The statutory authority which covers this information collection is contained in 47 U.S.C. 335 of the Communications Act of 1934, as amended.

Revised Information Collection Requirements:

The Commission is reinstating this collection into the Office of Management and Budget's (OMB's) inventory because after further evaluation the Commission has determined that this collection is still needed by the Commission because DBS providers make up the majority of their universe of respondents. Since this is the case, OMB approval is still need for this collection.

Nature and Extent of Confidentiality: Information requested in the reports may include confidential information. However, covered entities are allowed to request that such materials submitted to the Commission be withheld from public inspection.

Needs and Uses: The Commission will submit this information collection as an extension to the Office of Management and Budget (OMB) after this 60-day comment period to obtain the full three year clearance for the collection. There is no change in number of respondents/responses, total annual burden hours, or total annual cost from the previously approved estimates. As part of the extension request, the Commission will submit certain non-substantive changes for approval, as described below.

The collection is necessary to implement certain disclosure requirements that are part of the Commission's wireless hearing aid compatibility rule. In a Report and Order in WT Docket No. 01-309, FCC 03-168, adopted and released in September 2003, implementing a mandate under the Hearing Aid Compatibility Act of 1988, the Commission required digital wireless phone manufacturers and service providers to make certain digital wireless phones capable of effective use with hearing aids, label certain phones they sold with information about their compatibility with hearing aids, and report to the Commission (at first every six months, then on an annual basis) on the numbers and types of hearing aid-compatible phones they were producing or offering to the public. These reporting requirements were subsequently amended on several occasions, and the existing, OMB-approved collection under this OMB control number includes these modifications.

As part of this extension request, the Commission is requesting approval of certain non-substantive changes to the

form and instructions. Changes to the form include updating the edition form date for the electronic form to reflect the current date, and adding certain additional language drawn from the instructions to the question on device disclosures through Public Web sites. In the instructions, the Commission is updating the edition form date to reflect the current date, updating a Web site link that has become inactive, adding certain informational text to make the instructions easier to understand, and updating figures as necessary to reflect the non-substantive changes in the form.
