Please include the project number (P–77–275) on any comments, motions to
intervene, protests, or recommendations filed.

k. Description of Request: The
licensee requests an extension of a
previous temporary variance of the
minimum flow requirements in the Eel
River and East Branch Russian River.
On June 18, 2015, the Commission
issued an order approving a temporary
variance of the minimum flow
requirements in the Eel River below
Scott Dam (gage E–2), the Eel River
below Cape Horn Dam (gage E–11), and
East Branch Russian River (gage E–16).
Specifically, the order granted the
licensee’s request to operate under a dry
water year scenario through December
1, 2015, in order to preserve limited
water resources during the current
drought. In its November 10, 2015
request, the licensee states that the
project reservoir (Lake Pillsbury) is
projected to drain by mid-January.
Consequently, the licensee requests
Commission approval to operate as low
as the critically dry year minimum flow
requirements in the Eel River below
Scott Dam (20 cubic feet per second (cfs)
release) and the East Branch Russian
River (5 cfs release) and the
exceptionally low minimum flow
requirements in the Eel River below
Cape Horn Dam (9 cfs release) in order
to preserve water storage. In addition, the
licensee requests Commission
approval for a modified minimum flow
compliance criteria of a 24-hour
average, rather than an instantaneous
requirement. The licensee requests the
temporary variance through January 31,
2016, or when storage in Lake Pillsbury
reaches 27,000 acre-feet, whichever
comes first.
