**SUPPLEMENTARY INFORMATION:** The subject permit is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (MMPA; 16 U.S.C. 1361 *et seq.*), the regulations governing the taking and importing of marine mammals (50 CFR part 216), the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

The applicant proposes to address a variety of questions regarding population size, habitat use, and behavior of baleen and odontocete species using passive acoustic monitoring, suction cup tagging, biopsy sampling, underwater photography/videography, and photo ID during vessel surveys in Hawaii and the Mariana Islands (Guam and the Commonwealth of the Northern Mariana Islands). The research would target humpback whales as well as 25 other species of whales and dolphins. Species may undergo all methodologies (except right whales, which will not be tagged). Incidental harassment for all species is also requested. Research would take place throughout the year. The permit is requested for 5 years.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of the application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of SEDAR 45 in-person workshop for Gulf of Mexico Vermilion Snapper.

**SUMMARY:** The SEDAR 45 assessment of the Gulf of Mexico Vermilion Snapper will consist of one in-person workshop and a series of webinars. See **SUPPLEMENTARY INFORMATION**.

**DATES:** The SEDAR 45 in-person workshop will be held from 1 p.m. on November 17, 2015 until 12 p.m. on November 19, 2015.

**ADDRESSES:** *Meeting address:* The SEDAR 45 Workshop will be held at the Courtyard Miami Coconut Grove, 2649 South Bayshore Drive, Miami, FL, 33133, 800-321-2211.

*SEDAR address:* 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

**FOR FURTHER INFORMATION CONTACT:** Julie A. Neer, SEDAR Coordinator; (843) 571-4366; email: [Julie.neer@safmc.net](mailto:Julie.neer@safmc.net).

**SUPPLEMENTARY INFORMATION:** The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data/Assessment Workshop, and (2) a series of webinars. The product of the Data/Assessment Workshop is a report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses, and describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion in the Assessment Process webinars are as follows:

1. An assessment data set and associated documentation will be developed during the workshop.

2. Participants will evaluate proposed data and select appropriate sources for providing information on life history characteristics, catch statistics, discard estimates, length and age composition, and fishery dependent and fishery independent measures of stock abundance.

3. Using datasets selected, participants will develop population models to evaluate stock status, estimate population benchmarks and management criteria, and project future conditions.

4. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.
