

POLICY JUSTIFICATION*The Government of France—Hellfire Missiles*

The Government of France has requested a possible sale of two-hundred (200) AGM-114K1A Hellfire Missiles; Hellfire Missile conversion kits; blast fragmentation sleeves and installation kits; containers; and transportation. The estimated cost of MDE is \$25 million. The total estimated cost is \$30 million.

This proposed sale will contribute to the foreign policy and national security of the United States by improving the capability of a NATO ally. France is a major political and economic power in Europe and a key democratic partner of the United States in ensuring peace and stability around the world. It is vital to the U.S. national interest to assist France to develop and maintain a strong and ready self-defense capability.

The additional missiles will meet France's operational requirements for a precision guided tactical missile for its Tigre Attack Helicopter. The purchase will directly support French forces actively engaged in operations in Mali and Northern Africa, providing them the capability to successfully engage targets with minimal collateral damage. France will have no difficulty absorbing these missiles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

There is no principal contractor for this sale as the missiles are coming from U.S. Army stock. There are no known offset agreements in connection with this potential sale.

Implementation of this proposed sale will not require any additional U.S. Government or contractor representatives in France.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.
