I. Obtaining Information and Submitting Comments

ACTION: Draft interim staff guidance; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is soliciting public comment on its draft Interim Staff Guidance (ISG) for Natural Phenomena Hazards (NPH) in Fuel Cycle Facilities. Fuel cycle facility licensees are required to conduct and maintain an Integrated Safety Analysis (ISA). This analysis must examine potential accident sequences caused by process deviations or other events internal to the facility and credible external events, including natural phenomena. During inspections of selected fuel cycle facilities to confirm that the facilities were in compliance with regulatory requirements to address natural phenomena hazards, the NRC staff identified several unresolved items (URIs). The ISG provides criteria and methods that the staff can use to review the treatment of NPH at fuel cycle facilities as evaluated in the facility ISA.

DATES: Submit comments by April 10, 2015. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received before this date.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):
