#### SUPPLEMENTARY INFORMATION:

#### Background

On September 30, 2010, pursuant to section 522 of the Surface Mining Control and Reclamation Act (SMCRA), 30 U.S.C. 1272(c), the State of Tennessee filed a petition with OSMRE to designate certain lands in the state as unsuitable for surface coal mining operations. These lands include the area within 600 feet of all ridge lines (a 1,200 foot corridor) lying within the North Cumberland Wildlife Management Area (NCWMA)—made up of the Royal Blue Wildlife Management Area, the Sundquist Wildlife Management Area, and the New River Wildlife Management Area (also known as the Brimstone Tract Conservation Easement)—and the Emory River Tracts Conservation Easement (ERTCE). The area under consideration for designation encompasses in total approximately 67,326 acres along 505 miles of ridgelines. In accordance with its responsibility to administer the federal coal program in Tennessee, OSMRE must process and make decisions on all petitions submitted to designate areas in the state as unsuitable for surface coal mining operations.

The petition includes two primary allegations with numerous allegations of fact and supporting statements. In primary allegation 1, the petitioner contends that the petition area should be designated unsuitable for surface coal mining operations because surface coal

mining in the area would be incompatible with existing state or local land use plans or programs. SMCRA 522(a)(3)(A), 30 U.S.C. 1272(a)(3)(A). In primary allegation 2, the petitioner contends that the OSMRE should designate the petition area as unsuitable for surface coal mining operations because such operations would affect fragile or historic lands, resulting in significant damage to important historic, cultural, scientific, and aesthetic values and natural systems. SMCRA 522(a)(3)(B), 30 U.S.C. 1272(a)(3)(B).

The Director, OSMRE, is required to make a decision on the petition. The draft EIS currently considers in detail the following alternatives for action by the Secretary:

- Alternative 1—do not designate any of the petition area as unsuitable for surface coal mining operations (no-action). There would be no change in types of permits applications accepted for evaluation.
- Alternative 2—designate the entire petition area (67,326 acres) as unsuitable for all surface coal mining operations (State's proposed action). No types of surface mining permits applications would be accepted for this area.
- Alternative 3—designate the state petition area (67,326 acres) while allowing remining and road access (agency's preferred alternative). The only acceptable types of permits would be permits for remining.
- Alternative 4—grant an expanded corridor designation of independently-identified ridgelines within the petition area (76,133 acres) while allowing remining and road access. The only acceptable types of permits would be permits for remining.
- Alternative 5—designate lands based on the presence of certain sensitive resources (12,331 acres). No types of surface mining permits would be accepted for this area.
- Alternative 6—designate a reduced corridor of 600 feet (39,106 acres). No types of surface mining permits applications would be accepted for this area.

In accordance with the applicable regulations under 30 CFR parts 762 and 764 and the requirements of the National Environmental Policy Act of 1969 (NEPA), as amended, OSMRE evaluated the merits of the unsuitability petition and analyzed the impacts of these alternatives. This analysis is reflected in the draft PED/EIS.

OSMRE has identified Alternative 3 as its preferred alternative.
