SUPPLEMENTARY INFORMATION: Under the direction of Homeland Security Presidential Directive-7 (HSPD–7) (2003), DHS/NPPD/IP has developed the IP Gateway—a centrally managed repository of infrastructure capabilities allowing the Critical Infrastructure (CI) community to work in conjunction with each other toward the same goals. This collection involves the standardized recording, via a series of web-based forms, of a significant amount of information assembled during voluntary physical facility review surveys. The survey is used to analyze risks and vulnerabilities to a facility and how they can mitigate risks and vulnerabilities. Questions focus on whether specific sets of controls and operational best practices are planned, defined, implemented, measured, managed, and assessed on a regular basis across all aspects of facility use and operation. Surveys are usually completed by government personnel, but can be performed by individual site owners as well. OMB is particularly interested in comments that:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses.

Comments

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: <http://www.regulations.gov> and enter USCIS–2014–0002 in the search box. Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

- (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (3) Enhance the quality, utility, and clarity of the information to be collected; and
- (4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection Request:* New Collection.

(2) *Title of the Form/Collection:* AABB accredited laboratory testing; Rapid DNA prototype Accelerated Nuclear DNA Equipment (ANDE) by NetBio; Rapid DNA prototype RapidHIT200 by IntegenX.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* G–1294, G–1295; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief*

abstract: Primary: Individuals or households. Overseas applicants for refugee status filing through the USCIS Form I–590 (OMB Control Number 1615–0068) that have a spouse and/or child(ren) must meet all requirements of Immigration and Nationality Act § 207(c)(2) and have the necessary burden of proof to establish the relationship(s). In the case of a parent-child relationship, there is often a degree of difficulty in establishing this for refugee populations that often lack reliable documentation. USCIS is seeking to allow I–590 applicants to provide DNA testing results through an AABB accredited laboratory, and in coordination with the USCIS overseas office, to provide effective and credible evidence of this parent-child relationship. USCIS is also seeking to conduct simultaneous Rapid DNA testing as a pilot to make a determination if the Rapid DNA machines provide a valid alternative to traditional DNA testing. USCIS will be collecting samples for traditional DNA testing through an AABB accredited laboratory in conjunction with the Rapid DNA pilot to test the validity of the results obtained during the pilot. The collection of DNA, regardless of process employed, is strictly voluntary and refusal to provide a sample does not adversely impact an applicant's I–590 application.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 60 respondents for the Applicant Initiated AABB accredited lab DNA Testing with an estimate hour burden of 6 hours per response. 250 respondents for the standard DNA process (form G–1294) with an estimate of .217 hour burden per response. 250 respondents for the Rapid DNA process (Form G–1295) with an estimate of .217 hour burden per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated hour burden per response is 470 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The total estimated cost to the public is \$14,700.

Dated: November 5, 2015.

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.
