The Commission is revising the currently approved information collection on FCC Form 175 to implement new collection requirements that are the result of (1) various Commission actions in which the Commission adopted general rules and procedures to govern the BIA, including rules applicable to applicants seeking to participate in the forward auction component of the BIA and, (2) the Commission’s adoption of new and modified competitive bidding rules and requirements in the Updating Part 1 Report and Order, which will apply to applicants seeking to participate in a Commission auction, including the forward auction component of the BIA.

The Commission’s auction rules and related requirements are designed to ensure that the competitive bidding process is limited to serious qualified applicants, deter possible abuse of the bidding and licensing process, and enhance the use of competitive bidding to assign Commission licenses in furtherance of the public interest. The information collected on FCC Form 175 is used by the Commission to determine if an applicant is legally, technically, and financially qualified to participate in a Commission auction. Additionally, if an applicant applies for status as a particular type of auction participant pursuant to Commission rules, the Commission uses information collected on FCC Form 175 to determine whether the applicant is eligible for the status requested.

Commission staff reviews the information collected on FCC Form 175 for all upcoming, non-reverse spectrum auctions, including those required or authorized to be conducted pursuant to the Spectrum Act, collecting only the information necessary for each particular auction.

   Form Numbers: None.
   Frequency of Response: Occasionally.
   Affected Public: Insured state nonmember banks and state savings associations.
   Estimated Number of Respondents: 1.
   Estimated Number of Responses: 1.
   Total Annual Burden: 1,964 hours.
   General Description: The FDIC’s market risk capital rules (12 CFR part 324, subpart F) enhance risk sensitivity, increase transparency through enhanced disclosures and include requirements for the public disclosure of certain qualitative and quantitative information about the market risk of state nonmember banks and state savings associations (FDIC-supervised institutions). The market risk rule applies only if a bank holding company or bank has aggregated trading assets and trading liabilities equal to 10 percent or more of quarter-end total assets or $1 billion or more. Currently, only one FDIC-regulated entity meets the criteria. The information collection requirements are located at 12 CFR 324.203 through 324.212. The collection of information is necessary to ensure capital adequacy appropriate for the level of market risk.
   Section 324.203(a)(1) requires FDIC-supervised institutions to have clearly defined policies and procedures for determining which trading assets and trading liabilities are trading positions and specifies the factors a FDIC-supervised institution must take into account in drafting those policies and procedures. Section 324.203(a)(2) requires FDIC-supervised institutions to have clearly defined trading and hedging strategies for trading positions that are approved by senior management and specifies what the strategies must articulate. Section 324.203(b)(1) requires FDIC-supervised institutions to have clearly defined policies and procedures for actively managing all covered positions and specifies the minimum requirements for those policies and procedures. Sections 324.203(c)(4) through 324.203(c)(10) require the annual review of internal models and specify certain requirements for those models. Section 324.203(d) requires the internal audit group of a FDIC-supervised institution to prepare an annual report to the board of directors on the effectiveness of controls supporting the market risk measurement systems.
   Section 324.204(b) requires FDIC-supervised institutions to conduct quarterly backtesting. Section 324.205(a)(5) requires institutions to demonstrate to the FDIC the appropriateness of proxies used to capture risks within value-at-risk models. Section 324.205(c) requires institutions to develop, retain, and make available to the FDIC value-at-risk and profit and loss information on subportfolios for two years. Section 324.206(b)(3) requires FDIC-supervised institutions to have policies and procedures that describe how they determine the period of significant financial stress used to calculate the institution’s stressed value-at-risk models and to obtain prior FDIC approval for any material changes to these policies and procedures.
   Section 324.207(b)(1) details requirements applicable to a FDIC-supervised institution when the FDIC-supervised institution uses internal models to measure the specific risk of certain covered positions. Section 324.208 requires FDIC-supervised institutions to obtain prior written FDIC approval for incremental risk modeling. Section 324.209(a) requires prior FDIC approval for the use of a comprehensive risk measure. Section 324.209(c)(2) requires FDIC-supervised institutions to retain and report the results of supervisory stress testing. Section 324.210(f)(2)(i) requires FDIC-supervised institutions to document an internal analysis of the specific characteristics of each securitization position in order to demonstrate an
understanding of the position. Section 324.212 requires quarterly quantitative disclosures, annual qualitative disclosures, and a formal disclosure policy approved by the board of directors that addresses the approach for determining the market risk disclosures it makes.

Request for Comment

Comments are invited on: (a) Whether the collections of information are necessary for the proper performance of the FDIC’s functions, including whether the information has practical utility; (b) the accuracy of the estimates of the burden of the collections of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collections of information on respondents, including through the use of automated collection techniques or other forms of information technology. All comments will become a matter of public record.
