

amortization of the power investment consistent with the provisions of Department of Energy Order No. RA 6120.2. In accordance with Delegation Order No. 00-037.00A (October 25, 2013), and Section 5 of the Flood Control Act of 1944, the Administrator has determined that the proposed Willis power rate is consistent with applicable law and is the lowest possible rate to the customer consistent with sound business principles.

ENVIRONMENT

The environmental impact of the power rate increase proposal was evaluated in consideration of the Department of Energy's guidelines for implementing the procedural provisions of the National Environmental Policy Act and was determined to fall within the class of actions that are categorically excluded from the requirements of preparing either an Environmental Impact Statement or an Environmental Assessment (10 CFR part 1021, App. B to subpart D, § B1.1 "Changing rates & prices").

ORDER

In view of the foregoing and pursuant to the authority delegated to me by the Secretary of Energy, I hereby confirm, approve and place in effect on an interim basis, effective January 1, 2016, through September 30, 2019, the phased-in annual Willis power rate of \$1,282,836 for the sale of power and energy from Willis to the Sam Rayburn Municipal Power Agency, under Contract No. DE-PM75-85SW00117, as amended. This rate shall remain in effect on an interim basis through September 30, 2019, or until the FERC confirms and approves the rate on a final basis.

Abstract: Owners and operators of affected facilities are required to comply with both reporting and record-keeping requirements for the general provisions (40 CFR part 61, subpart A), as well as for the requirements in 40 CFR part 61, subpart E. This includes submitting initial notification reports, performance tests and periodic reports and results, and maintaining records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These reports are used by EPA to determine compliance with the standards.

Form Numbers: None.

Respondents/affected entities: Mercury ore processing facilities, mercury cell chlor-alkali plants, sludge incineration plants, and sludge drying plants.

Respondent's obligation to respond: Mandatory (40 CFR part 61, subpart E).

Estimated number of respondents: 107 (total).

Frequency of response: Initially, occasionally, semiannually and annually.

Total estimated burden: 20,600 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$2,070,000 (per year). There are no annualized capital/startup and operation & maintenance costs.

Changes in the Estimates: There is a small increase in the respondent burden due to an adjustment. In this ICR, we assume all existing sources will take some time each year to re-familiarize themselves with the regulatory requirements. This new assumption

results in an increase in the labor hours and cost.

Courtney Kerwin,

Acting Director, Collection Strategies Division.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you manufacture, process, or use the chemical substances contained in this rule. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Manufacturers, processors, or users of one or more subject chemical substances (NAICS codes 325 and 324110), e.g., chemical manufacturing and petroleum refineries.

B. What is the agency's authority for taking this action?

This action is issued under the authority in Section 5 of the Toxic Substances Control Act (TSCA), 15 U.S.C. 2604.

C. What action is the agency taking?

EPA is requesting new available data on the chlorinated paraffins, referenced in Unit II., in different industries and for different uses, to inform the risk assessments for chlorinated paraffins submitted as Toxic Substances Control Act (TSCA) Premanufacture Notices (PMNs). The risk assessments have been placed in a public docket. Any comments on the assessments or data to inform the assessments will be placed in the docket subject to Confidential Business Information considerations.

C. Why is EPA taking this action?

As a result of its TSCA new chemicals review, EPA preliminarily determined that the above mentioned chlorinated paraffin PMN substances may present an unreasonable risk to the environment for two independent reasons: (1) The PMN substances are expected to be persistent, bioaccumulative and toxic (PBT) chemicals; and (2) releases of the PMN substances may exceed concentrations of concern (COCs) to aquatic and sediment-dwelling
