• is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.);
• does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
• does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

The Department of Commerce is proposing rulemaking, and NMFS approved the FMP prepared, and NMFS approved, the FMP under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1801 et seq. Regulations governing U.S. fisheries and implementing the FMP appear at 50 CFR parts 600 and 679.

This advance notice of proposed rulemaking would apply to owners and operators of vessels that participate in the Federal fishery for yellowfin sole with trawl gear in the offshore sector of the BSAI. The BSAI is defined at §679.2 and shown in Figure 1 to 50 CFR part 679.

Vessels that participate in the offshore sector of the BSAI trawl limited access fishery for yellowfin sole include catcher vessels, catcher/processors, and motherships. Catcher vessels participate in the offshore sector by delivering yellowfin sole to catcher/processors or motherships for processing. Catcher/processors participate in the offshore sector by catching and processing yellowfin sole or by receiving and processing deliveries of yellowfin sole from catcher vessels. Motherships participate in the offshore sector by receiving and processing deliveries of yellowfin sole from catcher vessels. This advance notice of proposed rulemaking would not apply to owners and operators of trawl catcher vessels that participate in the inshore sector of the BSAI trawl limited access fishery for yellowfin sole, i.e., vessels that deliver yellowfin sole to shoreside processors rather than to catcher/processors or motherships.

The Council and NMFS annually establish biological thresholds and annual total allowable catch limits for groundfish species, such as yellowfin sole, to sustainably manage the groundfish fisheries in the BSAI. To achieve these objectives, NMFS requires vessel operators participating in BSAI groundfish fisheries to comply with various regulatory restrictions, such as fishery closures, to maintain catch within specified total allowable catch limits. The BSAI groundfish fishery restrictions also include prohibited species catch (PSC) limits for Pacific halibut that generally require halibut to be discarded when harvested. When harvest of halibut PSC reaches the specified halibut PSC limit for that fishery, NMFS closes directed fishing for the target groundfish species, even if the total allowable catch limit for that species has not been harvested. The Council and NMFS have long sought to control fishing effort in the North Pacific Ocean to ensure that fisheries are conservatively managed and do not exceed established biological.
thresholds. One of the measures used by the Council and NMFS is the license limitation program (LLP) which limits access to the groundfish, crab, and scallop fisheries in the BSAI and the Gulf of Alaska. The LLP is intended to limit entry into federally managed fisheries. For groundfish, the LLP requires that persons hold and assign a license to each vessel that is used to fish in federally managed fisheries, with some limited exemptions. The preamble to the final rule implementing the groundfish LLP provides a more detailed explanation of the rationale for specific provisions in the LLP (October 1, 1998; 63 FR 52642).

On October 13, 2015, the Council received public testimony from participants in the offshore sector of the BSAI trawl limited access fishery for yellowfin sole. These participants indicated that several new vessels entered the fishery during 2015. The testimony indicated that this new entry may negatively impact the ability of historical participants to maintain yellowfin sole harvests and may increase halibut PSC in the fishery. After considering this public testimony, the Council stated its intent to evaluate participation and effort in the BSAI trawl limited access fishery for yellowfin sole in response to a potential need to limit entry in the offshore sector of that fishery. To dampen the effect of speculative entry into the offshore sector of the BSAI trawl limited access fishery for yellowfin sole in anticipation of potential future action to further limit access to the fishery, the Council announced a control date of October 13, 2015. The control date may be used as a reference date for a future management action to further limit access to the offshore trawl limited access fishery for yellowfin sole in the BSAI. The Council clarified that the control date would not obligate the Council to use this control date in any future management action. Further, the control date would not obligate the Council to take any action or prevent the Council from selecting another control date. Accordingly, this document is intended to promote awareness that the Council may develop a future management action to achieve its objectives for the offshore sector of the BSAI trawl limited access fishery for yellowfin sole; to provide notice to the public that any current or future access to the offshore sector of the BSAI trawl limited access fishery for yellowfin sole may be affected or restricted; and to discourage speculative participation and behavior in the fishery while the Council considers whether to initiate a management action to further limit access to the fishery. Any measures the Council considers may require changes to the FMP. Such measures may be adopted in a future amendment to the FMP, which would include opportunity for further public participation and comment.

NMFS encourages public participation in the Council’s consideration of a management action to further limit access to the offshore sector of the BSAI trawl limited access fishery for yellowfin sole. Please consult the Council’s Web site at http://www.npfmc.org/ for information on public participation in the Council’s decision-making process.

This notification and control date do not impose any legal obligations, requirements, or expectations.

Authority: 16 U.S.C. 1801 et seq.

Dated: November 16, 2015.
Samuel D. Rauch III,
Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.
