II. Introduction

The NRC is considering a request to amend Renewed Facility Operating License Nos. DPR–63, NPR–69, and Docket No. 72–1036, issued to Exelon for operation of NMP located in Oswego County, New York, in accordance with 10 CFR 50.90. Therefore, as required by 10 CFR 51.21 and 10 CFR 51.33, the NRC has prepared a Draft Environmental Assessment and Finding of No Significant Impact documenting its finding. The requested amendment would permit licensee security personnel to use certain firearms and ammunition feeding devices not previously permitted, notwithstanding State, local, and certain Federal firearms laws or regulations that otherwise prohibit such actions.

III. Draft Environmental Assessment and Finding of No Significant Impact

Identification of the Proposed Action

The proposed action would permit security personnel at NMP, in the performance of official duties, to transfer, receive, possess, transport, import, and use certain firearms and large capacity ammunition feeding devices not previously permitted to be owned or possessed, notwithstanding State, local, and certain Federal firearms laws, or regulations, that otherwise prohibit such actions.

The proposed action is in accordance with Exelon’s application dated August 14, 2013, as supplemented by letters dated September 10, 2013, May 14, 2014, and January 16, 2015.

The Need for the Proposed Action

The proposed action would allow the transfer, receipt, possession, transportation, importation and use of those firearms and devices needed in the performance of official duties

required for the protection of NMP and associated special nuclear materials, consistent with the NMP NRC-approved security plan.

Environmental Impacts of the Proposed Action

The NRC has completed its evaluation of the proposed action and concludes that the proposed action only allow the use of those firearms and devices necessary to protect NMP and associated special nuclear material, consistent with the NMP NRC-approved security plan. Therefore, the proposed action would not significantly increase the probability or consequences of accidents. In addition, the proposed action would not change the types and the amounts of any effluents that may be released offsite. There would also be no significant increase in occupational or public radiation exposure. Therefore, there would be no significant radiological environmental impacts associated with the proposed action.

The proposed action would not impact land, air, or water resources, including biota. In addition, the proposed action would not result in any socioeconomic or environmental justice impacts or impacts to historic and cultural resources. Therefore, there would also be no significant non-radiological environmental impacts associated with the proposed action.

Accordingly, the NRC concludes that the issuance of the requested amendment would not result in significant environmental impacts.

The NRC will publish in the **Federal Register** a copy of the final environmental assessment as part of the final finding of no significant impact.

Environmental Impacts of the Alternatives to the Proposed Action

As an alternative to the proposed action, the staff considered denying the proposed action (*i.e.*, the “no-action” alternative). Denial of the license amendment request would result in no change in current environmental conditions at NMP.

Alternative Use of Resources

The proposed action would not involve the use of any resources.

Agencies and Persons Consulted

The staff did not consult with any other Federal Agency or State of New York agencies regarding the environmental impact of the proposed action.

IV. Finding of No Significant Impact

The licensee has requested a license amendment to permit licensee security

personnel, in the performance of official duties, to transfer, receive, possess, transport, import, and use certain firearms and large capacity ammunition feeding devices not previously permitted to be owned or possessed, notwithstanding State, local, and certain Federal firearms laws, or regulations that would otherwise prohibit such actions.

On the basis of the information presented in this environmental assessment, the NRC concludes that the proposed action would not cause any significant environmental impact and would not have a significant effect on the quality of the human environment. In addition, the NRC has determined that an environmental impact statement is not necessary for the evaluation of this proposed action.

Other than the licensee’s letter dated August 14, 2013, there are no other environmental documents associated with this review. This document is available for public inspection as indicated above.

Dated at Rockville, Maryland, this 22nd day of October 2015.

For the Nuclear Regulatory Commission,
Benjamin G. Beasley,

Chief, Plant Licensing Branch 1–1, Division of Operating Reactor Licensing, Office of Nuclear Reactor Regulation.
