Pursuant to Public Law 113–66, the Department of the Navy is required to decontaminate the public lands being relinquished and returned to the Department of the Interior to be managed by the Bureau of Land Management. The decontamination process has been initiated and the Bureau of Land Management continues to coordinate with the Department of the Navy. It has been determined that the lands may be contaminated with unfired 50 caliber and 20 mm rounds of ammunitions in addition to larger unexploded ordnance. The overall average density of munitions or munitions debris on site appears to be less than 1 pound per acre. The lands have been entered into the Military Munitions Response Program which will further assess risks to the public and identify mitigation measures—protective measures such as increased signage and public education warning of

UXO dangers—that may be necessary. Restrictions on excavations may be put into place.

The determination concerning the contaminated state of the land may be found at the Marine Corp Air Station Yuma Environmental Department Web site at <http://www.mcasymaenvironmental.com>. This document is posted under the Documents tab. The URL for the document is http://www.mcasymaenvironmental.com/docs/final_ecp_cmagr_outgrants_14_dec_2015_no_appendices.pdf.

The withdrawal relinquishment notice will be processed in accordance with Public Law 113–66, Section 204 of the Federal Land Policy and Management Act of 1976, (43 U.S.C. 1714), and the Bureau of Land Management regulations set forth in 43 CFR part 2370. Alternatives to the relinquishment may be considered as stated under Section 2922(d)(2) of Public Law 113–66.

Proposed Information Collection: National Park Service Centennial National Household Survey

AGENCY: National Park Service, Interior.

ACTION: Notice; request for comments.

SUMMARY: We (National Park Service) will ask the Office of Management and Budget (OMB) to approve an information collection (IC) concerning a national household survey that will be used to help determine the perceptions of the American public regarding the national park system. The collection will include no more than 40 cognitive

interviews to refine survey questions and a final survey instrument based on the findings from those interviews. As required by the Paperwork Reduction Act of 1995 and as part of our continuing efforts to reduce paperwork and respondent burden, we invite the general public and other federal agencies to take this opportunity to comment on this IC. We may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB Control Number.

DATES: To ensure that your comments on this IC are considered, we must receive them on or before February 22, 2016.

ADDRESSES: Direct all written comments on this IC to Phadrea Ponds, Information Collection Coordinator, National Park Service, 1201 Oakridge Drive, Fort Collins, CO 80525 (mail); or pponds@nps.gov (email). Please reference Information Collection 1024–0254—National Household Survey in the subject line.

SUPPLEMENTARY INFORMATION:

I. Abstract

On August 25, 2006—the 90th anniversary of the National Park Service (NPS)—Secretary of the Interior Dirk Kempthorne launched the National Park Centennial Initiative to prepare national parks for another century of conservation, preservation and enjoyment. Since then we have asked citizens, park partners, experts and other stakeholders what they envisioned for a second century of national parks. In celebration of our 100th anniversary in 2016, and to keep up with the initiative, we are proposing a national household survey to assess the quality of services available to the American public provided by the national parks. This survey will be used to assess the values and perceptions of both visitors and non-visitors needed to understand, sustain and enhance the relevancy of the national park system in an increasingly multicultural society.

We acknowledge that there are traditional in-park surveys of visitors at selected National Parks within the system each year; however, these park specific surveys cannot provide the
