

decision does not cover the EDSP component of this registration review case. The Agency's final registration review decision is dependent upon the evaluation of potential endocrine disruptor risk.

*Aquashade* (Combined Preliminary Work Plan, Draft Risk Assessments and Proposed Interim Decision). *Aquashade* is as an aquatic herbicide for which the mode of action is light filtration. It is primarily used in small water bodies such as ornamental ponds and small lakes, fountains and other landscaping water features, swimming holes, aquaculture ponds, and animal watering holes. The Agency conducted an ecological risk assessment and determined there are no risks of concern for any assessed taxa. The Agency also conducted a human health risk assessment and there were no dietary, residential, or occupational risks of concern. The Agency is not proposing any risk mitigation or additional data requirements for *Aquashade* at this time.

*Bacillus thuringiensis Plant-incorporated Protectants in Corn* (Combined Preliminary Work Plan and Proposed Interim Decision). Plant-incorporated protectants (PIPs) derived from *Bacillus thuringiensis* (Bt) have been genetically engineered into corn hybrids to provide insecticidal protection against certain pests. One class (case 6501) of Bt corn PIPs targets lepidopteran stalk-boring and ear-feeding insects (e.g., European corn borer, corn earworm, and southwestern corn borer); a second class (case 6502) targets coleopteran root-feeding insects (corn rootworm). EPA has conducted extensive risk assessments addressing human health (including food safety), non-target wildlife, environmental fate, gene flow, and insect resistance management for all registered products. No human health risks of concern or risks of concern to non-listed species (including honey bees and Monarch butterflies) have been identified. In addition, the Agency is proposing to make No Effects determinations under the ESA for all listed species. EPA will update these assessments for the final registration review. No risk mitigation measures for human health or ecological effects are included in the proposed interim decision.

The registration review docket for a pesticide includes earlier documents related to the registration review of the case. For example, the review typically opens with the availability of a Summary Document, containing a Preliminary Work Plan, for public comment. A Final Work Plan typically is placed in the docket following public

comment on the initial docket. Following a period for public comment on the proposed interim registration review decisions for products containing the affected active ingredients, the Agency will issue interim registration review decisions for products containing the affected active ingredients.

The registration review program is being conducted under congressionally mandated time frames, and EPA recognizes the need both to make timely decisions and to involve the public. Section 3(g) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) (7 U.S.C. 136a(g)) required EPA to establish by regulation procedures for reviewing pesticide registrations, originally with a goal of reviewing each pesticide's registration every 15 years to ensure that a pesticide continues to meet the FIFRA standard for registration. The Agency's final rule to implement this program was issued in the **Federal Register** of August 9, 2006 (71 FR 45720) (FRL-8080-4) and became effective in October 2006, and appears at 40 CFR part 155, subpart C. The Pesticide Registration Improvement Act of 2003 (PRIA) was amended and extended in September 2007. FIFRA, as amended by PRIA in 2007, requires EPA to complete registration review decisions by October 1, 2022, for all pesticides registered as of October 1, 2007.

The registration review final rule at 40 CFR 155.58(a) provides for a minimum 60-day public comment period on all proposed interim registration review decisions. This comment period is intended to provide an opportunity for public input and a mechanism for initiating any necessary amendments to the proposed interim decisions. All comments should be submitted using the methods in **ADDRESSES**, and must be received by EPA on or before the closing date. These comments will become part of the docket for the pesticides included in the table in Unit II. Comments received after the close of the comment period will be marked "late." EPA is not required to consider these late comments.

The Agency will carefully consider all comments received by the closing date and will provide a "Response to Comments Memorandum" in the docket for each of the pesticides included in the table in Unit II. The interim registration review decision will explain the effect that any comments had on the decision and provide the Agency's response to significant comments, as needed.
