SUPPLEMENTARY INFORMATION:

Title: Consumer Tipping Survey Study.

OMB Number: 1545-2261.

Form Number: Survey.

Abstract: The IRS is charged with collecting revenue legally owed to the federal government. One important category of income comes in the form of tips. Previous empirical research has shown income from tips to be significantly underreported, limiting the IRS's ability to collect the proper amount of tax revenue. The IRS believes a new study of consumer tipping practices is needed in order to better understand current tip reporting behavior so tax administrators and policy makers can make the tax system fairer and more efficient. Therefore, the IRS wishes to develop updated estimates of consumer tipping revenue across numerous services where tipping is prevalent.

In support of this mission, IRS is seeking a standard clearance to conduct a minimum, one-year fielding of a nation-wide consumer tipping survey. The sample that would be used for this study, Ipsos' non-probability online

panel, was only selected after a pilot study was conducted which compared the results from this vendor to another panel source (GfK KnowledgePanel, a probability-based online panel) and an independent source of tipping data in order to determine which method yielded the most accurate results while reducing respondent burden and cost to the IRS. The findings from the pilot study demonstrated that there were no consistent differences in the results gathered from the panels when compared against each other or when compared against the 3rd party source of data. As such, the decision was made to use the non-probability panel due to the reduced cost per completed survey, which will allow for a larger data collection and more precise estimates of tipping behavior for certain, low-incidence services.

This initiative flows from Goal 1 of the IRS Strategic Plan for FY 2014-2017: Deliver high quality and timely service to reduce taxpayer burden and encourage voluntary compliance.

Current Actions: The main goal for this survey effort is to generate statistically valid estimates of tipped income in a variety of services for which no such estimates exist, in addition to providing information on other correlates of tipped income and behavior including, but not limited to, regional or seasonal fluctuations in tipped income. As such, this survey effort requests a full-fielding of the previously tested pilot survey for the course of calendar year 2016. This will result in an estimated burden increase of 6,427 hours. This form is being submitted to update the current OMB approval.

Type of Review: Revision of a currently approved collection.

Affected Public: Individuals or Households.

The burden hour estimates breakdown as follows:

NON-PROBABILITY SAMPLE

Category of respondent/activity	Number of respondents	Participation time (minutes)	Burden hours
Read Invitation Email	461,540	0.5	3,846
Read Reminder Email*	431,540	0.25	1,798
Complete Survey	60,000	**5.5	5,500
Total Burden Hours			11,144

* The estimate for the Reminder emails is based on the assumption that 50% of the needed respondents will complete the survey online in time to not receive the Reminder email.

** Participant time is based on mean completion time for non-probability panel members during pilot survey fielding.
