**SUPPLEMENTARY INFORMATION:** On December 19, 2014, DOE published in the **Federal Register** a notice of proposed rulemaking (NPR) to update the energy conservation standards for residential dishwashers. 79 FR 76142. In the NPR, DOE invited written submission of public comments, to be received by February 17, 2015. On an email dated January 16, 2015, the Association for Home Appliance Manufacturers (AHAM) requested an extension of the public comment period by 60 days. AHAM stated in its request that AHAM required additional time to review the published analysis in order to prepare and submit comments accordingly. DOE has determined that extending the comment period to allow additional time for interested parties to submit comments is appropriate based on the foregoing reason. DOE believes an additional 30-days, providing a total comment period of 90 days, allows sufficient time for submitting inputs regarding DOE's analysis. Accordingly, DOE will consider any comments received by midnight of March 25, 2015, and deems any comments received by that time to be timely submitted.

Issued in Washington, DC, on February 12, 2015.

RIN 2120-AA64

#### Airworthiness Directives; the Boeing Company Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Supplemental notice of proposed rulemaking (NPRM); reopening of comment period.

**SUMMARY:** We are revising an earlier proposed airworthiness directive (AD) for certain The Boeing Company Model 757 airplanes. The NPRM proposed to require modifying the fuel quantity indication system (FQIS) wiring or fuel tank systems to prevent development of an ignition source inside the center fuel tank. The NPRM was prompted by fuel system reviews conducted by the

manufacturer. This action revises the NPRM by revising the applicability, including optional actions for cargo airplanes, and extending the compliance time. We are proposing this supplemental NPRM (SNPRM) to prevent ignition sources inside the center fuel tank, which, in combination with flammable fuel vapors, could result in fuel tank explosions and consequent loss of the airplane. Since these actions significantly change the corrective action options for cargo airplanes relative to the proposal in the NPRM, and because the cost estimate is significantly revised, we are reopening the comment period to allow the public the chance to comment on these proposed changes.

**DATES:** We must receive comments on this SNPRM by April 24, 2015.

**ADDRESSES:** You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.

##### Discussion

We issued an NPRM to amend 14 CFR part 39 by adding an AD that would apply to certain The Boeing Company Model 757 airplanes. The NPRM published in the **Federal Register** on March 1, 2012 (77 FR 12506). The NPRM proposed to require modifying the fuel quantity indication system (FQIS) wiring or fuel tank systems to prevent development of an ignition source inside the center fuel tank. We subsequently issued an NPRM (77 FR 33129, June 5, 2012) to reopen and extend the comment period for an additional 2 months.
