

water.eventbrite.com. Teleconferencing will be available for individuals participating via the webinar. The number of seats and webinar connections available for the meeting is limited and will be offered on a first-come, first-served basis. Early registration is strongly encouraged to ensure proper accommodations. EPA will do its best to include all those interested in either meeting in-person or online via webinar.

At the public meeting, EPA will present an overview of the draft document and will solicit public comments about the scientific aspects of available *Legionella* control technologies. The agenda for the public meeting will include time for public comment. To ensure adequate time for public comment, individuals or organizations interested in making a statement should mention their intent when they register.

Meeting Materials: Meeting materials will be sent by email to the registered attendees prior to the public meeting; copies will also be provided for attendees at the meeting and available in the Water Docket, identified by Docket ID No. EPA-HQ-OW-2015-0595.

Special Accommodations: Individuals with disabilities who wish to attend the meeting in person can request special accommodations by contacting Jini Mohanty at mohanty.jini@epa.gov. Please allow at least five business days prior to the meeting to give EPA time to process your request.

II. Background

Legionella is a bacterium commonly found in aquatic environments. It grows best in warm water environments and can be found in premise plumbing in large buildings, hot tubs, hot water tanks, decorative fountains, large plumbing systems (such as might be found in hospitals) and cooling towers. People who breathe in a mist or vapor that has been contaminated with *Legionella* can contract Legionnaire's disease or Pontiac fever (both referred to as legionellosis). Legionellosis is a major health concern associated with drinking water. Cases of legionellosis and fatalities have been associated with the occurrence of *Legionella* in building water systems. In response to the threat to public health, some building owners have installed supplemental treatment systems to prevent and control for *Legionella*. Some states have requested technical assistance from EPA with regards to evaluating effectiveness of control technologies. The agency expects the final document will help to further improve public health by

helping states, building owners and operators make science-based, risk management decisions regarding treatment and control of *Legionella* in buildings.

III. How will the Agency finalize the document?

Through this notice, EPA is announcing an opportunity for the public to provide input on the draft document in writing and/or verbally at the public meeting and webinar. EPA will conduct an independent, expert peer review following the public review and comment period.

Comments from the public and external peer reviewers will be considered as EPA finalizes the document.

IV. What input is the Agency seeking from the public?

The Agency is particularly interested in input from the public related to the following questions:

1. How well does the document accurately characterize the available, peer reviewed literature on the effectiveness of different technologies for control of *Legionella*?
2. What is your perspective on whether the characterization of each technology is balanced and supported by the available, peer reviewed scientific information?
3. What suggestions do you have to improve the document so that it can better support informed public health protection decisions and avoid or minimize unintended consequences?

Dated: October 13, 2015.

Kenneth J. Kopocis,

Deputy Assistant Administrator, Office of Water.

Clean Air Act Advisory Committee (CAAAC): Notice of Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of meeting.

SUMMARY: The Environmental Protection Agency (EPA) announces an upcoming public meeting of the Clean Air Act Advisory Committee (CAAAC). The EPA established the CAAAC on November 19, 1990, to provide independent advice and counsel to EPA on policy issues associated with implementation of the Clean Air Act of

1990. The Committee advises on economic, environmental, technical, scientific and enforcement policy issues.

DATES: The meeting will be held on November 18, 2015, tentatively from 8:30 a.m. to 4:30 p.m.

ADDRESSES: The CAAAC will hold its face-to-face meeting at the Hyatt Regency Crystal City hotel, 2799 Jefferson Davis Highway, Arlington, VA 22202.

Inspection of Committee Documents: The committee agenda, confirmed times for the meetings, and any documents prepared for these meetings will be publicly available on the CAAAC Web site at <http://www.epa.gov/oar/caaac/> prior to the meeting. Thereafter, these documents, together with CAAAC meeting minutes, will also be available on the CAAAC Web site or by contacting the Office of Air and Radiation Docket and requesting information under docket EPA-HQ-OAR-2004-0075. The docket office can be reached by email at: a-and-r-Docket@epa.gov or FAX: 202-566-9744.

FOR FURTHER INFORMATION CONTACT: For more information about the CAAAC, please contact Jim Ketcham-Colwill, Interim Designated Federal Officer (DFO), Office of Air and Radiation, U.S. EPA by email at ketcham-colwill.jim@epa.gov or by telephone at (202) 564-1676. Additional information about this meeting, the CAAAC, and its subcommittees and workgroups can be found on the CAAAC Web site: <http://www.epa.gov/oar/caaac/>.

For information on access or services for individuals with disabilities, please contact Lorraine Reddick at (202) 564-1293 or rednick.lorraine@epa.gov, preferably at least 10 days prior to the meeting to give EPA as much time as possible to process your request.

Dated: October 9, 2015.

Jim Ketcham-Colwill,

Interim Designated Federal Officer, Clean Air Act Advisory Committee, Office of Air and Radiation.
