DEPARTMENT OF DEFENSE

Department of the Army, Corps of Engineers

One-Time Deauthorization of Water Resources Projects

AGENCY: Army Corps of Engineers, DoD.

ACTION: Notice of Interim Deauthorization List.

SUMMARY: The U.S. Army Corps of Engineers is publishing an Interim Deauthorization List of water resources development projects and separable elements that have been identified for deauthorization in accordance with section 6001(c) of the Water Resources Reform and Development Act of 2014, Public Law 113–121, 128 STAT. 1346–1347 (WRRDA 2014), and is soliciting comments from the public on the list for 90 calendar days. Comments should be provided to the contact named below by January 4, 2016.

SUPPLEMENTARY INFORMATION: Interim Deauthorization List required by § 6001(c).

Section 6001(c) provides that the Secretary shall develop an Interim Deauthorization List that identifies each water resources development project, or separable element of a project, that meets the following criteria. Projects and separable elements eligible for deauthorization are those uncompleted construction projects and separable elements meeting all of the following criteria: (1) They were authorized for construction before November 8, 2007, or their most recent modification of the construction authorization predates November 8, 2007; (2) their construction has not been initiated, or, if construction has been initiated, there have been no obligations of Federal or non-Federal funds for construction in the current fiscal year or any of the past 6 fiscal years; and (3) there has been no funding for a post-authorization study in the current fiscal year or any of the past 6 fiscal years. As specifically provided in section 6001(f)(1)(B) of WRRDA 2014, water resources development projects include environmental infrastructure assistance projects and programs of the U.S. Army Corps of Engineers. In accordance with section 103(f) of the Water Resources Development Act of 1986, separable elements is defined as “a portion of a project—

(1) which is physically separable from other portions of the project; and
(2) which—
(A) achieves hydrologic effects, or
(B) produces physical or economic benefits, which are separately identifiable from those produced by other portions of the project.”

The following elements of an authorized water resources development project also qualify as separable elements: An element for which there is an executed design agreement or project partnership agreement specific to that element; an element that has received funding specifically for that element; an element that was authorized separately from or as an amendment to the authorization for the remainder of the water resources development project, that was separately identified in the authorization for the water resources development project, or for which a statute specifies an authorized cost, estimated cost, or amount authorized to be appropriated; an element that has been placed in service or for which the Government or the non-federal partner has assumed operation and maintenance; an element that has been deauthorized; or the remaining portion of the water resources development project apart from other separable elements. Following a 90-day public review period of the Interim Deauthorization List, the Assistant Secretary of the Army for Civil Works (ASA(CW)) will publish a Final Deauthorization List in the Federal Register. Section 6001(d)(2)(A) of WRRDA 2014 requires that the Secretary shall include on the Final Deauthorization List projects and separable elements of projects that have, in the aggregate, an estimated Federal cost to complete that is at least $18 billion. The ASA(CW) has strived to meet the requirements of Section 6001, but was not able to identify projects that totaled $18 billion.

The projects and elements on the Final Deauthorization List will be deauthorized automatically after 180 days following the date that the ASA(CW) submits the Final Deauthorization List to Congress, unless
