

health care, quality of life, social and educational outcomes, and transition of care from childhood to adulthood. The information collected from this population-based survey will be used to inform current knowledge, allocate resources, develop services, and,

ultimately, improve long-term health of adults born with CHD.

We estimate identifying 7,500 individuals with CHD in the birth defects surveillance systems, obtaining current addresses and sending surveys to 5,625 individuals with CHD (75%), and receiving completed surveys from 4,500 individuals (80%). The survey

takes approximately 25 minutes to complete, which includes 5 minutes to read the informed consent and 20 minutes to answer survey questions. Therefore, we estimate the total burden hours are 1,875.

There are no costs to participants other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
Individuals with CHD .....	Informed consent .....	4,500	1	5/60	375
Individuals with CHD .....	Survey .....	4,500	1	20/60	1,500
Total .....	.....	.....	.....	.....	1,875

BILLING CODE 4163-18-P

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Centers for Disease Control and Prevention**

[60 Day-16-15BHH; Docket No. CDC-2016-0087]

**Proposed Data Collection Submitted for Public Comment and Recommendations**

**AGENCY:** Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

**ACTION:** Notice with comment period.

**SUMMARY:** The Centers for Disease Control and Prevention (CDC), as part of its continuing efforts to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. This notice invites comment on the Personal Protective Equipment Information (PPE-Info) Database which is a compendium of personal protective equipment (PPE) Federal regulations and consensus standards.

**DATES:** Written comments must be received on December 7, 2015.

**ADDRESSES:** You may submit comments, identified by Docket No. CDC-2016-0087 by any of the following methods:

*Federal eRulemaking Portal: Regulation.gov.* Follow the instructions for submitting comments.

*Mail:* Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS-D74, Atlanta, Georgia 30329.

*Instructions:* All submissions received must include the agency name and Docket Number. All relevant comments received will be posted without change to Regulations.gov, including any personal information provided. For access to the docket to read background documents or comments received, go to Regulations.gov.

**Please note:** All public comment should be submitted through the Federal eRulemaking portal (Regulations.gov) or by U.S. mail to the address listed above.

**FOR FURTHER INFORMATION CONTACT:** To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact the Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road, NE., MS-D74, Atlanta, Georgia 30329; phone: 404-639-7570; Email: omb@cdc.gov.

**SUPPLEMENTARY INFORMATION:** Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed

extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

**Proposed Project**

PPE-Info Database—New—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

**Background and Brief Description**

The mission of the National Institute for Occupational Safety and Health (NIOSH) is to promote safety and health at work for all people through research and prevention. Under Public Law 91–173 as amended by Public Law 95–164 (Federal Mine Safety and Health Act of 1977), NIOSH is proposing a three-year study to conduct research to advance the health and safety of workers.

National Personal Protective Technology Laboratory (NPPTL) developed the NIOSH PPE-Info Database in response to recommendations from the Institute of Medicine (IOM) in its report, *Certifying Personal Protective Technologies (PPT): Improving Worker Safety*. The report recommended that NPPTL “expand its efforts to become a national clearinghouse for information on all types of PPT.”

In its current application, the database provides standards developers, manufacturers, purchasers, and end users of PPE with a comprehensive tool which allows general or advanced criteria searches of relevant standards, target occupational groups, basic conformity assessment specifications, accredited lab information, and standard connections.

The CDC is currently updating its PPE selection guidance related to the Ebola response. This guidance, *Guidance on Personal Protective Equipment To Be Used by Healthcare Workers During Management of Patients with Ebola Virus Disease in U.S. Hospitals, Including Procedures for Putting On (Donning) and Removing (Doffing)* (hereafter referred to as the “CDC Ebola Response PPE Guidance”) will provide recommendations, in the form of

protection standards, for PPE selection and use for the Ebola response.

The NIOSH PPE-Info Database is being expanded as a tool to connect the protection standards that already exist in the database, with relevant PPE information as identified through the updated CDC Ebola Response PPE Guidance. This new aspect of the NIOSH PPE-Info Database allows end users (e.g., healthcare workers) to find products (e.g., gowns and coveralls) that are compliant (as verified by manufacturer) with the protection standards outlined by the CDC Ebola Response PPE Guidance. The initial information in the NIOSH PPE-Info Database will only offer guidance on gowns and coveralls, but is intended to expand to all PPE types associated with the official CDC Ebola Response PPE Guidance in the future. Since there is no single source of this information, NIOSH is requesting that Manufacturers provide it directly for input into the Ebola PPE selection guidance portion of the database.

NIOSH is requesting that a Memorandum of Understanding (MOU) be developed with Ebola response PPE manufacturers to facilitate cooperation and collaboration on the provision of product information. The primary focus of the collaboration will be the exchange of manufacturer product information to be aggregated and displayed in the NIOSH PPE-Info Database.

The nature and use of this information exchange includes the (1) provision of product information regarding compliance (as verified by manufacturers) with designated protection standards related to CDC guidance for personal protective equipment (PPE) used by healthcare workers during management of patients with confirmed or suspected Ebola Virus Disease (“Ebola”) and (2) the verification, by manufacturers, of product information displayed in the NIOSH PPE-Info Database.

Once the MOU is signed, the manufacturer will be sent a product information sheet. Using the product information sheet, NIOSH collects manufacturer-specific product information such as; product category (e.g., gown or coverall), standards that the product claim complies with, product model number, product name, link to product specification sheet from manufacturer, and designation of whether third-party testing was performed. Once this information is completed, the product information sheet is electronically signed and returned by email to NIOSH. The NIOSH project officer will then upload the information into a PPE-Info sub database, which acts as an interim point for review. The manufacturer is then sent a link to the sub database to review their products. The manufacturer has one week to make objections. If no objections are made, the information in the sub-database gets published to the live NIOSH PPE-Info database.

Quarterly, manufacturer products will be pulled from the database and sent through a pre generated product information sheet to the manufacturer POC. Manufacturers are required through the MOU to complete and return the PPE Information Sheet within two weeks of receipt along with the electronic verification form.

NIOSH will be soliciting information from manufacturers and manufacturer POCs. For products that comply with gown and coverall standards, we estimate that seven manufacturers will need to supply product information. The amount of time for manufacturers to complete the initial product information sheets and make quarterly updates will be no more than 3 hours for the initial product information and one hour for the quarterly updates. The total estimated burden hours are 42. There are no costs to respondents other than their time.

**ESTIMATED ANNUALIZED BURDEN HOURS**

Type of respondent	Form name	Number of respondents	Number responses per respondent	Average burden per response (in hours)	Total burden hours
Manufacturer .....	Initial Product Info Sheet .....	7	1	3	
Manufacturer POC .....	Quarterly product Info Sheet .....	7	3	1	21
Total .....	.....	.....	.....	.....	42

BILLING CODE 4163-18-P

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

[60Day-16-0234; Docket No. CDC-2015-  
0086]

#### Proposed Data Collection Submitted for Public Comment and Recommendations

**AGENCY:** Centers for Disease Control and  
Prevention (CDC), Department of Health  
and Human Services (HHS).

**ACTION:** Notice with comment period.

**SUMMARY:** The Centers for Disease  
Control and Prevention (CDC), as part of  
its continuing efforts to reduce public  
burden and maximize the utility of  
government information, invites the  
general public and other Federal  
agencies to take this opportunity to  
comment on proposed and/or  
continuing information collections, as  
required by the Paperwork Reduction  
Act of 1995. This notice invites  
comment on the proposed revision of  
the National Ambulatory Medical Care  
Survey (NAMCS). The purpose of  
NAMCS is to meet the needs and  
demands for statistical information  
about the provision of ambulatory  
medical care services in the United  
States.

**DATES:** Written comments must be  
received on or before December 7, 2015.

**ADDRESSES:** You may submit comments,  
identified by Docket No. CDC-2016-  
0026 by any of the following methods:

- *Federal eRulemaking Portal:*  
Regulation.gov. Follow the instructions  
for submitting comments.

- *Mail:* Leroy A. Richardson,  
Information Collection Review Office,  
Centers for Disease Control and  
Prevention, 1600 Clifton Road NE., MS-  
D74, Atlanta, Georgia 30329.

*Instructions:* All submissions received  
must include the agency name and  
Docket Number. All relevant comments  
received will be posted without change  
to *Regulations.gov*, including any  
personal information provided. For  
access to the docket to read background  
documents or comments received, go to  
*Regulations.gov*.

**FOR FURTHER INFORMATION CONTACT:** To  
request more information on the  
proposed project or to obtain a copy of  
the information collection plan and  
instruments, contact the Information  
Collection Review Office, Centers for  
Disease Control and Prevention, 1600  
Clifton Road, NE., MS-D74, Atlanta,  
Georgia 30329; phone: 404-639-7570;  
Email: [omb@cdc.gov](mailto:omb@cdc.gov).

**SUPPLEMENTARY INFORMATION:** Under the  
Paperwork Reduction Act of 1995 (PRA)  
(44 U.S.C. 3501-3520), Federal agencies  
must obtain approval from the Office of  
Management and Budget (OMB) for each  
collection of information they conduct  
or sponsor. In addition, the PRA also  
requires Federal agencies to provide a  
60-day notice in the **Federal Register**  
concerning each proposed collection of  
information, including each new  
proposed collection, each proposed  
extension of existing collection of  
information, and each reinstatement of  
previously approved information  
collection before submitting the  
collection to OMB for approval. To  
comply with this requirement, we are  
publishing this notice of a proposed  
data collection as described below.

Comments are invited on: (a) Whether  
the proposed collection of information  
is necessary for the proper performance  
of the functions of the agency, including  
whether the information shall have  
practical utility; (b) the accuracy of the  
agency's estimate of the burden of the  
proposed collection of information; (c)  
ways to enhance the quality, utility, and  
clarity of the information to be  
collected; (d) ways to minimize the  
burden of the collection of information  
on respondents, including through the  
use of automated collection techniques  
or other forms of information  
technology; and (e) estimates of capital  
or start-up costs and costs of operation,  
maintenance, and purchase of services  
to provide information. Burden means  
the total time, effort, or financial  
resources expended by persons to  
generate, maintain, retain, disclose or  
provide information to or for a Federal  
agency. This includes the time needed  
to review instructions; to develop,  
acquire, install and utilize technology  
and systems for the purpose of  
collecting, validating and verifying  
information, processing and  
maintaining information, and disclosing  
and providing information; to train  
personnel and to be able to respond to  
a collection of information, to search  
data sources, to complete and review  
the collection of information; and to  
transmit or otherwise disclose the  
information.

#### Proposed Project

The National Ambulatory Medical  
Care Survey (NAMCS), (OMB No. 0920-  
0234, expires 12/31/2017)—Revision —  
National Center for Health Statistics  
(NCHS), Centers for Disease Control and  
Prevention (CDC).

#### Background and Brief Description

Section 306 of the Public Health  
Service (PHS) Act (42 U.S.C. 242k), as  
amended, authorizes that the Secretary  
of Health and Human Services, acting  
through NCHS, shall collect statistics on  
the utilization of health care provided  
by non-federal office-based physicians  
in the United States. On December 19,  
2014, the OMB approved data collection  
for three years from 2015 to 2017. This  
revision is to request approval to  
continue NAMCS data collection  
activities for three years from 2016-  
2018 and to add questions to the  
physician interview that pertain to  
policies, services, and experiences  
related to the prevention and treatment  
of sexually transmitted infections (STIs)  
and HIV prevention among adolescents  
and others. Small modifications will  
also be made to questions on the use of  
electronic health records. This notice  
also covers a decrease in the sample size  
resulting from smaller budget  
allocations. Due to this decrease,  
selected state estimates will not be  
available for 2016-2018 data.

The National Ambulatory Medical  
Care Survey (NAMCS) has been  
conducted intermittently from 1973  
through 1985, and annually since 1989.  
The purpose of NAMCS, a voluntary  
survey, is to meet the needs and  
demands for statistical information  
about the provision of ambulatory  
medical care services in the United  
States. Ambulatory services are  
rendered in a wide variety of settings,  
including physicians' offices and  
hospital outpatient and emergency  
departments.

The NAMCS target universe consists  
of all office visits made by ambulatory  
patients to non-Federal office-based  
physicians (excluding those in the  
specialties of anesthesiology, radiology,  
and pathology) who are engaged in  
direct patient care. In 2006, physicians  
and mid-level providers (*i.e.*, nurse  
practitioners, physician assistants, and  
nurse midwives) practicing in  
community health centers (CHCs) were  
added to the NAMCS sample, and these  
data will continue to be collected.

To complement NAMCS data, NCHS  
initiated the National Hospital  
Ambulatory Medical Care Survey  
(NHAMCS, OMB No. 0920-0278,  
expires 02/28/18) in 1992 to provide
