SUPPLEMENTARY INFORMATION: This ICR seeks PRA authority for the National Guard Youth ChalleNge Job ChalleNge Evaluation information collection. The National Guard Youth ChalleNge program is one of a handful of interventions that have demonstrated positive, sustained impacts on the educational attainment and labor market outcomes of youth who are not in school or the labor force. The goal of Youth ChalleNge, a residential program, is to build confidence and maturity, teach practical life skills, and help youth obtain a high school diploma or GED. The program's numerous activities address its eight core pillars: leadership/followership, responsible citizenship, service to community, life-coping skills, physical fitness, health and hygiene, job skills, and academic excellence. To build on the success of Youth ChalleNge, the Employment and Training Administration issued \$12 million in grants in early 2015 for three Youth ChalleNge programs to: (1)

expand the program's target population to include youth who have been involved with the courts and (2) add an occupational training component, known as Job ChalleNge. The addition of the Job ChalleNge component will expand the residential time by five months and offer the following activities: (1) Occupation skills training, (2) individualized career and academic counseling, (3) work-based learning opportunities, and (4) leadership development activities.

The National Guard Youth ChalleNge Job ChalleNge Evaluation will help policymakers and program administrators determine the impacts of expanding Youth ChalleNge to court-involved youth and adding the Job ChalleNge component to the existing Youth ChalleNge model. The study will evaluate how these program enhancements are implemented and how effective they are, both for youth overall and for court-involved youth in particular. The study will address four research questions: (1) How were the programs implemented?, (2) What impacts did Youth ChalleNge and Job ChalleNge have on the outcomes of participants?, (3) To what extent did participation in Job ChalleNge change the overall impact of Youth ChalleNge on program participants?, and (4) To what extent did impacts vary for selected subpopulations of participants? The first research question will be addressed through an implementation study of the three grantee demonstrations. The remaining three questions will be addressed through an impact study of the Youth ChalleNge and Job ChalleNge programs. For the impact study, the feasibility of using randomized controlled trials to estimate program effectiveness will be assessed; if needed, a comparison group of youth from Youth ChalleNge sites that did not receive grants will be included in the study. Only youth who agree to participate in the study will be allowed to participate in the Youth ChalleNge and Job ChalleNge programs at the grantees included in the study; active consent will be obtained from youth 18 years of age or older and from a parent or guardian of youth under the age of 18.

This ICR consists of two types of proposed data collection instruments to be used in the National Guard Youth ChalleNge Job ChalleNge evaluation. The first is a Baseline Information Form that will be included in the Youth ChalleNge application packet and completed by youth. The form will collect demographic information as well as baseline measures of major outcome variables, including: current

employment, past delinquency, expectations about future education, work experience and other topics, and detailed contact information. The second is a set of site visit protocols. Site visits will occur twice. The first will occur early in the study period and will collect information about grantees' plans and procedures, the backgrounds and experiences of youth served, the nature of employers' involvement in the programs, and other topics. The second visit will occur later in the grant and evaluation periods and will collect information on whether and how plans and activities for the Youth ChalleNge and Job ChalleNge programs have changed since the first visit. Workforce Investment Act section 171(c)(2) authorizes this information collection. See 29 U.S.C. 2916(c)(2). A future ICR will include an 18-month follow up survey of youth in the Job ChalleNge treatment and control or comparison groups.

This proposed information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information if the collection of information does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. For additional information, see the related notice published in the **Federal Register** on July 23, 2015 (80 FR 43796).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB ICR Reference Number 201509-1291-002. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Main Fan Operation and Inspection (I–A, II–A, III, and V–A Mines) information collection. Potentially gassy (explosive) conditions underground are largely controlled by main fans. When accumulations of explosive gases, such as methane, are not swept from the mine by the main fans, they may reasonably be expected to contact an ignition source. The results of such contacts are usually disastrous, and multiple fatalities may be reasonably expected to occur. The Main Fan Operation and Inspection standard contains significantly more stringent requirements for main fans in gassy mines than for main fans in other mines. Regulations 30 CFR 57.22204, which only applies to gassy metal and nonmetal underground mines, requires main fans to have pressure-recording systems. The standard also requires main fans to be inspected daily while operating if persons are underground and certification made of such inspections by signature and date. Certifications and pressure recordings must be retained for one year and made available to authorized representatives

of the Secretary. Federal Mine Safety and Health Act of 1977 sections 101(a) and 103(h) authorize this information collection. See 30 U.S.C. 811 and 30 U.S.C. 813(h).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. See 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1219–0030.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on December 31, 2015. The DOL seeks to extend PRA authorization for this information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on September 23, 2015 (80 FR 57396).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**.
