

for Vessels of the Armed Forces” or “UNDS”) no-discharge zones for discharges from Armed Forces vessels may be established by either state prohibition or EPA prohibition following the procedures in 40 CFR part 1700. UNDS also provides that the Governor of any state may petition EPA and the Secretary of Defense to review any determination or standard promulgated under the UNDS program if there is significant new information that could reasonably result in a change to the determination or standard. This ICR discusses the information that is required from a state if it decides (1) to establish a NDZ by state prohibition or (2) to apply for a NDZ by EPA prohibition for the UNDS discharges for which EPA and DOD have determined that it is not reasonable or practicable to require a Marine Pollution Control Device to mitigate adverse effects on the marine environment. 40 CFR 1700.5. The ICR also discusses the information that is required from a state to submit a petition for review of EPA and DOD determinations that it is not reasonable or practicable to require a Marine Pollution Control Device for a particular UNDS discharge identified at 40 CFR 1700.5.

Abstract: The Beaches Environmental Assessment and Coastal Health (BEACH) Act amends the Clean Water Act (CWA) in part and authorizes the U.S. Environmental Protection Agency (EPA) to award BEACH Act Program Development and Implementation Grants to coastal and Great Lakes states, tribes, and territories (collectively referred to as states) for their beach monitoring and notification programs. The grants assist those states to develop and implement a consistent approach to monitor recreational water quality; assess, manage, and communicate health risks from waterborne microbial contamination; notify the public of pollution occurrences, and post beach advisories and closures to prevent public exposure to microbial pathogens. To qualify for a BEACH Act Grant, a state must submit information to EPA documenting that its beach monitoring and notification program is consistent with 11 performance criteria outlined in the *National Beach Guidance and Required Performance Criteria for Grants, 2014 Edition*.

Form Numbers: None.

Respondents/affected entities: Environmental and public health agencies in states, territories, and tribes.

Respondent's obligation to respond: Required (Environmental Assessment and Coastal Health (BEACH) Act amendment to the Clean Water Act (CWA)).

Estimated number of respondents: 38 (total).

Frequency of response: Annually & quarterly.

Total estimated burden: 91,276 hours (per year). Burden is defined at 5 CFR 1320.03(b)

Total estimated cost: \$15,453,308 (per year), includes \$11,353,146 annualized capital or operation & maintenance costs.

Changes in Estimates: There is an increase of 2,464 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to an additional respondent qualifying for a grant, however this increase is partially

offset by efficiencies in data processing and reporting.

The complete text of the public notice is available for viewing via the Commission's ECFS Web site by entering the docket number, WT Docket No. 12-354. In the notice, the Bureau extends the comment deadline for a public notice seeking comment on the appropriate methodology for determining the protected interference contours for existing 3650-3700 MHz wireless broadband licensees during a fixed transition period. Interested parties will now have until December 28, 2015 to file comments and until January 12, 2016 to file reply comments.

On December 7, 2015, the Wireless Innovation Forum (WinnForum) filed a request to extend the comment and reply comment deadline for the *3650-3700 MHz Band Protection Contours Public Notice* from December 10, 2015 until December 28, 2015 for comments and from December 28, 2015 to January 12, 2016 for reply comments. WinnForum states that the forum's Spectrum Sharing Committee established a Task Group, comprised of both Part 90 incumbent licensees and potential Part 96 entities, to address the questions raised in the *3650-3700 MHz Band Protection Contours Public Notice*. WinnForum explains that the Task Group has reached general agreement on specific aspects for Part 90 protections but they will not be able to ballot comments prior to the comment filing deadline.

As set forth in section 1.46(a) of the Commission's rules, "it is the policy of the Commission that extensions of time shall not be routinely granted." However, in this case, we believe it is in the public interest to grant an extension to promote industry consensus and allow all interested to include their comments on the record at the comment deadline, as the WinnForum represents future Part 96 users and representatives of existing 3650-3700 MHz licensees. This will ensure that Commission has a complete record and all parties can fully address the complicated issues raised in the *3650-3700 MHz Band Protection Contours Public Notice*. A limited extension will not negatively affect existing operators or delay deployment of new systems in the 3650-3700 MHz band.

This proceeding has been designated as a "permit-but-disclose" proceeding in accordance with the Commission's *ex parte* rules. Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda or other filings in the proceeding, the presenter
