

(civilian air traffic control) interrogation systems to identify aircraft, vehicles or forces as friendly. Mode 5 provides a cryptographically secured version of Mode S and ADS-8 GPS position. Data can be classified up to SECRET.

s. Global Command and Control System-Joint (GCCS-J) is a command, control, communications, computers, and intelligence system consisting of hardware, software (commercial-off-the-shelf and government off-the-shelf), procedures, standards, and interfaces that provide an integrated near real-time picture of the battlespace necessary to conduct joint and multinational operations. Data can be classified up to SECRET.

t. GPS/PPS/SAASM -Global Positioning System (GPS) provides a space-based Global Navigation Satellite System (GNSS) that has reliable location and time information in all weather and at all times and anywhere on or near the Earth when and where there is an unobstructed line of sight to four or more GPS satellites. Selective Availability/Anti-Spoofing Module (SAASM) (AN/PSN-11) is used by military GPS receivers to allow decryption of precision GPS coordinates. The GPS hardware is UNCLASSIFIED. When electrical power is applied, the system is classified up to SECRET.

u. Automated Digital Network System furnishes autonomous, digital, interoperable, joint and secure LAN/WAN management and control for RF assets on demand aboard ships and at shore sites. It also ensures worldwide communications connectivity, automates all communications systems, and replaces several unique subnetworks with a single integrated network hub.

v. Link 16 equipment is a military tactical data exchange network used by the United States and North Atlantic Treaty Organization (NATO) member nations allowed by the MIDS International Program Office. Its specification is part of the family of tactical data links. With Link 16 equipment, military aircraft as well as ships and ground forces may exchange their tactical picture in near-real time. Link 16 equipment also supports the exchange of text messages, imagery data and provides two channels of digital voice.

2. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the

development of a system with similar or advanced capabilities.

3. A determination has been made that the recipient country can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

4. All defense articles and services listed in this transmittal have been authorized for release and export to Saudi Arabia.
