SUPPLEMENTARY INFORMATION: On July 20, 2015, NWMI filed with the NRC, pursuant to Section 103 of the Atomic Energy Act of 1954, as amended, and part 50 of title 10 of the *Code of Federal Regulations* (10 CFR), the second and final part of a two-part application for a construction permit for a medical radioisotope production facility in Columbia, Missouri (ADAMS Accession No. ML15086A262). The applicant is requesting a combined license in

accordance with 10 CFR 50.31 and 10 CFR 50.32.

An exemption from certain requirements of 10 CFR 2.101(a)(5) granted by the Commission on October 7, 2013 (ADAMS Accession No. ML13238A333 and 78 FR 63501), in response to a letter from NWMI dated August 9, 2013 (ADAMS Accession No. ML13227A295), allowed for NWMI to submit its construction permit application in two parts. Specifically, the exemption allowed NWMI to submit a portion of its construction permit application for a construction permit up to six months prior to submitting the remainder of the application regardless of whether or not an environmental impact statement or a supplement to an environmental impact statement is prepared during the review of its application. By letter dated November 7, 2014, NWMI submitted part one of its construction permit application to the NRC. By letter dated February 5, 2015 (ADAMS Accession No. ML15086A262, Package No. ML15086A261), NWMI withdrew and resubmitted part one of its construction permit application and included a discussion of connected actions in its environmental report in response to a January 23, 2015, letter from the NRC (ADAMS Accession No. ML14349A501). A notice of receipt and availability of part one of the construction permit application was previously published in the **Federal Register** on April 21, 2015 (80 FR 22227). The first part of NWMI's construction permit application contained the following information:

- The description and safety assessment of the site required by 10 CFR 50.34(a)(1),
- the environmental report required by 10 CFR 50.30(f),
- the filing fee information required by 10 CFR 50.30(e) and 10 CFR 170.21,
- the general information required by 10 CFR 50.33, and
- the agreement limiting access to classified information required by 10 CFR 50.37.

The NRC staff published in the **Federal Register** on June 8, 2015 (80 FR 32418), its determination that part one of NWMI's construction permit application is acceptable for docketing.

The NWMI states that part two of its application for a construction permit contains the remainder of the preliminary safety analysis report required by 10 CFR 50.34(a).

Subsequent **Federal Register** notices will address the acceptability of this part of the tendered construction permit application for docketing and provisions for public participation in the

construction permit application review process.

Dated at Rockville, Maryland, this day 28 of October, 2015.

B. Submitting Comments

Please include Docket ID NRC-2014-0109 in your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at <http://www.regulations.gov> as well as entering the comment submissions into ADAMS. The NRC does not routinely edit

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

II. Discussion

The NRC is issuing for public comment the draft plant-specific Supplement 56 to the GEIS for license renewal of nuclear plants, NUREG-1437, regarding the renewal of operating license, NPF-43 for an additional 20 years of operation for Fermi 2. Supplement 56 to the GEIS includes the preliminary analysis that evaluates the environmental impacts of the proposed action and alternatives to the proposed action. The NRC’s preliminary recommendation is that the adverse environmental impacts of license renewal for Fermi 2 are not great enough to deny the option of license renewal for energy-planning decisionmakers.

III. Public Meetings

The NRC staff will hold a public meeting prior to the close of the public comment period to present an overview of the draft plant-specific supplement to the GEIS and to accept public comment on the document. The meeting will be held at the Monroe County Community College, La-Z-Boy-Center 1555 S. Raisinville Road, Monroe, Michigan on Wednesday, December 2, 2015. There will be a registration period from 6:30 p.m. until 7:00 p.m. The meeting will start at 7:00 p.m. and continue until 9:00 p.m., as necessary. The meeting will be transcribed and will include: (1) A presentation of the contents of the draft plant-specific supplement to the GEIS; and (2) the opportunity for interested government agencies, organizations, and individuals to provide comments on the draft report. To be considered in the final supplement to the GEIS, comments must be provided either at the transcribed public meeting or submitted in writing by the comment deadline identified in the **DATES** section of this notice. Persons may pre-register to attend or present oral comments at the meeting by contacting Ms. Elaine Keegan, the NRC project manager, at 1-800-368-5642, extension 8517, or by

email at *Elaine.Keegan@nrc.gov* no later than Tuesday, November 24, 2015.

Members of the public may also register to provide oral comments during the registration period prior to the meeting. Individual oral comments may be limited by the time available, depending on the number of persons who register. If special equipment or accommodations are needed to attend or present information at the public meeting, the need should be brought to Ms. Keegan’s attention no later than Tuesday, November 24, 2015, in order to provide the NRC staff with adequate notice to determine whether the request can be accommodated. Additional details regarding the meeting will be posted at least 10 days prior to the public meeting on the NRC’s Public Meeting Schedule Web site at <http://www.nrc.gov/public-involve/public-meetings/index.cfm>.
