

Long Supply. These 50 tanks from Long Supply will be enhanced and refurbished to the M1A1 SA configuration. The proposed sale also includes 50 AGT 1500 engines (variant of the SLE and TIGER), electronic communication support systems consisting of an additional 22 each Export Single Channel Ground and Airborne Radio System (SINCGARS), 22 each M2 Chrysler Mount Machine Guns, 44 each 7.62MM M240 Machine Guns, and Ammunition consisting of 820 M865 SABOT Rounds, 2,640 M831A1 Rounds, 133,200 .50 caliber Rounds, 366,400 7.62MM Rounds and other various types of ammunition to support the M1A1 Tanks. This report also includes Support Equipment, Government-Furnished Equipment, Repair Parts, Communication Support Equipment, Tool and Test Equipment, Training, U.S. Government Technical Support and Logistical Support, Contractor Technical Support. These additions will result in an increase in MDE of \$117.5 million, for a total estimated MDE value of \$221.9 million, and the total overall value will remain \$1.015 billion.

(iv) *Significance*: This notification is being provided for the additional 50 M1A1 Abrams tanks from Long Supply,

with their associated equipment, that were not enumerated as Major Defense Equipment in the original notification. Their inclusion represents an increase in capability over what was previously notified. This equipment provides the Kingdom of Morocco Army the ability to modernize its tank fleet, enhancing its ability to meet current and future threats. These tanks will contribute to Morocco's goal of updating its military capability while further enhancing interoperability with the U.S. and other allies.

(v) *Justification*: This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a major Non-NATO ally that continues to be an important force for political stability and economic progress in Africa. This package of M1A1 tank enhancements will contribute to the modernization of Morocco's tank fleet, enhancing its ability to meet current and future threats. These tanks will contribute to Morocco's goal of updating its military capability while further enhancing interoperability with the U.S. and other allies.

(vi) *Date Report Delivered to Congress*: 03 NOV 2015

BILLING CODE 5001-06-P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Transmittal No. 15-59]

36(b)(1) Arms Sales Notification

AGENCY: Defense Security Cooperation Agency, Department of Defense.

ACTION: Notice.

SUMMARY: The Department of Defense is publishing the unclassified text of a section 36(b)(1) arms sales notification. This is published to fulfill the requirements of section 155 of Public Law 104-164 dated July 21, 1996.

FOR FURTHER INFORMATION CONTACT: Sarah A. Ragan or Heather N. Harwell, DSCA/LMO, (703) 604-1546/(703) 607-5339.

The following is a copy of a letter to the Speaker of the House of Representatives, Transmittal 15-59 with attached Policy Justification.

Dated: November 20, 2015.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEFENSE SECURITY COOPERATION AGENCY

201 12TH STREET SOUTH, STE 203
ARLINGTON, VA 22202-8408

The Honorable Paul D. Ryan
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

NOV 03 2015

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 15-59, concerning the Department of the Air Force's proposed Letter(s) of Offer and Acceptance to the Government of Italy for defense articles and services estimated to cost \$129.6 million. After this letter is delivered to your office, we plan to issue a news release to notify the public of this proposed sale.

Sincerely,

J. W. Rixey
Vice Admiral, USN
Director

Enclosures:

1. Transmittal
2. Policy Justification
3. Sensitivity of Technology

Transmittal No. 15-59

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Italy

(ii) *Total Estimated Value:*

Major Defense Equipment *	\$ 18.3 million
Other	\$ 111.3 million
TOTAL	\$ 129.6 million

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

Major Defense Equipment (MDE) included:

One hundred and fifty-six (156) AGM-114R2 HELLFIRE II Missiles
Eight (8) HELLFIRE II, M36-E8 Captive Air Training Missiles (CATMs)
Thirty (30) GBU-12 Laser Guided Bombs
One hundred and twenty (120) FMU-152A/B Joint Programmable Fuzes
Also included with this request are the following non-MDE items: thirty

(30) GBU-38 Joint Direct Attack Munitions (JDAMs); five (5) Hellfire M34 Dummy Missiles; thirty (30) GBU-49 Enhanced Laser Guided Bombs; thirty (30) GBU-54 Laser JDAMS; twenty-six (26) BRU-71A Bomb Racks; thirteen (13) M-299 launchers; six (6) MQ-9 weaponization kits and installation; and two (2) AN/AWM-103 test suites. Additionally, this transmittal includes personnel weapons training/equipment; spare parts; support equipment; publications and technical data; U.S. Government and contractor technical assistance; and other related

elements of program and logistics support.

(iv) *Military Department: Air Force (QAV)*

(v) *Prior Related Cases, if any: FMS Case IT-D-SAG-\$182M-02 Dec 08*

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid: None*

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold: See Attached Annex*

(viii) *Date Report Delivered to Congress: 03 NOV 2015*

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

Italy—Weaponization of MQ-9s

The Government of Italy requested a possible sale of Major Defense Equipment (MDE) items including one hundred and fifty-six (156) AGM-114R2 HELLFIRE II Missiles; eight (8) HELLFIRE II, M36-E8 Captive Air Training Missiles (CATMs); and thirty (30) GBU-12 Laser Guided Bombs. Non-MDE items requested include thirty (30) GBU-38 Joint Direct Attack Munitions (JDAMs); five (5) HELLFIRE M34 Dummy Missiles; thirty (30) GBU-49 Enhanced Laser Guided Bombs; thirty (30) GBU-54 Laser JDAMs; twenty-six (26) Bomb Racks; six (6) MQ-9 weaponization kits and installation; thirteen (13) M-299 launchers; two (2) AN/AWM-103 test suites; personnel weapons training/equipment; spare parts; support equipment; publications and technical data; U.S. Government and contractor technical assistance; and other related elements of program and logistics support. The estimated MDE value is \$18 million. The estimated total value is \$129.6 million.

This proposed sale will contribute to the foreign policy and national security of the United States by improving the capability of a North Atlantic Treaty Organization (NATO) ally that has been an integral member of every recent NATO and U.S.-led operation. It is in the U.S. strategic interest to support Italy's security contributions as a capable and interoperable ally. Italy is a major political and economic power in NATO and a key democratic partner of the United States in ensuring peace and stability around the world.

Italy requests to arm its MQ-9 Reapers for three primary reasons: 1) to support and enhance burden sharing in NATO and coalition operations; 2) to increase operational flexibility; and 3) to increase the survivability of Italian deployed forces. Italy currently operates the MQ-9 system and will have no difficulty incorporating this added capability into its Air Force.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The prime contractor will be the General Atomics-Aeronautical Systems, Inc. of San Diego, California. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Italy.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale. All defense articles/services have been approved for release by our foreign disclosure office.

Transmittal No. 15-59

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. *Armed MQ-9 Unmanned Aerial Vehicle System Upgrade:* Italy currently owns and operates an unarmed version of the MQ-9 system and has formally requested an armed capability.

No new Critical Program Information or Technology is involved in the weaponization process. The equipment proposed in this weaponization process for the Italian MQ-9 includes:

- BRU-7A Bomb Racks, M-299 launchers, MQ-9 weaponization kits to include pylons, AN/AWM-103 test suites, and associated operational flight programming (OFP).

2. *AGM-114R2 HELLFIRE II Semi-Active Laser Missile:* The AGM-114R2 HELLFIRE II is a rail-launched guided missile. The guidance system employs a Semi-Active Laser (SAL) seeker and an analogue autopilot. SAL missiles home on the laser energy reflected off a target that has been illuminated by a laser designator. The laser can be on either the launch platform or another platform that can be separated by several kilometers. The AGM-114R2 has a multi-purpose selectable warhead and inertial measurement unit (IMU)-Aided Trajectories. The highest level of classified information to be disclosed regarding the AGM-114R2 HELLFIRE II missile is SECRET, based upon the software. The highest level of classified information that could be disclosed by a proposed sale or by testing of the end item is SECRET; the highest level that must be disclosed for production, maintenance, or training is CONFIDENTIAL. Vulnerability data, countermeasures, vulnerability/susceptibility analyses, and threat definitions are classified up to SECRET.

3. The HELLFIRE II Captive Air Training Missile (CATM) consists of a functional guidance section coupled to an inert missile bus. The CATM is used for flight training and cannot be launched. The missile has an operational semi-active laser seeker that can search for and lock-on to laser-designated targets. The CATM functions like a tactical missile (without launch capability) during captive carry on the aircraft, making it suitable for training the aircrew in simulated HELLFIRE missile target acquisition and lock.

4. *GBU-12 (500 lb):* The GBU-12 is a general purpose bomb fitted with the MXU-650 airfoil and the MAU-169 L/B Computer Control Group (CCG) to convert them to Laser Guided Bombs (LGBs). The LGB is a maneuverable, free-fall weapon that guides to a spot of laser energy reflected off of the target. The LGB is delivered like a normal general purpose (GP) warhead and the semi-active guidance corrects for many of the normal errors inherent in any delivery system. The hardware is Unclassified.

Information revealing the probability of destroying common/unspecified targets, the number of simultaneous lasers the laser seeker head can discriminate, and data on the radar/infra-red frequency is classified CONFIDENTIAL.

5. *GBU-38 (500 lb) JDAM (Joint Direct Attack Munition):* The GBU-38 is a general purpose bomb with an FMU-152A/B fuse and a KMU-572 B/B guidance tail kit that converts unguided free-fall bombs into accurate, all weather, GPS guided "smart" munitions.

Information revealing target designation tactics and associated aircraft maneuvers, the probability of destroying specific/peculiar targets, vulnerabilities regarding countermeasures and the electromagnetic environment is classified SECRET.

Information revealing the probability of destroying common/unspecified targets is classified CONFIDENTIAL.

6. *GBU-49 (500 lb):* The GBU-49 is a 500 lb (MK-82 or BLU-111) Enhanced Paveway II, dual mode GPS/laser guided bomb with an airfoil group and the MAU-169L/B CCG. The laser sensor enhances standard GPS guidance by allowing rapid prosecution of moving targets or fixed targets with large initial target location errors (TLE).

Information revealing target designation tactics and associated aircraft maneuvers, the probability of destroying specific/peculiar targets, vulnerabilities regarding countermeasures and the

electromagnetic environment is classified SECRET.

Information revealing the probability of destroying common/unspecified targets, the number of simultaneous lasers the laser seeker head can discriminate, and data on the radar/infra-red frequency is classified CONFIDENTIAL.

7. *GBU-54 (500 lb)*: This is the dual-mode laser JDAM variant of the GBU-38 JDAM. The nose fuze is replaced with the DSU-38, which gives the weapon both GPS and laser guidance capability. The laser sensor enhances standard JDAM's reactive target capability by allowing rapid prosecution of fixed targets with large initial target location errors (TLE). The addition of the laser sensor combined with additional cabling and mounting hardware turns a standard JDAM into a Laser JDAM.

Information revealing target designation tactics and associated aircraft maneuvers, the probability of destroying specific/peculiar targets, vulnerabilities regarding countermeasures and the electromagnetic environment is classified SECRET.

Information revealing the probability of destroying common/unspecified targets, the number of simultaneous lasers the laser seeker head can discriminate, and data on the radar/infra-red frequency is classified CONFIDENTIAL.

8. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

9. A determination has been made that the recipient country can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

10. Release of this technology has been approved via appropriate technology transfer and foreign disclosure processes.

BILLING CODE 5001-06-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP16-9-000]

Algonquin Gas Transmission, LLC, Maritimes & Northeast Pipeline, LLC; Supplemental Notice of Intent To Prepare an Environmental Assessment for and Requesting Comments on the Proposed Atlantic Bridge Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) is preparing an environmental assessment (EA) that will discuss the environmental impacts of the Atlantic Bridge Project (Project), which would involve construction and operation of facilities by Algonquin Gas Transmission, LLC (Algonquin) and Maritimes & Northeast Pipeline, LLC (Maritimes), collectively referred to as the Applicants, in New York, Connecticut, and Massachusetts. The Commission will use this EA in its decision-making process to determine whether the Project is in the public convenience and necessity.

A Notice of Intent (NOI) for this Project was issued by the FERC on April 27, 2015. Since that time, some additional stakeholders not previously identified have been added to the environmental mailing list. In addition, the Applicants are proposing to use additional available horsepower at a compressor station in New York that was not previously included during the pre-filing process. As a result, this notice announces a supplemental scoping period to gather input from the public and agencies on the Project.

You can make a difference by providing us¹ with your specific comments or concerns about the Project. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues need to be evaluated in the EA. To ensure that your comments are timely and properly recorded, please send your comments so that the Commission receives them in Washington, DC on or before December 21, 2015; however, this will not be the last public input opportunity for the Project. Please refer to the Review Process flow chart in Appendix 1.²

¹ "We," "us," and "our" refer to the environmental staff of the Commission's Office of Energy Projects.

² The appendices referenced in this notice will not appear in the **Federal Register**. Copies of the appendices were sent to all those receiving this notice in the mail and are available at www.ferc.gov

If you sent comments on this Project to the Commission under Docket No. PF15-12-000, prior to the opening of the CP docket on October 22, 2015, you do not need to refile your comments under Docket No. CP16-9-000. We have received your comments and will use the information in the preparation of the EA.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to construct, operate, and maintain the planned facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the Commission approves the Project, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement and the Project is approved, the pipeline company could initiate condemnation proceedings where compensation would be determined in accordance with state law.

A fact sheet prepared by the FERC entitled "An Interstate Natural Gas Facility On My Land? What Do I Need To Know?" is available for viewing on the FERC Web site (www.ferc.gov). This fact sheet addresses a number of typically-asked questions, including the use of eminent domain and how to participate in the Commission's proceedings.

Public Participation

For your convenience, there are three methods you can use to submit your comments to the Commission. The commission will provide equal consideration to all comments received. In all instances, please reference the Project docket number (CP16-9) with your submission. The Commission encourages electronic filing of comments and has expert staff available to assist you at (202) 502-8258 or efiling@ferc.gov. Please carefully follow these instruction so that your comments are properly recorded.

(1) You can file your comments electronically using the *eComment* feature on the Commission's Web site (www.ferc.gov) under the link to *Documents and Filings*. This is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically using the *eFiling* feature on the Commission's Web site (www.ferc.gov) under the link to *Documents and Filings*. With eFiling,

using the link called "eLibrary" or from the Commission's Public Reference Room, 888 First Street NE., Washington, DC 20426, or call (202) 502-8371. For instructions on connecting to eLibrary, refer to the last page of this notice.
