Abstract: The affected entities are subject to the General Provisions of the NESHAP (40 CFR part 63, subpart A), and any changes, or additions to the Provisions are specified at 40 CFR part 63, subpart LLLLL. Owners or operators of the affected facilities must submit initial notification, performance tests, and periodic reports and results. Owners or operators are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during

which the monitoring system is inoperative. Reports, at a minimum, are required semiannually.

Form Numbers: None.

Respondents/affected entities: Asphalt processing and asphalt roofing manufacturing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart LLLLL).

Estimated number of respondents: 27 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 13,400 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1,480,000 (per year), which includes \$135,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in labor hours and number of responses as currently identified in the OMB Inventory of Approved Burdens. This decrease is not due to any program changes. The estimates decreased because we do not expect additional sources to become subject to the standard during the next three years. However, the O&M cost increased because we have updated the ongoing maintenance cost to maintain PM control devices. The information was obtained from consultation with trade associations and internal EPA experts during the renewal of this ICR.

Acting Director, Collection Strategies Division.

Abstract: The NSPS covers the requirements at Subpart OOOO. The existing provisions of Subparts KKK/LLL will be included in this subpart along with the new proposed provisions for the following affected facilities: Gas wellheads, pneumatic controllers, centrifugal and reciprocating compressors, and storage vessels. The oil and natural gas sector includes operations involved in the extraction and production of oil and natural gas, as well as the processing, transmission, and distribution of natural gas. The potential respondents are owners or operators of oil and gas affected facilities found throughout these industry segments. We estimate 500 entities will be affected by this NSPS.

Form Numbers: None.

Respondents/affected entities: Oil and natural gas production and natural gas transmission and distribution facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart OOOO).

Estimated number of respondents: 596 (total).

Frequency of response: Initially, semiannually and annually.

Total estimated burden: 93,900 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$11,200,000 (per year), includes \$1,750,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is an increase in the total estimated respondent burden and total annual O&M as currently identified in the OMB Inventory of Approved Burdens. This burden increase is due to adjustments EPA has made to account for industry growth that has occurred since the ICR was last approved.

EPA has also revised the respondent burden associated with compressor notifications and storage vessel annual reports. The previous ICR assumed respondents would submit initial notifications for affected centrifugal and reciprocating compressors. These sources, however, are not subject to initial notification requirements, thus we have removed them from the burden calculations. For storage vessels, the previous ICR assumed respondents would complete an individual report for each affected storage vessel. The rule, however, allows respondents to submit a single report for all affected storage vessels at their site. EPA's experience has been that respondents typically consolidate reporting activities in order to reduce the overall reporting burden. For this reason, we have revised the
