FEDERAL REGISTER

Vol. 80 Monday,

No. 158 August 17, 2015

Book 1 of 2 Books
Pages 49117–49324

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.ofr.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.fdsys.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $749 plus postage, or $808, plus postage, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 80 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

NATIONAL COUNCIL ON DISABILITY

5 CFR Chapter C

RIN 3480–AA00

Freedom of Information Act, Privacy Act, and Government in the Sunshine Act Procedures

AGENCY: National Council on Disability.

ACTION: Final rule.

SUMMARY: The National Council on Disability is finalizing regulations which implement the Freedom of Information Act, the Privacy Act of 1974, and the Government in the Sunshine Act. This rule describes the procedures for members of the public to request access to records. In addition, this document also describes procedures for the Council's responses to these requests, including the timeframe for response and applicable fees. These rules should be read in conjunction with the text of the Freedom of Information Act, the Privacy Act of 1974, the Government in the Sunshine Act, and the Uniform Freedom of Information Fee Schedule and Guidelines published by the Office of Management and Budget.

DATES: Effective September 16, 2015.

FOR FURTHER INFORMATION CONTACT: Joan Durocher, General Counsel, National Council on Disability, at 202–272–2004 or *jdurocher@ncd.gov*. To ensure proper handling, please include the docket number on your correspondence.

SUPPLEMENTARY INFORMATION: These regulations in a proposed rule were published for public comment in the **Federal Register** on June 11, 2015 (80 FR 33199), the comment period ended on August 10, 2015, and one commenter provided input. He is a private citizen and submitted his comments by mail.

I. Background

The commenter provided various comments on the proposed Freedom of Information Act procedures at part 10000. First, the commenter recommended that § 10000.6(b) should state that responses to a FOIA request should include the case number and the date of the original request. Reasoning that the absence of this information can cause confusion and wasted effort should an administrative appeal be necessary. We agree with the suggestion and § 10000.6(b) has been modified to reflect that correspondence responding to FOIA requests should include the case number and date of the original request.

In addition, the commenter had several comments about the proposed § 10000.10 concerning fees. The commenter stated that a page duplication fee of $.10 per page should be identified. The commenter states that the fee is supposed to be a proxy based on actual duplication costs. The commenter states actual duplication costs are substantially less than $.10 per page, but the standard rate for most agencies is $.10. FOIA regulation 5 U.S.C. 552(a)(4)(A)(ii) states fees shall be limited to reasonable standard charges for document search, duplication, and review. No specific fee scale was applied in the regulation, the Council does not intend to cite a specific cost for duplication. Not having specific rates listed in the regulation allows the Council to adjust costs accordingly when a price fluctuation exists which allows the Council flexibility to adjust rates without first necessitating a change in the regulation.

In addition, the commenter states in § 10000.10(c) the reference to the operating costs for a central processing unit is obsolete as well as the reference to the salary of the operators performing the search. FOIA regulation 28 CFR 16.10(a)(2) defines direct costs as expenses that an agency incurs in searching for and duplicating (and, in the case of commercial use requests, reviewing) records in order to respond to a FOIA request. For example, direct costs include the salary of the employee performing the work (*i.e.,* the basic rate of pay for the employee, plus 16 percent of that rate to cover benefits) and the cost of operating computers and other electronic equipment, such as photocopiers and scanners. The Council did not find it necessary to make changes to the section, the Council will adhere to all applicable statutes when assessing direct costs.

The commenter states in § 100000.10(d) the rules are ambiguous and should clearly state unambiguously that noncommercial requesters are not charged review fees. The commenter added that OMB guidance is quite clear that noncommercial requesters are not charged. The commenter also stated charging review fees following the results of an appeal in which the written initial determination was reversed or remanded is procedurally unfair and could impose needless hurdles. Council maintains there is sufficient clarity in the current language ''review fees shall be charged for requesters who make commercial use requests''. As to the assessment of review fees post an appeal, Council followed OMB guidelines when proposing review fees be assessed. We appreciate the commenter's perspective, the Council has decided to retain the language which mirrors the FOIA statute. Such fees are allowable under the FOIA regulations and therefore current language will remain unchanged.

Additionally, in § 10000.10(e) the commenter suggests changing the wording of ''statutory entitlements of 100 pages of duplication . . .'' To ''statutory entitlements of 100 pages of duplication or equivalent'', so that other types of duplicated media can be accommodated. With the ever-changing nature in which data is collected the Council agrees with the commenter and will add specific language to the final rule indicating that duplication costs equivalent of 100 pages in print or equivalent will be processed at no charge.

II. Regulatory Analysis and Notices

Executive Order 12866

This final rule is not a ''significant regulatory action'' within the meaning of Executive Order 12866. The economic impact of these regulations should be minimal, therefore, further economic evaluation is not necessary.

Regulatory Flexibility Act, as Amended

The Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Act of 1996 (5 U.S.C. 601 *et seq.*), generally requires an agency to prepare a regulatory flexibility analysis for any rule subject to notice and comment rulemaking under the

Administrative Procedure Act or any other statute, unless the agency certifies that the rule will not have a significant economic impact on a number of small entities. Small entities include small businesses, small organizations, and small government jurisdictions. The Council considered the effects on this final rule on small entities and certifies that these final rules will not have a significant impact on a substantial number of small entities.

Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104–4, requires each agency to assess the effects of its regulatory actions on state, local, and tribal governments, and the private sector. Agencies must prepare a written statement of economic and regulatory alternatives anytime a proposed or final rule imposes a new or additional enforceable duty on any state, local, or tribal government or the private sector that causes those entities to spend, in aggregate, $100 million or more (adjusted for inflation) in any one year (defined in UMRA as a ''federal mandate''). The Council determined that such a written statement is not required in connection with these final rules because they will not impose a federal mandate, as defined in UMRA.

National Environmental Policy Act

The Council analyzed this action for purposes of the National Environmental Policy Act of 1969, 42 U.S.C. 4321 *et seq.,* and determined that it would not significantly affect the environment; therefore, an environmental impact statement is not required.

Paperwork Reduction Act

Under the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.,* federal agencies must obtain approval from the Office of Management and Budget for each collection of information they conduct, sponsor, or require through regulations. This final rule does not include an information collection for purposes of the PRA.

Executive Order 13132 (Federalism)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 13132, dated August 4, 1999, and the Council determined that it does not have sufficient implications for federalism to warrant the preparation of a Federalism Assessment.

List of Subjects

5 CFR Part 10000

Administrative practice and procedure, Freedom of information, Confidential business information, Privacy.

5 CFR Part 10001

Administrative practice and procedure, Privacy.

5 CFR Part 10002

Administrative practice and procedure, Public availability of information, Meetings.

In consideration of the foregoing, the Council amends title 5, Code of Federal Regulations, by establishing chapter C, consisting of parts 10000–10049, to read as follows:

Chapter C—National Council On Disability

PART 10000—PROCEDURES FOR DISCLOSURE OF RECORDS UNDER THE FREEDOM OF INFORMATION ACT

PART 10001—IMPLEMENTATION OF THE PRIVACY ACT OF 1974

PART 10002—IMPLEMENTATION OF THE GOVERNMENT IN THE SUNSHINE ACT

PARTS 10003–10049 [RESERVED]

PART 10000—PROCEDURES FOR DISCLOSURE OF RECORDS UNDER THE FREEDOM OF INFORMATION ACT

Sec.

Authority: 5 U.S.C. 552, as amended; E.O. 12600, 52 FR 23781, 3 CFR 1987, 1987 Comp., p. 235; 3 CFR 235.

§ 10000.1 Purpose and scope.

The regulations in this part implement the provisions of the FOIA.

§ 10000.2 Definitions.

The following definitions apply to this part:

Chairperson means the Chairperson of the Council, as appointed by the President, or any person to whom the Council has delegated authority for the matter concerned.

Chief FOIA Officer means the senior official to whom the Council delegated responsibility for efficient and appropriate compliance with the FOIA, currently delegated to the General Counsel.

Commercial use request means a FOIA request from or on behalf of a requester that seeks information for a use or purpose that furthers their commercial, trade, or profit interests, including pursuit of those interests through litigation.

Confidential business information means trade secrets or confidential or privileged commercial or financial information submitted to the Council by a person that may be protected from disclosure under Exemption 4 of the FOIA.

Council means the National Council on Disability, established by the Rehabilitation Act of 1973 (29 U.S.C. 780 *et seq.*), as amended, and amended by the Workforce Innovation and Opportunity Act (Pub. L. 113–128) in 2014.

Direct costs are those expenses that an agency incurs in searching for and duplicating (and, in the case of commercial use requests, reviewing) records in order to respond to a FOIA request. For example, direct costs include the salary of the employee performing the work (*i.e.,* the basic rate of pay for the employee, plus 16 percent of that rate to cover benefits) and the cost of operating computers and other electronic equipment, such as photocopiers and scanners. Direct costs do not include overhead expenses such as the costs of space, and of heating or lighting a facility.

Educational institution means a preschool, a public or private elementary or secondary school, an institution of undergraduate or graduate higher education, an institution of professional education, or an institution of vocational education, which operates a program or programs of scholarly research. A requester in this fee category must show that the request is authorized by, and is made under the auspices of, an educational institution and that the records are not sought for a commercial use, but rather are sought to further scholarly research. To fall within this fee category, the request must serve the scholarly research goals of the institution rather than an individual research goal.

(1) Example 1. A request from a professor of geology at a university for records relating to soil erosion, written on letterhead of the Department of Geology, would be presumed to be from an educational institution.

(2) Example 2. A request from the same professor of geology seeking drug information from the Food and Drug Administration in furtherance of a murder mystery he is writing would not be presumed to be an institutional request, regardless of whether it was written on institutional stationery.

(3) Example 3. A student who makes a request in furtherance of the completion of a

course of instruction would be presumed to be carrying out an individual research goal, rather than a scholarly research goal of the institution and would not qualify as part of this fee category.

Fee waiver means the waiver or reduction of fees if a requester can demonstrate meeting the statutory standard that the information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester.

FOIA means the Freedom of Information Act, 5 U.S.C. 552, as amended. The FOIA applies to requests for agency records.

FOIA Officer means the individual to whom the Council has delegated authority to carry out the Council's day-to-day FOIA administration, currently delegated to the Council's Attorney Advisor.

FOIA Public Liaison means the individual designated by the Chairperson to assist FOIA requesters with concerns about the Council's processing of their FOIA request, including assistance in resolving disputes, currently delegated to the Council's Attorney Advisor.

Non-commercial scientific institution means an organization operated solely for the purpose of conducting scientific research, the results of which are not intended to promote any product or research, and not operated on a commercial basis.

Person includes an individual, partnership, corporation, association, or public or private organization other than an agency.

Record means any writing, drawing, map, recording, diskette, DVD, CD–ROM, tape, film, photograph, or other documentary material, regardless of medium, by which information is preserved, including documentary material stored electronically.

Redact means delete or mark over.

Representative of the news media is any person or entity organized and operated to publish or broadcast news to the public that actively gathers information of potential interest to a segment of the public, uses its editorial skills to turn the raw materials into a distinct work, and distributes that work to an audience. The term ''news'' means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations that broadcast ''news'' to the public at large and publishers of periodicals that disseminate ''news'' and make their products available through a variety of means to the general public, including news organizations that disseminate solely on the Internet. A request for records supporting the news-dissemination function of the requester shall not be considered to be for a commercial use. ''Freelance'' journalists who demonstrate a solid basis for expecting publication through a news media entity shall be considered as a representative of the news media. A publishing contract would provide the clearest evidence that publication is expected; however, components shall also consider a requester's past publication record in making this determination.

Requester category means one of the three categories defined by the Uniform Freedom of Information Fee Schedule and Guidelines published by the Office of Management and Budget (OMB Fee Guidelines) in which requesters will be placed for the purpose of determining what if any fees for search, review, or duplication may be assessed. They are:

(1) Commercial requestors;

(2) Non-commercial scientific or educational institutions or representatives of the news media; and

(3) All other requestors.

Submitter means any person or entity from whom the Council obtains confidential or privileged business information, directly or indirectly.

Unusual circumstances exist when:

(1) The need to search for and collect the requested records from physically separate facilities;

(2) The need to search for, collect and appropriately examine a voluminous amount of separate and distinct records which are demanded in a single request; or

(3) The need for consultation, which shall be conducted with all practicable speed, with another agency having a substantial interest in the determination of the request.

§ 10000.3 Availability of records.

Records that are required by the FOIA to be made available for public inspection and copying may be accessed through the Agency's Web site at *www.ncd.gov.* The Council is responsible for determining which of its records are required to be made publicly available, as well as identifying additional records of interest to the public that are appropriate for public disclosure, and for posting and indexing such records. The Council shall ensure that its Web site of posted records and indices is reviewed and updated on an ongoing basis. The Council's FOIA Public Liaison can assist individuals in locating records particular to a component.

§ 10000.4 Categories of exemptions.

(a) The FOIA does not require disclosure of matters that are:

(1) Specifically authorized under criteria established by an executive order to be kept secret in the interest of national defense or foreign policy and are, in fact, properly classified under executive order;

(2) Related solely to the internal personnel rules and practices of the Council;

(3) Specifically exempted from disclosure by statute (other than the Government in the Sunshine Act, 5 U.S.C. 552b, as amended), provided that such statute:

(i)(A) Requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue; or

(B) Establishes particular criteria for withholding or refers to particular types of matters to be withheld; and

(ii) If enacted after October 28, 2009, specifically cites to Exemption 3 of the FOIA, 5 U.S.C. 552(b)(3);

(4) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(5) Inter-agency or intra-agency memoranda or letters, which would not be available at law to a party other than an agency in litigation with the Council;

(6) Personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;

(7) Records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information:

(i) Could reasonably be expected to interfere with enforcement proceedings;

(ii) Would deprive a person of a right to a fair trial or impartial adjudication;

(iii) Could reasonably be expected to constitute an unwarranted invasion of personal privacy;

(iv) Could reasonably be expected to disclose the identity of a confidential source, including a state, local, or foreign agency or authority or any private institution that furnished information on a confidential basis, and, in the case of a record or information compiled by a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source;

(v) Would disclose techniques and procedures for law enforcement investigations or prosecutions or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law; or

(vi) Could reasonably be expected to endanger the life or physical safety of any individual.

(8) Contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or

(9) Geological and geophysical information and data, including maps, concerning wells.

§ 10000.5 Request for records.

(a) You may request copies of records under this part by email to *FOIA@ncd.gov* or in writing addressed to FOIA Officer, National Council on Disability, 1331 F Street NW., Suite 850, Washington, DC 20004.

(b) Your request shall reasonably describe the records sought with sufficient specificity, and when possible, include names, dates, and subject matter, in order to permit the FOIA Officer to locate the records with a reasonable amount of effort. If the FOIA Officer cannot locate responsive records based on your written description, you will be notified and advised that further identifying information is necessary before the request can be fulfilled. Although requests are considered either FOIA or Privacy Act requests, the Council processes requests for records in accordance with both laws so as to provide the greatest degree of lawful access while safeguarding an individual's personal privacy.

(c) Your request should specify your preferred form or format (including electronic formats) for the records you seek. We will accommodate your request if the record is readily available in that form or format. When you do not specify the form or format of the response, we will provide responsive records in the form or format most convenient to us.

§ 10000.6 Responsibility for responding to requests.

(a) *In general.* The Council delegates authority to grant or deny FOIA requests in whole or in part to the Chief FOIA Officer. When conducting a search for responsive records, the FOIA Officer generally will search for records in existence on the date of the search. If another date is used, the FOIA Officer shall inform the requester of the date used.

(b) *Responses.* The Chief FOIA Officer will notify you of his or her determination to grant or deny your FOIA request in the time frame stated in § 10000.8. The Council will release reasonably segregable non-exempt information. For any adverse determination, including those regarding any disputed fee matter; a denial of a request for a fee waiver; or a determination to withhold a record, in whole or in part, that a record does not exist or cannot be located; or to deny a request for expedited processing; the notice shall include the following information:

(1) FOIA case number and date of the original request;

(2) The name(s) of any person responsible for the determination to deny the request in whole or in part;

(3) A brief statement of the reason(s) for the denial, including any FOIA exemption applied in denying the request. The FOIA Officer will indicate, if technically feasible, the amount of information deleted and the exemption under which a deletion is made on the released portion of the record, unless including that indication would harm an interest protected by the exemption;

(4) An estimate of the volume of information withheld, if applicable. This estimate does not need to be provided if it is ascertainable based on redactions in partially disclosed records or if the disclosure of the estimate would harm an interest protected by an applicable FOIA exemption; and

(5) A statement that the adverse determination may be appealed and a description of the requirements for an appeal under § 10000.7.

(c) *Consultation, referral, and coordination.* When reviewing records located by the Council in response to a request, the Council shall determine whether another agency of the Federal Government is better able to determine whether the record is exempt from disclosure under the FOIA and, if so, whether it should be released as a matter of discretion. As to any such record, the Council shall proceed in one of the following ways:

(1) *Consultation.* When records originated with the Council, but contain within them information of interest to another agency, the Council should typically consult with that other agency prior to making a release determination.

(2) *Referral.* (i) When the Council believes that a different agency is best able to determine whether to disclose the record, the Council typically should refer the responsibility for responding to the request regarding that record, as long as the referral is to an agency that is subject to the FOIA. Ordinarily, the agency that originated the record will be presumed to be best able to make the disclosure determination. However, if the Council and the originating agency jointly agree that the former is in the best position to respond regarding the record, then the record may be handled as a consultation.

(ii) Whenever the Council refers any part of the responsibility for responding to a request to another agency, it shall document the referral, maintain a copy of the record that it refers, and notify the requester of the referral and inform the requester of the name(s) of the agency to which the record was referred, including that agency's FOIA contact information.

(3) *Coordination.* The standard referral procedure is not appropriate where disclosure of the identity of the agency to which the referral would be made could harm an interest protected by an applicable exemption, such as the exemptions that protect personal privacy or national security interests. For example, if the Council responding to a request for records on a living third party locates within its files records originating with a law enforcement agency, and if the existence of that law enforcement interest in the third party was not publicly known, then to disclose that law enforcement interest could cause an unwarranted invasion of the personal privacy of the third party. Similarly, if the Council locates within its files material originating with an Intelligence Community agency, and the involvement of that agency in the matter is classified and not publicly acknowledged, then to disclose or give attribution to the involvement of that Intelligence Community agency could cause national security harms. In such instances, in order to avoid harm to an interest protected by an applicable exemption, the Council should coordinate with the originating agency to seek its views on the disclosability of the record. The release determination for the record that is the subject of the coordination should then be conveyed to the requester by the Council.

§ 10000.7 Administrative appeals.

(a) You may appeal an adverse determination related to your FOIA request, or the Council's failure to respond to your FOIA request within the prescribed time limits, to the Executive Director, National Council on Disability, 1331 F Street, NW., Suite 850, Washington, DC 20004.

(b) Your appeal must be in writing and must be postmarked or electronically received by the Executive Director within 60 days of the date of the letter denying your request, in whole or in part. For the most expeditious handling, your appeal letter and envelope should be marked ''Freedom of Information Act Appeal'' and reference the request number.

(c) The Executive Director shall respond to all administrative appeals in writing and within the time frame stated in § 10000.8(d). If the decision affirms, in whole or in part, the Chief FOIA Officer's determination, the letter shall contain a statement of the reasons for the affirmance, including any FOIA exemption(s) applied, and will inform you of the FOIA's provisions for court review. If the Executive Director reverses or modifies the Chief FOIA Officer's determination, in whole or in part, you will be notified in writing and your request will be reprocessed in accordance with that decision. The Council may work with Office of Government Information Services (OGIS) to resolve disputes between FOIA requestors and the Council. A requester may also contact OGIS in the following ways: Via mail to OGIS, National Archives and Records Administration, 8601 Adelphi Road—OGIS, College Park, MD 20740 (*ogis.archives.gov*), via email at *ogis@nara.gov,* or via the telephone at 202–741–5770 or 877–684–6448. Facsimile is also available at 202–741–5769.

§ 10000.8 Timeframe for Council's response to a FOIA request or administrative appeal.

(a) *In general.* The Council ordinarily shall respond to requests according to their order of receipt.

(b) *Multi-track processing.* (1) The Council may use two or more processing tracks by distinguishing between simple and more complex requests based on the amount of work and/or time needed to process the request, including through limits based on the number of pages involved. If the Council does so, it shall advise requesters in its slower track(s) of the limits of its faster track(s).

(2) Using multitrack processing, the Council may provide requesters in its slower track(s) with an opportunity to limit the scope of their requests in order to qualify for faster processing within the specified limits of the Council's faster track(s). In doing so, the Council will contact the requester by telephone, letter, or email, whichever is more efficient in each case.

(c) *Initial decisions.* The Council shall determine whether to comply with a FOIA request within 20 working days after our receipt of the request, unless the time frame for response is extended due to unusual circumstances as further described in paragraph (f) of this section. A request is received by the Council, for purposes of commencing the 20-day timeframe for its response, on the day it is properly received by the FOIA Officer. The request must meet all requirements described by these regulations and the FOIA before the 20-day timeframe commences.

(d) *Administrative appeals.* The Executive Director shall determine whether to affirm or overturn a decision subject to administrative appeal within 20 working days after receipt of the appeal, unless the time frame for response is extended in accordance with paragraph (e) of this section.

(e) *Tolling timelines.* We may toll the 20-day timeframe set forth in paragraph (c) or (d) of this section:

(1) One time to await information that we reasonably requested from you, as permitted by 5 U.S.C. 552(a)(6)(A)(iii)(I);

(2) As necessary to clarify with you any fee-related issue.

(3) If we toll the time frame for response under paragraphs (e)(1) or (2) of this section, the tolling period ends upon our receipt of your response.

(f) *Unusual circumstances.* In the event of unusual circumstances, we may extend the time frame for response provided in paragraph (c) or (d) of this section by providing you with written notice of the unusual circumstances and the date on which a determination is expected to be made. Where the extension is for more than ten working days, we will provide you with an opportunity either to modify your request so that it may be processed within the statutorily-prescribed time limits or to arrange an alternative time period for processing your request or modified request.

(g) *Aggregating requests.* When we reasonably believe that multiple requests submitted by a requester, or by a group of requesters acting in concert, involving clearly related matters, can be viewed as a single request that involves unusual circumstances, we may aggregate the requests for the purposes of fees and processing activities.

(h) *Expedited processing.* You may request that the Council expedite processing of your FOIA request. To receive expedited processing, you must demonstrate a compelling need for such processing.

(1) For requests for expedited processing, a ''compelling need'' involves:

(i) Circumstances in which the lack of expedited treatment could reasonably be expected to pose an imminent threat to the life or physical safety of an individual; or

(ii) A request made by a person primarily engaged in disseminating information, with a time urgency to inform the public of actual or alleged federal government activity.

(2) Your request for expedited processing must be in writing and may be made at the time of the initial FOIA request or at any later time.

(3) Your request for expedited processing must include a statement, certified to be true and correct to the best of your knowledge and belief, explaining in detail the basis for requesting expedited processing. If you are a person primarily engaged in disseminating information, you must establish a particular urgency to inform the public about the federal government activity involved in the request.

(4) The FOIA Officer will decide whether to grant or deny your request for expedited processing and notify the requester within ten calendar days of receipt. You will be notified in writing of the determination. Appeals of adverse decisions regarding expedited processing shall be processed expeditiously.

§ 10000.9 Business information.

(a) *Designation of confidential business information.* In the event a FOIA request is made for confidential business information previously submitted to the Government by a commercial entity or on behalf of it (hereinafter ''submitter''), the regulations in this section apply. When submitting confidential business information, you must use a good-faith effort to designate, by use of appropriate markings, at the time of submission or at a reasonable time thereafter, any portions of your submission that you consider to be exempt from disclosure under FOIA Exemption 4, 5 U.S.C. 552(b)(4). Your designation will expire ten years after the date of submission unless you request, and provide justification for, a longer designation period.

(b) *Notice to submitters.* (1) Whenever you designate confidential business information as provided in paragraph (a) of this section, or the Council has reason to believe that your submission may contain confidential business information, we will provide you with prompt written notice of a FOIA request that seeks your business information. The notice shall:

(i) Give you an opportunity to object to disclosure of your information, in whole or in part;

(ii) Describe the business information requested or include copies of the requested records or record portions containing the information; and

(iii) Inform you of the time frame in which you must respond to the notice.

(2) In cases involving a voluminous number of submitters, notice may be made by posting or publishing the notice in a place or manner reasonably likely to accomplish it.

(c) *Opportunity to object to disclosure.* The Council shall allow you a reasonable time to respond to the notice described in paragraph (b) of this section. If you object to the disclosure of your information, in whole or in part, you must provide us with a detailed written statement of your objection. The statement must specify all grounds for withholding any portion of the information under any FOIA exemption and, when relying on FOIA Exemption 4, it must explain why the information is a trade secret or commercial or financial information that is privileged and confidential. If you fail to respond within the time frame specified in the notice, the Council will conclude that you have no objection to disclosure of your information. The Council will only consider information that we receive within the time frame specified in the notice.

(d) *Notice of intent to disclose.* The Council will consider your objection and specific grounds for non-disclosure in deciding whether to disclose business information. Whenever the Council decides to disclose business information over your objection, we will provide you with written notice that includes:

(1) A statement of the reasons why each of your bases for withholding were not sustained;

(2) A description of the business information to be disclosed; and

(3) A specified disclosure date, which shall be a reasonable time after the notice.

(e) *Exceptions to the notice requirement.* The notice requirements of paragraphs (c) and

(d) of this section shall not apply if:

(1) The Council determines that the information is exempt under the FOIA;

(2) The information lawfully has been published or has been officially made available to the public;

(3) Disclosure of the information is required by statute (other than the FOIA) or by a regulation issued in accordance with the requirements of Executive Order 12600;

(4) The designation made by the submitter under paragraph (a) of this section appears obviously frivolous, except that, in such a case, the Council shall, within a reasonable time prior to the date the disclosure will be made, give the submitter written notice of the final decision to disclose the information.

(f) *Requester notification.* The Council shall notify a requester whenever it provides the submitter with notice and an opportunity to object to disclosure; whenever it notifies the submitter of its intent to disclose the requested information; and whenever a submitter files a lawsuit to prevent the disclosure of the information.

§ 10000.10 Fees.

(a) We will charge fees that recoup the full allowable direct costs we incur in processing your FOIA request. Fees may be charged for search, review or duplication. We will use the most efficient and least costly methods to comply with your request.

(b) With regard to manual searches for records, we will charge the salary rate(s) (calculated as the basic rate of pay plus 16 percent of that basic rate to cover benefits) of the employee(s) performing the search.

(c) In calculating charges for computer searches for records, we will charge at the actual direct cost of providing the service, including the cost of operating the central processing unit directly attributable to searching for records potentially responsive to your FOIA request and the portion of the salary of the operators/programmers performing the search.

(d) Review fees shall be charged for requesters who make commercial use requests. Review fees shall be assessed only for the initial review—that is the review undertaken the first time we analyze the applicability of a specific exemption to a particular record or portion of a record. Records or portions of records withheld in full under an exemption that is subsequently determined not to apply may be reviewed again to determine the applicability of other exemptions not previously considered. We may assess the costs for such subsequent review. Review fees are charged at the same rates as those charged for a search.

(e) Notice of anticipated fees in excess of $25.00:

(1) When the Council determines or estimates that the fees to be assessed in accordance with this section will exceed $25.00, the Council shall notify the requester of the actual or estimated amount of the fees, including a breakdown of the fees for search, review or duplication, unless the requester has indicated a willingness to pay fees as high as those anticipated. If only a portion of the fee can be estimated readily, the Council shall advise the requester accordingly. If the requester is a noncommercial use requester, the notice shall specify that the requester is entitled to the statutory entitlements of 100 pages of duplication or equivalent at no charge. For example, 100 pages burned to a single CD would be considered equivalent to 100 pages of duplication. And, if the requester is charged search fees, two hours of search time at no charge, and shall advise the requester whether those entitlements have been provided.

(2) In cases in which a requester has been notified that the actual or estimated fees are in excess of $25.00, the request shall not be considered received and further work will not be completed until the requester commits in writing to pay the actual or estimated total fee, or designates some amount of fees the requester is willing to pay, or in the case of a noncommercial use requester who has not yet been provided with the requester's statutory entitlements, designates that the requester seeks only that which can be provided by the statutory entitlements. The requester must provide the commitment or designation in writing, and must, when applicable, designate an exact dollar amount the requester is willing to pay. The Council is not required to accept payments in installments.

(3) If the requester has indicated a willingness to pay some designated amount of fees, but the Council estimates that the total fee will exceed that amount, the Council shall toll the processing of the request when it notifies the requester of the estimated fees in excess of the amount the requester has indicated a willingness to pay. The Council shall inquire whether the requester wishes to revise the amount of fees the requester is willing to pay or modify the request. Once the requester responds, the time to respond will resume from where it was at the date of the notification.

(4) The Council shall make available its FOIA Public Liaison or other FOIA professional to assist any requester in reformulating a request to meet the requester's needs at a lower cost.

(f) We will charge you the full costs of providing you with the following services:

(1) Certifying that records are true copies; or

(2) Sending records by special methods such as express or certified mail.

(g) We may assess interest charges on an unpaid bill starting on the 31st calendar day following the day on which the billing was sent. Interest shall be at the rate prescribed in 31 U.S.C. 3717 and will accrue from the date of the billing.

(h) We will not charge a search fee for requests by educational institutions, non-commercial scientific institutions, or representatives of the news media. A search fee will be charged for a commercial use requests.

(i) Except for a commercial use request, we will not charge you for the

first 100 pages of duplication and the first two hours of search.

(j) If the Council fails to comply with the time limits in which to respond to a request, and if no unusual or exceptional circumstances, as those terms are defined by the FOIA, apply to the processing of the request, it may not charge search fees, or, in the instances of requests from requesters requests by educational institutions (unless the records are sought for a commercial use), noncommercial scientific institutions, or representatives of the news media, may not charge duplication fees.

(k) After processing, actual fees must be equal to or exceed $25, for the Council to require payment of fees.

(l) You may not file multiple requests, each seeking portions of a document or documents, solely for the purpose of avoiding payment of fees. When the Council reasonably believes that a requester, or a group of requesters acting in concert, has submitted requests that constitute a single request involving clearly related matters, we may aggregate those requests and charge accordingly.

(m) We may not require you to make payment before we begin work to satisfy the request or to continue work on a request, unless:

(1) We estimate or determine that the allowable charges that you may be required to pay are likely to exceed $250; or

(2) You have previously failed to pay a fee charged within 30 days of the date of billing.

(n) Upon written request, we may waive or reduce fees that are otherwise chargeable under this part. If you request a waiver or reduction in fees, you must demonstrate that a waiver or reduction in fees is in the public interest because disclosure of the requested records is likely to contribute significantly to the public understanding of the operations or activities of the government and is not primarily in your commercial interest.

(1) In deciding whether disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of operations or activities of the government, the Council shall consider all four of the following factors:

(i) The subject of the request must concern identifiable operations or activities of the Federal Government, with a connection that is direct and clear, not remote or attenuated.

(ii) Disclosure of the requested records must be meaningfully informative about government operations or activities in order to be ''likely to contribute'' to an increased public understanding of those operations or activities. The disclosure of information that already is in the public domain, in either the same or a substantially identical form, would not contribute to such understanding where nothing new would be added to the public's understanding.

(iii) The disclosure must contribute to the understanding of a reasonably broad audience of persons interested in the subject, as opposed to the individual understanding of the requester. A requester's expertise in the subject area as well as the requester's ability and intention to effectively convey information to the public shall be considered. It shall be presumed that a representative of the news media will satisfy this consideration.

(iv) The public's understanding of the subject in question must be enhanced by the disclosure to a significant extent. However, components shall not make value judgments about whether the information at issue is ''important'' enough to be made public.

(2) To determine whether disclosure of the requested information is primarily in the commercial interest of the requester, the Council shall consider the following factors:

(i) The Council shall identify any commercial interest of the requester, as defined in § 10000.2, that would be furthered by the requested disclosure. Requesters shall be given an opportunity to provide explanatory information regarding this consideration.

(ii) A waiver or reduction of fees is justified where the public interest is greater than any identified commercial interest in disclosure. The Council ordinarily shall presume that where a news media requester has satisfied the public interest standard, the public interest will be the interest primarily served by disclosure to that requester. Disclosure to data brokers or others who merely compile and market government information for direct economic return shall not be presumed to primarily serve the public interest.

(3) Where only some of the records to be released satisfy the requirements for a waiver of fees, a waiver shall be granted for those records.

(4) Requests for a waiver or reduction of fees should be made when the request is first submitted to the component and should address the criteria referenced above. A requester may submit a fee waiver request at a later time so long as the underlying record request is pending or on administrative appeal. When a requester who has committed to pay fees subsequently asks for a waiver of those fees and that waiver is denied, the requester shall be required to pay any costs incurred up to the date the fee waiver request was received.

PART 10001—IMPLEMENTATION OF THE PRIVACY ACT OF 1974

Sec.

Authority: 5 U.S.C. 552a.

§ 10001.1 Purpose and scope.

The regulations in this part implement the provisions of the Privacy Act.

§ 10001.2 Definitions.

The following terms used in this part are defined in the Privacy Act: *Individual, maintain, record, routine use, statistical record, system of records.* The following definitions also apply in this part:

Chairperson means the Chairperson of the Council, as appointed by the President, or any person to whom the Council has delegated authority for the matter concerned.

Council means the National Council on Disability, established by the Rehabilitation Act of 1973 (29 U.S.C. 780 *et seq.*), as amended, and amended by the Workforce Innovation and Opportunity Act (Pub. L. 113–128) in 2014.

General Counsel means the Council's principal legal advisor, or his or her designee.

Privacy Act means the Privacy Act of 1974, 5 U.S.C. 552a, as amended.

Privacy Act Officer means the person designated by the Council to be responsible for the day-to-day administration of the Privacy Act, currently delegated to the Council's Management Analyst.

§ 10001.3 Privacy Act requests.

(a) *Requests to determine if you are the subject of a record.* You may request that the Council inform you if we maintain a system of records that contains records about you. Your request must follow the procedures described in paragraph (b) of this section.

(b) *Requests for access.* You may request access to a Council record about you in writing or by appearing in person. You should direct your request to the Privacy Act Officer. Written requests may be sent to: Privacy Act

Officer, National Council on Disability, 1331 F Street NW., Suite 850, Washington, DC 20004. Your request should include the following information:

(1) Your name, address, and telephone number;

(2) The system(s) of records in which the requested information is contained; and

(3) At your option, authorization for copying expenses.

(4) *Written requests.* In addition to the information described in paragraphs (b)(1) through (3) of this section, written requests must include a statement affirming your identity, signed by you and witnessed by two persons (including witnesses' addresses) or notarized.

(i) *Witnessed.* If your statement is witnessed, it must include a sentence above the witnesses' signatures attesting that they personally know you or that you have provided satisfactory proof of your identity.

(ii) *Notarized.* If your statement is notarized, you must provide the notary with adequate proof of your identity in the form of a drivers' license, passport, or other identification acceptable to the notary.

(iii) The Council, in its discretion, may require additional proof of identification depending on the nature and sensitivity of the records in the system of records(iv) For the quickest possible handling, your letter and envelope should be marked ''Privacy Act Request.''

(5) *In person requests.* In addition to the information described in paragraphs (b)(1) through (3) of this section, if you make your request in person, you must provide adequate proof of identification at the time of your request. Adequate proof of identification includes a valid drivers' license, valid passport, or other current identification that includes your address and photograph.

(c) *Requests for amendment or correction of records.* You may request an amendment to or correction of a record about you in person or by writing to the Privacy Act Officer following the procedures described in paragraph (b) of this section. Your request for amendment or correction should identify each particular record at issue, state the amendment or correction sought, and describe why the record is not accurate, relevant, timely, or complete.

(d) *Requests for an accounting of disclosures.* Except for those disclosures for which the Privacy Act does not require an accounting, you may request an accounting of any disclosure by the Council of a record about you. Your request for an accounting of disclosures must be made in writing following the procedures described in paragraph (b) of this section.

(e) *Requests for access on behalf of someone else.* (1) If you are making a request on behalf of someone else, your request must include a statement from that individual verifying his or her identity, as provided in paragraph (b)(4) of this section. Your request also must include a statement certifying that individual's agreement that records about him or her may be released to you.

(2) If you are the parent or guardian of the individual to whom the requested record pertains, or the individual to whom the record pertains has been deemed incompetent by a court, your request for access to records about that individual must include:

(i) The identity of the individual who is the subject of the record, including his or her name, current address, and date and place of birth;

(ii) Verification of your identity in accordance with paragraph (b)(4) of this section;

(iii) Verification that you are the subject's parent or guardian, which may be established by a copy of the subject's birth certificate identifying you as his or her parent, or a court order establishing you as guardian; and

(iv) A statement certifying that you are making the request on the subject's behalf.

§ 10001.4 Responses to Privacy Act requests.

(a) *Acknowledgement.* The Privacy Act Officer shall provide you with a written acknowledgment of your written request under section 3 within ten business days of our receipt of your request.

(b) *Grants of requests.* If you make your request in person, the Privacy Act Officer shall respond to your request directly, either by granting you access to the requested records, upon payment of any applicable fee and with a written record of the grant of your request and receipt of the records, or by informing you when a response may be expected. If you are accompanied by another person, you must authorize in writing any discussion of the records in the presence of the third person. If your request is in writing, the Privacy Act Officer shall provide you with written notice of the Council's decision to grant your request and the amount of any applicable fee. The Privacy Act Officer shall disclose the records to you promptly, upon payment of any applicable fee.

(c) *Denials of requests in whole or in part.* The Privacy Act Officer shall notify you in writing of his or her determination to deny, in whole or in part, your request. This writing shall include the following information:

(1) The name and title or position of the person responsible for the denial;

(2) A brief statement of the reason for the denial(s), including any applicable Privacy Act exemption;

(3) A statement that you may appeal the denial and a brief description of the requirements for appeal under § 10001.5.

(d) *Request for records not covered by the Privacy Act or subject to Privacy Act exemption.* If the Privacy Act Officer determines that a requested record is not subject to the Privacy Act or the records are subject to Privacy Act exemption, your request will be processed in accordance with the Council's Freedom of Information Act procedures at 5 CFR part 10000.

§ 10001.5 Administrative appeals.

(a) *Appeal procedures.* (1) You may appeal any decision by the Council to deny, in whole or in part, your request under § 10001.3 no later than 60 days after the decision is rendered.

(2) Your appeal must be in writing, sent to the General Counsel at the address specified in § 10001.3(b) and contain the following information:

(i) Your name;

(ii) Description of the record(s) at issue;

(iii) The system of records in which the record(s) is contained;

(iv) A statement of why your request should be granted.

(3) The General Counsel shall determine whether to uphold or reverse the initial determination within 30 working days of our receipt of your appeal. The General Counsel shall notify you of his or her decision, including a brief statement of the reasons for the decision, in writing. The General Counsel's decision will be the final action of the Council.

(b) *Statement of disagreement.* If your appeal of our determination related to your request for amendment or correction is denied in whole or in part, you may file a Statement of Disagreement that states the basis for your disagreement with the denial. Statements of Disagreement must be concise and must clearly identify each part of any record that is disputed. The Privacy Act Officer will place your Statement of Disagreement in the system of records in which the disputed record is maintained and shall mark the disputed record to indicate that a

Statement of Disagreement has been filed and where it may be found.

(c) *Notification of amendment, correction, or disagreement.* Within 30 working days of the amendment or correction of a record, the Privacy Act Officer shall notify all persons, organizations, or agencies to which the Council previously disclosed the record, if an accounting of that disclosure was made, that the record has been corrected or amended. If you filed a Statement of Disagreement, the Privacy Act Officer shall append a copy of it to the disputed record whenever it is disclosed and also may append a concise statement of its reason(s) for denying the request to amend or correct the record.

§ 10001.6 Fees.

We will not charge a fee for search or review of records requested under this part, or for the correction of records. If you request copies of records, we may charge a fee of $.10 per page.

§ 10001.7 Penalties.

Any person who makes a false statement in connection with any request for a record or an amendment or correction thereto under this part is subject to the penalties prescribed in 18 U.S.C. 494 and 495 and 5 U.S.C. 552a(i)(3).

PART 10002—IMPLEMENTATION OF THE GOVERNMENT IN THE SUNSHINE ACT

Sec.

Authority: 5 U.S.C. 552b.

§ 10002.1 Purpose and scope.

(a) The regulations in this part implement the provisions of the Sunshine Act.

(b) Requests for all records other than those described in § 10002.9, shall be governed by the Council's Freedom of Information Act procedures at 5 CFR part 10001.

§ 10002.2 Definitions.

The following definitions apply in this part:

Chairperson means the Chairperson of the Council, as appointed by the President, or any person to whom the Council has delegated authority for the matter concerned.

Council means the National Council on Disability, established by the Rehabilitation Act of 1973 (29 U.S.C. 780 *et seq.*), as amended, and amended by the Workforce Innovation and Opportunity Act (Pub. L. 113–128) in 2014.

General Counsel means the Council's principal legal advisor, or his or her designee.

Meeting means the deliberations of five or more Council members that determine or result in the joint conduct or disposition of official Council business. A meeting does not include:

(1) Notational voting or similar consideration of business for the purpose of recording votes, whether by circulation of material to members' individually in writing or by a polling of the members individually by phone or email.

(2) Action by five or more members to:

(i) Open or close a meeting or to release or withhold information pursuant to § 10002.6;

(ii) Set an agenda for a proposed meeting;

(iii) Call a meeting on less than seven days' notice, as permitted by § 10002.4; or

(iv) Change the subject matter or the determination to open or to close a publicly announced meeting under § 10002.7.

(3) A session attended by five or more members for the purpose of having the Council's staff or expert consultants, another federal agency, or other persons or organizations brief or otherwise provide information to the Council concerning any matters within the purview of the Council, provided that the members do not engage in deliberations that determine or result in the joint conduct or disposition of official business on such matters.

(4) A gathering of members for the purpose of holding informal, preliminary discussions or exchanges of views which do not effectively predetermine official action.

Member means an individual duly appointed and confirmed to the Council.

Public observation means attendance by the public at a meeting of the Council, but does not include public participation.

Public participation means the presentation or discussion of information, raising of questions, or other manner of involvement in a meeting of the Council by the public in a manner that contributes to the disposition of official Council business.

Sunshine Act means the Government in the Sunshine Act, 5 U.S.C. 552b.

§ 10002.3 Open meetings.

(a) Except as otherwise provided in this part, every portion of a Council meeting shall be open to public observation.

(b) Council meetings, or portions thereof, shall be open to public participation when an announcement to that effect is published under § 10002.4. Public participation shall be conducted in an orderly, non-disruptive manner and in accordance with any procedures the Chairperson may establish. Public participation may be terminated for good cause as determined by the Council upon the advice of the General Counsel based on unanticipated developments.

§ 10002.4 Procedures for public announcement of meetings.

(a) Except as otherwise provided in this section, the Council shall make a public announcement at least seven days prior to a meeting. The public announcement shall include:

(1) The time and place of the meeting;

(2) The subject matter of the meeting;

(3) Whether the meeting is to be open, closed, or portions of a meeting will be closed;

(4) Whether public participation will be allowed;

(5) The name and telephone number of the person who will respond to requests for information about the meeting;

(b) The seven-day prior notice required by paragraph (a) of this section may be reduced only if:

(1) A majority of all members determine by recorded vote that Council business requires that such meeting be scheduled in less than seven days; and

(2) The public announcement required by this section is made at the earliest practicable time.

(c) If public notice is provided by means other than publication in the **Federal Register**, notice will be promptly submitted to the **Federal Register** for publication.

§ 10002.5 Grounds on which meetings may be closed or information withheld.

A meeting, or portion thereof, may be closed and information pertinent to such meeting withheld if the Council determines that the meeting or release of information is likely to disclose matters that are:

(a) Specifically authorized under criteria established by an executive

order to be kept secret in the interests of national defense or foreign policy; and, in fact, are properly classified pursuant to such executive order. In making the determination that this exemption applies, the Council shall rely on the classification assigned to the document or assigned to the information from the federal agency from which the document was received.

(b) Related solely to the internal personnel rules and practices of the Council;

(c) Specifically exempt from disclosure by statute (other than 5 U.S.C. 552), provided that such statute:

(1) Requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue; or

(2) Establishes particular criteria for withholding or refers to particular types of matters to be withheld;

(d) Trade secrets and commercial or financial information obtained from a person and privileged or confidential;

(e) Involved with accusing any person of a crime or formally censuring any person;

(f) Of a personal nature, if disclosure would constitute a clearly unwarranted invasion of personal privacy;

(g) Either investigatory records compiled for law enforcement purposes or information which, if written, would be contained in such records, but only to the extent that the production of records or information would:

(1) Interfere with enforcement proceedings;

(2) Deprive a person of a right to either a fair trial or an impartial adjudication;

(3) Constitute an unwarranted invasion of personal privacy;

(4) Disclose the identity of a confidential source or sources and, in the case of a record compiled either by a criminal law enforcement authority or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source(s);

(5) Disclose investigative techniques and procedures; or

(6) Endanger the life or physical safety of law enforcement personnel;

(h) Contained in or relating to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions;

(i) If prematurely disclosed, likely to significantly frustrate implementation of a proposed action of the Council, except that this subsection shall not apply in any instance where the Council has already disclosed to the public the content or nature of its proposed action or is required by law to make such disclosure on its own initiative prior to taking final action on such proposal; and

(j) Specifically concerned with the Council's issuance of a subpoena, or its participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by the Council of a particular case or formal agency adjudication pursuant to the procedures in 5 U.S.C. 554 or otherwise involving a determination on the record after opportunity for a hearing.

§ 10002.6 Procedures for closing meetings or withholding information, and requests by affected persons to close a meeting.

(a) A meeting or portion of a meeting may be closed and information pertaining to a meeting withheld under § 10002.5 only by vote of a majority of members.

(b) A separate vote of the members shall be taken with respect to each meeting or portion of a meeting proposed to be closed and with respect to information which is proposed to be withheld. A single vote may be taken with respect to a series of meetings or portions of a meeting that are proposed to be closed, so long as each meeting or portion thereof in the series involves the same particular matter and is scheduled to be held no more than 30 days after the initial meeting in the series. The vote of each member shall be recorded and no proxies shall be allowed.

(c) A person whose interests may be directly affected by a portion of a meeting may request in writing that the Council close that portion for any of the reasons referred to in § 10002.5(e) through (g). Upon the request of a member, a recorded vote shall be taken whether to close such meeting or portion thereof.

(d) For every meeting closed, the General Counsel shall publicly certify that, in his or her opinion, the meeting may be closed to the public and shall state each relevant basis for closing the meeting. If the General Counsel invokes the bases set forth in § 10002.5(a) or (c), he or she shall rely upon the classification or designation assigned to the information by the originating agency. A copy of such certification, together with a statement by the presiding officer setting forth the time and place of the meeting and the persons present, shall be retained by the Council as part of the transcript, recording, or minutes required by § 10002.8.

§ 10002.7 Changes following public announcement.

(a) The time or place of a meeting may be changed following the public announcement described in § 10002.4. The Council must publicly announce such change at the earliest practicable time.

(b) The subject matter of a meeting or the determination of the Council to open or close a meeting, or a portion thereof, to the public may be changed following public announcement only if:

(1) A majority of all members determine by recorded vote that Council business so requires and that no earlier announcement of the change was possible; and

(2) The Council publicly announces such change and the vote of each member thereon at the earliest practicable time.

§ 10002.8 Transcripts, recordings, or minutes of closed meetings.

Along with the General Counsel's certification and presiding officer's statement referred to in § 10002.6(d), the Council shall maintain a complete transcript or electronic recording adequate to record fully the proceedings of each meeting, or a portion thereof, closed to the public. Alternatively, for any meeting closed pursuant to § 10002.5(h) or (j), the Council may maintain a set of minutes adequate to record fully the proceedings, including a description of each of the views expressed on any item and the record of any roll call vote.

§ 10002.9 Public availability and retention of transcripts, recordings, and minutes, and applicable fees.

(a) The Council shall make available, in a place easily accessible, such as *www.ncd.gov,* to the public the transcript, electronic recording, or minutes of a meeting, except for items of discussion or testimony related to matters the Council determines may be withheld under § 10002.6.

(b) Copies of the nonexempt portions of the transcripts or minutes shall be provided upon receipt of the actual costs of the transcription or duplication.

(c) The Council shall maintain meeting transcripts, recordings, or minutes of each meeting closed to the public for a period ending at the later of two years following the date of the meeting, or one year after the conclusion of any Council proceeding with respect to the closed meeting.

PARTS 10003–10049—[RESERVED]

Dated: August 11, 2015.

Rebecca Cokley,

Executive Director.

[FR Doc. 2015–20140 Filed 8–14–15; 8:45 am]

BILLING CODE 8421–03–P

BUREAU OF CONSUMER FINANCIAL PROTECTION

12 CFR Part 1010

Compliance Bulletin—Amendment to the Interstate Land Sales Full Disclosure Act

AGENCY: Bureau of Consumer Financial Protection.

ACTION: Compliance bulletin.

SUMMARY: The Bureau of Consumer Financial Protection is issuing a compliance bulletin titled ''Amendment to the Interstate Land Sales Full Disclosure Act'' to provide information to developers and other interested parties relating to a recent Congressional amendment to the Interstate Land Sales Full Disclosure Act.

DATES: This bulletin is applicable August 17, 2015.

FOR FURTHER INFORMATION CONTACT: Amanda Quester, Senior Counsel, Office of Regulations, at (202) 435–7700.

SUPPLEMENTARY INFORMATION:

I. Compliance Bulletin

The Consumer Financial Protection Bureau (Bureau) issues this compliance bulletin to provide information to developers and other interested parties relating to Public Law 113–167, 128 Stat. 1882 (2014), which amended the Interstate Land Sales Full Disclosure Act (ILSA). This ILSA amendment was signed by the President on September 26, 2014. It became effective on March 25, 2015, and is codified primarily at 15 U.S.C. 1702(b)(9) and (d).

The amendment exempts from ILSA's registration and disclosure requirements the sale or lease of a condominium unit that is not exempt under 15 U.S.C. 1702(a). Under 15 U.S.C. 1702(d), a ''condominium unit'' is defined for purposes of this new exemption as a unit of residential or commercial property to be designated for separate ownership pursuant to a condominium plan or declaration provided that upon conveyance: (1) The owner of such unit will have sole ownership of the unit and an undivided interest in the common elements appurtenant to the unit; and (2) the unit will be an improved lot.

Pursuant to § 1010.4(d) of the Bureau's ILSA regulations, eligibility for an exemption under 15 U.S.C. 1702, including the exemption of section 1702(b)(9), is self-determining, and a developer is not required to file notice with or obtain the approval of the Bureau in order to take advantage of an exemption. Section 1010.4(d) also provides that a developer is responsible for maintaining records to demonstrate that the requirements of an exemption have been met if a developer elects to take advantage of an exemption. The Bureau will continue to process filings made by developers seeking to fulfill their obligations under ILSA and its implementing regulations.

If you have questions about ILSA program operations, you may contact ILSA program staff via email to *CFPB_ILS_Inquiries@cfpb.gov* or at the address below: Consumer Financial Protection Bureau, Interstate Land Sales Program, 1700 G St. NW., Attn: 1625 Eye St., Room 3093, Washington, DC 20552.

If you have a question regarding the interpretation of ILSA or the Bureau's implementing regulations, please email *CFPB_reginquiries@cfpb.gov* with your specific question, including reference to the applicable regulation section(s).

Bureau staff responding to queries cannot provide legal advice and are not authorized to provide official interpretations of ILSA or of the Bureau's implementing regulations.

II. Regulatory Requirements

This Compliance Bulletin summarizes existing requirements under the law, and does not itself establish any binding obligations. It is therefore exempt from notice and comment rulemaking requirements under the Administrative Procedure Act pursuant to 5 U.S.C. 553(b). Because no notice of proposed rulemaking is required, the Regulatory Flexibility Act does not require an initial or final regulatory flexibility analysis. 5 U.S.C. 603(a), 604(a). The Bureau has determined that this Compliance Bulletin does not impose any new or revise any existing recordkeeping, reporting, or disclosure requirements on covered entities or members of the public that would be collections of information requiring OMB approval under the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

Dated: August 10, 2015.

Richard Cordray,

Director, Bureau of Consumer Financial Protection.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2015–3398; Directorate Identifier 2015–CE–031–AD; Amendment 39–18232; AD 2015–16–07]

RIN 2120–AA64

Airworthiness Directives; REIMS AVIATION S.A. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: We are adopting a new airworthiness directive (AD) for REIMS AVIATION S.A. Model F406 airplanes. This AD results from mandatory continuing airworthiness information (MCAI) issued by the aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as detachment of the pilot's rudder control pedal in flight. We are issuing this AD to require actions to address the unsafe condition on these products.

DATES: This AD is effective August 18, 2015.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD as of August 18, 2015.

We must receive comments on this AD by October 1, 2015.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov*. Follow the instructions for submitting comments.
- *Fax:* (202) 493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this AD, contact ASI Aviation, Aérodrome de Reims Prunay, 51360 Prunay, FRANCE; phone: +33 3 26 48 46 65; fax: +33 3 26 49 18 57; email: none; Internet: *http://asi-aviation.fr/asi-aviation-support/1.html* (requires user name and password). You may view this referenced service information at the FAA, Small Airplane Directorate, 901

Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148. It is also available on the Internet at *http://www.regulations.gov* by searching for locating Docket No. FAA–2015–3398.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–3398; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Albert J. Mercado, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4119; fax: (816) 329–4090; email: *albert.mercado@faa.gov*.

SUPPLEMENTARY INFORMATION:

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Community, has issued AD No.: 2015–0159–E, dated July 31, 2015 (referred to after this as ''the MCAI''), to correct an unsafe condition for the specified products. The MCAI states:

> An occurrence was reported where one pilot rudder control pedal of an F 406 aeroplane detached in flight. No change in aeroplane attitude occurred. The rudder was controlled using the co-pilot rudder pedals, and the flight continued uneventfully until a safe landing was performed.
>
> This condition, if not detected and corrected, could result in loss of directional control of the aeroplane.
>
> To address this unsafe condition, ASI Aviation issued Service Bulletin (SB) F406–104 to provide inspection instructions.
>
> For the reason described above, this AD requires inspection of the rudder control pedal torque tubes, both left-hand (LH) and right-hand (RH), and, depending on findings, replacement with a serviceable part.
>
> This AD also requires inspection before new installation of rudder control pedal torque tubes.

You may examine the MCAI on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–3398.

Related Service Information Under 1 CFR Part 51

ASI AVIATION has issued Service Bulletin No.: F406–104, dated July 28, 2015. The actions described in this service information are intended to correct the unsafe condition identified in the MCAI. The service information describes procedures for inspection of the left-hand and right-hand rudder control pedal torque tubes, and, depending on findings, replacement with a serviceable part. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this AD.

FAA's Determination and Requirements of the AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with this State of Design Authority, they have notified us of the unsafe condition described in the MCAI and service information referenced above. We are issuing this AD because we evaluated all information provided by the State of Design Authority and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

FAA's Determination of the Effective Date

An unsafe condition exists that requires the immediate adoption of this AD. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to adoption of this rule because detachment of the pilot rudder control pedal in flight could result in loss of airplane directional control. Therefore, we determined that notice and opportunity for public comment before issuing this AD are impracticable and that good cause exists for making this amendment effective in fewer than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety, and we did not precede it by notice and opportunity for public comment. We invite you to send any written relevant data, views, or arguments about this AD. Send your comments to an address listed under the **ADDRESSES** section. Include ''Docket No. FAA–2015–3398; Directorate Identifier 2015–CE–031–AD'' at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this AD. We will consider all comments received by the closing date and may amend this AD because of those comments.

We will post all comments we receive, without change, to *http://www.regulations.gov,* including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this AD.

Costs of Compliance

We estimate that this AD will affect 7 products of U.S. registry. We also estimate that it will take about 5 work-hours per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour.

Based on these figures, we estimate the cost of the AD on U.S. operators to be $2,975, or $425 per product.

In addition, we estimate that any necessary follow-on actions would take about 20 work-hours and require parts costing $10,000, for a cost of $11,700 per product. We have no way of determining the number of products that may need these actions.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2015–16–07 REIMS AVIATION S.A.: Amendment 39–18232; Docket No. FAA–2015–3398; Directorate Identifier 2015–CE–031–AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective August 18, 2015.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Reims Aviation S.A. Model F406 airplanes, serial numbers 0001 through 0098, certificated in any category.

(d) Subject

Air Transport Association of America (ATA) Code 27: Flight Controls.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as detachment of the pilot's rudder control pedal in flight. We are issuing this AD to detect and correct cracking of the pilot rudder control pedal which, if not corrected, could result in detachment of the pedal with possible loss of airplane directional control.

(f) Actions and Compliance

Unless already done, do the actions in paragraphs (f)(1) through (f)(4) of this AD.

(1) Before further flight after August 18, 2015 (the effective date of this AD), do a visual inspection and a dye or fluorescent penetrant inspection of the rudder control pedal torque tubes, LH (Part Number (P/N) 5115260–1) and RH (P/N 5115260–2), following the instructions of PART A of ASI AVIATION Service Bulletin No.: F406–104, dated July 28, 2015.

(2) If no crack is detected during the inspection required by paragraph (f)(1) of this AD, within 100 hours time-in-service (TIS) after August 18, 2015 (the effective date of this AD), do a magnetic particle inspection of the rudder control pedal torque tubes, LH (P/N 5115260–1) and RH (P/N 5115260–2), following the instructions of PART B of ASI AVIATION Service Bulletin No.: F406–104, dated July 28, 2015.

(3) If any crack is detected on a rudder control pedal torque tube during the inspection required by paragraph (f)(1) or (f)(2) of this AD, before further flight, replace the affected part with a serviceable part following the instructions of ASI AVIATION Service Bulletin No.: F406–104, dated July 28, 2015.

(4) For the purpose of this AD, a serviceable part is a rudder control pedal torque tube that has had a magnetic particle inspection following the instructions of PART B of ASI AVIATION Service Bulletin No.: F406–104, dated July 28, 2015, and no cracks were found.

(5) You may install a rudder control pedal torque tube P/N 5115260–1 (LH) or P/N 5115260–2 (RH) on an airplane, provided it is a serviceable part.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Albert J. Mercado, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4119; fax: (816) 329–4090; email: *albert.mercado@faa.gov*. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, a federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120–0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES–200.

(h) Related Information

Refer to MCAI European Aviation Safety Agency (EASA) AD No.: 2015–0159–E, dated July 31, 2015, for related information. You may examine the MCAI on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–3398.

(i) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) ASI AVIATION Service Bulletin No.: F406–104, dated July 28, 2015.

(ii) Reserved.

(3) For service information identified in this AD, contact ASI Aviation, Aérodrome de Reims Prunay, 51360 Prunay, FRANCE; phone: +33 3 26 48 46 65; fax: +33 3 26 49 18 57; email: none; Internet: *http://asi-aviation.fr/asi-aviation-support/1.html* (requires user name and password).

(4) You may view this service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148. It is also available on the Internet at *http://www.regulations.gov* by searching for locating Docket No. FAA–2015–3398.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html*.

Issued in Kansas City, Missouri on August 6, 2015.

Earl Lawrence,

Manager, Small Airplane Directorate, Aircraft Certification Service.

Airworthiness Directives; British Aerospace Regional Aircraft Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for British Aerospace Regional Aircraft Model Jetstream Model 3201 airplanes. This AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as the in-service special detailed inspection technique required for the Jetstream 3200's life extension program was delayed; consequently, the in-service special detailed inspection technique is not formally part of the life extension program and may therefore not be accomplished as intended. We are issuing this AD to require actions to address the unsafe condition on these products.

DATES: This AD is effective September 21, 2015.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD as of September 21, 2015.

ADDRESSES: You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–1744; or in person at Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

For service information identified in this AD, contact BAE Systems (Operations) Limited, Customer Information Department, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland, United Kingdom; telephone: +44 1292 675207; fax: +44 1292 675704; email: *RApublications@baesystems.com;* Internet: *http://www.baesystems.com/Businesses/RegionalAircraft/*. FOR FURTHER INFORMATION CONTACT: Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4059; fax: (816) 329–4090; email: *doug.rudolph@faa.gov.*

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to adding an AD that would apply to British Aerospace Regional Aircraft Model Jetstream Model 3201 airplanes. The NPRM was published in the **Federal Register** on May 26, 2015 (80 FR 29988). The NPRM proposed to correct an unsafe condition for the specified products and was based on mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country. The MCAI states:

> The Jetstream 3200 Life Extension Programme (LEP) permits the airframe life limit to be extended from 45 000 flight cycles (FC) to 67 000 FC. Entry into the LEP requires operators to accomplish inspections specified in the Jetstream 3200 Supplemental Structural Inspections Document (SSID). SSID task 57–10–227 is the inspection requirement for the wing main spar at Rib 36. The threshold for task 57–10–227 is 48 000 FC, with a repeat interval of 16 800 FC, using a Special Detailed Inspection (SDI). Development of the in-service SDI technique required for SSID task 57–10–227 was delayed by BAE Systems (Operations) Ltd, as a result of which it is not formally part of the LEP and may therefore not be accomplished as intended.
>
> This condition, if not corrected, could lead to cracks in the wing main spar remaining undetected, possibly resulting in failure of the wing and loss of the aeroplane.
>
> To address this potential unsafe condition, BAE Systems (Operations) Ltd issued SB 57–JA140140 to provide SDI instructions for the wing main spar at Rib 36, which includes a reduced repeat inspection interval.
>
> For the reasons described above, this AD requires repetitive inspections of the wing main spar around Rib 36 to detect cracks and, depending on findings, accomplishment of the applicable corrective action(s).

The SSID will be revised in due course to include the SDI. The MCAI can be found in the AD docket on the Internet at: *http://www.regulations.gov/#!documentDetail;D=FAA-2015-1744-0002.*

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM (80 FR 29988, May 26, 2015) or on the determination of the cost to the public.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting the AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (80 FR 29988, May 26, 2015) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (80 FR 29988, May 26, 2015).

Related Service Information Under 1 CFR Part 51

We reviewed British Aerospace Regional Aircraft British Aerospace Jetstream Series 3100 & 3200 Service Bulletin 57–JA140140, Original Issue, dated: June 26, 2014. The service information describes procedures for inspections of the wing main spar around Rib 36 to detect cracks and, depending on findings, accomplishment of the applicable corrective action(s). This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this AD.

Costs of Compliance

We estimate that this AD will affect 22 products of U.S. registry. We also estimate that it will take about 96 work-hours per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour.

Based on these figures, we estimate the cost of the AD on U.S. operators to be $179,520, or $8,160 per product.

We have no way of determining any necessary follow-on actions, costs, or the number of products that may need these actions.

Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid

OMB control number. The control number for the collection of information required by this AD is 2120–0056. The paperwork cost associated with this AD has been detailed in the Costs of Compliance section of this document and includes time for reviewing instructions, as well as completing and reviewing the collection of information. Therefore, all reporting associated with this AD is mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at 800 Independence Ave. SW., Washington, DC 20591. ATTN: Information Collection Clearance Officer, AES–200.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–1744; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2015–16–06 British Aerospace Regional Aircraft: Amendment 39–18231; Docket No. FAA–2015–1744; Directorate Identifier 2015–CE–016–AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective September 21, 2015.

(b) Affected ADs

None.

(c) Applicability

This AD applies to British Aerospace Regional Aircraft Jetstream Model 3201 airplanes, all serial numbers, that are:

(1) Certificated in any category; and

(2) Modified in service following BAE Systems (Operations) Ltd Service Bulletin (SB) 05- JM8229.

(d) Subject

Air Transport Association of America (ATA) Code 57: Wings.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as the in-service special detailed inspection technique required for the Jetstream 3200's life extension program was delayed; consequently, the in-service special detailed inspection (SDI) technique is not formally part of the life extension program and may therefore not be accomplished as intended. We are issuing this AD to detect and correct cracking in the wing main spar, which could result in structural failure of the wing with consequent loss of control.

(f) Actions and Compliance

Unless already done, do the following actions as specified in paragraphs (f)(1) through (f)(3) of this AD:

(1) Before accumulating a total of 53,950 flight cycles (FC) on the airplane or within the next 50 FC after September 21, 2015 (the effective date of this AD), whichever occurs later, and repetitively thereafter at intervals not to exceed 14,300 FC, accomplish an eddy current (EC) and an x-ray inspection of the wing main spar around rib 36 following the instructions of British Aerospace Jetstream Series 3100 & 3200 Service Bulletin 57–JA140140, Original Issue, dated June 26, 2014. For the purposes of this AD, owner/operators who do not track total FC must multiply the total number of airplane hours time-in-service (TIS) by 0.75 to calculate the cycles.

(2) If any crack or corrosion is found during any inspection required by paragraph (f)(1) of this AD, before further flight, contact BAE Systems (Operations) Ltd for FAA-approved repair instructions approved specifically for this AD and accomplish those instructions. You can find contact information for BAE Systems (Operations) Ltd in paragraph (i)(3) of this AD. Use the Operator Report Form and follow the instructions in British Aerospace Jetstream Series 3100 & 3200 Service Bulletin 57–JA140140, Original Issue, dated: June 26, 2014.

(3) Repair of an airplane as required in paragraph (f)(2) of this AD does not terminate the repetitive inspections required in paragraph (f)(1) of this AD for that airplane, unless the approved repair instructions state otherwise.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4059; fax: (816) 329–4090; email: email: *doug.rudolph@faa.gov*. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required

to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements:* For any reporting requirement in this AD, a federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120–0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES–200.

(h) Related Information

Refer to MCAI European Aviation Safety Agency (EASA) AD No.: 2015–0063, dated April 22, 2015, for related information. The MCAI can be found in the AD docket on the Internet at: *http://www.regulations.gov/#!documentDetail;D=FAA-2015-1744-0002*.

(i) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) British Aerospace Regional Aircraft British Aerospace Jetstream Series 3100 & 3200 Service Bulletin 57–JA140140, Original Issue, dated: June 26, 2014.

(ii) Reserved.

(3) For British Aerospace Regional Aircraft service information identified in this AD, contact BAE Systems (Operations) Limited, Customer Information Department, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland, United Kingdom; telephone: +44 1292 675207; fax: +44 1292 675704; email: *RApublications@baesystems.com;* Internet: *http://www.baesystems.com/Businesses/RegionalAircraft/*.

(4) You may view this service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148. In addition, you can access this service information on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–1744.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: *http://www.archives.gov/federal-register/cfr/ibr-locations.html*.

Issued in Kansas City, Missouri, on August 6, 2015.

Earl Lawrence,

Manager, Small Airplane Directorate, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2015–2048; Directorate Identifier 2015–CE–015–AD; Amendment 39–18230; AD 2015–16–05]

RIN 2120–AA64

Airworthiness Directives; British Aerospace Regional Aircraft Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for British Aerospace Regional Aircraft Jetstream Series 3101 and Jetsream Model 3201 airplanes. This AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as missing countersunk washers under the head of the main landing gear trunnion cap tension bolts that could cause fatigue in the bolt shanks. We are issuing this AD to require actions to address the unsafe condition on these products.

DATES: This AD is effective September 21, 2015.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD as of September 21, 2015.

ADDRESSES: You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–2048; or in person at Document Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

For service information identified in this AD, contact BAE Systems (Operations) Limited, Customer Information Department, Prestwick International Airport, Ayrshire, KA9 2RW, Scotland, United Kingdom; telephone: +44 1292 675207; fax: +44 1292 675704; email: *RApublications@baesystems.com;* Internet: *http://www.baesystems.com/Businesses/RegionalAircraft/*. You may review this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. You may view this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148. It is also available on the Internet at *http://www.regulations.gov* by searching for Docket No. FAA–2015–2048.

FOR FURTHER INFORMATION CONTACT: Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4059; fax: (816) 329–4090; email: *doug.rudolph@faa.gov*.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to adding an AD that would apply to British Aerospace Regional Aircraft Model Jetstream Series 3101 and Jetstream Model 3201 airplanes. The NPRM was published in the **Federal Register** on June 9, 2015 (80 FR 32510). The NPRM proposed to correct an unsafe condition for the specified products and was based on mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country.

The MCAI states:

> The review of the BAE production drawing for main landing gear (MLG) fitting installation identified a risk of omitting installation of a countersunk washer under the head of the MLG trunnion cap tension bolts, potentially causing fatigue in the bolt shank under the head of such tension bolt(s).
>
> This condition, if not detected and corrected, could lead to failure of the bolt(s), thereby compromising the structural integrity of the other MLG tension bolts holding the MLG in place, possibly resulting in collapse of the MLG on take-off or landing with consequent damage to the aeroplane and injury to occupants.
>
> Although so far, no in-service bolt head failures have been reported since entry in to service of the type design in 1986, to address this potential unsafe condition, BAE Systems (Operations) Ltd issued Service Bulletin (SB) 57–JA120141 to provide inspection instructions.
>
> For the reasons described above, this AD requires inspection and, depending on findings, replacement of the MLG trunnion cap tension bolts.

The MCAI can be found in the AD docket on the Internet at: *http://www.regulations.gov/*

#!documentDetail;D=FAA-2015-2048-0003.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM (80 FR 32510, June 9, 2015) or on the determination of the cost to the public.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting the AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (80 FR 32510, June 9, 2015) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (80 FR 32510, June 9, 2015).

Related Service Information Under 1 CFR Part 51

We reviewed British Aerospace Regional Aircraft British Aerospace Jetstream Series 3100 & 3200 Service Bulletin 57–JA120141, REVISION 1, dated April 8, 2014. The service information describes procedures for inspection and replacement of main landing gear trunnion cap tension bolts. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this AD.

Costs of Compliance

We estimate that this AD will affect 66 products of U.S. registry. We also estimate that it will take about 6 work-hours per product to comply with the basic requirements of this AD. The average labor rate is $85 per work-hour.

Based on these figures, we estimate the cost of the AD on U.S. operators to be $33,660, or $510 per product.

In addition, we estimate that any necessary follow-on actions will take about 1 work-hour and require parts costing $1,200, for a cost of $1,285 per product. We have no way of determining the number of products that may need these actions.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. ''Subtitle VII: Aviation Programs,'' describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in ''Subtitle VII, Part A, Subpart III, section 44701: General requirements.'' Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866,

(2) Is not a ''significant rule'' under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),

(3) Will not affect intrastate aviation in Alaska, and

(4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Examining the AD Docket

You may examine the AD docket on the Internet at *http://www.regulations.gov* by searching for and locating Docket No. FAA–2015–2048; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new AD:

2015–16–05 British Aerospace Regional Aircraft: Amendment 39–18230; Docket No. FAA–2015–2048; Directorate Identifier 2015–CE–015–AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective September 21, 2015.

(b) Affected ADs

None.

(c) Applicability

This AD applies to British Aerospace Regional Aircraft Jetstream Series 3101 and Jetsream Model 3201 airplanes, all serial numbers, certificated in any category.

(d) Subject

Air Transport Association of America (ATA) Code 32: Landing Gear.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as missing countersunk washers under the head of the main landing gear (MLG) trunnion cap tension bolts that could cause fatigue in the bolt shanks. We are issuing this AD to detect and correct missing countersunk washers, which could lead to failure of the bolt(s), thereby compromising the structural integrity of the other MLG tension bolts holding the MLG in place, possibly resulting in collapse of the MLG on take-off or landing with consequent damage to the airplane and injury to occupants.

(f) Actions and Compliance

Unless already done, do the actions in paragraphs (f)(1) through (f)(4) of this AD, including all subparagraphs, following the Accomplishment Instructions in British Aerospace Jetstream Series 3100 & 3200 Service Bulletin 57–JA120141, REVISION 1, dated April 8, 2014:

(1) This AD allows credit for the actions required in paragraphs (f)(3) and (f)(4), including all subparagraphs, of this AD if done before September 21, 2015 (the effective date of this AD) following the Accomplishment Instructions of British Aerospace Jetstream Series 3100 & 3200 Service Bulletin 57–JA120141, Original Issue, dated: July 31, 2012.

(2) For the purposes of this AD, owner/operators who do not track total flight cycles (FC) must multiply the total number of airplane hours time-in-service by 0.75 to calculate the FC.

(3) *For Pre-Mod JM5218 airplanes:* Within 250 FC after September 21, 2015 (the

effective date of this AD), do a magnetic particle inspection (MPI) of each MLG trunnion cap tension bolt.

(i) If no crack is found during the MPI required by paragraph (f)(1) of this AD, before further flight, either re-install the crack-free bolt(s) or install a replacement bolt(s) having the same part number (P/N) as the original bolt. Install a countersunk washer under the bolt(s) ensuring the washer P/N is applicable to the diameter bolt installed as specified in figure 1 of paragraph (f)(3)(i) of this AD.

FIGURE 1 OF PARAGRAPH (f)(3)(i)—PRE-MOD JM5218 REPLACEMENT PARTS

Bolt P/N	Washer P/N
MS21250H06040	PKS1000–6–2–S (washer).
MS21250H07040	PKS1000–7–2–S (washer).

(ii) If a cracked bolt is found during the inspection required by paragraph (f)(3) of this AD, before further flight, replace each cracked bolt with a replacement bolt having the same P/N as the original bolt. Install a countersunk washer under the bolt ensuring the washer P/N is applicable to the diameter bolt installed as specified in figure 1 of paragraph (f)(3)(i) of this AD.

(4) *For Post-Mod JM5218 airplanes:* Within 250 FC after September 21, 2015 (the effective date of this AD), visually inspect each MLG trunnion cap tension bolt to determine which type of bolt is installed.

(i) If it is determined the installed bolts are P/N MS21134H07045 or P/N MS21134H07059 during the inspection required in paragraph (f)(4) of this AD, before further flight (except as specified in paragraph (f)(4)(i)(A) of this AD), replace each 'old' bolt P/N with a 'new' bolt P/N as specified in figure 2 of paragraph (f)(4)(i) of this AD and install a washer having P/N PKS1000–7–2–S under each bolt.

FIGURE 2 OF PARAGRAPH (f)(4)(i)—POST-MOD JM5218 REPLACEMENT PARTS

Bolt P/N 'Old'	Bolt P/N 'New'
MS21134H07045	MS21134H07046, or MS21250H07046.
MS21134H07059	MS21134H07060, or MS21250H07060.

(A) If no 'new' replacement bolt is available to comply with paragraph (f)(4)(i) of this AD, the 'old' bolt may be reinstalled without a countersunk washer, provided that within 500 FC after reinstallation and repetitively thereafter at intervals not to exceed 500 FC, each affected bolt is inspected by MPI.

(B) Within 2,000 FC after reinstallation of a bolt as allowed by paragraph (f)(4)(i)(A) of this AD or before further flight if a crack was found during any MPI as required by paragraph (f)(4)(i)(A) of this AD, whichever occurs first, replace the 'old' bolt P/N with a 'new' bolt P/N as specified in figure 2 of paragraph (f)(4)(i) of this AD and install a washer having P/N PKS1000–7–2–S under each bolt.

(ii) If it is determined the installed bolts are P/N MS21250H07046 or P/N MS21250H07060 and no countersunk washer is installed during the inspection required in paragraph (f)(4) of this AD, before further flight, do an MPI of each MLG trunnion cap tension bolt.

(A) If no crack is found during the MPI required by paragraph (f)(4)(ii) of this AD, before further flight, either re-install the crack-free bolts or install replacement bolts having a 'new' bolt P/N as specified in figure 2 of paragraph (f)(4)(i) of this AD and install a countersunk washer P/N PKS1000–7–2–S under each bolt.

(B) If any crack is found during the MPI required by paragraph (f)(4)(ii) of this AD, before further flight, replace each cracked bolt with a serviceable one having a 'new' bolt P/N as specified in figure 2 of paragraph (f)(4)(i) of this AD and install a countersunk washer P/N PKS1000–7–2–S under each bolt.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Doug Rudolph, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4059; fax: (816) 329–4090; email: *doug.rudolph@faa.gov*. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(h) Related Information

Refer to MCAI European Aviation Safety Agency (EASA) AD No.: 2015–0061, dated April 20, 2015; and British Aerospace Jetstream Series 3100 & 3200 Service Bulletin 57–JA120141, Original Issue, dated: July 31, 2012, for related information. The MCAI can be found in the AD docket on the Internet at: *http://www.regulations.gov/#!documentDetail;D=FAA-2015-2048-0003*.

[Docket No. FAA–2014–0639; Airspace Docket No. 13–ASW–20]

RIN 2120–AA66

Modification of Restricted Areas R–3804A, R–3804B, and R–3804C; Fort Polk, LA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action expands the lateral boundary of restricted area R–3804B, Fort Polk, LA, and raises the restricted area ceiling to, but not including 10,000 feet mean sea level (MSL). The expanded restricted area airspace will contain new live fire ranges to support mission requirements of the U.S. Army in order to fully exploit the capabilities of modern weapons systems and complex training scenarios that replicate conditions encountered during military deployments today. This action also amends time of designation for R–3804A and R–3804B to better reflect when the restricted areas are in use by the U.S. Army and when the airspace is available to nonparticipants. Lastly, this action makes administrative editorial

corrections to the R–3804A, R–3804B, and R–3804C legal descriptions.

DATES: Effective date: 0901 UTC, October 15, 2015.

FOR FURTHER INFORMATION CONTACT: Colby Abbott, Airspace Policy and Regulations Group, Office of Airspace Services, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority.

This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends the restricted area airspace at Fort Polk, LA, to enhance aviation safety and accommodate essential U.S. Army training requirements.

History

On September 25, 2014, the FAA published in the **Federal Register** a notice of proposed rulemaking (79 FR 57486) to expand the lateral boundary and raise the designated altitudes of restricted area R–3804B, amend the time of designation for R–3804A and R–3804B, and make using agency corrections to R–3804A, R–3804B, and R–3804C. The R–3804 restricted area complex amendments support the military training activities conducted at Fort Polk, LA.

Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal. Fifteen comments were received with 14 of the commenters supporting the proposed action, and one commenter raising several concerns.

The commenter suggested the FAA offset a larger R–3804B by eliminating the R–3801A, R–3801B, and R–3801C restricted areas and/or the R–3803A and R–3803B restricted areas. The commenter offered that since the R–3801 complex and the Hackett and Jena Military Operations Areas (MOAs) all have the deactivated 917th Fighter Wing listed as the using agency, the FAA should consider them for deactivation. The R–3801 complex and associated MOAs mentioned by the commenter are used by U.S. Air Force B–52 aircraft operating from Barksdale Air Force Base (AFB), LA, for electronic combat training. The FAA has amended the legal descriptions of these Special Use Airspace (SUA) areas, effective April 30, 2015, to reflect the current using agency, the 307th Bomb Wing at Barksdale AFB, LA. The R–3803 complex noted by the commenter is used by U.S. Army units at Fort Polk for live fire training similar to that occurring in the R–3804 complex. The actual time the restricted area complexes are activated is roughly the same and consistent with the expected usage of the proposed R–3804B.

The commenter also stated that real-time deactivation of the restricted area complex during Notice to Airmen (NOTAM) periods of use is a disservice to civilian pilots who have flight planned to avoid the airspace. In the interest of maximizing navigable airspace availability to the flying public, the FAA considers real-time deactivation of SUA airspace, and making it available to non-participants, an efficient use of the National Airspace System. Under the FAA ''joint use'' concept, SUA is expected to be released to the controlling agency and become available for access by nonparticipating aircraft during periods when the airspace is not needed by the using agency for its designated purpose.

Lastly, the commenter questioned how much of the NOTAM activation period is actually going to be used by Fort Polk. The expected usage of R–3804B is approximately 2 weeks per month, continuously, during large unit training rotations. Modern weapons capabilities and tactics are optimized for around-the-clock employment, and training events to replicate combat scenarios can occur any time of the day or night. The R–3804 complex utilization reporting for 2013, the most recent year available, shows R–3804B to have been activated 5,412 hours out of a possible 8,760 hours. The FAA considers this utilization rate to be consistent with Fort Polk's planned use of the proposed R–3804B.

The amendments to R–3804A, R–3804B, and R–3804C are addressed below.

The Rule

This action amends Title 14, Code of Federal Regulations (14 CFR) part 73 by expanding the lateral and vertical dimensions of restricted area R–3804B, Fort Polk, LA; changing the times of designation for R–3804A and R–3804B; and updating the using agency information for R–3804A, R–3804B, and R–3804C, and removing unnecessary verbiage from the designated altitudes and times of designation information for R–3804C.

The R–3804B boundary is expanded northward to match the northern boundary of R–3804A, as described in the NPRM, and the designated altitudes are raised from 3,000 feet MSL to, but not including, 10,000 feet MSL. This lateral and vertical expansion of R–3804B ensures containment of the hazardous artillery and mortar fires planned by the U.S. Army.

Additionally, the time of designation for R–3804A and R–3804B are changed from ''Continuous'' to ''By NOTAM.'' This amendment ensures the restricted areas are available to the U.S. Army when needed, continuously approximately two weeks each month, and provides a better indication to nonparticipants when the restricted areas are active and when they are available for use by the public.

Lastly, this action makes editorial updates to the using agency name for R–3804A, R–3804B, and R–3804C to incorporate the military service component of the using agency in the using agency name, removes the word ''up'' contained in the designated altitudes for R–3804C, and removes the words ''As published'' contained in the time of designation for R–3804C. These are purely administrative changes that do not affect the scheduling, use, or activities conducted within the restricted areas.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this regulation: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures and air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

Regarding expansion of the lateral boundary and raising the designated altitudes of restricted area R–3804B, in

accordance with FAA Order 1050.1E, paragraphs 402 and 404d, the FAA has conducted an independent evaluation of the United States Army, Joint Readiness Training Center's Final Environmental Assessment for the Establishment of Additional Restricted Airspace Joint Readiness Training Center and Fort Polk, LA dated March 2013 (hereinafter ''the FEA''). The FAA adopted the relevant portions of the FEA and prepared a Finding of No Significant Impact/Record of Decision dated August 11, 2015. The FAA has determined that no significant impacts would occur as a result of the Federal action and therefore that preparation of an Environmental Impact Statement is not warranted, and a Finding of No Significant Impact in accordance with 40 CFR part 1501.4(e) is appropriate.

Regarding amending the time of designation for R–3804A and R–3804B, the FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1E, Environmental Impacts: Policies and Procedures, paragraph 311c. This action, by changing time of designation from ''continuous'' to ''by NOTAM'' serves to return all or part of special use airspace (SUA) to the National Airspace System (NAS). It is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exists that warrant preparation of an environmental assessment.

Regarding making using agency corrections to R–3804A, R–3804B, and R–3804C, the FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1E, Environmental Impacts: Policies and Procedures, paragraph 311d. This action is an administrative change to the titles in the descriptions of the affected restricted areas to reflect the correct locations. It does not alter the dimensions, altitudes, times of designation or actual physical locations of the airspace; therefore, it is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exists that warrant preparation of an environmental assessment.

List of Subjects in 14 CFR Part 73

Airspace, Prohibited areas, Restricted areas.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 73 as follows:

PART 73—SPECIAL USE AIRSPACE

■ 1. The authority citation for part 73 continues to read as follows:

Authority: 49 U.S.C. 106 (f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 73.38 [Amended]

■ 2. Section 73.38 is amended as follows:

* * * * *

R–3804A Fort Polk, LA (Amended)

Boundaries. Beginning at lat. 31°00′53″ N., long. 93°08′12″ W.; to lat. 31°00′53″ N., long. 92°56′53″ W.; to lat. 31°00′20″ N., long. 92°56′14″ W.; to lat. 31°00′20″ N., long. 92°54′23″ W.; to lat. 31°03′55″ N., long. 92°51′34″ W.; to lat. 31°09′35″ N., long. 92°58′25″ W.; to lat. 31°09′35″ N., long. 93°00′56″ W.; to lat. 31°08′43″ N., long. 93°01′55″ W.; to lat. 31°08′43″ N., long. 93°08′12″ W.; to the point of beginning.

Designated altitudes. Surface to FL 180.

Time of designation. By NOTAM.

Controlling agency. FAA, Houston ARTCC.

Using agency. U.S. Army, Commanding General, Fort Polk, LA.

R–3804B Fort Polk, LA (Amended)

Boundaries. Beginning at lat. 31°00′53″ N., long. 93°10′53″ W.; to lat. 31°00′53″ N., long. 93°08′12″ W.; to lat. 31°08′43″ N., long. 93°08′12″ W.; to lat. 31°08′43″ N., long. 93°11′00″ W.; to lat. 31°04′56″ N., long. 93°11′00″ W.; to lat. 31°04′15″ N., long. 93°12′31″ W.; to the point of beginning.

Designated altitudes. Surface to but not including 10,000 feet MSL.

Time of designation. By NOTAM.

Controlling agency. FAA, Houston ARTCC.

Using agency. U.S. Army, Commanding General, Fort Polk, LA.

R–3804C Fort Polk, LA (Amended)

Boundaries. Beginning at lat. 31°00′53″ N., long. 93°08′12″ W.; to lat. 31°00′53″ N., long. 92°56′53″ W.; to lat. 31°00′20″ N., long. 92°56′14″ W.; to lat. 31°00′20″ N., long. 92°54′23″ W.; to lat. 31°03′55″ N., long. 92°51′34″ W.; to lat. 31°09′35″ N., long. 92°58′25″ W.; to lat. 31°09′35″ N., long. 93°00′56″ W.; to lat. 31°08′43″ N., long. 93°01′55″ W.; to lat. 31°08′43″ N., long. 93°08′12″ W.; to the point of beginning.

Designated altitudes. FL 180 to but not including FL 350.

Time of designation. By NOTAM 24 hours in advance.

Controlling agency. FAA, Houston ARTCC.

Using agency. U.S. Army, Commanding General, Fort Polk, LA.

Issued in Washington, DC, on August 11, 2015.

M. Randy Willis,

Acting Manager, Airspace Policy and Regulations Group.

BILLING CODE 4910–13–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

21 CFR Part 882

[Docket No. FDA–2015–N–2737]

Medical Devices; Neurological Devices; Classification of the Computerized Cognitive Assessment Aid

AGENCY: Food and Drug Administration, HHS.

ACTION: Final order.

SUMMARY: The Food and Drug Administration (FDA) is classifying the computerized cognitive assessment aid into class II (special controls). The special controls that will apply to the device are identified in this order, and will be part of the codified language for the computerized cognitive assessment aid's classification. The Agency is classifying the device into class II (special controls) in order to provide a reasonable assurance of safety and effectiveness of the device.

DATES: This order is effective September 16, 2015. The classification was applicable on June 5, 2015.

FOR FURTHER INFORMATION CONTACT: Peter Como, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. G242, Silver Spring, MD 20993–0002, 301–796–6919, *peter.como@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with section 513(f)(1) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 360c(f)(1)), devices that were not in commercial distribution before May 28, 1976 (the date of enactment of the Medical Device Amendments of 1976), generally referred to as postamendment devices, are classified automatically by statute into class III without any FDA rulemaking process. These devices remain in class III and require premarket approval, unless and until the device is classified or reclassified into class I or II, or FDA issues an order finding the device to be substantially

equivalent, in accordance with section 513(i) of the FD&C Act, to a predicate device that does not require premarket approval. The Agency determines whether new devices are substantially equivalent to predicate devices by means of premarket notification procedures in section 510(k) of the FD&C Act (21 U.S.C. 360(k)) and part 807 (21 CFR part 807) of the regulations.

Section 513(f)(2) of the FD&C Act, as amended by section 607 of the Food and Drug Administration Safety and Innovation Act (Pub. L. 112–144), provides two procedures by which a person may request FDA to classify a device under the criteria set forth in section 513(a)(1). Under the first procedure, the person submits a premarket notification under section 510(k) of the FD&C Act for a device that has not previously been classified and, within 30 days of receiving an order classifying the device into class III under section 513(f)(1) of the FD&C Act, the person requests a classification under section 513(f)(2). Under the second procedure, rather than first submitting a premarket notification under section 510(k) of the FD&C Act and then a request for classification under the first procedure, the person determines that there is no legally marketed device upon which to base a determination of substantial equivalence and requests a classification under section 513(f)(2) of the FD&C Act. If the person submits a request to classify the device under this second procedure, FDA may decline to undertake the classification request if FDA identifies a legally marketed device that could provide a reasonable basis for review of substantial equivalence with the device or if FDA determines that the device submitted is not of ''low-moderate risk'' or that general controls would be inadequate to control the risks and special controls to mitigate the risks cannot be developed.

In response to a request to classify a device under either procedure provided by section 513(f)(2) of the FD&C Act, FDA will classify the device by written order within 120 days. This classification will be the initial classification of the device. On June 24, 2013, Cerebral Assessment Systems, Inc., submitted a request for classification of the Cognivue under section 513(f)(2) of the FD&C Act. The manufacturer recommended that the device be classified into class II (Ref. 1).

In accordance with section 513(f)(2) of the FD&C Act, FDA reviewed the request in order to classify the device under the criteria for classification set forth in section 513(a)(1). FDA classifies devices into class II if general controls by themselves are insufficient to provide reasonable assurance of safety and effectiveness, but there is sufficient information to establish special controls to provide reasonable assurance of the safety and effectiveness of the device for its intended use. After review of the information submitted in the request, FDA determined that the device can be classified into class II with the establishment of special controls. FDA believes these special controls, in addition to general controls, will provide reasonable assurance of the safety and effectiveness of the device.

Therefore, on June 5, 2015, FDA issued an order to the requestor classifying the device into class II. FDA is codifying the classification of the device by adding § 882.1470.

Following the effective date of this final classification administrative order, any firm submitting a premarket notification [510(k)] for a computerized cognitive assessment aid will need to comply with the special controls named in the final order. The device is assigned the generic name computerized cognitive assessment aid, and it is identified as a prescription device that uses an individual's score(s) on a battery of cognitive tasks to provide an interpretation of the current level of cognitive function. The computerized cognitive assessment aid is used only as an assessment aid to determine level of cognitive functioning for which there exists other valid methods of cognitive assessment and does not identify the presence or absence of clinical diagnoses. The computerized cognitive assessment aid is not intended as a stand-alone or adjunctive diagnostic device.

FDA has identified the following risks to health associated specifically with this type of device, as well as the measures required to mitigate these risks in table 1:

TABLE 1—COMPUTERIZED COGNITIVE ASSESSMENT AID RISKS AND MITIGATION MEASURES

Identified risk	Mitigation measure
Equipment malfunction leading to subject injury (shock, burn, or mechanical failure)	Electrical safety testing. Labeling.
User discomfort (*e.g.*, visual fatigue, stimulus-induced nausea)	Labeling.
Incorrect result, inclusive of: • False positive—cognitive impairment when, in fact, none is present • False negative—cognitive impairment when, in fact, cognitive impairment is present	Hardware and software verification, validation, and hazard analysis. Labeling.

FDA believes that the following special controls, in addition to the general controls, address these risks to health and provide reasonable assurance of safety and effectiveness:

- The technical parameters of the device's hardware and software must be fully characterized and be accompanied by appropriate non-clinical testing:
  - Hardware specifications must be provided. Appropriate verification, validation, and hazard analysis must be performed.
  - Software, including any proprietary algorithm(s) used by the device to arrive at its interpretation of the patient's cognitive function, must be described in detail in the Software Requirements Specification (SRS) and Software Design Specification (SDS). Appropriate software verification, validation, and hazard analysis must be performed.
- The device must be designed and tested for electrical safety.
- The labeling must include:
  - A summary of any testing conducted to demonstrate how the device functions as an interpretation of the current level of cognitive function. The summary of testing must include the following, if available: Any expected or observed adverse events and complications; any performance measurements including sensitivity, specificity, positive predictive value (PPV), and negative predictive value (NPV) per the device intended use; a description of the repeatability of measurements; a description of how the cut-off values for categorization of measurements were determined; and a

description of the construct validity of the device.

○ A warning that the device does not identify the presence or absence of clinical diagnoses.

○ A warning that the device is not a stand-alone diagnostic.

○ The intended use population and the intended use environment.

○ Any instructions technicians must convey to patients regarding the administration of the test and collection of cognitive test data.

Computerized cognitive assessment aids are prescription devices restricted to patient use only upon the authorization of a practitioner licensed by law to administer or use the device; see 21 CFR 801.109 (*Prescription devices*).

Section 510(m) of the FD&C Act provides that FDA may exempt a class II device from the premarket notification requirements under section 510(k), if FDA determines that premarket notification is not necessary to provide reasonable assurance of the safety and effectiveness of the device. For this type of device, FDA has determined that premarket notification is necessary to provide reasonable assurance of the safety and effectiveness of the device. Therefore, this device type is not exempt from premarket notification requirements. Persons who intend to market this type of device must submit to FDA a premarket notification, prior to marketing the device, which contains information about the computerized cognitive assessment aid they intend to market.

II. Environmental Impact

The Agency has determined under 21 CFR 25.34(b) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.

III. Paperwork Reduction Act of 1995

This final order establishes special controls that refer to previously approved collections of information found in other FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in part 807, subpart E regarding premarket notification submissions have been approved under OMB control number 0910–0120, and the collections of information in 21 CFR part 801, regarding labeling have been approved under OMB control number 0910–0485.

IV. Reference

The following reference has been placed on display in the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, and may be seen by interested persons between 9 a.m. and 4 p.m., Monday through Friday, and is available electronically at *http://www.regulations.gov*.

1. DEN130033: De Novo Request per 513(f)(2) of the Federal Food, Drug, and Cosmetic Act from Cerebral Assessment Systems, Inc., dated June 24, 2013.

List of Subjects in 21 CFR Part 882

Medical devices, Neurological devices.

Therefore, under the Federal Food, Drug, and Cosmetic Act and under authority delegated to the Commissioner of Food and Drugs, 21 CFR part 882 is amended as follows:

PART 882—NEUROLOGICAL DEVICES

■ 1. The authority citation for 21 CFR part 882 continues to read as follows:

Authority: 21 U.S.C. 351, 360, 360c, 360e, 360j, 371.

■ 2. Add § 882.1470 to subpart B to read as follows:

§ 882.1470 Computerized cognitive assessment aid.

(a) *Identification.* The computerized cognitive assessment aid is a prescription device that uses an individual's score(s) on a battery of cognitive tasks to provide an interpretation of the current level of cognitive function. The computerized cognitive assessment aid is used only as an assessment aid to determine level of cognitive functioning for which there exists other valid methods of cognitive assessment and does not identify the presence or absence of clinical diagnoses. The computerized cognitive assessment aid is not intended as a stand-alone or adjunctive diagnostic device.

(b) *Classification.* Class II (special controls). The special control(s) for this device are:

(1) The technical parameters of the device's hardware and software must be fully characterized and be accompanied by appropriate non-clinical testing:

(i) Hardware specifications must be provided. Appropriate verification, validation, and hazard analysis must be performed.

(ii) Software, including any proprietary algorithm(s) used by the device to arrive at its interpretation of the patient's cognitive function, must be described in detail in the software requirements specification (SRS) and software design specification (SDS). Appropriate software verification, validation, and hazard analysis must be performed.

(2) The device must be designed and tested for electrical safety.

(3) The labeling must include:

(i) A summary of any testing conducted to demonstrate how the device functions as an interpretation of the current level of cognitive function. The summary of testing must include the following, if available: Any expected or observed adverse events and complications; any performance measurements including sensitivity, specificity, positive predictive value (PPV), and negative predictive value (NPV) per the devices intended use; a description of the repeatability of measurements; a description of how the cut-off values for categorization of measurements were determined; and a description of the construct validity of the device.

(ii) A warning that the device does not identify the presence or absence of clinical diagnoses.

(iii) A warning that the device is not a stand-alone diagnostic.

(iv) The intended use population and the intended use environment.

(v) Any instructions technicians must convey to patients regarding the administration of the test and collection of cognitive test data.

Dated: August 11, 2015.

Leslie Kux,

Associate Commissioner for Policy.

[FR Doc. 2015–20177 Filed 8–14–15; 8:45 am]

BILLING CODE 4164–01–P

DEPARTMENT OF STATE

22 CFR Part 35

[Public Notice 9220]

RIN 1400–AD85

Program Fraud Civil Remedies

AGENCY: Department of State.

ACTION: Final rule.

SUMMARY: The Department of State is updating its regulations regarding its implementation of the Program Fraud Civil Remedies Act of 1986, to remove a conflict between the ''reviewing official'' and the ''authority head'' as defined by the implementing regulations.

DATES: This rule is effective August 17, 2015.

FOR FURTHER INFORMATION CONTACT: Alice Kottmyer, Attorney-Adviser,

Office of the Legal Adviser, (202) 647–2318, or *kottmyeram@state.gov.*

SUPPLEMENTARY INFORMATION: The Program Fraud Civil Remedies Act of 1986, 31 U.S.C. 3801 *et seq.* (the Act), outlines a procedure for establishing administrative procedures for imposing civil penalties and assessments against persons who make, submit, or present, or cause to be made, submitted, or presented, false fictitious, or fraudulent claims or written statements to authorities or to their agents; and specifying the hearing and appeal rights of persons subject to allegations of liability for such penalties and assessments. In a nutshell, the ''investigating official'' (who is in the Office of the Inspector General) presents a case to the ''reviewing official'' (currently defined as the Chief Financial Officer) who, if appropriate, forwards the case to the Department of Justice. The Department of Justice will approve a ''claim'' if it believes further action is warranted. The reviewing official serves the claim on the respondent. There is a hearing before an administrative law judge (ALJ), and a disposition adverse to the respondent can be appealed to the ''authority head,'' defined in the rule as the Under Secretary for Management.

Currently, the Under Secretary for Management is designated by the President as the Chief Financial Officer for the Department of State. Therefore, he is the reviewing official as well as the authority head, which of course is unacceptable. This rule corrects that anomaly, by defining the ''reviewing official'' as the Assistant Legal Adviser for Buildings and Acquisitions (hereinafter, ''the ALA''). The Under Secretary for Management remains the authority head.

The Act (in 31 U.S.C. 3801(a)(8)) outlines the qualifications for the reviewing official, all of which are met by the ALA. (1) He or she must be designated by the authority head to make the determination under 31 U.S.C. 3803(a)(2) to send the case to the Department of Justice for its review and action, if appropriate. (2) He or she must be serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for grade GS–16 under the General Schedule; the ALA is a member of the Senior Executive Service, and thus has a rate of pay at least as high as GS–16, a grade which was eliminated under the provisions of the Civil Service Reform Act of 1978. (3) He or she must not be subject to supervision by, or required to report to, the investigating official, and not employed in the organizational unit of the authority in which the investigating official is employed; the ALA is not in the Office of the Inspector General and is not (nor will he or she ever be) subject to the supervision of anyone in that office.

Accordingly, 22 CFR 35.2(r), the definition of ''reviewing official,'' is changed by this rulemaking.

Regulatory Findings

Administrative Procedure Act

This regulation amends a ''rule of agency organization, procedure, or practice'', which is not subject to the notice-and-comment rulemaking procedures set forth in 5 U.S.C. 553. See 5 U.S.C. 553(b). Therefore, the Department is issuing this amendment as a final rule.

Regulatory Flexibility Act/Executive Order 13272: Small Business

Because this final rule is exempt from notice and comment rulemaking under 5 U.S.C. 553, it is exempt from the regulatory flexibility analysis requirements set forth by the Regulatory Flexibility Act. Nonetheless, consistent with the Regulatory Flexibility Act, the Department certifies that this rule will not have a significant economic impact on a substantial number of small entities.

Unfunded Mandates Reform Act of 1995

Section 202 of the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1532, generally requires agencies to prepare a statement before proposing any rule that may result in an annual expenditure of $100 million or more by State, local, or tribal governments, or by the private sector. This rule will not result in any such expenditure, nor will it significantly or uniquely affect small governments.

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by 5 U.S.C. 804. The Department is aware of no monetary effect on the economy that would result from this rulemaking, nor will there be any increase in costs or prices; or any effect on competition, employment, investment, productivity, innovation, or the ability of United States-based companies to compete with foreign-based companies in domestic and import markets.

Executive Orders 12866 and 13563

The Department of State has reviewed this rule to ensure its consistency with the regulatory philosophy and principles set forth in Executive Orders 12866 and 13563, and has determined that the benefits of this regulation outweigh any cost. The Department does not consider this rule to be a economically significant rulemaking action.

Executive Orders 12372 and 13132: Federalism

This regulation will not have substantial direct effects on the States, on the relationship between the national government and the States, or the distribution of power and responsibilities among the various levels of government. The rule will not have federalism implications warranting the application of Executive Orders 12372 and 13132.

Executive Order 12988: Civil Justice Reform

The Department has reviewed the regulation in light of sections 3(a) and 3(b)(2) of Executive Order 12988 to eliminate ambiguity, minimize litigation, establish clear legal standards, and reduce burden.

Executive Order 13175

The Department of State has determined that this rulemaking will not have tribal implications, will not impose substantial direct compliance costs on Indian tribal governments, and will not preempt tribal law. Accordingly, the requirements of Executive Order 13175 do not apply to this rulemaking.

Paperwork Reduction Act

This rule does not impose or revise information collection requirements under the provisions of the Paperwork Reduction Act, 44 U.S.C. Chapter 35.

List of Subjects in 22 CFR Part 35

Administrative practice and procedure, Claims, Fraud, Penalties.

For the reasons stated in the preamble, amend part 35 of title 22 of the Code of Federal Regulations as follows:

PART 35—PROGRAM FRAUD CIVIL REMEDIES

■ 1. The authority citation for part 35 is revised to read as follows:

Authority: 22 U.S.C. 2651a; 31 U.S.C. 3801 *et seq.*

■ 2. Revise § 35.2(r) to read as follows:

§ 35.2 Definitions.

* * * * *

(r) *Reviewing official* means the Assistant Legal Adviser for Buildings and Acquisitions or her or his designee who is—

(1) Not subject to supervision by, or required to report to, the investigating official;

(2) Not employed in the organizational unit of the authority in which the investigating official is employed; and

(3) Serving in a position for which the rate of basic pay is not less than the minimum rate of basic pay for grade GS–16 under the General Schedule.

Dated: August 3, 2015.

Patrick F. Kennedy,

Under Secretary of State for Management, Department of State.

[FR Doc. 2015–20263 Filed 8–14–15; 8:45 am]

BILLING CODE 4710–08–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

24 CFR Part 15

[Docket No. FR–5624–F–02]

RIN 2501–AD57

Revision of Freedom of Information Act Regulation

AGENCY: Office of the Deputy Secretary, HUD.

ACTION: Final rule.

SUMMARY: This final rule amends HUD's regulations implementing the Freedom of Information Act (FOIA) to update and streamline HUD's current FOIA regulation. Specifically, it updates HUD's regulations to reflect statutory changes to the FOIA, current HUD organizational structure, and current HUD policies and practices with respect to the FOIA. In addition, the rule uses current cost figures in calculating and charging fees. This final rule also incorporates changes made upon further evaluation of HUD's FOIA Regulation and in response to public comments received.

DATES: *Effective:* September 16, 2015.

FOR FURTHER INFORMATION CONTACT: Dolores W. Cole, Director, FOIA and Executive Correspondence, Office of Administration, Department of Housing and Urban Development, 451 7th Street SW., Room 10139, Washington, DC 20410–0500; telephone number 202–402–2671 (this is not a toll-free number). Hearing- or speech-impaired individuals may access this number via TTY by calling the Federal Relay Service at telephone number 1–800–877–8339 (this is a toll-free number).

SUPPLEMENTARY INFORMATION:

I. Background

HUD's regulations at 24 CFR part 15 contain the policies and procedures governing public access to HUD records under the FOIA (5 U.S.C. 552). Subject to certain statutory exceptions, the FOIA gives persons the right to request and receive a wide range of information from any Federal agency. The FOIA has been amended several times since its enactment in 1966. In 2007, significant amendments to the FOIA were made by the Openness Promotes Effectiveness in our National Government Act of 2007 (OPEN Government Act) (Pub. L. 110–175, approved December 31, 2007). The OPEN Government Act made several amendments to procedural issues affecting FOIA administration, including the protection of the fee status for news media, the time limits for agencies to act upon FOIA requests, the availability of agency records maintained by a private entity, the establishment of a FOIA Public Liaison and FOIA Requester Service Center, and the requirement to describe the exemptions authorizing the redaction of material provided under the FOIA.

In addition to these statutory changes, several policy directives have been issued that affect HUD's FOIA program. These policy directives include Presidential memoranda dated January 21, 2009, entitled ''Freedom of Information Act'' (74 FR 4683, January 26, 2009), which applies a presumption of disclosure in FOIA decision-making and ''Transparency and Open Government'' (74 FR 4685, January 26, 2009), which encourages Federal agencies to harness new technologies to proactively post online information about their operations and decisions consistent with applicable law. As required by the Presidential memoranda, on March 19, 2009, Attorney General Eric Holder issued comprehensive new FOIA guidelines (see *http://www.justice.gov/ag/foia-memo-march2009.pdf*). The Attorney General's guidance further advises that agencies should release information to the fullest extent of the law, including information that may be legally withheld, provided there is no foreseeable harm to an interest protected by an exemption or the disclosure is not prohibited by law. In addition, the Attorney General's FOIA guidelines emphasized that agencies must have effective systems in place for responding to FOIA requests.

Consistent with this law and guidance, HUD undertook a comprehensive review of its FOIA regulation. As part of this review, HUD looked to the proposed updated FOIA regulation published by the Department of Justice (DOJ) on March 21, 2011 (76 FR 15236). DOJ intended that its regulation serve as a model for all agencies in updating their own FOIA regulations.[1] As a result of its review, HUD published a proposed rule on May 31, 2013 (78 FR 32595), modeled on DOJ's proposed regulation, to incorporate changes enacted by the OPEN Government Act of 2007, reflect developments in case law, include current cost figures for calculating and charging fees, and enhance the administration and operation of HUD's FOIA program by increasing the transparency and clarity of the regulation.

II. Changes and Clarifications Made in This Final Rule

This final rule follows publication of the May 31, 2013, proposed rule and takes into consideration the public comments received on the proposed rule. In response to public comment, a discussion of which is presented in the following section of this preamble, and in further consideration of issues addressed at the proposed rule stage, the Department is making the following changes at this final rule:

- HUD is revising § 15.103(c) to state that HUD will provide written notice to requesters when the time limits for HUD's response will be delayed. HUD will also provide the requester with the date by which HUD expects to complete its processing of the request.
- HUD is revising § 15.104(c)(3) to mirror the language of the FOIA. Specifically, HUD is removing the requirement that a representative of the news media, if not a full-time member of the news media, should establish that he or she is a person whose main professional activity or occupation is information dissemination.
- HUD is revising § 15.106(c) to reduce the duplication costs that HUD will charge for a paper photocopy of a record from $0.18 per page to $0.10 per page.
- HUD is revising § 15.107(a) to refer to the most current Executive order regarding classified information, which is Executive Order 13526, issued December 29, 2009.
- HUD is removing proposed § 15.109 from this final rule. Upon review HUD has determined that, § 15.109, entitled ''Mortgage sales,'' directed itself to a specific HUD program rather than establish disclosure policy applicable

[1] See, *http://www.justice.gov/sites/default/files/testimonies/witnesses/attachments/03/15/11/03-15-11-oip-pustay-testimony-re-the-freedom-of-information-act---ensuring-transparency-and-accountability-in-the-digital-age.pdf.*

throughout the Department. In addition, § 15.109 as proposed did not accurately describe the process that HUD uses to address FOIA requests for information arising out of HUD's mortgage sales program. As a result, HUD is removing § 15.109 as proposed from this final rule.

- HUD is revising § 15.110(a) of the proposed rule (redesignated as § 15.109(a) in this final rule) to clarify that appeals may be submitted electronically.
- HUD is revising § 15.111(a)(2) of the proposed rule (redesignated as § 15.110(a)(2) in this final rule) by adding paragraph (iii) to provide that HUD will notify requesters of dispute resolution services in its FOIA appeal determination response letter.

III. Analysis of Public Comments

The public comment period for the May 31, 2013, proposed rule closed on July 30, 2013, and HUD received three public comments on the proposed rule. Comments were submitted by a nonprofit organization devoted to issues of effective government and by two members of the public. HUD reviewed the comments and considered responses to them. This section presents the significant issues, questions, and suggestions submitted by the commenters and HUD's responses.

Comment: HUD should expand online disclosures. One commenter recommended that HUD adopt a policy of proactively identifying records that are of interest to the public and posting such records online without waiting for FOIA requests. Accordingly, the commenter recommended that § 15.101 be revised to state that ''HUD will proactively identify and disclose additional records of interest to the public.'' The commenter added that the E–FOIA Act of 1996 mandates agencies to post online any information that has been released in response to a FOIA request and ''is likely to become the subject of subsequent requests.'' The commenter stated that some agencies have adopted the practice of posting all released records and suggested that HUD adopt this policy by revising its proposed rule to read: ''HUD will post all records released in response to FOIA requests in a searchable format on the agency Web site.'' Finally, the commenter stated that HUD should also revise § 15.101 by adopting a policy of publishing online its indexes of disclosed records.

Response: Section 15.101 revises HUD's FOIA regulation to reflect its current practice of proactively identifying and disclosing frequently requested records without waiting for a FOIA request. HUD developed the list of documents that it posts without request based on its prior experience regarding agency records that generally are of interest to the public. This list is not exhaustive and the final rule provides HUD the flexibility to post additional records without request. Releasing all records requested, along with an index, as requested by the commenter, would be excessively burdensome for the agency. HUD believes that § 15.101, as drafted, successfully balances its commitment to transparency as directed by President Obama's memorandum and Attorney General Holder's FOIA Guidance, within the scope of HUD's available resources. Accordingly, HUD has determined not to revise this section as the commenter recommended.

Comment: Information about the record sought. A commenter stated that clear and open communications between requesters and agency staff is vital to an effective, user-friendly FOIA process. Toward this end, the commenter recommended that HUD revise § 15.102(d)(2) to delete the first sentence that provides that FOIA requests ''include, whenever possible, detailed and specific information about each record sought, such as the date, title or name, author, recipient, and subject matter of the record,'' and substitute simply that FOIA requests should ''reasonably describe the records sought.'' The commenter also recommended that HUD delete the last sentence of this paragraph, which reads ''Insufficient descriptions may lead HUD officials to contact the requester to seek additional information for their record search.''

Response: HUD agrees that clear and open communications is vital to an effective and user-friendly FOIA process. Based on HUD's experience, § 15.102(d)(2) supports this goal by describing the type of information that will assist HUD to more promptly and effectively respond to a FOIA request. HUD therefore declines to revise § 15.102(d)(2) as suggested by the commenter.

Comment: Notification of further clarification needed. A commenter stated that HUD should adopt a policy stating that it will contact the requester to seek clarification before denying a request on the basis of its not reasonably describing the records sought. The commenter suggested that HUD revise this section of the rule to state: ''If HUD believes that a request may not reasonably describe the records sought, HUD will contact the requester to seek clarification. HUD will provide at least 30 days for the requester to respond. If the request has not been clarified after 30 days, HUD may decide to deny the request for not reasonably describing the records sought. If HUD determines that it must deny the request for not reasonably describing the records sought, it will notify the requester under the procedures in § 15.105(d)(2).''

Response: HUD's current policy is to request clarification prior to issuing an adverse determination based on a requester's failure to reasonably describe the records sought. In addition, depending on the specific request, HUD may on a case-by-case basis establish time limits for the requester to provide clarification. HUD, therefore, believes that imposing a 30-day time period would unnecessarily limit the staff's ability to exercise discretion in processing these requests. HUD, therefore, declines to revise § 15.105(d)(2) as recommended by the commenter.

Comment: Notification of delayed processing. A commenter recommended that HUD revise § 15.103(c) to state that HUD will notify requesters in writing as is required by FOIA when processing will be delayed.

Response: HUD agrees with the commenter and revises § 15.103(c) of the final rule to mirror the language of the FOIA by providing that, in unusual circumstances, the time limits prescribed in the regulation may be extended by written notice to the requester making such request. The written notice will also set forth the unusual circumstances for such extension and the date on which a determination is expected to be released.

Comment: Phrasing of revised language in § 15.104(c)(3). A commenter stated that language in proposed § 15.104(c)(3), which would require requesters who are not full-time members of the news media to submit a statement establishing that the requester ''is a person whose main professional activity or occupation is information dissemination'' when requesting expedited processing of a request, changes the meaning of FOIA. According to the commenter, this requirement is not found in FOIA and excludes an entire class of individuals, such as bloggers and other participants and thought leaders of the digital world who may be well positioned to expedite dissemination of information. The commenter recommended that the reference to ''main professional activity or occupation'' be removed and that § 15.104(c)(3) be revised to mirror FOIA.

Response: HUD agrees that the language in the final rule should mirror the language in the FOIA and therefore revises § 15.104(c)(3) to require that the

requester be ''primarily engaged in disseminating information.'' References to requirements that the requester, ''if not a full-time member of the news media, should establish that he or she is a person whose main professional activity or occupation is information dissemination,'' have been deleted.

Comment: Notification of rerouting and referrals. Two commenters recommended that HUD revise the rule to improve communications with the requester. These commenters recommended that HUD notify the requester if it reroutes the request to another government agency or second HUD office, as is permitted during the 10-day window immediately following HUD's receipt of the initial FOIA request. The commenters described this change as a modest step that is consistent with the policies of other Federal agencies and which would benefit HUD by reducing the number of requester inquiries made to the HUD FOIA office.

Response: HUD's current policy is to notify requesters that their request is being rerouted or referred to another Federal agency or a second HUD office. Federal agencies to which requests are referred follow their own policies to ensure that requesters are notified that their FOIA requests have been received. In addition, requesters can identify the HUD FOIA office to which their request has been rerouted by checking the status of their request online at *http://www.hud.gov/FOIA.* Because these options are available to requesters, HUD declines to revise § 15.105 to adopt the commenters' recommendations.

Comment: Keeping requesters informed regarding updates on the status of their FOIA requests. A commenter recommended that HUD revise § 15.105 to include provisions that would require HUD to notify all requesters as soon as practicable of the estimated time it will take to complete a request and provide requesters with the opportunity to reformulate their requests. The commenter also recommended that HUD revise the rule to provide on the agency's Web site automated updates on the status of FOIA requests and suggested that HUD can implement this recommendation by joining the multiagency portal FOIA online, which allows requesters to track the status of requests online.

Response: Section 15.103(a) provides that HUD generally will respond to a FOIA request within 20 working days of receipt. As discussed in this preamble, HUD is revising this section in the final rule to state that it will provide written notice to requesters when it extends the time to process a request, and will also provide the requester with the date by which HUD expects to complete its processing of the request. Given the number, unpredictability, and variability in type and scope of FOIA requests that HUD receives, however, it would be extremely difficult for HUD to offer specific dates by which it could estimate the processing time for any specific FOIA request not subject to § 15.103(a). In addition, HUD provides requesters the ability to verify the status of their FOIA requests through an online tool that is similar to FOIAonline and that is available at *http://www.hud.gov/FOIA.* Finally, HUD believes that the rule already addresses the commenter's concern that requesters be granted an opportunity to reformulate requests during the process. For example, § 15.103(c) provides that HUD will offer the requester the opportunity to limit the scope of a request if HUD determines that providing responsive documents will take more than the 10 working days established in § 15.103(a). For these reasons, HUD declines to revise the rule as recommended by the commenter.

Comment: Electronic communications. A commenter recommended that HUD adopt a policy to communicate with requesters by email, where appropriate, as digital communications are changing the way government connects with citizens, and email communications could result in cost savings for the agency.

Response: The FOIA does not require agencies to use a specific means to communicate with requesters. HUD currently communicates with requesters by email, when appropriate, and will continue to do so. At the same time, HUD requires the discretion to use physical mail when it deems necessary. For these reasons, HUD declines to revise the rule as recommended by the commenter.

Comment: Plain communications. A commenter stated that the Plain Writing Act of 2010 directs agencies to use ''writing that is clear, concise, well-organized, and follows other best practices appropriate to the subject or field and intended audience'' in any document that ''provides information about Federal Government benefit or service.'' The commenter recommended that HUD revise § 15.105 to state: ''HUD will use plain language in all communications with requesters.''

Response: HUD's current policy is to use plain language for all communications with the public. Some requests, however, require the production of records that are inherently technical or drafted for audiences with more technical backgrounds or expertise than the general public. As a result, HUD concludes that adding the language suggested by the commenter would be superfluous and may mislead requesters to expect HUD to translate technical documents into plain language. HUD therefore declines to amend this section in the final rule as requested by the commenter.

Comment: Release records on a rolling basis. A commenter stated that HUD should revise § 15.105 to require HUD to release records on a rolling basis, where requests involve a voluminous amount of material or searches in multiple locations.

Response: HUD's existing policy allows individual HUD FOIA offices to decide whether to release voluminous amounts of records on a rolling basis or all at once, depending on the specific request, the difficulty of collecting records responsive to the request, and the effective administration of the office's internal FOIA processing. HUD declines to revise this section of the rule in order to permit individual HUD FOIA offices the continued discretion over the appropriate approach to releasing records.

Comment: Rate of per-page printing. Two commenters stated that HUD's fee of $0.18 per page is a potential impediment to requests from members of the public, that it is higher than the rate imposed by other agencies, and that it does not reflect the amount that it costs HUD to print on a page. Both commenters recommended that HUD establish a standard fee of $0.10 per page. In addition, one commenter recommended that HUD revise the regulation to provide that it will not charge a fee if the total fee does not exceed $50, instead of the $25 threshold proposed by § 15.106(d)(4). The commenter stated that charging requesters the costs for producing small FOIA requests is uneconomical and contributes to processing delays. The commenter also stated that revising the $25 threshold would streamline the processing of requests that cost HUD less than $50.

Response: HUD appreciates the commenters' recommendations. HUD has reviewed its FOIA fee structure and agrees that it should revise its longstanding policy of charging $0.18 per page to the standard fee of $0.10 per page. Section 15.106(c) is revised to reflect this change. HUD's cost of responding to a request, however, has not changed. As a result, HUD will continue its practice of not charging the requester for processing a request if the total fee does not exceed $25. Based on HUD's experience, even at this $25

threshold, most requesters will still not be charged a processing fee.

Comment: Fee Waivers. A commenter stated that the proposed § 15.106(k)(5), which would give HUD discretion to consider ''the cost effectiveness of its investment of administrative resources'' when deciding whether to grant requests for a fee waiver or reduction, contradicts the plain language of FOIA. The commenter asserted that FOIA provides that agencies do not have authority to consider additional factors when deciding to waive or reduce fees if the statutory conditions are met. Accordingly, the commenter recommended that § 15.106(k)(5) be struck from the final rule.

Response: Section 552(a)(4)(A)(i) of the FOIA states that, ''[i]n order to carry out the provisions of this section, each agency shall promulgate regulations . . . establishing procedures and guidelines for determining when such fees should be waived or reduced.'' Accordingly, HUD is properly exercising its statutorily granted discretion in establishing that it will consider additional factors in deciding whether to grant requests for a fee waiver or reduction. HUD therefore declines to remove § 15.106(k)(5) from the final rule.

Comment: Applying ''foreseeable harm'' standard for withholding. A commenter stated that HUD should adopt a policy of applying a presumption of openness in processing requests and of only withholding information if it reasonably foresees that disclosure would harm an interest protected by one of the statutory exemptions. According to the commenter, applying this ''foreseeable harm'' standard would help to ensure that HUD does not improperly withhold information. The commenter recommends that HUD revise § 15.107 to add that ''HUD will conduct a foreseeable harm analysis, which clearly identifies the harm that would occur with disclosure.''

Response: HUD withholds documents according to the nine FOIA statutory exemptions that protect various records from disclosure (*see* 5 U.S.C. 552(b)), in conjunction with existing case law and publicly available guidance issued by the Department of Justice. When the request is one that appropriately raises questions of foreseeable harm, HUD staff analyzes the request in light of this standard. Not all requests require this level of review. Accordingly, HUD declines to amend the regulation to incorporate a standard that is not currently reflected in the FOIA.

Comment: Technical amendment to source reference. A commenter recommended that § 15.107(a) be updated to refer to the most current Executive order regarding classified information, which is Executive Order 13526, issued December 29, 2009.

Response: HUD agrees with the commenter and updates this reference in the final rule.

Comment: Avoiding frivolous claims of confidential business information. A commenter suggested that HUD require that submitters of confidential business information use good faith efforts to designate any information that such submitters consider exempt from disclosure under FOIA Exemption 4, and that HUD indicate in this final rule what constitutes a ''good faith effort.'' Specifically, the commenter suggested editing § 15.108(b) to read: ''A blanket designation on each page of a submission that all information contained on the page is protected from disclosure under Exemption 4 presumptively will not be considered a good faith effort.''

Response: Section 15.108(b) of the rule already requires submitters of business information to ''use good faith efforts to designate . . . any portion of its submission that it considers to be protected from disclosure under Exemption 4.'' Furthermore, the commenter's suggested language could create undue processing delays by creating the presumption that entire pages marked as ''business information'' are not marked as such in good faith. In practice, the determination of what constitutes a good faith effort does not hinge on the number of submitted pages entirely marked as ''business information.'' HUD therefore declines to amend this provision.

Comment: Decreased notifications to submitters of ''business information.'' The commenter also suggested that in the interest of avoiding undue delays, HUD establish that it is unnecessary to notify submitters of business information if HUD determines that the claim of confidential business information is obviously frivolous. The commenter also recommended that HUD provide specific time limits, generally 5 working days, for submitters to object to the release of submitted information and this proposed change be incorporated in § 15.108(e).

Response: HUD's current policy regarding the obligation to notify submitters of business information is to provide all of the basic procedural protections that HUD is required to give submitters under Executive Order 12600. It currently is already HUD's practice to grant submitters a reasonable number of days to object to the release of submitted information, as is required by Executive Order 12600, and to require that such objections be justified. HUD therefore declines to amend this provision in the final rule.

Comment: Copies of the original request and adverse determination. A commenter stated that requiring requesters to provide a copy of their original request is unnecessary and unfair because original requests might be difficult to locate after years pass between the time of submission and the appeal. The commenter added that HUD should remove this requirement, as well as the requirement for a copy of the adverse determination, from the proposed rule because many individuals do not have access to a scanner or a photocopier. The commenter suggested that HUD instead ''encourage'' appellants to provide these two copies.

Response: Because HUD often processes multiple requests from the same requester, provision of a copy of the original request and of the original adverse determination helps HUD's reviewing staff to ensure that they issue accurate responses to the original concern or request. Requesting the submission of these copies with an appeal does not pose an unnecessary and unfair burden upon requesters. HUD believes that most requesters have several tools available to make photocopies of important documents, with no exceptional inconvenience to them. In exceptional circumstances, however, requesters might be able to obtain a scanned or printed copy of their original request by contacting the HUD FOIA office handling the request. HUD, therefore, declines to amend § 15.110 of the proposed rule as recommended.

Comment: Providing a longer time period to submit appeals. A commenter suggested that HUD provide requesters with a minimum of 60 days to submit their administrative appeals, instead of the 30 days provided under the rule. The commenter added that this would provide requesters adequate time to gather the necessary information and to formulate any arguments they wish to make in the appeal.

Response: The FOIA provides agencies discretion in setting forth deadlines by which requesters must file their administrative appeals of adverse determinations. HUD's current policy of allowing a requester 30 days to submit an appeal is intended to ensure that FOIA requests and disputes are resolved as promptly as possible. Because an extension of this filing period would defeat this policy goal, HUD declines to amend this provision to, instead, grant requesters 60 days to file appeals to

adverse determinations as recommended.

Comment: Electronic process for appeal submissions. A commenter recommended that HUD provide requesters the option to submit their administrative appeals by email or through the HUD Web site, as opposed to the current process, which requires the submission of appeals ''in writing to the address specified in HUD's notice responding to a FOIA request.''

Response: HUD does not believe that § 15.110 of the proposed rule (redesignated as § 15.109 in this final rule) precludes the submission of an appeal electronically. Nevertheless, HUD has clarified that appeals may be submitted electronically by stating, ''If the letter of appeal is *transmitted electronically* or by a means other than the U.S. Postal Service, it must be received in the appropriate office by the close of business on the 30th calendar day after the date of HUD's letter of determination.'' HUD agrees with the commenter, however, that the public should have the option of submitting their appeals electronically. As a result, HUD has recently expanded its FOIA management system (FMS2), to accommodate the receipt of FOIA appeals electronically. HUD's FOIA management system includes a public access link that allows members of the public to submit FOIA requests electronically and track the status of their requests. HUD agrees that extending these capabilities to the submission of appeals will expedite the review of appeals and ensure that the public is better informed regarding the status of their appeals.

Comment: Notifying requesters of dispute resolution services available for appeal determinations. A commenter stated that HUD should adopt a policy of notifying requesters of dispute resolution services in appeal determination letters. The commenter added that HUD should revise the language at § 15.111(a)(2)(ii) of the proposed rule to add: ''HUD will provide the requester with the name and contact information of the Office of Government Information Services, which offers mediation services to resolve disputes between FOIA requesters and Federal agencies as a non-exclusive alternative to litigation.''

Response: HUD has considered the commenter's suggestion and agrees to provide requesters notification of dispute resolution services in the appeal determination letters. In addition, HUD will post the contact information for the Office of Government Information Services on its FOIA Web site. See § 15.110(a)(2)(iii).

IV. Findings and Certifications

Executive Order 12866 and Executive Order 13563

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if the regulation is necessary, to select the regulatory approach that maximizes net benefits. Because this final rule incorporates changes enacted by the OPEN Government Act of 2007 and otherwise updates and streamlines HUD's current FOIA regulation, the rule was determined to not be a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and therefore was not reviewed by the Office of Management and Budget.

Environmental Impact

This final rule is categorically excluded from environmental review under the National Environmental Policy Act (42 U.S.C. 4321). The revision of FOIA-related provisions of 24 CFR part 15 falls within the exclusion provided by 24 CFR 50.19(c)(1) in that it does not direct, provide for assistance or loan and mortgage insurance for or otherwise govern or regulate real property acquisition, disposition, leasing, rehabilitation, alteration, demolition, or new construction, or establish, revise, or provide for standards for construction or construction materials, manufactured housing, or occupancy.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. This final rule establishes the process by which HUD will respond to requests for information under the FOIA. Costs assessed by HUD for search, review, and duplication required to process the information requested by a requester are limited by the FOIA to direct costs and are not economically significant. As a result, the final rule will not have a significant economic impact on a substantial number of small entities.

Executive Order 13132, Federalism

Executive Order 13132 (entitled ''Federalism'') prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial direct compliance costs on state and local governments and is not required by statute, or the rule preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive order. This final rule does not have federalism implications and does not impose substantial direct compliance costs on state and local governments or preempt state law within the meaning of the Executive order.

Unfunded Mandates

Title II of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) establishes requirements for Federal agencies to assess the effects of their regulatory actions on state, local, and tribal governments and on the private sector. This final rule does not impose any Federal mandates on any state, local, or tribal governments, or on the private sector, within the meaning of the Unfunded Mandates Reform Act of 1995.

List of Subjects in 24 CFR Part 15

Classified information, Courts, Freedom of information, Government employees, Reporting and recordkeeping requirements.

For the reasons stated in the preamble, HUD amends 24 CFR part 15 as follows:

PART 15—PUBLIC ACCESS TO HUD RECORDS UNDER THE FREEDOM OF INFORMATION ACT AND TESTIMONY AND PRODUCTION OF INFORMATION BY HUD EMPLOYEES

Subpart A—General Provisions

■ 1. The authority for 24 CFR part 15 continues to read as follows:

Authority: 42 U.S.C. 3535(d), 5 U.S.C. 552.

■ 2. Revise subpart A to read as follows:

Subpart A—General Provisions

Sec.
15.1 General provisions.
15.2 Definitions.

§ 15.1 General provisions.

(a) *Scope.* Requests for material from HUD will be processed as set forth in this part. The Federal Housing Administration and the Government National Mortgage Association are components of HUD and are also covered by this part.

(b) *Subpart B.* Subpart B of this part contains the rules that HUD follows in processing requests for records under the Freedom of Information Act (FOIA) (5 U.S.C. 552). These rules should be read together with the FOIA, which provides additional information about access to records maintained by HUD.

Information routinely provided to the public as part of a regular Department activity may be provided to the public without following this subpart.

(c) *Subpart C.* Subpart C of this part describes the procedures to be followed and standards to be applied in processing demands for the production of material or provision of testimony in legal proceedings among private litigants.

(d) *Subpart D.* Subpart D of this part describes the procedures to be followed and standards to be applied in processing demands for the production of material or provision of testimony in legal proceedings in which the United States is a party.

(e) *Inspector General.* Subparts B and C of this part do not apply to the Office of Inspector General. The procedures that apply to the Office of Inspector General are described in parts 2002 and 2004 of this title.

§ 15.2 Definitions.

(a) The following definitions apply to this part.

Agency record means any documentary material that is either created or obtained by an agency in the transaction of agency business and is under agency control. ''Agency record'' does not include records that are not already in existence and which would have to be created specifically to meet a request.

Business information means commercial or financial information provided to HUD by a submitter that arguably is protected from disclosure under Exemption 4 (42 U.S.C. 552(b)(4)) of the FOIA.

FOIA means the Freedom of Information Act (5 U.S.C. 552).

HUD means the Department of Housing and Urban Development.

Review means the examination of a record located in response to a request in order to determine whether any portion of it is exempt from disclosure. Review time includes processing any record for disclosure (for example, doing all that is necessary to redact it and prepare it for disclosure). Review costs are recoverable even if a record ultimately is not disclosed. Review time includes time spent considering any formal objection to disclosure, made by a business submitter under § 15.108, but does not include time spent resolving general legal or policy issues regarding the application of exemptions.

Search means the process of looking for and retrieving records or information responsive to a request. It includes page-by-page or line-by-line identification of information within records and also includes reasonable efforts to locate and retrieve information from records maintained in electronic form or format.

Secretary means the Secretary of Housing and Urban Development.

Submitter means any person or entity that provides business information, directly or indirectly, to HUD. The term includes, but is not limited to, corporations, State governments, and foreign governments.

(b) The following definitions apply to subparts C and D of this part.

Appropriate Associate General Counsel means the Associate General Counsel for Litigation or the Associate General Counsel for HUD Headquarters employees in those programs for which the Associate General Counsel provides legal advice.

Appropriate Regional Counsel means the Regional Counsel for the regional office having delegated authority over the project or activity with respect to which the information is sought. For assistance in identifying the Appropriate Regional Counsel, see appendix A to this part.

Authorized Approving Official means the Secretary, General Counsel, Appropriate Associate General Counsel, or Appropriate Regional Counsel.

Demand means a subpoena, order, or other demand of a court or other authority that is issued in a legal proceeding and any accompanying submissions.

Employee of the Department means a current or former officer or employee of the United States appointed by or subject to the supervision of the Secretary, but does not include an officer or employee covered by part 2004 of this title.

Good cause means necessary to prevent a miscarriage of justice or to promote a significant interest of the Department.

Legal proceeding includes any proceeding before a court of law or other authority; *e.g.,* an administrative board or commission, a hearing officer, an arbitrator, or other body conducting a quasi-judicial or legislative proceeding.

Legal proceeding among private litigants means any legal proceeding in which the United States is not a party.

Legal proceeding in which the United States is a party means any legal proceeding including as a named party the United States, the Department of Housing and Urban Development, any other Federal executive or administrative agency or department, or any official thereof in his official capacity.

Material means either documents or information contained in, or relating to contents of, the files of the Department, or documents or information acquired by any person, while such person was an employee of the Department, as a part of the performance of his or her official duties or because of his or her official status.

Production means to produce material by any means other than through the provision of oral testimony.

Testimony means any oral or written statements made in litigation under oath or penalty of perjury.

United States means the Federal Government of the United States (including the Department), the Secretary, and any employees of the Department in their official capacities.

■ 3. Revise subpart B to read as follows:

Subpart B. Procedures for Disclosure of Records Under the FOIA

Sec.

§ 15.101 Proactive disclosures of department records.

(a) *In General.* Records that are required to be made available for public inspection and copying are accessible on the Department's Web site at *http://www.hud.gov/FOIA.* Published agency records, whether or not they are available for purchase, are made available for examination. Each HUD office (headquarters and field) has a FOIA Public Liaison that can assist individuals in locating records. A list of the Department's FOIA Public Liaisons is available at *http://www.hud.gov/FOIA.*

(b) *Electronic FOIA reading room.* As required by 5 U.S.C. 552(a)(2), HUD makes records created on or after November 1, 1996, available through its electronic FOIA Reading Room, located on HUD's FOIA Web site at *http://www.hud.gov/FOIA.* These records include:

(1) Final opinions and orders.

(2) Public access to high-value, machine readable datasets via http://www/data/gov.

(3) Statements of policy and interpretation, including:

(i) HUD's Client and Information Policy Systems (HUDCLIPS);

(ii) Housing policy;

(iii) Public and Indian Housing policy and regulations;

(iv) Public and Indian Housing policy and guidance (PHA Plans); and

(v) Community Planning and Development policy and guidance.

(4) Administrative staff manuals.

(5) HUD's online library.

(6) Fair housing information.

(c) *Frequently requested materials.* HUD also makes frequently requested materials available on its FOIA Web site at *http://www.hud.gov/FOIA.* These frequently requested materials include information related to:

(1) Highest-scoring funding grant applications.

(2) Purchase charge cardholders.

(3) FHA refunds.

(4) FHA-approved lenders.

(5) Homes for sale.

(6) How to buy a HUD home.

(7) How to apply for public housing and Section 8 housing.

(8) Housing for the elderly.

(9) Housing for individuals with disabilities.

(10) HUD contracting home page.

(11) FHA mortgage insurance programs.

(12) HUD handbooks.

(13) HUD programs.

(14) HUD telephone directory.

(15) HUD homes listing.

(16) HUD's organization.

(17) Multifamily housing data.

(18) Public housing authority contact information.

(19) Weekly listing of multifamily properties for sale.

(20) Catalog of Federal Domestic Assistance (CFDA) materials.

(21) Grants.

(22) FOIA request logs.

§ 15.102 Requirements for making requests for records.

(a) *In general.* Any request for HUD records must be made in writing and submitted to the FOIA Public Liaison in the HUD field office where the records are located or to the Office of the Executive Secretariat in HUD Headquarters if the request is for records located in HUD Headquarters.

(b) *HUD field office records.* Requests for records located in a HUD field office may be submitted by mail (including courier or delivery service), email, or facsimile to the FOIA Public Liaison at the field office.

(c) *HUD headquarters records.* Requests for records located in HUD Headquarters may be submitted via an electronic request form on HUD's FOIA Web site at *http://www.hud.gov/FOIA.* Requests can also be submitted in person or by mail (including courier or delivery service), email, or facsimile to the Office of the Executive Secretariat in HUD Headquarters.

(d) *Form of requests.* FOIA requests should:

(1) Be in writing and clearly identifiable as a FOIA request. To facilitate identification, the requester should place the phrase ''FOIA Request'' on the front of the envelope or on the cover sheet or other transmittal document used when submitting the request in person or by mail, email, facsimile, or electronic request form;

(2) Include, whenever possible, detailed and specific information about each record sought, such as the date, title or name, author, recipient, and subject matter of the record. The more specific the FOIA request for records, the more likely HUD officials will be able to locate the records requested. Requests for categories of information should be for specific and well-defined categories. Insufficient descriptions may lead HUD officials to contact the requester to seek additional information for their record search;

(3) Indicate the form or format in which the requester would like the record made available, if the requester has a preference;

(4) Specify the fee amount the requester is willing to pay. In general, HUD provides records at no cost up to $25. Requesters are required to agree to pay for any costs that exceed $25. Requesters may also request a dollar amount above which HUD should consult with them before they agree to pay the fee. If a requester seeks a fee waiver or reduction, the requester should include this request with the FOIA disclosure request and should describe, consistent with § 15.106(k), how the disclosure of the requested information is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in the commercial interest of the requester;

(5) Indicate the fee category that the requester believes applies to each of his or her requests (fee categories are defined in § 15.106(b));

(6) Include verification information of the requester's identity, if the requester requests agency records pertaining to the requester, a minor, or an individual who is legally incompetent. Information about what constitutes acceptable verification information can be found in HUD's Privacy Act regulations in 24 CFR part 16;

(7) Contain signed authorization from the other person, if the requester makes a request on another person's behalf for information about that person. If necessary, HUD will inform the requester of the authorization needed from the other person and give the requester an opportunity to provide such authorization. Requests for information about another person should be accompanied by either written, notarized authorization or proof that the individual is deceased (for example, a copy of a death certificate or an obituary), or the request will be deemed insufficient; and

(8) Contain a detailed explanation of the basis for the request, if the requester makes a request for expedited processing as provided by § 15.104(c). The requester should also include a statement certifying the truth of the circumstances alleged or other evidence, acceptable to HUD, of the requester's compelling need.

§ 15.103 Timing of responses to requests.

(a) *In general.* HUD will generally respond to a FOIA request within 20 working days, depending on the size of the request. The 20-day period will begin on the day the request is received by the appropriate component of HUD, but in any event not later than 10 working days after the request is received by any component of HUD designated to receive FOIA requests.

(b) *Tolling the 20-day time period.* Under the OPEN Government Act of 2007, HUD may toll the 20-day period:

(1) One time to make a reasonable request for additional information from the requester; or

(2) As many times as necessary to clarify issues regarding fee assessment with the requester. The agency's receipt of the requester's response to the agency's request for information or resolution of all fee assessment issues ends the tolling period.

(c) *Extension of time periods for processing a request.* In unusual circumstances, as defined in this paragraph, HUD may extend the time period for processing a FOIA request. In such circumstances, HUD will provide the requester with written notice setting forth the unusual circumstances for the extension and the date on which a determination is expected to be dispatched. This date will not exceed 10 working days beyond the general time limit established in paragraph (a) of this section. If processing a request would require more than 10 working days beyond the general time limit established in paragraph (a) of this section, HUD will offer the requester an opportunity to limit the scope of the request so that HUD may process it within the extra 10-day working period or arrange an alternative time period within which the FOIA request will be processed. For purposes of this section, unusual circumstances include:

(1) The need to search for and collect records not located in the office processing the request;

(2) The need to search for, collect, and appropriately examine a voluminous amount of separate and distinct records; or

(3) The need to consult with another agency or two or more HUD components having a substantial interest in the determination of the FOIA request.

(d) *Aggregating multiple requests.* (1) HUD may aggregate multiple requests in cases where unusual circumstances exist and HUD determines that:

(i) Certain requests from the same requester or from a group of requesters acting in concert actually constitute a single request; and

(ii) The requests involve clearly related matters.

(2) Aggregation of requests for this purpose will be conducted independent of aggregation of requests for fee purposes under § 15.106(h).

§ 15.104 Procedures for processing FOIA requests.

(a) *In general.* HUD will ordinarily respond to FOIA requests according to their order of receipt.

(b) *Tracking number.* FOIA requests will be logged in the order that they are received and be assigned a tracking number. A requester should use the tracking number to identify his or her request when contacting FOIA office for any reason.

(c) *Expedited processing.* (1) Requests and appeals will be taken out of order and given expedited treatment whenever it is determined that they involve:

(i) Circumstances in which the lack of expedited treatment could reasonably be expected to pose an imminent threat to the life or physical safety of an individual;

(ii) An urgency to inform the public about an actual or alleged Federal Government activity, if made by a person primarily engaged in disseminating information; or

(iii) The loss of substantial due process rights.

(2) A request for expedited processing may be made at the time of the initial request for records or at any later time. For a prompt determination, a request for expedited processing should be received by the proper office designated to receive FOIA requests as provided in § 15.102.

(3) A requester who seeks expedited processing should submit a statement, certified to be true and correct to the best of that person's knowledge and belief, explaining in detail the basis for requesting expedited processing. For example, a requester who makes a request under paragraph (c)(1)(ii) of this section, if not a full-time member of the news media, should establish that he or she is a person primarily engaged in disseminating information, though it need not be his or her sole occupation. A requester making a request under paragraph (c)(1)(ii) of this section also should establish a particular urgency to inform the public about the government activity involved in the request, beyond the public's right to know about government activity generally. The formality of certification may be waived as a matter of administrative discretion.

(4) HUD will make a determination within 10 calendar days of receipt by the appropriate component of HUD, as provided in § 15.103, whether to grant or deny a request for expedited processing and notify the requester of HUD's determination. FOIA requests accepted for expedited processing will be processed as soon as practicable and on a priority basis.

(d) *Multitrack processing.* (1) For requests that do not qualify for expedited processing, HUD may use two or more processing tracks by distinguishing between simple and complex FOIA requests based on the following: The time and work necessary to process the FOIA request and the volume of agency records responsive to the FOIA request.

(2) When HUD uses multitrack processing, it may provide requesters in its slower track an opportunity to limit the scope of their requests in order to qualify for faster processing within the specified limits of HUD's faster track. When HUD chooses to provide this option, HUD will contact the requester by telephone, letter, or email, whichever is more efficient in each case.

§ 15.105 Responses to requests.

(a) *Acknowledgements of requests.* The FOIA office in the Office of the Executive Secretariat in HUD Headquarters and FOIA Public Liaison in each HUD field office will ordinarily send an acknowledgement letter to the requester that will confirm receipt of the request by the appropriate HUD office and provide an assigned tracking number, as provided by § 15.104(b), for further reference.

(b) *Consultations, coordination, and referrals.* When HUD receives a request for a record in its possession, it shall determine whether another agency of the Federal Government is better able to determine whether the record is exempt from disclosure under the FOIA or whether it should be disclosed as a matter of administrative discretion. If HUD determines that it is best able to determine whether the record is exempt from disclosure, then it shall do so. If HUD determines that it is not best able to make that determination, then it shall either:

(1) Respond to the request regarding that record, after consulting with the agency best able to determine whether to disclose it and with any other agency that has a substantial interest in it; or

(2) Refer the responsibility for responding to the request regarding that record to the agency that originated the record, but only if that agency is subject to the FOIA. Ordinarily, the agency with which the record originated will be presumed to be best able to determine whether to disclose it.

(c) *Fee estimates.* HUD will notify the requester if HUD's estimate of the fee is more than the requester has agreed to pay. Consistent with § 15.106(e), the requester shall have 15 working days to agree to pay the higher fee.

(d) *Forms of response.* (1) Granting requests in whole or in part. Once HUD makes a determination to grant a request in whole or in part, it will notify the requester in writing. HUD will make a record available in the form or format requested, if the record is readily reproducible in that format. HUD will inform the requester in the notice of any fee charged under § 15.106 and disclose records to the requester promptly upon payment of any applicable fee. Records disclosed in part will be marked or annotated to show the amount of information deleted and the exemption(s) under which each deletion is made, unless doing so would harm an interest protected by an applicable FOIA exemption. The location of the information deleted and the exemption(s) under which the deletion is made will be indicated directly on the record itself, if technically feasible.

(2) Adverse determination of requests. If a determination is made to deny a request in any respect, HUD shall notify the requester of that determination in writing. Adverse determinations, or denials of requests, include: A determination to withhold any requested record, in whole or in part; a determination that a requested record does not exist, cannot be located, or has not been retained; a determination that a record is not readily reproducible in the form or format sought by the requester; a determination that what has been requested is not a record subject to the FOIA; a determination on any disputed fee matter, including a denial of a request for a fee waiver or reduction; and a denial of a request for expedited treatment. The denial letter shall be signed by the Director of the Office of the Executive Secretariat, or a

designee of the Director, in HUD Headquarters or the FOIA Public Liaison for the HUD field office where the adverse determination was made, and shall include:

(i) The name and title or position of the person responsible for the denial;

(ii) A brief statement of the reason(s) for the denial, including any FOIA exemption applied by HUD in denying the request;

(iii) An estimate of the volume of records or information withheld, when appropriate, in number of pages or in some other reasonable form of estimation. This estimate does not need to be provided if the volume is otherwise indicated through deletions on records disclosed in part, or if providing an estimate would harm an interest protected by an applicable exemption; and

(iv) A statement that the denial may be appealed as provided by § 15.109 and a description of the requirements for appeal.

§ 15.106 Fees.

(a) *In general.* HUD will charge for processing requests under the FOIA in accordance with paragraph (c) of this section, except where fees are limited under paragraph (d) of this section or where a waiver or reduction of fees is granted under paragraph (k) of this section. HUD shall collect all applicable fees before sending copies of requested records to a requester. In order to resolve any fee issues that arise under this section, HUD may contact a requester for additional information. Requesters shall pay fees by check or money order made payable to the United States Treasury.

(b) *Definitions.* For purposes of this section:

Commercial use means a request from or on behalf of a person who seeks information for a use or purpose that furthers his or her commercial, trade, or profit interests, which can include furthering those interests through litigation. HUD shall determine, whenever reasonably possible, the use to which a requester will put the requested records. When it appears that the requester will put the records to a commercial use, either because of the nature of the request itself or because HUD has reasonable cause to doubt a requester's stated use, HUD shall provide the requester a reasonable opportunity to submit further clarification.

Direct costs means those expenses that HUD actually incurs in searching for and duplicating and, in the case of commercial use requests, reviewing records to respond to a FOIA request. Direct costs include, for example, the salary of the employee performing the work and the cost of operating computers and other electronic equipment, such as for mainframe computer run time. Not included in direct costs are overhead expenses such as the costs of space and heating or lighting a facility.

Duplication means the process of making a copy of a document necessary to respond to a FOIA request. Such copies can take the form of paper copy, audiovisual materials, or machine readable documentation (*e.g.,* diskette), among others. HUD shall honor a requester's specified preference of form or format of disclosure if the record is readily reproducible with reasonable efforts in the requested form or format by the office responding to the request.

Educational institution means:

(i)(A) A preschool;

(B) A public or private elementary or secondary school;

(C) An institution of graduate higher education;

(D) An institution of undergraduate higher education;

(E) An institution of professional education; or

(F) An institution of vocational education, that primarily (or solely) operates a program or programs of scholarly research.

(ii) To be in this category, a requester should show that the request is authorized by, and is made under the auspices of, a qualifying institution and that the records are not sought for a commercial use but are sought to further scholarly research. Records requested for the intention of fulfilling credit requirements are not considered to be sought for a scholarly purpose.

Other requester means any requester that does not fall within the categories of requesters described in this section.

Noncommercial scientific institution means an institution that is not operated on a ''commercial'' basis, as defined in this section, and that is operated solely for the purpose of conducting scientific research the results of which are not intended to promote any particular product or industry. To be in this category, a requester should show that the request is authorized by, and is made under the auspices of, a qualifying institution and that the records are not sought for a commercial use but are sought to further scientific research.

Representative of the news media, or *news media requester,* means any person actively gathering news for an entity that is organized and operated to publish or broadcast news to the public, uses its editorial skills to turn the raw materials into a distinct work, and distributes that work to an audience. The term *news* means information that is about current events or that would be of current interest to the public. Examples of news media entities include television or radio stations broadcasting to the public at large and publishers of periodicals that disseminate news and make their products available to the general public through a variety of means. For freelance journalists to be regarded as working for a news media entity, they should demonstrate a solid basis for expecting publication through a news media entity. A publication contract would be the clearest proof, but HUD will also look to the past publication record of a requester in making this determination. To be in this category a requester should not be seeking the requested records for a commercial use. However, a request for records supporting the news dissemination function of the requester shall not be considered to be for a commercial use.

(c) *Fees*—(1) *Schedule.* In responding to FOIA requests, HUD will use the fee schedule set out in the following table, unless a waiver or reduction of fees has been granted under paragraph (k) of this section.

FOIA FEE SCHEDULE

Activity	Rate	Commercial use requester	News media, educational institution, or noncommercial scientific institution requester	Other requester
(i) Professional search	$13 per quarter hour	Applies	Does not apply	Applies. No charge for first 2 hours of cumulative search time.
(ii) Professional review	$13 per quarter hour	Applies	Does not apply	Does not apply.

FOIA FEE SCHEDULE—Continued

Activity	Rate	Commercial use requester	News media, educational institution, or noncommercial scientific institution requester	Other requester
(iii) Clerical search	$6 per quarter hour	Applies	Does not apply	Applies. No charge for first 2 hours of cumulative search time.
(iv) Clerical review	$6 per quarter hour	Applies	Does not apply	Does not apply.
(v) Programming services required.	Direct costs associated with search.	Applies	Does not apply	Applies.
(vi) Duplication costs	$0.10 per page	Applies	Applies. No charge for first 100 pages.	Applies. No charge for first 100 pages.
(vii) Duplication costs—tape, CD ROM or diskette.	Actual cost	Applies	Applies	Applies.

(2) *Search.* (i) Search fees will be charged for all requests other than requests made by educational institutions, noncommercial scientific institutions, or representatives of the news media, subject to the limitations of paragraph (d) of this section. HUD may charge for time spent searching even if HUD does not locate any responsive record or if HUD withholds the record(s) located as entirely exempt from disclosure.

(ii) For each hour spent by personnel searching for requested records, including electronic searches that do not require new programming, the fees will be $13 per quarter hour for professional personnel and $6 per quarter hour for clerical personnel.

(iii) Requesters will be charged the direct costs associated with conducting any search that requires the creation of a new program to locate the requested records.

(iv) For requests requiring the retrieval of records from any Federal records center, certain additional costs may be incurred in accordance with the Transactional Billing Rate Schedule established by the National Archives and Records Administration.

(3) *Duplication.* Duplication fees will be charged to all requesters, subject to the limitations of paragraph (d) of this section. For a paper photocopy of a record (no more than one copy of which need be supplied), the fee will be $0.10 per page. For copies in digital format, HUD will charge the direct costs, including operator time, of producing the copy. Where paper documents must be scanned in order to comply with a requester's preference to receive the records in an electronic format, the requester shall pay the direct costs associated with scanning those materials. For other forms of duplication, HUD will charge the direct costs.

(4) *Review.* Review fees will be charged to requesters who make a commercial use request. Review fees will be charged only for the initial record review (the review done where HUD determines whether an exemption applies to a particular record or record portion, at the initial request level). No charge will be made for review at the administrative appeal level for an exemption already applied. However, records or portions of records withheld under an exemption that is subsequently determined not to apply may be reviewed again to determine whether any other exemption not previously considered applies. The cost of that review is chargeable where it is made necessary by such a change of circumstances. Fees for the review time will be $13 per quarter hour for professional personnel and $6 per quarter hour for clerical personnel.

(d) *Restrictions on charging fees.* (1) No search fee will be charged for requests by educational institutions, noncommercial scientific institutions, or representatives of the news media. In addition, when HUD fails to comply with the applicable time limits in which to respond to a request and no unusual or exceptional circumstance, as those terms are defined by the FOIA, apply to the processing of the request, HUD will not charge search fees, or in the instances of requests from educational institutions, noncommercial scientific institutions, or representatives of the news media, as defined by paragraph (b) of this section, HUD will not charge duplication fees.

(2) Search and review fees will be charged in quarter-hour increments. HUD will round up a quarter hour when professional and clerical search and review time exceeds a quarter-hour increment.

(3) Except for requesters seeking records for a commercial use, HUD will provide without charge:

(i) The first 100 pages of duplication (or the cost equivalent); and

(ii) The first 2 hours of search (or the cost equivalent).

(4) No fee will be charged whenever a total fee calculated under paragraph (c) of this section is less than HUD's cost to process the payment. Currently, whenever a total fee calculated is $25 or less, no fee will be charged.

(e) *Notice of anticipated fees in excess of $25.* When HUD determines or estimates that the fees to be charged under this section will amount to more than $25, HUD will notify the requester of the actual or estimated amount of the fees, unless the requester has indicated a willingness to pay fees as high as the amount anticipated. If only a portion of the fee can be readily estimated, HUD shall advise the requester that the estimated fee may be only a portion of the total fee. In cases in which a requester has been notified that actual or estimated fees amount to more than $25, the request will be held in abeyance for 15 working days. Further work will not be done on that request until the requester has either made a firm commitment to pay the anticipated total fee, or has made payment in advance if the total fee exceeds $250. Any such agreement should be memorialized by the requester in writing, should indicate a given dollar amount, and should be received by HUD within the time period specified by HUD in its notice to the requester. If the requester does not provide a firm commitment to pay the anticipated fee within the time period specified by HUD, the request will be closed. A notice under this paragraph will offer the requester an opportunity to discuss the matter of fees with HUD personnel in order to reformulate the request to meet the requester's needs at a lower cost. HUD is not required to accept payments in installments.

(f) *Charges for other services.* Although not required to provide special services, if HUD chooses to do so as a matter of administrative discretion, HUD will charge the direct costs of providing these services. Examples of such services include certifying that records are true copies, providing multiple copies of the same document, or sending documents by means other than ordinary mail.

(g) *Charging interest.* HUD may charge interest on any unpaid bill starting on the 31st day following the date of billing the requester. Interest charges will be assessed at the rate provided in 31 U.S.C. 3717 and will accrue from the date of the billing until payment is received by HUD. HUD will follow the provisions of the Debt Collection Act of 1982 (Pub. L. 97–365, 96 Stat. 1749), as amended, and its administrative procedures, including the use of consumer reporting agencies, collection agencies, and offset.

(h) *Aggregating requests.* If HUD reasonably believes that a requester or a group of requesters acting together is attempting to divide a request into a series of requests for the purpose of avoiding fees, HUD may aggregate those requests and charge accordingly. HUD may presume that multiple requests of this type made within a 30-day period have been made in order to avoid fees. Where requests are separated by a longer period, HUD will aggregate them only where there is a reasonable basis for determining that aggregation is warranted under all the circumstances involved. Multiple requests involving unrelated matters will not be aggregated. Aggregation of requests for fee purposes under this paragraph will be conducted independent of aggregation of requests under § 15.103(d).

(i) *Advance payments.* (1) For requests other than those described in paragraphs (i)(2) and (3) of this section, HUD will not require the requester to make an advance payment before work is begun or continued on a request. Payment owed for work already completed, such as prepayment before copies are sent to a requester, is not an advance payment.

(2) If HUD determines or estimates that a total fee to be charged under this section will be more than $250, it may require the requester to make an advance payment of an amount up to the amount of the entire anticipated fee before beginning to process the request, except where it receives a satisfactory assurance of full payment from a requester who has a history of prompt payment.

(3) If a requester has previously failed to pay a properly charged FOIA fee to HUD within 30 days of the date of billing, before HUD begins to process a new request or continues to process a pending request from that requester, HUD will require the requester to pay the full amount due, plus any applicable interest, and to make an advance payment of the full amount of any anticipated fee. If HUD has a reasonable basis to believe that a requester has misrepresented his or her identity in order to avoid paying outstanding fees, HUD may require that the requester provide proof of identity.

(4) When HUD requires advance payment, the request will be held in abeyance for 15 working days to allow the requester an opportunity to make payment in advance and/or modify the scope of the request. If the requester does not pay the advance payment or modify the scope of the request within the allotted time frame, the request will be closed.

(j) *Other statutes specifically providing for fees.* The fee schedule in this section does not apply to fees charged under any statute that specifically requires an agency to set and collect fees for particular types of records. Where records responsive to requests are maintained for distribution by agencies operating such statutorily based fee schedule programs, HUD will inform requesters of the contact information for that source.

(k) *Requirements for waiver or reduction of fees.* (1) Records responsive to a request will be furnished without charge or at a charge reduced below that established under paragraph (c) of this section if HUD determines, based on all available information, that the requester has demonstrated the following:

(i) Disclosure of the requested information is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government; and

(ii) Disclosure of the information is not primarily in the commercial interest of the requester.

(2) To determine whether the first fee waiver requirement is met, HUD will consider the following factors:

(i) The subject of the requested records should concern identifiable operations or activities of the Federal Government, with a connection that is direct and clear, not remote or attenuated.

(ii) The disclosable portions of the requested records should be meaningfully informative about government operations or activities and ''likely to contribute'' to an increased public understanding of those operations or activities. The disclosure of information that already is in the public domain, in either a duplicative or a substantially identical form, would not be as likely to contribute to such increased understanding, where nothing new would be added to the public's understanding.

(iii) The disclosure should contribute to the understanding of a reasonably broad audience of persons interested in the subject, as opposed to the individual understanding of the requester. A requester's expertise in the subject area and ability and intention to effectively convey information to the public will be considered. It will be presumed that a representative of the news media will satisfy this consideration.

(iv) The public's understanding of the subject in question, as compared to the level of public understanding existing prior to the disclosure, should be enhanced by the disclosure to a significant extent. However, HUD will not make value judgments about whether information at issue is ''important'' enough to be made public.

(3) To determine whether the second fee waiver requirement is met, HUD will consider the following factors:

(i) HUD will identify any commercial interest of the requester as defined in paragraph (b) of this section, or of any person on whose behalf the requester may be acting, that would be furthered by the requested disclosure. Requesters shall be given an opportunity in the administrative process to provide explanatory information regarding this consideration.

(ii) A fee waiver or reduction is justified where the public interest standard is satisfied and that public interest is greater than that of any identified commercial interest in disclosure. HUD ordinarily will presume that where a news media requester has satisfied the public interest standard, the public interest will be the interest primarily served by disclosure to that requester. Disclosure to data brokers or others who merely compile and market government information for direct economic return will not be presumed to primarily serve the public interest.

(4) Where only some of the records to be released satisfy the requirements for a waiver of fees, a waiver will be granted for those records.

(5) Requests for the waiver or reduction of fees should address the factors listed in paragraphs (k)(2) and (3) of this section, insofar as they apply to each request. In deciding to grant waivers or reductions of fees, HUD will exercise its discretion to consider the cost effectiveness of its investment of administrative resources.

§ 15.107 Documents generally protected from disclosure.

The FOIA contains nine exemptions (5 U.S.C. 552(b)) that authorize agencies to withhold various records from disclosure. With regard to certain types of records, HUD generally applies the exemptions as follows:

(a) *Classified documents.* Exemption 1 (5 U.S.C. 552(b)(1)) protects classified national defense and foreign relations information. HUD seldom relies on this exception to withhold documents. However, where applicable, HUD will refer a request for records classified under Executive Order 13526 and the pertinent records to the originating agency for processing. HUD may refuse to confirm or deny the existence of the requested information if the originating agency determines that the fact of the existence of the information itself is classified.

(b) *Internal agency rules and practices.* Exemption 2 (5 U.S.C. 552(b)(2)) protects records relating to internal personnel rules and practices.

(c) *Information prohibited from disclosure by another statute.* Exemption 3 (5 U.S.C. 552(b)(3)) protects information that is prohibited from disclosure by another Federal law. HUD generally will not disclose competitive proposals prior to contract award, competitive proposals that are not set forth or incorporated by reference into the awarded contract, (see 41 U.S.C. 4702), or, during the selection process, any covered selection information regarding such selection, either directly or indirectly (see 42 U.S.C. 3537a).

(d) *Commercial or financial information.* Exemption 4 (5 U.S.C. 552(b)(4)) protects trade secrets and commercial or financial information obtained from a person that is privileged and confidential. HUD will handle this type of information as provided by § 15.108.

(e) *Certain interagency or intra-agency communications.* Exemption 5 (5 U.S.C. 552(b)(5)) protects interagency or intra-agency communications that are protected by legal privileges, such as the attorney-client privilege, attorney work-product privilege, or communications reflecting the agency's deliberative process.

(f) *Personal privacy.* Exemption 6 (5 U.S.C. 552(b)(6)) protects information involving matters of personal privacy. This information may include personnel, medical, and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy. Names, addresses, telephone numbers, and email addresses of persons residing in public or assisted housing or of borrowers in FHA-insured single family mortgage transactions generally will not be disclosed.

(g) *Law enforcement records.* Exemption 7 (5 U.S.C. 552(b)(7)) protects certain records or information compiled for law enforcement purposes. This exemption protects records where the production could reasonably be expected to interfere with enforcement proceedings; for example, the names of individuals who have filed fair housing complaints. The protection of this exemption also encompasses, but is not limited to, information in law enforcement files that could reasonably be expected to constitute an unwarranted invasion of personal privacy; the names of confidential informants; and techniques and procedures for law enforcement investigations, or guidelines for law enforcement investigations if such disclosure could reasonably be expected to risk circumvention of the law.

(h) *Supervision of financial institutions.* Exemption 8 (5 U.S.C. 552(b)(8)) protects information relating to the supervision of financial institutions. For purposes of Exemption 8, HUD is an ''agency responsible for the regulation and supervision of financial institutions'' for purposes of monitoring fair housing compliance.

(i) *Wells.* Exemption 9 (5 U.S.C. 552(b)(9)) protects geological information on wells.

§ 15.108 Business information.

(a) *In general.* Business information obtained by HUD from a submitter will be disclosed under the FOIA only under this section. In making final confidentiality determinations under this section, HUD relies to a large extent upon the information furnished by the affected business to substantiate its claim of confidentiality. HUD may be unable to verify the accuracy of much of the information submitted by the affected business. HUD will comply with Executive Order 12600 and follow the procedure in this section by giving notice to the affected business and an opportunity for the business to present evidence of its confidentiality claim. If HUD is sued by a requester under the FOIA for nondisclosure of confidential business information, HUD expects the affected business to cooperate to the fullest extent possible in defending such a decision.

(b) *Designation of business information.* A submitter of business information will use good faith efforts to designate, by appropriate markings, either at the time of submission or at a reasonable time thereafter, any portions of its submission that it considers to be protected from disclosure under Exemption 4. These designations will expire 10 years after the date of the submission unless the submitter requests, and provides justification for, a longer designation period.

(c) *Notice to submitters.* HUD will provide a submitter with prompt written notice of a FOIA request or administrative appeal that seeks business information, wherever required under paragraph (d) of this section, in order to give the submitter an opportunity to object to disclosure of any specified portion of that information under paragraph (e) of this section. The notice will either describe the business information requested or include copies of the requested records or portions of records containing the information. When notification of a voluminous number of submitters is required, notification may be made by posting or publishing the notice in a place reasonably likely to accomplish notification.

(d) *Where notice is required.* Notice will be given to a submitter wherever:

(1) The information has been designated in good faith by the submitter as information considered protected from disclosure under Exemption 4; or

(2) HUD has reason to believe that the information may be protected from disclosure under Exemption 4.

(e) *Opportunity to object to disclosure.* HUD will allow a submitter a reasonable time to respond to the notice described in paragraph (c) of this section and will specify that time period within the notice. If a submitter has any objection to disclosure, the submitter should submit a detailed written statement specifying the grounds for withholding any portion of the information under any exemption of the FOIA and, in the case of Exemption 4, the submitter should show why the information is a trade secret or commercial or financial information that is privileged or confidential. HUD generally will not consider conclusory statements that particular information would be useful to competitors or would impair sales, or other similar statements, sufficient to justify confidential treatment. In the event that a submitter fails to respond to the notice within the time specified, the submitter will be considered to have no objection to the disclosure of the information. Information provided by the submitter that is not received until after the disclosure decision has been made will not be considered by HUD. Information provided by a submitter under this paragraph may itself be subject to disclosure under the FOIA.

(f) *Notice of intent to disclose.* HUD will consider a submitter's objections and specific grounds for nondisclosure in deciding whether to disclose business information. Whenever HUD decides to disclose business information over the objection of a submitter, HUD will give the submitter written notice, which will include:

(1) A statement of the reason(s) why each of the submitter's disclosure objections was not sustained;

(2) A description of the business information to be disclosed; and

(3) A specified disclosure date, which shall be a reasonable time subsequent to the notice.

(g) *Exceptions to notice requirements.* The notice requirements of paragraphs (c) and (f) of this section will not apply if:

(1) HUD determines that the information should not be disclosed;

(2) The information lawfully has been published or has been officially made available to the public; or

(3) Disclosure of the information is required by statute (other than the FOIA) or by a regulation issued in accordance with the requirements of Executive Order 12600.

(h) *Notice of a FOIA lawsuit.* Whenever a requester files a lawsuit seeking to compel the disclosure of business information, HUD will promptly notify the submitter.

(i) *Corresponding notice to requesters.* Whenever HUD provides a submitter with notice and an opportunity to object to disclosure under paragraph (f) of this section, HUD will also notify the requester(s). Whenever a submitter files a lawsuit seeking to prevent the disclosure of business information, HUD will notify the requester(s).

§ 15.109 Appeals.

(a) *In general.* A requester may appeal an adverse determination denying a request, in any respect, in writing. The letter of appeal should clearly identify the determination that is being appealed and the assigned tracking number. The appeal letter and envelope should be marked ''Freedom of Information Act Appeal'' for the quickest possible handling. If mailed, the requester's letter of appeal must be postmarked within 30 calendar days of the date of HUD's letter of determination. If the letter of appeal is transmitted electronically or by a means other than the United States Postal Service, it must be received in the appropriate office by the close of business on the 30th calendar day after the date of HUD's letter of determination.

(b) *Time frames*—(1) Expedited processing. HUD will decide an appeal of a denial of a request to expedite processing of a FOIA request within 10 working days of receipt of the appeal.

(2) *All other appeals.* HUD will make a determination on appeals within 20 working days of receipt, unless unusual circumstances require HUD to extend the time for an additional 10 working days.

(3) *Exceptions.* An appeal ordinarily will not be acted upon if the subject of the appeal is simultaneously being litigated in an applicable Federal court.

(c) *Content of appeals.* An appeal letter should include the following:

(1) A copy of the original request;

(2) A copy of the adverse determination;

(3) A statement of facts and legal arguments supporting the appeal; and

(4) Any additional information the appellant wishes to include.

(d) *When appeal is required.* Before seeking a court review of HUD's adverse determination, a requester generally must have exhausted their administrative remedies.

§ 15.110 HUD response to appeals.

(a) *In general.* (1) The appellate official will conduct a de novo review of the entire record and applicable law when making a decision.

(2) The decision on the appeal will be made in writing and will be considered the final action of HUD.

(i) A decision affirming an adverse determination, in whole or in part, will contain a statement of the reason(s) for the affirmation, including any FOIA exemption(s) applied, and will inform the appellant of the FOIA provisions for potential court review of the decision.

(ii) If the adverse determination is modified on appeal, in whole or in part, a written decision will be sent to the appellant and the FOIA request will be reprocessed in accordance with the appeal decision.

(iii) Adverse decisions will include the name and contact information of dispute resolution services that offer mediation services to resolve disputes between FOIA requesters and Federal agencies as a nonexclusive alternative to litigation.

(b) *Appeal of a denial of record request.* Upon appeal of a denial of a record request, the appellate official will issue a decision that either:

(1) Overturns the adverse determination, in whole or in part, and remands the request to the appropriate office. The requester will be notified of the rationale for the determination in writing. The original office will then reprocess the request in accordance with the appeal determination and respond directly to the requester; or

(2) Affirms the adverse determination and declines to provide the requested records to the appellant.

(c) *Appeal of a fee determination.* Upon appeal of a fee determination, the appellate official will issue a decision that either:

(1) Waives the fee or charges the fee that the appellant requested;

(2) Modifies the original fee charged and explains why the modified fee is appropriate; or

(3) Advises the appellant that the original fee charged was appropriate and gives the reason behind this determination.

(d) *Appeal of a denial of expedited processing.* Upon appeal of a denial of an expedited processing request, the appellate official will issue a decision that either:

(1) Overturns the adverse determination and grants the expedited processing request; or

(2) Affirms the decision to deny expedited processing.

Date: August 7, 2015.

Nani A. Coloretti,

Deputy Secretary.

BILLING CODE 4210–67–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2015–0701]

RIN 1625–AA00

Safety Zone, James River; Newport News, VA

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a safety zone on the navigable waters of the James River, in the vicinity of the James River Reserve Fleet, in support of United States Navy explosives training on the M/V SS DEL MONTE. This safety zone will restrict vessel movement in the specified area during the explosives training. This action is necessary to provide for the safety of life and property on the surrounding navigable waters during the United States Navy explosives training.

DATES: This rule is effective and enforced from 8 a.m. on August 17, 2015 until 4 p.m. on August 21, 2015.

ADDRESSES: Documents mentioned in this preamble are part of docket [USCG–2015–0701]. To view documents

mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type the docket number in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rulemaking. You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email LCDR Barbara Wilk, Waterways Management Division Chief, Sector Hampton Roads, Coast Guard; telephone (757) 668–5580, email *HamptonRoadsWaterway@uscg.mil.* If you have questions on viewing or submitting material to the docket, call Cheryl Collins, Program Manager, Docket Operations, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

Table of Acronyms

DHS Department of Homeland Security
FR Federal Register
NPRM Notice of Proposed Rulemaking

A. Regulatory History and Information

The Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior written notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule due to the fact that this military training is necessary to train and qualify Navy personnel in the use of explosives. This training is imperative to ensure that Navy personnel located within the Fifth Coast Guard District are properly trained and qualified before conducting military and national security operations for use in securing ports and waterways. Navy policy requires that Navy personnel meet and maintain certain qualification standards before being allowed to carry out certain missions. Failure to conduct this required training at this time will result in a lapse in personnel qualification standards and, consequently, the inability of Navy personnel to carry out important national security functions at any time. The Coast Guard received the information about this event on July 20, 2015; delaying the effective date by first publishing an NPRM would be contrary to the safety zone's intended objectives as well as to the public interest because immediate action is needed to protect persons and vessels against the hazards associated. The Coast Guard will provide advance notification to users of the affected waterway via marine information broadcasts and local notice to mariners. The Coast Guard will provide advance notifications to users of the affected waterway via marine information broadcasts and local notice to mariners.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Due to the need for immediate action, the restriction on vessel traffic is necessary to protect life, property and the environment; therefore, a 30-day notice is impracticable. Delaying the effective date would be contrary to the safety zone's intended objectives of protecting persons and vessels, and enhancing public and maritime safety.

B. Basis and Purpose

The legal basis and authorities for this rule are found in 33 U.S.C. 1231; 33 CFR 1.05–1, 6.04–1, 160.5; Department of Homeland Security Delegation No. 0170.1, which collectively authorize the Coast Guard to propose, establish, and define regulatory safety zones.

The purpose of this safety zone is to protect the participants, patrol vessels, and other vessels transiting navigable waters of the James River, in the vicinity of the James River Reserve Fleet, from hazards associated with military explosives operations. The potential hazards to mariners within the safety zone include shock waves, flying shrapnel, and loud noises.

C. Discussion of the Final Rule

The Captain of the Port of Hampton Roads is establishing a safety zone on specified waters of the James River, in the vicinity of the James River Reserve Fleet, in Newport News, VA. The safety zone will encompass all navigable waters within a 1500 foot radius of the SS DEL MONTE location at position 37°06′11″ N., 076°38′40″ W. (NAD 1983). This safety zone will be established and enforced from 8 a.m. on August 17, 2015 until 4 p.m. on August 21, 2015. Access to the safety zone will be restricted during the specified dates and times. Except for participants and vessels authorized by the Captain of the Port of his Representative, no person or vessel may enter or remain in the regulated area.

The Captain of the Port will give notice of the enforcement of the safety zone by all appropriate means to provide the widest dissemination of notice to the affected segments of the public. This includes publication in the Local Notice to Mariners and Marine Information Broadcasts.

D. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on these statutes and executive orders.

1. Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of Executive Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under those Orders. Although this safety zone restricts vessel traffic through the regulated area, the effect of this rule will not be significant because: (i) This rule will only be enforced for the limited size and duration of the event; and (ii) the Coast Guard will make extensive notification to the maritime community via marine information broadcasts so mariners may adjust their plans accordingly.

2. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule affects the following entities, some of which might be small entities: The owners or operators of vessels intending to transit or anchor in waters of the Eastern Branch of the Elizabeth River during the enforcement period.

This safety zone will not have a significant economic impact on a substantial number of small entities for

the following reasons: (i) The safety zone is of limited size and duration, and (ii) Sector Hampton Roads will issue maritime advisories widely available to users of the James River allowing mariners to adjust their plans accordingly.

3. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the FOR FURTHER INFORMATION CONTACT, above.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

4. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

5. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and determined that this rule does not have implications for federalism.

6. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

7. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

11. Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This action is not a ''significant energy action'' under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. Technical Standards

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves the establishment of a safety zone. This rule is categorically excluded from further review under paragraph 34–(g) of Figure 2–1 of the Commandant Instruction. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T05–0701 to read as follows:

§ 165.T05–0701 Safety Zone, James River; Newport News, VA.

(a) *Definitions.* For the purposes of this section, *Captain of the Port* means the Commander, Sector Hampton Roads. *Representative* means any Coast Guard commissioned, warrant or petty officer who has been authorized to act on the behalf of the Captain of the Port. *Participants* mean individuals and vessels involved in explosives training.

(b) *Locations.* The following area is a safety zone:

(1) All waters in the vicinity of the of the James River Reserve Fleet, in the James River, within a 1500 foot radius of the M/V SS DEL MONTE in approximate position 37°06′11″ N., 076°38′40″ W. (NAD 1983).

(c) *Regulations.* (1) All persons are required to comply with the general regulations governing safety zones in § 165.23 of this part.

(2) With the exception of participants, entry into or remaining in this safety zone is prohibited unless authorized by the Captain of the Port, Hampton Roads or his designated representatives.

(3) All vessels underway within this safety zone at the time it is implemented are to depart the zone immediately.

(4) The Captain of the Port, Hampton Roads or his representative can be contacted at telephone number (757) 668–5555.

(5) The Coast Guard and designated James River Reserve Fleet security vessels enforcing the safety zone can be contacted on VHF–FM marine band radio channel 13 (165.65 Mhz) and channel 16 (156.8 Mhz).

(6) This section applies to all persons or vessels wishing to transit through the safety zone except participants and vessels that are engaged in the following operations:

(i) Enforcing laws;

(ii) Servicing aids to navigation; and

(iii) Emergency response vessels.

(7) The U.S. Coast Guard may be assisted in the patrol and enforcement of the safety zone by Federal, State, and local agencies.

(d) *Enforcement period.* This rule will be enforced from 8 a.m. on August 17, 2015 to 4 p.m. on August 21, 2015.

Dated: July 31, 2015.

Christopher S. Keane,

Captain, U.S. Coast Guard, Captain of the Port Hampton Roads.

BILLING CODE 9110–04–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2015–0760]

RIN 1625–AA00

Safety Zone; U.S. Army Exercise, Des Plaines River, Channahon, IL

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone on the Des Plaines River between mile marker 277.8 and mile marker 279.2, Channahon, IL. This safety zone is intended to restrict vessels from a portion of the Des Plaines River from August 18, 2015 to August 19, 2015, with a rain date of August 20, 2015. This temporary safety zone is necessary to protect the surrounding public and vessels from the hazards associated with low flying aircraft and bridging operations spanning the width of the river for a U.S. Army exercise.

DATES: This rule is effective from 12:01 a.m. on August 18, 2015 to 11:59 p.m. on August 20, 2015. This rule will be enforced with actual notice from 6:30 a.m. until 6:30 p.m. on August 18, 2015 and August 19, 2015, or alternatively if postponed due to inclement weather, from 6:30 a.m. until 6:30 p.m. on August 20, 2015.

ADDRESSES: Documents mentioned in this preamble are part of docket USCG–2015–0760. To view documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov,* type the docket number in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rulemaking. You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, contact or email LT Lindsay Cook, U.S. Coast Guard Marine Safety Unit Chicago, at (630) 986–2155 or *Lindsay.N.Cook@uscg.mil.* If you have questions on viewing the docket, call Cheryl Collins, Program Manager, Docket Operations, telephone (202) 366–9826.

NPRM Notice of Proposed Rulemaking

A. Regulatory History and Information

The Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking with respect to this rule because doing so would be impracticable. The final details for this event were not known to the Coast Guard until there was insufficient time remaining before the event to publish an NPRM. Thus, delaying the effective date of this rule to wait for a comment period to run would be impracticable because it would inhibit the Coast Guard's ability to protect the public and vessels from the hazards associated with low flying aircraft and bridging operations spanning the width of the river for a U.S. Army exercise.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this temporary rule effective less than 30 days after publication in the **Federal Register**. For the same reasons discussed in the preceding paragraph, waiting for a 30 day notice period to run would be impracticable.

B. Basis and Purpose

The legal basis for the rule is the Coast Guard's authority to establish safety zones: 33 U.S.C. 1231; 33 CFR 1.05–1, 160.5; Department of Homeland Security Delegation No. 0170.1.

On August 18, 2015 and August 19, 2015, the U.S. Army will conduct a bridging exercise spanning the width of the river. The Captain of the Port, Lake Michigan, has determined that the low flying aircraft and bridging operations spanning the width of the river associated with this exercise will pose a significant risk to public safety and property. This safety zone is necessary to protect the public from the hazards associated with low flying aircraft and bridging operations.

C. Discussion of the Final Rule

With the aforementioned hazards in mind, the Captain of the Port, Lake Michigan, has determined that this temporary safety zone is necessary to ensure the safety of the public and the participants during a U.S. Army exercise on a portion of the Des Plaines River from mile marker 277.8 to mile marker 279.2. This safety zone will be enforced from 6:30 a.m. until 6:30 p.m. on August 18, 2015 and August 19, 2015. If the event is postponed due to inclement weather, the safety zone will be enforced from 6:30 a.m. until 6:30 p.m. on August 20, 2015, the allotted rain date. This zone will encompass all waters of the Des Plaines River from mile marker 277.8 to mile marker 279.2.

Entry into, transiting, or anchoring within the safety zone is prohibited unless authorized by the Captain of the Port, Lake Michigan, or a designated on-scene representative. The Captain of the Port or a designated on-scene representative may be contacted via VHF Channel 16.

D. Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on these statutes and executive orders.

1. Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, Improving Regulation and Regulatory Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of Executive Order 12866 or under section 1 of Executive Order 13563. The Office of Management and Budget has not reviewed it under those Orders.

We conclude that this rule is not a significant regulatory action because we anticipate that it will have minimal impact on the economy, will not interfere with other agencies, will not adversely alter the budget of any grant or loan recipients, and will not raise any novel legal or policy issues. The safety zone created by this rule will be relatively small and enforced between the hours of 6:30 a.m. and 6:30 p.m. during a two day period. Under certain conditions, moreover, vessels may still transit through the safety zone when permitted by the Captain of the Port.

2. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered the impact of this temporary rule on small entities. This rule will affect the following entities, some of which might be small entities: The owners or operators of vessels intending to transit on a portion of the Des Plaines River from mile marker 277.8 to mile marker 279.2 on August 18, 2015 and August 19, 2015 or on August 20, 2015.

This safety zone will not have a significant economic impact on a substantial number of small entities for the reasons cited in the *Regulatory Planning and Review* section. Additionally, before the enforcement of the zone, we will issue local Broadcast Notice to Mariners and Public Notice of Safety Zone so vessel owners and operators can plan accordingly.

3. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, above.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

4. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

5. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and determined that this rule does not have implications for federalism.

6. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

7. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

8. Taking of Private Property

This rule will not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

9. Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

10. Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

11. Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

12. Energy Effects

This action is not a ''significant energy action'' under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use.

13. Technical Standards

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

14. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.lD, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have determined that this action is one

of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves the establishment of a safety zone and, therefore it is categorically excluded from further review under paragraph 34(g) of Figure 2–1 of the Commandant Instruction. An environmental analysis checklist supporting this determination and a Categorical Exclusion Determination are available in the docket where indicated under **ADDRESSES**. We seek any comments or information that may lead to the discovery of a significant environmental impact from this rule.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 50 U.S.C. 191; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T09–0760 to read as follows:

§ 165.T09–0760 Safety Zone; U.S. Army Exercise, Des Plaines River, Channahon, IL.

(a) *Location.* All waters on the Des Plaines River between the mile marker 277.8 and mile marker 279.2, Channahon, IL.

(b) *Effective and Enforcement Period.* This rule is effective from 12:01 a.m. on August 18, 2015 to 11:59 p.m. on August 20, 2015. This rule will be enforced with actual notice from 6:30 a.m. until 6:30 p.m. on August 18, 2015 and August 19, 2015, or alternatively if postponed due to weather, from 6:30 a.m. until 6:30 p.m. on August 20, 2015.

(c) *Regulations.* (1) In accordance with the general regulations in § 165.23 of this part, entry into, transiting, or anchoring within this safety zone is prohibited unless authorized by the Captain of the Port, Lake Michigan or a designated on-scene representative.

(2) This safety zone is closed to all vessel traffic, except as may be permitted by the Captain of the Port Lake Michigan or a designated on-scene representative.

(3) The ''on-scene representative'' of the Captain of the Port, Lake Michigan is any Coast Guard commissioned, warrant or petty officer who has been designated by the Captain of the Port, Lake Michigan to act on his or her behalf.

(4) Vessel operators desiring to enter or operate within the safety zone shall contact the Captain of the Port, Lake Michigan or an on-scene representative to obtain permission to do so. The Captain of the Port Lake Michigan or an on-scene representative may be contacted via VHF Channel 16. Vessel operators given permission to enter or operate in the safety zone must comply with all directions given to them by the Captain of the Port Lake Michigan, or an on-scene representative.

Dated: August 6, 2015.

A.B. Cocanour,

Captain, U.S. Coast Guard, Captain of the Port, Lake Michigan.

[FR Doc. 2015–20251 Filed 8–14–15; 8:45 am]

BILLING CODE 9110–04–P

DEPARTMENT OF VETERANS AFFAIRS

38 CFR Part 1

RIN 2900–AO39

Animals on VA Property

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

SUMMARY: The Department of Veterans Affairs (VA) amends its regulation concerning the presence of animals on VA property. This final rule expands the current VA regulation to authorize the presence of service animals consistent with applicable Federal law when these animals accompany individuals with disabilities seeking admittance to property owned or operated by VA.

DATES: This rule is effective September 16, 2015.

FOR FURTHER INFORMATION CONTACT: Joyce Edmonson, RN, JD, Patient Care Services, (10P4), Veterans Health Administration, Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (410) 637–4755. (This is not a toll free number.)

SUPPLEMENTARY INFORMATION: On November 21, 2014, VA published in the **Federal Register** (79 FR 69379) a proposed rule to amend VA regulations regarding the presence of animals on VA property. This rule authorizes the access of service animals when these animals accompany individuals with disabilities seeking admittance to VA property in a manner consistent with applicable Federal law, and clarifies the authority of a VA facility head or designee to allow non-service animals to be present on VA property.

Interested persons were invited to submit comments to the proposed rule on or before January 20, 2015, and VA received 96 comments. All of the issues raised by the commenters that concerned at least one portion of the rule can be grouped together by similar topic, and we have organized our discussion of the comments accordingly. For the reasons set forth in the proposed rule and below, we are adopting the proposed rule as final, with changes, explained below, to proposed 38 CFR 1.218(a)(11).

Multiple commenters stated that it was unclear to what groups of individuals the proposed rule would apply. One commenter specifically expressed concern as to whether a service animal that assisted a visitor of a veteran would be permitted on VA property. We clarify for these commenters that this VA regulation applies to everyone seeking access to VA property, to include employees, veterans, and visitors. The rule as proposed did not contain any limiting language to restrict applicability to only certain groups of individuals, and we therefore do not make any changes to the final rule based on these comments. Several commenters applauded the development by VA of a uniform regulation for service animal access for all VA property, and did not recommend any changes. VA appreciates these comments and believes that this regulation will allow for more consistent access of VA property by service animals.

One commenter asserted that VA should use the term ''assistance animal'' instead of ''service animals'' throughout the proposed regulation because, they assert, the term ''service animals'' is understood more narrowly in the service animal industry to refer only to those animals that assist with mobility impairments. We do not make any changes based on these comments. We disagree that the term ''assistance animal'' is better understood than ''service animal'' by those in the service animal industry. Additionally, this regulation is written for a broader audience than just those in the service animal industry, to include any member of the public that may have need to access VA property. Indeed, the term ''service animal'' as defined in the proposed rule is well understood by the general public because it is consistent with the definition of ''service animal'' in the regulations that implement the Americans with Disabilities Act (ADA). We therefore do not make any changes based on these comments. A commenter

also urged that VA use the phrase ''guide dog'' versus ''seeing eye dog.'' We do not make any changes based on this comment because, as proposed and in this final rule, ''seeing eye dog'' is replaced in § 1.218(a)(11) with the term ''service animal,'' and ''service animal'' includes those dogs trained for the purpose of assisting individuals with a sensory disability (to include visual impairments). Other commenters further asserted that the definition of ''service animal'' in proposed § 1.218(a)(11)(viii) be changed to refer to a dog that does ''work or performs tasks'' as opposed to a dog that does ''work and performs tasks.'' Particularly, commenters noted that VA used both these phrases interchangeably in proposed § 1.218(a)(11)(viii), and asserted that this was confusing. We agree with these comments, and clarify that the intent was to use only the phrase ''work or performs tasks'' throughout the definition of ''service animal.'' We therefore make changes to ensure that the phrase ''work or perform tasks'' is used consistently throughout § 1.218(a)(11)(viii).

One commenter was concerned that breed restrictions may be imposed based on a perception that certain breeds of dogs are prone to violence. This VA regulation does not impose breed restrictions, and VA will not otherwise pose breed restrictions for purposes of access of service animals on VA property. VA will only deny access to VA property or will remove a service animal from VA property based on an individual assessment in accordance with objective criteria of the risks that the individual service animal poses to the health or safety of people or other service animals. VA makes no changes based on this comment.

Several commenters sought clarification between a ''service animal'' and a ''pet,'' and whether animals other than dogs were included in the definition of ''service animal.'' As proposed, § 1.218(a)(11)(viii) defined a ''service animal'' as any dog that accompanies an individual with a disability and that is individually trained for that purpose. The definition in proposed § 1.218(a)(11)(viii) specifically excluded any species of animal other than a dog, and specifically required that the work or tasks performed by the service animal be directly related to the individual's disability. Further, § 1.218(a)(11)(viii) distinguished that the crime deterrent effects of an animal's presence, or the provision of emotional support or well-being, comfort, or companionship do not constitute ''work or tasks.'' The definition as proposed in § 1.218(a)(11)(viii) clearly excluded any animal other than a dog, and also excluded any dog that is not individually trained to assist an individual with a disability. As proposed, § 1.218(a)(11)(viii) makes clear that unless the animal is a dog that is individually trained to do something that qualifies as work or a task, the animal is a pet or other type of animal and does not qualify as a service animal. We believe the definition in proposed § 1.218(a)(11)(viii) is clear enough to exclude a ''pet,'', and we therefore do not make any changes based on these comments.

Several commenters wanted VA to permit miniature horses on VA properties. As discussed in the proposed rule, VA believes the presence of a miniature horse poses legitimate safety concerns, both to people on VA property and the miniature horse, especially on VA healthcare properties. This final rule reiterates VA's determination from the proposed rule, that, in light of a review of the multiple assessment factors, miniature horses are excluded from VA properties. We restate from the proposed rule that these assessment factors include the larger size of a miniature horse as well as their reduced predictability in behaving in accordance with typical standards of public access required of service animals. Additional factors from the proposed rule that VA considers to support the exclusion of miniature horses include elimination of horse waste, a heightened flee response of a miniature horse, the smooth flooring common to VA properties, and the likely disruptive attention a horse would receive. We therefore do not make any changes based on these comments.

Many commenters expressed concern that the proposed rule restricted access to only those dogs trained or certified by Assistance Dogs International (ADI), International Guide Dog Federation (IGDF), or one of their affiliated organizations. The proposed rule did not create such restrictions; as proposed, VA's standard for service animal access is consistent with regulations that implement the ADA and is not dependent on how the service animal was trained or by whom, but instead depends on the service animal's ability to behave in accordance with typical public access standards for public settings. Therefore, we do not make any changes based on these comments. VA notes that a service animal must be certified by ADI or IGDF as a requirement for veterans seeking service dog benefits under 38 CFR 17.148, however, those requirements for benefits do not apply to access. Conversely, several commenters asserted that service animal access to VA properties should be restricted to only those animals that are certified or trained by ADI, IGDF, or an affiliate—these commenters articulated various negative experiences where a ''fake service animal'' threatened their person, their service animal, or another person while on VA property or other property. VA recognizes that these commenters have legitimate concerns related to dogs that are not appropriately trained possibly being able to access VA property under the guise of a ''service dog,'' because VA will not be requiring any proof of training or certification for purposes of access. However, the lack of such a documentation requirement is consistent with regulations that implement the ADA, and otherwise provides the benefit of the doubt to individuals with disabilities unless the service animal's behavior necessitates that access be denied or the service animal be removed. VA does not make any changes based on these comments, but we stress that § 1.218(a)(11)(ii) still provides for removal of a service animal from certain areas on VA property if the animal exhibits behavior or other signs that it is a threat to the health or safety of individuals or other service animals on VA property.

Several commenters objected to the requirements in proposed § 1.218(a)(11)(vii) to provide proof of a service animal's good health when an individual will be accompanied by a service animal while receiving treatment in a Veterans Health Administration (VHA) residential program. Some of these commenters alluded to an administrative burden of ''registering'' a service animal to obtain access to the VA property. We clarify for these commenters that § 1.218(a)(11)(vii) only applies to situations where an individual would be accompanied by a service animal for the duration of his or her treatment in a VHA residential program—these documentation requirements would not apply for more general access to a VA property, such as to receive outpatient care provided by VA. The presentation of certain records as proof of an animal's health required in § 1.218(a)(11)(vii) is necessary when a service animal will have routine and constant interaction with employees, veterans, patients, and visitors over the course of an extended period of time in a residential setting, so that VA may ensure patient care, patient safety, and infection control standards are met. However, we do agree with the commenters who noted that some of the

requirements in § 1.218(a)(11)(vii) as proposed could create an undue administrative burden on both individuals receiving treatment as well as VA staff. We therefore make changes in the final rule to remove § 1.218(a)(11)(vii)(A)–(C), and to revise § 1.218(a)(11)(vii) to require that the individual receiving treatment in a residential program must only provide documentation that confirms that the service animal has a current rabies vaccine and current core canine vaccines. We further revise the conditions in § 1.218(a)(11)(vii) related to when a rabies vaccine and core canine vaccines are considered ''current'' to require ''a current rabies vaccine as determined by state and local public health requirements, and current core canine vaccines as dictated by local veterinary practice standards (*e.g.* distemper, parvovirus, and adenovirus-2).'' These changes will retain the requirement for documentation of basic canine vaccinations that we believe is necessary to ensure the service animal is in good health, while providing more flexibility of those required vaccinations in accordance with local requirements. These revisions will also remove the requirement for proof of a comprehensive exam within the past 12 months, as well as remove the requirement that an individual must otherwise confirm in writing that the service animal is healthy. We believe that the revised documentation requirements in § 1.218(a)(11)(vii) now relate only to the basic canine vaccines that an the individual would have merely as a function of being a responsible dog owner, and therefore providing such documentation to VA for confirmation is not burdensome. We make similar changes to the documentation requirements related to the health of non-service animals in § 1.218(a)(11)(ix)(C)–(E), specifically to clarify that the prophylactic medication requirement for non-service animals applies only to parasite control medications (*e.g.* monthly flea and tick prevention), and to clarify that the health requirements for non-service animals are consistent with local veterinary practice standards.

One commenter suggested that the mere presence of a flea or tick on a service animal should not be grounds for removal of a service animal under § 1.218(a)(11)(ii)(C)(2), particularly for individuals being treated in VA residential settings. VA does not make any changes based on this comment. We reiterate from the proposed rule that the presence of a flea or tick poses a threat to the health and safety of others, as fleas, ticks, and other parasites can be spread by physical contact and close proximity and can reproduce quickly and in great volume to create infestation conditions that are much more difficult to remediate, versus removing a service animal with visible external parasites. We note, however, that under § 1.218(a)(11)(ii)(C), VA staff must complete an individualized assessment based on objective indications, such as external signs of parasites, to ascertain the severity of risk to the health or safety of people or other service animals.

Several commenters suggested that VA revise § 1.218(a)(11)(viii) to permit service dogs in training to access VA property. Some of these commenters reasoned that a service dog in training could be well trained enough to dependably behave safely in public settings, even without having fully completed their training. Other commenters expressed that VA properties could be used as training opportunities for service animals. VA seeks to maintain a safe and therapeutic environment at its properties. In a complex hospital environment, we believe that service animals should be fully trained and a ''service animal in training'' is not fully trained. We therefore do not revise § 1.218(a)(11)(viii) to permit service animals in training.

Several commenters inquired as to how VA's service animal access rule would be enforced, particularly with regard to staff training. Some commenters expressed concerns about ''fake service animals'' interfering with the need for people and service animals to safely access VA properties. Others expressed concerns that VA's proposed rule would establish a barrier to access or expressed concern regarding the authority of varying facility directors to devise implementation criteria that would restrict access outside of the proposed rule. VA does not make any changes based on these comments. The final rule establishes a set of standardized criteria that can be uniformly enforced on VA property, and removes variation amongst individual facilities that existed prior to this final rule. A service animal meeting VA's requirements under this final rule will not be subject to any barrier to access. And once on VA property, service animals are subject to the same terms, conditions and regulations that govern the admission of the public to VA property, to include certain exceptions on VHA properties to ensure patient care, patient safety, and infection control standards are not compromised. Therefore, service animals would only be denied access or removed if, based on an individualized assessment that is subject to objective indications in the final rule to ascertain severity of risk, there is cause for access denial or removal. VA anticipates that in most cases concerns related to access and removal will be communicated by veterans, employees, or visitors to VA staff members (including security and law enforcement) who will manage any concerns and facilitate an appropriate response. VA anticipates all appropriate staff members will be trained on what is and what is not allowed under this regulation and how it should be implemented.

Several commenters expressed concern about the requirement in proposed § 1.218(a)(11)(i) that the service animal be in a guiding harness or on a leash, as well as under the control of the individual with a disability, at all times while on VA property. These commenters asserted that multiple disabilities might prevent an individual from physically controlling a service animal via a harness or leash, or that the service animal's presence on a leash or other tether at all times might prevent that service animal from completing work or tasks they are trained to perform. Further, some commenters urged VA to adopt a standard that mimics that of the regulations that implement the ADA, whereby control over the service animal by the handler can be in the form of voice control. VA agrees with these comments, and amends § 1.218(a)(11)(i) to incorporate comparable language to that used in the regulations that implement the ADA. *Cf.* 28 CFR 36.302(c)(4).

Likewise, after considering related comments, VA recognizes that individuals with disabilities may require the assistance of an alternate handler to control the service animal while on VA property. The need for an alternate handler may arise when the individual with the disability is unable to control the service animal because of the care the individual receives; or when the service animal, individual with a disability, and the alternate handler routinely operate as part of a team when accessing public areas. For this reason, VA amends § 1.218(a)(11)(i) and (a)(11)(ii)(A) to allow for an alternate handler to also be in control of the service animal. Specifically, § 1.218(a)(11)(i) will state that a service animal shall be under the control of the person with the disability or an alternate handler at all times while on VA property. Section 1.218(a)(11)(i) will also state that a service animal shall have a harness, leash, or other tether,

unless either the handler is unable because of a disability to use a harness, leash, or other tether, or the use of a harness, leash, or other tether would interfere with the service animal's safe, effective performance of work or tasks, in which case the service animal must be otherwise under the handler's control (*e.g.,* voice control, signals, or other effective means). We reiterate, that at no time is any VA employee to be responsible for the control of the service animal, as set forth in § 1.218(a)(11)(i).

Several commenters inquired into whose responsibility is it to clean up animal waste and if VA properties have to designate an area for animals to relieve themselves. Commensurate with the requirements for access is a properly housebroken service animal. Should a service animal relieve bowel or bladder on VA property, it is the responsibility of the handler or the alternate handler to properly dispose of the waste in accordance with standards appropriate for public settings. VA again notes that at no time is any employee to be responsible to control a service animal and part of the access requirements is that an animal is housebroken. VA makes no change based on this comment.

Several commenters objected to the absolute prohibition of service animal access to certain areas of VHA property in proposed 1.218(a)(11)(iii), citing contrary standards that permit such access in regulations that implement the ADA as well as guidance issued by the Centers for Disease Control and Prevention (CDC). Particularly, commenters objected to the categorical exclusion of service animals from inpatient hospital settings to include locked mental health units (in proposed § 1.218(a)(11)(iii)(C)), and from patient rooms or treatment areas where patients may have an animal allergy or phobia (in proposed § 1.218(a)(11)(iii)(E)). VA cited three examples of acute inpatient hospital settings in proposed § 1.218(a)(11)(iii)(C) (intensive care units, stabilization units, and locked mental health units) in a representative but not exhaustive list of areas that could be covered by this exclusion. In light of the comments received, VA revises § 1.218(a)(11)(iii)(C) to remove these examples, and instead qualify the exclusion of service animals in acute inpatient settings to exclude such animals when their presence is not part of a documented treatment plan. VA agrees with the commenters that there are scenarios in which a service animal on any of the specific areas in proposed § 1.218(a)(11)(iii)(C) may provide its services when the individual being treated or an alternate handler can control a service animal as part of a treatment plan established by the clinical care team. Although VA used CDC guidance to justify the area-based exclusions in proposed § 1.218(a)(11)(iii)(C) (see 79 FR 69379, 69381), VA believes that this revision is still consistent with CDC's guidance because the service animal would not be permitted to access the inpatient area if not part of a documented treatment plan. The animal would require a staff assessment under § 1.218(a)(11)(ii)(C) to evaluate any threat to the health or safety of patients or staff. A service animal could still be removed under § 1.218(a)(11)(ii) if it presented a risk to patient safety or infection control standards after gaining access to an acute inpatient setting. For these same reasons, VA removes proposed § 1.218(a)(11)(iii)(E), the prohibition of the presence of service animals in patient rooms or areas where a patient may have an animal allergy or phobia. Again, a service animal could be removed from such an area if the animal posed a risk to patient safety or health, under § 1.218(a)(11)(ii). By removing proposed § 1.218(a)(11)(iii)(E), we will renumber proposed § 1.218(a)(11)(iii)(F) and (iii)(G) as (iii)(E) and (iii)(F), respectively.

However, VA will not remove all categorical area-based exclusions of service animals on VHA property from proposed § 1.218(a)(11)(iii). VA's healthcare facilities reflect evidence based standards governing safe operation of a healthcare facility, patient care, and infection control. Consistent with CDC guidance, VA still finds certain locations such as operating rooms, surgical suites, areas where invasive procedures are being performed, decontamination, sterile processing, sterile storage areas, food preparation areas (not to include public food service areas), and any areas where protective barrier measures are required, to be inappropriate environments for a service animal. One commenter recommended removing the representative examples in proposed § 1.218(a)(11)(iii)(A)–(C) as redundant of places where protective barrier measures are required. We decline to remove these examples because they add clarity regarding the types of areas where access must be restricted to ensure patient care, patient safety or infection control standards are not compromised. While we will retain these area-based exclusions and the examples provided in the final rule, in response to comments we will revise § 1.218(a)(11)(iii)(F) as proposed, renumbered as § 1.218(a)(11)(iii)(E), to include the clarifying parenthetical ''(not to include public food service areas).'' We will also revise § 1.218(a)(11)(iii)(G) as proposed, renumbered as § 1.218(a)(11)(iii)(F), to refer to areas ''where personal protective clothing must be worn or barrier protective measures must be taken to enter,'' instead of referring to areas that require ''personal protective equipment'' to be worn. We agree with commenters that ''personal protective equipment'' in proposed § 1.218(a)(11)(iii)(G) could be interpreted to encompass even the wearing of basic equipment by patients, staff, or visitors like paper face masks or examination gloves, which could qualify nearly any area of a VHA medical facility as categorically excluding the presence of a service animal. The revisions to proposed § 1.218(a)(11)(iii)(G) (§ 1.218(a)(11)(iii)(F) as renumbered) more accurately describe the types of areas that a service animal will be restricted from entering.

We emphasize that even with these changes to the area-based exclusions in § 1.218(a)(11)(iii), a specific service animal may still be individually denied access or removed if it does not meet the standards in § 1.218(a)(11)(i) and (a)(11)(ii), namely that the animal must be controlled (by the individual or an alternate handler that is not a VA employee), be housebroken, and not pose a threat to the health and safety of people or other service animals.

Several commenters expressed concerns regarding the provision of service dogs, service dog training, and service dog benefits by VA. Particularly, some commenters asserted that VA should assist veterans to obtain a service dog and have such a dog trained and certified. These comments are beyond the scope of this rule, and we therefore do not make any changes. We note, however, that the provision of service dog benefits by VA is regulated at 38 CFR 17.148. Other commenters noted the benefits of service animals for the treatment of PTSD, but did not necessarily suggest any changes to the proposed rule. Again, these comments are beyond the scope of this rule, and we therefore do not make any changes. Some commenters requested that the final rule provide examples of what VA considers to be ''work'' or ''tasks'' that a service animal may be trained to perform, either in the preamble or through revisions to the regulation text. Commenters noted that such examples would be particularly helpful for a service animal that might assist an individual with a mental disability or illness. We decline to make revisions to

the regulation text or provide examples in the preamble of this final rule. However, we do provide as reference here the supplemental guidance issued by the Department of Justice when it last issued regulations on this subject in 2010, specifically on what constitutes ''work or tasks'' that a service animal may provide (see Appendix A to 28 CFR part 36, Guidance on Revisions to ADA Regulation on Nondiscrimination on the Basis of Disability by Public Accommodations and Commercial Facilities, 75 FR 56236, 56258). This reference provides examples of work or tasks that VA understands to be performed by service animals for individuals with disabilities so that such individuals may better navigate public spaces. By providing this reference of examples of work and tasks in the context of public access, VA is not expressing a position on the efficacy of such dogs for the treatment of the disabilities of the individuals.

One commenter urged VA to include emotional support animals in the definition of ''service animal'' in § 1.218(a)(11)(viii) as proposed. The commenter asserted that because many veterans with PTSD use emotional support animals in their homes, that refusing access to emotional support animals on VA property could discourage use of VA services by such veterans. This same commenter also made a reference to Department of Housing and Urban Development (HUD) regulations and guidance that create exclusions for public housing's ''no pet'' policies for certain animals, to include permitting access for emotional support animals in applicable circumstances, and suggested that VA consider developing a similar rule regarding emotional support animal access on VA property. Another commenter suggested adopting HUD's approach in the context of VA's residential treatment programs. VA does not disagree that some veterans may use emotional support animals, nor disagree with the commenters' subjective accounts that such animals have improved the quality of their lives. However, the HUD regulations and guidance referenced by the commenters appropriately apply in the context of public housing. In particular, the HUD regulations and guidance do not require an animal to be individually trained to do work or perform tasks for the benefit of the individual with a disability. However, there is a distinction between the presence of an animal in public areas and the functions that animal performs to enable an individual to use public services and public accommodations (service animal), as compared to the presence and use of a comfort or emotional support animal in the home (emotional support animal). Regarding VHA's residential treatment programs, these programs involve shared spaces amongst multiple veterans, where there is an active treatment component that involves the participation of not only the veterans but also treatment providers as well as other members of the public at times. Therefore, we interpret VHA residential programs to be public treatment spaces (just as the other areas of VHA property that are specified in this final rule), rather than a residential space analogous to the HUD public housing context. We therefore do not make any changes based on these comments.

Commenters expressed concern about the area-based restrictions for property under the control of the National Cemetery Administration (NCA) in proposed § 1.218(a)(11)(iv). We interpret such comments to be the result of a misunderstanding by commenters that new restrictions were being created in the proposed rule when in fact the proposed area-based restrictions reflect existing restrictions on NCA property in accordance with rules requiring access on the same terms, conditions, and regulations that generally govern admission of the public to the property. That is, the proposed and final rules only clarify that where an individual may not access NCA property (*i.e.,* in NCA construction or maintenance sites, or in NCA open interment areas), so, too, a service animal may not access such property. This rule does not affect the right of an individual to be accompanied by their service animal on NCA grounds in those areas where the general public is permitted. However, these comments raise the possibility that the provision regarding restriction of access to open interment areas may be perceived as overly restrictive. We have, therefore, made a change to § 1.218(a)(11)(iv)(A) to remove the reference to columbaria (as columbaria pose minimal safety issues), and to indicate that individuals may be permitted to observe an individual interment or inurnment accompanied by a service animal. This change will allow family or representatives (such as clergy), accompanied by their service animals, to observe an interment or inurnment when requested and when such observation can be safely accommodated.

VA makes one technical correction in § 1.218(a)(11)(viii). In the last sentence, VA is replacing ''of this chapter'' with a complete citation ''38 CFR 17.148.'' VA also makes several minor, non-substantive edits for clarity such as removing the first commas appearing in proposed § 1.218(a)(11)(ix)(C) and (D), replacing the word ''on'' with the word ''in'' three places in § 1.218(a)(11)(ix)(E) in reference to VA Community Living Centers, and adding the clarifying phrase ''with respect to an individual'' to the definition of a disability in § 1.218(a)(11)(x).

One commenter asked for clarification if animals other than dogs can participate in Animal Assisted Activities (AAA) or Animal Assisted Therapy (AAT) programs under § 1.218(a)(11)(ix)(C) and (ix)(D) as proposed. Unlike service animals under the proposed and final rules, there is no species restriction for AAA or AAT animals, and AAA or AAT animals are permitted on VHA property only at the discretion of the VA facility head or designee. Should an AAA or AAT animal that is not a dog meet the requirements in § 1.218(a)(11)(ix)(C) and (D), a VA facility head or designee may grant that animal access to VA property. Another commenter suggested that VA allow for pets to visit patients in unique circumstances such as end-of-life situations. As with other species of animals, there is no categorical restriction for AAA or AAT animals that would necessarily exclude a personal pet in an end-of-life or other special circumstance. Should an animal serve an AAA or AAT purpose and meet the requirements in § 1.218(a)(11)(ix)(C) and (D), a VA facility head or designee may grant that animal access to VA property. In addition, a commenter suggested that AAA and AAT animals be allowed on VA property only when their handler or organization has liability insurance. We do not disagree that liability insurance would be a sensible requirement, particularly as AAA is often conducted in group settings. However, VA believes that any liability insurance would be better addressed outside of a regulatory requirement by the VA facility head or designee and the AAA or AAT handler or organization prior to establishing a particular program at a facility. VA makes no changes based on these comments.

For all of the reasons noted above, VA is adopting the rule as final with changes as noted to 38 CFR 1.218.

Effect of Rulemaking

Title 38 of the Code of Federal Regulations, as revised by this rulemaking, represents VA's implementation of its legal authority on this subject. Other than future amendments to this regulation or governing statutes, no contrary guidance or procedures are authorized. All existing or subsequent VA guidance

must be read to conform with this rulemaking if possible or, if not possible, such guidance is superseded by this rulemaking.

Paperwork Reduction Act

This final rule includes a collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) that requires approval by the Office of Management and Budget (OMB). Accordingly, under 44 U.S.C. 3507(d), VA has submitted a copy of this rulemaking action to OMB for review.

OMB assigns a control number for each collection of information it approves. VA may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. Section 1.218(a)(11) contains a collection of information under the Paperwork Reduction Act of 1995. OMB has approved the information collection requirement in this section as an emergency clearance under control number 2900–0831. This emergency clearance expires on December 31, 2015, before which time VA will submit to OMB a request for permanent clearance.

Regulatory Flexibility Act

The Secretary hereby certifies that this final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. This final rule directly affects only individuals and will not directly affect small entities. Therefore, pursuant to 5 U.S.C. 605(b), this rulemaking is exempt from the final regulatory flexibility analysis requirements of 5 U.S.C. 604.

Executive Orders 12866 and 13563

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, and other advantages; distributive impacts; and equity). Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 12866 (Regulatory Planning and Review) defines a ''significant regulatory action,'' requiring review by OMB, unless OMB waives such review, as ''any regulatory action that is likely to result in a rule that may: (1) Have an annual effect on the economy of $100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) Raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in this Executive Order.''

The economic, interagency, budgetary, legal, and policy implications of this final rule have been examined and it has been determined not to be a significant regulatory action under Executive Order 12866. VA's impact analysis can be found as a supporting document at *http://www.regulations.gov,* usually within 48 hours after the rulemaking document is published. Additionally, a copy of this rulemaking and its impact analysis are available on VA's Web site at *http://www.va.gov/orpm/,* by following the link for ''VA Regulations Published From FY 2004 Through Fiscal Year to Date.''

Unfunded Mandates

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in an expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation) in any one year. This final rule will have no such effect on State, local, and tribal governments, or on the private sector.

Catalog of Federal Domestic Assistance

The Catalog of Federal Domestic Assistance numbers and titles for the programs affected by this document are 64.007, Blind Rehabilitation Centers; 64.009, Veterans Medical Care Benefits; 64.010, Veterans Nursing Home Care; and 64.011, Veterans Dental Care.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Robert L. Nabors II, Chief of Staff, Department of Veterans Affairs, approved this document on June 5, 2015, for publication.

List of Subjects in 38 CFR Part 1

Administrative practice and procedure, Cemeteries, Government property, Security measures.

Dated: June 19, 2015.

Michael Shores,

Chief Impact Analyst, Office of Regulation Policy & Management, Office of the General Counsel, Department of Veterans Affairs.

For the reasons stated in the preamble, VA amends 38 CFR part 1 as follows:

PART 1—GENERAL PROVISIONS

■ 1. The authority citation for part 1 continues to read as follows:

Authority: 38 U.S.C. 501(a), and as noted in specific sections.

■ 2. Revise § 1.218(a)(11) to read as follows:

§ 1.218. Security and law enforcement at VA facilities.

(a) * * *

(11) *Animals.* (i) Service animals, as defined in paragraph (a)(11)(viii) of this section, are permitted on VA property when those animals accompany individuals with disabilities and are trained for that purpose. A service animal shall be under the control of the person with the disability or an alternate handler at all times while on VA property. A service animal shall have a harness, leash, or other tether, unless either the handler is unable because of a disability to use a harness, leash, or other tether, or the use of a harness, leash, or other tether would interfere with the service animal's safe, effective performance of work or tasks, in which case the service animal must be otherwise under the handler's control (*e.g.,* voice control, signals, or other effective means). VA is not responsible for the care or supervision of a service animal. Service animal presence on VA property is subject to the same terms, conditions, and regulations as generally govern admission of the public to the property.

(ii) A service animal will be denied access to VA property or removed from VA property if:

(A) The animal is not under the control of the individual with a disability or an alternate handler;

(B) The animal is not housebroken. The animal must be trained to eliminate its waste in an outdoor area; or

(C) The animal otherwise poses a risk to the health or safety of people or other service animals. In determining whether

an animal poses a risk to the health or safety of people or other service animals, VA will make an individualized assessment based on objective indications to ascertain the severity of the risk. Such indications include but are not limited to:

(*1*) External signs of aggression from the service animal, such as growling, biting or snapping, baring its teeth, lunging; or

(*2*) External signs of parasites on the service animal (*e.g.* fleas, ticks), or other external signs of disease or bad health (*e.g.* diarrhea or vomiting).

(iii) Service animals will be restricted from accessing certain areas of VA property under the control of the Veterans Health Administration (VHA properties) to ensure patient care, patient safety, or infection control standards are not compromised. Such areas include but are not limited to:

(A) Operating rooms and surgical suites;

(B) Areas where invasive procedures are being performed;

(C) Acute inpatient hospital settings when the presence of the service animal is not part of a documented treatment plan;

(D) Decontamination, sterile processing, and sterile storage areas;

(E) Food preparation areas (not to include public food service areas); and

(F) Any areas where personal protective clothing must be worn or barrier protective measures must be taken to enter.

(iv) Service animals will be restricted from accessing certain areas of VA property under the control of the National Cemetery Administration (NCA properties) to ensure that public safety, facilities and grounds care, and maintenance control are not compromised. Such areas include but are not limited to:

(A) Open interment areas, except as approved to observe an individual interment or inurnment.

(B) Construction or maintenance sites; and

(C) Grounds keeping and storage facilities.

(v) If a service animal is denied access to VA property or removed from VA property in accordance with (a)(11)(ii) of this section, or restricted from accessing certain VA property in accordance with paragraphs (a)(11)(iii) and (iv) of this section, then VA will give the individual with a disability the opportunity to obtain services without having the service animal on VA property.

(vi) Unless paragraph (a)(11)(vii) of this section applies, an individual with a disability must not be required to provide documentation, such as proof that an animal has been certified, trained, or licensed as a service animal, to gain access to VA property accompanied by the service animal. However, an individual may be asked if the animal is required because of a disability, and what work or task the animal has been trained to perform.

(vii) An individual with a disability, if such individual will be accompanied by the service animal while receiving treatment in a VHA residential program, must provide VA with documentation that confirms the service animal has had a current rabies vaccine as determined by state and local public health requirements, and current core canine vaccines as dictated by local veterinary practice standards (*e.g.* distemper, parvovirus, and adenovirus-2).

(viii) A service animal means any dog that is individually trained to do work or perform tasks for the benefit of an individual with a disability, including a physical, sensory, psychiatric, intellectual, or other mental disability. Other species of animals, whether wild or domestic, trained or untrained, are not service animals for the purposes of this definition. The work or tasks performed by a service animal must be directly related to the individual's disability. The crime deterrent effects of an animal's presence and the provision of emotional support, well-being, comfort, or companionship do not constitute work or tasks for the purposes of this definition. Service dogs in training are not considered service animals. This definition applies regardless of whether VA is providing benefits to support a service dog under 38 CFR 17.148.

(ix) Generally, animals other than service animals (''non-service animals'') are not permitted to be present on VA property, and any individual with a non-service animal must remove it. However, a VA facility head or designee may permit certain non-service animals to be present on VA property for the following reasons:

(A) Animals may be permitted to be present on VA property for law enforcement purposes;

(B) Animals under the control of the VA Office of Research and Development may be permitted to be present on VA property;

(C) Animal-assisted therapy (AAT) animals may be permitted to be present on VHA property when the presence of such animals would not compromise patient care, patient safety, or infection control standards. AAT is a goal-directed clinical intervention, as provided or facilitated by a VA therapist or VA clinician, that incorporates the use of an animal into the treatment regimen of a patient. Any AAT animal present on VHA property must facilitate achievement of patient-specific treatment goals, as documented in the patient's treatment plan. AAT animals must be up to date with all core vaccinations or immunizations, prophylactic parasite control medications, and regular health screenings as determined necessary by a licensed veterinarian consistent with local veterinary practice standards. Proof of compliance with these requirements must be documented and accessible in the area(s) where patients receive AAT.

(D) Animal-assisted activity (AAA) animals may be permitted to be present on VHA property when the presence of such animals would not compromise patient care, patient safety, or infection control standards. AAA involves animals in activities to provide patients with casual opportunities for motivational, educational, recreational, and/or therapeutic benefits. AAA is not a goal-directed clinical intervention that must be provided or facilitated by a VA therapist or clinician, and therefore is not necessarily incorporated into the treatment regimen of a patient or documented in the patient's medical record as treatment. AAA animals must be up to date with all core vaccinations or immunizations, prophylactic parasite control medications, and regular health screenings as determined necessary by a licensed veterinarian consistent with local veterinary practice standards. Proof of compliance with these requirements must be documented and accessible in the area(s) where patients may participate in AAA.

(E) Animals participating in a VA Community Living Center (CLC) residential animal program or a Mental Health Residential Rehabilitation Treatment Program (MHRRTP) may be permitted to be present on VHA property, when the presence of such animals would not compromise patient care, patient safety, or infection control standards. A residential animal program in a VA CLC or a MHRRTP is a program that uses the presence of animals to create a more homelike environment to foster comfort for veterans, while also stimulating a sense of purpose, familiarity, and belonging. Any VA CLC or MHRRTP residential animal present on VHA property must facilitate achievement of therapeutic outcomes (such as described above), as documented in patient treatment plans. Residential animals in a VA CLC or MHRRTP must be up to date with all core vaccinations and immunizations, prophylactic parasite control

medications, and regular health screenings as determined necessary by a licensed veterinarian consistent with local veterinary practice standards. Proof of compliance with these requirements must be documented and accessible in the VA CLC or MHRRTP.

(F) Animals may be present on NCA property for ceremonial purposes during committal services, interments, and other memorials, if the presence of such animals would not compromise public safety, facilities and grounds care, and maintenance control standards.

(x) For purposes of this section, a disability means, with respect to an individual, a physical or mental impairment that substantially limits one or more major life activities of the individual; a record of such an impairment; or being regarded as having such an impairment.

(OMB has approved the information collection requirements in this section under control number XXXX–XXXX.)

[FR Doc. 2015–20182 Filed 8–14–15; 8:45 am]

BILLING CODE 8320–01–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 80

[EPA–HQ–OAR–2015–0208; FRL–9931–94–OAR]

RIN 2060–AS64

Approval of North Carolina's Request To Relax the Federal Reid Vapor Pressure Gasoline Volatility Standard for Mecklenburg and Gaston Counties

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking direct final action to approve a request from the state of North Carolina for the EPA to relax the Reid Vapor Pressure (RVP) standard applicable to gasoline introduced into commerce from June 1 to September 15 of each year for Mecklenburg and Gaston counties. Specifically, the EPA is approving amendments to the regulations to allow the RVP standard for the two counties to rise from 7.8 pounds per square inch (psi) to 9.0 psi for gasoline. The EPA has determined that this change to the federal RVP regulation is consistent with the applicable provisions of the Clean Air Act (CAA). This action is being taken without prior proposal because the EPA believes that this rulemaking is noncontroversial for the reasons set forth in this preamble, and due to the limited scope of this action.

DATES: This rule is effective on October 16, 2015 without further notice, unless EPA receives adverse comment by September 16, 2015. If EPA receives adverse comment, we will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2015–0208, to the Federal eRulemaking Portal: *http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Patty Klavon, Office of Transportation and Air Quality, Environmental Protection Agency, 2000 Traverwood Drive, Ann Arbor, Michigan, 48105; telephone number: (734) 214–4476; fax number: (734) 214–4052; email address: *klavon.patty@epa.gov.*

SUPPLEMENTARY INFORMATION:

The contents of this preamble are listed in the following outline:

I. General Information

A. Why is the EPA issuing a direct final rule?

The EPA is making this revision as a direct final rule without prior proposal because the EPA views this revision as noncontroversial and anticipates no adverse comment. The rationale for this rulemaking is described in detail below. In the Proposed Rules section of this **Federal Register**, the EPA is publishing a separate document that will serve as the proposal to approve this revision to the RVP gasoline standard that applies in Mecklenburg and Gaston counties should adverse comments be filed. If the EPA receives no adverse comment, the EPA will not take further action on the proposed rule. If the EPA receives adverse comment on this rule or any portion of this rule, the EPA will withdraw the direct final rule or the portion of the rule that received adverse comment. All public comments received will then be addressed in a subsequent final rule based on the proposed rule. The EPA will not institute a second comment period on this rulemaking. Any parties interested in commenting must do so at this time.

B. Does this action apply to me?

Entities potentially affected by this rule are fuel producers and distributors who do business in North Carolina.

Examples of potentially regulated entities	NAICS [1] codes
Petroleum refineries	324110
Gasoline Marketers and Distributors	424710 424720
Gasoline Retail Stations	447110
Gasoline Transporters	484220 484230

The above table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. The table lists the types of entities of which the EPA is aware that potentially could be affected by this rule. Other types of entities not listed on the table could also be affected by this rule. To determine whether your organization could be affected by this rule, you should carefully examine the regulations in 40 CFR 80.27. If you have questions regarding the applicability of this action to a particular entity, call the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this preamble.

[1] North American Industry Classification System.

C. What should I consider as I prepare my comments?

1. Submitting CBI

Do not submit CBI to the EPA through *www.regulations.gov* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information in a disk or CD–ROM that you mail to the EPA, mark the outside of the disk or CD–ROM as CBI and then identify electronically within the disk or CD–ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

2. Tips for Preparing Your Comments

When submitting comments, remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Follow directions—The EPA may ask you to respond to specific questions or organize comments by referencing a Code of Federal Regulations (CFR) part or section number.
- Explain why you agree or disagree, suggest alternatives, and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns, and suggest alternatives.
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- Make sure to submit your comments by the comment period deadline identified.

3. Docket Copying Costs

You may be required to pay a reasonable fee for copying docket materials.

II. Action Being Taken

This direct final rule approves a request from the state of North Carolina to change the summertime gasoline RVP standard for Mecklenburg and Gaston counties from 7.8 psi to 9.0 psi by amending the EPA's regulations at 40 CFR 80.27(a)(2). In a previous rulemaking, the EPA approved a redesignation request and maintenance plan for the Charlotte-Gastonia-Salisbury, North Carolina 2008 ozone area (''the Charlotte area'') and a CAA section 110(l) non-interference demonstration that relaxing the federal RVP gasoline requirement from 7.8 psi to 9.0 psi for gasoline sold from June 1 to September 15 of each year in Mecklenburg and Gaston counties would not interfere with maintenance of the national ambient air quality standards (NAAQS) in the Charlotte area. Mecklenburg and Gaston counties are part of the Charlotte area. For more information on North Carolina's redesignation request and maintenance plan for the Charlotte area, please refer to Docket ID. No. EPA–R04–OAR–2015–0275 for the rulemaking that was signed on July 17, 2015. The preamble for this rulemaking is organized as follows: Section III. provides the history of the federal gasoline volatility regulation. Section IV. describes the policy regarding relaxation of volatility standards in ozone nonattainment areas that are redesignated as attainment areas. Section V. provides information specific to North Carolina's request for Mecklenburg and Gaston counties. Finally, Section VI. presents the final action in response to North Carolina's request.

III. History of the Gasoline Volatility Requirement

On August 19, 1987 (52 FR 31274), the EPA determined that gasoline nationwide was becoming increasingly volatile, causing an increase in evaporative emissions from gasoline-powered vehicles and equipment. Evaporative emissions from gasoline, referred to as volatile organic compounds (VOC), are precursors to the formation of tropospheric ozone and contribute to the nation's ground-level ozone problem. Exposure to ground-level ozone can reduce lung function, thereby aggravating asthma and other respiratory conditions, increase susceptibility to respiratory infection, and may contribute to premature death in people with heart and lung disease.

The most common measure of fuel volatility that is useful in evaluating gasoline evaporative emissions is RVP. Under CAA section 211(c), the EPA promulgated regulations on March 22, 1989 (54 FR 11868) that set maximum limits for the RVP of gasoline sold during the regulatory control periods that were established on a state-by-state basis in the final rule. The regulatory control periods addressed the portion of the year when peak ozone concentrations were expected. These regulations constituted Phase I of a two-phase nationwide program, which was designed to reduce the volatility of gasoline during the high ozone season. On June 11, 1990 (55 FR 23658), the EPA promulgated more stringent volatility controls as Phase II of the volatility control program. These requirements established maximum gasoline RVP standards of 9.0 psi or 7.8 psi (depending on the state, the month, and the area's initial ozone attainment designation with respect to the 1-hour ozone NAAQS.)

The 1990 CAA Amendments established a new section 211(h) to address fuel volatility. CAA section 211(h) requires the EPA to promulgate regulations making it unlawful to sell, offer for sale, dispense, supply, offer for supply, transport, or introduce into commerce gasoline with an RVP level in excess of 9.0 psi during the high ozone season. CAA section 211(h) also prohibits the EPA from establishing a volatility standard more stringent than 9.0 psi in an attainment area, except that the EPA may impose a lower (more stringent) standard in any former ozone nonattainment area redesignated to attainment.

On December 12, 1991 (56 FR 64704), the EPA modified the Phase II volatility regulations to be consistent with CAA section 211(h). The modified regulations prohibited the sale of gasoline with an RVP above 9.0 psi in all areas designated attainment for ozone, effective January 13, 1992. For areas designated as nonattainment, the regulations retained the original Phase II standards published on June 11, 1990 (55 FR 23658), which included the 7.8 psi ozone season limitation for certain areas. As stated in the preamble to the Phase II volatility controls and reiterated in the proposed change to the volatility standards published in 1991, the EPA will rely on states to initiate changes to their respective volatility programs. The EPA's policy for approving such changes is described below in Section IV. of this action.

The state of North Carolina has initiated this change by requesting that the EPA relax the 7.8 psi gasoline RVP standard to 9.0 psi for Mecklenburg and Gaston counties, which are subject to the 7.8 gasoline RVP requirement during the summertime ozone season. Accordingly, the state of North Carolina provided a technical demonstration showing that relaxing the federal gasoline RVP requirements in the two counties from 7.8 psi to 9.0 psi would not interfere with maintenance of the NAAQS in the Charlotte area or with any other applicable CAA requirement.

IV. The EPA's Policy Regarding Relaxation of Gasoline Volatility Standards in Ozone Nonattainment Areas That Are Redesignated as Attainment Areas

As stated in the preamble for the EPA's amended Phase II volatility standards (56 FR 64706), any change in the volatility standard for a nonattainment area that was subsequently redesignated as an attainment area must be accomplished through a separate rulemaking that revises the applicable standard for that area. Thus, for former 1-hour ozone nonattainment areas where the EPA mandated a Phase II volatility standard of 7.8 psi RVP in the December 12, 1991 rulemaking, the federal 7.8 psi RVP gasoline requirement remains in effect, even after such an area is redesignated to attainment, until a separate rulemaking is completed that relaxes the federal RVP gasoline standard in that area from 7.8 psi to 9.0 psi.

As explained in the December 12, 1991 rulemaking, the EPA believes that relaxation of an applicable gasoline RVP standard is best accomplished in conjunction with the redesignation process. In order for an ozone nonattainment area to be redesignated as an attainment area, CAA section 107(d)(3) requires the state to make a showing, pursuant to CAA section 175A, that the area is capable of maintaining attainment for the ozone NAAQS for ten years. Depending on the area's circumstances, this maintenance plan will either demonstrate that the area is capable of maintaining attainment for ten years without the more stringent gasoline volatility standard or that the more stringent gasoline volatility standard may be necessary for the area to maintain its attainment with the ozone NAAQS. Therefore, in the context of a request for redesignation, the EPA will not relax the gasoline volatility standard unless the state requests a relaxation and the maintenance plan demonstrates to the satisfaction of the EPA that the area will maintain attainment for ten years without the need for the more stringent volatility standard.

North Carolina requested relaxation of the federal RVP gasoline standard from 7.8 psi to 9.0 psi for Mecklenburg and Gaston counties concurrent with its request that the EPA approve a redesignation request and maintenance plan for the Charlotte area for the 2008 ozone NAAQS.

V. North Carolina's Request To Relax the Federal Gasoline RVP Requirement for Mecklenburg and Gaston Counties

On March 11, 2015, the state of North Carolina, through the North Carolina Department of Environment and Natural Resources (NCDENR), submitted a redesignation request and maintenance plan for the Charlotte area, which was classified as Marginal for the 2008 ozone NAAQS. Mecklenburg and Gaston counties are part of the Charlotte area. Additionally, the state submitted a CAA section 110(l) non-interference demonstration that removal of the federal RVP requirement of 7.8 psi for gasoline during the summertime ozone season in Mecklenburg and Gaston counties would not interfere with maintenance of any NAAQS, including the 2008 ozone NAAQS. Specifically, the state provided a technical demonstration showing that relaxing the federal gasoline RVP requirement in the two counties from 7.8 psi to 9.0 psi would not interfere with maintenance of the ozone NAAQS in the Charlotte area or with any other applicable requirement of the CAA.

In a rulemaking that was signed on July 17, 2015, the EPA evaluated and approved North Carolina's March 11, 2015 redesignation request and maintenance plan for the Charlotte area. See Docket ID. No. EPA–R04–OAR–2015–0275. In a separate rulemaking signed on July 17, 2015, the EPA approved North Carolina's non-interference demonstration for Mecklenburg and Gaston counties. See Docket ID. No. EPA–R04–OAR–2015–0260.[2]

Both rulemakings were subject to public notice-and-comment. The EPA received two comments on the redesignation request and maintenance plan rulemaking, and those comments were addressed in the final rule for that rulemaking. The comments received can be found in the docket for that rulemaking (Docket ID. No. EPA–R04–OAR–2015–0275). No comments were received on the non-interference demonstration for Mecklenburg and Gaston counties (Docket ID. No. EPA–R04–OAR–2015–0260).

In this action, the EPA is taking the second and final step in the process to approve North Carolina's request to relax the summertime ozone season gasoline RVP standard for Mecklenburg and Gaston counties from 7.8 psi to 9.0 psi. Specifically, the EPA is amending the applicable gasoline RVP standard from 7.8 psi to 9.0 psi provided at 40 CFR 80.27(a)(2) for the two counties. This action to approve North Carolina's request to relax the summertime ozone season RVP standard for Mecklenburg and Gaston counties from 7.8 psi to 9.0 psi is based on the EPA's previous approval of North Carolina's March 11, 2015 redesignation request and maintenance plan for the Charlotte area, as well as the non-interference demonstration. This approval is also based on the fact that the Charlotte area is currently in attainment for both the 1997 ozone NAAQS and the 2008 ozone NAAQS.

[2] On March 11, 2015, the NCDENR requested that the EPA parallel process the approval of the submission.

VI. Final Action

The EPA is taking direct final action to approve the request from North Carolina for the EPA to relax the RVP applicable to gasoline introduced into commerce from June 1 to September 15 of each year in Mecklenburg and Gaston counties. Specifically, this action amends the applicable gasoline RVP standard from 7.8 psi to 9.0 psi provided at 40 CFR 80.27(a)(2) for Mecklenburg and Gaston counties.

The EPA is making this revision without prior proposal because the EPA views the revision as noncontroversial and anticipates no adverse comment. However, in the Proposed Rules section of this **Federal Register**, the EPA is publishing a separate document that will serve as the proposal to approve this revision to the gasoline RVP standard that applies in Mecklenburg and Gaston counties should adverse comments be filed. This rule will become effective October 16, 2015 without further notice unless the EPA receives adverse comments by September 16, 2015.

If the EPA receives adverse comments on the rule or any portion of the rule, the EPA will withdraw the direct final rule or the portion of the rule that received adverse comment. The EPA will publish a timely withdrawal in the **Federal Register** indicating which provisions will become effective and which provisions are being withdrawn. All public comments received will then be addressed in a subsequent final rule based on the proposed rule. The EPA will not institute a second comment period on the subsequent final action. Any parties interested in commenting must do so at this time. If no such comments are received, the public is advised that this rule will become effective on October 16, 2015 and no further action will be taken on the proposed rule.

VII. Statutory and Executive Order Reviews

A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

This action is not a ''significant regulatory action'' under the terms of Executive Order 12866 (58 FR 51735, October 4, 1993) and is therefore not subject to review under Executive Orders 12866 and 13563. (76 FR 3821, January 21, 2011).

B. Paperwork Reduction Act

This action does not impose any new information collection burden under the provisions of the *Paperwork Reduction Act,* 44 U.S.C. 3501 *et seq.,* and therefore is not subject to these requirements.

C. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. In making this determination, the impact of concern is any significant adverse economic impact on small entities. An agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, has no net burden or otherwise has a positive economic effect on the small entities subject to the rule. The small entities subject to the requirements of this action are refiners, importers or blenders of gasoline that choose to produce or import low RVP gasoline for sale in North Carolina and gasoline distributers and retail stations in North Carolina. This action relaxes the federal RVP standard for gasoline sold in Mecklenburg and Gaston counties during the summertime ozone season (June 1 to September 15 of each year) to allow the RVP for gasoline sold in Mecklenburg and Gaston counties to rise from 7.8 psi to 9.0 psi. This rule does not impose any requirements or create impacts on small entities beyond those, if any, already required by or resulting from the CAA section 211(h) Volatility Control program. We have therefore concluded that this action will have no net regulatory burden for all directly regulated small entities.

D. Unfunded Mandates Reform Act (UMRA)

This final rule does not contain an unfunded mandate of $100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action implements mandates specifically and explicitly set forth in CAA section 211(h) without the exercise of any policy discretion by the EPA.

E. Executive Order 13132 (Federalism)

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

F. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000). This final rule affects only those refiners, importers or blenders of gasoline that choose to produce or import low RVP gasoline for sale in the Birmingham area and gasoline distributers and retail stations in the Birmingham area. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045: Protection of Children From Environmental Health and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of ''covered regulatory action'' in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it approves a state program.

H. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not subject to Executive Order 13211 because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer Advancement Act

This action does not involve technical standards.

J. Executive Order 12898: Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes the human health or environmental risk addressed by this action will *not* have potential disproportionately high and adverse human health or environmental effects on minority, low-income or indigenous populations because it does not affect the applicable ozone NAAQS which establish the level of protection provided to human health or the environment. This rule will relax the applicable volatility standard of gasoline during the summer, possibly resulting in slightly higher mobile source emissions. However, the state of North Carolina has demonstrated in its non-interference demonstration that this action will not interfere with maintenance of the ozone NAAQS in the Charlotte-Gastonia-Salisbury, North Carolina 2008 ozone area, or with any other applicable requirement of the CAA. Mecklenburg and Gaston counties are part of the Charlotte-Gastonia-Salisbury, North Carolina 2008 ozone area. Therefore, disproportionately high and adverse human health or environmental effects on minority or low-income populations are not an anticipated result. The results of this evaluation are contained in Section V. of this direct final rule. A copy of North Carolina's March 11, 2015 letter requesting that the EPA relax the gasoline RVP standard, including the technical analysis demonstrating that the less stringent gasoline RVP in the Mecklenburg and Gaston counties would not interfere with continued maintenance of the 2008 ozone NAAQS in the Charlotte-Gastonia-Salisbury, North Carolina ozone area, or with any other applicable CAA requirement, has been placed in the public docket for this action.

K. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

L. Petitions for Judicial Review

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by September 16, 2015. Filing a petition for reconsideration by the Administrator of this direct final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel document of proposed rulemaking for this action published in the Proposed Rules section of this **Federal Register**, rather than file an immediate petition

for judicial review of this direct final rule, so that the EPA can withdraw this direct final rule and address the comment in the proposed rulemaking. This action may not be challenged later in proceedings to enforce its requirements. See CAA section 307(b)(2).

VIII. Legal Authority and Statutory Provisions

The statutory authority for this action is granted to the EPA by Sections 211(h) and 301(a) of the Clean Air Act, as amended; 42 U.S.C. 7545(h) and 7601(a).

List of Subjects in 40 CFR Part 80

Environmental protection, Administrative practice and procedures, Air pollution control, Fuel additives, Gasoline, Motor vehicle and motor vehicle engines, Motor vehicle pollution, Penalties, Reporting and recordkeeping requirements.

Dated: August 5, 2015.

Gina McCarthy,

Administrator.

For the reasons discussed in the preamble, the Environmental Protection Agency is amending 40 CFR part 80 as follows:

PART 80—REGULATION OF FUELS AND FUEL ADDITIVES

■ 1. The authority citation for part 80 continues to read as follows:

Authority: 42 U.S.C. 7414, 7521, 7542, 7545, and 7601(a).

■ 2. In § 80.27(a)(2)(ii), the table is amended by:

■ a. Removing the entry for North Carolina and footnotes 6 and 7;

■ b. Redesignating footnote 8 as footnote 6;

■ c. Adding a new entry in alphabetical order for North Carolina and a new footnote 7.

The additions read as follows:

§ 80.27 Controls and prohibitions on gasoline volatility.

(a) * * *

(2) * * *

(ii) * * *

APPLICABLE STANDARDS[1] 1992 AND SUBSEQUENT YEARS

State	May	June	July	August	September
* * *	*	*	*	*	
North Carolina[7]	9.0	9.0	9.0	9.0	9.0
* * *	*	*	*	*	

[1] Standards are expressed in pounds per square inch (psi).

* * * * * * *

[7] The standard for Mecklenburg and Gaston Counties from June 1 until September 15 in 1992 through October 16, 2015 was 7.8 psi.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 180

[EPA–HQ–OPP–2015–0017; FRL–9930–16]

Lavandulyl Senecioate; Exemption From the Requirement of a Tolerance

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This regulation establishes an exemption from the requirement of a tolerance for residues of the arthropod pheromone, lavandulyl senecioate, in or on all raw agricultural commodities when applied or used in microbeads/dispensers at a rate not to exceed 150 grams active ingredient/acre/year in accordance with good agricultural practices. Suterra, LLC submitted a petition to EPA under the Federal Food, Drug, and Cosmetic Act (FFDCA), requesting an exemption from the requirement of a tolerance. This regulation eliminates the need to establish a maximum permissible level for residues of lavandulyl senecioate.

DATES: This regulation is effective August 17, 2015. Objections and requests for hearings must be received on or before October 16, 2015, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

ADDRESSES: The docket for this action, identified by docket identification (ID) number EPA–HQ–OPP–2015–0017, is available at *http://www.regulations.gov* or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460–0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566–1744, and the telephone number for the OPP Docket is (703) 305–5805. Please review the visitor instructions and additional information about the docket available at *http://www.epa.gov/dockets.*

FOR FURTHER INFORMATION CONTACT: Robert McNally, Biopesticides and Pollution Prevention Division (7511P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001; main telephone number: (703) 305–7090; email address: *BPPDFRNotices@epa.gov.*

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

B. How can I get electronic access to other related information?

You may access a frequently updated electronic version of 40 CFR part 180 through the Government Printing Office's e-CFR site at *http://*

www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl.

C. How can I file an objection or hearing request?

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA–HQ–OPP–2015–0017 in the subject line on the first page of your submission. All objections and requests for a hearing must be in writing, and must be received by the Hearing Clerk on or before October 16, 2015. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA–HQ–OPP–2015–0017, by one of the following methods:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.
- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460–0001.
- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at *http://www.epa.gov/dockets/contacts.html.*

Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at *http://www.epa.gov/dockets.*

II. Background and Statutory Findings

In the **Federal Register** of March 4, 2015 (80 FR 11611) (FRL–9922–68), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide tolerance petition (PP 4F8292) by Suterra, LLC, 20950 NE Talus Place, Bend, OR 97701. The petition requested that 40 CFR part 180 be amended by establishing an exemption from the requirement of a tolerance for residues of lavandulyl senecioate in or on all raw agricultural commodities when applied to growing crops at a rate not to exceed 150 grams of active ingredient per acre per year. That document referenced a summary of the petition prepared by the petitioner Suterra, LLC, which is available in the docket via *http://www.regulations.gov.* No comments were received on the notice of filing.

Section 408(c)(2)(A)(i) of FFDCA allows EPA to establish an exemption from the requirement for a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the exemption is ''safe.'' Section 408(c)(2)(A)(ii) of FFDCA defines ''safe'' to mean that ''there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information.'' This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Pursuant to FFDCA section 408(c)(2)(B), in establishing or maintaining in effect an exemption from the requirement of a tolerance, EPA must take into account the factors set forth in FFDCA section 408(b)(2)(C), which require EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to ''ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . .'' Additionally, FFDCA section 408(b)(2)(D) requires that the Agency consider ''available information concerning the cumulative effects of a particular pesticide's residues'' and ''other substances that have a common mechanism of toxicity.''

EPA performs a number of analyses to determine the risks from aggregate exposure to pesticide residues. First, EPA determines the toxicity of pesticides. Second, EPA examines exposure to the pesticide through food, drinking water, and through other exposures that occur as a result of pesticide use in residential settings.

III. Toxicological Profile

Consistent with FFDCA section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action and considered its validity, completeness and reliability, and the relationship of this information to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children.

A. Overview of Lavandulyl Senecioate

Lavandulyl senecioate (5-methyl-2-(1-methylethenyl)-4-hexenyl 3-methyl-2-butonate) is a technical grade synthetic arthropod pheromone. This arthropod pheromone is structurally similar to and mimics a naturally occurring pheromone produced by the female vine mealybug (*Planococcus ficus*) to attract males for mating. This pheromone is used to disrupt the normal mating cycle of the vine mealybug and has a non-toxic mode of action.

As an arthropod pheromone, lavandulyl senecioate is exempt from the requirement of a tolerance when used in retrievably sized polymeric matrix dispensers in or on all raw agricultural commodities when applied to growing crops only at a rate not to exceed 150 grams active ingredient/acre/year in accordance with good agricultural practices (40 CFR 180.1124). The petitioner is requesting to apply this arthropod pheromone in an aqueous suspension of micro-bead/dispensers via normal spray equipment; therefore, the proposed new use of lavandulyl senecioate is not covered under the existing tolerance exemption listed in 40 CFR 180.1124. See the document entitled, ''Federal Food, Drug, and Cosmetic Act (FFDCA) Considerations for Lavandulyl Senecioate'' (June 30, 2015), available in the docket for this action.

B. Biochemical Pesticide Toxicology Data Requirements

All applicable mammalian toxicology data requirements supporting the petition to exempt residues of the arthropod pheromone, lavandulyl senecioate, from the requirement of a tolerance in or on all raw agricultural commodities when applied or used in microbeads/dispensers at a rate not to exceed 150 grams active ingredient/acre/year have been fulfilled. No significant toxicological effects were observed in any of the acute toxicity studies. Three mutagenicity studies submitted indicate that lavandulyl senecioate is not a mutagen. There are no known effects on endocrine systems via oral, dermal, or inhalation routes of exposure.

In the preamble to the final rule that exempted arthropod pheromones from the requirement of a tolerance when used in retrievably sized polymeric matrix dispensers, the Agency indicated that it did not have a toxicology

database for arthropod pheromones that addressed the potential risk of repeated, direct dietary exposure with sprayable formulations; therefore, at that time, the Agency limited the tolerance exemption to arthropod pheromones used in retrievably sized polymeric matrix dispensers with an annual rate limitation of 150 grams of active ingredient per acre. The Agency concluded that the limitations would not result in dietary exposure any greater than what may be found naturally as a result of heavy infestations of the pest arthropod. March 30, 1994 (59 FR 14757) (FRL–4761–9).

To address the subchronic and prenatal developmental toxicity data requirements for this exemption from the requirement of a tolerance for this arthropod pheromone, lavandulyl senecioate, the petitioner submitted scientific rationales that demonstrate that it is highly unlikely that there will be significant repeated exposure, including dietary exposure and exposure to female humans, to this pheromone when used as proposed based on the extremely low application rate, low emission rate, rapid volatilization after emission from the microbeads, and rapid biodegradation. Taking into account the petitioner's rationale, EPA has concluded that there is unlikely to be exposure that could result in subchronic and developmental effects and so has waived the requirements for subchronic and prenatal developmental testing.

For a full discussion of the data and rationale upon which EPA relied, and its human health risk assessment based on that data and rationale, please refer to the document entitled, ''Federal Food, Drug, and Cosmetic Act (FFDCA) Considerations for Lavandulyl Senecioate'' (June 30, 2015). This document, as well as other relevant information, is available in the docket for this action as described under **ADDRESSES**.

IV. Aggregate Exposures

In examining aggregate exposure, FFDCA section 408 directs EPA to consider available information concerning exposures from the pesticide residue in food and all other non-occupational exposures, including drinking water from ground water or surface water and exposure through pesticide use in gardens, lawns, or buildings (residential and other indoor uses).

A. Dietary Exposure

In the preamble to the final rule, the Agency stated that limiting the exemption to applications of arthropod pheromones in retrievably sized dispensers would severely limit the possibility of direct dietary exposure. The Agency believed that restriction was necessary to protect public health due to a lack of data on repeat exposure but acknowledged that petitioners wanting to use other application methods or formulations could petition for an amendment by demonstrating that the new formulation did not increase the likely dietary exposure. For this tolerance exemption, based on the petitioner's submission concerning the proposed use, the Agency has determined that the proposed use (applying this arthropod pheromone in an aqueous suspension of microbead/dispensers via normal spray equipment with a limitation of 150 grams active ingredient/acre/year) will not result in detectable residues in or on all food commodities. That use is unlikely to result in significant dietary exposure to lavandulyl senecioate based on the extremely low application rate, low emission rate, rapid volatilization after emission from the microbeads, and rapid biodegradation (see document entitled, ''Federal Food, Drug, and Cosmetic Act (FFDCA) Considerations for Lavandulyl Senecioate'' (June 30, 2015), available in the docket for this action). No significant exposure via drinking water is expected based on the previous information for dietary exposure and the fact that the arthropod pheromone is not to be applied directly to water. However, should any dietary and/or drinking water exposure occur, minimal to no risk is expected for the general population, including infants and children, due to the low toxicity of lavandulyl senecioate as demonstrated in the data submitted and evaluated by the Agency, as fully explained in the document entitled, ''Federal Food, Drug, and Cosmetic Act (FFDCA) Considerations for Lavandulyl Senecioate'' (June 30, 2015), available in the docket for this action.

B. Other Non-Occupational Exposure

Other non-occupational exposure (other than dietary) is not expected because the arthropod pheromone, lavandulyl senecioate, is not approved for residential uses.

V. Cumulative Effects From Substances With a Common Mechanism of Toxicity

Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider ''available information'' concerning the cumulative effects of a particular pesticide's residues and ''other substances that have a common mechanism of toxicity.''

EPA has not found lavandulyl senecioate to share a common mechanism of toxicity with any other substances, and lavandulyl senecioate does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has assumed that lavandulyl senecioate does not have a common mechanism of toxicity with other substances. For information regarding EPA's efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA's Web site at *http://www.epa.gov/pesticides/cumulative.*

VI. Determination of Safety for U.S. Population, Infants and Children

FFDCA section 408(b)(2)(C) provides that, in considering the establishment of a tolerance or tolerance exemption for a pesticide chemical residue, EPA shall assess the available information about consumption patterns among infants and children, special susceptibility of infants and children to pesticide chemical residues, and the cumulative effects on infants and children of the residues and other substances with a common mechanism of toxicity. In addition, FFDCA section 408(b)(2)(C) provides that EPA shall apply an additional tenfold (10X) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure, unless EPA determines that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the Food Quality Protection Act Safety Factor. In applying this provision, EPA either retains the default value of 10X, or uses a different additional or no safety factor when reliable data are available to support a different additional or no safety factor.

As part of its qualitative assessment, EPA evaluated the available toxicity and exposure data on lavandulyl senecioate and considered its validity, completeness, and reliability, as well as the relationship of this information to human risk. EPA considers the toxicity database to be complete and has identified no residual uncertainty with regard to prenatal and postnatal toxicity or exposure. No hazard was identified based on the available studies, as fully explained in the document entitled, ''Federal Food, Drug, and Cosmetic Act (FFDCA) Considerations for Lavandulyl

Senecioate'' (June 30, 2015), available in the docket for this action. Based upon its evaluation, EPA concludes that there are no threshold effects of concern to infants or children when lavandulyl senecioate is applied or used in microbeads/dispensers in or on all raw agricultural commodities at a rate not to exceed 150 grams active ingredient/acre/year. As a result, EPA concludes that no additional margin of exposure (safety) is necessary.

Based on the available data, EPA determines that there is a reasonable certainty that no harm will result from aggregate exposure to lavandulyl senecioate to the general U.S. population, including infants and children when applied to growing crops using microbeads/dispensers at a rate not to exceed 150 grams active ingredient/acre/year. EPA concludes that an exemption from the requirement of a tolerance for residues of lavandulyl senecioate in or on raw agricultural commodities when applied to growing crops using microbeads/dispensers at a rate not to exceed 150 grams active ingredient/acre/year is safe.

VII. Other Considerations

A. Analytical Enforcement Methodology

An analytical method is not required for enforcement purposes since the Agency is establishing an exemption from the requirement of a tolerance without any numerical limitation.

VIII. Conclusions

Therefore, an exemption is established for residues of the arthropod pheromone, lavandulyl senecioate, in or on all raw agricultural commodities when applied or used in microbeads/dispensers at a rate not to exceed 150 grams active ingredient/acre/year.

IX. Statutory and Executive Order Reviews

This action establishes an exemption from the requirement of a tolerance under FFDCA section 408(d) in response to a petition submitted to the Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled ''Regulatory Planning and Review'' (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use'' (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled ''Protection of Children from Environmental Health Risks and Safety Risks'' (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA), 44 U.S.C. 3501 *et seq.,* nor does it require any special considerations under Executive Order 12898, entitled ''Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations'' (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the exemption in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled ''Consultation and Coordination with Indian Tribal Governments'' (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

X. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a ''major rule'' as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 180

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: July 31, 2015.

Robert McNally,

Director, Biopesticides and Pollution Prevention Division.

Therefore, 40 CFR chapter I is amended as follows:

PART 180—[AMENDED]

■ 1. The authority citation for part 180 continues to read as follows:

Authority: 21 U.S.C. 321(q), 346a and 371.

■ 2. Add § 180.1332 to subpart D to read as follows:

§ 180.1332 Lavandulyl senecioate; exemption from the requirement of a tolerance.

An exemption from the requirement of a tolerance is established for residues of the arthropod pheromone, lavandulyl senecioate (5-methyl-2-(1-methylethenyl)-4-hexenyl 3-methyl-2-butonate), in or on all raw agricultural commodities when applied or used in microbeads/dispensers at a rate not to exceed 150 grams active ingredient/acre/year in accordance with good agricultural practices.

BILLING CODE 6560–50–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 120109034–2171–01]

RIN 0648–XE094

Fisheries of the Northeastern United States; Small-Mesh Multispecies Fishery; Adjustment to the Northern Red Hake Inseason Possession Limit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; inseason adjustment.

SUMMARY: We announce the reduction of the commercial possession limit for northern red hake for the remainder of the 2015 fishing year. This action is

required to prevent the northern red hake total allowable landing limit from being exceeded. This announcement informs the public that the northern red hake possession limit is reduced.

DATES: Effective August 12, 2015 through April, 30, 2016.

FOR FURTHER INFORMATION CONTACT: Reid Lichwell, Fishery Management Specialist, 978–675–9112.

SUPPLEMENTARY INFORMATION: The small-mesh multispecies fishery is managed primarily through a series of exemptions from the Northeast Multispecies Fisheries Management Plan. Regulations governing the red hake fishery are found at 50 CFR part 648. The regulations describing the process to adjust inseason commercial possession limits of northern red hake are described in § 648.86(d)(4) and (5). These regulations require the Regional Administrator to reduce the northern red hake possession limit from 3,000 lb (1,361 kg) to 1,500 lb (680 kg) when landings have been projected to reach or exceed 45 percent of the total allowable landings (TAL). The northern red hake possession limit is required to be further reduced to 400 lb (181 kg) if landings are projected to reach or exceed 62.5 percent of the TAL, unless such a reduction would be expected to prevent the TAL from being reached. The setting of these inseason adjustment thresholds were established in the final rule implementing the small-mesh multispecies specifications for 2015–2017, published in the **Federal Register** on May 28, 2015 (80 FR 30379).

These measures were imposed because the annual catch limits (ACL) for northern red hake were exceeded for the 2012 and 2013 fishing years, and northern red hake was experiencing overfishing. To reduce the risk of continued overfishing on the stock and to better constrain catch to the ACL, we implemented this possession limit reduction trigger.

Based on commercial landings data reported through July 30, 2015, the northern red hake fishery is projected to reach 45 percent of the TAL on August 10, 2015. Based on this projection, reducing the commercial northern red hake possession limit to 1,500 lb (680 kg) is required to prevent the TAL from being exceeded. Upon the effective date of this action, no person may possess on board or land more than 1,500 lb (680 kg) of northern red hake, per trip for the remainder of the fishing year.

Classification

This action is taken under 50 CFR part 648 and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 12, 2015.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Proposed Rules

Federal Register
Vol. 80, No. 158
Monday, August 17, 2015

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 950

RIN 3206–AM68

Solicitation of Federal Civilian and Uniformed Service Personnel for Contributions to Private Voluntary Organizations; Delay of Effective Date and Addition of Comment Period

AGENCY: Office of Personnel Management.

ACTION: Proposed rule with request for comments.

SUMMARY: The U.S. Office of Personnel Management (OPM) is issuing a proposed rule to delay the effective date that appeared in the final rule published in the **Federal Register** on April 17, 2014 titled ''Solicitation of Federal Civilian and Uniformed Service Personnel for Contributions to Private Voluntary Organizations'' to January 1, 2017. OPM is requesting comments on the proposed rule.

DATES: OPM must receive comments on or before September 16, 2015.

ADDRESSES: You may submit comments, identified by RIN number ''3206–AM68'', using the Federal eRulemaking Portal: *www.regulations.gov.* Follow the instructions for submitting comments.

FOR FURTHER INFORMATION CONTACT: Mary Capule by telephone at (202) 606–2564; by FAX at (202) 606–5056; or by email at *cfc@opm.gov.*

SUPPLEMENTARY INFORMATION: OPM proposes to delay the effective date of the final rule entitled ''Solicitation of Federal Civilian and Uniformed Service Personnel for Contributions to Private Voluntary Organizations'' (FR Doc. 2014–08574, in the **Federal Register** of April 17, 2014 (79 FR 21581)), to January 1, 2017. The new effective date for the CFC regulations would ensure that the tools needed to put these reforms in place—including the pivotal online charity application and donor pledging systems—are thoroughly tested and fully operational before being made available to charities and donors.

U.S. Office of Personnel Management.

Beth F. Cobert,

Acting Director.

FEDERAL RETIREMENT THRIFT INVESTMENT BOARD

5 CFR Part 1605

Default Investment Fund Errors

AGENCY: Federal Retirement Thrift Investment Board

ACTION: Proposed rule with request for comments.

SUMMARY: The Federal Retirement Thrift Investment Board (Agency) proposes to amend its regulations to codify procedures for correcting certain default investment fund errors.

DATES: Submit comments on or before September 16, 2015.

ADDRESSES: You may submit comments using one of the following methods:

- *Federal Rulemaking Portal: http://www.regulations.gov* at Docket ID number FRTIB–2015–0003. Follow the instructions for submitting comments.
- *Mail:* Office of General Counsel, Attn: James Petrick, Federal Retirement Thrift Investment Board, 77 K Street NE., Suite 1000, Washington, DC 20002.
- *Hand Delivery/Courier:* The address for sending comments by hand delivery or courier is the same as that for submitting comments by mail.
- *Facsimile:* Comments may be submitted by facsimile at (202) 942–1676.

The most helpful comments explain the reason for any recommended change and include data, information, and the authority that supports the recommended change.

FOR FURTHER INFORMATION CONTACT: Austen Townsend at (202) 864–8647.

SUPPLEMENTARY INFORMATION: The Agency administers the Thrift Savings Plan (TSP), which was established by the Federal Employees' Retirement System Act of 1986 (FERSA), Public Law 99–335, 100 Stat. 514. The TSP provisions of FERSA are codified, as amended, largely at 5 U.S.C. 8351 and 8401–79. The TSP is a tax-deferred retirement savings plan for Federal civilian employees, members of the uniformed services, and spouse beneficiaries. The TSP is similar to cash or deferred arrangements established for private-sector employees under section 401(k) of the Internal Revenue Code (26 U.S.C. 401(k)).

On December 18, 2014, the President signed the Smart Savings Act (''the Act''), Public Law 113–255 (128 Stat. 2920). The Act directed the Agency to invest any sums available for investment in the TSP for which an election has not been made in an age-appropriate target date asset allocation investment fund. On July 13, 2015, the Agency published a proposed rule to change the TSP's default investment fund from the TSP's Government Securities Investment Fund to the age-appropriate TSP Lifecycle Fund (L Fund) for civilian employees. 80 FR 39974. This proposed regulation would update the TSP's existing error correction rules to address the correction of default investment fund errors caused by erroneous dates of birth.

Default Investment Fund Errors

Erroneous dates of birth can result from participant error, employing agency error, Agency error, or record-keeper error. A participant's date of birth is used to determine his or her age-appropriate L Fund. An erroneous date of birth might therefore cause a participant's TSP account to be invested in an L Fund that is different from the L Fund his or her account would have been invested in had the participant's correct date of birth been used. This proposed regulation provides that the Agency will pay breakage when an erroneous date of birth caused by Agency or record-keeper error results in default investment in the wrong L Fund.

In addition, the Agency will charge employing agencies breakage when an erroneous date of birth caused by employing agency error results in default investment in the wrong L Fund. To initiate a breakage calculation for an employee, the employing agency must notify the TSP that the participant is entitled to breakage. A date of birth change received from an employing agency will not trigger corrective action other than to update the date of birth.

Consistent with the existing error correction procedures at 5 CFR 1605.22 for contribution allocation and interfund transfer errors, the participant

must file a breakage claim within 30 days of either the date the TSP provides the participant with a notice reflecting the error or the date the TSP makes available on its Web site a participant statement reflecting the error, whichever is earlier.

Regulatory Flexibility Act

I certify that this regulation will not have a significant economic impact on a substantial number of small entities. This regulation will affect Federal civilian employees and spouse beneficiaries who participate in the Thrift Savings Plan, which is a Federal defined contribution retirement savings plan created under the Federal Employees' Retirement System Act of 1986 (FERSA), Public Law 99–335, 100 Stat. 514, and which is administered by the Agency.

Paperwork Reduction Act

I certify that these regulations do not require additional reporting under the criteria of the Paperwork Reduction Act.

Unfunded Mandates Reform Act of 1995

Pursuant to the Unfunded Mandates Reform Act of 1995, 2 U.S.C. 602, 632, 653, 1501–1571, the effects of this regulation on state, local, and tribal governments and the private sector have been assessed. This regulation will not compel the expenditure in any one year of $100 million or more by state, local, and tribal governments, in the aggregate, or by the private sector. Therefore, a statement under section 1532 is not required.

List of Subjects in 5 CFR Part 1605

Government employees, Pensions, Retirement.

Gregory T. Long,

Executive Director, Federal Retirement Thrift Investment Board.

For the reasons stated in the preamble, the Agency proposes to amend 5 CFR chapter VI as follows:

PART 1605–CORRECTION OF ADMINISTRATIVE ERRORS

■ 1. The authority citation for part 1605 continues to read as follows:

Authority: 5 U.S.C. 8351, 8432(a), 8432(d), 8474(b)(5) and (c)(1). Subpart B also issued under section 1043(b) of Public Law 104–106, 110 Stat. 186 and § 7202(m)(2) of Public Law 101–508, 104 Stat. 1388.

■ 2. Amend § 1605.2 by revising the heading and paragraphs (b)(1)(i) and (c) to read as follows:

§ 1605.2 Calculating, posting, and charging breakage on late contributions and loan payments.

* * * * *

(b) * * *

(1) * * *

(i) Use the participant's contribution allocation on file for the ''as of'' date to determine how the funds would have been invested. If there is no contribution allocation on file, or one cannot be derived based on the investment of contributions, the TSP will consider the funds to have been invested in the default investment fund in effect for the participant on the ''as of'' date.

* * * * *

(c) *Posting contributions and loan payments.* Makeup and late contributions, late loan payments, and breakage, will be posted to the participant's account according to his or her contribution allocation on file for the posting date. If there is no contribution allocation on file for the posting date, they will be posted to the default investment fund in effect for the participant.

* * * * *

■ 3. Add § 1605.3 to read as follows:

§ 1605.3 Calculating, posting, and charging breakage on errors involving investment in the wrong fund.

(a) The TSP will calculate and post breakage on date of birth errors that result in default investment in the wrong L Fund, contribution allocation errors, and interfund transfer errors.

(b) The TSP will charge the employing agency for positive breakage on incorrect dates of birth caused by employing agency error that result in default investment in the wrong L Fund. A date of birth change received from an employing agency will not trigger corrective action other than to update the date of birth. To initiate a breakage calculation for an employee, the employing agency must notify the TSP that the participant is entitled to breakage.

■ 4. Amend § 1605.13 by revising paragraph (a)(3) to read as follows:

§ 1605.13 Back pay awards and other retroactive pay adjustments.

(a) * * *

(3) All contributions made under this paragraph (a) and associated breakage will be invested according to the participant's contribution allocation on the posting date. Breakage will be calculated using the share prices for the default investment fund in effect for the participant in accordance with § 1605.2 unless otherwise required by the employing agency or the court or other tribunal with jurisdiction over the back pay case.

* * * * *

■ 5. Amend § 1605.16, by re-designating the text of paragraph (a) as paragraph (a)(1), adding paragraph (a)(2), re-designating the text of paragraph (b) as paragraph (b)(1), and adding paragraphs (b)(2) and (b)(3) to read as follows:

§ 1605.16 Claims for correction of employing agency errors; time limitations.

(a) *Agency's discovery of error.* (1) Upon discovery of an error made within the past six months involving the correct or timely remittance of payments to the TSP (other than a retirement system misclassification error, as covered in paragraph (c) of this section), an employing agency must promptly correct the error on its own initiative. If the error was made more than six months before it was discovered, the agency may exercise sound discretion in deciding whether to correct it, but, in any event, the agency must act promptly in doing so.

(2) For errors involving incorrect dates of birth caused by employing agency error that result in default investment in the wrong L Fund, the employing agency must promptly notify the TSP that the participant is entitled to breakage if the error is discovered within 30 days of either the date the TSP provides the participant with a notice reflecting the error or the date the TSP makes available on its Web site a participant statement reflecting the error, whichever is earlier. If it is discovered after that time, the employing agency may use its sound discretion in deciding whether to pay breakage, but, in any event, must act promptly in doing so.

(b) *Participant's discovery of error.* (1) If an agency fails to discover an error of which a participant has knowledge involving the correct or timely remittance of a payment to the TSP (other than a retirement system misclassification error as covered by paragraph (c) of this section), the participant may file a claim with his or her employing agency to have the error corrected without a time limit. The agency must promptly correct any such error for which the participant files a claim within six months of its occurrence; if the participant files a claim to correct any such error after that time, the agency may do so at its sound discretion.

(2) For errors involving incorrect dates of birth that result in default investment in the wrong L Fund of which a participant or beneficiary has knowledge, he or she may file a claim for breakage with the employing agency

no later than 30 days after either the date the TSP provides the participant with a notice reflecting the error or the date the TSP makes available on its Web site a participant statement reflecting the error, whichever is earlier. The employing agency must promptly notify the TSP that the participant is entitled to breakage.

(3) If a participant or beneficiary fails to file a claim for breakage for errors involving incorrect dates of birth in a timely manner, the employing agency may nevertheless, in its sound discretion, pay breakage on any such error that is brought to its attention.

* * * * *

■ 6. Amend § 1605.22, by revising paragraphs (b)(2), (c)(2), and (c)(3) to read as follows:

§ 1605.22 Claims for correction of Board or TSP record keeper errors; time limitations.

* * * * *

(b) * * *

(1) * * *

(2) For errors involving an investment in the wrong fund caused by Board or TSP record keeper error, the Board or the TSP record keeper must promptly pay breakage if it is discovered within 30 days of the issuance of the most recent TSP participant (or loan) statement, transaction confirmation, or other notice that reflected the error, whichever is earlier. If it is discovered after that time, the Board or TSP record keeper may use its sound discretion in deciding whether to pay breakage, but, in any event, must act promptly in doing so.

(c) * * *

(1) * * *

(2) For errors involving an investment in the wrong fund of which a participant or beneficiary has knowledge, he or she may file a claim for breakage with the Board or TSP record keeper no later than 30 days after the TSP provides the participant with a transaction confirmation or other notice reflecting the error, or makes available on its Web site a participant statement reflecting the error, whichever is earlier. The Board or TSP record keeper must promptly pay breakage for such errors.

(3) If a participant or beneficiary fails to file a claim for breakage concerning an error involving an investment in the wrong fund in a timely manner, the Board or TSP record keeper may nevertheless, in its sound discretion, pay breakage for any such error that is brought to its attention.

* * * * *

■ 7. Amend § 1605.31 by revising paragraph (d) to read as follows:

§ 1605.31 Contributions missed as a result of military service.

* * * * *

(d) *Breakage.* The employee is entitled to breakage on agency contributions made under paragraph (c) of this section. The employee will elect to have the calculation based on either the contribution allocation(s) on file for the participant during the period of military service or the default investment fund in effect for the participant; the participant must make this election at the same time his or her makeup schedule is established pursuant to § 1605.11(c).

[FR Doc. 2015–20273 Filed 8–14–15; 8:45 am]

BILLING CODE 6760–01–P

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

6 CFR Part 5

[Docket No. DHS–2015–0046]

Privacy Act of 1974: Implementation of Exemptions; Department of Homeland Security DHS/CBP–001, Import Information System, System of Records, System of Records

AGENCY: Privacy Office, Department of Homeland Security.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Homeland Security is giving concurrent notice for the newly established ''Department of Homeland Security/CBP–001, Import Information System, System of Records'' and this proposed rulemaking. In accordance with the Privacy Act of 1974, the Department of Homeland Security concurrently proposes to consolidate, update, and rename two current Department of Homeland Security systems of records titled, ''Department of Homeland Security/U.S. Customs and Border Protection, DHS/CBP–001 Automated Commercial Environment/International Trade Data System System of Records'' and ''Department of Homeland Security/U.S. Customs and Border Protection, DHS/CBP–015 Automated Commercial System System of Records'' as one new system of records. The consolidated system of records notice will be titled, ''Department of Homeland Security/U.S. Customs and Border Protection, DHS/CBP–001 Import Information System System of Records.'' This system of records will continue to collect and maintain records on all commercial goods imported into the United States, as well as information pertaining to the carrier, broker, importer, and other persons associated with the manifest, import, or commercial entry transactions for the goods. In this proposed rulemaking, the Department proposes to exempt portions of the system of records from one or more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements.

DATES: Comments must be received on or before September 16, 2015.

ADDRESSES: You may submit comments, identified by docket number DHS–2015–0046, by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–343–4010.
- *Mail:* Karen L. Neuman, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

Instructions: All submissions received must include the agency name and docket number for this notice. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: For general questions, please contact: John Connors (202) 344–1610, CBP Privacy Officer, Office of the Commissioner, U.S. Customs and Border Protection, Washington, DC 20229. For privacy questions, please contact: Karen L. Neuman, (202) 343–1717, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528–0655.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS), U.S. Customs and Border Protection (CBP) proposes to consolidate, update, and rename as one system of records notice (SORN) the information currently contained in two DHS SORNs titled, ''DHS/CBP–001 Automated Commercial Environment/International Trade Data System (ACE/ITDS) System of Records'' (71 FR 3109, January 19, 2006) and ''DHS/CBP–015 Automated Commercial System (ACS) System of Records'' (73 FR 77759, December 19, 2008) . This new SORN, entitled ''DHS/CBP–001 Import Information System (IIS),'' will inform the public about changes to the

categories of individuals, categories of records, and routine uses contained in the consolidation of the former ACS and ACE/ITDS SORNs.

ACS, a decades old trade information database and information technology (IT) system, was deployed to track, control, and process all commercial goods imported into the United States. ACE, part of a multi-year modernization effort since 2001 to replace ACS, continues to be designed to manage CBP's import trade data and related transaction information. ACE/ITDS serves three sets of core stakeholders: The internal DHS/CBP users, Participating Government Agencies (PGA), and the trade community. ACE is the IT backbone for the ITDS, an interagency initiative formalized under the SAFE Port Act of 2006 to create a single window for the trade community and PGAs involved in importing and exporting. DHS/CBP has provided notice to the public and trade community that in the future, ACS, the IT system, will be fully phased out and replaced by ACE. As such, and to simplify the trade community's and the public's understanding of how trade information will be handled after ACE implementation, DHS/CBP is publishing this Import Information System (IIS) SORN to identify a single repository for import trade information. DHS/CBP is also publishing a combined ACE–ITDS/ACS Privacy Impact Assessment on its Web site (*http://www.dhs.gov/privacy*) to inform the public of the operation and inter-connectedness of the IT systems, ACS and ACE, and to assess the privacy impact of these systems using the fair information practice principles. This IIS system of records allows DHS/CBP to collect and maintain records on all commercial goods imported into the United States, along with related information about persons associated with those transactions, and manifest information.

As part of this consolidation and issuance of IIS, the category of individuals and category of records sections in the former ACS and ACE–ITDS have been merged to account for the data in both IT systems, as well as paper records related to the information in these systems. The category of individuals section is amended to remove reference to DHS/CBP employees and employees of other federal agencies for purposes of maintaining their user access accounts to the ACE–ITDS Portal, because these individuals are now covered under a DHS-wide SORN, ''DHS/ALL–004 General Information Technology Access Account Records System (GITAARS) (77 FR 70792, November 27, 2012). The category of records for IIS will also include notations and results of examinations and document review for cleared merchandise to clarify and better identify DHS and PGA-generated information related to the processing of the import entry transaction. Additionally, the category of records is being expanded to address the expansion of information DHS/CBP proposes to collect on its revised Importer ID Input Record (CBP Form 5106). DHS/CBP is adding required elements for the name (First, Middle, Last) and business contact information (job title and phone) of Senior Company Officers of the Importer; DHS/CBP is also adding optional data fields on the form for the Senior Officers to provide Social Security number (SSN) or Passport Number and Country of Issuance. These latter, optional data elements are to facilitate Importer screening and verification.

The authorities sections from the previous SORNs have been combined, reconciled to address duplication, and updated to account for expanded information collected about business associations as part of the ACE–ITDS Portal user account. The purpose section for IIS reflects an update to the combined purposes for ACS and ACE–ITDS and addresses DHS/CBP's broad use of its import trade transaction IT systems (ACS and ACE) to collect and manage records to track, control, and process all commercial goods imported into the United States.

Consistent with DHS's information-sharing mission, information stored in the DHS/CBP–001 Import Information System (IIS) may be shared with other DHS Components that have a need to know the information to carry out their national security, law enforcement, immigration, or other homeland security functions. In addition, information may be shared with appropriate federal, state, local, tribal, territorial, foreign, or international government agencies consistent with the routine uses set forth in this SORN and as otherwise authorized under the Privacy Act.

Information in IIS may be shared for the same routine uses as were previously published in ACS and ACE–ITDS, and are now updated in this document:

- ACS's former Routine Use K is now reclassified as Routine Use G.
  - Routine Use G permits sharing of data under the following circumstances: ''To appropriate federal, state, local, tribal, or foreign governmental agencies or multilateral governmental organizations responsible for investigating or prosecuting the violations of, or for enforcing or implementing, a statute, rule, regulation, order, license, or treaty where DHS determines that the information would assist in the enforcement of civil or criminal laws.''
- ACE–ITDS's former Routine Use 3 is now reclassified as Routine Use K.
  - Routine Use K permits sharing of data under the following circumstances: ''To a federal, state, local, tribal, territorial, foreign, or international agency, maintaining civil, criminal or other relevant enforcement information, or other pertinent information, which has requested information relevant to or necessary to the requesting agency's or the bureau's hiring or retention of an individual, or issuance of a security clearance, license, contract, grant, or other benefit.''

Additionally, DHS/CBP is adding another routine use to IIS, Routine Use R, to provide explicit coverage for the mandated release of Manifest Information as set forth in section 1431 of title 19, United States Code and implemented through title 19, Code of Federal Regulations, part 103:

- Routine Use R permits sharing of data under the following circumstances: ''To paid subscribers, in accordance with applicable regulations, for the purpose of providing access to manifest information as set forth in 19 U.S.C. 1431.''

DHS/CBP will not assert any exemptions with regard to information provided by or on behalf of an individual. However, this data may be shared with law enforcement and/or intelligence agencies pursuant to the routine uses identified in the IIS SORN and as otherwise authorized under the Privacy Act. The Privacy Act requires that DHS maintain an accounting of such disclosures. Disclosing the fact that a law enforcement and/or intelligence agency has sought particular records may interfere with or disclose techniques and procedures related to ongoing law enforcement investigations. As such, DHS is issuing a Notice of Proposed Rulemaking to exempt this system of records from certain provisions of the Privacy Act elsewhere in the **Federal Register**. This updated system will be included in DHS's inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information practice principles in a statutory framework governing the means by which Federal Government agencies collect, maintain, use, and disseminate personally identifiable information. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of

records'' is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and non-immigrant aliens.

The Privacy Act allows government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemptions from certain requirements of the Privacy Act for DHS/CBP–001 Import Information System System of Records.

No exemption shall be asserted with respect to information maintained in the system as it relates to data submitted by or on behalf of a person who travels to visit the United States, nor shall an exemption be asserted with respect to the resulting determination (authorized to travel, not authorized to travel, pending).

Some information in DHS/CBP–001 Import Information System System of Records relates to official DHS national security, law enforcement or intelligence activities. This system may contain records or information pertaining to the accounting of disclosures made from IIS to other law enforcement or intelligence agencies (Federal, State, local, foreign, international, or tribal) in accordance with the published routine uses. For the accounting of these disclosures only, in accordance with 5 U.S.C. 552a(j)(2) and (k)(2), DHS will claim the original exemptions for these records or information from subsection (c)(3), (e)(8), and (g) of the Privacy Act of 1974, as amended, as necessary and appropriate to protect such information. Moreover, DHS will add this exemption to Appendix C to 6 CFR part 5, DHS Systems of Records Exempt from the Privacy Act. Such exempt records or information may be law enforcement or national security investigation records, law enforcement activity and encounter records, or terrorist screening records.

DHS needs these exemptions in order to protect information relating to law enforcement investigations from disclosure to subjects of investigations and others who could interfere with investigatory and law enforcement activities. Specifically, the exemptions are required to: Preclude subjects of investigations from frustrating the investigative process; avoid disclosure of investigative techniques; protect the identities and physical safety of confidential informants and of law enforcement personnel; ensure DHS's and other federal agencies' ability to obtain information from third parties and other sources; protect the privacy of third parties; and safeguard sensitive information.

Nonetheless, DHS will examine each request on a case-by-case basis, and, after conferring with the appropriate component or agency, may waive applicable exemptions in appropriate circumstances and where it would not appear to interfere with or adversely affect the law enforcement or national security investigation.

Again, DHS will not assert any exemption with respect to information maintained in the system that is collected from a person and submitted by that person's air or vessel carrier, if that person, or his or her agent, seeks access or amendment of such information.

List of Subjects in 6 CFR Part 5

Freedom of information, Privacy.

For the reasons stated in the preamble, DHS proposes to amend Chapter I of Title 6, Code of Federal Regulations, as follows:

PART 5—DISCLOSURE OF RECORDS AND INFORMATION

■ 1. The authority citation for Part 5 continues to read as follows:

Authority: Pub. L. 107–296, 116 Stat. 2135, 6 U.S.C. 101 *et seq.;* 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552.

■ 2. At the end of Appendix C to Part 5, add paragraph ''74'' to read as follows:

Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act.

* * * * *

74. DHS/CBP–001, Import Information System (IIS). A portion of the following system of records is exempt from 5 U.S.C. 552a(c)(3), (e)(8), and (g)(1) pursuant to 5 U.S.C. 552a(j)(2), and from 5 U.S.C. 552a(c)(3) pursuant to 5 U.S.C. 552a(k)(2). Further, no exemption shall be asserted with respect to information maintained in the system as it relates to data submitted by or on behalf of a person who travels to visit the United States and crosses the border, nor shall an exemption be asserted with respect to the resulting determination (approval or denial). After conferring with the appropriate component or agency, DHS may waive applicable exemptions in appropriate circumstances and where it would not appear to interfere with or adversely affect the law enforcement purposes of the systems from which the information is recompiled or in which it is contained. Exemptions from the above particular subsections are justified, on a case-by-case basis to be determined at the time a request is made, when information in this system of records is may impede a law enforcement, intelligence activities and national security investigation:

(a) From subsection (c)(3) (Accounting for Disclosure) because making available to a record subject the accounting of disclosures from records concerning him or her would specifically reveal any investigative interest in the individual. Revealing this information could reasonably be expected to compromise ongoing efforts to investigate a violation of U.S. law, including investigations of a known or suspected terrorist, by notifying the record subject that he or she is under investigation. This information could also permit the record subject to take measures to impede the investigation, *e.g.,* destroy evidence, intimidate potential witnesses, or flee the area to avoid or impede the investigation.

(b) From subsection (e)(8) (Notice on Individuals) because to require individual notice of disclosure of information due to compulsory legal process would pose an impossible administrative burden on DHS and other agencies and could alert the subjects of counterterrorism or law enforcement investigations to the fact of those investigations when not previously known.

(c) From subsection (g)(1) (Civil Remedies) to the extent that the system is exempt from other specific subsections of the Privacy Act.

Dated: July 31, 2015.

Karen L. Neuman,

Chief Privacy Officer, Department of Homeland Security.

[FR Doc. 2015–19726 Filed 8–14–15; 8:45 am]

BILLING CODE 9111–14–P

NUCLEAR REGULATORY COMMISION

10 CFR Chapter I

[NRC–2015–0176]

Abnormal Occurrence Reports

AGENCY: Nuclear Regulatory Commission.

ACTION: Proposed revision to policy statement; request for comments.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is proposing revisions to its policy statement on reporting abnormal occurrences (AO) to Congress. The proposed revisions would clarify and restructure the criteria used by the NRC and Agreement States for determining whether to consider an incident or event as an AO. The proposed revisions to the policy statement would ensure consistency with current NRC guidance and

regulations. The NRC is requesting public comments on the proposed revision to the policy statement at this time.

DATES: Submit comments by November 16, 2015. Comments received after this date will be considered if it is practical to do so, but the Commission is able to assure consideration only for comments received on or before this date.

ADDRESSES: You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specific subject):

- *Federal Rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2015–0176. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.
- *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: OWFN–12–H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on obtaining information and submitting comments, see ''Obtaining Information and Submitting Comments'' in the **SUPPLEMENTARY INFORMATION** section of this document.

FOR FURTHER INFORMATION CONTACT: Luis A. Benevides, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington DC 20555–0001; telephone: 301–415–2457; email: *Luis.Benevides@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2015–0176 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal rulemaking Web site:* Go to *http://www.regulations.gov* and search for Docket ID NRC–2015–0176.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *http://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*ADAMS Public Documents''* and then select ''*Begin Web-based ADAMS Search.''* For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The ADAMS accession number for each document referenced (if it is available in ADAMS) is provided the first time that it is mentioned in the **SUPPLEMENTARY INFORMATION** section.
- *NRC's PDR:* You may examine and purchase copies of public documents at the NRC's PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

B. Submitting Comments

Please include Docket ID NRC–2015–0176 in the subject line of your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at *http://www.regulations.gov* as well as enter the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Section 208 of the Energy Reorganization Act of 1974, as amended (Pub. L. 93–438), defines an AO as an unscheduled incident or event that the NRC determines to be significant from the standpoint of public health or safety. The Federal Reports Elimination and Sunset Act of 1995 (Pub. L. 104–66) requires that AOs be reported to Congress annually. As required by Section 208, the discussion for each event includes the date and place, the nature and probable consequences, the cause or causes, and the action taken to prevent recurrence. The Commission must also widely disseminate the AO report to the public within 15 days of publishing the AO report to Congress.

Abnormal Occurrence Reporting

The Commission has developed the AO policy statement to comply with Section 208 of the Energy Reorganization Act of 1974, as amended. The intent of the act is to keep Congress and the public informed of unscheduled incidents or events that the Commission considers significant from the standpoint of public health and safety. The policy reflects a range of health and safety concerns and applies to incidents and events involving a single individual, as well as those having an overall impact on the general public. The AO criteria use a high reporting threshold so that only those events considered significant from the standpoint of public health and safety are reported to Congress.

Applicability

Implementation of Section 208 of the Energy Reorganization Act of 1974, as amended, ''Abnormal Occurrence Reports,'' involves the conduct of Commission business and does not impose requirements on licensees or certified facilities. The reports cover certain unscheduled incidents or events related to the manufacture, construction, or operation of a facility or conduct of an activity subject to the requirements of parts 20, 30 through 37, 39, 40, 50, 61, 70, 71, 72, or 76 in chapter I of Title 10 of the *Code of Federal Regulations* (10 CFR).

Agreement States provide information to the NRC on incidents and events involving applicable nuclear materials in their States. Agreement States are those States that have entered into formal agreements with the NRC, pursuant to Section 274 of the Atomic Energy Act of 1954, as amended (AEA) (Pub. L. 83–703), to regulate certain quantities of AEA material at facilities located within their borders. Events reported by Agreement States that reach the threshold for reporting as AOs are also published in the ''Report to Congress on Abnormal Occurrences.''

Proposed Revisions

The NRC is proposing revisions to the AO criteria to clarify the criteria for determining events that are significant from the standpoint of public health and safety and should therefore be considered AOs. The proposed revisions would also make the criteria consistent with NUREG–1614, Volume 6, ''U.S. Nuclear Regulatory Commission's Strategic Plan for Fiscal Years 2014–2018,'' issued August 2014 (ADAMS Accession No. ML14246A439), and new NRC requirements in 10 CFR part 37, ''Physical protection of category 1 and category 2 quantities of radioactive material.'' Further, the NRC proposes to revise the AO criteria to separate ''Other Events of Interest'' from the AO criteria to clearly delineate that events considered ''Other Events of Interest'' are not AOs, but do represent significant

events that the Commission deems appropriate to report to Congress. Finally, restructuring and minor editorial changes are proposed to some sections for clarity.

The NRC is requesting public comments on the proposed revision to the policy statement at this time. The NRC is specifically seeking public comments on screening all reports for exposures to embryo/fetus or nursing child as an AO under Criteria l.A.2, unintended radiation exposure, versus screening reports required by 10 CFR 35.3047 for exposures to embryo/fetus or nursing child resulting from treatment to a patient as an AO under Criteria III.C, ''Events involving the Medical Use of Radioactive Materials in Patients or Human Research Subjects.''

The entire text of the proposed revision of the policy statement is available as an attachment to this document.

Licensee Reports

The proposed changes to the general policy statement would not change the reporting requirements for NRC licensees in Commission regulations, license conditions, or technical specifications. The NRC licensees will continue to submit required reports on a wide range of events, including instrument malfunctions and deviations from normal operating procedures that may not be significant from the standpoint of the public health and safety but provide data useful to the Commission in monitoring operating trends of licensed facilities and in comparing the actual performance of these facilities with their design and/or licensing basis.

III. Paperwork Reduction Act

This policy statement does not contain information collection requirements that are subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Public Protection Notification

The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting documents displays a currently valid Office of Management and Budget control number.

Dated at Rockville, Maryland, this 10th day of August, 2015.

For the Nuclear Regulatory Commission.

Annette L. Vietti-Cook,

Secretary of the Commission.

Attachment—Abnormal Occurrence Statement of Policy

The Commission will apply the following policy in determining whether an incident or event at a facility or involving an activity that is licensed or otherwise regulated by the Commission or an Agreement State is an abnormal occurrence (AO).[1]

An incident or event is considered an AO if it involves a major reduction in the protection of public health or safety. The incident or event has a moderate or severe impact on public health or safety and could include, but need not be limited to, the following:

(1) Moderate exposure to, or release of, radioactive material licensed by or otherwise regulated by the Commission or Agreement States;

(2) major degradation of essential safety-related equipment;

(3) major deficiencies in design, construction, use of, or management controls for facilities or radioactive material licensed by or otherwise regulated by the Commission or Agreement States; or

(4) substantiated case of actual loss, theft, or diversion of risk significant radioactive material licensed by or otherwise regulated by the Commission or Agreement States.

The criteria for determining whether to consider an incident or event for reporting as an AO are set forth in Appendix A of this policy statement.

Commission Dissemination of Abnormal Occurrence Information

The Commission widely disseminates the AO reports to the public. The Commission will submit an annual report to Congress on AOs that occur at or are associated with any facility or activity that is licensed or otherwise regulated pursuant to the Atomic Energy Act of 1954, as amended, or the Energy Reorganization Act of 1974, as amended. This report gives the date, place, nature, and probable consequences of each AO; the cause or causes of each AO; and any action taken to prevent recurrence.

Appendix A: Abnormal Occurrence Criteria

An accident or event is considered an abnormal occurrence (AO) if it involves a major reduction in the degree of protection of public health or safety. This type of incident or event has a moderate or severe impact on public health or safety and could include, but need not be limited to, the following:

(1) Moderate exposure to, or release of, radioactive material licensed by or otherwise regulated by the Commission or Agreement States;

(2) major degradation of essential safety-related equipment;

(3) major deficiencies in design, construction, use of, or management controls for facilities or radioactive material licensed by or otherwise regulated by the Commission or Agreement States; or

(4) substantiated case of actual loss, theft, or diversion of risk-significant radioactive material licensed by or otherwise regulated by the Commission or Agreement States.

Abnormal Occurrence Criteria

The following presents the criteria, by types of events, used to determine which events will be considered for reporting as AOs.

I. All Licensees[2]

A. Human Exposure to Radiation From Licensed Material

1. Any unintended radiation exposure to an adult (any individual 18 years of age or older) resulting in:

(a) An annual total effective dose equivalent (TEDE) of 250 millisievert (mSv) (25 rem) or more;

(b) an annual sum of the deep dose equivalent (external dose) and committed dose equivalent (intake of radioactive material) to any individual organ other than the lens of the eye, the bone marrow, and the gonads of 2,500 mSv (250 rem) or more;

(c) an annual dose equivalent to the lens of the eye of 1 Sv (100 rem) or more;

(d) an annual sum of the deep dose equivalent and committed dose equivalent to the bone marrow of 1 Sv (100 rem) or more;

(e) a committed dose equivalent to the gonads of 2,500 mSv (250 rem) or more; or

(f) an annual shallow dose equivalent to the skin or extremities of 2,500 mSv (250 rem) or more.

2. Any unintended radiation exposure to any minor (an individual less than 18 years of age) resulting in an annual TEDE of 50 mSv (5 rem) or more, or to an embryo/fetus resulting in a dose equivalent of 50 mSv (5 rem) or more.

3. Any radiation exposure that has resulted in unintended permanent functional damage to an organ or a physiological system as determined by an independent physician[3] deemed qualified by the NRC or Agreement State.

[1] Events reported to the U.S. Nuclear Regulatory Commission (NRC) by Agreement States that reach the threshold for reporting as AOs will be reported as such by the Commission.

[2] Medical patients are excluded from consideration under this criterion and these criteria do not apply to medical events defined in § 35.3045 of Title 10 of the *Code of Federal Regulations* (10 CFR), which are considered in AO Criteria III.C, ''Events involving the Medical Use of Radioactive Materials in Patients or Human Research Subjects.''

[3] Independent physician is defined to be a physician not on the licensee's staff and who was not involved in the care of the patient involved.

B. Discharge or Dispersal of Radioactive Material From Its Intended Place of Confinement

The release of radioactive material to an unrestricted area in concentrations that, if averaged over a period of 24 hours, exceeds 5,000 times the values specified in Table 2 of appendix B, ''Annual Limits on Intake (ALIs) and Derived Air Concentrations (DACs) of Radionuclides for Occupational Exposure; Effluent Concentrations; Concentrations for Release to Sewerage,'' to 10 CFR part 20, ''Standards for protection against radiation,'' unless the licensee has demonstrated compliance with 10 CFR 20.1301, ''Dose limits for individual members of the public,'' using 10 CFR 20.1302(b)(1) or 10 CFR 20.1302(b)(2)(ii). This criterion does not apply to transportation events.

C. Theft, Diversion, or Loss of Licensed Material; Sabotage; or Security Breach[4][5][6]

1. Any stolen, diverted, abandoned, or unrecovered lost radioactive material that meets or exceeds the thresholds listed in appendix A of 10 CFR part 37, ''Physical protection of category 1 and category 2 quantities of radioactive material.'' Excluded from reporting under this criterion are those events involving sources that are lost or abandoned under the following conditions: Sources that have been lost and for which a reasonable attempt at recovery has been made without success or irretrievable well logging sources as defined in 10 CFR 39.2, ''Definitions.'' These sources are only excluded if there is reasonable assurance that the doses from these sources have not exceeded and will not exceed the reporting thresholds specified in AO Criteria I.A.1 and I.A.2 and the agency has determined that the risk of theft or diversion is acceptably low.

2. An act that results in radiological sabotage as defined in 10 CFR 73.2, ''Definitions.''

3. Any substantiated[7] case of actual theft, diversion, or loss of a formula quantity of special nuclear material[8] or an inventory discrepancy of a formula quantity of special nuclear material that is judged to be caused by theft or diversion.

4. Any substantial breakdown[9] of physical security, cyber security, or material control and accountability programs that significantly weakens the protection against loss, theft, diversion, or sabotage.

5. Any significant unauthorized disclosures (loss, theft, and/or deliberate) of classified information that harms national security or safeguards information that threatens public health and safety.

D. Initiation of High-Level NRC Team Inspection[10]

II. Commercial Nuclear Power Plant Licensees

A. Malfunction of Facility, Structures, or Equipment

1. Exceeding a safety limit of license technical specification (TS) (10 CFR 50.36(c)).

2. Serious degradation of fuel integrity, primary coolant pressure boundary, or primary containment boundary.

3. Loss of plant capability to perform essential safety functions so that a release of radioactive materials, which could result in exceeding the dose limits of 10 CFR part 100, ''Reactor Site Criteria,'' or five times the dose limits of General Design Criteria (GDC) 19 in appendix A, ''General Design Criteria for Nuclear Power Plants,'' to 10 CFR part 50, ''Domestic licensing of production and utilization facilities,'' could occur from a postulated transient or accident (*e.g.,* loss of emergency core cooling system, loss of control rod system).

B. Design or Safety Analysis Deficiency, Personnel Error, or Procedural or Administrative Inadequacy

1. Discovery of a major condition not specifically considered in the safety analysis report or TS that requires immediate remedial action.

2. Personnel error or procedural deficiencies that result in loss of plant capability to perform essential safety functions so that a release of radioactive materials, which could result in exceeding the dose limits of 10 CFR part 100 or five times the dose limits of GDC 19 in appendix A to 10 CFR part 50, could occur from a postulated transient or accident (*e.g.,* loss of emergency core cooling system, loss of control rod drive mechanism).

C. Any Operating Reactor Events or Conditions Evaluated by the NRC Reactor Oversight Process (ROP) To Be the Result of or Associated With Licensee Performance Issues of High Safety Significance[11]

D. Any Operating Reactor Events or Conditions Evaluated by the NRC Accident Sequence Precursor (ASP) Program To Have a Conditional Core Damage Probability (CCDP) or Change in Core Damage Probability (ΔCDP) of Greater Than or Equal to 1×10^{-3}[12]

E. Any Operating Reactor Plants That Are Determined To Have Overall Unacceptable Performance or Are in a Shutdown Condition as a Result of Significant Performance Problems and/or Operational Event(s)[13]

III. Events at Facilities Other Than Nuclear Power Plants and All Transportation Events

A. Events Involving Design, Analysis, Construction, Testing, Operation, Transport, Use, or Disposal

1. An accidental criticality.

2. A major deficiency in design, construction, control, or operation having significant safety implications that require immediate remedial action.

3. A serious safety-significant deficiency in management or procedural controls.

4. A series of events (in which the individual events are not of major importance), recurring incidents, or incidents with implications for similar facilities

[4] Information pertaining to certain incidents may be either classified or under consideration for classification because of national security implications. Classified information will be withheld when formally reporting these incidents in accordance with Executive Order 13526, as amended (''Classified National Security Information'' (75 FR 707), or any predecessor or successor order to require protection against unauthorized disclosures. Any classified details about these incidents would be available to the Congress, upon request, under appropriate security arrangements.

[5] Information pertaining to certain incidents may be Safeguards Information as defined in 10 CFR 73.2 because of safety and security implications. The AO report would withhold specific safeguards information in accordance with Section 147 of the Atomic Energy Act of 1954, as amended. Any safeguards details regarding these incidents would be available to the Congress, upon request, under appropriate security arrangements.

[6] Reporting lost or stolen material is based on the activity of the source at the time the radioactive material was known to be lost or stolen. If, by the time the AO report is due to Congress, the radioactive material has decayed to below the thresholds listed in appendix A of 10 CFR part 37, the report will clarify that the radioactive material has decayed below the thresholds.

[7] ''Substantiated'' means a situation in which there is an indication of loss, theft, or unlawful diversion, such as: An allegation of diversion, report of lost or stolen material, or other indication of loss of material control or accountability that cannot be refuted following an investigation; and requires further action on the part of the agency or other proper authorities.

[8] Formula quantity of special nuclear material is defined in 10 CFR 70.4, ''Definitions.''

[9] A substantial breakdown is defined as a red finding under the Reactor Oversight Process (ROP) in the physical security inspection program or any plant or facility determined to have overall unacceptable performance.

[10] This item addresses initiation of any incident investigation teams, as described in NRC Management Directive (MD) 8.3, ''NRC Incident Investigation Program'' (*see http://www.internal.nrc.gov/policy/directives/toc/md8.3.htm*), or initiation of any accident review groups, as described in MD 8.9, ''Accident Investigation'' (*see http://www.internal.nrc.gov/policy/directives/toc/md8.9.htm*).

[11] The NRC ROP uses four colors to describe the safety significance of licensee performance. As defined in NRC MD 8.13, ''Reactor Oversight Process'' (*see http://www.internal.nrc.gov/policy/directives/toc/md8.13.htm*), green is used for very low safety significance, white is used for low to moderate safety significance, yellow is used for substantial safety significance, and red is used for high safety significance. Reactor conditions or performance indicators evaluated to be red are considered AOs.

[12] Results from the NRC ASP program are used to monitor agency performance against the agency's strategic safety goal (*e.g.,* ensure the safe use of radioactive materials) and objectives (*e.g.,* prevent and mitigate accidents and ensure radiation safety). A precursor event with a CCDP or ΔCDP of greater than or equal to 1×10^{-3} is used as a performance indicator for the strategic safety goal by determining that there have been no significant precursors of a nuclear reactor accident and that there have been no more than one significant adverse trend in industry safety performance.

[13] Any plants assessed by the ROP to be in the unacceptable performance column, as described in NRC Inspection Manual Chapter (IMC) 0305, ''Operating Reactor Assessment Program'' (*see http://pbadupws.nrc.gov/docs/ML1508/ML15089A315.pdf*), or under the NRC IMC 0350, ''Oversight of Reactor Facilities in a Shutdown Condition Due to Significant Performance and/or Operational Concerns'' (see *http://pbadupws.nrc.gov/docs/ML0634/ML063400076.pdf*). This assessment of safety performance is based on the number and significance of NRC inspection findings and licensee performance indicators.

(generic incidents) that raise a major safety concern.

B. Fuel Cycle Facilities [14]

1. Absence or failure of all safety controls (engineered and human) such that conditions were present for the occurrence of a high-consequence event involving an NRC-regulated hazard (radiological or chemical).[15]

2. An NRC-ordered safety-related or security-related immediate remedial action.

C. Events Involving the Medical Use of Radioactive Materials in Patients or Human Research Subjects [16]

1. A medical event, as defined in 10 CFR 35.3045, which results in a dose that:

(a) Is equal to or greater than 1 Gray (Gy) (100 rad) to a major portion of the bone marrow or to the lens of the eye; or equal or greater than 2.5 Gy (250 rad) to the gonads; or

(b) exceeds, by 10 Gy (1,000 rad), the expected dose to any other organ or tissue from the administration defined in the written directive; and

2. A medical event, as defined in 10 CFR 35.3045, which involves:

(a) A dose or dosage that is at least 50 percent greater than that prescribed, or

(b) a prescribed dose or dosage that

(i) uses the wrong radiopharmaceutical or unsealed byproduct material; or

(ii) is delivered by the wrong route of administration; or

(iii) is delivered to the wrong treatment site; or

(iv) is delivered by the wrong treatment mode; or

(v) is from a leaking source or sources; or

(vi) is delivered to the wrong individual or human research subject.

Appendix B: Other Events of Interest

This appendix discusses other events of interest that do not meet the AO criteria in Appendix A. The Commission may determine that events, other than AOs, may be of interest to Congress and the public and should be included in an appendix to the AO report as ''Other Events of Interest.'' Such events may include, but are not necessarily limited to, events that do not meet the AO criteria but that have been perceived by Congress or the public to be of high health and safety significance, have received significant media coverage, or have caused the NRC to increase its attention to or oversight of a program area, or a group of similar events that have resulted in licensed materials entering the public domain in an uncontrolled manner.

[FR Doc. 2015–20260 Filed 8–14–15; 8:45 am]

BILLING CODE 7590–01–P

[14] Criterion III.A also applies to Fuel Cycle Facilities.

[15] High-consequence events for facilities licensed under 10 CFR part 70 are those that could seriously harm the worker or a member of the public in accordance with 10 CFR 70.61. The integrated safety analysis (ISA) conducted and maintained by the licensee or applicant of 10 CFR part 70 fuel cycle facilities identifies such hazards and the safety controls (10 CFR 70.62(c)) applied to meet the performance requirements in accordance with 10 CFR 70.61(b) through (d). Fuel cycle facilities licensed under 10 CFR part 40 or certified under 10 CFR part 76 have licensing basis documents that describe facility specific hazards, consequences, and those controls utilized to prevent or mitigate the consequences of such accidents. For these facilities, a high-consequence event would be a release that has the potential to cause acute radiological or chemical exposures to a worker or a member of the public similar to that defined in NUREG–1520, Revision 2, Appendix A to Chapter 3, Section A.2, under ''Consequence Category 3 (High Consequences)'' (see *http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1520/*).

[16] Criteria III.A.2, III.A.3, and III.A.4 also apply to medical licensees.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 73

[Docket No. FAA–2014–0370; Airspace Docket No. 14–ASO–2]

RIN 2120–AA66

Proposed Redesignation and Expansion of Restricted Area R–4403; Gainesville, MS

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Supplemental notice of proposed rulemaking (SNPRM).

SUMMARY: This SNPRM amends the notice of proposed rulemaking (NPRM) published in the **Federal Register** on July 10, 2014, proposing to redesignate and expand restricted area R–4403, Gainesville, MS, by changing the parameters of some restricted area subareas. The changes would include expanding the time of designation, modifying some restricted area lateral and vertical boundaries, and eliminating the proposed air-to-ground munitions delivery in some parts of the restricted area complex.

DATES: Comments must be received on or before October 1, 2015.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, M–30, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001; telephone: (202) 366–9826. You must identify FAA Docket No. FAA–2014–0370 and Airspace Docket No. 14–ASO–2, at the beginning of your comments. You may also submit comments through the Internet at *www.regulations.gov.* Comments on environmental and land use aspects to should be directed to: Mr. David Lorance, P.E., Center Environmental Officer, Center Operations Directorate, National Aeronautics and Space Administration (NASA) Stennis Space Center, Roy S. Estess Building 1100, Mail Code RA02, Stennis Space Center, MS 39529–6000.

FOR FURTHER INFORMATION CONTACT: Paul Gallant, Airspace Policy and Regulations Group, Office of Airspace Services, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267–8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would restructure the restricted airspace at the Stennis Space Center, MS, to enhance aviation safety and accommodate essential NASA and Naval Special Warfare Command (NSWC) requirements.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA–2014–0370 and Airspace Docket No. 14–ASO–2) and be submitted in triplicate to the Docket Management System (see **ADDRESSES** section for address and phone number). You may also submit comments through the Internet at *www.regulations.gov.*

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: ''Comments to FAA Docket No. FAA–2014–0370 and Airspace Docket No. 14–ASO–2.'' The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at *www.regulations.gov.*

You may review the public docket containing the proposal, any comments received and any final disposition in person at the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during normal business hours at the office of the Operations Support Group, Eastern Service Center, Federal Aviation Administration, 1701 Columbia Ave., College Park, GA 30337.

Persons interested in being placed on a mailing list for future NPRMs should contact the FAA's Office of Rulemaking, (202) 267–9677, for a copy of Advisory Circular No. 11–2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Background

On July 10, 2014, the FAA published in the **Federal Register** an NPRM proposing to redesignate and expand restricted area R–4403, Gainesville, MS, to support missions of the National Aeronautics and Space Administration (NASA) and the Naval Special Warfare Command (NSWC) (79 FR 39344). Eight comments were received; two commenters supported the proposal, four commenters posed limited concerns, and the remaining two commenters objected to the proposal.

Subsequent to publication, both NASA and NSWC revised their airspace proposal by changing certain restricted area boundaries, eliminating some proposed activities and increasing the proposed times of use of the airspace. The changes are described in the next section, below.

Since these changes to the proposal are significant, the FAA has determined it is necessary to reopen the comment period to provide additional opportunity for public comment. The FAA will dispose of all the comments to the NPRM and SNPRM when it issues its final determination on the proposal.

Differences From NPRM

The southern boundary of R–4403B and R–4403C is shifted slightly to the north to address a comment that the restricted areas were too close to Interstate I–10, which is used by some pilots as a visual flight reference.

The NPRM proposed to establish R–4403C, extending from the surface up to but not including 6,000 feet MSL; and to establish R–4403D, with the same lateral boundaries as R–4403C, and extending above R–4403C from 6,000 feet MSL up to 10,000 feet MSL. This SNPRM proposes to combine R–4403C and R–4403D into a single restricted area extending from the surface up to 10,000 feet MSL. This combined area would be designated R–4403C and the formerly proposed designation ''R–4403D'' would not be used.

The NPRM proposed the time of designation for restricted areas R–4403C, D, E and F as ''Intermittent, 1800 to 2400 local time, as activated by NOTAM at least 24 hours in advance; other times by NOTAM with air traffic control (ATC) approval.'' The SNPRM would revise the time of designation for R–4403C, E and F to ''Intermittent, 2000 to 0500 local time, as activated by NOTAM at least 24 hours in advance; and 1800 to 2000 local time, November 1 to March 1, as activated by NOTAM at least 24 hours in advance, not to exceed 20 days per year.'' The new times would expand the basic time frame during which the restricted areas could be activated from six hours per day to nine hours per day. Further, it would add a provision allowing for additional activation during the hours 1800 to 2000 local time between November 1 and March 1. However, use of the 1800 to 2000 time frame between November 1 and March 1 would be limited to a maximum of 20 days per year. The provision in the NPRM allowing for activation of R–4403C, E and F at ''other times by NOTAM with ATC approval'' is removed from consideration in this proposal.

The NPRM proposed the use of R–4403E and F for delivery of air-to-ground munitions at a ground target by aircraft, including AC–130 gunships and armed helicopters. The NSWC determined that the area is too small to contain the weapons safety footprint, so R–4403E and F would only be used to contain air-to-ground firing of non-eye-safe lasers. Ground forces would use lasers that are eye-safe in R–4403E and F to signal military aircraft operating overhead.

The southeastern-most point of the R–4403E boundary (where it intersects the Stennis International Airport Class D airspace boundary (at lat. 30°20′22″ N., long. 89°31′43″ W.) would be shifted northward by approximately 2.5 NM to intersect the Class D airspace area at lat. 30°22′35″ N., long. 89°32′06″ W. The airspace south of the new line would become a part of R–4403C.

The Proposal

The FAA is proposing an amendment to 14 CFR part 73 to remove restricted area R–4403, Gainesville, MS, and redesignate and expand the airspace to consist of five subareas: R–4403A, B, C, E and F, Stennis Space Center, MS. The FAA is proposing this action at the request of NASA and the NSWC to confine activities that potentially present hazards to nonparticipating aircraft. The existing airspace is too small to fully contain NASA activities and the proposed expansion would also enable NSWC to conduct realistic Special Operations Force training.

R–4403A and B would continue be used for NASA activities, such as rocket engine testing and untethered space vehicle propulsion system testing. The NSWC would use the proposed R–4403C, E and F for integrated Special Operations Forces training. The proposed restricted areas are described below.

R–4403A would be used by NASA to test rocket engine technology. It would consist of that airspace within a 2.5 NM radius of lat. 30°21′51″ N., long. 89°35′39″ W., centered on the rocket engine test complex. R–4403A would extend from the ground to 12,000 feet MSL. It would replace R–4403 with an expanded area to more fully contain rocket engine testing hazards. This area remains as proposed in the NPRM.

R–4403B would be used by NASA for untethered autonomous space vehicle testing. The area would extend upward from the ground to 6,000 feet MSL. These vehicles are utilized to explore planets and asteroids. Testing of these vehicles involves potential hazards since failure of the vehicle, its propulsion system or propellant tanks can result in explosion of the vehicle. The propensity for this to occur is greater with these vehicles than with a standard aircraft because of the extremely volatile nature of the propellants and the poor aerodynamic characteristics of the vehicle during earth-based operation. Proposed R–4403B is designed to contain the flight profiles of these vehicles as well as any potential hazards to nonparticipating aircraft. Except for the slight adjustment of the southern boundary, as described

above, this area remains as proposed in the NPRM.

R–4403C would be used for Special Operations Forces Integration Training. The NPRM proposed R–4403C to extend from the ground to 6,000 feet MSL. This SNPRM would expand R–4403C to extend from the ground to 10,000 feet MSL, incorporating the airspace from 6,000 feet MSL to 10,000 feet MSL, which was formerly proposed as R–4403D. The designation ''R–4403D'' will no longer be used. R–4403C would contain air-to-ground live-fire training for AC–130 gunships, armed helicopters and tilt-rotor (CV–22) aircraft and surface-to-surface weapons firing. R–4403C would contain two impact areas for air-to-ground munitions employment (up to 105mm), and air-to-ground non-eye-safe laser firing. Ground forces would use lasers that are eye-safe to signal military aircraft operating overhead. Anticipated use of R–4403C is 100–120 days per year.

R–4403D designation is removed from the proposal as described above.

R–4403E would also be used for Special Operations Forces Integration Training. It would extend upward from the ground to 10,000 feet MSL. It would contain a ground target to be used only for air-to-ground firing of non-eye safe lasers. The proposal in the NPRM to use this area for air-to-ground munitions delivery is eliminated. Ground forces would also use lasers that are eye-safe to signal military aircraft operating overhead.

R–4403F would extend upward from 4,000 feet MSL to 10,000 feet MSL. R–4403F would wrap around the northeast corner of R–4403E and would be used in conjunction with R–4403E.

R–4403E and F would always be activated together for AC–130 air-to-ground firing of non-eye-safe lasers. The two areas could be activated separately from R–4403C, but typically would be used in conjunction with R–4403C.

The proposed time of designation for R–4403A and R–4403B is ''Intermittent, 1000 to 0300 local time, as activated by NOTAM at least 24 hours in advance.'' This time frame is the same as proposed in the NPRM. The proposed time of designation for R–4403C, E and F is ''Intermittent, 2000 to 0500 local time, as activated by NOTAM at least 24 hours in advance; and 1800 to 2000 local time, November 1 to March 1 (not to exceed 20 days per year).'' The times for R–4403C, E and F are changed from those in the NPRM as explained in the ''Differences from NPRM'' section, above.

Note: The term ''Intermittent'' is used to indicate occasional, irregular, or changeable use periods.

During periods when the restricted areas are not needed by the using agencies, the airspace would be returned to the controlling agency for access by other airspace users.

A revised color chart depicting the proposed restricted areas will be posted on the *www.regulations.gov* Web site (search Docket No. FAA–2014–0370).

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation: (1) Is not a ''significant regulatory action'' under Executive Order 12866; (2) is not a ''significant rule'' under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal.

Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1E, ''Environmental Impacts: Policies and Procedures,'' prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 73

Airspace, Prohibited areas, Restricted areas.

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 73 as follows:

PART 73—SPECIAL USE AIRSPACE

■ 1. The authority citation for part 73 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 73.44 [Amended]

■ 2. Section 73.44 is amended as follows:

R–4403 Gainesville, MS [Removed]

R–4403A Stennis Space Center, MS [New]

Boundaries. Within a 2.5-NM radius centered at lat. 30°21′51″ N., long. 89°35′39″ W.

Designated altitudes. Surface to 12,000 feet MSL.

Time of designation. Intermittent, 1000 to 0300 local time, as activated by NOTAM at least 24 hours in advance.

Controlling agency. FAA, Houston ARTCC.

Using agency. NASA, Director, Stennis Space Center, Bay St. Louis, MS.

R–4403B Stennis Space Center, MS [New]

Boundaries. Beginning at lat. 30°29′37″ N., long. 89°35′16″ W.;
to lat. 30°29′37″ N., long. 89°32′33″ W.;
thence clockwise along a 0.85-NM arc centered
at lat. 30°28′46″ N., long. 89°32′33″ W.;
to lat. 30°28′46″ N., long. 89°31′34″ W.;
to lat. 30°26′25″ N., long. 89°31′34″ W.;
to lat. 30°24′02″ N., long. 89°31′34″ W.;
thence counterclockwise along a 4.2-NM arc centered
at lat. 30°22′04″ N., long. 89°27′17″ W.;
to lat. 30°20′28″ N., long. 89°31′46″ W.;
to lat. 30°19′19″ N., long. 89°35′32″ W.;
to lat. 30°18′23″ N., long. 89°40′17″ W.;
to lat. 30°21′08″ N., long. 89°42′25″ W.;
to lat. 30°22′22″ N., long. 89°42′58″ W.;
to lat. 30°23′44″ N., long. 89°42′43″ W.;
to lat. 30°26′40″ N., long. 89°40′51″ W.;
thence counterclockwise along a 3-NM arc centered
at lat. 30°29′15″ N., long. 89°39′04″ W.;
to lat. 30°27′08″ N., long. 89°36′37″ W.;
to lat. 30°27′58″ N., long. 89°35′27″ W.;
to lat. 30°28′47″ N., long. 89°35′27″ W.;
to the point of beginning.

Designated altitudes. Surface to 6,000 feet MSL.

Time of designation. Intermittent, 1000 to 0300 local time, as activated by NOTAM at least 24 hours in advance.

Controlling agency. FAA, Houston ARTCC.

Using agency. NASA, Director, Stennis Space Center, Bay St. Louis, MS.

R–4403C Stennis Space Center, MS [New]

Boundaries. Beginning at lat. 30°27′58″ N., long. 89°35′27″ W.;
to lat. 30°22′35″ N., long. 89°35′27″ W.;
to lat. 30°22′35″ N., long. 89°32′06″ W.;
thence counterclockwise along a 4.2-NM arc centered

I. Introduction

On August 5, 2015, the Postal Service filed a petition pursuant to 39 CFR 3050.11 requesting that the Commission initiate an informal rulemaking proceeding to consider changes to analytical principles relating to the Postal Service's periodic reports.[1] Proposal Seven is attached to the Petition and proposes an analytical method change relating to the avoided costs for Flats Sequencing System (FSS) workshare discounts. Petition at 1.

This Petition was filed in response to Order No. 2472, which directed the Postal Service ''to file a proposed methodology for determining the costs avoided for the Presorted FSS workshare discounts, as described in the body of [Order No. 2472], within 90 days of the date of [Order No. 2472].'' [2]

II. Summary of Proposal

Under Proposal Seven, the Postal Service seeks to address the avoided costs relating to FSS mail. Petition, Proposal Seven at 1. The Postal Service bifurcates Proposal Seven into the Mail Processing and the Delivery elements of the avoided costs for FSS workshare discounts. *Id.*

A. Section One: Proposed Method for Calculating Mail Processing Cost Avoidances

The Postal Service seeks to modify the modeling methodology used in the USPS–FY14–11 (Docket No. ACR2014) Standard Mail Flats Mail Processing Cost Model to estimate the mail processing cost avoidances of FSS presorted Standard Flats. Petition, Proposal Seven, Section One at 1. The Postal Service expands the Standard Mail Flats Mail Processing Cost Model to identify the unique characteristics and flows of FSS-prepared Standard Flats. *Id.* As part of Library Reference USPS–RM2015–16/1 filed with the Petition, the Postal Service provides three models supporting this section of Proposal Seven. *Id.* The Postal Service also proposes changes to the USPS–FY14–11 (Docket No. ACR2014) Periodicals Flats Mail Processing Cost Model. *Id.* at 4.[3]

There are nine modifications proposed by the Postal Service in Section One of Proposal Seven, all of which apply to the Standard Mail Flats Cost Model. Petition, Proposal Seven, Section One at 4. Two of the proposed modifications also apply to the Periodicals Model. *Id.*

1. Revision of the Methodology Used To Estimate the Proportion of Flats Processed in Mechanized Incoming Secondary Operations (Modification One)

The Postal Service presents a process to estimate the proportion of flat-shaped mail processed in mechanized incoming secondary operations. *Id.* at 4–8. Although over 98 percent of flats destinate in the service territories of plants that have mechanized equipment, certain facilities choose to perform the incoming secondary sortation manually for a variety of reasons, including low volume, service commitments, and

[2] Docket No. R2015–4, Order on Revised Price Adjustments for Standard Mail, Periodicals, and Package Services Products and Related Mail Classification Changes, May 7, 2015, at 62 (Order No. 2472).

[3] The proposed changes to the Periodicals Flats Mail Processing Cost Model were filed in Docket No. RM2015–18. *See* Docket No. RM2015–18, Petition of the United States Postal Service for the Initiation of a Proceeding to Consider Proposed Changes in Analytical Principles (Proposal Nine), August 5, 2015, Attachment at 2.

operating window/capacity restraints. *Id.* at 4–5. The Postal Service asserts that its proposed methodology accounts for the two different technologies performing mechanized incoming secondary sortation—the Automated Flats Sorting Machine 100 (AFSM 100) and the FSS. *Id.* at 5. The Postal Service also represents that its methodology excludes letter shaped mail worked in flat operations, pieces entered in Carrier Route bundles that have broken and therefore require incoming secondary sortation, rejects from FSS operations, and pieces destinating in FSS zones that are not sorted on the FSS. *See id.* at 5–8. This modification applies to both the Standard Mail and Periodicals Flats Mail Processing Cost Models.

2. Changes to Bundle Processing Flows To Account for Increased Mechanized Incoming Secondary Piece Processing

The Postal Service proposes to adjust the bundle flow formulae for consistency with the mechanized incoming secondary piece distribution calculated under Modification One. *See id.* at 8–9. The Postal Service states that bundles for mechanized incoming secondary sortation will not incur an incoming secondary bundle sort. *See id.* The Postal Service explains that bundles for zones worked manually will incur an additional bundle sort at the delivery unit. *Id.* at 9. This modification applies to the Standard Mail Flats Mail Processing Cost Model.

3. Introduction of FSS Bundle Flows

The Postal Service assumes that no FSS bundles will incur a sortation at the delivery unit. *Id.* Aside from this assumption, the Postal Service calculates the bundle flows for FSS bundles using the same methodology used for other bundle types. *Id.* This modification applies to the Standard Mail Flats Mail Processing Cost Model.

4. FSS Presort Piece Model and Costs

The Postal Service states that FSS presorted pieces flow directly into piece sortation on the FSS, bypassing outgoing primary, outgoing secondary, managed mail, and incoming primary operations. *Id.* The Postal Service represents that it models such FSS presorted pieces using the same basic methodology previously used to model piece flows. *Id.* This modification applies to the Standard Mail Flats Mail Processing Cost Model.

5. Updating 5-Digit Piece Model and Costs

The Postal Service represents that 5-Digit pieces do not flow into FSS operations and proposes to update the 5-Digit piece model to reflect this flow. *Id.* at 10. The Postal Service represents that the relative incidence of manual incoming secondary sortation is higher for 5-Digit pieces by a factor of one over one minus the FSS coverage factor. *Id.* This modification applies to the Standard Mail Flats Mail Processing Cost Model.

6. Updating Mixed ADC, ADC, 3-Digit for Incoming Secondary Coverage

The Postal Service proposes to update the area distribution center (ADC), mixed ADC, and 3-Digit models to incorporate the recalculation of the mechanized incoming secondary sortation. *Id.* This modification applies to the Standard Mail Flats Mail Processing Cost Model.

7. Explicit Modeling of Mail Preparation

The Postal Service states that the current model includes the hours associated with mail preparation for the FSS in the calculation of the FSS productivities. *See id.* at 11. However, because such AFSM 100 preparation costs are included in the calculation of the AFSM 100 productivities, the Postal Service observes that a portion of the AFSM 100 preparation costs are allocated incorrectly to FSS prepared pieces through the Cost and Revenue Analysis (CRA) adjustment factor. *See id.* The Postal Service proposes to model AFSM 100 preparation costs using the methodology used in the Periodicals Flats Mail Processing Model. *See id.* This modification applies to the Standard Mail Flats Mail Processing Cost Model.

8. CRA Adjustment Factor Adjusted for the FSS

The Postal Service uses the CRA adjustment factor to calibrate the model to CRA costs and to distribute non-modeled costs to the appropriate rate category. *Id.* The Postal Service states that applying the CRA adjustment factor as is done in the current methodology would distort measured cost avoidances by overdistributing non-modeled costs to FSS pieces. *Id.* at 12. The Postal Service represents that it will calculate the CRA adjustment factor to ensure the non-modeled costs distributed to FSS pieces are equal to those distributed to Five-Digit pieces. *Id.* This modification applies to the Standard Mail Flats Mail Processing Cost Model.

9. FSS Realization Factor

The Postal Service represents that it introduced a FSS Realization Factor to measure the proportion of FSS eligible mail that is processed on the FSS. *Id.* at 12–13. According to the Postal Service, this FSS Realization Factor captures the fact that mail that destinates in a FSS zone and arrives after the end of first-pass processing may be processed on the AFSM 100 rather than the FSS to avoid delay. *Id.* This modification applies to both the Standard Mail and Periodicals Flats Mail Processing Cost Models.

B. Section Two: Proposed Method for Calculating Delivery Costs

The Postal Service proposes a method to disaggregate delivery costs for Periodicals Flats, Bound Printed Matter Flats, Standard Flats and Carrier Route Flats (not including High Density or Saturation) between those destinating in FSS zones and those destinating in non-FSS zones. Petition, Proposal Seven: Section Two at 1. This method uses operational assumptions and models rather than data directly collected from cost systems, and calculates separate delivery costs for the relevant products based on whether pieces are destinating in FSS or non-FSS zones. *Id.* at 3.

The proposed computing method begins with a product's component group costs in three segments: Cost Segment 6, City Carrier In-Office Activities; Cost Segment 7, City Carrier Street Activities; and Cost Segment 10, Rural Carriers Office and Street Activities. *Id.* at 3–9. Within each cost segment, the purpose is to disaggregate costs into FSS zone costs and non-FSS zone costs. *Id.*

III. Initial Commission Action

The Commission establishes Docket No. RM2015–16 for consideration of matters raised by the Petition. Additional information concerning the Petition may be accessed via the Commission's Web site at *http://www.prc.gov.* Interested persons may submit comments on the Petition and Proposal Seven no later than September 25, 2015. Reply comments are due no later than October 16, 2015. Pursuant to 39 U.S.C. 505, Katalin K. Clendenin is designated as an officer of the Commission (Public Representative) to represent the interests of the general public in this proceeding.

IV. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. RM2015–16 for consideration of the matters raised by the Petition of the United States Postal Service for the Initiation of a Proceeding to Consider Proposed Changes in Analytical Principles (Proposal Seven), filed August 5, 2015.

2. Comments are due no later than September 25, 2015. Reply comments are due no later than October 16, 2015.

3. Pursuant to 39 U.S.C. 505, the Commission appoints Katalin K. Clendenin to serve as an officer of the Commission (Public Representative) to represent the interests of the general public in this docket.

4. The Secretary shall arrange for publication of this Order in the **Federal Register**.

By the Commission.

Ruth Ann Abrams,

Acting Secretary.

BILLING CODE 7710–FW–P

POSTAL REGULATORY COMMISSION

39 CFR Part 3050

[Docket No. RM2015–18; Order No. 2655]

Periodic Reporting

AGENCY: Postal Regulatory Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Commission is noticing a recent Postal Service filing requesting that the Commission initiate an informal rulemaking proceeding to consider changes to analytical principles relating to periodic reports (Proposal Nine). This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* September 8, 2015. *Reply Comments are due:* September 22, 2015.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at *http://www.prc.gov.* Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

I. Introduction

On August 5, 2015, the Postal Service filed a petition pursuant to 39 CFR 3050.11 requesting that the Commission initiate an informal rulemaking proceeding to consider changes to analytical principles relating to the Postal Service's periodic reports.[1] Proposal Nine is attached to the Petition and proposes an analytical method change relating to bottom-up costs for new Periodicals Mail Carrier Route bundle and container entry options. Petition at 1. This Petition was filed in response to Order No. 2472, which directed the Postal Service to ''. . . file a proposed methodology for determining the bottom-up costs for the new Periodicals Mail Carrier Route bundle and container entry options, as described in the body of [Order No. 2472], within 90 days of the date of [Order No. 2472].'' [2]

II. Summary of Proposal

Under Proposal Nine, the Postal Service asserts that no changes to the methodology used to produce avoided cost estimates for Periodicals Mail Carrier Route bundle and container entry options is necessary and instead proposes changes to the model presentation that explicitly identify the bottom-up costs of processing Carrier Route pallets. Petition, Proposal Nine at 1, 2.

When a mailing has sufficient density to prepare 5-Digit or 5-Digit Scheme pallets, the mailer presorts nearly all of the mail on the pallet into Carrier Route bundles. *Id.* at 1. The Postal Service represents that in Fiscal Year 2014, only one-half of one percent of the periodicals on such pallets were prepared in 5-Digit bundles. *Id.* The Postal Service states that the 5-Digit mail on these pallets generally consists of residual pieces for the few routes that lack sufficient density to qualify for Carrier Route rates. *Id.*

The Postal Service represents that for this reason it processes Carrier Route pallets (5-Digit or 5-Digit Scheme pallets containing only Carrier Route bundles) identically to other 5-Digit pallets. *Id.* at 1–2. The Postal Service explains that all pallets are cross-docked to the delivery unit for distribution of bundles to carriers. *Id.* at 2. The Postal Service states that the Carrier Route pallet rate encourages mailers to prepare Carrier Route pallets and to move any residual 5-Digit bundles to containers that would be distributed in the plant. *Id.* The Postal Service represents this enables it to process the residual 5-Digit bundles on the Automated Flats Sorting Machine 100, rather than via manual processing. *Id.*

According to the Postal Service, because the processing of Carrier Route pallets and other 5-Digit pallets does not differ, it proposes no changes to the methodology used to produce estimates of avoided costs. *Id.* The Postal Service represents that the changes it proposes to the USPS–FY14–11 Periodicals Model in Docket No. ACR2014 explicitly identify the costs avoided. *Id.* Further, the Postal Service states that it has incorporated Modifications 1 and 9, described in Section One of Proposal Seven,[3] into the Periodicals Model filed with the Petition as an Excel spreadsheet. *Id.*

III. Initial Commission Action

The Commission establishes Docket No. RM2015–18 for consideration of matters raised by the Petition. Additional information concerning the Petition may be accessed via the Commission's Web site at *http://www.prc.gov.* Interested persons may submit comments on the Petition and Proposal Nine no later than September 8, 2015. Reply comments are due no later than September 22, 2015. Pursuant to 39 U.S.C. 505, Lawrence Fenster is designated as officer of the Commission (Public Representative) to represent the interests of the general public in this proceeding.

IV. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. RM2015–18 for consideration of the matters raised by the Petition of the United States Postal Service for the Initiation of a Proceeding to Consider Proposed Changes in Analytical Principles (Proposal Nine), filed August 5, 2015.

2. Comments are due no later than September 8, 2015. Reply comments are due no later than September 22, 2015.

3. Pursuant to 39 U.S.C. 505, the Commission appoints Lawrence Fenster to serve as officer of the Commission (Public Representative) to represent the interests of the general public in this docket.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

Ruth Ann Abrams,

Acting Secretary.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R06–OAR–2015–0117; FRL–9931–11–Region 6]

Determination of Attainment; Texas; Houston-Galveston-Brazoria 1997 Ozone Nonattainment Area; Determination of Attainment of the 1997 Ozone Standard

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to determine that the Houston-Galveston-Brazoria (HGB) 8-hour ozone nonattainment area is currently attaining the 1997 ozone National Ambient Air Quality Standard (NAAQS). This determination is based upon certified ambient air monitoring data that show the area has monitored attainment of the 1997 ozone NAAQS for the 2012–2014 monitoring period and continues to monitor attainment of the NAAQS based on preliminary 2015 data. If this proposed determination is made final, the requirements for this area to submit an attainment demonstration, a reasonable further progress (RFP) plan, contingency measures, and other State Implementation Plan (SIP) documents related to attainment of the 1997 ozone NAAQS shall be suspended for so long as the area continues to attain the 1997 ozone NAAQS. This proposed action is consistent with EPA's interpretation of certain requirements of part D of title I of the Clean Air Act (CAA or Act).

DATES: Comments must be received on or before September 16, 2015.

ADDRESSES: Submit your comments, identified by Docket No. EPA–R06–OAR–2015–0117, by one of the following methods:

- *www.regulations.gov.* Follow the on-line instructions.
- *Email:* Ms. Wendy Jacques at *jacques.wendy@epa.gov.*
- *Mail or delivery:* Mr. Guy Donaldson, Chief, Air Planning Section (6PD–L), Environmental Protection Agency, 1445 Ross Avenue, Suite 1200, Dallas, Texas 75202–2733.

Instructions: Direct your comments to Docket No. EPA–R06–OAR–2015–0117. The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *www.regulations.gov*, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit electronically any information that you consider to be CBI or other information whose disclosure is restricted by statute. The *www.regulations.gov* Web site is an ''anonymous access'' system, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *www.regulations.gov* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD–ROM you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: The index to the docket for this action is available electronically at *www.regulations.gov* and in hard copy at EPA Region 6, 1445 Ross Avenue, Suite 700, Dallas, Texas. While all documents in the docket are listed in the index, some information may be publicly available only at the hard copy location (*e.g.*, copyrighted material), and some may not be publicly available at either location (*e.g.*, CBI). Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional information on submitting comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Ms. Wendy Jacques, (214) 665–7395, *jacques.wendy@epa.gov.* To inspect the hard copy materials, please contact Ms. Jacques or Mr. Bill Deese at (214) 665–7253.

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us,'' and ''our'' means EPA.

I. Background

Section 109 of the Act requires the EPA to establish a NAAQS for pollutants that ''may reasonably be anticipated to endanger public health and welfare'' and to develop a primary and secondary standard for each NAAQS. The primary standard is designed to protect human health with an adequate margin of safety and the secondary standard is designed to protect public welfare and the environment. The EPA has set NAAQS for six common air pollutants, referred to as criteria pollutants: carbon monoxide, lead, nitrogen dioxide, ozone, particulate matter, and sulfur dioxide. These standards present state and local governments with the minimum air quality levels they must meet to comply with the Act. Also, these standards provide information to residents of the United States about the air quality in their communities.

Ozone is a gas composed of three oxygen atoms. Ground-level ozone is generally not emitted directly from a vehicle's exhaust or an industrial smokestack, but is created by a chemical reaction between volatile organic compounds (VOCs) and oxides of nitrogen (NO_X) in the presence of sunlight.[1] Ozone is known primarily as a summertime air pollutant. Motor vehicle exhaust and industrial emissions, gasoline vapors, chemical solvents and natural sources emit NO_X and VOCs. Urban areas tend to have high concentrations of ground-level ozone, but areas without significant industrial activity and with relatively low vehicular traffic are also subject to increased ozone levels because wind carries ozone and its precursors hundreds of miles from their sources.[2]

On July 18, 1997, the EPA promulgated an 8-hour ozone NAAQS of 0.08 parts per million (ppm), known as the 1997 ozone standard. See 62 FR 38856 and 40 CFR 50.10. Under the EPA regulations at 40 CFR part 50, Appendix I, the 1997 ozone standard is attained when the 3-year average of the annual fourth highest daily maximum 8-hour average ambient ozone concentration is less than or equal to 0.08 ppm.

On April 30, 2004, the EPA designated and classified the 8-county HGB area (consisting of Brazoria, Chambers, Fort Bend, Galveston, Harris, Liberty, Montgomery and Waller counties) as a Moderate nonattainment area under the 1997 ozone standard with an attainment date of no later than

[1] VOC and NO_X are often referred to as ''precursors'' to ozone formation.

[2] For additional information on ozone, please visit *www.epa.gov/groundlevelozone.*

June 15, 2010 (see 69 FR 23858 and 69 FR 23951). On June 15, 2007, we received a request from the Governor of Texas seeking voluntary reclassification of the HGB area from a Moderate nonattainment area to a Severe nonattainment area under the 1997 ozone standard, which we approved on October 1, 2008 (73 FR 56983).[3] Subsequently, the State submitted the Reasonable Further Progress (RFP) and Attainment Demonstration (AD) SIPs for the HGB Severe area under the 1997 ozone standard. These RFP and AD SIPs were approved on January 2, 2014 (see 79 FR 51 and 79 FR 57, respectively).

On March 27, 2008 (73 FR 16436), the EPA promulgated a revised 8-hour ozone NAAQS of 0.075 ppm (the 2008 ozone standard). On April 30, 2012, the EPA promulgated designations under the 2008 ozone standard (77 FR 30088) and in that action the EPA designated the 8-county HGB area as a Marginal ozone nonattainment area.[4] The rule to implement the 2008 ozone standard was finalized on March 6, 2014 (see 80 FR 12264) and in that action the EPA revised the Clean Data Policy [5] to include the 2008 ozone NAAQS and any prior ozone NAAQS. That is, upon a determination by the EPA that an area designated nonattainment for the 2008 ozone NAAQS, or for any prior ozone NAAQS, has attained the relevant standard, the requirements for such area to submit attainment demonstrations and associated RFP plans, contingency measures for failure to attain or make reasonable progress and other planning SIPs required under section 182 of the Act related to attainment-of the 2008 ozone NAAQS, or for any prior NAAQS for which the determination has been made, shall be suspended until such time as: (1) The area is redesignated to attainment for that NAAQS or a redesignation substitute is approved as appropriate, at which time the requirements no longer apply; or (2) the EPA determines that the area has violated that NAAQS, at which time the area is again required to submit such plans. See 80 FR 12264, 12317 and 40 CFR 51.1118.

If the EPA's determination that the HGB area is currently attaining the 1997 ozone standard is finalized, 40 CFR 51.1118 provides that the requirements for the TCEQ to submit certain RFP plans, attainment demonstrations, contingency measures and any other attainment planning requirements of the CAA related to attainment of that standard in the HGB area shall be suspended for as long as the area continues to attain the standard. This action is known as a Clean Data Determination or CDD. However, a CDD does not constitute a redesignation to attainment under section 107(d)(3)(E) of the Act, and if the EPA determines that the area subsequently violates the standard, that suspension of the requirement to submit the attainment planning SIP provisions is lifted, and those requirements are once again due. Even though the EPA has finalized revocation of the 1997 eight-hour ozone NAAQS, under 40 CFR 51.1118, an area remains subject to the obligations for a revoked NAAQS until either (i) the area is redesignated to attainment for the 2008 ozone NAAQS; or (ii) the EPA approves a demonstration for the area in a redesignation substitute procedure for a revoked NAAQS per the provisions of § 51.1105(b). Under this redesignation substitute procedure for a revoked NAAQS, and for this limited anti-backsliding purpose, the demonstration must show that the area has attained that revoked NAAQS due to permanent and enforceable emission reductions and that the area will maintain that revoked NAAQS for 10 years from the date of the EPA's approval of this showing. We also note that the CDD does not constitute a Determination of Attainment by an Area's Attainment Date under sections 179(c) and 181(b)(2) of the Act.

II. The EPA's Evaluation of the HGB Data

For ozone, an area is considered to be attaining the 1997 ozone NAAQS if there are no violations, as determined in accordance with 40 CFR part 50, based on three complete, consecutive calendar years of quality-assured air quality monitoring data. Under the EPA regulations at 40 CFR part 50, the 1997 ozone standard is attained when the 3-year average of the annual fourth-highest daily maximum 8-hour average ozone concentrations at an ozone monitor is less than or equal to 0.08 parts per million (ppm), (*i.e.*, 0.084 ppm, when rounding, based on the truncating conventions in 40 CFR part 50, Appendix I). This 3-year average is referred to as the design value. When the design value is less than or equal to 0.084 ppm at each monitor within the area, then the area is meeting the NAAQS. Also, the data completeness requirement is met when the average percent of days with valid ambient monitoring data is greater than or equal to 90%, and no single year has less than 75% data completeness as determined in Appendix I of 40 CFR part 50. The data must be collected and quality-assured in accordance with 40 CFR part 58, and recorded in the EPA Air Quality System (AQS). The monitors generally should have remained at the same location for the duration of the monitoring period required for demonstrating attainment. For ease of communication, many reports of ozone concentrations are given in parts per billion (ppb); ppb = ppm × 1,000. Thus, 0.084 ppm equals 84 ppb.

The EPA reviewed the HGB area ozone monitoring data from ambient ozone monitoring stations for 2012–2014 and through July 2015. The 2012–2014 data for all the ozone monitors in the HGB area have been quality assured and certified by the EPA. The design value for 2012–2014 is 80 ppb. At the time of this writing, the preliminary ozone data for 2015 are posted on the Texas Commission on Environmental Quality (TCEQ) Web site and in AQS.[6] The data for 2012–2014, and preliminary data for 2015, show that the HGB area is attaining the 1997 ozone NAAQS.

Table 1 shows the fourth-highest daily maximum 8-hour average ozone concentrations for the HGB nonattainment area monitors for the years 2012–2014. (To find the overall design value for the area for a given year, simply find the highest design value from any of the 20 monitors for that year.)

[3] The attainment date for the HGB Severe nonattainment area is as expeditiously as practicable, but not later than June 15, 2019.

[4] The EPA's actions herein do not address the HGB nonattainment area for the 2008 ozone standard.

[5] The EPA initially issued the Clean Data Policy in 1995, ''RFP, Attainment Demonstration, and Related Requirements for Ozone Nonattainment Areas Meeting the Ozone National Ambient Air Quality Standard,'' Memorandum from John S. Seitz, Director, Office of Air Quality Planning and Standards, May 10, 1995. For purposes of the 1997 ozone standard, we codified that policy at 40 CFR 51.918. This codified policy was upheld by the D.C. Circuit in *NRDC* v. *EPA*, 571 F.3d 1245 (D.C. 2009). The policy memo is in the docket for this rulemaking.

[6] See *http://www.tceq.texas.gov/agency/data/ozone_data.html*. Preliminary data for the first quarter of 2015 are posted in AQS and are provided in the docket for this rulemaking.

[1] These ozone monitors have remained in the same location for the duration of the monitoring period from 2012 to 2014. The TCEQ Web site includes monitoring data for the Texas Avenue site, but Table 1 here does not. Data from the Texas Avenue site is excluded because the site does not meet siting criteria required by 40 CFR part 58 Appendix E. The TCEQ has requested NAAQS exclusion for the pollutants monitored at this site since 2002. The TCEQ ozone monitors and data are posted at *https://www.tceq.texas.gov/cgi-bin/compliance/monops/8hr_attainment.pl.*

As shown in Table 1, the 8-hour ozone design value for 2012–2014, which is based on a three-year average of the fourth-highest daily maximum average ozone concentration at the monitor recording the highest concentrations, is 80 ppb, which meets the 1997 ozone NAAQS. Data for 2015 not yet certified also indicate that the area continues to attain the 1997 ozone NAAQS. In addition, ozone data for 2015 that are available in the EPA AQS database show this area continues to attain the 1997 ozone NAAQS. The AQS data reports for the HGB area for the three years 2012 through 2014 and the first quarter of 2015 are included in the docket for this rulemaking.

III. Proposed Action

In accordance with 40 CFR 51.1118, the EPA is proposing to determine that the HGB 8-hour ozone nonattainment area is currently attaining the 1997 ozone NAAQS. This determination is based upon certified ambient air monitoring data that show the area has monitored attainment of the 1997 ozone NAAQS for the 2012–2014 monitoring period and continues to monitor attainment of the NAAQS based on preliminary 2015 data. Thus the requirements for such area to submit attainment demonstrations and associated reasonably available control measures, RFP plans, contingency measures for failure to attain or make reasonable progress and other planning SIPs related to attainment of the 1997 ozone NAAQS shall be suspended until such time as: (1) The area is redesignated to attainment for the 1997 ozone NAAQS or a redesignation substitute is approved as appropriate, at which time the requirements no longer apply; or (2) the EPA determines that the area has violated the 1997 ozone NAAQS, at which time the area is again required to submit such plans. This proposal is consistent with our interpretation of certain requirements of part D of title I of the Act.

IV. Statutory and Executive Order Reviews

This action proposes to make a determination of attainment based on air quality, and would, if finalized, result in the suspension of certain Federal requirements, and it would not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a ''significant regulatory action'' subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because it merely makes a determination based on air quality data.

[EPA–R09–OAR–2013–0534; FRL–9932–45–Region 9]

Withdrawal of Approval and Disapproval of Air Quality Implementation Plans; California; San Joaquin Valley; Contingency Measures for the 1997 $PM_{2.5}$ Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to withdraw a May 22, 2014 final action approving a state implementation plan (SIP) revision submitted by the State of California under the Clean Air Act (CAA) to address contingency measure requirements for the 1997 annual and 24-hour national ambient air quality standards (NAAQS) in the San Joaquin Valley. Simultaneously, EPA is proposing to disapprove this SIP submission. These proposed actions are in response to a decision issued by the U.S. Court of Appeals for the Ninth Circuit (*Committee for a Better Arvin* v. *EPA,* 786 F.3d 1169 (9th Cir. 2015)) remanding EPA's approval of a related SIP submission and rejecting EPA's rationale for approving plan submissions that rely on California mobile source control measures to meet SIP requirements such as contingency measures, which was a necessary basis for the May 22, 2014 final rule.

DATES: Any comments must arrive by September 16, 2015.

ADDRESSES: Submit comments, identified by docket number EPA–R09–OAR–2013–0534, by one of the following methods:

- *Federal eRulemaking Portal: www.regulations.gov.* Follow the on-line instructions.
- *Email: lo.doris@epa.gov.*
- *Mail or delivery:* Doris Lo, (AIR–2), U.S. Environmental Protection Agency Region 9, 75 Hawthorne Street, San Francisco, CA 94105.

Instructions: All comments will be included in the public docket without change and may be made available online at *www.regulations.gov,* including any personal information provided, unless the comment includes Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Information that you consider CBI or otherwise protected should be clearly identified as such and should not be submitted through *www.regulations.gov* or email. The *www.regulations.gov* Web site is an ''anonymous access'' system, and EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send email directly to EPA, your email address will be automatically captured and included as part of the public comment. If EPA cannot read your comments due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment.

Docket: Generally, documents in the docket for this action are available electronically at *www.regulations.gov* and in hard copy at EPA Region IX, 75 Hawthorne Street, San Francisco, California. While all documents in the docket are listed at *www.regulations.gov,* some information may be publicly available only at the hard copy location (*e.g.,* copyrighted material, large maps), and some may not be publicly available in either location (*e.g.,* CBI). To inspect the hard copy materials in person, please schedule an appointment during normal business hours with the contact listed in the **FOR FURTHER INFORMATION CONTACT** section below.

FOR FURTHER INFORMATION CONTACT: Doris Lo, Air Planning Office (AIR–2), (415) 972–3959, *lo.doris@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us'' and ''our'' refer to EPA.

Table of Contents

I. Background

On July 18, 1997, EPA established new national ambient air quality standards (NAAQS) for particles less than or equal to 2.5 micrometers (μm) in diameter ($PM_{2.5}$), including an annual standard of 15.0 micrograms per cubic meter (μg/m^3) based on a 3-year average of annual mean $PM_{2.5}$ concentrations and a 24-hour (daily) standard of 65 μg/m^3 based on a 3-year average of 98th percentile 24-hour $PM_{2.5}$ concentrations.[1] Effective April 5, 2005, EPA designated the San Joaquin Valley (SJV) area in California as nonattainment for the 1997 annual and 24-hour $PM_{2.5}$ NAAQS.[2] The SJV $PM_{2.5}$ nonattainment area is located in the southern half of California's central valley and includes all or part of eight counties: San Joaquin, Stanislaus, Merced, Madera, Fresno, Tulare, Kings, and the valley portion of Kern.[3] The local air district with primary responsibility for developing state implementation plans (SIPs) to attain the NAAQS in this area is the San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD or District).

Between 2007 and 2011, California made six SIP submittals to address nonattainment area planning requirements for the 1997 annual and 24-hour $PM_{2.5}$ NAAQS in the SJV.[4] We refer to these submittals collectively as the ''2008 $PM_{2.5}$ Plan.'' On November 9, 2011, EPA approved all elements of the 2008 $PM_{2.5}$ Plan except for the contingency measures, which EPA disapproved for failure to satisfy the requirements of CAA section 172(c)(9).[5] On July 3, 2013, the State made a new submission to meet the contingency measure requirements for the 1997 $PM_{2.5}$ NAAQS in the SJV (2013 Contingency Measure Submittal) to correct the deficiencies identified in EPA's November 2011 action disapproving the contingency measure element of the 2008 $PM_{2.5}$ Plan.[6]

On May 22, 2014, EPA fully approved the 2013 Contingency Measure Submittal based on the Agency's conclusion that this SIP submittal corrected then outstanding deficiencies in the CAA section 172(c)(9) contingency measures for the 1997

[1] 62 FR 36852 (July 18, 1997) and 40 CFR 50.7. Effective December 18, 2006, EPA strengthened the 24-hour $PM_{2.5}$ NAAQS by lowering the level to 35 μg/m^3. 71 FR 61144 (October 17, 2006) and 40 CFR 50.13. Effective March 18, 2013, EPA strengthened the primary annual $PM_{2.5}$ NAAQS by lowering the level to 12 μg/m^3. 78 FR 3086 (January 15, 2013) and 40 CFR 50.18. In this preamble, all references to the $PM_{2.5}$ NAAQS, unless otherwise specified, are to the 1997 24-hour standard (65 μg/m^3) and annual standard (15.0 μg/m^3) as codified in 40 CFR 50.7.

[2] 70 FR 944 (January 5, 2005), codified at 40 CFR 81.305.

[3] For a precise description of the geographic boundaries of the San Joaquin Valley nonattainment area, see 40 CFR 81.305.

[4] 76 FR 69896 at n. 2 (November 9, 2011) (final action on 2008 $PM_{2.5}$ Plan).

[6] 78 FR 53113, 53115–53116 (August 28, 2013) (proposed action on Contingency Measure SIP).

$PM_{2.5}$ NAAQS.[7] Among other things, the 2013 Contingency Measure Submittal relied on the ongoing implementation of California's mobile source control program as a basis for satisfying the contingency measure requirements in CAA section 172(c)(9). Specifically, the 2013 Contingency Measure Submittal relied on California mobile source measures to achieve 21 tons per day (tpd) of reductions in emissions of nitrogen oxides (NO_X) in 2015, roughly two-thirds of the total amount of NO_X emission reductions (31.6 tpd) necessary to achieve one year's worth of reasonable further progress (RFP) in the SJV.[8] In its May 22, 2014 final action on the 2013 Contingency Measure Submittal, EPA determined that CARB's continuing implementation of these mobile source control measures in 2015, together with other fully-adopted measures implemented by the District in the same timeframe, would provide for an appropriate level of continued emission reduction progress should the SJV area fail to attain the 1997 $PM_{2.5}$ NAAQS by the applicable attainment date, which was April 5, 2015, thereby meeting the requirement for contingency measures for failure to attain.[9] With respect to the requirement for contingency measures for failure to meet RFP requirements, EPA determined that this requirement was moot because the District had already met the RFP requirements relevant to the 2008 $PM_{2.5}$ Plan by the time of EPA's May 22, 2014 action.[10]

Several environmental and community organizations filed a petition for review of EPA's November 9, 2011 action on the 2008 $PM_{2.5}$ Plan, arguing, among other things, that the 2008 $PM_{2.5}$ Plan had calculated the necessary emission reductions and forecasts in part based on state-adopted mobile source measures that are not themselves incorporated into the federally enforceable plan, in violation of the CAA.[11] At that time, EPA's longstanding and consistent practice had been to allow California SIPs to rely on emission reduction credit for state mobile source rules waived or authorized by EPA under section 209 of the Act (''waiver measures'') to meet certain SIP requirements without requiring approval of those control measures into the SIP under section 110 of the Act. On May 20, 2015, the U.S. Court of Appeals for the Ninth Circuit granted the petition with respect to this issue, holding that EPA violated the CAA by approving the 2008 $PM_{2.5}$ Plan even though the plan did not include the waiver measures on which the plan relied to achieve its emission reduction goals. *Committee for a Better Arvin, et al.* v. *EPA,* 786 F.3d 1169 (9th Cir. 2015) (*CBA*) (partially granting and partially denying petition for review). The court rejected EPA's arguments supporting the Agency's longstanding practice, finding that section 110(a)(2)(A) of the Act plainly mandates that all control measures on which states rely to attain the NAAQS must be ''included'' in the SIP and subject to enforcement by EPA and citizens. The court remanded EPA's November 9, 2011 action for further proceedings consistent with the decision.

Separately, environmental and community organizations also filed a petition for review of EPA's May 22, 2014 action on the 2013 Contingency Measure Submittal, arguing, among other things, that EPA violated the CAA by approving that submittal even though it did not include the waiver measures on which it relied to achieve the necessary emission reductions to meet contingency measure requirements.[12] On June 10, 2015, EPA filed an unopposed motion for voluntary remand of the May 22, 2014 final rule without vacatur based, *inter alia,* on the Agency's substantial and legitimate need to reexamine this rulemaking in light of the Ninth Circuit's May 20, 2015 decision in *CBA*.[13] As explained in EPA's motion, the 2013 Contingency Measure Submittal that EPA approved in the May 22, 2014 rulemaking relied upon waiver measures to achieve a significant percentage of the emission reductions necessary to comply with the statutory requirement for contingency measures, and these waiver measures are not included in the SIP.[14] EPA moved the court for an order remanding the May 22, 2014 final rule to allow the Agency to reconsider it in light of the *CBA* decision.[15] On June 15, 2015, the Ninth Circuit granted EPA's motion and remanded the petition for review to EPA.[16]

II. Proposed Action and Clean Air Act Consequences

As noted above, the Ninth Circuit rejected EPA's prior interpretation of the CAA under which EPA had allowed California SIPs to rely on waiver measures without requiring approval of those measures into the SIP in accordance with section 110 of the Act. This interpretation formed a necessary basis for EPA's approval of the 2013 Contingency Measure Submittal.[17] In response to the court's ruling in *CBA,* we are proposing to withdraw our May 22, 2014 approval of the 2013 Contingency Measure Submittal (79 FR 29327) because it was predicated on an interpretation of the CAA that has been rejected by the Ninth Circuit. For the same reason, we are proposing to disapprove the 2013 Contingency Measure Submittal for failure to satisfy the requirements of the Act. This proposed withdrawal and disapproval, if finalized, would have the effect of removing the 2013 Contingency Measure Submittal from the applicable California SIP and deleting the provisions in 40 CFR 52.220(c) where EPA's approval of the SIP submittal is currently codified.[18]

Under section 179(a) of the CAA, final disapproval of a SIP submittal that addresses a requirement of part D, title I of the Act or is required in response to a finding of substantial inadequacy as described in CAA section 110(k)(5) (SIP Call) starts a mandatory sanctions clock. Disapproval of a SIP element also triggers the requirement under CAA section 110(c) for EPA to promulgate a FIP no later than 2 years from the date of the disapproval unless the State corrects the deficiency, and the Administrator approves the plan or plan revision, before the Administrator promulgates such FIP.

EPA is proposing to determine that this disapproval of the 2013 Contingency Measure Submittal does not start a mandatory sanctions clock or FIP clock because the specific type of contingency measure at issue in that submittal is no longer a required attainment plan element under the facts and circumstances of this situation. CARB submitted the 2013 Contingency Measure Submittal to address the contingency measure requirement in CAA section 172(c)(9) as applied to the 2008 $PM_{2.5}$ Plan, which provided for attainment of the 1997 $PM_{2.5}$ NAAQS by April 5, 2015, the latest permissible attainment date for this area under

[18] *See* 40 CFR 52.220(c)(438)(ii).

subpart 1 of part D, title I of the Act.[19] Thus, CARB intended the specific measures to be contingency measures that would apply in the event of a failure to attain by April 5, 2015. However, intervening events have affected the applicable requirements for contingency measures for this area. A January 2013 decision of the D.C. Circuit Court of Appeals (*NRDC* v. *EPA,* 706 F.3d 428 (D.C. Cir. 2013)) held that EPA must implement the 1997 $PM_{2.5}$ NAAQS in accordance with the requirements of subpart 4 of Part D, title I of the Act. In order to address the requirements of subpart 4, EPA promulgated a rulemaking to classify all existing $PM_{2.5}$ nonattainment areas, including SJV, as ''Moderate'' nonattainment areas and to provide additional time for states to make or supplement SIP submissions in order to meet the requirements of subpart 4.[20] On April 7, 2015, EPA determined that the SJV area could not attain by the applicable attainment date (*i.e.,* April 5, 2015) and therefore reclassified the area from ''Moderate'' to ''Serious.'' As a consequence of the SJV area's reclassification as a Serious area for the 1997 $PM_{2.5}$ NAAQS, California is now required to submit a Serious area plan, including both a demonstration that the plan provides for attainment of the 1997 $PM_{2.5}$ standards in the SJV by the Serious area attainment date, which is December 31, 2015, and contingency measures to be implemented if the area fails to make RFP or to attain by that date.[21] Another consequence of this reclassification, however, is that the specific requirement for contingency measures for failure to attain as a Moderate area plan requirement was superseded and eliminated.[22] Thus, the specific contingency measures at issue in the 2013 Contingency Measure Submittal are no longer required and disapproval of those specific measures should not be a basis for sanctions or a FIP under these facts and circumstances.

Our proposed disapproval of the 2013 Contingency Measure Submittal, if finalized, would not trigger sanctions or FIP clocks because the contingency measure requirement that this SIP submittal addressed has been superseded by different planning obligations under subpart 4 of part D, title I of the Act. That is, because the State submitted the 2013 Contingency Measure Submittal to address a contingency measure requirement for failure to attain by a statutory attainment date that no longer applies to the area (April 5, 2015), this SIP submittal no longer addresses an applicable requirement of part D, title I of the Act, and our disapproval of it therefore would not trigger sanctions. For the same reason, our disapproval of the 2013 Contingency Measure Submittal would not create any deficiency in a mandatory component of the SIP for this area and, therefore, would not trigger the obligation for EPA to promulgate a FIP under section 110(c) to address this issue.

III. Request for Public Comment

We will accept comments from the public on these proposals for the next 30 days. The deadline and instructions for submission of comments are provided in the ''Date'' and ''Addresses'' sections at the beginning of this preamble.

IV. Statutory and Executive Order Reviews

A. Executive Order 12866, Regulatory Planning and Review

This action is not a ''significant regulatory action'' under the terms of Executive Order (EO) 12866 (58 FR 51735, October 4, 1993) and is therefore not subject to review under the EO.

B. Paperwork Reduction Act

This action does not impose an information collection burden under the provisions of the Paperwork Reduction Act, 44 U.S.C. 3501 *et. seq.,* because this proposed SIP disapproval under section 110 and subchapter I, part D of the Clean Air Act will not in-and-of itself create any new information collection burdens but simply disapproves certain State requirements submitted for inclusion into the SIP. Burden is defined at 5 CFR 1320.3(b).

C. Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) generally requires an agency to conduct a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and small governmental jurisdictions. For purposes of assessing the impacts of today's rule on small entities, small entity is defined as: (1) A small business as defined by the Small Business Administration's (SBA) regulations at 13 CFR 121.201; (2) a small governmental jurisdiction that is a government of a city, county, town, school district or special district with a population of less than 50,000; and (3) a small organization that is any not-for-profit enterprise which is independently owned and operated and is not dominant in its field.

After considering the economic impacts of today's proposed rule on small entities, I certify that this action will not have a significant impact on a substantial number of small entities. This rule does not impose any requirements or create impacts on small entities. This proposed SIP disapproval under section 110 and subchapter I, part D of the Clean Air Act will not in-and-of itself create any new requirements but simply disapproves certain State requirements submitted for inclusion into the SIP. Accordingly, it affords no opportunity for EPA to fashion for small entities less burdensome compliance or reporting requirements or timetables or exemptions from all or part of the rule. The fact that the Clean Air Act prescribes that various consequences (*e.g.,* higher offset requirements) may or will result from disapproval actions does not mean that EPA either can or must conduct a regulatory flexibility analysis for this action. Therefore, this action will not have a significant economic impact on a substantial number of small entities.

We continue to be interested in the potential impacts of this proposed rule on small entities and welcome comments on issues related to such impacts.

D. Unfunded Mandates Reform Act

This action contains no Federal mandates under the provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), 2 U.S.C. 1531–1538 for State, local, or tribal governments or the private sector.'' EPA has determined that the proposed disapproval action does not include a Federal mandate that may result in estimated costs of $100 million or more to either State, local, or tribal governments in the aggregate, or to the private sector. This action proposes to

[19] 80 FR 1482, 1483 at n. 10 (January 12, 2015) (proposed rule to reclassify SJV as Serious nonattainment for 1997 $PM_{2.5}$ NAAQS).

[20] 79 FR 31566 (June 2, 2014).

[21] 80 FR 18528 (April 7, 2015). California has requested an extension of the Serious area attainment date pursuant to CAA section 188(e), and EPA is currently evaluating that request. *See* letter dated June 25, 2015, from Richard Corey, Executive Officer, California Air Resources Board, to Jared Blumenfeld, Regional Administrator, EPA Region 9, transmitting ''2015 Plan for the $PM_{2.5}$ Standard.''

[22] EPA does not interpret the requirement for failure-to-attain contingency measures to apply to Moderate $PM_{2.5}$ nonattainment areas that cannot practicably attain the NAAQS by the statutory attainment date. Rather, EPA believes it is appropriate for the state to identify and adopt attainment contingency measures as part of the Serious area attainment plan that it will develop once EPA reclassifies the area. *See* 59 FR 41998, 42015 (August 16, 1994).

disapprove pre-existing requirements under State or local law, and imposes no new requirements. Accordingly, no additional costs to State, local, or tribal governments, or to the private sector, result from this action.

E. Executive Order 13132, Federalism

Executive Order 13132, entitled ''Federalism'' (64 FR 43255, August 10, 1999), requires EPA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' is defined in the Executive Order to include regulations that have ''substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.''

This action does not have federalism implications. It will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132, because it merely disapproves certain State requirements for inclusion into the SIP and does not alter the relationship or the distribution of power and responsibilities established in the Clean Air Act. Thus, Executive Order 13132 does not apply to this action.

F. Executive Order 13175, Coordination With Indian Tribal Governments

This action does not have tribal implications, as specified in Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP EPA is proposing to disapprove would not apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law. Thus, Executive Order 13175 does not apply to this action.

G. Executive Order 13045, Protection of Children From Environmental Health Risks and Safety Risks

EPA interprets EO 13045 (62 FR 19885, April 23, 1997) as applying only to those regulatory actions that concern health or safety risks, such that the analysis required under section 5–501 of the EO has the potential to influence the regulation. This action is not subject to EO 13045 because it is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997). This proposed SIP disapproval under section 110 and subchapter I, part D of the Clean Air Act will not in-and-of itself create any new regulations but simply disapproves certain State requirements submitted for inclusion into the SIP.

H. Executive Order 13211, Actions That Significantly Affect Energy Supply, Distribution, or Use

This proposed rule is not subject to Executive Order 13211 (66 FR 28355, May 22, 2001) because it is not a significant regulatory action under Executive Order 12866.

I. National Technology Transfer and Advancement Act

Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (''NTTAA''), Public Law 104–113, 12(d) (15 U.S.C. 272 note) directs EPA to use voluntary consensus standards in its regulatory activities unless to do so would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (*e.g.,* materials specifications, test methods, sampling procedures, and business practices) that are developed or adopted by voluntary consensus standards bodies. NTTAA directs EPA to provide Congress, through OMB, explanations when the Agency decides not to use available and applicable voluntary consensus standards.

The EPA believes that this action is not subject to requirements of Section 12(d) of NTTAA because application of those requirements would be inconsistent with the Clean Air Act.

J. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Population

Executive Order (EO) 12898 (59 FR 7629 (Feb. 16, 1994)) establishes federal executive policy on environmental justice. Its main provision directs federal agencies, to the greatest extent practicable and permitted by law, to make environmental justice part of their mission by identifying and addressing, as appropriate, disproportionately high and adverse human health or environmental effects of their programs, policies, and activities on minority populations and low-income populations in the United States.

EPA lacks the discretionary authority to address environmental justice in this rulemaking.

Relaxation of the Federal Reid Vapor Pressure Gasoline Volatility Standard for Mecklenburg and Gaston Counties, North Carolina

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) is proposing to approve a request from the state of North Carolina for the EPA to relax the Reid Vapor Pressure (RVP) standard applicable to gasoline introduced into commerce from June 1 to September 15 of each year for Mecklenburg and Gaston counties, North Carolina. Specifically, the EPA is proposing to amend the regulations to allow the RVP standard for Mecklenburg and Gaston counties to rise from 7.8 pounds per square inch (psi) to 9.0 psi for gasoline. The EPA has preliminarily determined that this change to the federal RVP regulation is consistent with the applicable provisions of the Clean Air Act (CAA).

DATES: Written comments must be received on or before September 16, 2015 unless a public hearing is requested by September 1, 2015. If the EPA receives such a request, we will publish information related to the timing and location of the hearing and a new deadline for public comment.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA–HQ–OAR–2015–0208, to the *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. The EPA may publish any comment received to its public docket. Do not submit electronically any information you

consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. If you need to include CBI as part of your comment, please visit *http://www.epa.gov/dockets/comments.html* for instructions. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make.

The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.* on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *http://www2.epa.gov/dockets/commenting-epa-dockets.*

FOR FURTHER INFORMATION CONTACT: Patty Klavon, Office of Transportation and Air Quality, Environmental Protection Agency, 2000 Traverwood Drive, Ann Arbor, Michigan, 48105; telephone number: (734) 214–4476; fax number: (734) 214–4052; email address: *klavon.patty@epa.gov.*

SUPPLEMENTARY INFORMATION: The contents of this preamble are listed in the following outline:

I. General Information

A. This Proposed Rule Is Published Parallel to a Direct Final Rule

In the ''Rules and Regulations'' section of this **Federal Register**, the EPA is making this revision as a direct final rule without prior proposal because the EPA views this revision as noncontroversial and anticipates no adverse comment. The rationale for this rulemaking is described both in this proposal and in the direct final rule.

The regulatory text for this proposed rule is included in the direct final rule, and parties should review that rule for the regulatory text. If the EPA receives no adverse comment, the EPA will not take further action on this proposed rule. If the EPA receives adverse comment on this rule or any portion of this rule, the EPA will withdraw the direct final rule or the portion of the rule that received adverse comment. All public comments received will then be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this rulemaking. Any parties interested in commenting must do so at this time.

B. Does this action apply to me?

Entities potentially affected by this proposed rule are fuel producers and distributors who do business in North Carolina.

Examples of potentially regulated entities	NAICS [1] codes
Petroleum refineries	324110
Gasoline Marketers and Distributors	424710 424720
Gasoline Retail Stations	447110
Gasoline Transporters	484220 484230

[1] North American Industry Classification System.

The above table is not intended to be exhaustive, but rather provides a guide for readers regarding entities likely to be regulated by this action. The table lists the types of entities of which the EPA is aware that potentially could be affected by this proposed rule. Other types of entities not listed on the table could also be affected. To determine whether your organization could be affected by this proposed rule, you should carefully examine the regulations in 40 CFR 80.27. If you have questions regarding the applicability of this action to a particular entity, call the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this preamble.

C. What is the agency's authority for taking this action?

The statutory authority for this action is granted to the EPA by Sections 211(h) and 301(a) of the Clean Air Act, as amended; 42 U.S.C. 7545(h) and 7601(a).

II. Public Participation

The EPA will not hold a public hearing on this matter unless a request is received by the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble by September 1, 2015. If the EPA receives such a request, we will publish information related to the timing and location of the hearing and a new deadline for public comment.

III. Background and Proposal

A. Summary of the Proposal

The EPA is proposing to approve a request from the state of North Carolina to change the summertime RVP standard for Mecklenburg and Gaston counties, North Carolina from 7.8 psi to 9.0 psi by amending the EPA's regulations at 40 CFR 80.27(a)(2). In a previous rulemaking, the EPA approved a redesignation request and maintenance plan for the Charlotte-Gastonia-Salisbury, North Carolina 2008 ozone area (''the Charlotte area'') and a CAA section 110(l) non-interference demonstration that relaxing the federal RVP requirement from 7.8 psi to 9.0 psi for gasoline sold from June 1 to September 15 of each year in Mecklenburg and Gaston counties would not interfere with maintenance of any NAAQS in the Charlotte area, including the 2008 ozone NAAQS, or with any other applicable CAA requirement. Mecklenburg and Gaston counties are part of the Charlotte area. For more information on North Carolina's redesignation request and maintenance plan for the Charlotte area, please refer to Docket ID. No. EPA–R04–OAR–2015–0275 for the rulemaking that was signed on July 17, 2015.

The preamble for this rulemaking is organized as follows: Section III.B. provides the history of the federal gasoline volatility regulation. Section III.C. describes the policy regarding relaxation of gasoline volatility standards in ozone nonattainment areas that are redesignated as attainment areas. Section III.D. provides information specific to North Carolina's request for Mecklenburg and Gaston counties. Finally, Section IV. briefly discusses the associated direct final rule.

B. History of the Gasoline Volatility Requirement

On August 19, 1987 (52 FR 31274), the EPA determined that gasoline nationwide was becoming increasingly volatile, causing an increase in evaporative emissions from gasoline-powered vehicles and equipment. Evaporative emissions from gasoline, referred to as volatile organic compounds (VOC), are precursors to the formation of tropospheric ozone and contribute to the nation's ground-level ozone problem. Exposure to ground-level ozone can reduce lung function, thereby aggravating asthma and other respiratory conditions, increase susceptibility to respiratory infection, and may contribute to premature death in people with heart and lung disease.

The most common measure of fuel volatility that is useful in evaluating gasoline evaporative emissions is RVP. Under CAA section 211(c), the EPA promulgated regulations on March 22, 1989 (54 FR 11868) that set maximum limits for the RVP of gasoline sold during the regulatory control periods that were established on a state-by-state

basis in the final rule. The regulatory control periods addressed the portion of the year when peak ozone concentrations were expected. These regulations constituted Phase I of a two-phase nationwide program, which was designed to reduce the volatility of gasoline during the high ozone season. On June 11, 1990 (55 FR 23658), the EPA promulgated more stringent volatility controls as Phase II of the volatility control program. These requirements established maximum RVP standards of 9.0 psi or 7.8 psi (depending on the state, the month, and the area's initial ozone attainment designation with respect to the 1-hour ozone NAAQS.)

The 1990 CAA Amendments established a new section 211(h) to address fuel volatility. CAA section 211(h) requires the EPA to promulgate regulations making it unlawful to sell, offer for sale, dispense, supply, offer for supply, transport, or introduce into commerce gasoline with an RVP level in excess of 9.0 psi during the high ozone season. CAA section 211(h) also prohibits the EPA from establishing a volatility standard more stringent than 9.0 psi in an attainment area, except that the EPA may impose a lower (more stringent) standard in any former ozone nonattainment area redesignated to attainment.

On December 12, 1991 (56 FR 64704), the EPA modified the Phase II volatility regulations to be consistent with CAA section 211(h). The modified regulations prohibited the sale of gasoline with an RVP above 9.0 psi in all areas designated attainment for ozone, effective January 13, 1992. For areas designated as nonattainment, the regulations retained the original Phase II standards published on June 11, 1990 (55 FR 23658), which included the 7.8 psi ozone season limitation for certain areas. As stated in the preamble to the Phase II volatility controls and reiterated in the proposed change to the volatility standards published in 1991, the EPA will rely on states to initiate changes to their respective volatility programs. The EPA's policy for approving such changes is described below in Section III.C.

The state of North Carolina has initiated this change by requesting that the EPA relax the 7.8 psi gasoline RVP standard to 9.0 psi for Mecklenburg and Gaston counties, which are subject to the 7.8 gasoline RVP requirement during the summertime ozone season. Accordingly, the state of North Carolina provided a technical demonstration showing that relaxing the federal gasoline RVP requirements in the two counties from 7.8 psi to 9.0 psi would not interfere with maintenance of any NAAQS in the Charlotte area, including the 2008 ozone NAAQS, or with any other applicable CAA requirement.

C. The EPA's Policy Regarding Relaxation of Gasoline Volatility Standards in Ozone Nonattainment Areas That Are Redesignated to Attainment Areas

As stated in the preamble for the EPA's amended Phase II volatility standards (56 FR 64706), any change in the gasoline volatility standard for a nonattainment area that was subsequently redesignated as an attainment area must be accomplished through a separate rulemaking that revises the applicable standard for that area. Thus, for former 1-hour ozone nonattainment areas where the EPA mandated a Phase II volatility standard of 7.8 psi RVP in the December 12, 1991 rulemaking, the federal 7.8 psi gasoline RVP requirement remains in effect, even after such an area is redesignated to attainment, until a separate rulemaking is completed that relaxes the federal gasoline RVP standard in that area from 7.8 psi to 9.0 psi.

As explained in the December 12, 1991 rulemaking, the EPA believes that relaxation of an applicable gasoline RVP standard is best accomplished in conjunction with the redesignation process. In order for an ozone nonattainment area to be redesignated as an attainment area, CAA section 107(d)(3) requires the state to make a showing, pursuant to CAA section 175A, that the area is capable of maintaining attainment for the ozone NAAQS for ten years. Depending on the area's circumstances, this maintenance plan will either demonstrate that the area is capable of maintaining attainment for ten years without the more stringent volatility standard or that the more stringent volatility standard may be necessary for the area to maintain its attainment with the ozone NAAQS. Therefore, in the context of a request for redesignation, the EPA will not relax the gasoline volatility standard unless the state requests a relaxation and the maintenance plan demonstrates to the satisfaction of the EPA that the area will maintain attainment for ten years without the need for the more stringent volatility standard.

North Carolina is requesting relaxation of the federal gasoline RVP standard from 7.8 psi to 9.0 psi for Mecklenburg and Gaston counties concurrent with its request that the EPA approve a redesignation request and maintenance plan for the Charlotte area for the 2008 ozone NAAQS.

D. North Carolina's Request To Relax the Federal Gasoline RVP Requirement for Mecklenburg and Gaston Counties

On March 11, 2015, the state of North Carolina, through the North Carolina Department of Environment and Natural Resources (NCDENR), submitted a redesignation request and maintenance plan for the Charlotte area, which was classified as Marginal for the 2008 ozone NAAQS. Mecklenburg and Gaston counties are part of the Charlotte area. Additionally, the state submitted a CAA section 110(l) non-interference demonstration that removal of the federal RVP requirement of 7.8 psi for gasoline during the summertime ozone season in Mecklenburg and Gaston counties would not interfere with maintenance of any NAAQS, or with any other applicable CAA requirement. Specifically, the state provided a technical demonstration showing that relaxing the federal gasoline RVP requirement in the two counties from 7.8 psi to 9.0 psi would not interfere with maintenance of any NAAQS in the Charlotte area, of which the two counties are part, including the 2008 ozone NAAQS, or with any other applicable CAA requirement.

In a rulemaking that was signed on July 17, 2015, the EPA evaluated and approved North Carolina's March 11, 2015 redesignation request and maintenance plan for the Charlotte area. See Docket ID. No. EPA–R04–OAR–2015–0275. In a separate rulemaking signed on July 17, 2015, the EPA approved North Carolina's non-interference demonstration for Mecklenburg and Gaston counties. See Docket ID. No. EPA–R04–OAR–2015–0260.[1]

Both rulemakings were subject to public notice-and-comment. The EPA received two comments on the redesignation request and maintenance plan rulemaking, and those comments were addressed in the final rule for that rulemaking. The comments received can be found in the docket for that rulemaking (Docket ID. No. EPA–R04–OAR–2015–0275). No comments were received on the non-interference demonstration for Mecklenburg and Gaston counties (Docket ID. No. EPA–R04–OAR–2015–0260).

In this action, the EPA is taking the second and final step in the process by proposing to approve North Carolina's request to relax the summertime ozone season gasoline RVP standard for Mecklenburg and Gaston counties from 7.8 psi to 9.0 psi. Specifically, the EPA

[1] On March 11, 2015, the NCDENR requested that the EPA parallel process the approval of the submission.

is proposing to amend the applicable gasoline RVP standard to allow the gasoline RVP requirements to rise from 7.8 psi to 9.0 psi provided at 40 CFR 80.27(a)(2) for the two counties. This proposal to approve North Carolina's request to relax the summertime ozone season gasoline RVP standard for Mecklenburg and Gaston counties from 7.8 psi to 9.0 psi is based on the previous approval of North Carolina's March 11, 2015 redesignation request and maintenance plan and non-interference demonstration. It is also based on the fact that the Charlotte area is currently in attainment for the both the 1997 ozone NAAQS and the 2008 ozone NAAQS.

IV. Direct Final Rule

A direct final rule that would make the same changes as those proposed in this action appears in the Rules and Regulations section of this **Federal Register**. The EPA is taking direct final action on these revisions because the EPA views the revisions as noncontroversial and anticipates no adverse comment. The EPA has explained the reasons for the amendments in this proposal and in the direct final rule. If no adverse comments are received, no further action will be taken on the proposal, and the direct final rule will become effective as provided in that action.

If the EPA receives adverse comments on the rule or any portion of the rule, the EPA will withdraw the direct final rule or the portion of the rule that received adverse comment. The EPA will publish a timely withdrawal in the **Federal Register** indicating which provisions are being withdrawn. All public comments received will then be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on the subsequent final action. Any parties interested in commenting must do so at this time.

The changes to the regulatory text proposed in this document are identical to those for the direct final rule published in the Rules and Regulations section of this **Federal Register**. For further information, including the regulatory revisions, see the direct final rule published in a separate part of this **Federal Register**.

V. Statutory and Executive Order Reviews

For a complete discussion of all the administrative requirements applicable to this action, see the direct final rule in the Rules and Regulations section of this **Federal Register**.

VI. Legal Authority

The statutory authority for this action is granted to the EPA by Sections 211(h) and 301(a) of the Clean Air Act, as amended; 42 U.S.C. 7545(h) and 7601(a).

RIN 0648–BF02

Taking and Importing Marine Mammals; Taking Marine Mammals Incidental to Northeast Fisheries Science Center Fisheries Research; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed rule; correction; extension of public comment period.

SUMMARY: This document contains corrections to the preamble to the proposed rule published on August 6, 2015, that would establish a framework for authorizing the take of marine mammals incidental to the NEFSC's fisheries research activities in the Atlantic coast region for a five-year period, 2015–2020. This action is necessary to correct typographical errors in the annual estimates presented for Level B harassment of northern bottlenose whales (*Hyperoodon ampullatus*) from 10 to 12. This change accounts for the annual estimate of level B harassment for this species in both inshore (10 individuals) and offshore waters (2 individuals) in the Atlantic coast region.

The **Federal Register** proposed rule published on July 9, 2015, indicated that written comments were due by August 10, 2015, which allowed 30 calendar days for public input. On August 6, 2015, NMFS published a correction and extended the public comment period to August 17, 2015. NMFS has decided to extend the public comment period by an additional 30 calendar days for public input.

DATES: The comment period for the proposed rule published July 9, 2015, at 80 FR 39542, extended August 6, 2015, at 80 FR 46939, has been further extended. NMFS must receive written comments and information no later than September 16, 2015.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2015–0078, by any of the following methods:

- Electronic submission: Submit all electronic public comments via the federal e-Rulemaking Portal. Go to *www.regulations.gov*, enter 0648–BF02 in the ''Search'' box, click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments.
- Mail: Comments should be addressed to Jolie Harrison, Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East West Highway, Silver Spring, MD 20910.

Instructions: NMFS is not responsible for comments sent by any other method, to any other address or individual, or received after the end of the comment period. Attachments to electronic comments will be accepted in Microsoft Word or Excel or Adobe PDF file formats only. To help NMFS process and review comments more efficiently, please use only one method to submit comments. All comments received are a part of the public record. NMFS will generally post the comments on *www.regulations.gov* without change. All personal identifying information (*e.g.*, name, address) voluntarily submitted by the commenter may be publicly accessible. Do not submit confidential business information or otherwise sensitive or protected information. NMFS will accept anonymous comments (enter N/A in the required fields if you wish to remain anonymous).

FOR FURTHER INFORMATION CONTACT: Jeannine Cody, Office of Protected Resources, NMFS, (301) 427–8401.

SUPPLEMENTARY INFORMATION:

Background

NMFS published a proposed rule on July 9, 2015 (80 FR 39542) to establish a framework for authorizing the take of marine mammals incidental to the NEFSC's fisheries research activities in

the Atlantic coast region for a five-year period, 2015–2020. NMFS refers the reader to the July 9, 2015, **Federal Register** notice (80 FR 39542) for background information concerning the proposed regulations. The information presented in the notice of proposed rulemaking is not repeated here. NMFS also published a correction to the proposed rule on August 6, 2015 (80 FR 46939). This correction revises the description contained in the preamble of the estimates of northern bottlenose whales (*Hyperoodon ampullatus*) to be taken by Level B harassment from 10 to 12. This correction presents the total annual estimate of level B harassment for this species in both inshore (10) and offshore waters (2) in the Atlantic coast region. The correction does not affect NMFS' preliminary determinations presented in the proposed rule (80 FR 39542, July 9, 2015).

Need for Correction

As published, the preamble to the proposed regulations contains errors or typographical mistakes which need to be clarified. These errors and omissions were also incorrectly recorded within the proposed regulatory text and should be clarified there as well.

1. On page 46941, in Table 20, the entries for northern bottlenose whales are corrected to read as follows:

TABLE 20—SUMMARY INFORMATION RELATED TO PROPOSED ANNUAL TAKE AUTHORIZATION IN THE ATLANTIC COAST REGION, 2015–2020

Species [1]	Proposed total annual Level B harassment authorization	Percent of estimated population	Proposed total M/SI + Level A authorization, 2015–2020	Estimated maximum annual M/SI + Level A [2]	PBR [3]	% PBR [4]	Stock trend [5]
*	*	*	*	*	*	*	
Northern bottlenose whale	12	n/a	0	0	n/a	—	?
*	*	*	*	*	*	*	

[1] For species with multiple stocks in the Atlantic coast regions or for species groups (*Kogia spp.* and Mesoplodont beaked whales), indicated level of take could occur to individuals from any stock or species (not including coastal and estuarine stocks of bottlenose dolphins).

[2] This column represents the total number of incidents of M/SI + Level A that could potentially accrue to the specified species or stock and is the number carried forward for evaluation in the negligible impact analysis (later in this document). To reach this total, we add one to the total for each pinniped or delphinid that may be captured in longline or gillnet gear, one to the total for each delphinid that may be captured in trawl gear, and one pinniped that may be captured in fyke net gear. This represents the potential that the take of an unidentified pinniped or delphinid could accrue to any given stock captured in that gear. The proposed take authorization is formulated as a five-year total; the annual average is used only for purposes of negligible impact analysis. We recognize that portions of an animal may not be taken in a given year.

[3] See Table 3 and following discussion for more detail regarding PBR.

[4] Estimated maximum annual M/SI + Level A expressed as a percentage of PBR.

[5] See relevant SARs for more information regarding stock status and trends. Interannual increases may not be interpreted as evidence of a trend.

* * * * * * *

2 . On page 46941, in the center column, in the amendatory text for § 219.33, remove ''(Z) Northern bottlenose whale (Hyperoodon ampullatus)—10;'' and add ''(Z) Northern bottlenose whale (Hyperoodon ampullatus)—12;'' in its place.

Dated: August 11, 2015.

Eileen Sobeck,

Assistant Administrator for Fisheries, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection Activities: Proposed Collection; Comment Request—Food Program and Reporting System (FPRS)

AGENCY: Food and Nutrition Service (FNS), USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice invites the general public and other public agencies to comment on a proposed information collection, which is a revision of a currently approved form.

The purpose of the Food Programs Reporting System (FPRS) is to facilitate data gathering for the reporting of data for the Supplemental Nutrition Assistance Program (SNAP) and the Special Nutrition Programs. FPRS consolidated certain programmatic and financial data reporting requirements in an electronic reporting system and is the primary collection point for FNS program performance statistics and financial data from State agencies, Indian Tribal Organizations and U.S. Territories participating in the nutrition assistance programs.

DATES: Written comments must be submitted on or before October 16, 2015.

ADDRESSES: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility; (b) the accuracy of the agency's estimate of the burden hours, including the validity of the methodology and assumptions that were used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical or other technological collection techniques or other forms of information technology.

Comments may be sent to Jane Duffield, Chief, State Administration Branch, Program Accountability and Administration Division, Supplemental Nutrition Assistance Program, U.S. Department of Agriculture, Food and Nutrition Service, 3101 Park Center Drive, Room 818, Alexandria, VA 22302. Comments may also be submitted via fax to the attention of Jane Duffield at 703–605–0795, Room 824, or via email to *SNAP-Ed@fns.usda.gov.* Comments will also be accepted through the Federal eRulemaking Portal. Go to *http://www.regulations.gov* and follow the online instructions for submitting comments electronically.

All written comments will be open for public inspection at the office of FNS during regular business hours (8:30 a.m. to 5:00 p.m. Monday through Friday) at 3101 Park Center Drive, Room 808, Alexandria, Virginia 22302.

All responses to this notice will be summarized and included in the request for the Office of Management and Budget (OMB) approval. All comments will also be a matter of public record.

CONTACT FOR FURTHER INFORMATION: Requests for additional information should be directed to Usha Kalro at *SNAP-Ed@fns.usda.gov.*

SUPPLEMENTARY INFORMATION:

Title: Food Programs Reporting System.

OMB Number: 0584–0594.

Form Number and Name: Worksheet FNS–759 Education and Administrative Reporting System.

Expiration Date: 08/31/2016.

Type of Request: Revision of a currently approved information collection.

Abstract: The purpose of the Education and Administrative Reporting System (EARS) maintained in FPRS is to collect uniform and standard information on nutrition education activities funded through the Supplemental Nutrition Assistance Program—Education (SNAP-Ed) program. The data collected through EARS informs management decisions, supports policy initiatives, and provides documentation for legislative, budget, and other requests that support planning within the agency. FNS intends to update the EARS form so that it reflects changes, specifically those that are a direct result of provisions in the Healthy, Hunger-Free Kids Act (HHFKA) of 2010. In addition, FNS continues to explore other ways to improve upon or incorporate metrics that will enhance the evaluation of SNAP-Ed programs. FNS developed EARS for SNAP's nutrition education component, SNAP-Ed, which is provided for in Section 11 of the Food and Nutrition Act (FNA) 2008 (7 U.S.C. 2020 (f)(3)(B)(ii)). In 2003, the Agency convened a workgroup of diverse stakeholders to assist with this task, including people from the Federal, State, and local levels, as well as academia.

The EARS form (FNS–759) was approved by OMB in Fiscal Year (FY) 2007. FNS implemented the first phase of EARS in FY 2008, which required SNAP State agencies to report on financial items only. Full implementation of EARS reporting requirements was completed in FY 2010. EARS provides uniform data and information about the nutrition education activities of all participating States across the country, including the District of Columbia, the Virgin Islands and Guam. Data gathered through the EARS form includes demographic characteristics of participants receiving nutrition education benefits, information about education topics and strategies, and use of resources. The EARS form is designed as an annual report that SNAP State agencies submit using FNS' web-based Food Program Reporting System, OMB Control No: 0584–0594, Expiration Date 6/30/2017. State agencies submit data between October 15 and December 30 of each year for the prior FY's nutrition education activities.

In 2010, Congress passed the HHFKA. Section 241 of the HHFKA replaced the existing nutrition education program under Section 11(f) of the Food and Nutrition Act (''FNS'' or the ''Act'') (7 U.S.C. 2011 *et seq.*) with the nutrition education and obesity prevention grant program under Section 28. FNS continues to refer to the redesigned program as SNAP-Ed. Changes to the program mandated by the HHFKA require revisions to the currently approved EARS form/worksheet. Some of the major changes to SNAP-Ed are:

(1) A focus on the critical problem of obesity—The program now has a wider range of evidence-based intervention strategies. Specifically, SNAP-Ed includes any combination of educational strategies, accompanied by environmental supports, designed to facilitate the voluntary adoption of healthy food and physical activity choices, as well as other nutrition-related behaviors. It is conducive to the well-being of SNAP participants and other qualifying low-income individuals and may involve programs at complementary organizational and institutional levels in addition to community and public health approaches.

(2) A target population which more closely aligns SNAP-Ed participants with those in other FNS, Federal, and State-administered benefit programs. In the past, SNAP-Ed participants included those receiving SNAP or those eligible to receive SNAP. Following the implementation of the HHFKA, the target population is extended to individuals who are eligible to receive SNAP or other means-tested Federal assistance programs or those residing in a community with a significant low-income population. These means-tested programs include Medicaid and Temporary Assistance for Needy Families, among others.

(3) Requirement for evidence-based interventions—Evidence-based approaches have been defined by the FNS Administrator in consultation with the Director of the Centers for Disease Control and Prevention. FNS has provided States with more flexibility by permitting States to use funds for nutrition education and obesity prevention interventions that are developed by integrating the best available research evidence, practice-based evidence or emerging evidence. In accordance with the SNAP-Ed Guidance, these may include the implementation and measurement of policy, systems and environmental changes (PSEs). Expanding the types of environmental and policy approaches that can be used in SNAP-Ed allows State programs to build upon nutrition education and health promotion efforts in a way that better supports a more comprehensive focus on obesity prevention.

(4) A new funding mechanism—As opposed to matching State funds for SNAP-Ed programs, FNS allocates 100 percent Federal grant funding to States, which may coordinate SNAP-Ed activities through partnerships with public and private entities in order to better leverage their financial resources. The formula proscribed by the HHFKA builds progressively to a 50/50 weighting of SNAP-Ed expenditures to SNAP participation based on the funding from the previous 12-month period ending January 31. For Fiscal Year 2015, 80 percent of the funding was based on expenditures and 10 percent of the funding was based on the State's SNAP participation rate. The 50/50 weighting applies to Fiscal Year 2018 and beyond.

The revised form is available for review with this docket on *www.Regulations.gov,* in Supporting Documents. The proposed modifications to the current EARS form/worksheet include the following, where the items pertain to the proposed draft unless stated otherwise:

- Collect data on the number and percentage of SNAP-Ed eligibles and those reached through Direct Education, Social Marketing and PSE change interventions in a State (Item 1a-e).
- Collect data on the estimated percentage of SNAP-Ed funds expended to reach SNAP-Ed eligibles through the above intervention types (Item 1f).
- Added a statement about the Community Eligibility Provision as a special circumstance for determining SNAP status (Items 2a and 2b).
- Collect data on whether SNAP-Ed participation counts for each age group are actual or estimated values (Items 2a and 2b).
- Collect data on additional settings where education is provided to SNAP-Ed participants (Item 5).
- Collect data on whether Direct Education programs are part of a Social Marketing initiative (Item 6a).
- Collect data on whether Direct Education supports PSEs (Item 6b).
- Collect data on whether direct education programs are part of a social marketing and/or PSE interventions (Item 6a and 6b).
- Removed question 8 on Indirect Education (on the current form) and added the column on ''Source(s) of Data'' to the table ''Description of All Social Marketing Campaigns'' (Item 7).
- Collect data on PSEs (Item 8).
- Collect data focused on classifying partnerships and their role in SNAP-Ed programs (Item 9).
- Removed the last question on funding (Item 9 in the current form) since funds are now 100 percent federal allocations to States according to a specified formula and do not require a State match.

The form has been rearranged to better accommodate the instructions and improve the flow of questions. This revision also reflects an increase in burden estimates. FNS estimates that 53 State agencies will respond once a year for a total of 53 annual responses. The current burden it takes each State agency to respond is 54 burden hours. In the revised data collection instrument, it will take approximately 60 burden hours for each State agency to respond which reflects an increase of six burden hours per State from the last submission. The current burden for this collection is 2,808. FNS calculates the revised total burden for this collection is 3,180 annual burden hours which reflects an increase of 300 burden hours due to program changes and adjustments. There are no recordkeeping requirements imposed by this information collection. As this is a revision to the EARS form within the FPRS system, the total FPRS burden is summarized below.

Affected Public: SNAP State agencies and Business. Respondent Type: Businesses are identified as non-profit organizations serving as implementing partners, such as extension universities, and local program operators.

Estimated Number of Respondents: 3,267.

Number of Responses per Respondent: 7.28191.

Estimated Total Annual Responses: 23,790.

Hours per Response: 3.65157629.

Total Annual Burden Hours (Reporting Only): 86,871.

Dated: August 2, 2015.

Audrey Rowe,

Administrator, Food and Nutrition Service.

BILLING CODE 3410–30–P

DEPARTMENT OF AGRICULTURE

Forest Service

Gallatin Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Gallatin Resource Advisory Committee (RAC) will meet in Bozeman, Montana. The committee is authorized under the Secure Rural Schools and Community Self-Determination Act (the Act) and operates in compliance with the Federal Advisory Committee Act. The purpose of the committee is to improve collaborative relationships and to provide advice and recommendations to the Forest Service concerning projects and funding consistent with Title II of the Act. Additional RAC information, including the meeting agenda and the meeting summary/minutes can be found at the following Web site: *http://*

www.fs.usda.gov/detail/custergallatin/workingtogether/?cid=stelprdb5304491.

DATES: The meeting will be held October 2, 2015, from 9:00 a.m. to 12:30 p.m.

All RAC meetings are subject to cancellation. For status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

ADDRESSES: The meeting will be held at the Bozeman Public Library, Large Community Room, 626 East Main Street, Bozeman, Montana.

Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses when provided, are placed in the record and are available for public inspection and copying. The public may inspect comments received at the Custer Gallatin National Forest Supervisor's Office. Please call ahead to facilitate entry into the building.

FOR FURTHER INFORMATION CONTACT: Mariah Leuschen-Lonergan, RAC Coordinator, by phone at 406–587–6735 or via email at *mdleuschen@fs.fed.us.*

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: The purpose of the meeting is to:

1. Review project proposals; and
2. Recommend 2015 project proposals.

The meeting is open to the public. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should request in writing by September 21, 2015, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the committee may file written statements with the committee staff before or after the meeting. Written comments and time requests for oral comments must be sent to Mariah Leuschen-Lonergan, RAC Coordinator, 10 East Babcock Avenue, Bozeman, Montana 59105; by email to *mdleuschen@fs.fed.us*, or via facsimile to 406–587–6758.

Meeting Accommodations: If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices or other reasonable accommodation for access to the facility or proceedings by contacting the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

Dated: August 11, 2015.

Mary C. Erickson,

Forest Supervisor, Custer Gallatin National Forest.

BROADCASTING BOARD OF GOVERNORS

Sunshine Act Meeting

DATE AND TIME: Wednesday, August 19, 2015 11 a.m. EDT

PLACE: Broadcasting Board of Governors, Cohen Building, Room 3321, 330 Independence Ave. SW., Washington, DC 20237.

SUBJECT: Notice of Closed Meeting of the Broadcasting Board of Governors.

SUMMARY: The members of the Broadcasting Board of Governors (BBG) will meet in a special session, to be conducted telephonically, to discuss and approve a budget submission for Fiscal Year 2017. According to Office of Management and Budget (OMB) Circular A–11, section 22.1, all agency budgetary materials and data are considered confidential prior to the President submitting a budget to Congress. In accordance with section 22.5 of Circular A–11, the BBG has determined that its meeting should be closed to public observation pursuant to 5 U.S.C. 552b(c)(9)(B). In accordance with the Government in the Sunshine Act and BBG policies, the meeting will be recorded and a transcript of the proceedings, subject to the redaction of information protected by 5 U.S.C. 552b(c)(9)(B), will be made available to the public. The publicly-releasable transcript will be available for download at *www.bbg.gov* within 21 days of the date of the meeting.

Information regarding member votes to close the meeting and expected attendees can also be found on the Agency's public Web site.

CONTACT PERSON FOR MORE INFORMATION: Persons interested in obtaining more information should contact Oanh Tran at (202) 203–4545.

Oanh Tran,

Director of Board Operations.

DEPARTMENT OF COMMERCE

Economic Development Administration

Notice of Petitions by Firms for Determination of Eligibility to Apply for Trade Adjustment Assistance

AGENCY: Economic Development Administration, Commerce.

ACTION: Notice and opportunity for public comment.

Pursuant to Section 251 of the Trade Act 1974, as amended (19 U.S.C. 2341 *et seq.*), the Economic Development Administration (EDA) has received petitions for certification of eligibility to apply for Trade Adjustment Assistance from the firms listed below. Accordingly, EDA has initiated investigations to determine whether increased imports into the United States of articles like or directly competitive with those produced by each of these firms contributed importantly to the total or partial separation of the firm's workers, or threat thereof, and to a decrease in sales or production of each petitioning firm.

LIST OF PETITIONS RECEIVED BY EDA FOR CERTIFICATION ELIGIBILITY TO APPLY FOR TRADE ADJUSTMENT ASSISTANCE 8/6/2015 THROUGH 8/11/2015

Firm name	Firm address	Date accepted for investigation	Product(s)
Wiretek, Inc.	48 East Newberry Road, Bloomfield, CT 06002.	8/7/2015	The firm manufactures wires and cables.
The Wahl Company, Inc.	624 South Collard Street, Fort Worth, TX 76103.	8/7/2015	The firm manufactures machines, tools, fixtures, discrete parts and assemblies to order.
Lamjen, Inc.	2254 East 30th Street, Erie, PA 16510.	8/7/2015	The firm manufactures precision machined parts.

Any party having a substantial interest in these proceedings may request a public hearing on the matter. A written request for a hearing must be submitted to the Trade Adjustment Assistance for Firms Division, Room 71030, Economic Development Administration, U.S. Department of Commerce, Washington, DC 20230, no later than ten (10) calendar days following publication of this notice.

Please follow the requirements set forth in EDA's regulations at 13 CFR 315.9 for procedures to request a public hearing. The Catalog of Federal Domestic Assistance official number and title for the program under which these petitions are submitted is 11.313, Trade Adjustment Assistance for Firms.

Dated: August 11, 2015.

Michael S. DeVillo,

Eligibility Examiner.

Foreign-Trade Zones Board

[S–92–2015]

Approval of Expansion of Subzone 92A; VT Halter Marine, Inc.; Pascagoula, Mississippi

On June 19, 2015, the Acting Executive Secretary of the Foreign-Trade Zones (FTZ) Board docketed an application submitted by the Mississippi Coast Foreign Trade Zone, Inc., grantee of FTZ 92, requesting an additional site within Subzone 92A on behalf of VT Halter Marine, Inc., located in Pascagoula, Mississippi. The expanded subzone would be subject to the existing activation limit of FTZ 92.

The application was processed in accordance with the FTZ Act and Regulations, including notice in the **Federal Register** inviting public comment (80 FR 36506–36507, 06–25–2015). The FTZ staff examiner reviewed the application and determined that it meets the criteria for approval.

Pursuant to the authority delegated to the FTZ Board's Executive Secretary (15 CFR Sec. 400.36(f)), the application to expand Subzone 92A is approved, subject to the FTZ Act and the Board's regulations, including section 400.13, and with the overall subzone subject to FTZ 92's 2,000-acre activation limit.

Dated: August 11, 2015.

Andrew McGilvray,

Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[S–117–2015]

Foreign-Trade Zone 38—Spartanburg County, South Carolina; Application for Subzone; Springsteen Logistics, LLC; Rock Hill and Fort Lawn, South Carolina

An application has been submitted to the Foreign-Trade Zones (FTZ) Board by the South Carolina State Ports Authority, grantee of FTZ 38, requesting subzone status for the facilities of Springsteen Logistics, LLC, located in Rock Hill and Fort Lawn, South Carolina. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a–81u), and the regulations of the FTZ Board (15 CFR part 400). It was formally docketed on August 11, 2015.

The proposed subzone would consist of the following sites: *Site 1* (6.6 acres) 220 West White Street, Rock Hill; *Site 2* (24 acres) 5918 Lancaster Highway, Fort Lawn; and, *Site 3* (42 acres) 5992 Lancaster Highway, Fort Lawn. No authorization for production activity has been requested at this time. The proposed subzone would be subject to the existing activation limit of FTZ 38.

In accordance with the FTZ Board's regulations, Kathleen Boyce of the FTZ Staff is designated examiner to review the application and make recommendations to the Executive Secretary.

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary at the address below. The closing period for their receipt is September 28, 2015. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to October 13, 2015.

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the ''Reading Room'' section of the FTZ Board's Web site, which is accessible via *www.trade.gov/ftz.*

For further information, contact Kathleen Boyce at *Kathleen.Boyce@trade.gov* or (202) 482–1346.

Dated: August 11, 2015.

Andrew McGilvray,

Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–52–2015]

Foreign-Trade Zone (FTZ) 37—Orange County, NY; Notification of Proposed Production Activity; Takasago International Corporation (USA); (Fragrance Compounds); Harriman, NY

Takasago International Corporation (USA) (Takasago), an operator of FTZ 37, submitted a notification of proposed production activity to the FTZ Board for its facility located in Harriman, New York. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on August 7, 2015.

Takasago already has authority to produce fragrance compounds within Site 10 of FTZ 37. The current request would add foreign-status materials to the scope of authority. Pursuant to 15 CFR 400.14(b), additional FTZ authority would be limited to the specific foreign-status materials and components and specific finished products described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt Takasago from customs duty payments on the foreign status materials used in export production. On its domestic sales, Takasago would be able to choose the duty rate during customs entry procedures that applies to fragrance compounds (duty-free) for the foreign status materials noted below and in the existing scope of authority. Customs duties also could possibly be deferred or reduced on foreign status production equipment.

The components and materials sourced from abroad include: Beeswax abs, myroxide, octacetal, syvertal, hydroxyl ambran, safralene, cresyl iso buty, geranyl butyrate, diisobutyl adipate, allyl amyl glyocolate, jasmodione, auirantiol pure, jasmolactone, octalactone delta, g-undecalactone, methyl dioxolan, okumal, grisalva, iso butyl quinolone, peppermint oil, styrax resoid and crystarome strawberry (duty rate ranges from free to 6.5%).

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary at the address below. The

closing period for their receipt is September 28, 2015.

A copy of the notification will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 21013, U.S. Department of Commerce, 1401 Constitution Avenue NW., Washington, DC 20230–0002, and in the ''Reading Room'' section of the FTZ Board's Web site, which is accessible via *www.trade.gov/ftz.*

For further information, contact Kathleen Boyce at *Kathleen.Boyce@trade.gov* or (202) 482–1346.

Dated: August 11, 2015.

Transportation and Related Equipment, Technical Advisory Committee; Notice of Partially Closed Meeting

The Transportation and Related Equipment Technical Advisory Committee will meet on September 2, 2015, 9:30 a.m., in the Herbert C. Hoover Building, Room 3884, 14th Street between Constitution & Pennsylvania Avenues NW., Washington, DC. The Committee advises the Office of the Assistant Secretary for Export Administration with respect to technical questions that affect the level of export controls applicable to transportation and related equipment or technology.

Agenda

Public Session

1. Welcome and Introductions.
2. Status reports by working group chairs.
3. Public comments and Proposals.

Closed Session

4. Discussion of matters determined to be exempt from the provisions relating to public meetings found in 5 U.S.C. app. 2 §§ 10(a)(1) and 10(a)(3).

The open session will be accessible via teleconference to 20 participants on a first come, first serve basis. To join the conference, submit inquiries to Ms. Yvette Springer at *Yvette.Springer@bis.doc.gov* no later than August 26, 2015.

A limited number of seats will be available during the public session of the meeting. Reservations are not accepted. To the extent time permits, members of the public may present oral statements to the Committee. The public may submit written statements at any time before or after the meeting. However, to facilitate distribution of public presentation materials to Committee members, the Committee suggests that presenters forward the public presentation materials prior to the meeting to Ms. Springer via email.

The Assistant Secretary for Administration, with the concurrence of the delegate of the General Counsel, formally determined on October 2, 2014, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. app. 2 § (10)(d)), that the portion of the meeting dealing with pre-decisional changes to the Commerce Control List and U.S. export control policies shall be exempt from the provisions relating to public meetings found in 5 U.S.C. app. 2 §§ 10(a)(1) and 10(a)(3). The remaining portions of the meeting will be open to the public.

For more information, call Yvette Springer at (202) 482·2813.

Dated: August 11, 2015.

The Committee advises the Office of the Assistant Secretary for Export Administration with respect to technical questions that affect the level of export controls applicable to materials and related technology.

Agenda

Open Session

1. Introductions and opening remarks on ECR by senior management.
2. Foreign Policy brief on Cuba.
3. Open session report by on regime representatives.
4. Report from working groups (Composite Working Group, Biological Working Group, Pump and Valves Working Group, and the Chemicals Working Group).
5. Remarks by the Office of Technology Evaluation.
6. Public Comments and New Business.

Closed Session

7. Discussion of matters determined to be exempt from the provisions relating to public meetings found in 5 U.S.C. app. 2 §§ 10(a)(1) and 10(a)(3).

The open session will be accessible via teleconference to 20 participants on a first come, first serve basis. To join the conference, submit inquiries to Ms. Yvette Springer at *Yvette.Springer@bis.doc.gov,* no later than August 27, 2015.

International Trade Administration

[A–580–880, A–201–847, A–489–824]

Heavy Walled Rectangular Welded Carbon Steel Pipes and Tubes From the Republic of Korea, Mexico, and the Republic of Turkey: Initiation of Less-Than-Fair-Value Investigations

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: *Effective Date:* August 17, 2015.

FOR FURTHER INFORMATION CONTACT: Elizabeth Eastwood at (202) 482–3874 (the Republic of Korea and Mexico), or Brandon Custard at (202) 482–1823 (the Republic of Turkey), AD/CVD Operations, Enforcement and Compliance, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Petitions

On July 21, 2015, the Department of Commerce (the Department) received antidumping duty (AD) petitions concerning imports of heavy walled rectangular carbon steel pipes and tubes (HWR pipes and tubes) from the Republic of Korea (Korea), Mexico, and the Republic of Turkey (Turkey) filed in proper form on behalf of Atlas Tube, a division of JMC Steel Group, Bull Moose Tube Company, EXLTUBE,[1] Hannibal Industries, Inc., Independence Tube Corporation, Maruichi American Corporation, Searing Industries, Southland Tube, and Vest, Inc. (collectively, the petitioners). The AD petitions were accompanied by one countervailing duty (CVD) petition also concerning imports of HWR pipes and tubes from Turkey.[2] The petitioners are domestic producers of HWR pipes and tubes.[3]

On July 23, 2015, the Department requested additional information and clarification of certain areas of the Petitions.[4] The petitioners filed responses to these requests on July 24 and 27, 2015.[5]

In accordance with section 732(b) of the Tariff Act of 1930, as amended (the Act), the petitioners allege that imports of HWR pipes and tubes from Korea, Mexico, and Turkey are being, or are likely to be, sold in the United States at less-than-fair value within the meaning of section 731 of the Act, and that such imports are materially injuring, or threatening material injury to, an industry in the United States. Also, consistent with section 732(b)(1) of the Act, the Petitions are accompanied by information reasonably available to the petitioners supporting their allegations.

The Department finds that the petitioners filed these Petitions on behalf of the domestic industry because the petitioners are interested parties as defined in section 771(9)(C) of the Act. The Department also finds that the petitioners demonstrated sufficient industry support with respect to the initiation of the AD investigations that the petitioners are requesting.[6]

Period of Investigation

Because the Petitions were filed on July 21, 2015, pursuant to 19 CFR 351.204(b)(1) the period of investigation (POI) is July 1, 2014, through June 30, 2015.

Scope of the Investigations

The product covered by these investigations is HWR pipes and tubes from Korea, Mexico, and Turkey. For a full description of the scope of these investigations, see the ''Scope of the Investigations,'' in Appendix I of this notice.

Comments on Scope of the Investigations

During our review of the Petitions, the Department issued questions to, and received responses from, the petitioners pertaining to the proposed scope to ensure that the scope language in the Petitions would be an accurate reflection of the products for which the domestic industry is seeking relief.[7]

As discussed in the preamble to the Department's regulations, we are setting aside a period for interested parties to raise issues regarding product coverage (scope). The Department will consider all comments received from parties and, if necessary, will consult with parties prior to the issuance of the preliminary determinations. If scope comments include factual information (*see* 19 CFR 351.102(b)(21)), all such factual information should be limited to public information. In order to facilitate preparation of its questionnaires, the Department requests all interested parties to submit such comments by 5:00 p.m. Eastern Time (ET) on Monday, August 31, 2015, which is the first business day after 20 calendar days from the signature date of this notice. Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. ET on Thursday, September 10, 2015, which is 10 calendar days after the initial comments deadline.

The Department requests that any factual information the parties consider relevant to the scope of the investigations be submitted during this time period. However, if a party subsequently finds that additional factual information pertaining to the scope of the investigations may be relevant, the party may contact the Department and request permission to submit the additional information. All such comments must be filed on the records of each of the concurrent AD and CVD investigations.

Filing Requirements

Submissions to the Department must normally be filed electronically using Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS).[8] An electronically filed document must be received successfully in its entirety by the time and date when it is due. Documents excepted from the electronic submission requirements must be filed manually (*i.e.,* in paper form) with Enforcement and Compliance's APO/Dockets Unit, Room 18022, U.S. Department of Commerce,

[1] EXLTUBE is not a petitioner in the AD petition concerning imports of HWR pipes and tubes from Mexico.

[2] *See* Petitions for the Imposition of Antidumping and Countervailing Duties: Heavy Walled Rectangular Welded Carbon Steel Pipes and Tubes from Korea, Mexico, and Turkey, dated July 21, 2015 (the Petitions).

14th Street and Constitution Avenue NW., Washington, DC 20230, and stamped with the date and time of receipt by the applicable deadlines.

Comments on Product Characteristics for AD Questionnaires

The Department requests comments from interested parties regarding the appropriate physical characteristics of HWR pipes and tubes to be reported in response to the Department's AD questionnaires. This information will be used to identify the key physical characteristics of the subject merchandise in order to report the relevant factors and costs of production accurately as well as to develop appropriate product-comparison criteria.

Interested parties may provide any information or comments that they feel are relevant to the development of an accurate list of physical characteristics. Specifically, they may provide comments as to which characteristics are appropriate to use as: (1) General product characteristics and (2) product-comparison criteria. We note that it is not always appropriate to use all product characteristics as product-comparison criteria. We base product-comparison criteria on meaningful commercial differences among products. In other words, although there may be some physical product characteristics utilized by manufacturers to describe HWR pipes and tubes, it may be that only a select few product characteristics take into account commercially meaningful physical characteristics. In addition, interested parties may comment on the order in which the physical characteristics should be used in matching products. Generally, the Department attempts to list the most important physical characteristics first and the least important characteristics last.

In order to consider the suggestions of interested parties in developing and issuing the AD questionnaires, all comments must be filed by 5:00 p.m. ET on Monday, August 31, 2015, which is 21 calendar days from the signature date of this notice. Any rebuttal comments must be filed by 5:00 p.m. ET on Thursday, September 10, 2015. All comments and submissions to the Department must be filed electronically using ACCESS, as explained above, on the records of the Korea, Mexico, and Turkey less-than-fair-value investigations.

Determination of Industry Support for the Petitions

Section 732(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 732(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) At least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the petition. Moreover, section 732(c)(4)(D) of the Act provides that, if the petition does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, the Department shall: (i) Poll the industry or rely on other information in order to determine if there is support for the petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers as a whole of a domestic like product. Thus, to determine whether a petition has the requisite industry support, the statute directs the Department to look to producers and workers who produce the domestic like product. The International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both the Department and the ITC must apply the same statutory definition regarding the domestic like product,[9] they do so for different purposes and pursuant to a separate and distinct authority. In addition, the Department's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[10]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the Petitions).

With regard to the domestic like product, the petitioners do not offer a definition of the domestic like product distinct from the scope of the investigations. Based on our analysis of the information submitted on the record, we have determined that HWR pipes and tubes, as defined in the scope of the investigations, constitute a single domestic like product and we have analyzed industry support in terms of that domestic like product.[11]

In determining whether the petitioners have standing under section 732(c)(4)(A) of the Act, we considered the industry support data contained in the Petitions with reference to the domestic like product as defined in the ''Scope of the Investigations,'' in Appendix I of this notice. To establish industry support, the petitioners provided their own shipments of the domestic like product in 2014 and compared their shipments to the estimated total shipments of the domestic like product for the entire domestic industry.[12] Because data regarding total production of the domestic like product for 2014 are not reasonably available to the petitioners and the petitioners have established that shipments are a reasonable proxy for production,[13] we relied on the shipment data provided by the petitioners for purposes of measuring industry support.[14] We note that EXLTUBE is not a petitioner with respect to the petition for the imposition of antidumping duties on imports of HWR pipes and tubes from Mexico and has not expressed an opinion with regard to the petition on imports from Mexico.

[9] *See* section 771(10) of the Act.

[10] *See USEC, Inc.* v. *United States,* 132 F. Supp. 2d 1, 8 (CIT 2001) (citing *Algoma Steel Corp., Ltd.* v. *United States,* 688 F. Supp. 639, 644 (CIT 1988), *aff'd* 865 F.2d 240 (Fed. Cir. 1989)).

[11] For a discussion of the domestic like product analysis in this case, *see* Antidumping Duty Investigation Initiation Checklist: Heavy Walled Rectangular Welded Carbon Steel Pipes and Tubes from the Republic of Korea (Korea Initiation Checklist), at Attachment II, Analysis of Industry Support for the Antidumping and Countervailing Duty Petitions Covering Heavy Walled Rectangular Welded Carbon Steel Pipes and Tubes from the Republic of Korea, Mexico, and the Republic of Turkey (Attachment II); Antidumping Duty Investigation Initiation Checklist: Heavy Walled Rectangular Welded Carbon Steel Pipes and Tubes from Mexico (Mexico Initiation Checklist), at Attachment II; and Antidumping Duty Investigation Initiation Checklist: Heavy Walled Rectangular Welded Carbon Steel Pipes and Tubes from the Republic of Turkey (Turkey AD Initiation Checklist), at Attachment II. These checklists are dated concurrently with this notice and on file electronically via ACCESS. Access to documents filed via ACCESS is also available in the Central Records Unit, Room B8024 of the main Department of Commerce building.

[12] *See* Volume I of the Petitions, at 3–4 and Exhibits I–1 and I–2; *see also* General Issues Supplement, at 4–5 and Exhibit I–10.

[13] *See* Volume I of the Petitions, at 3–4; *see also* General Issues Supplement, at 4.

[14] For further discussion, *see* Korea Initiation Checklist, Mexico Initiation Checklist, and Turkey AD Initiation Checklist, at Attachment II.

Therefore, we have not included shipments from EXLTUBE to measure industry support for the Mexico Petition.[15]

Our review of the data provided in the Petitions, General Issues Supplement, and other information readily available to the Department indicates that the petitioners have established industry support for all of the Petitions.[16] First, the Petitions established support from domestic producers (or workers) accounting for more than 50 percent of the total shipments [17] of the domestic like product and, as such, the Department is not required to take further action in order to evaluate industry support (*e.g.,* polling).[18] Second, the domestic producers (or workers) have met the statutory criteria for industry support under section 732(c)(4)(A)(i) of the Act for all of the Petitions because the domestic producers (or workers) who support each of the Petitions account for at least 25 percent of the total shipments of the domestic like product.[19] Finally, the domestic producers (or workers) have met the statutory criteria for industry support under section 732(c)(4)(A)(ii) of the Act for all of the Petitions because the domestic producers (or workers) who support each of the Petitions account for more than 50 percent of the shipments of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petitions.[20] Accordingly, the Department determines that the Petitions were filed on behalf of the domestic industry within the meaning of section 732(b)(1) of the Act.

The Department finds that the petitioners filed the Petitions on behalf of the domestic industry because they are interested parties as defined in section 771(9)(C) of the Act and they have demonstrated sufficient industry support with respect to the AD investigations that they are requesting the Department initiate.[21]

[15] *See* Volume I of the Petitions, at 1.

[16] *See* Korea Initiation Checklist, Mexico Initiation Checklist, and Turkey AD Initiation Checklist, at Attachment II.

[17] As mentioned above, the petitioners established that shipments are a reasonable proxy for production data. Section 351.203(e)(1) of the Department's regulations states ''production levels may be established by reference to alternative data that the Secretary determines to be indicative of production levels.''

[21] *Id.*

Allegations and Evidence of Material Injury and Causation

The petitioners allege that the U.S. industry producing the domestic like product is being materially injured, or is threatened with material injury, by reason of the imports of the subject merchandise sold at less than normal value (NV). In addition, the petitioners allege that subject imports exceed the negligibility threshold provided for under section 771(24)(A) of the Act.[22]

The petitioners contend that the industry's injured condition is illustrated by reduced market share; underselling and price depression or suppression; lost sales and revenues; increased inventories and inventory overhang in the U.S. market; and decline in profitability.[23] We have assessed the allegations and supporting evidence regarding material injury, threat of material injury, and causation, and we have determined that these allegations are properly supported by adequate evidence and meet the statutory requirements for initiation.[24]

Allegations of Sales at Less-Than-Fair Value

The following is a description of the allegations of sales at less-than-fair value upon which the Department based its decision to initiate investigations of imports of HWR pipes and tubes from Korea, Mexico, and Turkey. The sources of data for the deductions and adjustments relating to U.S. price and NV are discussed in greater detail in the country-specific initiation checklists.

Export Price

For Korea, Mexico, and Turkey, the petitioners based U.S. price on price quotes/offers for sales of HWR pipes and tubes produced in, and exported from, the subject country.[25] The petitioners made deductions from U.S. price for movement expenses consistent with the delivery terms.[26] Where applicable, the petitioners also deducted from U.S. price trading company mark-ups estimated using the petitioners' knowledge of the U.S. industry.[27]

Normal Value

For Korea, Mexico, and Turkey, the petitioners provided home market price information obtained through market research for HWR pipes and tubes produced and offered for sale in each of these countries.[28] For each country, the petitioners provided an affidavit or declaration from a market researcher for the price information.[29] The petitioners made no adjustments to these prices consistent with the terms of sale.

Fair Value Comparisons

Based on the data provided by the petitioners, there is reason to believe that imports of HWR pipes and tubes from Korea, Mexico, and Turkey are being, or are likely to be, sold in the United States at less-than-fair value. Based on comparisons of export price to NV in accordance with section 773(a) of the Act, the estimated dumping margin for HWR pipes and tubes from Korea is 53.8 percent.[30] The estimated dumping margin for Mexico is 11.9 percent.[31] The estimated dumping margins for Turkey range from 102.1 to 113.7 percent.[32]

Initiation of Less-Than-Fair-Value Investigations

Based upon the examination of the AD Petitions on HWR pipes and tubes from Korea, Mexico, and Turkey, we find that Petitions meet the requirements of section 732 of the Act. Therefore, we are initiating AD investigations to determine whether imports of HWR pipes and tubes from Korea, Mexico and Turkey, are being, or are likely to be, sold in the United States at less-than-fair value. In accordance with section 733(b)(1)(A) of the Act and 19 CFR 351.205(b)(1), unless postponed, we will make our preliminary determinations no later than 140 days after the date of this initiation.

Respondent Selection

The petitioners named ten companies from Korea, ten companies from Mexico, and 14 companies from Turkey as producers/exporters of HWR pipes and tubes.[33] Following standard practice in AD investigations involving market economy countries, the

Department intends to select respondents based on U.S. Customs and Border Protection (CBP) data for U.S. imports during the POI under Harmonized Tariff Schedule of the United States (HTSUS) number 7306.61.1000.[34] We intend to release the CBP data under Administrative Protective Order (APO) to all parties with access to information protected by APO within five days of publication of this **Federal Register** notice and make our decision regarding respondent selection within 20 days of publication of this notice.

We invite interested parties to comment on this issue. Parties wishing to comment must do so within seven days of the publication of this notice in the **Federal Register**. Comments must be filed electronically using ACCESS. An electronically-filed document must be received successfully in its entirety by the Department's electronic records system, ACCESS, by 5 p.m. ET by the deadline noted above.

Distribution of Copies of the Petitions

In accordance with section 732(b)(3)(A) of the Act and 19 CFR 351.202(f), copies of the public version of the Petitions have been provided to the governments of Korea, Mexico, and Turkey via ACCESS. To the extent practicable, we will attempt to provide a copy of the public version of the Petitions to each exporter named in the Petitions, as provided under 19 CFR 351.203(c)(2).

ITC Notification

We have notified the ITC of our initiation, as required by section 732(d) of the Act.

Preliminary Determinations by the ITC

The ITC will preliminarily determine, within 45 days after the date on which the Petitions were filed, whether there is a reasonable indication that imports of HWR pipes and tubes from Korea, Mexico, and/or Turkey are materially injuring or threatening material injury to a U.S. industry.[35] A negative ITC determination for any country will result in the investigation being terminated with respect to that country; [36] otherwise, these investigations will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) Evidence submitted in response to questionnaires; (ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by the Department; and (v) evidence other than factual information described in (i)–(iv). The regulation requires any party, when submitting factual information, to specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct. Time limits for the submission of factual information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Please review the regulations prior to submitting factual information in these investigations.

Extensions of Time Limits

Parties may request an extension of time limits before the expiration of a time limit established under part 351, or as otherwise specified by the Secretary. In general, an extension request will be considered untimely if it is filed after the expiration of the time limit established under part 351 expires. For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. on the due date. Under certain circumstances, we may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, we will inform parties in the letter or memorandum setting forth the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, stand-alone submission; under limited circumstances we will grant untimely-filed requests for the extension of time limits. Review *Extension of Time Limits; Final Rule,* 78 FR 57790 (September 20, 2013), available at *http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm,* prior to submitting factual information in these investigations.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[37] Parties are hereby reminded that revised certification requirements are in effect for company/government officials, as well as their representatives. Investigations initiated on the basis of petitions filed on or after August 16, 2013, and other segments of any AD or CVD proceedings initiated on or after August 16, 2013, should use the formats for the revised certifications provided at the end of the *Final Rule.*[38] The Department intends to reject factual submissions if the submitting party does not comply with applicable revised certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. On January 22, 2008, the Department published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures,* 73 FR 3634 (January 22, 2008). Parties wishing to participate in these investigations should ensure that they meet the requirements of these procedures (*e.g.,* the filing of letters of appearance as discussed in 19 CFR 351.103(d)).

This notice is issued and published pursuant to sections 732 and 777(i) of the Act.

Dated: August 10, 2015.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigations

The products covered by these investigations are certain heavy walled rectangular welded steel pipes and tubes of rectangular (including square) cross section, having a nominal wall thickness of not less than 4 mm. The merchandise includes, but is not limited to, the American Society for Testing and Materials (ASTM) A–500, grade B specifications, or comparable domestic or foreign specifications.

Included products are those in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements below exceeds the quantity, by weight, respectively indicated:

[34] While the scope also references HTSUS number 7306.61.3000, we note that this HTSUS number includes non-subject merchandise. Therefore, we do not intend to use data for this HTSUS number for purposes of respondent selection.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

[C–489–825]

Heavy Walled Rectangular Welded Carbon Steel Pipes and Tubes From the Republic of Turkey: Initiation of Countervailing Duty Investigation

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: *Effective Date:* August 17, 2015.

FOR FURTHER INFORMATION CONTACT: Rebecca Trainor at (202) 482–4007 or Reza Karamloo at (202) 482–4470, AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

The Petitions

On July 21, 2015, the Department of Commerce (the Department) received a countervailing duty (CVD) petition concerning imports of heavy walled rectangular welded carbon steel pipes and tubes (HRW pipes and tubes) from the Republic of Turkey (Turkey), filed in proper form, on behalf of Atlas Tube, a division of JMC Steel Group, Bull Moose Tube Company, EXLTUBE, Hannibal Industries, Inc., Independence Tube Corporation, Maruichi American Corporation, Searing Industries, Southland Tube, and Vest, Inc. (collectively, the petitioners).[1] The CVD Petition was accompanied by antidumping duty (AD) petitions with respect to Turkey, the Republic of Korea (Korea), and Mexico. The petitioners are domestic producers of HWR pipes and tubes.[2]

On July 23, 2015, the Department requested information and clarification for certain areas of the Petition.[3] The petitioners filed responses to these requests on July 27, 2015.[4]

In accordance with section 702(b)(1) of the Tariff Act of 1930, as amended (the Act), the petitioners allege that the Government of Turkey (GOT) is providing countervailable subsidies (within the meaning of sections 701 and 771(5) of the Act) to imports of HWR pipes and tubes from Turkey, and that such imports are materially injuring, or threatening material injury to, an industry in the United States. Also, consistent with section 702(b)(1) of the Act, the Petition is accompanied by information reasonably available to the petitioners supporting their allegations.

The Department finds that the petitioners filed the Petition on behalf of the domestic industry because the petitioners are interested parties as defined in section 771(9)(C) of the Act. The Department also finds that the petitioners demonstrated sufficient industry support with respect to the initiation of the CVD investigation that the petitioners are requesting.[5]

Period of Investigation

The period of the investigation is January 1, 2014, through December 31, 2014.[6]

Scope of the Investigation

The product covered by this investigation is HWR pipes and tubes from Turkey. For a full description of the scope of this investigation, *see* the ''Scope of the Investigations'' in Appendix I of this notice.

Comments on Scope of the Investigations

During our review of the Petition, the Department issued questions to, and received responses from, the petitioners pertaining to the proposed scope to ensure that the scope language in the Petition would be an accurate reflection of the products for which the domestic industry is seeking relief.[7]

As discussed in the preamble to the Department's regulations,[8] we are setting aside a period for interested parties to raise issues regarding product coverage (scope). The Department will consider all comments received from parties and, if necessary, will consult with parties prior to the issuance of the preliminary determination. If scope comments include factual information (*see* 19 CFR 351.102(b)(21)), all such factual information should be limited to public information. In order to facilitate preparation of its questionnaires, the Department requests all interested parties to submit such comments by 5:00 p.m. Eastern Time (ET) on August 31, 2015, which is the first business day after 20 calendar days from the signature date of this notice. Any rebuttal comments, which may include factual information, must be filed by 5:00 p.m. ET on September 10, 2015, which is 10 calendar days after the initial comments deadline.

The Department requests that any factual information the parties consider relevant to the scope of the investigations be submitted during this time period. However, if a party subsequently finds that additional factual information pertaining to the scope of the investigations may be relevant, the party may contact the Department and request permission to submit the additional information. All such comments must be filed on the records of the Turkey AD and CVD investigations, as well as the concurrent Korea and Mexico AD investigations.

Filing Requirements

Submissions to the Department normally must be filed electronically using Enforcement and Compliance's Antidumping and Countervailing Duty

[1] *See* Petitions for the Imposition of Antidumping and Countervailing Duties: Heavy Walled Rectangular Welded Carbon Steel Pipes and Tubes, dated July 21, 2015, at Volume V (CVD Petition or Petition).

Centralized Electronic Service System (ACCESS).[9] An electronically-filed document must be received successfully in its entirety by the time and date it is due. Documents excepted from the electronic submission requirements must be filed manually (*i.e.,* in paper form) with Enforcement and Compliance's APO/Dockets Unit, Room 18022, U.S. Department of Commerce, 14th Street and Constitution Avenue NW., Washington, DC 20230, and stamped with the date and time of receipt by the applicable deadlines.

Consultations

Pursuant to section 702(b)(4)(A)(i) of the Act, the Department notified representatives of the GOT of the receipt of the Petition. Also, in accordance with section 702(b)(4)(A)(ii) of the Act, the Department provided representatives of the GOT the opportunity for consultations with respect to the Petition.[10] Consultations were held with the GOT on August 6, 2015.[11] The memorandum regarding these consultations is on file electronically via ACCESS.[12]

Determination of Industry Support for the Petition

Section 702(b)(1) of the Act requires that a petition be filed on behalf of the domestic industry. Section 702(c)(4)(A) of the Act provides that a petition meets this requirement if the domestic producers or workers who support the petition account for: (i) At least 25 percent of the total production of the domestic like product; and (ii) more than 50 percent of the production of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petition. Moreover, section 702(c)(4)(D) of the Act provides that, if the Petition does not establish support of domestic producers or workers accounting for more than 50 percent of the total production of the domestic like product, the Department shall: (i) Poll the industry or rely on other information in order to determine if there is support for the Petition, as required by subparagraph (A); or (ii) determine industry support using a statistically valid sampling method to poll the ''industry.''

Section 771(4)(A) of the Act defines the ''industry'' as the producers as a whole of a domestic like product. Thus, to determine whether a petition has the requisite industry support, the statute directs the Department to look to producers and workers who produce the domestic like product. The International Trade Commission (ITC), which is responsible for determining whether ''the domestic industry'' has been injured, must also determine what constitutes a domestic like product in order to define the industry. While both the Department and the ITC must apply the same statutory definition regarding the domestic like product,[13] they do so for different purposes and pursuant to a separate and distinct authority. In addition, the Department's determination is subject to limitations of time and information. Although this may result in different definitions of the like product, such differences do not render the decision of either agency contrary to law.[14]

Section 771(10) of the Act defines the domestic like product as ''a product which is like, or in the absence of like, most similar in characteristics and uses with, the article subject to an investigation under this title.'' Thus, the reference point from which the domestic like product analysis begins is ''the article subject to an investigation'' (*i.e.,* the class or kind of merchandise to be investigated, which normally will be the scope as defined in the Petition).

With regard to the domestic like product, the petitioners do not offer a definition of the domestic like product distinct from the scope of the investigation. Based on our analysis of the information submitted on the record, we have determined that HWR pipes and tubes, as defined in the scope of the investigation, constitute a single domestic like product and we have analyzed industry support in terms of that domestic like product.[15]

In determining whether the petitioners have standing under section 702(c)(4)(A) of the Act, we considered the industry support data contained in the Petition with reference to the domestic like product as defined in the ''Scope of the Investigation,'' in Appendix I of this notice. To establish industry support, the petitioners provided their own shipments of the domestic like product in 2014 and compared their shipments to estimated total shipments of the domestic like product for the entire domestic industry.[16] Because data regarding total production of the domestic like product are not reasonably available to the petitioners and the petitioners have established that shipments are a reasonable proxy for production,[17] we have relied on the shipment data provided by the petitioners for purposes of measuring industry support.[18]

Our review of the data provided in the Petition, General Issues Supplement, and other information readily available to the Department indicates that the petitioners have established industry support for the Petition.[19] First, the Petition established support from domestic producers (or workers) accounting for more than 50 percent of the total shipments [20] of the domestic like product and, as such, the Department is not required to take further action in order to evaluate industry support (*e.g.*, polling).[21] Second, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(i) of the Act for the Petition because the domestic producers (or workers) who support the Petition account for at least 25 percent of the total shipments of the domestic like

[18] For further discussion, *see* Turkey CVD Initiation Checklist, at Attachment II.

[19] *See* Turkey CVD Initiation Checklist, at Attachment II.

[20] As mentioned above, the petitioners have established that shipments are a reasonable proxy for production data. Section 351.203(e)(1) of the Department's regulations states ''production levels may be established by reference to alternative data that the Secretary determines to be indicative of production levels.''

[21] *See* section 702(c)(4)(D) of the Act; *see also* Turkey CVD Initiation Checklist, at Attachment II.

product.[22] Finally, the domestic producers (or workers) have met the statutory criteria for industry support under section 702(c)(4)(A)(ii) of the Act for the Petition because the domestic producers (or workers) who support the Petition account for more than 50 percent of the shipments of the domestic like product produced by that portion of the industry expressing support for, or opposition to, the Petition.[23] Accordingly, the Department determines that the Petition was filed on behalf of the domestic industry within the meaning of section 702(b)(1) of the Act.

The Department finds that the petitioners filed the Petition on behalf of the domestic industry because they are interested parties as defined in section 771(9)(C) of the Act and they have demonstrated sufficient industry support with respect to the CVD investigation that they are requesting the Department initiate.[24]

Injury Test

Because Turkey is a ''Subsidies Agreement Country'' within the meaning of section 701(b) of the Act, section 701(a)(2) of the Act applies to this investigation. Accordingly, the ITC must determine whether imports of the subject merchandise from Turkey materially injure, or threaten material injury to, a U.S. industry.

Allegations and Evidence of Material Injury and Causation

The petitioners allege that imports of the subject merchandise are benefitting from countervailable subsidies and that such imports are causing, or threaten to cause, material injury to the U.S. industry producing the domestic like product. The petitioners allege that subject imports exceed the negligibility threshold of three percent provided for under section 771(24)(A) of the Act.[25]

The petitioners contend that the industry's injured condition is illustrated by reduced market share; underselling and price suppression or depression; lost sales and revenues; increased inventories and inventory overhang in the U.S. market; and decline in profitability.[26] We have assessed the allegations and supporting evidence regarding material injury, threat of material injury, and causation, and we have determined that these allegations are properly supported by adequate evidence and meet the statutory requirements for initiation.[27]

Initiation of Countervailing Duty Investigations

Section 702(b)(1) of the Act requires the Department to initiate a CVD investigation whenever an interested party files a CVD Petition on behalf of an industry that: (1) Alleges the elements necessary for an imposition of a duty under section 701(a) of the Act; and (2) is accompanied by information reasonably available to the petitioner supporting the allegations.

The petitioners allege that producers/exporters of HWR pipes and tubes in Turkey benefited from countervailable subsidies bestowed by the government. The Department has examined the Petition and finds that it complies with the requirements of section 702(b)(1) of the Act. Therefore, in accordance with section 702(b)(1) of the Act, we are initiating a CVD investigation to determine whether manufacturers, producers, or exporters of HWR pipes and tubes from Turkey receive countervailable subsidies from the government.

Based on our review of the Petition, we find that there is sufficient information to initiate a CVD investigation on each of the alleged programs. For a full discussion of the basis for our decision to initiate on each program, *see* CVD Initiation Checklist. A public version of the initiation checklist for this investigation is available on ACCESS.

In accordance with section 703(b)(1) of the Act and 19 CFR 351.205(b)(1), unless postponed, we will make our preliminary determinations no later than 65 days after the date of this initiation.

Respondent Selection

The petitioners named 14 companies as producers/exporters of heavy walled rectangular welded carbon steel pipes and tubes from Turkey.[28] Following standard practice in CVD investigations, the Department will, where appropriate, select respondents based on U.S. Customs and Border Protection (CBP) data for U.S. imports of HWR pipes and tubes during the period of investigation under Harmonized Tariff Schedule of the United States (HTSUS) number 7306.61.1000.[29] We intend to release CBP data under Administrative Protective Order (APO) to all parties with access to information protected by APO within five days of publication of this **Federal Register** notice. The Department invites comments regarding respondent selection within seven days of publication of this **Federal Register** notice.

Comments must be filed electronically using ACCESS. An electronically-filed document must be received successfully in its entirety by ACCESS, by 5 p.m. ET by the date noted above. We intend to make our decision regarding respondent selection within 20 days of publication of this notice. Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305(b). Instructions for filing such applications may be found on the Department's Web site at *http://enforcement.trade.gov/apo*.

Distribution of Copies of the Petition

In accordance with section 702(b)(4)(A)(i) of the Act and 19 CFR 351.202(f), a copy of the public version of the Petition has been provided to the GOT via ACCESS. To the extent practicable, we will attempt to provide a copy of the public version of the Petition to each known exporter (as named in the Petition), consistent with 19 CFR 351.203(c)(2).

ITC Notification

We will notify the ITC of our initiation, as required by section 702(d) of the Act.

Preliminary Determination by the ITC

Within 45 days after the date on which the Petition was filed, the ITC will preliminarily determine whether there is a reasonable indication that imports of HWR pipes and tubes from Turkey are materially injuring, or threatening material injury to, a U.S. industry.[30] A negative ITC determination will result in the investigation being terminated; [31] otherwise, this investigation will proceed according to statutory and regulatory time limits.

Submission of Factual Information

Factual information is defined in 19 CFR 351.102(b)(21) as: (i) Evidence submitted in response to questionnaires;

[22] *Id.*

[23] *Id.*

[24] *Id.*

[25] *See* General Issues Supplement, at 5 and Exhibit I–13.

[26] *See* Volume I of the Petition, at 9–10, 12–27 and Exhibits I–1, I–5, I–7 and I–8; *see also* General Issues Supplement, at 1, 5 and Exhibits I–12 and I–13.

[27] *See* Turkey CVD Initiation Checklist at Attachment III, Analysis of Allegations and Evidence of Material Injury and Causation for the Antidumping and Countervailing Duty Petitions Covering Heavy Walled Rectangular Welded Carbon Steel Pipes and Tubes from the Republic of Korea, Mexico, and the Republic of Turkey.

[28] *See* Volume I of the Petitions, at Exhibit I–4.

[29] While the scope also references HTSUS number 7306.61.3000, we note that this HTSUS number includes non-subject merchandise. Therefore, we do not intend to use data for this HTSUS number for purposes of respondent selection.

[30] *See* section 703(a) of the Act.

[31] *Id.*

(ii) evidence submitted in support of allegations; (iii) publicly available information to value factors under 19 CFR 351.408(c) or to measure the adequacy of remuneration under 19 CFR 351.511(a)(2); (iv) evidence placed on the record by the Department; and (v) evidence other than factual information described in (i)–(iv). The regulation requires any party, when submitting factual information, to specify under which subsection of 19 CFR 351.102(b)(21) the information is being submitted and, if the information is submitted to rebut, clarify, or correct factual information already on the record, to provide an explanation identifying the information already on the record that the factual information seeks to rebut, clarify, or correct. Time limits for the submission of factual information are addressed in 19 CFR 351.301, which provides specific time limits based on the type of factual information being submitted. Parties should review the regulations prior to submitting factual information in this investigation.

Extension of Time Limits Regulation

Parties may request an extension of time limits before the expiration of a time limit established under 19 CFR 351.301, or as otherwise specified by the Secretary. In general, an extension request will be considered untimely if it is filed after the time limit established under 19 CFR 351.301 expires. For submissions that are due from multiple parties simultaneously, an extension request will be considered untimely if it is filed after 10:00 a.m. on the due date. Under certain circumstances, we may elect to specify a different time limit by which extension requests will be considered untimely for submissions which are due from multiple parties simultaneously. In such a case, we will inform parties in the letter or memorandum setting forth the deadline (including a specified time) by which extension requests must be filed to be considered timely. An extension request must be made in a separate, stand-alone submission; under limited circumstances we will grant untimely-filed requests for the extension of time limits. Review *Extension of Time Limits; Final Rule,* 78 FR 57790 (September 20, 2013), available at *http://www.gpo.gov/fdsys/pkg/FR-2013-09-20/html/2013-22853.htm,* prior to submitting factual information in this investigation.

Certification Requirements

Any party submitting factual information in an AD or CVD proceeding must certify to the accuracy and completeness of that information.[32] Parties are hereby reminded that revised certification requirements are in effect for company/government officials, as well as their representatives. Investigations initiated on the basis of petitions filed on or after August 16, 2013, and other segments of any AD or CVD proceedings initiated on or after August 16, 2013, should use the formats for the revised certifications provided at the end of the *Final Rule*.[33] The Department intends to reject factual submissions if the submitting party does not comply with the applicable revised certification requirements.

Notification to Interested Parties

Interested parties must submit applications for disclosure under APO in accordance with 19 CFR 351.305. On January 22, 2008, the Department published *Antidumping and Countervailing Duty Proceedings: Documents Submission Procedures; APO Procedures,* 73 FR 3634 (January 22, 2008). Parties wishing to participate in this investigation should ensure that they meet the requirements of these procedures (*e.g.,* the filing of letters of appearance as discussed at 19 CFR 351.103(d)).

This notice is issued and published pursuant to sections 702 and 777(i) of the Act.

Dated: August 10, 2015.

Ronald K. Lorentzen,

Acting Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The products covered by this investigation are certain heavy walled rectangular welded steel pipes and tubes of rectangular (including square) cross section, having a nominal wall thickness of not less than 4 mm. The merchandise includes, but is not limited to, the American Society for Testing and Materials (ASTM) A–500, grade B specifications, or comparable domestic or foreign specifications.

Included products are those in which: (1) Iron predominates, by weight, over each of the other contained elements; (2) the carbon content is 2 percent or less, by weight; and (3) none of the elements below exceeds the quantity, by weight, respectively indicated:

- 2.50 percent of manganese, or
- 3.30 percent of silicon, or
- 1.50 percent of copper, or
- 1.50 percent of aluminum, or
- 1.25 percent of chromium, or
- 0.30 percent of cobalt, or
- 0.40 percent of lead, or
- 2.0 percent of nickel, or
- 0.30 percent of tungsten, or
- 0.80 percent of molybdenum, or
- 0.10 percent of niobium (also called columbium), or
- 0.30 percent of vanadium, or
- 0.30 percent of zirconium.

The subject merchandise is currently provided for in item 7306.61.1000 of the Harmonized Tariff Schedule of the United States (HTSUS). Subject merchandise may also enter under HTSUS 7306.61.3000. While the HTSUS subheadings and ASTM specification are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XC554

Marine Mammals; File No. 17952

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of application for permit amendment.

SUMMARY: Notice is hereby given that Daniel P. Costa, Ph.D., Department of Biology and Institute of Marine Sciences, University of California, Santa Cruz, CA 95064, has applied for an amendment to Scientific Research Permit No. 17952–01.

DATES: Written, telefaxed, or email comments must be received on or before September 16, 2015.

ADDRESSES: The application and related documents are available for review by selecting ''Records Open for Public Comment'' from the ''Features'' box on the Applications and Permits for Protected Species home page, *https://apps.nmfs.noaa.gov,* and then selecting File No. 17952 from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427–8401; fax (301) 713–0376.

Written comments on this application should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301)

713–0376, or by email to *NMFS.Pr1Comments@noaa.gov.* Please include File No. 17952 in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on this application would be appropriate.

FOR FURTHER INFORMATION CONTACT: Amy Sloan or Brendan Hurley, (301) 427–8401.

SUPPLEMENTARY INFORMATION: The subject amendment to Permit No. 17952–01 is requested under the authority of the Marine Mammal Protection Act of 1972, as amended (16 U.S.C. 1361 *et seq.*), and the regulations governing the taking and importing of marine mammals (50 CFR part 216).

Permit No. 17952, issued on June 11, 2013 (78 FR 37796), authorizes the permit holder to conduct long-term research on California sea lions (*Zalophus californianus*) studying their foraging, diving, energetics, food habits, and at sea distribution. Dr. Costa is authorized to capture, sample, and tag California sea lions and recapture tagged California sea lions throughout their U.S. range (California, Oregon and Washington). Harassment of California sea lions, harbor seals (*Phoca vitulina*), and northern elephant seals (*Mirounga angustirostris*) incidental to research activities, unintentional mortalities of California sea lions, and import and export of pinniped samples is authorized. The permit was amended via a minor amendment (Permit No. 17952–01) on October 22, 2014, to include attachment of cameras to instrumentation deployed on sea lions already permitted for capture, sampling, and instrumentation, and to include intubation during gas anesthesia. The permit expires June 7, 2018.

The permit holder is requesting the permit be amended to include authorization to (1) add remote darting as an approved capture method with use of various sedative drugs for adult and juvenile California sea lions, (2) increase incidental harassment takes of non-target California sea lions, (3) include incidental harassment takes for the Eastern stock of Steller sea lions (*Eumetopias jubatus*), and (4) include takes for capture and disentanglement of California sea lions. The proposed takes are delineated in the amendment application and are requested for the duration of the permit.

In compliance with the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*), an initial determination has been made that the activity proposed is categorically excluded from the requirement to prepare an environmental assessment or environmental impact statement.

Concurrent with the publication of this notice in the **Federal Register**, NMFS is forwarding copies of this application to the Marine Mammal Commission and its Committee of Scientific Advisors.

Dated: August 12, 2015.

Donna S. Wieting,

Director, Office of Protected Resources, National Marine Fisheries Service.

Atlantic Highly Migratory Species; Meeting of the Atlantic Highly Migratory Species Advisory Panel; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting and webinar/conference call; correction.

SUMMARY: This document corrects the **ADDRESSES** section to the Notice of public meeting and webinar/conference call that was published on August 5, 2015, which did not contain all of the necessary information for those interested in participating in the webinar/conference call portion of the Atlantic Highly Migratory Species (HMS) Advisory Panel (AP) meeting in September 2015. This correction changes the webinar event addresses, conference call-in number, and participant codes.

DATES: The HMS AP meeting and webinar will be held from 9 a.m. to 6 p.m. on Wednesday, September 9, 2015; and from 8:30 a.m. to 12 p.m. on Thursday, September 10, 2015.

ADDRESSES: The meeting will be held at the Sheraton Silver Spring, 8777 Georgia Avenue, Silver Spring, MD 20910. The meeting presentations will also be available via WebEx webinar/conference call.

On Wednesday, September 9, 2015, the conference call information is: phone number 1–866–509–5013; Participant Code: 1475429; and the webinar event address is: *https://noaaevents2.webex.com/noaaevents2/onstage/g.php?d=999136478&t=a; event password: NOAA.*

On Thursday, September 10, 2015, the conference call information is: Phone number 1–866–509–5013; Participant Code: 1475429; and the webinar event address is: *https://noaaevents2.webex.com/noaaevents2/onstage/g.php?d=995421572&t=a;* event password: NOAA.

Participants are strongly encouraged to log/dial in fifteen minutes prior to the meeting. NMFS will show the presentations via webinar and allow public comment during identified times on the agenda.

FOR FURTHER INFORMATION CONTACT: LeAnn Hogan or Margo Schulze-Haugen at (301) 427–8503.

SUPPLEMENTARY INFORMATION:

Need for Correction

The original notice (80 FR 46544) didn't contain all of the necessary information in the **ADDRESSES** section. This document corrects the **ADDRESSES** section so that all interested parties have the necessary information pertaining to the webinar event addresses, conference call-in number, and participant codes.

In addition, we've included the new **ADDRESSES** section above, for clarity.

Correction

In a Notice published on August 5, 2015 (80 FR 46544), on page 46545, please make the following correction: In the first column, in the second and third paragraphs under the **ADDRESSES** heading, the WebEx webinar/conference call information is corrected to read as follows:

''On Wednesday, September 9, 2015, the conference call information is: phone number 1–866–509–5013; Participant Code: 1475429; and the webinar event address is: *https://noaaevents2.webex.com/noaaevents2/onstage/g.php?d=999136478&t=a; event password: NOAA.*

On Thursday, September 10, 2015, the conference call information is: Phone number 1–866–509–5013; Participant Code: 1475429; and the webinar event address is: *https://noaaevents2.webex.com/noaaevents2/onstage/g.php?d=995421572&t=a;* event password: NOAA.''

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 12, 2015.

Alan D. Risenhoover,

Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XE115

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting (webinar).

SUMMARY: The Pacific Fishery Management Council (Pacific Council) will convene a joint webinar meeting of its Coastal Pelagic Species Management Team (CPSMT) and Coastal Pelagic Species Advisory Subpanel (CSPAS). The meeting is open to the public.

DATES: The webinar meeting will be held Thursday, September 3, 2015, from 1 p.m. to 3 p.m. Pacific Daylight Time.

ADDRESSES: To attend the webinar, visit: *http://www.gotomeeting.com/online/webinar/join-webinar.* Enter the Webinar ID, which is 104-871-531, and your name and email address (required). Participants are encouraged to use their telephone, as this is the best practice to avoid technical issues and excessive feedback (see the *PFMC GoToMeeting Audio Diagram* for best practices). Please use your telephone for the audio portion of the meeting by dialing this TOLL number 1+951–384–3421 (not a toll-free number); then enter the Attendee phone audio access code: 468-846-695; then enter your audio phone pin (shown after joining the webinar). System Requirements for PC-based attendees: Required: Windows® 7, Vista, or XP; for Mac®-based attendees: Required: Mac OS® X 10.5 or newer; and for mobile attendees: iPhone®, iPad®, Android™ phone or Android tablet (See the GoToMeeting Webinar Apps).

You may send an email to *Mr. Kris Kleinschmidt* or contact him at (503) 820–2280, extension 425 for technical assistance. A public listening station will be available at the Pacific Council office.

Council address: Pacific Fishery Management Council, 7700 NE. Ambassador Place, Suite 101, Portland, OR 97220.

FOR FURTHER INFORMATION CONTACT: Kerry Griffin, Staff Officer; telephone: (503) 820–2409.

SUPPLEMENTARY INFORMATION: The primary purpose of the meeting is to discuss agenda items on the September 2015 Pacific Council meeting agenda and to discuss future meeting plans. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the CPSMT and CPSAS' intent to take final action to address the emergency.

Special Accommodations

The public listening station is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (503) 820–2280 at least 5 days prior to the meeting date.

Dated: August 12, 2015.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DATES: The HC meeting will be held Tuesday, September, 1, 2015, from 1 p.m. until 3 p.m.

ADDRESSES: To attend the webinar, visit: *https://global.gotomeeting.com/join/539285365.* Enter the Webinar ID, which is 539–285–365, and your name and email address (required). Participants are encouraged to use their telephone, as this is the best practice to avoid technical issues and excessive feedback (see the *PFMC GoToMeeting Audio Diagram (http://t.sidekickopen14.com/e1t/c/5/f18dQhb0S7lC8dDMPbW2n0x6l2B9nMJW7t5XYg8pTkCFVfmWRK8qm29WW2zq3QW56dJHNf6V05r202?t=http%3A%2F%2Fwww.pcouncil.org%2Fwp-content%2Fuploads%2FPFMC_Audio_Diagram_GoToMeeting.pdf&si=6706403137290240&pi=3e8f7565-3109-406a-8f2d-c0dfb39dbb8d)* for best practices). Please use your telephone for the audio portion of the meeting by dialing this TOLL number 1+872–240–3212 (not a toll-free number); then enter the Attendee phone audio access code: 539–285–365; then enter your audio phone pin (shown after joining the webinar). System Requirements for PC-based attendees: Required: Windows® 7, Vista, or XP; for Mac®-based attendees: Required: Mac OS® X 10.5 or newer; and for mobile attendees: iPhone®, iPad®, Android™ phone or Android tablet (see the GoToMeeting Webinar Apps).

You may send an email to Mr. Kris Kleinschmidt *(kris.kleinschmidt@noaa.gov)* or contact him at (503) 820–2280, extension 425 for technical assistance. A public listening station will also be provided at the Pacific Council office.

Council address: Pacific Council, 7700 NE. Ambassador Place, Suite 101, Portland, OR 97220–1384.

FOR FURTHER INFORMATION CONTACT: Ms. Jennifer Gilden, Pacific Council, (503) 820–2418.

SUPPLEMENTARY INFORMATION: The primary purpose of the HC working meeting is to prepare for the September 2015 Pacific Council meeting, specifically Agenda Item H.8, Amendment to Modify Groundfish Essential Fish Habitat and to Adjust Rockfish Conservation Areas. Public comment will be accommodated if time allows, at the discretion of the HC Chair. The HC's task will be to develop recommendations for consideration by the Pacific Council at its September 9–16, 2015 meeting in Sacramento, CA.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt at (503) 820–2425 at least 5 days prior to the meeting date.

Dated: August 12, 2015.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648–XE104

Western Pacific Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The Western Pacific Fishery Management Council (Council) will convene a meeting of Habitat Areas of Particular Concern (HAPC) Working Group comprised of Fishery Ecosystem Plan Team members. The working group will plan for producing a report exploring options in developing an HAPC designation process for the Western Pacific region.

DATES: The working group will meet on September 2, 2015. For specific times and agendas, see **SUPPLEMENTARY INFORMATION**.

ADDRESSES: The HAPC working group meeting will be held at the Council office, 1164 Bishop Street, Suite 1400, Honolulu, HI 96813; telephone: (808) 522–8220. WebEx and teleconference facilities will be provided for the meeting. The teleconference numbers are: U.S. toll-free: 1–888–482–3560 or International Access: +1–647–723–3959, and Access Code: 5228220; The Web conference can be accessed at *https://wprfmc.webex.com/join/info.wpcouncilnoaa.gov*.

FOR FURTHER INFORMATION CONTACT: Kitty M. Simonds, Executive Director; telephone: (808) 522–8220.

SUPPLEMENTARY INFORMATION: HAPC working group members will explore different process options for designating Habitat Areas of Particular Concern in the Western Pacific Region. The purpose of this meeting is to identify which process options to evaluate in a report to the Council's Fishery Ecosystem Plan Team. A public comment period will be provided. The order in which agenda items are addressed may change. The meetings will run as late as necessary to complete scheduled business.

Schedule and Agenda for the HAPC Working Group Meeting

September 2, 2015—1 p.m.–4 p.m.

1. Introductions
2. Purpose of meeting
3. Overview of Essential Fish Habitat and Habitat Areas of Particular Concern
4. Options From Other Regions
5. Consideration of Additional Options
6. Public Comment
7. Deliberation on Options to Evaluate
8. Other Business

Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kitty M. Simonds, (808) 522–8220 (voice) or (808) 522–8226 (fax), at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 12, 2015.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

Patent and Trademark Office

Invention Promoters/Promotion Firms Complaints

ACTION: Proposed collection; comment request

SUMMARY: The United States Patent and Trademark Office (USPTO), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to comment on the extension of a continuing information collection, as required by the Paperwork Reduction Act of 1995, Public Law 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before October 16, 2015.

ADDRESSES: Written comments may be submitted by any of the following methods:

- *Email: InformationCollection@uspto.gov.* Include ''0651–0044 comment'' in the subject line of the message.
- *Federal Rulemaking Portal: http://www.regulations.gov.*
- *Mail:* Marcie Lovett, Records Management Division Director, Office of the Chief Information Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

FOR FURTHER INFORMATION CONTACT: Requests for additional information should be directed to Cathie Kirik, Mail Stop 24, Commissioner for Patents, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450; by telephone at 571–272–8040; or by email at *Cathie.Kirik@uspto.gov* with ''0651–0044 comment'' in the subject line. Additional information about this collection is also available at *http://www.reginfo.gov* under ''Information Collection Review.''

SUPPLEMENTARY INFORMATION:

I. Abstract

Under the Inventors' Rights Act of 1999, as found in 35 U.S.C. 297 and implemented by 37 CFR part 4, the United States Patent and Trademark Office (USPTO) is required to provide a forum for the publication of complaints concerning invention promoters and responses from the invention promoters to these complaints. An individual may submit a complaint concerning an invention promoter to the USPTO, which will forward the complaint to the invention promoter for response. The complaints and responses will be published and made available to the public on the USPTO Web site. The USPTO does not investigate these complaints or participate in any legal proceedings against invention promoters or promotion firms.

Complaints submitted to the USPTO must (1) identify the name and address of the complainant and the invention promoter or promotion firm; (2) explain the basis for the complaint; and (3) include the signature of the complainant. The identifying information is necessary so that the USPTO can both forward the complaint to the invention promoter or promotion firm as well as notify the complainant that the complaint has been forwarded. Complainants should understand that the complaints will be forwarded to the invention promoter for response and that the complaint and response will be made available to the public as required by the Inventors' Rights Act. If the USPTO does not receive a response from the invention promoter, the complaint will still be published without the response. The USPTO does not accept complaints under this program if the complainant requests confidentiality.

This information collection includes one form, Complaint Regarding Invention Promoter (PTO/SB/2048A), which is used by the public to submit a complaint under this program. This form is available for download from the USPTO Web site. Use of this form is not mandatory, and the complainant may submit their complaint without the form via any of the approved methods of collection as long as the complainant includes the necessary information and the submission is clearly marked as a complaint filed under the Inventors' Rights Act. There is no associated form for submitting responses to the complaints.

II. Method of Collection

By mail, facsimile, or hand delivery to the USPTO.

III. Data

OMB Number: 0651–0044.

IC Instruments and Forms: The individual instruments in this collection, as well as their associated forms, are listed in the table below.

Type of Review: Revision of a Previously Existing Information Collection.

Affected Public: Individuals or households; businesses or other for-profits; and not-for-profit institutions.

Estimated Number of Respondents: 50 responses per year. Of this total, the USPTO expects that 100% will be submitted on paper.

Estimated Time per Response: The USPTO estimates that it will take the public approximately 15 minutes (0.25 hours) to gather the necessary information, prepare the form, and submit a complaint to the USPTO and approximately 30 minutes (0.5 hours) for an invention promoter or promotion firm to prepare and submit a response to a complaint.

Estimated Total Annual Hour Burden: 17.5 hours.

Estimated Total Annual Cost Burden (Hourly): $3,026.25. The USPTO expects that complaints will be prepared by paraprofessionals or independent inventors. Using the average of the paraprofessional rate of $125 per hour and the estimated rate of $30 per hour for independent inventors, the USPTO estimates that the average rate for preparing the complaints will be approximately $77.50 per hour.

The USPTO expects that the responses to the complaints will be prepared by attorneys or invention promoters. Using the average of the professional rate of $389 per hour for attorneys in private firms and the estimated rate of $100 per hour for invention promoters, the USPTO estimates that the average rate for preparing the responses to the complaints will be approximately $244.50 per hour. The time per response, estimated annual responses, and estimated annual hour burden associated with each instrument in this information collection is shown in the table below.

IC No.	Item	Hours (a)	Responses (yr) (b)	Burden (hrs/yr) (c) = (a) × (b)	Rate ($/hr) (d)	Total cost ($/yr) (e) = (c) × (d)
1	Complaint Regarding Invention Promoter (PTO/SB/2048).	0.25	30	7.5	$77.50	$581.25
2	Responses to the Complaints	0.50	20	10	224.50	2,445.00
Totals			50	17.5		3,026.25

Estimated Total Annual Cost Burden (Non-Hourly): $493.70. There are no capital startup, maintenance, or operating fees associated with this collection, nor are there filing or processing fees. There is, however, a non-hourly cost burden associated with this collection in the form of postage costs.

For this collection, it is estimated that 30 complaints will be received by mail. The USPTO estimates that the first-class postage cost for a mailed complaint will be $0.49. Promotion firms may choose to send responses to complaints using overnight mail service at an estimated cost of $23.95 per response. The USPTO estimates that it will receive 20 responses to complaints. Therefore, the total postage cost associated with this collection will be approximately $493.70. As there are no other annual (non-hourly) costs associated with this collection, the USPTO therefore estimates that the total annual (non-hourly) cost burden for this collection, in the form of postage costs, is $493.70 per year.

IV. Request for Comments

Comments are invited on:

(a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility;

(b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) ways to enhance the quality, utility, and clarity of the information to be collected; and

(d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Comments submitted in response to this notice will be summarized or included in the request for OMB approval of this information collection; they will also become a matter of public record.

Dated: August 6, 2015.

Marcie Lovett,

Records Management Division Director, USPTO, Office of the Chief Information Officer.

[FR Doc. 2015–20192 Filed 8–14–15; 8:45 am]

BILLING CODE 3510–16–P

DEPARTMENT OF COMMERCE

Patent and Trademark Office

Submission for OMB Review; Comment Request; ''Patents for Humanity Program''

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: United States Patent and Trademark Office, Commerce.

Title: Patents for Humanity Program.

OMB Control Number: 0651–0066.

Form Number(s):

- PTO/PFH/001
- PTO/PFH/002
- PTO/SB/431

Type of Request: Regular.

Number of Respondents: 110 responses per year.

Average Minutes per Response: 60 minutes (attorney) or 180 minutes (paralegal) for the Humanitarian Program Application, and 60 minutes for the Petition to Extend the Redemption Period of the Humanitarian Awards Certificate.

Burden Hours: 410.

Cost Burden: $0.

Needs and Uses

The Patents for Humanity Program is designed to incentivize the distribution of patented technologies or products to address humanitarian needs, and is open to any patent owners or patent licensees, including inventors who have not assigned their ownership rights to others, assignees, and exclusive or non-exclusive licensees. Applications are considered in five categories: Medicine, Nutrition, Sanitation, Household Energy, and Living Standards.

The USPTO has developed two application forms that applicants can use to apply for participation in the Patents for Humanity Program—one application covers the humanitarian uses of technologies or products and the other application covers humanitarian research. Applicants may optionally provide contact information for the public to reach them with any inquiries. Additionally, applicants may provide non-public contact information by email to the USPTO in order to be notified about their award status. Applications must be submitted electronically as described at *http://www.uspto.gov/patentsforhumanity.* Complete submitted applications will be available on the public Web site after being screened for inappropriate material.

The applications are reviewed by external judges working independently. A selection committee composed of representatives from other federal agencies and laboratories will make recommendations for the awards based on the judges' reviews. Those applicants who are selected for an award will receive a certificate redeemable to accelerate select matters before the USPTO and public recognition of their efforts, including an awards ceremony at the USPTO. The certificates can be redeemed to accelerate one of the following matters: an *ex parte* reexamination proceeding, including one appeal to the Patent Trial and Appeal Board (PTAB) from that proceeding; a patent application, including one appeal to the PTAB from that application; or an appeal to the PTAB of a claim twice rejected in a patent application or reissue application or finally rejected in an *ex parte* reexamination, without accelerating the underlying matter which generated the appeal. The certificates cannot be transferred to other parties.

Affected Public: Individuals or households, businesses or other for-profits; not-for-profit institutions.

Frequency: Annually.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Nicholas A. Fraser, email: *Nicholas_A._Fraser@omb.eop.gov.*

Once submitted, the request will be publicly available in electronic format through reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Further information can be obtained by:

• *Email: InformationCollection@uspto.gov.* Include ''0651–0066 copy request'' in the subject line of the message.

• *Mail:* Marcie Lovett, Records Management Division Director, Office of the Chief Information Officer, United States Patent and Trademark Office, P.O. Box 1450, Alexandria, VA 22313–1450.

Written comments and recommendations for the proposed information collection should be sent on or before September 16, 2015 to Nicholas A. Fraser, OMB Desk Officer, via email to *Nicholas_A._Fraser@omb.eop.gov,* or by fax to 202–395–5167, marked to the attention of Nicholas A. Fraser.

Dated: August 6, 2015.

Marcie Lovett,

Records Management Division Director, USPTO, Office of the Chief Information Officer.

BILLING CODE 3510–16–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID: DoD–2015–OS–0081]

Privacy Act of 1974; System of Records

AGENCY: Office of the Secretary of Defense, DoD.

ACTION: Notice to delete a System of Records.

SUMMARY: The Office of the Secretary of Defense is deleting a system of records notice from its existing inventory of record systems subject to the Privacy Act of 1974, as amended. The system of records notice is DA&M 02, Director of Administration and Management (DA&M) Mentoring Program (March 8, 2013, 78 FR 15006).

DATES: Comments will be accepted on or before September 16, 2015. This proposed action will be effective on the day following the end of the comment period unless comments are received which result in a contrary determination.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

* *Federal Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

* *Mail:* Department of Defense, Office of the Deputy Chief Management Officer, Directorate of Oversight and Compliance, Regulatory and Audit Matters Office, 9010 Defense Pentagon, Washington, DC 20301–9010.

Instructions: All submissions received must include the agency name and docket number for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Mrs. Cindy Allard at (571) 372–0461.

SUPPLEMENTARY INFORMATION: The Office of the Secretary of Defense systems of records notices subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended, have been published in the **Federal Register** and are available from the address in **FOR FURTHER INFORMATION CONTACT** or at the Defense Privacy and Civil Liberties Division Web site at *http://dpcld.defense.gov/.* The Office of the Secretary of Defense proposes to delete one system of records notice from its inventory of record systems subject to the Privacy Act of 1974 (5 U.S.C. 552a), as amended. The proposed deletion is not within the purview of subsection (r) of the Privacy Act of 1974 (5 U.S.C. 552a), as amended, which requires the submission of a new or altered system report.

Dated: August 11, 2015.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

Deletion:

DA&M 02

Director of Administration and Management (DA&M) Mentoring Program (March 8, 2013, 78 FR 15006)

REASON:

The mentoring program is no longer an active program and the records have been destroyed, therefore, this notice can be deleted.

Docket Numbers: ER15–2416–000.

Applicants: Southwest Power Pool, Inc.

Description: § 205(d) Rate Filing: 1887R4 Westar Energy, Inc. (Elsmore) NITSA and NOA to be effective 8/1/2015.

Filed Date: 8/11/15.

Accession Number: 20150811–5172.

Comments Due: 5 p.m. ET 9/1/15.

The filings are accessible in the Commission's eLibrary system by clicking on the links or querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: August 11, 2015.

Kimberly D. Bose,

Secretary.

[FR Doc. 2015–20195 Filed 8–14–15; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. PF15–22–000]

Equitrans, L.P.; Notice of Intent To Prepare an Environmental Impact Statement for the Planned Equitrans Expansion Project, and Request for Comments on Environmental Issues

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will discuss the potential environmental effects of the Equitrans Expansion Project (EEP, or Project) involving construction and operation of facilities by Equitrans, L.P. (Equitrans) in Allegheny, Washington, and Green Counties, Pennsylvania and Wetzel County, West Virginia, in the Commission's environmental impact statement (EIS) currently under preparation for the planned Mountain Valley Pipeline (MVP) Project (FERC Docket No. PF15–3–000). The Project is designed to transport natural gas from the northern portion of Equitrans' system south to a future interconnection with MVP, as well as existing interconnects on the southern portion of Equitrans' system with Texas Eastern Transmission, LP and Dominion Transmission, Inc. Because of the interconnection with MVP, the Commission staff will evaluate the two projects jointly in the EIS. This EIS will be used by the Commission in its decision-making process to determine whether the MVP and EEP Projects are in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies on the EEP. You can make a difference by providing us with your specific comments or concerns about the Project. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the EIS. To ensure that your comments are timely and properly recorded, please send your comments so that the Commission receives them in Washington, DC on or before September 14, 2015.

If you sent comments on the EEP to the Commission before the opening of this docket on April 9, 2015, you will need to re-file those comments in Docket No. PF15–22–000 to ensure they are considered as part of this proceeding. This scoping period is established to receive comments on the EEP, and comments previously filed with the FERC regarding the MVP Project should not be refiled under the EEP docket.

This notice is being sent to the Commission's current environmental mailing list for this Project. State and local government representatives should notify their constituents of this planned Project and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a representative of Equitrans may contact you about the acquisition of an easement to construct, operate, and maintain the planned facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the Commission approves the Project, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings where compensation would be determined in accordance with state law.

A fact sheet prepared by the FERC entitled ''An Interstate Natural Gas Facility On My Land? What Do I Need To Know?'' is available for viewing on the FERC Web site (*www.ferc.gov*). This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to

participate in the Commission's proceedings.

Public Participation

For your convenience, there are three methods you can use to submit your comments to the Commission. The Commission encourages electronic filing of comments and has expert staff available to assist you at (202) 502–8258 or *efiling@ferc.gov.* Please carefully follow these instructions so that your comments are properly recorded.

(1) You can file your comments electronically using the *eComment* feature on the Commission's Web site (*www.ferc.gov*) under the link to *Documents and Filings.* This is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the *eFiling* feature on the Commission's Web site (*www.ferc.gov*) under the link to *Documents and Filings.* With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''*eRegister.''* If you are filing a comment on a particular project, please select ''Comment on a Filing'' as the filing type; or

(3) You can file a paper copy of your comments by mailing them to the following address. Be sure to reference the project docket number (PF15–22–000) with your submission: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Room 1A, Washington, DC 20426.

Summary of the Planned Project

According to Equitrans, the EEP is designed to allow shippers the flexibility of transporting up to 600,000 dekatherms per day of natural gas produced in the Appalachian Basin to potential markets in the Northeast, Mid-Atlantic, and Southeastern United States. The EEP would consist of the following facilities:

- A new 3.0-mile-long, 30-inch-diameter pipeline and a new 4.2-mile-long, 20-inch-diameter pipeline in Allegheny and Washington Counties Pennsylvania (H–316 Pipeline and H–318 Pipeline);
- a new Redhook Compressor Station, to replace the existing Pratt Compressor Station in Green County, Pennsylvania;
- an interconnect with the planned MVP Project and a tap on Equitrans' existing H–302 pipeline in Wetzel County, West Virginia (Webster Interconnection and Mobley Tap);
- a new extension of an existing 6-inch-diameter pipeline and an existing 12-inch-diameter pipeline extending for 0.2-mile in Green County, Pennsylvania (M–80 Pipeline and H–158 Pipeline);
- a new approximately 200-foot-long, 16-inch-diameter pipeline in Wetzel County, West Virginia (H–319 Pipeline);
- a new approximately 55-foot-long extension of an existing 12-inch pipeline in Green County, Pennsylvania (H–305 Pipeline);
- pig launchers and receivers; [1] and
- four meter and regulation stations.

The general location of the Project facilities is shown in appendix 1.

Land Requirements for Construction

Construction of the planned facilities would disturb approximately 207 acres of land for the aboveground facilities and the pipelines. Following construction, Equitrans would maintain approximately 64 acres for permanent operation of the Project's facilities; the remaining acreage would be restored and revert to former uses. The actual acreage affected will be determined more precisely as Project design proceeds and likely will increase above these preliminary estimates.

The EIS Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. The NEPA also requires us [2] to discover and address concerns the public may have about proposals. This process is referred to as scoping. The main goal of the scoping process is to focus the analysis in the EIS on the important environmental issues. By this notice, the Commission requests public comments on the scope of the issues to address in the EIS. We will consider all filed comments during the preparation of the EIS.

In the EIS we will discuss impacts that could occur as a result of the construction and operation of the planned project under these general headings:

- Geology and soils;
- water resources and wetlands;
- cultural resources;
- vegetation and wildlife;
- cultural resources;
- land use, recreation, and visual resources;
- air quality and noise;
- public safety; and
- cumulative impacts.

The EIS will present our independent analysis of the issues. We will evaluate possible alternatives to the planned Project or portions of the Project. For specific resources, we would make recommendations on how to avoid, minimize, or mitigate impacts, in addition to the measures proposed by Equitrans.

Although no formal application has been filed, we have already initiated our environmental review under the Commission's pre-filing process. The purpose of the pre-filing process is to encourage early involvement of interested stakeholders and to identify and resolve issues before the FERC receives an application. As part of our pre-filing review, we have begun to contact some federal and state agencies to discuss their involvement in the scoping process and the preparation of the EIS.

We will publish and distribute the draft EIS for public comment. After the comment period, we will consider all timely comments and revise the document, as necessary, before issuing a final EIS. To ensure we have the opportunity to consider and address your comments, please carefully follow the instructions in the Public Participation section of this notice.

With this notice, we are asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues related to this project to formally cooperate with us in the preparation of the EIS.[3] Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the Public Participation section of this notice. The U.S. Department of Agriculture Forest Service, U.S. Army Corps of Engineers, U.S. Environmental Protection Agency, U.S. Department of Transportation, West Virginia Department of Natural Resources, and the West Virginia Department of Environment Protection have already agreed to be cooperating agencies in the development of the EIS for the MVP Project.

Consultations Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, we are using this notice to initiate consultation with the

[1] A ''pig'' is a tool that the pipeline company inserts into and pushes through the pipeline for cleaning the pipeline, conducting internal inspections, or other purposes.

[2] The pronouns ''we'', ''us'', and ''our'' refer to the environmental staff of the Commission's Office of Energy Projects.

[3] The Council on Environmental Quality regulations addressing cooperating agency responsibilities are at Title 40, Code of Federal Regulations, part 1501.6.

applicable State Historic Preservation Office(s), and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the Project's potential effects on historic properties.[4] We will define the Project-specific Area of Potential Effects (APE) in consultation with the SHPO(s) as the Project develops. On natural gas facility projects, the APE at a minimum encompasses all areas subject to ground disturbance (examples include construction right-of-way, contractor/pipe storage yards, compressor stations, and access roads). Our EIS for this Project will document our findings on the impacts on historic properties and summarize the status of consultations under section 106.

Currently Identified Environmental Issues

We have already identified several issues that we think deserve attention based on a preliminary review of the planned facilities and the environmental information provided by Equitrans. This preliminary list of issues may change based on your comments and our analysis:

- Steep slopes;
- erosion control;
- alternatives and their potential impacts on a range of resources; and
- cumulative impacts.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Indian Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for Project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the Project. We will update the environmental mailing list as the analysis proceeds to ensure that we send the information related to this environmental review to all individuals, organizations, and government entities interested in and/or potentially affected by the planned Project.

Copies of the completed draft EIS will be sent to the environmental mailing list for public review and comment. If you would prefer to receive a paper copy of the document instead of the compact disc version or would like to remove your name from the mailing list, please return the attached Information Request (appendix 2).

Becoming an Intervenor

Once Equitrans files its application with the Commission, you may want to become an ''intervenor,'' which is an official party to the Commission's proceeding. Intervenors play a more formal role in the process and are able to file briefs, appear at hearings, and be heard by the courts if they choose to appeal the Commission's final ruling. An intervenor formally participates in the proceeding by filing a request to intervene. Motions to intervene are more fully described at *http://www.ferc.gov/resources/guides/how-to/intervene.asp.* Instructions for becoming an intervenor are in the ''Document-less Intervention Guide'' under the ''e-filing'' link on the Commission's Web site. Please note that the Commission will not accept requests for intervenor status at this time. You must wait until the Commission receives a formal application for the project.

Additional Information

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC Web site (*www.ferc.gov*) using the eLibrary link. Click on the eLibrary link, click on ''General Search'' and enter the docket number, excluding the last three digits in the Docket Number field (*i.e.,* PF15–22). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to *www.ferc.gov/docs-filing/esubscription.asp.*

Finally, public meetings or site visits, if scheduled, will be posted on the Commission's calendar located at *www.ferc.gov/EventCalendar/EventsList.aspx* along with other related information.

Dated: August 11, 2015.

BILLING CODE 6717–01–P

[4] The Advisory Council on Historic Preservation regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER15–2304–000]

Oildale Energy, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Oildale Energy LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is August 31, 2015.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by

clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email *FERCOnlineSupport@ferc.gov.* or call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: August 11, 2015.

Kimberly D. Bose,

Secretary.

[FR Doc. 2015–20196 Filed 8–14–15; 8:45 am]

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP15–539–000]

Columbia Gulf Transmission, LLC; Notice of Application

Take notice that on July 29, 2015, Columbia Gulf Transmission, LLC (Columbia Gulf), 5151 San Felipe, Suite 2500, Houston, Texas 77056, filed an application under section 7(c) of the Natural Gas Act and Part 157 of the Commission's regulations requesting authorization to construct, own and operate 51,800 horsepower at two greenfield compressor stations in Carter, Menifee and Montgomery Counties, Kentucky, to enable up to 621,000 Dekatherms per day (Rayne XPress Project) of firm transportation on its system, all as more fully described in the application.

The filing may also be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, please contact FERC at *FERCOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or TTY, (202) 502–8659.

Any questions regarding the proposed project should be directed to William A. Sala, Jr., Senior Counsel, Columbia Gulf Transmission, LLC, 5151 San Felipe, Suite 2500, Houston, Texas 77056; telephone: 713–386–3743.

On June 22, 2015 in Docket No. CP15–514–000, the Commission issued a Notice of Application (June 22 Notice) for Columbia Gulf's affiliate, Columbia Gas Transmission, LLC's (Columbia Gas) Leach XPress Project. The June 22 Notice stated that the Rayne Express Project may have some connection to Columbia Gas' Leach Xpress Project, and further, that ''Until the details of the Rayne Xpress project are filed and more fully understood, the Commission cannot begin preparation of the Environmental Impact Statement (EIS) to comply with the NEPA of 1969.'' Columbia Gulf's Rayne XPress application filing confirms the connection between the Leach XPress and Rayne XPress Projects and thus, we can begin our analysis.

Within 90 days after the date of this Notice of Application for the Rayne Xpress project, the Commission staff will issue a Notice of Schedule for Environmental Review that will indicate the anticipated date for the Commission's staff issuance of the final EIS analyzing both the Leach XPress and Rayne XPress proposals. The issuance of a Notice of Schedule for Environmental Review will also serve to notify federal and state agencies of the timing for the completion of all necessary reviews, and the subsequent need to complete all federal authorizations within 90 days of the date of issuance of the Commission staff's final EIS.

There are two ways to become involved in the Commission's review of this project. First, any person wishing to obtain legal status by becoming a party to the proceedings for this project should, on or before the comment date stated below, file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, a motion to intervene in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 385.214 or 385.211) and the Regulations under the NGA (18 CFR 157.10). A person obtaining party status will be placed on the service list maintained by the Secretary of the Commission and will receive copies of all documents filed by the applicant and by all other parties. A party must submit 7 copies of filings made with the Commission and must mail a copy to the applicant and to every other party in the proceeding. Only parties to the proceeding can ask for court review of Commission orders in the proceeding.

However, a person does not have to intervene in order to have comments considered. The second way to participate is by filing with the Secretary of the Commission, as soon as possible, an original and two copies of comments in support of or in opposition to this project. The Commission will consider these comments in determining the appropriate action to be taken, but the filing of a comment alone will not serve to make the filer a party to the proceeding. The Commission's rules require that persons filing comments in opposition to the project provide copies of their protests only to the party or parties directly involved in the protest.

Persons who wish to comment only on the environmental review of this project should submit an original and two copies of their comments to the Secretary of the Commission. Environmental commenters will be placed on the Commission's environmental mailing list, will receive copies of the environmental documents, and will be notified of meetings associated with the Commission's environmental review process. Environmental commenters will not be required to serve copies of filed documents on all other parties. However, the non-party commenters will not receive copies of all documents filed by other parties or issued by the Commission (except for the mailing of environmental documents issued by the Commission) and will not have the right to seek court review of the Commission's final order.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

Comment Date: September 1, 2015.

Dated: August 11, 2015.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. OR15–34–000]

Saddle Butte Rockies Midstream, LLC; Notice of Request for Waiver

Take notice that on August 7, 2015, pursuant to Rule 204 of the Commission's Rules of Practices and Procedure, 18 CFR 385.204 (2014), Saddle Butte Rockies Midstream, LLC filed a petition requesting temporary waiver of the tariff filing and reporting requirements of sections 6 and 20 of the Interstate Commerce Act and parts 341 and 357 of the Commission's regulations, all as more fully explained in the petition.

Any person desiring to intervene or to protest this filing must file in

accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Petitioner.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically should submit an original and 5 copies of the protest or intervention to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. PF15–17–000]

Texas Eastern Transmission, LP; Notice of Intent To Prepare an Environmental Assessment for the Planned Access South, Adair Southwest, and Lebanon Extension Projects and Request for Comments on Environmental Issues

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental assessment (EA) that will discuss the environmental impacts of the Access South, Adair Southwest, and Lebanon Extension Projects (Projects) in Docket No. PF15–17–000. The projects involve construction, abandonment, and operation of facilities by Texas Eastern Transmission, LP (Texas Eastern) that would provide incremental pipeline transportation service from the Appalachia area natural gas supply basins to markets in the Midwest and Southeast. The Commission will use this EA in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies on the Projects. You can make a difference by providing us with your specific comments or concerns about the Projects. Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the EA. To ensure that your comments are timely and properly recorded, please send your comments so that the Commission receives them in Washington, DC on or before September 10, 2015.

If you sent comments on the Projects to the Commission before the opening of this docket on March 13, 2015, you will need to file those comments in Docket No. PF15–17–000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission's current environmental mailing list for this project. State and local government representatives should notify their constituents of this planned Projects and encourage them to comment on their areas of concern.

If you are a landowner receiving this notice, a pipeline company representative may contact you about the acquisition of an easement to

construct, operate, and maintain the planned facilities. The company would seek to negotiate a mutually acceptable agreement. However, if the Commission approves the Projects, that approval conveys with it the right of eminent domain. Therefore, if easement negotiations fail to produce an agreement, the pipeline company could initiate condemnation proceedings where compensation would be determined in accordance with state law.

A fact sheet prepared by the FERC entitled ''An Interstate Natural Gas Facility On My Land? What Do I Need To Know?'' is available for viewing on the FERC Web site (*www.ferc.gov*). This fact sheet addresses a number of typically asked questions, including the use of eminent domain and how to participate in the Commission's proceedings.

Public Participation

For your convenience, there are three methods you can use to submit your comments to the Commission. The Commission encourages electronic filing of comments and has expert staff available to assist you at (202) 502–8258 or *efiling@ferc.gov.* Please carefully follow these instructions so that your comments are properly recorded.

(1) You can file your comments electronically using the *eComment* feature on the Commission's Web site (*www.ferc.gov*) under the link to *Documents and Filings.* This is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the *eFiling* feature on the Commission's Web site (*www.ferc.gov*) under the link to *Documents and Filings.* With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''*eRegister.''* If you are filing a comment on a particular project, please select ''Comment on a Filing'' as the filing type; or

(3) You can file a paper copy of your comments by mailing them to the following address. Be sure to reference the project docket number (PF15–17–000) with your submission: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Room 1A, Washington, DC 20426.

Summary of the Planned Project

The planned pipeline facilities for the Projects include 19.9 miles of 36-inch diameter pipeline loop [1] in three segments, most of which would be either within or adjacent to Texas Eastern's existing rights-of-way in Meigs, Athens, Noble, Monroe Counties, Ohio. Proposed modifications to aboveground facilities would include the installation of new compression and additional modifications necessary to allow for bidirectional flow, increased horsepower requirements, and meter reversals at thirteen existing compressor stations which are expected to be located primarily within Texas Eastern's current footprint.

At the Five Points Compressor Station in Pickaway County, Ohio, Texas Eastern would install a new 10,000 horsepower (hp) electric compressor and would abandon in-place three 2,000 hp electric compressor units. A new 16,875 hp electric compressor would be added at the Tompkinsville Compressor Station in Monroe County, Kentucky.

Planned modifications at thirteen existing compressor station sites would include piping modifications to accommodate bi-directional flow capability along Texas Eastern's existing mainline. These modifications are proposed at the following compressor stations:

- Holbrook Compressor Station in Greene County, Pennsylvania;
- Lebanon Compressor Station in Warren County, Ohio;
- Five Points Compressor Station in Pickaway County, Ohio;
- Somerset Compressor Station in Perry County, Ohio;
- Berne Compressor Station in Monroe County, Ohio;
- Athens Compressor Station in Athens County, Ohio;
- Owingsville Compressor Station in Bath County, Kentucky;
- Danville Compressor Station in Lincoln County, Kentucky;
- Tompkinsville Compressor Station in Monroe County, Kentucky;
- Gladeville Compressor Station in Wilson County, Tennessee;
- Barton Compressor Station in Colbert County, Alabama;
- Egypt Compressor Station in Monroe County, Mississippi; and
- Kosciusko Compressor Station in Attala County, Mississippi.

In addition two pig [2] launcher/receivers would be relocated and two new pig launcher/receivers would be installed in Monroe County, Ohio.

The general location of the Projects facilities is shown in appendix 1.[3]

Land Requirements for Construction

Construction of the planned facilities would disturb about 631.9 acres of land for the aboveground facilities and the pipeline, including access roads. Following construction, Texas Eastern would maintain about 70.7 acres for permanent operation of the Projects' facilities; the remaining acreage would be restored and revert to former uses. The planned loops would be mostly adjacent to Texas Eastern's existing pipeline rights-of-way and construction at the compressor stations would occur at existing facilities where no permanent expansion of the facilities would occur.

The EA Process

The National Environmental Policy Act (NEPA) requires the Commission to take into account the environmental impacts that could result from an action whenever it considers the issuance of a Certificate of Public Convenience and Necessity. NEPA also requires us [4] to discover and address concerns the public may have about proposals. This process is referred to as scoping. The main goal of the scoping process is to focus the analysis in the EA on the important environmental issues. By this notice, the Commission requests public comments on the scope of the issues to address in the EA. We will consider all filed comments during the preparation of the EA.

In the EA we will discuss impacts that could occur as a result of the construction and operation of the planned Projects under these general headings:

- Geology and soils;
- land use;
- water resources, fisheries, and wetlands;
- cultural resources;
- vegetation and wildlife;
- air quality and noise;
- endangered and threatened species;
- public safety; and
- cumulative impacts.

We will also evaluate possible alternatives to the planned Projects or portions of the Projects, and make

[1] A pipeline loop is a segment of pipe constructed parallel to an existing pipeline to increase capacity.

[2] A ''pig'' is a tool that the pipeline company inserts into and pushes through the pipeline for cleaning the pipeline, conducting internal inspections, or other purposes.

[3] The appendices referenced in this notice will not appear in the **Federal Register**. Copies of the appendices were sent to all those receiving this notice in the mail and are available at *www.ferc.gov* using the link called ''eLibrary'' or from the Commission's Public Reference Room, 888 First Street NE., Washington, DC 20426, or call (202) 502–8371. For instructions on connecting to eLibrary, refer to the last page of this notice.

[4] ''We,'' ''us,'' and ''our'' refer to the environmental staff of the Commission's Office of Energy Projects.

recommendations on how to lessen or avoid impacts on the various resource areas.

Although no formal application has been filed, we have already initiated our NEPA review under the Commission's pre-filing process. The purpose of the pre-filing process is to encourage early involvement of interested stakeholders and to identify and resolve issues before the FERC receives an application. As part of our pre-filing review, we have begun to contact some federal and state agencies to discuss their involvement in the scoping process and the preparation of the EA.

The EA will present our independent analysis of the issues. The EA will be available in the public record through eLibrary. Depending on the comments received during the scoping process, we may also publish and distribute the EA to the public for an allotted comment period. We will consider all comments on the EA before we make our recommendations to the Commission. To ensure we have the opportunity to consider and address your comments, please carefully follow the instructions in the Public Participation section, beginning on page 2.

With this notice, we are asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues related to this project to formally cooperate with us in the preparation of the EA.[5] Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the Public Participation section of this notice.

Consultations Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, we are using this notice to initiate consultation with the applicable State Historic Preservation Office(s), and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the Projects' potential effects on historic properties.[6] We will define the project-specific Area of Potential Effects (APE) in consultation with the SHPO(s) as the Projects develop. On natural gas facility projects, the APE at a minimum encompasses all areas subject to ground disturbance (examples include construction right-of-way, contractor/pipe storage yards, compressor stations, and access roads). Our EA for the Projects will document our findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the Projects. We will update the environmental mailing list as the analysis proceeds to ensure that we send the information related to this environmental review to all individuals, organizations, and government entities interested in and/or potentially affected by the planned Projects.

If we publish and distribute the EA, copies of the EA will be sent to the environmental mailing list for public review and comment. If you would prefer to receive a paper copy of the document instead of the CD version or would like to remove your name from the mailing list, please return the attached Information Request (appendix 2).

Becoming an Intervenor

Once Texas Eastern files its application with the Commission, you may want to become an ''intervenor'' which is an official party to the Commission's proceeding. Intervenors play a more formal role in the process and are able to file briefs, appear at hearings, and be heard by the courts if they choose to appeal the Commission's final ruling. An intervenor formally participates in the proceeding by filing a request to intervene. Motions to intervene are more fully described at *http://www.ferc.gov/resources/guides/how-to/intervene.asp.* Instructions for becoming an intervenor are in the ''Document-less Intervention Guide'' under the ''e-filing'' link on the Commission's Web site. Please note that the Commission will not accept requests for intervenor status at this time. You must wait until the Commission receives a formal application for the project.

Additional Information

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC Web site (*www.ferc.gov*) using the eLibrary link. Click on the eLibrary link, click on ''General Search'' and enter the docket number, excluding the last three digits in the Docket Number field (*i.e.,* PF15–17). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659. The eLibrary link also provides access to the texts of formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to *www.ferc.gov/docs-filing/esubscription.asp.*

Finally, public meetings or site visits will be posted on the Commission's calendar located at *www.ferc.gov/EventCalendar/EventsList.aspx* along with other related information.

Dated: August 11, 2015.

Kimberly D. Bose,

Secretary.

[FR Doc. 2015–20198 Filed 8–14–15; 8:45 am]

BILLING CODE 6717–01–P

[5] The Council on Environmental Quality regulations addressing cooperating agency responsibilities are at Title 40, Code of Federal Regulations, Part 1501.6.

[6] The Advisory Council on Historic Preservation regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–9932–28–OSWER]

Twenty-Eighth Update of the Federal Agency Hazardous Waste Compliance Docket

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Since 1988, the Environmental Protection Agency (EPA) has maintained a Federal Agency Hazardous Waste Compliance Docket (''Docket'') under Section 120(c) of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). Section 120(c) requires EPA to establish a Docket that contains

certain information reported to EPA by Federal facilities that manage hazardous waste or from which a reportable quantity of hazardous substances has been released. As explained further below, the Docket is used to identify Federal facilities that should be evaluated to determine if they pose a threat to public health or welfare and the environment and to provide a mechanism to make this information available to the public.

This notice identifies the Federal facilities not previously listed on the Docket and reported to EPA since the last update of the Docket on December 31, 2014. In addition to the list of additions to the Docket, this notice includes a section with revisions of the previous Docket list. Thus, the revisions in this update include 21 additions and 90 deletions to the Docket since the previous update. At the time of publication of this notice, the new total number of Federal facilities listed on the Docket is 2,323.

DATES: This list is current as of July 13, 2015.

FOR FURTHER INFORMATION CONTACT: Electronic versions of the Docket and more information on its implementation can be obtained at *http://www2.epa.gov/fedfac/previous-federal-agency-hazardous-waste-compliance-docket-updates* by clicking on the link for *Update #28 to the Federal Agency Hazardous Waste Compliance Docket* or by contacting Benjamin Simes (*Simes.Benjamin@epa.gov*), Federal Agency Hazardous Waste Compliance Docket Coordinator, Federal Facilities Restoration and Reuse Office (Mail Code 5106P), U.S. Environmental Protection Agency, 1200 Pennsylvania Avenue NW., Washington, DC 20460.

SUPPLEMENTARY INFORMATION:

Table of Contents

1.0 Introduction

Section 120(c) of CERCLA, 42 United States Code (U.S.C.) 9620(c), as amended by the Superfund Amendments and Reauthorization Act of 1986 (SARA), requires EPA to establish the Federal Agency Hazardous Waste Compliance Docket. The Docket contains information on Federal facilities that manage hazardous waste and such information is submitted by Federal agencies to EPA under Sections 3005, 3010, and 3016 of the Resource Conservation and Recovery Act (RCRA), 42 U.S.C. 6925, 6930, and 6937. Additionally, the Docket contains information on Federal facilities with a reportable quantity of hazardous substances that has been released and such information is submitted by Federal agencies to EPA under Section 103 of CERCLA, 42 U.S.C. 9603. Specifically, RCRA Section 3005 establishes a permitting system for certain hazardous waste treatment, storage, and disposal (TSD) facilities; RCRA Section 3010 requires waste generators, transporters and TSD facilities to notify EPA of their hazardous waste activities; and RCRA Section 3016 requires Federal agencies to submit biennially to EPA an inventory of their Federal hazardous waste facilities. CERCLA Section 103(a) requires the owner or operator of a vessel or onshore or offshore facility to notify the National Response Center (NRC) of any spill or other release of a hazardous substance that equals or exceeds a reportable quantity (RQ), as defined by CERCLA Section 101. Additionally, CERCLA Section 103(c) requires facilities that have ''stored, treated, or disposed of'' hazardous wastes and where there is ''known, suspected, or likely releases'' of hazardous substances to report their activities to EPA.

CERCLA Section 120(d) requires EPA to take steps to assure that a Preliminary Assessment (PA) be completed for those sites identified in the Docket and that the evaluation and listing of sites with a PA be completed within a reasonable time frame. The PA is designed to provide information for EPA to consider when evaluating the site for potential response action or inclusion on the National Priorities List (NPL).

The Docket serves three major purposes: (1) To identify all Federal facilities that must be evaluated to determine whether they pose a threat to human health and the environment sufficient to warrant inclusion on the National Priorities List (NPL); (2) to compile and maintain the information submitted to EPA on such facilities under the provisions listed in Section 120(c) of CERCLA; and (3) to provide a mechanism to make the information available to the public.

The initial list of Federal facilities to be included on the Docket was published in the **Federal Register** on February 12, 1988 (53 FR 4280). Since then, updates to the Docket have been published on November 16, 1988 (53 FR 46364); December 15, 1989 (54 FR 51472); August 22, 1990 (55 FR 34492); September 27, 1991 (56 FR 49328); December 12, 1991 (56 FR 64898); July 17, 1992 (57 FR 31758); February 5, 1993 (58 FR 7298); November 10, 1993 (58 FR 59790); April 11, 1995 (60 FR 18474); June 27, 1997 (62 FR 34779); November 23, 1998 (63 FR 64806); June 12, 2000 (65 FR 36994); December 29, 2000 (65 FR 83222); October 2, 2001 (66 FR 50185); July 1, 2002 (67 FR 44200); January 2, 2003 (68 FR 107); July 11, 2003 (68 FR 41353); December 15, 2003 (68 FR 69685); July 19, 2004 (69 FR 42989); December 20, 2004 (69 FR 75951); October 25, 2005 (70 FR 61616); August 17, 2007 (72 FR 46218); November 25, 2008 (73 FR 71644); October 13, 2010 (75 FR 62810); November 6, 2012 (77 FR 66609), March 18, 2013 (78 FR 16668), January 6, 2014 (79 FR 654), and December 31, 2014 (79 FR 78850). This notice constitutes the twenty-eighth update of the Docket.

This notice provides some background information on the Docket. Additional information on the Docket requirements and implementation are found in the Docket Reference Manual, Federal Agency Hazardous Waste Compliance Docket found at *http://www2.epa.gov/fedfac/docket-reference-manual-federal-agency-hazardous-waste-compliance-docket-interim-final* or obtained by calling the Regional Docket Coordinators listed below. This notice also provides changes to the list of sites included on the Docket in three areas: (1) Additions, (2) Deletions, and (3) Corrections. Specifically, additions are newly identified Federal facilities that have been reported to EPA since the last update and now are included on the Docket; the deletions section lists Federal facilities that EPA is deleting from the Docket.[1] The information submitted to EPA on each Federal facility is maintained in the Docket repository located in the EPA Regional office of the Region in which the Federal facility is located; for a description of the information required under those provisions, *see* 53 FR 4280 (February 12, 1988). Each repository contains the documents submitted to EPA under the reporting provisions and correspondence relevant to the reporting provisions for each Federal facility.

In prior updates, information was also provided regarding No Further Remedial Action Planned (NFRAP) status changes. However, information on NFRAP and NPL status is no longer being provided separately in the Docket update as it is now available at: *http://www2.epa.gov/fedfac/previous-federal-*

[1] See Section 3.2 for the criteria for being deleted from the Docket.

agency-hazardous-waste-compliance-docket-updates or by contacting the EPA HQ Docket Coordinator at the address provided in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

2.0 Regional Docket Coordinators

Contact the following Docket Coordinators for information on Regional Docket repositories:

Martha Bosworth (HBS), US EPA Region 1, 5 Post Office Square, Suite 100, Mail Code: OSRR07–2, Boston MA 02109–3912, (617) 918–1407.

Helen Shannon (ERRD), US EPA Region 2, 290 Broadway, New York, NY 10007–1866, (212) 637– 4260.

Joseph Vitello (3HS12), US EPA Region 3, 1650 Arch Street, Philadelphia, PA 19107, (215) 814–3354.

Dawn Taylor (4SF–SRSEB), US EPA Region 4, 61 Forsyth St., SW., Atlanta, GA 30303, (404) 562–8575.

Michael Chrystof (SR–6J), US EPA Region 5, 77 W. Jackson Blvd., Chicago, IL 60604, (312) 353–3705.

Philip Ofosu (6SF–RA), US EPA Region 6, 1445 Ross Avenue, Dallas, TX 75202–2733, (214) 665–3178.

Paul Roemerman (SUPRERSP), US EPA Region 7, 11201 Renner Blvd., Lenexa, KS 66219, (913) 551–7694.

Ryan Dunham (EPR–F), US EPA Region 8, 1595 Wynkoop Street, Denver, CO 80202, (303) 312–6627.

Leslie Ramirez (SFD–6–1), US EPA Region 9, 75 Hawthorne Street, San Francisco, CA 94105, (415) 972–3978.

Monica Lindeman (ECL, ABU), US EPA Region 10, 1200 Sixth Avenue, Suite 900, ECL–112, Seattle, WA 98101, (206) 553–5113.

3.0 Revisions of the Previous Docket

This section includes a discussion of the additions and deletions to the list of Docket facilities since the previous Docket update.

3.1 Additions

In this notice, 21 Federal facilities are being added to the Docket, primarily because of new information obtained by EPA (for example, recent reporting of a facility pursuant to RCRA Sections 3005, 3010, or 3016 or CERCLA Section 103). CERCLA Section 120, as amended by the Defense Authorization Act of 1997, specifies that EPA take steps to assure that a Preliminary Assessment (PA) be completed within a reasonable time frame for those Federal facilities that are included on the Docket. Among other things, the PA is designed to provide information for EPA to consider when evaluating the site for potential response action or listing on the NPL.

3.2 Deletions

In this notice, 90 Federal facilities are being deleted from the Docket. There are no statutory or regulatory provisions that address deletion of a facility from the Docket. However, if a facility is incorrectly included on the Docket, it may be deleted from the Docket. The criteria EPA uses in deleting sites from the Docket include: A facility for which there was an incorrect report submitted for hazardous waste activity under RCRA (*e.g.,* 40 CFR 262.44); a facility that was not Federally-owned or operated at the time of the listing; a facility included more than once (*i.e.,* redundant listings); or when multiple facilities are combined under one listing. (See Docket Codes (*Categories for Deletion of Facilities*) for a more refined list of the criteria EPA uses for deleting sites from the Docket. Facilities being deleted no longer will be subject to the requirements of CERCLA Section 120(d).

3.3 Corrections

Changes necessary to correct the previous Docket are identified by both EPA and Federal agencies. The corrections section may include changes in addresses or spelling, and corrections of the recorded name and ownership of a Federal facility. In addition, changes in the names of Federal facilities may be made to establish consistency in the Docket or between the Superfund Enterprise Management System (SEMS) and the Docket. For the Federal facility for which a correction is entered, the original entry is as it appeared in previous Docket updates. The corrected update is shown directly below, for easy comparison. This notice includes 68 corrections.

4.0 Process for Compiling the Updated Docket

In compiling the newly reported Federal facilities for the update being published in this notice, EPA extracted the names, addresses, and identification numbers of facilities from four EPA databases—the Emergency Response Notification System (ERNS), the Biennial Inventory of Federal Agency Hazardous Waste Activities, the Resource Conservation and Recovery Act Information System (RCRAInfo), and CERCLIS—that contain information about Federal facilities submitted under the four provisions listed in CERCLA Section 120(c).

EPA assures the quality of the information on the Docket by conducting extensive evaluation of the current Docket list with the information obtained from the databases identified above to determine which Federal facilities were, in fact, newly reported and qualified for inclusion on the update. EPA is also striving to correct errors for Federal facilities that were previously reported. For example, state-owned or privately-owned facilities that are not operated by the Federal government may have been included. Such problems are sometimes caused by procedures historically used to report and track Federal facilities data. Representatives of Federal agencies are asked to write to the EPA HQ Docket Coordinator at the address provided in the **FOR FURTHER INFORMATION CONTACT** section of this notice if revisions of this update information are necessary.

5.0 Facilities Not Included

Certain categories of facilities may not be included on the Docket, such as: (1) Federal facilities formerly owned by a Federal agency that at the time of consideration was not Federally-owned or operated; (2) Federal facilities that are small quantity generators (SQGs) that have never generated more than 1,000 kg of hazardous waste in any month; (3) Federal facilities that are solely hazardous waste transportation facilities, as reported under RCRA Section 3010; and (4) Federal facilities that have mixed mine or mill site ownership.

An EPA policy issued in June 2003 provided guidance for a site-by-site evaluation as to whether ''mixed ownership'' mine or mill sites, typically created as a result of activities conducted pursuant to the General Mining Law of 1872 and never reported under Section 103(a), should be included on the Docket. For purposes of that policy, mixed ownership mine or mill sites are those located partially on private land and partially on public land. This policy is found at *http://www2.epa.gov/fedfac/policy-listing-mixed-ownership-mine-or-mill-sites-created-result-general-mining-law-1872*. The policy for not including these facilities may change; facilities now not included may be added at some point if EPA determines that they should be included.

6.0 Facility NPL Status Reporting, Including NFRAP Status

EPA typically tracks the NPL status of Federal facilities listed on the Docket. An updated list of the NPL status of all Docket facilities, as well as their NFRAP status, is available at *http://www2.epa.gov/fedfac/previous-federal-agency-hazardous-waste-compliance-docket-updates* or by contacting the EPA HQ Docket Coordinator at the address provided in the **FOR FURTHER INFORMATION CONTACT** section of this notice. In prior updates, information regarding NFRAP status changes was provided separately.

7.0 Information Contained on Docket Listing

The updated information is provided in three tables. The first table is a list of new Federal facilities that are being added to the Docket, the second table is a list of Federal facilities that are being deleted from the Docket, and the third table is for corrections.

The Federal facilities listed in each table are organized by the date reported. Under each heading is listed the name and address of the facility, the Federal agency responsible for the facility, the statutory provision(s) under which the facility was reported to EPA, and a code.[2] The code key precedes the lists.

The statutory provisions under which a Federal facility is reported are listed in a column titled ''Reporting Mechanism.'' Applicable mechanisms are listed for each Federal facility: for example, Sections 3005, 3010, 3016, 103(c), or Other. ''Other'' has been added as a reporting mechanism to indicate those Federal facilities that otherwise have been identified to have releases or threat of releases of hazardous substances. The National Contingency Plan 40 CFR 300.405 addresses discovery or notification, outlines what constitutes discovery of a hazardous substance release, and states that a release may be discovered in several ways, including: (1) A report submitted in accordance with Section 103(a) of CERCLA, *i.e.,* reportable quantities codified at 40 CFR part 302; (2) a report submitted to EPA in accordance with Section 103(c) of CERCLA; (3) investigation by government authorities conducted in accordance with Section 104(e) of CERCLA or other statutory authority; (4) notification of a release by a Federal or state permit holder when required by its permit; (5) inventory or survey efforts or random or incidental observation reported by government agencies or the public; (6) submission of a citizen petition to EPA or the appropriate Federal facility requesting a preliminary assessment, in accordance with Section 105(d) of CERCLA; (7) a report submitted in accordance with Section 311(b)(5) of the Clean Water Act; and (8) other sources. As a policy matter, EPA generally believes it is appropriate for Federal facilities identified through the CERCLA discovery and notification process to be included on the Docket.

The complete list of Federal facilities that now make up the Docket and the NPL and NFRAP status are available to interested parties and can be obtained at *http://www2.epa.gov/fedfac/previous-federal-agency-hazardous-waste-compliance-docket-updates* by clicking on the link for *Federal Agency Hazardous Waste Compliance Docket Update #28* or by contacting the EPA HQ Docket Coordinator at the address provided in the **FOR FURTHER INFORMATION CONTACT** section of this notice. As of the date of this notice, the total number of Federal facilities that appear on the Docket is 2,323.

Dated: August 3, 2015.

Charlotte Bertrand,

Acting Director, Federal Facilities Restoration and Reuse Office, Office of Solid Waste and Emergency Response.

Categories for Deletion of Facilities

(1) Small-Quantity Generator.Show citation box.

(2) Never Federally Owned and/or Operated.

(3) Formerly Federally Owned and/or Operated but not at time of listing.

(4) No Hazardous Waste Generated.

(5) (This code is no longer used.)

(6) Redundant Listing/Site on Facility.

(7) Combining Sites Into One Facility/Entries Combined.

(8) Does Not Fit Facility Definition.

Categories for Addition of Facilities

(15) Small-Quantity Generator with either a RCRA 3016 or CERCLA 103 Reporting Mechanism.

(16) One Entry Being Split Into Two (or more)/Federal Agency Responsibility Being Split.

(17) New Information Obtained Showing That Facility Should Be Included.

(18) Facility Was a Site on a Facility That Was Disbanded; Now a Separate Facility.

(19) Sites Were Combined Into One Facility.

(19A) New Currently Federally Owned and/or Operated Facility Site.

Categories for Corrections of Information About Facilities

(20) Reporting Provisions Change.

(20A) Typo Correction/Name Change/Address Change.

(21) Changing Responsible Federal Agency. (If applicable, new responsible Federal agency submits proof of previously performed PA, which is subject to approval by EPA.)

(22) Changing Responsible Federal Agency and Facility Name. (If applicable, new responsible Federal Agency submits proof of previously performed PA, which is subject to approval by EPA.)

(24) Reporting Mechanism Determined To Be Not Applicable After Review of Regional Files.

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Formations of, Acquisitions by, and Mergers of Bank Holding Companies; Correction

This notice corrects a notice (FR Doc. 2015–19667) published on pages 48103 and 48104 of the issue for Tuesday, August 11, 2015.

Under the Federal Reserve Bank of Minneapolis heading, the entry for *The Fishback Annuity Trust I, the Fishback Annuity Trust II, the Fishback Annuity Trust VI, Patricia S. Fishback, individually and as voting trustee of the trusts, all of Brookings, South Dakota, William Cornick Stephen Fishback, Francesca Margaret Fishback, both of San Francisco, California; Abby*

Margaret Rivlin, and Toby Sebastian Rivlin, both of Madison, Wisconsin; to retroactively join the Fishback Family Control group, is revised to read as follows:

A. Federal Reserve Bank of Minneapolis (Jacquelyn K. Brunmeier, Assistant Vice President) 90 Hennepin Avenue, Minneapolis, Minnesota 55480–0291:

1. *Fishback Annuity Trust I, the Fishback Annuity Trust II, the Fishback Annuity Trust VI, Patricia S. Fishback, individually and as voting trustee of the trusts, all of Brookings, South Dakota, William Fishback, San Francisco, California, Francesca Fishback, San Francisco, California, Abby Rivlin, Madison, Wisconsin, Toby Rivlin, Madison, Wisconsin, and Fishback Grandchildren Trust I,* Brookings, South Dakota, First Bank & Trust, Brookings, South Dakota, trustee, to retroactively join the Fishback Family Control group which controls 25 percent or more of the shares of Fishback Financial Corporation, Brookings, South Dakota and indirectly control First Bank & Trust, Brookings, South Dakota, First Bank & Trust, N.A., Pipestone, Minnesota, First Bank & Trust, Sioux Falls, South Dakota, and First Bank & Trust of Milbank, Milbank, South Dakota.

Comments on this application must be received by August 25, 2015.

Board of Governors of the Federal Reserve System, August 12, 2015.

Margaret McCloskey Shanks,

Deputy Secretary of the Board.

BILLING CODE 6210–01–P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than August 31, 2015.

A. Federal Reserve Bank of Cleveland (Nadine Wallman, Vice President) 1455 East Sixth Street, Cleveland, Ohio 44101–2566:

1. *Jeffrey Joseph Woda, Columbus, Ohio, and David Cooper, Jr.,* Gahanna, Ohio, individually and as a group acting in concert, to acquire additional voting shares of Benchmark Bancorp, Inc., and thereby indirectly acquire additional voting shares of Benchmark Bank, both in Gahanna, Ohio.

B. Federal Reserve Bank of Kansas City (Dennis Denney, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri 64198–0001:

1. *Joanne E. Matthews,* individually and as trustee of Haviland Bancshares, Inc. Employee Stock Ownership Plan, Leawood, Kansas, to acquire additional voting shares of Haviland Bancshares, Inc., and thereby indirectly acquire additional voting shares of The Haviland State Bank, both in Haviland, Kansas; and Stanley E. Robertson, Greensburg, Kansas, to retain voting shares of Haviland Bancshares, Inc., and thereby indirectly retain voting shares of the Haviland State Bank, both in Haviland, Kansas.

Board of Governors of the Federal Reserve System, August 11, 2015.

Michele Taylor Fennell,

Assistant Secretary of the Board.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30 Day–15–15AFJ]

Agency Forms Undergoing Paperwork Reduction Act Review

The Centers for Disease Control and Prevention (CDC) has submitted the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The notice for the proposed information collection is published to obtain comments from the public and affected agencies.

Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address any of the following: (a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) Enhance the quality, utility, and clarity of the information to be collected; (d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and (e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570 or send an email to *omb@cdc.gov.* Written comments and/or suggestions regarding the items contained in this notice should be directed to the Attention: CDC Desk Officer, Office of Management and Budget, Washington, DC 20503 or by fax to (202) 395–5806. Written comments should be received within 30 days of this notice.

Proposed Project

The Green Housing Pilot Study (New Orleans)—New—National Center for Environmental Health (NCEH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC) seeks a new three-year OMB approval for the Green Housing Pilot Study (New Orleans) or ''Pilot'' of additional components to be tested at the New Orleans site for the main Green Housing Study (OMB No. 0920–0906, Expiration 10/31/2017). The goal of the Pilot is to apply novel approaches to study exposures to various indoor pollutants in children ranging in age from newborn–12 years. The information collected will help scientists better understand time-activity patterns of children that affect exposures to chemical and biological agents in their residential environments, and improve estimates of exposure for children.

Results from this Pilot will inform future Green Housing Study sites and will potentially reduce participant time burden by collecting some questionnaires electronically. This study directly supports the Healthy People 2020 Healthy Homes' health protection goal of the CDC. This investigation is consistent with CDC's Health Protection Research Agenda, which calls for research to identify the major environmental causes of disease and disability and related risk factors.

In 2011, CDC funded the first two study sites for the Green Housing Study, Boston and Cincinnati. In these two cities, renovations sponsored by the Department of Housing and Urban Development (HUD) had already been scheduled. By selecting sites in which renovations were already scheduled to occur, CDC has leveraged the opportunity to collect survey and biomarker data from residents, and to collect environmental measurements in homes to evaluate associations between green housing and health.

Several objectives will be evaluated during the Pilot:

(1) Identify and characterize factors affecting children's exposures to chemical ingredients from consumer products found in their everyday environment to support the data and modeling needs of the exposure components of EPA's national research programs;

(2) Evaluate the Pilot data metrics for incorporation in and enhancement of CDC's ability to understand the relationship between environmental exposures and asthma;

(3) Compare multimedia measurements and survey data between pre- and post-renovation time points in green and non-green low-income housing to assess exposure related changes in the residence and participants due to renovation activities.

Like the other Green Housing Study sites, data will be collected from 64 households. Study participants are children with asthma and their mothers/primary caregivers living in HUD-subsidized housing that has either received a green renovation or is a non-green home. This Pilot will also enroll younger children with a focus on newborns–3 years. Having a larger age range of children in the study will improve the estimates of how environmental exposures inside and outside of their homes can occur during different life stages of childhood, a critical period of life when the immune system and other organ systems are still developing.

The Pilot will be implemented by incorporating it into the Green Housing study schedule. Data collection methods include: (1) Time-activity pattern questionnaire of children, administered to mothers/primary caregivers; (2) collection of air, soil, dust samples from the respondent's home; and (3) collection of blood, urine, toenails clippings, and feces from the respondent's eligible children.

We hypothesize that a better estimation of exposure pathways will improve exposure modeling for the current and the future Green Housing Study sites, and influence future research in environmental health. Although children are considered participants, the respondents to all questionnaires are the mothers/primary caregivers; no children will fill out questionnaires.

The respondents are 64 mothers/primary caregivers of enrolled children; or approximately 21 respondents each year. There is no cost to the respondents other than their time to participate in the study.

The total estimated annual burden hours for the Pilot is 56 hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hrs.)
Mothers/Primary Caregivers of Enrolled Children.	Time/Activity Questionnaire	21	4	40/60

Leroy A. Richardson,

Chief, Information Collection Review Office, Office of Scientific Integrity, Office of the Associate Director for Science, Office of the Director, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

Privacy Act of 1974: Report of New System of Records

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS)

ACTION: Notice of New System of Records (SOR).

SUMMARY: In accordance with the requirements of the Privacy Act of 1974, we are proposing to establish a new SOR titled, ''CMS Risk Adjustment Suite of Systems (RASS),'' System No. 09–70–0508. Payments to Medicare Advantage (MA) organizations, Part D sponsors, and Program of All Inclusive Care for the Elderly (PACE) organizations (collectively referred to as ''MA organizations and other entities'') are adjusted based on the health status of enrolled Medicare beneficiaries (''enrollees''). RASS is established to receive, process, and store the data used

to risk-adjust payments based on enrollee health status. The data will be used specifically to develop risk adjustment models and to calculate the risk score for each enrollee.

Each MA organization and other entity must submit data to CMS in accordance with CMS regulations and instructions. ''Risk adjustment data'' refers to data submitted in two separate formats: comprehensive data equivalent to Medicare fee-for-service data (often referred to as encounter data); and data in abbreviated formats (often referred to as RAPS data). The MA risk adjustment data addressed by this SOR includes RAPS data submitted by a MA organization in an abbreviated format, as referenced at § 422.310(d)(1), and similar abbreviated risk adjustment data submitted by other MA organizations and other entities. Encounter data has a separate SOR (System No. 09–70–0506).

DATES: Effective 30 days after publication. Written comments should be submitted on or before the effective date. HHS/CMS/CM may publish an amended system of records notice (SORN) in light of any comments received.

ADDRESSES: The public should address comments to: CMS Privacy Officer, Division of Security, Privacy Policy & Governance, Information Security & Privacy Group, Office of Enterprise Information, CMS, 7500 Security Boulevard, Baltimore, MD 21244–1870, Mailstop: N1–24–08, Office: (410) 786–5357, email: *walter.stone@cms.hhs.gov.* Comments received will be available for review at this location, by appointment, during regular business hours, Monday through Friday from 9 a.m.–3 p.m., Eastern Time zone.

FOR FURTHER INFORMATION CONTACT: Risk Adjustment Mailbox Coordinator, Division of Encounter Data and Risk Adjustment Operations, Medicare Plan Payment Group, Center for Medicare, CMS, Mail Stop C1–13–07, 7500 Security Boulevard, Baltimore, Maryland 21244–1850. The email is *Riskadjustment@cms.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background on the Risk Adjustment Suite of Systems (RASS)

The new RASS system of records is being established to cover data used to create risk adjustment scores needed to risk-adjust payments to Medicare and Medicaid provider entities, based on beneficiary demographics and health status. Risk-adjusted payments will implement reformatory provisions of the Social Security Act at sections 1853(a), 1860D–15(c), and 1894(d)(2) (42 U.S.C. 1395w–23, 1395w–115, and 1395eee), intended to collect and accurately calculate scores based on a beneficiary's demographics and health status. RASS will cover data housed in two existing information systems: The Risk Adjustment Processing System (RAPS), and the Risk Adjustment System (RAS). RAS will contain data extracted from RAPS and from two other IT systems (CME and NMUD), as more fully explained below:

- *RAPS* will receive abbreviated current risk adjustment data, consisting of diagnosis data about each beneficiary and the beneficiary's health care provider type, submitted by the relevant payee entity through the Front-End Risk Adjustment System (FERAS); RAPS will use the data to create an enrollee diagnosis data file for each beneficiary (See Categories of Records for data elements).
- *RAS* will extract the enrollee diagnosis data files from RAPS and will receive current demographic, enrollment and diagnoses data and past medical history data for each enrollee from two other CMS systems (CME and NMUD); RAS will use the RAPS, CME, and NMUD data to calculate risk factors and create a Risk Adjustment Factor (RAF) file, containing the risk score of each beneficiary:
  - *Common Medicare Environment (CME):* RAS will extract current individual demographic and enrollment data about each enrollee (See Categories of Records for data elements).
  - *National Claims History files housed in the National Medicare Utilization Database (NMUD):* RAS will extract current Medicare Fee-for-service (FFS) diagnoses information submitted on Inpatient, Outpatient, and Physician claims for each enrollee (See Categories of Records for data elements).
- RAS will transmit the Risk Adjustment Factor (RAF) file created in RAS to CMS' payment processing system for purposes of calculating and adjusting payments to payee entities, as follows:
  - CMS pays MA organizations on a monthly prospective amount for each beneficiary enrolled (enrollee) in a Part C plan.
  - CMS pays Part D sponsors a monthly prospective amount that reflects the plan sponsor's estimate of the revenue needed to cover a plan's costs for the risk portion of basic prescription drug coverage. The direct subsidy is adjusted based on the beneficiary's risk score, which reflects expected prescription drug expenditures for the coverage year (relative to a national average of 1.0), based on demographic and health status information for that person.
  - CMS pays PACE organizations a monthly capitation amount based on the Part A and Part B payment rates established for purposes of payment to Medicare Advantage organizations pursuant to 1894(d)(2). CMS will ensure that payments take into account the comparative frailty of PACE enrollees relative to the general Medicare population.

In addition to providing the file used to calculate risk adjustment payments, the RASS also provides reports for CMS based on the analysis of RAF files and other criteria; these reports include MA plan file submission transactions (acceptance rates, rejection rates, error rates, etc.) on a daily, weekly, monthly, and quarterly basis.

II. The Privacy Act

The Privacy Act governs the collection, maintenance, use, and dissemination of certain information about individuals by agencies of the Federal Government.

A ''SOR'' is a group of any records under the control of a Federal agency from which information about individuals is retrieved by name or other personal identifier. The Privacy Act requires each agency to publish in the **Federal Register** notice of the existence and character of each SOR that the agency maintains. The System of Records Notice (SORN) identifies or describes the laws authorizing the system to be maintained; the types and sources of records in the system; the categories of individuals to whom the records pertain; the purposes for which the records are used within the agency; the routine uses for which a record maybe disclosed to parties outside the agency without the individual's prior, written consent; agency policies and procedures for safeguarding, storing, retrieving, accessing, retaining, and disposing of the records; the procedures for an individual to follow to make notification, access, and amendment requests to the System Manager; and whether the SOR is exempt from certain Privacy Act requirements.

System Number:

09–70–0508

SYSTEM NAME:

CMS Risk Adjustment Suite of Systems (RASS), HHS/CMS/CM.

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

RASS (RAS/RAPS) Location: CMS Data Center, 7500 Security Boulevard, North Building, First Floor, Baltimore, Maryland 21244–1850.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Information collected and maintained in this system pertains to: (1) Medicare beneficiaries enrolled in a Part C MA plan, MA–PD plan, PDP or PACE organization (''enrollees'') and (2) the health care provider(s), supplier(s), physician(s), or other practitioner(s) (''Providers'') who provide health care items and services to these enrollees.

CATEGORIES OF RECORDS IN THE SYSTEM:

The MA plans, MA–PDs, PDPs and PACE organizations (''MA organizations and other entities'') receive the data from the providers which is then submitted to RAPS via FERAS. The data received from the MA organizations and other entities are primarily diagnosis data extracted from claims information. Additional FFS and utilization data regarding those submissions are received from the CME and NCH data systems to complete the enrollee data requirements.

Records will consist of the risk score for each enrollee and the data used to calculate the score, contained in Risk Adjustment Factor (RAF) files created in CMS' Risk Adjustment System (RAS), using data extracted from three other CMS IT systems:

- *RAPS data:* Diagnosis data files containing abbreviated current diagnosis data submitted by payee entities to CMS's Risk Adjustment Processing System (RAPS):
  - Health Insurance Claim Number (HICN)
  - Provider Type
  - Service From Date
  - Service Through Date
  - Plan Number (MAO contract number)
  - Diagnosis Code
  - Diagnosis Delete Date
  - RAS Diagnosis Indicator
  - NCH Category Equitable BIC
  - Accrete Data
  - Delete Plan Number
  - Submitter ID
  - Daily File Code, and
  - Delete File Code
- *CME data:* Current demographic and enrollment data from CMS's Common Medicare Environment (CME):
  - Beneficiary Link Key Partition number
  - Beneficiary Link Identifier
  - Health Insurance Claim Number (HICN)
  - Beneficiary Social Security Number
  - Beneficiary Birth Date
  - Beneficiary Death Date
  - Beneficiary Sex Code
  - Beneficiary Race Code
  - Beneficiary First Name
  - Beneficiary Middle Name
  - Beneficiary Last Name
- *NCH data:* Current diagnosis data [and past medical history data] from National Claims History Files in CMS's National Medicare Utilization Database (NMUD):
  - Health Insurance Claim Number (HICN)
  - NCH Category Equitable BIC
  - Diagnosis code
  - Service Through Date
  - Service From Date
  - Beneficiary Link Identifier
  - Provider Number

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

This system was established pursuant to sections 1853(a), 1860D–15(c), and 1894(d)(2)of the Social Security Act (42 U.S.C. 1395w–23, 1395w–115, 1395eee).

PURPOSE(S) OF THE SYSTEM:

Records will be used within the agency to develop risk adjustment models and to calculate the risk score for each Medicare beneficiary enrolled in the Medicare health plan. The risk score will be reported to the system that CMS uses to process payments, and ultimately will be used to adjust payments to MA organizations, Part D sponsors, and PACE organizations, based on beneficiary health status. (Note that payment records are not covered under this system of records.)

Information retrieved from this SOR will be used for the following purposes:

- To determine the risk adjustment factors used to adjust payments to MA organizations and other entities, as required under 42 CFR 422.304(a) and (c), 423.329 and 460.180
- to update risk adjustment models
- to calculate Medicare Disproportionate Share Hospital (DSH) percentages
- to conduct quality review and improvement activities for Medicare coverage purposes
- to conduct evaluations and other analysis to support the Medicare program (including demonstrations)
- to support public health initiatives and other health care-related research
- for activities to support the administration of the Medicare program
- for activities conducted to support program integrity
- for purposes authorized by applicable law

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OR USERS AND THE PURPOSES OF SUCH USES:

Records may be disclosed to parties outside HHS, without the individual record subject's prior, written consent, for the following purposes:

1. To determine the risk adjustment factors used to adjust payments, as required under §§ 422.304(a) and (c), 423.329, and 460.180, to update risk adjustment models, to calculate Medicare DSH percentages, to conduct quality review and improvement activities, for Medicare coverage purposes, to conduct evaluations and other analysis to support the Medicare program (including demonstrations) and to support public health initiatives, for activities conducted to support program integrity, and for purposes authorized by applicable law.

2. To support CMS contractors, consultants, or grantees that have been contracted by the Agency when necessary to assist in accomplishment of a CMS function relating to the purposes for this system or a purpose listed in paragraph 1.

3. To support an individual or organization for research to support the Medicare program and public health initiatives, and otherwise related to health care, such as evaluation or epidemiological projects related to the prevention of disease or disability, the restoration or maintenance of health, or for understanding and improving payment projects.

4. To provide information to the U.S. Department of Justice (DOJ), a court, or an adjudicatory body when (a) the Agency or any component thereof, or (b) any employee of the Agency in his or her official capacity, or (c) any employee of the Agency in his or her individual capacity where the DOJ has agreed to represent the employee, or (d) the United State Government, is a party to litigation or has an interest in such litigation, and by careful review, CMS determines that the records are both relevant and necessary to the litigation and that the use of such records by the DOJ, court, or adjudicatory body is compatible with the purpose for which the agency collected the records.

5. To assist a CMS contractor (including, but not limited to Medicare Administrative Contractors, fiscal intermediaries, and carriers) that assists in the administration of a CMS-administered health benefits program, or to a grantee of a CMS-administered grant program, when disclosure is deemed reasonably necessary by CMS to prevent, deter, discover, detect, investigate, examine, prosecute, sue with respect to, defend against, correct, remedy, or otherwise combat fraud, waste or abuse in such program.

6. To assist another Federal agency or an instrumentality of any governmental jurisdiction within or under the control of the United States (including any state or local governmental agency), that

administers or that has the authority to investigate potential fraud, waste or abuse in a health benefits program funded in whole or in part by Federal funds, when disclosure is deemed reasonably necessary by CMS to prevent, deter, discover, detect, investigate, examine, prosecute, sue with respect to, defend against, correct, remedy, or otherwise combat fraud, waste or abuse in such programs.

7. To assist Medicare Advantage organizations, Part D Sponsors and PACE organizations with improving the quality of required risk adjustment data obtained from the provider that furnished the item or service. CMS will be analyzing the data received and advising MA organizations, Part D Sponsors and PACE organizations of trends and data analysis results to help improve the accuracy and completeness of data received from the provider.

8. To assist appropriate Federal agencies and CMS contractors and consultants that have a need to know the information for the purpose of assisting CMS' efforts to respond to a suspected or confirmed breach of the security or confidentiality of information maintained in this system of records, provided that the information disclosed is relevant and necessary for that assistance.

Note: CMS may disclose information from this system of records, without the individual record subject's consent, for any of the following purposes referenced directly in the Privacy Act: 5 U.S.C. 552a(b)(1), (3)–(8), and (12). CMS must also disclose information from this system of records, without the individual record subject's consent, for any of the following purposes referenced directly in the Privacy Act: 5 U.S.C. 552a(b)(2), and (b)(9)–(11).

ADDITIONAL PROVISIONS AFFECTING ROUTINE USE DISCLOSURES:

This system contains Protected Health Information (PHI) as defined by HHS regulation ''Standards for Privacy of Individually Identifiable Health Information'' (45 CFR parts 160 and 164, 65 FR 82462 (12–28–00), subparts A and E). Disclosures of PHI authorized by these routine uses may only be made if, and as, permitted or required by the ''Standards for Privacy of Individually Identifiable Health Information.''

In addition, our policy will be to prohibit release even of data that is not directly identifiable, except if required by law, if we determine there is a possibility that an individual can be identified through implicit deduction based on small cell sizes (instances where the patient population is so small that individuals could, because of the small size, use this information to deduce the identity of the beneficiary).

Note: Information collected or obtained under § 1860D–15 (*i.e.,* risk adjustment data used to pay Part D plan sponsors) will be used and disclosed only in accordance with the statutory limitations under § 1860D–15(f)(2).

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEMSTORAGE:

Archived records will be stored on magnetic tapes. Data that is currently in use is stored in the RAPS database.

RETRIEVABILITY:

Records will be retrieved by National Provider Identifier (NPI), beneficiary provider name, or beneficiary Health Insurance Claim Number.

SAFEGUARDS:

Personnel having access to the system have been trained in the Privacy Act and information security requirements. Employees who maintain records in this system are instructed not to release data until the intended recipient agrees to implement appropriate management, operational, and technical safeguards sufficient to protect the confidentiality, integrity and availability of the information and information systems; and to prevent unauthorized access. Access to records in the RASS will be limited to CMS personnel and contractors through password security, encryption, firewalls, and secured operating system(s).

RETENTION AND DISPOSAL:

Records (*i.e.,* enrollee diagnosis data files created in RAPS, and Risk Adjustment Factor (RAF) files created in RAS) will be maintained for a period of up to 10 years after date of creation. Any such records that are needed longer, such as to resolve claims and audit exceptions or to prosecute fraud, will be retained until such matters are resolved. Enrollee claims records are currently subject to a document preservation order and will be preserved indefinitely pending further notice from the U.S. Department of Justice (DOJ).

SYSTEM MANAGER AND ADDRESS:

Director, Division of Encounter Data and Risk Adjustment Operations, Medicare Plan Payment Group, Center for Medicare, CMS, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

NOTIFICATION PROCEDURE:

Individuals (*i.e.,* the beneficiary or provider) wishing to know if this system contains records about them should write to the system manager and include pertinent personally identifiable information (encrypted and properly transmitted) to be used for retrieval of their records (*i.e.,* NPI or Health Insurance Claim Number).

RECORD ACCESS PROCEDURE:

Individuals seeking access to records about them in this system should follow the same instructions indicated under ''Notification Procedure'' and reasonably specify the record content being sought. (These procedures are in accordance with Department regulation 45 CFR 5b.5(a)(2)).

CONTESTING RECORD PROCEDURES:

Individuals seeking to contest the content of information about them in this system should follow the same instructions indicated under ''Notification Procedure.'' The request should: reasonably identify the record and specify the information being contested; state the corrective action sought; and provide the reasons for the correction, with supporting justification. (These procedures are in accordance with Department regulation 45 CFR 5b.7.)

RECORD SOURCE CATEGORIES:

RASS processes data extracted from RAPS and RAS IT systems to calculate the risk scores used to adjust payments to Medicare Advantage organizations, Part D plan sponsors and PACE plans. RAS receives the most current data for each Medicare Part C and Part D beneficiary from the following sources: RAPS, Common Medicare Environment (CME) also known as Medicare Beneficiary Database (MBD/CME), and National Medicare Utilization Database (NMUD). RAPS receives risk adjustment data from MA organizations and other entities defined above.

SYSTEMS EXEMPTED FROM CERTAIN PROVISIONS OF THE ACT:

None.

Celeste Dade-Vinson,

Health Insurance Specialist, Centers for Medicare & Medicaid Services.

Food and Drug Administration

[Docket No. FDA–2000–D–0103]

Botanical Drug Development; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft guidance for industry entitled ''Botanical Drug Development.'' This guidance describes FDA's current thinking on appropriate development plans for botanical drugs to be submitted in new drug applications (NDAs) and specific recommendations on submitting investigational new drug applications (INDs) in support of future NDA submissions for botanical drugs. In addition, this guidance provides general information on the over-the-counter (OTC) drug monograph system for botanical drugs. Although this guidance does not intend to provide recommendations specific to botanical drugs to be marketed under biologics license applications (BLAs), many scientific principles described in this guidance may also apply to these products. This draft guidance revises the guidance for industry entitled ''Botanical Drug Products'' issued in June 2004.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by October 16, 2015.

ADDRESSES: Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

Submit electronic comments on the draft guidance to *http://www.regulations.gov.* Submit written comments to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Sau L. Lee, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 4144, Silver Spring, MD 20993–0002, 301–796–2905, *Sau.Lee@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled ''Botanical Drug Development.'' This guidance describes the Center for Drug Evaluation and Research's current thinking on appropriate development plans for botanical drugs to be submitted in NDAs and specific recommendations on submitting INDs in support of future NDA submissions for botanical drugs. In addition, this guidance provides general information on the OTC drug monograph system for botanical drugs. Although this guidance does not intend to provide recommendations specific to botanical drugs to be marketed under BLAs, many scientific principles described in this guidance may also apply to these products.

This guidance specifically discusses several areas in which, due to the unique nature of botanical drugs, the Agency finds it appropriate to apply regulatory policies that differ from those applied to nonbotanical drugs, such as synthetic, semi-synthetic, or otherwise highly purified or chemically modified drugs, including antibiotics derived from microorganisms. Because this guidance focuses on considerations unique to botanical drugs, policies and recommendations applicable to both botanical and nonbotanical drugs are generally not covered in this document.

This guidance revises the final guidance for industry entitled ''Botanical Drug Products'' issued in June 2004. The general approach to botanical drug development has remained unchanged since that time; however, based on improved understanding of botanical drugs and experience acquired in the reviews of NDAs and INDs for these drugs, specific recommendations have been modified and new sections have been added to better address late-phase development and NDA submission for botanical drugs.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the Agency's current thinking on botanical drug development. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Comments

Interested persons may submit either electronic comments regarding this document to *http://www.regulations.gov* or written comments to the Division of Dockets Management (see **ADDRESSES**). It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *http://www.regulations.gov.*

III. The Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The guidance explains the circumstances under which FDA regulations require approval of an NDA for marketing a botanical drug product and when such a product may be marketed under an OTC drug monograph. The regulations governing the preparation and submission of an NDA are in part 314 (21 CFR part 314), and the guidance does not contain any recommendations that exceed the requirements of these regulations. FDA has estimated the information collection requirements resulting from the preparation and submission of an NDA, and OMB has approved the burden under OMB control number 0910–0001. FDA anticipates that any NDAs submitted for botanical drug products would be included under the burden estimates approved by OMB for part 314.

The regulations on the procedures for classifying OTC drugs as generally recognized as safe and effective and not misbranded, and for establishing OTC drug monographs, are set forth in § 330.10 (21 CFR 330.10). FDA believes that any botanical drug products that may be eligible for inclusion in an OTC drug monograph under current § 330.10 have already been or presently are being considered for such inclusion.

The guidance also provides scientific and regulatory guidance to sponsors on conducting clinical investigations of botanical drugs. The regulations governing the preparation and submission of INDs are in part 312 (21 CFR part 312). The guidance does not contain any recommendations that exceed the requirements in those regulations. FDA has estimated the information collection requirements resulting from the preparation and submission of an IND under part 312, and OMB has approved the reporting and recordkeeping burden under OMB control number 0910–0014.

IV. Electronic Access

Persons with access to the Internet may obtain the document at either *http://www.fda.gov/Drugs/GuidanceCompliance RegulatoryInformation/Guidances/default.htm* or *http://www.regulations.gov.*

[Docket No. FDA–2015–N–0012]

Disease Natural History Database Development—(U24)

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of grant funds for the support of Natural History Database Development. The National Organization for Rare Disorders (NORD) is developing an Internet-based data collection tool with promise to further the accumulation of natural history data for many rare diseases. The goal of this grant is to enable NORD to further develop, refine, and disseminate the database tool.

DATES: Important dates are as follows:

1. The application due date is September 4, 2015.
2. The anticipated start date is September 2015.
3. The opening date is July 2015.
4. The expiration date is September 5, 2015.

ADDRESSES: Submit electronic applications to: *http://www.grants.gov.* For more information, see section III of the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: James Kaiser, Office of Translational Sciences, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Silver Spring, MD 20993, 301–796–1237, *james.kaiser@fda.hhs.gov.*

Vieda Hubbard, Office of Acquisition and Grants Services, Food and Drug Administration, 5630 Fishers Lane, Rockville, MD 20857, 240–402–7588, *Vieda.Hubbard@fda.hhs.gov.*

For more information on this funding opportunity announcement (FOA) and to obtain detailed requirements, please refer to the full FOA located at *www.grants.gov.* Search by Funding Opportunity Number: RFA–FD–15–038.

SUPPLEMENTARY INFORMATION:

I. Funding Opportunity Description

RFA–FD–15–038
93.103

A. Background

There are an estimated 7,000 rare diseases, in total affecting approximately 30 million Americans. Most of these are serious conditions with no approved therapies. Rare diseases constitute an enormous unmet medical need.

Drug development for rare diseases, as well as for common diseases, relies on an indepth knowledge of the diseases' natural histories. Natural history is the course of the disease in the absence of a clinical intervention (that is, treatment under clinical care or study). Natural history knowledge makes possible the design of successful and efficient drug development programs. This knowledge has wide-ranging applications at every stage of drug development, for example, insight into the mechanism of disease, which can inform proof-of-concept studies; development of biomarkers that can expedite clinical studies at every stage of drug development; recognition and understanding of phenotypes of disease that may respond more (or less) to a therapy; and knowledge of the aspects of disease that matter to patients, with an impact on developing drugs that have a meaningful impact on how a patient feels, functions, or survives. The lack of natural history knowledge can result in the failure of drug programs, even for drugs with great promise. Unfortunately, the natural history of rare diseases is often poorly understood.

Impediments to the understanding of the natural history of a rare disease include the small numbers of patients and the sparse dispersal of clinical experience even among the chief clinical referral centers. The rare disease community is largely composed of small, diverse groups including patient and patient-family support, nonprofit disease groups (including umbrella groups), academic researchers, and small- to medium-sized biotechnology and pharmaceutical companies. For most rare diseases there has been no mechanism to systematically collect rare disease knowledge. In addition, it has become increasingly clear that it is vitally important to collect more knowledge from living patients over time, not simply to collect currently available information. This ''longitudinal'' information about individual patients is invaluable to the design of a drug development program. The rare disease community is in need of a means of collecting and analyzing this knowledge: A natural history database tool.

B. Research Objectives

The development of natural history databases will directly further FDA's public health mission. We anticipate that the successful implementation of a natural history database will have profound and far-reaching effects on development of therapies for rare diseases. As a basis for solid natural history knowledge of a disease it may help to make a clinical development program for a candidate therapy appear feasible, and thus a more attractive area to pharmaceutical companies for devoting a portion of their drug discovery resources. This too will lead to greater numbers of therapies for rare diseases.

C. Eligibility Information

Only the following organization is eligible to apply: The National Organization for Rare Disorders. NORD is uniquely qualified to apply for this grant as the only applicant. Natural history studies is an area of unmet need and there are very few efforts towards building these studies. Those efforts that exist are very limited to specific diseases (*e.g.,* cystic fibrosis, urea cycle disorders). These individual efforts cannot and do not support other patient groups starting their own studies. Most efforts are largely focused on patient communication and patient reports through Web-based self-reporting and are not likely to conform to sufficient scientific rigor to be able to support drug development. Although patient registries exist, these are not the same thing as natural history studies, and can often be very broad and general and cannot be customized to the depth and scope needed to support multiple natural history studies in a diverse group of rare diseases. The rigor, scope, and flexibility of NORD's platform, which comes from approximately 15 years of working with the rare disease community on these efforts, is unique and directly suited to the needs of FDA.

II. Award Information/Funds Available

A. Award Amount

FDA/Center for Drug Evaluation and Research intends to fund up to $250,000, for fiscal year 2015 in support of this grant program. It is anticipated that one award will be made, not to

exceed $250,000 in total costs (direct plus indirect).

B. Length of Support

The maximum project period is 1 year.

III. Electronic Application, Registration, and Submission

Only electronic applications will be accepted. To submit an electronic application in response to this FOA, applicants should first review the full announcement located at *www.grants.gov.* Search by Funding Opportunity Number: RFA–FD–15–038. For all electronically submitted applications, the following steps are required.

- Step 1: Obtain a Dun and Bradstreet (DUNS) Number
- Step 2: Register With System for Award Management (SAM)
- Step 3: Obtain Username & Password
- Step 4: Authorized Organization Representative (AOR) Authorization
- Step 5: Track AOR Status
- Step 6: Register With Electronic Research Administration (eRA) Commons

Steps 1 through 5, in detail, can be found at *http://www07.grants.gov/applicants/organization_registration.jsp.* Step 6, in detail, can be found at *https://commons.era.nih.gov/commons/registration/registrationInstructions.jsp.* After you have followed these steps, submit electronic applications to *http://www.grants.gov.*

Dated: August 10, 2015.

Leslie Kux,

Associate Commissioner for Policy.

Food and Drug Administration

[Docket No. FDA–2015–N–2735]

Scientific Inquiry Into How Mobile Health and Social Data Sources May Inform Medical Product Safety and Efficacy; Public Workshop; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public workshop; request for comments.

SUMMARY: The Food and Drug Administration (FDA), in collaboration with the University of Maryland's Center of Excellence in Regulatory Science and Innovation (M–CERSI) is announcing a public workshop entitled ''Scientific Inquiry Into How Mobile Health and Social Data Sources May Inform Medical Product Safety and Efficacy.'' The purpose of the public workshop is to discuss important scientific questions about using two of the most ubiquitous and fastest growing data sources, mobile health data and social computing data, focusing especially on the implications for product safety.

DATES: The public workshop will be held on September 11, 2015, from 12:30 p.m. to 5:30 p.m.

ADDRESSES: The public workshop will be held at the Adele H. Stamp Student Union, University of Maryland, 1021A Adele H. Stamp Student Union, College Park, MD. For additional travel and hotel information, please refer to: *http://go.umd.edu/mobilesocialanalytics.*

Submit electronic comments to *http://www.regulations.gov.* Submit written comments to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: *Regarding this notice:* Leslie D. Wheelock, Food and Drug Administration, Office of the Commissioner, 10903 New Hampshire Ave., Bldg. 1, Rm. 4345, Silver Spring, MD 20993, 301–796–8450, FAX: 301–847–8106; email: *leslie.wheelock@fda.hhs.gov.*

Regarding registration: Ann Anonsen, University of Maryland, Fischell Dept. of Bioengineering, 2207 Jeong H. Kim Bldg., College Park, MD 20742, 301–405–0285, FAX: 301–405–9953, email: *aanonsen@umd.edu.*

SUPPLEMENTARY INFORMATION:

I. Background

Mobile health and social computing data sources create unique and hitherto unavailable opportunities, but there are important questions that need to be answered. This workshop will bring together thought leaders from industry, academia, and the regulatory communities to reflect on the opportunities and challenges that these new data sources create.

II. Attendance and Registration

There is a registration fee to attend this public workshop. The registration fee is charged to help defray the costs for facilities, materials, and food. Seats are limited, and registration will be on a first-come, first-served basis. The costs of registration for the different categories of attendees are as follows:

Category	Cost
Industry Representatives	$50
Charitable Nonprofit/Academic	50
Government/Students	0

Persons interested in attending this public workshop must register online at *http://go.umd.edu/mobilesocialanalytics* by September 1, 2015. To register, please refer to: *http://www.rhsmith.umd.edu/centers-excellence/center-health-information-decision-systems/events/m-cersi-workshop.* Early registration is recommended because space is limited. Those without Internet access should contact Ann Anonsen to register (see **FOR FURTHER INFORMATION CONTACT** regarding registration).

Attendees are responsible for their own hotel accommodations. If you need special accommodations due to a disability, please contact Ann Anonsen, at 301–405–0285 or email: *aanonsen@umd.edu.*

III. Comments

Regardless of attendance at the public workshop, interested persons may submit either electronic comments to *http://www.regulations.gov* or written comments to the Division of Dockets Management (see **ADDRESSES**). The deadline for submitting comments related to this public workshop is August 28, 2015. It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *http://www.regulations.gov.*

Dated: August 10, 2015.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2014–D–0332]

Endotoxin Testing Recommendations for Single-Use Intraocular Ophthalmic Devices; Guidance for Industry and Food and Drug Administration Staff; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of the guidance entitled ''Endotoxin Testing Recommendations for Single-Use Intraocular Ophthalmic Devices.'' National outbreaks of Toxic Anterior Segment Syndrome (TASS) have been associated with single-use intraocular ophthalmic devices (IODs) and single-use intraocular ophthalmic surgical instruments/accessories that are contaminated with endotoxins. These devices can become contaminated as part of the manufacturing, sterilization, or packaging processes. This guidance document provides recommendations for endotoxin limits as well as endotoxin testing to manufacturers and other entities involved in submitting premarket applications (PMAs) or premarket notification submissions (510(k)s) for different categories of IODs to mitigate future outbreaks of TASS.

DATES: Submit either electronic or written comments on this guidance at any time. General comments on Agency guidance documents are welcome at any time.

ADDRESSES: An electronic copy of the guidance document is available for download from the Internet. See the **SUPPLEMENTARY INFORMATION** section for information on electronic access to the guidance. Submit written requests for a single hard copy of the guidance document entitled ''Endotoxin Testing Recommendations for Single-Use Intraocular Ophthalmic Devices'' to the Office of the Center Director, Guidance and Policy Development, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, rm. 5431, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your request.

Submit electronic comments on the guidance to *http://www.regulations.gov.* Submit written comments to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852. Identify comments with the docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Michelle Tarver, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 2504, Silver Spring, MD 20993–0002, 301–796–5620.

SUPPLEMENTARY INFORMATION:

I. Background

TASS has been increasing in frequency over the past decade from approximately 1 in 1,000 to about 2 in 100. Some cases of TASS are severe enough to require secondary surgical interventions including glaucoma surgery and corneal transplantation. The use of inadequately or improperly processed ophthalmic surgical instruments is one of many factors suggested as a potential cause of TASS. In many TASS cases, bacterial endotoxin from medical devices is believed to cause the inflammation.

This guidance document was developed to notify manufacturers and other entities involved in submitting PMAs or 510(k)s for different categories of IODs of the recommended endotoxin limit for the release of IODs and single-use intraocular ophthalmic surgical instruments/accessories in an effort to mitigate future TASS outbreaks.

The draft of this guidance was made available in the **Federal Register** on April 17, 2014 (79 FR 21777), and the comment period closed July 16, 2014. Only two sets of comments were received. The comments were minor, and FDA made revisions to the document in response to the comments where appropriate. FDA also removed posterior segment devices from the scope of the guidance document. FDA may address endotoxin testing recommendations for this device type in future guidance documents.

II. Significance of Guidance

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on endotoxin testing and limits for single-use IODs. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

III. Electronic Access

Persons interested in obtaining a copy of the guidance may do so by downloading an electronic copy from the Internet. A search capability for all Center for Devices and Radiological Health guidance documents is available at *http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/default.htm.* Guidance documents are also available at *http://www.regulations.gov.* Persons unable to download an electronic copy of ''Endotoxin Testing Recommendations for Single-Use Intraocular Ophthalmic Devices'' may send an email request to *CDRH-Guidance@fda.hhs.gov* to receive an electronic copy of the document. Please use the document number 1836 to identify the guidance you are requesting.

IV. Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information found in FDA regulations. These collections of information are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR part 814 have been approved under OMB control number 0910–0231.

V. Comments

Interested persons may submit either electronic comments regarding this document to *http://www.regulations.gov* or written comments to the Division of Dockets Management (see **ADDRESSES**). It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *http://www.regulations.gov.*

Dated: August 12, 2015.

Leslie Kux,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2015–D–2843]

Qualification of Biomarker—Total Kidney Volume in Studies for Treatment of Autosomal Dominant Polycystic Kidney Disease; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled ''Qualification of Biomarker—Total Kidney Volume in Studies for Treatment of Autosomal Dominant Polycystic Kidney Disease.'' This draft guidance provides a qualified context of use (COU) for total kidney volume (TKV), measured at baseline, to be used as a prognostic enrichment biomarker to select patients with autosomal dominant polycystic kidney disease (ADPKD) at high risk for a ''progressive decline'' in renal function, defined as a confirmed 30 percent decline in the patient's estimated glomerular filtration rate (eGFR), for inclusion in interventional clinical trials. This draft guidance also describes the experimental conditions and constraints for which this biomarker is qualified through the Center for Drug Evaluation and Research (CDER) Biomarker Qualification Program. This biomarker can be used by drug developers for the qualified COU in submissions of investigational new drug applications, new drug applications, and biologics license applications without the relevant CDER review group reconsidering and reconfirming the suitability of the biomarker.

In the **Federal Register** of January 7, 2014, FDA announced the availability of a final guidance for industry entitled ''Qualification Process for Drug Development Tools'' that described the process that would be used to qualify Drug Development Tools (DDTs) and to make new DDT qualification recommendations available on FDA's Web site. The qualification recommendations in this draft guidance were developed using the process described in that guidance.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by October 16, 2015.

ADDRESSES: Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

Submit electronic comments on the draft guidance to *http://www.regulations.gov*. Submit written comments to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Marianne Noone, Center for Drug Evaluation and Research (Office of Translational Sciences, Immediate Office), Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 21, Rm. 4528, Silver Spring, MD 20993–0002, 301–796–2600.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled ''Qualification of Biomarker—Total Kidney Volume in Studies for Treatment of Autosomal Dominant Polycystic Kidney Disease.'' This draft guidance provides qualification recommendations for the use of TKV, measured at baseline, as a prognostic enrichment biomarker to select patients with ADPKD at high risk for a ''progressive decline'' in renal function, defined as a confirmed 30 percent decline in the patient's eGFR, for inclusion in interventional clinical trials. This biomarker may be used in combination with the patient's age and baseline eGFR as an enrichment factor in these interventional clinical trials. Specifically, this draft guidance provides the COU for which this biomarker is qualified through the CDER Biomarker Qualification Program. Qualification of this biomarker for this specific COU represents the conclusion that analytically valid measurements of the biomarker can be relied on to have a specific use and interpretable meaning. This biomarker can be used by drug developers for the qualified COU in submission of investigational new drug applications, new drug applications, and biologics license applications without the relevant CDER review group reconsidering and reconfirming the suitability of the biomarker. ''Qualification'' means that the use of this biomarker in the specific COU is not limited to a single, specific drug development program. Making the qualification recommendations widely known and available for use by drug developers will contribute to drug innovation, thus supporting public health.

In the **Federal Register** of January 7, 2014 (79 FR 831), FDA announced the availability of a final guidance for industry entitled ''Qualification Process for Drug Development Tools'' that described the process that would be used to qualify DDTs and to make new DDT qualification recommendations available on FDA's Web site at *http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm*. The current draft guidance is an attachment to that final guidance.

CDER has initiated this formal qualification process to work with developers of these biomarker DDTs to guide them as they refine and evaluate DDTs for use in the regulatory context. Once qualified, biomarker DDTs will be publicly available for use in any drug development program for the qualified COU. As described in the January 2014 guidance, biomarker DDTs should be developed and reviewed using this process. For more information on FDA's DDTs Qualification Programs, refer to the following Web page: *http://www.fda.gov/Drugs/DevelopmentApprovalProcess/DrugDevelopmentToolsQualificationProgram/default.htm*.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the Agency's current thinking on the use of TKV, measured at baseline, as a prognostic enrichment biomarker to select patients with ADPKD at high risk for a progressive decline in renal function, defined as a confirmed 30 percent decline in eGFR, for inclusion in interventional clinical trials. This biomarker may be used in combination with patient age and baseline eGFR, as an enrichment factor in these interventional clinical trials. It does not establish any rights for any person and not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. The Paperwork Reduction Act of 1995

This guidance contains an information collection that is subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The information collection has been approved under the OMB control numbers 0910–0001 and 0910–0014. The information requested in this guidance is currently submitted to FDA to support medical product effectiveness (see 21 CFR 312.30, 21 CFR 314.50(d)(5), and 21 CFR 314.126(b)(6)).

III. Comments

Interested persons may submit either electronic comments regarding this document to *http://www.regulations.gov* or written comments to the Division of Dockets Management (see **ADDRESSES**). It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *http://www.regulations.gov*.

IV. Electronic Access

Persons with access to the Internet may obtain the document at either *http://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm* or *http://www.regulations.gov*.

Dated: August 12, 2015.

Leslie Kux,

Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2015–D–2818]

Rare Diseases: Common Issues in Drug Development; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled ''Rare Diseases: Common Issues in Drug Development.'' The purpose of this draft guidance is to advance and facilitate the development of drugs and biologics to treat rare diseases. Drug development for rare diseases has many challenges related to the nature of these diseases. This draft guidance is intended to assist sponsors of drug and biological products for treating rare diseases in conducting more efficient and successful development programs.

DATES: Although you can comment on any guidance at any time (see 21 CFR 10.115(g)(5)), to ensure that the Agency considers your comment on this draft guidance before it begins work on the final version of the guidance, submit either electronic or written comments on the draft guidance by October 16, 2015.

ADDRESSES: Submit written requests for single copies of the draft guidance to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993–0002; or Office of Communication, Outreach, and Development, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 3128, Silver Spring, MD 20993–0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance document.

Submit electronic comments on the draft guidance to *http://www.regulations.gov*. Submit written comments to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Jonathan Goldsmith, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 22, Rm. 6480, Silver Spring, MD 20903–0002, 240–402–9959; or Stephen Ripley, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 7301, Silver Spring, MD 20993–0002, 240–402–7911.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft guidance for industry entitled ''Rare Diseases: Common Issues in Drug Development.'' This guidance is intended to assist sponsors of drug and biological products for treating rare diseases in conducting more efficient and successful development programs through a discussion of selected issues commonly encountered in rare disease drug development. Although these issues are encountered in other drug development programs, they are frequently more difficult to address in the context of a rare disease than a common disease for which there is greater and more widespread medical experience. These issues are also more acute with increasing rarity of the disorder. A rare disease is defined by the Orphan Drug Act as a disorder or condition that affects less than 200,000 persons in the United States; however, most rare diseases affect far fewer persons.

Most rare disorders are serious conditions with no approved treatments, and rare disease patients have considerable unmet medical needs. Collectively, rare diseases are highly diverse. FDA is committed to helping sponsors of drugs for rare diseases create successful programs that address the particular challenges posed by each disease.

This guidance addresses the following important components of drug development:

- Adequate description and understanding of the disease's natural history
- Adequate understanding of the pathophysiology of the disease and the drug's proposed mechanism of action
- Nonclinical pharmacotoxicology considerations to support the proposed clinical investigation(s)
- Standard of evidence to establish safety and effectiveness
- Drug manufacturing considerations during drug development

Early consideration of these issues allows sponsors to efficiently and adequately address them during the course of drug development, from drug discovery to confirmatory efficacy and safety studies, and to have productive meetings with FDA.

This draft guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The draft guidance, when finalized, will represent the current thinking of FDA on common issues in drug development for rare diseases. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. The Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information in 21 CFR part 312 have been approved under OMB control number 0910–0014, and the collections of information in 21 CFR part 314 have been approved under OMB control number 0910–0001.

III. Comments

Interested persons may submit either electronic comments regarding this document to *http://www.regulations.gov* or written comments to the Division of Dockets Management (see **ADDRESSES**). It is only necessary to send one set of comments. Identify comments with the

docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *http://www.regulations.gov*.

IV. Electronic Access

Persons with access to the Internet may obtain the document at *http://www.fda.gov/Drugs/GuidanceCompliance RegulatoryInformation/Guidances/default.htm, http://www.fda.gov/BiologicsBloodVaccines/GuidanceCompliance RegulatoryInformation/default.htm,* or *http://www.regulations.gov*.

Dated: August 12, 2015.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2015–D–1176]

Compounding Animal Drugs From Bulk Drug Substances; Draft Guidance for Industry; Extension of Comment Period

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice; extension of comment period.

SUMMARY: The Food and Drug Administration (FDA) is extending the comment period for the document that appeared in the **Federal Register** of May 19, 2015. In the document, FDA requested comments on draft guidance for industry (GFI) #230 entitled ''Compounding Animal Drugs from Bulk Drug Substances.'' FDA is taking this action in response to a request for an extension to allow interested persons additional time to submit comments.

DATES: FDA is extending the comment period on the document published May 19, 2015 (80 FR 28624). Submit either electronic or written comments on the draft guidance by November 16, 2015.

ADDRESSES: You may submit comments by any of the following methods.

Electronic Submissions

Submit electronic comments in the following way:

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

Written Submissions

Submit written comments in the following ways:

- *Mail/Hand delivery/Courier (for paper submissions):* Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Instructions: All submissions received must include the Docket No. FDA–2015–D–1176. All comments received may be posted without change to *http://www.regulations.gov,* including any personal information provided. For additional information on submitting comments, see the ''Request for Comments'' heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to read background documents or comments received, go to *http://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

FOR FURTHER INFORMATION CONTACT: Division of Compliance, Center for Veterinary Medicine, Food and Drug Administration (HFV–230), 7519 Standish Pl., Rockville, MD 20855, 240–402–7001, *CVMCompliance@fda.hhs.gov.*

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of May 19, 2015, FDA published a document with a 90-day comment period for draft GFI #230 entitled ''Compounding Animal Drugs from Bulk Drug Substances.'' The draft guidance describes FDA's policies with regard to compounding animal drugs from bulk drug substances. When final, the guidance will reflect FDA's current thinking on the issues addressed by the guidance.

FDA has received a request for a 90-day extension of the comment period. The request conveyed concern that the current 90-day comment period does not allow sufficient time to respond. FDA has considered the request and is extending the comment period for 90 days, until November 16, 2015. FDA believes that a 90-day extension allows adequate time for interested persons to submit comments without significantly delaying further FDA action on this guidance document.

II. Specific Topics for Comment

In addition to comments on the draft guidance as written, we are specifically requesting comments on the following issues:

- Should the final guidance address the issue of FDA-approved animal and human drugs that are in shortage or are otherwise unavailable (*e.g.,* disruptions in the manufacture or supply chain; business decisions to stop marketing the drug; drug is subject to Agency action based on safety, effectiveness, or manufacturing concerns)? If so:
  - How should these situations be addressed in the final guidance?
  - How should the final guidance define the terms ''shortage'' and ''unavailable''?
  - What criteria should FDA use to determine if an approved animal or human drug is in shortage or otherwise unavailable?
- Do United States Pharmacopeia and National Formulary (USP–NF) [1] chapters 795 and 797 provide suitable standards for animal drugs compounded by veterinarians, and if not, what standards of safety, purity, and quality should apply to animal drugs compounded by veterinarians?
- Should licensed veterinarians be able to sell or transfer an animal drug compounded from bulk drug substances by a State-licensed pharmacy or an outsourcing facility to owners or caretakers of animals under the veterinarian's care?
- Should the final guidance include a condition on the amount or percentage of compounded animal drugs that a pharmacy or outsourcing facility can ship in interstate commerce? If so, what would a reasonable amount be?
- Is additional guidance needed to address the repackaging of drugs for animal use?
  - How widespread is the practice of repackaging drugs for animal use?
  - What types of drugs are repackaged for animal use, and why are they repackaged?
  - Have problems been identified with repackaged drugs for animal use?
- Is additional guidance needed to address the compounding of animal drugs from approved animal or human drugs under section 512(a)(4) or (a)(5) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 360b(a)(4) and (a)(5)) and 21 CFR part 530?
- Is additional guidance needed to address the compounding of animal drugs from bulk drug substances for food-producing animals?

[1] Chapters <795> ''Pharmaceutical Compounding—Nonsterile Preparations'' and <797> ''Pharmaceutical Compounding—Sterile Preparations'' can be found in both the *USP Compounding Compendium* and the combined *United States Pharmacopeia and National Formulary (USP–NF).* These compendia are available at *http://www.usp.org/*.

• As one condition under which FDA does not generally intend to take action for certain violations of the FD&C Act if this and the other conditions are followed, FDA is proposing that State-licensed pharmacies and veterinarians report any product defect or serious adverse event associated with animal drugs they compound from bulk drug substances to FDA within 15 days of becoming aware of the product defect or serious adverse event. Outsourcing facilities are required to report adverse events associated with the drugs they compound. FDA believes it is important to receive this information from State-licensed pharmacies and veterinarians because there are no other State Departments of Health or Federal Agencies (*e.g.,* the Centers for Disease Control and Prevention) charged with identifying and tracing animal injuries or disease associated with an animal drug compounded by these entities. FDA has the following specific questions with respect to this proposed condition:

○ How many State-licensed pharmacies and veterinarians compound animal drugs from bulk drug substances and would potentially be reporting product defects and serious adverse events to FDA?

○ Are State-licensed pharmacies and veterinarians reporting the same or similar information to any State regulatory agency (*e.g.,* State boards of pharmacy, State boards of veterinary medicine)? If so, how many reports on average does each State-licensed pharmacy and veterinarian submit to these State agencies each year?

○ For purposes of the guidance, how should FDA define the terms ''product defect'' and ''serious adverse event?''

○ Can FDA achieve the same objective of identifying and tracing the source of injuries or disease associated with an animal drug compounded from a bulk drug substance through means other than product defect and serious adverse event reporting, and if so, what other means? For example, would reports of product defects alone achieve the same objective?

III. Request for Comments

Interested persons may submit either electronic comments regarding this document to *http://www.regulations.gov* or written comments to the Division of Dockets Management (see **ADDRESSES**). It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *http://www.regulations.gov.*

IV. Electronic Access

Persons with access to the Internet may obtain the draft guidance at either *http://www.fda.gov/AnimalVeterinary/GuidanceComplianceEnforcement/GuidanceforIndustry/ucm042450.htm* or *http://www.regulations.gov.*

Dated: August 11, 2015.

Leslie Kux,

Associate Commissioner for Policy.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2015–N–2734]

Physiological Closed-Loop Controlled Devices; Public Workshop; Request for Comments

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of public workshop; request for comments.

SUMMARY: The Food and Drug Administration (FDA) is announcing the following public workshop entitled ''Physiological Closed-Loop Controlled (PCLC) Devices.'' The topic to be discussed is challenges related to the design, development, and evaluation of critical care PCLC devices. FDA considers PCLC devices an emerging technology and aims to hold a workshop focusing on design, development and performance evaluation of PCLC systems intended for use in critical care environments. Such devices include closed-loop anesthetic delivery, closed-loop vasoactive drug and fluid delivery, and closed-loop mechanical ventilation.

Dates and Times: The public workshop will be held on October 13 and 14, 2015, from 8 a.m. to 5 p.m.

Location: The public workshop will be held at FDA's White Oak Campus, 10903 New Hampshire Ave., Building 31 Conference Center, Rm. 1503 (The Great Room), Silver Spring, MD 20993.

Entrance for the public meeting participants (non-FDA employees) is through Building 1 where routine security check procedures will be performed. For parking and security information, please refer to *http://www.fda.gov/AboutFDA/WorkingatFDA/BuildingsandFacilities/WhiteOakCampusInformation/ucm241740.htm.*

Contact Persons: Bahram Parvinian, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 2534, Silver Spring, MD 20993, 301–796–6445, email: *Bahram.Parvinian@fda.hhs.gov;* and Allison Kumar, Center for Devices and Radiological Health, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 66, Rm. 5402, Silver Spring, MD 20993, 301–796–6369, email: *Allison.Kumar@fda.hhs.gov.*

Registration: Registration is free and available on a first-come, first-served basis. Persons interested in attending this public workshop must register online by 4 p.m., October 1, 2015. Early registration is recommended because facilities are limited and, therefore, FDA may limit the number of participants from each organization. If time and space permits, onsite registration on the day of the public workshop will be provided beginning at 7 a.m.

If you need special accommodations due to a disability, please contact Susan Monahan, Office of Communication and Education (OCE), Center for Devices and Radiological Health, Food and Drug Administration, 301–796–5661, email: *susan.monahan@fda.hhs.gov* no later than September 29, 2015.

To register for the public workshop, please visit FDA's Medical Devices News & Events—Workshops & Conferences calendar at *http://www.fda.gov/MedicalDevices/NewsEvents/WorkshopsConferences/default.htm.* (Select this meeting/public workshop from the posted events list.) Please provide complete contact information for each attendee, including name, title, affiliation, address, email, and telephone number. Those without Internet access should contact Susan Monahan to register. Registrants will receive confirmation after they have been accepted. You will be notified if you are on a waiting list.

Streaming Webcast of the Public Workshop: This public workshop will also be Webcast. Persons interested in viewing the Webcast must register online by 4 p.m., October 1, 2015. Early registration is recommended because Webcast connections are limited. Organizations are requested to register all participants, but to view using one connection per location. Webcast participants will be sent technical system requirements after registration and will be sent connection access information after October 7, 2015. If you have never attended a Connect Pro event before, test your connection at *https://collaboration.fda.gov/common/help/en/support/meeting_test.htm.* To get a quick overview of the Connect Pro program, visit *http://www.adobe.com/go/connectpro_overview.* (FDA has

verified the Web site addresses in this document, but FDA is not responsible for any subsequent changes to the Web sites after this document publishes in the **Federal Register**.)

Requests for Oral Presentations: This public workshop includes a public comment session and topic-focused sessions. During online registration you may indicate if you wish to present during a public comment session or participate in a specific session, and which topics you wish to address. FDA has included general topics in this document. FDA will do its best to accommodate requests to make public comments. Individuals and organizations with common interests are urged to consolidate or coordinate their presentations, and request time for a joint presentation, or submit requests for designated representatives to participate in the focused sessions. Following the close of registration, FDA will determine the amount of time allotted to each presenter and the approximate time each oral presentation is to begin, and will select and notify participants by September 15, 2015. All requests to make oral presentations must be received by September 1, 2015. If selected for presentation, any presentation materials must be emailed to Bahram Parvinian and Allison Kumar (see *Contact Persons*) no later than October 1, 2015. No commercial or promotional material will be permitted to be presented or distributed at the public workshop.

Comments: FDA is holding this public workshop to obtain information on challenges related to the design, development, and evaluation of critical care PCLC devices. In order to permit the widest possible opportunity to obtain public comment, FDA is soliciting either electronic or written comments on all aspects of the public workshop topics. The deadline for submitting comments related to this public workshop is September 1, 2015.

Regardless of attendance at the public workshop, interested persons may submit either electronic comments regarding this document to *http://www.regulations.gov* or written comments to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, rm. 1061, Rockville, MD 20852. It is only necessary to send one set of comments. Identify comments with the docket number found in brackets in the heading of this document. In addition, when responding to specific questions as outlined in section II of this document, please identify the question you are addressing. Received comments may be seen in the Division of Dockets Management between 9 a.m. and 4 p.m., Monday through Friday, and will be posted to the docket at *http://www.regulations.gov.*

Transcripts: Please be advised that as soon as a transcript is available, it will be accessible at *http://www.regulations.gov.* It may be viewed at the Division of Dockets Management (see *Comments*). A transcript will also be available in either hardcopy or on CD–ROM, after submission of a Freedom of Information request. The address of the Division of Freedom of Information is available on the Agency's Web site at *http://www.fda.gov.* A link to the transcripts will also be available approximately 45 days after the public workshop on the Internet at *http://www.fda.gov/MedicalDevices/NewsEvents/WorkshopsConferences/default.htm.* (Select this public workshop from the posted events list).

SUPPLEMENTARY INFORMATION:

I. Background

PCLC medical devices are an emerging technology in the intensive care and emergency medicine settings that provides autonomous therapy adjustments to manipulate a physiological variable. For example, a closed-loop oxygen delivery device may automatically adjust the fraction of inspired oxygen when an individual's oxygen saturation level drifts too high or too low. PCLCs could benefit patients and practitioners by automating a number of tasks including adjustments to mechanical ventilation, anesthetic delivery, and fluid resuscitation. These devices may provide practitioners more resources to consider the course of treatment for an individual patient and improve resource allocation during times of medical surge (*e.g.*, from mass casualty incidents). PCLC medical devices may also allow additional therapeutic and diagnostic capabilities by providing precise control of physiological variables by continuous manipulation of therapy that is impractical for a medical practitioner to perform.

Recent advances in medical device technology and control systems science have increased the development of PCLC medical devices. PCLCs shift specific assignments of data interpretation and therapy manipulation from a practitioner to a medical device. This may or may not introduce new risks to patients, but could introduce new medical device hazards that, considered during design and development, can be mitigated throughout the device life-cycle. Addressing technical and clinical challenges for a PCLC medical device to be robust, stable, and effective in its environment of use will ensure patient safety and promote innovation and development of PCLC medical devices.

This workshop seeks to involve industry, academia, medical societies, patient groups, standard bodies, and other relevant stakeholders in addressing the challenges in the development and implementation of PCLC medical devices in critical care environments. Participants in the workshop will include scientists and engineers developing PCLC medical devices, as well as end users including physicians, nurses, and patients. The intent of the workshop is to discuss benefit-risk considerations, design strategies, pre-clinical testing, and clinical evaluation for specific product areas of PCLC medical devices. Ideas generated during this workshop may facilitate development of new draft guidances and/or standards for PCLC medical devices.

II. Topics for Discussion at the Public Workshop

This workshop is aimed to address the scientific, clinical and regulatory considerations associated with these devices, including, but not limited to, the following topic areas:

1. Benefit-risk considerations at varying levels of closed-loop medical device autonomy

2. Challenges related to the design and development of critical care PCLC devices

a. System performance analysis for different controller types (*e.g.,* rule based/knowledge based, proportional-integral derivative, fuzz logic, adaptive predictive, neural networks)

b. Fault detection and fallback modes

c. User interfaces and operational transparency

3. Knowledge gap between clinicians and system engineers

a. Clinician involvement in system design

b. Control system terminology

4. Pre-clinical evaluation

a. Evidence needed to demonstrate a stable and robust controller

b. Use of computer simulations including verification, validation and uncertainty quantification of physiological models used for design and evaluation of PCLC systems.

c. Real time bench testing

5. Clinical evaluation (*e.g.,* study design, clinical endpoints, outside the U.S. data)

a. Clinical validity of sensors

b. Patient populations

c. Environments of use

d. User related level of expertise.

BILLING CODE 4164–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request

AGENCY: Health Resources and Services Administration, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects (Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995), the Health Resources and Services Administration (HRSA) announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on this Information Collection Request must be received no later than October 16, 2015.

ADDRESSES: Submit your comments to *paperwork@hrsa.gov* or mail the HRSA Information Collection Clearance Officer, Room 10–29, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email *paperwork@hrsa.gov* or call the HRSA Information Collection Clearance Officer at (301) 443–1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference.

Information Collection Request Title: National Health Service Corps Scholar/Students to Service Travel Worksheet.

OMB No. 0915–0278—Extension.

Abstract: Clinicians participating in the HRSA National Health Service Corps (NHSC) Scholarship Program and the Students to Service (S2S) Loan Repayment Program use the online Travel Request Worksheet to receive travel funds from the federal government to visit eligible NHSC sites to which they may be assigned in accordance with the Public Health Service Act (PHSA), section 331(c)(1).

The travel approval process is initiated when a NHSC scholar or S2S participant notifies the NHSC of an impending interview at one or more NHSC-approved practice sites. The Travel Request Worksheet is also used to initiate the relocation process after an NHSC scholar or S2S participant has successfully been matched to an approved practice site in accordance with the PHSA, section 331(c)(3). Upon receipt of the Travel Request Worksheet, the NHSC will review and approve or disapprove the request and promptly notify the scholar or S2S participant, and the NHSC logistics contractor regarding travel arrangements and authorization of the funding for the site visit or relocation.

Need and Proposed Use of the Information: This information will facilitate NHSC scholar and S2S clinicians' receipt of federal travel funds that are used to visit high-need NHSC sites. The Travel Request Worksheet is also used to initiate the relocation process after a NHSC scholar or S2S participant has successfully been matched to an approved practice site. This information will be used by the NHSC in order to make travel arrangements for NHSC scholar and S2S clinicians to potential practice sites and to assist them in relocation arrangements once clinicians have secured employment at one of these sites.

Likely Respondents: Clinicians participating in the National Health Service Corps Scholarship Program and the Students to Service Loan Repayment Program.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this Information Collection Request are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Travel Request Worksheet	250	2	500	.0667	33
Total	250	2	500	.0667	33

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Jackie Painter,

Director, Division of the Executive Secretariat.

BILLING CODE 4165–15–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of the Secretary

Notice of Interest Rate on Overdue Debts

Section 30.18 of the Department of Health and Human Services' claims collection regulations (45 CFR part 30)

provides that the Secretary shall charge an annual rate of interest, which is determined and fixed by the Secretary of the Treasury after considering private consumer rates of interest on the date that the Department of Health and Human Services becomes entitled to recovery. The rate cannot be lower than the Department of Treasury's current value of funds rate or the applicable rate determined from the ''Schedule of Certified Interest Rates with Range of Maturities'' unless the Secretary waives interest in whole or part, or a different rate is prescribed by statute, contract, or repayment agreement. The Secretary of the Treasury may revise this rate quarterly. The Department of Health and Human Services publishes this rate in the **Federal Register**.

The current rate of 9¾%, as fixed by the Secretary of the Treasury, is certified for the quarter ended June 30, 2015. This rate is based on the Interest Rates for Specific Legislation, ''National Health Services Corps Scholarship Program (42 U.S.C. 250(B)(1)(A))'' and ''National Research Service Award Program (42 U.S.C. 288(c)(4)(B)).'' This interest rate will be applied to overdue debt until the Department of Health and Human Services publishes a revision.

Dated: August 7, 2015.

Teresa V. Miranda,

Director, Division of Financial Management Policy.

BILLING CODE 4150–04–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of General Medical Sciences; Notice of Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the National Advisory General Medical Sciences Council.

The meeting will be open to the public as indicated below, with a short public comment period at the end. Attendance is limited by the space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting. The open session will also be videocast and can be accessed from the NIH Videocasting and Podcasting Web site (*http://videocast.nih.gov/*).

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property, such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory General Medical Sciences Council.

Date: September 17–18, 2015.

Closed: September 17, 2015, 8:30 a.m. to 5:00 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Natcher Building, Conference Rooms E1 & E2, 45 Center Drive, Bethesda, MD 20892.

Open: September 18, 2015, 8:30 a.m. to Adjournment.

Agenda: For the discussion of program policies and issues, opening remarks, report of the Director, NIGMS, and other business of the Council.

Place: National Institutes of Health, Natcher Building, Conference Rooms E1 & E2, 45 Center Drive, Bethesda, MD 20892.

Contact Person: Ann A. Hagan, Ph.D., Associate Director for Extramural Activities, NIGMS, NIH, DHHS, 45 Center Drive, Room 2AN24H, MSC 6200, Bethesda, MD 20892, (301) 594–4499, *hagana@nigms.nih.gov.*

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and, when applicable, the business or professional affiliation of the interested person.

In the interest of security, NIH has instituted stringent procedures for entrance onto the NIH campus. All visitor vehicles, including taxis, hotel, and airport shuttles, will be inspected before being allowed on campus. Visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit. Information is also available on the Institute's home page (*http://www.nigms.nih.gov/About/Council/*) where an agenda and any additional information for the meeting will be posted when available.

Center for Scientific Review; Notice of Meeting

Pursuant to section 10(a) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the Center for Scientific Review Advisory Council.

The meeting will be open to the public, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

Name of Committee: Center for Scientific Review Advisory Council.

Date: September 28, 2015.

Time: 8:30 a.m. to 3:00 p.m.

Agenda: Provide advice to the Director, Center for Scientific Review (CSR), on matters related to planning, execution, conduct, support, review, evaluation, and receipt and referral of grant applications at CSR.

Place: Bethesda Marriott, Congressional Ballroom, 5151 Pooks Hill Road, Bethesda, MD 20814.

Contact Person: Rene Etcheberrigaray, M.D., Deputy Director, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3030, MSC 7776, Bethesda, MD 20892, (301) 435–1111, *etcheber@csr.nih.gov.*

Any interested person may file written comments with the committee by forwarding the statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

Information is also available on the Institute's/Center's home page: *http://public.csr.nih.gov/aboutcsr/CSROrganization/Pages/CSRAC.aspx*, where an agenda and any additional information for the meeting will be posted when available.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Notice of Kidney Interagency Coordinating Committee Meeting

SUMMARY: The Kidney Interagency Coordinating Committee (KICC) will hold a meeting on September 25, 2015, on the pharmacist's role in chronic kidney disease care. The meeting is open to the public.

DATES: The meeting will be held on September 25, 2015, 9 a.m. to 12 p.m. Individuals wanting to present oral comments must notify the contact person at least 10 days before the meeting date.

ADDRESSES: The meeting will be held in the Natcher Conference Center on the NIH Campus at 9000 Rockville Pike, Bethesda, MD 20894.

FOR FURTHER INFORMATION CONTACT: For further information concerning this meeting, contact Dr. Andrew S. Narva, Executive Secretary of the Kidney Interagency Coordinating Committee, National Institute of Diabetes and Digestive and Kidney Diseases, 31 Center Drive, Building 31A, Room 9A27, MSC 2560, Bethesda, MD 20892–2560, telephone: 301–594–8864; FAX: 301–480–0243; email: *nkdep@info.niddk.nih.gov*.

SUPPLEMENTARY INFORMATION: The KICC, chaired by the National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK), comprises members of the Department of Health and Human Services and other federal agencies that support kidney-related activities, facilitates cooperation, communication, and collaboration on kidney disease among government entities. KICC meetings, held twice a year, provide an opportunity for Committee members to learn about and discuss current and future kidney programs in KICC member organizations and to identify opportunities for collaboration. The September 25, 2015 KICC meeting will focus on the pharmacist's role in chronic kidney disease care.

Any member of the public interested in presenting oral comments to the Committee should notify the contact person listed on this notice at least 10 days in advance of the meeting. Interested individuals and representatives or organizations should submit a letter of intent, a brief description of the organization represented, and a written copy of their oral presentation in advance of the meeting. Only one representative of an organization will be allowed to present; oral comments and presentations will be limited to a maximum of 5 minutes. Printed and electronic copies are requested for the record. In addition, any interested person may file written comments with the Committee by forwarding their statement to the contact person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person. Because of time constraints for the meeting, oral comments will be allowed on a first-come, first-serve basis.

Members of the public who would like to receive email notification about future KICC meetings should send a request to *nkdep@info.niddk.nih.gov*.

Dated: August 4, 2015.

1500N, Washington, DC 20229, tel. 202–344–1060.

SUPPLEMENTARY INFORMATION: Notice is hereby given pursuant to 19 CFR 151.12 and 19 CFR 151.13, that AmSpec Services, LLC, 4370 Oakes Rd., Unit 732, Davie FL 33314, has been approved to gauge petroleum and certain petroleum products and accredited to test petroleum and certain petroleum products for customs purposes, in accordance with the provisions of 19 CFR 151.12 and 19 CFR 151.13. AmSpec Services, LLC is approved for the following gauging procedures for petroleum and certain petroleum products from the American Petroleum Institute (API):

API Chapters	Title
3	Tank Gauging.
7	Temperature Determination.
8	Sampling.
9	Density Determinations.
12	Calculations.
17	Maritime Measurement.

AmSpec Services, LLC is accredited for the following laboratory analysis procedures and methods for petroleum and certain petroleum products set forth by the U.S. Customs and Border Protection Laboratory Methods (CBPL) and American Society for Testing and Materials (ASTM):

CBPL No.	ASTM	Title
27–02	D1298	Standard Practice for Density, Relative Density (Specific Gravity), or API Gravity of Crude Petroleum and Liquid Petroleum Products by Hydrometer Meter.
27–04	D95	Standard Test Method for Water in Petroleum Products and Bituminous Materials by Distillation.
27–06	D473	Standard Test Method for Sediment in Crude Oils and Fuel Oils by the Extraction Method.
27–08	D86	Standard Test Method for Distillation of Petroleum Products.
27–11	D445	Standard Test Method for Kinematic Viscosity of Transparent and Opaque Liquids.
27–13	D4294	Standard Test Method for Sulfur in Petroleum and Petroleum Products by Energy-Dispersive X-ray Fluorescence Spectrometry.
27–20	D4057	Standard Practice for Manual Sampling of Petroleum and Petroleum Products.
27–48	D4052	Standard Test Method for Density and Relative Density of Liquids by Digital Density Meter.
27–54	D1796	Standard Test Method for Water and Sediment in Fuel Oils by the Centrifuge Method.
27–57	D7039	Standard Test Method for Sulfur in Gasoline and Diesel Fuel by Monochromatic Wavelength Dispersive X-Ray Fluorescence Spectrometry.
27–58	D5191	Standard Test Method for Vapor Pressure of Petroleum Products.

Anyone wishing to employ this entity to conduct laboratory analyses and gauger services should request and receive written assurances from the entity that it is accredited or approved by the U.S. Customs and Border Protection to conduct the specific test or gauger service requested. Alternatively, inquiries regarding the specific test or gauger service this entity is accredited or approved to perform may be directed to the U.S. Customs and Border Protection by calling (202) 344–1060. The inquiry may also be sent to *CBPGaugersLabs@cbp.dhs.gov.* Please reference the Web site listed below for a complete listing of CBP approved gaugers and accredited laboratories. *http://www.cbp.gov/about/labs-scientific/commercial-gaugers-and-laboratories.*

Dated: August 6, 2015.

Ira S. Reese,

Executive Director, Laboratories and Scientific Services Directorate.

BILLING CODE P

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2013–0015]

RIN 1660–AA79

Notice of Adjustment of Legitimate Amount in Dispute for the Dispute Resolution Pilot Program for Public Assistance Appeals

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: Notice.

SUMMARY: FEMA gives notice of an increase of the legitimate amount in dispute for the Dispute Resolution Pilot Program for Public Assistance Appeals for disasters declared on or after October 30, 2012.

DATES: *Effective Date:* August 17, 2015.

FOR FURTHER INFORMATION CONTACT: William Roche, Public Assistance Division Director, Recovery Directorate, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472–3100, Phone: (202) 646–3834 or Email: *william.roche@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The Sandy Recovery Improvement Act of 2013, Public Law 113–2, 127 Stat. 43 (Jan. 29, 2013), 42 U.S.C. 5189a note, prescribes that the Administrator shall annually adjust the legitimate amount in dispute under the Dispute Resolution Pilot Program to reflect changes in the Consumer Price Index for all Urban Consumers published by the Department of Labor. See 44 CFR 206.210(c)(1).

FEMA gives notice of an increase in the legitimate amount in dispute under the Dispute Resolution Pilot Program for Public Assistance Appeals to $1,031,000 for all disasters declared on or after October 30, 2012.

FEMA bases the adjustment on an increase in the Consumer Price Index for All Urban Consumers provided by The Bureau of Labor Statistics of the U.S. Department of Labor. The sum of the annual average percent change from the two previous years (2013 and 2014) used in the adjustment is 3.1 percent.

Dated: June 15, 2015.

W. Craig Fugate,

Administrator, Federal Emergency Management Agency.

BILLING CODE 9111–123–P

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

[Docket No. DHS–2015–0047]

Privacy Act of 1974; Department of Homeland Security, U.S. Customs and Border Protection, DHS/CBP–001, Import Information System, System of Records

AGENCY: Privacy Office, Department of Homeland Security.

ACTION: Notice of Privacy Act system of records.

SUMMARY: In accordance with the Privacy Act of 1974, the Department of Homeland Security proposes to consolidate, update, and rename two current Department of Homeland Security systems of records titled, ''Department of Homeland Security/U.S. Customs and Border Protection, DHS/CBP–001 Automated Commercial Environment/International Trade Data System System of Records'' (7 FR 3109, January 19, 2006) and ''Department of Homeland Security/U.S. Customs and Border Protection, DHS/CBP–015 Automated Commercial System System of Records'' (73 FR 77759, December 19, 2008) as one new system of records. The consolidated system of records notice will be titled, ''Department of Homeland Security/U.S. Customs and Border Protection, DHS/CBP–001 Import Information System System of Records.'' This system of records will continue to collect and maintain records on all commercial goods imported into the United States, as well as information pertaining to the carrier, broker, importer, and other persons associated with the manifest, import, or commercial entry transactions for the goods.

As a result of a review of these two systems, the Department of Homeland Security/U.S. Customs and Border Protection is combining the system of records notices for these systems into one updated system of records notice that includes changes to the categories of individuals and to the categories of records regarding information maintained about persons who have account access to trade data in the system. The Department of Homeland Security/U.S. Customs and Border Protection is also including an additional routine use for disclosing vessel manifest information as required by statute, in addition to the new compilation of routine uses reconciled from the prior systems of records notices. Data from this system of records may be shared with law enforcement and/or intelligence agencies pursuant to the routine uses identified below. Additionally, the Department of Homeland Security is issuing a Notice of Proposed Rulemaking to exempt this system of records from certain provisions of the Privacy Act elsewhere in the **Federal Register**. Lastly, this notice includes non-substantive changes to simplify the formatting and text of the previously published notices. This updated system will be included in the Department of Homeland Security's inventory of record systems.

DATES: Submit comments on or before September 16, 2015. This updated system will be effective September 16, 2015.

ADDRESSES: You may submit comments, identified by docket number DHS–2015–0047 by one of the following methods:

- *Federal e-Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* (202) 343–4010.
- *Mail:* Karen L. Neuman, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528–0655.

Instructions: All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided.

Docket: For access to the docket to read background documents or comments received, please visit *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: For general questions, please contact: John Connors (202) 344–1610, CBP Privacy Officer, Office of the Commissioner, U.S. Customs and Border Protection, Washington, DC 20229. For privacy questions, please contact: Karen L. Neuman, (202) 343–1717, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528–0655.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS), U.S. Customs and Border Protection (CBP) proposes to consolidate, update, and rename as one system of records notice (SORN) the information currently contained in two DHS SORNs titled, ''DHS/CBP–001 Automated Commercial Environment/International Trade Data System (ACE/ITDS) System of Records'' (7 FR 3109, January 19, 2006) and ''DHS/CBP–015 Automated Commercial System (ACS) System of Records'' (73 FR 77759, December 19, 2008) . This new SORN, entitled ''DHS/CBP–001 Import Information System (IIS),'' will inform the public about changes to the categories of individuals, categories of records, and routine uses contained in the consolidation of the former ACS and ACE/ITDS SORNs.

ACS, a decades old trade information database and information technology (IT) system, was deployed to track, control, and process all commercial goods imported into the United States. ACE, part of a multi-year modernization effort since 2001 to replace ACS, continues to be designed to manage CBP's import trade data and related transaction information. ACE/ITDS serves three sets of core stakeholders: The internal DHS/CBP users, Partner Government Agencies (PGA), and the trade community. ACE is the IT backbone for the ITDS, an interagency initiative formalized under the SAFE Port Act of 2006 to create a single window for the trade community and PGAs involved in importing and exporting. DHS/CBP has provided notice to the public and trade community that in the future, the ACS IT system will be fully phased out and replaced by ACE. As such, and to simplify the trade community's and the public's understanding of how trade information will be handled after ACE implementation, DHS/CBP is publishing this Import Information System (IIS) SORN to identify a single repository for import trade information. DHS/CBP is also publishing an updated ACE Privacy Impact Assessment on its Web site (*http://www.dhs.gov/privacy*) to inform the public of the operation and interconnectedness of the IT systems, ACS and ACE, and to assess the privacy impact of these systems using the fair information practice principles. This IIS system of records allows DHS/CBP to collect and maintain records on all commercial goods imported into the United States, along with related information about persons associated with those transactions, and manifest information.

As part of this consolidation and issuance of IIS, the category of individuals and category of records sections in the former ACS and ACE–ITDS have been merged to account for the data in both IT systems, as well as paper records related to the information in these systems. The category of individuals section is amended to remove reference to DHS/CBP employees and employees of other federal agencies for purposes of maintaining their user access accounts to the ACE–ITDS Portal, because these

individuals are now covered under a DHS-wide SORN, ''DHS/ALL–004 General Information Technology Access Account Records System (GITAARS) (77 FR 70792, November 27, 2012). The category of records for IIS will also include notations and results of examinations and document review for cleared merchandise to clarify and better identify DHS and PGA-generated information related to the processing of the import entry transaction. Additionally, the category of records is being expanded to address the expansion of information DHS/CBP proposes to collect on its revised Importer ID Input Record (CBP Form 5106). DHS/CBP is adding required elements for the name (First, Middle, Last) and business contact information (job title and phone) of Senior Company Officers of the Importer; DHS/CBP is also adding optional data fields on the form for the Senior Officers to provide Social Security number (SSN) or Passport Number and Country of Issuance. These latter, optional data elements are to facilitate Importer screening and verification.

The authorities sections from the previous SORNs have been combined, reconciled to address duplication, and updated to account for expanded information collected about business associations as part of the ACE–ITDS Portal user account. The purpose section for IIS reflects an update to the combined purposes for ACS and ACE–ITDS and addresses DHS/CBP's broad use of its import trade transaction IT systems (ACS and ACE) to collect and manage records to track, control, and process all commercial goods imported into the United States.

Consistent with DHS's information-sharing mission, information stored in the DHS/CBP–001 Import Information System (IIS) may be shared with other DHS Components that have a need to know the information to carry out their national security, law enforcement, immigration, or other homeland security functions. In addition, information may be shared with appropriate federal, state, local, tribal, territorial, foreign, or international government agencies consistent with the routine uses set forth in this SORN and as otherwise authorized under the Privacy Act.

Information in IIS may be shared for the same routine uses as were previously published in ACS and ACE–ITDS, and are now updated in this document:

- ACS's former Routine Use K is now reclassified as Routine Use G.
  - Routine Use G permits sharing of data under the following circumstances: ''To appropriate federal, state, local, tribal, or foreign governmental agencies or multilateral governmental organizations responsible for investigating or prosecuting the violations of, or for enforcing or implementing, a statute, rule, regulation, order, license, or treaty when DHS determines that the information would assist in the enforcement of civil or criminal laws.''
- ACE–ITDS's former Routine Use 3 is now reclassified as Routine Use K.
  - Routine Use K permits sharing of data under the following circumstances: ''To a federal, state, local, tribal, territorial, foreign, or international agency, maintaining civil, criminal, or other relevant enforcement information or other pertinent information, which has requested information relevant to or necessary to the requesting agency's or the bureau's hiring or retention of an individual, or issuance of a security clearance, license, contract, grant, or other benefit.''

Additionally, DHS/CBP is adding another routine use to IIS, Routine Use R, to provide explicit coverage for the mandated release of Manifest Information as set forth in section 1431 of title 19, United States Code and implemented through title 19, Code of Federal Regulations, part 103:

- Routine Use R permits sharing of data under the following circumstances: ''To paid subscribers, in accordance with applicable regulations, for the purpose of providing access to manifest information as set forth in 19 U.S.C. 1431.''

DHS/CBP will not assert any exemptions with regard to information provided by or on behalf of an individual. However, this data may be shared with law enforcement and/or intelligence agencies pursuant to the routine uses identified in the IIS SORN and as otherwise authorized under the Privacy Act. The Privacy Act requires that DHS maintain an accounting of such disclosures. Disclosing the fact that a law enforcement and/or intelligence agency has sought particular records may interfere with or disclose techniques and procedures related to ongoing law enforcement investigations. As such, DHS is issuing a Notice of Proposed Rulemaking to exempt this system of records from certain provisions of the Privacy Act elsewhere in the **Federal Register**. This updated system will be included in DHS's inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information practice principles in a statutory framework governing the means by which federal government agencies collect, maintain, use, and disseminate individuals' records. The Privacy Act applies to information that is maintained in a ''system of records.'' A ''system of records'' is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all persons when systems of records maintain information on U.S. citizens, lawful permanent residents, and non-immigrant aliens.

Below is the description of the DHS/CBP–001 Import Information System (IIS) System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of these systems of records to the Office of Management and Budget and to Congress.

System of Records

Department of Homeland Security (DHS)/U.S. Customs and Border Protection (CBP)–001.

SYSTEM NAME:

DHS/CBP–001 Import Information System (IIS).

SECURITY CLASSIFICATION:

Unclassified.

SYSTEM LOCATION:

Records are maintained at the DHS/CBP Headquarters in Washington, DC and field offices.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Categories of individuals in this system include members of the public involved in the importation of merchandise and international trade, such as importers, brokers, carriers, manufacturers, shippers, consignees, cartmen/lightermen, filers, sureties, facility operators, foreign trade zone operators, drivers/crew, attorneys/consultants, and agents, in addition to persons required to file Customs Declarations for international mail transactions (including sender and recipient).

CATEGORIES OF RECORDS IN THE SYSTEM:

Information maintained by ACE as part of the *user account creation process* includes:

- *Account Information*—Including Name of Company, Name of Company Officer, Title of Company Officer, Company Organization Structure, and

Officer's Date of Birth (optional). For Operators, this information must match the name on the company's bond.

○ *Account Owner Information*—Name, Application Data, Email, Date of Birth, Country, Address, and Business Phone Number.

○ *Legal Entity Information*—Name, Application Data, Email, Country, Address, and Business Phone Number.

○ *Point of Contact Information*—Name, Application Data, Email, Country, Date of Birth, Address, and Business Phone Number.

• *Business Activity Information*—Depending on the account type being established, CBP requires the following identifying information to set up an ACE portal account. Users are limited to a single identification number for the portal account being requested with the exception of: Importer, broker, filer, software vendor, service bureau, port authority, preparer, or surety agent, which can use up to three identifying numbers for each portal view:

○ *Importer/Broker/Filer/Surety:* Importer Record Number; Filer Code; Taxpayer Identification Number (TIN) [*e.g.,* Internal Revenue Service (IRS) Employer Identification Number (EIN)/SSN]; Surety Code.

○ *Service Provider:* Standard Carrier Alpha Code (SCAC) or Filer Code; EIN/SSN.

○ *Operator:* EIN/SSN; Bond Number; Facilities Information and Resources Management System (FIRMS) Code; Zone Number; Site Number. Operators must also note whether their background investigation has been completed by CBP, and whether their fingerprints are on file with CBP.

○ *Cartman/Lighterman:* Cartman/Lighterman Identification Number; Customhouse License (CHL) Number; Passport Number; Country of Issuance; Date of Expiration; U.S. Visa Number; Birth Certification Number; Permanent Resident Card Number; Certificate of Naturalization; Certificate of U.S. Citizenship; Re-entry Permit Number (I–327); Refugee Permit Number; Other Identification (such as Military Dependent's Card, Temporary Resident Card, Voter Registration Card). A Cartman/Lighterman must also note whether his or her background investigation has been completed by CBP, and whether his or her fingerprints are on file with CBP.

○ *Carriers:* SCAC; Bond Numbers; Importer Record for Type 2 Bond (if applicable).

○ *Drivers/Crew:* Commercial Driver License (CDL) Number; State/Province of Issuance; Country; whether the Driver has an Enhanced CDL or is HAZMAT endorsed; Full Name; Date of Birth; Gender; Citizenship; Travel Documentation (and Country of Issuance) such as: Passport Number or Permanent Resident Card; or other type of identification including: SENTRI Card; NEXUS [1]; U.S. Visa (non-immigrant or immigrant); Permanent Resident Card; U.S. Alien Registration Card; U.S. Passport Card; DHS Refugee Travel Document; DHS Re-Entry Permit; U.S. Military ID Document; or U.S. Merchant Mariner Document.

Information maintained by ACE as part of the *trade facilitation process* includes:

• Filer Information

○ *Importer of Record Name and Address*—The name and address, including the standard postal two-letter state or territory abbreviation, of the importer of record. The importer of record is defined as the owner or purchaser of the goods, or when designated by the owner, purchaser, or consignee, a licensed customs broker. The importer of record is the individual or firm liable for payment of all duties and meeting all statutory and regulatory requirements incurred as a result of importation, as described in 19 CFR 141.1(b).

○ *Consignee Number*—IRS EIN, SSN, or CBP-assigned number of the consignee. This number must reflect a valid identification number filed with CBP via the CBP Form 5106 or its electronic equivalent.

○ *Importer Number*—The IRS EIN, SSN, or CBP-assigned number of the importer of record.

○ *Reference Number*—The IRS EIN, SSN, or CBP-assigned number of the individual or firm to whom refunds, bills, or notices of extension or suspension of liquidation are to be sent (if other than the importer of record and only when a CBP Form 4811 is on file).

○ *Ultimate Consignee Name and Address*—The name and address of the individual or firm purchasing the merchandise or, if a consigned shipment, to whom the merchandise is consigned.

○ *Broker/Filer Information*—A broker or filer name, address, and phone number.

○ *Broker/Importer File Number*—A broker or importer internal file or reference number.

○ *Bond Agent Information*—Bond agent name, SSN or a surety created identification, and surety name.

○ *Declarant Name, Title, Signature, and Date*—The name, job title, and signature of the owner, purchaser, or agent who signs the declaration. The month, day, and year when the declaration was signed.

○ *Importer Business Description*—Including the Importer Dun & Bradstreet (DUNS) Number and the North American Industry Classification System (NAICS) number for Importer Business.

○ *Senior Officers of the Importing Company*—Information pertaining to Senior Officers of the Importing Company with an importing or financial role in trade transactions: Position title; Name (First, Middle, Last); Business Phone; SSN (Optional); Passport Number (Optional); Passport Country of Issuance (Optional).

○ *Additional Data Elements*—Filers may, on their own initiative, provide additional or clarifying information on the form provided such additional information does not interfere with the reporting of those required data elements.

• Supply Chain Information

○ *Manufacturer Information:*

▪ Manufacturer (or supplier) name;

▪ Manufacturer (or supplier) address;

▪ Foreign manufacturer identification code and/or shipper identification code;

▪ Foreign manufacturer name and/or shipper name; and

▪ Foreign manufacturer address and/or shipper address.

○ *Carrier Information:*

▪ *Importing Carrier*—For merchandise arriving in the U.S. by vessel, CBP records the name of the vessel that transported the merchandise from the foreign port of lading to the first U.S. port of unlading.

• Vessel Identifier Code;
• Vessel Name;
• Carrier Name;
• Carrier Address;
• Carrier codes (non-SSN) (Standard Carrier Agent Code (SCAC) for vessel carriers, International Air Transport Association (IATA) for air carriers);
• Department of Transportation (DOT) number,
• Tax Identification Number;
• DUNS;
• Organizational structure; and
• Insurance information including name of insurer, policy number, date of issuance, and amount.

• The carrier can create users and points of contact, and may also choose to store details associated with the driver and crew, conveyance, and equipment for purposes of expediting the creation of manifests.

▪ *Mode of Transport*—The mode of transportation by which the imported merchandise entered the U.S. port of arrival from the last foreign country.

[1] SENTRI and NEXUS are Trusted Traveler Cards used for expedited border crossing along the southern and northern borders, respectively. *See, http://www.cbp.gov/travel/trusted-traveler-programs.*

The mode of transport may include vessel, rail, truck, air, or mail.

▪ *Export Date*—The month, day, and year on which the carrier departed the last port (or airport, for merchandise exported by air) in the exporting country.

○ Liquidator identification (non-SSN);

○ Seller (full name and address or a widely accepted industry number such as a DUNS number);

○ Buyer (full name and address or a widely accepted industry number such as a DUNS number);

○ Ship to party name;

○ Consolidator (stuffer);

○ Foreign trade zone applicant identification number;

○ Country of origin;

○ Commodity Harmonized Tariff Schedule of the United States (HTSUS) number;

○ Booking party; and

○ Other identification information regarding the party to the transaction.

• Crewmember/Passenger Information

○ Carrier Information—Including vessel flag and vessel name, date of arrival, and port of arrival (CBP Form 5129);

○ Person on arriving conveyance who is in charge;

○ Names of all crew members and passengers;

○ Date of birth of each crew member and passenger;

○ Commercial driver license (CDL)/driver license number for each crew member;

○ CDL state or province of issuance for each crew member;

○ CDL country of issuance for each crew member;

○ Travel document number for each crew member and passenger;

○ Travel document country of issuance for each crew member and passenger;

○ Travel document for state/province of issuance for each crew member and passenger;

○ Travel document type for each crew member and passenger;

○ Address for each crew member and passenger;

○ Gender of each crew member and passenger;

○ Nationality/citizenship of each crew member and passenger; and

○ HAZMAT endorsement for each crew member.

• Federal Employee Information (including CBP and PGA employees)

○ CBP employee names;

○ CBP employee hash identification, SSN, or other employee identification number; and

○ Federal Government employee names, work addresses, work phone numbers, and ACE identification if already an ACE–ITDS user.

• Manifest Information

○ *Bill of Lading (B/L) or Air Waybill (AWB) Number*—The number assigned on the manifest by the international carrier delivering the goods to the United States.

○ *Immediate Transportation Number*—The Immediate Transportation number obtained from the CBP Form 7512, the AWB number from the Transit Air Cargo Manifest (TACM), or Automated Manifest System (AMS) master in-bond (MIB) movement number.

○ *Immediate Transportation Date*—The month, day, and year obtained from the CBP Form 7512, TACM, or AMS MIB record. Note that Immediate Transportation date cannot be prior to import date.

○ *Missing Documents*—Codes that indicate which documents are not available at the time of filing the entry summary.

○ *Foreign Port of Lading*—The five digit numeric code listed in the ''Schedule K'' (Classification of Foreign Ports by Geographic Trade Area and Country) for the foreign port at which the merchandise was actually laden on the vessel that carried the merchandise to the United States.[2]

○ *U.S. Port of Unlading*—The U.S. port code where the merchandise was unladen (or, delivered) from the importing vessel, aircraft, or train.

○ *Location of Goods/General Order (GO) Number*—Also known as a ''container stuffing location,'' the pier or site where the goods are available for examination. For air shipments, this is the flight number.

• CBP Generated Records

○ *Entry Number*—The entry number is a CBP-assigned number that is unique to each Entry Summary (CBP Form 7501).

○ *Entry Type*—Entry type denotes which type of entry summary is being filed (*i.e.,* consumption, information, and warehouse). The sub-entry type further defines the specific processing type within the entry category (*i.e.,* free and dutiable, quota/visa, anti-dumping/countervailing duty, and appraisement).[3]

○ *Summary Date*—The month, day, and year on which the entry summary is filed with CBP. The record copy of the entry summary will be time stamped by the filer at the time of presentation of the entry summary. Use of this field is optional for ABI statement entries. The time stamp will serve as the entry summary date. The filer will record the proper team number designation in the upper right portion of the form above this block (three-character team number code).[4]

○ *Port Code*—The port is where the merchandise was entered under an entry or released under an immediate delivery permit. CBP relies on the U.S. port codes from Schedule D, Customs District and Port Codes, listed in Annex C of the Harmonized Tariff Schedule (HTS).

○ *Entry Date*—The month, day, and year on which the goods are released, except for immediate delivery, quota goods, or when the filer requests another date prior to release.[5] It is the responsibility of the filer to ensure that the entry date shown for entry/entry summaries is the date of presentation (*i.e.,* the time stamp date). The entry date for a warehouse withdrawal is the date of withdrawal.

○ *Manufacturer ID*—This code identifies the manufacture/shipper of the merchandise by a CBP-constructed code. The manufacturer/shipper identification code is required for all entry summaries and entry/entry summaries, including informal entries, filed on the CBP Form 7501.

○ *Notes*—Notations and results of examinations and document review for cleared merchandise.

○ Trade violation statistics.

○ Protest and appeal decision case information.

• Surety and Bond Information

○ *Surety Information*—Full legal name of entity, address.

○ *Surety Number*—A three-digit numeric code that identifies the surety company on the Customs Bond. This code can be found in block 7 of the CBP Form 301, or is available through CBP's automated system to ABI filers, via the importer bond query transaction.

○ *Bond Type*—A three-digit numeric code identifying the following type of bond: U.S. Government or entry types not requiring a bond; Continuous; or Single Transaction.

○ *Additional Bond Information*—All authorized users of bond, bond expiration date.

• Merchandise-Specific Information

○ *Line Number*—A commodity from one country, covered by a line which

[2] The ''Schedule K'' may be retrieved at: *http://www.iwr.usace.army.mil/ndc/wcsc/scheduleK/schedulek.htm.*

[3] Automated Broker Interface (ABI) processing requires an ABI status indicator. This indicator must be recorded in the entry type code block. It is to be shown for those entry summaries with ABI status only.

[4] For ABI entry summaries, the team number is supplied by CBP's automated system in the summary processing output message.

[5] 19 CFR 141.68.

includes a net quantity, entered value, HTS number, charges, rate of duty and tax.

- *Description of Merchandise*—A description of the articles in sufficient detail (*i.e.,* gross weight, manifest quantity, net quantity in HTS units, U.S. dollar value, all other charges, costs, and expenses incurred while bringing the merchandise from alongside the carrier at the port of exportation in the country of exportation and placing it alongside the carrier at the first U.S. port of entry).
- *License Numbers*—For merchandise subject to agriculture licensing.
- *Country of Origin*—The country of origin is the country of manufacture, production, or growth of any article. When merchandise is invoiced in or exported from a country other than that in which it originated, the actual country of origin shall be specified rather than the country of invoice or exportation.
- *Import Date*—The month, day, and year on which the importing vessel transporting the merchandise from the foreign country arrived within the limits of the U.S. port with the intent to unlade.
- *Exporting Country*—The country of which the merchandise was last part of the commerce and from which the merchandise was shipped to the United States.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

IIS derives its authority from 19 U.S.C. 66, 1431, 1448, 1481, 1484, 1505, 1514, 1624, and 2071; 26 U.S.C. 6109(d); 31 U.S.C. 7701(c); section 203 of the Security and Accountability for Every (SAFE) Port Act of 2006 and section 343(a) of the Trade Act of 2002, as amended by the Maritime Transportation Security Act of 2002; Title 19 of the Code of Federal Regulations, including 19 CFR 24.5, 149.3, 101.9, and 103.31(e).

PURPOSE(S):

This system of records allows DHS/CBP to collect and maintain records on all commercial goods imported into the United States, along with carrier, broker, importer, and other ACE–ITDS Portal user account and manifest information. The purpose of this system of records is to track, control, and process all commercial goods imported into the United States. This facilitates the flow of legitimate shipments, and assists DHS/CBP in securing U.S. borders and targeting illicit goods. IIS covers two principle information technology systems: The Automated Commercial System (ACS) and ACE–ITDS. ACS employs multiple modules to receive data transmissions from a variety of parties involved in international commercial transactions and provides DHS/CBP with the capability to track both the transport transactions and the financial transactions associated with the movement of merchandise through international commerce. ACE–ITDS modernizes and enhances trade processing with features that will consolidate and automate border processing. ACE–ITDS serves three sets of core stakeholders: The internal DHS/CBP users, PGAs, and the trade community in the movement of merchandise through international commerce.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice (DOJ), including Offices of the United States Attorneys, or other federal agency conducting litigation or in proceedings before any court, adjudicative, or administrative body, when it is relevant or necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any Component thereof;

2. Any employee or former employee of DHS in his or her official capacity;

3. Any employee or former employee of DHS in his or her individual capacity when DOJ or DHS has agreed to represent the employee; or

4. The United States or any agency thereof.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration (NARA) or General Services Administration pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency or organization for the purpose of performing audit or oversight operations as authorized by law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. DHS has determined that as a result of the suspected or confirmed compromise, there is a risk of identity theft or fraud, harm to economic or property interests, harm to an individual, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) that rely upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To appropriate federal, state, local, tribal, or foreign governmental agencies or multilateral governmental organizations responsible for investigating or prosecuting the violations of, or for enforcing or implementing, a statute, rule, regulation, order, license, or treaty when DHS determines that the information would assist in the enforcement of civil or criminal laws.

H. To a federal, state, or local agency, or other appropriate entity or individual, or through established liaison channels to selected foreign governments, in order to provide intelligence, counterintelligence, or other information for the purposes of intelligence, counterintelligence, or antiterrorism activities authorized by U.S. law, Executive Order, or other applicable national security directive.

I. To the Department of Commerce, United States Census Bureau for statistical analysis of foreign trade data.

J. To a federal agency, pursuant to an International Trade Data System Memorandum of Understanding, consistent with the receiving agency's legal authority to collect information pertaining to and/or regulate transactions in international trade.

K. To a federal, state, local, tribal, territorial, foreign, or international agency, maintaining civil, criminal, or other relevant enforcement information

or other pertinent information, which has requested information relevant or necessary to the requesting agency's hiring or retention of an individual, or issuance of a security clearance, license, contract, grant, or other benefit;

L. To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil discovery, litigation, or settlement negotiations, in response to a subpoena, or in connection with criminal law proceedings;

M. To third parties during the course of an investigation to the extent necessary to obtain information pertinent to the investigation;

N. To the Department of Justice, Offices of the United States Attorneys or a consumer reporting agency as defined by the Fair Credit Reporting Act, address or physical location information concerning the debtor, for further collection action on any delinquent debt when circumstances warrant;

O. To appropriate federal, state, local, tribal, or foreign governmental agencies or multilateral governmental organizations when DHS is aware of a need to use relevant data for purposes of testing new technology and systems designed to enhance national security or identify other violations of law;

P. To a former employee of DHS, in accordance with applicable regulations, for purposes of responding to an official inquiry by a federal, state, or local government entity or professional licensing authority; or facilitating communications with a former employee that may be necessary for personnel-related or other official purposes when the Department requires information or consultation assistance from the former employee regarding a matter within that person's former area of responsibility;

Q. To an organization or individual in either the public or private sector, either foreign or domestic, when there is a reason to believe that the recipient is or could become the target of a particular terrorist activity or conspiracy, to the extent the information is relevant to the protection of life or property;

R. To paid subscribers, in accordance with applicable regulations, for the purpose of providing access to manifest information as set forth in 19 U.S.C. 1431;

S. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information or when disclosure is necessary to preserve confidence in the integrity of DHS or is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent it is determined that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

DISCLOSURE TO CONSUMER REPORTING AGENCIES:

Yes, CBP may disclose, pursuant to 5 U.S.C. 552a(b)(12), to consumer reporting agencies in accordance with the provision of 15 U.S.C. 1681, *et seq.* or the Federal Claims Collection Act of 1966 as amended (31 U.S.C. 3701, *et seq.*). The purpose of this disclosure is to aid in the collection of outstanding debts owed to the Federal Government, typically, to provide an incentive for debtors to repay delinquent Federal Government debts by making these part of their credit records.

Disclosure of records is limited to the individual's name, address, EIN/SSN, and other information necessary to establish the individual's identity; the amount, status, and history of the claim; and the agency or program under which the claim arose. The disclosure will be made only after the procedural requirements of 31 U.S.C. 3711(e) have been followed.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:

STORAGE:

CBP stores records in this system electronically or on paper in secure facilities in a locked drawer behind a locked door. The records may be stored on magnetic disc, tape, digital media, and CD–ROM.

RETRIEVABILITY:

CBP retrieves records by file identification codes, name or other personal identifier.

SAFEGUARDS:

CBP safeguards records in this system in accordance with applicable rules and policies, including all applicable DHS automated systems security and access policies. CBP imposes strict controls to minimize the risk of compromising the information that is being stored. Access to the computer system containing the records in this system is limited to those individuals who have a need to know the information for the performance of their official duties and who have appropriate clearances or permissions. The systems maintain a real-time auditing function of individuals who access them. Additional safeguards may vary by Component and program.

RETENTION AND DISPOSAL:

The Importer Security Filing form is retained for fifteen years from date of submission unless it becomes linked to law enforcement action. All other import records contained within IIS are maintained for a period of six years from the date of entry.

Some records are retained online in a system database, while others may be retained in hard copy in ports of entry, as appropriate. Personally identifiable information collected in IIS as part of the regulation of incoming cargo will be retained in accordance with the U.S. Customs Records Schedules approved by the National Archive and Records Administration for the forms on which the data is submitted. This means that cargo, crew, driver, and passenger information collected from a manifest presented in connection with the arrival of a vessel, vehicle, or aircraft will be retained for six years.

Information collected in connection with the submission of a Postal Declaration for a mail importation will be retained for a maximum of six years and three months (as set forth pursuant to NARA Authority N1–36–86–1, U.S. Customs Records Schedule, Schedule 9 Entry Processing, Items 4 and 5).

SYSTEM MANAGER AND ADDRESS:

Director, Integrated Logistic Support, Cargo Systems Program Office, Office of Information Technology, U.S. Customs and Border Protection, who is located at 1801 North Beauregard Street, Alexandria, Virginia 22311.

NOTIFICATION PROCEDURE:

ACE–ITDS portal users may log in to ACE–ITDS to change their profile information and make permissible amendments or corrections to their records. Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to the DHS/CBP Freedom of Information Act (FOIA) Officer, whose contact information can be found at *http://www.dhs.gov/foia* under ''Contacts.'' If an individual believes more than one Component maintains Privacy Act records concerning him or her, the individual may submit the request to the Chief Privacy Officer and Chief FOIA Officer, Department of Homeland Security, 245 Murray Drive SW., Building 410, STOP–0655, Washington, DC 20528.

When seeking records about yourself from this system of records or any other Departmental system of records, your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity,

meaning that you must provide your full name, current address, and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. Although no specific form is required, you may obtain forms for this purpose from the Chief Privacy Officer and Chief FOIA Officer, *http://www.dhs.gov/foia* or 1–866–431–0486. In addition, you should:

- Explain why you believe the Department would have information on you;
- Identify which Component(s) of the Department you believe may have the information about you;
- Specify when you believe the records would have been created; and
- Provide any other information that will help the FOIA staff determine which DHS Component agency may have responsive records; and

If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his or her agreement for you to access his or her records.

Without the above information, the Component(s) may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

RECORD ACCESS PROCEDURES:

See ''Notification procedure'' above.

CONTESTING RECORD PROCEDURES:

See ''Notification procedure'' above.

RECORD SOURCE CATEGORIES:

Records are obtained through authorized DHS/CBP or other federal agency forms, related documents, or electronic submissions from individuals and/or companies incidental to the conduct of foreign trade and required to administer the transportation and trade laws and regulations of the United States.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

DHS/CBP will not assert any exemptions with regard to information provided by or on behalf of an individual, when requested by the data subject. However, this data may be shared with law enforcement and/or intelligence agencies pursuant to the routine uses identified in the IIS SORN. The Privacy Act requires DHS to maintain an accounting of such disclosures made pursuant to all routine uses. Disclosing the fact that a law enforcement and/or intelligence agency has sought particular records may affect ongoing law enforcement activity. As such, DHS will claim exemption pursuant to 5 U.S.C. 552a(j)(2) from sections (c)(3), (e)(8), and (g)(1) of the Privacy Act, and pursuant to 5 U.S.C. 552a(k)(2) from section (c)(3) of the Privacy Act, from providing an individual the accounting of disclosures, as necessary and appropriate to protect this information.

Dated: July 31, 2015.

Karen L. Neuman,

Chief Privacy Officer, Department of Homeland Security.

BILLING CODE 9111–14–P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

[OMB Control Number 1615–0015]

Agency Information Collection Activities: Immigrant Petition for Alien Worker, Form I–140; Extension, Without Change, of a Currently Approved Collection

AGENCY: U.S. Citizenship and Immigration Services, Department of Homeland Security.

ACTION: 60-Day Notice.

SUMMARY: The Department of Homeland Security (DHS), U.S. Citizenship and Immigration

(USCIS) invites the general public and other Federal agencies to comment upon this proposed extension of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

DATES: Comments are encouraged and will be accepted for 60 days until October 16, 2015.

ADDRESSES: All submissions received must include the OMB Control Number 1615–0015 in the subject box, the agency name and Docket ID USCIS–2007–0018. To avoid duplicate submissions, please use only *one* of the following methods to submit comments:

(1) *Online.* Submit comments via the Federal eRulemaking Portal Web site at *http://www.regulations.gov* under e-Docket ID number USCIS–2007–0018;

(2) *Email.* Submit comments to *USCISFRComment@uscis.dhs.gov;*

(3) *Mail.* Submit written comments to DHS, USCIS, Office of Policy and Strategy, Chief, Regulatory Coordination Division, 20 Massachusetts Avenue NW., Washington, DC 20529–2140.

FOR FURTHER INFORMATION CONTACT: USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Laura Dawkins, Chief, 20 Massachusetts Avenue NW., Washington, DC 20529–2140, telephone number 202–272–8377 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS Web site at *http://www.uscis.gov,* or call the USCIS National Customer Service Center at 800–375–5283 (TTY 800–767–1833).

SUPPLEMENTARY INFORMATION:

Comments

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2007–0018 in the search box. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Immigrant Petition for Alien Worker.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* Form I–140; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Business or other for-profit. The information furnished on Form I–140 will be used by USCIS to classify aliens under sections 203(b) (1), 203(b) (2) or 203(b) (3) of the Immigration and Nationality Act (Act).

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–140 is 77,149 and the estimated hour burden per response is 1.08 hours (1 hour and 5 minutes).

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 83,321 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $32,132,559.

Dated: August 11, 2015.

Laura Dawkins,

Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 9111–97–P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–5832–N–08]

60-Day Notice of Proposed Information Collection: Promise Zones

AGENCY: Office of Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* October 16, 2015.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW., Room 4176, Washington, DC 20410–5000; telephone 202–402–3400 (this is not a toll-free number) or email at *Colette.Pollard@hud.gov* for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

FOR FURTHER INFORMATION CONTACT: Bryan Herdliska, Presidential Management Fellow—Promise Zones Initiative Department of Housing and Urban Development, 451 7th Street SW., Washington, DC 20410; email Bryan Herdliska at *Bryan.n.Herdliska@hud.gov* or telephone 202–402–6758. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Promise Zones.

OMB Approval Number: 2506–0209.

Type of Request: Revision of a currently approved collection.

Form Number: N/A.

Description of the need for the information and proposed use: Under the Promise Zones initiative, the federal government will invest and partner with high-poverty urban, rural, and tribal communities to create jobs, increase economic activity, improve educational opportunities, leverage private investment, and reduce violent crime. Additional information about the Promise Zones initiative can be found at *www.hud.gov/promisezones,* and questions can be addressed to *promisezones@hud.gov.* This notice estimates burden for applying for the designation.

Respondents (*i.e.* affected public): Local or Tribal Governments.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Annual cost
Section I—Executive summary	300	1	1	3	900	$40	$36,000
Section II—Abstract	300	1	1	3	900	40	36,000
Section II—Community Eligibility Criteria and Local Leadership Support Documentation	300	1	1	4	1200	40	48,000
Section III—Need	300	1	1	1	300	40	12,000
Section IV—Strategy Part A (Needs and Assets Assessment)	300	1	1	3	900	40	36,000
Section IV—Strategy Part B (Plan)	300	1	1	6	1800	40	72,000
Section IV—Strategy Part C (Sustainability and Financial Feasibility)	300	1	1	3	900	40	36,000
Section IV—Strategy Part D (Resident Engagement Strategy)	300	1	1	3	900	40	36,000
Section V—Capacity and Local Commitment Part A (Partnership Structure and Commitment)	300	1	1	6	1800	40	72,000
Section V—Capacity and Local Commitment Part B (Capacity of Lead Applicant)	300	1	1	6	1800	40	72,000

Goals and Activities Template	300	1	1	8	2400	40	96,000
Total	300	1	1	61	18300	40	732,000

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

HUD encourages interested parties to submit comments in response to these questions.

Authority: Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

Dated: August 10, 2015.

Harriet Tregoning,

Principal Deputy Assistant Secretary for Community Planning and Development.

Advisory Board for Exceptional Children

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of meeting.

SUMMARY: The Bureau of Indian Education (BIE) is announcing that the Advisory Board for Exceptional Children (Advisory Board) will hold its next meeting in Washington, DC. The purpose of the meeting is to meet the mandates of the Individuals with Disabilities Education Act of 2004 (IDEA) for Indian children with disabilities.

DATES: The Advisory Board will meet on Thursday, September 17, 2015, from 8:30 a.m. to 4:30 p.m. and Friday, September 18, 2015, from 8:30 a.m. to 4:30 p.m. Eastern Time. Orientation for new members will be held Wednesday, September 16, 2015, from 9:00 a.m. to 4:00 p.m. Eastern Time.

ADDRESSES: The meetings on Wednesday, September 16, 2015, Thursday, September 17, 2015, and Friday, September 18, 2015, will be held at 1951 Constitution Avenue NW., Room 303–304, Washington, DC 20240; telephone number (202) 208–6123.

FOR FURTHER INFORMATION CONTACT: Ms. Sue Bement, Designated Federal Officer, Bureau of Indian Education, Albuquerque Service Center, Division of Performance and Accountability, 1011 Indian School Road NW., Suite 332, Albuquerque, NM 87104; telephone number (505) 563–5274.

SUPPLEMENTARY INFORMATION: In accordance with the Federal Advisory Committee Act (5 U.S.C. app.), the BIE is announcing that the Advisory Board will hold its next meeting in Washington, DC. The Advisory Board was established under the Individuals with Disabilities Education Act of 2004 (20 U.S.C. 1400 *et seq.*) to advise the Secretary of the Interior, through the Assistant Secretary—Indian Affairs, on the needs of Indian children with disabilities. The meetings are open to the public.

The following items will be on the agenda:

- Introduction of Advisory Board members
- Announcement of Chair Person
- Report from Gloria Yepa, Supervisory Education Specialist, BIE, Division of Performance and Accountability
- Report from BIE Director's Office
- Advisory Board work on Priorities for 2015
- Public Comment (via conference call, September 18, 2015 meeting only *)
- BIE Advisory Board-Advice and Recommendations

* During the September 18, 2015 meeting, time has been set aside for public comment via conference call from 1:30–2:00 p.m. Eastern Time. The call-in information is: Conference Number 1 (888) 417–0376, Passcode 1509140.

Dated: August 12, 2015.

Revision of Agency Information Collection for the Tribal Reassumption of Jurisdiction Over Child Custody Proceedings

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the Bureau of Indian Affairs (BIA) is seeking comments on the renewal of Office of Management and Budget (OMB) approval for the collection of information for the Tribal Reassumption of Jurisdiction over Child Custody Proceedings, authorized by OMB Control Number 1076–0112. This information collection expires November 30, 2015.

DATES: Submit comments on or before October 16, 2015.

ADDRESSES: You may submit comments on the information collection to Evangeline Campbell, Chief, Division of Human Services, Office of Indian Services, Bureau of Indian Affairs, 1849 C Street NW., MS–4513–MIB, Washington, DC 20240; facsimile: (202) 208–5113; email: *Evangeline.Campbell@bia.gov*.

FOR FURTHER INFORMATION CONTACT: Evangeline Campbell, (202) 513–7621.

SUPPLEMENTARY INFORMATION:

I. Abstract

The BIA is seeking to renew the information collection conducted under 25 CFR 13, which prescribed procedures by which an Indian tribe that occupies a reservation over which a state asserts any jurisdiction pursuant to federal law may reassume jurisdiction over Indian child proceedings as authorized by the Indian Child Welfare Act, Public Law 95–608, 92 Stat. 3069, 25 U.S.C. 1918.

II. Request for Comments

The BIA requests your comments on this collection concerning: (a) The necessity of this information collection for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) The accuracy of the agency's estimate of the burden (hours and cost) of the collection of information, including the validity of the methodology and assumptions used; (c) Ways we could enhance the quality, utility, and clarity of the information to be collected; and (d) Ways we could minimize the burden of the collection of the information on the respondents.

Please note that an agency may not conduct or sponsor, and an individual need not respond to, a collection of information unless it has a valid OMB Control Number.

It is our policy to make all comments available to the public for review at the location listed in the **ADDRESSES** section. Before including your address, phone number, email address or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

III. Data

OMB Control Number: 1076–0112.

Title: Tribal Reassumption of Jurisdiction Over Child Custody Proceedings, 25 CFR 13.

Brief Description of Collection: The collection of information will ensure that the provisions of Public Law 95–608 are met. Any Indian Tribe that became subject to State jurisdiction pursuant to the provisions of the Act of August 15, 1953 (67 Stat. 588), as amended by title IV of the Act of April 11, 1968 (82 Stat. 73,78), or pursuant to any other Federal law, may reassume jurisdiction over child custody proceedings. The collection of information provides data that will be used in considering the petition and feasibility of the plan of the Tribe for reassumption of jurisdiction over Indian child custody proceedings. We collect the following information: Full name, address, and telephone; number of petitioning Tribe or Tribes; a Tribal resolution; estimated total number of members in the petitioning Tribe of Tribes with an explanation of how the number was estimated; current criteria for Tribal membership; citation to provision in Tribal constitution authorizing the Tribal governing body to exercise jurisdiction over Indian child custody matters; description of Tribal court; copy of any Tribal ordinances or Tribal court rules establishing procedures or rules for exercise of jurisdiction over child custody matters; and all other information required by 25 CFR 13.11. Response is required to obtain or retain a benefit.

Type of Review: Extension without change of currently approved collection.

Respondents: Federally recognized Tribes who submit Tribal reassumption petitions for review and approval by the Secretary of the Interior.

Number of Respondents: 1, on average.

Frequency of Response: Annually.

Estimated Time per Response: 8 hours.

Estimated Total Annual Hour Burden: 8 hours.

Estimated Total Annual Non-Hour Dollar Cost: $0.

Elizabeth K. Appel,

Director, Office of Regulatory Affairs and Collaborative Action—Indian Affairs.

BILLING CODE 4337–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[Docket No. BOEM–2015–0093; MMAA104000]

Outer Continental Shelf, Gulf of Mexico, Oil and Gas Lease Sale, Central Planning Area Lease Sale 247

AGENCY: Bureau of Ocean Energy Management (BOEM), Interior.

ACTION: Notice of Intent to Prepare a Supplemental Environmental Impact Statement and an Announcement of Scoping Meetings and Comment Period for Proposed Gulf of Mexico Outer Continental Shelf Oil and Gas Central Planning Area Lease Sale 247.

SUMMARY: Consistent with the regulations implementing the National Environmental Policy Act (NEPA), as amended (42 U.S.C. 4321 *et seq.),* BOEM is announcing its intent to prepare a Supplemental Environmental Impact Statement (EIS) for proposed Gulf of Mexico Outer Continental Shelf (OCS) Central Planning Area (CPA) Oil and Gas Lease Sale 247 (CPA 247 Supplemental EIS). The CPA 247 Supplemental EIS will expand or update the environmental and socioeconomic analyses in: *Gulf of Mexico OCS Oil and Gas Lease Sales: 2012–2017; Western Planning Area Lease Sales 229, 233, 238, 246, and 248; Central Planning Area Lease Sales 227, 231, 235, 241, and 247, Final Environmental Impact Statement* (2012–2017 WPA/CPA Multisale EIS); *Gulf of Mexico OCS Oil and Gas Lease Sales: 2013–2014; Western Planning Area Lease Sale 233; Central Planning Area Lease Sale 231, Final Supplemental Environmental Impact Statement* (WPA 233/CPA 231 Supplemental EIS); *Gulf of Mexico OCS Oil and Gas Lease Sales: 2015–2017; Central Planning Area Lease Sales 235, 241, and 247, Final Supplemental EIS* (CPA 235/241/247 Supplemental EIS); and *Central Planning Area Lease Sales 241 and 247 and Eastern Planning Area Lease Sale 226, Final Supplemental EIS* (CPA 241/247 and EPA 226 Supplemental EIS).

The CPA 247 Supplemental EIS will supplement the NEPA documents cited above in order to consider new circumstances and information arising from, among other things, the *Deepwater Horizon* explosion, oil spill, and response. It will focus on updating the baseline conditions and any new information on the potential environmental effects of oil and natural gas leasing, exploration, development, and production in the CPA identified through the Area Identification procedure as the proposed lease sale area. In addition to the no action alternative (*i.e.,* canceling a proposed lease sale), other alternatives may be considered for the proposed CPA lease sales, such as deferring certain areas from the proposed lease sale area.

DATES: Comments on the scope of the CPA 247 Supplemental EIS should be submitted by September 16, 2015.

FOR FURTHER INFORMATION CONTACT: For information on the CPA 247 Supplemental EIS or the submission of comments, please contact Mr. Gary D. Goeke, Chief, Environmental Assessment Section, Office of Environment (GM 623E), BOEM, Gulf of Mexico OCS Region, 1201 Elmwood

Park Boulevard, New Orleans, LA 70123–2394, telephone 504–736–3233.

SUPPLEMENTARY INFORMATION: On August 27, 2012, the Secretary of the Interior approved the OCS Oil and Gas Leasing Program: 2012–2017 (2012–2017 Five Year Program). This Supplemental EIS will consider the last CPA sale for this 2012–2017 Five Year Program. Proposed CPA Lease Sale 247 is tentatively scheduled to be held in 2017.

Scoping Process: This Notice of Intent (NOI) serves to announce the scoping process for identifying issues for the CPA 247 Supplemental EIS. Throughout the scoping process, Federal, State, Tribal, and local governments and the general public have the opportunity to help BOEM determine significant resources and issues, impacting factors, reasonable alternatives, and potential mitigating measures to be analyzed in the CPA 247 Supplemental EIS, and to provide additional information. BOEM will also use the scoping process to inform the Section 106 consultation process of the National Historic Preservation Act (16 U.S.C. 470f), as provided for in 36 CFR 800.2(d)(3). Pursuant to the regulations implementing the procedural provisions of NEPA, the BOEM will hold public scoping meetings in Alabama, Louisiana and Mississippi on the CPA 247 Supplemental EIS. The purpose of these meetings is to solicit comments on the scope of the CPA 247 Supplemental EIS. BOEM's scoping meetings will be held at the following places and times:

- Mobile, Alabama: Tuesday, September 1, 2015, Hilton Garden Inn Mobile West, 828 West I–65 Service Road South, Mobile, Alabama 36609, one meeting beginning at 4:00 p.m. CDT;
- Gulfport, Mississippi: Wednesday, September 2, 2015, Courtyard by Marriott, Gulfport Beachfront MS Hotel, 1600 East Beach Boulevard, Gulfport, Mississippi 39501, one meeting beginning at 6:00 p.m. CDT; and
- New Orleans, Louisiana: Thursday, September 3, 2015, Bureau of Ocean Energy Management, Gulf of Mexico OCS Region, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123, one meeting beginning at 1:00 p.m. CDT.

Cooperating Agency: BOEM invites other Federal, State, Tribal, and local governments to consider becoming cooperating agencies in the preparation of the CPA 247 Supplemental EIS. We invite qualified government entities to inquire about cooperating agency status for the CPA 247 Supplemental EIS. Following the guidelines from the Council on Environmental Quality (CEQ), qualified agencies and governments are those with ''jurisdiction by law or special expertise.'' Potential cooperating agencies should consider their authority and capacity to assume the responsibilities of a cooperating agency and should remember that an agency's role in the environmental analysis neither enlarges nor diminishes the final decision making authority of any other agency involved in the NEPA process. Upon request, BOEM will provide potential cooperating agencies with a written summary of ground rules for cooperating agencies, including time schedules and critical action dates, milestones, responsibilities, scope and detail of cooperating agencies' contributions, and availability of predecisional information. BOEM anticipates this summary will form the basis for a Memorandum of Agreement between BOEM and any cooperating agency pursuant to 43 CFR 46.225. Agencies should also consider DOI's implementing regulation at 43 CFR part 46 and the ''Factors for Determining Cooperating Agency Status'' in Attachment 1 to CEQ's January 30, 2002, Memorandum for the Heads of Federal Agencies: Cooperating Agencies in Implementing the Procedural Requirements of the National Environmental Policy Act. The CEQ documents are available at the following location on the Internet: *http://energy.gov/sites/prod/files/nepapub/nepa_documents/RedDont/G-CEQCoopAgenciesImplem.pdf.*

BOEM, as the lead agency, will not provide financial assistance to cooperating agencies. Even if an organization is not a cooperating agency, opportunities will exist to provide information and comments to BOEM during the normal public input stages of the EIS process. For further information about cooperating agencies, please contact Mr. Gary D. Goeke at (504) 736–3233.

Comments: All interested parties, including Federal, State, Tribal, and local governments, and other organizations and members of the public, may submit written comments on the scope of the CPA 247 Supplemental EIS, significant issues that should be addressed, alternatives that should be considered, potential mitigating measures, and the types of oil and gas activities of interest in the proposed CPA lease sale area. BOEM is also seeking public comment and input regarding the identification of historic properties or potential effects, as defined by the National Historic Preservation Act, to historic properties from the proposed action. Written comments may be submitted in one of the following ways:

1. Federal eRulemaking Portal: *http://www.regulations.gov.* In the field entitled ''Search'' enter ''BOEM'' and then click ''search.'' Under ''Comment Period'' select ''Open'' and under ''Document Type'' select ''Notice''. Choose the ''Notice'' for ''Oil and Gas Lease Sales: Gulf of Mexico, Outer Continental Shelf; Central Planning Area Lease Sale 247.'' Follow the instructions to submit public comments and view supporting and related materials available for this notice;

2. U.S. mail in an envelope labeled ''Scoping Comments for the CPA 247 Supplemental EIS'' and mailed (or hand delivered) to Mr. Gary D. Goeke, Chief, Environmental Assessment Section, Office of Environment (GM 623E), BOEM, Gulf of Mexico OCS Region, 1201 Elmwood Park Boulevard, New Orleans, Louisiana 70123–2394. Comments must be postmarked by the last day of the comment period to be considered. As noted in the ''Dates'' section above, the comment period ends on *September 16, 2015*.

3. Via electronic mail to email address: *cpa247@boem.gov.*

Petitions, although accepted, do not generally provide useful information to assist in the development of alternatives, resources, and issues to be analyzed, or impacting factors. BOEM does not consider anonymous comments; please include your name and address as part of your submittal. BOEM makes all comments, including the names and addresses of respondents, available for public review during regular business hours. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Authority: This NOI to prepare a Supplemental EIS is published pursuant to the regulations (40 CFR 1501.7 and 43 CFR 46.435) implementing the provisions of NEPA.

Dated: August 11, 2015.

Walter D. Cruickshank,

Deputy Director, Bureau of Ocean Energy Management.

BILLING CODE 4310–MR–P

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

[S1D1 SS08011000SX064A000156S180110; S2D2SS08011000SX064A00015X501520]

Notice of Proposed Information Collection; Request for Comments for 1029–0119

AGENCY: Office of Surface Mining Reclamation and Enforcement, Interior.

ACTION: Notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995, the Office of Surface Mining Reclamation and Enforcement (OSM) is announcing its intention to seek approval to continue the collection of information for the contractor eligibility, and the Abandoned Mine Land (AML) Contractor Information form. This information collection activity was previously approved by the Office of Management and Budget (OMB), and assigned clearance number 1029–0119.

DATES: Comments on the proposed information collection must be received by October 16, 2015, to be assured of consideration.

ADDRESSES: Comments may be mailed to John A. Trelease, Office of Surface Mining Reclamation and Enforcement, 1951 Constitution Ave. NW., Room 203—SIB, Washington, DC 20240. Comments may also be submitted electronically to *jtrelease@osmre.gov.*

FOR FURTHER INFORMATION CONTACT: To receive a copy of the information collection request contact John Trelease, at (202) 208–2783 or by email at *jtrelease@osmre.gov.*

SUPPLEMENTARY INFORMATION: OMB regulations at 5 CFR 1320, which implementing provisions of the Paperwork Reduction Act of 1995 (Pub. L. 104–13), require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities [see 5 CFR 1320.8(d)]. This notice identifies information collection that OSM will be submitting to OMB for approval. This collection is contained in 30 CFR 874.16 and the Abandoned Mine Land Contractor Information form. OSM will request a 3-year term of approval for each information collection activity. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control number for this collection is 1029–0119. Responses are required to obtain a benefit.

Comments are invited on: (1) The need for the collection of information for the performance of the functions of the agency; (2) the accuracy of the agency's burden estimates; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the information collection burden on respondents, such as use of automated means of collection of the information. A summary of the public comments will accompany OSM's submission of the information collection request to OMB.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Title: 30 CFR 874.16—Contractor eligibility, and the AML Contractor Information form.

OMB Control Number: 1029–0119.

Summary: 30 CFR 874.16 requires that every successful bidder for an AML contract must be eligible under 30 CFR 773.15(b)(1) at the time of contract award to receive a permit or conditional permit to conduct surface coal mining operations. Further, the regulation requires the eligibility to be confirmed by OSMRE's automated AVS and the contractor must be eligible under the regulations implementing Section 510(c) of the Surface Mining Act to receive permits to conduct mining operations. The AML Contractor Information form provides a tool for OSM and the States/Indian tribes to help them prevent persons with outstanding violations from conducting further mining or AML reclamation activities in the State.

Bureau Form Number: None.

Frequency of Collection: Once per contract.

Description of Respondents: AML contract applicants and State and tribal AML authorities.

Total Annual Responses: 247 bidders and 93 State responses.

Total Annual Burden Hours: 205.

Dated: August 6, 2015.

Harry J. Payne,

Chief, Division of Regulatory Support.

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701–TA–468 and 731–TA–1166–1167 (Review)]

Certain Magnesia Carbon Bricks from China and Mexico; Correction to Notice of Institution of Five-Year Reviews

AGENCY: United States International Trade Commission.

ACTION: Notice.

SUMMARY: In a notice published in the **Federal Register** on August 3, 2015 (80 FR 46050), the Commission published a notice of institution of five-year reviews concerning the antidumping and countervailing duty orders on certain magnesia carbon bricks from China and Mexico with incorrect investigation numbers. The correct investigation numbers are as follows: Investigation Nos. 701–TA–468 and 731–TA–1166–1167 (Review).

DATES: *Effective Date:* August 3, 2015.

FOR FURTHER INFORMATION CONTACT: Mary Messer (202–205–3193), Office of Investigations, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its Internet server (*http://www.usitc.gov*). The public record for this proceeding may be viewed on the Commission's electronic docket (EDIS) at *http://edis.usitc.gov.*

Authority: This proceeding is being conducted under authority of Title VII of the Tariff Act of 1930; this notice is published pursuant to section 207.61 of the Commission's rules.

By order of the Commission.

Issued: August 11, 2015.

William R. Bishop,

Supervisory Hearings and Information Officer.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

[OMB Number 1110–0061]

Agency Information Collection Activities; Proposed eCollection eComments Requested; Approval of an Extension of a Currently Approved Collection; Request To Change III/NGI Base Identifier(s) (1–542)

AGENCY: Federal Bureau of Investigation, Department of Justice.

ACTION: 30-day notice.

SUMMARY: The Department of Justice (DOJ), Federal Bureau of Investigation (FBI), Criminal Justice Information Services (CJIS) Division, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection was previously published in the 80 FR 33290, on June 11, 2015, allowing for a 60-day comment period.

DATES: Comments are encouraged and will be accepted for an additional days until September 16, 2015:

If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Gerry Lynn Brovey, Supervisory Information Liaison Specialist, FBI, CJIS, Resources Management Section, Administrative Unit, Module C–2, 1000 Custer Hollow Road, Clarksburg, West Virginia 26306 (facsimile: 304–625–5093). Written comments and/or suggestions can also be directed to the Office of Management and Budget, Office of Information and Regulatory Affairs, Attention Department of Justice Desk Officer, Washington, DC 20503 or sent to *OIRA_submissions@omb.eop.gov.*

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Overview of This Information Collection

1. *Type of Information Collection:* Extension of a currently approved collection.

2. *The Title of the Form/Collection:* Request to Change III/NGI Base Identifier(s).

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* 1–542.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: City, county, state, federal and tribal law enforcement agencies. This collection is needed to report completion of an identity history summary. Acceptable data is stored as part of the Next Generation Identification (NGI) system of the FBI.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* It is estimated that approximately 114,000 agencies will complete each form within fifteen minutes.

6. *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 28,500 total annual burden hours associated with this collection.

If additional information is required contact: Jerri Murray, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE., 3E.405B, Washington, DC 20530.

Dated: August 11, 2015.

Jerri Murray,

Department Clearance Officer for PRA, U.S. Department of Justice.

[FR Doc. 2015–20128 Filed 8–14–15; 8:45 am]

BILLING CODE 4410–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Oil Pollution Act

On August 11, 2015, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Western District of Texas in the lawsuit entitled *United States and the State of Texas* v. *Koch Pipeline Company, L.P.,* Civil Action No. *SA–15–CV–676*.

In this action, the United States and the State of Texas, pursuant to Section 1002 of the Oil Pollution Act of 1990, seek natural resource damages, including past and future administrative and assessment costs, arising out of the unauthorized discharge of crude oil into Marcelinas Creek, a navigable water of the United States and the State of Texas, from Defendant's former crude oil receiving station in Karnes County, Texas, on October 18, 1998.

The proposed Consent Decree requires Defendant to pay the sum of $770,000, an amount which will: (1) Fund the restoration option selected by the federal and state trustees, (2) reimburse the trustees for their past assessment costs, and (3) provide for future administrative and assessment costs associated with implementation of the restoration plan. The United States and the State of Texas provide covenants not to sue Defendant pursuant to the Oil Pollution Act, 33 U.S.C. 2701 *et seq.,* and the Clean Water Act, 33 U.S.C. 1251 *et seq.,* for natural resource damages resulting from the spill.

The publication of this notice opens a period for public comment on the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States and the State of Texas* v. *Koch Pipeline Company, L.P.,* D.J. Ref. No. 90–5–1–1–10848. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by first class mail:

To submit comments:	*Send them to:*
By email	*pubcomment-ees.enrd@usdoj.gov.*
By first class mail.	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

During the public comment period, the Consent Decree may be examined

and downloaded at this Justice Department Web site: *http://www.justice.gov/enrd/consent-decrees*. We will provide a paper copy of the Consent Decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $5.00 (25 cents per page reproduction cost) payable to the United States Treasury.

Thomas P. Carroll,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

[FR Doc. 2015–20215 Filed 8–14–15; 8:45 am]

BILLING CODE 4410–15–P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Statutory Reconsideration of Petitions for Trade Adjustment Assistance

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: On June 29, 2015, President Obama signed into law the Trade Adjustment Assistance Reauthorization Act of 2015 (TAARA 2015), title IV of the Trade Preferences Extension Act of 2015, Public Law 114–27. In accordance with Section 405(a) of TAARA 2015, which amended the Trade Act of 1974, Public Law 93–618 (''the Trade Act''), the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration (OTAA) has taken the following action for petitions that were filed with the Secretary of Labor under section 221(a) of the Trade Act on or after January 1, 2014, and before June 29, 2015, and are identified in the Appendices to this notice.

OTAA has reopened investigations of petitions identified in Appendix A to reconsider all negative determinations on petitions filed on or after January 1, 2014, and before June 29, 2015, and will further investigate those petitions to determine whether the workers are eligible to apply for adjustment assistance under the provisions of section 222 of the Trade Act in effect on June 29, 2015, which were in effect before January 1, 2014. If eligible under these requirements, OTAA will certify the group of workers as eligible to apply for adjustment assistance under title II of the Trade Act, as amended by TAARA 2015.

OTAA also is continuing to investigate those petitions identified in Appendix B for which no determination was issued before June 29, 2015, to determine whether the workers are eligible to apply for adjustment assistance under the provisions of section 222 of the Trade Act in effect on June 29, 2015, which were in effect before January 1, 2014. If eligible under these requirements, OTAA will certify the group of workers as eligible to apply for adjustment assistance under title II of the Trade Act.

Further, worker groups that did not submit petitions between January 1, 2014 and June 29, 2015, but wish to be considered under the group eligibility for workers based on the 2015 Program may file a new petition within 90 days of enactment of the new 2015 law which was signed by President Barak Obama on June 29, 2015. This would include service sector workers as well as worker groups whose jobs are adversely affected by trade from countries that are not parties to Free Trade Agreements (FTAs) with the United States, including China and India. While all petitions filed on and after June 29, 2015, will be investigated under the 2015 Program worker group eligibility criteria, the TAARA 2015 provides that for petitions filed by MIDNIGHT (12:00 AM EASTERN TIME), SUNDAY, SEPTEMBER 27, 2015, that are certified, the certification will cover all members of the worker group who are separated or threatened with separations during the period beginning January 1, 2014, instead of a beginning date of no more than one year before the date of the petition, and generally ending two years after the date of certification. Each of those certifications will describe the worker group and specify the January 1, 2014, beginning date and the ending dates of the certification period.

APPENDIX A—LIST OF STATUTORY RECONSIDERATION OF NEGATIVE DETERMINATIONS UNDER REVERSION 2014

TA–W	Subject firm (petitioners)	Location	Date of petition filing
85001	Boehringer Ingelheim Chemicals, Inc. (BICI) (State/One-Stop)	Petersburg, VA	1/6/2014

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Cadmium in Construction Standard

ACTION: Notice.

SUMMARY: The Department of Labor (DOL) is submitting the Occupational Safety and Health Administration (OSHA) sponsored information collection request (ICR) titled, ''Cadmium in Construction Standard,'' to the Office of Management and Budget (OMB) for review and approval for continued use, without change, in accordance with the Paperwork Reduction Act of 1995 (PRA), 44 U.S.C. 3501 *et seq.* Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before September 16, 2015.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free of charge from the RegInfo.gov Web site at *http://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=20201505-1218-008* (this link will only become active on the day following publication of this notice) or by contacting Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Submit comments about this request by mail or courier to the Office of Information and Regulatory Affairs, Attn: OMB Desk Officer for DOL–OSHA, Office of Management and Budget, Room 10235, 725 17th Street NW., Washington, DC 20503; by Fax: 202–395–5806 (this is not a toll-free number); or by email: *OIRA_submission@omb.eop.gov.* Commenters are encouraged, but not required, to send a courtesy copy of any comments by mail or courier to the U.S. Department of Labor-OASAM, Office of the Chief Information Officer, Attn: Departmental Information Compliance Management Program, Room N1301, 200 Constitution Avenue NW., Washington, DC 20210; or by email: *DOL_PRA_PUBLIC@dol.gov.*

FOR FURTHER INFORMATION CONTACT: Contact Michel Smyth by telephone at 202–693–4129, TTY 202–693–8064, (these are not toll-free numbers) or by email at *DOL_PRA_PUBLIC@dol.gov.*

Authority: 44 U.S.C. 3507(a)(1)(D).

SUPPLEMENTARY INFORMATION: This ICR seeks to extend PRA authority for the Cadmium in Construction Standard information collection requirements codified in regulations 29 CFR 1926.1127. The major information collection requirements in the Standard include: Conducting worker exposure monitoring; notifying workers of their cadmium exposures; implementing a written compliance program; implementing medical surveillance of workers; providing examining physicians with specific information; ensuring workers receive a copy of their medical surveillance results; maintaining workers' exposure monitoring and medical surveillance records for specific periods; and providing access to these records by the worker who is the subject of the records, the worker's representative, and other designated parties. Occupational Safety and Health Act sections 2(b)(9), 6, and 8(c) authorize this information collection. *See* 29 U.S.C. 651(b)(9), 655, and 657(c).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless it is approved by the OMB under the PRA and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid Control Number. *See* 5 CFR 1320.5(a) and 1320.6. The DOL obtains OMB approval for this information collection under Control Number 1218–0186.

OMB authorization for an ICR cannot be for more than three (3) years without renewal, and the current approval for this collection is scheduled to expire on August 31, 2015. The DOL seeks to extend PRA authorization for this

information collection for three (3) more years, without any change to existing requirements. The DOL notes that existing information collection requirements submitted to the OMB receive a month-to-month extension while they undergo review. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on May 21, 2015 (80 FR 29346).

Interested parties are encouraged to send comments to the OMB, Office of Information and Regulatory Affairs at the address shown in the **ADDRESSES** section within thirty (30) days of publication of this notice in the **Federal Register**. In order to help ensure appropriate consideration, comments should mention OMB Control Number 1218–0186. The OMB is particularly interested in comments that:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Agency: DOL–OSHA.

Title of Collection: Cadmium in Construction Standard.

OMB Control Number: 1218–0186.

Affected Public: Private Sector—businesses or other for-profits.

Total Estimated Number of Respondents: 10,000.

Total Estimated Number of Responses: 258,249.

Total Estimated Annual Time Burden: 33,720 hours.

Total Estimated Annual Other Costs Burden: $2,082,199.

Dated: August 11, 2015.

Michel Smyth,

Departmental Clearance Officer.

BILLING CODE 4510–26–P

DEPARTMENT OF LABOR

Office of Workers' Compensation Programs

Proposed Extension of Existing Collection; Comment Request

ACTION: Notice.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA95) [44 U.S.C. 3506(c)(2)(A)]. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Office of Workers' Compensation Programs is soliciting comments concerning the proposed collection: Claim for Medical Reimbursement (OWCP–915). A copy of the proposed information collection request can be obtained by contacting the office listed below in the addresses section of this Notice.

DATES: Written comments must be submitted to the office listed in the addresses section below on or before October 16, 2015.

ADDRESSES: Ms. Yoon Ferguson, U.S. Department of Labor, 200 Constitution Ave. NW., Room S–3323, Washington, DC 20210, telephone/FAX (202) 354–9647, Email *ferguson.yoon@dol.gov.* Please use only one method of transmission for comments (mail or Email).

SUPPLEMENTARY INFORMATION:

I. Background

The Office of Workers' Compensation Programs (OWCP) is the agency responsible for administration of the Federal Employees' Compensation Act (FECA), 5 U.S.C. 8101 *et seq.,* the Black Lung Benefits Act (BLBA), 30 U.S.C. 901 *et seq.,* and the Energy Employees Occupational Illness Compensation Program Act of 2000 (EEOICPA), 42 U.S.C. 7384 *et seq.* All three statutes require OWCP to pay for covered medical treatment that is provided to beneficiaries, and also to reimburse beneficiaries for any out-of-pocket covered medical expenses they have paid. Form OWCP–915, Claim for Medical Reimbursement, is used for this purpose and collects the necessary beneficiary and medical provider data in a standard format. Regulations implementing the FECA, BLBA and EEOICPA programs require the collection of information that is needed to determine if reimbursement claims submitted by beneficiaries can be paid. (20 CFR 10.802, 30.702, 725.701 and 725.705). This information collection is currently approved for use through January 31, 2016.

II. Review Focus

The Department of Labor is particularly interested in comments which:

* Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

* evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

* enhance the quality, utility and clarity of the information to be collected; and

* minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

III. Current Actions

The Department of Labor seeks the approval of the extension of this currently approved information collection in order to carry out its responsibility to provide payment for certain covered medical services to injured employees who are covered under the Acts.

Type of Review: Extension.

Agency: Office of Workers' Compensation Programs.

Title: Claim for Medical Reimbursement.

OMB Number: 1240–0007.

Agency Number: OWCP–915.

Affected Public: Individual or Households; Business or other-for-profit; Not-for-profit institutions.

Total Respondents: 10,632.

Total Responses: 38,480.

Time per Response: 10 minutes.

Estimated Total Burden Hours: 6,388.

Total Burden Cost (capital/startup): $0.

Total Burden Cost (operating/maintenance): $68,879.

Comments submitted in response to this notice will be summarized and/or

included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

Dated: August 11, 2015.

Yoon Ferguson,

Agency Clearance Officer, Office of Workers' Compensation Programs, U.S. Department of Labor.

BILLING CODE 4510–CR–P

NUCLEAR REGULATORY COMMISSION

Advisory Committee on Reactor Safeguards (ACRS); Meeting of the ACRS Subcommittee on Radiation Protection and Nuclear Materials; Notice of Meeting

The ACRS Subcommittee on Radiation Protection and Nuclear Materials will hold a meeting on August 19, 2015, Room T–2B1, 11545 Rockville Pike, Rockville, Maryland 20852.

The meeting will be open to public attendance with the exception of portions that may be closed to protect information that is propriety pursuant to 5 U.S.C. 552b(c)(4). The agenda for the subject meeting shall be as follows:

Wednesday, August 19, 2015—8:30 a.m. Until 5:00 p.m.

The Subcommittee will review and discuss the SHINE Medical Technologies (SHINE) construction permit application for Mo99 medical radioisotope production facility under 10 CFR part 50 and the staff's Safety Evaluation Report, Chapters 1, 2, 4, 5, 6a, 7, 8. The Subcommittee will hear presentations by and hold discussions with SHINE, the NRC staff and other interested persons regarding this matter. The Subcommittee will gather information, analyze relevant issues and facts, and formulate proposed positions and actions, as appropriate, for deliberation by the Full Committee.

Members of the public desiring to provide oral statements and/or written comments should notify the Designated Federal Official (DFO), Maitri Banerjee (Telephone: 301–415–6973 or Email: *Maitri.Banerjee@nrc.gov*) five days prior to the meeting, if possible, so that appropriate arrangements can be made. Thirty-five hard copies of each presentation or handout should be provided to the DFO thirty minutes before the meeting. In addition, one electronic copy of each presentation should be Emailed to the DFO one day before the meeting. If an electronic copy cannot be provided within this timeframe, presenters should provide the DFO with a CD containing each presentation at least thirty minutes before the meeting. Electronic recordings will be permitted only during those portions of the meeting that are open to the public. Detailed procedures for the conduct of and participation in ACRS meetings were published in the **Federal Register** on October 1, 2014 (79 FR 59307–59308).

Detailed meeting agendas and meeting transcripts are available on the NRC Web site at *http://www.nrc.gov/reading-rm/doc-collections/acrs.* Information regarding topics to be discussed, changes to the agenda, whether the meeting has been canceled or rescheduled, and the time allotted to present oral statements can be obtained from the Web site cited above or by contacting the identified DFO. Moreover, in view of the possibility that the schedule for ACRS meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with these references if such rescheduling would result in a major inconvenience.

If attending this meeting, please enter through the One White Flint North Building, 11555 Rockville Pike, Rockville, Maryland 20152. After registering with Security, please contact Mr. Theron Brown (Telephone: 240–888–9835) to be escorted to the meeting room.

Dated: August 6, 2015.

Mark L. Banks,

Chief, Technical Support Branch, Advisory Committee on Reactor Safeguards.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–75662; File No. SR–NYSEARCA–2015–67]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Holdings By the iShares Interest Rate Hedged Corporate Bond ETF and iShares Interest Rate Hedged High Yield Bond ETF

August 11, 2015.

Pursuant to section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on August 3, 2015, NYSE Arca, Inc. (the ''Exchange'' or ''NYSE Arca'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to reflect a change to the holdings to be implemented by the iShares Interest Rate Hedged Corporate Bond ETF and iShares Interest Rate Hedged High Yield Bond ETF relating to the use of interest rate futures contracts, and interest rate swaps. The text of the proposed rule change is available on the Exchange's Web site at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Commission has approved a proposal to list and trade on the Exchange shares (''Shares'') of the iShares Interest Rate Hedged Corporate Bond ETF and iShares Interest Rate Hedged High Yield Bond ETF (each a ''Fund'' and, together, the ''Funds'') under NYSE Arca Equities Rule 8.600,[4] which governs the listing and trading of Managed Fund Shares.[5]

The Shares of the Funds are offered by iShares U.S. ETF Trust (the ''Trust'').[6] The Trust is registered with the Commission as an open-end management investment company. BlackRock Fund Advisors (''BFA'') serves as the investment adviser to the Funds (the ''Adviser''). BFA is an indirect wholly-owned subsidiary of BlackRock, Inc. BlackRock Investments, LLC is the principal underwriter and distributor of the Funds' Shares. State Street Bank and Trust Company serves as administrator, custodian and transfer agent for the Funds. The Funds' Shares are currently listed and traded on the Exchange under NYSE Arca Equities Rule 8.600.

The Exchange proposes to revise the representations made in the Prior Release regarding the Funds' investments to accommodate use of interest rate futures contracts [7] and interest rate swaps by the Funds, as described below, consistent with the use of such financial instruments permitted for other funds of the Trust previously approved by the Commission for Exchange listing and trading.[8]

iShares Interest Rate Hedged Corporate Bond ETF

As described in the Prior Release, according to the Corporate Bond Registration Statement, the Fund seeks to mitigate the interest rate risk of a portfolio composed of U.S. dollar-denominated, investment grade corporate bonds. The Fund seeks to achieve its investment objective by investing, under normal circumstances, at least 80% of its net assets in U.S. dollar-denominated investment grade bonds, in one or more investment companies (exchange-traded and non-exchange-traded funds) that principally invest in investment-grade bonds, in U.S. Treasury securities (or cash equivalents), and by taking short positions in U.S. Treasury futures and other interest rate futures contracts.

The Exchange proposes to amend this statement to provide that, going forward, the Fund will seek to achieve its investment objective by investing, under normal circumstances, at least 80% of its net assets in U.S. dollar-denominated investment grade bonds, in one or more investment companies (exchange-traded and non-exchange-traded funds) that principally invest in investment-grade bonds, in U.S. Treasury securities (or cash

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* Securities Exchange Act Release Nos. 71778 (March 24, 2014), 79 FR 17585 (March 28, 2014 (SR–NYSEArca–2014–23) (Notice of Filing of Proposed Rule Change to List and Trade Shares of the iShares Interest Rate Hedged Corporate Bond ETF and iShares Interest Rate Hedged High Yield Bond ETF under NYSE Arca Equities Rule 8.600) (''Prior Notice''); 72138 (May 9, 2014), 79 FR 27958 (May 15, 2014) (SR–NYSEArca–2014–23) (order approving listing and trading on the Exchange of Shares of the iShares Interest Rate Hedged Corporate Bond ETF and iShares Interest Rate Hedged High Yield Bond ETF under NYSE Arca Equities Rule 8.600) (''Prior Order'' and, together with the Prior Notice, the ''Prior Release'').

[5] A Managed Fund Share is a security that represents an interest in an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a–1) (''1940 Act'') organized as an open-end investment company or similar entity that invests in a portfolio of securities selected by its investment adviser consistent with its investment objectives and policies. In contrast, an open-end investment company that issues Investment Company Units, listed and traded on the Exchange under NYSE Arca Equities Rule 5.2(j)(3), seeks to provide investment results that correspond generally to the price and yield performance of a specific foreign or domestic stock index, fixed income securities index or combination thereof.

[6] The Trust is registered under the 1940 Act. On August 22, 2013, the Trust filed with the Commission post-effective amendments on Form N–1A under the Securities Act of 1933 (15 U.S.C. 77a) and under the 1940 Act relating to the iShares Interest Rate Hedged Corporate Bond ETF (the ''Corporate Bond Registration Statement'') and the iShares Interest Rate Hedged High Yield Bond ETF (the ''High Yield Registration Statement'' and together with the Corporate Bond Registration Statement, the ''Registration Statements'') (File Nos. 333–179904 and 811–22649). In addition, the Commission has issued an order granting certain exemptive relief to the Trust under the 1940 Act. *See* Investment Company Act Release No. 29571 (File No. 812–13601) (''Exemptive Order'').

[7] As described in the Prior Release, both Funds may use U.S. Treasury futures contracts to mitigate interest rate risk. In this proposed rule change, the Exchange proposes, among other things, to accommodate use by the Funds of other interest rate futures to mitigate interest rate risk.

[8] *See* Securities Exchange Act Release No. 74058 (January 15, 2015), 80 FR 3294 (January 22, 2015) (SR–NYSEArca–2014–114), (order approving listing and trading on the Exchange of shares of the iShares Interest Rate Hedged 0–5 Year High Yield Bond ETF, iShares Interest Rate Hedged 10+ Year Credit Bond ETF, and the iShares Interest Rate Hedged Emerging Markets Bond ETF under NYSE Arca Equities Rule 8.600).

equivalents), and by taking short positions in U.S. Treasury futures, other interest rate futures contracts, and interest rate swaps.[9]

The Prior Release also stated that, according to the Corporate Bond Registration Statement, the Fund initially intends to invest a substantial portion of its assets in the iShares iBoxx $ Investment Grade Corporate Bond ETF (the ''Underlying Corporate Bond Fund''). The Fund attempts to mitigate interest rate risk primarily through the use of U.S. Treasury futures contracts.

The Exchange proposes to amend the statement in the last sentence of the preceding paragraph to state that, going forward, the Fund will attempt to mitigate interest rate risk primarily through the use of U.S. Treasury futures contracts, interest rate futures, and interest rate swaps.

The Prior Release stated that BFA will utilize a model-based proprietary investment process to assemble an investment portfolio comprised of (i) long positions in the Underlying Corporate Bond Fund, (ii) long positions in U.S. dollar-denominated investment-grade corporate bonds, (iii) long positions in U.S. Treasury securities and (iv) short positions in U.S. Treasury futures and other interest rate futures contracts.

The Exchange proposes to amend the statement in item (iv) of the preceding paragraph to provide that, going forward, the investment portfolio referred to in the preceding paragraph may be comprised of short positions in U.S. Treasury futures, other interest rate futures contracts, and interest rate swaps.

iShares Interest Rate Hedged High Yield Bond ETF

According to the High Yield Registration Statement, the Fund seeks to mitigate the interest rate risk of a portfolio composed of U.S. dollar-denominated, high yield corporate bonds. The Fund seeks to achieve its investment objective by investing, under normal circumstances, at least 80% of its net assets in U.S. dollar-denominated high yield corporate bonds, in one or more investment companies (exchange-traded and non-exchange-traded funds) that principally invest in high yield bonds, in U.S. Treasury securities (or cash equivalents), and by taking short positions in U.S. Treasury futures and other interest rate futures contracts.

The Exchange proposes to amend this statement to provide that, going forward, the Fund will seek to achieve its investment objective by investing, under normal circumstances, at least 80% of its net assets in U.S. dollar-denominated high yield corporate bonds, in one or more investment companies (exchange-traded and non-exchange-traded funds) that principally invest in high yield bonds, in U.S. Treasury securities (or cash equivalents), and by taking short positions in U.S. Treasury futures, other interest rate futures contracts, and interest rate swaps.[10]

The Prior Release also stated that, according to the High Yield Registration Statement, the Fund initially intends to invest a substantial portion of its assets in the iShares iBoxx $ High Yield Corporate Bond ETF. The Fund will attempt to mitigate interest rate risk primarily through the use of U.S. Treasury futures contracts.

The Exchange proposes to amend the last sentence of the preceding paragraph to provide that, going forward, the Fund will attempt to mitigate interest rate risk primarily through the use of U.S. Treasury futures contracts, other interest rate futures contracts, and interest rate swaps.

The Prior Release stated that BFA will utilize a model-based proprietary investment process to assemble an investment portfolio comprised of (i) long positions in the Underlying High Yield Bond Fund, (ii) long positions in U.S. dollar-denominated high yield corporate bonds, (iii) long positions in U.S. Treasury securities and (iv) short positions in U.S. Treasury futures and other interest rate futures contracts.

The Exchange proposes to amend the statement in item (iv) of the preceding paragraph to provide that, going forward, the investment portfolio referred to in the preceding paragraph may be comprised of short positions in U.S. Treasury futures, other interest rate futures contracts, and interest rate swaps.

The section ''Determination of Net Asset Value'' in the Prior Release did not include reference to swaps. The Exchange proposes to state that swaps and other derivatives will generally be valued based upon quotations from market makers or by a pricing service in accordance with valuation procedures approved by Trust's Board of Directors.

On a daily basis, each of the Funds will disclose for each portfolio security or other financial instrument the following information on the Funds' Web site: Ticker symbol, if any; CUSIP number or other identifier, if any; a description of the holding (including the type of holding, such as the type of swap); the identity of the security or other asset or instrument underlying the holding, if any; for options, the option strike price; quantity held (as measured by, for example, par value, notional value or number of shares, contracts or units); maturity date, if any; coupon rate, if any; market value of the holding; and the percentage weighting of the holding in the portfolio. The Web site information will be publicly available at no charge.

The Adviser represents that the proposed changes relating to the Funds' holdings in interest rate swaps, as described above, are consistent with the Fund's investment objective, and will further assist the Adviser to achieve such investment objective. In addition, such proposed changes are consistent with the use of swaps permitted for shares of other funds of the Trust previously approved by the Commission for Exchange listing and trading.[11]

Except for the changes noted above, all other representations made in the Prior Release remain unchanged. The Funds will continue to comply with all initial and continued listing requirements under NYSE Arca Equities Rule 8.600.

2. Statutory Basis

The basis under the Act for this proposed rule change is the requirement under section 6(b)(5)[12] that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

The Exchange believes that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices in that the Shares will be listed and traded on the Exchange pursuant to the initial and continued listing criteria in NYSE Arca Equities Rule 8.600. The Funds will invest only in futures contracts that are traded on an exchange that is a member of the ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement. Swaps will be centrally cleared. All derivatives held by the Funds will be collateralized.

The proposed rule change is designed to promote just and equitable principles

[9] The Funds will invest only in futures contracts that are traded on an exchange that is a member of the Intermarket Surveillance Group (''ISG'') or with which the Exchange has in place a comprehensive surveillance sharing agreement. Swaps will be centrally cleared. All derivatives held by the Funds will be collateralized.

[10] *See* note 9, *supra.*

[11] *See* note 8, *supra.*

[12] 15 U.S.C. 78f(b)(5).

of trade and to protect investors and the public interest. The Adviser represents that the proposed changes relating to the Funds' holdings in U.S. Treasury futures, other interest rate futures contracts, and interest rate swaps, as described above, are consistent with each Fund's investment objective, and will further assist the Adviser to achieve each such investment objective. In addition, such proposed changes are consistent with the use of U.S. Treasury futures, other interest rate futures contracts, and interest rate swaps permitted for shares of other funds of the Trust previously approved by the Commission for Exchange listing and trading.[13]

The proposed rule change is designed to perfect the mechanism of a free and open market and, in general, to protect investors and the public interest. The Adviser represents that the proposed changes relating to the Funds' holdings in U.S. Treasury futures, other interest rate futures contracts, and interest rate swaps, as described above, are consistent with each Fund's investment objective, and will further assist the Adviser to achieve each such investment objective. In addition, such proposed changes are consistent with the use of U.S. Treasury futures, other interest rate futures contracts, and interest rate swaps permitted for shares of other funds of the Trust previously approved by the Commission for Exchange listing and trading.[14] Such changes would enhance the ability of the Funds to mitigate interest rate risk. The Funds will invest only in futures contracts that are traded on an exchange that is a member of the ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement. Swaps will be centrally cleared. All derivatives held by the Funds will be collateralized. The Adviser represents that the investment objective of each Fund has not changed. Except for the changes noted above, all other representations made in the Prior Release remain unchanged. The Funds will continue to comply with all initial and continued listing requirements under NYSE Arca Equities Rule 8.600.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Act. The Exchange believes the proposed rule change, in permitting each Fund to utilize other interest rate futures and interest rate swaps as part of its portfolio to achieve its investment objective, will enhance competition among issues of Managed Fund Shares that invest principally in fixed income securities.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to section 19(b)(3)(A)(iii) of the Act[15] and Rule 19b–4(f)(6) thereunder.[16] Because the proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to section 19(b)(3)(A) of the Act and Rule 19b–4(f)(6)(iii) thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2015–67 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2015–67. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2015–67 and should be submitted on or before September 8, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[17]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 31745; 812–14495]

Victory NextShares Trust, et al.; Notice of Application

August 11, 2015.

AGENCY: Securities and Exchange Commission (''Commission'').

ACTION: Notice of an application for an order under section 6(c) of the Investment Company Act of 1940 (''Act'') for an exemption from sections

2(a)(32), 5(a)(1), 22(d) and 22(e) of the Act and rule 22c–1 under the Act, under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and (a)(2) of the Act, and under section 12(d)(1)(J) of the Act for an exemption from sections 12(d)(1)(A) and (B) of the Act.

APPLICANTS: Victory NextShares Trust (the ''Trust''), Victory Capital Management Inc. (the ''Adviser'') and Victory Capital Advisers, Inc. (the ''Distributor'').

SUMMARY: *Summary of Application:* Applicants request an order (''Order'') that permits: (a) Actively managed series of certain open-end management investment companies to issue shares (''Shares'') redeemable in large aggregations only (''Creation Units''); (b) secondary market transactions in Shares to occur at the next-determined net asset value plus or minus a market-determined premium or discount that may vary during the trading day; (c) certain series to pay redemption proceeds, under certain circumstances, more than seven days from the tender of Shares for redemption; (d) certain affiliated persons of the series to deposit securities into, and receive securities from, the series in connection with the purchase and redemption of Creation Units; (e) certain registered management investment companies and unit investment trusts outside of the same group of investment companies as the series to acquire Shares; and (f) certain series to create and redeem Shares in kind in a master-feeder structure. The Order would incorporate by reference terms and conditions of a previous order granting the same relief sought by applicants, as that order may be amended from time to time (''Reference Order'').[1]

DATES: *Filing Date:* The application was filed on June 25, 2015.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on September 8, 2015, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: The Commission: Brent J. Fields, Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090. Applicants: Victory NextShares Trust, Victory Capital Management Inc., and Victory Capital Advisers, Inc., 4900 Tiedeman Rd., Brooklyn, OH 44144.

FOR FURTHER INFORMATION CONTACT: Diane L. Titus, Paralegal Specialist, or Dalia Osman Blass, Assistant Chief Counsel, at (202) 551–6821 (Division of Investment Management, Chief Counsel's Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or for an applicant using the Company name box, at *http://www.sec.gov/search/search.htm* or by calling (202) 551–8090.

Applicants

1. The Trust will be registered as an open-end management investment company under the Act and is a statutory business trust organized under the laws of Delaware. Applicants seek relief with respect to nine Funds (as defined below, and those Funds, the ''Initial Funds''). The portfolio positions of each Fund will consist of securities and other assets selected and managed by its Adviser or Subadviser (as defined below) to pursue the Fund's investment objective.

2. The Adviser, a New York corporation, will be the investment adviser to the Initial Funds. An Adviser (as defined below) will serve as investment adviser to each Fund. The Adviser is, and any other Adviser will be, registered as an investment adviser under the Investment Advisers Act of 1940 (''Advisers Act''). The Adviser and the Trust may retain one or more subadvisers (each a ''Subadviser'') to manage the portfolios of the Funds. Any Subadviser will be registered, or not subject to registration, under the Advisers Act.

3. The Distributor is a Delaware corporation and a broker-dealer registered under the Securities Exchange Act of 1934 and will act as the principal underwriter of Shares of the Funds. Applicants request that the requested relief apply to any distributor of Shares, whether affiliated or unaffiliated with the Adviser (included in the term ''Distributor''). Any Distributor will comply with the terms and conditions of the Order.

Applicants' Requested Exemptive Relief

4. Applicants seek the requested Order under section 6(c) of the Act for an exemption from sections 2(a)(32), 5(a)(1), 22(d) and 22(e) of the Act and rule 22c-1 under the Act, under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and 17(a)(2) of the Act, and under section 12(d)(1)(J) of the Act for an exemption from sections 12(d)(1)(A) and (B) of the Act. The requested Order would permit applicants to offer exchange-traded managed funds. Because the relief requested is the same as the relief granted by the Commission under the Reference Order and because the Adviser has entered into, or anticipates entering into, a licensing agreement with Eaton Vance Management, or an affiliate thereof in order to offer exchange-traded managed funds,[2] the Order would incorporate by reference the terms and conditions of the Reference Order.

5. Applicants request that the Order apply to the Initial Funds and to any other existing or future open-end management investment company or series thereof that: (a) Is advised by the Adviser or any entity controlling, controlled by, or under common control with the Adviser (any such entity included in the term ''Adviser''); and (b) operates as an exchange-traded managed fund as described in the Reference Order; and (c) complies with the terms and conditions of the Order and of the Reference Order, which is incorporated by reference herein (each such company or series and Initial Fund, a ''Fund'').[3]

6. Section 6(c) of the Act provides that the Commission may exempt any person, security or transaction, or any class of persons, securities or transactions, from any provisions of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Section 17(b) of the Act authorizes the Commission to exempt a proposed transaction from section 17(a) of the Act if evidence establishes that the terms of the

[1] Eaton Vance Management, *et al.,* Investment Company Act Rel. Nos. 31333 (Nov. 6, 2014) (notice) and 31361 (Dec. 2, 2014) (order).

[2] Eaton Vance Management has obtained patents with respect to certain aspects of the Funds' method of operation as exchange-traded managed funds.

[3] All entities that currently intend to rely on the Order are named as applicants. Any other entity that relies on the Order in the future will comply with the terms and conditions of the Order and of the Reference Order, which is incorporated by reference herein.

transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching on the part of any person concerned, and the proposed transaction is consistent with the policies of the registered investment company and the general purposes of the Act. Section 12(d)(1)(J) of the Act provides that the Commission may exempt any person, security, or transaction, or any class or classes of persons, securities or transactions, from any provision of section 12(d)(1) if the exemption is consistent with the public interest and the protection of investors.

7. Applicants submit that for the reasons stated in the Reference Order: (1) With respect to the relief requested pursuant to section 6(c) of the Act, the relief is appropriate, in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act; (2) with respect to the relief request pursuant to section 17(b) of the Act, the proposed transactions are reasonable and fair and do not involve overreaching on the part of any person concerned, are consistent with the policies of each registered investment company concerned and consistent with the general purposes of the Act; and (3) with respect to the relief requested pursuant to section 12(d)(1)(J) of the Act, the relief is consistent with the public interest and the protection of investors.

By the Division of Investment Management, pursuant to delegated authority.

Robert W. Errett

Deputy Secretary.

[FR Doc. 2015–20160 Filed 8–14–15; 8:45 am]

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–75659; File No. SR–NYSE–2015–27]

Self-Regulatory Organizations; New York Stock Exchange LLC; Designation of a Longer Period for Commission Action on a Proposed Rule Change Amending the Eighth Amended and Restated Operating Agreement of the Exchange To Establish a Regulatory Oversight Committee as a Committee of the Board of Directors of the Exchange and Make Certain Conforming Amendments to Exchange Rules

August 11, 2015.

On June 12, 2015, New York Stock Exchange LLC (''NYSE'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission''), pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] a proposed rule change to amend the Eighth Amended and Restated Operating Agreement of the Exchange to establish a Regulatory Oversight Committee as a Committee of the Board of Directors of the Exchange and make certain conforming amendments to Exchange Rules. The proposed rule change was published for comment in the **Federal Register** on June 30, 2015.[4] The Commission has received no comment letters on the proposed rule change.

Section 19(b)(2) of the Act [5] provides that, within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The Commission is extending this 45-day time period. The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change.

Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,[6] designates September 28, 2015, as the date by which the Commission shall either approve or disapprove or institute proceedings to determine whether to disapprove the proposed rule change (File Number SR–NYSE–2015–27).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[7]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[SEC File No. 270–101, OMB Control No. 3235–0082]

Proposed Collection; Comment Request

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE., Washington, DC 20549–2736.

Extension: Form 11–K.

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') is soliciting comments on the collection of information summarized below. The Commission plans to submit this existing collection of information to the Office of Management Budget for extension and approval.

Form 11–K (17 CFR 249.311) is the annual report designed for use by employee stock purchase, savings and similar plans to comply with the reporting requirements under Section 15(d) of the Securities and Exchange Act of 1934 (the ''Exchange Act'') (15 U.S.C. 78o(d)). Section 15(d) establishes a periodic reporting obligation for every issuer of a class of securities registered under the Securities Act of 1933 (the ''Securities Act'') (15 U.S.C. 77a *et seq.*). Form 11–K provides employees of an issuer with financial information so that they can assess the performance of the investment vehicle or stock plan. Form 11–K takes approximately 30 burden hours per response and is filed by 1,761 respondents for total of 52,830 burden hours.

Written comments are invited on: (a) Whether this proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden imposed by the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collections of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted in writing within 60 days of this publication.

Please direct your written comments to Pamela Dyson, Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon,

100 F Street NE., Washington, DC 20549; or send an email to: *PRA_Mailbox@sec.gov.*

August 11, 2015.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–75661; File No. SR–NASDAQ–2015–094]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Modify NASDAQ Rule 7051 Fees Relating to Pricing for Direct Circuit Connections

August 11, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 5, 2015, The NASDAQ Stock Market LLC (''NASDAQ'' or the ''Exchange'') filed with the Securities and Exchange Commission (''Commission'') a proposed rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

NASDAQ is proposing to amend Rule 7051 to extend the waiver of installation fees assessed for Direct Circuit Connection to NASDAQ, and to waive ongoing monthly fees for direct connectivity to the Chicago, IL data center, for a limited time.

The text of the proposed rule change is available at *http://nasdaq.cchwallstreet.com,* at NASDAQ's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NASDAQ included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

NASDAQ is proposing to amend Rule 7051 entitled ''Direct Connectivity to Nasdaq'' to extend the waiver of installation fees for Direct Circuit Connection to Nasdaq (10Gb), Direct Circuit Connection to Nasdaq (supports up to 1Gb), and Direct Circuit Connection to Nasdaq (1Gb Ultra). The Exchange is also proposing to waive the related ongoing monthly fees assessed for these direct connectivity options to the Exchange's new Chicago, IL data center.[3] The Direct Circuit Connection options under Rule 7051 provide market participants with three optional means by which they may connect to NASDAQ.[4] The three Direct Circuit Connections are differentiated by the total capacity of the fiber connection (represented in Gigabytes or ''Gb'') and the type of switch used. A switch is a type of network hardware that acts as the ''gatekeeper'' for all clients' orders sent to the System[5] and orders them in sequence for entry into the System for execution. The 1Gb ''Ultra'' fiber connection offering uses lower latency[6] switches than the 1Gb fiber connection offering.[7]

The Exchange assesses separate installation and ongoing monthly fees for subscription to each option. For 1Gb connectivity, the Exchange assesses an installation fee of $1,500 and ongoing monthly fees of $2,500. For 10Gb connectivity, the Exchange charges an installation fee of $1,500 and ongoing monthly fees of $7,500. For 1Gb Ultra, the Exchange charges an installation fee of $1,500 and ongoing monthly fees of $2,500.

NASDAQ is relocating its Disaster Recovery (''DR'') location for the U.S. equities and options markets from Ashburn, VA to its new Chicago, IL data center beginning in August 2015 with completion of the move expected on November 9, 2015. NASDAQ has invested and installed new equipment in this data center for client connectivity and for the infrastructure of Exchange systems. NASDAQ has chosen Chicago as the location of its new DR data center as many other exchanges are using this same location for a DR or primary location and, as a result, many of our market participants have a presence or connection at this location, thus making it easier and less expensive for many market participants to connect to NASDAQ's DR location. In anticipation of the move and to facilitate transfer of connectivity from Ashburn, VA to Chicago, IL, the Exchange waived the installation fees for the months of April through July, 2015, for all three connectivity options so that both new subscriptions and customers transferring from one connectivity option to another during that time would not be assessed the installation fee.[8] The Exchange notes that the waiver allows members to move from one offering to another, or to move the location of their connectivity from one direct connectivity access point to another, with no penalty in the form of an installation fee. The Exchange is proposing to extend the waiver through November 9, 2015. To further facilitate use of the upgraded facility, the Exchange is also proposing to waive ongoing monthly fees for all three Direct Circuit Connectivity options for connectivity to the Chicago, IL data center. Waiver of the ongoing monthly fees will provide incentive to market participants to move their DR connectivity to Chicago, IL and test this connectivity prior to completion of the transfer of the DR functionality, and will also allow market participants that wish to connect to the Chicago, IL data center to do so smoothly with no penalty in the form of overlapping monthly direct connectivity fees.

2. Statutory Basis

NASDAQ believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,[9] in general, and with Sections 6(b)(4) and 6(b)(5) of the Act,[10] in particular, in that it provides for the equitable allocation

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] Direct connectivity is offered through data centers in Carteret, NJ, Secaucus, NJ, Ashburn, VA, and Chicago, IL.

[4] The Exchange notes that there are several additional means by which market participants may connect to the Exchange, such as through the colocation facility or third parties.

[5] As defined in Rule 4701(a).

[6] The term ''latency'' for the purposes of this rule filing means a measure of the time it takes for an order to enter into a switch and then exit for entry into the System.

[7] Each of NASDAQ's connection offerings use different switches, but the switches are of uniform type within each offering (*i.e.,* all 1G connectivity options currently use the same switches). As a consequence, all client subscribers to a particular connectivity option receive the same latency in terms of the capabilities of their switches.

[8] *See* Securities Exchange Act Release No. 74680 (April 8, 2015), 80 FR 20035 (April 14, 2015) (SR–NASDAQ–2015–029).

[9] 15 U.S.C. 78f.

[10] 15 U.S.C. 78f(b)(4) and (5).

of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system which NASDAQ operates or controls and is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and are not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that extending the waiver of Direct Circuit Connectivity installation fees is reasonable because it will continue to enable market participants to move from one direct connectivity offering to another, or to move the location of their connectivity from one direct connectivity access point to another, with no penalty in the form of an installation fee. Similarly, the Exchange believes that the time-limited waiver of ongoing monthly fees for connectivity to the Chicago, IL data center is reasonable because the Exchange is moving its DR location from Ashburn, VA to Chicago, IL, which is expected to be completed on November 9, 2015. As such, to continue DR connectivity, market participants must subscribe to new Direct Circuit Connectivity to the Chicago, IL data center and test such connectivity prior to cancellation of their existing Ashburn, VA direct connectivity subscription. The Exchange believes that the proposed fee waivers are equitable and do not unfairly discriminate because they are of limited duration and designed to apply to market participants that wish to utilize the new direct connectivity location and/or are affected by the Exchange's determination to move trading and DR functionality from the Ashburn, VA data center. Moreover, the Exchange notes that the installation fee waiver applies to all three Direct Circuit Connectivity options, and therefore it believes that extension of the waiver is equitable and does not unfairly discriminate. Waiver of the installation fee will allow any market participant that wishes to move from their [sic] existing Direct Circuit Connectivity data center to the new Chicago, IL data center with no penalty. Waiver of the ongoing monthly fees for connectivity to Chicago, IL enables market participants to test the DR functionality in Chicago while still being connected to the Ashburn, VA location with no penalty in the form of overlapping monthly direct connectivity fees.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.[11] The Exchange believes that the proposed fee waivers are pro-competitive because they facilitate use of a new, upgraded data center, which will improve market resiliency and provide additional connectivity options to market participants. To the extent that the new data center makes NASDAQ more attractive to market participants over other exchanges and trading venues, it may provide incentive to such marketplaces to improve and add to their data centers, to the benefit of all market participants.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing change has become effective pursuant to Section 19(b)(3)(A) of the Act[12] and paragraph (f) of Rule 19b–4[13] thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–NASDAQ–2015–094 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2015–094. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2015–094, and should be submitted on or before September 8, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[14]

Brent J. Fields,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–75664; File No. SR–BATS–2015–56]

Self-Regulatory Organizations; BATS Exchange, Inc.; Notice of Filing of a Proposal To List and Trade Shares of the ProShares Managed Futures Strategy ETF of the ProShares Trust Under BATS Rule 14.11 on BATS Exchange, Inc.

August 11, 2015.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on July 30, 2015, BATS Exchange, Inc. (the ''Exchange'' or ''BATS'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is proposing to list and trade shares of the ProShares Managed Futures Strategy ETF (the ''Fund'') of the ProShares Trust (the ''Trust'') under BATS Rule 14.11(i) (''Managed Fund Shares''). The shares of the Fund are referred to herein as the ''Shares.''

The text of the proposed rule change is available at the Exchange's Web site at *www.batstrading.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to list and trade the Shares under BATS Rule 14.11(i), which governs the listing and trading of Managed Fund Shares on the Exchange.[4] The Fund will be an actively managed fund that seeks to provide positive returns that are not directly correlated to broad equity or fixed income markets.

The Shares will be offered by the Trust, which was established as a Delaware statutory trust on May 29, 2002. The Trust is registered with the Commission as an open-end investment company and has filed a registration statement on behalf of the Fund on Form N–1A (''Registration Statement'') with the Commission.[5] The Commodity Futures Trading Commission (''CFTC'') has recently adopted substantial amendments to CFTC Rule 4.5 relating to the permissible exemptions and conditions for reliance on exemptions from registration as a commodity pool operator. As a result of the instruments that will be held by the Fund, the Adviser has registered as a Commodity Pool Operator (''CPO'') and is also a member of the National Futures Association (''NFA''). The Fund and ProShares Cayman Trust I, a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands (the ''Subsidiary'' as further described herein) will be subject to regulation by the CFTC and NFA and additional disclosure, reporting and recordkeeping rules imposed upon commodity pools.

Description of the Shares and the Fund

ProShare Advisors LLC is the investment adviser (''PSA'' or ''Adviser'') to the Fund. JPMorgan Chase Bank, National Association is the administrator, custodian, fund account agent, index receipt agent and transfer agent for the Trust. SEI Investments Distribution Co. (''Distributor'') serves as the distributor for the Trust.

[4] The Commission approved BATS Rule 14.11(i) in Securities Exchange Act Release No. 65225 (August 30, 2011), 76 FR 55148 (September 6, 2011) (SR–BATS–2011–018).

[5] *See* Registration Statement on Form N–1A for the Trust, dated May 31, 2013 (File Nos. 333–89822 and 811–21114). The descriptions of the Fund and the Shares contained herein are based, in part, on information in the Registration Statement. The Commission has issued an order granting certain exemptive relief to the Company under the Investment Company Act of 1940 (15 U.S.C. 80a–1) (''1940 Act'') (the ''Exemptive Order''). *See* Investment Company Act Release No. 30562 (June 18, 2013) (File No. 812–14041).

BATS Rule 14.11(i)(7) provides that, if the investment adviser to the investment company issuing Managed Fund Shares is affiliated with a broker-dealer, such investment adviser shall erect a ''fire wall'' between the investment adviser and the broker-dealer with respect to access to information concerning the composition and/or changes to such investment company portfolio.[6] In addition, Rule 14.11(i)(7) further requires that personnel who make decisions on the investment company's portfolio composition must be subject to procedures designed to prevent the use and dissemination of material nonpublic information regarding the applicable investment company portfolio. Rule 14.11(i)(7) is similar to BATS Rule 14.11(b)(5)(A)(i), however, Rule 14.11(i)(7) in connection with the establishment of a ''fire wall'' between the investment adviser and the broker-dealer reflects the applicable open-end fund's portfolio, not an underlying benchmark index, as is the case with index-based funds. The Adviser is not a registered broker-dealer, but is currently affiliated with a broker-dealer and, in the future may be affiliated with other broker dealers. The Adviser personnel who make decisions regarding the Fund's portfolio are subject to procedures designed to prevent the use and dissemination of material nonpublic information regarding the Fund's portfolio. In the event that (a) the Adviser becomes a broker-dealer or newly affiliated with a broker-dealer, or (b) any new adviser or sub-adviser is a broker-dealer or becomes affiliated with a broker-dealer, it will implement a fire wall with respect to its relevant

[6] An investment adviser to an open-end fund is required to be registered under the Investment Advisers Act of 1940 (the ''Advisers Act''). As a result, the Adviser and its related personnel are subject to the provisions of Rule 204A–1 under the Advisers Act relating to codes of ethics. This Rule requires investment advisers to adopt a code of ethics that reflects the fiduciary nature of the relationship to clients as well as compliance with other applicable securities laws. Accordingly, procedures designed to prevent the communication and misuse of non-public information by an investment adviser must be consistent with Rule 204A–1 under the Advisers Act. In addition, Rule 206(4)–7 under the Advisers Act makes it unlawful for an investment adviser to provide investment advice to clients unless such investment adviser has (i) adopted and implemented written policies and procedures reasonably designed to prevent violation, by the investment adviser and its supervised persons, of the Advisers Act and the Commission rules adopted thereunder; (ii) implemented, at a minimum, an annual review regarding the adequacy of the policies and procedures established pursuant to subparagraph (i) above and the effectiveness of their implementation; and (iii) designated an individual (who is a supervised person) responsible for administering the policies and procedures adopted under subparagraph (i) above.

personnel or such broker-dealer affiliate, as applicable, regarding access to information concerning the composition and/or changes to the portfolio, and will be subject to procedures designed to prevent the use and dissemination of material non-public information regarding such portfolio.

ProShares Managed Futures Strategy ETF

According to the Registration Statement, the Fund seeks to achieve positive returns that are not directly correlated to broad equity or fixed income markets. The Fund uses the S&P® Strategic Futures Index as a performance benchmark (the ''Benchmark''). The Benchmark seeks to reflect trends (in either direction) in the commodity, foreign currency and fixed income markets by taking long or short positions in the related futures contracts. While the Fund generally will seek exposure to the commodity and financial markets included in the Benchmark, the Fund is not an index tracking ETF and will generally seek to enhance its performance by actively selecting investments for the Fund with varying maturities from the underlying components of the Benchmark.

There can be no assurance that the Fund's performance will exceed the performance of the Benchmark at any time. The Fund is not sponsored, endorsed, sold or promoted by S&P®. S&P's® only relationship to the Fund is the licensing of certain service marks and service names of S&P® and of the Benchmark, which is determined, composed and calculated by S&P® without regard to the Fund's investment advisor or the Fund. S&P® has no obligation to take the needs of the Fund's investment advisor or the Fund into consideration in determining, composing or calculating the Benchmark.

Under normal market conditions,[7] the Fund invests in a portfolio of exchange-traded commodity futures contracts (''Commodity Futures Contracts'') and exchange-traded currency and U.S. Treasury futures contracts (''Financial Futures Contracts'') (collectively, ''Futures Contracts'').

The Fund, in part through the Subsidiary, attempts to capture the economic benefit derived from rising and declining trends based on the price changes of these Futures Contracts. Each month, the Fund's investments will generally be positioned long or short based on a comparison of the recent returns of each Futures Contract with its own seven-month weighted moving average return. To be ''long'' means to hold or have long exposure to an asset with the expectation that its value will increase over time. To be ''short'' means to sell or have short exposure to an asset with the expectation that it will fall in value. The Fund will benefit if it is long an asset that increases in value or is short an asset that decreases in value. Conversely, the Fund will be adversely impacted if it is long an asset that decreases in value or short an asset that increases in value.

The following table describes each of the commodities, currencies and U.S. Treasuries underlying the futures contracts included in the Benchmark as of June 30, 2015. The table also provides each instrument's trading hours, exchange and ticker symbol. This table is subject to change:

Sector	Weight (%)	Component	Weight (%)	Exchange	Trading hours[8]

In order to achieve its investment objective, the Fund will invest in: (i) Futures Contracts; [11] and/or (ii) under limited circumstances (as further described herein), swap agreements whose value is derived from the level of the Benchmark, other indexes, one or more futures contracts or their underlying reference assets. The Fund may also invest up to 100% of its assets in cash or cash equivalents such as U.S. Treasury securities or other high credit quality short-term fixed-income or similar securities (including shares of money market funds, bank deposits, bank money market accounts, certain variable rate-demand notes, and repurchase agreements collateralized by government securities) for direct investment or as collateral for the Futures Contracts or swap agreements.

The Adviser does not expect that the Fund will invest directly in any commodity or currency. In the event position accountability rules or position limits with respect to a Futures Contract are reached with respect to a Fund, the Adviser may, in its commercially reasonable judgment, obtain exposure through swaps whose value is derived from the level of the Benchmark, other Indexes, one or more Futures Contracts or their underlying reference assets, or invest in other futures contracts or swaps if such instruments tend to exhibit trading prices or returns that will further the investment objective of the Fund.[12] The Fund may also invest in swaps if the market for a specific Futures Contract experiences emergencies (*e.g.,* natural disaster, terrorist attack, or an act of God) or disruptions (*e.g.,* a trading halt or a flash crash) that would prevent the Fund from obtaining the appropriate amount of investment exposure to the affected Futures Contracts or other futures contracts directly.[13]

According to the Registration Statement, the Fund will invest a substantial portion of its assets in fixed income securities that include U.S. government and agency securities, money market instruments,[14] overnight and fixed-term repurchase agreements, cash and other cash equivalents. The Fund will use the fixed-income securities as investments and to meet asset coverage tests resulting from the Subsidiary's derivative exposure on a day-to-day basis. As a whole, the Fund's investments are meant to achieve its investment objective within the limitations of the federal tax requirements applicable to regulated investment companies.

The Fund expects to gain exposure to certain of these investments by investing a portion of its assets in the Subsidiary. The Subsidiary will be advised by the Adviser.[15] The Fund's investment in the Subsidiary is intended to provide the Fund with exposure to markets (in general, the commodity markets) within the limits of current federal income tax laws applicable to investment companies such as the Fund, which limit the ability of investment companies to invest directly in certain Futures Contracts. The Subsidiary will have the same investment objective as the Fund. Except as otherwise noted, references to the Fund's investments may also be deemed to include the Fund's indirect investments through the Subsidiary. The Fund will invest up to 25% of its total assets in the Subsidiary.

The Fund intends to qualify each year as a regulated investment company (a ''RIC'') under Subchapter M of the Internal Revenue Code of 1986, as amended.[16] The Fund will invest its assets (including via the Subsidiary), and otherwise conduct its operations, in a manner that is intended to satisfy the qualifying income, diversification and distribution requirements necessary to establish and maintain RIC qualification under Subchapter M. Aside from its investments in the Subsidiary, The Fund will not invest in options or non-U.S. equity securities.

Additional Information Regarding the Benchmark

Developed by S&P® and launched on August 14, 2014, the Benchmark is a long/short rules-based investable index that seeks to capture the economic benefit derived from both rising and declining trends in futures prices. The Benchmark is typically composed of futures contracts representing unleveraged long or short positions in the commodity and financial markets.

The weight assigned to each futures contract in the Benchmark is determined on a monthly basis, and implemented each month in an index rebalancing. Weights are determined using a proprietary risk-weighting methodology that measures the risk exposure of the futures contracts included in the Benchmark and then weights each futures contract so that it

[9] ''U.S. Treasury Notes'' refers to 10 year U.S. Treasury Note futures.

[10] ''U.S. Treasury Bonds'' refers to those futures with underlying bonds of a remaining term to call or maturity of 15–25 years.

[11] Futures Contracts will be the same type of contracts as the Index Components, but the expiration dates of such Futures Contracts may differ from the expiration dates of the Index Components at any given point in time.

[12] To the extent practicable, the Fund will invest in swaps cleared through the facilities of a centralized clearing house.

[13] The Adviser will also attempt to mitigate the Fund's credit risk by transacting only with large, well-capitalized institutions using measures designed to determine the creditworthiness of a counterparty. The Adviser will take various steps to limit counterparty credit risk, as described in the Registration Statement.

[14] The Fund may invest in shares of money market funds to the extent permitted by the 1940 Act.

[15] The Subsidiary is not registered under the 1940 Act and is not directly subject to its investor protections, except as noted in the Registration Statement. However, the Subsidiary is wholly-owned and controlled by the Fund and is advised by the Adviser. Therefore, because of the Fund's ownership and control of the Subsidiary, the Subsidiary would not take action contrary to the interests of the Fund or its shareholders. The Fund's Board of Trustees (''Board'') has oversight responsibility for the investment activities of the Fund, including its expected investment in the Subsidiary, and the Fund's role as the sole shareholder of the Subsidiary. The Adviser receives no additional compensation for managing the assets of the Subsidiary. The Subsidiary will also enter into separate contracts for the provision of custody, transfer agency, and accounting agent services with the same or with affiliates of the same service providers that provide those services to the Fund.

[16] 26 U.S.C. 851.

contributes the same level of risk to the Benchmark.

The Benchmark's exposure to futures contracts are not long-only, but are either short or long based on a comparison of the price change in the contract during the most recent month to a seven-month exponential weighted moving average price change of that contact. During the monthly rebalancing, the Benchmark also ''rolls'' certain of its positions in futures contracts from the current contract to a contract further from settlement.

Each month, S&P® will determine whether a futures contract that is a part of the Benchmark should be either a long or short position by comparing the price change of the most recent month (the ''First Month Price Change'') of the futures contract to the seven-month exponential weighted moving average price change (the ''Seven Month Price Change''). Long positions are tracked when a futures contract's First Month Price Change is greater than or equal to the Seven Month Price Change. Short positions are tracked when a futures contract's First Month Price Change is less than the Seven Month Price Change. The First Month Price Change of each futures contract is calculated by calculating the percentage difference of each futures contract's price on the last PDD (as defined below) relative to the current PDD.

When calculating the Seven Month Price Change, each month's price input is represented as the monthly percentage change of a futures contract price which is calculated in the same manner as the First Month Price Change. Monthly positions are determined on the second to last Benchmark business day of the month (defined as the position determination date, or ''PDD'') when the monthly percentage change of a futures contract's price is compared to past monthly price changes, exponentially weighted to give greatest weight to the most recent return and least weight to the return seven months prior. The weighted sum of the percentage changes of all futures contract prices in the Benchmark equals the daily movement of the Benchmark. To create an exponential average for comparison, price inputs (percentage change from current and previous PDDs) are weighted per the schedule below. Due to this weighting methodology, current price movements are more important than those of the more distant past.

During this monthly rebalancing, the Benchmark will also ''roll'' certain of its positions from the current contract to a contract further from settlement. In order to maintain consistent exposure to the futures contracts that compose the Benchmark, each futures contract must be sold prior to its expiration date and replaced by a contract maturing at a specified date in the future. This process is known as ''rolling.'' The futures contracts that are a part of the Benchmark are rolled periodically. The rolls are implemented pursuant to a roll schedule over a five-day period from the first (1st) through the fifth (5th) index business days of the month. An index business day is any day on which the majority of the futures contracts included in the Benchmark are open for official trading and official settlement prices are provided, excluding holidays and weekends.

In order to mitigate the potential negative impact of contango on long commodity positions, certain futures contracts in commodities will be rolled according to an ''enhanced'' rolling methodology. This methodology seeks to modify the normal roll methodology for futures contracts in the energy sector when such long position would be materially and negatively impacted by contango. In addition, the methodology identifies seasonal factors applicable to both the energy and agricultural futures markets and implements a modified roll to mitigate potential costs of such seasonal impacts.

Other Portfolio Holdings

In addition to the instruments described above, the Fund will invest in money market instruments [17] in a manner consistent with its investment objective in order to generate additional returns, to help manage cash flows in and out of the Fund, such as in connection with payment of dividends or expenses, to satisfy margin requirements, and to provide collateral or to otherwise back investments Futures Contracts.

Investment Restrictions

The Fund may hold up to an aggregate amount of 15% of its net assets in illiquid assets (calculated at the time of investment) deemed illiquid by the Adviser [18] under the 1940 Act.[19] The Fund will monitor its portfolio liquidity on an ongoing basis to determine whether, in light of current circumstances, an adequate level of liquidity is being maintained, and will consider taking appropriate steps in order to maintain adequate liquidity if, through a change in values, net assets, or other circumstances, more than 15% of the Fund's net assets are held in illiquid assets. Illiquid assets include assets subject to contractual or other restrictions on resale and other instruments that lack readily available markets as determined in accordance with Commission staff guidance.

The Fund's investments will be consistent with the Fund's investment objective and will not be used to achieve leveraged or inverse leveraged returns (*i.e.* two times or three times the Fund's benchmark).

Net Asset Value

According to the Registration Statement, the net asset value (''NAV'') of the Shares of the Fund will be calculated by dividing the value of the net assets of the Fund (*i.e.,* the value of its total assets less total liabilities) by the total number of Shares outstanding. Expenses and fees, including the management and administration fees, are accrued daily and taken into account for purposes of determining NAV. The NAV of the Fund is generally determined at 3:00 p.m. Eastern Time each business day when the Exchange is open for trading. If the Exchange or market on which the Fund's investments are primarily traded closes early, the NAV may be calculated prior to its normal calculation time. Creation/redemption transaction order time cutoffs (as further described below) would also be accelerated.

Securities and other assets are generally valued at their market price using information provided by a pricing service or market quotations. Certain short-term securities are valued on the basis of amortized cost. Futures

[17] The specific money market instruments are Treasury securities and repurchase agreements and, in the future, may include money market fund shares.

[18] In reaching liquidity decisions, the Adviser may consider the following factors: The frequency of trades and quotes for the security; the number of dealers wishing to purchase or sell the security and the number of other potential purchasers; dealer undertakings to make a market in the security; and the nature of the security and the nature of the marketplace trades (*e.g.,* the time needed to dispose of the security, the method of soliciting offers, and the mechanics of transfer).

[19] The Commission has stated that long-standing Commission guidelines have required open-end funds to hold no more than 15% of their net assets in illiquid securities and other illiquid assets. *See* Investment Company Act Release No. 28193 (March 11, 2008), 73 FR 14618 (March 18, 2008), footnote 34. *See also,* Investment Company Act Release No. 5847 (October 21, 1969), 35 FR 19989 (December 31, 1970) (Statement Regarding ''Restricted Securities''); Investment Company Act Release No. 18612 (March 12, 1992), 57 FR 9828 (March 20, 1992) (Revisions of Guidelines to Form N–1A). A fund's portfolio security is illiquid if it cannot be disposed of in the ordinary course of business within seven days at approximately the value ascribed to it by the fund. *See* Investment Company Act Release No. 14983 (March 12, 1986), 51 FR 9773 (March 21, 1986) (adopting amendments to Rule 2a–7 under the 1940 Act); Investment Company Act Release No. 17452 (April 23, 1990), 55 FR 17933 (April 30, 1990) (adopting Rule 144A under the Securities Act of 1933).

Contracts are generally valued at their settlement price as determined by the relevant exchange. The settlement value of the Fund's swap agreements will be determined by applying the then-current disseminated value for the Index Components to the terms of the Fund's swap agreements. Repurchase agreements are generally valued at cost. U.S government securities are generally priced at a quoted market price from an active market, generally the midpoint between the bid/ask quotes. For U.S. government securities that mature within sixty days, amortized cost may be used to approximate fair value. Money market funds would generally be valued at their current Net Asset Value per share, typically $1.00 per share. Certain short-term debt securities will be valued on the basis of amortized cost.

When the Adviser determines that the price of a security or derivative is not readily available or deems the price unreliable, it may, in good faith, establish a fair value for that security or derivative in accordance with procedures established by and under the general supervision and responsibility of the Board. The use of a fair valuation method may be appropriate if, for example, market quotations do not accurately reflect fair value for an investment, a trading halt closes an exchange or market early, or other events result in an exchange or market delaying its normal close. The Adviser may consider applying appropriate valuation methodologies, which may include discounts of market value of similar freely traded securities, yields to maturity, or any other appropriate method. In determining the appropriate methodology, the Adviser may consider all relevant factors, including, among other things: Fundamental analytical data; the types of securities affected; pricing history of the security; whether dealer quotations are available; liquidity of the market; news or other events; and other factors the Adviser deems relevant.

For more information regarding the valuation of Fund investments in calculating the Fund's NAV, see the Registration Statement.

The Shares

The Fund will issue and redeem Shares on a continuous basis at the NAV per Share only in large blocks of a specified number of Shares or multiples thereof (''Creation Units'') in transactions with authorized participants who have entered into agreements with the Distributor. The Adviser currently anticipates that a Creation Unit will consist of 25,000 Shares, though this number may change from time to time, including prior to listing of the Shares. The exact number of Shares that will constitute a Creation Unit will be disclosed in the Registration Statement. Once created, Shares of the Fund trade on the secondary market in amounts less than a Creation Unit.

Although the Adviser anticipates that purchases and redemptions for Creation Units will generally be executed on an all-cash basis, the consideration for purchase of Creation Units of the Fund may consist of an in-kind deposit of a designated portfolio of securities (including any portion of such assets for which cash may be substituted) (*i.e.,* the ''Deposit Assets''), and the ''Cash Component'' computed as described below. Together, the Deposit Assets and the Cash Component constitute the ''Fund Deposit,'' which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund. The specific terms surrounding the creation and redemption of shares are at the discretion of the Adviser.

The Deposit Assets and Fund Securities (as defined below), as the case may be, in connection with a purchase or redemption of a Creation Unit, generally will correspond pro rata, to the extent practicable, to the assets held by the Fund.

The Cash Component will be an amount equal to the difference between the NAV of the Shares (per Creation Unit) and the ''Deposit Amount,'' which will be an amount equal to the market value of the Deposit Assets, and serve to compensate for any differences between the NAV per Creation Unit and the Deposit Amount. The Fund generally offers Creation Units partially or entirely for cash. PSA will make available through the National Securities Clearing Corporation (''NSCC'') on each business day, prior to the opening of business on the Exchange, the list of names and the required number or par value of each Deposit Security and the amount of the Cash Component to be included in the current Fund Deposit (based on information as of the end of the previous business day) for the Fund.

The identity and number or par value of the Deposit Assets may change pursuant to changes in the composition of the Fund's portfolio as rebalancing adjustments and corporate action events occur from time to time. The composition of the Deposit Assets may also change in response to adjustments to the weighting or composition of the holdings of the Fund.

The Fund reserves the right to permit or require the substitution of a ''cash in lieu'' amount to be added to the Cash Component to replace any Deposit Security that may not be available in sufficient quantity for delivery or that may not be eligible for transfer through the Depository Trust Company (''DTC'') or the clearing process through the NSCC.

Except as noted below, all creation orders must be placed for one or more Creation Units and must be received by the Distributor at a time specified by the Adviser. Currently, such orders must be received in proper form no later than 2:30 p.m. Eastern Time on the date such order is placed in order for creation of Creation Units to be effected based on the NAV of Shares of the Fund as next determined on such date after receipt of the order in proper form. The ''Settlement Date'' is generally the third business day after the transmittal date. On days when the Exchange or the bond markets close earlier than normal, the Fund may require orders to create or to redeem Creation Units to be placed earlier in the day.

Fund Deposits must be delivered through either the Continuous Net Settlement facility of the NSCC, the Federal Reserve System (for cash and government securities), through DTC (for corporate and municipal securities), or through a central depository account, such as with Euroclear or DTC, maintained by State Street or a sub-custodian (a ''Central Depository Account''), in any case at the discretion of the Adviser, by an authorized participant. Any portion of a Fund Deposit that may not be delivered through the NSCC, Federal Reserve System or DTC must be delivered through a Central Depository Account.

A standard creation transaction fee may be imposed to offset the transfer and other transaction costs associated with the issuance of Creation Units.

Shares of the Fund may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Distributor and only on a business day. PSA will make available through the NSCC, prior to the opening of business on the Exchange on each business day, the designated portfolio of securities (including any portion of such securities for which cash may be substituted) that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form on that day (''Fund Securities''). The redemption proceeds for a Creation Unit generally will consist of a specified amount of cash less a redemption transaction fee. The Fund generally will redeem Creation Units entirely for cash.

A standard redemption transaction fee may be imposed to offset transfer and other transaction costs that may be incurred by the Fund.

Redemption requests for Creation Units of the Fund must be submitted to the Distributor by or through an authorized participant by a time specified by the Adviser. Currently, such requests must be received no later than 10:45 a.m. Eastern Time on any business day, in order to receive that day's NAV. The authorized participant must transmit the request for redemption in the form required by the Fund to the Distributor in accordance with procedures set forth in the authorized participant agreement.

Additional information regarding the Shares and the Fund, including investment strategies, risks, creation and redemption procedures, fees and expenses, portfolio holdings disclosure policies, distributions, taxes and reports to be distributed to beneficial owners of the Shares can be found in the Registration Statement or on the Web site for the Fund (*www.ProShares.com*), as applicable.

Availability of Information

The Fund's Web site, which will be publicly available prior to the public offering of Shares, will include a form of the prospectus for the Fund that may be downloaded. The Web sites will include additional quantitative information updated on a daily basis, including, for the Fund: (1) The prior business day's reported NAV, the closing market price or the midpoint of the bid/ask spread at the time of calculation of such NAV (the ''Bid/Ask price''),[20] daily trading volume, and a calculation of the premium and discount of the closing market price or Bid/Ask Price against the NAV; and (2) data in chart format displaying the frequency distribution of discounts and premiums of the daily closing price against the NAV, within appropriate ranges, for each of the four previous calendar quarters. Daily trading volume information will be available in the financial section of newspapers, through subscription services such as Bloomberg, Thomson Reuters, and International Data Corporation, which can be accessed by authorized participants and other investors, as well as through other electronic services, including major public Web sites. On each business day, before commencement of trading in Shares during Regular Trading Hours [21] on the Exchange, the Fund will disclose on its Web site the identities and quantities of the portfolio Futures Contracts and other assets (the ''Disclosed Portfolio'') held by the Fund that will form the basis for the Fund's calculation of NAV at the end of the business day.[22] The Disclosed Portfolio will include, as applicable, the names, quantity, exposure value (notional value + gains/losses), and market value of the Futures Contracts and other assets held by the Fund and the characteristics of such assets. The Web site and information will be publicly available at no charge.

In addition, for the Fund, an estimated value, defined in BATS Rule 14.11(i)(3)(C) as the ''Intraday Indicative Value,'' that reflects an estimated intraday value of the Fund's portfolio, will be disseminated. Moreover, the Intraday Indicative Value will be based upon the current value for the components of the Disclosed Portfolio and will be updated and widely disseminated by one or more major market data vendors at least every 15 seconds during the Exchange's Regular Trading Hours.[23] In addition, the quotations of certain of the Fund's holdings may not be updated during U.S. trading hours if such holdings do not trade in the United States or if updated prices cannot be ascertained.

The dissemination of the Intraday Indicative Value, together with the Disclosed Portfolio, will allow investors to determine the value of the underlying portfolio of the Fund on a daily basis and provide an estimate of that value throughout the trading day.

Intraday price quotations on repurchase agreements and U.S. Government securities of the type held by the Fund are available from major broker-dealer firms and from third-parties, which may provide prices free with a time delay, or ''live'' with a paid fee. For Futures Contracts, such intraday information is available directly from the applicable listing exchange. Intraday price information is also available through subscription services, such as Bloomberg and Thomson Reuters, which can be accessed by authorized participants and other investors. Money market fund shares are not generally priced or quoted on an intraday basis.

Information regarding market price and volume of the Shares will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services. The previous day's closing price and trading volume information for the Shares will be generally available daily in the print and online financial press. Quotation and last sale information for the Shares will be available on the facilities of the CTA.

Initial and Continued Listing

The Shares will be subject to BATS Rule 14.11(i), which sets forth the initial and continued listing criteria applicable to Managed Fund Shares. The Exchange represents that, for initial and/or continued listing, the Fund must be in compliance with Rule 10A–3 under the Act.[24] A minimum of 100,000 Shares will be outstanding at the commencement of trading on the Exchange. The Exchange will obtain a representation from the issuer of the Shares that the NAV will be calculated daily and that the NAV and the Disclosed Portfolio will be made available to all market participants at the same time.

Trading Halts

With respect to trading halts, the Exchange may consider all relevant factors in exercising its discretion to halt or suspend trading in the Shares the Fund. The Exchange will halt trading in the Shares under the conditions specified in BATS Rule 11.18. Trading may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable. These may include: (1) The extent to which trading is not occurring in the Futures Contracts and other assets composing the Disclosed Portfolio of the Fund; or (2) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present. Trading in the Shares also will be subject to Rule 14.11(i)(4)(B)(iv), which sets forth circumstances under which Shares of the Fund may be halted.

Trading Rules

The Exchange deems the Shares to be equity securities, thus rendering trading in the Shares subject to the Exchange's existing rules governing the trading of

[20] The Bid/Ask Price of the Fund will be determined using the midpoint of the highest bid and the lowest offer on the Exchange as of the time of calculation of the Fund's NAV. The records relating to Bid/Ask Prices will be retained by the Fund and its service providers.

[21] Regular Trading Hours are 9:30 a.m. to 4:00 p.m. Eastern Time.

[22] Under accounting procedures to be followed by the Fund, trades made on the prior business day (''T'') will be booked and reflected in NAV on the current business day (''T+1''). Accordingly, the Fund will be able to disclose at the beginning of the business day the portfolio that will form the basis for the NAV calculation at the end of the business day.

[23] Currently, it is the Exchange's understanding that several major market data vendors display and/or make widely available Intraday Indicative Values published via the Consolidated Tape Association (''CTA'') or other data feeds.

[24] *See* 17 CFR 240.10A–3.

equity securities. BATS will allow trading in the Shares from 8:00 a.m. until 5:00 p.m. Eastern Time. The Exchange has appropriate rules to facilitate transactions in the Shares during all trading sessions. As provided in BATS Rule 11.11(a), the minimum price variation for quoting and entry of orders in Managed Fund Shares traded on the Exchange is $0.01, with the exception of securities that are priced less than $1.00, for which the minimum price variation for order entry is $0.0001.

Surveillance

The Exchange believes that its surveillance procedures are adequate to properly monitor the trading of the Shares on the Exchange during all trading sessions and to deter and detect violations of Exchange rules and the applicable federal securities laws. Trading of the Shares through the Exchange will be subject to the Exchange's surveillance procedures for derivative products, including Managed Fund Shares. The Exchange may obtain information regarding trading in the Shares and the underlying futures via the Intermarket Surveillance Group (''ISG'') from other exchanges who are members or affiliates of the ISG or with which the Exchange has entered into a comprehensive surveillance sharing agreement.[25] In addition, the Exchange is able to access, as needed, trade information for certain fixed income instruments reported to FINRA's Trade Reporting and Compliance Engine (''TRACE''). The Exchange prohibits the distribution of material non-public information by its employees.

Information Circular

Prior to the commencement of trading, the Exchange will inform its members in an Information Circular of the special characteristics and risks associated with trading the Shares. Specifically, the Information Circular will discuss the following: (1) The procedures for purchases and redemptions of Shares in Creation Units (and that Shares are not individually redeemable); (2) BATS Rule 3.7, which imposes suitability obligations on Exchange members with respect to recommending transactions in the Shares to customers; (3) how information regarding the Intraday Indicative Value is disseminated; (4) the risks involved in trading the Shares during the Pre-Opening[26] and After Hours Trading Sessions[27] when an updated Intraday Indicative Value will not be calculated or publicly disseminated; (5) the requirement that members deliver a prospectus to investors purchasing newly issued Shares prior to or concurrently with the confirmation of a transaction; and (6) trading information.

In addition, the Information Circular will advise members, prior to the commencement of trading, of the prospectus delivery requirements applicable to the Fund. Members purchasing Shares from the Fund for resale to investors will deliver a prospectus to such investors. The Information Circular will also discuss any exemptive, no-action, and interpretive relief granted by the Commission from any rules under the Act.

In addition, the Information Circular will reference that the Fund is subject to various fees and expenses described in the Registration Statement. The Information Circular will also disclose the trading hours of the Shares of the Fund and the applicable NAV calculation time for the Shares. The Information Circular will disclose that information about the Shares of the Fund will be publicly available on the Fund's Web site. In addition, the Information Circular will reference that the Trust is subject to various fees and expenses described in the Registration Statement.

2. Statutory Basis

The Exchange believes that the proposal is consistent with Section 6(b) of the Act[28] in general and Section 6(b)(5) of the Act[29] in particular in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

The Exchange believes that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices in that the Shares will be listed and traded on the Exchange pursuant to the initial and continued listing criteria in BATS Rule 14.11(i). The Exchange believes that its surveillance procedures are adequate to properly monitor the trading of the Shares on the Exchange during all trading sessions and to deter and detect violations of Exchange rules and the applicable federal securities laws. If the investment adviser to the investment company issuing Managed Fund Shares is affiliated with a broker-dealer, such investment adviser to the investment company shall erect a ''fire wall'' between the investment adviser and the broker-dealer with respect to access to information concerning the composition and/or changes to such investment company portfolio. The Adviser is not a registered broker-dealer, but is affiliated with a broker-dealer and has implemented a ''fire wall'' with respect to such broker-dealer regarding access to information concerning the composition and/or changes to the Fund's portfolio. The Exchange may obtain information regarding trading in the Shares and the underlying futures via the ISG from other exchanges who are members or affiliates of the ISG or with which the Exchange has entered into a comprehensive surveillance sharing agreement.[30] In addition, the Exchange is able to access, as needed, trade information for certain fixed income instruments reported to FINRA's TRACE.

According to the Registration Statement, the Fund expects that, under normal circumstances, it will have at least 80% of its assets invested, either directly or indirectly via the Subsidiary, in Futures Contracts. The Fund also may invest its net assets in money market instruments as collateral for the Futures Contracts and in order to help manage cash flows in and out of the Fund.

Additionally, the Fund may hold up to an aggregate amount of 15% of its net assets in illiquid assets (calculated at the time of investment). The Fund will monitor its portfolio liquidity on an ongoing basis to determine whether, in light of current circumstances, an adequate level of liquidity is being maintained, and will consider taking appropriate steps in order to maintain adequate liquidity if, through a change in values, net assets, or other circumstances, more than 15% of the Fund's net assets are held in illiquid assets. Illiquid assets include assets subject to contractual or other

[25] For a list of the current members and affiliate members of ISG, *see www.isgportal.com.* The Exchange notes that not all components of the Disclosed Portfolio for the Fund may trade on markets that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement. The Exchange also notes that all of the futures contracts in the Disclosed Portfolio for the Fund will trade on markets that are a member of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement.

[26] The Pre-Opening Session is from 8:00 a.m. to 9:30 a.m. Eastern Time.

[27] The After Hours Trading Session is from 4:00 p.m. to 5:00 p.m. Eastern Time.

[28] 15 U.S.C. 78f.

[29] 15 U.S.C. 78f(b)(5).

[30] *See* note 24, *supra.*

restrictions on resale and other instruments that lack readily available markets as determined in accordance with Commission staff guidance.

The proposed rule change is designed to promote just and equitable principles of trade and to protect investors and the public interest in that the Exchange will obtain a representation from the issuer of the Shares that the NAV will be calculated daily and that the NAV and the Disclosed Portfolio will be made available to all market participants at the same time. In addition, a large amount of information is publicly available regarding the Fund and the Shares, thereby promoting market transparency. Moreover, the Intraday Indicative Value will be disseminated by one or more major market data vendors at least every 15 seconds during Regular Trading Hours. On each business day, before commencement of trading in Shares during Regular Trading Hours, the Fund will disclose on its Web site the Disclosed Portfolio that will form the basis for the Fund's calculation of NAV at the end of the business day. Pricing information will be available on the Fund's Web site including: (1) The prior business day's reported NAV, the Bid/Ask Price of the Fund, and a calculation of the premium and discount of the Bid/Ask Price against the NAV; and (2) data in chart format displaying the frequency distribution of discounts and premiums of the daily Bid/Ask Price against the NAV, within appropriate ranges, for each of the four previous calendar quarters. Additionally, information regarding market price and trading of the Shares will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services, and quotation and last sale information for the Shares will be available on the facilities of the CTA. The Web site for the Fund will include a form of the prospectus for the Fund and additional data relating to NAV and other applicable quantitative information. Trading in Shares of the Fund will be halted under the conditions specified in BATS Rule 11.18. Trading may also be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable. Finally, trading in the Shares will be subject to BATS Rule 14.11(i)(4)(B)(iv), which sets forth circumstances under which Shares of the Fund may be halted. In addition, as noted above, investors will have ready access to information regarding the Fund's holdings, the Intraday Indicative Value, the Disclosed Portfolio, and quotation and last sale information for the Shares.

Intraday price quotations on repurchase agreements and U.S. Government securities of the type held by the Fund are available from major broker-dealer firms and from third-parties, which may provide prices free with a time delay, or ''live'' with a paid fee. For Futures Contracts, such intraday information is available directly from the applicable listing exchange. Intraday price information is also available through subscription services, such as Bloomberg and Thomson Reuters, which can be accessed by authorized participants and other investors. Money market fund shares are not generally priced or quoted on an intraday basis.

The proposed rule change is designed to perfect the mechanism of a free and open market and, in general, to protect investors and the public interest in that it will facilitate the listing and trading of additional types of actively-managed exchange-traded product that will enhance competition among market participants, to the benefit of investors and the marketplace. As noted above, the Exchange has in place surveillance procedures relating to trading in the Shares and may obtain information via ISG from other exchanges that are members of ISG or with which the Exchange has entered into a comprehensive surveillance sharing agreement as well as trade information for certain fixed income instruments as reported to FINRA's TRACE. In addition, as noted above, investors will have ready access to information regarding the Fund's holdings, the Intraday Indicative Value, the Disclosed Portfolio, and quotation and last sale information for the Shares.

For the above reasons, the Exchange believes that the proposed rule change is consistent with the requirements of Section 6(b)(5) of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Act. The Exchange notes that the proposed rule change, rather will facilitate the listing and trading of additional actively-managed exchange-traded products that will enhance competition among both market participants and listing venues, to the benefit of investors and the marketplace.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will: (a) By order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–BATS–2015–56 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BATS–2015–56. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be

available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BATS–2015–56 and should be submitted on or before September 8, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[31]

Brent J. Fields,

Secretary.

SMALL BUSINESS ADMINISTRATION

Regulatory Fairness Hearing; Region IX—Springerville, Arizona

AGENCY: U.S. Small Business Administration (SBA).

ACTION: Notice of open hearing of Region IX Small Business Owners and Business Leaders in Springerville, Arizona.

SUMMARY: The SBA, Office of the National Ombudsman is issuing this notice to announce the location, date and time of the Springerville, AZ Regulatory Fairness Hearing. This hearing is open to the public.

DATES: The hearing will be held on Wednesday, September 9, 2015, from 8:30 a.m. to 5:00 p.m. (MST).

ADDRESSES: The hearing will be at The American Legion, Post 30, 825 E. Main Street, Springerville, AZ 85938–5535.

SUPPLEMENTARY INFORMATION: Pursuant to the Small Business Regulatory Enforcement Fairness Act (Pub. L. 104–121), Sec. 222, SBA announces the hearing for Small Business Owners, Business Leaders, Business Organizations, Trade Associations, Chambers of Commerce and related organizations serving small business concerns to report experiences regarding unfair or excessive Federal regulatory enforcement issues affecting their members.

FOR FURTHER INFORMATION CONTACT: The hearing is open to the public; however, advance notice of attendance is requested. Anyone wishing to attend and/or make a presentation at the Springerville, AZ hearing must contact Doyel Shamley at *Doyel@vrcltd.us* or José Méndez by August 28, 2015 in writing, by fax, or email in order to be placed on the agenda. For further information, please contact José Méndez, Case Management Specialist, Office of the National Ombudsman, 409 3rd Street SW., Suite 7125, Washington, DC 20416, by fax (202) 481–5719, by email at *ombudsman-events@sba.gov,* by phone (202) 205–6178. Additionally, if you need accommodations because of a disability, translation services, or require additional information, please contact José Méndez as well at least 1 week in advance.

For more information on the Office of the National Ombudsman, see our Web site at *www.sba.gov/ombudsman.*

Dated: August 7, 2015.

Miguel J. L'Heureux,

SBA Committee Management Officer.

[Public Notice: 9224]

Culturally Significant Objects Imported for Exhibition Determinations: ''Painting the Modern Garden: Monet to Matisse'' Exhibition

SUMMARY: Notice is hereby given of the following determinations: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985; 22 U.S.C. 2459), E. O. 12047 of March 27, 1978, the Foreign Affairs Reform and Restructuring Act of 1998 (112 Stat. 2681, *et seq.;* 22 U.S.C. 6501 note, *et seq.*), Delegation of Authority No. 234 of October 1, 1999, Delegation of Authority No. 236–3 of August 28, 2000 (and, as appropriate, Delegation of Authority No. 257 of April 15, 2003), I hereby determine that the objects to be included in the exhibition ''Painting the Modern Garden: Monet to Matisse,'' imported from abroad for temporary exhibition within the United States, are of cultural significance. The objects are imported pursuant to loan agreements with the foreign owners or custodians. I also determine that the exhibition or display of the exhibit objects at The Cleveland Museum of Art, Cleveland, Ohio, from on or about October 6, 2015, until on or about January 5, 2016, and at possible additional exhibitions or venues yet to be determined, is in the national interest. I have ordered that Public Notice of these Determinations be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: For further information, including a list of the imported objects, contact the Office of Public Diplomacy and Public Affairs in the Office of the Legal Adviser, U.S. Department of State (telephone: 202–632–6471; email: *section2459@state.gov*). The mailing address is U.S. Department of State, L/PD, SA–5, Suite 5H03, Washington, DC 20522–0505.

Dated: August 6, 2015.

[Public Notice 9223]

60-Day Notice of Proposed Information Collection: Request for Entry Into Children's Passport Issuance Alert Program

ACTION: Notice of request for public comment.

SUMMARY: The Department of State is seeking Office of Management and Budget (OMB) approval for the information collection described below. In accordance with the Paperwork Reduction Act of 1995, we are requesting comments on this collection from all interested individuals and organizations. The purpose of this notice is to allow 60 days for public comment preceding submission of the collection to OMB.

DATE(S): The Department will accept comments from the public up to *October 16, 2015.*

ADDRESSES: You may submit comments by any of the following methods:

- *Web:* Persons with access to the Internet may comment on this notice by going to *www.Regulations.gov.* You can search for the document by entering ''Docket Number: DOS–2015–0042'' in the search field. Then click the ''Comment Now'' button and complete the comment form.
- *Email: RiversDA@state.gov.*
- *Mail:* Send written comments to: U.S. Department of State, CA/OCS/PMO, SA–17, 10th Floor, Washington, DC 20036.
- *Fax:* 202–736–9111.
- *Hand Delivery or Courier:* U.S. Department of State, CA/OCS/PMO, 600 19th St. NW., 10th Floor, Washington, DC 20036.

You must include the DS form number (if applicable), information collection title, and the OMB control number in any correspondence.

FOR FURTHER INFORMATION CONTACT: Direct requests for additional information regarding the collection listed in this notice, including requests for copies of the proposed collection instrument and supporting documents, to Derek Rivers, Bureau of Consular Affairs, Overseas Citizens Services (CA/OCS/PMO), U.S. Department of State, SA–17, 10th Floor, Washington, DC 20036 or at *RiversDA@state.gov.*

SUPPLEMENTARY INFORMATION:

- *Title of Information Collection:* Request for Entry into Children's Passport Issuance Alert Program.
- *OMB Control Number:* 1405–0169.
- *Type of Request:* Extension.
- *Originating Office:* CA/OCS/PMO.
- *Form Number:* DS–3077.
- *Respondents:* Concerned parents or their agents, institutions, or courts.
- *Estimated Number of Respondents:* 6,000.
- *Estimated Number of Responses:* 6,000.
- *Average Hours per Response:* 30 minutes.
- *Total Estimated Burden:* 3,000 hours.
- *Frequency:* On occasion.
- *Obligation to Respond:* Voluntary.

We are soliciting public comments to permit the Department to:

- Evaluate whether the proposed information collection is necessary for the proper functions of the Department.
- Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used.
- Enhance the quality, utility, and clarity of the requests for information to be collected.
- Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Please note that comments submitted in response to this Notice are public record. Before including any detailed personal information, you should be aware that your comments as submitted, including your personal information, will be available for public review.

Abstract of proposed collection: The information requested will be used to support entry of the name of a minor (an unmarried person under 18) into the Children's Passport Issuance Alert Program (CPIAP). CPIAP provides a mechanism for parents or other persons with legal custody of a minor to obtain information regarding whether the Department has received a passport application for the minor. This program was developed as a means to prevent international abduction of a minor or to help prevent other travel of a minor without the consent of a parent or legal guardian. If a minor's name and other identifying information has been entered into the CPIAP, when the Department receives an application for a new, replacement, or renewed passport for the minor, the application will be placed on hold for up to 60 days and the Office of Children's Issues will attempt to notify the requestor of receipt of the application. Form DS–3077 will be primarily submitted by a parent or legal guardian of a minor. 22 C.F.R § 51.28 which is a regulation that implements the statutory two parent consent requirement and prescribes the bases for an exception is one of the main legal authorities that this form is based from.

Methodology: The completed form DS–3077 can be filled out online and printed or completed by hand. The form must be manually signed and submitted to the Office of Children's Issues by email, fax or mail.

Dated: July 29, 2015.

Michelle Bernier-Toth,

Managing Director, Bureau of Consular Affairs, Department of State.

Federal Aviation Administration

Government/Industry Aeronautical Charting Forum Meeting

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of public meeting.

SUMMARY: This notice announces the bi-annual meeting of the Federal Aviation Administration (FAA) Aeronautical Charting Forum (ACF) to discuss informational content and design of aeronautical charts and related products, as well as instrument flight procedures development policy and design criteria.

DATES: The ACF is separated into two distinct groups. The Instrument Procedures Group (IPG) will meet October 27, 2015 from 8:30 a.m. to 5:00 p.m. The Charting Group will meet October 28 and 29, 2015 from 8:30 a.m. to 5:00 p.m.

ADDRESSES: The meeting will be held at the United States Geological Survey (USGS) Headquarters at 12201 Sunrise Valley Drive, Reston, VA 20192.

FOR FURTHER INFORMATION CONTACT: For information relating to the Instrument Procedures Group, contact Thomas E. Schneider, FAA, Flight Procedures Standards Branch, AFS–420, 6500 South MacArthur Blvd., P.O. Box 25082, Oklahoma City, OK 73125; telephone: (405) 954–5852.

For information relating to the Charting Group, contact Valerie S.

Watson, FAA, Aeronautical Information Services, Governance & Standards, AJV–553, 1305 East-West Highway, SSMC4, Station 3409, Silver Spring, MD 20910; telephone: (301) 427–5155.

SUPPLEMENTARY INFORMATION: Pursuant to § 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463; 5 U.S.C. App. II), notice is hereby given of a meeting of the FAA Aeronautical Charting Forum to be held from October 27 through October 29, 2015, from 8:30 a.m. to 5:00 p.m. at USGS Headquarters at 12201 Sunrise Valley Drive, Reston, VA 20192, in the Auditorium (Room 1C111).

The Instrument Procedures Group agenda will include briefings and discussions on recommendations regarding pilot procedures for instrument flight, as well as criteria, design, and developmental policy for instrument approach and departure procedures.

The Charting Group agenda will include briefings and discussions on recommendations regarding aeronautical charting specifications, flight information products, and new aeronautical charting and air traffic control initiatives. Attendance is open to the interested public, but will be limited to the space available.

Please note the following special security requirements for access to the USGS Headquarters. All visitors must enter at the Visitors Entrance and pass through security screening process. All packages, briefcases, handbags, etc. will be scanned. Visitors must sign in and present a picture I.D., such as a State's driver's license. The guard will then issue a visitor's badge which must be worn at all times.

All foreign national participants are required to have a passport. Additionally, not later than October 15, 2015, foreign national attendees must provide their name, country of citizenship, company/organization representing, passport number, passport expiration date, issuing country of passport, and country of the company/organization. Send the information to: Lance Christian via Email to: *lance.d.christian@nga.mil.* Foreign nationals who do not provide the required information will not be allowed entrance—NO EXCEPTIONS.

Attendees bringing laptop computers for use at during the conference are required to register their laptop when registering to enter the USGS facility. Attendees are to write the word ''laptop'' and the serial number on the sign-in beneath their printed name.

The public must make arrangements by October 8, 2015, to present oral statements at the meeting. The public may present written statements and/or new agenda items to the forum by providing a copy to the person listed in the **FOR FURTHER INFORMATION CONTACT** section not later than October 8, 2015. Public statements will only be considered if time permits.

Issued in Washington, DC, on August 6, 2015.

Valerie S. Watson,

Co-Chair, Aeronautical Charting Forum.

First Meeting: RTCA Special Committee 235 (SC 235)

AGENCY: Federal Aviation Administration (FAA), U.S. Department of Transportation (DOT).

ACTION: First Meeting Notice of RTCA Special Committee 235.

SUMMARY: The FAA is issuing this notice to advise the public of the first meeting of the RTCA Special Committee 235.

DATES: The meeting will be held October 21st–22nd from 9:00 a.m.–5:00 p.m.

ADDRESSES: The meeting will be held at RTCA Headquarters, 1150 18th Street NW., Suite 450, Washington, DC 20036, Tel: (202) 330–0680.

FOR FURTHER INFORMATION CONTACT: The RTCA Secretariat, 1150 18th Street NW., Suite 910, Washington, DC, 20036, or by telephone at (202) 833–9339, fax at (202) 833–9434, or Web site at *http://www.rtca.org* or Karan Hofmann, Program Director, RTCA, Inc., *khofmann@rtca.org,* (202) 330–0680.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463, 5 U.S.C., App.), notice is hereby given for a meeting of the RTCA Special Committee 235. The agenda will include the following:

Wednesday, October 21, 2015

1. Welcome
2. Administrative Remarks
3. Introductions
4. Agenda Review
5. RTCA Overview Presentation
   a. Background on RTCA, MOPS, and Process
6. SC–235 Scope and Terms of Reference review
7. Overview of DO–227
8. SC–235 Structure and Organization of Work
9. Proposed Schedule
10. RTCA workspace presentation
11. Other Business
12. Date and Place of Next Meeting
13. Adjourn

Thursday, October 22, 2015

14. Continuation of Plenary or Working Group Session

Attendance is open to the interested public but limited to space availability. With the approval of the chairman, members of the public may present oral statements at the meeting. Persons wishing to present statements or obtain information should contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section. Members of the public may present a written statement to the committee at any time.

Issued in Washington, DC, on August 13, 2015.

Notice of Opportunity for Public Comment on Surplus Property Release at Madras Municipal Airport, Madras, OR

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Request for public comments.

SUMMARY: Under the provisions of Title 49, U.S.C. Section 47153(c), notice is being given that the FAA is considering a request from the City of Madras, OR, to waive the surplus property requirements for approximately 1.07 acres of airport property located at Madras Municipal Airport, in Madras, OR.

The subject property is located away from the aeronautical area and currently vacant. The property will remain vacant of any structures, as it will be utilized for public road improvements and right of way purposes only. This release will allow the City to sell parcels of the airport property to businesses interested in the airport industrial park. There will be no actual proceeds generated from the proposed release of this property as it will be used for public road improvements and right-of-way purposes. It has been determined through study that the subject parcels will not be needed for aeronautical purposes.

DATES: Comments must be received on or before September 30, 2015.

ADDRESSES: Send comments on this document to Ms. Cayla Morgan at the Federal Aviation Administration, 1601 Lind Avenue SW., Renton, Washington, 98057–3356, Telephone 425–227–2653.

FOR FURTHER INFORMATION CONTACT: Documents are available for review by appointment by contacting Ms. Cayla Morgan, Telephone 425–227–2653, Federal Aviation Administration, 1601 Lind Avenue SW., Renton, Washington.

Issued in Renton, Washington on August 11, 2015.

Joelle Briggs,

Assistant, Manager, Seattle Airports District Office.

Federal Highway Administration

Buy America Waiver Notification

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice.

SUMMARY: This notice provides information regarding FHWA's finding that a Buy America waiver is appropriate for the use of non-domestic steel products contained in (1) Helical Bevel gearbox Rebuild kits for trail lock machinery, (2) Trail lock brake motors, (3) R1 and R2 Reducer Subcomponents, (4) Spherical Roller Bearings for bridge operating machinery, (5) Diesel Engine for Hydraulic Power Unit for emergency drive system, and (6) Hydraulic Vane Motor for emergency Hydraulic drive system in the State of New York.

DATES: The effective date of the waiver is August 18, 2015.

FOR FURTHER INFORMATION CONTACT: For questions about this notice, please contact Mr. Gerald Yakowenko, FHWA Office of Program Administration, (202) 366–1562, or via email at *gerald.yakowenko@dot.gov.* For legal questions, please contact Mr. Jomar Maldonado, FHWA Office of the Chief Counsel, (202) 366–1373, or via email at *Jomar.Maldonado@dot.gov.* Office hours for the FHWA are from 8:00 a.m. to 4:30 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Electronic Access

An electronic copy of this document may be downloaded from the Federal Register's home page at: *http://www.archives.gov* and the Government Printing Office's database at: *http://www.access.gpo.gov/nara.*

Background

The FHWA's Buy America policy in 23 CFR 635.410 requires a domestic manufacturing process for any steel or iron products (including protective coatings) that are permanently incorporated in a Federal-aid construction project. The regulation also provides for a waiver of the Buy America requirements when the application would be inconsistent with the public interest or when satisfactory quality domestic steel and iron products are not sufficiently available. This notice provides information regarding FHWA's finding that a Buy America waiver is appropriate for use of non-domestic steel product contained in (1) Helical Bevel gearbox Rebuild kits for trail lock machinery, (2) Trail lock brake motors, (3) R1 and R2 Reducer Subcomponents, (4) Spherical Roller Bearings for bridge operating machinery, (5) Diesel Engine for Hydraulic Power Unit for emergency drive system, and (6) Hydraulic Vane Motor for emergency Hydraulic drive system in the State of New York.

In accordance with Division K, section 122 of the ''Consolidated and Further Continuing Appropriations Act, 2015'' (Pub. L. 113–235), FHWA published a notice of intent to issue a waiver on its Web site for non-domestic steel cable nets (*http://www.fhwa.dot.gov/construction/contracts/waivers.cfm?id=109*) on June 18. The FHWA received no comments in response to the publication. During the 15-day comment period, FHWA conducted additional review to locate potential domestic manufacturers of (1) Helical Bevel gearbox Rebuild kits for trail lock machinery, (2) Trail lock brake motors, (3) R1 and R2 Reducer Subcomponents, (4) Spherical Roller Bearings for bridge operating machinery, (5) Diesel Engine for Hydraulic Power Unit for emergency drive system, and (6) Hydraulic Vane Motor for emergency Hydraulic drive system. Based on all the information available to the agency, FHWA concludes that there are no domestic manufacturers of (1) Helical Bevel gearbox Rebuild kits for trail lock machinery, (2) Trail lock brake motors, (3) R1 and R2 Reducer Subcomponents, (4) Spherical Roller Bearings for bridge operating machinery, (5) Diesel Engine for Hydraulic Power Unit for emergency drive system, and (6) Hydraulic Vane Motor for emergency Hydraulic drive system.

In accordance with the provisions of section 117 of the SAFETEA–LU Technical Corrections Act of 2008 (Pub. L. 110–244, 122 Stat. 1572), FHWA is providing this notice as its finding that a waiver of Buy America requirements is appropriate. The FHWA invites public comment on this finding for an additional 15 days following the effective date of the finding. Comments may be submitted to FHWA's Web site via the link provided to the New York waiver page noted above.

(Authority: 23 U.S.C. 313; Pub. L. 110–161, 23 CFR 635.410)

Issued on: August 10, 2015.

Gregory G. Nadeau,

Acting Administrator, Federal Highway Administration.

BILLING CODE 4910–22–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[FMCSA Docket No. FMCSA–2015–0060]

Qualification of Drivers; Exemption Applications; Diabetes Mellitus

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of final disposition.

SUMMARY: FMCSA confirms its decision to exempt 49 individuals from its rule prohibiting persons with insulin-treated diabetes mellitus (ITDM) from operating commercial motor vehicles (CMVs) in interstate commerce. The exemptions enable these individuals to operate CMVs in interstate commerce.

DATES: The exemptions were effective on July 7, 2015. The exemptions expire on July 7, 2017.

FOR FURTHER INFORMATION CONTACT: Charles A. Horan, III, Director, Carrier, Driver and Vehicle Safety Standards, (202) 366–4001, *fmcsamedical@dot.gov,* FMCSA, Room W64–224, Department of Transportation, 1200 New Jersey Avenue SE., Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Electronic Access

You may see all the comments online through the Federal Document Management System (FDMS) at: *http://www.regulations.gov.*

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* and/or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue

SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

II. Background

On June 4, 2015, FMCSA published a notice of receipt of Federal diabetes exemption applications from 49 individuals and requested comments from the public (80 FR 31949). The public comment period closed on July 6, 2015, and no comments were received.

FMCSA has evaluated the eligibility of the 49 applicants and determined that granting the exemptions to these individuals would achieve a level of safety equivalent to or greater than the level that would be achieved by complying with the current regulation 49 CFR 391.41(b)(3).

Diabetes Mellitus and Driving Experience of the Applicants

The Agency established the current requirement for diabetes in 1970 because several risk studies indicated that drivers with diabetes had a higher rate of crash involvement than the general population. The diabetes rule provides that ''A person is physically qualified to drive a commercial motor vehicle if that person has no established medical history or clinical diagnosis of diabetes mellitus currently requiring insulin for control'' (49 CFR 391.41(b)(3)).

FMCSA established its diabetes exemption program, based on the Agency's July 2000 study entitled ''A Report to Congress on the Feasibility of a Program to Qualify Individuals with Insulin-Treated Diabetes Mellitus to Operate in Interstate Commerce as Directed by the Transportation Act for the 21st Century.'' The report concluded that a safe and practicable protocol to allow some drivers with ITDM to operate CMVs is feasible. The September 3, 2003 (68 FR 52441), **Federal Register** notice in conjunction with the November 8, 2005 (70 FR 67777), **Federal Register** notice provides the current protocol for allowing such drivers to operate CMVs in interstate commerce.

These 49 applicants have had ITDM over a range of one to 43 years. These applicants report no severe hypoglycemic reactions resulting in loss of consciousness or seizure, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning symptoms, in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the past 5 years. In each case, an endocrinologist verified that the driver has demonstrated a willingness to properly monitor and manage his/her diabetes mellitus, received education related to diabetes management, and is on a stable insulin regimen. These drivers report no other disqualifying conditions, including diabetes-related complications. Each meets the vision requirement at 49 CFR 391.41(b)(10).

The qualifications and medical condition of each applicant were stated and discussed in detail in the June 4, 2015, **Federal Register** notice and they will not be repeated in this notice.

III. Discussion of Comments

FMCSA received no comments in this proceeding.

IV. Basis for Exemption Determination

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the diabetes requirement in 49 CFR 391.41(b)(3) if the exemption is likely to achieve an equivalent or greater level of safety than would be achieved without the exemption. The exemption allows the applicants to operate CMVs in interstate commerce.

To evaluate the effect of these exemptions on safety, FMCSA considered medical reports about the applicants' ITDM and vision, and reviewed the treating endocrinologists' medical opinion related to the ability of the driver to safely operate a CMV while using insulin.

Consequently, FMCSA finds that in each case exempting these applicants from the diabetes requirement in 49 CFR 391.41(b)(3) is likely to achieve a level of safety equal to that existing without the exemption.

V. Conditions and Requirements

The terms and conditions of the exemption will be provided to the applicants in the exemption document and they include the following: (1) That each individual submit a quarterly monitoring checklist completed by the treating endocrinologist as well as an annual checklist with a comprehensive medical evaluation; (2) that each individual reports within 2 business days of occurrence, all episodes of severe hypoglycemia, significant complications, or inability to manage diabetes; also, any involvement in an accident or any other adverse event in a CMV or personal vehicle, whether or not it is related to an episode of hypoglycemia; (3) that each individual provide a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (4) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy in his/her driver's qualification file if he/she is self-employed. The driver must also have a copy of the certification when driving, for presentation to a duly authorized Federal, State, or local enforcement official.

VI. Conclusion

Based upon its evaluation of the 49 exemption applications, FMCSA exempts the following drivers from the diabetes requirement in 49 CFR 391.41(b)(10), subject to the requirements cited above 949 CFR 391.64(b)):

Craig S. Barton (UT)
Kevin H. Bennerson (NY)
Eugene Butler (AR)
Dominick M. Ciuffreda (MA)
Allen D. Clise (MD)
John W. Dillard (TX)
Derek P. Elkins (AZ)
Joshua J. Ellett (IN)
Raymond C. Erschen (PA)
Dominic C. Frisina (PA)
David D. Gambill (NC)
Dennis T. Gannon (NJ)
Arnold W. Geske (MN)
Alan G. Gladhill (MD)
Richard A. Hall (IL)
Dwight L. Hawkins (NC)
Craig L. Jackson (WY)
Wayne A. Jadezuk (NY)
Lee L. Kropp (WI)
Douglas B. Lampela (MI)
David E. Lawton (MA)
Babe A. Lisai (NY)
Adrian Martinez-Alba (TX)
Robert S. Medberry (OH)
Daniel Mendolia (NY)
Gary L. Mjoness (ND)
Marty G. Niles (MT)
Timothy W. Olden (NJ)
John Palermo (NJ)
Dennis P. Pantone (NY)
John N. Peterson (WI)
Robert L. Potter, Jr. (NH)
Todd M. Raether (NE)
Michael A. Ramsey (CT)
Gene P. Rhodes Sr. (PA)
Peter B. Rzadkowski, Jr. (IL)
Jeffrey J. Salvador (MI)
Michael A. Scavotto (MA)
Michael Schmidt (PA)
Steven J. Schmitt (MN)
Carl J. Schneider (PA)
John R. Sherbondy (PA)
Douglas J. Smith (NY)

Johnathan C. Steffes (CA)
Carmen M. Stellitano (PA)
Andy L. Strommenger (CO)
Jared Villa (ND)
Robert T. Warriner (NJ)
Ellis E. Wilkins (MA)

In accordance with 49 U.S.C. 31136(e) and 31315 each exemption is valid for two years unless revoked earlier by FMCSA. The exemption will be revoked if the following occurs: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315. If the exemption is still effective at the end of the 2-year period, the person may apply to FMCSA for a renewal under procedures in effect at that time.

Issued on: August 7, 2015.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2014–0373]

Qualification of Drivers; Exemption Applications; Narcolepsy

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of denial of exemption applications.

SUMMARY: FMCSA announces its decision to deny applications from three individuals seeking exemptions from the prohibitions against operating a commercial motor vehicle (CMV) in interstate commerce by persons with: (1) Either a clinical diagnosis of epilepsy or any other condition that is likely to cause a loss of consciousness or any loss of ability to operate a CMV safely, or (2) a mental, nervous, organic, or functional disease or psychiatric disorder likely to interfere with his/her ability to drive a commercial motor vehicle safely. FMCSA has statutory authority to exempt individuals from certain parts of the Federal Motor Carrier Safety Regulations, if the exemptions granted will not compromise safety. The Agency must conclude that granting these exemptions provides a level of safety that will be equivalent to or greater than the level of safety maintained without the exemptions for these CMV drivers. Based on a review of the applications and following an opportunity for public comment, FMCSA has concluded that the individuals did not demonstrate that they could achieve a level of safety that is equivalent to, or greater than, the level of safety that would be obtained by complying with the regulation.

DATES: This decision is effective July 24, 2015.

FOR FURTHER INFORMATION CONTACT: Charles A. Horan III, Director, Office of Carrier, Driver and Vehicle Safety Standards, (202) 366–4001, or via email at *fmcsamedical@dot.gov,* or by letter FMCSA, Room W64–224, Department of Transportation, 1200 New Jersey Avenue SE., Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the Federal Motor Carrier Safety Regulations for a 2-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' FMCSA can renew exemptions at the end of each 2-year period. The three individuals listed in this notice have each requested such an exemption from the physical qualification requirements in 49 CFR 391.41(b)(8) and (b)(9), which applies to drivers of CMVs in interstate commerce. Accordingly, the Agency evaluates the qualifications of each applicant to determine whether granting an exemption will achieve the required level of safety mandated by statute.

Narcolepsy is a chronic neurological disorder caused by autoimmune destruction of hypocretin-producing neurons inhibiting the brain's ability to regulate sleep-wake cycles normally. Persons with narcolepsy experience frequent excessive daytime sleepiness, comparable to how non-narcoleptics feel after 24 to 48 hours of sleep deprivation, as well as disturbed nocturnal sleep, which often is confused with insomnia. See NIH Narcolepsy Fact Sheet at *www.ninds.nih.gov/disorders/narcolepsy/detail_narcolepsy.htm.*

The Agency considered the topic of narcolepsy and the potential impact on commercial drivers in a 2009 Evidence Report. The Evidence Report ''Narcolepsy (with and without cataplexy) and Commercial Motor Vehicle Driver Safety'' addressed several key questions.[1]

Key Question 1: Are individuals with narcolepsy (with and without cataplexy) at an increased risk for a motor vehicle crash when compared to comparable individuals without the disorder?

Key Question 2: Do currently recommended treatments for narcolepsy reduce the risk for a motor vehicle crash?

Key question 2 was further divided into several questions concerning the impact of various medication therapies for narcolepsy on driver safety. The complete report is included in the docket FMCSA 2014–0373.

The evidence report reviewed studies from the available literature and evaluated outcomes on measures of Excessive Daytime Sleepiness (EDS), cataplexy, event rate, measures of cognitive and psychomotor function, and driving performance. For key question 1, the currently available evidence (both direct and indirect) supports the contention that drivers with narcolepsy are at an increased risk for a motor vehicle crash when compared to otherwise similar individuals who do not have the disorder. The strength of the evidence was rated as strong. The direct evidence (from three crash studies) (study quality rating of ''Low'') conducted with non-CMV drivers showed that individuals with narcolepsy are at an increased risk for a crash compared to individuals who do not have narcolepsy. The indirect evidence (studies of driving tests and driving simulation, quality rating ''moderate''), examined factors associated with simulated driving outcomes, (driving performance, tracking error, fewer correct responses and more instances of going out of bounds compared to healthy controls). In summary, while there are limitations in the quality of the studies that examined direct crash risk in the evidence base, all study results showed a strong effect size and statistical significance. Indirect evidence of crash provides strong support for the direct crash study findings. Based upon available information, there is strong evidence that non-commercial drivers with narcolepsy are at an increased risk of crash.

Concerning key question 2 and its sub-questions, the American Academy of Sleep Medicine (AASM) and the European Federation of Neurological Societies recommend modafinil as the first-line of treatment and

[1] Evidence Report: Narcolepsy (with and without cataplexy) and Commercial Motor Vehicle Driver Safety; October 6, 2009.

methylphenidate as the second-line of treatment. The AASM also recommends amphetamine, methamphetamine, or dextroamphetamine as alternative second-line treatments. No studies that directly examined the impact of treatment with modafinil, armodafinil, sodium oxybate (used with narcolepsy with cataplexy), or anti-depressants on crash risk or driving performance were identified during the literature searches. Evidence-based conclusions pertaining to treatment with these medications on crash risk and driving performance could not be drawn.

Currently available evidence suggests that amphetamines and/or methylphenidate are effective in improving symptoms of EDS in individuals with narcolepsy (quality of studies range from ''moderate to low''). However, these improvements do not result in levels of daytime sleepiness that can be considered to be normal in the vast majority of individuals. Evidence-based conclusions pertaining to the impact of treatment with amphetamines, methylphenidate, or other related stimulant drugs on cognitive and psychomotor function among individuals with narcolepsy cannot be drawn at this time.

In January 2010, the FMCSA's Medical Review Board (MRB) recommended that individuals with narcolepsy be ineligible for a commercial driver's license, even with treatment.[2]

Discussion of Public Comments

The FMCSA published the names of three individuals seeking exemption in a **Federal Register** Notice, on April 17, 2015, and requested public comment. The public comment period closed on May 18, 2015. A total of 17 commenters responded. The majority of commenters were in favor of the applicants continuing to drive CMV's with Narcolepsy. Fourteen commenters consisting mainly of private citizens stated that the individual drivers listed in the notice were responsible drivers, were stable and compliant with their medication therapy, had safe driving histories, and believed that the individuals would continue to be safe drivers while on medication The State of New York's medical consultants reviewed the docket and suggested that drivers with narcolepsy be allowed to operate commercially only if they have been treated medically and have been event-free for at least one year. Three commenters did not support exemption for drivers with narcolepsy. One anonymous commenter encouraged the FMCSA not to grant exemptions to these individuals due to concerns of the high risk of the underlying medical condition in combination with operating a large CMV.

FMCSA Response

To evaluate the effects of these exemption requests on safety, FMCSA reviewed and considered the content of each request individually and all comments received.

FMCSA acknowledges comments received attesting that individual applicants are responsible drivers currently on a stable therapeutic regimen which includes medication therapy. The Agency considered available medical and scientific data concerning medication therapy for narcolepsy. As discussed in the background section of this notice, evidence-based conclusions pertaining to treatment with medications on crash risk and driving performance could not be drawn.

Concerning ATAs comments recommending granting fewer exemptions and revising the current medical standards, FMCSA acknowledges ATA's concerns. The FMCSA has statutory authority (49 U.S.C. 31136(e) and 31315), to consider granting exemptions from the Federal Motor Carrier Safety Regulations for a 2-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The FMCSA reviews its medical standards through the use of evidence reports, various medical expert panels and the Agency's Medical Review Board and proposes evidence-based revisions to the medical standards through the rulemaking process which takes a considerable length of time.

The exemption process is the Agency's most viable alternative in the short term to consider whether drivers with disqualifying medical conditions and who are found to meet an equivalent level of safety, should be permitted to operate in interstate commerce.

Conclusion

FMCSA evaluated the three individual exemption requests on their merits and available data from FMCSA's Evidence Reports, the Medical Review Board recommendations and public comments received. The Agency has determined that the available medical and scientific literature and research provides insufficient data to enable the Agency to conclude that granting the exemptions would achieve a level of safety equivalent to or greater than the level of safety maintained without the exemption. Each applicant has, prior to this notice, received a letter of final disposition on his/her exemption request. Those decision letters outlined fully the basis for the denial and constitute final Agency action. The list published today summarizes the Agency's recent denials as required under 49 U.S.C. 31315(b)(4).

The following three applicants are denied exemptions from the physical qualification standards in [49 CFR 391.41(b)(8)] and [49 CFR 391.41(b)(9)]: Thomas Skagen, Charles Larry Peterson, and Stanley Jandreau.

Qualification of Drivers; Exemption Applications; Vision

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew the exemptions from the vision requirement in the Federal Motor Carrier Safety Regulations for 22 individuals. FMCSA has statutory authority to exempt individuals from the vision requirement if the exemptions granted will not compromise safety. The Agency has concluded that granting these exemption renewals will provide a level of safety that is equivalent to or greater than the level of safety maintained without the exemptions for these commercial motor vehicle (CMV) drivers.

DATES: This decision is effective September 22, 2015. Comments must be received on or before September 16, 2015.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) numbers: Docket No. [Docket No. FMCSA–2000–8398; FMCSA–2003–14504; FMCSA–2005–20560; FMCSA–2009–0154; FMCSA–

2009–0303; FMCSA–2011–0124], using any of the following methods:

• *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the on-line instructions for submitting comments.

• *Hand Delivery or Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

• *Fax:* 1–202–493–2251.

Instructions: Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received without change to *http://www.regulations.gov,* including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* at any time or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Federal Docket Management System (FDMS) is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

FOR FURTHER INFORMATION CONTACT: Charles A. Horan, III, Director, Carrier, Driver and Vehicle Safety Standards, 202–366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m. Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may renew an exemption from the vision requirements in 49 CFR 391.41(b)(10), which applies to drivers of CMVs in interstate commerce, for a two-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The procedures for requesting an exemption (including renewals) are set out in 49 CFR part 381.

II. Exemption Decision

This notice addresses 22 individuals who have requested renewal of their exemptions in accordance with FMCSA procedures. FMCSA has evaluated these 22 applications for renewal on their merits and decided to extend each exemption for a renewable two-year period. They are:
Carl W. Adams (MN)
Michael K. Adams (OH)
Mark R. Anderson (MI)
Eleazar R. Balli (TX)
Darrell W. Bayless (TX)
Keith A. Bliss (NY)
Lloyd D. Burgess (OH)
Clifford D. Carpenter (MO)
Cecil A. Evey (ID)
Kamal A. Gaddah (OH)
Terry L. Hudgens (OH)
Eric M. Kousgaard (NE)
James F. McMahon, Jr. (NH)
Samuel A. Miller (IN)
Angelo D. Rogers (AL)
Larry T. Rogers (IL)
Ricky J. Sanderson (UT)
Marcial Soto-Rivas (OR)
Boyd D. Stamey (NC)
David C. Sybesma (ID)
Temesgn H. Teklezig (WA)
Matthew K. Tucker (MN)

The exemptions are extended subject to the following conditions: (1) That each individual has a physical examination every year (a) by an ophthalmologist or optometrist who attests that the vision in the better eye continues to meet the requirements in 49 CFR 391.41(b)(10), and (b) by a medical examiner who attests that the individual is otherwise physically qualified under 49 CFR 391.41; (2) that each individual provides a copy of the ophthalmologist's or optometrist's report to the medical examiner at the time of the annual medical examination; and (3) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file and retains a copy of the certification on his/her person while driving for presentation to a duly authorized Federal, State, or local enforcement official. Each exemption will be valid for two years unless rescinded earlier by FMCSA. The exemption will be rescinded if: (1) The person fails to comply with the terms and conditions of the exemption; (2) the exemption has resulted in a lower level of safety than was maintained before it was granted; or (3) continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315.

III. Basis for Renewing Exemptions

Under 49 U.S.C. 31315(b)(1), an exemption may be granted for no longer than two years from its approval date and may be renewed upon application for additional two year periods. In accordance with 49 U.S.C. 31136(e) and 31315, each of the 22 applicants has satisfied the entry conditions for obtaining an exemption from the vision requirements (65 FR 78256; 66 FR 16311; 68 FR 13360; 68 FR 19598; 68 FR 33570; 70 FR 12265; 70 FR 17504; 70 FR 25878; 70 FR 30997; 72 FR 11426; 72 FR 28093; 72 FR 40362; 74 FR 19270; 74 FR 20523; 74 FR 34394; 74 FR 37295; 74 FR 48343; 74 FR 60022; 75 FR 4623; 76 FR 34136; 76 FR 37173; 76 FR 53708; 76 FR 54530; 76 FR 55463; 78 FR 78477; 79 FR 53708). Each of these 22 applicants has requested renewal of the exemption and has submitted evidence showing that the vision in the better eye continues to meet the requirement specified at 49 CFR 391.41(b)(10) and that the vision impairment is stable. In addition, a review of each record of safety while driving with the respective vision deficiencies over the past two years indicates each applicant continues to meet the vision exemption requirements.

These factors provide an adequate basis for predicting each driver's ability to continue to drive safely in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each renewal applicant for a period of two years is likely to achieve a level of safety equal to that existing without the exemption.

IV. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2000–8398; FMCSA–2003–14504; FMCSA–2005–20560; FMCSA–2009–0154; FMCSA–2009–0303; FMCSA–2011–0124), indicate the specific section of this document to

which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, got to *http://www.regulations.gov* and put the docket number, ''FMCSA–2000–8398; FMCSA–2003–14504; FMCSA–2005–20560; FMCSA–2009–0154; FMCSA–2009–0303; FMCSA–2011–0124'' in the ''Keyword'' box, and click ''Search.'' When the new screen appears, click on ''Comment Now!'' button and type your comment into the text box in the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope. FMCSA will consider all comments and material received during the comment period and may change this notice based on your comments.

Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble as being available in the docket, go to *http://www.regulations.gov* and in the search box insert the docket number, ''FMCSA–2000–8398; FMCSA–2003–14504; FMCSA–2005–20560; FMCSA–2009–0154; FMCSA–2009–0303; FMCSA–2011–0124'' in the ''Keyword'' box and click ''Search.'' Next, click ''Open Docket Folder'' button choose the document listed to review. If you do not have access to the Internet, you may view the docket online by visiting the Docket Management Facility in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays.

Issued on: August 7, 2015.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA- 2015–0066]

Qualification of Drivers; Exemption Applications; Diabetes Mellitus

AGENCY: Federal Motor Carrier Safety Administration (FMCSA).

ACTION: Notice of applications for exemptions; request for comments.

SUMMARY: FMCSA announces receipt of applications from 54 individuals for exemption from the prohibition against persons with insulin-treated diabetes mellitus (ITDM) operating commercial motor vehicles (CMVs) in interstate commerce. If granted, the exemptions would enable these individuals with ITDM to operate CMVs in interstate commerce.

DATES: Comments must be received on or before September 16, 2015.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket No. FMCSA–2015–0066 using any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the on-line instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.
- *Fax:* 1–202–493–2251.

Instructions: Each submission must include the Agency name and the docket numbers for this notice. Note that all comments received will be posted without change to *http://www.regulations.gov,* including any personal information provided. Please see the Privacy Act heading below for further information.

Docket: For access to the docket to read background documents or comments, go to *http://www.regulations.gov* at any time or Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Federal Docket Management System (FDMS) is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *www.dot.gov/privacy.*

FOR FURTHER INFORMATION CONTACT: Charles A. Horan, III, Director, Carrier, Driver and Vehicle Safety Standards, (202) 366–4001, *fmcsamedical@dot.gov,* FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64–224, Washington, DC 20590–0001. Office hours are from 8:30 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the Federal Motor Carrier Safety Regulations for a 2-year period if it finds ''such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption.'' The statute also allows the Agency to renew exemptions at the end of the 2-year period. The 54 individuals listed in this notice have recently requested such an exemption from the diabetes prohibition in 49 CFR 391.41(b) (3), which applies to drivers of CMVs in interstate commerce. Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the exemption will achieve the required level of safety mandated by statute.

II. Qualifications of Applicants

Joshua E. Adkins

Mr. Adkins, 65, has had ITDM since 2013. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Adkins understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Adkins meets the

requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Kansas.

Rosendo R. Amador

Mr. Amador, 61, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Amador understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Amador meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Texas.

Thomas A. Ardoin

Mr. Ardoin, 52, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Ardoin understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Ardoin meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Louisiana.

Richard L. Arsenault

Mr. Arsenault, 59, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Arsenault understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Arsenault meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Texas.

George H. Bonney, Jr.

Mr. Bonney, 58, has had ITDM since 2005. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Bonney understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Bonney meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New Hampshire.

Paul M. Boucher

Mr. Boucher, 46, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Boucher understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Boucher meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class E CDL from Michigan.

Tiffany C. Carvalho

Ms. Carvalho, 44, has had ITDM since 2014. Her endocrinologist examined her in 2015 and certified that she has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. Her endocrinologist certifies that Ms. Carvalho understands diabetes management and monitoring has stable control of her diabetes using insulin, and is able to drive a CMV safely. Ms. Carvalho meets the requirements of the vision standard at 49 CFR 391.41(b)(10). Her optometrist examined her in 2015 and certified that she does not have diabetic retinopathy. She holds an operator's license from Minnesota.

Larry J. Christiansen

Mr. Christiansen, 67, has had ITDM since 2010. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Christiansen understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Christiansen meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

Cynthia J. Claunch

Ms. Claunch, 57, has had ITDM since 2013. Her endocrinologist examined her in 2015 and certified that she has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. Her endocrinologist certifies that Ms. Claunch understands diabetes management and monitoring has stable control of her diabetes using insulin, and is able to drive a CMV safely. Ms. Claunch meets the requirements of the vision standard at 49 CFR 391.41(b)(10). Her ophthalmologist examined her in 2015 and certified that she does not have diabetic retinopathy. She holds a Class A CDL from New Mexico.

Stephen C. Crescentini

Mr. Crescentini, 46, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12

months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Crescentini understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Crescentini meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New Jersey.

John J. D'Agostino

Mr. D'Agostino, 71, has had ITDM since 2010. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. D'Agostino understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. D'Agostino meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from New Jersey.

James R. Ditman

Mr. Ditman, 43, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Ditman understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Ditman meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Indiana.

Eric D. Egan

Mr. Egan, 29, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Egan understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Egan meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Illinois.

Alva Eldridge

Mr. Eldridge, 69, has had ITDM since 2011. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Eldridge understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Eldridge meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Illinois.

Walter R. Elser

Mr. Elser, 65, has had ITDM since 2006. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Elser understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Elser meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Vermont.

Adam C. Exum

Mr. Exum, 21, has had ITDM since 2008. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Exum understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Exum meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Georgia.

Ryan S. Farrell

Mr. Farrell, 27, has had ITDM since 1992. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Farrell understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Farrell meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds an operator's license from Massachusetts.

Patrick F. Felix

Mr. Felix, 57, has had ITDM since 2013. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Felix understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Felix meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Wisconsin.

Gary M. Fosnaught

Mr. Fosnaught, 55, has had ITDM since 1995. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Fosnaught understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Fosnaught meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Pennsylvania.

Jermaine Galle

Mr. Galle, 43, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Galle understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Galle meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Georgia.

Gary A. Gross

Mr. Gross, 66, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Gross understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Gross meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from South Dakota.

Terry L. Guynes

Mr. Guynes, 58, has had ITDM since 2007. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Guynes understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Guynes meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Missouri.

Colin W. Hale

Mr. Hale, 22, has had ITDM since 2006. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Hale understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hale meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from New York.

Clarence Hill

Mr. Hill, 68, has had ITDM since 2010. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Hill understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hill meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New York.

Marcus Hughes

Mr. Hughes, 42, has had ITDM since 2012. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Hughes understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hughes meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Georgia.

Paul J. Lennon

Mr. Lennon, 59, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Lennon understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Lennon meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Illinois.

Michael C. Lewis

Mr. Lewis, 36, has had ITDM since 1980. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Lewis understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Lewis meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His

ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds an operator's license from South Dakota.

Lon A. Mingo

Mr. Mingo, 47, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Mingo understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Mingo meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

Robert L. Moberly

Mr. Moberly, 74, has had ITDM since 2010. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Moberly understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Moberly meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Oregon.

Jason L. Montgomery

Mr. Montgomery, 39, has had ITDM since 1979. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Montgomery understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Montgomery meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable proliferative diabetic retinopathy. He holds a Class A CDL from Washington.

John F. Mortieau

Mr. Mortieau, 65, has had ITDM since 2007. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Mortieau understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Mortieau meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Montana.

Alexander Musalin

Mr. Musalin, 43, has had ITDM since 1994. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Musalin understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Musalin meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Washington.

Clark E. Najac

Mr. Najac, 59, has had ITDM since 2008. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Najac understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Najac meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from New York.

Matthew S. Ness

Mr. Ness, 25, has had ITDM since 2011. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Ness understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Ness meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Wisconsin.

Andrew T. Oezer

Mr. Oezer, 21, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Oezer understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Oezer meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class C CDL from Michigan.

Vanja Pazin

Mr. Pazin, 44, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or

more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Pazin understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Pazin meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Oregon.

Troy A. Pearl

Mr. Pearl, 57, has had ITDM since 2000. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Pearl understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Pearl meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Washington.

Randell J. Pecenka

Mr. Pecenka, 30, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Pecenka understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Pecenka meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Iowa.

Leonard M. Radford

Mr. Radford, 67, has had ITDM since 2012. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Radford understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Radford meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class B CDL from Indiana.

Jerry J. Rava

Mr. Rava, 77, has had ITDM since 2013. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Rava understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Rava meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from California.

Isaac E. Ridenour

Mr. Ridenour, 59, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Ridenour understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Ridenour meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New Mexico.

William J. Rixon, Jr.

Mr. Rixon, 63, has had ITDM since 2011. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Rixon understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Rixon meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from New Jersey.

Matias Rodriguez, Jr.

Mr. Rodriguez, 57, has had ITDM since 2001. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Rodriguez understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Rodriguez meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Connecticut.

William J. Schrade

Mr. Schrade, 62, has had ITDM since 2012. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Schrade understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Schrade meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Connecticut.

John W. Schwirian

Mr. Schwirian, 57, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that

he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Schwirian understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Schwirian meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Pennsylvania.

Shain L. Simpson

Mr. Simpson, 47, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Simpson understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Simpson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Utah.

Neil E. Smith

Mr. Smith, 27, has had ITDM since 2000. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Smith understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Smith meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Kansas.

Timothy R. Sobczynski

Mr. Sobczynski, 50, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Sobczynski understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Sobczynski meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Ohio.

Joey F. Starnes

Mr. Starnes, 26, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Starnes understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Starnes meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Alabama.

Joshua R. Stieb

Mr. Stieb, 22, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Stieb understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Stieb meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Colorado.

Donald L. Strand

Mr. Strand, 74, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Strand understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Strand meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Montana.

Rick L. Vosburg

Mr. Vosburg, 61, has had ITDM since 2009. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Vosburg understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Vosburg meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from California.

William G. Wressell

Mr. Wressell, 69, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Wressell understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Wressell meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that

he does not have diabetic retinopathy. He holds a Class A CDL from Washington.

Randy P. Young

Mr. Young, 49, has had ITDM since 2005. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Young understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Young meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Indiana.

III. Request for Comments

In accordance with 49 U.S.C. 31136(e) and 31315, FMCSA requests public comment from all interested persons on the exemption petitions described in this notice. We will consider all comments received before the close of business on the closing date indicated in the date section of the notice.

FMCSA notes that section 4129 of the Safe, Accountable, Flexible and Efficient Transportation Equity Act: A Legacy for Users requires the Secretary to revise its diabetes exemption program established on September 3, 2003 (68 FR 52441).[1] The revision must provide for individual assessment of drivers with diabetes mellitus, and be consistent with the criteria described in section 4018 of the Transportation Equity Act for the 21st Century (49 U.S.C. 31305).

Section 4129 requires: (1) Elimination of the requirement for 3 years of experience operating CMVs while being treated with insulin; and (2) establishment of a specified minimum period of insulin use to demonstrate stable control of diabetes before being allowed to operate a CMV.

In response to section 4129, FMCSA made immediate revisions to the diabetes exemption program established by the September 3, 2003 notice. FMCSA discontinued use of the 3-year driving experience and fulfilled the requirements of section 4129 while continuing to ensure that operation of CMVs by drivers with ITDM will achieve the requisite level of safety required of all exemptions granted under 49 U.S.C. 31136(e).

Section 4129(d) also directed FMCSA to ensure that drivers of CMVs with ITDM are not held to a higher standard than other drivers, with the exception of limited operating, monitoring and medical requirements that are deemed medically necessary.

The FMCSA concluded that all of the operating, monitoring and medical requirements set out in the September 3, 2003 notice, except as modified, were in compliance with section 4129(d). Therefore, all of the requirements set out in the September 3, 2003 notice, except as modified by the notice in the **Federal Register** on November 8, 2005 (70 FR 67777), remain in effect.

IV. Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to *http://www.regulations.gov* and in the search box insert the docket number FMCSA–2015–0066 and click the search button. When the new screen appears, click on the blue ''Comment Now!'' button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and material received during the comment period and may change this proposed rule based on your comments. FMCSA may issue a final rule at any time after the close of the comment period.

V. Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble, To submit your comment online, go to *http://www.regulations.gov* and in the search box insert the docket number FMCSA–2015–0066 and click ''Search.'' Next, click ''Open Docket Folder'' and you will find all documents and comments related to the proposed rulemaking.

Issued on: August 7, 2015.

Larry W. Minor,

Associate Administrator for Policy.

[FR Doc. 2015–20186 Filed 8–14–15; 8:45 am]

BILLING CODE 4910–EX–P

[1] Section 4129(a) refers to the 2003 notice as a ''final rule.'' However, the 2003 notice did not issue a ''final rule'' but did establish the procedures and standards for issuing exemptions for drivers with ITDM.

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[Docket No. AB 1235X]

MCM Rail Services LLC, d/b/a Baltimore Industrial Railroad—Petition for Discontinuance of Service Exemption—in Baltimore County, Md.

On July 28, 2015, MCM Rail Services LLC, d/b/a Baltimore Industrial Railroad (MCM Rail) filed with the Surface Transportation Board (Board) a petition under 49 U.S.C. 10502 for exemption from the provisions of 49 U.S.C. 10903 to discontinue rail service over an approximately 12-mile line of railroad in Sparrows Point, Baltimore County, Md. (the Line). MCM Rail states that there are no mileposts on the Line. The Line is the entire system operated by MCM Rail. The Line traverses through United States Postal Service Zip Code 21219, and there are no stations on the Line.

MCM Rail states that the Line is stub-ended and therefore not capable of handling overhead traffic. Upon discontinuance of service by MCM Rail, rail service over the Line will be provided by the owner of the Line, Sparrows Point Rail, LLC (formerly known as Hilco SP Rail LLC). To MCM Rail's knowledge, the Line does not contain federally granted rights-of-way.

Because this is the discontinuance of the entire system operated by MCM Rail, no labor conditions will be imposed. Additionally, because this is a discontinuance proceeding and not an abandonment proceeding, trail use/rail banking and public use conditions are not appropriate.

By issuance of this notice, the Board is instituting an exemption proceeding pursuant to 49 U.S.C. 10502(b). A final decision will be issued by November 13, 2015.

Any offer of financial assistance (OFA) under 49 CFR 1152.27(b)(2) to subsidize continued rail service will be due no later than November 23, 2015, or 10 days after the service of a decision granting the petition for exemption, whichever occurs sooner. Each offer must be accompanied by a $1,600 filing fee. *See* 49 CFR 1002.2(f)(25).

All filings in response to this notice must refer to Docket AB 1235X and must be sent to: (1) Surface Transportation Board, 395 E Street SW., Washington, DC 20423–0001; and (2) John K. Fiorilla, Esq., Capehart Scatchard, 8000 Midlantic Drive, Suite 300, Mt. Laurel, NJ 08054. Replies to the petition are due on or before September 8, 2015.

Persons seeking further information concerning discontinuance procedures may contact the Board's Office of Public Assistance, Governmental Affairs, and Compliance at (202) 245–0238 or refer to the full abandonment and discontinuance regulations at 49 CFR pt. 1152. Questions concerning environmental issues may be directed to the Board's Office of Environmental Analysis (OEA) at (202) 245–0305.

Assistance for the hearing impaired is available through the Federal Information Relay Service (FIRS) at 1–800–877–8339.

Board decisions and notices are available on our Web site at *WWW.STB.DOT.GOV*.

Decided: August 12, 2015.

By the Board, Rachel D. Campbell, Director, Office of Proceedings

Kenyatta Clay,

Clearance Clerk.

BILLING CODE 4915–01–P

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

[Docket No. DOT–OST–2012–0087]

Advisory Committee for Aviation Consumer Protection

AGENCY: Office of the Secretary (OST), Department of Transportation (DOT).

ACTION: Notice of ninth meeting of advisory committee.

SUMMARY: This notice announces the ninth meeting of the Advisory Committee for Aviation Consumer Protection.

DATES: The ninth meeting of the advisory committee is scheduled for September 1, 2015, from 10:00 a.m. to 12:00 p.m., Eastern Time.

ADDRESSES: The meeting will be held in the Media Center (located on the lobby level of the West Building) at the U.S. Department of Transportation (DOT) headquarters, 1200 New Jersey Avenue SE., Washington, DC. Attendance is open to the public up to the room's capacity of 100 attendees. Since space is limited and access to the DOT headquarters building is controlled for security purposes, any member of the general public who plans to attend this meeting must notify the registration contact identified below no later than August 25, 2015.

FOR FURTHER INFORMATION CONTACT: To register to attend the meeting, please contact Amy Przybyla, Research Analyst, CENTRA Technology, Inc., *przybylaa@centratechnology.com;* 703–894–6962. For other information please contact Amna Arshad, Senior Attorney, Office of Aviation Enforcement and Proceedings, *amna.arshad@dot.gov;* U.S. Department of Transportation, 1200 New Jersey Ave. SE., Washington, DC, 20590; 202–366–9342 (phone), 202–366–5944 (fax).

SUPPLEMENTARY INFORMATION: On May 24, 2012, the Secretary, as mandated by Section 411 of the FAA Modernization and Reform Act of 2012 (Pub. L. 112–95, 126 Stat. 11 (2012)), established the Advisory Committee for Aviation Consumer Protection. The committee's charter, drafted in accordance with the Federal Advisory Committee Act, as amended, 5 U.S.C. App. 2, sets forth policies for the operation of the advisory committee and is available on the Department's Web site at *http://www.facadatabase.gov/committee/charters.aspx?cid=2448&aid=47.*

The ninth meeting of the committee is scheduled to take place from 10:00 a.m. to 12:00 p.m. Eastern Time on September 1, 2015, in the Media Center at the DOT headquarters, 1200 New Jersey Avenue SE., Washington, DC 20590. The committee will discuss the recommendations submitted to it during the past three public meetings on the following subjects: Voice calls, government-imposed taxes and fees, airline mergers and consolidations, space allocated per passenger on aircraft, airline frequent flyer programs, airline change/cancellation fees, mandatory hotel resort fees, and baggage allowances, fees and interlining. The committee will also provide its preliminary recommendations to the Department which will form the basis for a report to the Secretary on improvements to existing aviation consumer protection programs. This meeting will be open to the public and comments by members of the public are invited. Attendance will necessarily be limited by the size of the meeting room (maximum 100 attendees). We ask that any member of the general public who plans to attend the ninth meeting notify the registration contact noted above no later than August 25, 2015.

Additionally, DOT will stream the event live on the Internet and provide a link to the recorded webcast for future viewing at *www.dot.gov/airconsumer/ACACP.*

Members of the public may present written comments at any time. The docket number referenced above (DOT–OST–2012–0087, available at *https://www.regulations.gov*) has been established for committee documents including any written comments that may be filed.

Persons with a disability who plan to attend the meeting and require special accommodations, such as an interpreter for the hearing impaired, should notify the registration contact noted above no later than August 25, 2015.

Notice of this meeting is being provided in accordance with the Federal Advisory Committee Act and the General Services Administration regulations covering management of Federal advisory committees. (41 CFR part 102–3.)

Issued in Washington, DC, on August 11, 2015.

Blane A. Workie,

Assistant General Counsel for Aviation Enforcement & Proceedings, U.S. Department of Transportation.

[FR Doc. 2015–20190 Filed 8–14–15; 8:45 am]

BILLING CODE 4910–9X–P

UNITED STATES SENTENCING COMMISSION

Sentencing Guidelines for United States Courts

AGENCY: United States Sentencing Commission.

ACTION: Notice of final action regarding technical and conforming amendments to federal sentencing guidelines effective November 1, 2015.

SUMMARY: On April 30, 2015, the Commission submitted to the Congress amendments to the sentencing guidelines and official commentary, which become effective on November 1, 2015, unless Congress acts to the contrary. Such amendments and the reasons for amendment subsequently were published in the **Federal Register**. 80 FR 25782 (May 5, 2015). The Commission has made technical and conforming amendments, set forth in this notice, to commentary provisions and policy statements related to those amendments.

DATES: The Commission has specified an effective date of November 1, 2015, for the amendments set forth in this notice.

FOR FURTHER INFORMATION CONTACT: Jeanne Doherty, Public Affairs Officer, (202) 502–4502, *jdoherty@ussc.gov.*

SUPPLEMENTARY INFORMATION: The United States Sentencing Commission is an independent agency in the judicial branch of the United States Government. The Commission promulgates sentencing guidelines and policy statements for federal sentencing courts pursuant to 28 U.S.C. 994(a). The Commission also periodically reviews and revises previously promulgated guidelines pursuant to 28 U.S.C. 994(o) and generally submits guideline amendments to Congress pursuant to 28 U.S.C. 994(p) not later than the first day of May each year. Absent action of Congress to the contrary, submitted amendments become effective by operation of law on the date specified by the Commission (generally November 1 of the year in which the amendments are submitted to Congress). *See* 28 U.S.C. § 994(p).

Unlike amendments made to sentencing guidelines, amendments to commentary and policy statements may be made at any time and are not subject to congressional review. To the extent practicable, the Commission endeavors to include amendments to commentary and policy statements in any submission of guideline amendments to Congress. Occasionally, however, the Commission determines that technical and conforming changes to commentary and policy statements are necessary. This notice sets forth technical and conforming amendments to commentary and policy statements that will become effective on November 1, 2015.

Authority: USSC Rules of Practice and Procedure 4.1.

Patti B. Saris,

Chair.

1. Amendment:

The Commentary to § 1B1.3 captioned ''Application Notes'', as amended by Amendment 1 of the amendments submitted to Congress on April 30, 2015, is further amended in Note 1 by inserting as the heading the following: ''*Sentencing Accountability and Criminal Liability.*—''.

The Commentary to § 1B1.3 captioned ''Application Notes'', as amended by Amendment 1 of the amendments submitted to Congress on April 30, 2015, is further amended by renumbering Notes 5 through 12 according to the following table:

Before amendment	After amendment
5	5(A)
11	5(B)
11(A)	5(B)(i)
11(B)	5(B)(ii)
10	5(C)
6	6(A)
7	6(B)
8	7
9	8
12	9

and by rearranging those Notes, as so renumbered, to place them in proper numerical order.

The Commentary to § 1B1.3 captioned ''Application Notes'', as so renumbered and rearranged, is further amended by inserting headings at the beginning of certain notes, as follows (with Notes referred to by their new numbers):

Note	*Heading to be inserted at the beginning*
5	*Application of Subsection (a)(2).*—
5(A)	*Relationship to Grouping of Multiple Counts.*—
5(B)	*''Same Course of Conduct or Common Scheme or Plan''.*—
5(C)	*Conduct Associated with a Prior Sentence.*—
6	*Application of Subsection (a)(3).*—
6(A)	*Definition of ''Harm''.*—
6(B)	*Risk or Danger of Harm.*—
7	*Factors Requiring Conviction under a Specific Statute.*—
8	*Partially Completed Offense.*—
9	*Solicitation, Misprision, or Accessory After the Fact.*—

The Commentary to § 2D1.1 captioned ''Application Notes'', is amended in Note 8(D), in the heading relating to Date Rape Drugs (except flunitrazipam, GHB, or ketamine), by striking ''flunitrazipam'' and inserting ''flunitrazepam''.

The Commentary to § 2K2.1 captioned ''Application Notes'', as amended by Amendment 1 of the amendments submitted to Congress on April 30, 2015, is further amended in Note 14(E) by striking ''Application Note 11'' both places such term appears and inserting ''Application Note 5(B)''.

The Commentary to § 2X3.1 captioned ''Application Notes'', as amended by Amendment 1 of the amendments submitted to Congress on April 30, 2015, is further amended in Note 1 by striking ''Application Note 12'' and inserting ''Application Note 9''.

The Commentary to § 2X4.1 captioned ''Application Notes'', as amended by Amendment 1 of the amendments submitted to Congress on April 30, 2015, is further amended in Note 1 by striking ''Application Note 12'' and inserting ''Application Note 9''.

The Commentary to § 8C2.8 captioned ''Application Notes'' is amended in Note 7 by striking the period at the end and inserting '').''.

Reason for Amendment: This amendment makes certain technical and conforming changes to commentary in the *Guidelines Manual.*

First, the amendment reorganizes the commentary to § 1B1.3 (Relevant Conduct (Factors that Determine the Guideline Range)), so that the order of the application notes better reflects the order of the guideline provisions to which they relate. The Commission had previously reorganized notes 1 and 2 into notes 1 through 4, also redesignating notes 3 through 10 as notes 5 through 12, in a recently promulgated amendment. *See* Amendment 1 of the amendments submitted by the Commission to Congress on April 30, 2015, 80 FR 25782 (May 5, 2015). This amendment further rearranges the commentary, specifically notes 5 through 12. The following table shows the renumbering of notes 5 through 12 that would result from the amendment in comparison to the current *Guidelines Manual* and the recently promulgated amendment to § 1B1.3.

2014 Guidelines Manual	*Recently Promulgated Amendment*	*Technical Amendment*
3	5	5(A)
9	11	5(B)
8	10	5(C)
4	6	6(A)
5	7	6(B)
6	8	7
7	9	8
10	12	9

The amendment also makes stylistic changes to the commentary to § 1B1.3, such as adding headings to certain application notes. To reflect the renumbering of application notes in § 1B1.3, conforming changes are also made to the commentary to §§ 2K2.1 (Unlawful Receipt, Possession, or Transportation of Firearms or Ammunition; Prohibited Transactions Involving Firearms or Ammunition), 2X3.1 (Accessory After the Fact), and 2X4.1 (Misprision of Felony).

Second, the amendment makes clerical changes to correct typographical errors in Application Note 8(D) to § 2D1.1 (Unlawful Manufacturing, Importing, Exporting, or Trafficking (Including Possession with Intent to Commit These Offenses); Attempt or Conspiracy) and Application Note 7 to § 8C2.8 (Determining the Fine Within the Range (Policy Statement)).

[FR Doc. 2015–20108 Filed 8–14–15; 8:45 am]

BILLING CODE 2210–40–P

UNITED STATES SENTENCING COMMISSION

Sentencing Guidelines for United States Courts

AGENCY: United States Sentencing Commission.

ACTION: Notice of proposed amendment to the sentencing guidelines and commentary. Request for public comment, including public comment regarding retroactive application of the proposed amendment. Notice of public hearing.

SUMMARY: Pursuant to section 994(a), (o), and (p) of title 28, United States Code, the United States Sentencing Commission is considering promulgating an amendment to the sentencing guidelines and commentary. This notice sets forth the proposed amendment and a synopsis of the issues addressed by the amendment. This notice also sets forth a number of issues for comment, most of which are set forth together with the proposed amendment and one of which (regarding retroactive application of the proposed amendment) is set forth in the **SUPPLEMENTARY INFORMATION** portion of this notice.

The proposed amendment and issues for comment in this notice are as follows: A proposed amendment to revise the ''crime of violence'' and ''drug trafficking offense'' definitions in the career offender guideline and the illegal reentry guideline, including (A) a proposed amendment to § 4B1.2 (Definitions of Terms Used in Section 4B1.1) to delete the residual clause and revise the list of enumerated offenses in the ''crime of violence'' definition, (B) a proposed amendment to § 4B1.2 to implement an additional requirement related to the state felony classification in determining whether an offense qualifies as a felony under § 4B1.2, and (C) corresponding changes to the ''crime of violence'' and ''drug trafficking offense'' definitions in § 2L1.2 (Unlawfully Entering or Remaining in the United States) to bring them more into parallel with the definitions at § 4B1.2, and related issues for comment.

DATES: (1) Written Public Comment.—Written public comment regarding the proposed amendment and issues for comment set forth in this notice, including public comment regarding retroactive application of the proposed amendment, should be received by the Commission not later than November 12, 2015.

(2) Public Hearing.—The Commission plans to hold a public hearing regarding the proposed amendment and issues for comment set forth in this notice. Further information regarding the public hearing, including requirements for testifying and providing written testimony, as well as the location, time, and scope of the hearing, will be provided by the Commission on its Web site at *www.ussc.gov.*

ADDRESSES: Public comment should be sent to the Commission by electronic mail or regular mail. The email address for public comment is *Public_Comment@ussc.gov.* The regular mail address for public comment is United States Sentencing Commission, One Columbus Circle NE., Suite 2–500, Washington, DC 20002–8002, Attention: Public Affairs.

FOR FURTHER INFORMATION CONTACT: Jeanne Doherty, Public Affairs Officer, (202) 502–4502, *jdoherty@ussc.gov.*

SUPPLEMENTARY INFORMATION: The United States Sentencing Commission is an independent agency in the judicial branch of the United States Government. The Commission promulgates sentencing guidelines and policy statements for federal courts pursuant to 28 U.S.C. 994(a). The Commission also periodically reviews and revises previously promulgated guidelines pursuant to 28 U.S.C. 994(o) and submits guideline amendments to the Congress not later than the first day of May each year pursuant to 28 U.S.C. 994(p).

The proposed amendment as presented in this notice contains bracketed text to indicate a heightened interest on the Commission's part in comment and suggestions regarding alternative policy choices and on whether the proposed provision is appropriate. The Commission has also highlighted certain issues for comment and invites suggestions on how the Commission should respond to those issues.

The Commission requests public comment regarding whether, pursuant to 18 U.S.C. 3582(c)(2) and 28 U.S.C. 994(u), the proposed amendment published in this notice should be included in subsection (d) of § 1B1.10 (Reduction in Term of Imprisonment as a Result of Amended Guideline Range (Policy Statement)) as an amendment that may be applied retroactively to previously sentenced defendants. The Commission lists in § 1B1.10(d) the specific guideline amendments that the court may apply retroactively under 18 U.S.C. 3582(c)(2). The background commentary to § 1B1.10 lists the purpose of the amendment, the magnitude of the change in the guideline range made by the amendment, and the difficulty of applying the amendment retroactively to determine an amended guideline range under § 1B1.10(b) as among the factors the Commission considers in selecting the amendments included in § 1B1.10(d). To the extent practicable, public comment should address each of these factors.

Publication of a proposed amendment requires the affirmative vote of at least three voting members and is deemed to be a request for public comment on the proposed amendment. *See* Rules 2.2 and 4.4 of the Commission's Rules of Practice and Procedure. In contrast, the affirmative vote of at least four voting members is required to promulgate an amendment and submit it to Congress. *See* Rule 2.2; 28 U.S.C. 994(p).

Additional information pertaining to the proposed amendment described in this notice may be accessed through the Commission's Web site at *www.ussc.gov.*

Authority: 28 U.S.C. 994(a), (o), (p), (x); USSC Rules of Practice and Procedure, Rule 4.4.

Patti B. Saris,

Chair.

1. ''Crime of Violence'' and Related Issues

Synopsis of Proposed Amendment: This proposed amendment is a result of the Commission's multi-year study of statutory and guideline definitions relating to the nature of a defendant's prior conviction (*e.g.,* ''crime of violence,'' ''aggravated felony,'' ''violent felony,'' ''drug trafficking offense,'' and ''felony drug offense'') and the impact of such definitions on the relevant statutory and guideline provisions (*e.g.,* career offender, illegal reentry, and armed career criminal). *See* United States Sentencing Commission, ''Notice of Final Priorities,'' 79 FR 49378 (Aug. 20, 2014); ''Proposed Priorities for Amendment Cycle,'' 80 FR 36594 (June 25, 2015).

The proposed amendment is also informed by the Supreme Court's recent decision in *Johnson* v. *United States,* __U.S. __, 135 S. Ct. 2551 (2015), relating to the statutory definition of ''violent felony'' in 18 U.S.C. 924(e), which held that an increased sentence under the ''residual clause'' of that definition violates due process. As the Court explained in *Johnson,* the term ''residual clause'' refers to the closing words of the statutory definition of ''violent felony.'' Under those closing words, a crime is a ''violent felony'' if it ''*otherwise involves conduct that presents a serious potential risk of physical injury to another.*'' *See* 18 U.S.C. 924(e)(2)(B)(ii) [emphasis added].

This clause, the Court held in *Johnson,* is unconstitutionally vague. The Court's holding did not implicate other parts of the statutory definition; a crime may still qualify as a ''violent felony'' under the statute if, for example, it ''has as an element the use, attempted use, or threatened use of physical force against the person of another'' (sometimes referred to as the ''elements'' clause) or if it ''is burglary, arson, or extortion'' (sometimes referred to as the ''enumerated'' clause).

Procedure

The Commission's ordinary practice with amendments to the sentencing guidelines is to publish proposals for comment in January, hold hearings in February or March, promulgate amendments in April, and submit final amendments to Congress on or shortly before May 1, to take effect on November 1. However, the Commission's organic statute authorizes the Commission to promulgate and submit amendments at any point after the beginning of a session of Congress and to specify an effective date sooner than November 1. *See* 28 U.S.C. 994(p). Publishing this proposed amendment at this time allows for the possibility that an amendment could be promulgated and submitted to Congress earlier than May 1 and could take effect earlier than November 1.

Accordingly, the Commission anticipates that in Fall 2015 it will hold a hearing on the proposed amendment and that in January 2016 it may, if appropriate, promulgate a final amendment and submit it to Congress (to take effect earlier than November 1) or publish a revised version of this proposed amendment for an additional period of comment.

Parts of the Proposed Amendment

The proposed amendment contains several parts. The Commission is considering whether to promulgate any one or more of these parts, as they are not necessarily mutually exclusive. Issues for comment are also included.

A. Elimination of ''Crime of Violence'' Residual Clause and Related Revisions to Definition of ''Crime of Violence''

The guidelines definition of ''crime of violence'' in § 4B1.2(a) was modeled after the statutory definition of ''violent felony.'' This guidelines definition is used in determining whether a defendant is a career offender under § 4B1.1 (Career Offender), and is also used in certain other guidelines. *See, e.g.,* §§ 2K1.3 (Unlawful Receipt, Possession, or Transportation of Explosive Materials; Prohibited Transactions Involving Explosive Materials), 2K2.1 (Unlawful Receipt, Possession, or Transportation of Firearms or Ammunition; Prohibited Transactions Involving Firearms and Ammunitions), 2S1.1 (Laundering of Monetary Instruments; Engaging in Monetary Transactions in Property Derived from Unlawful Activity), 4A1.2 (Definitions and Instructions for Computing Criminal History), and 5K2.17 (Semiautomatic Firearms Capable of Accepting Large Quantity Magazine (Policy Statement)).

While the statutory definition of ''violent felony'' in section 924(e) and the guidelines definition of ''crime of violence'' in § 4B1.2 are not identical in all respects — for example, they have different ''enumerated'' clauses — their residual clauses are identical. The proposed amendment amends § 4B1.2 to delete the residual clause.

In addition, the proposed amendment amends § 4B1.2 to clarify and revise the list of ''enumerated'' offenses. While some offenses covered by the definition are listed in the guideline (such as burglary of a dwelling, arson, and extortion), many other offenses covered by the definition are listed in the commentary instead (*e.g.,* murder, kidnapping, aggravated assault, robbery). The proposed amendment makes some revisions to the list of enumerated offenses, moves all enumerated offenses to the guideline, and provides definitions for the enumerated offenses in the commentary.

B. Use of the State Felony Classification in Determining Whether an Offense Qualifies as a ''Felony'' Under § 4B1.2

Under the career offender guideline, the court must analyze both the instant offense of conviction and the defendant's prior offenses of conviction. To be a career offender, the court must find (1) that the instant offense is a felony that is a crime of violence or a controlled substance offense, and (2) that the defendant has at least two prior felony convictions of either a crime of violence or a controlled substance offense. *See* § 4B1.1(a), 4B1.2; *see also* 28 U.S.C. 994(h).

To implement the requirement that the offense be a ''felony,'' the definitions in § 4B1.2(a) and (b) specify that the instant offense (whether a ''crime of violence'' or a ''controlled substance offense'') must have been an offense under federal or state law, punishable by imprisonment for a term exceeding one year. The proposed amendment adds an additional requirement: the offense must also have been classified [at the time defendant was initially sentenced] as a felony (or comparable classification) under the laws of the jurisdiction in which the defendant was convicted. If the jurisdiction does not have a ''felony'' classification, the offense must have been given a classification comparable to a felony classification.

C. Corresponding Changes to the Illegal Reentry Guideline, § 2L1.2

The definition of ''crime of violence'' in § 4B1.2 is not the only definition of ''crime of violence'' in the guidelines. In particular, § 2L1.2 (Unlawfully Entering or Remaining in the United States) sets forth a definition of ''crime of violence'' that contains a somewhat different list of ''enumerated'' offenses and does not contain a ''residual'' clause. It also sets forth a definition of ''drug trafficking offense'' that is somewhat different from the definition of ''controlled substance offense'' in § 4B1.2.

The proposed amendment would revise the definitions of ''crime of violence'' and ''drug trafficking offense'' in § 2L1.2 to bring them more into parallel with the definitions in § 4B1.2. Under the proposed amendment, the definitions in § 2L1.2 would generally follow the definitions in § 4B1.2, as revised by Parts A and B of the proposed amendment.

Proposed Amendment:

(A) ''Crime of Violence'' in § 4B1.2

Section § 4B1.2(a) is amended by striking paragraph (2) as follows:

'' (2) is burglary of a dwelling, arson, or extortion, involves use of explosives, or otherwise involves conduct that presents a serious potential risk of physical injury to another.'';

and inserting the following:

'' (2) is murder, voluntary manslaughter, kidnapping, aggravated assault, a forcible sex offense, robbery, [burglary of a dwelling][burglary], arson, or extortion, or involves use of explosives.''.

The Commentary to § 4B1.2 captioned ''Application Notes'' is amended in Note 1 by striking the second and third undesignated paragraphs as follows:

'' 'Crime of violence' includes murder, manslaughter, kidnapping, aggravated assault, forcible sex offenses, robbery, arson, extortion, extortionate extension of credit, and burglary of a dwelling. Other offenses are included as 'crimes of violence' if (A) that offense has as an element the use, attempted use, or threatened use of physical force against the person of another, or (B) the conduct set forth (*i.e.,* expressly charged) in the count of which the defendant was convicted involved use of explosives (including any explosive material or

destructive device) or, by its nature, presented a serious potential risk of physical injury to another.

'Crime of violence' does not include the offense of unlawful possession of a firearm by a felon, unless the possession was of a firearm described in 26 U.S.C. 5845(a). Where the instant offense of conviction is the unlawful possession of a firearm by a felon, § 2K2.1 (Unlawful Receipt, Possession, or Transportation of Firearms or Ammunition; Prohibited Transactions Involving Firearms or Ammunition) provides an increase in offense level if the defendant had one or more prior felony convictions for a crime of violence or controlled substance offense; and, if the defendant is sentenced under the provisions of 18 U.S.C. 924(e), § 4B1.4 (Armed Career Criminal) will apply.'',

and by striking the fifth undesignated paragraph as follows:

'' Unlawfully possessing a firearm described in 26 U.S.C. 5845(a) (*e.g.,* a sawed-off shotgun or sawed-off rifle, silencer, bomb, or machine gun) is a 'crime of violence'.'';

and by redesignating Notes 2 and 3 as Notes 3 and 4, respectively, and by inserting after Note 1 the following new Note 2:

''2. *Enumerated Offenses under Subsection (a).*—For purposes of subsection (a):

(A) 'Murder' is (i) the unlawful killing of a human being with malice aforethought (including killing a human being purposefully, knowingly, or recklessly under circumstances manifesting extreme indifference to the value of human life); or (ii) causing the death of a human being in the course of committing another felony offense.

(B) 'Voluntary manslaughter' is (i) the unlawful killing of a human being without malice, upon a sudden quarrel or heat of passion; or (ii) causing the death of a human being through actions intended to cause serious physical injury to another human being.

(C) 'Kidnapping' is an offense that includes at least (i) an act of restraining, removing, or confining another; (ii) an unlawful means of accomplishing that act; and (iii) at least one or more of the following aggravating factors: (I) the offense was committed for a nefarious purpose; (II) the offense substantially interfered with the victim's liberty; or (III) the offense exposed the victim to a substantial risk of bodily injury, sexual assault, or involuntary servitude.

(D) 'Aggravated assault' is (i) attempting to cause serious or substantial bodily injury to another, or causing such injury purposefully, knowingly, or recklessly; or (ii) attempting to cause, or purposefully, knowingly, or recklessly causing, bodily injury to another through use of a deadly weapon.

(E) A 'forcible sex offense' is any offense requiring a sexual act or sexual contact to which consent to the actor's conduct (i) is not given, or (ii) is not legally valid, such as where consent to the conduct is involuntary, incompetent, or coerced. The terms 'sexual act' and 'sexual contact' have the meaning given in 18 U.S.C. 2246.

(F) 'Robbery' is the misappropriation of property under circumstances involving immediate danger to the person of another.

(G) **[**'Burglary of a dwelling' is an unlawful or unprivileged entry into or remaining in a dwelling with intent to commit a **[**crime**][**felony**].] [**'Burglary' is an unlawful or unprivileged entry into or remaining in a building or other structure with intent to commit a **[**crime**][**felony**].]**

(H) 'Arson' is the intentional damaging, by fire or the use of explosives, of any building, vehicle, or other real property.

(I) 'Extortion' is obtaining something of value from another by the wrongful use of (i) force, (ii) fear of physical injury, or (iii) threat of physical injury.''.

(B) Requirement That Offense Be Classified as Felony Under State Law

Section 4B1.2 is amended in each of subsections (a) and (b) by inserting after ''a term exceeding one year'' both places such term appears the following: ''and classified **[**at the time the defendant was initially sentenced**]** as a felony (or comparable classification) under the laws of the jurisdiction in which the defendant was convicted''.

The Commentary to § 4B1.2 is amended in Note 1 in the paragraph that begins '' 'Prior felony conviction' means'' by inserting after ''a term exceeding one year'' the following: ''and classified **[**at the time the defendant was initially sentenced**]** as a felony (or comparable classification) under the laws of the jurisdiction in which the defendant was convicted''; and by striking ''regardless of whether such offense is specifically designated as a felony and''.

(C) Corresponding Revisions to § 2L1.2

The Commentary to § 2L1.2 captioned ''Application Notes'' is amended in Note 1 by striking subparagraph (B)(iii) as follows:

'' (iii) 'Crime of violence' means any of the following offenses under federal, state, or local law: murder, manslaughter, kidnapping, aggravated assault, forcible sex offenses (including where consent to the conduct is not given or is not legally valid, such as where consent to the conduct is involuntary, incompetent, or coerced), statutory rape, sexual abuse of a minor, robbery, arson, extortion, extortionate extension of credit, burglary of a dwelling, or any other offense under federal, state, or local law that has as an element the use, attempted use, or threatened use of physical force against the person of another.'',

and inserting the following:

''(iii) 'Crime of violence' has the meaning given that term in § 4B1.2(a). However, for purposes of subsection (b)(1)(E), which applies to misdemeanor crimes of violence, the requirements in § 4B1.2(a) that the offense be a felony (*i.e.,* punishable by a term more than one year and classified as a felony) do not apply.'';

in Note 2 by adding at the end as the last sentence the following: ''In addition, a crime of violence or a drug trafficking offense is a 'felony' only if it was classified **[**at the time the defendant was initially sentenced**]** as a felony (or comparable classification) under the laws of the jurisdiction in which the defendant was convicted.'';

and in Note 4(A) by striking ''any federal, state, or local offense punishable by a term of imprisonment of one year or less'' and inserting ''a federal or state offense, punishable by a term of imprisonment, that is not a 'felony' as defined in Application Note 2''.

Issues for Comment:

1. The Commission invites broad comment on the ''residual clause'' in the definition of ''crime of violence'' in § 4B1.2. Should the residual clause be eliminated, as proposed by the proposed amendment? If so, what other changes, if any, should be made to the guidelines definition of ''crime of violence''?

In the alternative, should the residual clause be revised? If so, how should it be revised? Should the Commission consider a different type of residual clause, such as the residual clause in 18 U.S.C. 16?

2. The Commission similarly invites broad comment on the list of ''enumerated'' offenses in the definition of ''crime of violence'' in § 4B1.2. Should the list of enumerated offenses be clarified and revised, as proposed by the proposed amendment? What offenses should be enumerated, and how (if at all) should they be defined?

For example, should the list of enumerated offenses be limited to common law offenses against the person? Should the list also include any

offense resulting in death or bodily injury to another if the defendant's conduct was knowing, intentional, or reckless?

Should the list of enumerated offenses include offenses where harm did not result, but could have resulted because of the risk involved? If so, what offenses should be included on the list, and how (if at all) should they be defined?

3. The Commission seeks comment on offenses against property and the extent to which they should be included in the guidelines definition of ''crime of violence.'' Statutory definitions relating to ''violent'' offenses account for property offenses in various ways. For example, the statutory definition of ''crime of violence'' in 18 U.S.C. 16 does not enumerate any specific property offenses, but its elements clause extends to offenses that have as an element the use, attempted use, or threatened use of physical force against the property of another, and its residual clause extends to offenses that involve a substantial risk of physical force against the property of another. In contrast, the statutory definition of ''violent felony'' in 18 U.S.C. 924(e) enumerates arson and burglary, but its elements clause and residual clause do not extend to property offenses. How, if at all, should the guidelines definition of ''crime of violence'' apply to property offenses?

4. The proposed amendment seeks comment on the enumerated offense definitions, as set forth in Part A of the proposed amendment. The definitions were derived from broad contemporary, generic definitions of the elements for the listed offenses. The Commission seeks comment generally on whether providing definitions for enumerated offenses is appropriate and specifically on whether the definitions provided are appropriate. Are there offenses that are covered by the proposed definitions but should not be? Are there offenses that are not covered by the proposed definitions but should be?

In addition, the Commission seeks specific comment on the following:

(A) The proposed definition of ''murder'' would include offenses in which the defendant causes the death of another in the course of committing any felony. This definition is worded more broadly than felony murder statutes in some states to minimize complexity and avoid difficulties with differing state law definition. The Commission seeks comment on whether such a definition is appropriate.

(B) The proposed definition of ''kidnapping'' attempts to capture the kinds of aggravating factors that some courts have held are present in state statutes. The Commission seeks comment on whether there are other factors that should be included as possible elements of kidnapping.

(C) The proposed definition of ''aggravated assault'' does not include as an aggravating factor that the victim has a special status, such as law enforcement, elderly, or minor. Should those type of assaults qualify as ''aggravated assault''? In particular, the Commission seeks comment on whether the definition of ''aggravated assault'' should include, as a possible alternative element, attempting to cause, or purposefully, knowingly, or recklessly causing, bodily injury to a person classified as a special victim under the statute of conviction (including public servants, minors, the elderly, pregnant women, and any other similar group).

(D) The proposed definition of ''forcible sex offense'' incorporates the definitions of ''sexual act'' and ''sexual contact'' in 18 U.S.C. 2246. Are there types of sex offenses that would be included in the definition of ''forcible sex offense'' set forth in the proposed amendment that should not be considered ''crimes of violence''? Are there types of sex offenses that would not be included under this definition, but should be? Should statutory rape be expressly included? Should it be expressly excluded?

(E) The proposed amendment defines ''robbery'' as the misappropriation of property under circumstances involving immediate danger to the person of another. The Commission seeks comment on whether this definition is adequately clear and on whether it is appropriate in scope. Are there types of offenses that would be included in the definition set forth in the proposed amendment that should not be considered ''crimes of violence''? Are there types of offenses that would not be included under this definition, but should be? For example, in some jurisdictions the elements of robbery may be established by a taking of property from a person or person's presence by fear (rather than, for example, by force or by injury). If the defendant was convicted of such a taking by fear, would it qualify as ''robbery'' as defined by the proposed amendment? In the alternative, would it qualify as ''extortion'' as defined by the proposed amendment? Should such a robbery (*i.e.,* the taking of property from a person or person's presence by fear) qualify as a crime of violence?

(F) The Supreme Court has determined that burglary under section 924(e) includes structures other than dwellings, but the Commission has included only burglaries of dwellings under the current definition of ''crime of violence'' at § 4B1.2. The Commission seeks comment on whether burglaries of buildings and other structures that are not dwellings should be included as ''crimes of violence.''

(G) Many states define ''arson'' to include burning of personal property. The proposed amendment does not include that type of arson in its definition of arson. The Commission seeks comment on whether the exclusion of such type of arson is appropriate. In those states that punish burning of personal property under arson statutes, what type of conduct is covered? Is it conduct that should be considered a crime of violence? Does it typically pose a risk of injury to a person?

(H) Extortion has been defined in case law as including non-violent threats, such as a threat to reveal embarrassing personal information. The definition of ''extortion'' in the proposed amendment requires the threat to be a ''threat of physical injury'' against the person. Similarly, extortion has been defined in case law as including fear, and the definition of ''extortion'' in the proposed amendment requires the fear to be a ''fear of physical injury.'' The Commission seeks comment on whether including these limitations in the ''extortion'' definition is appropriate.

5. Some commentators have suggested that the definition of ''crime of violence'' should not provide a list of enumerated offenses (*e.g.,* murder, voluntary manslaughter, aggravated assault), but should contain only an elements clause (*i.e.,* the use, attempted use, or threatened use of physical force against the person [or property] of another). The Commission seeks comment on whether such a single-prong approach would provide a sufficient and appropriate definition of ''crime of violence.'' If so, what should the ''elements clause'' provide?

6. The Commentary to § 4B1.2 states that ''crime of violence'' and ''controlled substance offense'' include the offenses of aiding and abetting, conspiring, and attempting to commit such offenses. The Commission seeks comment on whether the definitions of ''crime of violence'' and ''controlled substance offense'' should include attempts, conspiracies, and aiding and abetting. If so, should any limitations apply?

7. Part B of the proposed amendment would amend § 4B1.2 to revise the definition of ''felony.'' The Commission seeks comment on the advantages and disadvantages of using different definitions of ''felony'' in the guidelines. Should the Commission adopt a single definition of ''felony'' throughout the guidelines?

8. The revisions made by Part B would add a requirement that the offense have been classified as a felony under the laws of the jurisdiction in which the defendant was convicted. The Commission seeks comment on how this principle should apply to states that do not classify offenses as felonies, and to states (such as California) in which some offenses may be classified as either a felony or a misdemeanor at initial sentencing and the classification may change based on later events (such as a revocation of probation). The proposed amendment includes the parenthetical phrase ''(or comparable classification)'' and the bracketed phrase ''[at the time the defendant was initially sentenced]'' to address these situations. Do these phrases adequately address these situations? If not, how, if at all, should the Commission address these situations?

9. Part C of the proposed amendment would adopt for the illegal reentry guideline the same definition of ''crime of violence'' used in the career offender guideline. The Commission seeks comment on the advantages and disadvantages of using different definitions for these guidelines. Should the Commission have separate definitions for ''crime of violence'' in these guidelines?

10. The Commission seeks comment on whether any other guidelines that involve terms such as ''crime of violence,'' ''controlled substance offense,'' and ''drug trafficking offense'' should be revised to conform to the definitions used in the career offender guideline or the illegal reentry guideline (as revised by the proposed amendment). For example, what changes, if any, should be made to the firearms and explosives guidelines, §§ 2K2.1 and 2K1.3, to conform to the revisions made by the proposed amendment? What changes, if any, should be made to guidelines that use the term ''crime of violence'' but do not define it by reference to § 4B1.2 (such as guidelines that define it by reference to 18 U.S.C. 16)? Should the Commission revise those guidelines to promote a single definition of ''crime of violence'' (and terms such as ''controlled substance offense'') throughout the guidelines?

[FR Doc. 2015–20107 Filed 8–14–15; 8:45 am]

BILLING CODE 2210–40–P

DEPARTMENT OF VETERANS AFFAIRS

Funding Availability Under Supportive Services for Veteran Families (SSVF) Program

AGENCY: Veterans Health Administration, Department of Veterans Affairs (VA).

ACTION: Notice of funding availability (NOFA).

SUMMARY: VA is announcing the availability of funds for supportive services grants under the SSVF Program. This NOFA contains information concerning the SSVF Program, initial supportive services grant application processes, and the amount of funding available.

Funding Opportunity Title: SSVF Program.

Announcement Type: Initial.

Funding Opportunity Number: VA–SSVF–021015.

Catalog of Federal Domestic Assistance Number: 64.033, VA SSVF Program.

VA is announcing the availability of funds for supportive services grants under the SSVF Program. This NOFA contains information concerning the SSVF Program, initial supportive services grant application processes, and the amount of funding available. Awards made for supportive services grants will fund operations beginning October 1, 2015.

DATES: Applications for supportive services grants under the SSVF Program must be received by the SSVF Program Office by 4:00 p.m. Eastern Time on September 1, 2015. In the interest of fairness to all competing applicants, this deadline is firm as to date and hour, and VA will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays, computer service outages, or other delivery-related problems.

ADDRESSES: *For a Copy of the Application Package:* Copies of the application can be downloaded directly from the SSVF Program Web site at: *www.va.gov/homeless/ssvf.asp.* Questions should be referred to the SSVF Program Office via email at *SSVF@va.gov.* For detailed SSVF Program information and requirements, see Section 62 of Title 38, Code of Federal Regulations (38 CFR part 62).

Submission of Application Package: Applicants are strongly encouraged to submit applications electronically following instructions found at *www.va.gov/homeless/ssvf.asp.* Alternatively applicants can mail in applications. If mailed, applicants must submit two completed, collated, hard copies of the application and two compact discs (CD) containing electronic versions of the entire application are required. Each application copy must (i) be fastened with a binder clip, and (ii) contain tabs listing the major sections of and exhibits to the application. Each CD must be labeled with the applicant's name and must contain an electronic copy of the entire application. A budget template must be attached in Excel format on the CD, but all other application materials may be attached in a PDF or other format. The application copies and CDs must be submitted to the following address: Supportive Services for Veteran Families Program Office National Center on Homelessness Among Veterans, 4100 Chester Avenue, Suite 201, Philadelphia, PA 19104. Applicants must submit two hard copies and two CDs. Applications may not be sent by facsimile (FAX). Applications must be received in the SSVF Program Office by 4:00 p.m. Eastern Time on the application deadline date. Applications must arrive as a complete package. Materials arriving separately will not be included in the application package for consideration and may result in the application being rejected.

Technical Assistance: Information regarding how to obtain technical assistance with the preparation of an initial supportive services grant application is available on the SSVF Program Web site at: *http://www.va.gov/HOMELESS/SSVF.asp.*

FOR FURTHER INFORMATION CONTACT: Mr. John Kuhn, SSVF Program Office, National Center on Homelessness Among Veterans, 4100 Chester Avenue, Suite 201, Philadelphia, PA 19104; via email at *SSVF@va.gov.*

SUPPLEMENTARY INFORMATION:

I. Funding Opportunity Description

A. *Purpose:* The SSVF Program's purpose is to provide supportive services grants to private non-profit organizations and consumer cooperatives, who will coordinate or provide supportive services to very low-income Veteran families who: (i) Are residing in permanent housing; (ii) are homeless and scheduled to become residents of permanent housing within a specified time period; or (iii) after exiting permanent housing within a specified time period, are seeking other housing that is responsive to such very

low-income Veteran family's needs and preferences.

B. *Funding Priorities:* VA is making funding available for up to four awards, not to exceed $3.5 million. Up to two awards will provide up to $3 million for services in the State of Wyoming. An award of up to $1 million will be available to provide services in western Nebraska. An award of up to $60,000 will be made available to provide services to Lake County in the State of Indiana. VA may make adjustments to proposed budgets submitted by applicants to ensure that the overall funding from this NOFA does not exceed $3.5 million.

C. *Definitions:* Part 62 of title 38, Code of Federal Regulations (38 CFR 62), contains definitions of terms used in the SSVF Program, eligibility criteria, and programmatic priorities. Respondents to this NOFA should base their proposals and applications on the requirements of part 62 as it exists today. Any parties receiving supportive services grants as a result of this NOFA will be required to comply with those requirements for the duration of their grant.

D. *Approach:* Grantees will be expected to leverage supportive services grant funds to enhance the housing stability of very low-income Veteran families who are occupying permanent housing. In doing so, grantees are required to establish relationships with local community resources. Therefore, agencies must work through coordinated partnerships built either through formal agreements or the informal working relationships commonly found amongst strong social service providers. As part of the application, under 38 CFR 62.22(e), all applicants are strongly encouraged to provide letters of support from their respective VA Network Homeless Coordinator (or their designee). In addition, applicants are strongly encouraged to provide letters of support from the Continuums of Care (CoC) where they plan to deliver services that reflect the applicant's engagement in the CoC's efforts to coordinate services. CoCs may elect to provide VA with a rank order of their support in lieu of providing individual letters of support. A CoC is a community plan to organize and deliver housing and services to meet the needs of people who are homeless as they move to stable housing and maximize self-sufficiency. It includes action steps to end homelessness and prevent a return to homelessness (CoC locations and contact information can be found at the Department of Housing and Urban Development's (HUD) Web site, *http://www.hudhre.info/index.cfm?do=viewCocMaps*). This coordination should describe the applicant's participation in the CoC's coordinated assessment efforts (coordinated assessment refers to a common process for accessing homeless assistance services including: Prevention, diversion, emergency shelter, transitional housing, rapid re-housing, supportive services and even permanent supportive housing). In addition, any applicant proposing to serve an Indian Tribal area is strongly encouraged to provide a letter of support from the relevant Indian Tribal Government. The aim of the provision of supportive services is to assist very low-income Veteran families residing in permanent housing to remain stably housed and to rapidly transition those not currently in permanent housing to stable housing. SSVF emphasizes the placement of homeless Veteran families who are described in regulation as (i) very low-income Veteran families who are homeless and scheduled to become residents of permanent housing within 90 days, and (ii) very low-income Veteran families who have exited permanent housing within the previous 90 days to seek other housing that is responsive to their needs and preferences. Accordingly, VA encourages eligible entities skilled in facilitating housing stability and experienced in operating rapid re-housing programs (*i.e.,* administering HUD's Homelessness Prevention and Rapid Re-Housing Program, HUD's Emergency Solution Grant (ESG), or other comparable Federal or community resources) to apply for supportive services grants. As a crisis intervention program, the SSVF Program is not intended to provide long-term support for participants, nor will it be able to address all of the financial and supportive services needs of participants that affect housing stability. Rather, when participants require long-term support, grantees should focus on connecting such participants to income supports, such as employment and mainstream Federal and community resources (*e.g.,* HUD–VA Supportive Housing program, HUD Housing Choice Voucher programs, McKinney-Vento funded supportive housing programs, Temporary Assistance for Needy Families (TANF), and Social Security Income/Social Security Disability Insurance (SSI/SSDI) etc.) that can provide ongoing support as required.

Assistance in obtaining or retaining permanent housing is a fundamental goal of the SSVF Program. Grantees must provide case management services in accordance with 38 CFR 62.31. Such case management should include tenant counseling, mediation with landlords and outreach to landlords.

E. *Authority:* Funding applied for under this NOFA is authorized by 38 U.S. Code (U.S.C.) 2044. VA implements the SSVF Program by regulation in 38 CFR part 62. Funds made available under this NOFA are subject to the requirements of the aforementioned regulations and other applicable laws and regulations.

F. *Requirements for the Use of Supportive Services Grant Funds:* The grantee's request for funding must be consistent with the limitations and uses of supportive services grant funds set forth in 38 CFR part 62 and this NOFA. In accordance with the regulations and this NOFA, the following requirements apply to supportive services grants awarded under this NOFA:

1. Grantees may use a maximum of 10 percent of supportive services grant funds for administrative costs identified in 38 CFR 62.70.

2. Grantees must use a minimum of 60 percent of the temporary financial assistance portion of their supportive services grant funds to serve very low-income Veteran families who qualify under 38 CFR 62.11. (NOTE: Grantees may request a waiver to decrease this minimum, as discussed in section V.B.3.a.)

3. Grantees may use a maximum of 50 percent of supportive services grant funds to provide the supportive service of temporary financial assistance paid directly to a third party on behalf of a participant for child care, emergency housing assistance, transportation, rental assistance, utility-fee payment assistance, security deposits, utility deposits, moving costs, and general housing stability assistance (which includes emergency supplies) in accordance with 38 CFR 62.33 and 38 CFR 62.34.

G. *Guidance for the Use of Supportive Services Grant Funds:* It is VA policy to support a ''Housing First'' model in addressing and ending homelessness. Housing First establishes housing stability as the primary intervention in working with homeless persons. The Housing First approach is based on research that shows that a homeless individual or household's first and primary need is to obtain stable housing, and that other issues that may affect the household can and should be addressed as housing is obtained. Research supports this approach as an effective means to end homelessness. Housing is not contingent on compliance with services; instead, participants must comply with a standard lease agreement and are provided with the services and supports

that are necessary to help them do so successfully.

Grantees must develop plans that will ensure that Veteran participants have the level of income and economic stability needed to remain in permanent housing after the conclusion of the SSVF intervention. Both employment and benefits assistance from VA and non-VA sources represent a significant underutilized source of income stability for homeless Veterans. The complexity of program rules and the stigma some associate with entitlement programs contributes to their lack of use. To this effect, grantees are encouraged to consider strategies that can lead to prompt and successful access to employment and benefits that are essential to retaining housing.

1. Consistent with the Housing First model supported by VA, grantees are expected to offer the following supportive services: Housing counseling; assisting participants in understanding leases; securing utilities; making moving arrangements; provide representative payee services concerning rent and utilities when needed; and mediation and outreach to property owners related to locating or retaining housing. Grantees may also assist participants by providing rental assistance, security or utility deposits, moving costs or emergency supplies; or using other Federal resources, such as the HUD's ESG, or supportive services grant funds subject to the limitations described in this NOFA and 38 CFR 62.34.

2. As SSVF is a short-term crisis intervention, grantees must develop plans that will produce sufficient income to sustain Veteran participants in permanent housing after the conclusion of the SSVF intervention. Grantees must ensure the availability of employment and vocational services either through the direct provision of these services or their availability through formal or informal service agreements. Agreements with Homeless Veteran Reintegration Programs funded by the U.S. Department of Labor are strongly encouraged. For participants unable to work due to disability, income must be established through available benefits programs.

3. Per 38 CFR 62.33, grantees must assist participants in obtaining public benefits. Grantees must screen all participants for eligibility for a broad range of entitlements such as TANF, Social Security, the Supplemental Nutrition Assistance Program, the Low Income Home Energy Assistance Program, the Earned Income Tax Credit, and local General Assistance programs. Grantees are expected to access the Substance Abuse and Mental Health Services Administration's SSI/SSDI Outreach, Access, and Recovery (SOAR) program either though community linkages or by training staff to deliver SOAR services. In addition, where available, grantees should access information technology tools to support case managers in their efforts to link participants to benefits.

4. Grantees are encouraged to provide, or assist participants in obtaining, legal services relevant to issues that interfere with the participants' ability to obtain or retain permanent housing. (NOTE: Legal services provided may be protected from release by the grantee or VA under attorney-client privilege; however, documentation demonstrating the provision of legal services are subject to audit and mandatory program monitoring.) Support for legal services can include paying for court filing fees to assist a participant with issues that interfere with the participant's ability to obtain or retain permanent housing or supportive services, including issues that affect the participant's employability and financial security. Grantees (in addition to employees and members of grantees) may represent participants before VA with respect to a claim for VA benefits, but only if they are recognized for that purpose pursuant to 38 U.S.C. Chapter 59. Further, the individual providing such representation must be accredited pursuant to 38 U.S.C. Chapter 59.

5. Access to mental health and addiction services are required by SSVF; however, grantees cannot fund these services directly through the SSVF grant. Therefore, applicants must demonstrate, through either formal or informal agreements, their ability to promote rapid access and engagement to mental health and addiction services for the Veteran and family members.

6. VA recognizes that extremely low-income Veterans, with incomes below 30 percent of the area median income, face greater barriers to permanent housing placement. Grantees should consider how they can support these participants.

7. When serving participants who are residing in permanent housing, it is required that the defining question to ask is: ''Would this individual or family be homeless but for this assistance?'' The grantee must use a VA approved screening tool with criteria that targets those most at-risk of homelessness. To qualify for SSVF services, a Veteran who is served under Category 1 (homeless prevention), the participants must not have sufficient resources or support networks (*e.g.,* family, friends, faith-based or other social networks), immediately available to prevent them from becoming homeless. To further qualify for services under Category 1, the grantee must document that the participant meets at least one of the following conditions:

(a) Has moved because of economic reasons two or more times during the 60 days immediately preceding the application for homelessness prevention assistance;

(b) Is living in the home of another because of economic hardship;

(c) Has been notified in writing that their right to occupy their current housing or living situation will be terminated within 21 days after the date of application for assistance;

(d) Lives in a hotel or motel and the cost of the hotel or motel stay is not paid by charitable organizations or by Federal, state, or local Government programs for low-income individuals;

(e) Is exiting a publicly funded institution or system of care (such as a health care facility, a mental health facility, or correctional institution) without a stable housing plan; or

(f) Otherwise lives in housing that has characteristics associated with instability and an increased risk of homelessness, as identified in the recipient's approved screening tool.

8. Where other funds from community resources are not readily available, grantees may choose to utilize supportive services grants, subject to the limitations described in this NOFA and in 38 CFR 62.33 and 62.34, to provide temporary financial assistance. Such assistance may, subject to the limitations in this NOFA and 38 CFR part 62, be paid directly to a third party on behalf of a participant for child care, transportation, emergency housing assistance, rental assistance, utility-fee payment assistance, security or utility deposits, moving costs and general housing stability assistance as necessary.

II. Award Information

A. *Overview:* This NOFA announces the availability of funds for supportive services grant under the SSVF Program. VA is making funding available for up to four awards, not to exceed $3.5 million. Up to two awards will provide up to $3 million for services in the state of Wyoming. An award of up to $1 million will be available to provide services in western Nebraska. An award of up to $60,000 will be made available to provide services to Lake County in the state of Indiana. VA may make adjustments to proposed budgets submitted by applicants to ensure that the overall funding from this NOFA does not exceed $3.5 million.

B. *Funding:* To be eligible for a supportive services grant offered through this NOFA, the applicant must be a current SSVF grantee that has existing operations in areas adjacent to the areas proposed for funding through this NOFA.

C. *Allocation of Funds:* Funding will be awarded under this NOFA to existing grantees for a 1 year period beginning October 1, 2015. The following requirements apply to supportive services grants awarded under this NOFA:

1. In response to this NOFA, applicants can only submit one application.

2. A single application may be submitted to serve the contiguous area of Wyoming and western Nebraska targeted in this NOFA. Should a single application be submitted, the requested amount cannot exceed $3.5 million.

3. Applicants must be existing SSVF grantees.

4. To facilitate the rapid launch of services, applicants must currently provide SSVF services to areas adjacent to one of the identified target communities specific to the award being sought.

D. *Supportive Services Grant Award Period:* Grant awards are generally made for a 1-year period, however, if a successful applicant currently has a longer award period for their adjacent SSVF grant, the new award will be combined with their existing grant and the length of this new award will match the current award period.

III. Eligibility Information

A. *Eligible Applicants:* In order to be eligible, an applicant must qualify as a private non-profit organization (section 501(c)(3) or 501(c)(19) tax exempt status is required) or a consumer cooperative as has the meaning given such term in section 202 of the Housing Act of 1959 (12 U.S.C. 1701q).

B. *Cost Sharing or Matching:* None.

IV. Application and Submission Information

A. *Address to Request Application Package:* Download directly from the SSVF Program Web site at *www.va.gov/homeless/ssvf.asp* or send a written request for an application to SSVF Program Office, National Center on Homelessness Among Veterans, 4100 Chester Avenue, Suite 201, Philadelphia, PA 19104. Any questions regarding this process should be referred to the SSVF Program Office via phone at (877) 737–0111 (toll-free number) or via email at *SSVF@va.gov.* For detailed SSVF Program information and requirements, see 38 CFR part 62.

B. *Content and Form of Application:* Applicants are strongly encouraged to submit applications electronically following instructions found at *www.va.gov/homeless/ssvf.asp.* Alternatively applicants can mail in applications. If mailed, applicants must submit two completed collated, hard copies of the application and two compact discs (CD) containing electronic versions of the entire application are required. Each application copy must (i) be fastened with a binder clip, and (ii) contain tabs listing the major sections of and exhibits to the application. Each CD must be labeled with the applicant's name and must contain an electronic copy of the entire application. A budget template must be attached in Excel format on the CD, but all other application materials may be attached in a PDF or other format.

C. *Submission Dates and Times:* Applications for supportive services grants under the SSVF Program must be received by the SSVF Program Office by 4:00 p.m. Eastern Time on September 1, 2015. Awards made for supportive services grants will fund operations beginning October 1, 2015. Applications must arrive as a complete package. Materials arriving separately will not be included in the application package for consideration and may result in the application being rejected. Additionally, in the interest of fairness to all competing applicants, this deadline is firm as to date and hour, and VA will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays, computer service outages, or other delivery-related problems.

D. *Intergovernmental Review:* This section is not applicable to the SSVF Program.

E. *Funding Restrictions:* Up to $3.5 million may be awarded depending on funding availability and subject to available appropriations for initial supportive services grants to be funded under this NOFA. Applicants should fill out separate applications for each supportive services funding request. Funding will be awarded under this NOFA to existing grantees for a 1 to 3-year period beginning October 1, 2015 (as described in II.D.).

F. *Other Submission Requirements:*

1. Applicants shall apply as new applicant using the application designed for new grants.

2. Additional supportive services grant application requirements are specified in the initial application package. Submission of an incorrect or incomplete application package will result in the application being rejected during threshold review. The application packages must contain all required forms and certifications. Selections will be made based on criteria described in 38 CFR part 62 and this NOFA. Applicants and grantees will be notified of any additional information needed to confirm or clarify information provided in the application and the deadline by which to submit such information. Applicants are strongly encouraged to submit applications electronically. If mailed, applications and CDs must be submitted to the following address: SSVF Program Office, National Center on Homelessness Among Veterans, 4100 Chester Avenue, Suite 201, Philadelphia, PA 19104. Applicants must submit two hard copies and two CDs. Applications may not be sent by FAX.

V. Application Review Information

A. *Criteria:*

1. VA will only score applicants that meet the following threshold requirements:

(a) The application is filed within the time period established in the NOFA, and any additional information or documentation requested by VA under 38 CFR 62.20(c) is provided within the time frame established by VA;

(b) The application is completed in all parts;

(c) The applicant is an eligible entity;

(d) The activities for which the supportive services grant is requested are eligible for funding under this part;

(e) The applicant's proposed participants are eligible to receive supportive services under this part;

(f) The applicant agrees to comply with the requirements of this part;

(g) The applicant does not have an outstanding obligation to the Federal Government that is in arrears and does not have an overdue or unsatisfactory response to an audit; and

(h) The applicant is not in default by failing to meet the requirements for any previous Federal assistance.

2. VA will use the criteria described in 38 CFR 62 to score grantees applying for new supportive services grant:

3. VA will use the following process to select applicants to receive supportive services grants: VA will score all applicants that meet the threshold requirements set forth in 38 CFR 62.21 using the scoring criteria set forth in 38 CFR 62.22.

B. *Review and Selection Process:* VA will review all supportive services grant

applications in response to this NOFA according to the following steps:

1. Score all applications that meet the threshold requirements described in 38 CFR 62.21.

2. Rank those applications who score at least 75 cumulative points and receive at least one point under each of the categories identified for new applicants in 38 CFR 62.22, paragraphs (a), (b), (c), (d), and (e). The applications will be ranked in order from highest to lowest scores.

3. Applicants are required to spend no less than 60 percent of all budgeted temporary financial assistance on homeless participants defined in 38 CFR 62.11(a)(2) and (a)(3). Waivers to this 60 percent requirement may be requested when grantees can demonstrate significant local progress towards eliminating homelessness in the target service area. Waiver requests must include data from authoritative sources such as HUD's Annual Homeless Assessment Report, annual Point-In-Time Counts and evidence of decreased demand for emergency shelter and transitional housing. Waivers for the 60 percent requirement may also be requested for services provided to rural Indian tribal areas and other rural areas where shelter capacity is insufficient to meet local need.

VI. Award Administration Information

A. *Award Notices:* Although subject to change, the SSVF Program Office expects to announce the grant recipient in the fourth quarter of fiscal year 2015 with the grant beginning October 1, 2015. Prior to executing a funding agreement, VA will contact the applicant and make known the amount of proposed funding and verify that the applicant would still like the funding. Once VA verifies that the applicant is still seeking funding, VA will execute an agreement and make payments to the grant recipient in accordance with 38 CFR part 62 and other applicable provisions of this NOFA.

B. *Administrative and National Policy Requirements:* It is VA policy to support a ''Housing First'' model in addressing and ending homelessness. Housing First establishes housing stability as the primary intervention in working with homeless persons. The Housing First approach is based on research that shows that a homeless individual or household's first and primary need is to obtain stable housing, and that other issues that may affect the household can and should be addressed as housing is obtained. Housing is not contingent on compliance with services; instead, participants must comply with a standard lease agreement and are provided with the services and supports that are necessary to help them do so successfully. Research supports this approach as an effective means to end homelessness.

Consistent with the Housing First model supported by VA, grantees are expected to offer the following supportive services: Housing counseling; assisting participants in understanding leases; securing utilities; making moving arrangements; provide representative payee services concerning rent and utilities when needed; and mediation and outreach to property owners related to locating or retaining housing. Grantees may also assist participants by providing rental assistance, security or utility deposits, moving costs or emergency supplies, using other Federal resources, such as the ESG, or supportive services grant funds subject to the limitations described in this NOFA and 38 CFR 62.34.

As SSVF grants cannot be used to fund treatment for mental health or substance use disorders, applicants must provide evidence that they can provide access to such services to all program participants through formal and informal agreements with community providers.

C. *Reporting:* VA places great emphasis on the responsibility and accountability of grantees. As described in 38 CFR 62.63 and 62.71, VA has procedures in place to monitor supportive services provided to participants and outcomes associated with the supportive services provided under the SSVF Program. Applicants should be aware of the following:

1. Upon execution of a supportive services grant agreement with VA, grantees will have a VA regional coordinator assigned by the SSVF Program Office who will provide oversight and monitor supportive services provided to participants.

2. Grantees will be required to enter data into a Homeless Management Information System Web-based software application. This data will consist of information on the participants served and types of supportive services provided by grantees. Grantees must treat the data for activities funded by the SSVF Program separate from that of activities funded by other programs. Grantees will be required to work with their HMIS Administrators to export client-level data for activities funded by the SSVF Program to VA on at least a monthly basis.

3. VA shall complete annual monitoring evaluations of each grantee. Monitoring will also include the submittal of quarterly and annual financial and performance reports by the grantee. The grantee will be expected to demonstrate adherence to the grantee's proposed program concept, as described in the grantee's application. All grantees are subject to audits conducted by the VA Financial Services Center.

4. Grantees will be required to provide each participant with a satisfaction survey which can be submitted by the participant directly to VA, within 45 to 60 days of the participant's entry into the grantee's program and again within 30 days of such participant's pending exit from the grantee's program. In all cases there should be a minimum of 30 days between administration of the two surveys. In cases when a brief SSVF intervention results in the first survey being administered 30 days after exit, only one survey shall be provided.

5. Grantees will be assessed based on their ability to meet critical performance measures. In addition to meeting program requirements defined by the regulations and NOFA, grantees will be assessed on their ability to place participants into housing and the housing retention rates of participants served. Higher placement for homeless participants and higher housing retention rates for at-risk participants are expected for very-low income Veteran families when compared to extremely low-income Veteran families with incomes below 30 percent of the area median income.

VII. Agency Contact

FOR FURTHER INFORMATION CONTACT: John Kuhn, Supportive SSVF Program Office, National Center on Homelessness Among Veterans, 4100 Chester Avenue, Suite 201, Philadelphia, PA 19104; email: *SSVF@va.gov*.

VIII. Other Information

A. *VA Goals and Objectives for Funds Awarded Under this NOFA:* In accordance with 38 CFR 62.22(b)(6), VA will evaluate an applicant's ability to meet VA goals and objectives for the SSVF Program. VA goals and objectives include the provision of supportive services designed to enhance the housing stability and independent living skills of very low-income Veteran families occupying permanent housing across geographic regions. For purposes of this NOFA, VA goals and objectives also include the provision of supportive services designed to rapidly re-house or prevent homelessness among people in the following target populations who also meet all requirements for being part of a very low-income Veteran family occupying permanent housing:

1. Veteran families earning less than 30 percent of area median income as most recently published by HUD for programs under section 8 of the United States Housing Act of 1937 (42 U.S.C. 1437f) (*http://www.huduser.org*).

2. Veterans with at least one dependent family member.

3. Veterans returning from Operation Enduring Freedom, Operation Iraqi Freedom, or Operation New Dawn.

B. *Payments of Supportive Services Grant Funds:* Grantees will receive payments electronically through the U.S. Department of Health and Human Services Payment Management System. Grantees will have the ability to request payments as frequently as they choose subject to the following limitations:

1. During the first quarter of the grantee's supportive services annualized grant award period, the grantee's cumulative requests for supportive services grant funds may not exceed 35 percent of the total supportive services grant award without written approval by VA.

2. By the end of the second quarter of the grantee's supportive services annualized grant award period, the grantee's cumulative requests for supportive services grant funds may not exceed 60 percent of the total supportive services grant award without written approval by VA.

3. By the end of the third quarter of the grantee's supportive services annualized grant award period, the grantee's cumulative requests for supportive services grant funds may not exceed 80 percent of the total supportive services grant award without written approval by VA.

4. By the end of the fourth quarter of the grantee's supportive services annualized grant award period, the grantee's cumulative requests for supportive services grant funds may not exceed 100 percent of the total supportive services grant award.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Robert L. Nabors II, Chief of Staff, Department of Veterans Affairs, approved this document on August 12, 2015, for publication.

Dated: August 13, 2015.

Michael Shores,

Chief Impact Analyst, Office of Regulation Policy & Management, Office of the General Counsel, Department of Veterans Affairs.

RIN–0938–AS41

Medicare Program; Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System Policy Changes and Fiscal Year 2016 Rates; Revisions of Quality Reporting Requirements for Specific Providers, Including Changes Related to the Electronic Health Record Incentive Program; Extensions of the Medicare-Dependent, Small Rural Hospital Program and the Low-Volume Payment Adjustment for Hospitals

AGENCY: Centers for Medicare and Medicaid Services (CMS), HHS.

ACTION: Final rule; interim final rule with comment period.

SUMMARY: We are revising the Medicare hospital inpatient prospective payment systems (IPPS) for operating and capital-related costs of acute care hospitals to implement changes arising from our continuing experience with these systems for FY 2016. Some of these changes implement certain statutory provisions contained in the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (collectively known as the Affordable Care Act), the Pathway for Sustainable Growth Reform (SGR) Act of 2013, the Protecting Access to Medicare Act of 2014, the Improving Medicare Post-Acute Care Transformation Act of 2014, the Medicare Access and CHIP Reauthorization Act of 2015, and other legislation. We also are addressing the update of the rate-of-increase limits for certain hospitals excluded from the IPPS that are paid on a reasonable cost basis subject to these limits for FY 2016. As an interim final rule with comment period, we are implementing the statutory extensions of the Medicare-dependent, small rural hospital (MDH) Program and changes to the payment adjustment for low-volume hospitals under the IPPS.

We also are updating the payment policies and the annual payment rates for the Medicare prospective payment system (PPS) for inpatient hospital services provided by long-term care hospitals (LTCHs) for FY 2016 and implementing certain statutory changes to the LTCH PPS under the Affordable Care Act and the Pathway for Sustainable Growth Rate (SGR) Reform Act of 2013 and the Protecting Access to Medicare Act of 2014.

In addition, we are establishing new requirements or revising existing requirements for quality reporting by specific providers (acute care hospitals, PPS-exempt cancer hospitals, and LTCHs) that are participating in Medicare, including related provisions for eligible hospitals and critical access hospitals participating in the Medicare Electronic Health Record (EHR) Incentive Program. We also are updating policies relating to the Hospital Value-Based Purchasing (VBP) Program, the Hospital Readmissions Reduction Program, and the Hospital-Acquired Condition (HAC) Reduction Program.

DATES: *Effective Date:* This final rule is effective on October 1, 2015.

Applicability Date: The provisions of the interim final rule with comment period portion of this rule (presented in section IV.L. of the preamble) are applicable for discharges on or after April 1, 2015 and on or before September 30, 2017.

Comment Period: To be assured consideration, comments on the interim final rule with comment period presented in section IV.L. of this document must be received at one of the addresses provided in the **ADDRESSES** section no later than 5 p.m. EST on September 29, 2015.

ADDRESSES: In commenting, please refer to file code CMS–1632–IFC. Because of staff and resource limitations, we cannot accept comments by facsimile (FAX) transmission.

You may submit comments in one of four ways (no duplicates, please):

1. *Electronically.* You may (and we encourage you to) submit electronic comments on this regulation to *http://www.regulations.gov*. Follow the instructions under the ''submit a comment'' tab.

2. *By regular mail.* You may mail written comments to the following address ONLY:

Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1632–IFC, P.O. Box 8013, Baltimore, MD 21244–1850.

Please allow sufficient time for mailed comments to be received before the close of the comment period.

3. *By express or overnight mail.* You may send written comments via express or overnight mail to the following address ONLY:

Centers for Medicare & Medicaid Services, Department of Health and Human Services, Attention: CMS–1632–IFC, Mail Stop C4–26–05, 7500 Security Boulevard, Baltimore, MD 21244–1850.

4. *By hand or courier.* If you prefer, you may deliver (by hand or courier) your written comments before the close of the comment period to either of the following addresses:

a. For delivery in Washington, DC—Centers for Medicare & Medicaid Services, Department of Health and Human Services, Room 445–G, Hubert H. Humphrey Building, 200 Independence Avenue SW., Washington, DC 20201.

(Because access to the interior of the Hubert H. Humphrey Building is not readily available to persons without Federal Government identification, commenters are encouraged to leave their comments in the CMS drop slots located in the main lobby of the building. A stamp-in clock is available for persons wishing to retain a proof of filing by stamping in and retaining an extra copy of the comments being filed.)

b. For delivery in Baltimore, MD—Centers for Medicare & Medicaid Services, Department of Health and Human Services, 7500 Security Boulevard, Baltimore, MD 21244–1850.

If you intend to deliver your comments to the Baltimore address, please call the telephone number (410) 786–7195 in advance to schedule your arrival with one of our staff members.

Comments mailed to the addresses indicated as appropriate for hand or courier delivery may be delayed and received after the comment period.

For information on viewing public comments, we refer readers to the beginning of the **SUPPLEMENTARY INFORMATION** section.

SUPPLEMENTARY INFORMATION:

Electronic Access

Inspection of Public Comments: All public comments received before the close of the comment period are available for viewing by the public, including any personally identifiable or confidential business information that is included in a comment. We post all public comments received before the close of the comment period on the following Web site as soon as possible after they have been received: *http://www.regulations.gov*. Follow the search instructions on that Web site to view public comments.

This **Federal Register** document is also available from the **Federal Register** online database through Federal Digital System (FDsys), a service of the U.S. Government Printing Office. This database can be accessed via the Internet at: *http://www.gpo.gov/fdsys*.

Tables Available Only Through the Internet on the CMS Web site

In the past, a majority of the tables referred to throughout this preamble and in the Addendum to the proposed rule and the final rule were published in the **Federal Register** as part of the annual proposed and final rules. However, beginning in FY 2012, some of the IPPS tables and LTCH PPS tables are no longer published in the **Federal Register**. Instead, these tables are generally only available through the Internet. The IPPS tables for this final rule are available through the Internet on the CMS Web site at: *http://www.cms.hhs.gov/Medicare/medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*. Click on the link on the left side of the screen titled, ''FY 2016 IPPS Final Rule Home Page'' or ''Acute Inpatient—Files for Download''. The LTCH PPS tables for this FY 2016 final rule are available through the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/LongTermCareHospitalPPS/index.html* under the list item for Regulation Number CMS–1632–F. For further details on the contents of the tables referenced in this final rule, we refer readers to section VI. of the Addendum to this final rule.

Readers who experience any problems accessing any of the tables that are posted on the CMS Web sites identified above should contact Michael Treitel at (410) 786–4552.

I. Executive Summary and Background

A. Executive Summary

1. Purpose and Legal Authority

This final rule makes payment and policy changes under the Medicare inpatient prospective payment systems (IPPS) for operating and capital-related costs of acute care hospitals as well as for certain hospitals and hospital units excluded from the IPPS. In addition, it makes payment and policy changes for inpatient hospital services provided by long-term care hospitals (LTCHs) under the long-term care hospital prospective payment system (LTCH PPS). It also makes policy changes to programs associated with Medicare IPPS hospitals, IPPS-excluded hospitals, and LTCHs.

This interim final rule with comment period implements the provisions of the Medicare Access and CHIP Reauthorization Act of 2015 which extended the MDH Program and changes to the low-volume payment adjustment for hospitals through FY 2017.

Under various statutory authorities, we are making changes to the Medicare IPPS, to the LTCH PPS, and to other related payment methodologies and programs for FY 2016 and subsequent fiscal years. These statutory authorities include, but are not limited to, the following:

- Section 1886(d) of the Social Security Act (the Act), which sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires that, instead of paying for capital-related costs of inpatient hospital services on a reasonable cost basis, the Secretary use a prospective payment system (PPS).
- Section 1886(d)(1)(B) of the Act, which specifies that certain hospitals and hospital units are excluded from the IPPS. These hospitals and units are: Rehabilitation hospitals and units; LTCHs; psychiatric hospitals and units; children's hospitals; cancer hospitals; and short-term acute care hospitals located in the Virgin Islands, Guam, the Northern Mariana Islands, and American Samoa. Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS.
- Sections 123(a) and (c) of Public Law 106–113 and section 307(b)(1) of Public Law 106–554 (as codified under section 1886(m)(1) of the Act), which provide for the development and implementation of a prospective payment system for payment for inpatient hospital services of long-term care hospitals (LTCHs) described in section 1886(d)(1)(B)(iv) of the Act.
- Sections 1814(l), 1820, and 1834(g) of the Act, which specify that payments are made to critical access hospitals (CAHs) (that is, rural hospitals or facilities that meet certain statutory requirements) for inpatient and outpatient services and that these payments are generally based on 101 percent of reasonable cost.
- Section 1866(k) of the Act, as added by section 3005 of the Affordable Care Act, which establishes a quality reporting program for hospitals described in section 1886(d)(1)(B)(v) of the Act, referred to as ''PPS-Exempt Cancer Hospitals.''
- Section 1886(d)(4)(D) of the Act, which addresses certain hospital-acquired conditions (HACs), including infections. Section 1886(d)(4)(D) of the Act specifies that, by October 1, 2007, the Secretary was required to select, in consultation with the Centers for Disease Control and Prevention (CDC), at least two conditions that: (a) Are high cost, high volume, or both; (b) are assigned to a higher paying MS–DRG when present as a secondary diagnosis (that is, conditions under the MS–DRG system that are complications or comorbidities (CCs) or major complications or comorbidities (MCCs); and (c) could reasonably have been prevented through the application of evidence-based guidelines. Section 1886(d)(4)(D) of the Act also specifies that the list of conditions may be revised, again in consultation with CDC, from time to time as long as the list contains at least two conditions. Section 1886(d)(4)(D)(iii) of the Act requires that hospitals, effective with discharges occurring on or after October 1, 2007, submit information on Medicare claims specifying whether diagnoses were present on admission (POA). Section 1886(d)(4)(D)(i) of the Act specifies that effective for discharges occurring on or after October 1, 2008, Medicare no longer assigns an inpatient hospital discharge to a higher paying MS–DRG if a selected condition is not POA.
- Section 1886(a)(4) of the Act, which specifies that costs of approved educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of GME in accordance with section 1886(h) of the Act. A payment for indirect medical education (IME) is made under section 1886(d)(5)(B) of the Act.
- Section 1886(b)(3)(B)(viii) of the Act, which requires the Secretary to reduce the applicable percentage increase in payments to a subsection (d) hospital for a fiscal year if the hospital does not submit data on measures in a form and manner, and at a time, specified by the Secretary.
- Section 1886(o) of the Act, which requires the Secretary to establish a Hospital Value-Based Purchasing (VBP) Program under which value-based incentive payments are made in a fiscal year to hospitals meeting performance standards established for a performance period for such fiscal year.
- Section 1886(p) of the Act, as added by section 3008 of the Affordable Care Act, which establishes an adjustment to hospital payments for hospital-acquired conditions (HACs), or a Hospital-Acquired Condition (HAC) Reduction Program, under which payments to applicable hospitals are adjusted to provide an incentive to reduce hospital-acquired conditions.
- Section 1886(q) of the Act, as added by section 3025 of the Affordable Care Act and amended by section 10309 of the Affordable Care Act, which establishes the ''Hospital Readmissions Reduction Program'' effective for discharges from an ''applicable hospital'' beginning on or after October 1, 2012, under which payments to those hospitals under section 1886(d) of the Act will be reduced to account for certain excess readmissions.
- Section 1886(r) of the Act, as added by section 3133 of the Affordable Care Act, which provides for a reduction to disproportionate share hospital payments under section 1886(d)(5)(F) of the Act and for a new uncompensated care payment to eligible hospitals. Specifically, section 1886(r) of the Act requires that, for fiscal year 2014 and each subsequent fiscal year, subsection (d) hospitals that would otherwise receive a disproportionate share hospital payment made under section 1886(d)(5)(F) of the Act will receive two separate payments: (1) 25 percent of the amount they previously would have received under section 1886(d)(5)(F) of the Act for DSH (''the empirically justified amount''), and (2) an additional payment for the DSH hospital's proportion of uncompensated care, determined as the product of three factors. These three factors are: (1) 75 percent of the payments that would otherwise be made under section 1886(d)(5)(F) of the Act; (2) 1 minus the percent change in the percent of individuals under the age of 65 who are uninsured (minus 0.1 percentage points for FY 2014, and minus 0.2 percentage points for FY 2015 through FY 2017);

and (3) a hospital's uncompensated care amount relative to the uncompensated care amount of all DSH hospitals expressed as a percentage.

- Section 1886(m)(6) of the Act, as added by section 1206(a)(1) of the Pathway for SGR Reform Act of 2013 (Pub. L. 113–67), which provided for the establishment of site neutral payment rate criteria under the LTCH PPS with implementation beginning in FY 2016.
- Section 1206(b)(1) of the Pathway for SGR Reform Act of 2013, which further amended section 114(c) of the MMSEA, as amended by section 4302(a) of the ARRA and sections 3106(c) and 10312(a) of the Affordable Care Act, by retroactively reestablishing and extending the statutory moratorium on the full implementation of the 25-percent threshold payment adjustment policy under the LTCH PPS so that the policy will be in effect for 9 years (except for ''grandfathered'' hospital-within-hospitals (HwHs), which are permanently exempt from this policy); and section 1206(b)(2) (as amended by section 112(b) of Pub. L. 113–93), which together further amended section 114(d) of the MMSEA, as amended by section 4302(a) of the ARRA and sections 3106(c) and 10312(a) of the Affordable Care Act to establish a new moratoria (subject to certain defined exceptions) on the development of new LTCHs and LTCH satellite facilities and a new moratorium on increases in the number of beds in existing LTCHs and LTCH satellite facilities beginning January 1, 2015 and ending on September 30, 2017; and section 1206(d), which instructs the Secretary to evaluate payments to LTCHs classified under section 1886(b)(1)(C)(iv)(II) of the Act and to adjust payment rates in FY 2015 or FY 2016 under the LTCH PPS, as appropriate, based upon the evaluation findings.
- Section 1886(m)(5)(D)(iv) of the Act, as added by section 1206(c) of the Pathway for SGR Reform Act of 2013, which provides for the establishment, no later than October 1, 2015, of a functional status quality measure under the LTCH QRP for change in mobility among inpatients requiring ventilator support.
- Section 1899B of the Act, as added by the Improving Medicare Post-Acute Care Transformation Act of 2014 (the IMPACT Act of 2014), which imposes new data reporting requirements for certain postacute care providers, including LTCHs.
- Section 1886(d)(12) of the Act, as amended by section 204 of the Medicare Access and CHIP Reauthorization Act of 2015, which extended, through FY 2017, changes to the inpatient hospital payment adjustment for certain low-volume hospitals; and section 1886(d)(5)(G) of the Act, as amended by section 205 of the Medicare Access and CHIP Reauthorization Act of 2015, which extended, through FY 2017, the Medicare-dependent, small rural hospital (MDH) program.

2. Summary of the Major Provisions

a. MS–DRG Documentation and Coding Adjustment

Section 631 of the American Taxpayer Relief Act (ATRA, Pub. L. 112–240) amended section 7(b)(1)(B) of Public Law 110–90 to require the Secretary to make a recoupment adjustment to the standardized amount of Medicare payments to acute care hospitals to account for changes in MS–DRG documentation and coding that do not reflect real changes in case-mix, totaling $11 billion over a 4-year period of FYs 2014, 2015, 2016, and 2017. This adjustment represents the amount of the increase in aggregate payments as a result of not completing the prospective adjustment authorized under section 7(b)(1)(A) of Public Law 110–90 until FY 2013. Prior to the ATRA, this amount could not have been recovered under Public Law 110–90.

While our actuaries estimated that a −9.3 percent adjustment to the standardized amount would be necessary if CMS were to fully recover the $11 billion recoupment required by section 631 of the ATRA in one year, it is often our practice to delay or phase in rate adjustments over more than one year, in order to moderate the effects on rates in any one year. Therefore, consistent with the policies that we have adopted in many similar cases, we made a −0.8 percent recoupment adjustment to the standardized amount in FY 2014 and FY 2015. For FY 2016, we are making an additional −0.8 percent recoupment adjustment to the standardized amount.

b. Reduction of Hospital Payments for Excess Readmissions

We are making changes in policies to the Hospital Readmissions Reduction Program, which is established under section 1886(q) of the Act, as added by section 3025 of the Affordable Care Act. The Hospital Readmissions Reduction Program requires a reduction to a hospital's base operating DRG payment to account for excess readmissions of selected applicable conditions. For FYs 2013 and 2014, these conditions are acute myocardial infarction, heart failure, and pneumonia. For FY 2014, we established additional exclusions to the three existing readmission measures (that is, the excess readmission ratio) to account for additional planned readmissions. We also established additional readmissions measures, chronic obstructive pulmonary disease (COPD), and total hip arthroplasty and total knee arthroplasty (THA/TKA), to be used in the Hospital Readmissions Reduction Program for FY 2015 and future years. We expanded the readmissions measures for FY 2017 and future years by adding a measure of patients readmitted following coronary artery bypass graft (CABG) surgery.

In this final rule, we are making a refinement to the pneumonia readmissions measure, which expands the measure cohort for the FY 2017 payment determination and subsequent years. Specifically, we are finalizing a modified version of the expanded pneumonia cohort from what we had specified in the FY 2016 IPPS/LTCH PPS proposed rule such that the modified version includes patients with a principal discharge diagnosis of pneumonia or aspiration pneumonia, and patients with a principal discharge diagnosis of sepsis with a secondary diagnosis of pneumonia coded as present on admission. However, we are not including patients with a principal discharge diagnosis of respiratory failure or patients with a principal discharge diagnosis of sepsis if they are coded as having severe sepsis as we had previously proposed. In addition, we are adopting an extraordinary circumstance exception policy that will align with existing extraordinary circumstance exception policies for other IPPS quality reporting and payment programs and will allow hospitals that experience an extraordinary circumstance (such as a hurricane or flood) to request a waiver for use of data from the affected time period.

c. Hospital Value-Based Purchasing (VBP) Program

Section 1886(o) of the Act requires the Secretary to establish a Hospital VBP Program under which value-based incentive payments are made in a fiscal year to hospitals based on their performance on measures established for a performance period for such fiscal year.

For FY 2016, we are adopting one additional measure beginning with the FY 2018 program year and one measure beginning with the FY 2021 program year. We also are removing two measures beginning with the FY 2018 program year. In addition, we are moving one measure to the Safety domain and removing the Clinical Care—Process subdomain and renaming the Clinical Care—Outcomes subdomain

as the Clinical Care domain. Finally, we are signaling our intent to propose in future rulemaking to expand one measure and to update the standard population data we use to calculate several measures beginning with the FY 2019 program year.

d. Hospital-Acquired Condition (HAC) Reduction Program

Section 1886(p) of the Act, as added under section 3008(a) of the Affordable Care Act, establishes an incentive to hospitals to reduce the incidence of hospital-acquired conditions by requiring the Secretary to make an adjustment to payments to applicable hospitals effective for discharges beginning on October 1, 2014 and for subsequent program years. This 1-percent payment reduction applies to a hospital whose ranking is in the top quartile (25 percent) of all applicable hospitals, relative to the national average, of conditions acquired during the applicable period and on all of the hospital's discharges for the specified fiscal year. The amount of payment shall be equal to 99 percent of the amount of payment that would otherwise apply to such discharges under section 1886(d) or 1814(b)(3) of the Act, as applicable.

In this final rule, we are making three changes to existing Hospital-Acquired Condition Reduction Program policies: (1) An expansion to the population covered by the central line-associated bloodstream infection (CLABSI) and catheter-associated urinary tract infection (CAUTI) measures to include patients in select nonintensive care unit sites within a hospital; (2) an adjustment to the relative contribution of each domain to the Total HAC Score which is used to determine if a hospital will receive the payment adjustment; and (3) a policy that will align with existing extraordinary circumstance exception policies for other IPPS quality reporting and payment programs and will allow hospitals to request a waiver for use of data from the affected time period.

e. DSH Payment Adjustment and Additional Payment for Uncompensated Care

Section 3133 of the Affordable Care Act modified the Medicare disproportionate share hospital (DSH) payment methodology beginning in FY 2014. Under section 1886(r) of the Act, which was added by section 3133 of the Affordable Care Act, starting in FY 2014, DSHs will receive 25 percent of the amount they previously would have received under the statutory formula for Medicare DSH payments in section 1886(d)(5)(F) of the Act. The remaining amount, equal to 75 percent of what otherwise would have been paid as Medicare DSH payments, will be paid as additional payments after the amount is reduced for changes in the percentage of individuals that are uninsured. Each Medicare DSH hospital will receive an additional payment based on its share of the total amount of uncompensated care for all Medicare DSH hospitals for a given time period.

In this final rule, we are updating our estimates of the three factors used to determine uncompensated care payments for FY 2016. We are continuing to use the methodology we established in FY 2015 to calculate the uncompensated care payment amounts for merged hospitals such that we combine uncompensated care data for the hospitals that have undergone a merger in order to calculate their relative share of uncompensated care. We also are changing the time period of the data used to calculate the uncompensated care payment amounts to be distributed.

f. Changes to the LTCH PPS

Under the current LTCH PPS, all discharges are paid under the LTCH PPS standard Federal payment rate. In this final rule, we are implementing section 1206 of the Pathway for SGR Reform Act, which requires the establishment of an alternative site neutral payment rate for Medicare discharges from an LTCH that fail to meet certain statutory defined criteria, beginning with LTCH discharges occurring in cost reporting periods beginning on or after October 1, 2015. We include provisions regarding the application of the site neutral payment rate and the criteria for exclusion from the site neutral payment rate, as well as provisions on a number of methodological and implementation issues, such as the criterion for a principal diagnosis relating to a psychiatric diagnosis or to rehabilitation, the intensive care unit (ICU) criterion, the ventilator criterion, the definition of ''immediately preceded'' by a subsection (d) hospital discharge, limitation on beneficiary charges in the context of the new site neutral payment rate, and the transitional blended payment rate methodology for FY 2016 and FY 2017.

In addition, we are making changes to address certain statutory requirements related to an LTCH's average length of stay criterion and discharge payment percentage. We also are providing technical clarifications relating to our FY 2015 implementation of the new statutory moratoria on the establishment of new LTCHs and LTCH satellite facilities (subject to certain defined exceptions) and on bed increases in existing LTCHs and LTCH satellite facilities as well as making a technical revision to the regulations to more clearly reflect our established policies.

g. Hospital Inpatient Quality Reporting (IQR) Program

Under section 1886(b)(3)(B)(viii) of the Act, hospitals are required to report data on measures selected by the Secretary for the Hospital IQR Program in order to receive the full annual percentage increase in payments. In past years, we have established measures for reporting data and the process for submittal and validation of the data.

In this final rule, we are updating considerations for measure removal and retention. In addition, we are removing nine chart-abstracted measures for the FY 2018 payment determination and subsequent years: Six of these measures are ''topped-out'' (STK–01, STK–06, STK–08, VTE–1, VTE–2, and VTE–3) and two of the measures are suspended (IMM–1 and SCIP-Inf-4). However, we are retaining the electronic versions of five of the chart-abstracted measures finalized for removal.

We are refining two previously adopted measures for the FY 2018 payment determination and subsequent years. We are also adding seven new measures: Three new claims-based measures and one structural measure for the FY 2018 payment determination and subsequent years; and three new claims-based measures for the FY 2019 payment determination and subsequent years.

Further, for the FY 2018 payment determination, we are requiring hospitals to report a minimum of 4 electronic clinical quality measures. Under this modification to our proposal, no NQS domain distribution will be required. We are requiring that hospitals submit one quarter of electronic clinical quality measure data from either Q3 or Q4 of CY 2016 with a submission deadline of February 28, 2017. For the reporting of electronic clinical quality measures, hospitals may be certified either to the CEHRT 2014 or 2015 Edition, but must submit using the QRDA I format. We plan to finalize public reporting of electronic data in next year's rulemaking after the conclusion and assessment of the validation pilot. Six previously adopted measures (ED–1, ED–2, PC–01, STK–04, VTE–5, and VTE–6) must still be submitted via chart-abstraction regardless of whether they are also submitted as electronic clinical quality measures. We are also continuing our policy regarding STK–01 to clarify that

hospitals need not report the STK–01 measure as part of the STK measure set if reporting electronically, because no electronic specification existed for STK–01. Beginning with the FY 2018 payment determination, we are expanding our previously established extraordinary circumstances extensions/exemptions policy (79 FR 50277) to allow hospitals to utilize the existing Extraordinary Circumstances Exception (ECE) form to request exemptions based on hardships in reporting eCQMs.

Finally, we are modifying the existing processes for validation of chart-abstracted Hospital IQR Program data to remove one stratum.

h. Long-Term Care Quality Reporting Program (LTCH QRP)

Section 3004(a) of the Affordable Care Act amended section 1886(m)(5) of the Act to require the Secretary to establish the Long-Term Care Hospital Quality Reporting Program (LTCH QRP). This program applies to all hospitals certified by Medicare as LTCHs. Beginning with the FY 2014 payment determination and subsequent years, the Secretary is required to reduce any annual update to the standard Federal rate for discharges occurring during such fiscal year by 2 percentage points for any LTCH that does not comply with the requirements established by the Secretary.

The IMPACT Act of 2014 amended the Act in ways that affect the LTCH QRP. Specifically, section 2(a) of the IMPACT Act of 2014 added section 1899B of the Act, and section 2(c)(3) of the IMPACT Act of 2014 amended section 1886(m)(5) of the Act. Under section 1899B(a)(1) of the Act, the Secretary must require post-acute care (PAC) providers (defined in section 1899B(a)(2)(A) of the Act to include HHAs, SNFs, IRFs, and LTCHs) to submit standardized patient assessment data in accordance with section 1899B(b) of the Act, data on quality measures required under section 1899B(c)(1) of the Act, and data on resource use and other measures required under section 1899B(d)(1) of the Act. The Act also sets out specified application dates for each of the measures. The Secretary must specify the quality, resource use, and other measures not later than the applicable specified application date defined in section 1899B(a)(2)(E) of the Act.

In this final rule, we are establishing three previously finalized quality measures: One measure establishes the newly NQF-endorsed status of that quality measure; two other measures are for the purpose of establishing the cross-setting use of the previously finalized quality measures, in order to satisfy the IMPACT Act of 2014 requirement of adopting quality measures under the domains of skin integrity and falls with major injury. We are adopting an application of a fourth previously finalized LTCH functional status measure in order to meet the requirement of the IMPACT Act of 2014 to adopt a cross-setting measure under the domain of functional status, such as self-care or mobility. All four measures effect the FY 2018 annual payment update determination and beyond.

In addition, we will publicly report LTCH quality data beginning in fall 2016, on a CMS Web site, such as *Hospital Compare.* We will initially publicly report quality data on four quality measures.

Finally, we are lengthening our quarterly data submission deadlines from 45 days to 135 days beyond the end of each calendar year quarter beginning with quarter four (4) 2015 quality data. We are making this change in order to align with other quality reporting programs, and to allow an appropriate amount of time for LTCHs to review and correct quality data prior to the public posting of that data.

3. Summary of Costs and Benefits

• Adjustment for MS–DRG Documentation and Coding Changes. We are making a −0.8 percent recoupment adjustment to the standardized amount for FY 2016 to implement, in part, the requirement of section 631 of the ATRA that the Secretary make an adjustment totaling $11 billion over a 4-year period of FYs 2014, 2015, 2016, and 2017. This recoupment adjustment represents the amount of the increase in aggregate payments as a result of not completing the prospective adjustment authorized under section 7(b)(1)(A) of Public Law 110–90 until FY 2013. Prior to the ATRA, this amount could not have been recovered under Public Law 110–90.

While our actuaries estimated that a −9.3 percent recoupment adjustment to the standardized amount would be necessary if CMS were to fully recover the $11 billion recoupment required by section 631 of the ATRA in FY 2014, it is often our practice to delay or phase in rate adjustments over more than one year, in order to moderate the effects on rates in any one year. Therefore, consistent with the policies that we have adopted in many similar cases and the adjustment we made for FY 2014, we are making a −0.8 percent recoupment adjustment to the standardized amount in FY 2016. Taking into account the cumulative effects of this adjustment and the adjustments made in FYs 2014 and 2015, we currently estimate that approximately $5 to $6 billion would be left to recover under section 631 of the ATRA by the end of FY 2016. We have not yet addressed the specific amount of the final adjustment required under section 631 of the ATRA for FY 2017. We intend to address this adjustment in the FY 2017 IPPS rulemaking. However, we note that section 414 of the MACRA (Pub. L. 114–10), enacted on April 16, 2015, replaced the single positive adjustment we intended to make in FY 2018 with a 0.5 percent positive adjustment for each of FYs 2018 through 2023. The provision under section 414 of the MACRA does not impact our FY 2016 recoupment adjustment, and we will address this MACRA provision in future rulemaking.

• Changes to the Hospital Readmissions Reduction Program. We are making a refinement to the pneumonia readmissions measure, which will expand the measure cohort for the FY 2017 payment determination and subsequent years. In addition, we are adopting an extraordinary circumstance exception policy that will align with existing extraordinary circumstance exception policies for other IPPS quality reporting and payment programs and will allow hospitals that experience an extraordinary circumstance (such as a hurricane or flood) to request a waiver for use of data from the affected time period. These changes will not significantly impact the program in FY 2016, but could impact future years, depending on actual experience.

Overall, in this final rule, we estimate that 2,666 hospitals will have their base operating DRG payments reduced by their proxy FY 2016 hospital-specific readmissions adjustment. As a result, we estimate that the Hospital Readmissions Reduction Program will save approximately $420 million in FY 2016, an increase of $6 million over the estimated FY 2015 savings.

• Value-Based Incentive Payments under the Hospital VBP Program. We estimate that there will be no net financial impact to the Hospital VBP Program for the FY 2016 program year in the aggregate because, by law, the amount available for value-based incentive payments under the program in a given year must be equal to the total amount of base operating MS–DRG payment amount reductions for that year, as estimated by the Secretary. The estimated amount of base operating MS–DRG payment amount reductions for the FY 2016 program year and, therefore, the estimated amount available for value-based incentive payments for FY

2016 discharges is approximately $1.5 billion.

• Changes to the HAC Reduction Program for FY 2016. We are making three changes to existing HAC Reduction Program policies: (1) An expansion to the population covered by the central line-associated bloodstream infection (CLABSI) and catheter-associated urinary tract infection (CAUTI) measures to include patients in select nonintensive care unit sites within a hospital; (2) an adjustment to the relative contribution of each domain to the Total HAC Score that is used to determine if a hospital will receive the payment adjustment; and (3) a policy that will align with existing extraordinary circumstance exception policies for other IPPS quality reporting and payment programs and will allow hospitals to request a waiver for use of data from the affected period. Hospitals in the top quartile of HAC scores will continue to have their HAC Reduction Program payment adjustment applied, as required by law. However, because a hospital's Total HAC score and its ranking in comparison to other hospitals in any given year depend on several different factors, any significant impact due to the HAC Reduction Program changes for FY 2016, including which hospitals receive the adjustment, will depend on actual experience.

• Medicare DSH Payment Adjustment and Additional Payment for Uncompensated Care. Under section 1886(r) of the Act (as added by section 3313 of the Affordable Care Act), disproportionate share hospital payments to hospitals under section 1886(d)(5)(F) of the Act are reduced and an additional payment for uncompensated care is made to eligible hospitals beginning in FY 2014. Hospitals that receive Medicare DSH payments will receive 25 percent of the amount they previously would have received under the current statutory formula for Medicare DSH payments in section 1886(d)(5)(F) of the Act. The remainder, equal to an estimate of 75 percent of what otherwise would have been paid as Medicare DSH payments, will be the basis for determining the additional payments for uncompensated care after the amount is reduced for changes in the percentage of individuals that are uninsured and additional statutory adjustments. Each hospital that receives Medicare DSH payments will receive an additional payment for uncompensated care based on its share of the total uncompensated care amount reported by Medicare DSHs. The reduction to Medicare DSH payments is not budget neutral.

For FY 2016, we are providing that the 75 percent of what otherwise would have been paid for Medicare DSH is adjusted to approximately 63.69 percent of the amount to reflect changes in the percentage of individuals that are uninsured and additional statutory adjustments. In other words, approximately 47.76 percent (the product of 75 percent and 63.69 percent) of our estimate of Medicare DSH payments prior to the application of section 3133 of the Affordable Care Act is available to make additional payments to hospitals for their relative share of the total amount of uncompensated care. We project that Medicare DSH payments and additional payments for uncompensated care made for FY 2016 will reduce payments overall by approximately 1 percent as compared to the Medicare DSH payments and uncompensated care payments distributed in FY 2015. The additional payments have redistributive effects based on a hospital's uncompensated care amount relative to the uncompensated care amount for all hospitals that are estimated to receive Medicare DSH payments, and the payment amount is not directly tied to a hospital's number of discharges.

• Implementation of Legislative Extensions Relating to the Payment Adjustment for Low-Volume Hospitals and the Medicare-Dependent, Small Rural Hospital Program. The Medicare Access and CHIP Reauthorization Act of 2015 (MACRA) (Pub. L. 114–10) extended certain provisions relating to the payment adjustment for low-volume hospitals under section 1886(d)(12) of the Act and extended the Medicare-dependent, small rural hospital (MDH) Program. Section 204 of the MACRA extended the temporary changes to the low-volume hospital qualifying criteria and payment adjustment for IPPS hospital discharges occurring on or after April 1, 2015 through September 30, 2017. Section 205 of the MACRA extended the MDH program for IPPS hospital discharges occurring on or after April 1, 2015 through September 30, 2017. We project that IPPS payments for FY 2016 will increase by approximately $322 million as a result of the statutory extensions of certain provisions of the low-volume hospital payment adjustment and approximately $96 million for the MDH program compared to such payments in absence of these extensions.

• Update to the LTCH PPS Payment Rates and Other Payment Factors. Based on the best available data for the 419 LTCHs in our data base, we estimate that the changes to the payment rates and factors that we are presenting in the preamble and Addendum of this final rule, including the application of the new site neutral payment rate required by section 1886(m)(6)(A) of the Act, the update to the LTCH PPS standard Federal payment rate for FY 2016, and the changes to short-stay outlier and high-cost outlier payments will result in an estimated decrease in payments from FY 2015 of approximately $250 million.

• Hospital Inpatient Quality Reporting (IQR) Program. In this final rule, we are removing nine measures for the FY 2018 payment determination and subsequent years. We are adding seven measures to the Hospital IQR Program for the payment determination; four for the FY 2018 payment determination and subsequent years and three for FY 2019 payment determination and subsequent years. We also are requiring hospitals to report 4 of the 28 Hospital IQR Program electronic clinical quality measures that align with the Medicare EHR Incentive Program. We estimate that our policies for the adoption and removal of measures will result in total hospital costs of $169 million across 3,300 IPPS hospitals.

• Changes in LTCH Payments Related to the LTCH QRP Proposals. We believe that the increase in costs to LTCHs related to our LTCH QRP policies in this final rule is zero. We refer readers to sections VIII.C. of the preamble of this final rule for detailed discussion of the policies.

B. Summary

1. Acute Care Hospital Inpatient Prospective Payment System (IPPS)

Section 1886(d) of the Social Security Act (the Act) sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires the Secretary to use a prospective payment system (PPS) to pay for the capital-related costs of inpatient hospital services for these ''subsection (d) hospitals.'' Under these PPSs, Medicare payment for hospital inpatient operating and capital-related costs is made at predetermined, specific rates for each hospital discharge. Discharges are classified according to a list of diagnosis-related groups (DRGs).

The base payment rate is comprised of a standardized amount that is divided into a labor-related share and a nonlabor-related share. The labor-related share is adjusted by the wage index applicable to the area where the hospital is located. If the hospital is located in Alaska or Hawaii, the nonlabor-related share is adjusted by a cost-of-living adjustment factor. This

base payment rate is multiplied by the DRG relative weight.

If the hospital treats a high percentage of certain low-income patients, it receives a percentage add-on payment applied to the DRG-adjusted base payment rate. This add-on payment, known as the disproportionate share hospital (DSH) adjustment, provides for a percentage increase in Medicare payments to hospitals that qualify under either of two statutory formulas designed to identify hospitals that serve a disproportionate share of low-income patients. For qualifying hospitals, the amount of this adjustment varies based on the outcome of the statutory calculations. The Affordable Care Act revised the Medicare DSH payment methodology and provided for a new additional Medicare payment that considers the amount of uncompensated care provided by the hospital. Payment under this methodology began in FY 2014.

If the hospital is an approved teaching hospital, it receives a percentage add-on payment for each case paid under the IPPS, known as the indirect medical education (IME) adjustment. This percentage varies, depending on the ratio of residents to beds.

Additional payments may be made for cases that involve new technologies or medical services that have been approved for special add-on payments. To qualify, a new technology or medical service must demonstrate that it is a substantial clinical improvement over technologies or services otherwise available, and that, absent an add-on payment, it would be inadequately paid under the regular DRG payment.

The costs incurred by the hospital for a case are evaluated to determine whether the hospital is eligible for an additional payment as an outlier case. This additional payment is designed to protect the hospital from large financial losses due to unusually expensive cases. Any eligible outlier payment is added to the DRG-adjusted base payment rate, plus any DSH, IME, and new technology or medical service add-on adjustments.

Although payments to most hospitals under the IPPS are made on the basis of the standardized amounts, some categories of hospitals are paid in whole or in part based on their hospital-specific rate, which is determined from their costs in a base year. For example, sole community hospitals (SCHs) receive the higher of a hospital-specific rate based on their costs in a base year (the highest of FY 1982, FY 1987, FY 1996, or FY 2006) or the IPPS Federal rate based on the standardized amount. SCHs are the sole source of care in their areas. Specifically, section 1886(d)(5)(D)(iii) of the Act defines an SCH as a hospital that is located more than 35 road miles from another hospital or that, by reason of factors such as isolated location, weather conditions, travel conditions, or absence of other like hospitals (as determined by the Secretary), is the sole source of hospital inpatient services reasonably available to Medicare beneficiaries. In addition, certain rural hospitals previously designated by the Secretary as essential access community hospitals are considered SCHs.

We note that the Medicare Access and CHIP Reauthorization Act of 2015 (Pub. L. 114–10), enacted on April 16, 2015, extended the Medicare-dependent, small rural hospital (MDH) program through FY 2017. Through and including FY 2006, an MDH received the higher of the Federal rate or the Federal rate plus 50 percent of the amount by which the Federal rate was exceeded by the higher of its FY 1982 or FY 1987 hospital-specific rate. For discharges occurring on or after October 1, 2007, through FY 2017, an MDH receives the higher of the Federal rate or the Federal rate plus 75 percent of the amount by which the Federal rate is exceeded by the highest of its FY 1982, FY 1987, or FY 2002 hospital-specific rate. MDHs are a major source of care for Medicare beneficiaries in their areas. Section 1886(d)(5)(G)(iv) of the Act defines an MDH as a hospital that is located in a rural area, has no more than 100 beds, is not an SCH, and has a high percentage of Medicare discharges (not less than 60 percent of its inpatient days or discharges in its cost reporting year beginning in FY 1987 or in two of its three most recently settled Medicare cost reporting years).

Section 1886(g) of the Act requires the Secretary to pay for the capital-related costs of inpatient hospital services ''in accordance with a prospective payment system established by the Secretary.'' The basic methodology for determining capital prospective payments is set forth in our regulations at 42 CFR 412.308 and 412.312. Under the capital IPPS, payments are adjusted by the same DRG for the case as they are under the operating IPPS. Capital IPPS payments are also adjusted for IME and DSH, similar to the adjustments made under the operating IPPS. In addition, hospitals may receive outlier payments for those cases that have unusually high costs.

The existing regulations governing payments to hospitals under the IPPS are located in 42 CFR part 412, subparts A through M.

2. Hospitals and Hospital Units Excluded From the IPPS

Under section 1886(d)(1)(B) of the Act, as amended, certain hospitals and hospital units are excluded from the IPPS. These hospitals and units are: Rehabilitation hospitals and units; long-term care hospitals (LTCHs); psychiatric hospitals and units; children's hospitals; certain cancer hospitals; and short-term acute care hospitals located in Guam, the U.S. Virgin Islands, the Northern Mariana Islands, and American Samoa. Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS. Various sections of the Balanced Budget Act of 1997 (BBA, Pub. L. 105–33), the Medicare, Medicaid and SCHIP [State Children's Health Insurance Program] Balanced Budget Refinement Act of 1999 (BBRA, Pub. L. 106–113), and the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA, Pub. L. 106–554) provide for the implementation of PPSs for rehabilitation hospitals and units (referred to as inpatient rehabilitation facilities (IRFs)), LTCHs, and psychiatric hospitals and units (referred to as inpatient psychiatric facilities (IPFs)). (We note that the annual updates to the LTCH PPS are now included as part of the IPPS annual update document. Updates to the IRF PPS and IPF PPS are issued as separate documents.) Children's hospitals, certain cancer hospitals, short-term acute care hospitals located in Guam, the U.S. Virgin Islands, the Northern Mariana Islands, and American Samoa, and RNHCIs continue to be paid solely under a reasonable cost-based system subject to a rate-of-increase ceiling on inpatient operating costs, as updated annually by the percentage increase in the IPPS operating market basket.

The existing regulations governing payments to excluded hospitals and hospital units are located in 42 CFR parts 412 and 413.

3. Long-Term Care Hospital Prospective Payment System (LTCH PPS)

The Medicare prospective payment system (PPS) for LTCHs applies to hospitals described in section 1886(d)(1)(B)(iv) of the Act effective for cost reporting periods beginning on or after October 1, 2002. The LTCH PPS was established under the authority of section 123 of the BBRA and section 307(b) of the BIPA (as codified under section 1886(m)(1) of the Act). During the 5-year (optional) transition period, a LTCH's payment under the PPS was based on an increasing proportion of the LTCH Federal rate with a corresponding

decreasing proportion based on reasonable cost principles. Effective for cost reporting periods beginning on or after October 1, 2006, all LTCHs are paid 100 percent of the Federal rate. Section 1206(a) of Public Law 113–67 established the site neutral payment rate under the LTCH PPS. Under this statute, based on a rolling effective date that is linked to the date on which a given LTCH's Federal FY 2016 cost reporting period begins, LTCHs will be paid for LTCH discharges at the new site neutral payment rate unless the discharge meets the patient criteria for payment at the LTCH PPS standard Federal payment rate. The existing regulations governing payment under the LTCH PPS are located in 42 CFR part 412, subpart O.

4. Critical Access Hospitals (CAHs)

Under sections 1814(l), 1820, and 1834(g) of the Act, payments made to critical access hospitals (CAHs) (that is, rural hospitals or facilities that meet certain statutory requirements) for inpatient and outpatient services are generally based on 101 percent of reasonable cost. Reasonable cost is determined under the provisions of section 1861(v)(1)(A) of the Act and existing regulations under 42 CFR part 413.

5. Payments for Graduate Medical Education (GME)

Under section 1886(a)(4) of the Act, costs of approved educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of GME in accordance with section 1886(h) of the Act. The amount of payment for direct GME costs for a cost reporting period is based on the hospital's number of residents in that period and the hospital's costs per resident in a base year. The existing regulations governing payments to the various types of hospitals are located in 42 CFR part 413.

C. Summary of Provisions of Recent Legislation Discussed in This Final Rule

The American Taxpayer Relief Act of 2012 (ATRA) (Pub. L. 112–240), enacted on January 2, 2013, made a number of changes that affect the IPPS. We announced changes related to certain IPPS provisions for FY 2013 in accordance with sections 605 and 606 of Public Law 112–240 in a notice that appeared in the **Federal Register** on March 7, 2013 (78 FR 14689).

The Pathway for SGR Reform Act of 2013 (Pub. L. 113–67), enacted on December 26, 2013, also made a number of changes that affect the IPPS and the LTCH PPS. We implemented changes related to the low-volume hospital payment adjustment and MDH provisions for FY 2014 in accordance with sections 1105 and 1106 of Public Law 113–67 in an interim final rule with comment period that appeared in the **Federal Register** on March 18, 2014 (79 FR 15022).

The Protecting Access to Medicare Act of 2014 (Pub. L. 113–93), enacted on April 1, 2014, also made a number of changes that affect the IPPS and LTCH PPS.

The Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act of 2014) (Pub. L. 113–185), enacted on October 6, 2014, made a number of changes that affect the Long-Term Care Quality Reporting Program (LTCH QRP).

The Medicare Access and CHIP Reauthorization Act of 2015 (Pub. L. 114–10) enacted on April 16, 2015, extended the MDH program and changes to the payment adjustment for low-volume hospitals through FY 2017.

1. American Taxpayer Relief Act of 2012 (ATRA) (Pub. L. 112–240)

In this final rule, we are making policy changes to implement section 631 of the American Taxpayer Relief Act of 2012, which amended section 7(b)(1)(B) of Public Law 110–90 and requires a recoupment adjustment to the standardized amounts under section 1886(d) of the Act based upon the Secretary's estimates for discharges occurring in FY 2014 through FY 2017 to fully offset $11 billion (which represents the amount of the increase in aggregate payments from FYs 2008 through 2013 for which an adjustment was not previously applied).

2. Pathway for SGR Reform Act of 2013 (Pub. L. 113–67)

In this final rule, we are providing clarifications to prior policy changes, making new policy changes, and discussing the need for future policy changes to implement provisions under section 1206 of the Pathway for SGR Reform Act of 2013. These include:

- Section 1206(a), which provides for the establishment of patient criteria for exclusion from the new site neutral payment rate under the LTCH PPS, beginning in FY 2016.
- Section 1206(a)(3), which requires changes to the LTCH average length of stay criterion.
- Section 1206(b)(1), which further amended section 114(c) of the MMSEA, as amended by section 4302(a) of the ARRA and sections 3106(c) and 10312(a) of the Affordable Care Act by retroactively reestablishing, and extending, the statutory moratorium on the full implementation of the 25-percent threshold payment adjustment policy under the LTCH PPS so that the policy will be in effect for 9 years (except for grandfathered hospitals-within-hospitals (HwHs), which it permanently exempted from this policy).
- Section 1206(b)(2), which amended section 114(d) of the MMSEA, as amended by section 4302(a) of the ARRA and sections 3106(c) and 10312(a) of the Affordable Care Act to establish new moratoria (subject to certain defined exceptions) on the development of new LTCHs and LTCH satellite facilities and a new moratorium on increases in the number of beds in existing LTCHs and LTCH satellite facilities.

3. Protecting Access to Medicare Act of 2014 (Pub. L. 113–93)

In this final rule, we are clarifying or discussing our prior policy changes that implemented the following provisions (or portions of the following provisions) of the Protecting Access to Medicare Act of 2014 that are applicable to the IPPS and the LTCH PPS for FY 2016:

- Section 112, which makes certain changes to Medicare LTCH provisions, including modifications to the statutory moratoria on the establishment of new LTCHs and LTCH satellite facilities.
- Section 212, which prohibits the Secretary from requiring implementation of ICD–10 code sets before October 1, 2015.

4. Improving Medicare Post-Acute Care Transformation Act of 2014 (IMPACT Act of 2014) (Pub. L. 113–185)

In this final rule, we are implementing portions of section 2 of the IMPACT Act of 2014, which, in part, requires LTCHs, among other postacute care providers, to report standardized patient assessment data, data on quality measures, and data on resource use and other measures.

5. The Medicare Access and CHIP Reauthorization Act of 2015 (Pub. L. 114–10)

In this document, as an interim final rule with comment period, we are implementing sections 204 and 205 of the Medicare Access and CHIP Reauthorization Act of 2015, which extended the MDH program and changes to the low-volume payment adjustment for hospitals through FY 2017.

D. Issuance of Notice of Proposed Rulemaking

Earlier this year, we published a proposed rule that set forth proposed changes for the Medicare IPPS for operating costs and for capital-related costs of acute care hospitals for FY 2016. The proposed rule appeared in the **Federal Register** on April 30, 2015 (80 FR 24324). We also set forth proposed changes to payments to certain hospitals that continue to be excluded from the IPPS and paid on a reasonable cost basis. In addition, in the proposed rule, we set forth proposed changes to the payment rates, factors, and other payment rate policies under the LTCH PPS for FY 2016.

Below is a summary of the major changes that we proposed to make.

1. Proposed Changes to MS–DRG Classifications and Recalibrations of Relative Weights

In section II. of the preamble of the proposed rule, we included—

- Proposed changes to MS–DRG classifications based on our yearly review, including a discussion of the conversion of MS–DRGs to ICD–10 and the implementation of the ICD–10–CM and ICD–10–PCS systems.
- Proposed application of the documentation and coding adjustment for FY 2016 resulting from implementation of the MS–DRG system.
- Proposed recalibrations of the MS–DRG relative weights.
- Proposed changes to hospital-acquired conditions (HACs) and a discussion of HACs, including infections, that would be subject to the statutorily required adjustment in MS–DRG payments for FY 2016.
- A discussion of the FY 2016 status of new technologies approved for add-on payments for FY 2015 and a presentation of our evaluation and analysis of the FY 2016 applicants for add-on payments for high-cost new medical services and technologies (including public input, as directed by Pub. L. 108–173, obtained in a town hall meeting).

2. Proposed Changes to the Hospital Wage Index for Acute Care Hospitals

In section III. of the preamble to the proposed rule, we proposed revisions to the wage index for acute care hospitals and the annual update of the wage data. Specific issues addressed included the following:

- The proposed FY 2016 wage index update using wage data from cost reporting periods beginning in FY 2012.
- Calculation of the proposed occupational mix adjustment for FY 2016 based on the 2013 Occupational Mix Survey.
- Analysis and implementation of the proposed FY 2016 occupational mix adjustment to the wage index for acute care hospitals.
- Application of the rural floor, the proposed imputed rural floor, and the frontier State floor.
- Transitional wage indexes relating to the continued use of the revised OMB labor market area delineations based on 2010 Decennial Census data.
- Proposed revisions to the wage index for acute care hospitals based on hospital redesignations and reclassifications.
- The proposed out-migration adjustment to the wage index for acute care hospitals for FY 2016 based on commuting patterns of hospital employees who reside in a county and work in a different area with a higher wage index. Beginning in FY 2016, we proposed new out-migration adjustments based on commuting patterns obtained from 2010 Decennial Census data.
- The timetable for reviewing and verifying the wage data used to compute the proposed FY 2016 hospital wage index.
- Determination of the labor-related share for the proposed FY 2016 wage index.
- Proposed changes to the 3-year average pension policy and proposed changes to the wage index timetable regarding pension cost for FY 2017 and subsequent years.
- Clarification of the allocation of pension costs for the wage index.

3. Other Decisions and Proposed Changes to the IPPS for Operating Costs and Indirect Medical Education (IME) Costs

In section IV. of the preamble of the proposed rule, we discussed proposed changes or clarifications of a number of the provisions of the regulations in 42 CFR parts 412 and 413, including the following:

- Proposed changes to the inpatient hospital updates for FY 2016, including the adjustment for hospitals that are not meaningful EHR users under section 1886(b)(3)(B)(ix) of the Act.
- The proposed updated national and regional case-mix values and discharges for purposes of determining RRC status.
- The statutorily required IME adjustment factor for FY 2016.
- Proposal for determining Medicare DSH payments and the additional payments for uncompensated care for FY 2016.
- Proposed changes to the measures and payment adjustments under the Hospital Readmissions Reduction Program.
- Proposed changes to the requirements and provision of value-based incentive payments under the Hospital Value-Based Purchasing Program.
- Proposed requirements for payment adjustments to hospitals under the HAC Reduction Program for FY 2016.
- Proposed elimination of the election by hospitals to use the simplified cost allocation methodology for Medicare cost reports.
- Discussion of the Rural Community Hospital Demonstration Program and a proposal for making a budget neutrality adjustment for the demonstration program.
- Proposed changes in postacute care transfer policies as a result of proposed new MS–DRGs.
- A statement of our intent to discuss issues related to short inpatient hospital stays, long outpatient stays with observation services, and the related −0.2 percent IPPS payment adjustment in the CY 2016 hospital outpatient prospective payment system proposed rule.

4. Proposed FY 2016 Policy Governing the IPPS for Capital-Related Costs

In section V. of the preamble to the proposed rule, we discussed the proposed payment policy requirements for capital-related costs and capital payments to hospitals for FY 2016.

5. Proposed Changes to the Payment Rates for Certain Excluded Hospitals: Rate-of-Increase Percentages

In section VI. of the preamble of the proposed rule, we discussed proposed changes to payments to certain excluded hospitals for FY 2016.

6. Proposed Changes to the LTCH PPS

In section VII. of the preamble of the proposed rule, we set forth—

- Proposed changes to the LTCH PPS Federal payment rates, factors, and other payment rate policies under the LTCH PPS for FY 2016.
- Proposals to implement section 1206(a)(1) of the Pathway for SGR Reform Act, which established the site neutral payment rate as the default means of paying for discharges in LTCH cost reporting periods beginning on or after October 1, 2015.
- Provisions to make technical clarifications regarding the moratoria on the establishment of new LTCHs and LTCH satellite facilities and on bed increases in existing LTCHs and LTCH satellite facilities that were established by section 1206(b)(2) of the Pathway for SGR Reform, as amended, as well as a

proposal to make a technical revision to the regulations to more clearly reflect our established policies.

• Proposal to revise the average length of stay criterion for LTCHs to implement section 1206(a)(3) of the Pathway for SGR Reform Act.

7. Proposed Changes Relating to Quality Data Reporting for Specific Providers and Suppliers

In section VIII. of the preamble of the proposed rule, we addressed—

• Proposed requirements for the Hospital Inpatient Quality Reporting (IQR) Program as a condition for receiving the full applicable percentage increase.

• Proposed changes to the requirements for the quality reporting program for PPS-exempt cancer hospitals (PCHQR Program).

• Proposed changes to the requirements under the LTCH Quality Reporting Program (LTCH QRP).

• Proposed changes to align the reporting and submission timelines for the electronic submission of clinical quality measures for the Medicare Electronic Health Record (EHR) Incentive Program for eligible hospitals and CAHs with the reporting and submission of timelines for the Hospital IQR Program. (We note that the proposal included in the proposed rule to establish in regulations an EHR technology certification criterion for reporting clinical quality measures is not being finalized in this final rule but will be addressed in a future rulemaking.)

8. Determining Prospective Payment Operating and Capital Rates and Rate-of-Increase Limits for Acute Care Hospitals

In the Addendum to the proposed rule, we set forth proposed changes to the amounts and factors for determining the proposed FY 2016 prospective payment rates for operating costs and capital-related costs for acute care hospitals. We also proposed to establish the threshold amounts for outlier cases. In addition, we addressed the update factors for determining the rate-of-increase limits for cost reporting periods beginning in FY 2016 for certain hospitals excluded from the IPPS.

9. Determining Standard Federal Payment Rates for LTCHs

In the Addendum to the proposed rule, we set forth proposed changes to the amounts and factors for determining the proposed FY 2016 LTCH PPS standard Federal payment rate. We proposed to establish the adjustments for wage levels, the labor-related share, the cost-of-living adjustment, and high-cost outliers, including the fixed-loss amount, and the LTCH cost-to-charge ratios (CCRs) under the LTCH PPS.

10. Impact Analysis

In Appendix A of the proposed rule, we set forth an analysis of the impact that the proposed changes would have on affected acute care hospitals, LTCHs, and PCHs.

11. Recommendation of Update Factors for Operating Cost Rates of Payment for Hospital Inpatient Services

In Appendix B of the proposed rule, as required by sections 1886(e)(4) and (e)(5) of the Act, we provided our recommendations of the appropriate percentage changes for FY 2016 for the following:

• A single average standardized amount for all areas for hospital inpatient services paid under the IPPS for operating costs of acute care hospitals (and hospital-specific rates applicable to SCHs).

• Target rate-of-increase limits to the allowable operating costs of hospital inpatient services furnished by certain hospitals excluded from the IPPS.

• The standard Federal payment rate for hospital inpatient services furnished by LTCHs.

12. Discussion of Medicare Payment Advisory Commission Recommendations

Under section 1805(b) of the Act, MedPAC is required to submit a report to Congress, no later than March 15 of each year, in which MedPAC reviews and makes recommendations on Medicare payment policies. MedPAC's March 2015 recommendations concerning hospital inpatient payment policies address the update factor for hospital inpatient operating costs and capital-related costs for hospitals under the IPPS. We addressed these recommendations in Appendix B of the proposed rule. For further information relating specifically to the MedPAC March 2015 report or to obtain a copy of the report, contact MedPAC at (202) 220–3700 or visit MedPAC's Web site at: *http://www.medpac.gov*.

E. Public Comments Received in Response to the FY 2016 IPPS/LTCH PPS Proposed Rule

We received approximately 361 timely pieces of correspondence containing multiple comments on the FY 2016 IPPS/LTCH PPS proposed rule. We note that some of these public comments were outside of the scope of the proposed rule. These out-of-scope public comments are mentioned but not addressed with the policy responses in this final rule. Summaries of the public comments that are within the scope of the proposed rule and our responses to those public comments are set forth in the various sections of this final rule under the appropriate heading.

II. Changes to Medicare Severity Diagnosis-Related Group (MS–DRG) Classifications and Relative Weights

A. Background

Section 1886(d) of the Act specifies that the Secretary shall establish a classification system (referred to as diagnosis-related groups (DRGs)) for inpatient discharges and adjust payments under the IPPS based on appropriate weighting factors assigned to each DRG. Therefore, under the IPPS, Medicare pays for inpatient hospital services on a rate per discharge basis that varies according to the DRG to which a beneficiary's stay is assigned. The formula used to calculate payment for a specific case multiplies an individual hospital's payment rate per case by the weight of the DRG to which the case is assigned. Each DRG weight represents the average resources required to care for cases in that particular DRG, relative to the average resources used to treat cases in all DRGs.

Congress recognized that it would be necessary to recalculate the DRG relative weights periodically to account for changes in resource consumption. Accordingly, section 1886(d)(4)(C) of the Act requires that the Secretary adjust the DRG classifications and relative weights at least annually. These adjustments are made to reflect changes in treatment patterns, technology, and any other factors that may change the relative use of hospital resources.

B. MS–DRG Reclassifications

For general information about the MS–DRG system, including yearly reviews and changes to the MS–DRGs, we refer readers to the previous discussions in the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43764 through 43766), the FY 2011 IPPS/LTCH PPS final rule (75 FR 50053 through 50055), the FY 2012 IPPS/LTCH PPS final rule (76 FR 51485 through 51487), the FY 2013 IPPS/LTCH PPS final rule (77 FR 53273), the FY 2014 IPPS/LTCH PPS final rule (78 FR 50512), and the FY 2015 IPPS/LTCH PPS final rule (79 FR 49871).

C. Adoption of the MS–DRGs in FY 2008

For information on the adoption of the MS–DRGs in FY 2008, we refer readers to the FY 2008 IPPS final rule

with comment period (72 FR 47140 through 47189).

D. FY 2016 MS–DRG Documentation and Coding Adjustment

1. Background on the Prospective MS–DRG Documentation and Coding Adjustments for FY 2008 and FY 2009 Authorized by Public Law 110–90

In the FY 2008 IPPS final rule with comment period (72 FR 47140 through 47189), we adopted the MS–DRG patient classification system for the IPPS, effective October 1, 2007, to better recognize severity of illness in Medicare payment rates for acute care hospitals. The adoption of the MS–DRG system resulted in the expansion of the number of DRGs from 538 in FY 2007 to 745 in FY 2008. By increasing the number of MS–DRGs and more fully taking into account patient severity of illness in Medicare payment rates for acute care hospitals, MS–DRGs encourage hospitals to improve their documentation and coding of patient diagnoses.

In the FY 2008 IPPS final rule with comment period (72 FR 47175 through 47186), we indicated that the adoption of the MS–DRGs had the potential to lead to increases in aggregate payments without a corresponding increase in actual patient severity of illness due to the incentives for additional documentation and coding. In that final rule with comment period, we exercised our authority under section 1886(d)(3)(A)(vi) of the Act, which authorizes us to maintain budget neutrality by adjusting the national standardized amount, to eliminate the estimated effect of changes in coding or classification that do not reflect real changes in case-mix. Our actuaries estimated that maintaining budget neutrality required an adjustment of −4.8 percent to the national standardized amount. We provided for phasing in this −4.8 percent adjustment over 3 years. Specifically, we established prospective documentation and coding adjustments of −1.2 percent for FY 2008, −1.8 percent for FY 2009, and −1.8 percent for FY 2010.

On September 29, 2007, Congress enacted the TMA [Transitional Medical Assistance], Abstinence Education, and QI [Qualifying Individuals] Programs Extension Act of 2007 (Pub. L. 110–90). Section 7(a) of Public Law 110–90 reduced the documentation and coding adjustment made as a result of the MS–DRG system that we adopted in the FY 2008 IPPS final rule with comment period to −0.6 percent for FY 2008 and −0.9 percent for FY 2009, and we finalized the FY 2008 adjustment through rulemaking, effective October 1, 2007 (72 FR 66886).

For FY 2009, section 7(a) of Public Law 110–90 required a documentation and coding adjustment of −0.9 percent, and we finalized that adjustment through rulemaking effective October 1, 2008 (73 FR 48447). The documentation and coding adjustments established in the FY 2008 IPPS final rule with comment period, which reflected the amendments made by section 7(a) of Public Law 110–90, are cumulative. As a result, the −0.9 percent documentation and coding adjustment for FY 2009 was in addition to the −0.6 percent adjustment for FY 2008, yielding a combined effect of −1.5 percent.

2. Adjustment to the Average Standardized Amounts Required by Public Law 110–90

a. Prospective Adjustment Required by Section 7(b)(1)(A) of Public Law 110–90

Section 7(b)(1)(A) of Public Law 110–90 requires that, if the Secretary determines that implementation of the MS–DRG system resulted in changes in documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008 or FY 2009 that are different than the prospective documentation and coding adjustments applied under section 7(a) of Public Law 110–90, the Secretary shall make an appropriate adjustment under section 1886(d)(3)(A)(vi) of the Act. Section 1886(d)(3)(A)(vi) of the Act authorizes adjustments to the average standardized amounts for subsequent fiscal years in order to eliminate the effect of such coding or classification changes. These adjustments are intended to ensure that future annual aggregate IPPS payments are the same as the payments that otherwise would have been made had the prospective adjustments for documentation and coding applied in FY 2008 and FY 2009 reflected the change that occurred in those years.

b. Recoupment or Repayment Adjustments in FYs 2010 Through 2012 Required by Section 7(b)(1)(B) Public Law 110–90

If, based on a retroactive evaluation of claims data, the Secretary determines that implementation of the MS–DRG system resulted in changes in documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008 or FY 2009 that are different from the prospective documentation and coding adjustments applied under section 7(a) of Public Law 110–90, section 7(b)(1)(B) of Public Law 110–90 requires the Secretary to make an additional adjustment to the standardized amounts under section 1886(d) of the Act. This adjustment must offset the estimated increase or decrease in aggregate payments for FYs 2008 and 2009 (including interest) resulting from the difference between the estimated actual documentation and coding effect and the documentation and coding adjustment applied under section 7(a) of Public Law 110–90. This adjustment is in addition to making an appropriate adjustment to the standardized amounts under section 1886(d)(3)(A)(vi) of the Act as required by section 7(b)(1)(A) of Public Law 110–90. That is, these adjustments are intended to recoup (or repay, in the case of underpayments) spending in excess of (or less than) spending that would have occurred had the prospective adjustments for changes in documentation and coding applied in FY 2008 and FY 2009 matched the changes that occurred in those years. Public Law 110–90 requires that the Secretary only make these recoupment or repayment adjustments for discharges occurring during FYs 2010, 2011, and 2012.

3. Retrospective Evaluation of FY 2008 and FY 2009 Claims Data

In order to implement the requirements of section 7 of Public Law 110–90, we performed a retrospective evaluation of the FY 2008 data for claims paid through December 2008 using the methodology first described in the FY 2009 IPPS/LTCH PPS final rule (73 FR 43768 and 43775) and later discussed in the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43768 through 43772). We performed the same analysis for FY 2009 claims data using the same methodology as we did for FY 2008 claims (75 FR 50057 through 50068). The results of the analysis for the FY 2011 IPPS/LTCH PPS proposed and final rules, and subsequent evaluations in FY 2012, supported that the 5.4 percent estimate accurately reflected the FY 2009 increases in documentation and coding under the MS–DRG system. We were persuaded by both MedPAC's analysis (as discussed in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50064 through 50065)) and our own review of the methodologies recommended by various commenters that the methodology we employed to determine the required documentation and coding adjustments was sound.

As in prior years, the FY 2008, FY 2009, and FY 2010 MedPAR files are available to the public to allow independent analysis of the FY 2008 and FY 2009 documentation and coding

effects. Interested individuals may still order these files through the CMS Web site at: *http://www.cms.gov/Research-Statistics-Data-and-Systems/Files-for-Order/LimitedDataSets/* by clicking on MedPAR Limited Data Set (LDS)-Hospital (National). This CMS Web page describes the file and provides directions and further detailed instructions for how to order.

Persons placing an order must send the following: a Letter of Request, the LDS Data Use Agreement and Research Protocol (refer to the Web site for further instructions), the LDS Form, and a check (refer to the Web site for the required payment amount) to:

Mailing address if using the U.S. Postal Service: Centers for Medicare & Medicaid Services, RDDC Account, Accounting Division, P.O. Box 7520, Baltimore, MD 21207–0520.

Mailing address if using express mail: Centers for Medicare & Medicaid Services, OFM/Division of Accounting—RDDC, 7500 Security Boulevard, C3–07–11, Baltimore, MD 21244–1850.

4. Prospective Adjustments for FY 2008 and FY 2009 Authorized by Section 7(b)(1)(A) of Public Law 110–90

In the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43767 through 43777), we opted to delay the implementation of any documentation and coding adjustment until a full analysis of case-mix changes based on FY 2009 claims data could be completed. We refer readers to the FY 2010 IPPS/RY LTCH PPS final rule for a detailed description of our proposal, responses to comments, and finalized policy. After analysis of the FY 2009 claims data for the FY 2011 IPPS/LTCH PPS final rule (75 FR 50057 through 50073), we found a total prospective documentation and coding effect of 5.4 percent. After accounting for the −0.6 percent and the −0.9 percent documentation and coding adjustments in FYs 2008 and 2009, we found a remaining documentation and coding effect of 3.9 percent. As we have discussed, an additional cumulative adjustment of −3.9 percent would be necessary to meet the requirements of section 7(b)(1)(A) of Public Law 110–90 to make an adjustment to the average standardized amounts in order to eliminate the full effect of the documentation and coding changes that do not reflect real changes in case-mix on future payments. Unlike section 7(b)(1)(B) of Public Law 110–90, section 7(b)(1)(A) does not specify when we must apply the prospective adjustment, but merely requires us to make an ''appropriate'' adjustment. Therefore, as we stated in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50061), we believed the law provided some discretion as to the manner in which we applied the prospective adjustment of −3.9 percent. As we discussed extensively in the FY 2011 IPPS/LTCH PPS final rule, it has been our practice to moderate payment adjustments when necessary to mitigate the effects of significant downward adjustments on hospitals, to avoid what could be widespread, disruptive effects of such adjustments on hospitals. Therefore, we stated that we believed it was appropriate to not implement the −3.9 percent prospective adjustment in FY 2011 because we finalized a −2.9 percent recoupment adjustment for that fiscal year. Accordingly, we did not propose a prospective adjustment under section 7(b)(1)(A) of Public Law 110–90 for FY 2011 (75 FR 23868 through 23870). We noted that, as a result, payments in FY 2011 (and in each future fiscal year until we implemented the requisite adjustment) would be higher than they would have been if we had implemented an adjustment under section 7(b)(1)(A) of Public Law 110–90.

In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51489 and 51497), we indicated that, because further delay of this prospective adjustment would result in a continued accrual of unrecoverable overpayments, it was imperative that we implement a prospective adjustment for FY 2012, while recognizing CMS' continued desire to mitigate the effects of any significant downward adjustments to hospitals. Therefore, we implemented a −2.0 percent prospective adjustment to the standardized amount instead of the full −3.9 percent.

In the FY 2013 IPPS/LTCH PPS final rule (77 FR 53274 through 53276), we completed the prospective portion of the adjustment required under section 7(b)(1)(A) of Public Law 110–90 by finalizing a −1.9 percent adjustment to the standardized amount for FY 2013. We stated that this adjustment would remove the remaining effect of the documentation and coding changes that do not reflect real changes in case-mix that occurred in FY 2008 and FY 2009. We believed that it was imperative to implement the full remaining adjustment, as any further delay would result in an overstated standardized amount in FY 2013 and any future fiscal years until a full adjustment was made.

We noted again that delaying full implementation of the prospective portion of the adjustment required under section 7(b)(1)(A) of Public Law 110–90 until FY 2013 resulted in payments in FY 2010 through FY 2012 being overstated. These overpayments could not be recovered by CMS because section 7(b)(1)(B) of Public Law 110–90 limited recoupments to overpayments made in FY 2008 and FY 2009.

5. Recoupment or Repayment Adjustment Authorized by Section 7(b)(1)(B) of Public Law 110–90

Section 7(b)(1)(B) of Public Law 110–90 requires the Secretary to make an adjustment to the standardized amounts under section 1886(d) of the Act to offset the estimated increase or decrease in aggregate payments for FY 2008 and FY 2009 (including interest) resulting from the difference between the estimated actual documentation and coding effect and the documentation and coding adjustments applied under section 7(a) of Public Law 110–90. This determination must be based on a retrospective evaluation of claims data. Our actuaries estimated that there was a 5.8 percentage point difference resulting in an increase in aggregate payments of approximately $6.9 billion. Therefore, as discussed in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50062 through 50067), we determined that an aggregate adjustment of −5.8 percent in FYs 2011 and 2012 would be necessary in order to meet the requirements of section 7(b)(1)(B) of Public Law 110–90 to adjust the standardized amounts for discharges occurring in FYs 2010, 2011, and/or 2012 to offset the estimated amount of the increase in aggregate payments (including interest) in FYs 2008 and 2009.

It is often our practice to phase in payment rate adjustments over more than one year in order to moderate the effect on payment rates in any one year. Therefore, consistent with the policies that we have adopted in many similar cases, in the FY 2011 IPPS/LTCH PPS final rule, we made an adjustment to the standardized amount of −2.9 percent, representing approximately one-half of the aggregate adjustment required under section 7(b)(1)(B) of Public Law 110–90, for FY 2011. An adjustment of this magnitude allowed us to moderate the effects on hospitals in one year while simultaneously making it possible to implement the entire adjustment within the timeframe required under section 7(b)(1)(B) of Public Law 110–90 (that is, no later than FY 2012). For FY 2012, in accordance with the timeframes set forth by section 7(b)(1)(B) of Public Law 110–90, and consistent with the discussion in the FY 2011 IPPS/LTCH PPS final rule, we completed the recoupment adjustment by implementing the remaining −2.9 percent adjustment, in addition to removing the effect of the −2.9 percent

adjustment to the standardized amount finalized for FY 2011 (76 FR 51489 and 51498). Because these adjustments, in effect, balanced out, there was no year-to-year change in the standardized amount due to this recoupment adjustment for FY 2012. In the FY 2013 IPPS/LTCH PPS final rule (77 FR 53276), we made a final +2.9 percent adjustment to the standardized amount, completing the recoupment portion of section 7(b)(1)(B) of Public Law 110–90. We note that with this positive adjustment, according to our estimates, all overpayments made in FY 2008 and FY 2009 have been fully recaptured with appropriate interest, and the standardized amount has been returned to the appropriate baseline.

6. Recoupment or Repayment Adjustment Authorized by Section 631 of the American Taxpayer Relief Act of 2012 (ATRA)

Section 631 of the ATRA amended section 7(b)(1)(B) of Public Law 110–90 to require the Secretary to make a recoupment adjustment or adjustments totaling $11 billion by FY 2017. This adjustment represents the amount of the increase in aggregate payments as a result of not completing the prospective adjustment authorized under section 7(b)(1)(A) of Public Law 110–90 until FY 2013. As discussed earlier, this delay in implementation resulted in overstated payment rates in FYs 2010, 2011, and 2012. The resulting overpayments could not have been recovered under Public Law 110–90.

Similar to the adjustments authorized under section 7(b)(1)(B) of Public Law 110–90, the adjustment required under section 631 of the ATRA is a one-time recoupment of a prior overpayment, not a permanent reduction to payment rates. Therefore, we anticipated that any adjustment made to reduce payment rates in one year would eventually be offset by a single positive adjustment in FY 2018, once the necessary amount of overpayment was recovered. However, we note that section 414 of the Medicare Access and CHIP Reauthorization Act (MACRA) of 2015, Public Law 114–10, enacted on April 16, 2015, replaced the single positive adjustment we intended to make in FY 2018 with a 0.5 percent positive adjustment for each of FYs 2018 through 2023. The provision under section 414 of the MACRA does not impact our FY 2016 adjustment, and we will address this MACRA provision in future rulemaking.

As we stated in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50515 through 50517), our actuaries estimate that a −9.3 percent adjustment to the standardized amount would be necessary if CMS were to fully recover the $11 billion recoupment required by section 631 of the ATRA in FY 2014. It is often our practice to phase in payment rate adjustments over more than one year, in order to moderate the effect on payment rates in any one year. Therefore, consistent with the policies that we have adopted in many similar cases, and after consideration of the public comments we received, in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50515 through 50517), we implemented a −0.8 percent recoupment adjustment to the standardized amount in FY 2014. We stated that if adjustments of approximately −0.8 percent are implemented in FYs 2014, 2015, 2016, and 2017, using standard inflation factors, we estimate that the entire $11 billion will be accounted for by the end of the statutory 4-year timeline. As estimates of any future adjustments are subject to slight variations in total savings, we did not provide for specific adjustments for FYs 2015, 2016, or 2017 at that time. We stated that we believed that this level of adjustment for FY 2014 was a reasonable and fair approach that satisfies the requirements of the statute while mitigating extreme annual fluctuations in payment rates.

Consistent with the approach discussed in the FY 2014 IPPS/LTCH PPS final rule for recouping the $11 billion required by section 631 of the ATRA, in the FY 2015 IPPS/LTCH PPS final rule (79 FR 49873 through 49874), we implemented an additional −0.8 percent recoupment adjustment to the standardized amount for FY 2015. We estimated that this level of adjustment, combined with leaving the −0.8 percent adjustment made for FY 2014 in place, would recover up to $2 billion in FY 2015. When combined with the approximately $1 billion adjustment made in FY 2014, we estimated that approximately $8 billion would be left to recover under section 631 of the ATRA.

Consistent with the approach discussed in the FY 2014 IPPS/LTCH PPS final rule for recouping the $11 billion required by section 631 of the ATRA, we proposed in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24342) to implement a −0.8 percent recoupment adjustment to the standardized amount for FY 2016. We estimated that this level of adjustment, combined with leaving the −0.8 percent adjustments made for FY 2014 and FY 2015 in place, would recover up to $3 billion in FY 2016.

Comment: Several commenters restated their previous position, as set forth in comments submitted in response to the FY 2014 and FY 2015 IPPS/LTCH PPS proposed rules and summarized in the FY 2014 IPPS/LTCH PPS final rule, that CMS overstated the impact of documentation and coding effects for prior years. The commenters cited potential deficiencies in the CMS methodology and disagreed that the congressionally mandated adjustment is warranted. However, the majority of these commenters conceded that CMS is required by section 631 of the ATRA to recover $11 billion by FY 2017, and supported CMS' policy to phase in the adjustments over a 4-year period.

Response: We refer readers to the FY 2014 IPPS/LTCH PPS final rule (78 FR 50515 through 50517) for our response to the commenters' position that CMS overstated the impact of documentation and coding effects. We appreciate the commenters' acknowledgement that we are required by section 631 of the ATRA to recover $11 billion by FY 2017.

After consideration of the public comments we received, we are finalizing the proposal to make an additional −0.8 percent recoupment adjustment to the standardized amount for FY 2016. Taking into account the cumulative effects of this adjustment and the adjustments made in FYs 2014 and 2015, we currently estimate that approximately $5 to $6 billion would be left to recover under section 631 of the ATRA by the end of FY 2016. As we explained in the FY 2014 and FY 2015 IPPS/LTCH PPS final rules, estimates of any future adjustments are subject to variations in total estimated savings. Therefore, we have not yet addressed the specific amount of the final adjustment required under section 631 of the ATRA for FY 2017. We intend to address this adjustment in the FY 2017 IPPS rulemaking. As stated earlier, we also note that section 414 of the MACRA (Pub. L. 114–10), enacted on April 16, 2015, replaced the single positive adjustment we intended to make in FY 2018 with a 0.5 percent positive adjustment for each of FYs 2018 through 2023. The provision under section 414 of the MACRA does not impact our FY 2016 recoupment adjustment, and we will address this MACRA provision in future rulemaking.

E. Refinement of the MS–DRG Relative Weight Calculation

1. Background

Beginning in FY 2007, we implemented relative weights for DRGs based on cost report data instead of charge information. We refer readers to the FY 2007 IPPS final rule (71 FR 47882) for a detailed discussion of our final policy for calculating the cost-based DRG relative weights and to the

FY 2008 IPPS final rule with comment period (72 FR 47199) for information on how we blended relative weights based on the CMS DRGs and MS–DRGs.

As we implemented cost-based relative weights, some public commenters raised concerns about potential bias in the weights due to ''charge compression,'' which is the practice of applying a higher percentage charge markup over costs to lower cost items and services, and a lower percentage charge markup over costs to higher cost items and services. As a result, the cost-based weights would undervalue high-cost items and overvalue low-cost items if a single cost-to-charge ratio (CCR) is applied to items of widely varying costs in the same cost center. To address this concern, in August 2006, we awarded a contract to the Research Triangle Institute, International (RTI) to study the effects of charge compression in calculating the relative weights and to consider methods to reduce the variation in the CCRs across services within cost centers. For a detailed summary of RTI's findings, recommendations, and public comments that we received on the report, we refer readers to the FY 2009 IPPS/LTCH PPS final rule (73 FR 48452 through 48453). In addition, we refer readers to RTI's July 2008 final report titled ''Refining Cost to Charge Ratios for Calculating APC and MS–DRG Relative Payment Weights'' (*http://www.rti.org/reports/cms/HHSM-500-2005-0029I/PDF/Refining_Cost_to_Charge_Ratios_200807_Final.pdf*).

In the FY 2009 IPPS final rule (73 FR 48458 through 48467), in response to the RTI's recommendations concerning cost report refinements, we discussed our decision to pursue changes to the cost report to split the cost center for Medical Supplies Charged to Patients into one line for ''Medical Supplies Charged to Patients'' and another line for ''Implantable Devices Charged to Patients.'' We acknowledged, as RTI had found, that charge compression occurs in several cost centers that exist on the Medicare cost report. However, as we stated in the FY 2009 IPPS final rule, we focused on the CCR for Medical Supplies and Equipment because RTI found that the largest impact on the MS–DRG relative weights could result from correcting charge compression for devices and implants. In determining the items that should be reported in these respective cost centers, we adopted the commenters' recommendations that hospitals should use revenue codes established by the AHA's National Uniform Billing Committee to determine the items that should be reported in the ''Medical Supplies Charged to Patients'' and the ''Implantable Devices Charged to Patients'' cost centers. Accordingly, a new subscripted line for ''Implantable Devices Charged to Patients'' was created in July 2009. This new subscripted cost center has been available for use for cost reporting periods beginning on or after May 1, 2009.

As we discussed in the FY 2009 IPPS final rule (73 FR 48458) and in the CY 2009 OPPS/ASC final rule with comment period (73 FR 68519 through 68527), in addition to the findings regarding implantable devices, RTI also found that the costs and charges of computed tomography (CT) scans, magnetic resonance imaging (MRI), and cardiac catheterization differ significantly from the costs and charges of other services included in the standard associated cost center. RTI also concluded that both the IPPS and the OPPS relative weights would better estimate the costs of those services if CMS were to add standard cost centers for CT scans, MRIs, and cardiac catheterization in order for hospitals to report separately the costs and charges for those services and in order for CMS to calculate unique CCRs to estimate the costs from charges on claims data. In the FY 2011 IPPS/LTCH PPS final rule (75 FR 50075 through 50080), we finalized our proposal to create standard cost centers for CT scans, MRIs, and cardiac catheterization, and to require that hospitals report the costs and charges for these services under new cost centers on the revised Medicare cost report Form CMS–2552–10. (We refer readers to the FY 2011 IPPS/LTCH PPS final rule (75 FR 50075 through 50080) for a detailed discussion of the reasons for the creation of standard cost centers for CT scans, MRIs, and cardiac catheterization.) The new standard cost centers for CT scans, MRIs, and cardiac catheterization are effective for cost reporting periods beginning on or after May 1, 2010, on the revised cost report Form CMS–2552–10.

In the FY 2009 IPPS final rule (73 FR 48468), we stated that, due to what is typically a 3-year lag between the reporting of cost report data and the availability for use in ratesetting, we anticipated that we might be able to use data from the new ''Implantable Devices Charged to Patients'' cost center to develop a CCR for ''Implantable Devices Charged to Patients'' in the FY 2012 or FY 2013 IPPS rulemaking cycle. However, as noted in the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43782), due to delays in the issuance of the revised cost report Form CMS 2552–10, we determined that a new CCR for ''Implantable Devices Charged to Patients'' might not be available before FY 2013. Similarly, when we finalized the decision in the FY 2011 IPPS/LTCH PPS final rule to add new cost centers for CT scans, MRIs, and cardiac catheterization, we explained that data from any new cost centers that may be created will not be available until at least 3 years after they are first used (75 FR 50077). In preparation for the FY 2012 IPPS/LTCH PPS rulemaking, we checked the availability of data in the ''Implantable Devices Charged to Patients'' cost center on the FY 2009 cost reports, but we did not believe that there was a sufficient amount of data from which to generate a meaningful analysis in this particular situation. Therefore, we did not propose to use data from the ''Implantable Devices Charged to Patients'' cost center to create a distinct CCR for ''Implantable Devices Charged to Patients'' for use in calculating the MS–DRG relative weights for FY 2012. We indicated that we would reassess the availability of data for the ''Implantable Devices Charged to Patients'' cost center for the FY 2013 IPPS/LTCH PPS rulemaking cycle and, if appropriate, we would propose to create a distinct CCR at that time.

During the development of the FY 2013 IPPS/LTCH PPS proposed and final rules, hospitals were still in the process of transitioning from the previous cost report Form CMS–2552–96 to the new cost report Form CMS–2552–10. Therefore, we were able to access only those cost reports in the FY 2010 HCRIS with fiscal year begin dates on or after October 1, 2009, and before May 1, 2010; that is, those cost reports on Form CMS–2552–96. Data from the Form CMS–2552–10 cost reports were not available because cost reports filed on the Form CMS–2552–10 were not accessible in the HCRIS. Further complicating matters was that, due to additional unforeseen technical difficulties, the corresponding information regarding charges for implantable devices on hospital claims was not yet available to us in the MedPAR file. Without the breakout in the MedPAR file of charges associated with implantable devices to correspond to the costs of implantable devices on the cost report, we believed that we had no choice but to continue computing the relative weights with the current CCR that combines the costs and charges for supplies and implantable devices. We stated in the FY 2013 IPPS/LTCH PPS final rule (77 FR 53281 through 53283) that when we do have the necessary data for supplies and implantable

devices on the claims in the MedPAR file to create distinct CCRs for the respective cost centers for supplies and implantable devices, we hoped that we would also have data for an analysis of creating distinct CCRs for CT scans, MRIs, and cardiac catheterization, which could then be finalized through rulemaking. In the FY 2013 IPPS/LTCH PPS final rule (77 FR 53281), we stated that, prior to proposing to create these CCRs, we would first thoroughly analyze and determine the impacts of the data, and that distinct CCRs for these new cost centers would be used in the calculation of the relative weights only if they were first finalized through rulemaking.

At the time of the development of the FY 2014 IPPS/LTCH PPS proposed rule (78 FR 27506 through 27507), we had a substantial number of hospitals completing all, or some, of these new cost centers on the FY 2011 Medicare cost reports, compared to prior years. We stated that we believed that the analytic findings described using the FY 2011 cost report data and FY 2012 claims data supported our original decision to break out and create new cost centers for implantable devices, MRIs, CT scans, and cardiac catheterization, and we saw no reason to further delay proposing to implement the CCRs of each of these cost centers. Therefore, beginning in FY 2014, we proposed a policy to calculate the MS–DRG relative weights using 19 CCRs, creating distinct CCRs from cost report data for implantable devices, MRIs, CT scans, and cardiac catheterization.

We refer readers to the FY 2014 IPPS/LTCH PPS proposed rule (78 FR 27507 through 27509) and final rule (78 FR 50518 through 50523) in which we presented data analyses using distinct CCRs for implantable devices, MRIs, CT scans, and cardiac catheterization. The FY 2014 IPPS/LTCH PPS final rule also set forth our responses to public comments we received on our proposal to implement these CCRs. As explained in more detail in the FY 2014 IPPS/LTCH PPS final rule, we finalized our proposal to use 19 CCRs to calculate MS–DRG relative weights beginning in FY 2014—the then existing 15 cost centers and the 4 new CCRs for implantable devices, MRIs, CT scans, and cardiac catheterization. Therefore, beginning in FY 2014, we calculate the IPPS MS–DRG relative weights using 19 CCRs, creating distinct CCRs for implantable devices, MRIs, CT scans, and cardiac catheterization.

2. Discussion for FY 2016 and Summary of Public Comments Received in Response to Request on Nonstandard Cost Center Codes

Consistent with the policy established beginning for FY 2014, we calculated the MS–DRG relative weights for FY 2016 using two data sources: The MedPAR file as the claims data source and the HCRIS as the cost report data source. We adjusted the charges from the claims to costs by applying the 19 national average CCRs developed from the cost reports. The description of the calculation of the 19 CCRs and the MS–DRG relative weights for FY 2016 is included in section II.H.3. of the preamble of this final rule.

In preparing to calculate the 19 national average CCRs developed from the cost reports, we reviewed the HCRIS data and noticed inconsistencies in hospitals' cost reporting and use of nonstandard cost center codes. In addition, we discovered that hospitals typically report the nonstandard codes with standard cost centers that are different from the standard cost centers to which CMS maps and ''rolls up'' each nonstandard code in compiling the HCRIS. As stated in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24344), we are concerned that inconsistencies in hospitals' use of nonstandard codes, coupled with differences in the way hospitals and CMS map these nonstandard codes to standard lines, may have implications for the calculation of the 19 CCRs and the aspects of the IPPS that rely on the CCRs (for example, the calculation of the MS–DRG relative weights).

The Medicare cost report Form CMS–2552–10, Worksheet A, includes preprinted cost center codes that reflect the standard cost center descriptions by category (General Service, Routine, and Ancillary) used in most hospitals. Each preprinted standard cost center is assigned a unique 5-digit code. The preprinted 5-digit codes provide standardized meaning for data analysis, and are automatically coded by CMS-approved cost report software. To accommodate hospitals that have additional cost centers that are sufficiently different from the preprinted standard cost centers, CMS identified additional cost centers known as ''nonstandard'' cost centers. Each nonstandard cost center must be labeled appropriately and reported under a specific standard cost center. For example, under the standard cost center ''Electrocardiology'' with its 5-digit code of 06900, there are six nonstandard cost centers (for EKG and EEG, Electromyography, Cardiopulmonary, Stress Test, Cardiology, and Holter Monitor), each with a unique 5-digit code.

The instructions for the Medicare cost report Form CMS–2552–10 explain the purpose and requirements related to the standard and nonstandard cost centers. Specifically, in CMS Pub. 15–2, Chapter 40, Section 4013, the instructions for Worksheet A of Form CMS–2552–10 state:

''Cost center coding is a methodology for standardizing the meaning of cost center labels as used by health care providers on the Medicare cost report. Form CMS–2552–10 provides for preprinted cost center descriptions on Worksheet A. In addition, a space is provided for a cost center code. The preprinted cost center labels are automatically coded by CMS approved cost reporting software. These cost center descriptions are hereafter referred to as the standard cost centers. Additionally, nonstandard cost center descriptions have been identified through analysis of frequently used labels.

The use of this coding methodology allows providers to continue to use labels for cost centers that have meaning within the individual institution. The five digit cost center codes that are associated with each provider label in their electronic file provide standardized meaning for data analysis. You are required to compare any added or changed label to the descriptions offered on the standard or nonstandard cost center tables. A description of cost center coding and the table of cost center codes are in § 4095, Table 5.''

Section 4095 of CMS Pub. 15–2 (pages 40–805 and 40–806) further provides that: ''Both the standard and nonstandard cost center descriptions along with their cost center codes are shown on Table 5 . . . . Cost center codes may only be used in designated lines in accordance with the classification of the cost center(s), *i.e.,* lines 1 through 23 may only contain cost center codes within the general service cost center category of both standard and nonstandard coding. For example, in the general service cost center category for Operation of Plant cost, line 7 and subscripts thereof should only contain cost center codes of 00700–00719 and nonstandard cost center codes. This logic must hold true for all other cost center categories, *i.e.,* ancillary, inpatient routine, outpatient, other reimbursable, special purpose, and non- reimbursable cost centers.''

Table 5 of Section 4095, Chapter 40, of CMS Pub. 15–2 (pages 40–807 through 40–810) lists the electronic reporting specifications for each

standard cost center, its 5-digit code, and, separately, the nonstandard cost center descriptions and their 5-digit codes. While the nonstandard codes are categorized by General Service Cost Centers, Inpatient Routine Service Cost Centers, and Ancillary Service Cost Centers, among others, Table 5 does not map the nonstandard cost centers and codes to specific standard cost centers. In addition, the CMS-approved cost reporting software does not restrict the use of nonstandard codes to specific standard cost centers. Furthermore, the software does not prevent hospitals from manually entering in a name for a nonstandard cost center code that may be different from the name that CMS assigned to that nonstandard cost center code. For example, Table 5 specifies that the 5-digit code for the Ancillary Service nonstandard cost center ''Acupuncture'' is 03020. When CMS creates the HCRIS SAS files, CMS maps all codes 03020 to standard line 53, ''Anesthesiology''.[1] However, a review of the December 31, 2014 update of the FY 2013 HCRIS SAS files, from which the proposed 19 CCRs for FY 2016 were calculated, revealed that, of the 3,172 times that nonstandard code 03020 was reported by hospitals, it is called ''Acupuncture'' only 122 times. Instead, hospitals use various names for nonstandard code 03020, such as ''Cardiopulmonary,'' ''Sleep Lab,'' ''Diabetes Center,'' or ''Wound Care''.

As noted above, the Ancillary Service standard cost center for ''Anesthesiology'', line 53 of Worksheet A and subsequent worksheets of the Medicare cost report Form CMS–2552–10 (and its associated nonstandard cost center code 03020 ''Acupuncture'') is an example of a cost center that is subject to inconsistent reporting. Our review of the FY 2013 HCRIS as-submitted cost reports from which the proposed 19 CCRs for FY 2016 were calculated revealed that, regardless of the actual name hospitals assigned to nonstandard code 03020 (for example, ''Acupuncture'' or otherwise), hospitals reported this code almost 100 percent of the time on standard line 76, ''Other Ancillary,'' and never on standard line 53, ''Anesthesiology.'' Yet, as noted above, CMS (and previously HCFA, under earlier versions of the Medicare cost report), in creating the HCRIS database, has had the longstanding practice of mapping and rolling up all instances of nonstandard code 03020 to standard line 53, ''Anesthesiology,'' not to standard line 76, ''Other Ancillary. Therefore, the version of the HCRIS SAS files created by CMS, which CMS uses for ratesetting purposes, may differ somewhat from the as-submitted cost reports of hospitals because CMS moves various nonstandard cost centers based on cost center codes, not cost center descriptions, from the standard cost centers in which hospitals report them and places them in different standard cost centers based on CMS' roll-up specifications.

In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24345), we highlighted the discrepancy in the reporting of nonstandard code 03020 ''Acupuncture'' because the placement of nonstandard code 03020 and its related costs and charges seem to have the most significant implications for the calculation of one of the 19 CCRs, the Anesthesia CCR. As stated in section II.H.3. of the preamble of the proposed rule (80 FR 24413), the proposed FY 2016 CCR for Anesthesia was 0.108. We calculated this proposed CCR based on the December 31, 2014 update of the FY 2013 HCRIS, with the nonstandard cost center codes of 03020 through 03029 rolled up to standard line 53, ''Anesthesiology.'' That is, under the CMS' HCRIS specifications, we rolled up the following 5-digit codes to standard line 53, ''Anesthesiology'':[2] standard codes for ''Anesthesiology'' 05300 through 05329; and nonstandard codes for ''Acupuncture'' 03020 through 03029. For simulation purposes, we also created a version of the December 31, 2014 update of the FY 2013 HCRIS which retained nonstandard codes 03020 through 03029 on standard line 76, ''Other Ancillary,'' where hospitals actually reported these codes on their as-submitted FY 2013 cost reports. When all reported uses of nonstandard codes 03020 through 03029 remain on standard line 76, ''Other Ancillary,'' we calculated that the Anesthesia CCR would be 0.084 (instead of 0.108 as proposed in section II.H.3. of the preamble of the FY 2016 IPPS/LTCH PPS proposed rule). We also looked at the effect on the other 18 CCRs. In the version of HCRIS we created for simulation purposes, by keeping the nonstandard cost center codes in standard line 76, ''Other Ancillary,'' where hospitals typically report them, rather than remapping them according to CMS specifications, three other CCRs also were affected, although not quite as significantly as the Anesthesia CCR. As proposed in section II.H.3. of the preamble of the FY 2016 IPPS/LTCH PPS proposed rule, the proposed FY 2016 Cardiology CCR was 0.119. However, when all cardiology-related nonstandard codes were rolled up to standard line 76, ''Other Ancillary'', and not to standard line 69, ''Electrocardiology'' as under CMS' usual practice, the Cardiology CCR was 0.113. In addition, as proposed in section II.H.3. of the preamble of the FY 2016 IPPS/LTCH PPS proposed rule, the proposed FY 2016 Radiology CCR was 0.159. However, when all radiology-related nonstandard codes were rolled up to standard line 76, ''Other Ancillary'', and not to standard lines 54 (Radiology-Diagnostic), 55 (Radiology-Therapeutic), and 56 (Radioisotope) as under CMS' usual practice, the Radiology CCR was 0.161. Most notably, the CCR that was most impacted was the ''Other Services'' CCR. As proposed in section II.H.3. of the preamble of the FY 2016 proposed rule, the ''Other Services'' CCR was 0.367. However, if all nonstandard cost center codes remained in line 76, ''Other Ancillary'' as hospitals have reported them in their FY 2013 as-submitted cost reports, instead of CMS applying its usual practice of rolling up these lines to the applicable ''Electrocardiology'' and ''Radiology'' standard cost centers, among others, the ''Other Services'' CCR was 0.291. We note that we observed minimal or no differences in the remaining 15 CCRs, when their associated nonstandard cost centers were rolled up to their specific standard cost centers, versus being rolled up to the standard line 76, ''Other Ancillary.''

The differences in these CCRs computed from the HCRIS that was compiled by applying CMS' current rollup procedures of assigning nonstandard codes to specific standard cost centers, as compared to following hospitals' general practice of reporting nonstandard codes ''en masse'' on line 76, ''Other Ancillary,'' have implications for the aspects of the IPPS that rely on the CCRs (for example, the calculation of the MS–DRG relative weights). In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24345), we discussed that some questions arise: whether CMS' procedures for mapping and rolling up nonstandard cost centers to specific standard cost centers should be updated; whether hospital reporting practices are imprecise; or whether there is a combination of both of these

[1] To view how CMS rolls up the codes to create the HCRIS SAS files, we refer readers to *http://www.cms.gov/Research-Statistics-Data-and-Systems/Downloadable-Public-Use-Files/Cost-Reports/Hospital-2010-form.html*. On this page, click on ''Hospital-2010–SAS.ZIP (SAS datasets and documentation)'', and from the zip file, choose the Excel spreadsheet ''2552–10 SAS FILE RECORD LAYOUT AND CROSSWALK TO 96.xlsx''. The second tab of this spreadsheet is ''NEW ROLLUPS'', and shows the standard and nonstandard 5-digit codes (columns B and C) that CMS rolls up to each standard line (column G).

[2] *Ibid.*

questions. CMS' rollup procedures were developed many years ago based on historical analysis of hospitals' cost reporting practices and health care services furnished. It may be that it would be appropriate for CMS to reevaluate its rollup procedures based on hospitals' more current cost reporting practices and contemporary health care services provided. However, one factor complicating the determination of the most accurate standard cost centers to which each respective nonstandard cost center should be mapped is hospitals' own inconsistent reporting practices. For example, it may be determined that CMS should no longer be mapping and rolling up nonstandard cost center ''Acupuncture'' and its associated 5-digit codes 03020 through 03029 to standard cost center line 53, ''Anesthesiology.'' However, determining which other standard line ''Acupuncture'' and its associated 5-digit codes 03020 through 03029 should be mapped to is unclear, given that, as mentioned above, out of the 3,172 times that codes 03020 through 03029 were reported in the FY 2013 HCRIS file, hospitals called these codes ''Acupuncture'' only 122 times, and instead called these codes a variety of other names (such as Cardiopulmonary, Sleep Lab, Wound Care, Diabetes Center, among others). Therefore, without being able to determine the true nature of the services that were actually provided, it is difficult to know which standard cost center to map these services. That is, the question arises as to whether the service provided was acupuncture because a hospital reported code 03020, or whether the service provided was cardiopulmonary, which was the name a hospital assigned to code 03020. Furthermore, if the service provided was in fact cardiopulmonary, then, as Table 5 of Section 4095 of CMS Pub. 15–2 indicates, the correct nonstandard code for cardiopulmonary is 03160, not 03020. A related question would be, if the hospital provided cardiopulmonary services, which are clearly related to cardiology, why did the hospital report those costs and charges on line 76, ''Other Ancillary,'' instead of subscripting standard line 69, ''Electrocardiology,'' and reporting the cardiopulmonary costs and charges there.

In summary, we stated in the FY 2016 IPPS/LTCH PPS proposed rule that we believe that the differences between the standard cost centers to which CMS assigns nonstandard codes when CMS rolls up cost report data to create the HCRIS SAS database, and the standard cost centers to which hospitals tend to assign and use nonstandard codes, coupled with the inconsistencies found in hospitals' use and naming of the nonstandard codes, have implications for the aspects of the IPPS that rely on the CCRs. For example, we have explained above and provided examples of how the CCRs used to calculate the MS–DRG relative weights could change, based on where certain nonstandard codes are reported and rolled up in the cost reports. However, before considering changes to our longstanding practices, in the proposed rule, we solicited public comments from stakeholders as to how to improve the use of nonstandard cost center codes. We indicated that one option might be for CMS to allow only certain nonstandard codes to be used with certain standard cost centers, meaning that CMS might require that the CMS-approved cost reporting software ''lock in'' those nonstandard codes with their assigned standard cost centers. For example, if a hospital wishes to subscript a standard cost center, the cost reporting software might allow the hospital to choose only from a predetermined set of nonstandard codes. Therefore, for example, if a hospital wished to report Cardiopulmonary costs and charges on its cost report, the only place that the hospital could do that under this approach would be from a drop down list of cardiology-related services on standard line 69, ''Electrocardiology,'' and not on another line (not even line 76, ''Other Ancillary''). We stated that some flexibility could be maintained, but within certain limits, in consideration of unique services that hospitals might provide.

Below we summarize the public comments that we received in response to our solicitation of comments on nonstandard cost center codes.

Comment: Several commenters expressed concern that issues related to reporting of costs and charges in the nonstandard cost centers could affect the validity of the CCRs used to develop the relative weights. The commenters requested that CMS provide more cost reporting instruction so that the accuracy and validity of the CCRs could be improved, through more detailed examples of how cost report and claims data are used for ratesetting, identifying what revenue codes and services should be associated with specific cost centers, and providing detailed instructions regarding cost allocation methods. The commenters believed that these types of actions would resolve some of the inconsistencies in hospital cost reporting. Several commenters supported more specific guidance and data processing on cost reporting and supported CMS' idea to ''lock in'' certain nonstandard codes with specific cost centers in the cost reporting softwares, but wanted to retain flexibility in terms of available options.

Commenters requested that CMS work with stakeholders through methods such as additional engagement with the provider community and convening a technical workgroup to receive stakeholder input. Several commenters requested that CMS provide sufficient advance notice when cost reporting process changes are made, noting that it would take time for hospitals to implement changes to their internal cost reporting processes. The commenters were generally supportive of efforts to improve the cost reporting process and cost estimation accuracy. One commenter stated that inconsistencies in reporting of nonstandard cost centers compound the problems the commenter raised in earlier public comments regarding allocation of capital costs and the new CCRs for MRIs and CT scans. Other commenters stated generally that the use of distinct CCRs for MRI and CT scans produces ''payment rates that lack face validity'' and recommended that CMS not finalize the use of the MRI and CT scan CCRs.

Response: We appreciate the input that stakeholders have provided in response to the request for comment on how to improve the use of nonstandard cost center codes. As discussed in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24344 through 24346), we noticed inconsistencies in hospital cost reporting of nonstandard cost centers and were concerned about the implication that some of these discrepancies might have on the aspects of the IPPS that rely on CCRs. However, we did not propose any changes to the methodology or data sources for the FY 2016 CCRs and relative weights.

We appreciate the request that CMS provide more detailed instructions regarding appropriate cost reporting methodologies. We believe that the desire for more specific direction in how to report should be balanced by the need for flexibility in cost reporting based on each hospital's own internal charge structure. That balance also applies to cost allocation methodologies. As discussed in the FY 2014 IPPS/LTCH PPS final rule (78 FR 50523) and in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50077 through 50079), we encouraged hospitals over the past several years to use the most precise cost reporting methods in response to the new cost report lines such as the MRI and CT scan standard

cost centers, which, in most cases, corresponded to the recommended cost allocation statistic. We believe that more precise cost allocation could mitigate concerns related to the accuracy of the MRI and CT scan CCRs. However, we recognized that hospitals have varying resources and capability for assigning costs and charges on the cost report, which is why in most cases we have allowed greater flexibility. As commenters noted, an instance in which we have specifically provided guidance was in connection with the decision to split the cost center for Medical Supplies Charged to Patients into one line for ''Medical Supplies Charged to Patients'' and another line for ''Implantable Devices Charged to Patients,'' where we listed the revenue codes for which charges would properly be associated with these two cost centers (we refer readers to the FY 2009 IPPS/LTCH PPS final rule (73 FR 48462 through 48463). For that specific change to address charge compression in the ''Medical Supplies'' cost center, the separation between the types of services associated with each cost center is more distinct and therefore more easily identifiable by revenue code, which may not be true of all nonstandard and standard cost centers. Regarding the comments stating that use of distinct CCRs for MRI and CT scans produce ''payment rates that lack face validity'' and that CMS not finalize use of the MRI and CT scan CCRs, we note that we did not make any proposals regarding the use of the MRI and CT scans in particular in the relative weights calculation for FY 2016. As we have done since FY 2014, we are using the MRI and CT scan CCRs to calculate the IPPS relative weights for FY 2016. We also note that we have previously addressed stakeholder concerns related to the CT scan and MRI standard cost centers in setting the IPPS relative weights. For a detailed discussion of the CT scan and MRI standard cost centers, we refer readers to the FY 2014 IPPS/LTCH PPS final rule (78 FR 50520 through 50523), and the FY 2011 IPPS/LTCH PPS final rule (75 FR 50077 through 50079).

We appreciate the comments that stakeholders submitted and will continue to explore ways in which we can improve the accuracy of the cost report data and calculated CCRs used in the cost estimation process. To the extent possible, we will continue to seek stakeholder input in efforts to limit the impact on providers. In the interim, while we are considering these public comments, as we proposed, we are using the 19 CCRs for FY 2016 (listed in section II.H.3. of the preamble of this final rule) that were calculated from the March 2015 update of the FY 2013 HCRIS, created in accordance with CMS' current longstanding procedures for mapping and rolling up nonstandard cost center codes. As we did with the FY 2015 IPPS/LTCH PPS final rule, we are providing the version of the HCRIS from which we calculated these 19 CCRs on the FY 2016 IPPS Final Rule Home Page at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2016–IPPS-Final-Rule-Home-Page.html*.[3]

F. Adjustment to MS–DRGs for Preventable Hospital-Acquired Conditions (HACs), Including Infections for FY 2016

1. Background

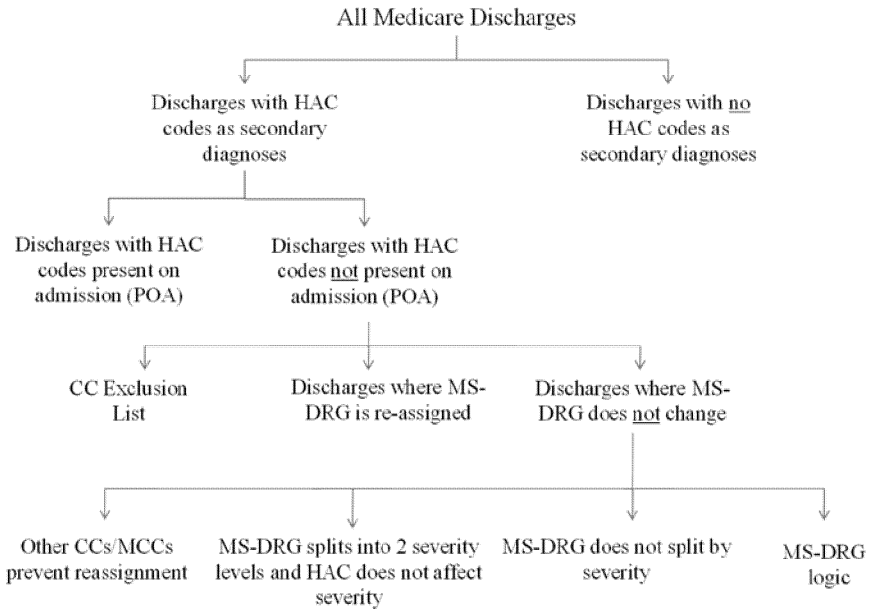
Section 1886(d)(4)(D) of the Act addresses certain hospital-acquired conditions (HACs), including infections. This provision is part of an array of Medicare tools that we are using to promote increased quality and efficiency of care. Under the IPPS, hospitals are encouraged to treat patients efficiently because they receive the same DRG payment for stays that vary in length and in the services provided, which gives hospitals an incentive to avoid unnecessary costs in the delivery of care. In some cases, conditions acquired in the hospital do not generate higher payments than the hospital would otherwise receive for cases without these conditions. To this extent, the IPPS encourages hospitals to avoid complications.

However, the treatment of these conditions can generate higher Medicare payments in two ways. First, if a hospital incurs exceptionally high costs treating a patient, the hospital stay may generate an outlier payment. However, because the outlier payment methodology requires that hospitals experience large losses on outlier cases before outlier payments are made, hospitals have an incentive to prevent outliers. Second, under the MS–DRG system that took effect in FY 2008 and that has been refined through rulemaking in subsequent years, certain conditions can generate higher payments even if the outlier payment requirements are not met. Under the MS–DRG system, there are currently 261 sets of MS–DRGs that are split into 2 or 3 subgroups based on the presence or absence of a complication or comorbidity (CC) or a major complication or comorbidity (MCC). The presence of a CC or an MCC generally results in a higher payment.

Section 1886(d)(4)(D) of the Act specifies that, by October 1, 2007, the Secretary was required to select, in consultation with the Centers for Disease Control and Prevention (CDC), at least two conditions that: (a) Are high cost, high volume, or both; (b) are assigned to a higher paying MS–DRG when present as a secondary diagnosis (that is, conditions under the MS–DRG system that are CCs or MCCs); and (c) could reasonably have been prevented through the application of evidence-based guidelines. Section 1886(d)(4)(D) of the Act also specifies that the list of conditions may be revised, again in consultation with the CDC, from time to time as long as the list contains at least two conditions.

Effective for discharges occurring on or after October 1, 2008, under the authority of section 1886(d)(4)(D) of the Act, Medicare no longer assigns an inpatient hospital discharge to a higher paying MS–DRG if a selected condition is not present on admission (POA). Thus, if a selected condition that was not POA manifests during the hospital stay, it is considered a HAC and the case is paid as though the secondary diagnosis was not present. However, even if a HAC manifests during the hospital stay, if any nonselected CC or MCC appears on the claim, the claim will be paid at the higher MS–DRG rate. In addition, Medicare continues to assign a discharge to a higher paying MS–DRG if a selected condition is POA. When a HAC is not POA, payment can be affected in a manner shown in the diagram below.

[3] *Ibid.*



2. HAC Selection

Beginning in FY 2007, we have set forth proposals, and solicited and responded to public comments, to implement section 1886(d)(4)(D) of the Act through the IPPS annual rulemaking process. For specific policies addressed in each rulemaking cycle, including a detailed discussion of the collaborative interdepartmental process and public input regarding selected and potential candidate HACs, we refer readers to the following rules: The FY 2007 IPPS proposed rule (71 FR 24100) and final rule (71 FR 48051 through 48053); the FY 2008 IPPS proposed rule (72 FR 24716 through 24726) and final rule with comment period (72 FR 47200 through 47218); the FY 2009 IPPS proposed rule (73 FR 23547) and final rule (73 FR 48471); the FY 2010 IPPS/RY 2010 LTCH PPS proposed rule (74 FR 24106) and final rule (74 FR 43782); the FY 2011 IPPS/LTCH PPS proposed rule (75 FR 23880) and final rule (75 FR 50080); the FY 2012 IPPS/LTCH PPS proposed rule (76 FR 25810 through 25816) and final rule (76 FR 51504 through 51522); the FY 2013 IPPS/LTCH PPS proposed rule (77 FR 27892 through 27898) and final rule (77 FR 53283 through 53303); the FY 2014 IPPS/LTCH PPS proposed rule (78 FR 27509 through 27512) and final rule (78 FR 50523 through 50527), and the FY 2015 IPPS/LTCH PPS proposed rule (79 FR 28000 through 28003) and final rule (79 FR 49876 through 49880). A complete list of the 14 current categories of HACs is included on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalAcqCond/Hospital-Acquired_Conditions.html*.

3. Present on Admission (POA) Indicator Reporting

Collection of POA indicator data is necessary to identify which conditions were acquired during hospitalization for the HAC payment provision as well as for broader public health uses of Medicare data. In previous rulemaking, we provided both CMS and CDC Web site resources that are available to hospitals for assistance in this reporting effort. For detailed information regarding these sites and materials, including the application and use of POA indicators, we refer the reader to the FY 2012 IPPS/LTCH PPS final rule (76 FR 51506 through 51507).

Currently, as we have discussed in the prior rulemaking cited under section II.I.2. of the preamble of this final rule, the POA indicator reporting requirement only applies to IPPS hospitals and Maryland hospitals because they are subject to this HAC provision. Non-IPPS hospitals, including CAHs, LTCHs, IRFs, IPFs, cancer hospitals, children's hospitals, RNHCIs, and the Department of Veterans Affairs/Department of Defense hospitals, are exempt from POA reporting.

There are currently four POA indicator reporting options, ''Y'', ''W'', ''N'', and ''U'', as defined by the *ICD–9–CM Official Guidelines for Coding and Reporting*. We note that prior to January 1, 2011, we also used a POA indicator reporting option ''1''. However, beginning on or after January 1, 2011, hospitals were required to begin reporting POA indicators using the 5010 electronic transmittal standards format. The 5010 format removes the need to report a POA indicator of ''1'' for codes that are exempt from POA reporting. We issued CMS instructions on this reporting change as a One-Time Notification, Pub. No. 100–20, Transmittal No. 756, Change Request 7024, effective on August 13, 2010, which can be located at the following link on the CMS Web site: *http://www.cms.gov/manuals/downloads/Pub100_20.pdf*. The current POA indicators and their descriptors are shown in the chart below:

Indicator	Descriptor
Y	Indicates that the condition was present on admission.
W	Affirms that the hospital has determined that, based on data and clinical judgment, it is not possible to document when the onset of the condition occurred.
N	Indicates that the condition was not present on admission.
U	Indicates that the documentation is insufficient to determine if the condition was present at the time of admission.

Under the HAC payment policy, we treat HACs coded with ''Y'' and ''W'' indicators as POA and allow the condition on its own to cause an increased payment at the CC and MCC level. We treat HACs coded with ''N'' and ''U'' indicators as Not Present on Admission (NPOA) and do not allow the condition on its own to cause an increased payment at the CC and MCC level. We refer readers to the following rules for a detailed discussion of POA indicator reporting: The FY 2009 IPPS proposed rule (73 FR 23559) and final rule (73 FR 48486 through 48487); the FY 2010 IPPS/RY 2010 LTCH PPS proposed rule (74 FR 24106) and final rule (74 FR 43784 through 43785); the FY 2011 IPPS/LTCH PPS proposed rule (75 FR 23881 through 23882) and final rule (75 FR 50081 through 50082); the FY 2012 IPPS/LTCH PPS proposed rule (76 FR 25812 through 25813) and final rule (76 FR 51506 through 51507); the FY 2013 IPPS/LTCH PPS proposed rule (77 FR 27893 through 27894) and final rule (77 FR 53284 through 53285); the FY 2014 IPPS/LTCH PPS proposed rule (78 FR 27510 through 27511) and final rule (78 FR 50524 through 50525), and the FY 2015 IPPS/LTCH PPS proposed rule (79 FR 28001 through 28002) and final rule (79 FR 49877 through 49878).

In addition, as discussed previously in the FY 2013 IPPS/LTCH PPS final rule (77 FR 53324), the 5010 format allows the reporting and, effective January 1, 2011, the processing of up to 25 diagnoses and 25 procedure codes. As such, it is necessary to report a valid POA indicator for each diagnosis code, including the principal diagnosis and all secondary diagnoses up to 25.

4. HACs and POA Reporting in Preparation for Transition to ICD–10–CM and ICD–10–PCS

In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51506 and 51507), in preparation for the transition to the ICD–10–CM and ICD–10–PCS code sets, we indicated that further information regarding the use of the POA indicator with the ICD–10–CM/ICD–10–PCS classifications as they pertain to the HAC policy would be discussed in future rulemaking.

At the March 5, 2012 and the September 19, 2012 meetings of the ICD–9–CM Coordination and Maintenance Committee, an announcement was made with regard to the availability of the ICD–9–CM HAC list translation to ICD–10–CM and ICD–10–PCS code sets. Participants were informed that the list of the ICD–9–CM selected HACs had been translated into codes using the ICD–10–CM and ICD–10–PCS classification system. It was recommended that the public review this list of ICD–10–CM/ICD–10–PCS code translations of the selected HACs available on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html.* We encouraged the public to submit comments on these translations through the HACs Web page using the CMS ICD–10–CM/PCS HAC Translation Feedback Mailbox that was set up for this purpose under the Related Links section titled ''CMS HAC Feedback.'' We also encouraged readers to review the educational materials and draft code sets available for ICD–10–CM/PCS on the CMS Web site at: *http://www.cms.gov/ICD10/.* Lastly, we provided information regarding the ICD–10 MS–DRG Conversion Project on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalAcqCond/icd10_hacs.html.*

In the FY 2014 IPPS/LTCH PPS final rule (78 FR 50525), we stated that the final HAC list translation from ICD–9–CM to ICD–10–CM/ICD–10–PCS would be subject to formal rulemaking. We again encouraged readers to review the educational materials and updated draft code sets available for ICD–10–CM/ICD–10–PCS on the CMS Web site at: *http://www.cms.gov/ICD10/.* In addition, we stated that the draft ICD–10–CM Coding Guidelines could be viewed on the CDC Web site at: *http://www.cdc.gov/nchs/icd/icd10cm.htm.*

However, prior to engaging in rulemaking for the FY 2015 DRA HAC program, on April 1, 2014, the Protecting Access to Medicare Act of 2014 (PAMA) (Pub. L. 113–93) was enacted, which specified that the Secretary may not adopt ICD–10 prior to October 1, 2015. Accordingly, the U.S. Department of Health and Human Services released a final rule in the **Federal Register** on August 4, 2014 (79 FR 45128 through 45134) that included a new compliance date that requires the use of ICD–10 beginning October 1, 2015. The August 4, 2014 final rule is available for viewing on the Internet at: *http://www.gpo.gov/fdsys/pkg/FR-2014-08-04/pdf/2014-18347.pdf.* That final rule also requires HIPAA covered entities to continue to use ICD–9–CM through September 30, 2015. Further information on the ICD–10 rules can be found on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/Statute_Regulations.html.*

As described in section II.F.5. of the preamble of this final rule, we are implementing the HAC list translations from ICD–9–CM to ICD–10–CM/ICD–10–PCS in this FY 2016 IPPS/LTCH PPS final rule.

5. Changes to the HAC Program for FY 2016

As discussed in section II.G. 1. a. of the preamble of this final rule, for FY 2016, we are implementing the ICD–10 MS–DRGs Version 33 as the replacement logic for the ICD–9–CM MS–DRGs Version 32. As part of our DRA HAC update for FY 2016, we proposed to implement the ICD–10–CM/PCS Version 33 HAC list to replace the ICD–9–CM Version 32 HAC list.

CMS prepared the ICD–10 MS–DRGs Version 32 based on the FY 2015 MS–DRGs (Version 32) that we finalized in the FY 2015 IPPS/LTCH PPS final rule. In November 2014, we posted a Definitions Manual of the ICD–10 MS–DRGs Version 32 on the ICD–10 MS–DRG Conversion Project Web site at: *http://www.cms.hhs.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html.* The HAC code list translations from ICD–9–CM to ICD–10–CM/PCS are located in Appendix I of the ICD–10–CM/PCS MS–DRG Version 32 Definitions Manual. The link to this Manual (available in both text and HTML formats) is located in the Downloads section of the ICD–10 MS–DRG Conversion Project Web site.

In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24348 through 24349), we solicited public comments on how well the ICD–10–CM/PCS Version 32 HAC list replicates the ICD–9–CM Version 32 HAC list. We did not receive any public comments on our list of ICD–10 translations for the HAC list. Therefore, we are finalizing our proposal to implement the ICD–10–CM/PCS Version 33 HAC list to replace the ICD–9–CM Version 32 HAC list.

With respect to the current categories of the HACs, in the FY 2016 IPPS/LTCH PPS proposed rule, we did not propose to add or remove any categories for FY 2016.

Comment: Two commenters suggested that CMS expand the current HAC category of Iatrogenic Pneumothorax with Venous Catheterization to include Iatrogenic Pneumothorax with Thoracentesis and to also add Accidental Puncture/Bleeding with Paracentesis as a HAC category. The commenters cited various studies and asserted that both of these conditions satisfy the established criteria of being high cost, high volume, or both; being assigned to a higher paying MS–DRG when present as a secondary diagnosis (that is, conditions under the MS–DRG system that are CCs or MCCs); and could reasonably have been prevented through the application of evidence-based guidelines. Both commenters also listed a series of ICD–10–CM and ICD–10–PCS

codes that they requested CMS to consider for inclusion in each of these recommended new HAC categories. The commenters believed that adding these two conditions would improve patient care and result in cost savings to the Medicare program.

Response: We recognize and appreciate the commenters' recommendations for refinements to the HAC list. We also thank the commenters for their commitment to working with CMS on reducing complications resulting in better patient care and cost savings. In the FY 2015 IPPS/LTCH PPS final rule (79 FR 49879), we responded to similar comments and noted that we would take them under consideration for future rulemaking. While we did not propose to expand or add these specific HAC categories (Iatrogenic Pneumothorax with Thoracentesis and Accidental Puncture/Bleeding with Paracentesis) for FY 2016, in response to a public comment received last year, we did engage our contractor, RTI, to begin researching available evidence-based guidelines for these conditions. As discussed in section II.F.7. of the preamble to this final rule, RTI has completed their annual evidence-based guidelines report and, in addition, has developed a separate excerpt report that summarizes the two conditions recommended by the commenters under consideration. We encourage readers to review the separate document titled, ''Evidence-based Guidelines Pertaining to Select Thoracentesis- and Paracentesis-Related Conditions,'' which is available via the Internet on the CMS Hospital-Acquired Conditions Web page in the ''Downloads'' section at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalAcqCond/index.html?redirect=/HospitalAcqCond/* We reiterate that we continue to encourage public dialogue about refinements to the HAC list through written stakeholder comments.

We were unable to fully evaluate each of these two recommended conditions against all the established criteria, as well as review the references the commenters submitted, or perform detailed analysis of the ICD–10 codes that the commenters listed in time for discussion in this FY 2016 IPPS/LTCH PPS final rule. However, we intend to consider these public comments as we develop proposed changes to the HAC–POA program for FY 2017.

Comment: One commenter urged CMS to remove the Falls and Trauma HAC category from the HAC–POA program. The commenter stated that the statutory criterion that a condition could reasonably have been prevented through the application of evidence-based guidelines is not met for preventing falls. The commenter also stated that this HAC may lead to unintended consequences such as ''creating an epidemic of immobility in hospitals'' and excessive orders for bed rest and motion detection devices. The commenter recommended that CMS develop quality measures and incentivize hospitals to create Acute Care for Elders (ACE) units that focus on this specific population as another option. According to the commenter, studies of the ACE initiative determined better outcomes. For example, the commenter noted results of the ACE program model indicated a reduction in falls, delirium, and functional decline for patients, as well as shorter lengths of stay in a hospital, a decrease in the number of discharges to a nursing home, a reduction in 30-day readmissions, and reduced health care costs.

Response: We acknowledge the commenter's comments regarding the Falls and Trauma HAC category. With respect to the commenter's statement that one of the statutory criteria (that is, could reasonably have been prevented through the application of evidence-based guidelines) is not being met for the prevention of falls, we note that, as mentioned in response to an earlier comment, our contractor, RTI, has completed the 2015 Report for Evidence-Based Guidelines, which is available via the Internet on the CMS Hospital-Acquired Conditions Web page in the ''Downloads'' section at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalAcqCond/index.html?redirect=/HospitalAcqCond/*. We further note that evidence-based guidelines for falls prevention exist and refer the reader to the findings in this report directly related to falls. We also point out that, while the commenter requested the removal of the entire Falls and Trauma HAC category, falls are only one component (or condition) in the HAC category. The Falls and Trauma HAC category also includes conditions related to trauma, such as intracranial injuries, crushing injuries, burns, and other injuries (for example, frostbite, heat stroke, drowning, and suffocation). Therefore, we do not agree with the commenter's suggestion to remove the Falls and Trauma HAC category from the HAC–POA program.

In response to the commenter's recommendation that CMS establish quality measures and incentive payments for hospitals, we point out that currently, under various CMS quality reporting programs, there are measures specifically related to falls. On October 6, 2014, the Improving Medicare Post-Acute Care Transformation Act of 2014 (the IMPACT Act) (Pub. L. 113–185) was enacted, which specified under section 1899B(c)(1) of the Act that the Secretary shall require postacute care providers to report data on quality measures relating to functional status, skin integrity, medication reconciliation and incidence of major falls. Prior to the IMPACT Act, the NQF #0674 measure, Percent of Residents Experiencing One or More Falls with Major Injury (Long Stay), was finalized in the LTCHQR Program and the IRF QR Program. As such, we believe these measures specified in the IMPACT Act align with the CMS Quality Strategy,[4] which incorporates the three broad aims of the National Quality Strategy [5]:

- Better Care: Improve the overall quality of care by making healthcare more patient-centered, reliable, accessible and safe;
- Healthy People, Healthy Communities: Improve the health of the U.S. population by supporting proven interventions to address behavioral, social and environmental determinants of health in addition to delivering higher-quality care; and
- Affordable Care: Reduce the cost of quality healthcare for individuals, families, employers, and government.

Comment: One commenter requested that CMS incorporate untreated malnutrition, including disease-related malnutrition, as a HAC category. The commenter indicated there are three common types of malnutrition diagnoses that can be attributed to adults in healthcare settings: (1) Starvation-relation malnutrition; (2) chronic disease-related malnutrition; and (3) acute disease or injury-related malnutrition. The commenter also noted that hospital-acquired malnutrition from inadequate feeding practices is widespread. According to the commenter, screening patients for the detection of malnutrition allows for further follow-up sessions if warranted. In addition, the commenter stated that, through the process of early detection, the prevention and treatment for disease-related malnutrition will lead to improved outcomes such as patients acquiring fewer complications, hospitalizations, and readmissions.

The commenter suggested that CMS also advocate for the creation of quality measures that encourage nutrition screening, assessment, and intervention to be included in various quality

[4] Available at: *http://www.coms.gov/Medicare/Quality-Initiatives-Patient-Assessment-Instruments/QualityInitiativesGenInfo/CMS-Quality-Strategy.html.*

[5] Available at: *http://www.ahrq.gov/workingforquality/nqs/nqs2011annlrpt.html.*

reporting programs or other agency initiatives that focus on measuring quality of care.

Response: We appreciate the commenter's suggestion. As stated previously, we did not propose to add or remove any HAC categories for FY 2016. Therefore, we will consider this topic for future rulemaking. We encourage the commenter to submit the specific list of conditions, including the ICD–10 coded data identifying the various types of malnutrition that the commenter is recommending as a candidate condition, along with any additional supporting documentation, for the other established criteria for a HAC as referenced earlier in this section.

With regard to the commenter's recommendation to develop quality measures related to malnutrition in other quality reporting programs, we note that the quality reporting programs that involve measures are separate and distinct from the Deficit Reduction Act (DRA) HAC program. We refer the reader to section VII. of this FY 2016 IPPS/LTCH PPS final rule for information related to those programs.

We also refer readers to section II.F.6. of the FY 2008 IPPS final rule with comment period (72 FR 47202 through 47218) and to section II.F.7. of the FY 2009 IPPS final rule (73 FR 48774 through 48491) for detailed discussion supporting our determination regarding each of the current conditions. We refer readers to the FY 2013 IPPS/LTCH PPS proposed rule (77 FR 27892 through 27898) and final rule (77 FR 53285 through 53292) for the HAC policy for FY 2013, the FY 2014 IPPS/LTCH PPS proposed rule (78 FR 27509 through 27512) and final rule (78 FR 50523 through 50527) for the HAC policy for FY 2014, and the FY 2015 IPPS/LTCH PPS proposed rule (79 FR 28000 through 28003) and final rule (79 FR 49876 through 49880) for the HAC policy for FY 2015.

After consideration of the public comments we received, as we proposed, we are not adding or removing any HAC categories for FY 2016. However, as described more fully in section III.F.7. of the preamble of this final rule, we will continue to monitor contemporary evidence-based guidelines for selected, candidate, and previously considered HACs that provide specific recommendations for the prevention of the corresponding conditions in the acute hospital setting and may use this information to inform future rulemaking. In addition, we continue to encourage public dialogue about refinements to the HAC list through written stakeholder comments.

6. RTI Program Evaluation

On September 30, 2009, a contract was awarded to RTI to evaluate the impact of the Hospital-Acquired Condition-Present on Admission (HAC–POA) provisions on the changes in the incidence of selected conditions, effects on Medicare payments, impacts on coding accuracy, unintended consequences, and infection and event rates. This was an intra-agency project with funding and technical support from CMS, OPHS, AHRQ, and CDC. The evaluation also examined the implementation of the program and evaluated additional conditions for future selection. The contract with RTI ended on November 30, 2012. Summary reports of RTI's analysis of the FYs 2009, 2010, and 2011 Med PAR data files for the HAC–POA program evaluation were included in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50085 through 50101), the FY 2012 IPPS/LTCH PPS final rule (76 FR 51512 through 51522), and the FY 2013 IPPS/LTCH PPS final rule (77 FR 53292 through 53302). Summary and detailed data also were made publicly available on the CMS Web site at: *http://www.cms.gov/HospitalAcqCond/01_Overview.asp* and the RTI Web site at: *http://www.rti.org/reports/cms/*.

In addition to the evaluation of HAC and POA Med PAR claims data, RTI also conducted analyses on readmissions due to HACs, the incremental costs of HACs to the health care system, a study of spillover effects and unintended consequences, as well as an updated analysis of the evidence-based guidelines for selected and previously considered HACs. Reports on these analyses have been made publicly available on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalAcqCond/index.html*.

7. RTI Reports on Evidence-Based Guidelines

The RTI program evaluation included a report that provided references for all evidence-based guidelines available for each of the selected, candidate, and previously considered HACs that provided specific recommendations for the prevention of the corresponding conditions. Guidelines were primarily identified using the AHRQ National Guidelines Clearing House (NGCH) and the CDC, along with relevant professional societies. Guidelines published in the United States were used, if available. In the absence of U.S. guidelines for a specific condition, international guidelines were included.

RTI prepared a final report to summarize its findings regarding these guidelines. This report is titled ''Evidence-Based Guidelines for Selected, Candidate, and Previously Considered Hospital-Acquired Conditions'' and can be found on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalAcqCond/Downloads/Evidence-Based-Guidelines.pdf*.

Subsequent to this final report, RTI was awarded a new Evidence-Based Guidelines Monitoring contract. Under this monitoring contract, RTI annually provides a summary report of the contemporary evidence-based guidelines for selected, candidate, and previously considered HACs that provide specific recommendations for the prevention of the corresponding conditions in the acute care hospital setting. We received RTI's 2015 report and are making it available to the public on the CMS Hospital-Acquired Conditions Web page in the ''Downloads'' section at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/HospitalAcqCond/index.html?redirect=/HospitalAcqCond/*.

G. Changes to Specific MS–DRG Classifications

1. Discussion of Changes to Coding System and Basis for MS–DRG Updates

a. Conversion of MS–DRGs to the International Classification of Diseases, 10th Revision (ICD–10)

Providers use the code sets under the ICD–9–CM coding system to report diagnoses and procedures for Medicare hospital inpatient services under the MS–DRG system. A later coding edition, the ICD–10 coding system, includes the International Classification of Diseases, 10th Revision, Clinical Modification (ICD–10–CM) for diagnosis coding and the International Classification of Diseases, 10th Revision, Procedure Coding System (ICD–10–PCS) for inpatient hospital procedure coding, as well as the Official ICD–10–CM and ICD–10–PCS Guidelines for Coding and Reporting. The ICD–10 coding system was initially adopted for transactions conducted on or after October 1, 2013, as described in the Health Insurance Portability and Accountability Act of 1996 (HIPAA) Administrative Simplification: Modifications to Medical Data Code Set Standards to Adopt ICD–10–CM and ICD–10–PCS Final Rule published in the **Federal Register** on January 16, 2009 (74 FR 3328 through 3362) (hereinafter referred to as the ''ICD–10–CM and ICD–10–PCS final rule''). However, the Secretary of

Health and Human Services issued a final rule that delayed the compliance date for ICD–10 from October 1, 2013, to October 1, 2014. That final rule, entitled ''Administrative Simplification: Adoption of a Standard for a Unique Health Plan Identifier; Addition to the National Provider Identifier Requirements; and a Change to the Compliance Date for ICD–10–CM and ICD–10–PCS Medical Data Code Sets,'' CMS–0040–F, was published in the **Federal Register** on September 5, 2012 (77 FR 54664) and is available for viewing on the Internet at: *http://www.gpo.gov/fdsys/pkg/FR-2012-09-05/pdf/2012-21238.pdf*. On April 1, 2014, the Protecting Access to Medicare Act of 2014 (PAMA) (Pub. L. 113–93) was enacted, which specified that the Secretary may not adopt ICD–10 prior to October 1, 2015. Accordingly, the U.S. Department of Health and Human Services released a final rule in the **Federal Register** on August 4, 2014 (79 FR 45128 through 45134) that included a new compliance date that requires the use of ICD–10 beginning October 1, 2015. The August 4, 2014 final rule is available for viewing on the Internet at: *http://www.gpo.gov/fdsys/pkg/FR-2014-08-04/pdf/2014-18347.pdf*. That final rule also requires HIPAA covered entities to continue to use ICD–9–CM through September 30, 2015.

The anticipated move to ICD–10 necessitated the development of an ICD–10–CM/ICD–10–PCS version of the MS–DRGs. CMS began a project to convert the ICD–9–CM-based MS–DRGs to ICD–10 MS–DRGs. In response to the FY 2011 IPPS/LTCH PPS proposed rule, we received public comments on the creation of the ICD–10 version of the MS–DRGs, which will be implemented at the same time as ICD–10 (75 FR 50127 and 50128). While we did not propose an ICD–10 version of the MS–DRGs in the FY 2011 IPPS/LTCH PPS proposed rule, we noted that we have been actively involved in converting current MS–DRGs from ICD–9–CM codes to ICD–10 codes and sharing this information through the ICD–10 (previously ICD–9–CM) Coordination and Maintenance Committee. We undertook this early conversion project to assist other payers and providers in understanding how to implement their own conversion projects. We posted ICD–10 MS–DRGs based on Version 26.0 (FY 2009) of the MS–DRGs. We also posted a paper that describes how CMS went about completing this project and suggestions for other payers and providers to follow. Information on the ICD–10 MS–DRG conversion project can be found on the ICD–10 MS–DRG Conversion Project Web site at: *http://www.cms.hhs.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*. We have continued to keep the public updated on our maintenance efforts for ICD–10–CM and ICD–10–PCS coding systems, as well as the General Equivalence Mappings that assist in conversion through the ICD–10 (previously ICD–9–CM) Coordination and Maintenance Committee. Information on these committee meetings can be found on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/index.html*.

During FY 2011, we developed and posted Version 28 of the ICD–10 MS–DRGs based on the FY 2011 MS–DRGs (Version 28) that we finalized in the FY 2011 IPPS/LTCH PPS final rule on the CMS Web site. This ICD–10 MS–DRGs Version 28 also included the CC Exclusion List and the ICD–10 version of the hospital-acquired conditions (HACs), which was not posted with Version 26. We also discussed this update at the September 15–16, 2010 and the March 9–10, 2011 meetings of the ICD–9–CM Coordination and Maintenance Committee. The minutes of these two meetings are posted on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/index.html*.

We reviewed public comments on the ICD–10 MS–DRGs Version 28 and made updates as a result of these comments. We called the updated version the ICD–10 MS–DRGs Version 28–R1. We posted a Definitions Manual of ICD–10 MS–DRGs Version 28–R1 on our ICD–10 MS–DRG Conversion Project Web site. To make the review of Version 28–R1 updates easier for the public, we also made available pilot software on a CD ROM that could be ordered through the National Technical Information Service (NTIS). A link to the NTIS ordering page was provided on the CMS ICD–10 MS–DRGs Web page. We stated that we believed that, by providing the ICD–10 MS–DRGs Version 28–R1 Pilot Software (distributed on CD ROM), the public would be able to more easily review and provide feedback on updates to the ICD–10 MS–DRGs. We discussed the updated ICD–10 MS–DRGs Version 28–R1 at the September 14, 2011 ICD–9–CM Coordination and Maintenance Committee meeting. We encouraged the public to continue to review and provide comments on the ICD–10 MS–DRGs so that CMS could continue to update the system.

In FY 2012, we prepared the ICD–10 MS–DRGs Version 29, based on the FY 2012 MS–DRGs (Version 29) that we finalized in the FY 2012 IPPS/LTCH PPS final rule. We posted a Definitions Manual of ICD–10 MS–DRGs Version 29 on our ICD–10 MS–DRG Conversion Project Web site. We also prepared a document that describes changes made from Version 28 to Version 29 to facilitate a review. The ICD–10 MS–DRGs Version 29 was discussed at the ICD–9–CM Coordination and Maintenance Committee meeting on March 5, 2012. Information was provided on the types of updates made. Once again, the public was encouraged to review and comment on the most recent update to the ICD–10 MS–DRGs.

CMS prepared the ICD–10 MS–DRGs Version 30 based on the FY 2013 MS–DRGs (Version 30) that we finalized in the FY 2013 IPPS/LTCH PPS final rule. We posted a Definitions Manual of the ICD–10 MS–DRGs Version 30 on our ICD–10 MS–DRG Conversion Project Web site. We also prepared a document that describes changes made from Version 29 to Version 30 to facilitate a review. We produced mainframe and computer software for Version 30, which was made available to the public in February 2013. Information on ordering the mainframe and computer software through NTIS was posted on the ICD–10 MS–DRG Conversion Project Web site. The ICD–10 MS–DRGs Version 30 computer software facilitated additional review of the ICD–10 MS–DRGs conversion.

We provided information on a study conducted on the impact of converting MS–DRGs to ICD–10. Information on this study is summarized in a paper entitled ''Impact of the Transition to ICD–10 on Medicare Inpatient Hospital Payments.'' This paper was posted on the CMS ICD–10 MS–DRGs Conversion Project Web site and was distributed and discussed at the September 15, 2010 ICD–9–CM Coordination and Maintenance Committee meeting. The paper described CMS' approach to the conversion of the MS–DRGs from ICD–9–CM codes to ICD–10 codes. The study was undertaken using the ICD–9–CM MS–DRGs Version 27 (FY 2010), which was converted to the ICD–10 MS–DRGs Version 27. The study estimated the impact on aggregate payment to hospitals and the distribution of payments across hospitals. The impact of the conversion from ICD–9–CM to ICD–10 on Medicare MS–DRG hospital payments was estimated using FY 2009 Medicare claims data. The study found a hospital payment increase of 0.05 percent using the ICD–10 MS–DRGs Version 27.

CMS provided an overview of this hospital payment impact study at the March 5, 2012 ICD–9–CM Coordination and Maintenance Committee meeting.

This presentation followed presentations on the creation of ICD–10 MS–DRGs Version 29. A summary report of this meeting can be found on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/index.html*. At the March 2012 meeting, CMS announced that it would produce an update on this impact study based on an updated version of the ICD–10 MS–DRGs. This update of the impact study was presented at the March 5, 2013 ICD–9–CM Coordination and Maintenance Committee meeting. The study found that moving from an ICD–9–CM-based system to an ICD–10 MS–DRG replicated system would lead to DRG reassignments on only 1 percent of the 10 million MedPAR sample records used in the study. Ninety-nine percent of the records did not shift to another MS–DRG when using an ICD–10 MS–DRG system. For the 1 percent of the records that shifted, 45 percent of the shifts were to a higher weighted MS–DRG, while 55 percent of the shifts were to lower weighted MS–DRGs. The net impact across all MS–DRGs was a reduction by 4/10000 or minus 4 pennies per $100. The updated paper is posted on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html* under the ''Downloads'' section. Information on the March 5, 2013 ICD–9–CM Coordination and Maintenance Committee meeting can be found on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/ICD-9-CM-C-and-M-Meeting-Materials.html*. This update of the impact paper and the ICD–10 MS–DRG Version 30 software provided additional information to the public who were evaluating the conversion of the MS–DRGs to ICD–10 MS–DRGs.

CMS prepared the ICD–10 MS–DRGs Version 31.0 based on the FY 2014 MS–DRGs (Version 31) that we finalized in the FY 2014 IPPS/LTCH PPS final rule. In November 2013, we posted a Definitions Manual of the ICD–10 MS–DRGs Version 31 on the ICD–10 MS–DRG Conversion Project Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*. We also prepared a document that described changes made from Version 30 to Version 31 to facilitate a review. We produced mainframe and computer software for Version 31, which was made available to the public in December 2013. Information on ordering the mainframe and computer software through NTIS was posted on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html* under the ''Related Links'' section. This ICD–10 MS–DRGs Version 31 computer software facilitated additional review of the ICD–10 MS–DRGs conversion. We encouraged the public to submit to CMS any comments on areas where they believed the ICD–10 MS–DRGs did not accurately reflect grouping logic found in the ICD–9–CM MS–DRGs Version 31.

We reviewed public comments received and developed an update of ICD–10 MS–DRGs Version 31, which we called ICD–10 MS–DRGs Version 31.0–R. We made available a Definitions Manual of the ICD–10 MS–DRGs Version 31.0–R on the ICD–10 MS–DRG Conversion Project Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*. We also prepared a document that describes changes made from Version 31 to Version 31–R to facilitate a review. We will continue to share ICD–10–MS–DRG conversion activities with the public through this Web site.

CMS prepared the ICD–10 MS–DRGs Version 32 based on the FY 2015 MS–DRGs (Version 32) that we finalized in the FY 2015 IPPS/LTCH PPS final rule. In November 2014, we made available a Definitions Manual of the ICD–10 MS DRGs Version 32 on the ICD–10 MS–DRG Conversion Project Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*. We also prepared a document that described changes made from Version 31–R to Version 32 to facilitate a review. We produced mainframe and computer software for Version 32, which was made available to the public in January 2015. Information on ordering the mainframe and computer software through NTIS was made available on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html* under the ''Related Links'' section. This ICD–10 MS–DRGs Version 32 computer software facilitated additional review of the ICD–10 MS–DRGs conversion. We encouraged the public to submit to CMS any comments on areas where they believed the ICD–10 MS–DRGs did not accurately reflect grouping logic found in the ICD–9–CM MS–DRGs Version 32. We discuss five requests from the public to update the ICD–10 MS–DRGs Version 32 to better replicate the ICD–9–CM MS–DRGs in section II.G.3., 4., and 5. of the preamble of this FY 2016 IPPS/LTCH PPS final rule. In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24351), we proposed to implement the MS–DRG code logic in the ICD–10 MS–DRGs Version 32 along with any finalized updates to the ICD–10 MS–DRGs Version 32 for the final ICD–10 MS–DRGs Version 33. In the proposed rule, we proposed the ICD–10 MS–DRGs Version 33 as the replacement logic for the ICD–9–CM based MS–DRGs Version 32 as part of the proposed MS–DRG updates for FY 2016. We invited public comments on how well the ICD–10 MS–DRGs Version 32 replicates the logic of the MS–DRGs Version 32 based on ICD–9–CM codes.

Comment: One commenter addressed an ICD–10 MS–DRG replication issue regarding the procedure code designation and MS–DRG assignment of two ICD–10–PCS codes in the ICD–10 MS–DRGs Version 32 Definitions Manual under Appendix E—Operating Room Procedures and Procedure Code MS–DRG Index. The commenter agreed with CMS that the two ICD–10–PCS codes identified in the FY 2016 IPPS/LTCH PPS proposed rule, 02HQ30Z (Insertion of pressure sensor monitoring device into right pulmonary artery, percutaneous approach) and 02HR30Z (Insertion of pressure sensor monitoring device into left pulmonary artery, percutaneous approach), were appropriate translations for ICD–9–CM procedure code 38.26 (Insertion of implantable wireless pressure sensor without lead for intracardiac or great vessel hemodynamic monitoring), which identifies the CardioMEMS™ HF Monitoring System (80 FR 24426). However, the commenter noted that, under the ICD–9–CM based MS–DRGs Version 32 logic, procedure code 38.26 is designated as an operating room (O.R.) procedure for MS–DRG assignment and group to MS–DRG 264 (Other Circulatory O.R. Procedures), while under the ICD–10 based MS–DRGs Version 32 logic, the two ICD–10–PCS code translations are not recognized as O.R. procedures for purposes of MS–DRG assignment. Therefore, the commenter requested that the two ICD–10–PCS codes be designated as O.R. procedures within Appendix E of the ICD–10 MS–DRG Definitions Manual and group to ICD–10 MS–DRG 264 to accurately replicate the ICD–9–CM MS–DRG Version 32 logic.

Response: We agree with the commenter that this is an ICD–10 MS–DRG replication error. ICD–10–PCS codes 02HQ30Z and 02HR30Z, along with the other ICD–10–PCS codes describing the insertion of a pressure sensor monitoring device that are also appropriate translations for ICD–9–CM procedure code 38.26, should be designated as O.R. procedures within Appendix E of the ICD–10 MS–DRG

Definitions Manual and assigned to ICD–10 MS–DRG 264 to accurately replicate the ICD–9–CM MS–DRGs Version 32 logic. These other ICD–10–PCS codes describe the insertion of a pressure sensor monitoring device utilizing an open approach or a percutaneous endoscopic approach (for the right or left pulmonary artery). Therefore, to be consistent with the comparable ICD–10–PCS code translations describing a percutaneous approach and to accurately replicate the ICD–9–CM MS–DRGs Version 32 logic for ICD–9–CM procedure code 38.26, the ICD–10–PCS codes listed below that describe the insertion of a pressure sensor monitoring device utilizing an open approach or a percutaneous endoscopic approach (for the right or left pulmonary artery) should also be designated as O.R. procedures and assigned to ICD–10 MS–DRG 264.

After consideration of the public comments we received, as final policy for the FY 2016 ICD–10 MS–DRGs Version 33, we are designating the following ICD–10–PCS codes as O.R. procedures and assigning them to ICD–10 MS–DRG 264:

- 02HQ00Z (Insertion of pressure sensor monitoring device into right pulmonary artery, open approach);
- 02HQ30Z (Insertion of pressure sensor monitoring device into right pulmonary artery, percutaneous approach);
- 02HQ40Z (Insertion of pressure sensor monitoring device into right pulmonary artery, percutaneous endoscopic approach);
- 02HR00Z (Insertion of pressure sensor monitoring device into left pulmonary artery, open approach);
- 02HR30Z (Insertion of pressure sensor monitoring device into left pulmonary artery, percutaneous approach); and
- 02HR40Z (Insertion of pressure sensor monitoring device into left pulmonary artery, percutaneous endoscopic approach).

Comment: One commenter addressed an ICD–10 MS–DRG replication issue concerning excisional debridements of deep pressure ulcers of the ankle. The commenter recommended that the following two ICD–10–PCS codes be added to ICD–10 MS–DRG 581 (Other Skin, Subcutaneous Tissue and Breast Procedures without CC/MCC) to accurately replicate the ICD–9–CM MS–DRG logic: ICD–10–PCS procedure code 0LBT0ZZ (Excision of left ankle tendon, open approach) and ICD–10–PCS procedure code 0LBS0ZZ (Excision of right ankle tendon, open approach). The commenter stated that the ICD–9–CM procedure codes describing the excisional debridements of pressure ulcers that extend down into the ankle tendon are currently assigned to MS–DRG 581. However, the ICD–10–PCS codes capturing these procedures are not in the ICD–10–PCS MS–DRG 581.

Response: We agree with the commenter that this is an ICD–10 MS–DRG replication error. ICD–9–CM code 83.39 (Excision of lesion of other soft tissue) captures this procedure and is assigned to ICD–9 MS–DRGs 579, 580, and 581 (Other Skin, Subcutaneous Tissue and Breast Procedures with MCC, with CC, and without CC/MCC, respectively). Therefore, ICD–10–PCS codes 0LBT0ZZ and 0LBS0ZZ also should be assigned to ICD–10 MS–DRGs 579, 580, and 581.

After consideration of the public comments received, we are assigning ICD–10–PCS procedure codes 0LBT0ZZ (Excision of left ankle tendon, open approach) and 0LBS0ZZ (Excision of right ankle tendon, open approach) to ICD–10 MS–DRGs 579, 580, and 581 (Other Skin, Subcutaneous Tissue and Breast Procedures with MCC, with CC, and without CC/MCC, respectively).

Comment: One commenter addressing an ICD–10 MS–DRG replication issue requested that CMS add the following four post-delivery procedure codes to the ICD–10 version of MS–DRGs 774 and 775 (Vaginal Delivery with and without Complicating Diagnoses, respectively) under the ''Only Operating Room Procedures'' section. The commenter stated that these codes are currently assigned to the ICD–9–CM version of MS–DRGs 774 and 775.

- 0HBJXZZ (Excision of left upper leg skin, external approach);
- 0DQR0ZZ (Repair anal sphincter, open approach (3rd degree obstetrical laceration repair);
- OUQJXZZ (Repair clitoris, external approach); and
- 0UBMXZZ (Excision of vulva, external approach).

The following table shows the equivalent ICD–9–CM codes provided by the requestor.

ICD–10–PCS Procedure code	ICD–9–CM Procedure code
0UBMXZZ (Excision of vulva, external approach)	71.3 (Other local excision or destruction of vulva and perineum).
0DQR0ZZ (Repair anal sphincter, open approach (3rd degree obstetrical laceration repair).	75.61(Repair of current obstetric laceration of rectum and sphincter ani).
0UQJXZZ (Repair clitoris, external approach)	75.69 (Repair of current obstetric laceration).
0HBJXZZ (Excision of left upper leg skin, external approach)	86.3 (Local excision/destruction of lesion/tissue of skin and subcutaneous tissues).

Response: We examined the list of post-delivery procedure codes in ICD–9 MS–DRGs 774 and 775 under the ''Only Operating Room Procedures'' section and found that ICD–9–CM procedure code 71.3 is included. Therefore, we agree with the commenter that this oversight is a replication error and that ICD–10–PCS procedure code 0UBMXZZ should be assigned to ICD–10 MS–DRGs 774 and 775 under the ''Only Operating Room Procedures'' section. However, with regard to ICD–9–CM procedure codes 75.61, 75.69, and 86.3, when we examined the list of post-delivery procedure codes in MS–DRGs 774 and 775 under the ''Only Operating Room Procedures'' section, we found that they were not included. Therefore, we disagree with adding ICD–10–PCS codes 0DQR0ZZ, 0UQJXZZ, and 0HBJXZZ to ICD–10 MS–DRGs 774 and 775 under the ''Only operating room Procedures'' section because these procedures are not currently captured in ICD–9 MS–DRGs 774 and 775. The omission of these three ICD–10–PCS codes is not an ICD–10 MS–DRG replication error.

After consideration of the public comments received, we are assigning ICD–10–PCS code 0UBMXZZ (Excision of vulva, external approach) to ICD–10 MS–DRGs 774 and 775 (Vaginal Delivery with and without Complicating Diagnoses, respectively) under the ''Only Operating Room Procedures'' section.

b. Basis for FY 2016 MS–DRG Updates

CMS encourages input from our stakeholders concerning the annual IPPS updates when that input is made available to us by December 7 of the year prior to the next annual proposed rule update. For example, to be considered for any updates or changes in FY 2016, comments and suggestions should have been submitted by December 7, 2014. The comments that were submitted in a timely manner for

FY 2016 are discussed below in this section.

Following are the changes we proposed to the MS–DRGs and our finalized policies for FY 2016. We invited public comments on each of the MS–DRG classification proposed changes described below, as well as our proposals to maintain certain existing MS–DRG classifications, which also are discussed below. In some cases, we proposed changes to the MS–DRG classifications based on our analysis of claims data. In other cases, we proposed to maintain the existing MS–DRG classification based on our analysis of claims data. For the FY 2016 proposed rule, our MS–DRG analysis was based on claims data from the December 2014 update of the FY 2014 MedPAR file, which contains hospital bills received through September 30, 2014, for discharges occurring through September 30, 2014. In our discussion of the MS–DRG reclassification changes that follows, we refer to our analysis of claims data from the ''December 2014 update of the FY 2014 MedPAR file.''

As explained in previous rulemaking (76 FR 51487), in deciding whether to propose and to make further modification to the MS–DRGs for particular circumstances brought to our attention, we consider whether the resource consumption and clinical characteristics of the patients with a given set of conditions are significantly different than the remaining patients in the MS–DRG. We evaluate patient care costs using average costs and lengths of stay and rely on the judgment of our clinical advisors to decide whether patients are clinically distinct or similar to other patients in the MS–DRG. In evaluating resource costs, we consider both the absolute and percentage differences in average costs between the cases we select for review and the remainder of cases in the MS–DRG. We also consider variation in costs within these groups; that is, whether observed average differences are consistent across patients or attributable to cases that are extreme in terms of costs or length of stay, or both. Furthermore, we consider the number of patients who will have a given set of characteristics and generally prefer not to create a new MS–DRG unless it would include a substantial number of cases.

In our examination of the claims data, we apply the following criteria established in FY 2008 (72 FR 47169) to determine if the creation of a new complication or comorbidity (CC) or major complication or comorbidity (MCC) subgroup within a base MS–DRG is warranted:

- A reduction in variance of costs of at least 3 percent.
- At least 5 percent of the patients in the MS–DRG fall within the CC or MCC subgroup.
- At least 500 cases are in the CC or MCC subgroup.
- There is at least a 20-percent difference in average costs between subgroups.
- There is a $2,000 difference in average costs between subgroups.

In order to warrant creation of a CC or MCC subgroup within a base MS–DRG, the subgroup must meet all five of the criteria.

2. MDC 1 (Diseases and Disorders of the Nervous System): Endovascular Embolization (Coiling) Procedures

We received a request again this year to change the MS–DRG assignment for endovascular embolization (coiling) procedures. This topic was discussed previously in the FY 2015 IPPS/LTCH PPS proposed rule (79 FR 28005 through 28006) and in the FY 2015 IPPS/LTCH PPS final rule (79 FR 49883 through 49886). For FY 2015, we did not change the MS–DRG assignment for endovascular embolization (coiling) procedures.

After issuance of the FY 2015 IPPS/LTCH PPS final rule, we received a modified request from the commenter asking that CMS consider establishing four new MS–DRGs:

- Recommended MS–DRG XXX (Endovascular Intracranial Embolization Procedures with Principal Diagnosis of Hemorrhage);
- Recommended MS–DRG XXX (Endovascular Intracranial Embolization Procedures without Principal Diagnosis of Hemorrhage with MCC);
- Recommended MS–DRG XXX (Endovascular Intracranial Embolization Procedures without Principal Diagnosis of Hemorrhage with CC); and
- Recommended MS–DRG XXX (Endovascular Intracranial Embolization Procedures without Principal Diagnosis of Hemorrhage without CC/MCC).

The requestor stated that establishing these new suggested MS–DRGs will promote clinical cohesiveness and resource comparability. The requestor stated that endovascular intracranial and endovascular embolization procedures are not similar to the open craniotomy procedures with which they are currently grouped. The requestor asserted that the differences in costs between endovascular intracranial procedures and open craniotomy procedures are significant, reflecting, for instance, the use of an operating suite versus an interventional vascular catheterization laboratory suite, intensive care and other costs.

In conjunction with the recommended new MS–DRGs, the requestor recommended that the following ICD–9–CM codes, which include endovascular embolization procedures and additional intracranial procedures, be removed from MS–DRG 020 (Intracranial Vascular Procedures with Principal Diagnosis of Hemorrhage with MCC); MS–DRG 021 (Intracranial Vascular Procedures with Principal Diagnosis of Hemorrhage with CC); MS–DRG 022 (Intracranial Vascular Procedures with Principal Diagnosis of Hemorrhage without CC/MCC); MS–DRG 023 (Craniotomy with Major Device Implant/Acute Complex CNS Principal Diagnosis with MCC or Chemo Implant); MS–DRG 024 (Craniotomy with Major Device Implant/Acute Complex CNS Principal Diagnosis without MCC); MS–DRG 025 (Craniotomy & Endovascular Intracranial Procedures with MCC); MS–DRG 026 (Craniotomy & Endovascular Intracranial Procedures with CC); and MS–DRG 027 (Craniotomy & Endovascular Intracranial Procedures without CC/MCC):

- 00.62 (Percutaneous angioplasty of intracranial vessel);
- 39.72 (Endovascular (total) embolization or occlusion of head and neck vessels);
- 39.74 (Endovascular removal of obstruction from head and neck vessel(s));
- 39.75 (Endovascular embolization or occlusion of vessel(s) of head or neck using bare coils);
- 39.76 (Endovascular embolization or occlusion of vessel(s) of head or neck using bioactive coils); and
- 39.79 (Other endovascular procedures on other vessels).

The requestor asked that the four new requested MS–DRGs be created using these procedure codes. The requestor suggested that the first requested new MS–DRG would be MS–DRG XXX (Endovascular Intracranial Embolization Procedures with Principal Diagnosis of Hemorrhage). The principal diagnoses for hemorrhage would include the same hemorrhage codes in the current MS–DRGs 020, 021, and 022, which are as follows:

- 094.87 (Syphilitic ruptured cerebral aneurysm);
- 430 (Subarachnoid hemorrhage);
- 431 (Intracerebral hemorrhage);
- 432.0 (Nontraumatic extradural hemorrhage);
- 432.1 (Subdural hemorrhage); and
- 432.9 (Unspecified intracranial hemorrhage).

For this first new requested MS–DRG, the requestor suggested that only the

following endovascular embolization procedure codes would be assigned:

- 39.72 (Endovascular (total) embolization or occlusion of head and neck vessels);
- 39.75 (Endovascular embolization or occlusion of vessel(s) of head or neck using bare coils); and
- 39.76 (Endovascular embolization or occlusion of vessel(s) of head or neck using bioactive coils).

The requestor recommended that the three additional new MS–DRGs would consist of a new base MS–DRG subdivided into three severity levels as follows:

- Recommended MS–DRG XXX (Endovascular Intracranial Embolization Procedures without Principal Diagnosis of Hemorrhage with MCC);
- Recommended MS–DRG XXX (Endovascular Intracranial Embolization Procedures without Principal Diagnosis of Hemorrhage with CC); and
- Recommended MS–DRG XXX (Endovascular Intracranial Embolization Procedures without Principal Diagnosis of Hemorrhage without CC/MCC).

The requestor suggested that these three new recommended MS–DRGs would have endovascular embolization procedures as well as additional percutaneous and endovascular procedures as listed below:

- 00.62 (Percutaneous angioplasty of intracranial vessel);
- 39.72 (Endovascular (total) embolization or occlusion of head and neck vessels);
- 39.74 (Endovascular removal of obstruction from head and neck vessel(s));
- 39.75 (Endovascular embolization or occlusion of vessel(s) of head or neck using bare coils);
- 39.76 (Endovascular embolization or occlusion of vessel(s) of head or neck using bioactive coils); and
- 39.79 (Other endovascular procedures on other vessels).

ICD–10–PCS provides the following more detailed codes for endovascular embolization, which are assigned to MS–DRGs 020, 021, 022, 023, 024, 025, 026, and 027 in the ICD–10 MS–DRGs Version 32:

ICD–10–PCS Codes for Endovascular Embolization Assigned to MS–DRGs 020 Through 027 in ICD–10 MS–DRGs Version 32

ICD–10–PCS Code	Code description
03LG3BZ	Occlusion of intracranial artery with bioactive intraluminal device, percutaneous approach.
03LG3DZ	Occlusion of intracranial artery with intraluminal device, percutaneous approach.
03LG4BZ	Occlusion of intracranial artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LG4DZ	Occlusion of intracranial artery with intraluminal device, percutaneous endoscopic approach.
03LH3BZ	Occlusion of right common carotid artery with bioactive intraluminal device, percutaneous approach.
03LH3DZ	Occlusion of right common carotid artery with intraluminal device, percutaneous approach.
03LH4BZ	Occlusion of right common carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LH4DZ	Occlusion of right common carotid artery with intraluminal device, percutaneous endoscopic approach.
03LJ3BZ	Occlusion of left common carotid artery with bioactive intraluminal device, percutaneous approach.
03LJ3DZ	Occlusion of left common carotid artery with intraluminal device, percutaneous approach.
03LJ4BZ	Occlusion of left common carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LJ4DZ	Occlusion of left common carotid artery with intraluminal device, percutaneous endoscopic approach.
03LK3BZ	Occlusion of right internal carotid artery with bioactive intraluminal device, percutaneous approach.
03LK3DZ	Occlusion of right internal carotid artery with intraluminal device, percutaneous approach.
03LK4BZ	Occlusion of right internal carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LK4DZ	Occlusion of right internal carotid artery with intraluminal device, percutaneous endoscopic approach.
03LL3BZ	Occlusion of left internal carotid artery with bioactive intraluminal device, percutaneous approach.
03LL3DZ	Occlusion of left internal carotid artery with intraluminal device, percutaneous approach.
03LL4BZ	Occlusion of left internal carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LL4DZ	Occlusion of left internal carotid artery with intraluminal device, percutaneous endoscopic approach.
03LM3BZ	Occlusion of right external carotid artery with bioactive intraluminal device, percutaneous approach.
03LM3DZ	Occlusion of right external carotid artery with intraluminal device, percutaneous approach.
03LM4BZ	Occlusion of right external carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LM4DZ	Occlusion of right external carotid artery with intraluminal device, percutaneous endoscopic approach.
03LN3BZ	Occlusion of left external carotid artery with bioactive intraluminal device, percutaneous approach.
03LN3DZ	Occlusion of left external carotid artery with intraluminal device, percutaneous approach.
03LN4BZ	Occlusion of left external carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LN4DZ	Occlusion of left external carotid artery with intraluminal device, percutaneous endoscopic approach.
03LP3BZ	Occlusion of right vertebral artery with bioactive intraluminal device, percutaneous approach.
03LP3DZ	Occlusion of right vertebral artery with intraluminal device, percutaneous approach.
03LP4BZ	Occlusion of right vertebral artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LP4DZ	Occlusion of right vertebral artery with intraluminal device, percutaneous endoscopic approach.
03LQ3BZ	Occlusion of left vertebral artery with bioactive intraluminal device, percutaneous approach.
03LQ3DZ	Occlusion of left vertebral artery with intraluminal device, percutaneous approach.
03LQ4BZ	Occlusion of left vertebral artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LQ4DZ	Occlusion of left vertebral artery with intraluminal device, percutaneous endoscopic approach.
03LR3DZ	Occlusion of face artery with intraluminal device, percutaneous approach.
03LR4DZ	Occlusion of face artery with intraluminal device, percutaneous endoscopic approach.
03LS3DZ	Occlusion of right temporal artery with intraluminal device, percutaneous approach.
03LS4DZ	Occlusion of right temporal artery with intraluminal device, percutaneous endoscopic approach.
03LT3DZ	Occlusion of left temporal artery with intraluminal device, percutaneous approach.
03LT4DZ	Occlusion of left temporal artery with intraluminal device, percutaneous endoscopic approach.
03VG3BZ	Restriction of intracranial artery with bioactive intraluminal device, percutaneous approach.
03VG3DZ	Restriction of intracranial artery with intraluminal device, percutaneous approach.
03VG4BZ	Restriction of intracranial artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VG4DZ	Restriction of intracranial artery with intraluminal device, percutaneous endoscopic approach.
03VH3BZ	Restriction of right common carotid artery with bioactive intraluminal device, percutaneous approach.

ICD–10–PCS CODES FOR ENDOVASCULAR EMBOLIZATION ASSIGNED TO MS–DRGS 020 THROUGH 027 IN ICD–10 MS–DRGS VERSION 32—Continued

ICD–10–PCS Code	Code description
03VH3DZ	Restriction of right common carotid artery with intraluminal device, percutaneous approach.
03VH4BZ	Restriction of right common carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VH4DZ	Restriction of right common carotid artery with intraluminal device, percutaneous endoscopic approach.
03VJ3BZ	Restriction of left common carotid artery with bioactive intraluminal device, percutaneous approach.
03VJ3DZ	Restriction of left common carotid artery with intraluminal device, percutaneous approach.
03VJ4BZ	Restriction of left common carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VJ4DZ	Restriction of left common carotid artery with intraluminal device, percutaneous endoscopic approach.
03VK3BZ	Restriction of right internal carotid artery with bioactive intraluminal device, percutaneous approach.
03VK3DZ	Restriction of right internal carotid artery with intraluminal device, percutaneous approach.
03VK4BZ	Restriction of right internal carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VK4DZ	Restriction of right internal carotid artery with intraluminal device, percutaneous endoscopic approach.
03VL3BZ	Restriction of left internal carotid artery with bioactive intraluminal device, percutaneous approach.
03VL3DZ	Restriction of left internal carotid artery with intraluminal device, percutaneous approach.
03VL4BZ	Restriction of left internal carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VL4DZ	Restriction of left internal carotid artery with intraluminal device, percutaneous endoscopic approach.
03VM3BZ	Restriction of right external carotid artery with bioactive intraluminal device, percutaneous approach.
03VM3DZ	Restriction of right external carotid artery with intraluminal device, percutaneous approach.
03VM4BZ	Restriction of right external carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VM4DZ	Restriction of right external carotid artery with intraluminal device, percutaneous endoscopic approach.
03VN3BZ	Restriction of left external carotid artery with bioactive intraluminal device, percutaneous approach.
03VN3DZ	Restriction of left external carotid artery with intraluminal device, percutaneous approach.
03VN4BZ	Restriction of left external carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VN4DZ	Restriction of left external carotid artery with intraluminal device, percutaneous endoscopic approach.
03VP3BZ	Restriction of right vertebral artery with bioactive intraluminal device, percutaneous approach.
03VP3DZ	Restriction of right vertebral artery with intraluminal device, percutaneous approach.
03VP4BZ	Restriction of right vertebral artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VP4DZ	Restriction of right vertebral artery with intraluminal device, percutaneous endoscopic approach.
03VQ3BZ	Restriction of left vertebral artery with bioactive intraluminal device, percutaneous approach.
03VQ3DZ	Restriction of left vertebral artery with intraluminal device, percutaneous approach.
03VQ4BZ	Restriction of left vertebral artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VQ4DZ	Restriction of left vertebral artery with intraluminal device, percutaneous endoscopic approach.
03VR3DZ	Restriction of face artery with intraluminal device, percutaneous approach.
03VR4DZ	Restriction of face artery with intraluminal device, percutaneous endoscopic approach.
03VS3DZ	Restriction of right temporal artery with intraluminal device, percutaneous approach.
03VS4DZ	Restriction of right temporal artery with intraluminal device, percutaneous endoscopic approach.
03VT3DZ	Restriction of left temporal artery with intraluminal device, percutaneous approach.
03VT4DZ	Restriction of left temporal artery with intraluminal device, percutaneous endoscopic approach.
03VU3DZ	Restriction of right thyroid artery with intraluminal device, percutaneous approach.
03VU4DZ	Restriction of right thyroid artery with intraluminal device, percutaneous endoscopic approach.
03VV3DZ	Restriction of left thyroid artery with intraluminal device, percutaneous approach.
03VV4DZ	Restriction of left thyroid artery with intraluminal device, percutaneous endoscopic approach.

For this request, as discussed in the FY 2016 IPPS/LTCH PPS proposed rule, we first examined claims data for all intracranial vascular procedure cases with a principal diagnosis of hemorrhage reported in MS–DRGs 020, 021, and 022 in the December 2014 update of the FY 2014 MedPAR file. The table below shows our findings. We found a total of 1,755 cases with an average length of stay ranging from 8.28 days to 16.84 days and average costs ranging from $36,998 to $71,665 in MS–DRGs 020, 021, and 022.

INTRACRANIAL VASCULAR PROCEDURES WITH PRINCIPAL DIAGNOSIS OF HEMORRHAGE

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 020 (with MCC)—All cases	1,285	16.84	$71,655
MS–DRG 021 (with CC)—All cases	372	13.82	52,143
MS–DRG 022 (without CC/MCC)—All cases	98	8.28	36,998

Next, we examined claims data on the first part of the request, which was to create a new MS–DRG for endovascular intracranial embolization procedure cases with a principal diagnosis of hemorrhage that are currently assigned to MS–DRGs 020, 021, and 022. Our findings for the first part of this multi-part request are shown in the table below.

ENDOVASCULAR INTRACRANIAL EMBOLIZATION PROCEDURES WITH PRINCIPAL DIAGNOSIS OF HEMORRHAGE

MS–DRG	Number of cases	Average length of stay	Average costs
Requested new combined MS–DRG	1,275	15.6	$67,831

The requestor suggested that this new requested base MS–DRG would not be subdivided by severity levels. Using the requested code logic, cases with a principal diagnosis of hemorrhage and procedure codes 39.72 (Endovascular (total) embolization or occlusion of head and neck vessels), 39.75 (Endovascular embolization or occlusion of vessel(s) of head or neck using bare coils), and 39.76 (Endovascular embolization or occlusion of vessel(s) of head or neck using bioactive coils) would be moved out of MS–DRGs 020, 021, and 022 and into a single new MS–DRG with no severity levels.

As can be seen in the table above, the average costs for the new requested combined MS–DRG would be $67,831. The average costs for current MS–DRGs 020, 021, and 022 were $71,655, $52,143, and $36,998, respectively. Based on these findings, if we established this requested new MS–DRG, payments for those cases at the highest severity level (MS–DRG 020, which had average costs of $71,655) would be reduced.

In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24351 through 24356), we stated that we believe that maintaining the current MS–DRG assignment for these types of procedures is appropriate. Our clinical advisors stated that the current grouping of procedures within MS–DRGs 020, 021, and 022 reflects patients who are unique in terms of utilization and complexity based on the three severity levels, which are specifically designed to capture clinical differences in these patients, and these factors support maintaining the current structure. Therefore, we did not propose to move cases with a principal diagnosis of hemorrhage and procedure codes 39.72, 39.75, and 39.76 out of MS–DRGs 020, 021, and 022 and create a new base MS–DRG. We invited public comments on this proposal.

As discussed earlier in this section, the requestor also recommended the creation of a new set of MS–DRGs for endovascular intracranial embolization procedures without a principal diagnosis of hemorrhage with MCC, with CC, and without CC/MCC. For these requested new MS–DRGs, the requestor suggested assignment of endovascular embolization procedures as well as certain other percutaneous and endovascular procedures. The complete list of endovascular intracranial embolization procedures developed by the requestor is as follows:

- 00.62 (Percutaneous angioplasty of intracranial vessel);
- 39.72 (Endovascular (total) embolization or occlusion of head and neck vessels);
- 39.74 (Endovascular removal of obstruction from head and neck vessel(s));
- 39.75 (Endovascular embolization or occlusion of vessel(s) of head or neck using bare coils);
- 39.76 (Endovascular embolization or occlusion of vessel(s) of head or neck using bioactive coils); and
- 39.79 (Other endovascular procedures on other vessels)

The following table shows our findings from examination of claims data on endovascular intracranial procedures without a principal diagnosis of hemorrhage reported in MS–DRGs 023 through 027 from the December 2014 update of the FY 2014 MedPAR file.

ENDOVASCULAR INTRACRANIAL PROCEDURES WITHOUT PRINCIPAL DIAGNOSIS OF HEMORRHAGE

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 023—All cases	5,615	10.96	$37,784
MS–DRG 023—Cases with endovascular intracranial procedure without diagnosis of hemorrhage	1,510	8.88	39,666
MS–DRG 024—All cases	1,848	5.93	26,195
MS–DRG 024—Cases with endovascular intracranial procedure without diagnosis of hemorrhage	867	5.80	27,975
MS–DRG 025—All cases	16,949	9.35	29,970
MS–DRG 025—Cases with endovascular intracranial procedure without diagnosis of hemorrhage	650	8.52	44,082
MS–DRG 026—All cases	8,075	6.09	21,414
MS–DRG 026—Cases with endovascular intracranial procedure without diagnosis of hemorrhage	778	3.07	26,594
MS–DRG 027—All cases	9,883	3.15	16,613
MS–DRG 027—Cases with endovascular intracranial procedure without diagnosis of hemorrhage	1,793	1.66	22,244

As can be seen from this table, if we created a new set of MS–DRGs recommended by the requester, most of the cases would have to be moved out of MS–DRGs 023 and 027. The 1,510 cases that would have to be moved out of MS–DRG 023 have average costs of $39,666 compared to average costs of $37,784 for all cases in MS–DRG 023. The average costs for these cases are not significantly different from the average costs for all cases in MS–DRG 023. The average length of stay for the cases with endovascular intracranial procedure without a diagnosis of hemorrhage in MS–DRG 023 is 8.88 compared to 10.96 days for all cases in MS–DRG 023. In the proposed rule, we stated that we believe that these data support the current MS–DRG assignment for MS–DRG 023. The 1,793 cases that would have to be moved out of MS–DRG 027 have average costs of $22,244 compared to the average costs of $16,613 for all cases in MS–DRG 027. While the average costs for these cases are higher than for all cases in MS–DRG 027, one would

expect some procedures within an MS–DRG to have higher average costs and other procedures to have lower average costs than the overall average costs. Cases within the MS–DRGs describing endovascular intracranial procedures are grouped together based on similar clinical and resource criteria. Some cases will have average costs that are higher than the overall average costs for cases in the MS–DRG, while other cases will have lower average costs. These differences in average costs are found within all MS–DRGs. The average length of stay of MS–DRG 027 cases with endovascular intracranial procedure without a diagnosis of hemorrhage is 1.66 days as compared to 3.15 days for all cases in MS–DRG 027. Therefore, while the average costs are higher for the cases with endovascular intracranial procedure without a diagnosis of hemorrhage than for all cases in MS–DRG 027, the length of stay is shorter.

The 867 cases that would have to be moved out of MS–DRG 024 have average costs of $27,975 compared to average costs for all cases in MS–DRG 024 of $26,195. The average costs for these cases are not significantly different than the average costs for all cases in MS–DRG 024. The average length of stay for the 867 cases that would have to be moved out of MS–DRG 024 is 5.80 compared to 5.93 for all cases in MS–DRG 024. Therefore, the lengths of stay for the cases also are quite similar in MS–DRG 024. In the FY 2016 IPPS/LTCH PPS proposed rule, we stated that we determined that these data findings support maintaining the current MS–DRG assignment of these procedures in MS–DRG 024.

MS–DRGs 025 and 026 show the smallest number of cases that would have to be moved to the requested new MS–DRGs, but these cases have larger differences in average costs. The average costs of cases that would have to be moved out of MS–DRG 025 are $44,082 compared to $29,970 for all cases in MS–DRG 025. The average length of stay for the MS–DRG 025 cases with endovascular intracranial procedure without a diagnosis of hemorrhage is 8.52 days as compared to 9.35 days for all cases in MS–DRG 025. Therefore, the lengths of stay are similar for cases in MS–DRG 025. The average costs of cases that would have to be moved out of MS–DRG 026 are $26,594 compared to $21,414 for all cases. The average length of stay for cases that would have to be moved out of MS–DRG 026 is 3.07 days compared to 6.09 days for all cases in MS–DRG 026, or almost half as long as for all cases in MS–DRG 026. As stated earlier, the average costs for cases that would be moved out of MS–DRGs 023, 024, 025, 026, and 027 under this request are higher than the average costs for all cases in these MS–DRGs, with most of the cases coming out of MS–DRGs 023 and 027. The average costs for these particular cases in MS–DRG 023 are not significantly different from the average costs for all cases in MS–DRG 023. In addition, while the average costs are higher for the cases with an endovascular intracranial procedure without a diagnosis of hemorrhage than for all cases in MS–DRG 027, the length of stay is shorter. We determined that the overall data do not support making the requested MS–DRG updates to MS–DRGs 023, 024, 025, 026, and 027 and creating three new MS–DRGs. Therefore, we did not propose to make changes to the current structure for MS–DRGs 023 through 027.

In summary, our clinical advisors reviewed each aspect of this multi-part request and advised us that the endovascular embolization procedures are appropriately assigned to MS–DRGs 020 through 027. They did not support removing the procedures (procedure codes 39.72, 39.75, and 39.76) from MS–DRGs 020, 021, and 022 and creating a single MS–DRG for endovascular intracranial embolization procedures with a principal diagnosis of hemorrhage with no severity levels. Our clinical advisors stated that the current MS–DRG grouping of three severity levels captures differences in clinical severity, average costs, and length of stay for these patients appropriately. Our clinical advisors also recommended maintaining the current MS–DRG assignments for endovascular embolization and other percutaneous and endovascular procedures within MS–DRGs 023 through 027. They stated that these procedures are all clinically similar to others in these MS–DRGs. In addition, they stated that the surgical techniques are all designed to correct the same clinical problem, and they advised against moving a select number of those procedures out of MS–DRGs 023 through 027.

Based on the findings from our data analysis and the recommendations from our clinical advisors, in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24356), we did not propose to create the four new MS–DRGs for endovascular intracranial embolization and other endovascular procedures recommended by the requestor. We proposed to maintain the current MS–DRG structure for MS–DRGs 020 through 027.

We invited public comments on these two proposals.

Comment: A number of commenters supported the proposal to maintain the current MS–DRG structure for MS–DRGs 020 through 027 and not to create four new MS–DRGs for endovascular intracranial embolization and other endovascular procedures. The commenters stated that the proposal was reasonable, given the data and information provided.

One commenter disagreed with the proposal. The commenter stated that the data demonstrate that the cost of endovascular coil cases consistently exceeds the overall average cost of all cases within each of the MS–DRGs to which these procedures are currently assigned. Moreover, the commenter believed that it was inappropriate to minimize the clinical complexity of these procedures compared to other procedures in the current MS–DRGs.

Response: We appreciate the commenters' support for our proposal to maintain the current MS–DRG structure for MS–DRGs 020 through 027 and not to create four new MS–DRGs for endovascular intracranial embolization and other endovascular procedures. In response to the commenter who disagreed with the proposal, as stated earlier in this section, while we recognize that the average costs of these cases are higher than the average costs of all cases in MS–DRGs 023 through 027, one would expect some procedures within an MS–DRG to have higher average costs and other procedures to have lower average costs than the overall average costs. Cases within the MS–DRGs describing endovascular intracranial procedures are grouped together based on similar clinical and resource criteria. Some cases will have average costs that are higher than the overall average costs for cases in the MS–DRG, while other cases will have lower average costs. Our clinical advisors recommended maintaining the current MS–DRG assignments for endovascular embolization and other percutaneous and endovascular procedures within MS–DRGs 023 through 027. They continue to believe that these procedures are all clinically similar to others in these MS–DRGs and that the surgical techniques are all designed to correct the same clinical problem, and continue to advise against moving a select number of those procedures out of MS–DRGs 020 through 027. Our clinical advisors stated that the endovascular intracranial embolizations and other endovascular procedures address the same clinical problems as other procedures assigned to MS–DRGs 020 through 027. Therefore, the cases in MS–DRGs 020 through 027 are clinically similar.

After consideration of the public comments we received, we are finalizing our proposal to maintain the

current MS–DRG structure for MS–DRGs 020 through 027 and not to create four new MS–DRGs for endovascular intracranial embolization and other endovascular procedures.

3. MDC 5 (Diseases and Disorders of the Circulatory System)

a. Adding Severity Levels to MS–DRGs 245 Through 251

During the comment period for the FY 2015 IPPS/LTCH PPS proposed rule, we received a comment that recommended establishing severity levels for MS–DRG 245 (AICD Generator Procedures) and including additional severity levels for MS–DRG 246 (Percutaneous Cardiovascular Procedure with Drug-Eluting Stent with MCC or 4+ Vessels/Stents); MS–DRG 247 (Percutaneous Cardiovascular Procedure with Drug-Eluting Stent without MCC); MS–DRG 248 (Percutaneous Cardiovascular Procedure with Non-Drug-Eluting Stent with MCC or 4+ Vessels/Stents); MS–DRG 249 (Percutaneous Cardiovascular Procedure with Non-Drug-Eluting Stent without MCC); MS–DRG 250 (Percutaneous Cardiovascular Procedure without Coronary Artery Stent with MCC); and MS–DRG 251 (Percutaneous Cardiovascular Procedure without Coronary Artery Stent without MCC).

We considered this public comment to be outside of the scope of the FY 2015 IPPS/LTCH PPS proposed rule. Therefore, we did not address this comment in the FY 2015 IPPS/LTCH PPS final rule. However, we indicated that we would consider the public comment for possible proposals in future rulemaking as part of our annual review process.

For the FY 2016 IPPS/LTCH PPS proposed rule, we received a separate, but related, request involving most of these same MS–DRGs. Therefore, for the FY 2016 IPPS/LTCH PPS proposed rule, we conducted a simultaneous analysis of claims data to address both the FY 2015 public comment request and the related FY 2016 request. We discuss both of these requests below.

b. Percutaneous Intracardiac Procedures

We received a request to remove the cardiac ablation and other specified cardiovascular procedures from the following MS–DRGs, and to create new MS–DRGs to classify these procedures:

- MS–DRG 246 (Percutaneous Cardiovascular Procedure with Drug-Eluting Stent with MCC or 4+ Vessels/Stents);
- MS–DRG 247 (Percutaneous Cardiovascular Procedure with Drug-Eluting Stent without MCC);
- MS–DRG 248 (Percutaneous Cardiovascular Procedure with Non-Drug-Eluting Stent with MCC or 4+ Vessels/Stents);
- MS–DRG 249 (Percutaneous Cardiovascular Procedure with Non-Drug-Eluting Stent without MCC);
- MS–DRG 250 (Percutaneous Cardiovascular Procedure without Coronary Artery Stent with MCC); and
- MS–DRG 251 (Percutaneous Cardiovascular Procedure without Coronary Artery Stent without MCC).

The commenter stated that, historically, the MS–DRGs listed above appropriately reflected the differential cost of percutaneous transluminal coronary angioplasty (PTCA) procedures with and without stents. The commenter noted that PTCA procedures with drug eluting stents were previously paid the highest, followed by PTCA procedures with bare metal stents and PTCA procedures with no stents, respectively. However, the commenter believed that, in recent years, the opposite has begun to occur and cases reporting a PTCA procedure without a stent are being paid more than cases reporting a PTCA procedure with a stent. The commenter further noted that cardiac ablation procedures and PTCA procedures without stents are currently assigned to the same MS–DRGs, notwithstanding that the procedures have different clinical objectives and patient diagnoses. The commenter indicated that cardiac ablation procedures are performed on patients with multiple distinct cardiac arrhythmias to alter electrical conduction systems of the heart, and PTCA procedures are performed on patients with coronary atherosclerosis to open blocked coronary arteries. The commenter also noted that cardiac ablation procedures are performed in the heart chambers by cardiac electrophysiologists, require significantly more resources, and require longer periods of time to complete. Conversely, PTCA procedures are performed in the coronary vessels by interventional cardiologists, require the use of less equipment, and require a shorter period of time to complete. Therefore, the commenter suggested that CMS create new MS–DRGs for percutaneous intracardiac procedures to help improve clinical homogeneity by differentiating percutaneous intracardiac procedures (performed within the heart chambers) from percutaneous intracoronary procedures (performed within the coronary vessels). The commenter further believed that creating new MS–DRGs for these procedures would also better reflect the resource cost of specialized equipment used for more complex structures of electrical conduction systems when performing cardiac ablation procedures.

The following ICD–9–CM procedure codes identify and describe the cardiac ablation procedures and the other percutaneous intracardiac procedures that are currently classified under MS–DRGs 246 through 251 and that the commenter recommended that CMS assign to the newly created MS–DRGs:

- 35.52 (Repair of atrial septal defect with prosthesis, closed technique);
- 35.96 (Percutaneous balloon valvuloplasty);
- 35.97 (Percutaneous mitral valve repair with implant);
- 37.26 (Catheter based invasive electrophysiologic testing);
- 37.27 (Cardiac mapping);
- 37.34 (Excision or destruction of other lesion or tissue of heart, endovascular approach);
- 37.36 (Excision, destruction, or exclusion of left atrial appendage (LAA)); and
- 37.90 (Insertion of left atrial appendage device).

There are a number of ICD–10–PCS code translations that provide more detailed and specific information for each of the ICD–9–CM procedure codes listed above that also are currently classified under MS–DRGs 246 through 251 based on the GROUPER Version 32 ICD–10 MS–DRGs. The comparable ICD–10–PCS code translations for ICD–9–CM procedure code 35.52 are shown in the following table.

ICD–10–PCS Code Translations for ICD–9–CM Procedure Code 35.52

ICD–10–PCS Code	Code description
02U53JZ	Supplement atrial septum with synthetic substitute, percutaneous approach.
02U54JZ	Supplement atrial septum with synthetic substitute, percutaneous endoscopic approach.

The comparable ICD–10–PCS code translations for ICD–9–CM procedure code 35.96 are shown in the following table.

ICD–10–PCS TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 35.96

ICD–10–PCS Code	Code description
027F34Z	Dilation of aortic valve with drug-eluting intraluminal device, percutaneous approach.
027F3DZ	Dilation of aortic valve with intraluminal device, percutaneous approach.
027F3ZZ	Dilation of aortic valve, percutaneous approach.
027F44Z	Dilation of aortic valve with drug-eluting intraluminal device, percutaneous endoscopic approach.
027F4DZ	Dilation of aortic valve with intraluminal device, percutaneous endoscopic approach.

The ICD–10–PCS code translations listed above, along with their respective MS–DRG assignments, can be found in the ICD–10 MS–DRGs Version 32 Definitions Manual posted on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*.

As mentioned earlier, we received a separate, but related, request to add severity levels to MS–DRGs 246 through 251. We address this request at the end of this section.

To address the first of these separate, but related, requests, we reviewed claims data for MS–DRGs 246 through 251 from the December 2014 update of the FY 2014 MedPAR file. Our findings are shown in the following table:

PERCUTANEOUS CARDIOVASCULAR MS–DRGS WITH AND WITHOUT STENTS

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 246—All cases	30,617	5.52	$23,855
MS–DRG 246—Cases with procedure codes 35.52, 35.96, 35.97, 37.26, 37.27, 37.34, 37.36, and 37.90	244	9.69	34.099
MS–DRG 247—All cases	79,639	2.69	15,671
MS–DRG 247—Cases with procedure codes 35.52, 35.96, 35.97, 37.26, 37.27, 37.34, 37.36, and 37.90	260	5.20	25,797
MS–DRG 248—All cases	9,310	6.37	22,504
MS–DRG 248—Cases with procedure codes 35.52, 35.96, 35.97, 37.26, 37.27, 37.34, 37.36, and 37.90	125	10.76	33,521
MS–DRG 249—All cases	16,273	3.08	14,066
MS–DRG 249—Cases with procedure codes 35.52, 35.96, 35.97, 37.26, 37.27, 37.34, 37.36, and 37.90	81	5.12	23,710
MS–DRG 250—All cases	9,275	7.07	22,902
MS–DRG 250—Cases with procedure codes 35.52, 35.96, 35.97, 37.26, 37.27, 37.34, 37.36, and 37.90	5,826	7.90	24,841
MS–DRG 251—All cases	20,945	3.25	15,757

PERCUTANEOUS CARDIOVASCULAR MS–DRGS WITH AND WITHOUT STENTS—Continued

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 251—Cases with procedure codes 35.52, 35.96, 35.97, 37.26, 37.27, 37.34, 37.36, and 37.90	14,436	3.39	17,290

As shown in the table above, there were a total of 30,617 cases in MS–DRG 246, with an average length of stay of 5.52 days and average costs of $23,855. For cases reporting a percutaneous intracardiac procedure in MS–DRG 246 (ICD–9–CM procedure codes 35.52, 35.96, 35.97, 37.26, 37.27, 37.34, 37.36, and 37.90), there were a total of 244 cases, with an average length of stay of 9.69 days and average costs of $34,099. For MS–DRGs 247 through 251, a similar pattern was identified; the data reflected that the average costs are higher and the average length of stay is greater for cases reporting a percutaneous intracardiac procedure in comparison to the average costs and average length of stay for all of the cases in their respective MS–DRGs.

As reflected in the following table, a further analysis of the data showed that percutaneous intracardiac procedures represent a total of 20,972 cases in MS–DRGs 246 through 251, with a greater average length of stay (4.79 days versus 3.62 days) and higher average costs ($19,810 versus $17,532) in comparison to all of the remaining cases in MS–DRGs 246 through 251.

SUMMARY OF PERCUTANEOUS CARDIOVASCULAR DRGS WITH AND WITHOUT STENTS

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRGs 246 through 251—Cases with procedure codes 35.52, 35.96, 35.97, 37.26, 37.27, 37.34, 37.36, and 37.90	20,972	4.79	$19,810
MS–DRGs 246 through 251—Cases without procedure codes 35.52, 35.96, 35.97, 37.26, 37.27, 37.34, 37.36, and 37.90	145,087	3.62	17,532

We stated in the FY 2016 IPPS/LTCH PPS proposed rule that the results of these data analyses support removing procedures performed within the heart chambers using intracardiac techniques from MS–DRGs 246 through 251, and assigning these procedures to separate MS–DRGs. The results of these data analyses also supported subdividing these MS–DRGs using the ''with MCC'' and ''without MCC'' severity levels based on the application of the criteria established in the FY 2008 IPPS final rule (72 FR 47169), and described in section II.G.1.b. of the preamble of the proposed rule, that must be met to warrant the creation of a CC or an MCC subgroup within a base MS–DRG. Our clinical advisors also agreed that this differentiation would improve the clinical homogeneity of these MS–DRGs by separating percutaneous intracardiac procedures (performed within the heart chambers) from percutaneous intracoronary procedures (performed within the coronary vessels). In addition, we believe that creating these new MS–DRGs would better reflect the resource cost of specialized equipment used to perform more complex structures of electrical conduction systems during cardiac ablation procedures. Therefore, for FY 2016, we proposed to create two new MS–DRGs to classify percutaneous intracardiac procedures (80 FR24359). Specifically, we proposed to create MS–DRG 273, entitled ''Percutaneous Intracardiac Procedures with MCC,'' and MS–DRG 274, entitled ''Percutaneous Intracardiac Procedures without MCC,'' and to assign the procedures performed within the heart chambers using intracardiac techniques to the two proposed new MS–DRGs. We proposed that existing percutaneous intracoronary procedures with and without stents continue to be assigned to the other MS–DRGs to reflect that those procedures are performed within the coronary vessels and require fewer resources.

The table below represents the distribution of cases, average length of stay, and average costs for these proposed two new MS–DRGs.

PROPOSED NEW MS–DRGS FOR PERCUTANEOUS INTRACARDIAC PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
Proposed MS–DRG 273 with MCC	6,195	8.03	$25,380
Proposed MS–DRG 274 without MCC	14,777	3.44	17,475

We invited public comments on our proposal to create the two new MS–DRGs for percutaneous intracardiac procedures for FY 2016. In addition, we invited public comments on the ICD–10–PCS code translations that were presented earlier in this section and our proposal to assign these procedure codes to the proposed new MS–DRGs 273 and 274.

Comment: Several commenters supported the proposal to create proposed new MS–DRG 273 and MS–DRG 274 to improve clinical homogeneity and better reflect resource costs. The commenters stated that the proposal was reasonable, given the data and information provided. The commenters also agreed with the proposed ICD–10–PCS code translations and assignment of those codes to the proposed new MS–DRGs.

Several commenters commended CMS for conducting the analysis and continuing to make further refinements to the MS–DRGs. One commenter specifically expressed appreciation for CMS' display of cost and length of stay data in the analysis, in addition to the clinical factors that support

differentiation of intracardiac procedures from intracoronary procedures. This commenter recommended that, if the two proposed MS–DRGs are finalized, CMS continue to monitor them after ICD–10 implementation in an effort to mitigate potential unintended consequences. The commenter also suggested that, in the future, additional procedure codes may warrant assignment to the proposed new MS–DRGs. Another commenter stated that adopting the proposal to create the new MS–DRGs will lead to more appropriate payment.

Response: We appreciate the commenters' support. We agree that creating these new MS–DRGs will better reflect utilization of resources and clinical cohesiveness for intracardiac procedures in comparison to intracoronary procedures, as well as provide for appropriate payment for the procedures.

Comment: One commenter supported the proposal but also requested that CMS provide additional information on how the payment rate will be adjusted for the remaining existing MS–DRGs (246 through 251) following the creation of proposed new MS–DRGs 273 and 274.

Response: We thank the commenter for its support. For payment rate updates to all of the MS–DRGs for FY 2016, we refer readers to Table 5 associated with this final rule (which is available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*).

After consideration of the public comments we received, we are finalizing our proposal to create MS–DRGs 273 (Percutaneous Intracardiac Procedures with MCC) and MS–DRG 274 (Percutaneous Intracardiac Procedures without MCC) for the FY 2016 ICD–10 MS–DRGs Version 33.

As mentioned earlier in this section, we received a similar request in response to the FY 2015 IPPS/LTCH PPS proposed rule to add severity levels to MS–DRGs 246 through 251. We considered this public comment to be outside of the scope of the FY 2015 IPPS/LTCH PPS proposed rule. Therefore, we did not address this comment in the FY 2015 IPPS/LTCH PPS final rule. However, we indicated that we would consider the public comment for possible proposals in future rulemaking as part of our annual review process. Specifically, the commenter recommended including additional severity levels for MS–DRGs 246 through 251 and establishing severity levels for MS–DRG 245 (AICD Generator Procedures).

For our data analysis for this recommendation, we examined claims data from the December 2014 update of the FY 2014 MedPAR file to determine if including additional severity levels in MS–DRGs 246 through 251 was warranted. During our analysis, we applied the criteria established in the FY 2008 IPPS final rule (72 FR 47169), as described in section II.G.1.b. of the preamble of the proposed rule. As shown in the table below, we collapsed MS–DRGs 246 through 251 into base MS–DRGs (MS–DRGs 246, 248, and 250) by suggested severity level and applied the criteria.

PERCUTANEOUS CARDIOVASCULAR MS–DRG WITH AND WITHOUT STENT PROCEDURES BY SUGGESTED SEVERITY LEVEL

MS–DRG	Number of cases	Average length of stay	Average costs
Suggested MS–DRG 246 with MCC	30,617	5.52	$23,855
Suggested MS–DRG 246 with CC	45,313	2.96	16,233
Suggested MS–DRG 246 without CC/MCC	34,326	2.33	14,928
Suggested MS–DRG 248 with MCC	9,310	6.37	22,504
Suggested MS–DRG 248 with CC	9,510	3.49	14,798
Suggested MS–DRG 248 without CC/MCC	6,763	2.51	13,037
Suggested MS–DRG 250 with MCC	9,275	7.07	22,903
Suggested MS–DRG 250 with CC	11,653	3.80	16,113
Suggested MS–DRG 250 without CC/MCC	9,292	2.56	15,310

We found that the criterion that there be a $2,000 difference in average costs between subgroups was not met. Specifically, between the ''with CC'' and ''without CC/MCC'' subgroups for base MS–DRG 246, the difference in average costs was only $1,305; for base MS–DRG 248, the difference in average costs was only $1,761; and for base MS–DRG 250, the difference in average costs was only $803. The results of the data analysis of MS–DRGs 246 through 251 confirmed, and our clinical advisors agreed, that the existing 2-way severity level splits for these MS–DRGs (with MCC and without MCC) are appropriate, as displayed in the table below.

PERCUTANEOUS CARDIOVASCULAR MS–DRGS WITH AND WITHOUT STENTS

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 246—All cases	30,617	5.52	$23,855
MS–DRG 247—All cases	79,639	2.69	15,671
MS–DRG 248—All cases	9,310	6.37	22,504
MS–DRG 249—All cases	16,273	3.08	14,066
MS–DRG 250—All cases	9,275	7.07	22,903
MS–DRG 251—All cases	20,945	3.25	15,757

Therefore, we did not propose to further subdivide the severity levels for MS–DRGs 246 through 251. We invited public comments on our proposal not to create additional severity levels for MS–DRGs 246 through 251.

Comment: Several commenters supported the proposal not to create additional severity levels for MS–DRGs 246 through 251. The commenters stated that the proposal was reasonable,

given the data and information provided.

Response: We appreciate the commenters' support. Therefore, we are finalizing our proposal to not create additional severity levels for MS–DRGs 246–251 for the FY 2016 ICD–10 MS–DRGs Version 33.

Using the same MedPAR claims data for FY 2014, we separately examined cases in MS–DRG 245 to determine whether to subdivide this MS–DRG into severity levels. As displayed in the table below, the results of the FY 2014 data analysis showed there were a total of 1,699 cases, with an average length of stay of 5.49 days and average costs of $34,287, in MS–DRG 245.

AICD GENERATOR PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 245—All cases	1,699	5.49	$34,287

We applied the five criteria established in the FY 2008 IPPS final rule (72 FR 47169), as described in section II.G.1.b. of the preamble of the proposed rule, to determine if it was appropriate to subdivide MS–DRG 245 into severity levels. The table below illustrates our findings.

AICD Generator procedures by suggested severity level	Number of cases	Average length of stay	Average costs
Suggested MS–DRG 245 with MCC	542	8.15	$40,004
Suggested MS–DRG 245 with CC	939	4.51	$32,237
Suggested MS–DRG 245 without CC/MCC	218	3.12	$28,907

Based on the analysis of the FY 2014 claims data for MS–DRG 245, the results supported creating a ''with MCC'' and a ''without MCC'' severity level split. However, our clinical advisors indicated that it would not be clinically appropriate to add severity levels based on an isolated year's data fluctuation because this could lead to a lack of stability in MS–DRG payments. We agreed with our clinical advisors and noted that we annually conduct an analysis of base MS–DRGs to evaluate if additional severity levels are warranted. This analysis includes 2 years of MedPAR claims data to specifically compare data results from 1 year to the next to avoid making determinations about whether additional severity levels are warranted based on an isolated year's data fluctuation. Generally, in past years, for our review of requests to add or establish severity levels, in our analysis of the most recent claims data, there was at least one criterion that was not met. Therefore, it was not necessary to further analyze data beyond 1 year. However, the results of our analysis of claims data in the December 2014 update of the FY 2014 MedPAR file for this particular request involving MS–DRG 245 demonstrate that all five criteria to establish subgroups were met, and, therefore, it was necessary to also examine the FY 2013 MedPAR claims data file.

The results of our analysis from the December 2013 update of the FY 2013 claims data for MS–DRG 245 are shown in the table below.

AICD GENERATOR PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 245—All cases	1,850	4.81	$33,272

The FY 2013 claims data for MS–DRG 245 did not support creating any severity levels because the data did not meet one or more of the five required criteria for creating new severity levels. The data did not meet the requirement for a 3-way severity level split (with MCC, with CC, and without CC/MCC) or a 2-way severity level split (with MCC and without MCC) because there were not at least 500 cases in the MCC subgroup. While the data did meet this particular criterion for the 2-way severity level split of ''with CC/MCC'' and ''without CC/MCC'' because there were at least 500 cases in the CC subgroup, the data did not meet the criterion that there be at least a 20-percent difference in average costs between subgroups, as shown in the table below.

AICD GENERATOR PROCEDURES

MS–DRG by suggested severity level	Number of cases	Average length of stay	Average costs
MS–DRG 245 with MCC	44	7.32	$39,536
MS–DRG 245 with CC	1,118	4.26	$31,786
MS–DRG 245 without CC/MCC	288	3.10	$29,383

As stated previously, we believe that 2 years of data showing that the requested CC or MCC subgroup meets all five of the established criteria for creating severity levels are needed in order to support a proposal to add

severity levels for MS–DRG 245. Our clinical advisors also agreed that it would not be clinically appropriate to add severity levels based on an isolated year's data fluctuation because this could lead to a lack of stability in payments. Therefore, we did not propose to add severity levels for MS–DRG 245 for FY 2016. We invited public comments on the results of our analysis and our proposal not to create severity levels for MS–DRG 245.

Comment: Several commenters supported the proposal not to create severity levels for MS–DRG 245. The commenters stated that the proposal was reasonable, given the data and information provided. One commenter specifically noted that it understood the rationale of CMS' proposal based on analysis of the FY 2013 and FY 2014 data fluctuation. However, the commenter recommended that a followup analysis be conducted for the FY 2017 IPPS/LTCH PPS proposed rule.

Response: We appreciate the commenters' support. We intend to conduct a followup analysis for MS–DRG 245 in the FY 2017 IPPS/LTCH PPS proposed rule as the commenter recommended.

After consideration of the public comments we received, we are finalizing our proposal not to create severity levels for MS–DRG 245 in FY 2016.

c. Zilver® PTX Drug-Eluting Peripheral Stent (Zilver® PTX®)

The Zilver® PTX Drug-Eluting Peripheral Stent (Zilver® PTX®) was approved for new technology add-on payments in FY 2014 (78 FR 50583 through 50585). Cases involving the Zilver® PTX® that are eligible for new technology add-on payments are identified by ICD–9–CM procedure code 00.60 (Insertion of drug-eluting stent(s) of superficial femoral artery).

We received a request from the manufacturer for an extension of new technology add-on payments for Zilver® PTX® in FY 2016. In the request, the manufacturer asked CMS to consider three options for procedure code 00.60 for FY 2016. The first option was to extend the new technology add-on payment through FY 2016. The request to extend the new technology add-on payment is addressed in section II.I.3.e. of the preamble of the proposed rule and this final rule. The second option was to establish a new family of MS–DRGs for procedures involving drug-eluting stents used in the peripheral (noncoronary) vasculature. The third option was to assign all Zilver® PTX® cases to MS–DRG 252 even if there is no MCC (which would necessitate revising the MS–DRG title to ''Other Vascular Procedures).

ICD–10–PCS provides the following more detailed procedure codes for the insertion of drug-eluting stents of superficial femoral artery:

- 047K04Z (Dilation of right femoral artery with drug-eluting intraluminal device, open approach);
- 047K34Z (Dilation of right femoral artery with drug-eluting intraluminal device, percutaneous approach);
- 047K44Z (Dilation of right femoral artery with drug-eluting intraluminal device, percutaneous endoscopic approach);
- 047L04Z (Dilation of left femoral artery with drug-eluting intraluminal device, open approach);
- 047L34Z (Dilation of left femoral artery with drug-eluting intraluminal device, percutaneous approach); and
- 047L44Z (Dilation of left femoral artery with drug-eluting intraluminal device, percutaneous endoscopic approach).

We examined claims data for cases involving the drug-eluting peripheral stent procedures reported in the December 2014 update of the FY 2014 MedPAR file for MS–DRGs 252, 253, and 254 (Other Vascular Procedures with MCC, with CC and without CC/MCC, respectively). The following table illustrates our findings.

DRUG-ELUTING PERIPHERAL STENT PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 252—All cases	30,696	7.89	$23,935
MS–DRG 252—Cases with procedure code 00.60	133	9.08	32,623
MS–DRG 253—All cases	34,746	5.68	19,030
MS–DRG 253—Cases with procedure code 00.60	353	4.99	25,396
MS–DRG 254—All cases	15,394	2.99	12,629
MS–DRG 254—Cases with procedure code 00.60	115	2.62	21,461

Our findings showed that there were only 601 peripheral angioplasty cases with a drug-eluting stent reported. Of the 601 peripheral angioplasty cases with a drug-eluting stent, 133 cases were in MS–DRG 252, 353 cases were in MS–DRG 253, and 115 cases were in MS–DRG 254. The average costs for the drug-eluting stent cases in MS–DRGs 252, 253, and 254 were $32,623, $25,396, and $21,461, respectively. The average costs for all cases in MS–DRGs 252, 253, and 254 were $23,935, $19,030, and $12,629, respectively. The average costs for the drug-eluting stent cases in MS–DRG 253 ($25,396) were higher than the average costs for all cases in MS–DRG 252 ($23,935). However, the average costs for the drug-eluting stent cases in MS–DRG 254 ($21,461) were lower than the average costs for all cases in MS–DRG 252 ($23,935).

We determined that the small number of cases (601) did not provide justification to create a new set of MS–DRGs specifically for angioplasty of peripheral arteries using drug-eluting stents. In addition, the data did not support assigning all the drug-eluting stent cases to the highest severity level (MS–DRG 252), even when there is not an MCC, because the average costs for the drug-eluting stent cases in MS–DRG 254 ($21,461) were lower than the average costs for all cases in MS–DRG 252 ($23,935). The average length of stay for drug-eluting stent cases in MS–DRG 254 was 2.62 days compared to 7.89 days for all cases in MS–DRG 252. Cases are grouped together based on similar clinical and resource criteria.

Our clinical advisors recommended making no MS–DRG updates for peripheral angioplasty cases with a drug-eluting stent and considered the current MS–DRG assignment appropriate. Our clinical advisors agreed that the small number of peripheral angioplasty cases with a drug-eluting stent does not support creating a new MS–DRG for this specific type of treatment. They stated that the cases are clinically similar to other cases within MS–DRGs 252, 253, and 254. Considering the data for peripheral angioplasty cases with a drug-eluting stent found reported in MS–DRGs 252, 253, and 254 and the input from our clinical advisors, in the FY 2016 IPPS/

LTCH proposed rule (80 FR 24362), we did not propose to make any MS–DRG updates for peripheral angioplasty cases with a drug-eluting stent. We proposed to maintain the current MS–DRG assignments for these cases in MS–DRGs 252, 253, and 254. We invited public comments on our proposal.

Comment: A number of commenters supported the proposal to maintain the current MS–DRG assignments for peripheral angioplasty cases with a drug-eluting stent in MS–DRGs 252, 253, and 254. The commenters stated that the proposal was reasonable, given the data and information provided.

One commenter, the manufacturer, expressed concern with the proposal and asked CMS to reconsider its recommendation for denying the request that all Zilver® PTX® cases be assigned to MS–DRG 252 even if there were no MCC. The commenter stated that it is true that assignment of all drug-eluting cases to MS–DRG 252 would result in an overpayment for cases with a drug-eluting stent that currently are assigned to MS–DRG 254. However, the commenter stated that these cases represent only 19 percent of the drug-eluting stent cases, and that the overpayment of these cases would be modest because the average cost of drug-eluting stent cases in MS–DRG 254 is only $2,500 less than the average cost of all cases in MS–DRG 252. The commenter stated that there would be an underpayment for all the drug-eluting stent cases if the cases continue to be assigned to MS–DRGs 252, 253, and 254. The commenter stated that implementing its original request would allow more adequate payment to hospitals using the Zilver® PTX® technology and thus remove a potential financial barrier to Medicare providers desiring to provide access of this technology to their patients.

Another commenter asserted that it understood CMS' concern that the agency could be overpaying for uncomplicated cases by assigning all drug-eluting stent cases to MS–DRG 252, even if they did not have a MCC. However, the commenter stated that CMS is underpaying all drug-eluting stent cases by maintaining the current MS–DRG assignments for these procedures. The commenter expressed concern regarding patient access to this technology.

Response: We appreciate the commenters' support for our proposal to maintain the current MS–DRG for drug-eluting stent cases in MS–DRGs 252, 253, and 254. Our clinical advisors have also reexamined this issue and continue to advise us that the cases reporting procedure code 00.60 are appropriately classified within MS–DRG 252, 253, or 254.

In regard to the commenters who disagreed with our proposal, as stated earlier, the data do not support assigning all the drug-eluting stent cases to the highest severity level (MS–DRG 252), even when there is not an MCC. We note that while the average costs for MS–DRG 254 (lowest severity level) may only represent 19 percent of the drug-eluting stent cases as shown in the table above, the MS–DRGs are comprised of a distinct structure with respect to the types of patients within each severity level. This structure is based on an organizing principle that patients at the MCC level, the highest severity level, are those patients who are generally sicker, consume an increased utilization of resources, and require more complex services. Disregarding this structure solely for the purpose of increasing payment for patients who are not similar in terms of their severity of illness and resource utilization would be inconsistent with how the MS–DRGs are otherwise defined within the classification system.

In addition, as the requester pointed out in its own comments, ''it is the nature of a MS–DRG system that there will be variations in cost between different hospitalizations that fall into the same MS–DRG or MS–DRGs—each MS–DRG will have some cases that are higher and some cases that are lower than the average costs for the entire MS–DRG.'' We believe that the higher average costs for the drug-eluting stent cases can be attributed to the cost of the device and not necessarily because the patients receiving these stents are more severely ill.

With regard to the commenters' concerns regarding patient access to the technology with the expiration of the new technology add-on payment, we would expect that hospitals that now have experience with the technology and have observed favorable clinical outcomes for their patients would nonetheless consider the technology to be worth the investment. Accordingly, we will continue to monitor cases with the Zilver® PTX® technology to determine if modifications are warranted to the MS–DRG structure in future rulemaking.

After consideration of the public comments we received, we are finalizing our proposal to maintain the current structure for MS–DRG assignments for procedures involving drug-eluting stents in MS–DRG 252, 253, or 254 for FY 2016.

d. Percutaneous Mitral Valve Repair System—Proposed Revision of ICD–10–PCS Version 32 Logic

We received a comment which brought to our attention that the ICD–10 MS–DRGs Version 32 assignment for ICD–10–PCS procedure code 02UG3JZ (Supplement mitral valve with synthetic substitute, percutaneous approach) does not accurately replicate the ICD–9–CM MS–DRGs Version 32, which assigns this procedure code to the following MS–DRGs:

- MS–DRG 231 (Coronary Bypass with PTCA with MCC);
- MS–DRG 232 (Coronary Bypass with PTCA without MCC);
- MS–DRG 246 (Percutaneous Cardiovascular Procedure with Drug-Eluting Stent with MCC or 4+ Vessels/Stents);
- MS DRG 247 (Percutaneous Cardiovascular Procedure with Drug-Eluting Stent without MCC);
- MS–DRG 248 (Percutaneous Cardiovascular Procedure with Non-Drug-Eluting Stent with MCC or 4+ Vessels/Stents);
- MS DRG 249 (Percutaneous Cardiovascular Procedure with Non-Drug-Eluting Stent without MCC);
- MS–DRG 250 (Percutaneous Cardiovascular Procedure without Coronary Artery Stent with MCC); and
- MS–DRG 251 (Percutaneous Cardiovascular Procedure without Coronary Artery Stent without MCC).

We agree with the commenter that the ICD–10 MS–DRGs logic should be consistent with the ICD–9 MS–DRGs logic; that is, the ICD–10 MS–DRGs Version 32 should replicate the ICD–9–CM MS–DRGs Version 32. Therefore, in the FY 2016 IPPS/LTCH PPS proposed rule, for the proposed FY 2016 ICD–10 MS–DRGs Version 33, we proposed to assign ICD–10–PCS procedure code 02UG3JZ to MS–DRGs 231 and 232 and MS–DRGs 246 through 251 (80 FR 24362). We invited public comments on this proposal.

Comment: Several commenters agreed with the proposal to assign ICD–10–PCS procedure code 02UG3JZ to ICD–10 MS–DRGs 231 and 232 and MS–DRGs 246 through 251 to accurately replicate the ICD–9–CM MS–DRGs Version 32 logic. The commenters also noted that, as discussed in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24356 through 24359), for the FY 2016 ICD–10 MS–DRGs Version 33, CMS proposed to create two new ICD–10 MS–DRGs which include ICD–10–PCS procedure code 02UG3JZ. The commenters recognized that, if proposed new MS–DRGs 273 and 274 (Percutaneous Intracardiac Procedures with and without MCC, respectively) were finalized for FY 2016, ICD–10–PCS procedure code 02UG3JZ would then group to those new MS–DRGs. The

commenters requested that CMS confirm the MS–DRG assignment.

Response: We appreciate the commenters' support for our proposal to accurately replicate the assignment of ICD–10–PCS procedure code 02UG3JZ under the ICD–10 MS–DRGs. As discussed earlier in section III.G.3.a. of this final rule, we are finalizing our proposal to create ICD–10 MS–DRGs 273 and 274 (Percutaneous Intracardiac Procedures with and without MCC, respectively). After consideration of the public comments we received, we are confirming as final policy for the FY 2016 ICD–10 MS–DRGs Version 33 that ICD–10–PCS procedure code 02UG3JZ (Supplement mitral valve with synthetic substitute, percutaneous approach) is assigned to new ICD–10 MS–DRGs 273 and 274 and will continue to be assigned to MS–DRGs 231 and 232 (Coronary Bypass with PTC with MCC and without MCC, respectively).

e. Major Cardiovascular Procedures: Zenith® Fenestrated Abdominal Aortic Aneurysm (AAA) Graft

New technology add-on payments for the Zenith® Fenestrated Abdominal Aortic Aneurysm (AAA) Graft (Zenith® F. Graft) will end on September 30, 2015. Cases involving the Zenith® F. Graft are identified by ICD–9–CM procedure code 39.78 (Endovascular implantation of branching or fenestrated graft(s) in aorta) in MS–DRGs 237 and 238 (Major Cardiovascular Procedures with and without MCC, respectively). For additional information on the Zenith® F. Graft, we refer readers to the FY 2015 IPPS/LTCH PPS final rule (79 FR 49921 through 49922).

We received a request to reassign procedures described by ICD–9–CM procedure code 39.78 to the highest severity level in MS–DRGs 237 and 238, including in instances when there is not an MCC present, or to create a new MS–DRG that would contain all endovascular aneurysm repair procedures. We note that, in addition to ICD–9–CM procedure code 39.78, ICD–9–CM procedure code 39.71 (Endovascular implantation of other graft in abdominal aorta) also describes endovascular aneurysm repair procedures.

There are a number of ICD–10–PCS code translations that provide more detailed and specific information for each of ICD–9–CM codes 39.71 and 39.78 that also currently group to MS–DRGs 237 and 238 in the ICD–10 MS–DRGs Version 32. The comparable ICD–10–PCS code translations for ICD–9–CM procedure code 39.71 and 39.78 are shown in the following tables:

ICD–10–PCS Code Translations for ICD–9–CM Procedure Code 39.71

ICD–10–PCS Code	Code description
04U03JZ	Supplement abdominal aorta with synthetic substitute, percutaneous approach.
04U04JZ	Supplement abdominal aorta with synthetic substitute, percutaneous endoscopic approach.
04V03DZ	Restriction of abdominal aorta with intraluminal device, percutaneous approach.
04V04DZ	Restriction of abdominal aorta with intraluminal device, percutaneous endoscopic approach.

ICD–10–PCS Code Translations for ICD–9–CM Procedure Code 39.78

ICD–10–PCS Code	Code description
04V03DZ	Restriction of abdominal aorta with intraluminal device, percutaneous approach.
04V04DZ	Restriction of abdominal aorta with intraluminal device, percutaneous endoscopic approach.

Note: As discussed later in this section, the FY 2016 IPPS/LTCH PPS proposed rule listed the dilation codes ICD–10–PCS 04793DZ through 04754DZ as possible translations for ICD–9–CM procedure code 39.78. For this final rule, we are only listing those codes that as ''standalone'' procedures are assigned to new MS–DRGs 268 and 269.

We analyzed claims data reporting ICD–9–CM procedure code 39.78 for cases assigned to MS–DRGs 237 and 238 in the December 2014 update of the FY 2014 MedPAR file. We found a total of 18,340 cases, with an average length of stay of 9.46 days and average costs of $36,355 in MS–DRG 237. We found 332 cases reporting ICD–9–CM procedure code 39.78, with an average length of stay of 8.46 days and average costs of $51,397 in MS–DRG 237. For MS–DRG 238, we found a total of 32,227 cases, with an average length of stay of 3.72 days and average costs of $25,087. We found 1,927 cases reporting ICD–9–CM procedure code 39.78, with an average length of stay of 2.52 days and average costs of $31,739 in MS–DRG 238.

Zenith Fenestrated Graft Procedures

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 237—All cases	18,340	9.46	$36,355
MS–DRG 237—Cases with procedure code 39.78	332	8.46	51,397
MS–DRG 238—All cases	32,227	3.72	25,087
MS–DRG 238—Cases with procedure code 39.78	1,927	2.52	31,739

As illustrated in the table above, the results of the data analysis indicate that the average costs for cases reporting procedure code 39.78 assigned to MS–DRG 238 were higher than the average costs for all cases in MS–DRG 238 ($31,739 compared to $25,087). In addition, the average costs for the 1,927 cases reporting procedure code 39.78 assigned to MS–DRG 238 were $4,616 less than the costs of all cases assigned to MS–DRG 237. We determined that moving cases reporting procedure code 39.78 from MS–DRG 238 to MS–DRG 237 would result in overpayments. We

also noted that the average length of stay for the 1,927 cases reporting procedure code 39.78 in MS–DRG 238 was 2.52 days in comparison to the average length of stay for all cases in MS–DRG 237 of 9.46 days. Our clinical advisors did not agree with moving cases reporting procedure code 39.78 to a higher severity level (with MCC) MS–DRG.

We believe that the higher average costs could be attributed to the cost of the device. The Zenith® F. Graft is the only fenestrated graft device currently approved by the FDA. Therefore, this manufacturer is able to set its own costs in the market. We pointed out that the IPPS is not designed to pay solely for the cost of devices. More importantly, moving cases that greatly differ in their severity of illness and complexity of resources into a higher severity level MS–DRG, in the absence of an MCC, would conflict with the objective of the MS–DRGs, which is to maintain homogeneous subgroups that are different from one another in terms of utilization of resources, that have enough volume to be meaningful, and that improve our ability to explain variance in resource use (72 FR 47169). Therefore, we did not propose to reassign all cases reporting procedure code 39.78 from MS–DRG 238 to MS–DRG 237, as the commenter requested.

However, we recognized that the results of the data analysis also demonstrated that the average costs for cases reporting ICD–9–CM procedure code 39.78 are higher in both MS–DRG 237 and MS–DRG 238 in comparison to all cases in each respective MS–DRG. As these higher average costs could be attributable to the cost of the device, we noted the commenter's concern that the end of the new technology add-on payment for Zenith® F. Graft, effective September 30, 2015, may result in reduced payment to hospitals and potentially lead to issues involving access to care for the subset of beneficiaries who would benefit from treatment with the Zenith® F. Graft. We continued to review the data to explore other alternatives as we analyzed additional claims data in response to the second part of the request from the commenter; that is, to create a new MS–DRG that would contain all endovascular aneurysm repair procedures.

In our evaluation of the claims data in response to the request to create a new MS–DRG, we again reviewed claims data from the December 2014 update of the FY 2014 MedPAR file. We began our analysis by examining claims data for cases reporting ICD–9–CM procedure codes 39.71 and 39.78 assigned to MS–DRGs 237 and 238. Our findings are shown in the table below.

ENDOVASCULAR ABDOMINAL AORTA PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 237—All cases	18,340	9.46	$36,355
MS–DRG 237—Cases with procedure codes 39.71 and 39.78	2,425	8.34	47,363
MS–DRG 238—All cases	32,227	3.72	25,087
MS–DRG 238—Cases with procedure codes 39.71 and 39.78	16,502	2.27	28,998

As shown in the table above, the average costs for cases involving endovascular abdominal aorta aneurysm repair procedures assigned to MS–DRG 237 were higher than the average costs of all cases assigned to MS–DRGs 237. The average costs for cases reporting ICD–9–CM procedure codes 39.71 and 39.78 assigned to MS–DRG 237 were $47,363 compared to the average costs of $36,355 for all cases assigned to MS–DRG 237 and $25,087 for all cases assigned to MS–DRG 238. Similarly, the average costs for cases reporting ICD–9–CM procedure codes 39.71 and 39.78 assigned to MS–DRG 238 were higher than the average costs of all cases assigned to MS–DRG 238 ($28,998 compared to $25,087). The average length of stay for cases reporting ICD–9–CM procedure codes 39.71 and 39.78 in MS–DRGs 237 and 238 were also shorter than the average length of stay for all cases in the respective MS–DRG.

Our clinical advisors did not support creating a new MS–DRG specifically for endovascular abdominal aortic aneurysm repair procedures only. Therefore, we reviewed other procedure codes currently assigned to MS–DRGs 237 and 238 and found that there were a number of procedures with varying resource requirements and clinical indications that could be analyzed further. We agreed with our clinical advisors that further analysis was warranted to determine how we could better recognize resource utilization, clinical complexity, and average costs by separating the more complex, more invasive, and more expensive procedures used to treat more severely ill individuals from the less complex, less invasive, and less expensive procedures currently grouped to these MS–DRGs.

Therefore, we evaluated all of the procedures currently assigned to MS–DRGs 237 and 238. In our evaluation, we found that MS–DRGs 237 and 238 contained two distinct groups of procedures. We found a high volume of less invasive procedures, such as pericardiotomies and pulsation balloon implants, that had substantially lower costs than the more invasive procedures, such as open and endovascular repairs of the aorta with replacement grafts. We found that the more invasive procedures were primarily associated with procedures on the aorta and heart assist procedures.

For this next phase of our analysis, the following procedure codes were designated as the more complex, more invasive procedures:

- 37.41 (Implantation of prosthetic cardiac support device around the heart);
- 37.49 (Other repair of heart and pericardium);
- 37.55 (Removal of internal biventricular heart replacement system);
- 37.64 (Removal of external heart assist system(s) or device(s));
- 38.04 (Incision of vessel, aorta);
- 38.14 (Endarterectomy, aorta);
- 38.34 (Resection of vessel with anastomosis, aorta);
- 38.44 (Resection of vessel with replacement, aorta, abdominal);
- 38.64 (Other excision of vessels, aorta, abdominal);
- 38.84 (Other surgical occlusion of vessels, aorta, abdominal);
- 39.24 (Aorta-renal bypass);
- 39.71 (Endovascular implantation of other graft in abdominal aorta); and
- 39.78 (Endovascular implantation of branching or fenestrated graft(s) in aorta).

There are a number of ICD–10–PCS code translations that provide more detailed and specific information for each of the ICD–9–CM codes listed above that also currently group to MS–DRGs 237 and 238 in the ICD–10 MS–DRGs Version 32. The comparable ICD–10–PCS code translations for these ICD–

9–CM procedure codes are shown in the following table:

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 37.41

ICD–10–PCS Code	Code description
02UA0JZ	Supplement heart with synthetic substitute, open approach.
02UA3JZ	Supplement heart with synthetic substitute, percutaneous approach.
02UA4JZ	Supplement heart with synthetic substitute, percutaneous endoscopic approach.

For the ICD–9–CM codes that result in greater than 50 ICD–10–PCS comparable code translations, we refer readers to Table 6P (ICD–10–PCS Code Translations for MS–DRG Changes) for this FY 2016 final rule (which is available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*). The table includes the MDC topic, the ICD–9–CM code, and the ICD–10–PCS code translations.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 37.49

The comparable ICD–10–PCS code translations for ICD–9–CM procedure code 37.49 are shown in Table 6P.1a for this final rule that is available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html.*

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 39.24—Continued

ICD–10–PCS Code	Code description
04104A4	Bypass abdominal aorta to left renal artery with autologous arterial tissue, percutaneous endoscopic approach.
04104A5	Bypass abdominal aorta to bilateral renal artery with autologous arterial tissue, percutaneous endoscopic approach.
04104J3	Bypass abdominal aorta to right renal artery with synthetic substitute, percutaneous endoscopic approach.
04104J4	Bypass abdominal aorta to left renal artery with synthetic substitute, percutaneous endoscopic approach.
04104J5	Bypass abdominal aorta to bilateral renal artery with synthetic substitute, percutaneous endoscopic approach.
04104K3	Bypass abdominal aorta to right renal artery with nonautologous tissue substitute, percutaneous endoscopic approach
04104K4	Bypass abdominal aorta to left renal artery with nonautologous tissue substitute, percutaneous endoscopic approach.
04104K5	Bypass abdominal aorta to bilateral renal artery with nonautologous tissue substitute, percutaneous endoscopic approach.
04104Z3	Bypass abdominal aorta to right renal artery, percutaneous endoscopic approach.
04104Z4	Bypass abdominal aorta to left renal artery, percutaneous endoscopic approach.
04104Z5	Bypass abdominal aorta to bilateral renal artery, percutaneous endoscopic approach

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 39.71

ICD–10–PCS Code	Code description
04U03JZ	Supplement abdominal aorta with synthetic substitute, percutaneous approach.
04U04JZ	Supplement abdominal aorta with synthetic substitute, percutaneous endoscopic approach.
04V03DZ	Restriction of abdominal aorta with intraluminal device, percutaneous approach.
04V04DZ	Restriction of abdominal aorta with intraluminal device, percutaneous endoscopic approach

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 39.78

ICD–10–PCS Code	Code description
04793DZ	Dilation of right renal artery with intraluminal device, percutaneous approach.
04794DZ	Dilation of right renal artery with intraluminal device, percutaneous endoscopic approach.
047A3DZ	Dilation of left renal artery with intraluminal device, percutaneous approach.
047A4DZ	Dilation of left renal artery with intraluminal device, percutaneous endoscopic approach.
04753DZ	Dilation of superior mesenteric artery with intraluminal device, percutaneous approach.
04754DZ	Dilation of superior mesenteric artery with intraluminal device, percutaneous endoscopic approach.
04U03JZ	Supplement abdominal aorta with synthetic substitute, percutaneous approach.
04U04JZ	Supplement abdominal aorta with synthetic substitute, percutaneous endoscopic approach.
04V03DZ	Restriction of abdominal aorta with intraluminal device, percutaneous approach.
04V04DZ	Restriction of abdominal aorta with intraluminal device, percutaneous endoscopic approach.

For the next phase of our analysis, the procedure codes shown in the following table were designated as the less complex, less invasive procedures.

ICD–9–CM PROCEDURE CODES THAT WERE DESIGNATED AS THE LESS COMPLEX, LESS INVASIVE PROCEDURES

ICD–9–CM Procedure code	Code description
35.00	Closed heart valvotomy, unspecified valve.
35.01	Closed heart valvotomy, aortic valve.
35.02	Closed heart valvotomy, mitral valve.
35.03	Closed heart valvotomy, pulmonary valve.
35.04	Closed heart valvotomy, tricuspid valve.
37.12	Pericardiotomy.
37.24	Biopsy of pericardium.
37.31	Pericardiectomy.
37.61	Implant of pulsation balloon.
37.67	Implantation of cardiomyostimulation system.
37.91	Open chest cardiac massage.
37.99	Other operations on heart and pericardium.
38.05	Incision of vessel, other thoracic vessels.
38.06	Incision of vessel, abdominal arteries.
38.07	Incision of vessel, abdominal veins.
38.15	Endarterectomy, other thoracic vessels.
38.16	Endarterectomy, abdominal arteries.
38.35	Resection of vessel with anastomosis, other thoracic vessels.
38.36	Resection of vessel with anastomosis, abdominal arteries.
38.37	Resection of vessel with anastomosis, abdominal veins.
38.46	Resection of vessel with replacement, abdominal arteries.

ICD–9–CM PROCEDURE CODES THAT WERE DESIGNATED AS THE LESS COMPLEX, LESS INVASIVE PROCEDURES—Continued

ICD–9–CM Procedure code	Code description
38.47	Resection of vessel with replacement, abdominal veins.
38.55	Ligation and stripping of varicose veins, other thoracic vessels.
38.65	Other excision of vessels, thoracic vessels.
38.66	Other excision of vessels, abdominal arteries.
38.67	Other excision of vessels, abdominal veins.
38.85	Other surgical occlusion of vessels, thoracic vessels.
38.86	Other surgical occlusion of vessels, abdominal arteries.
38.87	Other surgical occlusion of vessels, abdominal veins.
39.0	Systemic to pulmonary artery shunt.
39.1	Intra-abdominal venous shunt.
39.21	Caval-pulmonary artery anastomosis.
39.22	Aorta-subclavian-carotid bypass.
39.23	Other intrathoracic vascular shunt or bypass.
39.25	Aorta-iliac-femoral bypass.
39.26	Other intra-abdominal vascular shunt or bypass.
39.52	Other repair of aneurysm.
39.54	Re-entry operation (aorta).
39.72	Endovascular (total) embolization or occlusion of head and neck vessels.
39.75	Endovascular embolization or occlusion of vessel(s) of head or neck using bare coils.
39.76	Endovascular embolization or occlusion of vessel(s) of head or neck using bioactive coils.
39.79	Other endovascular procedures on other vessels.

There are a number of ICD–10–PCS code translations that provide more detailed and specific information for each of the ICD–9–CM codes listed in the table immediately above that also currently group to MS–DRGs 237 and 238 in the ICD–10 MS–DRGs Version 32. The comparable ICD–10–PCS code translations for these ICD–9–CM procedure codes are shown in the following tables:

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 35.00

ICD–10–PCS Procedure code	Code description
02NF3ZZ	Release aortic valve, percutaneous approach.
02NF4ZZ	Release aortic valve, percutaneous endoscopic approach.
02NG3ZZ	Release mitral valve, percutaneous approach.
02NG4ZZ	Release mitral valve, percutaneous endoscopic approach.
02NH3ZZ	Release pulmonary valve, percutaneous approach.
02NH4ZZ	Release pulmonary valve, percutaneous endoscopic approach.
02NJ3ZZ	Release tricuspid valve, percutaneous approach.
02NJ4ZZ	Release tricuspid valve, percutaneous endoscopic approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 35.01

ICD–10–PCS Procedure code	Code description
02CF3ZZ	Extirpation of matter from aortic valve, percutaneous approach.
02CF4ZZ	Extirpation of matter from aortic valve, percutaneous endoscopic approach.
02NF3ZZ	Release aortic valve, percutaneous approach.
02NF4ZZ	Release aortic valve, percutaneous endoscopic approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 35.02

ICD–10–PCS Procedure code	Code description
02CG3ZZ	Extirpation of matter from mitral valve, percutaneous approach.
02CG4ZZ	Extirpation of matter from mitral valve, percutaneous endoscopic approach.
02NG3ZZ	Release mitral valve, percutaneous approach.
02NG4ZZ	Release mitral valve, percutaneous endoscopic approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 35.03

ICD–10–PCS Code	Code description
02CH3ZZ	Extirpation of matter from pulmonary valve, percutaneous approach.
02CH4ZZ	Extirpation of matter from pulmonary valve, percutaneous endoscopic approach.
02NH3ZZ	Release Pulmonary Valve, Percutaneous Approach.
02NH4ZZ	Release Pulmonary Valve, Percutaneous Endoscopic Approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 35.04

ICD–10–PCS Code	Code description
02CJ3ZZ	Extirpation of matter from tricuspid valve, percutaneous approach.
02CJ4ZZ	Extirpation of matter from tricuspid valve, percutaneous endoscopic approach.
02NJ3ZZ	Release tricuspid valve, percutaneous approach.
02NJ4ZZ	Release tricuspid valve, percutaneous endoscopic approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 37.12

ICD–10–PCS Code	Code description
02CN0ZZ	Extirpation of matter from pericardium, open approach.
02CN3ZZ	Extirpation of matter from pericardium, percutaneous approach.
02CN4ZZ	Extirpation of matter from pericardium, percutaneous endoscopic approach.
02HN00Z	Insertion of pressure sensor monitoring device into pericardium, open approach.
02HN02Z	Insertion of monitoring device into pericardium, open approach.
02HN30Z	Insertion of pressure sensor monitoring device into pericardium, percutaneous approach.
02HN32Z	Insertion of monitoring device into pericardium, percutaneous approach.
02HN40Z	Insertion of pressure sensor monitoring device into pericardium, percutaneous endoscopic approach.
02HN42Z	Insertion of monitoring device into pericardium, percutaneous endoscopic approach.
02NN0ZZ	Release pericardium, open approach.
02NN3ZZ	Release pericardium, percutaneous approach.
02NN4ZZ	Release pericardium, percutaneous endoscopic approach.
0W9D00Z	Drainage of pericardial cavity with drainage device, open approach.
0W9D0ZX	Drainage of pericardial cavity, open approach, diagnostic.
0W9D0ZZ	Drainage of pericardial cavity, open approach.
0WCD0ZZ	Extirpation of matter from pericardial cavity, open approach.
0WCD3ZZ	Extirpation of matter from pericardial cavity, percutaneous approach.
0WCD4ZZ	Extirpation of matter from pericardial cavity, percutaneous endoscopic approach.
0WHD03Z	Insertion of infusion device into pericardial cavity, open approach.
0WHD0YZ	Insertion of other device into pericardial cavity, open approach.
0WHD33Z	Insertion of infusion device into pericardial cavity, percutaneous approach.
0WHD3YZ	Insertion of other device into pericardial cavity, percutaneous approach.
0WHD43Z	Insertion of infusion device into pericardial cavity, percutaneous endoscopic approach.
0WHD4YZ	Insertion of other device into pericardial cavity, percutaneous endoscopic approach.
0WPD00Z	Removal of drainage device from pericardial cavity, open approach.
0WPD01Z	Removal of radioactive element from pericardial cavity, open approach.
0WPD03Z	Removal of infusion device from pericardial cavity, open approach.
0WPD0YZ	Removal of other device from pericardial cavity, open approach.
0WPD30Z	Removal of drainage device from pericardial cavity, percutaneous approach.
0WPD31Z	Removal of radioactive element from pericardial cavity, percutaneous approach.
0WPD33Z	Removal of infusion device from pericardial cavity, percutaneous approach.
0WPD3YZ	Removal of other device from pericardial cavity, percutaneous approach.
0WPD40Z	Removal of drainage device from pericardial cavity, percutaneous endoscopic approach.
0WPD41Z	Removal of radioactive element from pericardial cavity, percutaneous endoscopic approach.
0WPD43Z	Removal of infusion device from pericardial cavity, percutaneous endoscopic approach.
0WPD4YZ	Removal of other device from pericardial cavity, percutaneous endoscopic approach.
0WWD00Z	Revision of drainage device in pericardial cavity, open approach.
0WWD01Z	Revision of radioactive element in pericardial cavity, open approach.
0WWD03Z	Revision of infusion device in pericardial cavity, open approach.
0WWD0YZ	Revision of other device in pericardial cavity, open approach.
0WWD30Z	Revision of drainage device in pericardial cavity, percutaneous approach.
0WWD31Z	Revision of radioactive element in pericardial cavity, percutaneous approach.
0WWD33Z	Revision of infusion device in pericardial cavity, percutaneous approach.
0WWD3YZ	Revision of other device in pericardial cavity, percutaneous approach.
0WWD40Z	Revision of drainage device in pericardial cavity, percutaneous endoscopic approach.
0WWD41Z	Revision of radioactive element in pericardial cavity, percutaneous endoscopic approach.
0WWD43Z	Revision of infusion device in pericardial cavity, percutaneous endoscopic approach.
0WWD4YZ	Revision of other device in pericardial cavity, percutaneous endoscopic approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 37.24

ICD–10–PCS Code	Code description
02BN0ZX	Excision of pericardium, open approach, diagnostic.
02BN3ZX	Excision of pericardium, percutaneous approach, diagnostic.
02BN4ZX	Excision of pericardium, percutaneous endoscopic approach, diagnostic.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 37.31

ICD–10–PCS Code	Code description
025N0ZZ	Destruction of pericardium, open approach.
025N3ZZ	Destruction of pericardium, percutaneous approach.
025N4ZZ	Destruction of pericardium, percutaneous endoscopic approach.
02BN0ZZ	Excision of pericardium, open approach.
02BN3ZZ	Excision of pericardium, percutaneous approach.
02BN4ZZ	Excision of pericardium, percutaneous endoscopic approach.
02TN0ZZ	Resection of pericardium, open approach.
02TN3ZZ	Resection of pericardium, percutaneous approach.
02TN4ZZ	Resection of pericardium, percutaneous endoscopic approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 37.61

ICD–10–PCS Code	Code description
5A02110	Assistance with cardiac output using balloon pump, intermittent.
5A02210	Assistance with cardiac output using balloon pump, continuous.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 37.67

ICD–10–PCS Code	Code description
02QA0ZZ	Repair heart, open approach.
02QA3ZZ	Repair heart, percutaneous approach.
02QA4ZZ	Repair heart, percutaneous endoscopic approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 37.91

ICD–10–PCS Code	Code description
02QA0ZZ	Repair heart, open approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 37.99

ICD–10–PCS Code	Code description
02880ZZ	Division of conduction mechanism, open approach.
02883ZZ	Division of conduction mechanism, percutaneous approach.
02884ZZ	Division of conduction mechanism, percutaneous endoscopic approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 38.05

The comparable ICD–10–PCS code translations for ICD–9–CM procedure code 38.05 are shown in Table 6P.1b for this final rule, which is available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 38.06

ICD–10–PCS Code	Code description
04C10ZZ	Extirpation of matter from celiac artery, open approach.
04C13ZZ	Extirpation of matter from celiac artery, percutaneous approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 38.06—Continued

ICD–10–PCS Code	Code description
04C14ZZ	Extirpation of matter from celiac artery, percutaneous endoscopic approach.
04C20ZZ	Extirpation of matter from gastric artery, open approach.
04C23ZZ	Extirpation of matter from gastric artery, percutaneous approach.
04C24ZZ	Extirpation of matter from gastric artery, percutaneous endoscopic approach.
04C30ZZ	Extirpation of matter from hepatic artery, open approach.
04C33ZZ	Extirpation of matter from hepatic artery, percutaneous approach.
04C34ZZ	Extirpation of matter from hepatic artery, percutaneous endoscopic approach.
04C40ZZ	Extirpation of matter from splenic artery, open approach.
04C43ZZ	Extirpation of matter from splenic artery, percutaneous approach.
04C44ZZ	Extirpation of matter from splenic artery, percutaneous endoscopic approach.
04C50ZZ	Extirpation of matter from superior mesenteric artery, open approach.
04C53ZZ	Extirpation of matter from superior mesenteric artery, percutaneous approach.
04C54ZZ	Extirpation of matter from superior mesenteric artery, percutaneous endoscopic approach.
04C60ZZ	Extirpation of matter from right colic artery, open approach.
04C63ZZ	Extirpation of matter from right colic artery, percutaneous approach.
04C64ZZ	Extirpation of matter from right colic artery, percutaneous endoscopic approach.
04C70ZZ	Extirpation of matter from left colic artery, open approach.
04C73ZZ	Extirpation of matter from left colic artery, percutaneous approach.
04C74ZZ	Extirpation of matter from left colic artery, percutaneous endoscopic approach.
04C80ZZ	Extirpation of matter from middle colic artery, open approach.
04C83ZZ	Extirpation of matter from middle colic artery, percutaneous approach.
04C84ZZ	Extirpation of matter from middle colic artery, percutaneous endoscopic approach.
04C90ZZ	Extirpation of matter from right renal artery, open approach.
04C93ZZ	Extirpation of matter from right renal artery, percutaneous approach.
04C94ZZ	Extirpation of matter from right renal artery, percutaneous endoscopic approach.
04CA0ZZ	Extirpation of matter from left renal artery, open approach.
04CA3ZZ	Extirpation of matter from left renal artery, percutaneous approach.
04CA4ZZ	Extirpation of matter from left renal artery, percutaneous endoscopic approach.
04CB0ZZ	Extirpation of matter from inferior mesenteric artery, open approach.
04CB3ZZ	Extirpation of matter from inferior mesenteric artery, percutaneous approach.
04CB4ZZ	Extirpation of matter from inferior mesenteric artery, percutaneous endoscopic approach.
04CC0ZZ	Extirpation of matter from right common iliac artery, open approach.
04CC3ZZ	Extirpation of matter from right common iliac artery, percutaneous approach.
04CC4ZZ	Extirpation of matter from right common iliac artery, percutaneous endoscopic approach.
04CD0ZZ	Extirpation of matter from left common iliac artery, open approach.
04CD3ZZ	Extirpation of matter from left common iliac artery, percutaneous approach.
04CD4ZZ	Extirpation of matter from left common iliac artery, percutaneous endoscopic approach.
04CE0ZZ	Extirpation of matter from right internal iliac artery, open approach.
04CE3ZZ	Extirpation of matter from right internal iliac artery, percutaneous approach.
04CE4ZZ	Extirpation of matter from right internal iliac artery, percutaneous endoscopic approach.
04CF0ZZ	Extirpation of matter from left internal iliac artery, open approach.
04CF3ZZ	Extirpation of matter from left internal iliac artery, percutaneous approach.
04CF4ZZ	Extirpation of matter from left internal iliac artery, percutaneous endoscopic approach.
04CH0ZZ	Extirpation of matter from right external iliac artery, open approach.
04CH3ZZ	Extirpation of matter from right external iliac artery, percutaneous approach.
04CH4ZZ	Extirpation of matter from right external iliac artery, percutaneous endoscopic approach.
04CJ0ZZ	Extirpation of matter from left external iliac artery, open approach.
04CJ3ZZ	Extirpation of matter from left external iliac artery, percutaneous approach.
04CJ4ZZ	Extirpation of matter from left external iliac artery, percutaneous endoscopic approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 38.07

ICD–10–PCS Code	Code description
06C00ZZ	Extirpation of matter from inferior vena cava, open approach.
06C03ZZ	Extirpation of matter from inferior vena cava, percutaneous approach.
06C04ZZ	Extirpation of matter from inferior vena cava, percutaneous endoscopic approach.
06C10ZZ	Extirpation of matter from splenic vein, open approach.
06C13ZZ	Extirpation of matter from splenic vein, percutaneous approach.
06C14ZZ	Extirpation of matter from splenic vein, percutaneous endoscopic approach.
06C20ZZ	Extirpation of matter from gastric vein, open approach.
06C23ZZ	Extirpation of matter from gastric vein, percutaneous approach.
06C24ZZ	Extirpation of matter from gastric vein, percutaneous endoscopic approach.
06C40ZZ	Extirpation of matter from hepatic vein, open approach.
06C43ZZ	Extirpation of matter from hepatic vein, percutaneous approach.
06C44ZZ	Extirpation of matter from hepatic vein, percutaneous endoscopic approach.
06C50ZZ	Extirpation of matter from superior mesenteric vein, open approach.
06C53ZZ	Extirpation of matter from superior mesenteric vein, percutaneous approach.
06C54ZZ	Extirpation of matter from superior mesenteric vein, percutaneous endoscopic approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 38.07—Continued

ICD–10–PCS Code	Code description
06C60ZZ	Extirpation of matter from inferior mesenteric vein, open approach.
06C63ZZ	Extirpation of matter from inferior mesenteric vein, percutaneous approach.
06C64ZZ	Extirpation of matter from inferior mesenteric vein, percutaneous endoscopic approach.
06C70ZZ	Extirpation of matter from colic vein, open approach.
06C73ZZ	Extirpation of matter from colic vein, percutaneous approach.
06C74ZZ	Extirpation of matter from colic vein, percutaneous endoscopic approach.
06C80ZZ	Extirpation of matter from portal vein, open approach.
06C83ZZ	Extirpation of matter from portal vein, percutaneous approach.
06C84ZZ	Extirpation of matter from portal vein, percutaneous endoscopic approach.
06C90ZZ	Extirpation of matter from right renal vein, open approach.
06C93ZZ	Extirpation of matter from right renal vein, percutaneous approach.
06C94ZZ	Extirpation of matter from right renal vein, percutaneous endoscopic approach.
06CB0ZZ	Extirpation of matter from left renal vein, open approach.
06CB3ZZ	Extirpation of matter from left renal vein, percutaneous approach.
06CB4ZZ	Extirpation of matter from left renal vein, percutaneous endoscopic approach.
06CC0ZZ	Extirpation of matter from right common iliac vein, open approach.
06CC3ZZ	Extirpation of matter from right common iliac vein, percutaneous approach.
06CC4ZZ	Extirpation of matter from right common iliac vein, percutaneous endoscopic approach.
06CD0ZZ	Extirpation of matter from left common iliac vein, open approach.
06CD3ZZ	Extirpation of matter from left common iliac vein, percutaneous approach.
06CD4ZZ	Extirpation of matter from left common iliac vein, percutaneous endoscopic approach.
06CF0ZZ	Extirpation of matter from right external iliac vein, open approach.
06CF3ZZ	Extirpation of matter from right external iliac vein, percutaneous approach.
06CF4ZZ	Extirpation of matter from right external iliac vein, percutaneous endoscopic approach.
06CG0ZZ	Extirpation of matter from left external iliac vein, open approach.
06CG3ZZ	Extirpation of matter from left external iliac vein, percutaneous approach.
06CG4ZZ	Extirpation of matter from left external iliac vein, percutaneous endoscopic approach.
06CH0ZZ	Extirpation of matter from right hypogastric vein, open approach.
06CH3ZZ	Extirpation of matter from right hypogastric vein, percutaneous approach.
06CH4ZZ	Extirpation of matter from right hypogastric vein, percutaneous endoscopic approach.
06CJ0ZZ	Extirpation of matter from left hypogastric vein, open approach.
06CJ3ZZ	Extirpation of matter from left hypogastric vein, percutaneous approach.
06CJ4ZZ	Extirpation of matter from left hypogastric vein, percutaneous endoscopic approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 38.15

ICD–10–PCS Code	Code description
02CP0ZZ	Extirpation of matter from pulmonary trunk, open approach.
02CP3ZZ	Extirpation of matter from pulmonary trunk, percutaneous approach.
02CP4ZZ	Extirpation of matter from pulmonary trunk, percutaneous endoscopic approach.
02CQ0ZZ	Extirpation of matter from right pulmonary artery, open approach.
02CQ3ZZ	Extirpation of matter from right pulmonary artery, percutaneous approach.
02CQ4ZZ	Extirpation of matter from right pulmonary artery, percutaneous endoscopic approach.
02CR0ZZ	Extirpation of matter from left pulmonary artery, open approach.
02CR3ZZ	Extirpation of matter from left pulmonary artery, percutaneous approach.
02CR4ZZ	Extirpation of matter from left pulmonary artery, percutaneous endoscopic approach.
02CS0ZZ	Extirpation of matter from right pulmonary vein, open approach.
02CS3ZZ	Extirpation of matter from right pulmonary vein, percutaneous approach.
02CS4ZZ	Extirpation of matter from right pulmonary vein, percutaneous endoscopic approach.
02CT0ZZ	Extirpation of matter from left pulmonary vein, open approach.
02CT3ZZ	Extirpation of matter from left pulmonary vein, percutaneous approach.
02CT4ZZ	Extirpation of matter from left pulmonary vein, percutaneous endoscopic approach.
02CV0ZZ	Extirpation of matter from superior vena cava, open approach.
02CV3ZZ	Extirpation of matter from superior vena cava, percutaneous approach.
02CV4ZZ	Extirpation of matter from superior vena cava, percutaneous endoscopic approach.
03C00ZZ	Extirpation of matter from right internal mammary artery, open approach.
03C03ZZ	Extirpation of matter from right internal mammary artery, percutaneous approach.
03C04ZZ	Extirpation of matter from right internal mammary artery, percutaneous endoscopic approach.
03C10ZZ	Extirpation of matter from left internal mammary artery, open approach.
03C13ZZ	Extirpation of matter from left internal mammary artery, percutaneous approach.
03C14ZZ	Extirpation of matter from left internal mammary artery, percutaneous endoscopic approach.
03C20ZZ	Extirpation of matter from innominate artery, open approach.
03C23ZZ	Extirpation of matter from innominate artery, percutaneous approach.
03C24ZZ	Extirpation of matter from innominate artery, percutaneous endoscopic approach.
03C30ZZ	Extirpation of matter from right subclavian artery, open approach.
03C33ZZ	Extirpation of matter from right subclavian artery, percutaneous approach.
03C34ZZ	Extirpation of matter from right subclavian artery, percutaneous endoscopic approach.
03C40ZZ	Extirpation of matter from left subclavian artery, open approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 38.15—Continued

ICD–10–PCS Code	Code description
03C43ZZ	Extirpation of matter from left subclavian artery, percutaneous approach.
03C44ZZ	Extirpation of matter from left subclavian artery, percutaneous endoscopic approach.

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 38.16

The comparable ICD–10–PCS code translations for ICD–9–CM procedure code 38.16 are shown in Table 6P.1c for this final rule, which is available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html.*

ICD–10–PCS CODE TRANSLATIONS FOR ICD–9–CM PROCEDURE CODE 38.35

ICD–10–PCS Code	Code description
02BP0ZZ	Excision of pulmonary trunk, open approach.
02BP4ZZ	Excision of pulmonary trunk, percutaneous endoscopic approach.
02BQ0ZZ	Excision of right pulmonary artery, open approach.
02BQ4ZZ	Excision of right pulmonary artery, percutaneous endoscopic approach.
02BR0ZZ	Excision of left pulmonary artery, open approach.
02BR4ZZ	Excision of left pulmonary artery, percutaneous endoscopic approach.
02BS0ZZ	Excision of right pulmonary vein, open approach.
02BS4ZZ	Excision of right pulmonary vein, percutaneous endoscopic approach.
02BT0ZZ	Excision of left pulmonary vein, open approach.
02BT4ZZ	Excision of left pulmonary vein, percutaneous endoscopic approach.
02BV0ZZ	Excision of superior vena cava, open approach.
02BV4ZZ	Excision of superior vena cava, percutaneous endoscopic approach.
03B00ZZ	Excision of right internal mammary artery, open approach.
03B04ZZ	Excision of right internal mammary artery, percutaneous endoscopic approach.
03B10ZZ	Excision of left internal mammary artery, open approach.

As previously stated, we separated the more complex, more invasive procedures from the less complex, less invasive procedures to continue our evaluation of the procedures assigned to MS–DRGs 237 and 238. Our data analysis showed that the distribution of cases, the average length of stay, and average costs of the more complex, more invasive aortic and heart assist procedures and the less complex, less invasive other cardiovascular procedures would be more appropriately reflected if we classified these distinguishing types of procedures under newly created MS–DRGs, as reflected in the table below.

MAJOR CARDIOVASCULAR PROCEDURES WITH AND WITHOUT MCC

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRGs 237 and 238—Combined	50,567	5.8	$29,174
MS–DRGs 237 and 238—Cases with more complex, more invasive procedure codes (37.41; 37.49; 37.55; 37.64; 38.04; 38.14; 38.34; 38.44; 38.64; 38.84; 39.24; 39.71, and 39.78)	22,278	4.0	31,729
MS–DRGs 237 and 238—Cases with less complex, less invasive procedure codes (35.00; 35.01; 35.02; 35.03; 35.04; 37.12; 37.24; 37.31; 37.61; 37.67; 37.91; 37.99; 38.05; 38.06; 38.07; 38.15; 38.16; 38.35; 38.36; 38.37; 38.46; 38.47; 38.55; 38.65; 38.66; 38.67; 38.85; 38.86; 38.87; 39.0; 39.1; 39.21; 39.22; 39.23; 39.25; 39.26; 39.52; 39.54; 39.72; 39.75; 39.76; and 39.79)	28,289	7.1	27,162

Our clinical advisors reviewed the results of the analysis and agreed that distinguishing the more complex, more invasive procedures from the less complex, less invasive procedures would result in improved clinical coherence for the various cardiovascular procedures currently assigned to MS–DRGs 237 and 238, as listed previously. Therefore, for FY 2016, we proposed to delete MS–DRGs 237 and 238. When we applied our established criteria to determine if the creation of a new CC or MCC subgroup within a base MS–DRG is warranted, we determined that a 2-way severity level split (with MCC and without MCC) was justified. Therefore, we proposed to create two new MS–DRGs that would contain the more complex, more invasive aortic and heart assist procedures currently assigned to MS–DRGs 237 and 238, as listed previously. We proposed to create MS–DRG 268, entitled ''Aortic and Heart Assist Procedures Except Pulsation Balloon with MCC,'' and MS–DRG 269, entitled ''Aortic and Heart Assist Procedures Except Pulsation Balloon without MCC.'' The table below shows the distribution of cases and the average length of stay and average costs of the more complex, more invasive procedures for aortic and heart assistance for the proposed new MS–DRGs 268 and 269.

PROPOSED NEW MS–DRGS FOR AORTIC AND HEART ASSIST PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
Proposed New MS–DRG 268 with MCC	4,182	10.03	$45,996
Proposed New MS–DRG 269 without MCC	18,096	2.68	28,431

We invited public comments on this proposal and the ICD–10–PCS code translations for these procedures shown earlier in this section, which we also proposed to assign to proposed new MS–DRGs 268 and 269.

In addition, when we further applied our established criteria to determine if the creation of a new CC or MCC subgroup for the remaining procedures was warranted, we determined that a 3-way severity level split (with MCC, with CC, and without CC/MCC) was justified. Therefore, we proposed to create three new MS–DRGs that would contain the remaining cardiovascular procedures that were designated as the less complex, less invasive procedures, as listed previously. For FY 2016, we proposed to create MS–DRG 270, entitled ''Other Major Cardiovascular Procedures with MCC''; MS–DRG 271, entitled ''Other Major Cardiovascular Procedures with CC''; and MS–DRG 272, entitled ''Other Major Cardiovascular Procedures without CC/MCC,'' and to assign the less complex, less invasive cardiovascular procedures shown earlier in this section to these proposed new MS–DRGs. We believed that, as shown in the table below, the distribution of cases and average length of stay and average costs of these procedures would be more appropriately reflected when these types of procedures are classified under these proposed new MS–DRGs.

PROPOSED NEW MS–DRGS FOR OTHER MAJOR CARDIOVASCULAR PROCEDURES

MS–DRG	Number of cases	Average length of stay	Average costs
Proposed New MS–DRG 270 with MCC	14,158	9.3	$33,507
Proposed New MS–DRG 271 with CC	9,648	5.99	22,800
Proposed New MS–DRG 272 without CC/MCC	4,483	3.08	16,438

We invited public comments on this proposal and the ICD–10–PCS code translations for the less complex, less invasive cardiovascular procedures shown earlier in this section, which we also proposed to assign to proposed new MS–DRGs 270, 271, and 272.

In summary, for FY 2016, we proposed to delete MS–DRGs 237 and 238, and to create the following five new MS–DRGs:

- Proposed new MS–DRG 268 (Aortic and Heart Assist Procedures Except Pulsation Balloon with MCC);
- Proposed new MS–DRG 269 (Aortic and Heart Assist Procedures Except Pulsation Balloon without MCC);
- Proposed new MS–DRG 270 (Other Major Cardiovascular Procedures with MCC);
- Proposed new MS–DRG 271 (Other Major Cardiovascular Procedures with CC); and
- Proposed new MS–DRG 272 (Other Major Cardiovascular Procedures without CC/MCC).

We also proposed to assign the more complex, more invasive cardiovascular procedures identified in our analysis and the ICD–10–PCS code translations to proposed new MS–DRGs 268 and 269. In addition, we proposed to assign the less complex, less invasive cardiovascular procedures identified in our analysis and the ICD–10–PCS code translations to proposed new MS–DRGs 270, 271, and 272. We encouraged public comments on our proposal to create these proposed new MS–DRGs, as well as the ICD–10–PCS code translations that we proposed to assign to the corresponding proposed new MS–DRGs.

Comment: Several commenters supported the proposal to delete MS–DRGs 237 and 238 and to create five new proposed MS–DRGs 268, 269, 270, 271, and 272 to distinguish the more complex, more invasive procedures from the less complex, less invasive procedures resulting in improved clinical coherence for the various cardiovascular procedures currently assigned to MS–DRGs 237 and 238. Commenters stated that the proposal was reasonable, given the data and information provided.

One commenter who supported the creation of proposed new MS–DRGs 268 and 269 expressed additional support with regard to how these proposed new MS–DRGs would incorporate selected high resource surgical aortic and visceral vessel procedures, as well as selected high resource extra-cardiac procedures. The commenter agreed that, in terms of resource utilization and clinical coherency, the procedures included would be classified appropriately to the proposed new MS–DRGs. However, this commenter requested clarification on some of the ICD–10–PCS code translations that were listed for ICD–9–CM procedure code 39.78 (Endovascular implantation of branching or fenestrated graft(s) in aorta). The commenter stated that, as displayed in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24363), the dilation of right and left renal arteries and the superior mesenteric artery (procedures described by ICD–10–PCS codes 04793DZ through 04754DZ) also appear to be proposed for grouping to proposed MS–DRGs 268 and 269. The commenter believed that CMS did not intend to classify those dilation codes as ''stand alone'' procedures that would be assigned to proposed new MS–DRGs 268 and 269. The commenter stated that the ICD–10–PCS dilation codes should not be necessary as translations for ICD–9–CM procedure code 39.78.

Another commenter commended CMS on the timing of the proposal to establish proposed new MS–DRGs 268 and 269. The commenter stated that this proposal will allow patients requiring fenestrated grafts continued access to care in FY 2016, as the new-technology add-on payment for the Zenith Fenestrated Graft device is expiring September 30, 2015. The commenter also stated that, currently, there is not an appropriate mechanism to ensure access to these procedures, especially in rural hospitals, and that this proposal would change that.

Other commenters stated that the proposed new MS–DRGs would better recognize clinical homogeneity and

resource requirements for the range of major cardiovascular procedures.

Response: We appreciate the commenters' support of our proposal to delete MS–DRGs 237 and 238 and to create proposed new MS–DRGs 268 through 272.

In response to the comment requesting clarification on some of the ICD–10–PCS code translations that were listed for ICD–9–CM procedure code 39.78, the commenter is correct. It was not our intent to classify those dilation codes (ICD–10–PCS codes 04793DZ through 04754DZ) as ''stand alone'' procedures that would be assigned to proposed new MS–DRGs 268 and 269. Rather, we proposed those codes for consideration as supplemental codes to more fully describe the procedure performed. We agree with the commenter that these dilation codes are not necessary translations for ICD–9–CM procedure code 39.78 and as ''stand alone'' procedures they would be assigned to their own separate and clinically appropriate ICD–10 MS–DRG.

As we reviewed the translations for ICD–9–CM procedure code 39.78 in response to the commenter's request, we reviewed all the comparable ICD–10–PCS code translations that we proposed to assign to proposed new MS–DRGs 268 through 272. Specifically, we reviewed the list of the more complex, more invasive procedures that we proposed to assign to proposed MS–DRGs 268 and 269 and the list of the less complex, less invasive procedures that we proposed to assign to proposed MS–DRGs 270 through 272. We determined that the ICD–10–PCS translations for ICD–9–CM procedure code 37.49 (Other repair of heart and pericardium) as displayed in Table 6P.1a of the proposed rule were not complete. There was an inadvertent omission of an additional 78 ICD–10–PCS comparable code translations. Therefore, we are providing an updated Table 6P for this final rule, which is available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*. We note that this list of ICD–10–PCS code translations for ICD–9–CM procedure code 37.49 is consistent with the list of possible code translations found in the General Equivalency Maps (GEMs) files provided for public use available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/index.html*.

In conducting this review, our clinical advisors also determined that ICD–9–CM procedure code 37.49 and the corresponding ICD–10–PCS comparable code translations would be more appropriately classified under proposed new MS–DRGs 270 through 272 versus proposed new MS–DRGs 268 and 269. This decision is consistent with our proposal to assign less invasive procedures, such as pericardiotomies and pulsation balloon implants, to proposed new MS–DRGs 270 through 272. This procedure code captures procedures that are similar to the other procedures included in the proposal for MS–DRGs 270 through 272 involving the pericardium such as ICD–9–CM procedure codes 37.12 (Pericardiotomy), 37.24 (Biopsy of pericardium) and 37.61 (Pericardiectomy) and does not relate to the more complex, more invasive aortic and heart assist procedures that we proposed to assign to proposed MS–DRGs 268 and 269. According to our clinical advisors, the ICD–10–PCS code translations for ICD–9–CM procedure code 37.49 also do not constitute the level of complexity or resources similar to the other procedures that we proposed to assign to proposed new MS–DRGs 268 and 269. In addition, our clinical advisors determined that ICD–9–CM procedure code 39.54 (Re-entry operation (aorta)) and the corresponding ICD–10–PCS comparable code translations would be more appropriately classified under proposed new MS–DRGs 268 through 269 versus proposed new MS–DRGs 270 through 272. This decision is consistent with our proposal to assign more invasive procedures, such as open and endovascular repairs of the aorta with replacement grafts, to proposed new MS–DRGs 268 and 269. According to our clinical advisors, the procedure described by ICD–9–CM procedure code 39.54 and the comparable ICD–10–PCS code translations are precisely indicated for the aorta, and, as such, the procedure code belongs under proposed new MS–DRGs 268 and 269 along with the other aorta and heart assist procedures.

Comment: One commenter requested clarification on certain ICD–10–PCS code translations for proposed new MS–DRGs 268 through 272 and how they relate to the General Equivalency Maps (GEMs) and ICD–10–PCS to ICD–9–CM Reimbursement Mappings files. The commenter noted that there were instances where more than one ICD–9–CM procedure code could be translated to an ICD–10–PCS code that was included in the proposed new MS–DRGs, as well as listed in the Reimbursement Mappings file. The commenter submitted an example where ICD–10–PCS code 04V00DZ (Restriction of abdominal aorta with intraluminal device, open approach) was listed as a comparable ICD–10–PCS translation for ICD–9–CM procedure code 39.52 (Other repair of aneurysm) in the proposal for proposed new MS–DRGs 270 through 272. However, the commenter stated that, in the FY 2015 Reimbursement Mappings file, this same ICD–10–PCS code (04V00DZ) was shown to map to ICD–9–CM procedure code 39.71 (Endovascular implantation of other graft in abdominal aorta), which was included in the proposal for proposed new MS–DRGs 268 and 269. The commenter asked if the FY 2016 Reimbursement Mappings file would be updated to reflect that ICD–10–PCS code 04V00DZ maps back to ICD–9–CM procedure code 39.52.

Response: We acknowledge and appreciate the commenter's request for clarification. We point out that the General Equivalence Mappings (GEMs) and Reimbursement Mappings files were developed as resources for the public and are updated separate from the IPPS rulemaking. The GEMs were developed to provide users with a code to code translation reference tool for both ICD–9–CM and ICD–10 codes sets and to offer acceptable translation alternatives where possible. The Reimbursement Mappings were created to provide a temporary mechanism for mapping records containing ICD–10 codes to ''MS–DRG reimbursement minimum impact'' ICD–9–CM codes and allow claims processing by legacy systems while systems were being converted to process ICD–10 claims directly. The GEMs have been updated on an annual basis as part of the ICD–10 Coordination and Maintenance Committee meetings process and will continue to be updated for approximately 3 years after ICD–10 is implemented. We refer readers to the ICD–10 Coordination and Maintenance Committee Meeting Materials for further information related to discussion of GEMs updates, which can be found on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/ICD-9-CM-C-and-M-Meeting-Materials.html*. The Reimbursement Mappings have been updated on an annual basis in preparation for the transition to ICD–10 implementation. As stated on the CMS ICD–10 Coordination and Maintenance Committee Meeting Web page available on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/2016-ICD-10-PCS-and-GEMs.html*, the FY 2016 Reimbursement Mappings files will be posted in August 2015.

Comment: One commenter who supported proposed new MS–DRGs 268 and 269 requested that CMS revise the

titles to address concerns expressed by stakeholders. According to the commenter, the proposed titles have caused confusion among providers and consultants. The commenter suggested that CMS consider the following three modifications:

- Indicate that MS–DRGs 268 and 269 are aortic procedures, not aortic heart assist devices;
- Indicate that MS–DRGs 268 and 269 are assigned to heart assist removal or repair, and not the multitude of other heart assist insertion procedures not addressed in the proposed rule; and
- Remove the reference to pulsation balloon insertion, or add the reference to proposed new MS–DRGs 270 through 272 (Other Major Cardiovascular Procedures with MCC, with CC and without CC/MCC, respectively).

The commenter noted that the titles for proposed new MS–DRGs 268 and 269 contain the phrase ''Heart Assist Procedures''. However, the commenter stated that not *all* heart assist procedures are proposed to be assigned to these MS–DRGs; essentially, it is only the removal of heart assist procedures codes that are included. The commenter further noted that other heart assist procedures such as insertion of heart assist devices are identified in several other MS–DRGs, such as MS–DRGs 001 and 002 (Heart Transplant or Implant of Heart Assist System w MCC and without MCC, respectively) and that external heart assist devices are identified in MS–DRG 215 (Other Heart Assist System Implant), while heart assist devices inserted percutaneously with cardiac catheterization are identified in MS–DRGs 216 through 218 (Cardiac Valve & Other Major Cardiothoracic Procedures with Cardiac Catheterization with MCC, with CC and without CC/MCC, respectively).

The commenter also stated that the reference to ''Except Pulsation Balloon'' in the titles for proposed new MS–DRGs 268 and 269 indicates that *all* aortic and heart assist procedures would be included *except* pulsation balloon. The commenter asserted that the titles could cause confusion for stakeholders because there are other procedures that are nonpulsation balloon, heart assist procedures that correspond to the titles for proposed new MS–DRGs 268 and 269 and are assigned to other MS–DRGs. The commenter requested that CMS delete the terminology of pulsation balloon completely or remove it from proposed new MS–DRGs 268 and 269 and add it to proposed new MS–DRGs 270 through 272. The commenter maintained that incorporating the reference to pulsation balloon into proposed new MS–DRGs 270 through 272 would afford a clearer understanding of the procedures that are assigned for providers.

The commenter provided suggestions for the revision to the titles that CMS should take into consideration for proposed new MS–DRGs 268 through 272 as follows:

- Suggested retitle of proposed new MS–DRG 268: ''Aortic Procedures and Heart Assist Removal or Repair with MCC'';
- Suggested retitle of proposed new MS–DRG 269: ''Aortic Procedures and Heart Assist Removal or Repair without MCC'';
- Suggested retitle of proposed new MS–DRG 270: ''Pulsation Balloon and Other Major Cardiovascular Procedures with MCC'';
- Suggested retitle of proposed new MS–DRG 271: ''Pulsation Balloon and Other Major Cardiovascular Procedures with CC''; and
- Suggested retitle of proposed new MS–DRG 272: ''Pulsation Balloon and Other Major Cardiovascular Procedures without CC/MCC''.

Response: We acknowledge the commenter's request to consider revisions to the titles for proposed new MS–DRGs 268 through 272. However, we note that we did not receive any other comments from stakeholders expressing confusion with regard to the titles for these proposed new MS–DRGs or the assignment of heart assist procedures.

The commenter is correct that not *all* heart assist procedures are being proposed for assignment to proposed new MS–DRGs 268 and 269. As the commenter pointed out, there are other heart assist procedures that group to various MS–DRGs. The proposal was based on ICD–9–CM procedure codes that are currently assigned to MS–DRGs 237 and 238 and the corresponding ICD–10–PCS code translations for proposed new MS–DRGs 268 through 272. We believe that stakeholders understand that the MS–DRG system is a classification scheme consisting of clinically similar groups of patients with similar resource intensity, and that while the titles of the MS–DRGs reflect the category of procedures which may or may not be assigned to a particular MS–DRG, they do not specifically identify the details of each applicable procedure code. We also believe that stakeholders do not rely solely on the MS–DRG titles to determine what procedures are assigned to a particular MS–DRG. Rather, they would consult the MS–DRG Definitions Manual. The MS–DRG Definitions Manual contains the complete documentation of the MS–DRG GROUPER logic and is available from 3M/HIS, which, under contract with CMS, is responsible for updating and maintaining the GROUPER program. As discussed in the FY 2015 IPPS/LTCH PPS final rule (79 FR 49905 through 49906), the MS–DRG Definitions Manual, Version 32, which includes the FY 2015 MS–DRG changes is available on a CD for $225. This manual may be obtained by writing 3M/HIS at the following address: 100 Barnes Road, Wallingford, CT 06492; or by calling (203) 949–0303; or by obtaining an order form at the Web site at: *http://www/3MHIS.com*. In addition, as discussed in section II.G.1.a. of this final rule, in November 2014, CMS made available a Definitions Manual of the ICD–10 MS–DRGs Version 32 on the ICD–10 MS–DRG Conversion Project Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*. Accordingly, we do not believe that the reference to ''Heart Assist Procedures'' in the title for proposed new MS–DRGs 268 and 269 would create confusion.

For this same reason, we also do not believe that including the reference to ''*except* pulsation balloon'' in the titles for proposed new MS–DRGs 268 and 269, to accurately reflect that the pulsation balloon procedure is not assigned to those MS–DRGs, necessarily indicates that all other aortic and heart assist procedures are included. We would expect stakeholders to consult the MS–DRG Definitions Manual as described above to identify and determine whether a particular procedure is assigned to MS–DRG 268 or 269 or to another MS–DRG, rather than relying on the MS–DRGs title alone.

After consideration of the public comments received, we are adopting as final our proposal to delete ICD–9–CM MS–DRGs 237 and 238 and add the following five new MS–DRGs to ICD–10 MS–DRGs Version 33:

- MS–DRG 268 (Aortic and Heart Assist Procedures Except Pulsation Balloon with MCC);
- MS–DRG 269 (Aortic and Heart Assist Procedures Except Pulsation Balloon without MCC);
- MS–DRG 270 (Other Major Cardiovascular Procedures with MCC);
- MS–DRG 271 (Other Major Cardiovascular Procedures with CC); and
- MS–DRG 272 (Other Major Cardiovascular Procedures without CC/MCC)

We agree that these modifications will more appropriately reflect payment while recognizing differences in complexity, resources and severity of illness for the various cardiovascular

procedures. These finalized ICD–10 MS–DRGs will include the updated assignments discussed above related to the ICD–10–PCS code translations for ICD–9–CM codes 37.49 (Other repair of heart and pericardium) and 39.54 (Re-entry operation (aorta)). We also refer readers to the updated Table 6P for this final rule which is available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*. Lastly, we will consider if further modifications to the titles of these MS–DRGs are warranted in future rulemaking.

4. MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue)

a. Revision of Hip or Knee Replacements: Proposed Revision of ICD–10–PCS Version 32 Logic

We received two comments that the logic for ICD–10 MS–DRGs Version 32 does not work the same as it does for the ICD–9–CM based MS–DRGs Version 32 for procedures involving joint revisions. One of the commenters requested that CMS change the MS–DRG structure for procedures involving joint revisions within the ICD–10 MS–DRGs 466, 467, and 468 (Revision of Hip or Knee Replacement with MCC, with CC, and without CC/MCC, respectively) so that cases that have a spacer removed prior to the insertion of a new joint prosthesis are assigned to MS–DRG 466, 467, and 468, as is the case with the ICD–9–CM MS–DRGs. The other commenter asked that joint revision cases that involve knee revisions with cemented and uncemented qualifiers be assigned to these MS–DRGs. This commenter provided an example of a patient admitted for a knee revision and reported under ICD–10–PCS codes 0SPD0JZ (Removal of synthetic substitute from left knee joint, open approach) and 0SRU0JA (Replacement of left knee joint, femoral surface with synthetic substitute, uncemented, open approach), which should be assigned to MS–DRGs 466, 467, and 468. The requestor stated that joint revision cases reported with ICD–9–CM codes are assigned to MS–DRGs 466, 467, and 468, but similar cases reported with the corresponding ICD–10–PCS codes are not assigned to MS–DRGs 466, 467, and 468 in ICD–10–PCS MS–DRGs Version 32.

We agree that joint revision cases involving the removal of a spacer and subsequent insertion of a new joint prosthesis should be assigned to ICD–10 MS–DRGs 466, 467, and 468 as is the case currently with the ICD–9–CM based MS–DRGs Version 32. We also agree that knee revision cases that involve cemented and uncemented qualifiers should be assigned to ICD–10 MS–DRGs 466, 467, and 468. Knee revision cases currently reported with ICD–9–CM codes are assigned to MS–DRGs 466, 467, and 468 in the ICD–9–CM based MS–DRGs. We examined joint revision combination codes that are not currently assigned to MS–DRGs 466, 467, and 468 in ICD–10 MS–DRGs Version 32 and identified additional combinations that also should be included so that the joint revision ICD–10 MS–DRGs would have the same logic as the ICD–9–CM MS–DRGs. In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24379 through 24395), we proposed to add code combinations listed in a table in the proposed rule that would capture the joint revisions to the Version 33 MS–DRG structure for ICD–10 MS–DRGs 466, 467, and 468 that we proposed to implement effective October 1, 2015. We invited public comments on our proposal to add the joint revision code combinations to MS–DRGs 466, 467, and 468 that were listed in the table in the proposed rule (80 FR 24379 through 24395).

Comment: A number of commenters supported the proposal to add the joint revision code combinations to MS–DRGs 466, 467, and 468. The commenters stated that the proposal was reasonable, given the data and information provided. One commenter commended CMS for its careful review of these code pairs for hip and knee revision cases and supported the proposed updates. Another commenter supported the proposed MS–DRG assignment changes which the commenter believed would help to ensure that the ICD–10 MS–DRGs capture the appropriate ICD–10 procedure codes. One commenter stated that the proposed MS–DRG assignment changes improve alignment of these cases under the ICD–10 framework.

Response: We appreciate the commenters' support for our proposal.

After consideration of the public comments we received, we are finalizing our proposal to add code combinations which capture the joint revision procedures set forth in the table below to the Version 33 MS–DRG structure for ICD–10 MS–DRGs 466, 467, and 468 that will be implemented effective October 1, 2015. We note that joint revision procedures are also included in the ICD–9–CM version of MS–DRGs 628, 629, and 630 (Other Endocrine, Nutritional, and Metabolic Operating Room Procedures with MCC, with CC, and without CC/MCC, respectively). Therefore, to ensure that the joint revision ICD–10 MS–DRGs would have the same logic as the ICD–9–CM MS–DRGs, any updates to the joint revision combinations would apply to MS–DRGs 466, 467, and 468 as well as MS–DRGs 628, 629, and 630 because both sets of MS–DRGs contain the same joint revision codes. These comparable joint revisions combinations updates also will be made to MS–DRGs 628, 629, and 630 in the Version 33 MS–DRG structure for ICD–10 to maintain consistency with the logic for the ICD–9–CM MS–DRGs, effective October 1, 2015. Therefore, the joint revision combination codes that we are finalizing in this final rule are the same for MS–DRGs 466, 467, 468, 628, 629, and 630 and are reflected in the updated table below.

MS–DRGs 466–468 and 628–630 ICD–10–PCS Code Pairs Added to the Version 33 ICD–10 MS–DRGs 466, 467, 468, 628, 629, and 630: New Hip Revision ICD–10–PCS Combinations

ICD–10–PCS code	Code description		ICD–10–PCS code	Code description
0SP908Z	Removal of spacer from right hip joint, open approach.	and	0SR9019	Replacement of right hip joint with metal synthetic substitute, cemented, open approach.
0SP908Z	Removal of spacer from right hip joint, open approach.	and	0SR901A	Replacement of right hip joint with metal synthetic substitute, uncemented, open approach.
0SP908Z	Removal of spacer from right hip joint, open approach.	and	0SR901Z	Replacement of right hip joint with metal synthetic substitute, open approach.
0SP908Z	Removal of spacer from right hip joint, open approach.	and	0SR9029	Replacement of right hip joint with metal on polyethylene synthetic substitute, cemented, open approach.

MS–DRGs 466–468 AND 628–630 ICD–10–PCS CODE PAIRS ADDED TO THE VERSION 33 ICD–10 MS–DRGs 466, 467, 468, 628, 629, AND 630: NEW HIP REVISION ICD–10–PCS COMBINATIONS—Continued

b. Spinal Fusion

We received a request to revise the titles of MS–DRGs 456, 457, and 458 (Spinal Fusion Except Cervical with Spinal Curvature/Malignancy/Infection or 9+ Fusion with MCC, with CC, and without CC/MCC, respectively) for the ICD–10 MS–DRGs so that they more closely correspond to the terminology used to describe the ICD–10–PCS procedure codes without changing the ICD–10 MS–DRG logic. We agree with the requestor that revising the titles of these MS–DRGs would more appropriately identify the procedures classified under these groupings. Therefore, in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24395), we proposed new titles for these three MS–DRGs that would change the reference of ''9+ Fusions'' to ''Extensive Fusions.''

We invited public comments on our proposal.

Comment: Several commenters supported the proposal to modify the titles for ICD–10 MS–DRGs 456 through 458. The commenters stated that the proposal was reasonable, given the data and information provided.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to modify the titles for ICD–10 MS–DRGs 456 through 458. The final title revisions to MS–DRGs 456, 457, and 458 for the FY 2016 ICD–10 MS–DRGs Version 33 are as follows:

- MS–DRG 456 (Spinal Fusion Except Cervical with Spinal Curvature/Malignancy/Infection or Extensive Fusion with MCC);
- MS–DRG 457 (Spinal Fusion Except Cervical with Spinal Curvature/Malignancy/Infection or Extensive Fusion with CC); and
- MS–DRG 458 (Spinal Fusion Except Cervical with Spinal Curvature/Malignancy/Infection or Extensive Fusion without CC/MCC).

5. MDC 14 (Pregnancy, Childbirth and the Puerperium): MS–DRG 775 (Vaginal Delivery Without Complicating Diagnosis)

We received a request to modify the logic for ICD–10 MS–DRG 775 (Vaginal Delivery without Complicating Diagnosis) so that the procedure code for the induction of labor with a cervical ripening gel would not group to the incorrect MS–DRG when a normal delivery has occurred. ICD–10–PCS procedure code 3E0P7GC (Introduction of other therapeutic substance into female reproductive, via natural or artificial opening) describes this procedure.

We reviewed how this procedure code is currently classified under the ICD–10 MS–DRGs Version 32 and noted that it is currently designated as an operating room (O.R.) procedure code that affects MS–DRG assignment. In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24395), we agreed with the requestor that the current logic for ICD–10–PCS procedure code 3E0P7GC did not result in the appropriate MS–DRG assignment. The result of our analysis suggested that this code should not be designated as an O.R. code. Our clinical advisors agreed that this procedure did not require the intensity or complexity of service and resource utilization to merit an O.R. designation under ICD–10. Therefore, in the proposed rule, we proposed to make ICD–10–PCS procedure code 3E0P7GC a non-O.R. code so that cases reporting this procedure code will group to the appropriate MS–DRG assignment. We invited public comments on our proposal.

Comment: Several commenters supported the proposal to modify the logic for ICD–10 MS–DRG 775 so that procedure code 3E0P7GC would not group to the incorrect MS–DRG when a normal delivery has occurred. The commenters stated that the proposal

was reasonable, given the data and information provided.

Response: We appreciate the commenters' support for our proposal.

After consideration of the public comments received, we are finalizing our proposal to modify the logic for ICD–10 MS–DRG 775 so that ICD–10–PCS procedure code 3E0P7GC will not group to the incorrect MS–DRG when a normal delivery has occurred.

Our analysis of ICD–10–PCS procedure code 3E0P7GC also prompted the review of additional, similar codes that describe the introduction of a substance. We evaluated the following ICD–10–PCS procedure codes:

- 3E0P76Z (Introduction of nutritional substance into female reproductive, via natural or artificial opening);
- 3E0P77Z (Introduction of electrolytic and water balance substance into female reproductive, via natural or artificial opening);
- 3E0P7SF (Introduction of other gas into female reproductive, via natural or artificial opening);
- 3E0P83Z (Introduction of anti-inflammatory into female reproductive, via natural or artificial opening endoscopic);
- 3E0P86Z (Introduction of nutritional substance into female reproductive, via natural or artificial opening endoscopic);
- 3E0P87Z (Introduction of electrolytic and water balance substance into female reproductive, via natural or artificial opening endoscopic);
- 3E0P8GC (Introduction of other therapeutic substance into female reproductive, via natural or artificial opening endoscopic); and
- 3E0P8SF (Introduction of other gas into female reproductive, via natural or artificial opening endoscopic).

From our analysis, we determined that these codes also are currently designated as O.R. codes which affect MS–DRG assignment. Our clinical advisors recommended that these codes should also be designated as non-O.R. because they do not require the intensity or complexity of service and resource utilization to merit an O.R. designation under the ICD–10 MS–DRGs. As a result of our analysis and based on our clinical advisors' recommendation, in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24395), we proposed to designate the above listed ICD–10–PCS procedure codes as non-O.R. procedure codes to ensure that these codes will group to the appropriate MS–DRG assignment.

We invited public comments on our proposal.

Comment: Several commenters agreed with the proposal to change the designation for the additional ICD–10–PCS codes listed in the proposed rule describing the introduction of a substance from O.R. to non-O.R. The commenters stated that the proposal was reasonable, given the data and information provided.

Response: We appreciate the commenters' support.

After consideration of the public comments received, we are finalizing our proposal to designate the following ICD–10–PCS procedure codes as non-O.R. for the FY 2016 ICD–10 MS–DRGs Version 33: 3E0P76Z; 3E0P77Z; 3E0P7SF; 3E0P83Z; 3E0P86Z; 3E0P87Z; 3E0P8GC; and 3E0P8SF.

6. MDC 21 (Injuries, Poisonings and Toxic Effects of Drugs): CroFab Antivenin Drug

We received a request that CMS change the MS–DRG assignment for antivenom cases from MS–DRG 917 and 918 (Poisoning & Toxic Effects of Drugs with and without MCC, respectively). For the FY 2016 IPPS/LTCH PPS proposed rule, for these MS–DRGs, we examined claims data from the December 2014 update of the FY 2014 MedPAR file for cases reporting ICD–9–CM diagnosis codes of a principal diagnosis 989.5 (Toxic effect of venom), a secondary diagnosis ICD–9–CM E code of E905.0 (Venomous snakes and lizards), and the ICD–9–CM procedure code of 99.16 (Injection of antidote), which is a non-O.R. code and does not impact the MS–DRG assignment.

For the ICD–9–CM diagnosis code 989.5 (Toxic effect of venom), the ICD–10–CM provides more detailed diagnosis codes for these toxic effects of venom cases as shown in the following table:

ICD–10–CM Code Translations for ICD–9–CM Diagnosis Code 989.5

ICD–10–CM Code	Code description
T63.001A	Toxic effect of unspecified snake venom, accidental (unintentional), initial encounter.
T63.011A	Toxic effect of rattlesnake venom, accidental (unintentional) initial encounter.
T63.021A	Toxic effect of coral snake venom, accidental (unintentional), initial encounter.
T63.031A	Toxic effect of taipan venom, accidental (unintentional), initial encounter.
T63.041A	Toxic effect of cobra venom, accidental (unintentional), initial encounter.
T63.061A	Toxic effect of venom of other North and South American snake, accidental (unintentional), initial encounter.
T63.71A	Toxic effect of venom of other Australian snake, accidental (unintentional), initial encounter.
T63.081A	Toxic effect of venom of other African and Asian snake, accidental (unintentional), initial encounter.
T63.091A	Toxic effect of venom of other snake, accidental (unintentional), initial encounter.

For the ICD–9–CM Supplementary Classification of External Causes of Injury and Poisoning code E905.0 (Venomous snakes and lizards), ICD–10–CM provides more detailed diagnosis codes for these cases as shown in the following table:

ICD–10–CM Code Translations for ICD–9–CM Code E905.0

ICD–10–CM Code	Code description
T63.001A	Toxic effect of unspecified snake venom, accidental (unintentional), initial encounter.
T63.011A	Toxic effect of rattlesnake venom, accidental (unintentional) initial encounter.
T63.021A	Toxic effect of coral snake venom, accidental (unintentional), initial encounter.
T63.031A	Toxic effect of taipan venom, accidental (unintentional), initial encounter.
T63.041A	Toxic effect of cobra venom, accidental (unintentional), initial encounter.
T63.061A	Toxic effect of venom of other North and South American snake, accidental (unintentional), initial encounter.

ICD–10–CM CODE TRANSLATIONS FOR ICD–9–CM CODE E905.0—Continued

ICD–10–CM Code	Code description
T63.71A	Toxic effect of venom of other Australian snake, accidental (unintentional), initial encounter.
T63.081A	Toxic effect of venom of other African and Asian snake, accidental (unintentional), initial encounter.
T63.091A	Toxic effect of venom of other snake, accidental (unintentional), initial encounter.

We examined claims data for reported cases involving injections for snake bites in MS–DRGs 917 and 918 from the December 2014 update of the FY 2014 MedPAR file. Our findings are displayed in the table below.

SNAKE BITE WITH INJECTIONS

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 917—All cases	26,393	4.77	$9,983
MS–DRG 917—Cases with principal diagnosis code 989.5 and secondary diagnosis code E905.0 with procedure code 99.16 (non-OR)	0	0	0
MS–DRG 918—All cases	24,557	2.90	4,953
MS–DRG 918—Cases with principal diagnosis code 989.5 and secondary diagnosis code E905.0 with procedure code 99.16 (non-OR)	19	2.16	12,014

As shown in the table above, we identified 19 cases involving injections for snake bites reported in MS–DRG 918 only. In the FY 2016 IPPS/LTCH PPS proposed rule, we pointed out that this small number of cases (19) does not provide justification to create a new MS–DRG. The cases are assigned to the same MS–DRG as are other types of poisonings and toxic effects. We were unable to identify another MS–DRG that would be a more appropriate MS–DRG assignment for these cases based on the clinical nature of this condition. The MS–DRGs are a classification system intended to group together diagnoses and procedures with similar clinical characteristics and utilization of resources. Basing a new MS–DRG on such a small number of cases (19) could lead to distortions in the relative payment weights for the MS–DRG because several expensive cases could impact the overall relative payment weight. Having larger clinical cohesive groups within an MS–DRG provides greater stability for annual updates to the relative payment weights.

Our clinical advisors reviewed the data, evaluated these conditions, and recommended that we not change the MS–DRG assignment for procedures involving the injection of the CroFab antivenom drug for snake bites because these cases are clinically similar to other poisoning cases currently assigned to MS–DRGs 917 and 918. Based on the findings in our data analysis and the recommendations of our clinical advisors, in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24397), we did not propose to create a new MS–DRG for cases of CroFab antivenom drugs for snake bites. We proposed to maintain the current assignment of diagnosis codes in MS–DRGs 917 and 918. We invited public comments on our proposal.

Comment: A number of commenters supported the proposal to maintain the current MS–DRG assignment for procedures involving CroFab antivenom. The commenters stated that the proposal was reasonable, given the data and information provided.

Response: We appreciate the commenters' support for our proposal.

After consideration of the public comments we received, we are finalizing our proposal to maintain the current MS–DRG assignment for procedures involving the CroFab antivenom drug for snakebites to MS–DRGs 917 and 918.

7. MDC 22 (Burns): Additional Severity of Illness Level for MS–DRG 927 (Extensive Burns or Full Thickness Burns With Mechanical Ventilation 96+ Hours With Skin Graft)

We received a request to add an additional severity level to MS–DRG 927 (Extensive Burns or Full Thickness Burns with Mechanical Ventilation 96+ Hours with Skin Graft). The requestor was concerned about payment for severe burn cases that used dermal regenerative grafts. These grafts are captured by ICD–9–CM procedure code 86.67 (Dermal regenerative graft). The requestor stated that the total cost of these graft cases is significantly greater than the average total costs for all cases in MS–DRG 927. The requestor stated that the dermal regenerative grafts are used to cover large burns where donor skin is not available. The requestor stated that the grafts provide permanent covering of the wound and thus immediate closure of the wound. The requestor asserted that the grafts offer benefits such as the avoidance of infections. The requestor pointed out that MS–DRG 927 is not subdivided into severity of illness levels and recommended an additional severity level be added to address any payment issues for dermal regenerative grafts within MS–DRG 927.

ICD–10–PCS provides more detailed and specific codes for skin grafts. The ICD–10–PCS codes for skin grafts provide specific information on the part of the body receiving the skin graft, the type of graft, and the approach used to apply the graft. These codes can be found in the table labeled ''OHR (Replacement of Skin)'' in the ICD–10 MS–DRG Version 32 Definitions Manual available on the Internet at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html.* As stated earlier, for the ICD–9–CM codes that result in greater than 50 ICD–10–PCS comparable code translations, we referred readers to Table 6P (ICD–10–PCS Code Translations for Final MS–DRG Changes), which is available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html.* The table includes the MDC topic, the ICD–9–CM code, and the ICD–10–PCS code translations. In Table 6P.2a, we show the comparable ICD–10–PCS codes for ICD–9–CM code 86.67 (Dermal regenerative graft).

We examined claims data for cases reported in MS–DRG 927 from the December 2014 update of the FY 2014

MedPAR file. The following table shows our findings.

EXTENSIVE BURNS OR FULL THICKNESS BURNS WITH MECHANICAL VENTILATION 96+ HOURS WITH SKIN GRAFT)

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 927—All cases	171	29.92	$113,844
MS–DRG 927—Cases with procedure code 86.67	22	33.5	146,903
MS–DRG 927—Cases with procedure code 86.67 and 96.72 (Mechanical ventilation for 96+ hours)	14	38.6	174,372
MS–DRG 927—Cases with procedure code 86.67 and without 96.72 (Mechanical ventilation for 96+ hours)	8	24.6	98,482
MS–DRG 927—All cases with MCC	131	31.51	121,519
MS–DRG 927—All cases with CC	38	25.21	91,910
MS–DRG 927—All cases without CC/MCC	2	15.00	27,872

As shown in the table above, we found a total of 171 cases in MS–DRG 927. Of these 171 cases, there were 131 cases with an MCC, 38 cases with a CC, and 2 cases without a CC or an MCC. We determined that the requested new severity level did not meet all of the criteria established in the FY 2008 IPPS final rule (72 FR 47169), and described in section II.G.1.b. of the preamble of the proposed rule, that must be met to warrant the creation of a CC or an MCC subgroup within a base MS–DRG. Specifically, the requested new severity level did not meet the criterion that there are at least 500 cases in the CC or MCC subgroup.

We also pointed out that the long-term mechanical ventilation cases are driving the costs to a greater extent than the graft cases. We found that the 22 cases that received a graft had average costs of $146,903. The 14 cases that had both 96+ hours of mechanical ventilation and a graft had average costs of $174,372. The 8 cases that had a graft but did not receive 96+ hours of mechanical ventilation had average costs of $98,482.

Our clinical advisors reviewed this issue and recommended making no MS–DRG updates for MS–DRG 927. They advised us that the dermal regenerative graft cases are appropriately assigned to the MS–DRG 927 because they are clinically similar to other cases within MS–DRG 927. Our clinical advisors also agreed that the cases in MS–DRG 927 do not meet the established criterion for creating a new severity level.

Based on the findings of our data analysis, the fact that MS–DRG 927 did not meet the criterion for the creation of an additional severity level, and the recommendations of our clinical advisors, in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24397), we did not propose to create a new severity level for MS–DRG 927. We proposed to maintain the current MS–DRG 927 structure without additional severity levels. We invited public comments on our proposal.

Comment: A number of commenters supported the proposal to maintain the current MS–DRG 927 structure without creating additional severity levels. The commenters stated that the proposal was reasonable, given the data and information provided.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to maintain the current MS–DRG 927 structure without creating additional severity levels.

8. Medicare Code Editor (MCE) Changes

The Medicare Code Editor (MCE) is a software program that detects and reports errors in the coding of Medicare claims data. Patient diagnoses, procedure(s), and demographic information are entered into the Medicare claims processing systems and are subjected to a series of automated screens. The MCE screens are designed to identify cases that require further review before classification into an MS–DRG.

As discussed in section II.G.1.a. of the preamble of the FY 2016 IPPS/LTCH PPS proposed rule and this final rule, CMS prepared the ICD–10 MS–DRGs Version 32 based on the FY 2015 MS–DRGs (Version 32) that we finalized in the FY 2015 IPPS/LTCH PPS final rule. In November 2014, we made available a Definitions Manual of the ICD–10 MS–DRGs Version 32 and the MCE Version 32 on the ICD–10 MS–DRG Conversion Project Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html.* We also prepared a document that described the changes made between Version 31–R to Version 32 to help facilitate a review of the ICD–10 MS–DRGs logic. We produced mainframe and computer software for ICD–10 MS–DRGs Version 32 and MCE Version 32, which was made available to the public in January 2015. Information on ordering the mainframe and computer software through NTIS was made available on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html* under the ''Related Links'' section. We encouraged the public to submit to CMS any comments on areas where they believed the ICD–10 MS–DRG GROUPER and MCE did not accurately reflect the logic and edits found in the ICD–9–CM MS–DRG GROUPER and the MCE.

For FY 2016, in order to be consistent with the ICD–9–CM MS–DRG GROUPER and MCE Version 32, we proposed to add the ICD–10–CM codes listed in the table below to the ICD–10 MCE Version 33 of the ''Manifestation codes not allowed as principal diagnosis'' edit. Under the MCE, manifestation codes describe the ''manifestation'' of an underlying disease, not the disease itself. Because these codes do not describe the disease itself, they should not be used as principal diagnoses.

ICD–10–CM CODES PROPOSED TO BE ADDED TO THE VERSION 33 MCE ''MANIFESTATION CODES NOT ALLOWED AS PRINCIPAL DIAGNOSIS'' EDIT

ICD–10–CM Code	Code description
D75.81	Myelofibrosis.
E08.00	Diabetes mellitus due to underlying condition with hyperosmolarity without nonketotic hyperglycemic-hyperosmolar coma (NKHHC).
E08.01	Diabetes mellitus due to underlying condition with hyperosmolarity with coma.
E08.10	Diabetes mellitus due to underlying condition with ketoacidosis without coma.
E08.11	Diabetes mellitus due to underlying condition with ketoacidosis with coma.
E08.21	Diabetes mellitus due to underlying condition with diabetic nephropathy.
E08.22	Diabetes mellitus due to underlying condition with diabetic chronic kidney disease.
E08.29	Diabetes mellitus due to underlying condition with other diabetic kidney complication.
E08.311	Diabetes mellitus due to underlying condition with unspecified diabetic retinopathy with macular edema.
E08.319	Diabetes mellitus due to underlying condition with unspecified diabetic retinopathy without macular edema.
E08.321	Diabetes mellitus due to underlying condition with mild nonproliferative diabetic retinopathy with macular edema.
E08.329	Diabetes mellitus due to underlying condition with mild nonproliferative diabetic retinopathy without macular edema.
E08.331	Diabetes mellitus due to underlying condition with moderate nonproliferative diabetic retinopathy with macular edema.
E08.339	Diabetes mellitus due to underlying condition with moderate nonproliferative diabetic retinopathy without macular edema.
E08.341	Diabetes mellitus due to underlying condition with severe nonproliferative diabetic retinopathy with macular edema.
E08.349	Diabetes mellitus due to underlying condition with severe nonproliferative diabetic retinopathy without macular edema.
E08.351	Diabetes mellitus due to underlying condition with proliferative diabetic retinopathy with macular edema.
E08.359	Diabetes mellitus due to underlying condition with proliferative diabetic retinopathy without macular edema.
E08.36	Diabetes mellitus due to underlying condition with diabetic cataract.
E08.39	Diabetes mellitus due to underlying condition with other diabetic ophthalmic complication.
E08.40	Diabetes mellitus due to underlying condition with diabetic neuropathy, unspecified.
E08.41	Diabetes mellitus due to underlying condition with diabetic mononeuropathy.
E08.42	Diabetes mellitus due to underlying condition with diabetic polyneuropathy.
E08.43	Diabetes mellitus due to underlying condition with diabetic autonomic (poly)neuropathy.
E08.44	Diabetes mellitus due to underlying condition with diabetic amyotrophy.
E08.49	Diabetes mellitus due to underlying condition with other diabetic neurological complication.
E08.51	Diabetes mellitus due to underlying condition with diabetic peripheral angiopathy without gangrene.
E08.52	Diabetes mellitus due to underlying condition with diabetic peripheral angiopathy with gangrene.
E08.59	Diabetes mellitus due to underlying condition with other circulatory complications.
E08.610	Diabetes mellitus due to underlying condition with diabetic neuropathic arthropathy.
E08.618	Diabetes mellitus due to underlying condition with other diabetic arthropathy.
E08.620	Diabetes mellitus due to underlying condition with diabetic dermatitis.
E08.621	Diabetes mellitus due to underlying condition with foot ulcer.
E08.622	Diabetes mellitus due to underlying condition with other skin ulcer.
E08.628	Diabetes mellitus due to underlying condition with other skin complications.
E08.630	Diabetes mellitus due to underlying condition with periodontal disease.
E08.638	Diabetes mellitus due to underlying condition with other oral complications.
E08.641	Diabetes mellitus due to underlying condition with hypoglycemia with coma.
E08.649	Diabetes mellitus due to underlying condition with hypoglycemia without coma.
E08.65	Diabetes mellitus due to underlying condition with hyperglycemia.
E08.69	Diabetes mellitus due to underlying condition with other specified complication.
E08.8	Diabetes mellitus due to underlying condition with unspecified complications.
E08.9	Diabetes mellitus due to underlying condition without complications.

We invited public comment on our proposal to add the above list of ICD–10–CM diagnosis codes to the ''Manifestation codes not allowed as principal diagnosis'' edit in the FY 2016 ICD–10 MCE Version 33.

Comment: Several commenters supported the proposal to add the above listed ICD–10–CM diagnosis codes to the ''Manifestation codes not allowed as principal diagnosis'' edit in the FY 2016 ICD–10 MCE Version 33. The commenters stated that the proposed changes for the ICD–10 MCE seemed reasonable, given the data and information provided. However, one commenter asserted that the code description for ICD–10–CM diagnosis code D75.81, ''Myelofibrosis'', as displayed in the table in the proposed rule was inaccurate and that the more accurate long description is ''Secondary myelofibrosis''. The commenter stated that if the proposal for myelofibrosis under the ''Manifestation codes not allowed as principal diagnosis'' edit is restricted to ''secondary myelofibrosis,'' it would support the proposal. This commenter indicated that the disease of myelofibrosis is often the main reason for admission as it is a well-defined myeloproliferative neoplasm.

The commenter also noted it recently participated in proposals related to expanding coverage indications for hematopoietic stem cell transplant to include patients with a principal diagnosis of myelofibrosis. The commenter stated that primary or idiopathic myelofibrosis is coded with ICD–9–CM code 238.76 (Myelofibrosis with myeloid metaplasia) and will be reported with ICD–10–PCS code D47.1 (Chronic myeloproliferative disease). The commenter expressed a desire for coding of this condition to not create confusion as implementation of ICD–10 approaches and pledged to work with its members to confirm understanding.

Response: We appreciate the commenters' support of our proposal to add the listed ICD–10–CM diagnosis codes to the ICD–10 MCE Version 33 of the ''Manifestation codes not allowed as principal diagnosis'' edit. With regard to the commenter who asserted that the code description for ICD–10–CM diagnosis code D75.81 was inaccurate and that the more accurate long description is ''Secondary

myelofibrosis'', we point out that the official ICD–10–CM diagnosis code title description, as displayed in the 2015 Code Descriptions in Tabular Order file, which is available on the CMS ICD–10 Web site at *http://www.cms.gov/Medicare/Coding/ICD10/2015-ICD-10-CM-and-GEMs.html* in the Downloads section, is as presented in the FY 2016 IPPS/LTCH PPS proposed rule, ''Myelofibrosis''. In response to the commenter's statement that if the proposal for myelofibrosis under the ''Manifestation codes not allowed as principal diagnosis'' edit is restricted to ''secondary myelofibrosis,'' the commenter would support it, we note that ICD–10–CM diagnosis code D75.81 (Myelofibrosis) has an inclusion term of ''Secondary myelofibrosis NOS''. (Within ICD–10–CM, an inclusion term is defined as a term that is included under certain codes. The term represents a condition for which that code is to be used. The term may also be a synonym of the code title. We refer the reader to the ICD–10–CM Official Guidelines for Coding and Reporting for additional information related to inclusion terms.) As such, we believe the proposal to include ICD–10–CM diagnosis code D75.81 (Myelofibrosis) on the list of ''Manifestation codes not allowed as principal diagnosis'' edit is not inconsistent with the commenter's statement of support for a proposal restricted to ''secondary myelofibrosis.'' In response to the commenter indicating that the disease of myelofibrosis is often the main reason for admission as it is a well-defined myeloproliferative neoplasm, we note that, under both ICD–9–CM and ICD–10–CM, myelofibrosis is a manifestation code. As discussed previously, manifestation codes describe the manifestation of an underlying disease, not the disease itself, and therefore should not be used as a principal diagnosis. We also point out that a ''code first'' note appears at ICD–10–CM diagnosis code D75.81 (Myelofibrosis). The ''code first'' note is an etiology/manifestation coding convention (additional detail can be found in the ICD–10–CM Official Guidelines for Coding and Reporting), indicating that the condition has both an underlying etiology and manifestation due to the underlying etiology.

The commenter is correct that primary or idiopathic myelofibrosis is coded with ICD–9–CM code 238.76 (Myelofibrosis with myeloid metaplasia) and the comparable ICD–10–PCS procedure code translation is D47.1 (Chronic myeloproliferative disease). We also acknowledge and appreciate that the commenter stated its intent to work with its members to confirm understanding of coding as it relates to myelofibrosis as the transition to ICD–10 approaches. We encourage the commenter to review the ICD–10–CM Official Guidelines for Coding and Reporting to assist in that effort.

After consideration of the public comments we received, for FY 2016, we are finalizing our proposal to add the ICD–10–PCS codes listed earlier in this section to the ICD–10 MCE Version 33 ''Manifestation codes not allowed as principal diagnosis'' edit, which will ensure consistency with the ICD–9–CM MS–DRG GROUPER and MCE Version 32.

In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24398 through 24399), we also proposed to revise the language describing the ''Procedure inconsistent with LOS (Length of stay)'' edit which lists ICD–10–PCS code 5A1955Z (Respiratory ventilation, greater than 96 consecutive hours), effective for the FY 2016 ICD–10 MCE Version 33. Currently, in Version 32 of the ICD–10 MCE, the language describing this ''Procedure inconsistent with LOS (Length of stay)'' edit states: ''The following procedure should only be coded on claims with a length of stay of four days or greater.'' Because the code description of the ICD–10–PCS code is for ventilation that occurs *greater than* 96 consecutive hours, we proposed to revise the language for the edit to read: ''The following procedure code should only be coded on claims with a length of stay greater than 4 days.'' This proposed revision would clarify the intent of this MCE edit. We invited public comments on our proposal.

Comment: Several commenters supported the proposal to revise the language describing the ''Procedure inconsistent with LOS (Length of stay)'' edit. The commenters stated that the proposed changes seem reasonable, given the data and information provided.

Response: We appreciate the commenters' support.

Consistent with the proposal to revise the language for the ''Procedure inconsistent with LOS (Length of stay)'' edit because the code description for ICD–10–PCS code 5A1955Z is for ventilation that occurs *greater than* 96 consecutive hours, we determined that it is also necessary to revise the language for the corresponding ICD–10 MS–DRG titles that currently reference the ICD–9–CM terminology for mechanical ventilation of ''96 + hours'' based on the ICD–9–CM procedure code 96.72 (Continuous invasive mechanical ventilation for 96 consecutive hours or more) to instead reflect the terminology for the ICD–10–PCS code translation. Consistent with the logic for the ICD–9–CM MS–DRGs Version 32, ICD–10–PCS code 5A1955Z is assigned to these same MS–DRGs under the ICD–10 MS–DRGs Version 33. Under ICD–9–CM, the following six MS–DRGs contain GROUPER and MCE logic based on procedure code 96.72:

- MS–DRG 003 (ECMO or Tracheostomy with Mechanical Ventilation 96+ Hours or Principal Diagnosis Except, Face Mouth and Neck with Major Operating Room Procedure);
- MS–DRG 004 (Tracheostomy with Mechanical Ventilation 96+ Hours or Principal Diagnosis Except, Face Mouth and Neck without Major Operating Room Procedure);
- MS–DRG 207 (Respiratory System Diagnosis with Ventilator Support 96+Hours);
- MS–DRG 870 (Septicemia or Severe Sepsis with Mechanical Ventilation 96+ Hours);
- MS–DRG 927 (Extensive Burns or Full Thickness Burns with Mechanical Ventilation 96+ Hours with Skin Graft); and
- MS–DRG 933 (Extensive Burns or Full Thickness Burns with Mechanical Ventilation 96+ Hours without Skin Graft).

The following two MS–DRGs do not include GROUPER and MCE logic based on procedure code 96.72. However, the titles currently include the terminology for without mechanical ventilation of ''96 + hours''.

- MS–DRG 871 (Septicemia or Severe Sepsis without Mechanical Ventilation 96+ Hours with MCC); and
- MS–DRG 872 (Septicemia or Severe Sepsis without Mechanical Ventilation 96+ Hours with CC).

Therefore, we are revising the titles for the corresponding ICD–10 MS–DRGs as the GROUPER and MCE logic include ICD–10–PCS code 5A1955Z (Respiratory ventilation, greater than 96 consecutive hours) or the language in the title of the MS–DRG includes without mechanical ventilation of ''96 + hours''. The revision to the titles is to add a ''greater than'' sign (>) before the 96 to reflect ''> 96 consecutive hours'' and to remove the ''plus sign'' (+) after the 96.

After consideration of the public comments received, we are finalizing our proposal to revise the language describing the ''Procedure inconsistent with LOS (Length of stay)'' edit which lists ICD–10–PCS code 5A1955Z (Respiratory ventilation, greater than 96 consecutive hours). Consistent with that proposal, we also are revising the ICD–

10 MS–DRG Version 33 titles as follows, effective for FY 2016.

- MS–DRG 003: ''(ECMO or Tracheostomy with Mechanical Ventilation >96 Hours or Principal Diagnosis Except, Face Mouth and Neck with Major Operating Room Procedure'';
- MS–DRG 004: ''Tracheostomy with Mechanical Ventilation >96 Hours or Principal Diagnosis Except, Face Mouth and Neck without Major Operating Room Procedure'';
- MS–DRG 007: ''Respiratory System Diagnosis with Ventilator Support >96 Hours'';
- MS–DRG 870: ''Septicemia or Severe Sepsis with Mechanical Ventilation >96 Hours'';
- MS–DRG 871: ''Septicemia or Severe Sepsis without Mechanical Ventilation >96 Hours with MCC'';
- MS–DRG 872: ''Septicemia or Severe Sepsis without Mechanical Ventilation >96 Hours with CC'';
- MS–DRG 927: ''Extensive Burns or Full Thickness Burns with Mechanical Ventilation >96 Hours with Skin Graft''; and
- MS–DRG 933: ''Extensive Burns or Full Thickness Burns with Mechanical Ventilation >96 Hours without Skin Graft''.

9. Changes to Surgical Hierarchies

Some inpatient stays entail multiple surgical procedures, each one of which, occurring by itself, could result in assignment of the case to a different MS–DRG within the MDC to which the principal diagnosis is assigned. Therefore, it is necessary to have a decision rule within the GROUPER by which these cases are assigned to a single MS–DRG. The surgical hierarchy, an ordering of surgical classes from most resource-intensive to least resource-intensive, performs that function. Application of this hierarchy ensures that cases involving multiple surgical procedures are assigned to the MS–DRG associated with the most resource-intensive surgical class.

Because the relative resource intensity of surgical classes can shift as a function of MS–DRG reclassification and recalibrations, for FY 2016, we reviewed the surgical hierarchy of each MDC, as we have for previous reclassifications and recalibrations, to determine if the ordering of classes coincides with the intensity of resource utilization.

A surgical class can be composed of one or more MS–DRGs. For example, in MDC 11, the surgical class ''kidney transplant'' consists of a single MS–DRG (MS–DRG 652) and the class ''major bladder procedures'' consists of three MS–DRGs (MS–DRGs 653, 654, and 655). Consequently, in many cases, the surgical hierarchy has an impact on more than one MS–DRG. The methodology for determining the most resource-intensive surgical class involves weighting the average resources for each MS–DRG by frequency to determine the weighted average resources for each surgical class. For example, assume surgical class A includes MS–DRGs 001 and 002 and surgical class B includes MS–DRGs 003, 004, and 005. Assume also that the average costs of MS–DRG 001 are higher than that of MS–DRG 003, but the average costs of MS–DRGs 004 and 005 are higher than the average costs of MS–DRG 002. To determine whether surgical class A should be higher or lower than surgical class B in the surgical hierarchy, we would weigh the average costs of each MS–DRG in the class by frequency (that is, by the number of cases in the MS–DRG) to determine average resource consumption for the surgical class. The surgical classes would then be ordered from the class with the highest average resource utilization to that with the lowest, with the exception of ''other O.R. procedures'' as discussed below.

This methodology may occasionally result in assignment of a case involving multiple procedures to the lower-weighted MS–DRG (in the highest, most resource-intensive surgical class) of the available alternatives. However, given that the logic underlying the surgical hierarchy provides that the GROUPER search for the procedure in the most resource-intensive surgical class, in cases involving multiple procedures, this result is sometimes unavoidable.

We note that, notwithstanding the foregoing discussion, there are a few instances when a surgical class with a lower average cost is ordered above a surgical class with a higher average cost. For example, the ''other O.R. procedures'' surgical class is uniformly ordered last in the surgical hierarchy of each MDC in which it occurs, regardless of the fact that the average costs for the MS–DRG or MS–DRGs in that surgical class may be higher than those for other surgical classes in the MDC. The ''other O.R. procedures'' class is a group of procedures that are only infrequently related to the diagnoses in the MDC, but are still occasionally performed on patients with cases assigned to the MDC with these diagnoses. Therefore, assignment to these surgical classes should only occur if no other surgical class more closely related to the diagnoses in the MDC is appropriate.

A second example occurs when the difference between the average costs for two surgical classes is very small. We have found that small differences generally do not warrant reordering of the hierarchy because, as a result of reassigning cases on the basis of the hierarchy change, the average costs are likely to shift such that the higher-ordered surgical class has lower average costs than the class ordered below it.

Based on the changes that we proposed to make for FY 2016, as discussed in section II.G.3.e. of the preamble of the FY 2016 IPPS/LTCH PPS proposed rule, we proposed to revise the surgical hierarchy for MDC 5 (Diseases and Disorders of the Circulatory System) (80 FR 24399). Specifically, we proposed to delete MS–DRG 237 (Major Cardiovascular Procedures with MCC) and MS–DRG 238 (Major Cardiovascular Procedures without MCC) from the surgical hierarchy. We proposed to sequence proposed new MS–DRG 268 (Aortic and Heart Assist Procedures Except Pulsation Balloon with MCC) and proposed new MS–DRG 269 (Aortic and Heart Assist Procedures Except Pulsation Balloon without MCC) above proposed new MS–DRG 270 (Other Major Cardiovascular Procedures with MCC), proposed new MS–DRG 271 (Other Major Cardiovascular Procedures with CC), and proposed new MS–DRG 272 (Other Major Cardiovascular Procedures without CC/MCC). We proposed to sequence proposed new MS–DRGs 270, 271, and 272 above MS–DRG 239 (Amputation for Circulatory System Disorders Except Upper Limb & Toe with MCC). In addition, we proposed to sequence proposed new MS–DRG 273 (Percutaneous Intracardiac Procedures with MCC) and proposed new MS–DRG 274 (Percutaneous Intracardiac Procedures without MCC) above MS–DRG 246 (Percutaneous Cardiovascular Procedure with Drug-eluting Stent with MCC or 4+ Vessels/Stents).

We invited public comments on our proposals.

We did not receive any public comments on our proposals for the surgical hierarchy within MDC 5. Therefore, we are finalizing our proposals to delete ICD–9–CM MS–DRG 237 and ICD–9–CM MS–DRG 238 from the surgical hierarchy. We are adopting as final the sequencing of new ICD–10 MS–DRG 268 and new ICD–10 MS–DRG 269 above new ICD–10 MS–DRG 270, new ICD–10MS–DRG 271, and new ICD–10 MS–DRG 272. We also are finalizing our proposal to sequence new ICD–10 MS–DRGs 270, 271, and 272 above ICD–10 MS–DRG 239. Lastly, we are finalizing the sequencing of new ICD–10 MS–DRG 273 and new ICD–10 MS–DRG 274 above ICD–10 MS–DRG 246.

10. Changes to the MS–DRG Diagnosis Codes for FY 2016

a. Major Complications or Comorbidities (MCCs) and Complications or Comorbidities (CC) Severity Levels for FY 2016

A complete updated MCC, CC, and Non-CC Exclusion List is available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html* as follows:

- Table 6I (Complete MCC list);
- Table 6J (Complete CC list); and
- Table 6K (Complete list of CC Exclusions).

b. Coronary Atherosclerosis Due to Calcified Coronary Lesion

We received a request that we change the severity levels for ICD–9–CM diagnosis codes 414.2 (Chronic total occlusion of coronary artery) and 414.4 (Coronary atherosclerosis due to calcified coronary lesion) from non-CCs to MCCs. The ICD–10–CM codes for these diagnoses are I25.82 (Chronic total occlusion of coronary artery) and I25.84 (Coronary atherosclerosis due to calcified coronary lesion), respectively, and both of these codes are currently classified as non-CCs.

This issue was previously discussed in the FY 2014 IPPS/LTCH PPS proposed rule and final rule (78 FR 27522 and 78 FR 50541 through 50542, respectively), and the FY 2015 IPPS/LTCH PPS proposed rule and final rule (79 FR 28018 and 28019 and 79 FR 49903 and 49904, respectively).

We examined claims data from the December 2014 update of the FY 2014 MedPAR file for ICD–9–CM diagnosis codes 414.2 and 414.4. The following table shows our findings.

SDX	SDX description	CC level	Cnt 1	Cnt 1 impact	Cnt 2	Cnt 2 impact	Cnt 3	Cnt 3 impact
414.2	Chronic total occlusion of coronary artery.	Non-CC	14,655	1.393	21,222	2.098	20,615	3.046
414.4	Coronary atherosclerosis due to calcified coronary lesion.	Non-CC	1,752	1.412	3,238	2.148	3,244	3.053

We ran the data using the criteria described in the FY 2008 IPPS final rule with comment period (72 FR 47169) to determine severity levels for procedures in MS–DRGs. The C1 value reflects a patient with no other secondary diagnosis or with all other secondary diagnoses that are non-CCs. The C2 value reflects a patient with at least one other secondary diagnosis that is a CC, but none that is an MCC. The C3 value reflects a patient with at least one other secondary diagnosis that is an MCC.

The table above shows that the C1 finding is 1.393 for ICD–9–CM diagnosis code 414.2 and the C1 finding is 1.412 for ICD–9–CM diagnosis code 414.4. A value close to 1.0 in the C1 field suggests that the diagnosis produces the same expected value as a non-CC. A value close to 2.0 suggests the condition is more like a CC than a non-CC, but not as significant in resource usage as an MCC. A value close to 3.0 suggests that the condition is expected to consume resources more similar to an MCC than a CC or a non-CC. The C2 finding was 2.098 for ICD–9–CM diagnosis code 414.2, and the C2 finding was 2.148 for ICD–9–CM diagnosis code 414.4. A C2 value close to 2.0 suggests the condition is more like a CC than a non-CC, but not as significant in resource usage as an MCC when there is at least one other secondary diagnosis that is a CC but none that is an MCC. While the C1 value of 1.393 for ICD–9–CM diagnosis code 414.2 and the C1 value of 1.412 for ICD–9–CM diagnosis code 414.4 are above the 1.0 value for a non-CC, these values do not support the reclassification of diagnosis codes 414.2 and 414.4 to MCCs. As stated earlier, a value close to 3.0 suggests the condition is expected to consume resources more similar to an MCC than a CC or a non-CC. The C2 finding of 2.098 for ICD–9–CM diagnosis code 414.2 and the C2 finding of 2.148 for ICD–9–CM diagnosis code 414.4 also do not support reclassifying these diagnosis codes to MCCs.

Our clinical advisors reviewed the data and evaluated these conditions. They recommended that we not change the severity level of diagnosis codes 414.2 and 414.4 from a non-CC to an MCC. Our clinical advisors did not believe that these diagnoses would increase the severity of illness level of patients. Considering the C1 and C2 ratings of both diagnosis codes 414.2 and 414.4 and the input from our clinical advisors, in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24399 through 24400), we did not propose to reclassify conditions represented by diagnosis codes 414.2 and 414.4 to MCCs. We proposed to maintain both of these conditions as non-CCs. As stated earlier, the equivalent ICD–10–CM codes for these conditions are codes I25.82 and I25.84, respectively. Therefore, based on the data and clinical analysis, we proposed to maintain ICD–10–CM diagnosis codes I25.82 and I25.84 as non-CCs. We invited public comments on our proposals.

Comment: A number of commenters supported the proposals to maintain the designation of ICD–10–CM diagnosis codes I25.82 and I25.84 as non-CCs. The commenters stated that the proposals were reasonable, given the information that was provided.

One commenter disagreed with the proposal to maintain code I25.84 as a non-CC. The commenter indicated that it was not able to duplicate the results of C1 and C2 described in the narrative and the table presented in the proposed rule, despite contacting CMS for assistance in running the data. The commenter disagreed with the CMS' clinical advisors that the ICD–9–CM code 414.4 and ICD–10–CM code I25.84 represent conditions that are not at the MCC level. The commenter stated that patients with severe calcified lesions are more difficult to treat and, therefore, require greater resources. The commenter also expressed concerns that hospitals were underreporting cases of patients with calcified lesions.

Response: We appreciate the commenters' support for our proposals. In response to the commenter who disagreed with our clinical advisors' determination that ICD–9–CM code 414.4 and ICD–10–CM code I25.84 represent conditions that are not at the MCC level, we point out that ICD–9–CM code 414.4 captures patients who are diagnosed as having coronary atherosclerosis due to calcified coronary lesions. This diagnosis code includes patients with any range of calcified lesion, not just those with severe calcified lesions. Therefore, the use of ICD–9–CM code 414.4 is not restricted to those patients who have severe calcified lesions. Hospitals are correctly using this code to report all patients who are determined to have atherosclerosis due to calcified coronary lesions. The same is true for the use of ICD–10–CM code I25.84, which is not restricted to cases with severe calcified

lesions. We based our analysis on claims data reported by hospitals. We cannot speculate on the underreporting of this condition on submitted claims. It also appears that the commenter did not follow the correct methodology in attempting to replicate the results for C1 and C2. The categorization of diagnoses as an MCC, CC, or non-CC was accomplished using an iterative approach in which each diagnosis was evaluated to determine the extent to which its presence as a secondary diagnosis resulted in increased hospital resource use. We use the same cost calculations for computing the C1, C2, and C3 values that we use in calculating the relative weights. The cases for each ''C'' statistic are the cases with the secondary diagnosis codes for all the cases in that subset of non-CC cases, CC cases, or MCC cases. For example, the cases that are in the C3 statistic are those cases with one or more MCC secondary diagnosis codes in addition to the secondary diagnosis code under the specific review. Cases that are in the C2 statistic are those cases that do not have any MCC secondary diagnosis codes, but have one or more CC secondary diagnosis codes in addition to the secondary diagnosis code under review. The remaining cases are in the C1 statistic and have only non-CC secondary diagnosis codes along with the secondary diagnosis code under review. Numerical resource impact values were assigned for each diagnosis as follows:

Value	Meaning
0	Significantly below expected value for the non CC subgroup.
1	Approximately equal to expected value for the non CC subgroup.
2	Approximately equal to expected value for the CC subgroup.
3	Approximately equal to expected value for the major CC subgroup.
4	Significantly above the expected value for the major CC subgroup.

Each diagnosis for which Medicare data were available was evaluated to determine its impact on resource use and to determine the most appropriate CC subclass (non-CC, CC, or MCC) assignment. In order to make this determination, the average cost for each subset of cases was compared to the expected cost of cases in that subset. An expected average cost is computed across all cases in the data analysis for each base MS–DRG and severity level (1=MCC, 2=CC, and 3=Non-CC). Then, for each case in a subset, the average expected cost is computed based on the base MS–DRG and severity level to which the cases are assigned. The following format was used to evaluate each diagnosis:

Code Diagnosis Cnt1 C1 Cnt2 C2 Cnt3 C3

Where count (Cnt) is the number of patients in each subset and C1, C2, and C3 are a measure of the impact on resource use of patients in each of the subsets. A C1 value of 1.412 for a secondary diagnosis code 414.4 (Coronary atherosclerosis due to calcified coronary lesion) means that, for the subset of patients who have the secondary diagnosis and have either no other secondary diagnosis present, or all the other secondary diagnoses present are non-CCs, the impact on resource use of the secondary diagnoses is greater than the expected value for a non-CC by an amount equal to 41.2 percent of the difference between the expected value of a CC and a non-CC (that is, the impact on resource use of the secondary diagnosis is closer to a CC than a non-CC).

After consideration of the public comments we received, the findings from our claims data, and the input from our clinical advisors noted above, we are finalizing our proposal to maintain ICD–10–CM diagnosis codes I25.82 and I25.84 as non-CCs.

c. Hydronephrosis

Some ICD–10–CM diagnosis codes express conditions that are normally coded in ICD–9–CM using two or more ICD–9–CM diagnosis codes. CMS' goal in developing the ICD–10 MS–DRGs was to ensure that a patient case is assigned to the same MS–DRG, regardless of whether the patient record were to be coded in ICD–9–CM or ICD–10–CM/PCS. When one of the ICD–10–CM combination codes is used as a principal diagnosis, the cluster of ICD–9–CM codes that would be coded on an ICD–9–CM record was evaluated. If one of the ICD–9–CM codes in the cluster is a CC or an MCC, the single ICD–10–CM combination code used as a principal diagnosis also must imply that the CC or MCC is present. Appendix J of the ICD–10 MS–DRG Definitions Manual Version 32 includes two lists. Part 1 is the list of principal diagnosis codes where the ICD–10–CM code is its own MCC. Part 2 is the list of principal diagnosis codes where the ICD–10–CM code is its own CC. Appendix J of the ICD–10 MS–DRG Definitions Manual Version 32 is available via the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*.

We received a request that the ICD–10–CM combination codes for hydronephrosis due to ureteral stricture and urinary stone (N13.1 and N13.2) be flagged as principal diagnoses that can act as their own CC for MS–DRG grouping purposes.

In ICD–9–CM, code 591 (Hydronephrosis) is classified as a CC. In ICD–10–CM, hydronephrosis is reported with a combination code if the hydronephrosis is due to a ureteral stricture or urinary stone obstruction of N13.1 (Hydronephrosis with ureteral stricture, not elsewhere classified) and N13.2 (Hydronephrosis with renal and ureteral calculous obstruction). In ICD–10–CM, these two codes (N13.1 and N 13.2) are classified as CCs, but these codes are not recognized as principal diagnoses that act as their own CC (they are not included in the Appendix J of the ICD–10 MS–DRG Definitions Manual Version 32).

In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24400), we stated that we agreed with the requestor that ICD–10–CM diagnosis codes N13.1 and N13.2 should be flagged as principal diagnosis codes that can act as their own CC for MS–DRG grouping purposes. Therefore, we proposed that diagnosis codes N13.1 and N13.2 be added to the list of principal diagnoses that act as their own CC in Appendix J of the ICD–10 MS–DRG Definitions Manual Version 33. We invited public comments on our proposal.

Comment: A number of commenters supported the proposal. The commenters stated that the proposal was reasonable, given the data and information provided.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to add diagnosis codes N13.1 and N13.2 to the list of principal diagnoses that can act as their own CC in Appendix J of the ICD–10 MS–DRG Definitions Manual Version 33.

11. Complications or Comorbidity (CC) Exclusions List for FY 2016

a. Background of the CC List and the CC Exclusions List

Under the IPPS MS–DRG classification system, we have developed a standard list of diagnoses that are considered CCs. Historically, we developed this list using physician panels that classified each diagnosis code based on whether the diagnosis, when present as a secondary condition, would be considered a substantial complication or comorbidity. A substantial complication or comorbidity was defined as a condition that, because of its presence with a specific principal diagnosis, would cause an increase in the length of stay by at least 1 day in at least 75 percent of the patients. However, depending on the principal diagnosis of the patient, some diagnoses on the basic list of complications and comorbidities may be excluded if they are closely related to the principal diagnosis. In FY 2008, we evaluated each diagnosis code to determine its impact on resource use and to determine the most appropriate CC subclassification (non-CC, CC, or MCC) assignment. We refer readers to sections II.D.2. and 3. of the preamble of the FY 2008 IPPS final rule with comment period for a discussion of the refinement of CCs in relation to the MS–DRGs we adopted for FY 2008 (72 FR 47152 through 47171).

b. CC Exclusions List for FY 2016

In the September 1, 1987 final notice (52 FR 33143) concerning changes to the DRG classification system, we modified the GROUPER logic so that certain diagnoses included on the standard list of CCs would not be considered valid CCs in combination with a particular principal diagnosis. We created the CC Exclusions List for the following reasons: (1) To preclude coding of CCs for closely related conditions; (2) to preclude duplicative or inconsistent coding from being treated as CCs; and (3) to ensure that cases are appropriately classified between the complicated and uncomplicated DRGs in a pair. As we indicated above, we developed a list of diagnoses, using physician panels, to include those diagnoses that, when present as a secondary condition, would be considered a substantial complication or comorbidity. In previous years, we have made changes to the list of CCs, either by adding new CCs or deleting CCs already on the list.

In the May 19, 1987 proposed notice (52 FR 18877) and the September 1, 1987 final notice (52 FR 33154), we explained that the excluded secondary diagnoses were established using the following five principles:

- Chronic and acute manifestations of the same condition should not be considered CCs for one another;
- Specific and nonspecific (that is, not otherwise specified (NOS)) diagnosis codes for the same condition should not be considered CCs for one another;
- Codes for the same condition that cannot coexist, such as partial/total, unilateral/bilateral, obstructed/unobstructed, and benign/malignant, should not be considered CCs for one another;
- Codes for the same condition in anatomically proximal sites should not be considered CCs for one another; and
- Closely related conditions should not be considered CCs for one another.

The creation of the CC Exclusions List was a major project involving hundreds of codes. We have continued to review the remaining CCs to identify additional exclusions and to remove diagnoses from the master list that have been shown not to meet the definition of a CC.[6]

The ICD–10 MS–DRGs Version 32 CC Exclusion List is included as Appendix C in the Definitions Manual available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*.

In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24401), we did not propose any changes to the CC Exclusion List for FY 2016. Because we did not propose any changes to the ICD–10 MS–DRGs CC Exclusion List for FY 2016, we did not publish Table 6G (Additions to the CC Exclusion List) or Table 6H (Deletions from the CC Exclusion List). We developed Table 6K (Complete List of CC Exclusions), which is available only via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*. Because of the length of Table 6K, we did not publish it in the Addendum to the proposed rule.

As we did for the proposed rule, because we are not making any changes to the ICD–10 MS–DRGs CC Exclusion List for FY 2016, we are not publishing Table 6G (Additions to the CC Exclusion List) or Table 6H (Deletions from the CC Exclusion List). We developed Table 6K (Complete List of CC Exclusions), which is available only via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*. Because of the length of Table 6K, we are not publishing it in the Addendum to this final rule. Each of the secondary diagnosis codes for which there is an exclusion is listed in Part 1 of Table 6K. Each of these secondary diagnosis codes is indicated as a CC or an MCC. If the CC or MCC is allowed with all principal diagnoses, the phrase ''NoExcl'' (for no exclusions) follows the CC/MCC indicator. Otherwise, a link is given to a collection of diagnosis codes which, when used as the principal diagnosis, will cause the CC or MCC to be considered as only a non-CC. Part 2 of Table 6K lists codes that are assigned as an MCC only for patients discharged alive. Otherwise, the codes are assigned as a non-CC.

A complete updated MCC, CC, and Non-CC Exclusions List is available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*.

Because there are no new, revised, or deleted ICD–10–CM diagnosis codes for FY 2016, we have not developed Table 6A (New Diagnosis Codes), Table 6C (Invalid Diagnosis Codes), or Table 6E (Revised Diagnosis Code Titles), for this final rule and they are not published as part of this final rule. We have developed Table 6B (New Procedure Codes) for new ICD–10–PCS codes which will be implemented on October 1, 2015. Because there are no revised or

[6] We refer readers to the FY 1989 final rule (53 FR 38485, September 30, 1988) for the revision made for the discharges occurring in FY 1989; the FY 1990 final rule (54 FR 36552, September 1, 1989) for the FY 1990 revision; the FY 1991 final rule (55 FR 36126, September 4, 1990) for the FY 1991 revision; the FY 1992 final rule (56 FR 43209, August 30, 1991) for the FY 1992 revision; the FY 1993 final rule (57 FR 39753, September 1, 1992) for the FY 1993 revision; the FY 1994 final rule (58 FR 46278, September 1, 1993) for the FY 1994 revisions; the FY 1995 final rule (59 FR 45334, September 1, 1994) for the FY 1995 revisions; the FY 1996 final rule (60 FR 45782, September 1, 1995) for the FY 1996 revisions; the FY 1997 final rule (61 FR 46171, August 30, 1996) for the FY 1997 revisions; the FY 1998 final rule (62 FR 45966, August 29, 1997) for the FY 1998 revisions; the FY 1999 final rule (63 FR 40954, July 31, 1998) for the FY 1999 revisions; the FY 2001 final rule (65 FR 47064, August 1, 2000) for the FY 2001 revisions; the FY 2002 final rule (66 FR 39851, August 1, 2001) for the FY 2002 revisions; the FY 2003 final rule (67 FR 49998, August 1, 2002) for the FY 2003 revisions; the FY 2004 final rule (68 FR 45364, August 1, 2003) for the FY 2004 revisions; the FY 2005 final rule (69 FR 49848, August 11, 2004) for the FY 2005 revisions; the FY 2006 final rule (70 FR 47640, August 12, 2005) for the FY 2006 revisions; the FY 2007 final rule (71 FR 47870) for the FY 2007 revisions; the FY 2008 final rule (72 FR 47130) for the FY 2008 revisions; the FY 2009 final rule (73 FR 48510); the FY 2010 final rule (74 FR 43799); the FY 2011 final rule (75 FR 50114); the FY 2012 final rule (76 FR 51542); the FY 2013 final rule (77 FR 53315); the FY 2014 final rule (78 FR 50541), and the FY 2015 final rule (79 FR 49905). In the FY 2000 final rule (64 FR 41490, July 30, 1999), we did not modify the CC Exclusions List because we did not make any changes to the ICD–9–CM codes for FY 2000.

deleted procedure codes for FY 2016, we have not developed Table 6D (Invalid Procedure Codes) or Table 6F (Revised Procedure Codes).

In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24401), we did not propose any additions or deletions to the MS–DRG MCC List for FY 2016 nor any additions or deletions to the MS–DRG CC List for FY 2016. As we did for the proposed rule, for this final rule, we have not developed Tables 6I.1 (Additions to the MCC List), 6I.2 (Deletions to the MCC List), 6J.1 (Additions to the CC List), and 6J.2 (Deletions to the CC List), and they are not published as part of this final rule. We have developed Tables 6L (Principal Diagnosis Is Its Own MCC List) and 6M (Principal Diagnosis Is Its Own CC List). As stated in the Definitions Manual of the ICD–10 MS DRGs Version 32 on the ICD–10 MS–DRG Conversion Project Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*, a few ICD–10–CM diagnosis codes express conditions that are normally coded in ICD–9–CM using two or more ICD–9–CM diagnosis codes. In the interest of ensuring that the ICD–10 MS–DRGs place a patient in the same DRG, whenever one of these ICD–10–CM combination codes is used as principal diagnosis, the cluster of ICD–9–CM codes that would be coded on an ICD–9–CM record is considered. If one of the ICD–9–CM codes in the cluster is a CC or an MCC, the single ICD–10–CM combination code used as a principal diagnosis must also imply the CC or MCC that the ICD–9–CM cluster would have presented. The ICD–10–CM diagnoses for which this implication must be made are listed in these tables. We also have developed Table 6M.1 (Additions to Principal Diagnosis Is Its Own CC) to show the two additions to this list for the two principal diagnosis codes acting as their own CC.

The complete documentation of the ICD–10 MS–DRG Version 32 GROUPER logic, including the current CC Exclusions List, is available via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-10-MS-DRG-Conversion-Project.html*. The complete documentation of the ICD–10 MS–DRG GROUPER logic also is available on the CMS Acute Inpatient PPS Web page at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html*.

12. Review of Procedure Codes in MS–DRGs 981 Through 983, 984 Through 986, and 987 Through 989

Each year, we review cases assigned to former CMS DRG 468 (Extensive O.R. Procedure Unrelated to Principal Diagnosis), CMS DRG 476 (Prostatic O.R. Procedure Unrelated to Principal Diagnosis), and CMS DRG 477 (Nonextensive O.R. Procedure Unrelated to Principal Diagnosis) to determine whether it would be appropriate to change the procedures assigned among these CMS DRGs. Under the MS–DRGs that we adopted for FY 2008, CMS DRG 468 was split three ways and became MS–DRGs 981, 982, and 983 (Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively). CMS DRG 476 became MS–DRGs 984, 985, and 986 (Prostatic O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively). CMS DRG 477 became MS–DRGs 987, 988, and 989 (Nonextensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, and without CC/MCC, respectively).

MS–DRGs 981 through 983, 984 through 986, and 987 through 989 (formerly CMS DRGs 468, 476, and 477, respectively) are reserved for those cases in which none of the O.R. procedures performed are related to the principal diagnosis. These MS–DRGs are intended to capture atypical cases, that is, those cases not occurring with sufficient frequency to represent a distinct, recognizable clinical group. MS–DRGs 984 through 986 (previously CMS DRG 476) are assigned to those discharges in which one or more of the following prostatic procedures are performed and are unrelated to the principal diagnosis:

- 60.0 (Incision of prostate);
- 60.12 (Open biopsy of prostate);
- 60.15 (Biopsy of periprostatic tissue);
- 60.18 (Other diagnostic procedures on prostate and periprostatic tissue);
- 60.21 (Transurethral prostatectomy);
- 60.29 (Other transurethral prostatectomy);
- 60.61 (Local excision of lesion of prostate);
- 60.69 (Prostatectomy, not elsewhere classified);
- 60.81 (Incision of periprostatic tissue);
- 60.82 (Excision of periprostatic tissue);
- 60.93 (Repair of prostate);
- 60.94 (Control of (postoperative) hemorrhage of prostate);
- 60.95 (Transurethral balloon dilation of the prostatic urethra);
- 60.96 (Transurethral destruction of prostate tissue by microwave thermotherapy);
- 60.97 (Other transurethral destruction of prostate tissue by other thermotherapy); and
- 60.99 (Other operations on prostate).

All remaining O.R. procedures are assigned to MS–DRGs 981 through 983 and 987 through 989, with MS–DRGs 987 through 989 assigned to those discharges in which the only procedures performed are nonextensive procedures that are unrelated to the principal diagnosis.[7]

Our review of MedPAR claims data showed that there are no cases that merited movement or should logically be assigned to any of the other MDCs. Therefore, for FY 2016, we did not propose to change the procedures assigned among these MS–DRGs. We invited public comments on our proposal.

We did not receive any public comments on our proposal and, therefore, are adopting it as final.

a. Moving Procedure Codes From MS–DRGs 981 Through 983 or MS–DRGs 987 Through 989 into MDCs

We annually conduct a review of procedures producing assignment to MS–DRGs 981 through 983 (Extensive

[7] The original list of the ICD–9–CM procedure codes for the procedures we consider nonextensive procedures, if performed with an unrelated principal diagnosis, was published in Table 6C in section IV. of the Addendum to the FY 1989 final rule (53 FR 38591). As part of the FY 1991 final rule (55 FR 36135), the FY 1992 final rule (56 FR 43212), the FY 1993 final rule (57 FR 23625), the FY 1994 final rule (58 FR 46279), the FY 1995 final rule (59 FR 45336), the FY 1996 final rule (60 FR 45783), the FY 1997 final rule (61 FR 46173), and the FY 1998 final rule (62 FR 45981), we moved several other procedures from DRG 468 to DRG 477, and some procedures from DRG 477 to DRG 468. No procedures were moved in FY 1999, as noted in the final rule (63 FR 40962), in the FY 2000 (64 FR 41496), in the FY 2001 (65 FR 47064), or in the FY 2002 (66 FR 39852). In the FY 2003 final rule (67 FR 49999), we did not move any procedures from DRG 477. However, we did move procedure codes from DRG 468 and placed them in more clinically coherent DRGs. In the FY 2004 final rule (68 FR 45365), we moved several procedures from DRG 468 to DRGs 476 and 477 because the procedures are nonextensive. In the FY 2005 final rule (69 FR 48950), we moved one procedure from DRG 468 to 477. In addition, we added several existing procedures to DRGs 476 and 477. In FY 2006 (70 FR 47317), we moved one procedure from DRG 468 and assigned it to DRG 477. In FY 2007, we moved one procedure from DRG 468 and assigned it to DRGs 479, 553, and 554. In FYs 2008, 2009, 2010, 2011, 2012, 2013, 2014, and 2015, no procedures were moved, as noted in the FY 2008 final rule with comment period (72 FR 46241), in the FY 2009 final rule (73 FR 48513), in the FY 2010 final rule (74 FR 43796), in the FY 2011 final rule (75 FR 50122), in the FY 2012 final rule (76 FR 51549), in the FY 2013 final rule (77 FR 53321), in the FY 2014 final rule (78 FR 50545); and in the FY 2015 final rule (79 FR 49906).

O.R. procedure unrelated to principal diagnosis with MCC, with CC, and without CC/MCC, respectively) or MS–DRGs 987 through 989 (Nonextensive O.R. procedure unrelated to principal diagnosis with MCC, with CC, and without CC/MCC, respectively) on the basis of volume, by procedure, to see if it would be appropriate to move procedure codes out of these MS–DRGs into one of the surgical MS–DRGs for the MDC into which the principal diagnosis falls. The data are arrayed in two ways for comparison purposes. We look at a frequency count of each major operative procedure code. We also compare procedures across MDCs by volume of procedure codes within each MDC.

We identify those procedures occurring in conjunction with certain principal diagnoses with sufficient frequency to justify adding them to one of the surgical MS–DRGs for the MDC in which the diagnosis falls. As noted above, there are no cases that merited movement or that should logically be assigned to any of the other MDCs. Therefore, for FY 2016, we did not propose to remove any procedures from MS–DRGs 981 through 983 or MS–DRGs 987 through 989 into one of the surgical MS–DRGs for the MDC into which the principal diagnosis is assigned. We invited public comments on our proposal.

We did not receive any public comments on our proposal and, therefore, are adopting it as final.

b. Reassignment of Procedures Among MS DRGs 981 Through 983, 984 Through 986, and 987 Through 989

(1) Annual Review of Procedures

We also annually review the list of ICD–9–CM procedures that, when in combination with their principal diagnosis code, result in assignment to MS–DRGs 981 through 983, 984 through 986 (Prostatic O.R. procedure unrelated to principal diagnosis with MCC, with CC, or without CC/MCC, respectively), and 987 through 989, to ascertain whether any of those procedures should be reassigned from one of these three MS DRGs to another of the three MS–DRGs based on average costs and the length of stay. We look at the data for trends such as shifts in treatment practice or reporting practice that would make the resulting MS–DRG assignment illogical. If we find these shifts, we would propose to move cases to keep the MS–DRGs clinically similar or to provide payment for the cases in a similar manner. Generally, we move only those procedures for which we have an adequate number of discharges to analyze the data.

There are no cases representing shifts in treatment practice or reporting practice that would make the resulting MS–DRG assignment illogical, or that merited movement so that cases should logically be assigned to any of the other MDCs. Therefore, for FY 2016, we did not propose to move any procedure codes among these MS–DRGs.

We did not receive any public comments on our proposal and, therefore, are adopting it as final.

(2) Review of Cases With Endovascular Embolization Procedures for Epistaxis

During the comment period for the FY 2015 IPPS/LTCH PPS proposed rule, we received a public comment expressing concern regarding specific procedure codes that are assigned to MS–DRGs 981 through 983; 984 through 986; and 987 through 989 in relation to our discussion of the annual review of these MS–DRGs in section II.G.12. of that proposed rule (79 FR 28020). The commenter noted that the endovascular embolization of the arteries of the branches of the internal maxillary artery is frequently performed for intractable posterior epistaxis (nosebleed). The commenter stated that, currently, diagnosis code 784.7 (Epistaxis) reported with procedure codes 39.75 (Endovascular embolization or occlusion of vessel(s) of head or neck using bare coils) and 39.76 (Endovascular embolization or occlusion of vessel(s) of head or neck using bioactive coils) groups to MS–DRGs 981, 982, and 983. The commenter indicated that it also found this grouping with the ICD–10 MS–DRGs Version 31 using ICD–10–CM diagnosis code R04.0 (Epistaxis) reported with artery occlusion procedure codes. The commenter requested that CMS review these groupings and consider the possibility of reassigning these epistaxis cases with endovascular embolization procedure codes into a more specific MS–DRG.

We considered this public comment to be outside of the scope of the FY 2015 IPPS/LTCH PPS proposed rule and, therefore, did not address it in the FY 2015 IPPS/LTCH PPS final rule. However, we indicated that we would consider this public comment for possible proposals in future rulemaking as part of our annual review process.

ICD–10–PCS provides more detailed codes for endovascular embolization or occlusion of vessel(s) of head or neck using bare coils and bioactive coils which are listed in the following table:

ICD–10–PCS Codes for Endovascular Embolization or Occlusion of Vessel(s) of Head or Neck Using Bare Coils and Bioactive Coils

ICD–10–PCS code	Code description
03LG0BZ	Occlusion of intracranial artery with bioactive intraluminal device, open approach.
03LG0DZ	Occlusion of intracranial artery with intraluminal device, open approach.
03LG3BZ	Occlusion of intracranial artery with bioactive intraluminal device, percutaneous approach.
03LG3DZ	Occlusion of intracranial artery with intraluminal device, percutaneous approach.
03LG4BZ	Occlusion of intracranial artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LG4DZ	Occlusion of intracranial artery with intraluminal device, percutaneous endoscopic approach.
03LH0BZ	Occlusion of right common carotid artery with bioactive intraluminal device, open approach.
03LH0DZ	Occlusion of right common carotid artery with intraluminal device, open approach.
03LH3BZ	Occlusion of right common carotid artery with bioactive intraluminal device, percutaneous approach.
03LH3DZ	Occlusion of right common carotid artery with intraluminal device, percutaneous approach.
03LH4BZ	Occlusion of right common carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.

03LJ0BZ	Occlusion of left common carotid artery with bioactive intraluminal device, open approach.
03LJ0DZ	Occlusion of left common carotid artery with intraluminal device, open approach.
03LJ3BZ	Occlusion of left common carotid artery with bioactive intraluminal device, percutaneous approach.
03LJ3DZ	Occlusion of left common carotid artery with intraluminal device, percutaneous approach.
03LJ4BZ	Occlusion of left common carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LJ4DZ	Occlusion of left common carotid artery with intraluminal device, percutaneous endoscopic approach.

ICD–10–PCS CODES FOR ENDOVASCULAR EMBOLIZATION OR OCCLUSION OF VESSEL(S) OF HEAD OR NECK USING BARE COILS AND BIOACTIVE COILS—Continued

ICD–10–PCS code	Code description
03LK0BZ	Occlusion of right internal carotid artery with bioactive intraluminal device, open approach.
03LK0DZ	Occlusion of right internal carotid artery with intraluminal device, open approach.
03LK3BZ	Occlusion of right internal carotid artery with bioactive intraluminal device, percutaneous approach.
03LK3DZ	Occlusion of right internal carotid artery with intraluminal device, percutaneous approach.
03LK4BZ	Occlusion of right internal carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LK4DZ	Occlusion of right internal carotid artery with intraluminal device, percutaneous endoscopic approach.
03LL0BZ	Occlusion of left internal carotid artery with bioactive intraluminal device, open approach.
03LL0DZ	Occlusion of left internal carotid artery with intraluminal device, open approach.
03LL3BZ	Occlusion of left internal carotid artery with bioactive intraluminal device, percutaneous approach.
03LL3DZ	Occlusion of left internal carotid artery with intraluminal device, percutaneous approach.
03LL4BZ	Occlusion of left internal carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LL4DZ	Occlusion of left internal carotid artery with intraluminal device, percutaneous endoscopic approach.
03LM0BZ	Occlusion of right external carotid artery with bioactive intraluminal device, open approach.
03LM0DZ	Occlusion of right external carotid artery with intraluminal device, open approach.
03LM3BZ	Occlusion of right external carotid artery with bioactive intraluminal device, percutaneous approach.
03LM3DZ	Occlusion of right external carotid artery with intraluminal device, percutaneous approach.
03LM4BZ	Occlusion of right external carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LM4DZ	Occlusion of right external carotid artery with intraluminal device, percutaneous endoscopic approach.
03LN0BZ	Occlusion of left external carotid artery with bioactive intraluminal device, open approach.
03LN0DZ	Occlusion of left external carotid artery with intraluminal device, open approach.
03LN3BZ	Occlusion of left external carotid artery with bioactive intraluminal device, percutaneous approach.
03LN3DZ	Occlusion of left external carotid artery with intraluminal device, percutaneous approach.
03LN4BZ	Occlusion of left external carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LN4DZ	Occlusion of left external carotid artery with intraluminal device, percutaneous endoscopic approach.
03LP0BZ	Occlusion of right vertebral artery with bioactive intraluminal device, open approach.
03LP0DZ	Occlusion of right vertebral artery with intraluminal device, open approach.
03LP3BZ	Occlusion of right vertebral artery with bioactive intraluminal device, percutaneous approach.
03LP3DZ	Occlusion of right vertebral artery with intraluminal device, percutaneous approach.
03LP4BZ	Occlusion of right vertebral artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LP4DZ	Occlusion of right vertebral artery with intraluminal device, percutaneous endoscopic approach.
03LQ0BZ	Occlusion of left vertebral artery with bioactive intraluminal device, open approach.
03LQ0DZ	Occlusion of left vertebral artery with intraluminal device, open approach.
03LQ3BZ	Occlusion of left vertebral artery with bioactive intraluminal device, percutaneous approach.
03LQ3DZ	Occlusion of left vertebral artery with intraluminal device, percutaneous approach.
03LQ4BZ	Occlusion of left vertebral artery with bioactive intraluminal device, percutaneous endoscopic approach.
03LQ4DZ	Occlusion of left vertebral artery with intraluminal device, percutaneous endoscopic approach.
03VG0BZ	Restriction of intracranial artery with bioactive intraluminal device, open approach.
03VG0DZ	Restriction of intracranial artery with intraluminal device, open approach.
03VG3BZ	Restriction of intracranial artery with bioactive intraluminal device, percutaneous approach.
03VG3DZ	Restriction of intracranial artery with intraluminal device, percutaneous approach.
03VG4BZ	Restriction of intracranial artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VG4DZ	Restriction of intracranial artery with intraluminal device, percutaneous endoscopic approach.
03VH0BZ	Restriction of right common carotid artery with bioactive intraluminal device, open approach.
03VH0DZ	Restriction of right common carotid artery with intraluminal device, open approach.
03VH3BZ	Restriction of right common carotid artery with bioactive intraluminal device, percutaneous approach.
03VH3DZ	Restriction of right common carotid artery with intraluminal device, percutaneous approach.
03VH4BZ	Restriction of right common carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VH4DZ	Restriction of right common carotid artery with intraluminal device, percutaneous endoscopic approach.
03VJ0BZ	Restriction of left common carotid artery with bioactive intraluminal device, open approach.
03VJ0DZ	Restriction of left common carotid artery with intraluminal device, open approach.
03VJ3BZ	Restriction of left common carotid artery with bioactive intraluminal device, percutaneous approach.
03VJ3DZ	Restriction of left common carotid artery with intraluminal device, percutaneous approach.
03VJ4BZ	Restriction of left common carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VJ4DZ	Restriction of left common carotid artery with intraluminal device, percutaneous endoscopic approach.
03VK0BZ	Restriction of right internal carotid artery with bioactive intraluminal device, open approach.
03VK0DZ	Restriction of right internal carotid artery with intraluminal device, open approach.
03VK3BZ	Restriction of right internal carotid artery with bioactive intraluminal device, percutaneous approach.
03VK3DZ	Restriction of right internal carotid artery with intraluminal device, percutaneous approach.
03VK4BZ	Restriction of right internal carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VK4DZ	Restriction of right internal carotid artery with intraluminal device, percutaneous endoscopic approach.
03VL0BZ	Restriction of left internal carotid artery with bioactive intraluminal device, open approach.
03VL0DZ	Restriction of left internal carotid artery with intraluminal device, open approach.
03VL3BZ	Restriction of left internal carotid artery with bioactive intraluminal device, percutaneous approach.
03VL3DZ	Restriction of left internal carotid artery with intraluminal device, percutaneous approach.
03VL4BZ	Restriction of left internal carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VL4DZ	Restriction of left internal carotid artery with intraluminal device, percutaneous endoscopic approach.
03VM0BZ	Restriction of right external carotid artery with bioactive intraluminal device, open approach.
03VM0DZ	Restriction of right external carotid artery with intraluminal device, open approach.
03VM3BZ	Restriction of right external carotid artery with bioactive intraluminal device, percutaneous approach.
03VM3DZ	Restriction of right external carotid artery with intraluminal device, percutaneous approach.

ICD–10–PCS CODES FOR ENDOVASCULAR EMBOLIZATION OR OCCLUSION OF VESSEL(S) OF HEAD OR NECK USING BARE COILS AND BIOACTIVE COILS—Continued

ICD–10–PCS code	Code description
03VM4BZ	Restriction of right external carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VM4DZ	Restriction of right external carotid artery with intraluminal device, percutaneous endoscopic approach.
03VN0BZ	Restriction of left external carotid artery with bioactive intraluminal device, open approach.
03VN0DZ	Restriction of left external carotid artery with intraluminal device, open approach.
03VN3BZ	Restriction of left external carotid artery with bioactive intraluminal device, percutaneous approach.
03VN3DZ	Restriction of left external carotid artery with intraluminal device, percutaneous approach.
03VN4BZ	Restriction of left external carotid artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VN4DZ	Restriction of left external carotid artery with intraluminal device, percutaneous endoscopic approach.
03VP0BZ	Restriction of right vertebral artery with bioactive intraluminal device, open approach.
03VP0DZ	Restriction of right vertebral artery with intraluminal device, open approach.
03VP3BZ	Restriction of right vertebral artery with bioactive intraluminal device, percutaneous approach.
03VP3DZ	Restriction of right vertebral artery with intraluminal device, percutaneous approach.
03VP4BZ	Restriction of right vertebral artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VP4DZ	Restriction of right vertebral artery with intraluminal device, percutaneous endoscopic approach.
03VQ0BZ	Restriction of left vertebral artery with bioactive intraluminal device, open approach.
03VQ0DZ	Restriction of left vertebral artery with intraluminal device, open approach.
03VQ3BZ	Restriction of left vertebral artery with bioactive intraluminal device, percutaneous approach.
03VQ3DZ	Restriction of left vertebral artery with intraluminal device, percutaneous approach.
03VQ4BZ	Restriction of left vertebral artery with bioactive intraluminal device, percutaneous endoscopic approach.
03VQ4DZ	Restriction of left vertebral artery with intraluminal device, percutaneous endoscopic approach.
03VR0DZ	Restriction of face artery with intraluminal device, open approach.
03VR3DZ	Restriction of face artery with intraluminal device, percutaneous approach.
03VR4DZ	Restriction of face artery with intraluminal device, percutaneous endoscopic approach.
03VS0DZ	Restriction of right temporal artery with intraluminal device, open approach.
03VS3DZ	Restriction of right temporal artery with intraluminal device, percutaneous approach.
03VS4DZ	Restriction of right temporal artery with intraluminal device, percutaneous endoscopic approach.
03VT0DZ	Restriction of left temporal artery with intraluminal device, open approach.
03VT3DZ	Restriction of left temporal artery with intraluminal device, percutaneous approach.
03VT4DZ	Restriction of left temporal artery with intraluminal device, percutaneous endoscopic approach.
03VU0DZ	Restriction of right thyroid artery with intraluminal device, open approach.
03VU3DZ	Restriction of right thyroid artery with intraluminal device, percutaneous approach.
03VU4DZ	Restriction of right thyroid artery with intraluminal device, percutaneous endoscopic approach.
03VV0DZ	Restriction of left thyroid artery with intraluminal device, open approach.
03VV3DZ	Restriction of left thyroid artery with intraluminal device, percutaneous approach.
03VV4DZ	Restriction of left thyroid artery with intraluminal device, percutaneous endoscopic approach.

We examined claims data from the December 2014 update of the FY 2014 MedPAR file for cases with diagnosis code 784.7 reported with procedure codes 39.75 and 39.76 in MS–DRGs 981, 982, and 983. The following table shows our findings.

ENDOVASCULAR EMBOLIZATION PROCEDURES FOR EPISTAXIS

MS–DRG	Number of cases	Average length of stay	Average costs
MS–DRG 981—All cases	21,118	12.38	$33,080
MS–DRG 981—Epistaxis cases with principal diagnosis code 784.7 and procedure code 39.75	8	6.50	34,655
MS–DRG 981—Epistaxis cases with principal diagnosis code 784.7 and procedure code 39.76	2	12.50	50,081
MS–DRG 982—All cases	13,657	7.14	19,392
MS–DRG 982—Epistaxis cases with principal diagnosis code 784.7 and procedure code 39.75	22	3.14	17,725
MS–DRG 982—Epistaxis cases with principal diagnosis code 784.7 and procedure code 39.76	2	2.0	11,010
MS–DRG 983—All cases	2,989	3.60	12,760
MS–DRG 983—Epistaxis cases with principal diagnosis code 784.7 and procedure code 39.75	5	2.60	10,532
MS–DRG 983—Epistaxis cases with principal diagnosis code 784.7 and procedure code 39.76	4	1.50	16,658

We found only 35 epistaxis cases with procedure code 39.75 reported and 8 cases with procedure code 39.76 reported among MS–DRGs 981, 982, and 983. The use of endovascular embolizations for epistaxis appears to be rare. The average costs for the cases with procedure code 39.75 in MS–DRGs 981, 982, and 983 are similar to the average costs for all cases in MS–DRGs 981, 982, and 983, respectively. The average costs for the cases with procedure code 39.75 in MS–DRGs 981, 982, and 983 were $34,655, $17,725, and $10,532, respectively, compared to $33,080, $19,392, and $12,760 for all cases in MS–DRGs 981, 982, and 983. The average costs for cases with procedure code 39.76 in MS–DRGs 981, 982, and 983 were $50,081, $11,010, and $16,658, respectively, and were significantly greater than all cases in MS–DRGs 981 and 983. However, as stated earlier, there were only 8 cases reported with procedure code 39.76. As explained previously, MS–DRGs 981, 982, and 983 were created for operating

room procedures that are unrelated to the principal diagnosis. Because there were so few cases reported, this does not appear to be a common procedure for epistaxis. There were not enough cases to base a change of MS–DRG assignment for these cases.

Our clinical advisors reviewed this issue and did not identify any new MS–DRG assignment that would be more appropriate for these rare cases. They advised us to maintain the current MS–DRG structure within MS–DRGs 981, 982, and 983.

Based on the results of the examination of the claims data and the recommendations from our clinical advisors, in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24403 through 24405), we did not propose to create new MS–DRG assignments for epistaxis cases receiving endovascular embolization procedures. We proposed to maintain the current MS–DRG structure for epistaxis cases receiving endovascular embolization procedures and did not propose any updates to MS–DRGs 981, 982, and 983. We invited public comments on our proposal.

Comment: A number of commenters supported the proposal. The commenters stated that the proposal was reasonable, given the data and information provided.

Response: We appreciate the commenters' support for our proposal.

After consideration of the public comments we received, we are finalizing our proposal to maintain the current MS–DRG structure for epistaxis cases receiving endovascular embolization procedures and not make any updates to MS–DRGs 981, 982, and 983.

c. Adding Diagnosis or Procedure Codes to MDCs

Based on the review of cases in the MDCs, as described above in sections II.G.2. through 7. of the preamble of this final rule, we did not propose to add any diagnosis or procedure codes to MDCs for FY 2016. We invited public comments on our proposal.

We did not receive any public comments on our proposal and, therefore, are adopting it as final.

13. Changes to the ICD–9–CM System

a. ICD–10 Coordination and Maintenance Committee

In September 1985, the ICD–9–CM Coordination and Maintenance Committee was formed. This is a Federal interdepartmental committee, co-chaired by the National Center for Health Statistics (NCHS), the Centers for Disease Control and Prevention, and CMS, charged with maintaining and updating the ICD–9–CM system. The final update to ICD–9–CM codes was to be made on October 1, 2013. Thereafter, the name of the Committee was changed to the ICD–10 Coordination and Maintenance Committee, effective with the March 19–20, 2014 meeting. The ICD–10 Coordination and Maintenance Committee addresses updates to the ICD–10–CM, ICD–10–PCS, and ICD–9–CM coding systems. The Committee is jointly responsible for approving coding changes, and developing errata, addenda, and other modifications to the coding systems to reflect newly developed procedures and technologies and newly identified diseases. The Committee is also responsible for promoting the use of Federal and non-Federal educational programs and other communication techniques with a view toward standardizing coding applications and upgrading the quality of the classification system.

The official list of ICD–9–CM diagnosis and procedure codes by fiscal year can be found on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/codes.html.* The official list of ICD–10–CM and ICD–10–PCS codes can be found on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/index.html,*

The NCHS has lead responsibility for the ICD–10–CM and ICD–9–CM diagnosis codes included in the Tabular List and Alphabetic Index for Diseases, while CMS has lead responsibility for the ICD–10–PCS and ICD–9–CM procedure codes included in the Tabular List and Alphabetic Index for Procedures.

The Committee encourages participation in the above process by health-related organizations. In this regard, the Committee holds public meetings for discussion of educational issues and proposed coding changes. These meetings provide an opportunity for representatives of recognized organizations in the coding field, such as the American Health Information Management Association (AHIMA), the American Hospital Association (AHA), and various physician specialty groups, as well as individual physicians, health information management professionals, and other members of the public, to contribute ideas on coding matters. After considering the opinions expressed at the public meetings and in writing, the Committee formulates recommendations, which then must be approved by the agencies.

The Committee presented proposals for coding changes for implementation in FY 2016 at a public meeting held on September 23–24, 2014, and finalized the coding changes after consideration of comments received at the meetings and in writing by November 15, 2014.

The Committee held its 2015 meeting on March 18–19, 2015. It was announced at this meeting that any new ICD–10–CM/PCS codes for which there was consensus of public support and for which complete tabular and indexing changes would be made by May 2015 would be included in the October 1, 2015 update to ICD–10–CM/ICD–10–PCS. For FY 2016, there are no new, revised, or deleted ICD–10–CM diagnosis codes. For FY 2016, there are new ICD–10–PCS procedure codes that are included in Table 6B (New Procedure Codes). However, there are no revised or deleted ICD–10–PCS procedure codes. There also are no new ICD–9–CM diagnosis or procedure codes because ICD–9–CM will be replaced by ICD–10–CM/ICD–10–PCS for services provided on or after October 1, 2015.

Copies of the agenda, handouts, and access to the live stream videos for the procedure codes discussions at the Committee's September 23–24, 2014 meeting and March 18–19, 2015 meeting can be obtained from the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/index.html?redirect=/icd9ProviderDiagnosticCodes/03_meetings.asp.* The agenda, handouts and minutes of the diagnosis codes discussions at the September 23–24, 2014 meeting and March 18–19, 2015 meeting are found at: *http://www.cdc.gov/nchs/icd/icd9cm-maintenance.html.* These Web sites also provide detailed information about the Committee, including information on requesting a new code, attending a Committee meeting, timeline requirements and meeting dates.

We encourage commenters to address suggestions on coding issues involving diagnosis codes to: Donna Pickett, Co-Chairperson, ICD–10 Coordination and Maintenance Committee, NCHS, Room 2402, 3311 Toledo Road, Hyattsville, MD 20782. Comments may be sent by Email to: *dfp4@cdc.gov.*

Questions and comments concerning the procedure codes should be addressed to: Patricia Brooks, Co-Chairperson, ICD–10 Coordination and Maintenance Committee, CMS, Center for Medicare, Hospital and Ambulatory Policy Group, Division of Acute Care, C4–08–06, 7500 Security Boulevard, Baltimore, MD 21244–1850. Comments may be sent by Email to: *patricia.brooks2@cms.hhs.gov.*

In the September 7, 2001 final rule implementing the IPPS new technology add-on payments (66 FR 46906), we

indicated we would attempt to include proposals for procedure codes that would describe new technology discussed and approved at the Spring meeting as part of the code revisions effective the following October.

Section 503(a) of Public Law 108–173 included a requirement for updating ICD–9–CM codes twice a year instead of a single update on October 1 of each year. This requirement was included as part of the amendments to the Act relating to recognition of new technology under the IPPS. Section 503(a) amended section 1886(d)(5)(K) of the Act by adding a clause (vii) which states that the Secretary shall provide for the addition of new diagnosis and procedure codes on April 1 of each year, but the addition of such codes shall not require the Secretary to adjust the payment (or diagnosis-related group classification) until the fiscal year that begins after such date. This requirement improves the recognition of new technologies under the IPPS system by providing information on these new technologies at an earlier date. Data will be available 6 months earlier than would be possible with updates occurring only once a year on October 1.

While section 1886(d)(5)(K)(vii) of the Act states that the addition of new diagnosis and procedure codes on April 1 of each year shall not require the Secretary to adjust the payment, or DRG classification, under section 1886(d) of the Act until the fiscal year that begins after such date, we have to update the DRG software and other systems in order to recognize and accept the new codes. We also publicize the code changes and the need for a mid-year systems update by providers to identify the new codes. Hospitals also have to obtain the new code books and encoder updates, and make other system changes in order to identify and report the new codes.

The ICD–10 (previously the ICD–9–CM) Coordination and Maintenance Committee holds its meetings in the spring and fall in order to update the codes and the applicable payment and reporting systems by October 1 of each year. Items are placed on the agenda for the Committee meeting if the request is received at least 2 months prior to the meeting. This requirement allows time for staff to review and research the coding issues and prepare material for discussion at the meeting. It also allows time for the topic to be publicized in meeting announcements in the **Federal Register** as well as on the CMS Web site. The public decides whether or not to attend the meeting based on the topics listed on the agenda. Final decisions on code title revisions are currently made by March 1 so that these titles can be included in the IPPS proposed rule. A complete addendum describing details of all diagnosis and procedure coding changes, both tabular and index, is published on the CMS and NCHS Web sites in May of each year. Publishers of coding books and software use this information to modify their products that are used by health care providers. This 5-month time period has proved to be necessary for hospitals and other providers to update their systems.

A discussion of this timeline and the need for changes are included in the December 4–5, 2005 ICD–9–CM Coordination and Maintenance Committee Meeting minutes. The public agreed that there was a need to hold the fall meetings earlier, in September or October, in order to meet the new implementation dates. The public provided comment that additional time would be needed to update hospital systems and obtain new code books and coding software. There was considerable concern expressed about the impact this new April update would have on providers.

In the FY 2005 IPPS final rule, we implemented section 1886(d)(5)(K)(vii) of the Act, as added by section 503(a) of Public Law 108–173, by developing a mechanism for approving, in time for the April update, diagnosis and procedure code revisions needed to describe new technologies and medical services for purposes of the new technology add-on payment process. We also established the following process for making these determinations. Topics considered during the Fall ICD–10 (previously ICD–9–CM) Coordination and Maintenance Committee meeting are considered for an April 1 update if a strong and convincing case is made by the requestor at the Committee's public meeting. The request must identify the reason why a new code is needed in April for purposes of the new technology process. The participants at the meeting and those reviewing the Committee meeting summary report are provided the opportunity to comment on this expedited request. All other topics are considered for the October 1 update. Participants at the Committee meeting are encouraged to comment on all such requests. There were no requests approved for an expedited April l, 2015 implementation of a code at the September 23–24, 2014 Committee meeting. Therefore, there were no new codes implemented on April 1, 2015.

ICD–9–CM addendum and code title information is published on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/index.html?redirect=/icd9ProviderDiagnosticCodes/01overview.asp#TopofPage*. ICD–10–CM and ICD–10–PCS addendum and code title information is published on the CMS Web site at *http://www.cms.gov/Medicare/Coding/ICD10/index.html*. Information on ICD–10–CM diagnosis codes, along with the Official ICD–10–CM Coding Guidelines, can also be found on the CDC Web site at: *http://www.cdc.gov/nchs/index.html*. Information on new, revised, and deleted ICD–10–CM/ICD–10–PCS codes is also provided to the AHA for publication in the *Coding Clinic for ICD–10.* AHA also distributes information to publishers and software vendors.

CMS also sends copies of all ICD–10–CM and ICD–10–PCS coding changes to its Medicare contractors for use in updating their systems and providing education to providers.

The code titles are adopted as part of the ICD–10 (previously ICD–9–CM) Coordination and Maintenance Committee process. Therefore, although we publish the code titles in the IPPS proposed and final rules, they are not subject to comment in the proposed or final rules.

b. Code Freeze

In the January 16, 2009 ICD–10–CM and ICD–10–PCS final rule (74 FR 3340), there was a discussion of the need for a partial or total freeze in the annual updates to both ICD–9–CM and ICD–10–CM and ICD–10–PCS codes. The public comment addressed in that final rule stated that the annual code set updates should cease l year prior to the implementation of ICD–10. The commenters stated that this freeze of code updates would allow for instructional and/or coding software programs to be designed and purchased early, without concern that an upgrade would take place immediately before the compliance date, necessitating additional updates and purchases.

HHS responded to comments in the ICD–10 final rule that the ICD–9–CM Coordination and Maintenance Committee has jurisdiction over any action impacting the ICD–9–CM and ICD–10 code sets. Therefore, HHS indicated that the issue of consideration of a moratorium on updates to the ICD–9–CM, ICD–10–CM, and ICD–10–PCS code sets in anticipation of the adoption of ICD–10–CM and ICD–10–PCS would be addressed through the Committee at a future public meeting.

The code freeze was discussed at multiple meetings of the ICD–9–CM Coordination and Maintenance

Committee and public comment was actively solicited. The Committee evaluated all comments from participants attending the Committee meetings as well as written comments that were received. The Committee also considered the delay in implementation of ICD–10 until October 1, 2014. There was an announcement at the September 19, 2012 ICD–9–CM Coordination and Maintenance Committee meeting that a partial freeze of both ICD–9–CM and ICD–10 codes will be implemented as follows:

- The last regular annual update to both ICD–9–CM and ICD–10 code sets was made on October 1, 2011.
- On October 1, 2012 and October 1, 2013, there were to be only limited code updates to both ICD–9–CM and ICD–10 code sets to capture new technology and new diseases.
- On October 1, 2014, there were to be only limited code updates to ICD–10 code sets to capture new technology and diagnoses as required by section 503(a) of Public Law 108–173. There were to be no updates to ICD–9–CM on October 1, 2014.
- On October 1, 2015, one year after the originally scheduled implementation of ICD–10, regular updates to ICD–10 were to begin.

On May 15, 2014, CMS posted an updated Partial Code Freeze schedule on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/ICD-9-CM-Coordination-and-Maintenance-Committee-Meetings.html*. This updated schedule provided information on the extension of the partial code freeze until 1 year after the implementation of ICD–10. As stated earlier, on April 1, 2014, the Protecting Access to Medicare Act of 2014 (PAMA) (Pub. L. 113–93) was enacted, which specified that the Secretary may not adopt ICD–10 prior to October 1, 2015. Accordingly, the U.S. Department of Health and Human Services released a final rule in the **Federal Register** on August 4, 2014 (79 FR 45128 through 45134) that included a new compliance date that requires the use of ICD–10 beginning October 1, 2015. The August 4, 2014 final rule is available for viewing on the Internet at: *http://www.gpo.gov/fdsys/pkg/FR-2014-08-04/pdf/2014-18347.pdf*. That final rule also requires HIPAA covered entities to continue to use ICD–9–CM through September 30, 2015. Accordingly, the updated schedule for the partial code freeze is as follows:

- The last regular annual updates to both ICD–9–CM and ICD–10 code sets were made on October 1, 2011.
- On October 1, 2012, October 1, 2013, and October 1, 2014, there were only limited code updates to both the ICD–9–CM and ICD–10 code sets to capture new technologies and diseases as required by section 1886(d)(5)(K) of the Act.
- On October 1, 2015, there will be only limited code updates to ICD–10 code sets to capture new technologies and diagnoses as required by section 1886(d)(5)(K) of the Act. There will be no updates to ICD–9–CM, as it will no longer be used for reporting.
- On October 1, 2016 (1 year after implementation of ICD–10), regular updates to ICD–10 will begin.

The ICD–10 (previously ICD–9–CM) Coordination and Maintenance Committee announced that it would continue to meet twice a year during the freeze. At these meetings, the public will be encouraged to comment on whether or not requests for new diagnosis and procedure codes should be created based on the need to capture new technology and new diseases. Any code requests that do not meet the criteria will be evaluated for implementation within ICD–10 one year after the implementation of ICD–10, once the partial freeze is ended.

Complete information on the partial code freeze and discussions of the issues at the Committee meetings can be found on the ICD–10 Coordination and Maintenance Committee Web site at: *http://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/meetings.html*. A summary of the September 19, 2012 Committee meeting, along with both written and audio transcripts of this meeting, is posted on the Web site at: *http://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/ICD-9-CM-C-and-M-Meeting-Materials-Items/2012-09-19-MeetingMaterials.html*.

This partial code freeze has dramatically decreased the number of codes created each year as shown by the following information.

TOTAL NUMBER OF CODES AND CHANGES IN TOTAL NUMBER OF CODES PER FISCAL YEAR

ICD–9–CM Codes			ICD–10–CM and ICD–10–PCS Codes		
Fiscal Year	Number	Change	Fiscal Year	Number	Change
FY 2009 (October 1, 2008):			FY 2009:		
Diagnoses	14,025	348	ICD–10–CM	68,069	+5
Procedures	3,824	56	ICD–10–PCS	72,589	−14,327
FY 2010 (October 1, 2009):			FY 2010:		
Diagnoses	14,315	290	ICD–10–CM	69,099	+1,030
Procedures	3,838	14	ICD–10–PCS	71,957	−632
FY 2011 (October 1, 2010):					
Diagnoses	14,432	117	ICD–10–CM	69,368	+269
Procedures	3,859	21	ICD–10–PCS	72,081	+124
FY 2012 (October 1, 2011):			FY 2012:		
Diagnoses	14,567	135	ICD–10–CM	69,833	+465
Procedures	3,877	18	ICD–10–PCS	71,918	−163
FY 2013 (October 1, 2012):			FY 2013:		
Diagnoses	14,567	0	ICD–10–CM	69,832	−1
Procedures	3,878	1	ICD–10–PCS	71,920	+2
FY 2014 (October 1, 2013):			FY 2014:		
Diagnoses	14,567	0	ICD–10–CM	69,823	−9
Procedures	3,882	4	ICD–10–PCS	71,924	+4
FY 2015 (October 1, 2014):			FY 2015:		
Diagnoses	14,567	0	ICD–10–CM	69,823	0
Procedures	3,882	0	ICD–10–PCS	71,924	0
FY 2016 (October 1, 2015):			FY 2016:		
Diagnoses	14,567	0	ICD–10–CM	69,823	0
Procedures	3,882	0	ICD–10–PCS	71,974	+50

As mentioned earlier, the public is provided the opportunity to comment on any requests for new diagnosis or procedure codes discussed at the ICD–10 Coordination and Maintenance Committee meeting. The public has supported only a limited number of new codes during the partial code freeze, as can be seen by data shown above. We have gone from creating several hundred new codes each year to creating only a limited number of new ICD–9–CM and ICD–10 codes.

At the September 23–24, 2014 and March 18–19, 2015 Committee meetings, we discussed any requests we had received for new ICD–10–CM diagnosis and ICD–10–PCS procedure codes that were to be implemented on October 1, 2015. We did not discuss ICD–9–CM codes. The public was given the opportunity to comment on whether or not new ICD–10–CM and ICD–10–PCS codes should be created, based on the partial code freeze criteria. The public was to use the criteria as to whether codes were needed to capture new diagnoses or new technologies. If the codes do not meet those criteria for implementation during the partial code freeze, consideration was to be given as to whether the codes should be created after the partial code freeze ends 1 year after the implementation of ICD–10–CM/PCS. We invited public comments on any code requests discussed at the September 23–24, 2014 and March 18–19, 2015 Committee meetings for implementation as part of the October 1, 2015 update. The deadline for commenting on code proposals discussed at the September 23–24, 2014 Committee meeting was November 21, 2014. The deadline for commenting on code proposals discussed at the March 18–19, 2015 Committee meeting was April 17, 2015.

14. Other Policy Changes: Replaced Devices Offered Without Cost or With a Credit

a. Background

In the FY 2008 IPPS final rule with comment period (72 FR 47246 through 47251), we discussed the topic of Medicare payment for devices that are replaced without cost or where credit for a replaced device is furnished to the hospital. We implemented a policy to reduce a hospital's IPPS payment for certain MS–DRGs where the implantation of a device that has been recalled determined the base MS–DRG assignment. We specified that if a hospital received a credit for a recalled device equal to 50 percent or more of the cost of the device, we would reduce a hospital's IPPS payment for those MS–DRGs.

In the FY 2012 IPPS/LTCH PPS final rule (76 FR 51556 and 51557), we clarified this policy to state that the policy applies if the hospital received a credit equal to 50 percent or more of the cost of the replacement device and issued instructions to hospitals accordingly.

b. Request for Clarification on Policy Relating to ''Device-Dependent'' MS–DRGs

After publication of the FY 2015 IPPS/LTCH PPS final rule, we received a request to clarify the list of ''device-dependent'' MS–DRGs subject to the policy for payment under the IPPS for replaced devices offered without cost or with a credit. Specifically, a requestor noted that ICD–9–CM procedure codes that previously grouped to MS–DRGs 216 through 221 (Cardiac Valve & Other Major Cardiothoracic Procedure with and without Cardiac Catheterization, with MCC, with CC, without CC/MCC, respectively) and were subject to the policy for payment under the IPPS as ''device-dependent'' MS–DRGs had been reassigned to new MS–DRGs 266 and 267 (Endovascular Cardiac Valve Replacement with MCC and without MCC, respectively). The requestor suggested that MS–DRGs 266 and 267 also should be considered ''device-dependent'' MS–DRGs and added to the list of MS–DRGs subject to the IPPS payment policy for replaced devices offered without cost or with a credit.

As noted by the requestor, as final policy for FY 2015, certain ICD–9–CM procedure codes that previously grouped to MS–DRGs 216 through 221, which are on the list of MS–DRGs subject to the policy for payment under the IPPS for replaced devices offered without cost or with a credit, were reassigned to MS–DRGs 266 and 267. We agree that MS–DRGs 266 and 267 should be included in the list of ''device-dependent'' MS–DRGs subject to the IPPS policy. We generally map new MS–DRGs onto the list when they are formed from procedures previously assigned to MS–DRGs that are already on the list. Therefore, in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24409), we proposed to add MS–DRGs 266 and 267 to the list of ''device dependent'' MS–DRGs subject to the policy for payment under the IPPS for replaced devices offered without cost or with a credit.

In addition, as discussed in section II.G.4.e. of the preamble of the proposed rule, for FY 2016, we proposed to delete MS–DRGs 237 and 238 (Major Cardiovascular Procedures with MCC and without MCC, respectively) and create new MS–DRGs 268 and 269 (Aortic and Heart Assist Procedures Except Pulsation Balloon with MCC and without MCC, respectively), as well as new MS–DRGs 270, 271, and 272 (Other Major Cardiovascular Procedures with MCC, with CC, and without CC/MCC, respectively). Currently, MS–DRGs 237 and 238 are on the list of MS–DRGs subject to the policy for payment under the IPPS for replaced devices offered without cost or with a credit. As stated previously, we generally map new MS–DRGs onto the list when they are formed from procedures previously assigned to MS–DRGs that are already on the list. Therefore, we indicated that if we finalized these proposed MS–DRG changes, we also would add proposed new MS–DRGs 268 through 272 to the list of MS–DRGs subject to the policy for payment under the IPPS for replaced devices offered without cost or with a credit. We invited public comments on our proposed list of MS–DRGs to be subject to the IPPS policy for replaced devices offered without cost or with a credit for FY 2016 (80 FR 24409 through 24410).

Comment: Commenters supported the proposal to add MS–DRGs 266 and 267 to the list of MS–DRGs subject to the IPPS payment policy for replaced devices offered without cost or with a credit. We did not receive any public comments in response to our proposal to delete ICD–9–CM MS–DRGs 237 and 238 and add any of the finalized new ICD–10 MS–DRGs to the list.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are adding MS–DRGs 266 and 267 to the list of MS–DRGs subject to the policy for payment under the IPPS for replaced devices offered without cost or with a credit, and consistent with the applicable finalized MS–DRG changes, also removing existing MS–DRGs 237 and 238 and adding new MS–DRGs 268 through 272. The list of MS–DRGs that are subject to the IPPS policy for replaced devices offered without cost or with a credit for FY 2016 is displayed below. We also intend to issue this list to providers in the form of a Change Request (CR).

LIST OF MS–DRGS SUBJECT TO THE IPPS POLICY FOR REPLACED DEVICES OFFERED WITHOUT COST OR WITH A CREDIT

MDC	MS–DRG	MS–DRG title
PreMDC	001	Heart Transplant or Implant of Heart Assist System with MCC.
PreMDC	002	Heart Transplant or Implant of Heart Assist System without MCC.
MDC 01	023	Craniotomy with Major Device Implant/Acute Complex CNS PDX with MCC or Chemo Implant.
MDC 01	024	Craniotomy with Major Device Implant/Acute Complex CNS PDX without MCC.
MDC 01	025	Craniotomy & Endovascular Intracranial Procedures with MCC.
MDC 01	026	Craniotomy & Endovascular Intracranial Procedures with CC.
MDC 01	027	Craniotomy & Endovascular Intracranial Procedures without CC/MCC.
MDC 01	040	Peripheral/Cranial Nerve & Other Nervous System Procedures with MCC.
MDC 01	041	Peripheral/Cranial Nerve & Other Nervous System Procedures with CC or Peripheral Neurostimulation.
MDC 01	042	Peripheral/Cranial Nerve & Other Nervous System Procedures without CC/MCC.
MDC 03	129	Major Head & Neck Procedures with CC/MCC or Major Device.
MDC 03	130	Major Head & Neck Procedures without CC/MCC.
MDC 05	215	Other Heart Assist System Implant.
MDC 05	216	Cardiac Valve & Other Major Cardiothoracic Procedures with Cardiac Catheterization with MCC.
MDC 05	217	Cardiac Valve & Other Major Cardiothoracic Procedures with Cardiac Catheterization with CC.
MDC 05	218	Cardiac Valve & Other Major Cardiothoracic Procedures with Cardiac Catheterization without CC/MCC.
MDC 05	219	Cardiac Valve & Other Major Cardiothoracic Procedures without Cardiac Catheterization with MCC.
MDC 05	220	Cardiac Valve & Other Major Cardiothoracic Procedures without Cardiac Catheterization with CC.
MDC 05	221	Cardiac Valve & Other Major Cardiothoracic Procedures without Cardiac Catheterization without CC/MCC.
MDC 05	222	Cardiac Defibrillator Implant with Cardiac Catheterization with AMI/HF/Shock with MCC.
MDC 05	223	Cardiac Defibrillator Implant with Cardiac Catheterization with AMI/HF/Shock without MCC.
MDC 05	224	Cardiac Defibrillator Implant with Cardiac Catheterization without AMI/HF/Shock with MCC.
MDC 05	225	Cardiac Defibrillator Implant with Cardiac Catheterization without AMI/HF/Shock without MCC.
MDC 05	226	Cardiac Defibrillator Implant without Cardiac Catheterization with MCC.
MDC 05	227	Cardiac Defibrillator Implant without Cardiac Catheterization without MCC.
MDC 05	242	Permanent Cardiac Pacemaker Implant with MCC.
MDC 05	243	Permanent Cardiac Pacemaker Implant with CC.
MDC 05	244	Permanent Cardiac Pacemaker Implant without CC/MCC.
MDC 05	245	AICD Generator Procedures.
MDC 05	258	Cardiac Pacemaker Device Replacement with MCC.
MDC 05	259	Cardiac Pacemaker Device Replacement without MCC.
MDC 05	260	Cardiac Pacemaker Revision Except Device Replacement with MCC.
MDC 05	261	Cardiac Pacemaker Revision Except Device Replacement with CC.
MDC 05	262	Cardiac Pacemaker Revision Except Device Replacement without CC/MCC.
MDC 05	265	AICD Lead Procedures.
MDC 05	266	Endovascular Cardiac Valve Replacement with MCC.
MDC 05	267	Endovascular Cardiac Valve Replacement without MCC.
MDC 05	268	Aortic and Heart Assist Procedures Except Pulsation Balloon with MCC.
MDC 05	269	Aortic and Heart Assist Procedures Except Pulsation Balloon without MCC.
MDC 05	270	Other Major Cardiovascular Procedures with MCC.
MDC 05	271	Other Major Cardiovascular Procedures with CC.
MDC 05	272	Other Major Cardiovascular Procedures without CC/MCC.
MDC 08	461	Bilateral or Multiple Major Joint Procedures of Lower Extremity with MCC.
MDC 08	462	Bilateral or Multiple Major Joint Procedures of Lower Extremity without MCC.
MDC 08	466	Revision of Hip or Knee Replacement with MCC.
MDC 08	467	Revision of Hip or Knee Replacement with CC.
MDC 08	468	Revision of Hip or Knee Replacement without CC/MCC.
MDC 08	469	Major Joint Replacement or Reattachment of Lower Extremity with MCC.
MDC 08	470	Major Joint Replacement or Reattachment of Lower Extremity without MCC.

15. Out of Scope Public Comments

We received public comments regarding two MS–DRG issues that were outside of the scope of the proposals included in the FY 2016 IPPS/LTCH proposed rule. These comments were as follows:

- Several commenters requested the creation of a new MS–DRG for primary total ankle replacements and revisions of total ankle replacement procedures.
- Several commenters requested the creation of a new MS–DRG for hip fractures for individuals who receive total hip replacements.

However, because we consider these public comments to be outside of the scope of the proposed rule, we are not addressing them in this final rule. As stated in section II.G.1.b. of the preamble of this final rule, we encourage individuals with comments about MS–DRG classification to submit these comments no later than December 7 of each year so that they can be considered for possible inclusion in the annual proposed rule and, if included, may be subjected to public review and comment. We will consider these public comments for possible proposals in future rulemaking as part of our annual review process.

H. Recalibration of the FY 2016 MS–DRG Relative Weights

1. Data Sources for Developing the Relative Weights

In developing the FY 2016 system of weights, we used two data sources: claims data and cost report data. As in previous years, the claims data source is the MedPAR file. This file is based on fully coded diagnostic and procedure data for all Medicare inpatient hospital bills. The FY 2014 MedPAR data used in this final rule include discharges occurring on October 1, 2013, through September 30, 2014, based on bills received by CMS through March 31,

2015, from all hospitals subject to the IPPS and short-term, acute care hospitals in Maryland (which at that time were under a waiver from the IPPS). The FY 2014 MedPAR file used in calculating the relative weights includes data for approximately 9,682,319 Medicare discharges from IPPS providers. Discharges for Medicare beneficiaries enrolled in a Medicare Advantage managed care plan are excluded from this analysis. These discharges are excluded when the MedPAR ''GHO Paid'' indicator field on the claim record is equal to ''1'' or when the MedPAR DRG payment field, which represents the total payment for the claim, is equal to the MedPAR ''Indirect Medical Education (IME)'' payment field, indicating that the claim was an ''IME only'' claim submitted by a teaching hospital on behalf of a beneficiary enrolled in a Medicare Advantage managed care plan. In addition, the March 31, 2015 update of the FY 2014 MedPAR file complies with version 5010 of the X12 HIPAA Transaction and Code Set Standards, and includes a variable called ''claim type.'' Claim type ''60'' indicates that the claim was an inpatient claim paid as fee-for-service. Claim types ''61,'' ''62,'' ''63,'' and ''64'' relate to encounter claims, Medicare Advantage IME claims, and HMO no-pay claims. Therefore, the calculation of the relative weights for FY 2016 also excludes claims with claim type values not equal to ''60.'' The data exclude CAHs, including hospitals that subsequently became CAHs after the period from which the data were taken. We note that the FY 2016 relative weights are based on the ICD–9–CM diagnoses and procedures codes from the MedPAR claims data, grouped through the ICD–9–CM version of the FY 2016 GROUPER (Version 33).

The second data source used in the cost-based relative weighting methodology is the Medicare cost report data files from the HCRIS. Normally, we use the HCRIS dataset that is 3 years prior to the IPPS fiscal year. Specifically, we used cost report data from the March 31, 2015 update of the FY 2013 HCRIS for calculating the FY 2016 cost-based relative weights.

2. Methodology for Calculation of the Relative Weights

As we explain in section II.E.2. of the preamble of this final rule, we calculated the FY 2016 relative weights based on 19 CCRs, as we did for FY 2015. The methodology we used to calculate the FY 2016 MS–DRG cost-based relative weights based on claims data in the FY 2014 MedPAR file and data from the FY 2013 Medicare cost reports is as follows:

- To the extent possible, all the claims were regrouped using the FY 2016 MS–DRG classifications discussed in sections II.B. and II.G. of the preamble of this final rule.
- The transplant cases that were used to establish the relative weights for heart and heart-lung, liver and/or intestinal, and lung transplants (MS–DRGs 001, 002, 005, 006, and 007, respectively) were limited to those Medicare-approved transplant centers that have cases in the FY 2014 MedPAR file. (Medicare coverage for heart, heart-lung, liver and/or intestinal, and lung transplants is limited to those facilities that have received approval from CMS as transplant centers.)
- Organ acquisition costs for kidney, heart, heart-lung, liver, lung, pancreas, and intestinal (or multivisceral organs) transplants continue to be paid on a reasonable cost basis. Because these acquisition costs are paid separately from the prospective payment rate, it is necessary to subtract the acquisition charges from the total charges on each transplant bill that showed acquisition charges before computing the average cost for each MS–DRG and before eliminating statistical outliers.
- Claims with total charges or total lengths of stay less than or equal to zero were deleted. Claims that had an amount in the total charge field that differed by more than $10.00 from the sum of the routine day charges, intensive care charges, pharmacy charges, special equipment charges, therapy services charges, operating room charges, cardiology charges, laboratory charges, radiology charges, other service charges, labor and delivery charges, inhalation therapy charges, emergency room charges, blood charges, and anesthesia charges were also deleted.
- At least 92.1 percent of the providers in the MedPAR file had charges for 14 of the 19 cost centers. All claims of providers that did not have charges greater than zero for at least 14 of the 19 cost centers were deleted. In other words, a provider must have no more than five blank cost centers. If a provider did not have charges greater than zero in more than five cost centers, the claims for the provider were deleted.
- Statistical outliers were eliminated by removing all cases that were beyond 3.0 standard deviations from the geometric mean of the log distribution of both the total charges per case and the total charges per day for each MS–DRG.
- Effective October 1, 2008, because hospital inpatient claims include a POA indicator field for each diagnosis present on the claim, only for purposes of relative weight-setting, the POA indicator field was reset to ''Y'' for ''Yes'' for all claims that otherwise have an ''N'' (No) or a ''U'' (documentation insufficient to determine if the condition was present at the time of inpatient admission) in the POA field.

Under current payment policy, the presence of specific HAC codes, as indicated by the POA field values, can generate a lower payment for the claim. Specifically, if the particular condition is present on admission (that is, a ''Y'' indicator is associated with the diagnosis on the claim), it is not a HAC, and the hospital is paid for the higher severity (and, therefore, the higher weighted MS–DRG). If the particular condition is not present on admission (that is, an ''N'' indicator is associated with the diagnosis on the claim) and there are no other complicating conditions, the DRG GROUPER assigns the claim to a lower severity (and, therefore, the lower weighted MS–DRG) as a penalty for allowing a Medicare inpatient to contract a HAC. While the POA reporting meets policy goals of encouraging quality care and generates program savings, it presents an issue for the relative weight-setting process. Because cases identified as HACs are likely to be more complex than similar cases that are not identified as HACs, the charges associated with HAC cases are likely to be higher as well. Therefore, if the higher charges of these HAC claims are grouped into lower severity MS–DRGs prior to the relative weight-setting process, the relative weights of these particular MS–DRGs would become artificially inflated, potentially skewing the relative weights. In addition, we want to protect the integrity of the budget neutrality process by ensuring that, in estimating payments, no increase to the standardized amount occurs as a result of lower overall payments in a previous year that stem from using weights and case-mix that are based on lower severity MS–DRG assignments. If this would occur, the anticipated cost savings from the HAC policy would be lost.

To avoid these problems, we reset the POA indicator field to ''Y'' only for relative weight-setting purposes for all claims that otherwise have an ''N'' or a ''U'' in the POA field. This resetting ''forced'' the more costly HAC claims into the higher severity MS–DRGs as appropriate, and the relative weights calculated for each MS–DRG more closely reflect the true costs of those cases.

In addition, in the FY 2013 IPPS/LTCH PPS final rule, for FY 2013 and subsequent fiscal years, we finalized a policy to treat hospitals that participate in the Bundled Payments for Care Improvement (BPCI) initiative the same as prior fiscal years for the IPPS payment modeling and ratesetting process without regard to hospitals' participation within these bundled payment models (that is, as if hospitals were not participating in those models under the BPCI initiative). The BPCI initiative, developed under the authority of section 3021 of the Affordable Care Act (codified at section 1115A of the Act), is comprised of four broadly defined models of care, which link payments for multiple services beneficiaries receive during an episode of care. Under the BPCI initiative, organizations enter into payment arrangements that include financial and performance accountability for episodes of care. For FY 2016, as we proposed, we are continuing to include all applicable data from subsection (d) hospitals participating in BPCI Models 1, 2, and 4 in our IPPS payment modeling and ratesetting calculations. We refer readers to the FY 2013 IPPS/LTCH PPS final rule for a complete discussion on our final policy for the treatment of hospitals participating in the BPCI initiative in our ratesetting process. For additional information on the BPCI initiative, we refer readers to the CMS' Center for Medicare and Medicaid Innovation's Web site at: *http://innovation.cms.gov/initiatives/Bundled-Payments/index.html* and to section IV.H.4. of the preamble of the FY 2013 IPPS/LTCH PPS final rule (77 FR 53341 through 53343).

Once the MedPAR data were trimmed and the statistical outliers were removed, the charges for each of the 19 cost groups for each claim were standardized to remove the effects of differences in area wage levels, IME and DSH payments, and for hospitals located in Alaska and Hawaii, the applicable cost-of-living adjustment. Because hospital charges include charges for both operating and capital costs, we standardized total charges to remove the effects of differences in geographic adjustment factors, cost-of-living adjustments, and DSH payments under the capital IPPS as well. Charges were then summed by MS–DRG for each of the 19 cost groups so that each MS–DRG had 19 standardized charge totals. These charges were then adjusted to cost by applying the national average CCRs developed from the FY 2013 cost report data.

The 19 cost centers that we used in the relative weight calculation are shown in the following table. The table shows the lines on the cost report and the corresponding revenue codes that we used to create the 19 national cost center CCRs.

Cost center group name (19 total)	MedPAR charge field	Revenue codes contained in MedPAR charge field	Cost report line description	Cost from HCRIS (Worksheet C, Part 1, Column 5 and line number) Form CMS–2552–10	Charges from HCRIS (Worksheet C, Part 1, Columns 6 and 7 and line number) Form CMS–2552–10	Medicare charges from HCRIS (Worksheet D-3, Column and line number) Form CMS–2552–10
Routine Days	Private Room Charges.	011X and 014X	Adults & Pediatrics (General Routine Care).	C_1_C5_30	C_1_C6_30	D3_HOS_C2_30

We refer readers to the FY 2009 IPPS/LTCH PPS final rule (73 FR 48462) for a discussion on the revenue codes included in the Supplies and Equipment and Implantable Devices CCRs, respectively.

3. Development of National Average CCRs

We developed the national average CCRs as follows:

Using the FY 2013 cost report data, we removed CAHs, Indian Health Service hospitals, all-inclusive rate hospitals, and cost reports that represented time periods of less than 1 year (365 days). We included hospitals located in Maryland because we include their charges in our claims database. We then created CCRs for each provider for each cost center (see prior table for line items used in the calculations) and removed any CCRs that were greater than 10 or less than 0.01. We normalized the departmental CCRs by dividing the CCR for each department by the total CCR for the hospital for the purpose of trimming the data. We then took the logs of the normalized cost center CCRs and removed any cost center CCRs where the log of the cost center CCR was greater or less than the mean log plus/minus 3 times the standard deviation for the log of that cost center CCR. Once the cost report data were trimmed, we calculated a Medicare-specific CCR. The Medicare-specific CCR was determined by taking the Medicare charges for each line item from Worksheet D–3 and deriving the Medicare-specific costs by applying the hospital-specific departmental CCRs to the Medicare-specific charges for each line item from Worksheet D–3. Once each hospital's Medicare-specific costs were established, we summed the total Medicare-specific costs and divided by the sum of the total Medicare-specific charges to produce national average, charge-weighted CCRs.

After we multiplied the total charges for each MS–DRG in each of the 19 cost centers by the corresponding national average CCR, we summed the 19 ''costs'' across each MS–DRG to produce a total standardized cost for the MS–DRG. The average standardized cost for each MS–DRG was then computed as the total standardized cost for the MS–DRG divided by the transfer-adjusted case count for the MS–DRG. The average cost for each MS–DRG was then divided by the national average standardized cost per case to determine the relative weight.

The FY 2016 cost-based relative weights were then normalized by an adjustment factor of 1.678947 so that the average case weight after recalibration was equal to the average case weight before recalibration. The normalization adjustment is intended to ensure that recalibration by itself neither increases nor decreases total payments under the IPPS, as required by section 1886(d)(4)(C)(iii) of the Act.

The 19 national average CCRs for FY 2016 are as follows:

Group	CCR
Routine Days	0.480
Intensive Days	0.393
Drugs	0.191
Supplies & Equipment	0.297
Implantable Devices	0.337
Therapy Services	0.332
Laboratory	0.125
Operating Room	0.199
Cardiology	0.118
Cardiac Catheterization	0.124
Radiology	0.159
MRIs	0.085
CT Scans	0.041
Emergency Room	0.183
Blood and Blood Products	0.336
Other Services	0.368
Labor & Delivery	0.404
Inhalation Therapy	0.177
Anesthesia	0.106

Since FY 2009, the relative weights have been based on 100 percent cost weights based on our MS–DRG grouping system.

When we recalibrated the DRG weights for previous years, we set a threshold of 10 cases as the minimum number of cases required to compute a reasonable weight. In the FY 2016 IPPS/LTCH PPS proposed rule, we proposed to use that same case threshold in recalibrating the MS–DRG relative weights for FY 2016. In the FY 2016 IPPS/LTCH PPS proposed rule, we stated that, using data from the FY 2014 MedPAR file, there were 8 MS–DRGs that contain fewer than 10 cases (80 FR 24414). However, we mistakenly included MS–DRG 768 (Vaginal Delivery with O.R. Procedure Except Sterilization and/or D&C) as a low-volume MS–DRG, which, using data from the December 2014 update of the FY 2014 MedPAR file, had more than 10 cases. For this final rule, using data from the March 2015 update of the FY 2014 MedPAR file, there continue to be 7 MS–DRGs that contain fewer than 10 cases, as reflected in the table below. Under the MS–DRGs, we have fewer low-volume DRGs than under the CMS DRGs because we no longer have separate MS–DRGs for patients aged 0 to 17 years. With the exception of newborns, we previously separated some MS–DRGs based on whether the patient was age 0 to 17 years or age 17 years and older. Other than the age split, cases grouping to these MS–DRGs are identical. The MS–DRGs for patients aged 0 to 17 years generally have very low volumes because children are typically ineligible for Medicare. In the past, we have found that the low volume of cases for the pediatric MS–DRGs could lead to significant year-to-year instability in their relative weights. Although we have always encouraged non-Medicare payers to develop weights applicable to their own patient populations, we have received frequent complaints from providers about the use of the Medicare relative weights in the pediatric population. We believe that eliminating this age split in the MS–DRGs will provide more stable payment for pediatric cases by determining their payment using adult cases that are much higher in total volume. Newborns are unique and require separate MS–DRGs that are not mirrored in the adult population. Therefore, it remains necessary to retain separate MS–DRGs for newborns. All of the low-volume MS–DRGs listed below are for newborns. For FY 2016, because we do not have sufficient MedPAR data to set accurate and stable cost relative weights for the following low-volume MS–DRGs, as we proposed, we computed relative weights for the low-volume MS–DRGs by adjusting their final FY 2015 relative weights by the percentage change in the average weight of the cases in other MS–DRGs. The crosswalk table is shown below:

Low-volume MS–DRG	MS–DRG Title	Crosswalk to MS–DRG
789	Neonates, Died or Transferred to Another Acute Care Facility.	Final FY 2015 relative weight (adjusted by percent change in average weight of the cases in other MS–DRGs).
790	Extreme Immaturity or Respiratory Distress Syndrome, Neonate.	Final FY 2015 relative weight (adjusted by percent change in average weight of the cases in other MS–DRGs).
791	Prematurity with Major Problems	Final FY 2015 relative weight (adjusted by percent change in average weight of the cases in other MS–DRGs).
792	Prematurity without Major Problems	Final FY 2015 relative weight (adjusted by percent change in average weight of the cases in other MS–DRGs).
793	Full-Term Neonate with Major Problems	Final FY 2015 relative weight (adjusted by percent change in average weight of the cases in other MS–DRGs).
794	Neonate with Other Significant Problems	Final FY 2015 relative weight (adjusted by percent change in average weight of the cases in other MS DRGs).
795	Normal Newborn	Final FY 2015 relative weight (adjusted by percent change in average weight of the cases in other MS–DRGs).

Comment: One commenter stated that the relative weight for MS–DRG 014 (Allogeneic Bone Marrow Transplant) may be understated due to the omission of costs and charges associated with revenue code 0819 which was not included in column 3 of the table of cost report lines and revenue codes on pages 24412 and 24413 of the FY 2016 IPPS/LTCH PPS proposed rule. This commenter also noted that, in the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24411), CMS removes claims from the relative weight calculation that had an amount in the total charge field that differed by more than $10 from the sum of the routine day charges, intensive care charges, pharmacy charges, special equipment charges, therapy services charges, operating room charges, cardiology charges, laboratory charges, radiology charges, other service charges, labor and delivery charges, inhalation therapy charges, emergency room charges, blood charges, and anesthesia charges. The commenter asserted that if revenue code 0819 is not included in the mapped charges, a difference of greater than $10 would always result on any claim with revenue code 0819, causing the claims with revenue code 0819 to be deleted from the dataset, and the relative weight for MS–DRG 014 to be understated. Another commenter noted that, in response to its question in the past regarding the absence of revenue code 0819 from the cost centers crosswalk table, CMS had indicated that the national Blood and Blood Products CCR is what is used to reduce revenue code 0819 line item charges to costs on inpatient claims. The commenter believed this should be reflected in the table in the final rule so that hospitals are able to use this information to evaluate their internal cost reporting practices. The commenter also mentioned the variability in cost reporting among hospitals related to the Blood and Blood Products cost centers, and noted that some hospitals report

costs and charges related to stem cell transplantation on lines 62 or 63 of the Medicare cost report Form CMS–2552–10, while other hospitals report these costs and charges on line 112, ''Other Organ Acquisition''. The commenter asserted that CMS' use of a cost center group that may have no relation to where and how donor related charges and costs are actually being captured by providers could be one explanation for why the payment rate for MS–DRG 014 does not appropriately account for all donor related costs incurred by providers who perform stem cell transplantations. The commenter expressed hope that, as CMS reviews the use of nonstandard and subscripted cost centers, it also will undertake a review of where and how SCT charges and costs associated with donor related services reported through revenue code 0819 are being accounted for by hospitals in the cost reports. The commenter also was concerned there are no donor source codes in the ICD–10–PCS coding system and urged CMS to address this matter as soon as possible so that provider reporting of donor source codes is not interrupted with the implementation of ICD–10.

Response: Section 90.3.3.A.1 of Chapter 3 of the Medicare Claims Processing Manual states that payment for acquisition services associated with allogeneic stem cell transplants is included in the MS–DRG payment for the allogeneic stem cell transplant when the transplant occurs in the inpatient setting. The MAC will not make separate payment for these acquisition services because hospitals may bill and receive payment only for services provided to a Medicare beneficiary who is the recipient of the stem cell transplant and whose illness is being treated with the stem cell transplant. Unlike the acquisition costs of solid organs for transplant (for example, hearts and kidneys), which are paid on a reasonable cost basis, acquisition costs for allogeneic stem cells are included in the prospective payment. We note that, in each proposed and final IPPS rule, in the description of the calculation of the MS–DRG relative weights, we state that organ acquisition costs are paid on a reasonable cost basis, and therefore, we deduct the acquisition charges from the total charges on each transplant bill that showed acquisition charges before computing the average cost for each MS–DRG. (We refer readers to the FY 2016 IPPS/LTCH PPS proposed rule 80 FR 24410 through 24411.) Under section 90.3.3.A.2 of the Medicare Claims Processing Manual, hospitals are to identify stem cell acquisition charges for allogeneic bone marrow/stem cell transplants separately by using revenue code 0819 (Other Organ Acquisition).

Accordingly, charges for allogeneic bone marrow transplants are, in fact, included in the MS–DRG relative weights calculation, in the ''Blood and Blood Products'' CCR. That is, for claims that group into MS–DRG 014, CMS includes the acquisition charges in the blood charges and uses the Blood and Blood Products CCR to adjust those charges to cost. Therefore, contrary to the concern expressed by the first commenter, the relative weight for MS–DRG 014 does reflect costs and charges associated with revenue code 0819, and claims containing revenue code 0819 are not systematically deleted from the dataset. In this final rule and for subsequent rules, we are modifying the crosswalk table for the entry of the Blood and Blood Products cost center group to include revenue code 0819, but we are specifying that only the charges associated with MS–DRG 014 are mapped to the Blood and Blood Products cost center. We are continuing to exclude other 081x revenue codes from the crosswalk table, as these codes are associated with Organ Acquisition, which are otherwise *excluded* from the relative weights calculation because, as explained above, organ acquisition costs are paid on a reasonable cost basis and not under the prospective payment rate.

Regarding the comment which stated that some hospitals report costs and charges related to stem cell transplantation on lines 62 or 63 of the Medicare cost report Form CMS–2552–10, while other hospitals report these costs and charges on line 112, ''Other Organ Acquisition,'' we note that because the charges associated with revenue code 0819 are being mapped by CMS to the Blood and Blood Products cost centers from line 62 (Whole Blood and Packed Red Blood Cells) and line 63 (Blood Storing, Processing, and Transfusions), the appropriate cost centers for hospitals to report the attending costs of allogeneic bone marrow/stem cell transplants are lines 62 and 63 of CMS Form–2552–10. (The cost report instructions for Worksheet A in the Provider Reimbursement Manual (PRM), Part II (Pub. 15–2, Chapter 40, Section 4013, state that hospitals are to include on line 62 ''the direct expenses incurred in obtaining blood directly from donors as well as obtaining whole blood, packed red blood cells, and blood derivatives,'' and ''the processing fee charged by suppliers.'' We also note that line 112, along with the other organ transplant lines 105 through 111, are excluded from the calculation of the CCRs and the IPPS relative weights (and therefore are not listed on the crosswalk table). Consequently, any costs related to charges billed under revenue code 0819 that are reported on line 112 would not be captured in the MS–DRG relative weight calculations.

Regarding the commenter's concern that donor related costs are not being properly reported on the Medicare cost report, and that CMS should undertake a review of where and how donor related services reported through revenue code 0819 are being accounted for by hospitals on the cost reports, we believe this is related to overall inconsistencies in cost reporting, particularly with nonstandard cost centers, which we discuss in section II.E.2. of this final rule. As we state in response to comments received in that section, we appreciate the comments that stakeholders have submitted and will continue to explore ways in which CMS can improve the accuracy of the cost report data and the calculation of CCRs used in the cost estimation process. To the extent possible, we will continue to seek stakeholder input in an effort to limit the impact on hospitals.

Regarding the commenter's concerns that there are no donor source codes under ICD–10–PCS, we note that the donor source is an integral part of all transplant and transfusion codes within ICD–10–PCS. Donor source information is captured in the seventh character qualifiers. For example, the root term ''Transplantation'' provides the following seventh character qualifier values as options to describe donor source: Syngeneic (live related); Allogeneic (live non-related); and Zooplastic (animal). We note that bone marrow transplant procedures are coded to the root operation ''Transfusion'' as stated in the ICD–10–PCS Reference Manual (which is available on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/2016-ICD-10-PCS-and-GEMs.html*). The root term ''Transfusion'' provides the seventh character qualifier values of Autologous and Nonautologous as options to describe donor source. For specific questions related to coding for transplants and transfusions, we refer readers to the American Hospital Association (AHA). The AHA Central Office™ is the national clearinghouse for medical coding advice. Coding inquiries may be directed to the following AHA Web site: *http://www.CodingClinicAdvisor.com*.

Comment: One commenter pointed out that the proposed MS–DRG relative weight for MS–DRG 619 (O.R. Procedures for Obesity with MCC) is 2.8830, which is less than the MS–DRG relative weight for this MS–DRG for FY

2015 of 3.2890. The commenter stated that, while this category represents a small percentage of the total bariatric procedures performed on Medicare beneficiaries, patients with conditions described in this MS–DRG are at the greatest risk for readmission and require the greatest support and coordination of postoperative resources to ensure a safe and efficient recovery, and that providers will be unable to provide such support and resources if payment is so drastically reduced. The commenter asked CMS to reconsider the reduction, and consider an increase of 1.1 percent in the relative weight for MS–DRG 619 in keeping with Hospital IQR Program and meaningful electronic health record (EHR) user incentives. The commenter asked that, for hospitals not participating in the Hospital IQR Program or the EHR Incentive Program, CMS keep the relative weight for MS–DRG 619 neutral.

Response: We note that, while the proposed FY 2016 relative weight for MS–DRG 619 was 2.8830, the final FY 2016 relative weight for MS–DRG 619 is 2.9418 (as reflected in Table 5 associated with this final rule and available on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2016-IPPS-Final-Rule-Home-Page.html*). While we are sympathetic to the commenter's concerns, we note that the reduction in the relative weight from FY 2015 to FY 2016 is a function of the relative weight calculation, as described in section II.H. of the FY 2016 IPPS/LTCH PPS proposed rule and this final rule, which is comprised of hospitals' billed charges for MS–DRG 619 and the costs reported on hospitals' cost reports. The reduction in the relative weight may be attributed to the change in the number of cases and average charges for MS–DRG 619 used to develop the relative weight for FY 2015 and the final FY 2016 relative weight. Specifically, we observed that FY 2015 cases were 896, and FY 2016 cases are 1,037, while FY 2015 average charges were $90,806, and FY 2016 average charges are $84,592.

We are finalizing the methodology for recalibration of the MS–DRG relative weights specified in this final rule for FY 2016 as proposed.

4. Discussion and Acknowledgement of Public Comments Received on Expanding the Bundled Payments for Care Improvement (BPCI) Initiative

a. Background

Since 2011, CMS has been working to develop and test models of bundling Medicare payments under the authority of section 1115A of the Act. Through these models, CMS plans to evaluate whether bundled payments result in higher quality and more coordinated care at a lower cost to Medicare. CMS is currently testing the Bundled Payments for Care Improvement (BPCI) initiative. Under this initiative, organizations enter into payment arrangements that include financial and performance accountability for episodes of care.

The BPCI initiative is comprised of four related payment models, which link payments for multiple services that Medicare beneficiaries receive during an episode of care into a bundled payment. Episodes of care under the BPCI initiative begin with either (1) an inpatient hospital stay or (2) postacute care services following a qualifying inpatient hospital stay. More information on the four models under the BPCI initiative can be found on the CMS Center for Medicare and Medicaid Innovation's Web site at: *http://innovation.cms.gov/initiatives/bundled-payments/*.

In the FY 2016 IPPS/LTCH PPS proposed rule (80 FR 24414 through 24418), we presented a discussion of the models in the BPCI initiative and solicited public comments regarding policy and operational issues related to a potential expansion of the BPCI initiative in the future. Section 1115A(c) of the Act, as added by section 3021 of the Affordable Care Act, provides the Secretary with the authority to expand through rulemaking the duration and scope of a model that is being tested under section 1115A(b) of the Act, such as the BPCI initiative (including implementation on a nationwide basis), if the following findings are made, taking into account the evaluation of the model under section 1115A(b)(4) of the Act: (1) The Secretary determines that the expansion is expected to either reduce Medicare spending without reducing the quality of care or improve the quality of patient care without increasing spending; (2) the CMS Chief Actuary certifies that the expansion would reduce (or would not result in any increase in) net Medicare program spending; and (3) the Secretary determines that the expansion would not deny or limit the coverage or provision of Medicare benefits. The decision of whether or not to expand will be made by the Secretary in coordination with CMS and the Office of the Chief Actuary based on whether findings about the initiative meet the statutory criteria for expansion under section 1115A(c) of the Act. Given that further evaluation of the BPCI initiative is needed to determine its impact on both Medicare cost and quality of care, we did not propose an expansion of any models within the initiative or any policy changes associated with it in the FY 2016 IPPS/LTCH PPS proposed rule.

Consistent with our continuing commitment to engaging stakeholders in CMS' work, we sought public comments on a variety of issues to broaden and deepen our understanding of the important issues and challenges regarding bundled payments in the current health care marketplace. Among other subject-matter areas, we sought public comments on the scope of any expansion, episode definitions, bundled payment amounts, data needs, and the use of health information technology. In response to our solicitation, we received over 75 timely and informative public comments suggesting matters to consider in a potential future expansion of the BPCI initiative, including the evaluation of the BPCI models, further testing of the BPCI initiative, target pricing methodologies, data collection and reporting, quality measures, episode definitions, payment methodologies, and precedence rules. We appreciate the commenters' views and recommendations. We will consider the public comments we received if the BPCI initiative is expanded in the future through rulemaking.

I. Add-On Payments for New Services and Technologies for FY 2016

1. Background

Sections 1886(d)(5)(K) and (L) of the Act establish a process of identifying and ensuring adequate payment for new medical services and technologies (sometimes collectively referred to in this section as ''new technologies'') under the IPPS. Section 1886(d)(5)(K)(vi) of the Act specifies that a medical service or technology will be considered new if it meets criteria established by the Secretary after notice and opportunity for public comment. Section 1886(d)(5)(K)(ii)(I) of the Act specifies that a new medical service or technology may be considered for new technology add-on payment if, based on the estimated costs incurred with respect to discharges involving such service or technology, the DRG prospective payment rate otherwise applicable to such discharges under this subsection is inadequate. We note that, beginning with discharges occurring in FY 2008, CMS transitioned from CMS–DRGs to MS–DRGs.

The regulations at 42 CFR 412.87 implement these provisions and specify three criteria for a new medical service or technology to receive the additional payment: (1) The medical service or

technology must be new; (2) the medical service or technology must be costly such that the DRG rate otherwise applicable to discharges involving the medical service or technology is determined to be inadequate; and (3) the service or technology must demonstrate a substantial clinical improvement over existing services or technologies. Below we highlight some of the major statutory and regulatory provisions relevant to the new technology add-on payment criteria as well as other information. For a complete discussion on the new technology add-on payment criteria, we refer readers to the FY 2012 IPPS/LTCH PPS final rule (76 FR 51572 through 51574).

Under the first criterion, as reflected in § 412.87(b)(2), a specific medical service or technology will be considered ''new'' for purposes of new medical service or technology add-on payments until such time as Medicare data are available to fully reflect the cost of the technology in the MS–DRG weights through recalibration. We note that we do not consider a service or technology to be new if it is substantially similar to one or more existing technologies. That is, even if a technology receives a new FDA approval, it may not necessarily be considered ''new'' for purposes of new technology add-on payments if it is ''substantially similar'' to a technology that was approved by FDA and has been on the market for more than 2 to 3 years. In the FY 2006 IPPS final rule (70 FR 47351) and the FY 2010 IPPS/RY 2010 LTCH PPS final rule (74 FR 43813 and 43814), we explained our policy regarding substantial similarity in detail.

Under the second criterion, § 412.87(b)(3) further provides that, to be eligible for the add-on payment for new medical services or technologies, the MS–DRG prospective payment rate otherwise applicable to the discharge involving the new medical services or technologies must be assessed for adequacy. Under the cost criterion, consistent with the formula specified in section 1886(d)(5)(K)(ii)(I) of the Act, to assess the adequacy of payment for a new technology paid under the applicable MS–DRG prospective payment rate, we evaluate whether the charges for cases involving the new technology exceed certain threshold amounts. We update the thresholds in Table 10 of each final rule that apply for the upcoming fiscal year. Table 10 that was released with the FY 2015 IPPS/LTCH PPS final rule contains the final thresholds that we used to evaluate applications for new medical service and new technology add-on payments for FY 2016. We refer readers to the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2015–IPPS-Final-Rule-Home-Page-Items/FY2015-Final-Rule-Tables.html* to download and view Table 10.

In the September 7, 2001 final rule that established the new technology add-on payment regulations (66 FR 46917), we discussed the issue of whether the Health Insurance Portability and Accountability Act (HIPAA) Privacy Rule at 45 CFR parts 160 and 164 applies to claims information that providers submit with applications for new medical service and new technology add-on payments. We refer readers to the FY 2012 IPPS/LTCH PPS final rule (76 FR 51573) for complete information on this issue.

Under the third criterion, § 412.87(b)(1) of our existing regulations provides that a new technology is an appropriate candidate for an additional payment when it represents an advance that substantially improves, relative to technologies previously available, the diagnosis or treatment of Medicare beneficiaries. For example, a new technology represents a substantial clinical improvement when it reduces mortality, decreases the number of hospitalizations or physician visits, or reduces recovery time compared to the technologies previously available. (We refer readers to the September 7, 2001 final rule for a more detailed discussion of this criterion (66 FR 46902).)

The new medical service or technology add-on payment policy under the IPPS provides additional payments for cases with relatively high costs involving eligible new medical services or technologies while preserving some of the incentives inherent under an average-based prospective payment system. The payment mechanism is based on the cost to hospitals for the new medical service or technology. Under § 412.88, if the costs of the discharge (determined by applying cost-to-charge ratios (CCRs) as described in § 412.84(h)) exceed the full DRG payment (including payments for IME and DSH, but excluding outlier payments), Medicare will make an add-on payment equal to the lesser of: (1) 50 percent of the estimated costs of the new technology or medical service (if the estimated costs for the case including the new technology or medical service exceed Medicare's payment); or (2) 50 percent of the difference between the full DRG payment and the hospital's estimated cost for the case. Unless the discharge qualifies for an outlier payment, the additional Medicare payment is limited to the full MS–DRG payment plus 50 percent of the estimated costs of the new technology or new medical service.

Section 503(d)(2) of Public Law 108–173 provides that there shall be no reduction or adjustment in aggregate payments under the IPPS due to add-on payments for new medical services and technologies. Therefore, in accordance with section 503(d)(2) of Public Law 108–173, add-on payments for new medical services or technologies for FY 2005 and later years have not been subjected to budget neutrality.

In the FY 2009 IPPS final rule (73 FR 48561 through 48563), we modified our regulations at § 412.87 to codify our longstanding practice of how CMS evaluates the eligibility criteria for new medical service or technology add-on payment applications. That is, we first determine whether a medical service or technology meets the newness criterion, and only if so, do we then make a determination as to whether the technology meets the cost threshold and represents a substantial clinical improvement over existing medical services or technologies. We amended § 412.87(c) to specify that all applicants for new technology add-on payments must have FDA approval or clearance for their new medical service or technology by July 1 of each year prior to the beginning of the fiscal year that the application is being considered.

The Council on Technology and Innovation (CTI) at CMS oversees the agency's cross-cutting priority on coordinating coverage, coding and payment processes for Medicare with respect to new technologies and procedures, including new drug therapies, as well as promoting the exchange of information on new technologies and medical services between CMS and other entities. The CTI, composed of senior CMS staff and clinicians, was established under section 942(a) of Public Law 108–173. The Council is co-chaired by the Director of the Center for Clinical Standards and Quality (CCSQ) and the Director of the Center for Medicare (CM), who is also designated as the CTI's Executive Coordinator.

The specific processes for coverage, coding, and payment are implemented by CM, CCSQ, and the local claims-payment contractors (in the case of local coverage and payment decisions). The CTI supplements, rather than replaces, these processes by working to assure that all of these activities reflect the agency-wide priority to promote high-quality, innovative care. At the same time, the CTI also works to streamline, accelerate, and improve coordination of these processes to ensure that they remain up to date as new issues arise.

To achieve its goals, the CTI works to streamline and create a more transparent coding and payment process, improve the quality of medical decisions, and speed patient access to effective new treatments. It is also dedicated to supporting better decisions by patients and doctors in using Medicare-covered services through the promotion of better evidence development, which is critical for improving the quality of care for Medicare beneficiaries.

To improve the understanding of CMS' processes for coverage, coding, and payment and how to access them, the CTI has developed an ''Innovator's Guide'' to these processes. The intent is to consolidate this information, much of which is already available in a variety of CMS documents and in various places on the CMS Web site, in a user-friendly format. This guide was published in 2010 and is available on the CMS Web site at: *http://www.cms.gov/CouncilonTechInnov/Downloads/InnovatorsGuide5_10_10.pdf*.

As we indicated in the FY 2009 IPPS final rule (73 FR 48554), we invite any product developers or manufacturers of new medical services or technologies to contact the agency early in the process of product development if they have questions or concerns about the evidence that would be needed later in the development process for the agency's coverage decisions for Medicare.

The CTI aims to provide useful information on its activities and initiatives to stakeholders, including Medicare beneficiaries, advocates, medical product manufacturers, providers, and health policy experts. Stakeholders with further questions about Medicare's coverage, coding, and payment processes, or who want further guidance about how they can navigate these processes, can contact the CTI at *CTI@cms.hhs.gov*.

We note that applicants for add-on payments for new medical services or technologies for FY 2017 must submit a formal request, including a full description of the clinical applications of the medical service or technology and the results of any clinical evaluations demonstrating that the new medical service or technology represents a substantial clinical improvement, along with a significant sample of data to demonstrate that the medical service or technology meets the high-cost threshold. Complete application information, along with final deadlines for submitting a full application, will be posted as it becomes available on the CMS Web site at: *http://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/newtech.html*. To allow interested parties to identify the new medical services or technologies under review before the publication of the proposed rule for FY 2017, the CMS Web site also will post the tracking forms completed by each applicant.

2. Public Input Before Publication of a Notice of Proposed Rulemaking on Add-On Payments

Section 1886(d)(5)(K)(viii) of the Act, as amended by section 503(b)(2) of Public Law 108–173, provides for a mechanism for public input before publication of a notice of proposed rulemaking regarding whether a medical service or technology represents a substantial clinical improvement or advancement. The process for evaluating new medical service and technology applications requires the Secretary to—

- Provide, before publication of a proposed rule, for public input regarding whether a new service or technology represents an advance in medical technology that substantially improves the diagnosis or treatment of Medicare beneficiaries;
- Make public and periodically update a list of the services and technologies for which applications for add-on payments are pending;
- Accept comments, recommendations, and data from the public regarding whether a service or technology represents a substantial clinical improvement; and
- Provide, before publication of a proposed rule, for a meeting at which organizations representing hospitals, physicians, manufacturers, and any other interested party may present comments, recommendations, and data regarding whether a new medical service or technology represents a substantial clinical improvement to the clinical staff of CMS.

In order to provide an opportunity for public input regarding add-on payments for new medical services and technologies for FY 2016 prior to publication of the FY 2016 IPPS/LTCH PPS proposed rule, we published a notice in the **Federal Register** on November 21, 2014 (79 FR 69490), and held a town hall meeting at the CMS Headquarters Office in Baltimore, MD, on February 3, 2015. In the announcement notice for the meeting, we stated that the opinions and alternatives provided during the meeting would assist us in our evaluations of applications by allowing public discussion of the substantial clinical improvement criterion for each of the FY 2016 new medical service and technology add-on payment applications before the publication of the FY 2016 IPPS/LTCH PPS proposed rule.

Approximately 95 individuals registered to attend the town hall meeting in person, while additional individuals listened over an open telephone line. We also live-streamed the town hall meeting and posted the town hall on the CMS YouTube Web page at: *https://www.youtube.com/watch?v=dn-R5KGQu-M*. We considered each applicant's presentation made at the town hall meeting, as well as written comments submitted on the applications that were received by the due date of January 19, 2015, in our evaluation of the new technology add-on payment applications for FY 2016 in the proposed rule.

In response to the published notice and the New Technology Town Hall meeting, we received written comments regarding the applications for FY 2016 new technology add-on payments. We summarized these comments in the preamble of the proposed rule or, if applicable, indicated that there were no comments received, at the end of each discussion of the individual applications in the proposed rule. We are not reprinting those summations in this final rule and refer readers to the FY 2016 IPPS/LTCH PPS proposed rule for this discussion.

We also received public comments in response to the proposed rule relating to topics such as marginal cost factors for new technology add-on payments, mapping new technologies to the appropriate MS–DRG, additional criteria for substantial clinical improvement, and changing the newness criterion. Because we did not request public comments nor propose to make any changes to any of the issues above, we are not summarizing these public comments nor responding to them in this final rule.

Comment: One commenter stated that it is not appropriate for CMS to continue to add requirements or to impose standards that exceed realistic requirements for clinical trials. The commenter cited the WATCHMAN® System as an example where CMS suggested that substantial clinical improvement should be based on a superiority trial rather than the noninferiority trial that was used.

Response: We received a similar public comment last year and responded to it in the FY 2015 IPPS/LTCH PPS final rule. We refer the readers to the FY 2015 IPPS/LTCH PPS final rule (79 FR 49925 through 49926) for a complete response to this issue.

3. Implementation of ICD–10–PCS Section ''X'' Codes for Certain New Medical Services and Technologies for FY 2016

As discussed in section II.G.1.a. of the preamble of this final rule, HIPAA covered entities are required, as of October 1, 2015, to use the ICD–10 coding system (ICD–10–PCS codes for procedures and ICD–10–CM codes for diagnosis), instead of the ICD–9–CM coding system, to report diagnoses and procedures for Medicare hospital inpatient services provided to Medicare beneficiaries as classified under the MS–DRG system and paid for under the IPPS. HIPAA covered entities must continue to use ICD–9–CM codes and coding guidelines through September 30, 2015. We refer readers to section II.G.1.a. of the preamble of this final rule for a complete discussion of the adoption of the ICD–10 coding system.

As part of the transition to the ICD–10–CM/PCS coding system, at the September 23–24, 2014 ICD–10 Coordination and Maintenance Committee meeting, CMS received a request to create a new section within the ICD–10–PCS to capture new medical services and technologies that might not appropriately align with the current structure of the ICD–10–PCS codes. Examples of these types of new medical services and technologies included drugs, biologicals, and newer medical devices being tested in clinical trials that are not currently captured within the ICD–9–CM or the ICD–10–PCS. The requestor indicated that there may be a need to identify and report these technologies and inpatient services for purposes of approving new technology add-on payment applications and initiating subsequent new technology add-on payments based on approval or tracking and analyzing the use of these new technologies and services. Although several commenters have opposed including these types of technologies and services within the current structure of the ICD–10–PCS codes during past ICD–10 Coordination and Maintenance Committee meetings, as well as in public comments, CMS has evaluated these suggestions and considered them to be valid. As a result, CMS has created a new component within the ICD–10–PCS codes, labeled Section ''X'' codes, to identify and describe these new technologies and services. The new Section ''X'' codes identify new medical services and technologies that are not usually captured by coders, or that do not usually have the desired specificity within the current ICD–10–PCS structure required to capture the use of these new services and technologies. As mentioned earlier, examples of these types of services and technologies include specific drugs, biologicals, and newer medical devices being tested in clinical trials. The new Section ''X'' codes within the ICD–10–PCS structure will be implemented on October 1, 2015, and will be used to identify new technologies and medical services approved under the new technology add-on payment policy for payment purposes beginning October 1, 2015. The Section ''X'' codes also will be used to identify procedures or services that are not commonly captured within the definitions and descriptions included in most coding systems or procedures or services that require definitions and descriptions that contain greater detail or specificity, which may be needed for a variety of health care data needs. An overview of Section ''X'' codes was provided at the March 18–19, 2015 ICD–10 Coordination and Maintenance Committee meeting. We also have posted an article on the CMS Web site that explains the creation and use of ICD–10–PCS Section ''X'' codes. This article can be found on the CMS 2016 ICD–10–PCS and GEMs Web site at *http://www.cms.gov/Medicare/Coding/ICD10/2016-ICD-10-PCS-and-GEMs.html*. Further information regarding the new Section ''X'' codes and their use within the ICD–10–PCS can be found on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/ICD-9-CM-C-and-M-Meeting-Materials.html* through the ''CMS Coordination and Maintenance Committee Meeting'' link.

In addition, on June 18, 2015, CMS held a National ICD–10 Teleconference (Preparing for Implementation and New ICD–10–PCS Section ''X'' MLN Connects National Provider Call) to explain the Section ''X'' codes under the ICD–10. The agenda, slides, and audio from this teleconference are posted on the CMS Web site at: *http://www.cms.gov/Outreach-and-Education/Outreach/NPC/National-Provider-Calls-and-Events-Items/2015-06-18-ICD10.html?DLPage=1&DLSort=0&DLSortDir=descending*.

As stated earlier, the ICD–10–PCS includes a new section containing the new Section ''X'' codes, which will be used beginning with discharges occurring on or after October 1, 2015. Decisions regarding changes to ICD–10–PCS Section ''X'' codes will be handled in the same manner as the decisions for all of the other ICD–10–PCS code changes. That is, proposals to create, delete, or revise Section ''X'' codes under the ICD–10–PCS structure will be referred to the ICD–10 Coordination and Maintenance Committee. In addition, several of the new medical services and technologies that have been, or may be, approved for new technology add-on payments may now, and in the future, be assigned a Section ''X'' code within the structure of the ICD–10–PCS. The FY 2016 ICD–10–PCS, which includes the new Section ''X'' codes, was posted in June 2015 via the Internet on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD10/2016-ICD-10-PCS-and-GEMs.html*. We also posted the FY 2016 ICD–10–PCS Guidelines on this CMS Web site that also includes guidelines for ICD–10–PCS ''X'' codes. We encourage providers to view the material provided on ICD–10–PCS Section ''X'' codes.

Comment: Several commenters supported the creation of the new ICD–10–PCS Section ''X'' codes as a means to more specifically identify new technologies or more precise information about certain services. The commenters recognized the challenges of maintaining a partial code freeze while at the same time finding a way to capture new procedures. One commenter who supported the creation of the new Section ''X'' codes to identify new medical services and technologies stated that it was important to have a more robust coding system that will allow for recognition of more technologies, procedures, and variations in patients' conditions.

Another commenter recognized the need to conserve code values within the regular ICD–10–PCS sections, as well as the exponential effect that adding a new value has on the large number of codes, and noted the importance of using Section ''X'' codes specifically for certain types of new technologies. The commenter stated that Section ''X'' codes are especially important to identify drugs and intraoperative supplies related to MS–DRG new technology add-on payments.

Response: We appreciate the commenters' support.

Comment: Several commenters expressed concern that payers may mistakenly consider ICD–10–PCS Section ''X'' codes as interchangeable with CPT Category III codes. The commenters stated that, although CPT Category III codes also represent emerging technologies, the technologies lack substantive support in professional literature, and the codes used for these technologies often describe noncovered procedures that are experimental or investigational. In contrast, the commenter recognized that ICD–10–PCS Section ''X'' codes describe new technologies or services that frequently are FDA approved. However, the

commenters asked that CMS clarify that ICD–10–PCS Section ''X'' codes will not be used to specifically identify experimental or unproven procedures.

Response: Section ''X'' codes were created to more specifically identify new technologies, procedures that have historically not been captured through ICD–9–CM codes, or to more precisely describe information on a specific procedure or technology than is found with the other sections of ICD–10–PCS. Section ''X'' codes were not created, nor intended to be used, to identify experimental or investigational procedures.

Comment: Several commenters expressed concerns about the decision to create new codes during the partial code freeze, in particular the creation of the ICD–10–PCS Section ''X'' during the partial code freeze. The commenters believed that it would be more appropriate to delay the implementation of this section of the ICD–10–PCS and the use of Section ''X'' codes until after the ICD–10 coding system is implemented and the partial code freeze ends. The commenters also requested clarifications on how the new Section ''X'' codes would be used.

Response: We acknowledge that it has been a challenge for CMS to implement the ICD–10–PCS/CM coding system, particularly in light of the partial code freeze and several delays of the implementation of ICD–10. However, the partial code freeze has allowed sufficient time and the ability to capture new technologies or new medical services under the new coding system. Many participants at the ICD–10 Coordination and Maintenance Committee have voiced opposition to the creation of any new codes during the partial code freeze. Other participants have actively encouraged the creation of more code updates beyond those that capture new technologies or new medical services. We have given consideration to all of the public comments presented at the ICD–10 Coordination and Maintenance Committee meetings and have attempted to make updates to the ICD–10–CM/PCS in a manner that is most appropriate and results in less burden on the majority of users. Any updates to ICD–10–CM/PCS, including updates to the Section ''X'' codes, will be presented at future ICD–10 Coordination and Maintenance Committee meetings for public comments. For those individuals who are interested in participating in future ICD–10 Coordination and Maintenance Committee meetings, information on the Committee can be found on the CMS Web site at: *http://www.cms.gov/Medicare/Coding/ICD9ProviderDiagnosticCodes/meetings.html*. We encourage public participation at these meetings either in person, by conference lines, or by the livestream provided by CMS. As discussed earlier, CMS has posted the FY 2016 ICD–10–PCS guidelines, which include guidelines on the use of Section ''X'' codes and an article explaining why ICD–10–PCS Section ''X'' codes were created and how to use them on the CMS Web site. We believe that this detailed information will assist coders in using the new Section ''X'' codes.

4. FY 2016 Status of Technologies Approved for FY 2015 Add-On Payments

a. Glucarpidase (Voraxaze®)

BTG International, Inc. submitted an application for new technology add-on payments for Glucarpidase (Voraxaze®) for FY 2013. Glucarpidase is used in the treatment of patients who have been diagnosed with toxic methotrexate (MTX) concentrations as of result of renal impairment. The administration of Glucarpidase causes a rapid and sustained reduction of toxic MTX concentrations.

Voraxaze® was approved by the FDA on January 17, 2012. Beginning in 1993, certain patients could obtain expanded access for treatment use to Voraxaze® as an investigational drug. Since 2007, the applicant has been authorized to recover the costs of making Voraxaze® available through its expanded access program. We describe expanded access for treatment use of investigational drugs and authorization to recover certain costs of investigational drugs in the FY 2013 IPPS/LTCH PPS final rule (77 FR 53346 through 53350). Voraxaze® was available on the market in the United States as a commercial product to the larger population as of April 30, 2012. In the FY 2013 IPPS/LTCH PPS proposed rule (77 FR 27936 through 27939), we expressed concerns about whether Voraxaze® could be considered new for FY 2013. After consideration of all of the public comments received, in the FY 2013 IPPS/LTCH PPS final rule, we stated that we considered Voraxaze® to be ''new'' as of April 30, 2012, which is the date of U.S. market availability.

After evaluation of the newness, costs, and substantial clinical improvement criteria for new technology payments for Voraxaze® and consideration of the public comments we received in response to the FY 2013 IPPS/LTCH PPS proposed rule, we approved Voraxaze® for new technology add-on payments for FY 2013. Cases of Voraxaze® are identified with ICD–9–CM procedure code 00.95 (Injection or infusion of glucarpidase). As stated in the FY 2015 IPPS/LTCH PPS final rule correction notice (79 FR 59679), the cost of Voraxaze® is $23,625 per vial. The applicant stated that an average of four vials is used per Medicare beneficiary. Therefore, the average cost per case for Voraxaze® is $94,500 ($23,625 × 4). Under § 412.88(a)(2), we limit new technology add-on payments to the lesser of 50 percent of the average cost of the technology or 50 percent of the costs in excess of the MS–DRG payment for the case. As a result, the maximum new technology add-on payment for Voraxaze® is $47,250 per case.

As stated above, the new technology add-on payment regulations provide that a medical service or technology may be considered new within 2 or 3 years after the point at which data begin to become available reflecting the ICD–9–CM code assigned to the new service or technology (§ 412.87(b)(2)). Our practice has been to begin and end new technology add-on payments on the basis of a fiscal year, and we have generally followed a guideline that uses a 6-month window before and after the start of the fiscal year to determine whether to extend the new technology add-on payment for an additional fiscal year. In general, we extend add-on payments for an additional year only if the 3-year anniversary date of the product's entry on the market occurs in the latter half of the fiscal year (70 FR 47362).

With regard to the newness criterion for Voraxaze®, we considered the beginning of the newness period to commence when Voraxaze® was first made available on the U.S. market on April 30, 2012. Because the 3-year anniversary date for Voraxaze® occurred in the latter half of FY 2015 (April 30, 2015), in the FY 2015 IPPS/LTCH PPS final rule, we continued new technology add-on payments for this technology for FY 2015 (79 FR 49918). However, for FY 2016, the 3-year anniversary date of the product's entry on the U.S. market (April 30, 2015) occurred prior to the beginning of FY 2016. Therefore, we proposed to discontinue new technology add-on payments for Voraxaze® for FY 2016. We invited public comments on this proposal.

Comment: One commenter supported CMS' proposal to discontinue new technology add-on payments for Voraxaze® for FY 2016.

Response: We appreciate the commenter's support.

After consideration of the public comments we received, we are discontinuing new technology add-on payments for Voraxaze® for FY 2016. The 3-year anniversary date of the

product's entry onto the U.S. market occurred prior to the beginning of FY 2016 and, therefore, the technology will no longer be eligible for new technology add-on payments because the technology will no longer meet the ''newness'' criterion.

b. Zenith® Fenestrated Abdominal Aortic Aneurysm (AAA) Endovascular Graft

Cook® Medical submitted an application for new technology add-on payments for the Zenith® Fenestrated Abdominal Aortic Aneurysm (AAA) Endovascular Graft (Zenith® F. Graft) for FY 2013. The applicant stated that the current treatment for patients who have had an AAA is an endovascular graft. The applicant explained that the Zenith® F. Graft is an implantable device designed to treat patients who have an AAA and who are anatomically unsuitable for treatment with currently approved AAA endovascular grafts because of the length of the infrarenal aortic neck. The applicant noted that, currently, an AAA is treated through an open surgical repair or medical management for those patients not eligible for currently approved AAA endovascular grafts.

With respect to newness, the applicant stated that FDA approval for the use of the Zenith® F. Graft was granted on April 4, 2012. In the FY 2013 IPPS/LTCH PPS final rule (77 FR 53360 through 53365), we stated that because the Zenith® F. Graft was approved by the FDA on April 4, 2012, we believed that the Zenith® F. Graft met the newness criterion as of that date.

After evaluation of the newness, costs, and substantial clinical improvement criteria for new technology add-on payments for the Zenith® F. Graft and consideration of the public comments we received in response to the FY 2013 IPPS/LTCH PPS proposed rule, we approved the Zenith® F. Graft for new technology add-on payments for FY 2013. Cases involving the Zenith® F. Graft that are eligible for new technology add-on payments currently are identified by ICD–9–CM procedure code 39.78 (Endovascular implantation of branching or fenestrated graft(s) in aorta). In the application, the applicant provided a breakdown of the costs of the Zenith® F. Graft. The total cost of the Zenith® F. Graft utilizing bare metal (renal) alignment stents was $17,264. Of the $17,264 in costs for the Zenith® F. Graft, $921 is for components that are used in a standard Zenith AAA Endovascular Graft procedure. Because the costs for these components are already reflected within the MS–DRGs (and are no longer ''new''), in the FY 2013 IPPS/LTCH PPS final rule, we stated that we did not believe it is appropriate to include these costs in our calculation of the maximum cost to determine the maximum add-on payment for the Zenith® F. Graft. Therefore, the total maximum cost for the Zenith® F. Graft is $16,343 ($17,264 − $921). Under § 412.88(a)(2), we limit new technology add-on payments to the lesser of 50 percent of the average cost of the device or 50 percent of the costs in excess of the MS–DRG payment for the case. As a result, the maximum add-on payment for a case involving the Zenith® F. Graft is $8,171.50.

With regard to the newness criterion for the Zenith® F. Graft, we considered the beginning of the newness period to commence when the Zenith® F. Graft was approved by the FDA on April 4, 2012. Because the 3-year anniversary date of the entry of the Zenith® F. Graft on the U.S. market occurred in the second half of FY 2015 (April 4, 2015), in the FY 2015 IPPS/LTCH PPS final rule, we continued new technology add-on payments for this technology for FY 2015 (79 FR 49922). However, for FY 2016, the 3-year anniversary date of the product's entry on the U.S. market (April 4, 2015) occurred prior to the beginning of FY 2016. Therefore, we proposed to discontinue new technology add-on payments for the Zenith® F. Graft for FY 2016. We invited public comments on this proposal.

We did not receive any public comments on our proposal. Therefore, as we proposed, we are discontinuing new technology add-on payments for the Zenith® F. Graft technology for FY 2016. The 3-year anniversary of the product's entry onto the U.S. market occurred prior to the beginning of FY 2016 and, therefore, the technology is not eligible for new technology add-on payments for FY 2016 because the technology will no longer meet ''newness'' criterion.

c. Kcentra™

CSL Behring submitted an application for new technology add-on payments for Kcentra™ for FY 2014. Kcentra™ is a replacement therapy for fresh frozen plasma (FFP) for patients with an acquired coagulation factor deficiency due to warfarin and who are experiencing a severe bleed. Kcentra™ contains the Vitamin K dependent coagulation factors II, VII, IX and X, together known as the prothrombin complex, and antithrombotic proteins C and S. Factor IX is the lead factor for the potency of the preparation. The product is a heat-treated, non-activated, virus filtered and lyophilized plasma protein concentrate made from pooled human plasma. Kcentra™ is available as a lyophilized powder that needs to be reconstituted with sterile water prior to administration via intravenous infusion. The product is dosed based on Factor IX units. Concurrent Vitamin K treatment is recommended to maintain blood clotting factor levels once the effects of Kcentra™ have diminished.

Kcentra™ was approved by the FDA on April 29, 2013. In the FY 2014 IPPS/LTCH PPS final rule, we finalized new ICD–9–CM procedure code 00.96 (Infusion of 4-Factor Prothrombrin Complex Concentrate) which uniquely identifies Kcentra™.

In the FY 2014 IPPS/LTCH PPS proposed rule (78 FR 27538), we noted that we were concerned that Kcentra™ may be substantially similar to FFP and/or Vitamin K therapy. In the FY 2014 IPPS/LTCH PPS final rule, in response to comments submitted by the manufacturer, we stated that we agree that Kcentra™ may be used in a patient population that is experiencing an acquired coagulation factor deficiency due to Warfarin and who are experiencing a severe bleed currently but are ineligible for FFP, particularly for use by IgA deficient patients and other patient populations that have no other treatment option to resolve severe bleeding in the context of an acquired Vitamin K deficiency. In addition, FFP is limited because it requires special storage conditions while Kcentra™ is stable for up to 36 months at room temperature thus allowing hospitals that otherwise would not have access to FFP (for example, small rural hospitals as discussed by the applicant in its comments) to keep a supply of Kcentra™ and treat patients who would possibly have no access to FFP. We noted that FFP is considered perishable and can be scarce by nature (due to production and other market limitations) thus making some hospitals unable to store FFP, which limits access to certain patient populations in certain locations. Therefore, we stated that we believe that Kcentra™ provides a therapeutic option for a new patient population and is not substantially similar to FFP. Also, we gave credence to the information presented by the manufacturer that Kcentra™ provides a simple and rapid repletion relative to FFP and reduces the risk of a transfusion reaction relative to FFP because it does not contain ABO antibodies and does not require ABO typing. As a result, we concluded that Kcentra™ is not substantially similar to FFP, and that it meets the newness criterion.

After evaluation of the newness, cost, and substantial clinical improvement criteria for new technology add-on payments for Kcentra™ and consideration of the public comments we received in response to the FY 2014 IPPS/LTCH PPS proposed rule, we approved Kcentra™ for new technology add-on payments for FY 2014 (78 FR 50575 through 50580). Cases involving Kcentra™ that are eligible for new technology add-on payments currently are identified by ICD–9–CM procedure code 00.96. In the application, the applicant estimated that the average Medicare beneficiary would require an average dosage of 2500 International Units (IU). Vials contain 500 IU at a cost of $635 per vial. Therefore, cases of Kcentra™ would incur an average cost per case of $3,175 ($635 × 5). Under § 412.88(a)(2), we limit new technology add-on payments to the lesser of 50 percent of the average cost of the technology or 50 percent of the costs in excess of the MS–DRG payment for the case. As a result, the maximum add-on payment for a case of Kcentra™ was $1,587.50 for FY 2014.

In the FY 2014 IPPS/LTCH PPS final rule (78 FR 50579), we stated that new technology add-on payments for Kcentra™ would not be available with respect to discharges for which the hospital received an add-on payment for a blood clotting factor administered to a Medicare beneficiary with hemophilia who is a hospital inpatient. Under section 1886(d)(1)(A)(iii) of the Act, the national adjusted DRG prospective payment rate is the amount of the payment with respect to the operating costs of inpatient hospital services (as defined in subsection (a)(4)) for discharges on or after April 1, 1988. Section 1886(a)(4) of the Act excludes from the term ''operating costs of inpatient hospital services'' the costs with respect to administering blood clotting factors to individuals with hemophilia. The costs of administering a blood clotting factor to a Medicare beneficiary who has hemophilia and is a hospital inpatient are paid separately from the IPPS. (For information on how the blood clotting factor add-on payment is made, we refer readers to Section 20.7.3, Chapter 3, of the Medicare Claims Processing Manual, which can be downloaded from the CMS Web site at: *http://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/clm104c03.pdf.*) In addition, we stated that if Kcentra™ is approved by the FDA as a blood clotting factor, we believed that it may be eligible for blood clotting factor add-on payments when administered to Medicare beneficiaries with hemophilia. We make an add-on payment for Kcentra™ for such discharges in accordance with our policy for payment of a blood clotting factor, and the costs would be excluded from the operating costs of inpatient hospital services as set forth in section 1886(a)(4) of the Act.

Section 1886(d)(5)(K)(i) of the Act requires the Secretary to establish a mechanism to recognize the costs of new medical services and technologies under the payment system established under this subsection beginning with discharges on or after October 1, 2001. We believe that it is reasonable to interpret this requirement to mean that the payment mechanism established by the Secretary recognizes only costs for those items that would otherwise be paid based on the prospective payment system (that is, ''the payment system established under this subsection''). As noted above, under section 1886(d)(1)(A)(iii) of the Act, the national adjusted DRG prospective payment rate is the amount of payment for the operating costs of inpatient hospital services, as defined in section 1886(a)(4) of the Act, for discharges on or after April 1, 1988. We understand this to mean that a new medical service or technology must be an operating cost of inpatient hospital services paid based on the prospective payment system, and not excluded from such costs, in order to be eligible for the new technology add-on payment. We pointed out that new technology add-on payments are based on the operating costs per case relative to the prospective payment rate as described in § 412.88. Therefore, we believe that new technology add-on payments are appropriate only when the new technology is an operating cost of inpatient hospital services and are not appropriate when the new technology is excluded from such costs.

In the FY 2014 IPPS/LTCH PPS final rule (78 FR 50579), we stated that we believe that hospitals may only receive new technology add-on payments for discharges where Kcentra™ is an operating cost of inpatient hospital services. In other words, a hospital would not be eligible to receive the new technology add-on payment when it is administering Kcentra™ in treating a Medicare beneficiary who has hemophilia. In those instances, Kcentra™ is specifically excluded from the operating costs of inpatient hospital services in accordance with section 1886(a)(4) of the Act and paid separately from the IPPS. However, when a hospital administers Kcentra™ to a Medicare beneficiary who does not have hemophilia, the hospital would be eligible for a new technology add-on payment because Kcentra™ would not be excluded from the operating costs of inpatient hospital services. Therefore, discharges where the hospital receives a blood clotting factor add-on payment are not eligible for a new technology add-on payment for the blood clotting factor. We refer readers to Section 20.7.3, Chapter 3, of the Medicare Claims Processing Manual for a complete discussion on when a blood clotting factor add-on payment is made. The manual can be downloaded from the CMS Web site at: *http://www.cms.gov/Regulations-and-Guidance/Guidance/Manuals/Downloads/clm104c03.pdf.*

With regard to the newness criterion for Kcentra™, we considered the beginning of the newness period to commence when Kcentra™ was approved by the FDA on April 29, 2013. Because the 3-year anniversary date of the entry of Kcentra™ on the U.S. market will occur in the second half of FY 2016 (April 29, 2016), we proposed to continue new technology add-on payments for this technology for FY 2016.

Because we are adopting the ICD–10 coding system effective October 1, 2015, for FY 2016, we proposed to identify and make new technology add-on payments for cases involving Kcentra™ with ICD 10 PCS procedure code 30283B1 (Transfusion of nonautologous 4-factor prothrombin complex concentrate into vein, percutaneous approach). We stated that the maximum new technology add-on payment for a case involving the Kcentra™ technology would remain at $1,587.50 for FY 2016.

We invited public comments on these proposals.

Comment: One commenter supported CMS' proposal to continue new technology add-on payments for Kcentra™ for FY 2016.

Response: We appreciate the commenter's support.

We did not receive any public comments on the coding and payment for Kcentra™ for FY 2016.
