Pesticide Registration Review; Draft Human Health and Ecological Risk Assessments for Sulfonylureas and Certain Other Pesticides; Notice of Availability and Request for Comment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This notice announces the availability of and opens a public comment period on EPA's draft human health and ecological risk assessments for the registration review of a group of pesticides known collectively as sulfonylureas (SUs) that are identified individually in this document in Table 1 of Unit III, as well as additional chemicals identified in Table 2 of Unit III. This notice also announces both the opening of the registration review docket and the availability of the registration review human health and ecological risk assessments for antimycin A and imazosulfuron. Registration review is EPA's periodic review of pesticide registrations to ensure that each pesticide continues to satisfy the statutory standard for registration that is the pesticide can perform its intended function without unreasonable adverse effects on human health or the environment. As part of the registration review process, the Agency has completed a comprehensive preliminary human health and ecological risk assessment for the pesticide uses of the identified pesticides. After reviewing comments received during the public comment period, EPA may issue a revised risk assessment, explain any changes to the draft risk assessment, and respond to comments and may request public input on risk mitigation before completing a proposed registration review decision for the identified pesticides. Through this program, EPA is ensuring that the registration of each pesticide is based on current scientific and other knowledge, including its effects on human health and the environment.

DATES: Comments must be received on or before November 24, 2015.

ADDRESSES: Submit your comments, identified by docket identification (ID)

number EPA-HQ-OPP-2015-0386, by one of the following methods:
