Clean Energy Manufacturing Innovation Institute on Smart Manufacturing Industry Day Workshop

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Notice of Open Meeting: Clean Energy Manufacturing Innovation Institute on Smart Manufacturing Industry Day Workshop.

SUMMARY: The Department of Energy (DOE) is announcing the following public workshop entitled, "Clean Energy Manufacturing Innovation Institute on Smart Manufacturing Industry Day Workshop." The intent is to discuss the specifics of the previously announced potential investment in SMART Manufacturing.

DATES: The public workshop will be held on Wednesday, February 25, 2015, 8:30 a.m.–4:30 p.m. at the Georgia Tech Global Learning Center.

ADDRESSES: The meeting location is: 84 5th St. NW., Atlanta, GA 30308.

FOR FURTHER INFORMATION CONTACT: Questions may be directed to—David Hardy at 202-586-8092 or by email at david.hardy@ee.doe.gov.

SUPPLEMENTARY INFORMATION:

Purpose of the Meeting: The purpose of this workshop is to bring together parties interested in responding to the upcoming Funding Opportunity Announcement (FOA) for the Clean Energy Manufacturing Innovation Institute on Smart Manufacturing. Smart Manufacturing represents an emerging opportunity faced broadly by the U.S. manufacturing sector to merge information and communications technologies with the manufacturing environment for the real-time management of energy, productivity, and costs in American factories all across the country. Smart Manufacturing was recently identified by private sector and university leaders in the White House's Advanced Manufacturing Partnership 2.0 as one of the highest priority manufacturing technology areas in need of federal

investment. Participants will hear presentations from government officials about the framework for the Institute, specific technical topic areas of interest, and anticipated proposal requirements; be provided an opportunity to ask questions about the Institute and the FOA; and have opportunity for networking discussions with other potential collaborators. DOE previously posted an associated Notice of Intent (NOI) entitled "Clean Energy Manufacturing Innovation Institute on Smart Manufacturing: Advanced Sensors, Controls, Platforms and Modeling for Manufacturing" regarding the planned competition on December 11, 2014.

Public Participation: Members of the public are welcome to attend the workshop. Registration is free and available on a first-come, first-served basis. Persons interested in attending this public workshop must register online by 4 p.m., February 23. Early registration is recommended because facilities are limited and, therefore, DOE may limit the number of participants from each organization. If time and space permit, onsite registration on the day of the public workshop will be provided beginning at 8:30 a.m. To register for the public workshop, please visit <https://www.eventbrite.com/e/industry-day-tickets-15743251489>. Registrants will receive confirmation after they have been accepted. If you need special accommodations due to a disability, please contact Kendra Pierson, 678-478-2030, email: Kendra@tcgconsultinginc.com, no later than February 23, 2015.

Issued in Washington, DC, on February 12, 2015.

Mark J. Shuart,

R&D Facilities Program Manager, Advance Manufacturing Office.

l. *Project Description:* The existing, unlicensed Zealand Falls Hydroelectric Project consists of: (1) A 27-foot-long, 3-inch diameter intake pipe with a 1/8-inch welded wire debris screen; (2) a 50.5-inch-long, 26.5-inch-wide, 31-inch-high settling tank; (3) a 1,374-foot-long penstock consisting of a 970-foot-long, 3-inch-diameter section connected to a 404-foot-long, 2-inch diameter section; (4) a 47.75-inch-wide, 41.25-inch-long generator shed; (5) a single turbine-generator unit with an installed capacity of 2.5 kilowatts; (6) a 6.5-foot-long, 3-inch diameter drain line; (7) a buried 300-foot-long, 48-volt transmission line connecting the turbine-generator unit to Zealand Falls Hut; and (8) appurtenant facilities. The project generates approximately 1,010 kilowatt-hours annually. The applicant proposes to continue operating the project in a run-of-river mode.

m. Due to the applicant's close coordination with federal and state agencies during preparation of the application, the inclusion of draft terms and conditions with the application, and the lack of any new construction in the applicant's proposal, we intend to waive scoping and expedite the licensing process. Based on a review of the application, resource agency consultation letters including the preliminary terms and conditions, and comments filed to date, Commission staff intends to prepare a single environmental assessment (EA). Commission staff determined that the issues that need to be addressed in its EA have been adequately identified during the pre-filing period, and no new issues are likely to be identified through additional scoping. The EA will consider assessing the potential effects of project operation on geology and soils, aquatic, terrestrial, threatened and endangered species, recreation, and cultural and historic resources.

n. A copy of the application is available for review at the Commission in the Public Reference Room or may be viewed on the Commission's Web site at <http://www.ferc.gov> using the "eLibrary" link.
