covered by units of the DIAMONDS Trust held in the same account. CBOE notes, based on this previous guidance from the FRB and the Commission, and in conjunction with the Exchange’s current rules, CBOE has applied this margin treatment to short index option positions where there are offsetting positions in an ETF that tracks the same underlying index held in the same margin account (which treatment the Exchange has announced in Regulatory Circulars). CBOE believes the proposed rule change is consistent with these previous findings and applies this margin treatment generally to all ETFs and mutual funds that overly market indexes, in the same manner that the rules currently apply to underlying stock baskets. Given that the Exchange regularly lists new products, including index options, the Exchange believes it is appropriate to have a more general rule related to margin on these index option products that applies in the same manner rather than identifying this margin treatment in Regulatory Circulars.

III. Discussion and Commission Findings

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange. Specifically, the Commission finds that the proposed rule change is consistent with Section 6(b)(5) of the Act, which requires, among other things, that the rules of a national securities exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. Specifically, the Commission believes that providing for a specific margin treatment related to covered puts and calls to apply to all index options in the same manner will promote just and equitable principles of trade because stock baskets, ETFs and mutual funds that trade a reference index can generally provide the same economic function as a security underlying an option.

Finally, the Commission believes the non-substantive technical changes will benefit investors by offering more clarity with respect to the margin rules by providing for more consistent and plain English language in the rule.

IV. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change (SR–CBOE–2015–077) be, and hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.

Robert W. Errett,
Deputy Secretary.
