

to determine if this flexibility applies to their situation.

*F. Can areas use EMFAC2011 during the grace period?*

Yes, the conformity rule provides some flexibility for regional emissions analyses that are started before the end of the grace period. Analyses that begin before or during the grace period may continue to rely on EMFAC2011. The interagency consultation process should be used if it is unclear if an EMFAC2011-based analysis was begun before the end of the grace period. When the grace period ends, EMFAC2014 will become the EPA-approved motor vehicle emissions model for regional emissions analyses for transportation conformity in California.

CO, PM<sub>10</sub> and PM<sub>2.5</sub> hot-spot analyses for project-level conformity determinations can be based on EMFAC2011 if the analysis was begun before the end of the grace period, and if the final environmental document for the project is issued no more than three years after the issuance of the draft environmental document (see 40 CFR 93.111(c)). Therefore quantitative analysis already underway that were started before the end of the grace period using EMFAC2011 can be completed as long as 40 CFR 93.111(c) is satisfied. The interagency consultation process should be used if it is unclear whether an EMFAC2011-based analysis is covered by the circumstances described in the conformity rule.

*G. Future Updates to EMFAC*

On January 31, 2006, CARB submitted a letter to the EPA and to the California Division of the FHWA indicating the State's intention to make future revisions to update EMFAC. These EMFAC updates would reflect, among other new information, updated vehicle fleet data every three years. In California, MPOs and Air Districts have not been able to update vehicle fleet data embedded into EMFAC. The EPA's July 2004 final rule (69 FR 40004) states that new vehicle registration data must be used when it is available prior to the start of new conformity analyses and that states and MPOs are strongly encouraged to update the data at least every five years as described in EPA/USDOT December 2008 guidance.<sup>8</sup> The next update to the planning

assumptions in EMFAC is expected in 2017.

**III. Summary of EPA Actions**

As described in this notice, the EPA is approving and announcing the availability of EMFAC2014 as submitted by CARB on May 21, 2015 with the following limitations and conditions:

(1) The approval is limited to California.

(2) The approval is Statewide and applies to estimation of emissions of HC, CO, NO<sub>x</sub>, PM<sub>10</sub>, PM<sub>2.5</sub>, lead, and sulfur oxides. In addition, EMFAC2014 will be used in transportation conformity regional emissions analyses for pollutants and precursors that are applicable in a given nonattainment or maintenance area. The EPA is approving the emission factor elements of EMFAC2014, but not the associated default travel activity (e.g. Vehicle Miles Traveled). The EPA is also approving EMFAC2014's Emission Rate Mode that allows the model to estimate project-level emissions for CO, PM<sub>10</sub> and PM<sub>2.5</sub> conformity hot-spot analyses.

(3) A 24-month statewide transportation conformity grace period will be established beginning December 14, 2015 and ending December 14, 2017 for the transportation conformity uses described in (2) above.

Dated: December 2, 2015.

*Privacy Act Impact Assessment:* No impact(s).

*Needs and Uses:* The Commission is submitting this revised information collection to OMB under its emergency processing procedures. The Commission is seeking emergency OMB approval no later than 26 days after the collection is received at OMB. On February 22, 2012, the President signed the Spectrum Act, which, among other things, authorized the Commission to conduct incentive auctions, and directed that the Commission use this innovative tool for an incentive auction of broadcast television spectrum to help meet the Nation's growing spectrum needs. See Middle Class Tax Relief and Job Creation Act of 2012, Public Law 112-96, sections 6402, 6403, 125 Stat. 156 (2012) (Spectrum Act). The Commission's broadcast incentive auction (BIA) will have three main components: (1) A reverse auction in

which broadcast television licensees will submit bids to voluntarily relinquish their spectrum usage rights in exchange for defined shares of proceeds from the forward auction; (2) a repacking of the broadcast television bands; and (3) a forward auction of initial licenses for flexible use of the newly available spectrum.

The Commission is revising the currently approved information collection on FCC Form 175 to implement new collection requirements that are the result of (1) various Commission actions in which the Commission adopted general rules and procedures to govern the BIA, including rules applicable to applicants seeking to participate in the forward auction component of the BIA and, (2) the Commission's adoption of new and modified competitive bidding rules and requirements in the *Updating Part 1 Report and Order*, which will apply to applicants seeking to participate in a Commission auction, including the forward auction component of the BIA.

The Commission's auction rules and related requirements are designed to ensure that the competitive bidding process is limited to serious qualified applicants, deter possible abuse of the bidding and licensing process, and enhance the use of competitive bidding to assign Commission licenses in furtherance of the public interest. The information collected on FCC Form 175 is used by the Commission to determine if an applicant is legally, technically, and financially qualified to participate in a Commission auction. Additionally, if an applicant applies for status as a particular type of auction participant pursuant to Commission rules, the Commission uses information collected on FCC Form 175 to determine whether the applicant is eligible for the status requested. Commission staff reviews the information collected on FCC Form 175 for a particular auction as part of the pre-auction process, prior to the auction being held. Staff determines whether each applicant satisfies the Commission's requirements to participate in the auction and, if applicable, is eligible for the status as a particular type of auction participant if requested. Without the information collected on FCC Form 175, the Commission will not be able to determine if an applicant is legally, technically, and financially qualified to participate in a Commission auction, including the forward auction component of the BIA, and has complied with the various applicable regulatory and statutory auction requirements for such participation. The Commission plans to continue to use

the FCC Form 175 for all upcoming, non-reverse spectrum auctions, including those required or authorized to be conducted pursuant to the Spectrum Act, collecting only the information necessary for each particular auction.
