SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) proposes to update and reissue a current DHS system of records titled, "DHS/ALL-010 Asset Management Records System of Records."

This system allows DHS to collect and maintain records of all Department-owned or controlled property that has been issued to DHS employees and contractors. DHS is updating this System of Records (SORN) to provide notice that asset management activities for three DHS Components: Domestic and Nuclear Detection Office (DNDO), Transportation Security Administration (TSA), and the United States Coast Guard (USCG), are transferring their financial management systems to the Department of Interior's (DOI) Oracle Federal Financials (OFF) Virtual

Environment. OFF is an application owned by DOI that provides federal agencies with a web-based application that contains customizable financial management modules. When combined, the modules provide a comprehensive financial software package that supports budgeting, purchasing, federal procurement, accounts payable, fixed assets, general ledger, inventory, accounts receivable, reimbursement, reporting, and collection functions. Although DOI will host DHS information, DHS will retain control over its data. Individuals should request DHS records resident on the DOI system through DHS and DHS will review and if approve (as appropriate) all requests.

DHS is updating the category of records to replace Social Security number with Employee ID number and remove “outstanding debts related to said property.” After surveying asset managers throughout the Department, DHS confirmed that Social Security numbers are not used for tracking Departmental assets. Some Components, however, use an Employee ID number that is not the Social Security number. Outstanding debts related to DHS assets are more appropriately covered under the existing DHS/ALL-008 Accounts Receivable System of Records (73 FR 61885, October 17, 2008). DHS is also publishing an update the DHS/ALL-008 concurrent with this SORN. DHS is updating the system location to provide notice that DHS information will be maintained at DOI.

DHS is adding a new routine use I to permit DHS to share records with the Merit Systems Protection Board, arbitrators, the Federal Labor Relations Authority, Equal Employment Opportunity Commission and other parties responsible for the administration of the Federal Labor-Management Program, to align with other DHS SORNs. DHS is also updating and renumbering routine use J (formerly routine use I), which will allow DHS to share information with federal agencies that host shared financial services, such as DOI’s web-based financial management application. DHS is updating the record source categories to remove “employee locator documentation” because this is not a source of information for the categories of individuals and records in this system of records. Additionally, this notice includes non-substantive changes to simplify the formatting and text of the previously published notice.

Consistent with DHS’s information sharing mission, information stored in the DHS/ALL-010 Asset Management Records system of records may be shared with other DHS Components that

have a need to know the information to carry out their national security, law enforcement, immigration, intelligence, or other homeland security functions. In addition, DHS may share information with appropriate federal, state, local, tribal, territorial, foreign, and international government agencies, members of the public, and other entities consistent with the routine uses set forth in this system of records notice.

This updated system will be included in DHS’s inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information principles in a statutory framework governing the means by which Federal Government agencies collect, maintain, use, and disseminate individuals’ records. The Privacy Act applies to information that is maintained in a “system of records.” A “system of records” is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass United States citizens and legal permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals when systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DHS by complying with DHS Privacy Act regulations, 6 CFR part 5.

The Privacy Act requires that each agency publish in the **Federal Register** a description denoting the type and character of each system of records in order to make agency recordkeeping practices transparent, to notify individuals about the use of their records, and to assist the individual to more easily find files within the agency. Below is a description of the DHS/ALL-010 Asset Management Records System of Records.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) proposes to update and reissue a current DHS system of records titled, "DHS/ALL-019 Payroll, Personnel, and Time and Attendance Records System of Records."

This system helps DHS ensure proper payment of salary and benefits to DHS

personnel and track time worked and leave or other absences (both excused and unexcused) for reporting and compliance purposes. The categories of records have been modified to include more specific details about information collected from current and former employees of DHS. In some instances, DHS Components may use a timekeeping system that relies on a hash identification number calculated from a finger scan. The hash identification number cannot be used to recreate a readable fingerprint to confirm the employee's identity. DHS is also modifying routine uses (A), (G), and (I) to provide greater clarity and non-substantive grammatical changes. DHS is amending the previous routine use (J) to eliminate a redundancy with 5 U.S.C. 552a (b)(11). New routine uses (P) through (Z) provide notice and transparency about external disclosures as part of the DHS payroll, time, and attendance process.

Consistent with DHS's information sharing mission, information stored in the DHS/ALL-019 Payroll, Personnel, and Time and Attendance Records may be shared with other DHS Components that have a need to know the information to carry out their national security, law enforcement, immigration, intelligence, or other homeland security functions. In addition, DHS may share information with appropriate federal, state, local, tribal, territorial, foreign, and international government agencies, members of the public, and other entities consistent with the routine uses set forth in this system of records notice.

This updated system will be included in DHS's inventory of record systems.
