SUPPLEMENTARY INFORMATION:

I. Background

The Department of the Interior (DOI) Interior Business Center (IBC) maintains the “Oracle Federal Financials (OFF), DOI–91” system of records. The IBC is a service provider that performs services

for other Federal government agencies, both inside and outside the DOI. The IBC’s service offerings include providing and maintaining various types of business management systems for its clients, including human resources and financial management applications. The Oracle Federal Financial (OFF) system includes the OFF and OFF–VE applications, which are components of the Oracle eBusiness Suite. The OFF system provides IBC clients with a web-based application that contains customizable financial management modules that combine to provide a comprehensive financial software package to support budgeting, purchasing, Federal procurement, accounts payable, fixed assets, general ledger, inventory, accounts receivable, reimbursement, reporting, and collection functions.

The IBC hosts the OFF system and is responsible for system administration functions. Each client agency retains control over its data in the system and has one or more designated managers who are responsible for maintaining client agency data in the OFF system. While DOI records generated and maintained in OFF are covered under this system of records notice, each client agency that maintains records within the system has published system notices that cover these financial management activities. Therefore, individuals seeking access to or amendment of their records under the control of a client agency should follow the access procedures outlined in the applicable client agency system of records notice or send a written inquiry to that agency Chief Privacy Officer.

Additionally, the records maintained within the OFF system may also be covered by existing government-wide system of records notices, including GSA/GOVT–3, Travel Charge Card Program; GSA/GOVT–4, Contracted Travel Services Program; and GSA/GOVT–6, GSA SmartPay Purchase Charge Card Program, and may be subject to handling and disclosure requirements under published routine uses pursuant to the government-wide notices as applicable. Client agencies are responsible for ensuring the handling, use, and sharing of their records in OFF is in compliance with the Privacy Act of 1974, including the provisions regarding notice, access, collection, use, retention, and disclosure of records from this system. The Oracle Federal Financials (OFF), DOI–91 system of records notice was last published in the **Federal Register** on September 10, 2013, 78 FR 55284.

The amendments to the system will be effective as proposed at the end of

the comment period (the comment period will end 30 days after publication of this notice in the **Federal Register**), unless comments are received which would require a contrary determination. DOI will publish a revised notice if changes are made based upon a review of the comments received.

II. Privacy Act

The Privacy Act of 1974, as amended, embodies fair information practice principles in a statutory framework governing the means by which Federal agencies collect, maintain, use, and disseminate individuals' personal information. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency for which information about an individual is retrieved by the name or by some identifying number, symbol, or other identifying particular assigned to the individual. The Privacy Act defines an individual as a United States citizen or lawful permanent resident. As a matter of policy, DOI extends Privacy Act protections to all individuals. Individuals may request access to their own records that are maintained in a system of records in the possession or under the control of DOI by complying with DOI Privacy Act Regulations located at 43 CFR part 2, subpart K.

The Privacy Act requires each agency to publish in the **Federal Register** a description denoting the type and character of each system of records that the agency maintains and the routine uses of the information in each system in order to make agency record keeping practices transparent, notify individuals regarding the uses of their records, and assist individuals to more easily find these records within the agency. Below is the description of the "Oracle Federal Financials (OFF), DOI-91" system of records.

In accordance with 5 U.S.C. 552a(r), DOI has provided a report concerning this system of records to the Office of Management and Budget and to Congress.

III. Public Disclosure

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we

cannot guarantee that we will be able to do so.

Departmental Privacy Officer.

Background

Under the National Environmental Policy Act (42 U.S.C. 4321 *et seq.*, NEPA), Federal agencies are required to consider the potential environmental impact of agency actions. Agencies are generally required to prepare an Environmental Assessment (EA) or an Environmental Impact Statement (EIS) or both. However, when a Federal agency identifies categories of actions that under normal circumstances do not have a significant environmental impact, either individually or cumulatively, Council on Environmental Quality (CEQ)
