SUPPLEMENTARY INFORMATION: In accordance with Section 122(i) of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), 42 U.S.C. 9622(i), EPA is providing notice of a proposed administrative settlement for payment of response costs at the Bremerton Auto Wrecking/Gorst Creek Landfill Site in Port Orchard, Washington with the following settling parties: The United States Department of the Navy and the ST Trust. The Bremerton Auto Wrecking/Gorst Creek Landfill Site is a triangular shaped parcel of approximately 5.7 acres located within a ravine through which Gorst Creek flows. To create the landfill Gorst Creek was channeled through a 24-inch steel culvert placed at the bottom of the ravine. From 1968 until 1989, waste was disposed in the creek ravine on top of the culvert. The weight of the waste has crushed the culvert in at least two locations and diminished flow capacity. The diminished flow capacity causes Gorst Creek to impound upstream of the landfill, resulting in water seeping through and flowing over the surface of the landfill. During periods of heavy precipitation erosion of the landfill disperses waste material and debris into the downstream reaches of Gorst Creek. The landfill is estimated to contain approximately 150,000 cubic yards of waste.

The Agency is proposing to enter into an administrative agreement with the settling parties to fund a response action to remove and properly dispose of waste disposed in the creek ravine. Following

waste removal, the creek ravine will be restored to provide proper hydrological and ecological functions, including restoration of fish habitat and migration. The response action is expected to take approximately one-year and will cost an estimated \$27,605,000. The proposed settlement will provide the settling parties with a release of liability subject to certain rights reserved by the Agency.

Administration for Children and Families

Submission for OMB Review; Comment Request

Title: Job Search Assistance (JSA) Strategies Evaluation.

OMB No.: 0970-0440.

Description: The Administration for Children and Families (ACF) is proposing a data collection activity as part of the Job Search Assistance (JSA) Strategies Evaluation. The JSA evaluation aims to determine which JSA strategies are most effective in moving TANF applicants and recipients into work. The impact study will randomly assign individuals to contrasting JSA approaches and then compare their employment and earnings to determine their relative effectiveness. The implementation study will describe services participants receive under each approach as well as provide operational lessons gathered directly from practitioners.

Two data collection efforts have been previously approved for JSA, including one for data collection activities to document program implementation, to administer a staff survey and to collect baseline information of program participants. These collection activities will continue under this new request.

This **Federal Register** Notice provides the opportunity to comment on a proposed new information collection activity for JSA: A follow-up survey for JSA participants approximately 6 months after program enrollment.

The purpose of the survey is to follow-up with study participants and document their job search assistance services and experiences including their receipt of job search assistance services, their knowledge and skills for conducting a job search, the nature of their job search process, including tools and services used to locate employment, and their search outputs and outcomes, such as the number of applications submitted, interviews attended, offers received and jobs obtained. In addition, the survey will provide an opportunity for respondents to provide contact data for possible longer-term follow-up.

Respondents: JSA study participants and program staff.
