On November 12, 2015, Federal Energy Regulatory Commission (Commission) staff conducted a technical conference to understand PJM Interconnection, L.L.C’s (PJM) application of its Order No. 1000-compliant transmission planning process to local transmission facilities in PJM’s Regional Transmission Expansion Plan (RTEP). All interested persons are invited to file post-technical conference comments on the topics discussed during the technical conference, including:

• The process for planning for individual Transmission Owner FERC-filed planning criteria in Form No. 715; 2
• the process and method PJM uses to track criteria violations that drive each transmission project identified in the Subregional Local Plans and RTEP; 3
• the difference, if any, between local transmission maintenance and local transmission planning; 3
• whether, pursuant to section 1.5.8 of its Operating Agreement, PJM should have opened a proposal window for baseline project b2562 under its current tariff and whether other factors justify the manner in which the project was planned; and
• how the transmission planning process used by each PJM transmission owner for Supplemental Projects complies with Order No. 890, specifically with respect to the coordination, openness, transparency, information exchange, comparability, and dispute resolution transmission planning principles as described by the Commission and where these processes are set forth in FERC-filed documents.
