DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 17

RIN 2900–AP37

Removing Net Worth Requirement From Health Care Enrollment

AGENCY: Department of Veterans Affairs.

ACTION: Proposed rule.

SUMMARY: This rulemaking proposes to remove the regulatory provision regarding consideration by the Department of Veterans Affairs (VA) of the net worth of a veteran's assets as a factor in determining the veteran's eligibility for lower-cost VA health care. Prior to January 1, 2015, VA considered both the net worth of a veteran's assets and the veteran's annual income when determining a veteran's eligibility. Because of that, certain veterans who would have been eligible for VA health care based on their annual income alone were ineligible for care because the net value of their assets was too high, or they were placed in a less favorable eligibility category. Reporting asset information imposed a significant paperwork burden on veterans, and VA dedicated significant administrative resources to verifying reported information. VA changed its policy to improve access to health care to lower-income veterans and remove the reporting burden from veterans by discontinuing collection of asset information. This rulemaking would amend the regulation to remove the reference to VA's discretionary statutory authority to consider net worth.

SUPPLEMENTARY INFORMATION: This rulemaking proposes to amend VA's regulations governing enrollment in the VA health care system by removing the regulatory provision restating VA's discretionary authority to consider the net worth of a veteran's assets when determining eligibility for lower-cost health care.

Pursuant to 38 U.S.C. 1705, VA has established a health care enrollment system with implementing regulations at 38 CFR 17.36. When veterans apply for health care benefits, VA assigns a priority category that reflects the basis for that veteran's eligibility, such as whether the veteran has been rated as having a service-connected disability or would be unable to defray the costs of necessary expenses because of low income. The veteran is placed in the highest priority category possible. These categories are described in § 17.36(b). Priority categories are used by VA to determine which veterans are eligible to enroll in the VA health care system, which VA does on an annual basis, in accordance with § 17.36(c). The priority category is also used to determine the amount of copayments veterans must pay to receive VA medical benefits. Veterans who are not eligible for enrollment in priority categories 1 through 4 but who are unable to defray the expenses of necessary care under 38 U.S.C. 1722(a) are placed in priority category 5. 38 CFR 17.36(b)(5). This rulemaking would affect a regulatory provision related to that category. Veterans are considered to be unable to defray the costs of necessary care if they have a low annual income, qualify for VA pension benefits, or meet other criteria under 38 U.S.C. 1722(a) and 38 CFR 17.47(d). VA has the authority to use net worth asset values to determine whether a veteran is unable to defray the cost of care at 38 U.S.C. 1722(d)(1), but this authority is not mandatory; *i.e.*, VA is not required to consider the value of the estate of a veteran for this purpose. 38 U.S.C. 1722(d)(1) (“Notwithstanding the attributable income of a veteran,” VA may determine that such veteran is not eligible “if the corpus of the estate of the veteran is such that under all the circumstances it is reasonable that some

part of the corpus of the estate of the veteran be consumed for the veteran's maintenance").

In 2013, VA informed the public of its intent to discontinue annual financial assessment reporting by veterans. 78 FR 64065 (Oct. 25, 2013), 78 FR 79564 (Dec. 30, 2013). VA notified the public that it would no longer request annual financial assessments from veterans enrolled in income-based priority categories, and would only request financial assessments for the initial health care enrollment process. Because we received no adverse responses to those notices and for the reasons that follow, as VA announced in March 2015, VA used its discretion under 38 U.S.C. 1722(d)(1) to cease consideration of the net worth of veterans' assets to determine whether they are able to defray the expenses of necessary care and qualify for inclusion in priority category 5, effective January 1, 2015. To avoid potential confusion, this rulemaking would remove the regulatory provision referencing VA's discretionary authority to consider net worth for purposes of priority category 5.

By eliminating consideration of the net worth of a veteran's assets for purposes of health care enrollment, more veterans would qualify for VA health care in a higher priority category, improving access and affordability of health care for many lower-income veterans. VA estimates that in the first year of implementation of this policy, 53,000 veterans would be moved to category 5 from a lower priority category and would be able to make lower copayments for VA care. Over five years, VA expects that 135,000 veterans who previously were ineligible would be able to enroll in the VA health care system because of this change. This change also reduces administrative burdens for veterans and VA. The burden on veterans to supply asset information to VA on an annual basis was considerable. In contrast, the burden is much lower for veterans to provide only an initial report of annual income during the enrollment process and future verification only in those cases where VA identifies a change to the veteran's income that would result in a change to the veteran's priority group status. In past years, VA had expended significant resources on verifying the reported figures because asset values are subjective and difficult to verify. Through established practices with the Internal Revenue Service and Social Security Administration, VA can verify veterans' reported annual income far more efficiently than reported assets. Therefore, this policy has eliminated the

significant burden on veterans to report the worth of their assets, and also eliminated the need for VA to use resources to verify that information.

In light of the preceding discussion, we propose to remove § 17.47(d)(5) in its entirety and renumber current § 17.47(d)(6) as § 17.47(d)(5). Current paragraph (d)(5) restates VA's discretionary statutory authority to use the value of a veteran's estate to determine whether he is able to defray the costs of care. By removing the regulatory restatement of VA's discretionary statutory authority to consider a veteran's net worth, VA removes language in the regulation that could be perceived as inconsistent with the policy change, which is favorable to veterans.

Effect of Rulemaking

The Code of Federal Regulations, as proposed to be revised by this proposed rulemaking, represents the exclusive legal authority on this subject. No contrary rules or procedures would be authorized. All existing or subsequent VA guidance would be read to conform with this rulemaking if possible or, if not possible, such guidance would be superseded by this rulemaking.

Paperwork Reduction Act

This proposed rule contains no provisions constituting a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521).

Regulatory Flexibility Act

The Secretary hereby certifies that this proposed rule would not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. This proposed rule would directly affect only individuals and would not directly affect small entities. Therefore, pursuant to 5 U.S.C. 605(b), this rulemaking is exempt from the initial and final regulatory flexibility analysis requirements of 5 U.S.C. 603 and 604.

Executive Orders 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, and other advantages; distributive impacts; and equity). Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of

quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 12866 (Regulatory Planning and Review) defines a "significant regulatory action," requiring review by the Office of Management and Budget (OMB), unless OMB waives such review, as "any regulatory action that is likely to result in a rule that may: (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order."

The economic, interagency, budgetary, legal, and policy implications of this regulatory action have been examined, and it has been determined not to be a significant regulatory action under Executive Order 12866. VA's impact analysis can be found as a supporting document at <http://www.regulations.gov>, usually within 48 hours after the rulemaking document is published. Additionally, a copy of the rulemaking and its impact analysis are available on VA's Web site at <http://www.va.gov/orpm/>, by following the link for "VA Regulations Published From FY 2004 Through Fiscal Year to Date."

Unfunded Mandates

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year. This proposed rule would have no such effect on State, local, and tribal governments, or on the private sector.

I. Introduction

On October 7, 2015, the Postal Service filed a petition pursuant to 39 CFR 3050.11 requesting that the Commission initiate an informal rulemaking proceeding to consider a proposed change in analytical principles relating to periodic reports.¹ A description of Proposal Eleven is attached to the Petition. *Id.* at 1. The Petition seeks a change in the statistical point and variance estimation methodology for the Origin-Destination Information System—revenue, pieces, and weight (ODIS–RPW) system² estimates used in the “Revenue, Pieces and Weight By

¹Petition of the United States Postal Service Requesting Initiation of a Proceeding to Consider a Proposed Change in Analytical Principles (Proposal Eleven), October 7, 2015 (Petition).

²“The ODIS–RPW system is a probability-based destinating mail sampling system used to support the Postal Service's many and varied business needs for mail revenue and volume information. ODIS–RPW primarily supplies official RPW estimates of revenue, volume and weight for single-piece stamped and metered indicia mail.” Petition at 4.

Class and Special Services (RPW) report relating to letter and card mailpieces that will be sampled digitally.” Petition at 3.

II. Summary of Proposal

Under Proposal Eleven, beginning Q2 FY2016 (January 1, 2016), the Postal Service seeks to replace the direct expansion estimator for the population of digitally sampled First-Class letter and card mail,³ within ODIS–RPW, with a ratio estimator that utilizes national End-of-Run machine counts. Petition at 1–2. “The digital letter mail estimates utilizing the ratio estimator applied to the digital letter mail sampling frame would be combined with direct expansion estimates from the non-digital sampling frame.” *Id.* at 2. The Postal Service contends the proposed ratio estimator for the letter mail digital sampling frame mathematically outperforms the direct expansion estimator for First-Class Mail single-piece volume and revenue. *Id.*

The Postal Service plans to implement the change described in Proposal Eleven on January 1, 2016. *Id.* at 3. The Postal Service asserts that the proposed estimation methodology of the ratio estimator is an improvement over the direct expansion estimator and will improve the product estimates used for RPW by reducing bias and significantly lowering the calculated coefficient of variation for the same sample size. *Id.* The Postal Service states that “[t]he only significant category affected is First-Class Mail single piece letters and cards.” *Id.* at 4.

III. Initial Commission Action

The Commission establishes Docket No. RM2016–1 for consideration of matters raised by the Petition. Additional information concerning the Petition may be accessed via the Commission's Web site at <http://www.prc.gov>. Interested persons may submit comments on the Petition and Proposal Eleven no later than November 24, 2015. Reply comments are due no later than December 7, 2015. Pursuant to 39 U.S.C. 505, Lyudmila Y. Bzhilyanskaya is designated as an officer of the Commission to represent the interests of the general public (Public Representative) in this proceeding.

IV. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. RM2016–1 for consideration of the

³Docket No. RM2015–11, Order on Analytical Principles Used in Periodic Reporting (Proposal Three) September 30, 2015 (Order No. 2739).
