SUPPLEMENTARY INFORMATION:

Title: Residue and Biomass Field Survey.

OMB Control Number: 0535–0251.

Type of Request: Intent to Seek Approval to Revise and Extend an Information Collection for 3 years.

Abstract: The primary objectives of the National Agricultural Statistics Service are to prepare and issue State and national estimates of crop production, livestock production, economic statistics, and environmental statistics related to agriculture and to conduct the Census of Agriculture and its follow-on surveys. This project is conducted as a cooperative effort with USDA's Agricultural Research Service (ARS).

The Residue and Biomass Field Survey will use as a sampling universe, fields in the South Fork watershed in central Iowa (Buckeye, IA). This study will investigate the effect crop residue removal has on soil and water quality. Measurements of crop residues will be compared with remotely sensed data to measure crop residue cover and soil tillage intensity for the entire watershed. The survey will be conducted in several phases. The farm operators will only be involved in three parts of the complete survey process. After obtaining the operators' permission, field enumerators will return several times during the growing season to measure and collect samples from the target areas. The farm operators will be contacted two other times to collect some additional data relating to cropping practices performed during the growing season.

Authority: These data will be collected under the authority of 7 U.S.C. 2204(a). Individually identifiable data

collected under this authority are governed by Section 1770 of the Food Security Act of 1985 as amended, 7 U.S.C. 2276, which requires USDA to afford strict confidentiality to non-aggregated data provided by respondents. This Notice is submitted in accordance with the Paperwork

Reduction Act of 1995 (Pub. L. 104–13) and Office of Management and Budget regulations at 5 CFR part 1320 (60 FR 44978, August 29, 1995).

NASS also complies with OMB Implementation Guidance, “Implementation Guidance for Title V of the E-Government Act, Confidential Information Protection and Statistical

Efficiency Act of 2002 (CIPSEA),” **Federal Register**, 72 FR 33376, June 15, 2007.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average a total of 70 minutes per respondent for the complete survey cycle.

ANNUAL ESTIMATED SAMPLE SIZE AND RESPONDENT BURDEN FOR 2016–2018

Survey	Sample size	Freq.	Responses				Non-response				Total burden hours
			Resp. count	Freq. × count	Min./ resp.	Burden hours	Nonresp. count	Freq. × count	Min./ nonr.	Burden hours

Total	100	146	230	62	3	65

¹ The operator does not need to be present for the field visits (measurement and harvesting), so no respondent burden is associated with these phases of the survey.

Respondents: Farmers, ranchers, and farm managers in the South Fork Watershed in Central Iowa.

Estimated Number of Respondents: 100

Estimated Total Annual Burden on Respondents: 65 hours

Comments: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency’s estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, through the use of appropriate automated, electronic, mechanical, technological or other forms of information technology collection methods.

SUPPLEMENTARY INFORMATION:

Title: Urban Agriculture Pilot Surveys.

OMB Control Number: 0535–NEW.

Type of Request: Intent to seek approval to conduct a new information collection for a period of three years.

Abstract: The National Agricultural Statistics Service (NASS) has traditionally been focused on production agriculture. This focus has omitted some urban agriculture, which is attracting increased interest from individuals and local governments. In contrast with traditional agriculture, agriculture in urbanized areas tends to be conducted in smaller areas and have less potential for sales. Yet, urban agriculture contributes to the Nation’s food security by providing local sources. NASS intends to integrate urban agriculture in future Censuses of Agriculture. In 2015, NASS conducted a small scale urban agriculture study in Baltimore, Maryland. This new data collection will build on the Baltimore project by refining methodology and procedures for: (1) Building the list of potential urban agricultural locations, (2) developing the questionnaire used to collect urban agricultural data, (3) data
