

Under the alternatives, the BIA would apply varying levels of resource conservation measures to oil and gas activities in Osage County, ranging from (1) the existing situation, to (2) an expanded list of measures to provide certainty to lessees and to streamline the permitting process, to (3) a further expanded list of measures to add protection for specific areas where sensitive resources are located. The BIA is considering applying resource conservation measures to three types of activities under oil and gas leases: (1) Non-permitted lease activities, (2) activities within the scope of the 2015 Workover Programmatic Environmental Assessment, and (3) Applications for Permit to Drill and other permitted activities.
