and (i) of AD 2013–09–01, Amendment 39–17442 (78 FR 27001, May 9, 2013), for the replaced skin panel only.

(r) Exceptions to Service Information Specifications

(1) Where Boeing Service Bulletin 737–53A1177, Revision 7, dated June 14, 2013, specifies a compliance time “after the Revision 7 date of this service bulletin,” this AD requires compliance within the specified compliance time after the effective date of this AD.

(2) Where Boeing Service Bulletin 737–53A1177, Revision 6, dated May 31, 2001, and Boeing Service Bulletin 737–53A1177, Revision 7, dated June 14, 2013, specify to continue doing for certain procedures: Do the specified actions before further flight using a method approved in accordance with the procedures specified in paragraph (t) of this AD.

(3) Where Boeing Service Bulletin 737–53A1177, Revision 6, dated May 31, 2001, and Boeing Service Bulletin 737–53A1177, Revision 7, dated June 14, 2013, include the phrase “or is Boeing or FAA approved,” this AD requires the “Boeing Approval” to be requested in accordance with the procedures specified in paragraph (t) of this AD.

(s) Credit for Previous Actions

(1) This paragraph provides credit for the actions required by paragraph (g) of this AD, if those actions were performed before the effective date of this AD using the applicable service information specified in paragraphs (a)(1)(i), (a)(1)(ii), (a)(1)(iii), and (a)(1)(iii) of this AD, which were incorporated by reference in AD 2002–07–08, Amendment 39–12702 (67 FR 17917, April 12, 2002).

(ii) Boeing Service Bulletin 737–53A1177, Revision 5, dated February 15, 2001, which continues to be incorporated by reference in this AD.

(iii) Boeing Service Bulletin 737–53A1177, Revision 6, dated May 31, 2001, which continues to be incorporated by reference in this AD.

(2) This paragraph provides credit for the actions required by paragraphs (t) through (o) of this AD, if those actions were performed before the effective date of this AD using Boeing Service Bulletin 737–53A1177, Revision 6, dated May 31, 2001, which was incorporated by reference in AD 2002–07–08, Amendment 39–12702 (67 FR 17917, April 12, 2002) and continues to be incorporated by reference in this AD.

(t) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Los Angeles Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (u)(1) of this AD. Information may be emailed to: 9-ANM-LAACO-AMOC-Requests@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Los Angeles ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) AMOCs approved for AD 2002–07–08, Amendment 39–12702 (67 FR 17917, April 12, 2002), are approved as AMOCs for the corresponding provisions of this AD.

(u) Related Information

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (v)(3) and (v)(4) of this AD.

(v) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph only (under the U.S.C. 552(a) and 1 CFR part 51).

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(ii) Reserved.

(3) The following service information was approved for IBR on May 17, 2002 (67 FR 17917, April 12, 2002).

(4) For Boeing service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5006; extension 1; fax 206–766–5680; Internet https://www.myboeingfleet.com.

(5) You may view this service information at FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 202–741–6036, or go to: http://www.archives.gov/federal-register/cfr/ibr-locations.html.

(6) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6036, or go to: http://www.archives.gov/federal-register/cfr/ibr-locations.html.

Issued in Renton, Washington, on October 11, 2015.

Jeffrey E. Duven,
Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

RIN 2120–AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are superseding Airworthiness Directive (AD) 2009–18–15, for all Airbus Model A300, A310, and A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes (collectively called Model A300–600 series airplanes). AD 2009–18–15 required revising the Airworthiness Limitations section (ALS) of the Instructions for Continued Airworthiness (ICA) to require additional life limits and/or replacements for certain main landing gear and nose landing gear components. This new AD requires revising the maintenance or inspection program to incorporate the new maintenance requirements and airworthiness limitations. This AD was prompted by a determination that existing maintenance requirements and airworthiness limitations are inadequate to ensure the structural integrity of the airplane. We are issuing this AD to prevent failure of certain system components, which could result in reduced structural integrity of the airplane.

DATES: This AD becomes effective December 17, 2015.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of December 17, 2015.

The Director of the Federal Register approved the incorporation by reference of certain other publications listed in this AD as of October 27, 2009 (74 FR 48143, September 22, 2009).

ADDRESSES: You may examine the AD docket on the Internet at http://www.federalregister.gov.
The MCAI states:

an unsafe condition for all Model A300, Information, or “the MCAI”), to correct

Mandatory Continuing Airworthiness

2013 (referred to after this as the

Directive 2013–0248, dated October 14,

September 22, 2009). AD 2009–18–15

Part 39 to supersede AD 2009–18–15,

rulemaking (NPRM) to amend 14 CFR

Part 4 documents, which are approved by the

European Aviation Safety Agency (EASA).

EASA AD 2007–0092 [http://
ad.easa.europa.eu/blob/easa_ad_2007_0092.pdf/AD_2007-0092] [which corresponds to

FAA 2009–06, Amendment 39–15842 (74 FR 12228, March 24, 2009)] was

issued to require compliance to the

requirements as specified in these
documents.

The revision 02 of Airbus A310 and Airbus
A300–600 ALS Part 4 documents introduces
more restrictive maintenance requirements
and/or airworthiness limitations. Failure to
comply with the instructions of ALS Part 4
could result in an unsafe condition [reduced
structural integrity of the airplane.]

For the reasons described above, this new
[EASA] AD retains the requirements of EASA
AD 2007–0092, which is superseded, and
requires the implementation of the new or
more restrictive maintenance requirements
and/or airworthiness limitations as specified
in Airbus A310 ALS Part 4, Revision 02, or
Airbus A300–600 ALS Part 4, Revision 02, as
applicable to aeroplane type/model.

You may examine the MCAI in the
AD docket on the Internet at http://
www.regulations.gov by searching for

FAA, call 425–227–1221. It is also
available on the Internet at http://
www.regulations.gov by searching for

SUPPLEMENTARY INFORMATION:

Discussion
We issued a notice of proposed
rulemaking (NPRM) to amend 14 CFR
part 39 to supersede AD 2009–18–15,
Amendment 39–16011 (74 FR 48143,
September 22, 2009). AD 2009–18–15
applied to all Airbus Model A300,
A310, and A300 B4–600, B4–600R, and
F4–600R series airplanes; and Model
A300 C4–605R Variant F airplanes
(collectively called Model A300–600
series airplanes). The NPRM published in
the Federal Register on July 14, 2015
(80 FR 40942).

The European Aviation Safety Agency
(EASA), which is the Technical Agent
for the Member States of the European
Union, has issued EASA Airworthiness
Directive 2013–0248, dated October 14,
2013 (referred to after this as the
Mandatory Continuing Airworthiness
Information, or “the MCAI”), to correct
an unsafe condition for all Model A300,
A310, and A300–600 series airplanes.

The MCAI states:

The airworthiness limitations for Airbus
airplanes are currently published in
Airworthiness Limitations Section (ALS)
documents.

The mandatory instructions and
airworthiness limitations applicable to the
Aging Systems Maintenance (ASM) are
specified in Airbus A310 or A300–600 ALS
Part 4 documents, which are approved by the

European Aviation Safety Agency (EASA).

For Model A300 B4–600, B4–600R,
and F4–600R series airplanes, and
Model A300 C4–605R Variant F
airplanes (collectively called Model
Life Airworthiness Limitation Items.”
Revision 01, dated September 5, 2013,
of the Airbus Model A300–600
Airworthiness Limitations Section.

For Model A310 series airplanes:
Part 1, “Safe Life Airworthiness
Limitation Items.” Revision 01, dated
September 5, 2013, of the Airbus Model
A310 Airworthiness Limitations
Section.

This service information is reasonably
available because the interested parties
have access to it through their normal
course of business, or by the means
identified in the ADDRESSES section
of this AD.

Costs of Compliance
We estimate that this AD affects 177
airplanes of U.S. registry.

The retained ALS revision required by
AD 2009–18–15, Amendment 39–16011
(74 FR 48143, September 22, 2009),
takes about 1 work-hour per product, at
an average labor rate of $85 per work-
hour. Based on these figures, the
estimated cost of the actions that were
required by AD 2009–18–15 is $85 per
product.

We also estimate that it takes about 1
work-hour per product to comply with
the new ALS revision of this AD. The
average labor rate is $85 per work-hour.
Based on these figures, we estimate the
cost of this AD on U.S. operators to be
$15,045, or $85 per product.

Authority for This Rulemaking

Title 49 of the United States Code
specifies the FAA’s authority to issue
rules on aviation safety. Subtitle I,
section 106, describes the authority of
the FAA Administrator. “Subtitle VII:
Aviation Programs,” describes in more
detail the scope of the Agency’s
authority.

We are issuing this rulemaking under
the authority described in “Subtitle VII,
Part A, Subpart III, Section 44701:
General requirements.” Under that
section, Congress charges the FAA with
promoting safe flight of civil aircraft in
air commerce by prescribing regulations
for practices, methods, and procedures
the Administrator finds necessary for
safety in air commerce. This regulation
is within the scope of that authority
because it addresses an unsafe condition
that is likely to exist or develop on
products identified in this rulemaking
action.
Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a “significant regulatory action” under Executive Order 12866; and
2. Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Examining the AD Docket

You may examine the AD docket on the Internet at http://www.regulations.gov/#!docketDetail;D=FAA-2015-2461; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800–647–5527) is in the ADDRESSES section.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive AD 2009–18–15, Amendment 39–16011 (74 FR 40143, September 22, 2009), and adding the following new AD:

(a) Effective Date

This AD becomes effective December 17, 2015.

(b) Affected ADs

(1) This AD replaces AD 2009–18–15, Amendment 39–16011 (74 FR 48143, September 22, 2009).

(2) Accomplishing certain requirements of paragraph (g) of this AD satisfies the requirements of paragraph A. of AD 84–02–04, Amendment 39–4795 (49 FR 2746, January 23, 1984).

(c) Applicability

(d) Subject

Air Transport Association (ATA) of America 32, Landing Gear.

(e) Reason

This AD was prompted by a determination that existing maintenance requirements and airworthiness limitations are inadequate to ensure the structural integrity of the airplane. We are issuing this AD to prevent failure of certain system components, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Revision of Airworthiness Limitation Section (ALS)

This paragraph restates the requirements of paragraph (h) of AD 2009–18–15, Amendment 39–16011 (74 FR 48143, September 22, 2009). For Model A300, A310, and A300–600 series airplanes: Within 3 months after October 27, 2009 (the effective date of AD 2009–18–15), revise the ALS of the instructions for continued airworthiness (ICA) to incorporate the applicable document listed in paragraph (g)(1), (g)(2), or (g)(3) of this AD. Accomplishing the actions specified in the applicable document satisfies the requirements of paragraphs A. of AD 84–02–04, Amendment 39–4795 (49 FR 2746, January 23, 1984).

(1) For Model A300 series airplanes:

(a) Incorporate the applicable document listed in paragraph (g)(1)(i) or (g)(1)(ii) of this AD.

(i) Section 05–10–00, Revision 28, dated February 27, 1998, of Chapter 05, “Service Life Limits and Maintenance Checks,” of the Airbus A300 Aircraft Maintenance Manual, except that the parts listed in table 1 to paragraph (g) of this AD are subject to the life limits defined in the document listed in paragraph (g)(1)(ii) of this AD.

(b) Incorporate the applicable document listed in paragraph (g)(2)(i) or (g)(2)(ii) of this AD.

(i) Limits defined in the document listed in paragraph (g)(2)(i) of this AD.

(c) Incorporate the applicable document listed in paragraph (g)(3)(i) or (g)(3)(ii) of this AD.

(i) Limits defined in the document listed in paragraph (g)(3)(i) of this AD.

(2) For Model A310 series airplanes:

(3) For Model A300 B4–600, B4–600R, and F4–600R series airplanes, and Model A300 C4–605R Variant F airplanes (collectively called Model A300–600 series airplanes):

(h) Retained Initial Compliance Times and Repetitive Inspections

This paragraph restates the requirements of paragraph (i) of AD 2009–18–15, Amendment 39–16011 (74 FR 48143, September 22, 2009). Do the replacement at the applicable time specified in paragraph (h)(1) or (h)(2) of this AD, except as provided by paragraph (i) of this AD. The replacement must be done thereafter within the interval specified in the applicable document identified in paragraph (g)(1), (g)(2), or (g)(3) of this AD.

(1) For any life limitation/task that has not been complied with before October 27, 2009 (the effective date of AD 2009–18–15, Amendment 39–16011), in accordance with the applicable document listed in paragraph (g)(1), (g)(2), or (g)(3) of this AD, or in accordance with paragraph (g) of AD 2009–18–15, use the last accomplishment of each limitation/task as a starting point for accomplishing each corresponding limitation/task required by this AD.

(2) For any life limitation/task that has not been complied with before October 27, 2009 (the effective date of AD 2009–18–15, Amendment 39–16011), in accordance with the applicable document listed in paragraph (g)(1), (g)(2), or (g)(3) of this AD, or in accordance with paragraph (g) of AD 2009–18–15, use the last accomplishment of each limitation/task as a starting point for accomplishing each corresponding life limitation/task required by this AD.
For any airplane on which the history of accumulated landings is partial or unknown, or where the history of application details (airplane type, model, weight variant, etc.) is partial or unknown: Parts listed in figure 1 to paragraph (i) of this AD must be replaced at the associated compliance time. The replacement must be done thereafter at the interval specified in the applicable document(s) specified in paragraphs (g)(1), (g)(2), and (g)(3) of this AD.  

Note 1 to paragraph (i) of this AD: Airbus Service Information Letter 32–118, Revision 02, dated October 24, 2007, provides operators with guidance on the means to assign a conservative calculated life to parts whose history of accumulated landings is partial or unknown; and to select the limitations applicable to parts whose history of application details (airplane type, aircraft model, weight variant, etc.) is partial or unknown.

1 When the nut is temporarily removed and reinstalled for the purpose of performing maintenance outside a workshop, no replacement is required provided the nut’s removal and reinstallation are performed on the same assembly and neither the assembly nor the nut accumulates time in service during the period between the removal and reinstallation.

2 If the removal/installation was done after the start date, but before the effective date of this AD, the compliance time is within 3 months after October 27, 2009 (the effective date of AD 2009–18–15, Amendment 39–16011 (74 FR 48143, September 22, 2009)).

(j) New Requirements of This AD: Maintenance Program Revision
Within 3 months after the effective date of this AD: Revise the maintenance or inspection program, as applicable, to incorporate the applicable limitation, replacement, or inspection specified in paragraph (j)(1), (j)(2), or (j)(3) of this AD, as applicable. Doing any task required by this paragraph terminates the corresponding task required by paragraph (g), (h), and (i) of this AD.

(k) New Limitation: No Alternative Actions or Intervals
After accomplishment of the revision required by paragraph (j) of this AD, no alternative actions (e.g., inspections) or intervals may be used unless the actions or intervals are approved as an alternative method of compliance (AMOC) in accordance with the procedures specified in paragraph (l) of this AD.

(l) Other FAA AD Provisions
The following provisions also apply to this AD:

(1) Alternative Methods of Compliance (AMOCs): The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Dan Rodina, Aerospace Engineer, International Branch, ANM–116, Transport Aircraft Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–2125; fax 425–227–1149. Information may be emailed to: 9-AMN–116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, the manager of the local Flight Standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) Contacting the Manufacturer: As of the effective date of this AD, any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus’s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(m) Related Information
(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2013–0248, dated October 14, 2013, for related information. This MCAI may be found in the AD docket by searching for and locating Docket No. FAA–2015–2461–0002.
(2) Service information identified in this AD that is not incorporated by reference in this AD is available at the addresses specified in paragraphs (n)(5) and (n)(6) of this AD.

(n) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(3) The following service information was approved for IBR on November 27, 2015.

(i) ALS Part 1, “Safe Life Airworthiness Limitation Items,” Revision 01, dated September 5, 2013, of the Airbus Model A300 Airworthiness Limitations Section.

(ii) ALS Part 1, “Safe Life Airworthiness Limitation Items,” Revision 01, dated September 5, 2013, of the Airbus Model A300–600 Airworthiness Limitations Section.

(iii) ALS Part 1, “Safe Life Airworthiness Limitation Items,” Revision 01, dated September 5, 2013, of the Airbus Model A310 Airworthiness Limitations Section.

(4) The following service information was approved for IBR on October 27, 2009 (74 FR 48145, September 22, 2009).

(i) Section 05–10–00 of Chapter 05, “Service Life Limits and Maintenance Checks,” of the Airbus A300 Aircraft Maintenance Manual (AMM), Revision 28, dated February 27, 1988.

(A) The AMM title page; the Record of Revisions, Effective Pages, and Table of Content pages; and Section 05–10–00; for Chapter 05 of Airbus A300 AMM are all dated February 27, 1988.

(B) The revision level of Chapter 05 of the Airbus A300 AMM is indicated only in the Record of Revisions section of Chapter 05.

(C) The List of Effective Pages (LOEP) for Chapter 05 of the Airbus A300 AMM contains the discrepancies identified in paragraphs (n)(4)(i)(C)(1) through (n)(4)(i)(C)(4) of this AD.

(i) The Transmittal Letter page, page 4 of the LOEP and Table of Contents sections, page 2 of Subsection 05–00–01, Subsection 05–10–00, and page 1 of Subsection 05–11–11, are not listed in the LOEP for Chapter 05 of the Airbus A300 AMM.

(ii) The LOEP for Chapter 05 of the Airbus A300 AMM does not specify a date for the Record of Revisions page.

(iii) The LOEP for Chapter 05 of the Airbus A300 AMM identifies three pages for Subsection 05–11–00, Configuration 5; however, only one page exists.

(iv) The LOEP for Chapter 05 of the Airbus A300 AMM identifies three pages for Subsection 05–11–00, Configuration 9; however, those pages do not exist.

(5) For service information identified in this AD, contact Airbus, Airworthiness Office—EAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email account.airworth-eas@airbus.com; Internet http://www.airbus.com.

(6) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(7) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: http://www.archives.gov/federal-register/cfr/ibr-locations.html.

Issued in Renton, Washington, on October 21, 2015.

Jeffrey E. Duven,
Manager, Transport Airplane Directorate, Aircraft Certification Service.

3911, Email: ERC@bis.doc.gov.

SUPPLEMENTARY INFORMATION:

Background

The Entity List (Supplement No. 4 to Part 744) identifies entities and other persons reasonably believed to be involved, or to pose a significant risk of being or becoming involved, in activities contrary to the national security or foreign policy interests of the United States. The EAR imposes additional license requirements on, and limits the availability of most license exceptions for, exports, reexports, and transfers (in-country) to those listed. The “license review policy” for each listed entity or other person is identified in the License Review Policy column on the Entity List and the impact on the availability of license exceptions is described in the Federal Register notice adding entities or other persons to the Entity List. BIS places entities and other persons on the Entity List pursuant to sections of part 744 (Control Policy: End-User and End-Use Based) and part 746 (Embargoes and Other Special Controls) of the EAR.

The ERC, composed of representatives of the Departments of Commerce (Chair), State, Defense, Energy and, where appropriate, the Treasury, makes all decisions regarding additions to, removals from, or other modifications to the Entity List. The ERC makes all decisions to add an entry to the Entity List by majority vote and all decisions to remove or modify an entry by unanimous vote.

ERC Entity List Decisions

Additions to the Entity List

This rule implements the decision of the ERC to add seven persons under ten entries to the Entity List. These seven persons are being added on the basis of
