

# FEDERAL REGISTER

---

Vol. 80

Thursday,

No. 180

September 17, 2015

Pages 55715–56364

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see [www.ofr.gov](http://www.ofr.gov).

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at [www.fdsys.gov](http://www.fdsys.gov), a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, [gpocusthelp.com](mailto:gpocusthelp.com).

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see [bookstore.gpo.gov](http://bookstore.gpo.gov).

There are no restrictions on the republication of material appearing in the **Federal Register**.

**How To Cite This Publication:** Use the volume number and the page number. Example: 80 FR 12345.

**Postmaster:** Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

## Presidential Documents

Proclamation 9320 of September 11, 2015

### National Hispanic-Serving Institutions Week, 2015

By the President of the United States of America

#### A Proclamation

Our higher education system is one of the crown jewels of our Nation, and investing in it is a hallmark of America. In an economy where knowledge is the most valuable asset, the best way to get ahead and ensure mobility to the middle class is to earn a college degree. Hispanic-Serving Institutions (HSIs) help make the promise a college education provides a reality for many Hispanic students across our country, enabling them to secure a better future for themselves and their families. This week, let us recognize the tremendous impact these institutions have and rededicate ourselves to continuing our support of their valuable work.

An education can broaden horizons and empower us to be better people and better citizens, and no one should be left out of that opportunity. Roughly one-quarter of students in our Nation's public schools today are Hispanic, yet less than one-fifth of Hispanics in the United States have a college degree. HSIs help address this disparity, moving us closer to the day when we have the highest proportion of college graduates in the world. HSIs serve more than half of our Nation's undergraduate Hispanics, and they work to provide more Americans—especially low- and middle-income students—with the chance to thrive in an institution of higher learning.

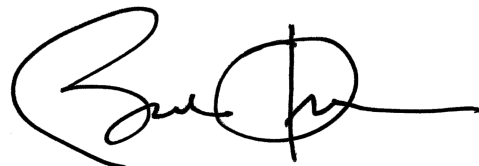

Hispanics are projected to account for almost one-third of our Nation's population by 2060, and ensuring they have access to the best education possible is important to securing America's success. In the last few years, we have seen the dropout rates for Hispanics significantly decrease, while college enrollment has steadily risen. But more work remains to be done to ensure all our people can realize the American dream, and that is why my Administration has pledged \$1 billion in funding over the course of this decade to support HSIs. Additionally, I announced a plan that would open doors of opportunity for millions of people by making community college free for responsible students willing to work hard—because in America, nobody should be denied a college education simply because they do not have the resources to pay for it.

At the heart of our country is a basic bargain: that with determination and grit, you can get ahead—no matter who you are, what you look like, or where you come from. By working to provide many Hispanics with the chance they deserve to get a higher education, HSIs embody this truth and pull the country we all call home a little closer to its founding ideals: that all of us are created equal and all of us should have the chance to make of our lives what we will. This week, let us recommit to strengthening these institutions and pledge our support to all who attend them.

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim September 14 through September 20, 2015, as National Hispanic-Serving Institutions Week. I call on public officials, educators, and all the people of the United States to observe this week with appropriate programs, ceremonies, and activities

that acknowledge the many ways these institutions and their graduates contribute to our country.

IN WITNESS WHEREOF, I have hereunto set my hand this eleventh day of September, in the year of our Lord two thousand fifteen, and of the Independence of the United States of America the two hundred and fortieth.

A handwritten signature in black ink, appearing to be Barack Obama's signature, consisting of a large 'B' followed by a circle and a horizontal line.

---

## Presidential Documents

Proclamation 9321 of September 11, 2015

### National Grandparents Day, 2015

By the President of the United States of America

#### A Proclamation

Across America, grandparents are loving pillars of comfort and support. After a lifetime of giving back to their families and communities, grandmothers and grandfathers continue to offer compassion and wisdom to their loved ones and inspire us to be our best selves. On National Grandparents Day, we honor the sacrifices they make and continue to show our affection and appreciation for them.

We owe so much of who we are and what we have to our grandparents. With grit and dedication, they helped define a new age and open doors of opportunity for us all. From overcoming the depths of economic collapse to fighting to defend our liberty on battlefields around the world, their determination to ensure we could live better lives than they did helped secure our peace and prosperity. They created the world's largest economy and strongest middle class. They built skyscrapers, made innovative advances, and charted new frontiers. They broke down barriers and instilled fundamental values and ideals. And the extraordinary example they set in striving to forge a better future for their families and our Nation reflects the idea that we are all part of something larger than ourselves.

Today, grandparents continue serving as quiet heroes in every corner of our country. From reading bedtime stories to their grandchildren to volunteering in their communities to acting as primary caregivers, they work hard each and every day while showing love and kindness to their families and those around them. Let us continue to show them the same, and let us forever honor their tremendous efforts to nurture, guide, and drive us in all we do.

NOW, THEREFORE, I, BARACK OBAMA, President of the United States of America, by virtue of the authority vested in me by the Constitution and the laws of the United States, do hereby proclaim September 13, 2015, as National Grandparents Day. I call upon all Americans to take the time to honor their own grandparents and those in their community.

IN WITNESS WHEREOF, I have hereunto set my hand this eleventh day of September, in the year of our Lord two thousand fifteen, and of the Independence of the United States of America the two hundred and fortieth.

A handwritten signature in black ink, appearing to be Barack Obama's signature, consisting of a large 'B' followed by a circle and a vertical line through it, and a horizontal line extending to the right.

Vol. 80, No. 180

Thursday, September 17, 2015

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

## AGENCY FOR INTERNATIONAL DEVELOPMENT

### 2 CFR Part 700

RIN 0412-AA73

### USAID Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards

**AGENCY:** Agency for International Development (USAID).

**ACTION:** Final rule.

**SUMMARY:** USAID is issuing a final rule adopting with amendments the “Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards,” issued by the Office of Management and Budget and published in **Federal Register** on December 26, 2013.

Consistent with the OMB rule, USAID’s rule supersedes USAID’s “Administration of Assistance Awards to U.S. Non-Governmental Organizations.” Parts of this final rule apply to for-profit entities in limited circumstances and to foreign organizations as described in this guidance.

**DATES:** This final rule is effective October 19, 2015.

**FOR FURTHER INFORMATION CONTACT:** Michael Gushue, Telephone: 202-567-4678, Email: [mgushue@usaid.gov](mailto:mgushue@usaid.gov).

#### SUPPLEMENTARY INFORMATION:

#### A. Background

The Agency for International Development issued an interim final rule with a request for comments adopting the Office of Management and Budget’s “Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, and published in the **Federal Register** in Vol. 78, No. 248 (Dec. 26, 2013). This OMB rule is codified at 2 CFR part 200

and superseded OMB Circulars A-21, A-87, A-110, A-122, A-89, A-102, and A-133, and the guidance in Circular A-50 on Single Audit Act follow-up. USAID’s interim final rule and subsequent final rule replace 22 CFR part 226, “Administration of Assistance Awards to U.S. Nongovernmental Organizations.” Parts of this final rule also apply to for-profit entities in limited circumstances and to foreign organizations as described in this guidance.

**Regulatory Authority:** The authority for Part 700 reads as follows:

**Authority:** Sec. 621, Public L. 87-195, 75 Stat 445, (22 U.S.C. 2381) as amended, E.O. 12163, Sept 29, 1979, 44 FR 56673; 2 CFR 1979 Comp., p. 435

#### B. Discussion of Comments

The public comment period on the proposed rule closed on March 6, 2015. USAID received comments and suggestions from two organizations on its interim final rule. The following responses address comments that were specific to USAID’s implementation of OMB’s rule. Comments regarding OMB’s Administrative Requirements, Cost Principles, and Audit Requirements at 2 CFR part 200 that did not affect USAID’s implementation at 2 CFR part 700 were not considered.

#### *Applicability of Subparts D and E to Foreign Organizations*

**Comment:** Two commenters addressed USAID’s application of 2 CFR part 200 and 2 CFR part 700 to foreign organizations. Agencies were given decision making authority on the applicability of 2 CFR part 200 to non-US entities, which has resulted in a lack of consistency in applicability to non-US entities across the various federal agencies. Because the goal of this new regulation was to increase uniformity and reduce administrative burden, Subparts A through E of 2 CFR part 200 should be made applicable to all non-US entities, which will simplify and streamline sub-recipient monitoring, as well as implementation. The U.S. Agency for International Development has applied Subpart E inconsistently. Non-US entities will face different administrative requirements when they receive federal awards directly from these agencies. Pass-through entities that subaward funds to local indigenous organizations in host countries as well as to U.S. based entities must craft

differing subaward agreements for each class of subrecipients and monitor and enforce differing requirements. Those non-US based subrecipients who receive funds that originate from USAID and from other federal agencies are subject to policies that are not uniform. We encourage USAID to use references to 2 CFR part 200, subpart D in its policies affecting non-US entities and to use the provisions of 2 CFR 200.207 to differentiate on an individual basis whether differing special conditions are warranted rather than continue to differentiate as they have done.

**Response:** USAID has modified 2 CFR part 700 to clearly identify what parts of 2 CFR part 200 apply to different entities. USAID will continue its longstanding practice of not applying the uniform set of administrative requirements consolidated in the new Uniform Requirements to foreign organizations. The Uniform Requirements would have significant negative implications for USAID’s ongoing operations and awards involving foreign organizations. Taken as a whole, adoption by USAID of the Uniform Requirements to foreign organizations would impose U.S. requirements on local organizations working in English as a second language and unfamiliar with the technical wording and systems logic of federal regulations primarily directed at U.S. recipients, including U.S. and international non-governmental organizations, universities, and research organizations. Application of these requirements would result in an across-the-board increase of administrative burden on local organizations and would seriously undermine USAID’s development and sustainability goals that have been the subject of significant efforts to reduce such burdens and barriers to local organization partnerships with USAID.

More broadly, these changes would have a significant impact on the Agency’s ongoing efforts to work directly with capable local organizations to fulfill our overall mandate to support sustainable development.

#### *Applicability to Commercial Organizations*

**Comment:** Two commenters addressed the application of cost principles to for-profit entities. Section 2 CFR 200.101 indicates that Federal

agencies may apply the Cost Principles, found in Subpart E, to commercial entities. OMB's decision to permit Federal awarding agencies to decide whether to apply the provisions of the Uniform Guidance to commercial organizations and its discussion of the applicability of Subpart E of 2 CFR part 200 has created confusion as to the continuing role that the cost principles for commercial organizations contained in 48 CFR Subpart 31.2 have when the Federal award is made to a commercial organization.

In particular, the statement in 2 CFR 200.101(a) (*i.e.*, "These requirements are applicable to all costs related to Federal awards."), the chart that follows in 2 CFR 200.101(b), and particularly the statement contained in 2 CFR 200.101(c) lead to the conclusion that OMB's intent is for commercial organizations to follow Subpart E when administering grants and cooperative agreements. However, Subpart E only applies to non-commercial entities, while 48 CFR Subpart 31.2 applies to commercial entities. It is clear that when those organizations are administering a Federal contract, they would be directed to follow 48 CFR Subpart 31.2, leading to potential inconsistency of costing. The Department of State has addressed this subject by promulgating 2 CFR 600.101(b) to assure cost consistency shows that this clarification should be made on a government-wide basis.

*Response:* USAID has revised 2 CFR part 700 to clarify that Subpart E does not apply to for-profit entities.

### Regulatory Findings

For the regulatory findings regarding this rulemaking, please refer to the analysis prepared by OIRA in the interim final rule, which is incorporated herein. 79 FR at 75876.

### List of Subjects in 22 CFR Part 700

Accounting, Administrative practice and procedure, Audit requirements, Grant administration, Grant programs, Reporting and recordkeeping requirements.

### Regulatory Text

For the reasons stated in the preamble, The Agency for International Development amends 2 CFR Chapter VII by revising part 700 to read as follows:

## **PART 700—UNIFORM ADMINISTRATIVE REQUIREMENTS, COST PRINCIPLES, AND AUDIT REQUIREMENTS FOR FEDERAL AWARDS**

Sec.

### **Subpart A—Acronyms and Definitions**

700.1 Definitions.

### **Subpart B—General Provisions**

700.2 Adoption of 2 CFR part 200.  
700.3 Applicability.  
700.4 Exceptions.  
700.5 Supersession.

### **Subpart C—Pre-Federal Award Requirements and Contents of Federal Awards**

700.6 Metric system of measurement.  
700.7 Advance payment.

### **Subpart D—Post Federal Award Requirements**

700.8 Payment.  
700.9 Property standards.  
700.10 Cost sharing or matching.  
700.11 Contracting with small and minority businesses, women's business enterprises, and labor surplus area firms.  
700.12 Contract provisions.  
700.13 Additional provisions for awards to for-profit entities.

### **Termination and Disputes**

700.14 Termination.  
700.15 Disputes.

### **USAID—Specific Requirements**

700.16 Marking.

**Authority:** Sec. 621, Public L. 87-195, 75 Stat 445, (22 U.S.C. 2381) as amended, E.O. 12163, Sept 29, 1979, 44 FR 56673; 2 CFR 1979 Comp., p. 435.

### **Subpart A—Acronyms and Definitions**

#### **§ 700.1 Definitions.**

These are the definitions for terms used in this part. Different definitions may be found in Federal statutes or regulations that apply more specifically to particular programs or activities.

*Activity* means a set of actions through which inputs—such as commodities, technical assistance, training, or resource transfers—are mobilized to produce specific outputs, such as vaccinations given, schools built, microenterprise loans issued, or policies changed. Activities are undertaken to achieve objectives that have been formally approved and notified to Congress.

*Agreement Officer* means a person with the authority to enter into, administer, terminate and/or closeout assistance agreements subject to this part, and make related determinations and findings on behalf of USAID. An Agreement Officer can only act within the scope of a duly authorized warrant or other valid delegation of authority. The term "Agreement Officer" includes persons warranted as "Grant Officers." It also includes certain authorized representatives of the Agreement Officer acting within the limits of their authority as delegated by the Agreement Officer.

*Apparently successful applicant(s)* means the applicant(s) for USAID funding recommended for an award after merit review, but who has not yet been awarded a grant, cooperative agreement or other assistance award by the Agreement Officer. Apparently successful applicant status confers no right and constitutes no USAID commitment to an award, which still must be executed by the Agreement Officer.

*Award* means financial assistance that provides support or stimulation to accomplish a public purpose. Awards include grants, cooperative agreements, and other agreements in the form of money or property in lieu of money, by the Federal Government to an eligible recipient. The term does not include: Technical assistance, which provides services instead of money; other assistance in the form of loans, loan guarantees, interest subsidies, or insurance; direct payments of any kind to individuals; contracts which are required to be entered into and administered under procurement laws and regulations.

*Branding strategy* means a strategy the apparently successful applicant submits at the specific request of an USAID Agreement Officer after merit review of an application for USAID funding, describing how the program, project, or activity is named and positioned, as well as how it is promoted and communicated to beneficiaries and cooperating country citizens. It identifies all donors and explains how they will be acknowledged. A Branding Strategy is required even if a Presumptive Exception is approved in the Marking Plan.

*Commodities* mean any material, article, supply, goods or equipment, excluding recipient offices, vehicles, and non-deliverable items for recipient's internal use in administration of the USAID-funded grant, cooperative agreement, or other agreement or subagreement.

*Date of completion* means the date on which all work under an award is completed or the date on the award document, or any supplement or amendment, on which USAID sponsorship ends.

*Marking plan* means a plan that the apparently successful applicant submits at the specific request of a USAID Agreement Officer after merit review of an application for USAID funding, detailing the public communications, commodities, and program materials and other items that will visibly bear the USAID Identity. Recipients may request approval of Presumptive Exceptions to

marking requirements in the Marking Plan.

*Principal officer* means the most senior officer in an USAID Operating Unit in the field, e.g., USAID Mission Director or USAID Representative. For global programs managed from Washington but executed across many countries such as disaster relief and assistance to internally displaced persons, humanitarian emergencies or immediate post conflict and political crisis response, the cognizant Principal Officer may be an Office Director, for example, the Directors of USAID/W/ Office of Foreign Disaster Assistance and Office of Transition Initiatives. For non-presence countries, the cognizant Principal Officer is the Senior USAID officer in a regional USAID Operating Unit responsible for the non-presence country, or in the absence of such a responsible operating unit, the Principle U.S Diplomatic Officer in the non-presence country exercising delegated authority from USAID.

*Program* means an organized set of activities and allocation of resources directed toward a common purpose, objective, or goal undertaken or proposed by an organization to carry out the responsibilities assigned to it. Projects include all the marginal costs of inputs (including the proposed investment) technically required to produce a discrete marketable output or a desired result (for example, services from a fully functional water/sewage treatment facility).

*Public communications* are documents and messages intended for distribution to audiences external to the recipient's organization. They include, but are not limited to, correspondence, publications, studies, reports, audio visual productions, and other informational products; applications, forms, press and promotional materials used in connection with USAID funded programs, projects or activities, including signage and plaques; Web sites/Internet activities; and events such as training courses, conferences, seminars, press conferences and the like.

*Suspension* means an action by USAID that temporarily withdraws Federal sponsorship under an award, pending corrective action by the recipient or pending a decision to terminate the award. Suspension of an award is a separate action from suspension under USAID regulations implementing E.O.'s 12549 and 12689, "Debarment and Suspension." See 2 CFR part 780.

*Unrecovered indirect cost* means the difference between the amount awarded and the amount which could have been

awarded under the recipient's approved negotiated indirect cost rate.

*USAID* means the United States Agency for International Development.

*USAID Identity* (Identity) means the official marking for the United States Agency for International Development (USAID) comprised of the USAID logo or seal and new brandmark with the tagline that clearly communicates our assistance is "from the American people." In exceptional circumstances, upon a written determination by the USAID Administrator, the definition of the USAID Identity may be amended to include additional or substitute use of a logo or seal and tagline representing a presidential initiative or other high level interagency Federal initiative that requires consistent and uniform branding and marking by all participating agencies. The USAID Identity (including any required presidential initiative or related identity) is available on the USAID Web site at <http://www.usaid.gov/branding> and is provided without royalty, license or other fee to recipients of USAID funded grants or cooperative agreements or other assistance awards.

## Subpart B—General Provisions

### § 700.2 Adoption of 2 CFR Part 200.

Under the authority listed above the Agency for International Development adopts the Office of Management and Budget (OMB) guidance Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards to Non-Federal Entities (subparts A through F of 2 CFR part 200), as supplemented by this part, as the Agency for International Development (USAID) policies and procedures for financial assistance administration. This part satisfies the requirements of 2 CFR 200.110(a) and gives regulatory effect to the OMB guidance as supplemented by this part.

### § 700.3 Applicability.

(a) Subparts A through D of 2 CFR part 200 apply to for-profit entities. The Federal Acquisition Regulation (FAR) at 48 CFR part 30, Cost Accounting Standards, and Part 31, Contract Cost Principles and Procedures, takes precedence over the cost principles in Subpart E for Federal awards to for-profit entities.

(b) Subpart E applies to foreign organizations and foreign public entities, except where the Federal awarding agency determines that the application of these subparts would be inconsistent with the international obligations of the United States or the

statute or regulations of a foreign government.

### § 700.4 Exceptions.

Consistent with 2 CFR 200.102(b):

(a) Exceptions on a case-by-case basis for individual non-Federal entities may be authorized by USAID's Assistant Administrator, Bureau for Management, or designee as delegated in Agency policy, except where otherwise required by law or where OMB or other approval is expressly required by this Part. No case-by-case exceptions may be granted to the provisions of Subpart F—Audit Requirements of this Part.

(b) USAID's Assistant Administrator, Bureau for Management, or designee as delegated in Agency policy, is also authorized to approve exceptions, on a class or an individual case basis, to USAID program specific assistance regulations other than those which implement statutory and executive order requirements.

(c) The Federal awarding agency may apply more restrictive requirements to a class of Federal awards or non-Federal entities when approved by OMB, required by Federal statutes or regulations except for the requirements in Subpart F—Audit Requirements of this part. A Federal awarding agency may apply less restrictive requirements when making awards at or below the simplified acquisition threshold, or when making fixed amount awards as defined in Subpart A—Acronyms and Definitions of 2 CFR part 200, except for those requirements imposed by statute or in Subpart F—Audit Requirements of this part.

### § 700.5 Supersession.

Effective December 26, 2014, this part supersedes the following regulations under Title 22 of the Code of Federal Regulations: 22 CFR part 226, "Administration of Assistance Awards To U.S. Non-Governmental Organizations."

## Subpart C—Pre-Federal Award Requirements and Contents of Federal Awards

### § 700.6 Metric system of measurement.

(a) The Metric Conversion Act, as amended by the Omnibus Trade and Competitiveness Act (15 U.S.C. 205) declares that the metric system is the preferred measurement system for U.S. trade and commerce.

(b) Wherever measurements are required or authorized, they must be made, computed, and recorded in metric system units of measurement, unless otherwise authorized by the Agreement Officer in writing when it

has been found that such usage is impractical or is likely to cause U.S. firms to experience significant inefficiencies or the loss of markets. Where the metric system is not the predominant standard for a particular application, measurements may be expressed in both the metric and the traditional equivalent units, provided the metric units are listed first.

#### **§ 700.7 Advance payment.**

Advance payment mechanisms include, but are not limited to, Letter of Credit, Treasury check and electronic funds transfer and must comply with applicable guidance in 31 CFR part 205.

### **Subpart D—Post Federal Award Requirements**

#### **§ 700.8 Payment.**

(a) Use of resources before requesting advance payments. To the extent available, the non-Federal entity must disburse funds available from program income (including repayments to a revolving fund), rebates, refunds, contract settlements, audit recoveries, and interest earned on such funds before requesting additional cash payments. This paragraph is not applicable to such earnings which are generated as foreign currencies.

(b) Standards governing the use of banks and other institutions as depositories of advance payments under Federal awards are as follows:

(1) Except for situations described in paragraph (b)(2) of this section, USAID does not require separate depository accounts for funds provided to a non-Federal entity or establish any eligibility requirements for depositories for funds provided to the non-Federal entity. However, the non-Federal entity must be able to account for receipt, obligation and expenditure of funds.

(2) Advance payments of Federal funds must be deposited and maintained in insured accounts whenever possible.

#### **§ 700.9 Property standards.**

(a) *Real property.* Unless the agreement provides otherwise, title to real property will vest in accordance with 2 CFR 200.311.

(b) *Equipment.* Unless the agreement provides otherwise, title to equipment will vest in accordance with 2 CFR 200.313.

#### **§ 700.10 Cost sharing or matching.**

Unrecovered indirect costs, including indirect costs on cost sharing or matching may be included as part of cost sharing or matching. Unrecovered indirect cost means the difference between the amount charged to the

Federal award and the amount which would have been charged to the Federal award under the non-Federal entity's approved negotiated indirect cost rate.

#### **§ 700.11 Contracting with small and minority businesses, women's business enterprises, and labor surplus area firms.**

(a) Make information on forthcoming opportunities available and arrange time frames for purchases and contracts to encourage and facilitate participation by small businesses, minority-owned firms, and women's business enterprises. To permit USAID, in accordance with the small business provisions of the Foreign Assistance Act of 1961, as amended, to give United States small business firms an opportunity to participate in supplying commodities and services procured under the award, the recipient must to the maximum extent possible provide the following information to the Office of Small Disadvantaged Business Utilization (OSDBU), USAID, Washington, DC 20523, at least 45 days prior to placing any order or contract in excess of the simplified acquisition threshold:

- (1) Brief general description and quantity of goods or services;
  - (2) Closing date for receiving quotations, proposals or bids; and
  - (3) Address where solicitations or specifications can be obtained.
- (b) [Reserved]

#### **§ 700.12 Contract provisions.**

(a) The non-Federal entity's contracts must contain the applicable provisions described in Appendix II to Part 200—Contract Provisions for non-Federal Entity Contracts Under Federal Awards.

(b) All negotiated contracts (except those for less than the simplified acquisition threshold) awarded by the non-Federal entity must include a provision to the effect that the non-Federal Entity, USAID, the Comptroller General of the United States, or any of their duly authorized representatives, must have access to any books, documents, papers and records of the contractor which are directly pertinent to a specific program for the purpose of making audits, examinations, excerpts and transcriptions.

#### **§ 700.13 Additional provisions for awards to for-profit entities.**

(a) This paragraph contains additional provisions that apply to awards to for-profit entities. These provisions supplement and make exceptions for awards to for-profit entities from other provisions of this part.

(1) Prohibition against profit. No funds will be paid as profit to any for-profit entity receiving or administering Federal financial assistance as a

recipient or subrecipient. Federal financial assistance does not include contracts as defined at 2 CFR 200.22, other contracts a Federal agency uses to buy goods or services from a contractor, or contracts to operate Federal government owned, contractor operated facilities (GOCOs). Profit is any amount in excess of allowable direct and indirect costs.

(2) Program income. As described in § 200.307(e)(2), program income earned by a for-profit entity may not be added to the Federal award.

(b) [Reserved]

### **Termination and Disputes**

#### **§ 700.14 Termination.**

If at any time USAID determines that continuation of all or part of the funding for a program should be suspended or terminated because such assistance would not be in the national interest of the United States or would be in violation of an applicable law, then USAID may, following notice to the recipient, suspend or terminate the award in whole or in part and prohibit the recipient from incurring additional obligations chargeable to the award other than those costs specified in the notice of suspension. If a suspension is put into effect and the situation causing the suspension continues for 60 calendar days or more, then USAID may terminate the award in whole or in part on written notice to the recipient and cancel any portion of the award which has not been disbursed or irrevocably committed to third parties.

#### **§ 700.15 Disputes.**

(a) Any dispute under or relating to a grant or agreement will be decided by the USAID Agreement Officer. The Agreement Officer must furnish the recipient a written copy of the decision.

(b) Decisions of the USAID Agreement Officer will be final unless, within 30 calendar days of receipt of the decision, the recipient appeals the decision to USAID's Assistant Administrator, Bureau for Management, or designee as delegated in Agency policy. Appeals must be in writing with a copy concurrently furnished to the Agreement Officer.

(c) In order to facilitate review of the record by the USAID's Assistant Administrator, Bureau for Management, or designee as delegated in Agency policy, the recipient will be given an opportunity to submit written evidence in support of its appeal. No hearing will be provided.

(d) Decisions by the Assistant Administrator, Bureau for Management, or designee as delegated in Agency policy, will be final.

**USAID—Specific Requirements****§ 700.16 Marking.**

(a) USAID policy is that all programs, projects, activities, public communications, and commodities, specified further at paragraphs (c) through (f) of this section, partially or fully funded by a USAID grant or cooperative agreement or other assistance award or subaward must be marked appropriately overseas with the USAID Identity, of a size and prominence equivalent to or greater than the recipient's, other donor's or any other third party's identity or logo.

(1) USAID reserves the right to require the USAID Identity to be larger and more prominent if it is the majority donor, or to require that a cooperating country government's identity be larger and more prominent if circumstances warrant; any such requirement will be on a case-by-case basis depending on the audience, program goals and materials produced.

(2) USAID reserves the right to request pre-production review of USAID funded public communications and program materials for compliance with the approved Marking Plan.

(3) USAID reserves the right to require marking with the USAID Identity in the event the recipient does not choose to mark with its own identity or logo.

(4) To ensure that the marking requirements "flow down" to subrecipients of subawards, recipients of USAID funded grants and cooperative agreements or other assistance awards are required to include a USAID-approved marking provision in any USAID funded subaward, to read as follows:

As a condition of receipt of this subaward, marking with the USAID Identity of a size and prominence equivalent to or greater than the recipient's, subrecipient's, other donor's or third party's is required. In the event the recipient chooses not to require marking with its own identity or logo by the subrecipient, USAID may, at its discretion, require marking by the subrecipient with the USAID Identity.

(b) Subject to § 700.16(a), (h), and (j), program, project, or activity sites funded by USAID, including visible infrastructure projects (for example, roads, bridges, buildings) or other programs, projects, or activities that are physical in nature (for example, agriculture, forestry, water management), must be marked with the USAID Identity. Temporary signs or plaques should be erected early in the construction or implementation phase. When construction or implementation is complete, a permanent, durable sign, plaque or other marking must be installed.

(c) Subject to § 700.16(a), (h), and (j), technical assistance, studies, reports, papers, publications, audio-visual productions, public service announcements, Web sites/Internet activities and other promotional, informational, media, or communications products funded by USAID must be marked with the USAID Identity.

(1) Any "public communications" as defined in § 700.1, funded by USAID, in which the content has not been approved by USAID, must contain the following disclaimer:

This study/report/audio/visual/other information/media product (specify) is made possible by the generous support of the American people through the United States Agency for International Development (USAID). The contents are the responsibility of [insert recipient name] and do not necessarily reflect the views of USAID or the United States Government.

(2) The recipient must provide the Agreement Officer's Representative (AOR) or other USAID personnel designated in the grant or cooperative agreement with at least two copies of all program and communications materials produced under the award. In addition, the recipient must submit one electronic and/or one hard copy of all final documents to USAID's Development Experience Clearinghouse.

(d) Subject to § 700.16(a), (h), and (j), events financed by USAID such as training courses, conferences, seminars, exhibitions, fairs, workshops, press conferences and other public activities, must be marked appropriately with the USAID Identity. Unless directly prohibited and as appropriate to the surroundings, recipients should display additional materials such as signs and banners with the USAID Identity. In circumstances in which the USAID Identity cannot be displayed visually, recipients are encouraged otherwise to acknowledge USAID and the American people's support.

(e) Subject to § 700.16(a), (h), and (j), all commodities financed by USAID, including commodities or equipment provided under humanitarian assistance or disaster relief programs, and all other equipment, supplies and other materials funded by USAID, and their export packaging, must be marked with the USAID Identity.

(f) After merit review of applications for USAID funding, USAID Agreement Officers will request apparently successful applicants to submit a Branding Strategy, defined in § 700.1. The proposed Branding Strategy will not be evaluated competitively. The Agreement Officer will review for adequacy the proposed Branding

Strategy, and will negotiate, approve and include the Branding Strategy in the award. Failure to submit or negotiate a Branding Strategy within the time specified by the Agreement Officer will make the apparently successful applicant ineligible for award.

(g) After merit review of applications for USAID funding, USAID Agreement Officers will request apparently successful applicants to submit a Marking Plan, defined in § 700.1. The Marking Plan may include requests for approval of Presumptive Exceptions, paragraph (h) of this section. All estimated costs associated with branding and marking USAID programs, such as plaques, labels, banners, press events, promotional materials, and the like, must be included in the total cost estimate of the grant or cooperative agreement or other assistance award, and are subject to revision and negotiation with the Agreement Officer upon submission of the Marking Plan. The Marking Plan will not be evaluated competitively. The Agreement Officer will review for adequacy the proposed Marking Plan, and will negotiate, approve and include the Marking Plan in the award. Failure to submit or negotiate a Marking Plan within the time specified by the Agreement Officer will make the apparently successful applicant ineligible for award.

Agreement Officers have the discretion to suspend the implementation requirements of the Marking Plan if circumstances warrant. Recipients of USAID funded grant or cooperative agreement or other assistance award or subaward should retain copies of any specific marking instructions or waivers in their project, program or activity files. Agreement Officer's Representatives will be assigned responsibility to monitor marking requirements on the basis of the approved Marking Plan.

(h) Presumptive exceptions:

(1) The above marking requirements in § 700.16(a) through (e) may not apply if marking would:

(i) Compromise the intrinsic independence or neutrality of a program or materials where independence or neutrality is an inherent aspect of the program and materials, such as election monitoring or ballots, and voter information literature; political party support or public policy advocacy or reform; independent media, such as television and radio broadcasts, newspaper articles and editorials; public service announcements or public opinion polls and surveys.

(ii) Diminish the credibility of audits, reports, analyses, studies, or policy recommendations whose data or findings must be seen as independent.

(iii) Undercut host-country government "ownership" of constitutions, laws, regulations, policies, studies, assessments, reports, publications, surveys or audits, public service announcements, or other communications better positioned as "by" or "from" a cooperating country ministry or government official.

(iv) Impair the functionality of an item, such as sterilized equipment or spare parts.

(v) Incur substantial costs or be impractical, such as items too small or other otherwise unsuited for individual marking, such as food in bulk.

(vi) Offend local cultural or social norms, or be considered inappropriate on such items as condoms, toilets, bed pans, or similar commodities.

(vii) Conflict with international law.

(2) These exceptions are presumptive, not automatic and must be approved by the Agreement Officer. Apparently successful applicants may request approval of one or more of the presumptive exceptions, depending on the circumstances, in their Marking Plan. The Agreement Officer will review requests for presumptive exceptions for adequacy, along with the rest of the Marking Plan. When reviewing a request for approval of a presumptive exception, the Agreement Officer may review how program materials will be marked (if at all) if the USAID identity is removed. Exceptions approved will apply to subrecipients unless otherwise provided by USAID.

(i) In cases where the Marking Plan has not been complied with, the Agreement Officer will initiate corrective action. Such action may involve informing the recipient of a USAID grant or cooperative agreement or other assistance award or subaward of instances of noncompliance and requesting that the recipient carry out its responsibilities as set forth in the Marking Plan and award. Major or repeated non-compliance with the Marking Plan will be governed by the uniform suspension and termination procedures set forth at 2 CFR 200.338 through 2 CFR 200.342, and 2 CFR 700.14.

(j)(1) *Waivers*. USAID Principal Officers, defined for purposes of this provision at § 700.1, may at any time after award waive in whole or in part the USAID approved Marking Plan, including USAID marking requirements for each USAID funded program, project, activity, public communication or commodity, or in exceptional circumstances may make a waiver by region or country, if the Principal Officer determines that otherwise USAID required marking would pose

compelling political, safety, or security concerns, or marking would have an adverse impact in the cooperating country. USAID recipients may request waivers of the Marking Plan in whole or in part, through the AOR. No marking is required while a waiver determination is pending. The waiver determination on safety or security grounds must be made in consultation with U.S. Government security personnel if available, and must consider the same information that applies to determinations of the safety and security of U.S. Government employees in the cooperating country, as well as any information supplied by the AOR or the recipient for whom the waiver is sought. When reviewing a request for approval of a waiver, the Principal Officer may review how program materials will be marked (if at all) if the USAID Identity is removed. Approved waivers are not limited in duration but are subject to Principal Officer review at any time due to changed circumstances. Approved waivers "flow down" to recipients of subawards unless specified otherwise. Principal Officers may also authorize the removal of USAID markings already affixed if circumstances warrant. Principal Officers' determinations regarding waiver requests are subject to appeal to the Principal Officer's cognizant Assistant Administrator. Recipients may appeal by submitting a written request to reconsider the Principal Officer's waiver determination to the cognizant Assistant Administrator.

(2) *Non-retroactivity*. Marking requirements apply to any obligation of USAID funds for new awards as of January 2, 2006. Marking requirements also will apply to new obligations under existing awards, such as incremental funding actions, as of January 2, 2006, when the total estimated cost of the existing award has been increased by USAID or the scope of effort is changed to accommodate any costs associated with marking. In the event a waiver is rescinded, the marking requirements will apply from the date forward that the waiver is rescinded. In the event a waiver is rescinded after the period of performance as defined in 2 CFR 200.77 but before closeout as defined in 2 CFR 200.16., the USAID mission or operating unit with initial responsibility to administer the marking requirements must make a cost benefit analysis as to requiring USAID marking requirements after the date of completion of the affected programs, projects, activities, public communications or commodities.

(k) The USAID Identity and other guidance will be provided at no cost or

fee to recipients of USAID grants, cooperative agreements or other assistance awards or subawards. Additional costs associated with marking requirements will be met by USAID if reasonable, allowable, and allocable under 2 CFR part 200, subpart E. The standard cost reimbursement provisions of the grant, cooperative agreement, other assistance award or subaward must be followed when applying for reimbursement of additional marking costs.

(End of award term)

## OFFICE OF PERSONNEL MANAGEMENT

### 5 CFR Parts 890 and 892

RIN 3206-AN08

#### Federal Employees Health Benefits Program Self Plus One Enrollment Type

**AGENCY:** Office of Personnel  
Management.

**ACTION:** Final rule.

**SUMMARY:** The United States Office of Personnel Management (OPM) is issuing a final rule to amend the Federal Employees Health Benefits (FEHB) Program regulations to add an additional enrollment type called "self plus one" for premium rating and family member eligibility purposes.

**DATES:** This rule is effective September 17, 2015.

**FOR FURTHER INFORMATION CONTACT:** Chelsea Ruediger at [Chelsea.Ruediger@opm.gov](mailto:Chelsea.Ruediger@opm.gov) or (202) 606-0004.

**SUPPLEMENTARY INFORMATION:** The U.S. Office of Personnel Management (OPM) issued a Notice of Proposed Rulemaking on December 2, 2014 to amend title 5 of the Code of Federal Regulations parts 890 and 892 to include a self plus one enrollment type to comply with the 2013 Bipartisan Budget Act. During the comment period on the proposed rule, OPM received 64 comments including 5 from Federal Employees Health Benefits (FEHB) Program carriers, 2 from employee organizations or unions, 1 from a carrier organization, and 56 from individuals, many of them enrollees in the FEHB Program. These comments are addressed below.

**General Comments Regarding Self Plus One**

OPM received a variety of comments, mostly from FEHB enrollees, expressing excitement about the self plus one enrollment type. Commenters indicated that the enrollment type will benefit them personally and financially.

One commenter requested justification for the implementation of the self plus one enrollment type and expressed concern over the level of complexity that this additional statutorily required enrollment type introduces to consumer choice in the FEHB Program. The commenter noted that under the current two-tier system, “the typical enrollee . . . has a choice of about 20 plan options” and projected that options available for families may double and premiums might vary greatly.

OPM is updating 5 CFR parts 890 and 892 to comply with provisions of the 2013 Bipartisan Budget Act. This more closely aligns insurance offerings for Federal employees with those available in the commercial market and to more equitably spread costs among the enrollment types offered.

OPM is aware that creation of a new enrollment tier may create additional complexity. However, this complexity is limited because the rule only introduces a new enrollment type. Benefits design will not differ from other enrollment types offered within the same plan option, which minimizes the complexity introduced by the rule. To alleviate potential concerns about complexity during the introductory year, § 892.207(d) has been amended in this final rule to include a one-time limited enrollment period to be held in early 2016. Final dates for the Limited Enrollment Period will be announced by OPM following the publication of this rule. During this period, enrollees will be allowed to decrease enrollment from self and family to self plus one. Enrollment changes made in conjunction with the limited enrollment period will be effective on the first day of the first pay period following the one in which the appropriate request is

received by the employing office. Because enrollees who do not participate in premium conversion (pre-tax deduction of premiums), including annuitants, may decrease their enrollment at any time, this limited enrollment period is intended only for premium conversion participants. No new enrollments, changes in plan or plan option, or increases in enrollment will be allowed in conjunction with the limited enrollment period.

In advance of Open Season each year, OPM, agencies and carriers inform employees and annuitants of their enrollment options and provide them with decision-making tools. Given the addition of the self plus one enrollment type, this communications strategy will be augmented for the 2015 Open Season. OPM communications will encourage enrollees to carefully review the options available to them for plan year 2016.

An FEHB carrier requested clarification that “enrollees will need to make a positive election through their agency or retirement office in order to switch from self only or self and family to self plus one.” This statement is correct. Just as is the case under the current two-tier system, enrollees must inform their agency, either through an electronic or paper copy of the Standard Form 2809, when they increase or decrease coverage. Agencies are responsible for submitting this information to carriers. This requirement will be no different for self plus one.

**Comments on Effective Dates**

Several commenters requested additional information about the timing of the implementation of the self plus one enrollment type. Others requested that OPM delay implementation by at least one year in order to conduct additional analysis. Another questioned the decision to implement the new self plus one enrollment option for plan year 2016, as this date was not required by law.

The effective date in this final rule has not been altered. The Bipartisan

Budget Act was passed in 2013 and OPM has been working diligently to implement this statutory mandate within a reasonable timeframe. Enrollees who have been looking forward to this change will now be able to select a self plus one enrollment type during the 2015 Open Season for effective dates in January of 2016.

**Comments on Family Member Eligibility**

OPM received three comments about family member eligibility. Two commenters asked about the eligibility of domestic partners and cohabitating (unmarried) opposite sex couples. A third comment asked if a sibling could be covered.

Family member eligibility is defined in title 5 U.S. Code section 8901 and includes spouses and children up to age 26. As stated in the supplementary information of the proposed rule, family member eligibility guidelines remain the same as in place under the two tier system. Domestic partners, cohabitating (unmarried) couples, and siblings are not considered eligible family members under the law at this time.

**Switching a Covered Family Member**

The proposed rule outlined the circumstances in which an enrollee with a self plus one enrollment would be allowed to switch their covered family member. Some commenters expressed concerns that these provisions might lead to adverse selection. OPM believes that adequate protection against adverse selection is provided in the manner in which Qualifying Life Events (QLEs) allowing such a change have been limited. Further, the general rule applies that the change must be consistent with the QLE experienced. The following chart, which was published with the proposed rule, clarifies which QLE codes will allow an enrollee to switch a covered family member outside of Open Season (definitions for each of the event codes can be found on the SF2809 at [http://www.opm.gov/forms/pdf\\_fill/sf2809.pdf](http://www.opm.gov/forms/pdf_fill/sf2809.pdf)):

Change	Permitted for the following event codes
<b>For Enrollees Participating in Premium Conversion</b>	
Switch covered family member under a self plus one enrollment .....	1B, 1C, 1I, 1J, 1M, 1N, 1O, 1P, 1Q, 1R
<b>For Annuitants (decreases in enrollment type are allowed at any time)</b>	
Switch covered family member under a self plus one enrollment .....	2A, 2B, 2F, 2G, 2H, 2I, 2J
<b>For Former Spouses Under the Spouse Equity Provision (decreases in enrollment type are allowed at any time)</b>	
Switch covered family member under a self plus one enrollment .....	3B, 3C, 3F, 3G, 3H, 3I

Change	Permitted for the following event codes
<b>For Temporary Continuation of Coverage (TCC) for Eligible Former Employees, Former Spouses, and Children (decreases in enrollment type are allowed at any time)</b>	
Switch covered family member under a self plus one enrollment .....	4B, 4C, 4D, 4F, 4G, 4H
<b>For Employees Not Participating in Premium Conversion (decreases in enrollment type are allowed at any time)</b>	
Switch covered family member under a self plus one enrollment .....	5B, 5C, 5F, 5G, 5H, 5I, 5J, 5N

One carrier organization requested that OPM require a 30 day advance notice to carriers before allowing a switch in covered family member in order to prevent overpayments as well as verification of alternative health insurance for the family member being removed. OPM declines to make this change. It is expected that carriers will utilize current standard operating procedures to process the switching of a covered family member; generally changes are effective at the beginning of the next pay period after receipt by the agency.

A commenter urged OPM to treat the switch as a cancellation for the family member who is being removed from the self plus one enrollment, thereby rendering the individual ineligible for the 31 day extension of coverage. Just as is the case under the two tier system, under § 890.401(a)(1) eligibility for the 31 day extension of coverage is provided for covered family members whose coverage is terminated other than by cancellation of the enrollment or discontinuance of the plan, in whole or in part. For family members, terminations are typically based on a loss of eligibility such as, in the case of a child, turning age 26; or, in the case of a spouse, a divorce. Cancellation is typically a voluntary election to no longer be covered under an FEHB plan, for example when a family member becomes eligible for other group coverage. Switching a covered family member may occur as the result of either a termination or a cancellation. Therefore, OPM declines to make this change.

One commenter urged OPM to apply a blanket policy against discretionary retroactive switching of a covered family member. Section 892.207(b) has been updated in the final rule to include switching a covered family member in order to accommodate this suggestion. Enrollment changes made under § 892.207 are, in general, effective on the first day of the first pay period following the one in which the appropriate request is received by the employing office. In addition, paragraph (f)(2) has been added to § 890.302 in the final rule to specify that the effective

date for switching a covered family member will be prospective. A definition of the term “switching a covered family member” has also been added to § 890.101.

One commenter requested that OPM clarify that “enrollees cannot switch the covered family member under the self plus one without a QLE to validate dependent eligibility.” As described in the proposed rule, and supported in the final rule, enrollees must experience a QLE in order to switch their covered family member.

One commenter requested additional information about how carriers will be notified of the designated covered family member under the self plus one enrollment. The Standard Form 2809 and electronic enrollment transmissions will be utilized just as they are currently to communicate enrollment information. Additionally, OPM is assessing other methods, including updating enrollment systems government-wide to allow for the transmittal of changes in the designated family member from agencies to carriers.

One commenter asked that OPM require the capture of a Social Security Number for dependents. As this is outside the scope of this rule, we decline to comment at this time.

**Qualifying Life Events (QLE)**

One commenter requested that OPM clarify whether or not enrollees must experience a QLE in order to decrease enrollment outside of Open Season. Under § 892.208, enrollees who participate in premium conversion must experience a QLE in order to decrease enrollment outside of Open Season. Under § 890.301(e), enrollees who do not participate in premium conversion may decrease enrollment at any time. This final rule has not altered these requirements.

Another commenter requested that OPM clarify that “retired federal employees/annuitants will have the option to change plans and/or enrollment types upon retirement, regardless of Medicare eligibility or age at the time of retirement.”

Retirement is not a QLE and therefore no changes may be made based solely on retirement. Retirement is a change from one payroll office to another. After an individual is retired, under the provisions in § 890.301(e), they may decrease enrollment or cancel coverage at any time. QLEs are still required for increasing coverage or changing plans outside of Open Season.

It was requested that OPM clarify the process for handling an annuitant who, upon experiencing the death of her spouse, forgets to decrease her enrollment to self only. As this question is beyond the scope of this regulation, OPM declines to comment at this time.

Additional guidance was requested regarding carrier responsibilities to notify enrollees and agencies when a family member has aged out of eligibility or passed away. OPM encourages carriers to contact their enrollees when a child ages out or if they learn of the death of a covered family member in order to inform the enrollee of their QLE opportunity at that time.

**Alternative Enrollment Types**

Four commenters suggested alternative enrollment types. One commenter suggested that OPM provide rates based on the number of family members enrolled. Another suggested an enrollment type available to only those enrolled in both FEHB and Medicare. A third commenter suggested that, instead of self plus one, OPM alter eligibility guidelines to allow spouses and dependents to enroll in their own right in self only enrollments. Finally, an FEHB carrier commented that OPM should implement a four-tier system: Self only, employee and spouse, employee and one non-spousal family member, and self and family. Commenters urged OPM to consider methods for encouraging or requiring Medicare enrollment. One suggested that OPM should consider reducing premiums for annuitants enrolled in Medicare as FEHB is the secondary payer. Another expressed concerns that the addition of the self plus one enrollment type would exacerbate an existing problem in which younger

enrollees subsidize higher cost annuitants.

OPM is unable to implement these suggested changes. The FEHB statute only allows the following enrollment types: Self only, self plus one, and self and family. Any other enrollment types, including separate enrollment tiers for individuals enrolled in Medicare, would require legislative change.

#### Definition of Self Plus One

OPM received four comments indicating that the definition of self plus one in the proposed rule, which does not preclude an individual with only one eligible family member from enrolling in self and family, has potentially negative consequences. These commenters indicated the definition, coupled with concerns that self plus one premiums and/or enrollee shares may rise above self and family premiums and/or enrollee shares, could result in revenue shortfall for carriers. They predicted that some consumers with only one eligible family member will likely select a self and family enrollment if the enrollee share is lower, leading to a financial loss for plans with higher claims costs for self plus one enrollments.

Individual choice is, and always has been, one of the hallmarks of the FEHB Program. Before the addition of the self plus one enrollment type, individuals have been free to select a self only or self and family enrollment, regardless of whether or not they have eligible family members. In that tradition, the final rule adopts the proposed rule's provision, providing individuals the freedom to select among all three enrollment types available, regardless of the number of their eligible family members.

One commenter requested that OPM use this opportunity to expressly state that all eligible family members are covered under a self and family enrollment. Current regulatory language, which has not been altered in this rule, already adequately expresses this. Section 890.302(a)(1) states that an enrollment for self and family includes all family member who are eligible to be covered by the enrollment. Further, the definition of self and family, as added by this final rule states that self and family enrollment means an enrollment that covers the enrollee and all eligible family members.

#### Government Contribution Calculations

The government contribution to premium is calculated based on weighted average of the subscription charges described in 5 U.S. Code section 8906. One commenter points out that most carriers are unable to predict the

government contribution for their plans because they do not cover an adequate portion of the total market to estimate actual FEHB enrollment to determine the weighted average. Thus, many plans propose total premiums to OPM without a complete understanding of what the government and enrollee contributions will be, putting them at a disadvantage in a competitive market. Given the additional uncertainty for plan year 2016, with the addition of the self plus one enrollment type, the commenter requested that OPM provide carriers more flexibility to adjust final premium rates during the negotiation process after the government contribution has been calculated. OPM will adhere to standard operating procedures for plan year 2016 final rate negotiations.

An FEHB carrier requested that OPM provide additional information to carriers concerning rate setting for plan year 2016. In addition, they cautioned OPM against applying the same government contribution for both self plus one and self and family enrollments for plan year 2016 as this method might lead to increased "unpredictability of which subscribers will choose which tier." Many commenters requested additional information about the weighted averages that would be used to determine the government contribution for plan year 2016.

The 2013 Bipartisan Budget Act provides OPM with flexibility in the first year that self plus one is offered to "determine the weighted average of the subscription charges that will be in effect for the contract year for enrollments for self plus one under such chapter based on an actuarial analysis."<sup>1</sup> The weighted average is used to calculate the Government contribution, according to a formula set in statute (5 U.S.C. 8906). OPM takes a count of enrollments with Government contributions in March of each year (referred to in the following paragraphs as the "March enrollment count"). This March enrollment count is used to determine the maximum Government contribution for the following plan year. For each enrollment type, OPM sums the product of the new premium and the March enrollment count for each option and divides the sum by the total number of individuals enrolled in that enrollment type.

Because we do not have self plus one data from our March 2015 enrollment count, OPM has determined that it will use the 2015 self and family March

enrollment count to calculate the weighted average for both the 2016 self plus one and self and family enrollment types. The weighted average for self plus one will be based on the 2016 self plus one premiums and the 2015 self and family March enrollment count. OPM provides rate-setting guidance to carriers on an annual basis. For the 2016 plan year, OPM requested that carriers propose self plus one premiums that are no greater than self and family premiums.<sup>2</sup> Although OPM does not expect this policy to change in the out years, the right to reevaluate is reserved.

#### Rate-Setting and the Cost of Self Plus One

Comments were received that indicated the addition of the self plus one enrollment type would translate into cost savings for enrollees with only one eligible family member. Commenters in this category praised OPM for implementing the new enrollment type. Other commenters expressed concerns about rate setting for the new self plus one enrollment type. In particular, a concern that self and family premiums would rise drastically in plan year 2016 in order to accommodate the new self plus one enrollment type. It was suggested that OPM impose a 10% cap on such growth in the final rule, especially for the first year of implementation. Others expressed concerns about the differential between the three enrollment tiers. OPM was asked to clarify whether or not the enrollee share of a self plus one enrollment would be less than or exactly equal to two self only enrollments. One carrier projected that, although self plus one premiums might not rise above self and family premiums, the differential between the two would be negligible, calling into question the cost-benefit of such a change given the high administrative burden of implementation.

Other commenters expressed concerns about actual claims costs. One highlighted the unique nature of the FEHB risk pool because the annuitant population is combined with the active employee population, indicating that many annuitants, who traditionally have higher claims costs, have only one eligible family member and therefore might make up the bulk of self plus one enrollees. Two commenters pointed out that HMO plans might be especially impacted. They expressed concerns that, if OPM were to require that self

<sup>1</sup> Full text available at <http://www.gpo.gov/fdsys/pkg/BILLS-113hjres59enr/pdf/BILLS-113hjres59enr.pdf>.

<sup>2</sup> United States Office of Personnel Management, Federal Employees Health Benefits Program Call Letter, Fiscal Year 2016, Issued March 13, 2015. <https://www.opm.gov/healthcare-insurance/healthcare/carriers/2015/2015-02.pdf>

plus one total premiums remain below self and family total premiums, the end result would be an even more dramatic increase for self and family enrollees. The commenter projected that this change would render some regional HMOs non-competitive, forcing them out of the FEHB market.

The final rule does not set differentials between tiers, nor does it impose caps on premium growth. Under the three tier system, carriers will set rate differentials between tiers that are appropriate for the expected population, just as they do under the two tier system. An artificial cap is unwarranted because plans must set rates that reflect the costs of the population they will be covering. Further, enrollees have free choice to stay in their current plan or shop for a less expensive plan or option that meets their needs. Because the FEHB Program is market-based, artificial caps on premium are likely to cause adverse consequences such as inadequate rates for some products.

One commenter requested that rate information be provided earlier than normally scheduled to provide individuals adequate time to analyze their options. Given the rate negotiation process outlined in § 890.501, OPM cannot set the government contribution before September 1st for the following plan year.

### Comments on the Regulatory Impact Analysis

Commenters who discussed OPM's Regulatory Impact Analysis (RIA) in the proposed rule asked that OPM provide a more robust analysis for public comment. Four commenters suggested that the RIA provided in the proposed rule was insufficient under requirements outlined in the Administrative Procedures Act, Executive Order 12866, Executive Order 13563, and the Congressional Review Act. They suggested a delay in implementation in order to conduct additional analysis, provide details to the public, and allow for an additional comment period. One commenter stated OPM had failed to properly justify the change and to explain the potential impacts on the FEHB Program. Multiple commenters disagreed with OPM's assertion that self plus one premiums would likely be lower than self and family. One commenter noted that the RIA failed to discuss the possibility of rate differentials between the enrollment types. The commenter suggested that all carriers should be required to maintain the same differentials between their plan tiers. The commenter requested an actuarial analysis of the method that will be

utilized to determine the weighted average of all FEHB plans for plan year 2015.

OPM believes the analysis provided in the proposed rule fulfills legal requirements. As noted in the proposed and reiterated in the final rule, this change is being implemented to comply with the 2013 Bipartisan Budget Act. In addition, this change aligns insurance offerings with those available in the commercial market and more equitably spreads costs among the enrollment types offered.

### Information Provided to Carriers

Four commenters requested that we clarify information for carriers. One commenter asked OPM to release details, including the final rule, by March 31, 2015 to allow carriers ample time to prepare. Another commenter asked for additional details on enrollment and eligibility under the new self plus one enrollment type; however, provided no specific questions.

One commenter asked that OPM clarify benefits structures including deductibles and out of pocket maximums. OPM addressed these issues through normal carrier communications including the annual call letter, carrier letters, and teleconferences. OPM utilizes several methods for communicating with carriers including, but not limited to carrier letters, brochure tools, and teleconferences. Some of the information requested during the public comment period either has already been released or is forthcoming via these alternative communication methods.

### Systems Updates

OPM received three comments relative to the systems updates required to implement the new self plus one enrollment type. One commenter also asked that the brochure template language be available early. Two commenters suggested that OPM improve processes by which dependent information is communicated to carriers. An employee organization noted that the number of enrollment changes in Open Season 2015 is likely to far exceed the average Open Season and expressed concerns that the overall system would not be able to handle this increased number of enrollment changes.

OPM has carefully and deliberately been reviewing, modifying, and testing internal systems to ensure that enrollee information is accurately collected and disseminated to carriers. In addition, numerous communications have been distributed on the required systems

changes with agencies, carriers, and enrollment systems. We are confident that, through all of these efforts, all necessary systems updates will be completed in time for a smooth implementation of the self plus one enrollment type in plan year 2016.

### Paperwork Reduction Act (PRA)

OPM has reviewed this final rule for PRA implications and has determined that it does not apply to this section.

### Regulatory Impact Analysis

Executive Order 12866 and Executive Order 13563 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public, health, and safety effects, distributive impacts, and equity). A regulatory impact analysis must be prepared for major rules that may have economically significant effects (*i.e.*, effects of \$100 million or more in at least one year). Given that there are approximately 8.2 million members participating in the FEHB Program, including approximately one million two-person self and family enrollments, and participation involves hundreds of dollars per member per month, we cannot rule out the possibility that this final rule's changes to the FEHB Program will have effects that meet the threshold for economic significance. We do expect the overall federal budget impact of this final rule to be net neutral, though this is subject to uncertainty.

The new enrollment tier will align FEHB Program offerings with the commercial market and serve to more equitably spread costs across different enrollment types; in other words, it will shift costs among program participants. For plan year 2016, OPM has required that that the self plus one enrollment type have total premiums no greater than self and family total premiums.

### Current FEHB Enrollment Trends

In plan year 2015 there were over 4 million FEHB contracts. This includes 1.89 million self only contracts (47%) and 2.13 million self and family contracts (53%).

During a typical year, approximately 6% of FEHB enrollees change their enrollment by selecting a new plan option or a new enrollment type (approximately 8% of active employees and 4% of annuitants). However, as this is the first time the FEHB Program has experienced a large-scale programmatic change as the addition of a new enrollment type, it is expected that

movement will be greater in the coming years as enrollees learn more about their options.

#### *Predicting Enrollment Trends Under the Three Tier System*

In order to estimate the impact of the addition of the self plus one enrollment type, OPM has conducted an analysis to predict the potential shift in enrollment that may occur.

OPM determined that the following movement patterns were possible:

- FEHB eligible individuals who are currently not enrolled may choose to enroll in FEHB after self plus one becomes available.
- Current self only enrollees may choose to increase enrollment to include coverage for an eligible family member who is not currently covered under an FEHB enrollment.
- Current self only enrollees may choose to cancel coverage in order to be covered under a spouse or parent's self plus one FEHB enrollment.
- Current self and family enrollees with only one eligible family member may choose to decrease to a self plus one enrollment.
- Current self and family enrollees with two or more eligible family members may choose to decrease to a self plus one enrollment to cover only one of their eligible family members.
- Some FEHB enrollees in either self only or self and family may choose to cancel their enrollments.
- Enrollees in either self only or self and family may choose to remain in their current enrollment type.

Based on available data and experience, OPM estimates that much of the movement that will occur will result in a shift from one enrollment type to another. There are a limited number of circumstances where the addition of the self plus one enrollment type may result in new FEHB enrollees or in enrollees leaving the program. It is difficult to estimate how many individuals may newly enroll in the program. Most employees who do not participate in the FEHB Program do so because they have access to other insurance options. This rule will not alter access to other insurance for FEHB eligible employees. Also, because OPM does not have government-wide eligible and covered family member data, it is not known exactly how many individuals are covered under self and family enrollments, nor is it known how many eligible family members exist but are not currently covered because the enrollee has chosen a self only enrollment.

In order to learn more about potential movement between enrollment types,

OPM requested data on covered enrollees and family members from carriers with the 2014 rate proposals. Carriers reported that over one million self and family contracts had only one dependent listed. Of those enrollments, approximately 60% were annuitants and 40% were active employees. While this number does not capture the universe of enrollees who may choose a self plus one enrollment, it does provide a starting place for estimating the potential movement between tiers.

OPM also examined enrollment data for the Federal Employees Dental and Vision Insurance Program (FEDVIP). FEDVIP has offered self plus one as an enrollment option since its inception in 2007. There are currently approximately 2.7 million FEDVIP contracts. Of those, 41% are self only, 32% are self plus one, and 27% are self and family.

Comparing FEHB and FEDVIP enrollment patterns may be illustrative because the pool of eligible individuals is roughly the same. Most FEDVIP enrollees are also eligible for FEHB. However, there are some key differences between the programs. First, family member eligibility guidelines are slightly different. Eligible children are covered under FEDVIP enrollments until the age of 22 whereas eligible children are covered under FEHB until the age of 26. Second, FEDVIP has lower participation as it is an employee-pay-all program with no government contribution towards the premium. In addition, benefits offered in standalone dental and vision programs are limited, and therefore, enrollee behavior and motivation based on those benefits would be different.

Examining the types of movement that are possible and comparing FEHB enrollment trends with other programs provides only a limited view of the complex factors that affect enrollment decisions for enrollees. Enrollee choice and movement is an individualized decision based on the needs of the enrollee and their dependents. Self plus one uptake is dependent on a combination of factors including premiums, benefits structures, and the level of communication from agencies, carriers, and OPM about new enrollment options.

For most enrollees, the enrollee share for self plus one will be lower than for self and family; however, it is possible that, because of the statutory formula used to calculate the government contribution, some plans may have a higher enrollee share for self plus one than for self and family. This will make it even more important for enrollees to review their enrollment options before selecting a plan and an enrollment type

that meets their needs. OPM is implementing a robust communications strategy to ensure that as many enrollees as possible are aware of the new self plus one enrollment type.

Plan design remains the same between enrollment types offered in the same plan option. Therefore, OPM expects that cognitive costs for enrollees would be relatively low. For those enrollees that do not typically reevaluate their enrollment every Open Season, the cognitive costs of a review of the plans, plan options, and enrollment types available may well be worth incurring, as they may discover better alternatives (though these improvements may represent transfers from other members of society, rather than benefits to society as whole). Ultimately, actual enrollment decisions cannot be predicted with precision. Further, it will likely take years for enrollment numbers to reach an equilibrium following this Program change.<sup>3</sup>

#### *Cost Analysis*

OPM's Fiscal Year 2014 Congressional Budget Justification<sup>4</sup> included a projection that the addition of the self plus one enrollment would have a net neutral impact on the Federal budget. This projection, based on FEHB carriers' relative costs and population

<sup>3</sup> As discussed in more detail elsewhere in this analysis, plan switching—in which federal employees and annuitants with one eligible family member gravitate toward plans with relatively low self plus one premiums and federal employees and annuitants with multiple eligible family members gravitate toward plans with relatively low self and family premiums—would lead to further changes in premiums, and several iterations of switching activity and premium adjustments may occur before the new equilibrium is reached. Moreover, because health insurance decisions tend to be characterized by inertia, the behavioral changes discussed here and throughout this analysis may be relatively rare when this rule is first implemented and then become more widespread over time, as turnover occurs in the federal workforce and there is an accumulation of qualifying life events that cause FEHB participants to reconsider their health insurance choices.

<sup>4</sup> United States Office of Personnel Management, Congressional Budget Justification Performance Budget, Fiscal Year 2014, Submitted April 2013, available at <https://www.opm.gov/about-us/budget-performance/budgets/congressional-budget-justification-fy2014.pdf>. See also Congressional Budget Office, Cost Estimate, Bipartisan Budget Act of 2013, dated December 11, 2013, available at <http://www.cbo.gov/sites/default/files/cbofiles/attachments/Bipartisan%20Budget%20Act%20of%202013.pdf>. In estimating potential premium changes, OPM used data on FEHB enrollees' medical expenditures, while CBO used data on medical expenditures for the general population. Because of the large number of annuitants in the FEHB enrolled population, two-person FEHB enrollments tend to have higher costs than two-person enrollments in the nation as a whole, thus explaining some of the difference between OPM's and CBO's estimates.

distributions, included the following assumptions:

- The average premium for self plus one coverage will be approximately 94% of the cost of existing self and family coverage.
- The average premium for self and family coverage will be approximately 107% of the cost of existing self and family coverage.
- 33% of active employees with existing self and family will shift to self plus one coverage.
- Only 20% of annuitants with existing self and family coverage will retain that coverage (80% will shift to self plus one).

As discussed above, there are several ways in which enrollees may choose to change their enrollment based on the addition of the self plus one enrollment type. The magnitudes of these changes (and the effects experienced by the government that depend on FEHB participants' behavior) would be correlated with the amount that participant premium contributions change. If, as shown above, self plus one premiums are only slightly lower than baseline self and family premiums, then two-person families will have little incentive to transfer family members from other coverage to FEHB. Similarly, if self and family premiums increase only slightly as a result of this rule, then families larger than two people will have little incentive to switch some or all of their members from FEHB to other health insurance coverage. As a result, in this example, a change in the cost of the Program would be contingent, in part, upon the amount of switching into or out of FEHB from/to other health insurance.

Current enrollees with self and family coverage who only have one dependent and choose to decrease enrollment to self plus one, will likely benefit from lower premiums. Those with more than one dependent covered under a self and family enrollment will likely incur higher premiums. A large percentage of annuitants who currently have self and family coverage would likely benefit from the lower total premiums of a self plus one enrollment type, resulting in score-able savings to the government because the government share of annuitant premiums will decrease.

OPM estimated that, in total, savings for annuitants and the government would rise above \$450 million in the first year of self plus one. Conversely, costs for non-Postal employees and the government would rise about \$450 million for the same time frame. This converse relationship between costs associated with annuitants and employees continues into future year

projections and results in the overall net-neutral projection.

Actual cost shifting cannot be measured until rate negotiations are finalized and enrollment changes take place. As enrollees shift from self only and self and family enrollments, OPM will closely monitor the effect on premiums. If premiums for active employees with two or more covered family members rise, there will be increasing costs to government agencies (assuming appropriation of necessary funds).<sup>5</sup>

The impact of this final rule hinges upon the relative premiums for self plus one and self and family enrollment types. Because the self and family option includes coverage for a larger number of people, a natural assumption would be that premiums would be lower for a self plus one enrollment type than for a self and family enrollment type. For plan year 2016, OPM instructed carriers to propose total premiums for self plus one that were less than or equal to total premiums for self and family. In that case, several rule-induced outcomes are likely:

- Federal employees and annuitants who, in the absence of the rule, would choose self and family enrollment for themselves and either a spouse or a child would switch to a self plus one enrollment, resulting in lower total premium payments between employees, annuitants and the federal government.
- Federal employees and annuitants choosing self and family enrollment for themselves and at least two family members would experience an increase in premiums and therefore, in some cases, may choose to switch from FEHB to an alternative health insurance option. If all such families continued with FEHB participation, the government would experience an increase in premium payments that would (in theory) exactly offset the decreases associated with two-person families switching from self and family to self plus one enrollment; however, any switching away from FEHB would mitigate the premium increases experienced by the federal government, instead potentially leading to payment increases by any contributors to the newly-chosen insurance options (an obvious example would be the employer

of a federal employee's or annuitant's spouse if that employer sponsors the newly-chosen insurance).

- Federal employees and annuitants who, in the absence of the rule, would choose self only enrollment in spite of having a spouse who would be eligible for coverage under self and family enrollment may choose self plus one enrollment. This might occur if a self and family premium is greater than the combined premiums for a federal employee's self only enrollment and a spouse's self only enrollment in health insurance through his or her own non-federal employer, but the relevant FEHB self plus one premium is less than the combined premiums.<sup>6</sup> In this type of scenario in which the federal employee's or annuitant's enrollment increases, the federal government would pay more in premiums (relative to a baseline in which this rule is not finalized) but the federal employee's or annuitant's family would pay less. Any contributors to the insurance in which the family member would be enrolled in the absence of the rule—such as the non-federal employer of the federal employee's spouse in the preceding example—would also pay less.

To the extent that new patterns of enrollment do not change how society uses its resources (*i.e.*, amount or quality of medical services provided), then the effects described above would be transfers between members of society, rather than social costs or benefits.

It is possible that two-person families are, on average, less healthy than larger families; indeed, multiple comments to the docket provided evidence that some plans' expenditures for two-person enrollments are higher than for enrollments with three or more total family members. For the 2016 plan year, because OPM has requested that carriers propose self plus one premiums no greater than self and family premiums, plans with this medical expenditure pattern will presumably set equal premiums for self plus one and self and family enrollment types. In the event that OPM does not repeat this request for future years, plans with higher average expenditures for two-person than for larger families will presumably set premiums higher for self plus one enrollment than for self and family

<sup>5</sup> United States Office of Personnel Management, Congressional Budget Justification Performance Budget, Fiscal Year 2014, Submitted April 2013, available at <https://www.opm.gov/about-us/budget-performance/budgets/congressional-budget-justification-fy2014.pdf>. See also Congressional Budget Office, Cost Estimate, Bipartisan Budget Act of 2013, dated December 11, 2013, available at <http://www.cbo.gov/sites/default/files/cbofiles/attachments/Bipartisan%20Budget%20Act%20of%202013.pdf>.

<sup>6</sup> Similarly, federal employees and annuitants who, in the absence of the rule, would choose not to participate in the FEHB Program may choose a self plus one enrollment. For example, this outcome might occur if the self plus one option available in the FEHB Program is less expensive than either a family or plus-one enrollment available via a federal employee's spouse or the combined premiums for the federal employee's self only enrollment and the spouse's self only enrollment.

enrollment. If this pattern—in which self plus one premiums are greater than or equal to self and family premiums—held universally, the lack of premium decrease to give federal employees and annuitants an incentive to switch from self and family to self plus one enrollment would lead to the rule’s enrollment impact being negligible.<sup>7</sup> However, as indicated by docket submissions, relative expenditures on (and thus premiums for) two-person and larger enrollments differ across plans, and hence the effect of adding the self plus one option may be to increase switching between plans, as federal employees and annuitants with one eligible family member gravitate toward plans with relatively low self plus one premiums and federal employees and annuitants with multiple eligible family members gravitate toward plans with relatively low self and family premiums. Plan switching of this type would lead to further changes in premiums and several iterations of switching activity and premium adjustments may occur.

Additionally, the rule imposes implementation costs, such as the costs of systems updates, on FEHB-participating health insurance plans, federal agencies, and on OPM itself. These expenses are encompassed in existing workloads. OPM has no specific estimate for these costs, but expects them to be marginal.

Though regulatory alternatives to this rule are limited due to the statutory mandate, OPM did consider delaying implementation of the rule until the 2017 plan year. OPM rejected this option for two reasons. First, delaying implementation will not provide additional information. Because OPM contracts with a number of carriers, proposed rates are proprietary and cannot be released publically without compromising confidential negotiation processes. Until first year negotiations are completed and enrollment changes occur, OPM would not have a precise understanding of the impact of the self plus one enrollment type on premiums.

Second, implementation has already been delayed. After the passage of the 2013 Bipartisan Budget Act, the first year that implementation would have been possible was plan year 2015. OPM determined that this was not adequate time to implement the new enrollment type and chose to delay implementation

until 2016. OPM, carriers, and Federal agencies are well into the implementation process. Rate negotiations between OPM and FEHB carriers have begun under the assumption that the 2016 plan year would include the self plus one enrollment type. Agencies and carriers are currently implementing the systems changes required to accommodate three tier enrollments. Delaying implementation would adversely impact the Federal benefits Open Season which is scheduled to begin in early November of this year.

**Congressional Review Act**

OPM has determined that this regulatory action is not subject to the Congressional Review Act, 5 U.S.C. 801–08, because it relates to agency management and personnel. The program is not statutorily for general application but rather governs employment fringe benefits for Federal employees, annuitants and their families. Moreover, OPM has been statutorily granted discretion in terms of deciding how its actions may affect non-agency parties, such as carriers, by its authority to regulate enrollment. See, 5 U.S.C. 8905(a), 8905(g)(2), and 8913(b).

**Regulatory Flexibility Act**

I certify that this regulation will not have a significant economic impact on a substantial number of small entities because the regulation only adds a self plus one enrollment tier to the current self only and self and family enrollment tiers under FEHB.

**Executive Orders 13563 and 12866, Regulatory Review**

This rule has been reviewed by the Office of Management and Budget in accordance with Executive Orders 13563 and 12866.

**Federalism**

We have examined this rule in accordance with Executive Order 13132, Federalism, and have determined that this rule will not have any negative impact on the rights, roles and responsibilities of State, local, or tribal governments.

**List of Subjects**

5 CFR Part 890

Administrative practice and procedure, Government employees, Health facilities, Health insurance, Health professions, Hostages, Iraq, Kuwait, Lebanon, Military personnel, Reporting and recordkeeping requirements, Retirement.

5 CFR Part 892

U.S. Office of Personnel Management.

**Beth F. Cobert,**  
*Acting Director.*

Accordingly, OPM is amending title 5, Code of Federal Regulations as follows:

**PART 890—FEDERAL EMPLOYEES HEALTH BENEFITS PROGRAM**

■ 1. The authority citation for part 890 continues to read as follows:

**Authority:** 5 U.S.C. 8913; Sec. 890.301 also issued under sec. 311 of Pub. L. 111–03, 123 Stat. 64; Sec. 890.111 also issued under section 1622(b) of Pub. L. 104–106, 110 Stat. 521; Sec. 890.112 also issued under section 1 of Pub. L. 110–279, 122 Stat. 2604; 5 U.S.C. 8913; Sec. 890.803 also issued under 50 U.S.C. 403p, 22 U.S.C. 4069c and 4069c–1; subpart L also issued under sec. 599C of Pub. L. 101–513, 104 Stat. 2064, as amended; Sec. 890.102 also issued under sections 11202(f), 11232(e), 11246(b) and (c) of Pub. L. 105–33, 111 Stat. 251; and section 721 of Pub. L. 105–261, 112 Stat. 2061.

- 2. Amend § 890.101 as follows:
  - a. By revising the definitions of “Change the enrollment” and “Covered family member.”
  - b. By adding the definitions of “Decrease enrollment type,” “Increase enrollment type,” “Self and family enrollment,” “Self only enrollment,” “Self plus one enrollment,” and “Switch a covered family member” in alphabetical order.

The revisions and additions read as follows:

**§ 890.101 Definitions; time computations.**

\* \* \* \* \*

*Change the enrollment* means to submit to the employing office an appropriate request electing a change of enrollment to a different plan or option, or to a different type of coverage (self only, self plus one, or self and family).

\* \* \* \* \*

*Covered family member* means a member of the family of an enrollee with a self plus one or self and family enrollment who meets the requirements of §§ 890.302, 890.804, or 890.1106(a), as appropriate to the type of enrollee.

\* \* \* \* \*

*Decrease enrollment type* means a change in enrollment from self and family to self plus one or to self only or a change from self plus one to self only.

\* \* \* \* \*

*Increase enrollment type* means a change in enrollment from self only to self plus one or to self and family or a

<sup>7</sup> This negligible-impact outcome may not occur if the government contribution, as determined by statutory formula, was such that enrollee contributions were lower for self plus one enrollments than for self and family enrollments even in cases where total premiums for self plus one enrollments were greater than or equal to total premiums for self and family enrollments.

change from self plus one to self and family.

\* \* \* \* \*

*Self and family enrollment* means an enrollment that covers the enrollee and all eligible family members.

*Self only enrollment* means an enrollment that covers only the enrollee.

*Self plus one enrollment* means an enrollment that covers the enrollee and one eligible family member.

\* \* \* \* \*

*Switch a covered family member* means, under a self plus one enrollment, to terminate or cancel the enrollment of the designated covered family member and designate another eligible family member for coverage.

\* \* \* \* \*

■ 3. Amend § 890.201 by revising paragraph (a)(6) to read as follows:

**§ 890.201 Minimum standards for health benefits plans.**

(a) \* \* \*

(6) Provide a standard rate structure that contains, for each option, one standard self only rate, one standard self plus one rate and one standard self and family rate.

\* \* \* \* \*

■ 4. Amend § 890.301 by revising paragraphs (e), (f)(3), (g)(1) and (3), (h) heading and introductory text, (i) introductory text, (i)(1), and (m) to read as follows:

**§ 890.301 Opportunities for employees who are not participants in premium conversion to enroll or change enrollment; effective dates.**

\* \* \* \* \*

(e) *Decreasing enrollment type.* (1) Subject to two exceptions, an employee may decrease enrollment type at any time. *Exceptions:*

(i) An employee participating in health insurance premium conversion may decrease enrollment type during an open season or because of and consistent with a qualifying life event as defined in part 892 of this chapter.

(ii) An employee who is subject to a court or administrative order as discussed in paragraph (g)(3) of this section may not decrease enrollment type in a way that eliminates coverage of a child identified in the order as long as the court or administrative order is still in effect and the employee has at least one child identified in the order who is still eligible under the FEHB Program, unless the employee provides documentation to the agency that he or she has other coverage for the child(ren). The employee may not elect self only as long as he or she has one child identified as covered, but may elect self plus one.

(2) A decrease in enrollment type takes effect on the first day of the first pay period that begins after the date the employing office receives an appropriate request to change the enrollment, except that at the request of the enrollee and upon a showing satisfactory to the employing office that there was no family member eligible for coverage under the self plus one or self and family enrollment, or only one family member eligible for coverage under the self and family enrollment, as appropriate, the employing office may make the change effective on the first day of the pay period following the one in which there was, in the case of a self plus one enrollment, no family member or, in the case of a self and family enrollment, only one or no family member.

(f) \* \* \*

(3) With one exception, during an open season, an eligible employee may enroll and an enrolled employee may decrease or increase enrollment type, may change from one plan or option to another, or may make any combination of these changes. *Exception:* An employee who is subject to a court or administrative order as discussed in paragraph (g)(3) of this section may not cancel his or her enrollment, decrease enrollment type, or change to a comprehensive medical plan that does not serve the area where his or her child or children live as long as the court or administrative order is still in effect, and the employee has at least one child identified in the order who is still eligible under the FEHB Program, unless the employee provides documentation to the agency that he or she has other coverage for the child(ren). The employee may not elect self only as long as he or she has one child identified as covered, but may elect self plus one.

\* \* \* \* \*

(g) *Change in family status.* (1) An eligible employee may enroll and an enrolled employee may decrease or increase enrollment type, change from one plan or option to another, or make any combination of these changes when the employee's family status changes, including a change in marital status or any other change in family status. The employee must enroll or change the enrollment within the period beginning 31 days before the date of the change in family status, and ending 60 days after the date of the change in family status.

\* \* \* \* \*

(3)(i) If an employing office receives a court or administrative order on or after October 30, 2000, requiring an employee to provide health benefits for his or her child or children, the employing office

will determine if the employee has a self plus one or self and family enrollment, as appropriate, in a health benefits plan that provides full benefits in the area where the child or children live. If the employee does not have the required enrollment, the agency must notify him or her that it has received the court or administrative order and give the employee until the end of the following pay period to change his or her enrollment or provide documentation to the employing office that he or she has other coverage for the child or children. If the employee does not comply within these time frames, the employing office must enroll the employee involuntarily as stated in paragraph (g)(3)(ii) of this section.

(ii) If the employee is not enrolled or does not enroll, the agency must enroll him or her for self plus one or self and family coverage, as appropriate, in the option that provides the lower level of coverage in the Service Benefit Plan. If the employee is enrolled but does not increase the enrollment type in a way that is sufficient to cover the child or children, the employing office must change the enrollment to self plus one or self and family, as appropriate, in the same option and plan, as long as the plan provides full benefits in the area where the child or children live. If the employee is enrolled in a comprehensive medical plan that does not serve the area in which the child or children live, the employing office must change the enrollment to self plus one or self and family, as appropriate, in the option that provides the lower level of coverage in the Service Benefit Plan.

\* \* \* \* \*

(h) *Change in employment status.* An eligible employee may enroll and an enrolled employee may decrease or increase enrollment type, change from one plan or option to another, or make any combination of these changes when the employee's employment status changes. Except as otherwise provided, an employee must enroll or change the enrollment within 60 days after the change in employment status. Employment status changes include, but are not limited to—

\* \* \* \* \*

(i) *Loss of coverage under this part or under another group insurance plan.* An eligible employee may enroll and an enrolled employee may decrease or increase enrollment type, change from one plan or option to another, or make any combination of these changes when the employee or an eligible family member of the employee loses coverage under this part or another group health benefits plan. Except as otherwise

provided, an employee must enroll or change the enrollment within the period beginning 31 days before the date of loss of coverage, and ending 60 days after the date of loss of coverage. Losses of coverage include, but are not limited to—

(1) Loss of coverage under another FEHB enrollment due to the termination, cancellation, or a change to self plus one or to self only, of the covering enrollment.

\* \* \* \* \*

(m) *An employee or eligible family member becomes eligible for premium assistance under Medicaid or a State Children's Health Insurance Program (CHIP).* An eligible employee may enroll and an enrolled employee may decrease or increase enrollment type, change from one plan or option to another, or make any combination of these changes when the employee or an eligible family member of the employee becomes eligible for premium assistance under a Medicaid plan or CHIP. An employee must enroll or change his or her enrollment within 60 days after the date the employee or family member is determined to be eligible for assistance.

■ 5. Amend § 890.302 by revising paragraphs (a)(1), (a)(2)(ii), and (c) introductory text and adding paragraph (f) to read as follows:

**§ 890.302 Coverage of family members.**

(a)(1) An enrollment for self plus one includes the enrollee and one eligible family member. An enrollment for self and family includes all family members who are eligible to be covered by the enrollment. Except as provided in paragraph (a)(2) of this section, no employee, former employee, annuitant, child, or former spouse may enroll or be covered as a family member if he or she is already covered under another person's self plus one or self and family enrollment in the FEHB Program.

(2) \* \* \*

(ii) *Exception.* An individual described in paragraph (a)(2)(i) of this section may enroll if he or she or his or her eligible family members would otherwise not have access to coverage, in which case the individual may enroll in his or her own right for self only, self plus one, or self and family coverage, as appropriate. However, an eligible individual is entitled to receive benefits under only one enrollment regardless of whether he or she qualifies as a family member under a spouse's or parent's enrollment. To ensure that no person receives benefits under more than one enrollment, each enrollee must promptly notify the insurance carrier as to which person(s) will be covered

under his or her enrollment. These individuals are not covered under the other enrollment. Examples include but are not limited to:

(A) To protect the interests of married or legally separated Federal employees, annuitants, and their children, an employee or annuitant may enroll in his or her own right in a self only, self plus one, or self and family enrollment, as appropriate, even though his or her spouse also has a self plus one or self and family enrollment if the employee, annuitant, or his or her children live apart from the spouse and would otherwise not have access to coverage due to a service area restriction and the spouse refuses to change health plans.

(B) When an employee who is under age 26 and covered under a parent's self plus one or self and family enrollment acquires an eligible family member, the employee may elect to enroll for self plus one or self and family coverage.

\* \* \* \* \*

(c) *Child incapable of self-support.* When an individual's enrollment for self plus one or self and family includes a child who has become 26 years of age and is incapable of self-support, the employing office must require such enrollee to submit a physician's certificate verifying the child's disability. The certificate must—

\* \* \* \* \*

(f) *Switching a covered family member.* (1) An enrollee with a self plus one enrollment may switch his or her covered family member during the annual Open Season, upon a change in family status, upon a change in coverage, or upon a change in eligibility, so long as switching a covered family member is consistent with the event that has taken place.

(2) Switching a covered family member under a self plus one enrollment will be effective on the first day of the first pay period that begins after the date the employing office receives an appropriate request to switch the covered family member.

■ 6. Amend § 890.303 by revising paragraphs (c), (d)(2)(ii), and the heading of paragraph (d)(3) to read as follows:

**§ 890.303 Continuation of enrollment.**

\* \* \* \* \*

(c) *On death.* The enrollment of a deceased employee or annuitant who is enrolled for self plus one or self and family (as opposed to self only) is transferred automatically to his or her eligible survivor annuitant(s) covered by the enrollment, as applicable. For self and family, the enrollment is considered to be that of:

(1) The survivor annuitant from whose annuity all or the greatest portion of the withholding for health benefits is made; or

(2) The surviving spouse entitled to a basic employee death benefit. The enrollment covers members of the family of the deceased employee or annuitant. In those instances in which the annuity is split among surviving family members, multiple enrollments are allowed. A remarried spouse is not a member of the family of the deceased employee or annuitant unless annuity under section 8341 or 8442 of title 5, United States Code, continues after remarriage.

(d) \* \* \*

(2) \* \* \*

(ii) If the surviving spouse of a deceased employee or annuitant is enrolled as an employee with a self plus one or self and family enrollment (or, if both the decedent and the surviving spouse were enrolled in a self only or self plus one enrollment) at the time the surviving spouse becomes a survivor annuitant and the surviving spouse is thereafter separated without entitlement to continued enrollment as a retiree, the surviving spouse is entitled to enroll as a survivor annuitant. The change from coverage as an employee to coverage as a survivor annuitant must be made within 30 days of separation from service.

\* \* \* \* \*

(3) *Insurable interest survivor annuity.*

\* \* \*

\* \* \* \* \*

■ 7. Amend § 890.306 by revising paragraphs (e), (f)(1)(i), (g)(1), (l) introductory text, (l)(1), (n), and (r) to read as follows:

**§ 890.306 When can annuitants or survivor annuitants change enrollment or reenroll and what are the effective dates?**

\* \* \* \* \*

(e) *Decreasing enrollment type.* (1) With one exception, an annuitant may decrease enrollment type at any time. Exception: An annuitant who, as an employee, was subject to a court or administrative order as discussed in § 890.301(g)(3) at the time he or she retired may not, after retirement, decrease enrollment type in a way that eliminates coverage of a child identified in the order as long as the court or administrative order is still in effect and the annuitant has at least one child identified in the order who is still eligible under the FEHB Program, unless the annuitant provides documentation to the retirement system that he or she has other coverage for the child or children. The annuitant may not elect

self only as long as he or she has one child identified as covered, but may elect self plus one.

(2) A decrease in enrollment type takes effect on the first day of the first pay period that begins after the date the employing office receives an appropriate request to change the enrollment, except that at the request of the annuitant and upon a showing satisfactory to the employing office that there was no family member eligible for coverage under the self plus one or self and family enrollment, or only one family member eligible for coverage under the self and family enrollment, as appropriate, the employing office may make the change effective on the first day of the pay period following the one in which there was, in the case of a self plus one enrollment, no family member or, in the case of a self and family enrollment, only one or no family member.

(f) \* \* \*

(1) \* \* \*

(i) With one exception, an enrolled annuitant may decrease or increase enrollment type, may change from one plan or option to another, or may make any combination of these changes. Exception: An annuitant who, as an employee, was subject to a court or administrative order as discussed in § 890.301(g)(3) at the time he or she retired may not cancel or suspend his or her enrollment, decrease enrollment type in a way that eliminates coverage of a child identified in the order or change to a comprehensive medical plan that does not serve the area where his or her child or children live after retirement as long as the court or administrative order is still in effect and the annuitant has at least one child identified in the order who is still eligible under the FEHB Program, unless the annuitant provides documentation to the retirement system that he or she has other coverage for the child or children. The annuitant may not elect self only as long as he or she has one child identified as covered, but may elect self plus one.

\* \* \* \* \*

(g) *Change in family status.* (1) An enrolled former employee in receipt of an annuity may decrease or increase enrollment type, change from one plan or option to another, or make any combination of these changes when the annuitant's family status changes, including a change in marital status or any other change in family status. In the case of an enrolled survivor annuitant, a change in family status based on additional family members occurs only if the additional family members are

family members of the deceased employee or annuitant. The annuitant must change the enrollment within the period beginning 31 days before the date of the change in family status, and ending 60 days after the date of the change in family status.

\* \* \* \* \*

(l) *Loss of coverage under this part or under another group insurance plan.* An annuitant who meets the requirements of paragraph (a) of this section, and who is not enrolled but is covered by another enrollment under this part may continue coverage by enrolling in his or her own name when the annuitant loses coverage under the other enrollment under this part. An enrolled annuitant may decrease or increase enrollment type, change from one plan or option to another, or make any combination of these changes when the annuitant or an eligible family member of the annuitant loses coverage under this part or under another group health benefits plan. Except as otherwise provided, an annuitant must enroll or change the enrollment within the period beginning 31 days before the date of loss of coverage and ending 60 days after the date of loss of coverage. Losses of coverage include, but are not limited to—

(1) Loss of coverage under another FEHB enrollment due to the termination, cancellation, or a change to self plus one or self only, of the covering enrollment;

\* \* \* \* \*

(n) *Overseas post of duty.* An annuitant may decrease or increase enrollment type, change from one plan or option to another, or make any combination of these changes within 60 days after the retirement or death of the employee on whose service title to annuity is based, if the employee was stationed at a post of duty outside a State of the United States or the District of Columbia at the time of retirement or death.

\* \* \* \* \*

(r) *Sole survivor.* When an employee or annuitant enrolled for self plus one or self and family dies, leaving a survivor annuitant who is entitled to continue the enrollment, and it is apparent from available records that the survivor annuitant is the sole survivor entitled to continue the enrollment, the office of the retirement system which is acting as employing office must decrease the enrollment to self only, effective on the commencing date of the survivor annuity. On request of the survivor annuitant made within 31 days after the first installment of annuity is paid, the office of the retirement system

which is acting as employing office must rescind the action retroactive to the effective date of the change to self only, with corresponding adjustment in withholdings and contributions.

\* \* \* \* \*

■ 8. Amend § 890.401 by revising paragraph (a)(1) to read as follows:

**§ 890.401 Temporary extension of coverage and conversion.**

(a) *Thirty-one day extension and conversion.* (1) An enrollee whose enrollment is terminated other than by cancellation of the enrollment or discontinuance of the plan, in whole or part, and a covered family member whose coverage is terminated other than by cancellation of the enrollment or discontinuance of the plan, in whole or in part, is entitled to a 31-day extension of coverage for self only, self plus one, or self and family, as the case may be, without contributions by the enrollee or the Government, during which period he or she is entitled to exercise the right of conversion provided for by this part. The 31-day extension of coverage and the right of conversion for any person ends on the effective date of a new enrollment under this part covering the person.

\* \* \* \* \*

■ 9. Amend § 890.501 by revising paragraphs (b) introductory text, (b)(2)(i), and (b)(3) to read as follows:

**§ 890.501 Government contributions.**

\* \* \* \* \*

(b) In accordance with the provisions of 5 U.S.C. 8906(a) which take effect with the contract year that begins in January 1999, OPM will determine the amounts representing the weighted average of subscription charges in effect for each contract year, for self only, self plus one, and self and family enrollments, as follows:

\* \* \* \* \*

(2) \* \* \*

(i) When a subscription charge for an upcoming contract year applies to a plan that is the result of a merger of two or more plans which contract separately with OPM during the determination year, or applies to a plan which will cease to offer two benefits options, OPM will combine the self only enrollments, the self plus one enrollments, and the self and family enrollments from the merging plans, or from a plan's benefits options, for purposes of weighting subscription charges in effect for the successor plan for the upcoming contract year.

\* \* \* \* \*

(3) After OPM weights each subscription charge as provided in

paragraph (b)(2) of this section, OPM will compute the total of subscription charges associated with self only enrollments, self plus one enrollments, and self and family enrollments, respectively. OPM will divide each subscription charge total by the total number of enrollments such amount represents to obtain the program-wide weighted average subscription charges for self only and for self plus one and self and family enrollments, respectively.

\* \* \* \* \*

■ 10. Amend § 890.804 by revising paragraph (a) to read as follows:

**§ 890.804 Coverage.**

(a) *Type of enrollment.* A former spouse who meets the requirements of § 890.803 may elect coverage for self only, self plus one, or self and family. A self and family enrollment covers only the former spouse and all eligible children of both the former spouse and the employee, former employee, or employee annuitant, provided such children are not otherwise covered by a health plan under this part. A self plus one enrollment covers only the former spouse and one eligible child of both the former spouse and the employee, former employee, or employee annuitant, provided the child is not otherwise covered by a health plan under this part. A child must be under age 26 or incapable of self-support because of a mental or physical disability existing before age 26. No person may be covered by two enrollments.

\* \* \* \* \*

■ 11. Amend § 890.806 by revising paragraphs (e), (f)(1)(i), (g)(1), (j) introductory text, and (j)(1) to read as follows:

**§ 890.806 When can former spouses change enrollment or reenroll and what are the effective dates?**

\* \* \* \* \*

(e) *Decreasing enrollment type.* (1) A former spouse may decrease enrollment type at any time.

(2) A decrease in enrollment type takes effect on the first day of the first pay period that begins after the date the employing office receives an appropriate request to change the enrollment, except that at the request of the former spouse and upon a showing satisfactory to the employing office that there was no family member eligible for coverage under the self plus one or self and family enrollment, or only one family member eligible for coverage under the self and family enrollment, as appropriate, the employing office may make the change effective on the first

day of the pay period following the one in which there was, in the case of a self plus one enrollment, no family member or, in the case of a self and family enrollment, only one or no family member.

(f) \* \* \*

(1) \* \* \*

(i) An enrolled former spouse may decrease enrollment type, increase enrollment type provided the family member(s) to be covered under the enrollment is eligible for coverage under § 890.804, change from one plan or option to another, or make any combination of these changes.

\* \* \* \* \*

(g) *Change in family status.* (1) An enrolled former spouse may increase enrollment type, change from one plan or option to another, or make any combination of these changes within the period beginning 31 days before and ending 60 days after the birth or acquisition of a child who meets the eligibility requirements of § 890.804.

\* \* \* \* \*

(j) *Loss of coverage under this part or under another group insurance plan.* An enrolled former spouse may decrease or increase enrollment type, change from one plan or option to another or make any combination of these changes when the former spouse or a child who meets the eligibility requirements under § 890.804 loses coverage under another enrollment under this part or under another group health benefits plan. Except as otherwise provided, the former spouse must change the enrollment within the period beginning 31 days before the date of loss of coverage and ending 60 days after the date of loss of coverage, provided he or she continues to meet the eligibility requirements under § 890.803. Losses of coverage include but are not limited to—

(1) Loss of coverage under another FEHB enrollment due to the termination, cancellation, or a change to self plus one or self only, of the covering enrollment;

\* \* \* \* \*

■ 12. Amend § 890.1103 by revising paragraphs (a)(2) and (3) to read as follows:

**§ 890.1103 Eligibility.**

(a) \* \* \*

(2) Individuals whose coverage as children under the self plus one or self and family enrollment of an employee, former employee, or annuitant ends because they cease meeting the requirements for being considered covered family members. For the purpose of this section, children who

are enrolled under this part as survivors of deceased employees or annuitants are considered to be children under a self plus one or self and family enrollment of an employee or annuitant at the time of the qualifying event.

(3) Former spouses of employees, of former employees having continued self plus one or self and family coverage under this subpart, or of annuitants, if the former spouse would be eligible for continued coverage under subpart H of this part except for failure to meet the requirement of § 890.803(a)(1) or (3) or the documentation requirements of § 890.806(a), including former spouses who lose eligibility under subpart H within 36 months after termination of the marriage because they ceased meeting the requirement of § 890.803(a)(1) or (3).

\* \* \* \* \*

■ 13. Amend § 890.1106 by revising paragraph (a) introductory text to read as follows:

**§ 890.1106 Coverage.**

(a) *Type of enrollment.* An individual who enrolls under this subpart may elect coverage for self only, self plus one, or self and family.

\* \* \* \* \*

■ 14. Amend § 890.1108 by revising paragraphs (d), (e)(1), (f)(1) and (2), (h) introductory text, and (h)(1) to read as follows:

**§ 890.1108 Opportunities to change enrollment; effective dates.**

\* \* \* \* \*

(d) *Decreasing enrollment type.* (1) An enrollee may decrease enrollment type at any time.

(2) A decrease in enrollment type takes effect on the first day of the first pay period that begins after the date the employing office receives an appropriate request to change the enrollment, except that at the request of the enrollee and upon a showing satisfactory to the employing office that there was no family member eligible for coverage under the self plus one or self and family enrollment, or only one family member eligible for coverage under the self and family enrollment, as appropriate, the employing office may make the change effective on the first day of the pay period following the one in which there was, in the case of a self plus one enrollment, no family member or, in the case of a self and family enrollment, only one or no family member.

(e) *Open season.* (1) During an open season as provided by § 890.301(f), an enrollee (except for a former spouse who is eligible for continued coverage

under § 890.1103(a)(3) may decrease or increase enrollment type, change from one plan or option to another, or make any combination of these changes. A former spouse who is eligible for continued coverage under § 890.1103(a)(3) may change from one plan or option to another, but may not increase enrollment type unless the individual to be covered under the self plus one or self and family enrollment qualifies as a family member under § 890.1106(a)(2).

(f) *Change in family status.* (1) Except for a former spouse, an enrollee may decrease or increase enrollment type, change from one plan or option to another, or make any combination of these changes when the enrollee's family status changes, including a change in marital status or any other change in family status. The enrollee must change the enrollment within the period beginning 31 days before the date of the change in family status, and ending 60 days after the date of the change in family status.

(2) A former spouse who is covered under this section may increase enrollment type, change from one plan or option to another, or make any combination of these changes within the period beginning 31 days before and ending 60 days after the birth or acquisition of a child who qualifies as a covered family member under § 890.1106(a)(2).

(h) *Loss of coverage under this part or under another group insurance plan.* An enrollee may decrease or increase enrollment type, change from one plan or option to another, or make any combination of these changes when the enrollee loses coverage under this part or a qualified family member of the enrollee loses coverage under this part or under another group health benefits plan. Except as otherwise provided, an enrollee must change the enrollment within the period beginning 31 days before the date of loss of coverage and ending 60 days after the date of loss of coverage. Losses of coverage include, but are not limited to—

(1) Loss of coverage under another FEHB enrollment due to the termination, cancellation, or change to self plus one or to self only, of the covering enrollment.

■ 15. Amend § 890.1202 by revising the definition of "Covered family members" to read as follows:

**§ 890.1202 Definitions.**

\* \* \* \* \*

*Covered family members* as it applies to individuals covered under this subpart has the same meaning as set forth in § 890.101(a). For eligible survivors of individuals enrolled under this subpart, a self plus one enrollment covers only the survivor or former spouse and one eligible child of both the survivor or former spouse and hostage. A self and family enrollment covers only the survivor or former spouse and any eligible children of both the survivor or former spouse and hostage.

■ 16. Amend § 890.1203 by revising paragraph (b) to read as follows:

**§ 890.1203 Coverage.**

(b) An individual who is covered under this subpart is covered under the Standard Option of the Service Benefit Plan. The individual has a self and family enrollment unless the U.S. Department of State determines that the individual is married and has no eligible children, or is unmarried and has one eligible child, in which case the individual is covered under a self plus one enrollment, or unless the U.S. Department of State determines that the individual is unmarried and has no eligible children, in which case the individual has a self only enrollment.

■ 17. Amend § 890.1205 by revising paragraphs (a) and (b) to read as follows:

**§ 890.1205 Change in type of enrollment.**

(a) Individuals covered under this subpart or eligible survivors enrolled under this subpart may increase enrollment type if they acquire an eligible family member. The change may be made at the written request of the enrollee at any time after the family member is acquired. An increase in enrollment type under this paragraph (a) becomes effective on the 1st day of the pay period after the pay period during which the request is received by the U.S. Department of State, except that a change based on the birth or addition of a child as a new family member is effective on the 1st day of the pay period during which the child is born or otherwise becomes a new family member.

(b) Individuals covered under this subpart or eligible survivors enrolled under this subpart may decrease enrollment type from a self and family enrollment when the last eligible family member (other than the enrollee) ceases to be a family member or only one family member remains; and may decrease enrollment type from a self plus one enrollment when no family

member remains. The change may be made at the written request of the enrollee at any time after the last family member is lost and it becomes effective on the 1st day of the pay period after the pay period during which the request is received by the U.S. Department of State.

\* \* \* \* \*

■ 18. Amend § 890.1209 by revising paragraph (c) to read as follows:

**§ 890.1209 Responsibilities of the U.S. Department of State.**

\* \* \* \* \*

(c) The U.S. Department of State must determine the number of eligible family members, if any, for the purpose of coverage under a self only, self plus one, or self and family enrollment as set forth in § 890.1203(b). If the number of eligible family members of the individual cannot be determined, the U.S. Department of State must enroll the individual for self and family coverage.

**PART 892—FEDERAL FLEXIBLE BENEFITS PLAN: PRE-TAX PAYMENT OF HEALTH BENEFITS PREMIUMS**

■ 19. The authority citation for part 892 is revised to read as follows:

**Authority:** 5 U.S.C. 8913; 5 U.S.C. 1103(a)(7); 26 U.S.C. 125.

■ 20. In § 892.101, the definition of "Qualifying life event" is amended by revising the introductory text and paragraphs (9) and (13) to read as follows:

**§ 892.101 Definitions.**

\* \* \* \* \*

*Qualifying life event* means an event that may permit changes to your FEHB enrollment as well as changes to your premium conversion election as described in Treasury regulations at 26 CFR 1.125-4. For purposes of determining whether a qualifying life event has occurred under this part, a stepchild who is the child of an employee's domestic partner as defined in part 890 of this chapter shall be treated as though the child were a dependent within the meaning of 26 CFR 1.125-4 even if the child does not so qualify under such Treasury regulations. Such events include the following:

\* \* \* \* \*

(9) An employee becomes entitled to Medicare. (For change to self only, self plus one, cancellation, or change in premium conversion status see paragraph (11) of this definition.)

\* \* \* \* \*

(13) An employee or eligible family member becomes eligible for premium

assistance under Medicaid or a State Children's Health Insurance Program (CHIP). An eligible employee may enroll and an enrolled employee may decrease or increase enrollment type, change from one plan or option to another, or make any combination of these changes when the employee or an eligible family member of the employee becomes eligible for premium assistance under a Medicaid plan or a State Children's Health Insurance Program. An employee must enroll or change his or her enrollment within 60 days after the date the employee or family member is determined to be eligible for assistance.

■ 21. Amend § 892.207 by revising paragraph (b) and adding paragraph (d) to read as follows:

**§ 892.207 Can I make changes to my FEHB enrollment while I am participating in premium conversion?**

\* \* \* \* \*

(b) However, if you are participating in premium conversion there are two exceptions: You must have a qualifying life event to decrease enrollment type, switch a covered family member, or to cancel FEHB coverage entirely. (See §§ 892.209 and 892.210.) Your change in enrollment must be consistent with and correspond to your qualifying life event as described in § 892.101. These limitations apply only to changes you may wish to make outside open season.

\* \* \* \* \*

(d) During the first plan year in which the self plus one enrollment type is available, OPM will administer a limited enrollment period for enrollees who participate in premium conversion. During this limited enrollment period, enrollees who participate in premium conversion will be allowed to decrease enrollment from self and family to self plus one during a time period determined by OPM. No other changes, including changes in plan or plan option or increases in enrollment, will be allowed. Enrollments will be effective on the first day of the first pay period following the one in which the appropriate request is received by the employing office.

■ 22. Revise § 892.208 to read as follows:

**§ 892.208 Can I decrease my enrollment type at any time?**

If you are participating in premium conversion you may decrease your FEHB enrollment type under either of the following circumstances:

(a) *During the annual open season.* A decrease in enrollment type made during the annual open season takes effect on the 1st day of the first pay period that begins in the next year.

(b) *Within 60 days after you have a qualifying life event.* A decrease in enrollment type made because of a qualifying life event takes effect on the first day of the first pay period that begins after the date your employing office receives your appropriate request. Your change in enrollment must be consistent with and correspond to your qualifying life event. For example, if you get divorced and have no dependent children, changing to self only would be consistent with that qualifying life event. As another example, if both you and your spouse are Federal employees, and your youngest dependent turns age 26, changing from a self and family to a self plus one or two self only enrollments would be consistent and appropriate for that event.

(c) If you are subject to a court or administrative order as discussed in § 890.301(g)(3), you may not decrease enrollment type in a way that eliminates coverage of a child identified in the order as long as the court or administrative order is still in effect and you have at least one child identified in the order who is still eligible under the FEHB Program, unless you provide documentation to your agency that you have other coverage for your child or children. See also §§ 892.207 and 892.209. If you are subject to a court or administrative order as discussed in § 890.301(g)(3), you may not change your enrollment to self plus one as long as the court or administrative order is still in effect and you have more than one child identified in the order who is still eligible under the FEHB Program, unless you provide documentation to your agency that you have other coverage for your children. See also §§ 892.207 and 892.209.

**BILLING CODE 6325-63-P**

**DEPARTMENT OF AGRICULTURE**

**Animal and Plant Health Inspection Service**

**7 CFR Part 319**

[Docket No. APHIS-2014-0002]

RIN 0579-AD98

**Importation of Kiwi From Chile Into the United States**

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Final rule.

**SUMMARY:** We are amending the fruits and vegetables regulations to list kiwi

(*Actinidia deliciosa* and *Actinidia chinensis*) from Chile as eligible for importation into the United States subject to a systems approach. Under this systems approach, the fruit will have to be grown in a place of production that is registered with the Government of Chile and certified as having a low prevalence of *Brevipalpus chilensis*. The fruit will have to undergo pre-harvest sampling at the registered production site. Following post-harvest processing, the fruit will have to be inspected in Chile at an approved inspection site. Each consignment of fruit will have to be accompanied by a phytosanitary certificate with an additional declaration stating that the fruit had been found free of *Brevipalpus chilensis* based on field and packinghouse inspections. This rule allows for the safe importation of kiwi from Chile using mitigation measures other than fumigation with methyl bromide.

**DATES:** Effective October 19, 2015.

**FOR FURTHER INFORMATION CONTACT:** Ms. Claudia Ferguson, Senior Regulatory Policy Specialist, Regulatory Coordination and Compliance, PPQ, APHIS, 4700 River Road Unit 133, Riverdale, MD 20737-1236; (301) 851-2352.

**SUPPLEMENTARY INFORMATION:**

**Background**

Under the regulations in “Subpart-Fruits and Vegetables” (7 CFR 319.56-1 through 319.56-73, referred to below as the regulations), the Animal and Plant Health Inspection Service (APHIS) of the U.S. Department of Agriculture prohibits or restricts the importation of fruits and vegetables into the United States from certain parts of the world to prevent plant pests from being introduced into and spread within the United States.

On October 16, 2014, we published in the **Federal Register** (79 FR 62055-62058, Docket No. APHIS-2014-0002) a proposal<sup>1</sup> to amend the regulations by listing kiwi (*Actinidia deliciosa* and *Actinidia chinensis*) from Chile as eligible for importation into the United States under the same systems approach as baby kiwi from Chile, which are eligible for importation under the conditions in § 319.56-53. We also prepared a commodity import evaluation document (CIED) titled “Importation of Fresh Fruits of Kiwi (*Actinidia deliciosa* and *Actinidia chinensis*) from Chile into the United

<sup>1</sup> To view the proposed rule, supporting documents, and the comments we received, go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2014-0002>.

States.” The CIED assesses the risks associated with the importation of kiwi from Chile into the United States under the listed phytosanitary measures.

We solicited comments concerning our proposal for 60 days ending December 15, 2014. We received seven comments by that date. They were from private citizens, a fruit exporter, an industry group, and representatives of State and foreign governments. Four of the comments were supportive. Three commenters expressed concerns regarding aspects of the proposed rule. Those concerns are discussed below.

In the proposed rule, we proposed that a random sample of kiwi would have to be washed using a flushing method, placed in a 20-mesh sieve on top of a 200-mesh sieve, sprinkled with a liquid soap and water solution, washed with water at high pressure, and washed with water at low pressure. The washing process would then have to be repeated immediately after the first washing. The contents of the 200-mesh sieve would then be placed on a petri dish and analyzed for the presence of live *Brevipalpus chilensis* mites. This mite sampling method is identical to the method currently in use for baby kiwi production areas in Chile and has been found to be successful in identifying production areas within Chile with high and low populations of mites.

One commenter stated that the washing process should be expanded to include all fruit in a shipment.

The washing process is used as a way to sample for the presence of *B. chilensis* in order to confirm the low prevalence of *B. chilensis* in certified

production areas within Chile. It is not intended as a phytosanitary measure.

Two commenters recommended that 270 mesh be used in place of 200 mesh for sampling at the port of entry because they stated that 200 mesh may not be fine enough to detect immature stages of *B. chilensis*.

Fruit has been imported from Chile since 1997 using a systems approach based on sampling for mites using a 200 mesh screen. Any eggs or nymphs found using a finer mesh sieve cannot be identified to species. This systems approach is based on low prevalence for adult mites, not pest freedom. If even one adult *B. chilensis* mite is found in a shipment, it is enough to disqualify a place of production from the export program. APHIS has successfully used this approach for 18 years for determining areas of low prevalence for a number of Chilean fruits.

Therefore, for the reasons given in the proposed rule and in this document, we are adopting the proposed rule as a final rule, without change.

**Executive Order 12866 and Regulatory Flexibility Act**

This final rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

In accordance with the Regulatory Flexibility Act, we have analyzed the potential economic effects of this action on small entities. Production, consumption, and trade of kiwi by the United States have been expanding and are expected to continue to increase, as

shown in table 1. Over the 5 years from 2008 through 2012, U.S. kiwi production and imports expanded by about 29 percent and 24 percent, respectively, and U.S. exports by 48 percent. U.S. consumption of kiwi grew by about 23 percent over this same period.

The United States is dependent on imports for the major share of its kiwi supply. In 2012, nearly four of every five kiwis consumed were imported. Chile is the principal foreign source, supplying one-half of the kiwis imported by the United States in 2012, up from approximately one-third of U.S. kiwi imports in 2008. Chile is expected to continue to dominate the supply of kiwi to the United States in the near term. Under this rule, Chile’s kiwi exporters will have the option of using the systems approach rather than relying on fumigation with methyl bromide to meet import requirements.

Although the United States is a net importer of kiwi, the percentage increase in U.S. kiwi exports between 2008 and 2012 was twice the percentage increase in U.S. kiwi imports; U.S. producers are actively expanding their sales to other countries. We also note that kiwi imports from Chile are largely counter-seasonal to kiwi sales by domestic producers. California produces 98 percent the kiwis grown in the United States, and the California season runs October through May.<sup>2</sup> Kiwi from Chile is predominantly imported during the spring and summer months. Ninety-four percent of Chilean kiwi imported in 2012 arrived between April and September.<sup>3</sup>

TABLE 1—U.S. KIWI PRODUCTION, IMPORTS, EXPORTS, AND CONSUMPTION, AND KIWI IMPORTS FROM CHILE, 2008 AND 2012, METRIC TONS

	2008	2012 <sup>1</sup>	Percentage increase over 5 years
U.S. Production .....	20,865	26,853	28.7
U.S. Imports .....	50,322	62,372	23.9
U.S. Exports .....	6,883	10,204	48.2
U.S. Consumption <sup>2</sup> .....	64,304	79,021	22.9
U.S. Imports from Chile .....	17,248	31,668	83.6
Chile’s Share of Imports .....	34.3%	50.8%	.....
Imports from Chile as a Percentage of U.S. Consumption .....	26.8%	40.1%	.....

**Sources:** For U.S. production, the U.N. Food and Agriculture Organization; for U.S. imports and exports, the U.S. Census Bureau, as reported by Global Trade Information Services, Inc.

<sup>1</sup> U.S. kiwi production data for 2012 are the most recently reported.  
<sup>2</sup> U.S. consumption calculated as production plus imports minus exports.

Although kiwi production in the United States is expanding, it remains a relatively small agricultural industry, with fewer than 300 growers whose

farms average about 13 acres. Nevertheless, it is a vibrant industry with an expanding export market. This fact, together with the counter-

seasonality of kiwi imports from Chile, suggests that the economic impact of the rule for U.S. small entities will be minor.

<sup>2</sup> California Kiwifruit Commission, <http://www.kiwifruit.org/about/availability.aspx>.

<sup>3</sup> Based on U.S. Census data, as reported by Global Trade Information Services, Inc.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

**Executive Order 12988**

This final rule allows kiwi to be imported into the United States from Chile. State and local laws and regulations regarding kiwi imported under this rule will be preempted while the fruit is in foreign commerce. Fresh fruits are generally imported for immediate distribution and sale to the consuming public, and remain in foreign commerce until sold to the ultimate consumer. The question of when foreign commerce ceases in other cases must be addressed on a case-by-case basis. No retroactive effect will be given to this rule, and this rule will not require administrative proceedings before parties may file suit in court challenging this rule.

**Paperwork Reduction Act**

This final rule contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

**Lists of Subjects in 7 CFR Part 319**

Coffee, Cotton, Fruits, Imports, Logs, Nursery stock, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Rice, Vegetables.

Accordingly, we are amending 7 CFR part 319 as follows:

**PART 319—FOREIGN QUARANTINE NOTICES**

■ 1. The authority citation for part 319 continues to read as follows:

**Authority:** 7 U.S.C. 450, 7701–7772, and 7781–7786; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.3.

■ 2. Section 319.56–53 is amended as follows:

- a. By revising the section heading;
- b. By revising the introductory paragraph;
- c. By redesignating paragraphs (a), (b), (c), (d), and (e) as paragraphs (b), (c), (d), (e), and (f), respectively, and adding a new paragraph (a);
- d. By revising the first and second sentences after the heading of newly designated paragraph (b);
- e. By revising the third sentence after the heading of newly designated paragraph (e), introductory text; and
- f. By revising newly designated paragraph (f).

The revisions and addition read as follows:

**§ 319.56–53 Fresh kiwi and baby kiwi from Chile.**

Fresh kiwi (*Actinidia deliciosa* and *Actinidia chinensis*) may be imported into the United States from Chile, and fresh baby kiwi (*Actinidia arguta*) may be imported into the continental United States from Chile under the following conditions:

(a) The national plant protection organization (NPPO) of Chile must provide a workplan to APHIS that details the activities that the NPPO of Chile will, subject to APHIS’ approval of the workplan, carry out to meet the requirements of this section.

(b) \* \* \* The production site where the fruit is grown must be registered with the NPPO of Chile. Harvested kiwi and baby kiwi must be placed in field cartons or containers that are marked to show the official registration number of the production site. \* \* \*

(e) \* \* \* Kiwi in any consignment may be shipped to the United States, and baby kiwi in any consignment may be shipped to the continental United States, under the conditions of this section only if the consignment passes inspection as follows:

(f) *Phytosanitary certificate.* Each consignment of fresh kiwi and fresh baby kiwi must be accompanied by a phytosanitary certificate issued by the NPPO of Chile that contains an additional declaration stating that the fruit in the consignment was inspected and found free of *Brevipalpus chilensis* and was grown, packed, and shipped in accordance with the requirements of 7 CFR 319.56–53.

Done in Washington, DC, this 11th day of September 2015.

**Michael C. Gregoire,**  
*Acting Administrator, Animal and Plant Health Inspection Service.*

**Federal Aviation Administration**

**14 CFR Part 71**

[Docket No. FAA–2015–1623; Airspace Docket No. 15–AWP–10]

**Amendment of Class E Airspace; Tracy, CA**

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule, correction.

**SUMMARY:** This action corrects an error in a final rule published in the **Federal Register** of August 31, 2015, by amending the geographic coordinates of Tracy Municipal Airport, Tracy, CA, in Class E airspace. This does not affect the boundaries or operating requirements of the airspace.

**DATES:** Effective 0901 UTC, October 15, 2015. The Director of the Federal Register approves this incorporation by reference action under title 1, Code of Federal Regulations, part 51, subject to the annual revision of FAA Order 7400.9 and publication of conforming amendments.

**FOR FURTHER INFORMATION CONTACT:** Steve Haga, Federal Aviation Administration, Operations Support Group, Western Service Center, 1601 Lind Avenue SW., Renton, WA, 98057; Telephone: (425) 203–4563.

**SUPPLEMENTARY INFORMATION:**

**History**

The FAA published a final rule, in the **Federal Register**, amending Class E airspace extending upward from 700 feet above the surface at Tracy Municipal Airport, Tracy, CA (80 FR 52392 August 31, 2015). Subsequent to publication the FAA identified an error in the longitudinal coordinate of the airport reference point for Tracy Municipal Airport. This action corrects the error.

**Correction to Final Rule**

Accordingly, pursuant to the authority delegated to me, in the **Federal Register** of August 31, 2015 (80 FR 52392) FR Doc. 2015–21414, the longitude coordinate in the regulatory text on page 52393, column 2, line 10, is corrected as follows:

**§ 71.1 [Amended]**

**AWP CA E5 Tracy, CA (Corrected)**

- Remove “long. 121°26’31” W.” and add in its place “long. 121°26’30” W.”

Issued in Seattle, Washington, on September 08, 2015.

**Christopher Ramirez,**

*Manager, Operations Support Group, Western Service Center.*

### Federal Aviation Administration

#### 14 CFR Chapter I

[Docket No.: FAA-2015-1006]

#### Discontinuation of Airport Advisory Service in the Contiguous United States, Puerto Rico, and Hawaii

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of policy.

**SUMMARY:** This action discontinues the availability Airport Advisory services within the contiguous United States, Puerto Rico, and Hawaii. The FAA is taking this action because the frequency of Remote Airport Advisories service use at the 19 locations within the contiguous United States, Puerto Rico, and Hawaii, no longer justifies the continuation of the service due to the lack of productivity.

**DATES:** Effective date October 1, 2015.

**FOR FURTHER INFORMATION CONTACT:** Alan Wilkes, Manager, Flight Service NAS Initiative Operations/Implementation, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone 202-267-7771; Fax (202) 267-6310; email [Alan.Wilkes@faa.gov](mailto:Alan.Wilkes@faa.gov).

#### SUPPLEMENTARY INFORMATION:

##### History

On June 30, 2015, the FAA published in the **Federal Register** (80 FR 37356-37358) a notice of proposed policy to inform the public regarding proposed revisions to the criteria set forth in FAA Order 7110.10, Flight Services, Chapter 4, Section 4; and FAA Order 7210.3, Facility Operation and Administration, paragraph 13-4-5, so that the policy would apply to the State of Alaska only. Interested parties were invited to participate in this policy change by submitting written comments of the proposal. No comments were received.

##### Background

The criteria for providing Airport Advisory (AA) services at Flight Service Stations (FSS) is provided in FAA Order 7210.3, and specifies the criteria for providing Airport Advisory (AA) services; specifically, paragraph 13-4-5,

addresses Local Airport Advisory (LAA), Remote Airport Advisory (RAA) and Remote Airport Information Service (RAIS). Section (b) of that paragraph requires, in part, that Flight Service Stations provide RAA when the employee productivity factor is high enough to justify the cost of providing the service.<sup>1</sup>

Currently, Lockheed Martin provides RAA services at 19 locations. At 18 of the 19 locations, a sample of historical data reflects that pilots contact the RAA service an average of less than 1 time per day. At Millville Municipal Airport in Millville, NJ, pilots contact the RAA service an average of 14 times per day.<sup>2</sup> The frequency of RAA service use no longer justifies the continuation of the service due to the lack of productivity.

The FAA will discontinue the requirement for FSSs to provide AA services in the contiguous United States, Puerto Rico, and Hawaii effective October 1, 2015, resulting in services no longer being available at the 19 locations. The AA services in the state of Alaska will not be affected by this change, and will remain due to the unique challenges presented by the remote mountainous terrain and weather conditions across the state.

##### Applicability

The FAA will revise the criteria set forth in FAA Order 7110.10, Chapter 4, Section 4; and FAA Order 7210.3, paragraph 13-4-5 to only be applicable to the State of Alaska, and AA services will be discontinued at locations within the CONUS, Puerto Rico, and Hawaii. Due to the policy change, RAA service would no longer be provided at the following airports:

Altoona-Blair County Airport (AOO), Altoona, Pennsylvania;  
Columbia Regional Airport (COU), Columbia, Missouri;  
Elkins-Randolph Airport (EKN), Elkins, West Virginia;  
Huron Regional Airport (HON), Huron, South Dakota;  
Jackson-McKellar-Sipes Regional Airport (MKL), Jackson, Tennessee;  
Jonesboro Municipal Airport (JBR), Jonesboro, Arkansas;  
Macon-Middle Georgia Regional Airport (MCN), Macon, Georgia;  
Anderson Regional Airport (AND), Anderson, South Carolina;

<sup>1</sup> The facility's productivity factor is determined by dividing the annual RAA service count by 16,000. The productivity factor is compared to the number of employees used to provide the service and must be equal to or greater than the number of employees needed to provide the service. Normally about 2.5 employees are factored annually to provide 10 hours of service per day.

<sup>2</sup> Lockheed Martin contact history daily averages, July 12-26 and October 1-15, 2014.

Anniston Metropolitan Airport (ANB), Anniston, Alabama;  
Casper-Natrona County International Airport (CPR), Casper, Wyoming;  
Gainesville Regional Airport (GNV), Gainesville, Florida;  
Grand Forks International Airport (GFK), Grand Forks, North Dakota;  
Greenwood-Lefflore Airport (GWO), Greenwood, Mississippi;  
Louisville-Bowman Field Airport (LOU), Louisville, Kentucky;  
Millville Municipal Airport (MIV), Millville, New Jersey;  
Prescott-Ernest A. Love Field Airport (PRC), Prescott, Arizona;  
St. Louis-Spirit of St. Louis Airport (SUS), St. Louis, Missouri;  
St. Petersburg-Clearwater International Airport (PIE), St. Petersburg, Florida; and  
Miami-Kendall-Tamiami Executive Airport (TMB), Miami, Florida.

## II. Additional Information

### A. Availability of Documents

An electronic copy of rulemaking documents may be obtained from the Internet by—

1. Searching the Federal eRulemaking Portal (<http://www.regulations.gov>);
2. Visiting the FAA's Regulations and Policies Web page at [http://www.faa.gov/regulations\\_policies](http://www.faa.gov/regulations_policies) or
3. Accessing the Government Printing Office's Web page at <http://www.gpo.gov/fdsys/>.

Copies may also be obtained by sending a request to the Federal Aviation Administration, Office of Rulemaking, ARM-1, 800 Independence Avenue SW., Washington, DC 20591, or by calling (202) 267-9680. Commenters must identify the docket or amendment number of this notice.

All documents the FAA considered in developing this notice, including economic analyses and technical reports, may be accessed from the Internet through the Federal eRulemaking Portal referenced in item (1) above.

Issued in Washington, DC, on August 25, 2015.

**Jeanne Giering,**

*Director of Flight Services.*

## PENSION BENEFIT GUARANTY CORPORATION

### 29 CFR Parts 4000, 4041A, and 4281

RIN 1212-AB28

#### Multiemployer Plans; Electronic Filing Requirements

**AGENCY:** Pension Benefit Guaranty Corporation.

**ACTION:** Final rule.

**SUMMARY:** This final rule amends Pension Benefit Guaranty Corporation's (PBGC) regulations to require electronic filing of certain multiemployer notices. These changes make the provision of information to PBGC more efficient and effective.

**DATES:** Effective October 19, 2015. See Applicability in **SUPPLEMENTARY INFORMATION**.

**FOR FURTHER INFORMATION CONTACT:** Catherine B. Klion (*klion.catherine@pbgc.gov*), Assistant General Counsel for Regulatory Affairs, or Donald McCabe (*mccabe.donald@pbgc.gov*), Attorney, Office of the General Counsel, Pension Benefit Guaranty Corporation, 1200 K Street NW., Washington, DC 20005-4026; 202-326-4024. (TTY/TDD users may call the Federal relay service toll-free at 1-800-877-8339 and ask to be connected to 202-326-4024.)

**SUPPLEMENTARY INFORMATION:**

### Executive Summary

#### *Purpose of the Regulatory Action*

This final rule is part of PBGC's ongoing implementation of the Government Paperwork Elimination Act and is consistent with the Office of Management and Budget's directive to remove regulatory impediments to electronic transactions. The rule builds in flexibility to allow PBGC to update the electronic filing process as technology advances.

PBGC's legal authority for this regulatory action comes from section 4002(b)(3) of the Employee Retirement Income Security Act of 1974 (ERISA), which authorizes PBGC to issue regulations to carry out the purposes of title IV of ERISA; section 4041A(f)(2), which gives PBGC authority to prescribe reporting requirements for terminated plans; section 4245(e)(4), which authorizes PBGC to issue regulations on notices related to insolvency and resource benefit levels; and section 4281(d), which directs PBGC to prescribe by regulation the notice requirements to plan participants and beneficiaries in the event of a benefit suspension under an insolvent plan.

#### *Major Provisions of the Regulatory Action*

This final rule requires the following notices to be filed electronically with PBGC: Notices of termination under part 4041A, notices of insolvency and of insolvency benefit level under parts 4245 and 4281, and applications for financial assistance under part 4281.

This final rule does not involve any conforming amendments reflecting the

Multiemployer Pension Reform Act of 2014 (MPRA).<sup>1</sup> The rule affects only notices to PBGC (not notices to participants or other parties).

### Background

The Pension Benefit Guaranty Corporation (PBGC) is a federal corporation created under the Employee Retirement Income Security Act of 1974 (ERISA) to guarantee the payment of pension benefits earned by more than 41 million American workers and retirees in nearly 24,000 private-sector defined benefit pension plans. PBGC administers two insurance programs—one for single-employer defined benefit pension plans and a second for multiemployer defined benefit pension plans.

The multiemployer plan program protects benefits of approximately 10 million workers and retirees in approximately 1,400 plans. A multiemployer plan is a collectively bargained pension arrangement involving two or more unrelated employers, usually in a common industry such as construction or trucking, where workers move from employer to employer on a regular basis. Under PBGC's multiemployer program, when a plan becomes insolvent, PBGC provides financial assistance directly to the insolvent plan sufficient to pay guaranteed benefits to participants and beneficiaries, and the reasonable and necessary administrative expenses of the insolvent plan.

ERISA section 4041A provides for two types of multiemployer plan terminations: mass withdrawal and plan amendment. A mass withdrawal termination occurs when all employers withdraw or cease to be obligated to contribute to the plan. A plan amendment termination occurs when the plan adopts an amendment that provides that participants will receive no credit for service with any employer after a specified date, or an amendment that makes it no longer a covered plan. Unlike terminated single-employer plans, terminated multiemployer plans generally continue to pay all vested benefits out of existing plan assets and withdrawal liability payments.

#### *Multiemployer Plan Notices*

PBGC's regulation on Termination of Multiemployer Plans (29 CFR part

<sup>1</sup> Division O of the Consolidated and Further Continuing Appropriations Act, 2015, Public Law 113-235, enacted December 16, 2014. On June 19, 2015, (at 80 FR 35220), PBGC published an interim final rule on Partitions of Eligible Multiemployer Plans under MPRA, <http://www.pbgc.gov/documents/2015-14930.pdf>. PBGC expects to publish further guidance under MPRA.

4041A) implements these provisions, among other things by requiring the plan sponsor of a terminated multiemployer plan to file with PBGC a notice of termination containing basic information necessary to alert PBGC to possible demands on the multiemployer insurance program.

ERISA section 4245(e) requires two types of notices:

- Notice of insolvency, which states a plan sponsor's determination that the plan is or may become insolvent.
- Notice of insolvency benefit level, which states the level of benefits that will be paid during an insolvency year.

Section 4245(e)(4) provides that these notices are to be given in accordance with rules promulgated by PBGC. PBGC's regulation on Notice of Insolvency, 29 CFR part 4245, establishes the procedure for complying with these notice requirements. The regulation allows a single notice of insolvency to cover more than one plan year, thereby generally permitting plan sponsors to file only a single notice (a notice of insolvency benefit level) for any future year. The regulation also prescribes, among other things, the manner in which the notices must be given. The recipients of these notices include PBGC, in addition to other parties.

PBGC's regulation on Duties of Plan Sponsor Following Mass Withdrawal (29 CFR part 4281) implements the requirements of ERISA section 4281. The regulation prescribes rules under which plan sponsors must:

- Provide notices to PBGC and to participants and beneficiaries that a plan is, or will be, insolvent (§§ 4281.43 and 4281.44).
- Provide notices of insolvency benefit level to PBGC and to participants and beneficiaries who are in pay status or may reasonably be expected to enter pay status during the year (§§ 4281.45 and 4281.46).
- Submit an application to PBGC for financial assistance if a plan is, or will be, unable to pay guaranteed benefits when due (§ 4281.47).

#### *Mandatory Electronic Filing: Current Requirements*

Section 4000.3 of PBGC's regulation on Filing, Issuance, Computation of Time, and Record Retention (29 CFR part 4000) requires electronic filing of premium declarations under part 4007 (Payment of Premiums) and information required under part 4010 (Annual Financial and Actuarial Information Reporting).

### Regulatory Review

On January 18, 2011, the President issued Executive Order 13563 “Improving Regulation and Regulatory Review,” to ensure that Federal regulations seek more affordable, less intrusive means to achieve policy goals, and that agencies give careful consideration to the benefits and costs of those regulations. PBGC’s Plan for Regulatory Review,<sup>2</sup> identifies several regulatory areas for review, including the multiemployer regulations referred to above. PBGC will continue to review its regulations with a view to developing more ideas for improvement.

### Proposed Rule

On April 3, 2015 (at 80 FR 18172), PBGC published a proposed rule to amend parts 4000, 4041A, and 4281 to require electronic filing of certain multiemployer notices.<sup>3</sup> PBGC received no comments on the proposed rule. The final regulation is unchanged from the proposed regulation.

### Regulatory Changes

The final regulation requires electronic filing with PBGC of the following multiemployer plan filings:

- Notices of termination under part 4041A.
- Notices of insolvency and of insolvency benefit level under part 4245.
- Notices of insolvency and of insolvency benefit level under part 4281 (following mass withdrawal).
- Applications for financial assistance under part 4281 (following mass withdrawal).

PBGC will grant case-by-case exemptions to the electronic filing requirement in appropriate circumstances for filers that demonstrate good cause for exemption. PBGC believes that requiring electronic filing for these notices will result in benefits for both the public and the government.

Electronic filing will simplify the filing process for the public by building in all required and optional fields and including readily accessible guidance in the application. Electronic filing is expected to reduce the need to contact PBGC for assistance. PBGC estimates that the amendments in the rule will result in a total savings in administrative burdens for the public of 25 percent (about 22 hours and \$99,000 annually).

Electronic filing will also result in greater efficiencies for the government.

Up to now, documents submitted by filers needed to be manually uploaded to electronic depositories. With electronic filing, those documents will be automatically uploaded. Electronic filing will also save the government time by reducing the need to provide assistance to filers. It will also improve the government’s recordkeeping, records retrieval, and records archiving process by eliminating the possibility of missing or lost paper files due to human error.

Moreover, the PBGC expects electronic filing will improve the government’s ability to protect potential personally identifiable information (PII), or otherwise sensitive information, since only pre-approved personnel will have access to PBGC’s electronic records systems, and limited access will be approved for officials of pension plans.

PBGC did not propose to require electronic filing of notices of benefit reduction and of restoration of benefits under part 4281. PBGC may in the future require that other multiemployer filings also be made electronically.

### Applicability

The amendments in this final rule will be applicable for filings made on or after January 1, 2016.

### Compliance With Rulemaking Requirements

*Executive Order 12866 “Regulatory Planning and Review” and Executive Order 13563 “Improving Regulation and Regulatory Review”*

PBGC has determined that this final rule is not a “significant regulatory action” under Executive Order 12866. Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility.

Under Section 3(f)(1) of Executive Order 12866, a regulatory action is economically significant if “it is likely to result in a rule that may . . . [h]ave an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities.” PBGC has determined that this final rule does

not cross the \$100 million threshold for economic significance and is not otherwise economically significant (see discussion above).

### Regulatory Flexibility Act

The Regulatory Flexibility Act imposes certain requirements with respect to rules that are subject to the notice and comment requirements of section 553(b) of the Administrative Procedure Act and that are likely to have a significant economic impact on a substantial number of small entities. Unless an agency determines that a final rule is not likely to have a significant economic impact on a substantial number of small entities, section 603 of the Regulatory Flexibility Act requires that the agency present a regulatory flexibility analysis at the time of the publication of the final rule describing the impact of the rule on small entities and seeking public comment on such impact. Small entities include small businesses, organizations and governmental jurisdictions.

For purposes of the Regulatory Flexibility Act requirements with respect to this final rule, PBGC considers a small entity to be a plan with fewer than 100 participants. This is the same criterion PBGC uses in other aspects of its regulations involving small plans, and is consistent with certain requirements in Title I of ERISA and the Internal Revenue Code, as well as the definition of a small entity that the Department of Labor (DOL) has used for purposes of the Regulatory Flexibility Act.

Thus, PBGC believes that assessing the impact of the rule on small plans is an appropriate substitute for evaluating the effect on small entities. The definition of small entity considered appropriate for this purpose differs, however, from a definition of small business based on size standards promulgated by the Small Business Administration (13 CFR 121.201) pursuant to the Small Business Act. Therefore, in the proposed rule, PBGC requested comments on the appropriateness of the size standard used in evaluating the impact on small entities of the amendments to the benefit payments regulation. No comments were received on this point.

On the basis of its definition of small entity, PBGC certifies under section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) that the amendments in this rule will not have a significant economic impact on a substantial number of small entities. Very few multiemployer plans are

<sup>2</sup> <http://www.pbgc.gov/documents/plan-for-regulatory-review.pdf>.

<sup>3</sup> <http://www.gpo.gov/fdsys/pkg/FR-2015-04-03/pdf/2015-07602.pdf>.

small.<sup>4</sup> And, as discussed above, the amendments will not have a significant economic impact on entities of any size. Accordingly, as provided in section 605 of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), sections 603 and 604 will not apply.

**Paperwork Reduction Act**

PBGC is submitting the information requirements under this final rule to the Office of Management and Budget (OMB) for review and approval under the Paperwork Reduction Act. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The collection of information in part 4041A is approved under control number 1212-0020 (expires June 30, 2017). PBGC estimates that there will be 10 respondents each year and that the total annual burden of the collection of information will be about 17 hours and \$3,850.00 (about 2 hours and \$385 per respondent).

The collection of information in part 4245 is approved under control number 1212-0033 (expires June 30, 2017). PBGC estimates that there will be one respondent each year and that the total annual burden of the collection of information will be about \$1,550.

The collection of information in part 4281 is approved under control number 1212-0032 (expires July 31, 2017). PBGC estimates that there will be 324 respondents each year and that the total annual burden of the collection of information will be about 61 hours and \$309,000 (about \$950 per respondent).

**List of Subjects**

29 CFR Part 4000

Pension insurance, Pensions, Reporting and recordkeeping requirements.

29 CFR Parts 4041A and 4281

Employee benefit plans, Pension insurance, Reporting and recordkeeping requirements.

For the reasons given above, the PBGC is amending 29 CFR parts 4000, 4041A, and 4281 as follows.

<sup>4</sup> According to data from 2012 5500 filings, only 32 of 1,407 active plans have fewer than 100 participants. Further, PBGC is not aware of a multiemployer plan that was established and covered by ERISA that was not initially a large plan. Generally it is only after a plan terminates and employers withdraw from the plan that a plan might reduce in size to fewer than 100 participants.

**PART 4000—FILING, ISSUANCE, COMPUTATION OF TIME, AND RECORD RETENTION**

■ 1. The authority citation for part 4000 continues to read as follows:

**Authority:** 29 U.S.C. 1082(f), 1302(b)(3).

■ 2. In § 4000.3, revise paragraph (b)(3) to read as follows:

**§ 4000.3 What methods of filing may I use?**

\* \* \* \* \*

(b) \* \* \*

(3) When making filings to PBGC under parts 4041A, 4245, and 4281 of this chapter (except for notices of benefit reductions and notices of restoration of benefits under part 4281), you must submit the information required under these parts electronically in accordance with the instructions on the PBGC's Web site, except as otherwise provided by the PBGC.

\* \* \* \* \*

**PART 4041A—TERMINATION OF MULTIEMPLOYER PLANS**

■ 3. The authority citation for part 4041A continues to read as follows:

**Authority:** 29 U.S.C. 1302(b)(3), 1341a, 1441.

■ 4. In § 4041A.11, add paragraph (d) to read as follows:

**§ 4041A.11 Requirement of notice.**

\* \* \* \* \*

(d) *How and where to file.* Filings to PBGC under this subpart must be submitted in accordance with the rules in subpart A of part 4000 of this chapter. See § 4000.4 of this chapter for information on where to file.

**§ 4041A.25 [Amended]**

■ 5. In § 4041A.25, amend paragraph (d) by removing the words “of the PBGC” and adding in their place “to the PBGC”.

**PART 4281—DUTIES OF PLAN SPONSOR FOLLOWING MASS WITHDRAWAL**

■ 6. The authority citation for part 4281 continues to read as follows:

**Authority:** 29 U.S.C. 1302(b)(3), 1341a, 1399(c)(1)(D), and 1441.

■ 7. In § 4281.3, revise paragraph (b) to read as follows:

**§ 4281.3 Filing and issuance rules.**

\* \* \* \* \*

(b) *Method of issuance.* For rules on method of issuance to interested parties, see § 4281.32(c) for notices of benefit reductions, § 4281.43(e) for notices of

insolvency, and § 4281.45(c) for notices of insolvency benefit level.

\* \* \* \* \*

■ 8. In § 4281.43, revise paragraph (a) to read as follows:

**§ 4281.43 Notices of insolvency.**

(a) *Requirement of notices of insolvency.* A plan sponsor that determines that the plan is, or is expected to be, insolvent for a plan year shall file with the PBGC and issue to plan participants and beneficiaries notices of insolvency. Once notices of insolvency have been filed with the PBGC and issued to plan participants and beneficiaries, no notice of insolvency needs to be issued for subsequent insolvency years. Notices shall be delivered in the manner and within the time prescribed in this section and shall contain the information described in § 4281.44.

\* \* \* \* \*

■ 9. In § 4281.47, revise paragraph (b) to read as follows:

**§ 4281.47 Application for financial assistance.**

\* \* \* \* \*

(b) *When, how, and where to apply.* When the plan sponsor determines a resource benefit level that is less than guaranteed benefits, it shall apply for financial assistance at the same time that it submits its notice of insolvency benefit level pursuant to § 4281.45. When the plan sponsor determines an inability to pay guaranteed benefits for any month, it shall apply for financial assistance within 15 days after making that determination. Application to the PBGC for financial assistance shall be made in accordance with the rules in subpart A of part 4000 of this chapter. See § 4000.4 of this chapter for information on where to apply.

\* \* \* \* \*

Issued in Washington, DC, this 14 day of September, 2015.

**DEPARTMENT OF THE INTERIOR****Office of Surface Mining Reclamation and Enforcement****30 CFR Part 938**

[SATS No. PA-159-FOR; Docket No. OSM-2010-0017; S1D1S SS08011000 SX064A000 156S180110; S2D2S SS08011000 SX064A000 15XS501520]

**Pennsylvania Regulatory Program**

**AGENCY:** Office of Surface Mining Reclamation and Enforcement, Interior.

**ACTION:** Final rule.

**SUMMARY:** The Office of Surface Mining Reclamation and Enforcement (OSMRE) is removing a required amendment to the Pennsylvania regulatory program (the Pennsylvania program) under the Surface Mining Control and Reclamation Act of 1977 (SMCRA or the Act). OSMRE has determined that the information submitted by Pennsylvania satisfies a previously required amendment regarding bonding in Pennsylvania. Therefore, OSMRE is removing the previously required amendment from the Pennsylvania program as Pennsylvania has demonstrated that its program is being administered in a manner consistent with SMCRA and the corresponding Federal regulations.

**DATES:** Effective September 17, 2015.

**FOR FURTHER INFORMATION CONTACT:** Ben Owens, Chief, Pittsburgh Field Division; Telephone: (412) 937-2827, Email: [bowens@osmre.gov](mailto:bowens@osmre.gov).

**SUPPLEMENTARY INFORMATION:**

- I. Background on the Pennsylvania Program
- II. Description of the Submission
- III. OSMRE's Findings
- IV. Summary and Disposition of Comments
- V. OSMRE's Decision
- VI. Procedural Determinations

**I. Background on the Pennsylvania Program**

Section 503(a) of the Act permits a State to assume primacy for the regulation of surface coal mining and reclamation operations on non-Federal and non-Indian lands within its borders by demonstrating that its program includes, among other things, "a State law which provides for the regulation of surface coal mining and reclamation operations in accordance with the requirements of this Act . . . ; and rules and regulations consistent with regulations issued by the Secretary pursuant to this Act." See 30 U.S.C. 1253(a)(1) and (7). On the basis of these criteria, the Secretary of the Interior conditionally approved the Pennsylvania program, effective July 31,

1982. You can find background information on the Pennsylvania program, including the Secretary's findings, the disposition of comments, and the conditions of approval of the Pennsylvania program in the July 30, 1982, **Federal Register** (47 FR 33050). You can also find later actions concerning the Pennsylvania program and program amendments at 30 CFR 938.11, 938.12, 938.13, 938.15, and 938.16.

**II. Description of the Submission**

OSMRE published a final rule in the August 10, 2010, **Federal Register** (75 FR 48526), herein referred to as the 2010 final rule, requiring Pennsylvania "to ensure that its program provides suitable, enforceable funding mechanisms that are sufficient to guarantee coverage of the full cost of land reclamation at all sites originally permitted and bonded under the [alternative bonding system (ABS)]." This was codified in the Federal regulations at 30 CFR 938.16(h). OSMRE approved several changes in the 2010 final rule. However, OSMRE concluded that two sites, originally permitted and bonded under the ABS, held insufficient bonds after the conversion to a full cost bonding system to guarantee that the land would be reclaimed in the event forfeiture occurred.

The two sites at issue are anthracite operations that were permitted by Lehigh Coal & Navigation (LCN) and Coal Contractors Inc. (CCI). Before the 2010 final rule was published, Pennsylvania had indicated that these two sites were bonded in an amount that was less than the full cost needed to complete reclamation in the event that forfeiture occurred. Although Pennsylvania contended that these sites were not reclamation liabilities, as the bond deficiency at both sites was being addressed through other means, OSMRE determined that Pennsylvania's approach to resolving this issue did not provide the same level of financial assurance as that guaranteed by posting a full cost bond. As a result, OSMRE revised 30 CFR 938.16(h), and required that Pennsylvania demonstrate that sufficient funds existed to ensure the land reclamation would be completed at the LCN and CCI sites.

In response to OSMRE's 2010 final rule, Pennsylvania submitted information which it believed demonstrated that it is able to guarantee sufficient funds to cover the full reclamation costs at the LCN and CCI sites. After providing three submissions, Pennsylvania requests the removal of the required amendment. Each submission is discussed below.

*Submission No. 1:* By letter dated October 1, 2010 (Administrative Record No. PA 802.72), Pennsylvania sent us a response as required by 30 CFR 938.16(h). We announced receipt of this submission in the February 7, 2011, **Federal Register** (76 FR 6587). In the same document, we opened the public comment period and provided an opportunity for a public hearing or meeting on the adequacy of the submission. OSMRE received comments, but did not hold a public hearing or meeting because neither was requested. The public comment period ended on March 9, 2011.

In the first submission, Pennsylvania provided information that it believed demonstrated that available funds were more than sufficient to guarantee coverage of the full cost of land reclamation at the two sites. The information submitted to support Pennsylvania's contention included a demonstration of available funding, the Coal Contractors 2009 Annual Bond Review, LCN's annual bond review, updated estimates for the ABS bond forfeiture discharge treatment sites, and updated land reclamation estimates. Based on this information, Pennsylvania requested the removal of the previously required amendment.

At the time of this submission, the following conditions existed:

LCN Land Reclamation Estimate:

\$11,230,429

Current Bonds Available: \$7,759,000

Additional Reclamation Funding

Needed: \$3,471,429

CCI Land Reclamation Estimate:

\$2,863,982

Current Bonds Available: \$804,625

Additional Reclamation Funding

Needed: \$2,059,357

The submission indicated a balance of \$19,496,955 in the Surface Mining Conservation and Reclamation Fund (SMCR Fund) that was available for ABS land and discharge treatment for ABS legacy sites. Projected expenses at the time for ABS land reclamation and discharge treatment (design and construction) was \$12,877,636, leaving a balance of \$6,619,319 available to address the reclamation funding needs of \$5,530,786 for the LCN and CCI sites, if forfeited.

Pennsylvania also stated that in the unlikely event that both of these sites would require expenditure of funds for land reclamation, then at least some of the cost for the design and construction of the ABS bond forfeiture discharge treatment facilities would be paid for using the Reclamation Fee Operation and Maintenance account (RFO&M account). There was approximately \$1

million of immediately available funds in this account that could be used for this purpose exclusively. Pennsylvania believed that this demonstration of available funding warranted removal of the required amendment.

*Submission No. 2:* On June 13, 2011 (Administrative Record No. PA 802.80), we received additional information from Pennsylvania regarding recent developments with the LCN site. The permit had been transferred to BET Associates IV, LLC (BET), resulting in the posting of a full cost bond in an amount to cover the land reclamation obligation. We announced this submission in the October 17, 2011, **Federal Register** (76 FR 64048). In the same document, we opened the public comment period and provided an opportunity for a public hearing or meeting on the adequacy of the submission. OSMRE received comments, but did not hold a public hearing or meeting because neither was requested. The public comment period ended on November 1, 2011.

Included in the second submission was the mining permit, Part C (Authorization to Mine), and the calculation sheet documenting the bond amount. At the time of this submission, the following conditions existed:

LCN Land Reclamation Estimate:  
\$10,523,000  
Current Bonds Available: \$10,523,000  
Additional Reclamation Funding Needed: \$0

*Submission No. 3:* On November 6, 2012, we received additional information from Pennsylvania regarding recent developments involving the CCI permit bonding status (Administrative Record No. PA 802.85). We announced receipt of this submission in the February 19, 2013, **Federal Register** (78 FR 11617). In the same document, we opened the public comment period and provided an opportunity for a public hearing or meeting on the adequacy of the submission. OSMRE received comments, but did not hold a public hearing or meeting because neither was requested. The public comment period ended on March 6, 2013.

The third submission included a letter to the operator regarding the annual bond review, along with the supporting documentation supporting the review, which included the annual bond calculation summary.

At the time of this submission, the following conditions existed:

CCI Land Reclamation Estimate:  
\$403,691  
Current Bonds Available: \$804,625  
Additional Reclamation Funding Needed: \$0

After three submissions, Pennsylvania believed it had provided sufficient information as required by OSMRE to satisfy the 30 CFR 938.16(h) requirements. As a result, Pennsylvania requested that OSMRE remove the previously required amendment.

### III. OSMRE's Findings

Discussed below are our findings concerning this request to remove a previously required amendment to the Pennsylvania program pursuant to SMCRA and the Federal regulations at 30 CFR 732.15 and 732.17. After reviewing the information submitted, OSMRE is removing the previously required amendment that was codified at 30 CFR 938.16(h).

OSMRE finds that Pennsylvania demonstrated through its bonding calculations and reclamation estimates that sufficient funds are available to guarantee coverage of the reclamation needs at the LCN and CCI sites, in satisfaction of the previously required amendment. Therefore, we are approving this request to remove paragraph (h) of 30 CFR 938.16.

### IV. Summary and Disposition of Comments

#### *Public Comments*

We asked for public comments on each of the three submissions. No requests for public meetings were received. On March 5, 2013, we received comments from a group of citizen organizations collectively known as "the Federation," which represents six organizations: (1) Citizens for Pennsylvania's Future (PennFUTURE), (2) Pennsylvania Federation of Sportsmen's Clubs, Inc., (3) Sierra Club, (4) Pennsylvania Council of Trout Unlimited, (5) Center for Coalfield Justice, and (6) Mountain Watershed Association.

PennFUTURE serves as legal counsel for these organizations with respect to alleged inadequacies of Pennsylvania's bonding program and continues to serve in that capacity by responding to related matters, such as this program amendment. PennFUTURE provided comments on Pennsylvania's initial submission, which we responded to in the 2010 final rule (Administrative Record No. PA 802.43).

In addition to the March 5, 2013, comments (Administrative Record No. PA 802.88) on the latest submission from Pennsylvania, PennFUTURE also submitted comments on March 9, 2011 (Administrative Record No. PA 802.79), regarding the initial October 1, 2010, submission and on November 1, 2011 (Administrative Record No. PA 802.83),

regarding Pennsylvania's first supplemental submission dated June 13, 2011 (Administrative Record No. PA 802.80), concerning the LCN site.

PennFUTURE originally contended that the program amendment submission was deficient for various reasons. As noted in our findings, however, subsequent events occurred after the original submission, which affected the financial solvency and prior bond deficiency at the two sites. Since the comments submitted by PennFUTURE have largely restated its earlier comments, OSMRE is addressing those comments still applicable. We are addressing the March 5, 2013, comments first and they are as follows:

#### A. The CCI Site

PennFUTURE submitted previous comments regarding the adequacy of this site. However, subsequent to the receipt of those comments, PennFUTURE now agrees that, as a result of the reclamation work performed at the CCI site since Submission No. 1, the site finally appears to have an enforceable, full cost reclamation guarantee in place considering the current bond amount and the estimated cost to complete reclamation of the site. Since the most recent bond calculation summary submitted (revised summary for 2011) was prepared, PennFUTURE recommends that OSMRE review CCI's annual bond calculation summary for 2012 to confirm that the site is adequately bonded.

*OSMRE's Response:* On August 20, 2013, Pennsylvania advised OSMRE that the CCI site had been backfilled and graded, with five acres to be seeded in the fall of 2013. There has been no corresponding bond reduction. The amount remains \$804,625, which is sufficient to complete reclamation (Administrative Record No. PA 802.65).

#### B. The LCN Site/Perpetual Post-Mining Discharge and Land Reclamation Bond

According to PennFUTURE, Pennsylvania has not demonstrated that an enforceable, full cost land reclamation guarantee exists for the LCN site because there is no fully funded guarantee of perpetual treatment for the LCN site's post-mining discharge. PennFUTURE asserts that the perpetual post-mining discharge from the LCN site puts the adequacy of the treatment trust for that discharge directly at issue in this program amendment proceeding. As a result, PennFUTURE contends that OSMRE must decide a number of issues concerning Pennsylvania's implementation of treatment trusts raised in PennFUTURE's February 27,

2009, comments on Pennsylvania's August 1, 2008, proposed ABS program amendment (Administrative Record No. PA 802.60).

PennFUTURE states that \$8,423,000 is needed for land reclamation only and does not apply to discharges. The perpetual post-mining discharge from the LCN site puts the adequacy of the treatment trust for that discharge directly at issue in this proceeding. In order to demonstrate that the surety reclamation bond for the LCN site fully guarantees all land reclamation at the site and will not be used to address mine drainage treatment liability, Pennsylvania must demonstrate that the treatment trust for the LCN site is both adequate in amount and fully funded, which it has failed to do as explained below.

PennFUTURE states that its November 1, 2011, comments on Pennsylvania's first supplemental program amendment submission included the May 5, 2011, Post-Mining Treatment Trust Consent Order and Agreement between Pennsylvania and BET (BET Trust CO&A), which established a payment schedule for funding a perpetual treatment trust.

PennFUTURE states that its comments showed that Pennsylvania had failed to demonstrate that the surety bond posted by BET fully guarantees all outstanding land reclamation at the LCN site because it had failed to demonstrate that an adequate and fully funded trust is in place that guarantees perpetual treatment of the post-mining discharge from the LCN site. PennFUTURE's earlier comment letter concluded:

"Under Pennsylvania's approved regulatory program, surety bonds cover all varieties of potential reclamation liabilities at a permitted coal mine. Thus, until a fully funded treatment trust is in place that fully guarantees perpetual treatment of the post-mining discharge from the LCN site, the \$8,423,000 surety bond posted by BET is stretched too thin, covering an estimated \$8,423,000 in land reclamation liability plus perhaps an equivalent amount in mine drainage treatment liability. As a result, the surety bond currently does not provide fully, dollar-for-dollar coverage of the potential land reclamation liabilities at the LCN site. [Pennsylvania] therefore has not carried its burden of demonstrating that the combination of BET's surety bond and the transferred [Land Reclamation Financial Guarantees (LRFG)] 'are sufficient to guarantee coverage of the full cost of land reclamation' at the LCN site."

PennFUTURE states that for any primacy mine with a post-mining

discharge, like the LCN site, the conventional reclamation bond covers both the outstanding land reclamation obligation and the outstanding discharge treatment obligation, unless and until the mine operator posts a treatment trust or other financial guarantee that is both: (1) Adequate in amount to provide perpetual treatment and (2) fully funded. It follows that in order to find that the surety bond posted by BET for the LCN site is unencumbered by any potential mine drainage treatment liability, and therefore, is adequate to fully guarantee the outstanding land reclamation liability, OSMRE must find that the treatment trust for the LCN site is both (1) adequate in amount to provide perpetual treatment and (2) fully funded. PennFUTURE goes on to comment about the calculation and assumptions used to estimate the valuing of trust assets to derive a treatment trust amount that results in financial solvency. These issues were raised in detail in their 2009 comments on Pennsylvania's initial submission. PennFUTURE further asserts that the current program amendment presents, concretely for one specific mine, the issues OSMRE declined to address in the abstract, for a range of potential future scenarios, in ruling on the ABS program amendment in the 2010 final rule.

PennFUTURE references several developments relevant to the adequacy and funding status of the LCN site treatment trust since the submission of their last comment letter on November 1, 2011. The developments include the LCN site's pollutant discharge limits and PennFUTURE's submission of comment letters detailing the reasons why the pollutant loads and effluent limitations Pennsylvania proposed for relocating discharge from the LCN site are excessive. PennFUTURE further states that correcting those errors and reducing the allowable pollutant loads and applicable effluent limitations will increase the estimated costs of treating the discharge from the LCN site and thus, the required amount of the treatment trust. Additionally, PennFUTURE also references the completion of a 2012 OSMRE report documenting a review of the Al Hamilton Treatment Trust Fund. While this report is not directly related to the LCN site, PennFUTURE provides it as an example of perceived trust inadequacies. This report documents that when the trust was established in 2003, roughly half of its assets were coal reserves that now appear to be valueless, leaving the primary portion of

the trust at only a fraction of the value required to provide adequate and perpetual treatment of the dozens of mine discharges it covers. In reference to OSMRE's Al Hamilton Trust Fund Report attached in its letter dated March 5, 2013, PennFUTURE stated that the fractional funding of the trust has forced Pennsylvania "to triage and prioritize the systems needing attention, to spread out the expenditures to reduce the financial stress," leaving some discharges wholly or partially untreated and others lacking adequate treatment.

PennFUTURE states that the harsh lessons provided by this example are that something appearing to have great value today may, in fact, be worthless when needed in the future, and that for a financial mechanism that is required to provide a rock-solid, perpetual guarantee, only money in the bank qualifies as money in the bank. In light of this concern, no discharge treatment trust should be considered fully funded—that is, to provide the iron-clad reclamation guarantee required by law—unless the primary portion of the trust consists of cash or assets that are easily and immediately convertible to cash.

PennFUTURE states that when Pennsylvania enters into a CO&A with a mine operator establishing a payment schedule for funding a treatment trust, it typically does not immediately consider the trust fully funded based on the operator's documented payment obligation. To the contrary, it is only when the mine operator makes the final payment and the trustee has the cash in hand that Pennsylvania changes the designation from "payment plan" to "fully funded".

According to PennFUTURE, the inability to market the Al Hamilton Treatment Trust's coal reserves shows that any trust asset that is not easily and immediately convertible to cash is something like a payment plan—it may or may not deliver the expected value when the time comes. Just as a payment plan trust is not considered fully funded until the last payment is delivered, PennFUTURE states that any trust containing an asset like coal reserves may not be considered fully funded until the asset actually delivers its estimated value by being converted to cash.

*OSMRE's Response:* Pennsylvania's regulations require adjustment of the reclamation fee, which is deposited into the RFO&M account, to cover any increased costs of water treatment for all ABS forfeited sites in any given year. Pennsylvania's annual adjustments to the reclamation fee amount will be evaluated by OSMRE through its oversight authority. In short, the

regulations create the mandate to fully fund discharge treatment costs for all existing and potential ABS legacy sites in perpetuity. Therefore, should the LCN site-specific bond be forfeited, the entire amount of that bond will be used for land reclamation and treatment costs and will be covered by the treatment trust and supplemented, if necessary, by the adjustable reclamation fee. As noted above, sufficient funds exist in the site-specific bond to cover land reclamation costs. In an email dated June 18, 2013, Pennsylvania, at our request, provided the 2012 annual bond calculation, which indicated a reclamation obligation of \$10,448,389 as well as a surplus of \$74,611 at the LCN site (Administrative Record No. PA 802.89). Pennsylvania has demonstrated that its program provides suitable, enforceable funding mechanisms sufficient to guarantee the full cost of land reclamation at all sites originally permitted and bonded under the ABS, in accordance with 30 CFR 938.16(h). Therefore, the previously required amendment can be removed.

#### C. The LCN Site's Trust Fund Adequacy

PennFUTURE asserts that OSMRE cannot find that the land reclamation at the LCN site is fully guaranteed unless it also finds that perpetual treatment of the mine drainage discharge from the LCN site is fully guaranteed.

PennFUTURE states that in addition to being fully funded, a treatment trust must be adequate in amount to provide the firm guarantee of perpetual treatment required by law. Thus, in order to find that the treatment of the discharge from the LCN site is fully guaranteed (which, as explained above, is a prerequisite to finding that the reclamation of the land at the LCN site is fully guaranteed), OSMRE must determine whether Pennsylvania, in calculating the amount of the BET/LCN site trust, applied assumptions and methods that yield a dollar figure that is sufficient to provide the required firm guarantee of perpetual treatment.

PennFUTURE claims that the first complication is that Pennsylvania cannot, at this point, accurately project the treatment costs because it has yet to set the effluent limit targets that such treatment will be required to meet, much less to approve the installation of the new treatment system(s) that will be designed to meet them. PennFUTURE additionally asserts that the BET Trust CO&A estimated the present discounted value for perpetual operation and maintenance of the Mine's "New Treatment System(s)" at \$13.8 million a year before Pennsylvania produced a draft of the National Pollutant Discharge

Elimination System (NPDES) permit revision that would govern the new system's discharge. However, according to PennFUTURE, the effluent limitations in the final revision of the NPDES permit must be more stringent than those proposed in Pennsylvania's draft of the permit.

The second complication, according to PennFUTURE, is that the requirement that the amount of the trust be sufficient to provide a firm guarantee of perpetual treatment forces OSMRE to address all of the issues concerning the inadequacy of Pennsylvania treatment trusts raised in our coalition's February 27, 2009, comments on the 2008 ABS program amendment. PennFUTURE claims that OSMRE declined to address those issues in the abstract across a multitude of potential scenarios in its 2010 final rule on the ABS program amendment. 75 FR 48526. Now, however, the abstract has been made concrete and the programmatic concern has been reduced to a single, specific case. In short, PennFUTURE believes that the issues are squarely and concretely presented and OSMRE must decide them in order to rule on the adequacy of the reclamation guarantee for the LCN site.

PennFUTURE incorporates by reference all earlier comments concerning the deficiencies of Pennsylvania's trust fund calculations, along with the many exhibits supporting those comments. Issues addressed in those earlier comments included trust fund volatility, trust investment portfolio composition, treatment trust portfolio rates of return, and the 75-year recapitalization cost calculation.

*OSMRE's Response:* As we addressed in our response above, Pennsylvania's regulations require adjustment of the reclamation fee to fully fund discharge treatment costs for all ABS forfeited sites. In the event that the LCN site-specific bond is forfeited, the entire bond amount will be used for land reclamation and treatment costs will be covered by the treatment trust and supplemented by the adjustable reclamation fee, if necessary. In an email dated June 18, 2013, Pennsylvania, at our request, indicated that the 2012 bond calculation amount for the LCN site is \$10,448,389. Further, documentation was provided that indicated a surplus of \$74,611 at the site (Administrative Record No. PA 802.89). Thus, Pennsylvania has demonstrated that its program provides suitable, enforceable funding mechanisms sufficient to guarantee the full cost of land reclamation at all sites originally permitted and bonded under the ABS, in accordance with 30 CFR 938.16(h).

Therefore, the previously required amendment can be removed.

As we addressed in our findings above, Pennsylvania's submissions satisfy the requirements set forth in the previously required amendment and demonstrate the existence of sufficient funds to guarantee coverage of the full cost of land reclamation at both the LCN and CCI sites. Therefore, OSMRE is removing the previously required amendment, at subsection (h) of 30 CFR 938.16.

#### *Federal Agency Comments*

On October 5, 2010, under the Federal regulations at 30 CFR 732.17(h)(11)(i) and section 503(b) of SMCRA, we requested comments on the amendment from various Federal agencies with an actual or potential interest in the Pennsylvania program (Administrative Record No. PA 802.73). We received a response of no comment from the Mine Safety and Health Administration on October 18, 2010 (Administrative Record No. PA 802.74). No other comments were received, with the exception noted below.

#### *Environmental Protection Agency (EPA) Concurrence and Comments*

Under 30 CFR 732.17(h)(11)(ii), we are required to obtain a written concurrence from EPA for those provisions of the program amendment that relate to air or water quality standards issued under the authority of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or the Clean Air Act (42 U.S.C. 7401 *et seq.*). None of the revisions that Pennsylvania proposed to make in this amendment pertain to air or water quality standards. Therefore, we did not ask EPA to concur on the amendment. However, we received comments from EPA on November 12, 2010, regarding the submission (Administrative Record No. PA 802.76). EPA concluded that the submission was limited to land reclamation. EPA, however, mentioned that well-funded bonding programs are necessary to provide for post-mining treatment, prevent perpetual post-mining drainage problems, as well as protect the hydrologic balance and ensure compliance with water quality standards. In response to EPA's comments, OSMRE agrees that an adequately funded bonding program is crucial to prevent post-mining pollutional discharges.

#### **V. OSMRE's Decision**

Based on the above findings, we are removing the previously required amendment at 30 CFR 938.16(h). To implement this decision, we are amending the Federal regulations, at 30

CFR part 938, that codify decisions concerning the Pennsylvania program. We find that good cause exists under 5 U.S.C. 553(d)(3) to make this final rule effective immediately. Section 503(a) of SMCRA requires that the State's program demonstrate that the State has the capability of carrying out the provisions of the Act and meeting its purposes. Making this rule effective immediately will expedite that process. SMCRA requires consistency of State and Federal standards.

## VI. Procedural Determinations

### *Executive Order 12630—Takings*

This rule does not have takings implications. This determination is based on the analysis performed for the counterpart Federal regulation.

### *Executive Order 12866—Regulatory Planning and Review*

This rule is exempted from review by the Office of Management and Budget (OMB) under Executive Order 12866.

### *Executive Order 12988—Civil Justice Reform*

The Department of the Interior has conducted the reviews required by section 3 of Executive Order 12988 and has determined that this rule meets the applicable standards of subsections (a) and (b) of that section. However, these standards are not applicable to the actual language of State regulatory programs and program amendments because each program is drafted and promulgated by a specific State, not by OSMRE. Under sections 503 and 505 of SMCRA (30 U.S.C. 1253 and 1255) and the Federal regulations at 30 CFR 730.11, 732.15, and 732.17(h)(10), decisions on proposed State regulatory programs and program amendments submitted by the States must be based solely on a determination of whether the submittal is consistent with SMCRA and its implementing Federal regulations and whether the other requirements of 30 CFR parts 730, 731, and 732 have been met.

### *Executive Order 13132—Federalism*

This rule does not have Federalism implications. SMCRA delineates the roles of the Federal and State governments with regard to the regulation of surface coal mining and reclamation operations. One of the purposes of SMCRA is to "establish a nationwide program to protect society and the environment from the adverse effects of surface coal mining operations." Section 503(a)(1) of SMCRA requires that State laws regulating surface coal mining and reclamation operations be "in

accordance with" the requirements of SMCRA, and section 503(a)(7) requires that State programs contain rules and regulations "consistent with" regulations issued by the Secretary pursuant to SMCRA.

### *Executive Order 13175—Consultation and Coordination With Indian Tribal Governments*

In accordance with Executive Order 13175, we have evaluated the potential effects of this rule on federally recognized Indian tribes and have determined that the rule does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. The basis for this determination is that our decision is on a State regulatory program and does not involve Federal regulations involving Indian lands.

### *Executive Order 13211—Regulations That Significantly Affect the Supply, Distribution, or Use of Energy*

On May 18, 2001, the President issued Executive Order 13211 which requires agencies to prepare a Statement of Energy Effects for a rule that is (1) considered significant under Executive Order 12866, and (2) likely to have a significant adverse effect on the supply, distribution, or use of energy. Because this rule is exempt from review under Executive Order 12866 and is not expected to have a significant adverse effect on the supply, distribution, or use of energy, a Statement of Energy Effects is not required.

### *National Environmental Policy Act*

This rule does not require an environmental impact statement because section 702(d) of SMCRA (30 U.S.C. 1292(d)) provides that agency decisions on proposed State regulatory program provisions do not constitute major Federal actions within the meaning of section 102(2)(C) of the National Environmental Policy Act (42 U.S.C. 4332(2)(C)).

### *Paperwork Reduction Act*

This rule does not contain information collection requirements that require approval by OMB under the Paperwork Reduction Act (44 U.S.C. 3507 *et seq.*).

### *Regulatory Flexibility Act*

The Department of the Interior certifies that this rule will not have a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5

U.S.C. 601 *et seq.*). The State submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an economic analysis was prepared and certification made that such regulations would not have a significant economic effect upon a substantial number of small entities. In making the determination as to whether this rule would have a significant economic impact, the Department relied upon the data and assumptions for the counterpart Federal regulations.

### *Small Business Regulatory Enforcement Fairness Act*

This rule is not a major rule under 5 U.S.C. 804(2), the Small Business Regulatory Enforcement Fairness Act. This rule: (a) Does not have an annual effect on the economy of \$100 million; (b) Will not cause a major increase in costs or prices for consumers, individual industries, Federal, State, or local government agencies, or geographic regions; and (c) Does not have significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of U.S.-based enterprises to compete with foreign-based enterprises. This determination is based upon the fact that the State submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation was not considered a major rule.

### *Unfunded Mandates*

This rule will not impose an unfunded mandate on State, local, or tribal governments or the private sector of \$100 million or more in any given year. This determination is based upon the fact that the State submittal, which is the subject of this rule, is based upon counterpart Federal regulations for which an analysis was prepared and a determination made that the Federal regulation did not impose an unfunded mandate.

### **List of Subjects in 30 CFR Part 938**

Intergovernmental relations, Surface mining, Underground mining.

Dated: May 22, 2015.

**Thomas D. Shope,**

*Regional Director, Appalachian Region.*

**EDITORIAL NOTE:** This document was received for publication by the Office of Federal Register on September 10, 2015.

For the reasons set out in the preamble, 30 CFR part 938 is amended as follows:

**PART 938—PENNSYLVANIA**

■ 1. The authority citation for Part 938 continues to read as follows:

*Authority:* 30 U.S.C. 1201 *et seq.*

**§ 938.16 [Amended]**

■ 2. Section 938.16 is amended by removing and reserving paragraph (h).

[FR Doc. 2015–23118 Filed 9–16–15; 8:45 am]

**BILLING CODE** 4310–05–P

**DEPARTMENT OF THE TREASURY****Fiscal Service****31 CFR Part 285**

**RIN 1530-AA02**

**Offset of Tax Refund Payments To Collect Certain Debts Owed to States**

**AGENCY:** Bureau of the Fiscal Service, Fiscal Service, Treasury.

**ACTION:** Final rule.

**SUMMARY:** This final rule adopts the interim rule, published in the **Federal Register** on January 28, 2011, concerning the collection of delinquent State unemployment compensation debts through the offset of overpayments of Federal taxes.

**DATES:** This rule is effective September 17, 2015.

**ADDRESSES:** In accordance with the U.S. government's eRulemaking Initiative, the Bureau of the Fiscal Service publishes rulemaking information on <http://www.regulations.gov>.

**FOR FURTHER INFORMATION CONTACT:** Thomas Kobielus, Manager, Treasury Offset Program Debt Policy Branch, Treasury Offset Program Division, Debt Collection Program Management Directorate, Debt Management Services, Bureau of the Fiscal Service, at (202) 874–6810, or Michelle M. Cordeiro, Attorney, Office of Chief Counsel, Bureau of the Fiscal Service, at (202) 874–6680.

**SUPPLEMENTARY INFORMATION:****I. Background**

This rule implements the authority added by the SSI Extension for Elderly and Disabled Refugees Act of 2008 (“2008 Act”), as amended by the Claims Resolution Act of 2010 (“2010 Act”), to offset overpayments of Federal taxes (referred to as “tax refund offset”) to collect delinquent state unemployment compensation debts. The Department of the Treasury (“Treasury”) has incorporated the procedures necessary to collect state unemployment compensation debts as part of the

Treasury Offset Program, a centralized offset program operated by Treasury's Bureau of the Fiscal Service (“Fiscal Service”).

On January 28, 2011, Fiscal Service (then, the Financial Management Service) published an interim rule with request for comments at 76 FR 5070, implementing this new authority. Specifically, this rule amended Fiscal Service regulations to include unemployment compensation debts among the types of state debts that may be collected by tax refund offset.

**II. Summary of Comments Received and Treasury's Responses**

Treasury sought comments on all aspects of the proposed rule. Treasury received comments from one private company that provides worldwide tax services. The following is a discussion of the substantive issues raised in the comments.

**1. Notice**

The commenter suggested that the rule provide guidelines to the states regarding how to notify debtor populations who may be affected by this rule. While this comment is outside the scope of this rule, Fiscal Service notes that this rule requires debtor-specific pre-offset notification (see 31 CFR 285.8(c)(3)(i)). The commenter also suggested that Fiscal Service mandate that states provide a pre-offset notice by certified mail, return receipt requested. In the 2010 Act, Congress explicitly removed this requirement in the case of unemployment compensation debt. Fiscal Service is unaware of any evidence that certified mail is more likely to reach the debtor than is regular first class mail, and notes that the cost of sending a notice by certified mail, return receipt requested, is high relative to sending a notice by regular first class mail. Therefore, Fiscal Service has not adopted this suggestion. As required by statute, however, notice must be sent by certified mail, return receipt requested prior to pursuing Federal tax refund offset to collect delinquent state income tax obligations.

The commenter also suggested that Fiscal Service mandate that the notice to the debtor include certain details about the debt. Fiscal Service notes that, prior to submitting a debt to the Treasury Offset Program for tax refund offset purposes, a state is required to certify to Fiscal Service that it has provided the debtor with sufficient due process, including identification of the debt the state seeks to collect by offset. The information that must be provided may differ with the specific circumstances, and states may provide notice beyond

what is specifically required by statute and regulation. Because identification of the debt is already required, Fiscal Service has not incorporated this suggestion.

**2. Reasonable Efforts**

The commenter suggested that this rule provide specific actions that states should take and state what documentation they should retain to demonstrate that they have made reasonable efforts to collect a debt prior to pursuing Federal tax refund offset. The rule provides detail on what a reasonable effort includes—namely, making written demand on the debtor for payment and following state law and procedure. In addition, the rule was designed to provide flexibility because what constitutes a reasonable effort may differ based on the specific circumstances. Therefore, Fiscal Service believes that providing specific actions that states should take is unnecessary and not practicable and has not adopted this suggestion.

**3. Central Repository for Information**

The commenter suggested that debtors be able to obtain information through a centralized location within the Treasury Offset Program Web site and through an automated telephone system on why their payment was offset and on state appeals processes. While this suggestion is outside the scope of this rule, Fiscal Service notes that debtors currently may access certain offset information through an automated telephone system. Fiscal Service further notes that it is exploring other self-service options that would permit debtors to obtain information about their own debts.

**4. Other Concerns**

The commenter suggested that the description of the required appeal process contain more detail. Fiscal Service is not aware of any additional detail that needs to be included and, therefore, has not made any changes to the rule based on this suggestion.

The commenter also suggested that Fiscal Service consider extending the period of dispute to 90 days because debtors are unlikely to have retained records for long periods of time. Fiscal Service notes that several other delinquent debt collection tools provide a due process period of 60 days or fewer, including the offset of Federal nontax payments to collect Federal nontax debts (31 CFR 285.5(d)(6)(ii)(A)); the offset of Federal nontax payments to collect state debts (31 CFR 285.6(e)(2)); the offset of Federal tax payments to collect Federal nontax debts (31 CFR 285.2(d)(1)(ii)(B)); and the

administrative garnishment of wages to collect Federal nontax debts (31 U.S.C. 3720D(b)(2)). Moreover, Fiscal Service believes that an additional 30 days is not likely to help debtors locate and produce such records, and is not aware of any evidence that 60 days is insufficient. Given the time period for other debt collection tools, Fiscal Service believes it would be best to leave the interim rule unchanged.

The commenter also expressed concern that lifting the 10-year time limitation will create burdens for Treasury's Internal Revenue Service, due to an increase in injured spouse claims. Fiscal Service is unaware of any evidence to support this concern. Fiscal Service further notes that the 10-year limitation was removed by statute.

#### Procedural Matters

This rule is not a significant regulatory action as defined in Executive Order 12866. Because no notice of proposed rulemaking was required for this rule, the provisions of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) do not apply.

#### Federalism

This rule has been reviewed under Executive Order 13132, federalism. This rule will not have substantial direct effects on states, on the relationship between the national government and the states, or on distribution of power and responsibilities among the various levels of government. Participation in the program governed by this rule is voluntary for the states; this rule only sets forth the general procedures for state participation. States already participate in offset of tax refunds to collect delinquent state income tax obligations pursuant to 31 CFR 285.8. This rule merely updates the regulations to reflect the statutory change authorizing states to submit additional debts to Treasury Offset Program for collection by tax refund offset. Therefore, in accordance with Executive Order 13132, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

For the reasons stated above, the interim rule amending 31 CFR 285.8, published at 76 FR 5070, January 28, 2011, is adopted as final without change.

**David A. Lebryk,**

*Fiscal Assistant Secretary.*

## DEPARTMENT OF DEFENSE

### Office of the Secretary

#### 32 CFR Part 86

[Docket ID: DOD-2014-OS-0009]

RIN 0790-AJ19

#### Background Checks on Individuals in DoD Child Care Services Programs

**AGENCY:** Under Secretary of Defense for Personnel and Readiness, DoD.

**ACTION:** Final rule.

**SUMMARY:** This rule establishes and updates policy, assigns responsibilities, and provides procedures to conduct criminal history checks on individuals involved in the provision of child care services for children under the age of 18 in DoD programs. The Crime Control Act of 1990 (Act) requires all individuals involved with the provision of child care services to children under the age of 18 undergo a criminal background check. "Child care services" include, but are not limited to, social services, health and mental health care, child (day) care, education (whether or not directly involved in teaching), and rehabilitative programs. Any conviction for a sex crime, an offense involving a child victim, or a drug felony, may be grounds for denying employment or for dismissal of an employee providing any of the services discussed above.

**DATES:** This rule is effective October 19, 2015.

**FOR FURTHER INFORMATION CONTACT:** Karen Morgan, 571-372-0859.

**SUPPLEMENTARY INFORMATION:**

#### Executive Summary

The purpose of this regulatory action is to describe requirements for criminal history background checks, including reinvestigation, and self-reporting, for individuals involved with the provision of child care services.

The legal authorities for this rule include: 5 U.S.C. 2105, 10 U.S.C. chapter 47, 42 U.S.C. 13041.

The major provisions of this regulatory action include providing procedures for requirements for criminal history background checks listing the types of background checks, and descriptions of reinvestigation and self-reporting.

This rule is intended to support the workforce mission of the DoD and implement current law that covers individuals expected to have regular contact with children in the performance of child care services on a DoD installation or DoD-sanctioned program. The estimated costs of the rule

are \$10 million annually. This cost includes administration costs; required FBI fingerprint Investigations Child Care National Agency Check and Inquiries checks (\$125/NACI); State Criminal History Repository checks (\$25/each state the individual resided in); and periodic reinvestigations. We do not believe that this rule will impose substantial direct costs on state and local governments.

This rule is part of DoD's retrospective plan, completed in August 2011, under Executive Order 13563, "Improving Regulation and Regulatory Review." DoD's full plan and updates can be accessed at: <http://www.regulations.gov/#!docketDetail;ct=FR+PR+N+O+SR;rpp=10;po=0;D=DOD-2011-OS-0036>.

#### Public Comments

The Department of Defense published a proposed rule in the **Federal Register** on October 1, 2014 (79 FR 59168-59173) for a 60-day public comment period. We received 22 comments. Five comments expressed support for the rule and no response is required. One comment was withdrawn. The remaining comments are listed below.

*Comment ID DOD-2014-OS-0009-0003:*

- The law still states that any conviction for a sex crime, an offense involving a child victim, or a drug felony, may be grounds for denying employment or for dismissal of an employee. Public Law 101-647. The word may give too much flexibility in the decision making process to hiring agents in determining what to do with results of the background check. The review board may either bar employment based on the offenses listed out in the statute or excuse the background check results. Agency processes should spell out more specifically which offenses are bars and which are not.

*Response:* The commenter has referenced the summary paragraph at the beginning of the rule, which is not the rule itself. Please see § 86.6(c) for specific criteria for automatic and presumptive disqualifiers, which does not use the term, "may."

- It is imperative that a thorough review, investigation and study of different systems for background checks is completed on each organization interacting with children.

*Response:* This rule/policy was developed in collaboration with the Military Services, which are responsible for providing detailed procedures that meet the overall DoD requirements in this rule to ensure the rule/policy is implemented correctly.

*Comment ID DOD-2014-OS-0009-0004:*

- This rule includes all current employees, contractors and specific volunteers, in addition to future applicants, which is bound to create a backlog for which no solution is presented, at least in the current rule.

*Response:* This rule does not create a new system. It updates existing policy for background checks.

- This rule addresses foreign nationals in a way that could be ambiguous in its application. The definition describes a foreign national as not a citizen of the United States. This encompasses a fair amount of specific volunteers, especially in the religious ministries at overseas DoD facilities. These volunteers, innocent of any criminal wrong doing, may not fall under host country agreements and therefore be unable to continue their work. This would be an unfair outcome for those individuals and the organizations that rely on an already limited pool of volunteers. A similar outcome is possible for those foreign nationals who are military members or spouses who are not yet U.S. citizens that reside in the U.S. and work on DoD facilities.

*Response:* There are policies and procedures in place to ensure foreign nationals receive appropriate background checks or work under line-of-sight supervision (LOSS) in order to continue their work.

- The rule seems to exclude subcontractors from its application. This may be due to the potential increased burden on first line contractors to ensure all its subs are in compliance. This is frankly unacceptable as a lot of what occurs on DoD facilities, especially overseas, is accomplished by subcontractors.

*Response:* The exclusion of subcontractors has been deleted from the definition of contractors.

*Comment ID DOD-2014-OS-0009-0005:* I'm confused by the language in § 86.6(b), which references "(a)(6)(i)" and "(a)(6)(ix)" as being "in this section." I can't find the quoted section. This may be my error, or perhaps it is a clerical oversight.

*Response:* The reference should be (a)(5)(i) and (a)(5)(ix). Section 86.6(b) has been updated with the accurate reference.

*Comment ID DOD-2014-OS-0009-0006:* Why limit the background checks to individuals with "regular contact with children?" The definition of "regular contact with children" excludes those with access to children. The narrow reach of the proposed rule

seems to leave out serious threats. Limited resources could be to blame.

*Response:* It is beyond the scope of DoD to conduct a background check on any individual who has access to children. This rule/policy is intended to ensure appropriate checks of those who work in DoD-sanctioned child care services programs.

*Comment ID DOD-2014-OS-0009-0007:* Absent documented statistical research to the contrary, the Department of Defense has not established that individuals who are convicted drug felons are any more likely to threaten a child's safety than any other citizen of the United States. Please modify the proposed rule to omit the class "persons with a drug felony" from the screening process for federal jobs within the Department of Defense that serve children under the age of 18.

*Response:* Inclusion of a "felony conviction of a drug offense" as an automatic disqualifier was based on careful and objective analysis regarding how to protect children in DoD child care services programs. A felony conviction of a drug offense could adversely impact the integrity of the position and the safety and well-being of children in DoD care.

*Comment ID DOD-2014-OS-0009-0008:*

- Costs: \$10 million annually is a large amount of money. How crucial are each of the checks and investigations and how necessary is it for reinvestigations to take place every 5 years if the surfacing of derogatory information will trigger a reinvestigation anyways? I like Executive Orders 13563, and it seems to address these questions, however it states that it is not economically significant, which makes me wonder whether alternatives ways to regulate and minimize costs are properly being explored and examined. The price of each component, for example video surveillances or conspicuous marking, should be strictly scrutinized. What other programs is the use of this money being indirectly taken away from? Additionally, what process will determine that the state and local governments will not be substantially affected financially and what does substantial mean? It is great that employers and a substantial number of small entities will not be significantly impacted under the Unfunded Mandates Reform Act and the Regulatory Flexibility Act, but how far do the costs extend to government contracts and employees within the state?

*Response:* The requirements for the initial checks and regular 5 year reinvestigations are crucial to ensuring protection of children in DoD child care

services programs. As background check systems are updated to report derogatory information more immediately, this rule/policy may be updated to revise the every 5 year requirement. The costs of the investigations are borne by the DoD, and not by the individual or his or her employer or the State. This policy update does not and cannot mandate that State, local, and tribal governments adopt new, unfunded regulatory obligations.

- Privacy and Relevancy: Those in charge of the background checks are about to look at any other available information that is relevant (listed under Adjudication). I fear that some may abuse this and unfairly use information that is not so relevant against an applicant.

*Response:* Adjudicators are trained to appropriately assess information received as part of a background checks in accordance with law and policy. Individuals who abuse their access to information are not operating in accordance with laws, regulations and policies.

- Categorizing Care Provider, Providers, and Personnel performing duties in athletic programs: The definitions for these types of jobs can easily be stretched to many things (for example, could babysitting under certain circumstances count?). Child care or youth activities could mean so many things that do not necessarily require these extensive checks. My obvious hesitancy expressed in these comments and questions comes from my concern for costs for this rule as well as unfair burdens placed on individuals that may have a poor history, but a history that is unrelated to the wrongdoings that their guilt from these tests would be impliedly accusing them of, or a history that is simply in the past and different from their present state (for example a minor criminal record or drug use that has been overcome). It is honorable to aim to protect our children, but it is also important to protect our citizens and employees who are trying to live happy lives and contribute to the economy in the best ways that they can.

*Response:* The categories of individuals who require a criminal history background check, which includes all individuals who have regular contact with children under 18 years of age in DoD-sanctioned child care services programs, was established in accordance with Public Law 101-647 in order to protect the health and well-being of children in such programs. The costs of the specific investigations required pursuant to this rule have been

budgeted and are borne by the Department of Defense and not by the individual or his or her employer or the state.

- Lastly, it concerns me that the DoD Components will evaluate the disqualifications AND ALSO oversee procedures for the appeal of unfavorable determinations. This system has the potential to be unjust.

*Response:* There is an appeals process that individuals can pursue should they feel they have been treated unjustly. The DoD Components will establish and oversee procedures for the appeal of unfavorable determinations for all categories of individuals. The procedures for civilian personnel are subject to Volume 731 of DoDI 1400.25, DoD Civilian Personnel Management System.

*Comment ID DOD-2014-OS-0009-0009:* Under § 86.4(c), not only individuals who have current DoD affiliation but also individuals who have prior DoD affiliation must undergo an IRC. I am curious why this would be necessary. If a person no longer has an affiliation with the DoD and is not going to have contact with the DoD child care service, why go through the trouble of checking all those individuals with prior affiliation?

*Response:* Section 86.4(a) has been modified to include this requirement so that it is clear the IRC is only conducted if the individual (who has a prior DoD affiliation) is undergoing a background check because he/she will have regular contact with children in DoD child care services programs.

*Comment ID DOD-2014-OS-0009-0010:*

- Section 86.4 Policy does not contain any actual policy as to why these rules are being proposed. It would be helpful if the section included something pertaining to the importance of the protection of children from known child abusers, drug users etc. A specific policy will help when looking at what is important in conducting a background check (in example, a person with a former addiction who has undergone rehabilitation who has had no adverse contact with children.) Also, the policy will help the DoD in defending any appeals from potential employees who were denied employment.

*Response:* Section 86.4 has been updated with additional language indicating why the rule is being promulgated.

- A required amount of employment for a LOSS supervisor as an extra safeguard will also help promote the policy of the proposed rules.

*Response:* The role of the LOSS supervisor is to ensure that an individual who does not yet have a completed background check remains in the line of sight of another individual who does have a completed background check. The LOSS supervisor is not necessarily supervising the performance of the other individual; the LOSS supervisor is only ensuring that individual is not left alone with children.

*Comment ID DOD-2014-OS-0009-0011:* It seems as though we should require the caregivers themselves to pay for the background checks. It is not uncommon for employers to require employees to pay the costs associated with licensing or certifications.

*Response:* Background checks should not be compared to elective licenses and certifications. The costs of the specific investigations required pursuant to this Rule have been budgeted and are borne by the Department of Defense and not by the individual or his or her employer or the state. By law, background checks are required for federal agencies that hire or contract for hire in the provision of care to children under the age of 18. Per this Rule, Office of Personnel Management (OPM) is the only authorized Investigative Service Provider (ISP) that the Military Service Components may use for background investigations. Contracted support must meet the intent of this Rule, DoD policy and the law.

*Comment ID DOD-2014-OS-0009-0012:*

- Video surveillance violates a person's "expectation of privacy." It should be re-written to comply with the 5th Amendment. The procedure may be ruled unconstitutional as it currently stands.

*Response:* Signage and monitors are placed in highly visible entryways and foyers and inform individuals that video surveillance is being conducted. Video surveillance events occurring in public space for which individuals do not have reasonable expectations of privacy. Video surveillance does not intrude upon an individual's sphere of privacy; the use of video surveillance equipment (in designated programs) supports the law's intent for Line of Sight Supervision (LOSS) for individuals whose background checks have been initiated but not completed. Surveillance equipment is also used by staff trainers and managers as a training aid for staff observations and coaching.

- Procedures: Requirements for Criminal background checks. Foreign government background checks for employees working overseas has a 5th Amendment issue. How is an overseas

employee challenge the validity of a foreign background check? There may be procedural and language barriers that prevent a fair opportunity to exonerate oneself.

*Response:* The current rule provides basic guidance regarding background checks for foreign nationals as they relate to DoD child care services programs. See DoD Instruction 5200.46 for more detailed guidance on procedures for foreign nationals.

*Comment ID DOD-2014-OS-0009-0015:* Of course children of any parentage should be protected from criminals and potential harm via their caretakers; however this cost will most likely be substantial. Please consider you taxpayers when making these choices that can seem frivolous at times.

*Response:* The costs of the investigations are borne by the DoD, and not by the individual or his or her employer or the State. When contracting for services, the contract must ensure it meets the intent of this Rule and the Crime Control Act of 1990. This Rule is a top priority for DoD to ensure the safety and well-being of all children in DoD child care services programs. By law, background checks are required for federal agencies that hire, contract for hire or use volunteers for the provision of care to children under the age of 18.

*Comment ID DOD-2014-OS-0009-0016:* The Unfunded Mandates Reform Act states there will be no additional financial expenditures required from the individual or employer while the regulatory act acknowledges potential indirect costs to small entities. If this proposed rule is passed, it would be beneficial to clearly outline what constitutes a small entity, what course of action, if any, can they take to avoid costs, and what kind of notice will they have if they are affected by this rule. When it comes to implementing the rule, if passed, there needs to be guidelines for how businesses that may incur costs can go about managing the financial change comfortably. As a DoD organization, can these small entities expect to qualify for additional funds to offset these costs (costs unspecified at this moment)? If this rule is passed, it should clearly state what the dollar figure will be, and a definite yes or no about eligibility of offsetting the expenses via government funds. If the proposed rule is passed, how immediate will the new procedures effect these small entities? The rule should be altered to include the time frame for implementing the policy and allow organizations to communicate if they need additional accommodations to be effective in its implementation.

*Response:* DoD has certified that this rule would not have a significant economic impact on a substantial number of small entities because the costs for the investigation conducted pursuant to this rule are borne by the DoD, and not by the individual or his or her employer. Furthermore, any indirect costs incurred by small businesses as a result of this rule would be minimal.

*Comment ID DOD-2014-OS-0009-00017:* Not all agencies within individual states make their records available to commercial databases, nor does the FBI make its federal or state criminal records available to commercial services. In addition, the information in commercial databases may only be updated occasionally. Some states have databases that have not been updated to determine if the individual has any arrest history, therefore when a background check is being completed on a federal level, the record may not be current, and in turn, invalid information will be received on that individual. Most states allow criminals who have paid their dues, to erase their criminal records. Currently, 12 states expunge first-time criminal offenses after ex-convicts demonstrate a law-abiding lifestyle for 10 years.

*Response:* The rule requires multiple levels of investigation in order to ensure the most accurate information possible is captured during the investigation process. The DoD uses various data sources from federal, state and local authorities to obtain information on background investigations, credentialing, suitability determination and security clearances. The primary investigations include the Child Care National Agency Check and Inquiries; the FBI Identification Records check; the State Criminal History Repository Check; the state sex offender registry; the child abuse registry and an Installations Records Check (IRC Derogatory information is identified through this multi-tier investigative process). The Department remains committed in its efforts to ensure those who work with children meet the highest standards of conduct.

*Comment ID DOD-2014-OS-0009-00018:*

- Will background checks be conducted on the current staff on hand first? Will there be a set time frame to complete the background check? For example, each person attempting to gain employment has a 4–6 month waiting period, prior to a hire date? I know firsthand that some background checks can take a very long time ranging from 4 months to 12 months depending on the individual and their circumstances.

*Response:* This rule does not create a new system. It updates existing policy for background checks. The provision to work under LOSS allows DoD to employ individuals while the background checks are being completed.

- Has the DoD considered how criminal histories are not always current or may have mistakes? A person may have committed a crime, even serious in nature, but the individual may take a plea, and with 12 months good behavior it may be expunged from their record. Are there any plans or a step to assist with this process? Has the DoD considered using public Web site searches to assist with this process such as Facebook, Instagram, YouTube, Twitter, etc. to gain more information on that particular individual? Using open source information may quickly display a person behaviors, likes, dislikes, etc., is a cheaper option, and may take only ten minutes depending on what the DoD discovers.

*Response:* DoD requirements outlined in this rule make use of available legal sources of investigative information to make determinations about individuals' suitability for employment in DoD child care services programs.

*Comment ID DOD-2014-OS-0009-00022:* I am in support of this proposed rule, but to accomplish greater safeguarding of children as intended, subcontractors should not be excluded as stated. DoD contracts are typically performed by subcontractors who actually perform work around the children, not the prime contractors.

*Response:* The exclusion of subcontractors has been deleted from the definition of contractors.

*Comment ID DOD-2014-OS-0009-00024:* The comment urges the DoD to update requirements for criminal background checks on individuals in DoD child care services programs in § 86.5, Responsibilities to align with the provisions recently enacted by the Child Care and Development Block Grant Act of 2014.

*Response:* We have carefully reviewed the requirements of the proposed rule and the requirements set forth in Public Law 113–186, the Child Care and Development Block Grant Act of 2014. This rule meets or exceeds the requirements of the Child Care and Development Block Grant Act of 2014. We have determined that, while the language of the rule differs slightly from the language of Public Law 113–186, the databases searched yield the same information.

#### Regulatory Analysis

Executive Order 12866, “Regulatory Planning and Review” and Executive

Order 13563, “Improving Regulation and Regulatory Review” direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. This rule has been determined to be a significant regulatory action, although not economically significant, under section 3(f) of Executive Order 12866. Accordingly, the rule has been reviewed by the Office of Management and Budget (OMB).

#### *Sec. 202, Public Law 104–4, “Unfunded Mandates Reform Act”*

DoD has reviewed the rule in accordance with the Unfunded Mandates Reform Act of 1995, and compliance with the rule would require no additional expenditures by either public or private employers. In sum, the final rule does not mandate that State, local, and tribal governments adopt new, unfunded regulatory obligations. The costs of the investigations conducted pursuant to this rule are borne by the DoD, and not by the individual or his or her employer.

#### *Public Law 96–354, “Regulatory Flexibility Act” (5 U.S.C. 601)*

We certify this rule would not have a significant economic impact on a substantial number of small entities because the costs for the investigation conducted pursuant to this rule are borne by the DoD, and not by the individual or his or her employer. Furthermore, any indirect costs incurred by small businesses as a result of this rule would be minimal. Accordingly, a regulatory flexibility analysis as provided in the Regulatory Flexibility Act, as amended, is not required.

#### *Public Law 96–511, “Paperwork Reduction Act” (44 U.S.C. Chapter 35)*

This rule imposes reporting and record keeping requirements under the Paperwork Reduction Act of 1995. These requirements have been approved by the Office of Management and Budget and assigned OMB Control Number 3206–0005, “Questionnaires for National Security Positions, Standard Form 86 (SF 86),” OMB Control Number 3206–0261, “SF 85 Questionnaire for Non-Sensitive Positions,” OMB Control Number 3206–0191, “SF 85P Questionnaire for Public Trust Positions,” and OMB Control Number

0704–0516, “Child Care Development Program (CDP) Criminal History.”

*Executive Order 13132, “Federalism”*

This rulemaking was analyzed in accordance with the principles and criteria contained in Executive Order 13132 (“Federalism”). It has been determined that it does not have sufficient Federalism implications to warrant the preparation of a Federalism summary impact statement. This rulemaking has no substantial effect on the States, or on the current Federal-State relationship, or on the current distribution of power and responsibilities among the various local officials. Nothing in this document preempts any State law or regulation. Therefore, DoD did not consult with State and local officials because it was not necessary.

**List of Subjects in 32 CFR Part 86**

Government contracts, Government employees, Infants and children, Investigations.

Accordingly, 32 CFR part 86 is revised to read as follows:

**PART 86—BACKGROUND CHECKS ON INDIVIDUALS IN DOD CHILD CARE SERVICES PROGRAMS**

Secs.

- 86.1 Purpose.
- 86.2 Applicability.
- 86.3 Definitions.
- 86.4 Policy.
- 86.5 Responsibilities.
- 86.6 Procedures.

**Authority:** 5 U.S.C. 2105, 10 U.S.C. chapter 47, and 42 U.S.C. 13041.

**§ 86.1 Purpose.**

This part establishes policy, assigns responsibilities, and provides procedures to conduct criminal history checks on individuals involved in the provision of child care services for children under the age of 18 in DoD programs.

**§ 86.2 Applicability.**

This part applies to the Office of the Secretary of Defense, the Military Departments, the Office of the Chairman of the Joint Chiefs of Staff and the Joint Staff, the Combatant Commands, the Office of the Inspector General of the Department of Defense, the Defense Agencies, the DoD Field Activities, and all other organizational entities within the DoD (referred to collectively in this part as the “DoD Components”).

**§ 86.3 Definitions.**

Unless otherwise noted, these terms and their definitions are for the purposes of this part.

*Adjudication.* The evaluation of pertinent data in a background investigation, as well as any other available information that is relevant and reliable, to determine whether an individual is suitable for work.

*Adult.* An individual 18 years of age or older regarded in the eyes of the law as being able to manage his or her own affairs.

*Applicant.* A person upon whom a criminal history background check is, will be, or has been conducted, including individuals who have been selected or are being considered for a position subject to a criminal history background check, and individuals undergoing a recurring criminal history background check. Includes current employees.

*Child.* A person under 18 years of age.

*Care provider.* Current or prospective individuals hired with appropriated funds (APF) and nonappropriated funds (NAFs) for education, treatment or healthcare, child care or youth activities; individuals employed under contract who work with children; and those who are certified for care. Individuals working within programs that include: Child Development Programs, DoD dependents schools, DoD-operated or -sponsored activities, foster care, private organizations on DoD installations, and youth programs.

*Child care services.* Care or services provided to children under the age of 18 in settings including child protective services (including the investigation of child abuse and neglect reports), social services, health and mental health care, child (day) care, education (whether or not directly involved in teaching), foster care, residential care, recreational or rehabilitative programs, and detention, correctional, or treatment services, as defined in 42 U.S.C. 13041.

*Class.* With regard to the designation of positions, a categorical descriptor identifying employee, contractor, provider, or volunteer positions by group rather than by individual position or title (e.g., “doctors” or “individuals supervising children in a school”).

*Contractor.* Any individual, firm, corporation, partnership, association, or other legal non-Federal entity that enters into a contract directly with DoD or a DoD Component to furnish supplies, services, or both including construction. Foreign governments or representatives of foreign governments that are engaged in selling to DoD or a DoD Component are defense contractors when acting in that context. A subcontractor is any supplier, distributor, vendor, or firm that furnishes supplies or services to or for

a prime contractor or another subcontractor.

*Covered position.* Defined in volume 731 of DoD Instruction 1400.25, “DoD Civilian Personnel Management System” (available at <http://www.dtic.mil/whs/directives/corres/pdf/140025v731.pdf>).

*Criminal history background checks.*

A review of records, investigative reports, and other investigative elements to generate criminal history background findings to be used to make fitness or suitability determinations.

*Derogatory information.* Information that may reasonably justify an unfavorable personnel suitability or fitness determination because of the nexus between the issue or conduct and the core duties of the position.

*DoD affiliation.* A prior or current association, relationship, or involvement with the DoD or any elements of DoD, including the Military Departments.

*DoD-sanctioned programs.* Any program, facility, or service funded, or operated by the DoD, a Military Department or Service, or any agency, unit, or subdivision thereof. Examples include, but are not limited to, chapel programs, child development centers, family child care (FCC) programs, medical treatment facilities, Department of Defense Education Activity (DoDEA) schools, recreation and youth programs. These do not include programs operated by other State or Federal government agencies or private organizations without the official sanction of a DoD entity.

*Duties.* Those activities performed as an employee, contractor, provider, or volunteer that involve interaction with children, including any work performed in a child development program or DoDEA school.

*Employee.* An individual, paid from funds appropriated by the Congress of the United States, or an individual employed by a NAF instrumentality in accordance with 5 U.S.C. 2105(c). Includes foreign nationals in accordance with Volume 1231 of DoD Instruction 1400.25, “DoD Civilian Personnel Management System” (available at <http://www.dtic.mil/whs/directives/corres/pdf/1400.25-V1231.pdf>), Military Service members working during their off-duty hours, and non-status, non-continuing temporary positions with specified employment periods not to exceed 1 year such as summer hires, student interns, and seasonal hires.

*FAP.* Defined in DoD Directive 6400.1, “Family Advocacy Program (FAP)” (available at <http://www.dtic.mil/whs/directives/corres/pdf/640001p.pdf>).

**FAP records check.** A review of FAP records maintained on an individual, including records maintained by the installation office and records in the Service Child and Spouse Abuse Central Registry in accordance with DoD Directive 6400.1. If the individual is the spouse or dependent of a Service member, this may entail review of records maintained on the sponsoring Service member. Installation and Service Central Registry checks are limited to identifying pending and met criteria incidents of maltreatment and do not include information related to incidents that did not meet criteria or any information contained in the clinical case record that is protected by section 1320d-6 or 5 U.S.C. 552a.

**Federal Bureau of Investigation (FBI) criminal history background check.** An FBI identification record—often referred to as a criminal history record or a “rapsheet”—is a listing of certain information taken from fingerprint submissions retained by the FBI in connection with arrests and, in some instances, federal employment, naturalization, or military service. The process of responding to an identification record request is generally known as a criminal history background check.

**FCC.** Defined in DoD Instruction 6060.2, “Child Development Programs (CDPs)” (available at <http://www.dtic.mil/whs/directives/corres/pdf/606002p.pdf>).

**FCC provider.** Defined in DoD Instruction 6060.2.

**FCC adult family members.** Any adult, 18 years of age or older, who resides in the home of an FCC provider for 30 or more consecutive days.

**Fitness.** The reference to a person’s level of character and conduct determined necessary for an individual to perform work for, or on behalf of, a Federal Agency as an employee in the excepted service (other than in a position subject to suitability) or as a contractor employee.

**Fitness determination.** A decision, based on review of criminal history background check findings, that an individual is fit to perform duties in a position subject to criminal history background check. Fitness determinations will be “favorable,” meaning that the individual is fit to perform the duties, or “unfavorable,” meaning that the individual is not.

**Foreign nationals.** Individuals who are not citizens of the United States.

**Foster care providers.** A voluntary or court-mandated program that provides 24-hour care and supportive services in a family home or group facility, within government-owned or -leased quarters,

for children and youth who cannot be properly cared for by their own family.

**Healthcare personnel.** Military, civilian, or contract staff involved in the delivery of healthcare services.

**Host-government check.** A criminal history background check conducted on foreign nationals in accordance with U.S. and host country treaties or agreements.

**Interim suitability or fitness determination.** Part of the pre-screening process in the identification and resolution of suitability or fitness issues, which occurs prior to the initiation of the required investigation. It involves the review of applications and other employment related documents. A favorable interim suitability or fitness determination is a status granted on a temporary basis, which permits individuals to work under line-of-sight supervision (LOSS) after the return of the advance FBI fingerprint check, pending completion of full investigative requirements and a final suitability determination.

**Investigative elements.** The records, reports, or other individual elements that comprise the whole of information collected during a criminal history background check and used to make a fitness or suitability determination.

**Installations records check (IRC).** A query of records maintained on an individual by programs and entities at the military installation where the individual lives, is assigned, or works, including military law enforcement and installation security records, drug and alcohol records, and FAP records for a minimum of 2 years before the date of the application.

**Investigative service provider (ISP).** The company or agency authorized to perform background investigations on personnel on behalf of the agency.

**Line of Sight Supervision (LOSS).** Continuous visual observation and supervision of an individual whose background check has not yet cleared, and has a favorable interim suitability or fitness determination, while engaged in child interactive duties, or in the presence of children in a DoD-sanctioned program or activity. The person providing supervision must have undergone a background check and received a final favorable suitability or fitness determination and be current on all periodic reinvestigations as required by this part.

**Met criteria.** Reported incident of alleged maltreatment found to meet DoD incident determination criteria for child abuse or domestic abuse and entry into the Service FAP central registry of child abuse and domestic abuse reports.

**Position.** An employee, contractor, provider, or volunteer role or function.

**Preliminary investigations.** Those investigative elements of a criminal history background check, including those specified in § 86.6(f), which must be favorably completed and reviewed before an individual may be permitted to perform duties under LOSS.

**Providers.** Individuals involved in child care services who have regular contact with children or may be alone with children in the performance of their duties. Includes FCC providers and individuals with overall management responsibility for child and youth programs.

**Regular contact with children.** Recurring and more than incidental contact with or access to children in the performance of their duties on a DoD installation, program, or as part of a DoD-sanctioned activity.

**Reinvestigation.** A criminal history background check conducted after the period of time prescribed by this part to ensure the individual remains eligible to provide child care services. Reinvestigation includes the same checks conducted for the initial investigation as outlined in § 86.6(b).

**Respite care providers.** Individuals who provide short-term care and supportive services in a family home or group facility within government-owned or -leased quarters.

**State criminal history repository (SCHR).** A repository of criminal information that lists past state convictions, current offender information, and criminal identification information (fingerprints, photographs, and other information or descriptions) that identify a person as having been the subject of a criminal arrest or prosecution. Checks of the SCHR may include the State child abuse and neglect repository and the State sex offender registry.

**Suitability determination.** A decision that a person is or is not suitable for a covered position within the DoD.

**Supervisor.** The person supervising individuals who are permitted to perform duties only under LOSS, who is not necessarily the same as an employee’s supervisor for employment purposes (e.g., ratings, assignment of duties).

**Volunteer.** There are two types of volunteers:

(1) **Specified volunteers.** Individuals who could have extensive or frequent contact with children over a period of time. They include, but are not limited to, positions involving extensive interaction alone, extended travel, or overnight activities with children or youth. Coaches and long-term

instructors are among those who fall in this category. Specified volunteers are designated by the DoD Component head. Background checks are required in accordance with § 86.6(b)(4).

(2) *Non-specified volunteers.*

Individuals who provide services that are shorter in duration than is required to perform a criminal history background check (e.g., one-day class trip, class party). Because non-specified volunteers do not receive the same level of background checks as specified volunteers, non-specified volunteers must always be in line of sight of a staff member with a complete background check.

*Youth program.* Defined in DoD Instruction 6060.4, "Department of Defense (DoD) Youth Programs (YPs)" (available at <http://www.dtic.mil/whs/directives/corres/pdf/606004p.pdf>).

**§ 86.4 Policy.**

It is DoD policy that:

(a) Individuals who have regular contact with children under 18 years of age in DoD-sanctioned child care services programs will undergo a criminal history background check in order to protect the health, safety and well-being of children in such programs.

(b) All individuals who have regular contact with children under 18 years of age in DoD-sanctioned child care services programs and who also have a current or prior DoD affiliation must also undergo an IRC.

(c) DoD Component heads are delegated the authority to make suitability determinations and take subsequent actions in cases involving applicants and appointees to covered positions as defined by 5 CFR 731.101, subject to the conditions in 5 CFR 731.103. This authority may be further delegated to authorized management officials, in writing, in accordance with volume 731 of DoD Instruction 1400.25.

(1) The DoD Consolidated Adjudications Facility is responsible for making favorable suitability determinations for civilian personnel in accordance with Deputy Assistant Secretary of Defense for Civilian Personnel and Policy Memorandum, "Responsibilities Under the Department of Defense Suitability and Fitness Adjudications for Civilian Employees Programs," August 26, 2013.

(2) Military members are not subject to suitability adjudication under Volume 731 of DoD Instruction 1400.25, "DoD Civilian Personnel Management System" (available at <http://www.dtic.mil/whs/directives/corres/pdf/140025v731.pdf>). Military members are subject to the background check requirements of DoD Instruction

5200.02, "Personnel Security Program" (available at [http://www.dtic.mil/whs/directives/corres/pdf/520002\\_2014.pdf](http://www.dtic.mil/whs/directives/corres/pdf/520002_2014.pdf)) and § 86.6.

(d) Suitability and fitness determinations for individuals subject to this part will follow the guidance of Volume 731 of DoD Instruction 1400.25 for APF employees and Subchapter 1403 of DoD Instruction 1400.25 for NAF employees. Suitability and fitness are to be applied for the child care worker population in accordance with Volume 731 of DoD Instruction 1400.25 for appropriated fund employees in covered positions as defined by 5 CFR part 731.

(e) Individuals who have received a favorable interim suitability or fitness determination based on the FBI criminal history background check are permitted to work under LOSS pursuant to 42 U.S.C. 13041(b)(3).

**§ 86.5 Responsibilities.**

(a) Under the authority, direction, and control of the Under Secretary of Defense for Personnel and Readiness (USD(P&R)), the Assistant Secretary of Defense for Readiness and Force Management (ASD(R&FM)):

(1) Ensures the conduct of criminal history background checks complies with DoD policy and the Criminal Justice Information Services Division of the FBI's operational and security policies and procedures.

(2) Monitors DoD Component compliance with this part, applicable laws, and subsequent guidance issued by the applicable ISP.

(b) Under the authority, direction, and control of the ASD(R&FM), the Deputy Assistant Secretary of Defense for Civilian Personnel Policy (DASD(CPP)) oversees development of DoD Component policies and procedures for the background check initiation, completion, adjudication, and suitability or fitness determination process for civilian employees in accordance with this part.

(c) Under the authority, direction, and control of the ASD(R&FM), the Deputy Assistant Secretary of Defense for Military Community and Family Policy (DASD(MC&FP)) oversees development of DoD Component policies and procedures related to the background check initiation, completion, adjudication, and fitness determination process for specified volunteers, FCC providers and adults residing in their home, and others as identified in accordance with this part.

(d) Under the authority, direction, and control of the ASD(R&FM), the Deputy Assistant Secretary of Defense for Military Personnel Policy (DASD(MPP)):

(1) Implements this part for military personnel in accordance with DoD Instruction 5200.02.

(2) Institutes effective quality assurance and quality control systems for chaplains, support staff, specified volunteers, and contractors who provide support to religious programs and activities identified in § 86.6(a)(5)(v) and in accordance with this part.

(e) Under the authority, direction, and control of the Deputy Chief Management Officer (DCMO) of the Department of Defense, the Director of Administration ensures that the adjudication of background investigations of individuals who have regular contact with children under 18 years of age in DoD-sanctioned programs considers the criteria for presumptive and automatic disqualification as specified in this part.

(f) The Under Secretary of Defense for Acquisition, Technology, and Logistics (USD(AT&L)) establishes policies and procedures for the background check initiation, completion, adjudication, and fitness determination process for contractors in accordance with the requirements of this part.

(g) The DoD Component heads:

(1) Ensure Component compliance with the requirements of this part, applicable laws, and guidance for civilian employees.

(2) Ensure compliance with suitability and fitness determination policies, requirements, and procedures for individuals in child care services in DoD programs as defined in 42 U.S.C. 13041 and DoD Instruction 1400.25.

(3) Ensure compliance with policies, requirements, and procedures for LOSS of individuals with a favorable interim suitability determination.

(4) Provide support and resources as required to implement this part and any Component-specific policies, requirements, and procedures, and ensure implementation.

**§ 86.6 Procedures.**

(a) *Requirements for criminal history background checks.* (1) All criminal history background checks required by this part must be initiated, tracked, and overseen by properly trained and vetted individuals who have been determined to be responsible for personnel security pursuant to DoD Instruction 5200.02 or human resource functions pursuant to Volume 731 of DoD Instruction 1400.25. Program managers, supervisors, and others not routinely performing personnel security and human resource functions are prohibited from managing the criminal history checks.

(2) All employment applications completed by individuals subject to this

part must comply with the requirements of 42 U.S.C. 13041(d).

(3) The DoD Component will ensure that only authorized ISPs are used.

(4) When permitted by the host government, foreign government checks of individuals serving on DoD installations overseas must be requested directly by the employing Military Service or agency in accordance with Volume 1231 of DoD Instruction 1400.25. As an alternative, DoD Components may request that overseas Military Service investigative elements obtain appropriate host-government checks and accept such checks if they are comparable to those required by 42 U.S.C. 13041. Where it is not possible to obtain criminal history checks comparable to those required by 42 U.S.C. 13041, foreign nationals will not be eligible for employment in child care services.

(5) Individuals subject to criminal history background checks are:

(i) All personnel employed or performing duties in DoD Child and Youth or other sanctioned child care services programs.

(ii) Individuals providing in-home FCC.

(iii) Personnel employed or performing duties in child and youth recreational and athletic programs (e.g., Morale, Welfare, and Recreation), including instructors and, when working in a facility when children and youth are present, custodial personnel.

(iv) Individuals employed or performing duties in a DoDEA school (whether or not directly involved with teaching), including but not limited to teachers, administrators, other professional staff, aides, bus drivers, janitors, cafeteria workers, nurses, and attendants.

(v) Chaplains, chaplains' assistants, religious program specialists, and other individuals employed or performing child care services duties for children under 18 years of age on a DoD installation or as part of a military-sanctioned program.

(vi) Foster and respite child care providers on a DoD installation, program, or as part of a military-sanctioned activity.

(vii) Health and mental health care personnel, employed or performing child care services duties on a DoD installation, in a DoD sanctioned program, or as part of a military-sanctioned activity, including but not limited to physicians, dentists, nurse practitioners, clinical social workers, physical therapists, speech-language pathologists, clinical support staff (including residents), registered nurses, licensed practical nurses, nursing

assistants, play therapists, and technicians.

(viii) Individuals employed or performing child care duties in social services, residential care, rehabilitation programs, detention, and correctional services on a DoD installation, program, or as part of a military-sanctioned activity.

(ix) Any other individuals reasonably expected to have regular contact with children on a DoD installation, in a DoD sanctioned program, or as part of a military-sanctioned activity, including specified volunteers and any person 18 years of age or older residing in an FCC, foster, or respite care home. Healthcare providers participating in TRICARE shall be governed by TRICARE policy.

(6) The DoD Components will also determine any other classes of positions subject to criminal history background checks, taking care to ensure that all individuals who have regular contact with children when providing child care services are investigated and the requirement must pertain to the class as a whole.

(7) Individuals designated in non-specified volunteer positions must always be under direct LOSS in accordance with paragraph (g) of this section.

(b) *Types of background checks.* Procedures for conducting a background check on individuals in paragraphs (a)(5)(i) through (ix) of this section differ based on the employment status of the individual. Military members are subject to the background check requirements of DoD Instruction 5200.02 and this section. The FBI criminal history background checks for all categories of individuals must be fingerprint-based and fingerprints must be captured using an FBI-approved system. SCHR checks may require hardcopy fingerprint submissions. State checks must include the state child abuse and neglect repository and the state sex offender registry. The Component must request a check of the state child abuse and neglect repository and the State sex offender registry if they are not automatically checked as part of the standard SCHR check.

(1) *Criminal history background checks for DoD civilian and military personnel who are investigated at the NACI or a higher level pursuant to DoD's personnel security program.* (i) DoD civilian and military personnel required by DoD Instruction 5200.02 to be investigated according to the requirements of the National Agency Check and Inquiries (NACI) or a higher level investigation and who have regular contact with children under 18 years of age in DoD-sanctioned programs will be

investigated and adjudicated in accordance with the provisions of DoD Instruction 5200.02.

(ii) These personnel will also be subject to the additional requirements of the Child Care National Agency Check and Inquiries (CNACI) and the criteria for presumptive and automatic disqualification as specified in paragraph (c) of this section.

(2) *Criminal history background checks for civilian employees (APF and NAF).* (i) In accordance with 42 U.S.C. 13041 and Volume 731 and Subchapter 1403 of DoD Instruction 1400.25, complete a CNACI, which includes an FBI criminal history background check conducted through the Criminal Justice Information Services Division of the FBI and SCHR checks through State repositories of all States that an employee or prospective employee lists as current and former residences on an employment application. Results of an advanced FBI fingerprint check must be provided before completion of the full CNACI to determine employment under LOSS.

(ii) Individuals with a prior DoD affiliation must also complete an IRC, which includes an installation law enforcement check, drug and alcohol records check, and a check of the Family Advocacy Program (FAP) records for a minimum of 2 years before the date of the application.

(3) *Criminal history background checks for FCC providers and contractors.* (i) In accordance with 42 U.S.C. 13041, complete a CNACI, which includes an FBI criminal history background check conducted through the Criminal Justice Identification Services Division of the FBI and SCHR checks through State repositories of all States that a provider or contractor or prospective provider or contractor lists as current and former residences in an employment application. Results of an advanced FBI fingerprint check must be provided before completion of the full CNACI. Results for contractors may be used to determine employment under LOSS.

(ii) Individuals with a prior DoD affiliation must also complete an IRC, including an installation law enforcement check, drug and alcohol records check, and a check of the FAP records for a minimum of 2 years before the date of the application.

(4) *Criminal history background checks for others.* (i) In accordance with 42 U.S.C. 13041, only an FBI advanced fingerprint check is required for criminal history background checks for volunteers and persons 18 years of age or older residing in an FCC, foster, or respite care home.

(ii) Individuals with a prior DoD affiliation must also complete an IRC to include: an installation law enforcement check, drug and alcohol records check, and a check of the FAP records for a minimum of 2 years before the date of the application.

(5) *Timely completion.* To ensure timely completion, the DoD Components will establish procedures to initiate or request criminal history background check results, follow up to ensure checks have been completed, and address situations where there is a delay in receiving results. In no event will an individual subject to this part be presumed to have a favorable background check merely because there has been a delay in receiving the results of the requisite background check. If no response from the state(s) is received within 60 days, determinations based upon the CNACI report may be made.

(c) *Criteria for disqualification based on results on criminal history background checks.* The ultimate decision to determine how to use information obtained from the criminal history background checks in selection for positions involving the care, treatment, supervision, or education of children must incorporate a common sense decision based upon all known facts. Adverse information is evaluated by the DoD Component who is qualified at the appropriate level of command in interpreting criminal history background checks. All information of record both favorable and unfavorable will be assessed in terms of its relevance, recentness, and seriousness. Likewise, positive mitigating factors should be considered. Final suitability decisions shall be made by that commander or designee. Criteria that will result in disqualification of an applicant require careful screening of the data. A disqualifying event may be the basis for a non-selection, withdrawal of a tentative offer of employment, ineligibility for facility access, removal from a contract, a suitability action under 5 CFR part 731, a probationary termination, an adverse action, or other appropriate action.

(1) *Criteria for automatic disqualification.* No person, regardless of circumstances, will be approved to provide child care services pursuant to this part if the background check discloses:

(i) That the individual has been convicted in either a civilian or military court (to include any general, special or summary court-martial conviction) or received non-judicial punishment (under Article 15 or chapter 47 of Title 10, U.S.C., also known and referred to in this part as “the Uniform Code of

Military Justice (UCMJ)”) for any of the following:

(A) A sexual offense.

(B) Any criminal offense involving a child victim.

(C) A felony drug offense.

(ii) That the individual has been held to be negligent in a civil adjudication or administrative proceeding concerning the death or serious injury to a child or dependent person entrusted to the individual’s care.

(2) [Reserved]

(d) *Suitability and fitness determinations for individuals involved with the provision of child care services.* Suitability and fitness determinations for individuals subject to this part will be made in accordance with Volume 731, Volume 1231, and Subchapter 1403 of DoD Instruction 1400.25, and part 1201 of 5 U.S.C., as appropriate. The following may be the basis for non-selection, withdrawal of a tentative offer of employment, ineligibility for facility access, removal from a contract, a suitability action under DoD Instruction 1400.25, a probationary termination, an adverse action, or other appropriate action.

(1) *Criteria for presumptive disqualification.* Officials charged with making determinations pursuant to this part must include in the record a written justification for any favorable determination made where background check findings include any of the following presumptively disqualifying information:

(i) A FAP record indicating that the individual met criteria for child abuse or neglect or civil adjudication that the individual committed child abuse or neglect.

(ii) Evidence of an act or acts by the individual that tend to indicate poor judgment, unreliability, or untrustworthiness in providing child care services.

(iii) Evidence or documentation of the individual’s past or present dependency on or addiction to any controlled or psychoactive substances, narcotics, cannabis, or other dangerous drug without evidence of rehabilitation.

(iv) A conviction, including any general, special, or summary court-martial conviction, or non-judicial punishment under Article 15 of the UCMJ for:

(A) A crime of violence committed against an adult.

(B) Illegal or improper use, possession, or addiction to any controlled or psychoactive substances, narcotics, cannabis, or other dangerous drug.

(v) A civil adjudication that terminated the individual’s parental

rights to his or her child, except in cases where the birth parent places his or her child for adoption.

(2) *Evaluation of presumptively disqualifying information.* The DoD Components will establish and oversee procedures for the evaluation of presumptively disqualifying information for all categories of individuals in paragraph (b) of this section. Evaluation of presumptively disqualifying information for APF and NAF personnel must be in accordance with Volume 731 and Subchapter 1403 of DoD Instruction 1400.25, respectively.

(3) *Criteria for disqualification under LOSS.* If an investigation of an individual who is currently working under LOSS subsequently results in an unfavorable determination, the DoD Components will take action to protect children by reassigning or removing the individual from employment, contract, or volunteer status.

(4) *Disputes and appeals.* The DoD Components will establish and oversee procedures for the communication of determinations and the appeal of unfavorable determinations for all categories of individuals in paragraph (b) of this section. The procedures for civilian personnel are subject to Volume 731 of DoD Instruction 1400.25 for APF employees and Subchapter 1403 of DoD Instruction 1400.25 for NAF employees.

(e) *Reinvestigation.* (1) All DoD civilian employees (both APF and NAF), contractors, military personnel, and any other individuals reasonably expected to have regular contact with children on a DoD installation, program, or as part of a military-sanctioned activity, including specified volunteers and any person 18 years of age or older residing in an FCC, foster, or respite care home, who continue to perform duties in the position for which their initial background check was conducted, must undergo a reinvestigation every 5 years. The reinvestigation must consist of the same check conducted for the initial investigation as outlined in paragraph (b) of this section.

(2) All FCC providers and adults residing in an FCC home must undergo an annual reinvestigation utilizing the Special Agreement Check (SAC) for childcare providers. The SAC reinvestigation consists of an update to the initial investigation as outlined in paragraph (b) of this section.

(3) If the reinvestigation results in an unfavorable determination, the DoD Components will take action to protect children by reassigning or removing the individual from employment, contract, or volunteer status.

(4) If derogatory information surfaces within the 5 years before the reinvestigation, the DoD Component will take action to protect children by reassigning or suspending from having contact with children, any individual, contractor or volunteer until the case is resolved.

(f) *Self-reporting.* (1) Individuals who have regular contact with children under 18 years of age in DoD-sanctioned programs who have a completed background check are required to immediately report subsequent automatic disqualification criteria under paragraph (c)(1) of this section and presumptive disqualification criteria under paragraphs (c)(2)(i), (iv), and (v) of this section.

(2) The DoD Components will establish procedures for:

(i) Informing individuals of the requirement to immediately report any incident or conviction that may invalidate their prior background check and make them ineligible to work or have contact with children.

(ii) Responding to and evaluating reports made by such individuals, and taking appropriate action until the case has been resolved or closed.

(g) *Eligibility to perform duties under LOSS.* The DoD Components will establish Component-specific procedures, policies, and requirements, subject to the requirements of this paragraph, to permit applicants for whom a criminal history background check has been initiated but not yet completed, to perform duties under LOSS upon favorable findings of preliminary investigations.

(1) *No presumption of right.* No individual will be permitted to perform duties under LOSS in a position subject to criminal history background check without authorizing policy or other written permission from a DoD Component head.

(2) *Preliminary investigations required.* No individual will be permitted to perform duties under LOSS in a position subject to criminal history background check unless the following investigative elements have been reviewed and determined favorably:

(i) An IRC, including installation law enforcement records check, drug and alcohol records, and FAP records check for a minimum of 2 years before the date of the application if the individual has a preexisting DoD affiliation.

(ii) Initial results from the advanced FBI fingerprint criminal history background check (not the full check).

(3) *Exception for non-specified volunteers.* Due to the controlled, limited duration of an activity for these individuals, an advanced FBI

fingerprint criminal history background check is not required. Non-specified volunteers will be permitted to perform duties and services under LOSS for the duration of the activity.

(4) *Supervisor requirements.* The supervisor must be a person who:

(i) Has undergone and successfully completed the required background check.

(ii) Has complied, as required, with the periodic reinvestigation requirement for a recurring criminal history background check.

(iii) Has not previously exhibited reckless disregard for an obligation to supervise an employee, contractor, or volunteer.

(5) *Video surveillance.* The use of video surveillance equipment to provide temporary oversight for individuals whose required background checks have been initiated but not completed is acceptable provided it is continuously monitored by an individual who has undergone and successfully completed all required background checks. This provision shall meet the intent of a flexible and reasonable alternative for "direct sight supervision."

(6) *Conspicuous identification of individuals subject to LOSS.* Individuals permitted to perform duties solely under LOSS must be conspicuously marked by means of distinctive clothing, badges, wristbands, or other visible and apparent markings. The purpose of such markings must be communicated to staff, customers, parents, and guardians by conspicuous posting or printed information.

(7) *Permissible performance of duties without supervision.* Individuals otherwise required to perform duties only under LOSS may perform duties without supervision if:

(i) Interaction with a child occurs in the presence of the child's parent or guardian;

(ii) Interaction with children is in a medical facility, subject to supervisory policies of the facility, and in the presence of a mandated reporter of child abuse; or

(iii) Interaction is necessary to prevent death or serious harm to the child, and supervision is impractical or unfeasible (e.g., response to a medical emergency, emergency evacuation of a child from a hazardous location).

Dated: September 11, 2015.

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

#### 33 CFR Part 117

[Docket No. USCG-2015-0849]

#### Drawbridge Operation Regulations; New Jersey Intracoastal Waterway, Atlantic City, NJ and Delaware River, Delair, NJ

**AGENCY:** Coast Guard, DHS.

**ACTION:** Notice of deviation from drawbridge regulations.

**SUMMARY:** The Coast Guard has issued a temporary deviation from the operating schedules that govern the AMTRAK Bridge over Beach Thorofare, New Jersey Intracoastal Waterway, mile 68.9, at Atlantic City, NJ, and the AMTRAK Bridge over Delaware River, mile 104.6, at Delair, NJ. This deviation allows the bridges to remain in the closed-to-navigation position to facilitate the 2015 Papal Visit to Philadelphia, PA.

**DATES:** This deviation is effective from 5 a.m. on September 26, 2015, to 3 a.m. on September 28, 2015.

**ADDRESSES:** The docket for this deviation, [USCG-2015-0849], is available at <http://www.regulations.gov>. Type the docket number in the "SEARCH" box and click "SEARCH". Click on Open Docket Folder on the line associated with this deviation. You may also visit the Docket Management Facility in Room W12-140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this temporary deviation, call or email Mr. Hal R. Pitts, Bridge Administration Branch Fifth District, Coast Guard; telephone (757) 398-6222, email [Hal.R.Pitts@uscg.mil](mailto:Hal.R.Pitts@uscg.mil). If you have questions on viewing the docket, call Cheryl Collins, Program Manager, Docket Operations, telephone 202-366-9826.

**SUPPLEMENTARY INFORMATION:** The New Jersey Transit, who owns and operates the AMTRAK Bridge over Beach Thorofare and AMTRAK Bridge over Delaware River, has requested a temporary deviation from the current operating regulations set out in 33 CFR 117.733(d) and 117.716, respectively, to facilitate movement of trains during the 2015 Papal Visit to Philadelphia, PA.

Under the normal operating schedule for the AMTRAK Bridge over Beach

Thorofare, New Jersey Intracoastal Waterway, mile 68.9, at Atlantic City, NJ; the bridge shall open on signal from 11 p.m. to 6 a.m.; from 6 a.m. to 11 p.m., open on signal from 20 minutes to 30 minutes after each hour and remain open for all waiting vessels; opening of the draw may be delayed for ten minutes except as provide in 33 CFR 117.31(b); However, if a train is moving toward the bridge and has crossed the home signal for the bridge before the signal requesting the opening of the bridge is given, that train may continue across the bridge and must clear the bridge interlocks before stopping. Under the normal operating schedule for the AMTRAK Bridge over Delaware River, mile 104.6, at Delair, NJ, the bridgneed not open when there is a train in the bridge block approaching the bridge with the intention of crossing, or within five minutes of the known time of the passage of a scheduled passenger train; the opening of a bridge may not be delayed for more than 10 minutes, after the signal to open is given. The vertical clearances in the closed-to-navigation position of the AMTRAK Bridge over Beach Thorofare and AMTRAK Bridge over Delaware River are 5 feet and 49 feet, respectively, above mean high water.

Under this temporary deviation, the bridges will not be required to open on signal or within ten minutes of a signal from 5 a.m. on September 26, 2015, to 3 a.m. on September 28, 2015. Mariners requesting an opening shall provide at least one hour notice and may be required to adjust their voyage plan to transit through the bridge at a specified time. Beach Thorofare, New Jersey Intracoastal Waterway is used by a variety of vessels including small commercial fishing vessels, recreational vessels and tug and barge traffic. The Delaware River is used by a variety of vessels including deep draft ocean-going vessels, small commercial fishing vessels, recreational vessels and tug and barge traffic. The Coast Guard has carefully coordinated the restrictions with commercial and recreational waterway users.

Vessels able to pass through the bridges in the closed position may do so at anytime. The bridges will be able to open for emergencies and there is no alternate route for vessels unable to pass through the bridges in the closed position. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notice to Mariners of the change in operating schedules for these bridges so that vessels can arrange their transits to minimize any impacts caused by this temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridges must return to their regular operating schedules immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: September 10, 2015.

## DEPARTMENT OF HOMELAND SECURITY

### Coast Guard

#### 33 CFR Part 117

[Docket No. USCG-2015-0848]

#### Drawbridge Operation Regulations; Mantua Creek, Paulsboro, NJ and Raccoon Creek, Bridgeport, NJ

**AGENCY:** Coast Guard, DHS.

**ACTION:** Notice of deviation from drawbridge regulations.

**SUMMARY:** The Coast Guard has issued a temporary deviation from the operating schedules that govern the S.R. 44 Bridge over Mantua Creek, mile 1.7, at Paulsboro, NJ and Route 130 Bridge over Raccoon Creek, mile 1.8, at Bridgeport, NJ. This deviation allows the bridges to remain in the closed-to-navigation position to facilitate the 2015 Papal Visit to Philadelphia, PA.

**DATES:** This deviation is effective from 7 a.m. on September 26, 2015, to 11 p.m. on September 28, 2015.

**ADDRESSES:** The docket for this deviation, [USCG-2015-0848], is available at <http://www.regulations.gov>. Type the docket number in the "SEARCH" box and click "SEARCH". Click on Open Docket Folder on the line associated with this deviation. You may also visit the Docket Management Facility in Room W12-140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this temporary deviation, call or email Mr. Hal R. Pitts, Bridge Administration Branch Fifth District, Coast Guard; telephone (757) 398-6222, email [Hal.R.Pitts@uscg.mil](mailto:Hal.R.Pitts@uscg.mil). If you have questions on viewing the docket, call Cheryl Collins, Program

Manager, Docket Operations, telephone 202-366-9826.

**SUPPLEMENTARY INFORMATION:** The New Jersey Department of Transportation, who owns and operates the S.R. 44 Bridge and Route 130 Bridge, has requested a temporary deviation from the current operating regulations set out in 33 CFR 117.729 and 117.741, respectively, to facilitate movement of vehicles during the 2015 Papal Visit to Philadelphia, PA.

Under the normal operating schedule for the S.R. 44 Bridge over Mantua Creek, mile 1.7, at Paulsboro, NJ and Route 130 Bridge over Raccoon Creek, mile 1.8, at Bridgeport, NJ; the bridges shall open on signal from May 1 through October 31, from 7 a.m. to 11 p.m.; and all other times, if at least four hours notice is given. The vertical clearances in the closed-to-navigation position of the S.R. 44 Bridge and Route 130 Bridge are 25 feet and 4 feet, respectively, above mean high water.

Under this temporary deviation, the bridges will be closed to navigation from 7 a.m. to 11 p.m. each day starting September 26 through September 28, 2015, except for scheduled daily openings at 7 a.m. and 7 p.m. The bridges will operate per the normal operating schedules between 11 p.m. and 7 a.m. Mantua Creek and Raccoon Creek are used by a variety of vessels including small commercial fishing vessels and recreational vessels. The Coast Guard has carefully coordinated the restrictions with commercial and recreational waterway users.

Vessels able to pass through the bridges in the closed position may do so at anytime. The bridges will be able to open for emergencies and there is no alternate route for vessels unable to pass through the bridges in the closed position. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notice to Mariners of the change in operating schedules for these bridges so that vessels can arrange their transits to minimize any impacts caused by this temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridges must return to their regular operating schedules immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: September 10, 2015.

[Docket No. USCG–2015–0850]

**Drawbridge Operation Regulations; Delaware River, Burlington County, NJ**

AGENCY: Coast Guard, DHS.

ACTION: Notice of deviation from drawbridge regulations.

**SUMMARY:** The Coast Guard has issued a temporary deviation from the operating schedules that govern the Tacony-Palmyra (Route 73) Bridge over Delaware River, mile 107.2, between Tacony, PA and Palmyra, NJ and Burlington-Bristol (Route 413) Bridge over Delaware River, mile 117.8, between Burlington, NJ and Bristol, PA. This deviation allows the bridges to remain in the closed-to-navigation position to facilitate the 2015 Papal Visit to Philadelphia, PA.

**DATES:** This deviation is effective from 6 a.m. on September 26, 2015, to 9 p.m. on September 27, 2015.

**ADDRESSES:** The docket for this deviation, [USCG–2015–0850], is available at <http://www.regulations.gov>. Type the docket number in the “SEARCH” box and click “SEARCH”. Click on Open Docket Folder on the line associated with this deviation. You may also visit the Docket Management Facility in Room W12–140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

**FOR FURTHER INFORMATION CONTACT:** If you have questions on this temporary deviation, call or email Mr. Hal R. Pitts, Bridge Administration Branch Fifth District, Coast Guard; telephone (757) 398–6222, email [Hal.R.Pitts@uscg.mil](mailto:Hal.R.Pitts@uscg.mil). If you have questions on viewing the docket, call Cheryl Collins, Program Manager, Docket Operations, telephone 202–366–9826.

**SUPPLEMENTARY INFORMATION:** The Burlington County Bridge Commission, who owns and operates the Tacony-Palmyra (Route 73) Bridge over Delaware River and Burlington-Bristol (Route 413) Bridge over Delaware River, has requested a temporary deviation from the current operating regulations set out in 33 CFR 117.716 to facilitate movement of vehicles during the 2015 Papal Visit to Philadelphia, PA.

Under the normal operating schedule for Tacony-Palmyra (Route 73) Bridge over Delaware River, mile 107.2, between Tacony, PA and Palmyra, NJ and Burlington-Bristol (Route 413) Bridge over Delaware River, mile 117.8, between Burlington, NJ and Bristol, PA; opening of the bridge may not be delayed more than five minutes after the signal to open is given. The vertical clearances in the closed-to-navigation position of the Tacony-Palmyra (Route 73) Bridge over Delaware River and Burlington-Bristol (Route 413) Bridge over Delaware River are 53 feet and 62 feet, respectively, above mean high water.

Under this temporary deviation, the bridges will remain in the closed-to-navigation position from 6 a.m. to 9 p.m. on September 26 and September 27, 2015, except for scheduled daily openings at 12 noon and 6 p.m. Vessels signaling an intention to transit through both bridges during a scheduled opening will receive openings at both bridges. The bridges will operate as required per 33 CFR 117.716 from 9 p.m. on September 26 to 6 a.m. on September 27, 2015. The Delaware River is used by a variety of vessels including deep draft ocean-going vessels, small commercial fishing vessels, recreational vessels and tug and barge traffic. The Coast Guard has carefully coordinated the restrictions with commercial and recreational waterway users.

Vessels able to pass through the bridges in the closed position may do so at anytime. The bridges will be able to open for emergencies and there is no alternate route for vessels unable to pass through the bridges in the closed position. The Coast Guard will also inform the users of the waterways through our Local and Broadcast Notice to Mariners of the change in operating schedules for these bridges so that vessels can arrange their transits to minimize any impacts caused by this temporary deviation.

In accordance with 33 CFR 117.35(e), the drawbridges must return to their regular operating schedules immediately at the end of the effective period of this temporary deviation. This deviation from the operating regulations is authorized under 33 CFR 117.35.

Dated: September 10, 2015.

**BILLING CODE 9110–04–P****DEPARTMENT OF VETERANS AFFAIRS****38 CFR Part 36**

RIN 2900–AO70

**Loan Guaranty—Specially Adapted Housing Assistive Technology Grant Program**

AGENCY: Department of Veterans Affairs.

ACTION: Final rule.

**SUMMARY:** This rule adopts as final, without change, a proposed rule of the Department of Veterans Affairs (VA) to amend its regulations to provide grants for the development of new assistive technologies for use in specially adapted housing for eligible veterans or servicemembers. The Veterans’ Benefits Act of 2010 authorizes VA to provide grants of up to \$200,000 per fiscal year to persons or entities to encourage the development of specially adapted housing assistive technologies. This final rule implements changes to VA regulations to clarify the process, the criteria, and the priorities relating to the award of these research and development grants.

**DATES:** *Effective Date:* This rule is effective October 19, 2015.

**FOR FURTHER INFORMATION CONTACT:** John Bell III, Assistant Director for Loan Policy and Valuation (262), Veterans Benefits Administration, Department of Veterans Affairs, 810 Vermont Avenue NW., Washington, DC 20420, (202) 632–8786. (This is not a toll-free number.)

**SUPPLEMENTARY INFORMATION:****The September 8, 2014 Proposed Rule**

On September 8, 2014, VA published a proposed rule in the **Federal Register** at 79 FR 53146, implementing VA’s statutory authority to provide grants for the development of new assistive technologies for use in specially adapted housing for eligible veterans or servicemembers. Section 203 of the Veterans’ Benefits Act of 2010 (the Act) amended chapter 21, title 38, United States Code, to establish the Specially Adapted Housing Assistive Technology Grant Program. Veterans’ Benefits Act of 2010, Public Law 111–275, section 203, 124 Stat. 2874 (2010). The Act authorizes VA to provide grants of up to \$200,000 per fiscal year, through September 30, 2016, to a “person or entity” for the development of specially adapted housing assistive technologies and limits to \$1 million the aggregate amount of such grants VA may award in any fiscal year. *Id.*

The public comment period for the proposed rule closed on November 7,

2014. VA received one comment. The comment received on the proposed rule is discussed below. VA adopts without substantive change the proposed rule that implements the grant program to encourage the development of specially adapted housing assistive technologies. As explained below, however, VA is making one administrative correction to the proposed delegation of authority.

VA received one public comment on the proposed rule from an individual. The commenter expressed support for the proposed rule, but believed the application scoring criteria should be revised. The commenter explained that the prioritization of the criteria outlined in the proposed rule should be changed to reflect “those characteristics that make the project most likely to produce a successful and impactful result.” The commenter recommended changing the maximum point values that may be awarded for certain scoring criteria, with a feasible implementation plan being eligible for the highest number of maximum possible points and innovation and minority or economic status being eligible for the lowest number of maximum possible points. Additionally, the commenter proposed that “empirical research” should be added as a distinct scoring criterion utilized in the review process.

VA is publishing the scoring criteria set forth in proposed 38 CFR 36.4412(f) without change because VA believes that the criteria as proposed effectively carry out Congress’s intent for the Grant program and satisfy the commenter’s interest in successful and impactful results. Specifically, in regard to the legislative history of the Act, the preamble to the proposed rule explained that “House Report 111–109 also explained that there are many emerging technologies that could improve home adaptations or otherwise enhance a veteran or servicemember’s ability to live independently, such as voice-recognition and voice-command operations, living environment controls, and adaptive feeding equipment.” 79 FR 53147. In its scoring criteria, VA provided that a new advancement’s innovation and ability to meet an unmet need may be awarded the maximum possible points because it understood a central goal of the law to be the development of original, potentially groundbreaking technologies. VA also prioritized a new advancement’s promotion of independent living in the scoring criteria based on Congress’s statement that emerging technologies (as supported through this Grant program) could enhance the ability for veterans or servicemembers to live independently. See 79 FR 53148. Additionally, to

ensure that these advancements may be feasibly developed and effectively utilized by eligible individuals, VA’s proposed scoring criteria also include a description of the new assistive technology’s concept, size, and scope and an implementation plan for bringing the technology to the marketplace. See *id.* Accordingly, VA is maintaining its scoring criteria as set forth in the proposed rule because this prioritization effectively carries out congressional intent while addressing the commenter’s stated interest in successful and impactful results.

Additionally, VA is publishing the scoring criteria set forth in proposed 38 CFR 36.4412(f) without change because the criteria provide VA flexibility to ensure that grant awards are made based on the identified priorities and/or needs of veterans and VA at the time the Notice of Funds Availability (NoFA) is published. See 79 FR 53147, 53148. Specifically, in setting out the scoring criteria and maximum points that may be awarded for each criterion, VA explained that “the scoring framework would allow the Secretary to make awards based on priorities of veterans and VA, while also ensuring that taxpayer funds are used responsibly.” 79 FR 53148. As explained in the preamble to the proposed rule, while the regulation text sets forth the maximum number of points that may be awarded based on any one criterion, each NoFA would explain the specific scoring priorities for that grant application cycle. *Id.* This change in priorities would not introduce new scoring criteria, but would instead help technology grant applicants understand how the scores will be weighted and provide them an opportunity to tailor their responses accordingly. *Id.*

The preamble to the proposed rule also provides an example to illustrate VA’s flexibility to emphasize certain criterion in each NoFA. It explains that VA might emphasize in one grant cycle the need for innovation, and as a result, explain in the NoFA that innovation will be a top priority. A technology grant applicant would then know to concentrate on how innovative its product would be. In reviewing the application, the Secretary might award all 50 allowable points to the technology grant applicant who best satisfies that criterion. In the next grant cycle, the Secretary might determine that a particular need has gone unmet among eligible individuals who are adapting their homes. The Secretary might choose to place more emphasis on meeting that need than on general innovation. As a result, the published NoFA for that grant cycle would explain

the Secretary’s new priorities. A technology grant applicant would then know that its application would have more success if it were to focus on how the product would meet the need. When reviewing applications, the Secretary could choose to award all 50 points for that criterion, while only scoring the most innovative product 30 points. *Id.* Accordingly, VA believes this flexibility to weigh criteria based on the identified needs and priorities of veterans and VA at the time a NoFA is published will ensure grant awards successfully carry out program goals and positively impact eligible individuals.

Finally, the commenter suggested adding “empirical research” as a criterion to be evaluated when scoring grant applications. VA understands empirical research to be defined as “originating in or based on observation or experience” (<http://www.merriam-webster.com/dictionary/empirical>). VA’s scoring criteria anticipate VA’s consideration of empirical research in evaluating applications and determining points awarded for each criterion. For example, an application for a new assistive technology may utilize empirical research surrounding currently-available technologies on the market to demonstrate the advancement’s level of innovation. Or, a successful description of how the new advancement is specifically designed to promote the ability of eligible individuals to live independently may utilize empirical research to explain, for example, the most common disabilities among eligible individuals, the critical factors that affect an eligible individual’s ability to live independently, and how the new assistive technology may enable individuals to overcome barriers to independent living. VA will consider the presence of empirical research in its review of applications and determination of points to be awarded. As empirical research may be utilized to support applications and impact application scoring under the existing criteria, it does not need to be added as a stand-alone factor for evaluation.

#### Administrative Correction

The proposed rule included a delegation of authority to various officials in the Department. The title of the Deputy Under Secretary for Economic Opportunity was incorrectly listed as the Deputy Under Secretary for Economic Development. This rule corrects the error. The change is only for administrative accuracy and has no substantive effect on the rule.

**Executive Orders 12866 and 13563**

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, and other advantages; distributive impacts; and equity). Executive Order 13563 (Improving Regulation and Regulatory Review) emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility. Executive Order 12866 (Regulatory Planning and Review) defines a “significant regulatory action” requiring review by the Office of Management and Budget (OMB), unless OMB waives such review, as any regulatory action that is likely to result in a rule that may: (1) Have an annual effect on the economy of \$100 million or more or adversely affect in a material way the economy, a sector of the economy, productivity, competition, jobs, the environment, public health or safety, or State, local, or tribal governments or communities; (2) Create a serious inconsistency or otherwise interfere with an action taken or planned by another agency; (3) Materially alter the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or (4) Raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in this Executive Order.

The economic, interagency, budgetary, legal, and policy implications of this regulatory action have been examined, and it has been determined to be a significant regulatory action under Executive Order 12866 because it is likely to result in a rule that may raise novel legal or policy issues arising out of legal mandates, the President’s priorities, or the principles set forth in Executive Orders 12866 or 13563. VA’s impact analysis can be found as a supporting document at <http://www.regulations.gov>, usually within 48 hours after the rulemaking document is published. Additionally, a copy of the rulemaking and its impact analysis are available on VA’s Web site at <http://www.va.gov/orpm/>, by following the link for “VA Regulations Published from FY 2004 Through Fiscal Year to Date.”

**Regulatory Flexibility Act**

The Secretary hereby certifies that this final rule will not have a significant

economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. There will be no significant economic impact on any small entities because grant applicants are not required to provide matching funds to receive the maximum grant amount of \$200,000. The assistive technology grant program will not impact a substantial number of small entities because VA may only award a maximum of \$1 million in aggregate grant funds per fiscal year, and VA’s authority to award these grants expires September 30, 2016. On this basis, the Secretary certifies that the final rule will not have a significant economic impact on a substantial number of small entities as they are defined in the Regulatory Flexibility Act, 5 U.S.C. 601–612. Therefore, under 5 U.S.C. 605(b), this rulemaking is exempt from the initial and final regulatory flexibility analysis requirements of sections 603 and 604.

**Unfunded Mandates**

The Unfunded Mandates Reform Act of 1995 requires, at 2 U.S.C. 1532, that agencies prepare an assessment of anticipated costs and benefits before issuing any rule that may result in the expenditure by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more (adjusted annually for inflation) in any one year. This final rule will have no such effect on State, local, and tribal governments, or on the private sector.

**Paperwork Reduction Act**

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires that VA consider the impact of paperwork and other information collection burdens imposed on the public. Under 44 U.S.C. 3507(a), an agency may not collect or sponsor the collection of information, nor may it impose an information collection requirement unless it displays a currently valid OMB control number. 5 CFR 1320.8(b)(1) and (3)(vi).

This final rule will impose the following new information collection requirements. Section 36.4412(d) of title 38 CFR will require applicants for an SAH Assistive Technology grant to submit VA Form 26–0967, “Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion,” and to provide statements addressing the scoring criteria for grant awards. The information provided under this collection of information is necessary for a complete SAH Assistive Technology grant application. The information will be used by VA in deciding whether an applicant meets the requirements and satisfies the

scoring criteria for award of an SAH Assistive Technology grant under 38 U.S.C. 2108. As required by the Paperwork Reduction Act of 1995 (at 44 U.S.C. 3507(d)), VA has submitted these information collections to OMB for its review. OMB approved these new information collection requirements associated with the final rule and assigned OMB control number 2900–0821.

**Catalog of Federal Domestic Assistance**

The Catalog of Federal Domestic Assistance program numbers and titles for the programs affected by this document are 64.106, Specially Adapted Housing for Disabled Veterans and 64.118, Veterans Housing—Direct Loans for Certain Disabled Veterans.

**Signing Authority**

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Robert L. Nabors II, Chief of Staff, Department of Veterans Affairs, approved this document on September 11, 2015, for publication.

**List of Subjects in 38 CFR Part 36**

Condominiums, Housing, Indians, Individuals with disabilities, Loan programs—housing and community development, Loan programs—Indians, Loan programs—veterans, Manufactured homes, Mortgage insurance, Reporting and recordkeeping requirements, Veterans.

Dated: September 11, 2015.

**Michael P. Shores,**

*Chief Impact Analyst, Office of Regulation Policy & Management, Office of the General Counsel, Department of Veterans Affairs.*

For the reasons set out in the preamble, VA amends 38 CFR part 36, subpart C to read as follows:

**PART 36—LOAN GUARANTY**

- 1. The authority citation for part 36 continues to read as follows:

**Authority:** 38 U.S.C. 501 and as otherwise noted.

- 2. Add § 36.4412 to read as follows:

**§ 36.4412 Specially Adapted Housing Assistive Technology Grant Program.**

(a) *General.* (1) The Secretary will make grants for the development of new assistive technologies for specially adapted housing.

(2) A person or entity may apply for, and receive, a grant pursuant to this section.

(3)(i) All technology grant recipients, including individuals and entities formed as for-profit entities, will be subject to the rules on Uniform Administrative Requirements for Grants and Agreements With Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations, as found at 2 CFR part 200.

(ii) Where the Secretary determines that 2 CFR part 200 is not applicable or where the Secretary determines that additional requirements are necessary due to the uniqueness of a situation, the Secretary will apply the same standard applicable to exceptions under 2 CFR 200.102.

(b) *Definitions.* To supplement the definitions contained in § 36.4401, the following terms are herein defined for purposes of this section:

(1) A *technology grant applicant* is a person or entity that applies for a grant pursuant to 38 U.S.C. 2108 and this section to develop new assistive technology or technologies for specially adapted housing.

(2) A *new assistive technology* is an advancement that the Secretary determines could aid or enhance the ability of an eligible individual, as defined in 38 CFR 36.4401, to live in an adapted home.

(c) *Grant application solicitation.* As funds are available for the program, VA will publish in the **Federal Register** a Notice of Funds Availability (NoFA), soliciting applications for the grant program and providing information on applications.

(d) *Application process and requirements.* Upon publication of the NoFA, a technology grant applicant must submit an application to the Secretary via [www.Grants.gov](http://www.Grants.gov). Applications must consist of the following:

(1) Standard Form 424 (Application for Federal Assistance) with the box labeled "application" marked;

(2) VA Form 26–0967 (Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion) to ensure that the technology grant applicant has not been debarred or suspended and is eligible to participate in the VA grant process and receive Federal funds;

(3) Statements addressing the scoring criteria in paragraph (f) of this section; and

(4) Any additional information as deemed appropriate by VA.

(e) *Threshold requirements.* The NoFA will set out the full and specific procedural requirements for technology grant applicants.

(f) *Scoring criteria.* (1) The Secretary will score technology grant applications

based on the scoring criteria in paragraph (f)(2) of this section. Although there is not a cap on the maximum aggregate score possible, a technology grant application must receive a minimum aggregate score of 70 points to be considered for a technology grant.

(2) The scoring criteria and maximum points are as follows:

(i) A description of how the new assistive technology is innovative (up to 50 points);

(ii) An explanation of how the new assistive technology will meet a specific, unmet need among eligible individuals (up to 50 points);

(iii) An explanation of how the new assistive technology is specifically designed to promote the ability of eligible individuals to live more independently (up to 30 points);

(iv) A description of the new assistive technology's concept, size, and scope (up to 30 points);

(v) An implementation plan with major milestones for bringing the new assistive technology into production and to the market. Such milestones must be meaningful and achievable within a specific timeframe (up to 30 points); and

(vi) An explanation of what uniquely positions the technology grant applicant in the marketplace. This can include a focus on characteristics such as the economic reliability of the technology grant applicant, the technology grant applicant's status as a minority or veteran-owned business, or other characteristics that the technology grant applicant wants to include to show how it will help protect the interests of, or further the mission of, VA and the program (up to 20 points).

(g) *Application deadlines.* Deadlines for technology grant applications will be established in the NoFA.

(h) *Awards process.* Decisions for awarding technology grants under this section will be made in accordance with guidelines (covering such issues as timing and method of notification) described in the NoFA. The Secretary will provide written approvals, denials, or requests for additional information. The Secretary will conduct periodic audits of all approved grants under this program to ensure that the actual project size and scope are consistent with those outlined in the proposal and that established milestones are achieved.

(i) *Delegation of authority.* (1) Each VA employee appointed to or lawfully fulfilling any of the following positions is hereby delegated authority, within the limitations and conditions prescribed by law, to exercise the powers and functions of the Secretary with respect

to the grant program authorized by 38 U.S.C. 2108:

- (i) Under Secretary for Benefits.
- (ii) Deputy Under Secretary for Economic Opportunity.
- (iii) Director, Loan Guaranty Service.
- (iv) Deputy Director, Loan Guaranty Service.

(2) [Reserved]

(j) *Miscellaneous.* (1) The grant offered by this chapter is not a veterans' benefit. As such, the decisions of the Secretary are final and not subject to the same appeal rights as decisions related to veterans' benefits.

(2) The Secretary does not have a duty to assist technology grant applicants in obtaining a grant.

(Authority: 38 U.S.C. 2108)

(The Office of Management and Budget has approved the information collection requirements in this section under control numbers 4040–0004 and 2900–0821.)

## POSTAL SERVICE

### 39 CFR Part 957

#### Rules of Practice Before the Judicial Officer

**AGENCY:** Postal Service.

**ACTION:** Final rule.

**SUMMARY:** This document contains the final revisions to the rules of practice before the Judicial Officer in proceedings relative to debarment from contracting.

**DATES:** *Effective:* September 17, 2015.

**ADDRESSES:** Written inquiries may be directed to: Postal Service Judicial Officer Department, 2101 Wilson Boulevard, Suite 600, Arlington, VA 22201–3078.

**FOR FURTHER INFORMATION CONTACT:** Associate Judicial Officer Gary E. Shapiro, (703) 812–1910.

**SUPPLEMENTARY INFORMATION:**

#### A. Executive Summary

On July 1, 2015, the Judicial Officer Department published for comment proposed revisions to the rules of practice before the Judicial Officer for proceedings relative to debarment from contracting (80 FR 37565–7). The period for comments closed on July 31, 2015, and no comments were received. The Judicial Officer has made no further revisions to the original proposed rules, which are adopted as final. The new rules completely replace the former rules of 39 CFR part 957.

## B. Background

The rules of practice in proceedings relative to debarment from contracting are set forth in 39 CFR part 957. This authority is delegated by the Postmaster General. The rules are being changed to effectuate the Postal Service's present debarment procedures, at 39 CFR part 601, and the Judicial Officer's role in those procedures.

In 2007, the Postal Service changed its procurement regulations regarding suspension and debarment from contracting. See 72 FR 58252 (October 15, 2007). Whereas prior to that change, the Judicial Officer conducted hearings and rendered final agency decisions regarding suspension and debarment from contracting, the revised procurement regulations at 39 CFR 601.113 eliminated any role of the Judicial Officer from suspensions, and reserved final agency action regarding debarments to the Vice President, Supply Management. The remaining role of the Judicial Officer relative to debarment from contracting is set forth in paragraphs (g)(2) and (h)(2) of § 601.113. Those paragraphs provide that the Vice President, Supply Management, may request the Judicial Officer to conduct fact-finding hearings to resolve questions of material facts involving a debarment, and will consider those findings when deciding the matter. Under paragraph (h)(2) of § 601.113, fact-finding hearings will be governed by rules of procedure promulgated by the Judicial Officer. These new rules of procedure satisfy that requirement.

### List of Subjects in 39 CFR Part 957

Administrative practice and procedure, Government contracts.

Accordingly, for the reasons stated, the Postal Service revises 39 CFR part 957 to read as follows:

## PART 957—RULES OF PRACTICE IN PROCEEDINGS RELATIVE TO DEBARMENT FROM CONTRACTING

Sec.

- 957.1 Authority for rules.
- 957.2 Scope of rules.
- 957.3 Definitions.
- 957.4 Authority of the Hearing Officer.
- 957.5 Case initiation.
- 957.6 Filing documents for the record.
- 957.7 Failure to appear at the hearing.
- 957.8 Hearings.
- 957.9 Appearances.
- 957.10 Conduct of the hearing.
- 957.11 Witness fees.
- 957.12 Transcript.
- 957.13 Proposed findings of fact.
- 957.14 Findings of fact.
- 957.15 Computation of time.
- 957.16 Official record.

- 957.17 Public information.
- 957.18 Ex parte communications.

**Authority:** 39 U.S.C. 204, 401.

### § 957.1 Authority for rules.

The rules in this part are issued by the Judicial Officer of the Postal Service pursuant to authority delegated by the Postmaster General (39 U.S.C. 204, 401).

### § 957.2 Scope of rules.

The rules in this part apply to proceedings initiated pursuant to paragraphs (g)(2) or (h)(2) of § 601.113 of this subchapter.

### § 957.3 Definitions.

(a) *Vice President* means the Vice President, Supply Management, or the Vice President's representative for the purpose of carrying out the provisions of § 601.113 of this subchapter.

(b) *General Counsel* includes the Postal Service's General Counsel and any designated representative within the Office of the General Counsel.

(c) *Judicial Officer* includes the Postal Service's Judicial Officer, Associate Judicial Officer, and Acting Judicial Officer.

(d) *Debarment* has the meaning given by paragraph (b)(2) of § 601.113 of this subchapter.

(e) *Respondent* means any individual, firm or other entity which has been served a written notice of proposed debarment pursuant to § 601.113(h), or which previously has been debarred, as provided in § 601.113(g)(2) of this subchapter.

(f) *Hearing Officer* means the judge assigned to the case by the Judicial Officer. The Hearing Officer may be the Judicial Officer, Associate Judicial Officer, Administrative Law Judge or an Administrative Judge who is a member of the Postal Service Board of Contract Appeals.

(g) *Recorder* means the Recorder of the Judicial Officer Department of the United States Postal Service, 2101 Wilson Boulevard, Suite 600, Arlington, VA 22201-3078. The Recorder's telephone number is (703) 812-1900, fax number is (703) 812-1901, and the Judicial Officer's Web site is <http://www.about.usps.com/who-we-are/judicial/welcome.htm>.

### § 957.4 Authority of the Hearing Officer.

The Hearing Officer's authority includes, but is not limited to, the following:

(a) Ruling on all motions or requests by the parties.

(b) Issuing notices, orders, or memoranda to the parties concerning the hearing proceedings.

(c) Conducting conferences with the parties. The Hearing Officer will prepare

a Memorandum of Conference, which will be transmitted to both parties and which serves as the official record of that conference.

(d) Determining whether an oral hearing will be conducted, and setting the place, date, and time for such a hearing.

(e) Administering oaths or affirmations to witnesses.

(f) Conducting the proceedings and the hearing in a manner to maintain discipline and decorum while ensuring that relevant, reliable and probative evidence is elicited, but irrelevant, immaterial or repetitious evidence is excluded. The Hearing Officer in his or her discretion may examine witnesses to ensure that a satisfactory record is developed.

(g) Establishing the record. The weight to be attached to evidence will rest within the discretion of the Hearing Officer. Except as the Hearing Officer may otherwise order, no proof shall be received in evidence after completion of a hearing. The Hearing Officer may require either party, with appropriate notice to the other party, to submit additional evidence on any relevant matter.

(h) Granting reasonable time extensions or other relief for good cause shown, in the Hearing Officer's sole discretion.

(i) Issuing findings of fact. The Hearing Officer will issue findings of fact to the Vice President within 30 days from the close of the record, to the extent practicable.

### § 957.5 Case initiation.

(a) Upon receipt of a request or referral from the Vice President, the Recorder will docket a case under this Part. Following docketing, the Judicial Officer will assign a Hearing Officer. The Hearing Officer will establish the schedule for the proceeding, perform all judicial duties under this Part and render Findings of Fact. Whenever practicable, a hearing should be conducted within 30 days of the date of docketing.

(b) The request or referral from the Vice President shall include the notice of proposed debarment and the information or argument submitted by the Respondent pursuant to paragraphs (g) or (h) of § 601.113 of this subchapter.

### § 957.6 Filing documents for the record.

The parties shall file documents, permitted by the rules in this part or required by the Hearing Officer, in the Judicial Officer Department's electronic filing system. The Web site for electronic filing is <https://uspsjoe.justware.com/justiceweb>.

Documents submitted using that system are considered filed as of the date and time (Eastern Time) reflected in the system. Orders issued by the Hearing Officer shall be considered received by the parties on the date posted to the electronic filing system.

**§ 957.7 Failure to appear at the hearing.**

If a party fails to appear at the hearing, the Hearing Officer may proceed with the hearing, receive evidence and issue findings of fact without requirement of further notice to the absent party.

**§ 957.8 Hearings.**

Hearings ordinarily will be conducted in the Judicial Officer Department courtroom at 2101 Wilson Boulevard, Suite 600, Arlington, VA 22201-3078. However, the Hearing Officer, in his or her discretion, may order the hearing to be conducted at another location, or by another means such as by video.

**§ 957.9 Appearances.**

(a) An individual Respondent may appear in his or her own behalf, a corporation may appear by an officer thereof, a partnership or joint venture may appear by a member thereof, or any of these may appear by a licensed attorney.

(b) After a request for a hearing has been filed pursuant to the rules in this part, the General Counsel shall designate a licensed attorney as counsel assigned to handle the case.

(c) All counsel, or a self-represented Respondent, shall register in the electronic filing system, and request to be added to the case. Counsel also promptly shall file notices of appearance.

(d) An attorney for any party who has filed a notice of appearance and who wishes to withdraw must file a motion requesting withdrawal, explaining the reasons supporting the motion, and identifying the name, email address, mailing address, telephone number, and fax number of the person who will assume responsibility for representation of the party in question.

**§ 957.10 Conduct of the hearing.**

The Hearing Officer may approve or disapprove witnesses in his or her discretion. All testimony will be taken under oath or affirmation, and subject to cross-examination. The Hearing Officer may exclude evidence to avoid unfair prejudice, confusion of the issues, undue delay, waste of time, or presentation of irrelevant, immaterial, or cumulative evidence. Although the Hearing Officer will consider the Federal Rules of Evidence for guidance

regarding admissibility of evidence and other evidentiary issues, he or she is not bound by those rules. The weight to be attached to evidence presented in any particular form will be within the discretion of the Hearing Officer, taking into consideration all the circumstances of the particular case. Stipulations of fact agreed upon by the parties may be accepted as evidence at the hearing. The parties may stipulate the testimony that would be given by a witness if the witness were present. The Hearing Officer may in any case require evidence in addition to that offered by the parties. A party requiring the use of a foreign language interpreter allowing testimony to be taken in English for itself or witnesses it proffers is responsible for making all necessary arrangements and paying all costs and expenses associated with the use of an interpreter.

**§ 957.11 Witness fees.**

Each party is responsible for the fees and costs for its own witnesses.

**§ 957.12 Transcript.**

Testimony and argument at hearings shall be reported verbatim, unless the Hearing Officer otherwise orders. Transcripts of the proceedings will be made available or provided to the parties.

**§ 957.13 Proposed findings of fact.**

(a) The Hearing Officer may direct the parties to submit proposed findings of fact and supporting explanations within 15 days after the delivery of the official transcript to the Recorder who shall notify both parties of the date of its receipt. The filing date for proposed findings shall be the same for both parties.

(b) Proposed findings of fact shall be set forth in numbered paragraphs and shall state with particularity all evidentiary facts in the record with appropriate citations to the transcript or exhibits supporting the proposed findings.

**§ 957.14 Findings of fact.**

The Hearing Officer shall issue written findings of fact, and transmit them to the Vice President. Copies will be sent to the parties.

**§ 957.15 Computation of time.**

A designated period of time under the rules in this part excludes the day the period begins, and includes the last day of the period unless the last day is a Saturday, Sunday, or legal holiday, in which event the period runs until the close of business on the next business day.

**§ 957.16 Official record.**

The transcript of testimony together with all pleadings, orders, exhibits, briefs, and other documents filed in the proceeding shall constitute the official record of the proceeding.

**§ 957.17 Public information.**

The Postal Service shall maintain for public inspection copies of all findings of fact issued under this Part, and make them available through the Postal Service Web site. The Recorder maintains the complete official record of every proceeding.

**§ 957.18 Ex parte communications.**

The provisions of 5 U.S.C. 551(14), 556(d), and 557(d) prohibiting ex parte communications are made applicable to proceedings under these rules of practice.

**ENVIRONMENTAL PROTECTION AGENCY**

**40 CFR Part 180**

[EPA-HQ-OPP-2014-0574; FRL-9933-00]

**Halosulfuron-methyl; Pesticide Tolerances**

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Final rule.

**SUMMARY:** This regulation establishes a tolerance for residues of halosulfuron-methyl in or on the pome fruit group 11-10 and a tolerance with regional registration for residues of halosulfuron-methyl in or on the small vine climbing fruit, except fuzzy kiwifruit, subgroup 13-07F. Interregional Research Project Number 4 (IR-4) requested these tolerances under the Federal Food, Drug, and Cosmetic Act (FFDCA).

**DATES:** This regulation is effective September 17, 2015. Objections and requests for hearings must be received on or before November 16, 2015, and must be filed in accordance with the instructions provided in 40 CFR part 178 (see also Unit I.C. of the **SUPPLEMENTARY INFORMATION**).

**ADDRESSES:** The docket for this action, identified by docket identification (ID) number EPA-HQ-OPP-2014-0574, is available at <http://www.regulations.gov> or at the Office of Pesticide Programs Regulatory Public Docket (OPP Docket) in the Environmental Protection Agency Docket Center (EPA/DC), West William

Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC 20460-0001. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the OPP Docket is (703) 305-5805. Please review the visitor instructions and additional information about the docket available at <http://www.epa.gov/dockets>.

**FOR FURTHER INFORMATION CONTACT:** Susan Lewis, Registration Division (7505P), Office of Pesticide Programs, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; main telephone number: (703) 305-7090; email address: [RDfrNotices@epa.gov](mailto:RDfrNotices@epa.gov).

**SUPPLEMENTARY INFORMATION:**

**I. General Information**

*A. Does this action apply to me?*

You may be potentially affected by this action if you are an agricultural producer, food manufacturer, or pesticide manufacturer. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Crop production (NAICS code 111).
- Animal production (NAICS code 112).
- Food manufacturing (NAICS code 311).
- Pesticide manufacturing (NAICS code 32532).

*B. How can I get electronic access to other related information?*

You may access a frequently updated electronic version of EPA's tolerance regulations at 40 CFR part 180 through the Government Printing Office's e-CFR site at [http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab\\_02.tpl](http://www.ecfr.gov/cgi-bin/text-idx?&c=ecfr&tpl=/ecfrbrowse/Title40/40tab_02.tpl).

*C. How can I file an objection or hearing request?*

Under FFDCA section 408(g), 21 U.S.C. 346a, any person may file an objection to any aspect of this regulation and may also request a hearing on those objections. You must file your objection or request a hearing on this regulation in accordance with the instructions provided in 40 CFR part 178. To ensure proper receipt by EPA, you must identify docket ID number EPA-HQ-OPP-2014-0574 in the subject line on the first page of your submission. All objections and requests for a hearing

must be in writing, and must be received by the Hearing Clerk on or before November 16, 2015. Addresses for mail and hand delivery of objections and hearing requests are provided in 40 CFR 178.25(b).

In addition to filing an objection or hearing request with the Hearing Clerk as described in 40 CFR part 178, please submit a copy of the filing (excluding any Confidential Business Information (CBI)) for inclusion in the public docket. Information not marked confidential pursuant to 40 CFR part 2 may be disclosed publicly by EPA without prior notice. Submit the non-CBI copy of your objection or hearing request, identified by docket ID number EPA-HQ-OPP-2014-0574, by one of the following methods:

- *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.

- *Mail:* OPP Docket, Environmental Protection Agency Docket Center (EPA/DC), (28221T), 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001.

- *Hand Delivery:* To make special arrangements for hand delivery or delivery of boxed information, please follow the instructions at <http://www.epa.gov/dockets/contacts.html>. Additional instructions on commenting or visiting the docket, along with more information about dockets generally, is available at <http://www.epa.gov/dockets>.

**II. Summary of Petitioned-For Tolerance**

In the **Federal Register** of February 11, 2015 (80 FR 7559) (FRL-9921-94), EPA issued a document pursuant to FFDCA section 408(d)(3), 21 U.S.C. 346a(d)(3), announcing the filing of a pesticide petition (PP 4E8297) by IR-4, IR-4 Project Headquarters, Rutgers, The State University of New Jersey, Suite 201 W, 500 College Road East, Princeton, NJ 08540. The petition requested that 40 CFR 180.479 be amended by establishing tolerances for residues of the herbicide halosulfuron-methyl, methyl 5-[(4,6-dimethoxy-2-pyrimidinyl)amino] carbonylamino-sulfonyl]-3-chloro-1-methyl-1H-pyrazole-4-carboxylate, including its metabolites and degradates, in or on the raw agricultural commodities: Fruit, pome, group 11-10 at 0.05 parts per million (ppm), and fruit, small vine climbing, except fuzzy kiwifruit, subgroup 13-07F at 0.05 ppm (associated with a regional registration). That document referenced a summary of

the petition prepared by the Canyon Group, c/o Gowan Company, the registrant, which is available in the docket, <http://www.regulations.gov>. No comments were received on the notice of filing.

Based upon available data, EPA is establishing tolerances as requested.

**III. Aggregate Risk Assessment and Determination of Safety**

Section 408(b)(2)(A)(i) of FFDCA allows EPA to establish a tolerance (the legal limit for a pesticide chemical residue in or on a food) only if EPA determines that the tolerance is "safe." Section 408(b)(2)(A)(ii) of FFDCA defines "safe" to mean that "there is a reasonable certainty that no harm will result from aggregate exposure to the pesticide chemical residue, including all anticipated dietary exposures and all other exposures for which there is reliable information." This includes exposure through drinking water and in residential settings, but does not include occupational exposure. Section 408(b)(2)(C) of FFDCA requires EPA to give special consideration to exposure of infants and children to the pesticide chemical residue in establishing a tolerance and to "ensure that there is a reasonable certainty that no harm will result to infants and children from aggregate exposure to the pesticide chemical residue. . . ."

Consistent with FFDCA section 408(b)(2)(D), and the factors specified in FFDCA section 408(b)(2)(D), EPA has reviewed the available scientific data and other relevant information in support of this action. EPA has sufficient data to assess the hazards of and to make a determination on aggregate exposure for halosulfuron-methyl including exposure resulting from the tolerances established by this action. EPA's assessment of exposures and risks associated with halosulfuron-methyl follows.

*A. Toxicological Profile*

EPA has evaluated the available toxicity data and considered its validity, completeness, and reliability as well as the relationship of the results of the studies to human risk. EPA has also considered available information concerning the variability of the sensitivities of major identifiable subgroups of consumers, including infants and children.

With repeated dosing, the available data on halosulfuron-methyl did not demonstrate a target organ or tissue in any of the test animals. Reduction in body weight was seen in the 90-day and 1-year oral toxicity studies in dogs. Reduced body weights were also seen in

rat studies at higher dose levels than those seen in dogs. An effect on the hematological parameters was detected in the dog studies, but the magnitude of changes was slight and the effect was considered to be marginal. Thus, the slight hematological changes were not considered to be adverse.

In the prenatal developmental toxicity study in rats, increases in resorptions, soft tissue (dilation of the lateral ventricles) and skeletal variations, and decreases in body weights were seen in the fetuses compared to clinical signs and decreases in body weights and food consumption in the maternal animals at a similar dose level. In the rabbit developmental toxicity study, increases in resorptions and post-implantation losses and decreases in mean litter size were observed in the presence of decreases in body weight and food consumption in maternal animals. The fetal effects seen in developmental toxicity studies in rats and rabbits represented a qualitative increase in susceptibility. However, a clear no-observed-adverse-effect-level (NOAEL) for these effects was established in both rat and rabbit developmental toxicity studies. No quantitative susceptibility was found in studies following pre-and/or post-natal exposures. Halosulfuron-methyl did not produce any effects on reproductive parameters in the 2-generation reproduction study in rats. No neurotoxic effects were observed in the acute or subchronic neurotoxicity studies up to 2,000 mg/kg or 760 mg/kg/day, respectively. In addition, no adverse effect was found in a 21-day dermal toxicity study at doses up to the limit dose (1,000 mg/kg/day).

Halosulfuron-methyl is negative for mutagenicity in a battery of genotoxicity studies and is classified as “not likely to be carcinogenic to humans” based on lack of evidence for carcinogenicity in mice and rats following long-term dietary administration.

Specific information on the studies received and the nature of the adverse effects caused by halosulfuron-methyl as well as the NOAEL and the lowest-observed-adverse-effect-level (LOAEL) from the toxicity studies can be found at <http://www.regulations.gov> in document “Halosulfuron-Methyl. Human Health Risk Assessment for a Proposed Use on Pome Fruit Crop Group 11–10 and Small Fruit Vine Climbing Subgroup, Except Fuzzy Kiwifruit, Subgroup 13–07F” at page 28 in docket ID number EPA–HQ–OPP–2014–0574.

### *B. Toxicological Points of Departure/Levels of Concern*

Once a pesticide’s toxicological profile is determined, EPA identifies toxicological points of departure (POD) and levels of concern to use in evaluating the risk posed by human exposure to the pesticide. For hazards that have a threshold below which there is no appreciable risk, the toxicological POD is used as the basis for derivation of reference values for risk assessment. PODs are developed based on a careful analysis of the doses in each toxicological study to determine the dose at which no adverse effects are observed (the NOAEL) and the lowest dose at which adverse effects of concern are identified (the LOAEL). Uncertainty/safety factors are used in conjunction with the POD to calculate a safe exposure level—generally referred to as a population-adjusted dose (PAD) or a reference dose (RfD)—and a safe margin of exposure (MOE). For non-threshold risks, the Agency assumes that any amount of exposure will lead to some degree of risk. Thus, the Agency estimates risk in terms of the probability of an occurrence of the adverse effect expected in a lifetime. For more information on the general principles EPA uses in risk characterization and a complete description of the risk assessment process, see <http://www.epa.gov/pesticides/factsheets/riskassess.htm>.

A summary of the toxicological endpoints for halosulfuron used for human risk assessment is discussed in Unit III. B. of the final rule published in the **Federal Register** of December 3, 2012 (77 FR 71555) (FRL–9370–6). However, there is one change to the prior toxicity endpoint and point of departure selections for halosulfuron-methyl discussed in the 2012 document. The previous toxicity endpoint for dermal exposure assessments was based on the results of a 21-day dermal toxicity study, where the no observed effect level (NOEL) and lowest observed effect level (LOEL) were established at 100 and 1,000 mg/kg/day, respectively. The LOEL was based on “total body weight gains in males.” However, following a reevaluation of this study according to the current evaluation standard, there was only 4% reduction in absolute body weight in the affected 1,000 mg/kg/day males. This reduction was not considered to be adverse and no other adverse effect was reported in this study. No LOAEL could be established, and the NOAEL was 1,000 mg/kg/day. Based on this re-evaluation, halosulfuron-methyl did not cause adverse effects at the limit dose (1,000

mg/kg/day), and no toxicity endpoint could be established for the dermal exposure scenario. In addition, no quantitative susceptibility was found in studies following pre-and/or post-natal exposures. Hence, no dermal exposure assessment was necessary.

### *C. Exposure Assessment*

1. *Dietary exposure from food and feed uses.* In evaluating dietary exposure to halosulfuron-methyl, EPA considered exposure under the petitioned-for tolerances as well as all existing halosulfuron-methyl tolerances in 40 CFR 180.479. EPA assessed dietary exposures from halosulfuron-methyl in food as follows:

i. *Acute exposure.* Quantitative acute dietary exposure and risk assessments are performed for a food-use pesticide, if a toxicological study has indicated the possibility of an effect of concern occurring as a result of a 1-day or single exposure.

Such effects were identified for halosulfuron-methyl. Exposure and risk assessments were conducted using the Dietary Exposure Evaluation Model software with the Food Commodity Intake Database (DEEM–FCID). This software uses 2003–2008 food consumption data from the United States Department of Agriculture’s (USDA’s) National Health and Nutrition Examination Survey, What We Eat in America (NHANES/WWEIA). As to residue levels in food, EPA assumed tolerance-level residues and 100 percent crop treated (PCT) for all commodities.

ii. *Chronic exposure.* In conducting the chronic dietary exposure assessment EPA used the food consumption data from the USDA NHANES/WWEIA. As to residue levels in food, EPA assumed tolerance-level residues and 100 PCT for all commodities.

iii. *Cancer.* Based on the data summarized in Unit III.A., EPA has concluded that halosulfuron-methyl does not pose a cancer risk to humans. Therefore, a dietary exposure assessment for the purpose of assessing cancer risk is unnecessary.

iv. *Anticipated residue and PCT information.* EPA did not use anticipated residue or PCT information in the dietary assessment for halosulfuron-methyl. Tolerance-level residues and 100 PCT were assumed for all food commodities.

2. *Dietary exposure from drinking water.* The Agency used screening level water exposure models in the dietary exposure analysis and risk assessment for halosulfuron-methyl in drinking water. These simulation models take into account data on the physical, chemical, and fate/transport

characteristics of halosulfuron-methyl. Further information regarding EPA drinking water models used in pesticide exposure assessment can be found at <http://www.epa.gov/oppefed1/models/water/index.htm>.

Based on the First Index Reservoir Screening Tool (FIRST) and Screening Concentration in Ground Water (SCI-GROW) models, the estimated drinking water concentrations (EDWCs) of halosulfuron-methyl for acute exposures are estimated to be 59.2 parts per billion (ppb) for surface water and 0.065 ppb for ground water and for chronic exposures are estimated to be 59.2 ppb for surface water and 0.065 ppb for ground water.

Modeled estimates of drinking water concentrations were directly entered into the dietary exposure model. For acute dietary risk assessment, the water concentration value of 59.2 ppb was used to assess the contribution to drinking water. For chronic dietary risk assessment, the water concentration of value 59.2 ppb was used to assess the contribution to drinking water.

3. *From non-dietary exposure.* The term “residential exposure” is used in this document to refer to non-occupational, non-dietary exposure (e.g., for lawn and garden pest control, indoor pest control, termiticides, and flea and tick control on pets).

Halosulfuron-methyl is currently registered for use by residential handlers on residential turf. EPA reassessed residential exposure for aggregate risk assessment reflecting the removal of the dermal POD. EPA assessed short-term (1–30 days) exposure to halosulfuron-methyl for residential handlers (inhalation exposure) and children 1 to < 2 years old (post-application incidental oral exposures).

The residential exposure scenario used in the adult aggregate assessment reflects inhalation exposure from mixing/loading/applying halosulfuron-methyl via backpack sprayer or manually pressurized handwand to turf.

The residential exposure scenario used in the children 1 to <2 years old aggregate assessment reflects hand-to-mouth incidental oral exposures from post-application exposure to treated turf.

Intermediate-term exposures are not likely because of the intermittent nature of applications by homeowners.

Further information regarding EPA standard assumptions and generic inputs for residential exposures may be found at <http://www.epa.gov/pesticides/trac/science/trac6a05.pdf>.

4. *Cumulative effects from substances with a common mechanism of toxicity.*

Section 408(b)(2)(D)(v) of FFDCA requires that, when considering whether to establish, modify, or revoke a tolerance, the Agency consider “available information” concerning the cumulative effects of a particular pesticide’s residues and “other substances that have a common mechanism of toxicity.”

EPA has not found halosulfuron-methyl to share a common mechanism of toxicity with any other substances, and halosulfuron-methyl does not appear to produce a toxic metabolite produced by other substances. For the purposes of this tolerance action, therefore, EPA has assumed that halosulfuron-methyl does not have a common mechanism of toxicity with other substances. For information regarding EPA’s efforts to determine which chemicals have a common mechanism of toxicity and to evaluate the cumulative effects of such chemicals, see EPA’s Web site at <http://www.epa.gov/pesticides/cumulative>.

#### D. Safety Factor for Infants and Children

1. *In general.* Section 408(b)(2)(C) of FFDCA provides that EPA shall apply an additional tenfold (10X) margin of safety for infants and children in the case of threshold effects to account for prenatal and postnatal toxicity and the completeness of the database on toxicity and exposure unless EPA determines based on reliable data that a different margin of safety will be safe for infants and children. This additional margin of safety is commonly referred to as the FQPA Safety Factor (SF). In applying this provision, EPA either retains the default value of 10X, or uses a different additional safety factor when reliable data available to EPA support the choice of a different factor.

2. *Prenatal and postnatal sensitivity.* There was no quantitative evidence of increased susceptibility following pre- and/or post-natal exposure to halosulfuron-methyl. Qualitative susceptibility was seen in the prenatal developmental toxicity study in rats and in rabbits; however, this qualitative susceptibility was of low concern because (1) in both studies, there were clear NOAELs/LOAELs for developmental and maternal toxicities; (2) the developmental effects were seen in the presence of maternal toxicity; and (3) the effects were only seen at the high dose levels. In rats, the developmental effects were seen at a dose (750 mg/kg/day) which was approaching the limit-dose (1,000 mg/kg/day). Furthermore, the PODs for risk assessment are

protective of the effects which occur at high doses.

3. *Conclusion.* EPA has determined that reliable data show the safety of infants and children would be adequately protected if the FQPA SF were reduced to 1x. That decision is based on the following findings:

i. The toxicity database for halosulfuron-methyl is considered complete.

ii. There is no indication that halosulfuron-methyl is a neurotoxic chemical and there is no need for a developmental neurotoxicity study or additional UFs to account for neurotoxicity.

iii. There was no quantitative evidence of increased susceptibility following pre- and/or post-natal exposure and the qualitative susceptibility observed in the developmental toxicity studies in rats and rabbits was of low concern for the reasons outlined in section III.D.2.

iv. There are no residual uncertainties identified in the exposure databases. The dietary food exposure assessments were performed based on 100 PCT and tolerance-level residues. EPA made conservative (protective) assumptions in the ground and surface water modeling used to assess exposure to halosulfuron-methyl in drinking water. EPA used similarly conservative assumptions to assess post-application exposure of children as well as incidental oral exposure of toddlers. These assessments will not underestimate the exposure and risks posed by halosulfuron-methyl.

#### E. Aggregate Risks and Determination of Safety

EPA determines whether acute and chronic dietary pesticide exposures are safe by comparing aggregate exposure estimates to the acute PAD (aPAD) and chronic PAD (cPAD). For linear cancer risks, EPA calculates the lifetime probability of acquiring cancer given the estimated aggregate exposure. Short-, intermediate-, and chronic-term risks are evaluated by comparing the estimated aggregate food, water, and residential exposure to the appropriate PODs to ensure that an adequate MOE exists.

1. *Acute risk.* Using the exposure assumptions discussed in this unit for acute exposure, the acute dietary exposure from food and water to halosulfuron-methyl will occupy <1% of the aPAD for females 13–49 years old, the only population group of concern.

2. *Chronic risk.* Using the exposure assumptions described in this unit for chronic exposure, EPA has concluded that chronic exposure to halosulfuron-methyl from food and water will utilize

5.7% of the cPAD for children 1–2 years old, the population subgroup receiving the greatest exposure. Based on the explanation in Unit III.C.3., regarding residential use patterns, chronic residential exposure to residues of halosulfuron-methyl is not expected.

3. *Short-term risk.* Short-term aggregate exposure takes into account short-term residential exposure plus chronic exposure to food and water (considered to be a background exposure level).

Halosulfuron-methyl is currently registered for uses that could result in short-term residential exposure, and the Agency has determined that it is appropriate to aggregate chronic exposure through food and water with short-term residential exposures to halosulfuron-methyl.

Using the exposure assumptions described in this unit for short-term exposures, EPA has concluded the combined short-term food, water, and residential exposures result in aggregate MOEs of 25,000 for adults and 1,800 for children 1 to < 2 years old. Because EPA's level of concern for halosulfuron-methyl is a MOE of 100 or below, these MOEs are not of concern.

4. *Intermediate-term risk.* Intermediate-term aggregate exposure takes into account intermediate-term residential exposure plus chronic exposure to food and water (considered to be a background exposure level).

An intermediate-term adverse effect was identified; however, halosulfuron-methyl is not registered for any use patterns that would result in intermediate-term residential exposure. Intermediate-term risk is assessed based on intermediate-term residential exposure plus chronic dietary exposure. Because there is no intermediate-term residential exposure and chronic dietary exposure has already been assessed under the appropriately protective cPAD (which is at least as protective as the POD used to assess intermediate-term risk), no further assessment of intermediate-term risk is necessary, and EPA relies on the chronic dietary risk assessment for evaluating intermediate-term risk for halosulfuron-methyl.

5. *Aggregate cancer risk for U.S. population.* Based on the lack of evidence of carcinogenicity in two adequate rodent carcinogenicity studies, halosulfuron-methyl is not expected to pose a cancer risk to humans.

6. *Determination of safety.* Based on these risk assessments, EPA concludes that there is a reasonable certainty that no harm will result to the general population, or to infants and children from aggregate exposure to halosulfuron-methyl residues.

#### IV. Other Considerations

##### A. Analytical Enforcement Methodology

Adequate enforcement methodology (gas chromatography (GC) thermionic-specific detection (TSD, nitrogen specific)) is available to enforce the tolerance expression.

The method may be requested from: Chief, Analytical Chemistry Branch, Environmental Science Center, 701 Mapes Rd., Ft. Meade, MD 20755–5350; telephone number: (410) 305–2905; email address: [residuemethods@epa.gov](mailto:residuemethods@epa.gov).

##### B. International Residue Limits

In making its tolerance decisions, EPA seeks to harmonize U.S. tolerances with international standards whenever possible, consistent with U.S. food safety standards and agricultural practices. EPA considers the international maximum residue limits (MRLs) established by the Codex Alimentarius Commission (Codex), as required by FFDCA section 408(b)(4). The Codex Alimentarius is a joint United Nations Food and Agriculture Organization/World Health Organization food standards program, and it is recognized as an international food safety standards-setting organization in trade agreements to which the United States is a party. EPA may establish a tolerance that is different from a Codex MRL; however, FFDCA section 408(b)(4) requires that EPA explain the reasons for departing from the Codex level.

The Codex has not established a MRL for halosulfuron-methyl for any of the crops covered by this Final Rule.

#### V. Conclusion

Therefore, a tolerance is established for residues of halosulfuron-methyl, methyl 5-[(4,6-dimethoxy-2-pyrimidinyl)amino]carbonylamino-sulfonyl]-3-chloro-1-methyl-1H-pyrazole-4-carboxylate, including its metabolites and degradates, in or on the fruit, pome, group 11–10 at 0.05 ppm, and a tolerance with regional registration is established for fruit, small vine climbing, except fuzzy kiwifruit, subgroup 13–07F at 0.05 ppm. In addition, the existing tolerance for the commodity “Apple” in paragraph (a)(2) of § 180.479 is removed since it is covered by the newly established fruit, pome, group 11–10 tolerance.

#### VI. Statutory and Executive Order Reviews

This action establishes tolerances under FFDCA section 408(d) in response to a petition submitted to the

Agency. The Office of Management and Budget (OMB) has exempted these types of actions from review under Executive Order 12866, entitled “Regulatory Planning and Review” (58 FR 51735, October 4, 1993). Because this action has been exempted from review under Executive Order 12866, this action is not subject to Executive Order 13211, entitled “Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use” (66 FR 28355, May 22, 2001) or Executive Order 13045, entitled “Protection of Children from Environmental Health Risks and Safety Risks” (62 FR 19885, April 23, 1997). This action does not contain any information collections subject to OMB approval under the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), nor does it require any special considerations under Executive Order 12898, entitled “Federal Actions to Address Environmental Justice in Minority Populations and Low-Income Populations” (59 FR 7629, February 16, 1994).

Since tolerances and exemptions that are established on the basis of a petition under FFDCA section 408(d), such as the tolerance in this final rule, do not require the issuance of a proposed rule, the requirements of the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), do not apply.

This action directly regulates growers, food processors, food handlers, and food retailers, not States or tribes, nor does this action alter the relationships or distribution of power and responsibilities established by Congress in the preemption provisions of FFDCA section 408(n)(4). As such, the Agency has determined that this action will not have a substantial direct effect on States or tribal governments, on the relationship between the national government and the States or tribal governments, or on the distribution of power and responsibilities among the various levels of government or between the Federal Government and Indian tribes. Thus, the Agency has determined that Executive Order 13132, entitled “Federalism” (64 FR 43255, August 10, 1999) and Executive Order 13175, entitled “Consultation and Coordination with Indian Tribal Governments” (65 FR 67249, November 9, 2000) do not apply to this action. In addition, this action does not impose any enforceable duty or contain any unfunded mandate as described under Title II of the Unfunded Mandates Reform Act (UMRA) (2 U.S.C. 1501 *et seq.*).

This action does not involve any technical standards that would require Agency consideration of voluntary

consensus standards pursuant to section 12(d) of the National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note).

**VII. Congressional Review Act**

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), EPA will submit a report containing this rule and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

**List of Subjects in 40 CFR Part 180**

Environmental protection, Administrative practice and procedure, Agricultural commodities, Pesticides and pests, Reporting and recordkeeping requirements.

Dated: September 4, 2015.

**Susan Lewis,**

*Director, Registration Division, Office of Pesticide Programs.*

Therefore, 40 CFR chapter I is amended as follows:

**PART 180—[AMENDED]**

■ 1. The authority citation for part 180 continues to read as follows:

**Authority:** 21 U.S.C. 321(q), 346a and 371.

■ 2. In § 180.479:

- a. Remove the entry for “Apple” from the table in paragraph (a)(2);
- b. Add alphabetically the entry for “Fruit, pome, group 11–10” to the table in paragraph (a)(2), and
- c. Revise paragraph (c).

The additions and revision read as follows:

**§ 180.479 Halosulfuron-methyl; tolerances for residues.**

- (a) \* \* \*
- (2) \* \* \*

Commodity	Parts per million
* * * *	
Fruit, pome, group 11–10 .....	0.05
* * * *	

(c) *Tolerances with regional registrations.* Tolerances with regional registrations are established for residues of the herbicide halosulfuron-methyl, methyl 5-[[4,6-dimethoxy-2-pyrimidinyl]amino]carbonylamino-sulfonyl]-3-chloro-1-methyl-1H-pyrazole-4-carboxylate, including its metabolites and

degradates, in or on the commodities in the following table. Compliance with the tolerance levels specified in the following table is to be determined by measuring only halosulfuron-methyl.

Commodity	Parts per million
Fruit, small vine climbing, except fuzzy kiwifruit, subgroup 13–07F .....	0.05
* * * *	

[FR Doc. 2015–23298 Filed 9–16–15; 8:45 am]  
**BILLING CODE 6560–50–P**

**DEPARTMENT OF HOMELAND SECURITY**

**Federal Emergency Management Agency**

**44 CFR Part 64**

[Docket ID FEMA–2015–0001: Internal Agency Docket No. FEMA–8399]

**Suspension of Community Eligibility**

**AGENCY:** Federal Emergency Management Agency, DHS.

**ACTION:** Final rule.

**SUMMARY:** This rule identifies communities where the sale of flood insurance has been authorized under the National Flood Insurance Program (NFIP) that are scheduled for suspension on the effective dates listed within this rule because of noncompliance with the floodplain management requirements of the program. If the Federal Emergency Management Agency (FEMA) receives documentation that the community has adopted the required floodplain management measures prior to the effective suspension date given in this rule, the suspension will not occur and a notice of this will be provided by publication in the **Federal Register** on a subsequent date. Also, information identifying the current participation status of a community can be obtained from FEMA’s Community Status Book (CSB).

**DATES:** The effective date of each community’s scheduled suspension is the third date (“Susp.”) listed in the third column of the following tables.

**ADDRESSES:** The CSB is available at <http://www.fema.gov/fema/csb.shtm>.

**FOR FURTHER INFORMATION CONTACT:** If you want to determine whether a particular community was suspended on the suspension date or for further information, contact Bret Gates, Federal Insurance and Mitigation

Administration, Federal Emergency Management Agency, 500 C Street SW., Washington, DC 20472, (202) 646–4133.

**SUPPLEMENTARY INFORMATION:** The NFIP enables property owners to purchase Federal flood insurance that is not otherwise generally available from private insurers. In return, communities agree to adopt and administer local floodplain management measures aimed at protecting lives and new construction from future flooding. Section 1315 of the National Flood Insurance Act of 1968, as amended, 42 U.S.C. 4022, prohibits the sale of NFIP flood insurance unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed in this document no longer meet that statutory requirement for compliance with program regulations, 44 CFR part 59. Accordingly, the communities will be suspended on the effective date in the third column. As of that date, flood insurance will no longer be available in the community. We recognize that some of these communities may adopt and submit the required documentation of legally enforceable floodplain management measures after this rule is published but prior to the actual suspension date. These communities will not be suspended and will continue to be eligible for the sale of NFIP flood insurance. A notice withdrawing the suspension of such communities will be published in the **Federal Register**.

In addition, FEMA publishes a Flood Insurance Rate Map (FIRM) that identifies the Special Flood Hazard Areas (SFHAs) in these communities. The date of the FIRM, if one has been published, is indicated in the fourth column of the table. No direct Federal financial assistance (except assistance pursuant to the Robert T. Stafford Disaster Relief and Emergency Assistance Act not in connection with a flood) may be provided for construction or acquisition of buildings in identified SFHAs for communities not participating in the NFIP and identified for more than a year on FEMA’s initial FIRM for the community as having flood-prone areas (section 202(a) of the Flood Disaster Protection Act of 1973, 42 U.S.C. 4106(a), as amended). This prohibition against certain types of Federal assistance becomes effective for the communities listed on the date shown in the last column. The Administrator finds that notice and public comment procedures under 5 U.S.C. 553(b), are impracticable and unnecessary because communities listed

in this final rule have been adequately notified.

Each community receives 6-month, 90-day, and 30-day notification letters addressed to the Chief Executive Officer stating that the community will be suspended unless the required floodplain management measures are met prior to the effective suspension date. Since these notifications were made, this final rule may take effect within less than 30 days.

*National Environmental Policy Act.* This rule is categorically excluded from the requirements of 44 CFR part 10, Environmental Considerations. No environmental impact assessment has been prepared.

*Regulatory Flexibility Act.* The Administrator has determined that this rule is exempt from the requirements of the Regulatory Flexibility Act because the National Flood Insurance Act of 1968, as amended, Section 1315, 42

U.S.C. 4022, prohibits flood insurance coverage unless an appropriate public body adopts adequate floodplain management measures with effective enforcement measures. The communities listed no longer comply with the statutory requirements, and after the effective date, flood insurance will no longer be available in the communities unless remedial action takes place.

*Regulatory Classification.* This final rule is not a significant regulatory action under the criteria of section 3(f) of Executive Order 12866 of September 30, 1993, Regulatory Planning and Review, 58 FR 51735.

*Executive Order 13132, Federalism.* This rule involves no policies that have federalism implications under Executive Order 13132.

*Executive Order 12988, Civil Justice Reform.* This rule meets the applicable standards of Executive Order 12988.

*Paperwork Reduction Act.* This rule does not involve any collection of information for purposes of the Paperwork Reduction Act, 44 U.S.C. 3501 *et seq.*

**List of Subjects in 44 CFR Part 64**

Flood insurance, Floodplains.

Accordingly, 44 CFR part 64 is amended as follows:

**PART 64—[AMENDED]**

■ 1. The authority citation for Part 64 continues to read as follows:

**Authority:** 42 U.S.C. 4001 *et seq.*; Reorganization Plan No. 3 of 1978, 3 CFR, 1978 Comp.; p. 329; E.O. 12127, 44 FR 19367, 3 CFR, 1979 Comp.; p. 376.

**§ 64.6 [Amended]**

■ 2. The tables published under the authority of § 64.6 are amended as follows:

[FR Doc. 2015–23303 Filed 9–16–15; 8:45 am]

**BILLING CODE 9110–12–P**

**FEDERAL COMMUNICATIONS COMMISSION**

**47 CFR Part 1**

[MD Docket No. 15–121; FCC 15–108]

**Assessment and Collection of Regulatory Fees for Fiscal Year 2015**

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** In this document the Commission revises its Schedule of Regulatory Fees to recover an amount of \$339,844,000 that Congress has required the Commission to collect for fiscal year 2015. Section 9 of the Communications

Act of 1934, as amended, provides for the annual assessment and collection of regulatory fees under sections 9(b)(2) and 9(b)(3), respectively, for annual “Mandatory Adjustments” and “Permitted Amendments” to the Schedule of Regulatory Fees.

**DATES:** Effective September 17, 2015. To avoid penalties and interest, regulatory fees should be paid by the due date of September 24, 2015.

**FOR FURTHER INFORMATION CONTACT:** Roland Helvajian, Office of Managing Director at (202) 418–0444.

**SUPPLEMENTARY INFORMATION:** This is a summary of the Commission’s Report and Order (R&O), FCC 15–108, MD Docket No. 15–121, adopted on September 1, 2015 and released on September 2, 2015.

**I. Administrative Matters**

*A. Final Regulatory Flexibility Analysis*

1. As required by the Regulatory Flexibility Act of 1980 (RFA),<sup>1</sup> the

<sup>1</sup> See 5 U.S.C. 603. The RFA, see 5 U.S.C. 601–612, has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996

Commission has prepared a Final Regulatory Flexibility Analysis (FRFA) relating to this Report and Order. The FRFA is contained towards the end of this document.

*B. Final Paperwork Reduction Act of 1995 Analysis*

2. This document does not contain new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. In addition, therefore, it does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4).

*C. Congressional Review Act*

3. The Commission will send a copy of this Report and Order to Congress and the Government Accountability

(SBREFA), Public Law 104–121, Title II, 110 Stat. 847 (1996). The SBREFA was enacted as Title II of the Contract with America Advancement Act of 1996 (CWAAA).

Office pursuant to the Congressional Review Act. 5 U.S.C. 801(a)(1)(A).

## II. Introduction and Executive Summary

4. This *Report and Order* adopts a schedule of regulatory fees to assess and collect \$339,844,000 in regulatory fees for Fiscal Year (FY) 2015, pursuant to Section 9 of the Communications Act of 1934, as amended (the Act or Communications Act) and the Commission's FY 2015 Appropriation.<sup>2</sup> The schedule of regulatory fees for FY 2015 adopted here is attached in Table C. These regulatory fees are due in September 2015.

5. The FY 2015 regulatory fees are based on the proposals in the *FY 2015 NPRM*,<sup>3</sup> considered in light of the comments received and Commission analysis. The FY 2015 regulatory fee schedule includes the following noteworthy changes from prior years: (1) A reduction in regulatory fees for the submarine cable/terrestrial and satellite bearer circuit (IBC) category relative to other fee categories in the International Bureau; (2) the first fee rate for Direct Broadcast Satellite (DBS) as a subcategory of the cable television and Internet Protocol Television (IPTV) regulatory fee category; (3) the first fee rate for toll free numbers; and (4) the elimination of the regulatory fee component of two fee categories: amateur radio Vanity Call Signs and General Mobile Radio Service (GMRS).<sup>4</sup> In addition, for FY 2015, in calculating the fee schedule, the Commission also reallocated four International Bureau full time employees (FTEs)<sup>5</sup> from direct to indirect.

<sup>2</sup> Section 9 regulatory fees are mandated by Congress and collected to recover the regulatory costs associated with the Commission's enforcement, policy and rulemaking, user information, and international activities. 47 U.S.C. 159(a). Public Law 113-235, Consolidated and Further Continuing Appropriation Act of 2015 (*FY 2015 Appropriation*) ("Provided further, That \$339,844,000 of offsetting collections shall be assessed and collected pursuant to section 9 of title I of the Communications Act of 1934, shall be retained and used for necessary expenses and shall remain available until expended.")

<sup>3</sup> *Assessment and Collection of Regulatory Fees for Fiscal Year 2015*, Notice of Proposed Rulemaking, Report and Order, and Order, 30 FCC Rcd 5354 (2015) (*FY 2015 NPRM, FY 2015 Fee Reform Report and Order*).

<sup>4</sup> See *FY 2015 Fee Reform Report and Order*, 30 FCC Rcd at 5361-62, paras. 19-22. As required by section 9(b)(4)(B) of the Act, "permitted amendment" letters were mailed June 4, 2015 and these amendments will take effect 90 days after congressional notification, *i.e.*, September 3, 2015.

<sup>5</sup> One FTE, a "Full Time Equivalent" or "Full Time Employee," is a unit of measure equal to the work performed annually by a full time person (working a 40 hour workweek for a full year) assigned to the particular job, and subject to agency personnel staffing limitations established by the U.S. Office of Management and Budget.

## III. Background

6. Congress adopted a regulatory fee schedule in 1993<sup>6</sup> and authorized the Commission to assess and collect annual regulatory fees pursuant to the schedule, as amended by the Commission.<sup>7</sup> As a result, the Commission annually reviews the regulatory fee schedule, proposes changes to the schedule to reflect changes in the amount of its appropriation, and proposes increases or decrease to the schedule of regulatory fees.<sup>8</sup> The Commission makes changes to the regulatory fee schedule "if the Commission determines that the schedule requires amendment to comply with the requirements"<sup>9</sup> of section 9(b)(1)(A) of the Act.<sup>10</sup> The Commission may also add, delete, or reclassify services in the fee schedule to reflect additions, deletions, or changes in the nature of its services "as a consequence of Commission rulemaking proceedings or changes in law." Thus, for each fiscal year, the proposed fee schedule in the annual Notice of Proposed Rulemaking (NPRM) will reflect changes in the amount appropriated for the performance of the FCC's regulatory activities, changes in the industries represented by the regulatory fee payers, changes in Commission FTE levels, and any other issues of relevance to the proposed fee schedule.<sup>11</sup> After receipt and review of comments, the Commission issues a Report and Order adopting the fee schedule for the fiscal year and sets out the procedures for payment of fees.

7. The Commission calculates the fees by first determining the FTE number of employees performing the regulatory activities specified in section 9(a), "adjusted to take into account factors that are reasonably related to the benefits provided to the payor of the fee by the Commission's activities . . ." <sup>12</sup> FTEs are categorized as "direct" if they are performing regulatory activities in one of the "core" bureaus, *i.e.*, the

<sup>6</sup> 47 U.S.C. 159 (g) (showing original fee schedule prior to Commission amendment).

<sup>7</sup> 47 U.S.C. 159.

<sup>8</sup> 47 U.S.C. 159(b)(1)(B).

<sup>9</sup> 47 U.S.C. 159(b)(2).

<sup>10</sup> 47 U.S.C. 159(b)(1)(A).

<sup>11</sup> Section 9(b)(2) discusses mandatory amendments to the fee schedule and Section 9(b)(3) discusses permissive amendments to the fee schedule. Both mandatory and permissive amendments are not subject to judicial review. 47 U.S.C. 159(b)(2) and (3).

<sup>12</sup> 47 U.S.C. 159(b)(1)(A). When section 9 was adopted, the total FTEs were to be calculated based on the number of FTEs in the Private Radio Bureau, Mass Media Bureau, and Common Carrier Bureau. (The names of these bureaus were subsequently changed.) Satellites and submarine cable were regulated through the Common Carrier Bureau before the International Bureau was created.

Wireless Telecommunications Bureau, Media Bureau, Wireline Competition Bureau, and part of the International Bureau. All other FTEs are considered "indirect."<sup>13</sup> The total FTEs for each fee category is calculated by counting the number of direct FTEs in the core bureau that regulates that category, plus a proportional allocation of indirect FTEs. Next, the Commission allocates the total amount to be collected among the various regulatory fee categories. This allocation is based on the number of FTEs assigned to work in each regulatory fee category. Each regulatee within a fee category pays its proportionate share based on an objective measure, *e.g.*, revenues, number of subscribers, or licenses.<sup>14</sup>

8. As part of its annual review, the Commission regularly seeks to improve its regulatory fee analysis.<sup>15</sup> For example, in the *FY 2013 Report and Order*, the Commission adopted updated FTE allocations to more accurately reflect the number of FTEs working on regulation and oversight of the regulatees in the various fee categories,<sup>16</sup> combined the UHF and VHF television stations into one regulatory fee category,<sup>17</sup> and created a fee category to include IPTV.<sup>18</sup> Subsequently, in the *FY 2014 Report and Order and FNPRM*, the Commission adopted a new fee category for toll free numbers,<sup>19</sup> increased the de minimis threshold,<sup>20</sup> and eliminated several categories from the regulatory fee

<sup>13</sup> The indirect FTEs are the employees from the International Bureau (in part), Enforcement Bureau, Consumer & Governmental Affairs Bureau, Public Safety & Homeland Security Bureau, Chairman and Commissioners' offices, Office of the Managing Director, Office of General Counsel, Office of the Inspector General, Office of Communications Business Opportunities, Office of Engineering and Technology, Office of Legislative Affairs, Office of Strategic Planning and Policy Analysis, Office of Workplace Diversity, Office of Media Relations, and Office of Administrative Law Judges, totaling 1,041 indirect FTEs.

<sup>14</sup> See *Assessment and Collection of Regulatory Fees*, Notice of Proposed Rulemaking, 27 FCC Rcd 8458, 8461-62, paras. 8-11 (2012) (*FY 2012 NPRM*).

<sup>15</sup> See *Assessment and Collection of Regulatory Fees for Fiscal Year 2008*, MD Docket No. 08-65, Report and Order and Further Notice of Proposed Rulemaking, 24 FCC Rcd 6388 (2008) (*FY 2008 Further Notice*).

schedule.<sup>21</sup> Earlier this year, in our *FY 2015 Fee Reform Report and Order*, we added a subcategory for DBS providers in the cable television and IPTV regulatory fee category.<sup>22</sup>

9. In our *FY 2015 NPRM*, we proposed to collect \$339,844,000 in regulatory fees and included a detailed, proposed fee schedule. We also sought comment on (1) a proposal revising the apportionment between the submarine cable/terrestrial and satellite bearer circuits fee category and the space station/earth station fee category; (2) revising an apportionment of regulatory fees among broadcasters; (3) a request for relief from regulatory fee assessments for radio stations in Puerto Rico filed by the Puerto Rico Broadcasters Association (PRBA);<sup>23</sup> (4) raising earth station regulatory fees relative to space station fees;<sup>24</sup> (5) a new regulatory fee for toll free numbers; (6) a new regulatory fee for DBS (as a subcategory in the cable television and IPTV regulatory fee category); and (7) whether certain FTEs should be allocated as direct instead of indirect.<sup>25</sup> We received 13 comments and eight reply comments. The list of commenters is attached in Table A.

#### IV. Report And Order

##### A. Discussion

##### 1. FY 2015 Regulatory Fees

10. In this Report and Order, we adopt a regulatory fee schedule for FY 2015, pursuant to Section 9 of the Communications Act and our FY 2015 appropriation statute in order to collect \$339,844,000 in regulatory fees.<sup>26</sup> Of this amount, we project approximately \$18.56 million (5.45 percent of the total FTE allocation) in fees from the International Bureau regulatees;<sup>27</sup> \$69.07 million (20.28 percent of the

total FTE allocation) in fees from the Wireless Telecommunications Bureau regulatees;<sup>28</sup> \$132.81 million (38.99 percent of the total FTE allocation) from Wireline Competition Bureau regulatees;<sup>29</sup> and \$120.15 million (35.28 percent of the total FTE allocation) from the Media Bureau regulatees.<sup>30</sup> These regulatory fees are due in September 2015. The schedule of regulatory fees for FY 2015 adopted here is attached as Table C.

##### 2. Toll Free Numbers

11. In the *FY 2014 Report and Order and FNPRM*,<sup>31</sup> we adopted a regulatory fee category for each toll free number managed by a RespOrg.<sup>32</sup> In the *FY 2015 NPRM*, we sought comment on a regulatory fee of 12 cents per toll free number.<sup>33</sup> In this *Report and Order*, we

<sup>28</sup> Includes Commercial Mobile Radio Service (CMRS), CMRS messaging, Broadband Radio Service/Local Multipoint Distribution Service (BRS/LMDS), and multi-year wireless licensees.

<sup>29</sup> Includes Interstate Telecommunications Service Providers (ITSP) and toll free numbers.

<sup>30</sup> Includes AM radio, FM radio, television, low power/FM, cable and IPTV, DBS, and Cable Television Relay Service (CARS) licenses.

<sup>31</sup> *FY 2014 Report and Order and FNPRM*, 29 FCC Rcd at 10777–79, paras. 25–28. We adopted this category for working, assigned, and reserved toll free numbers and for toll free numbers that are in the “transit” status, or any other status as defined in section 52.103 of the Commission’s rules. The regulatory fee, assessed on RespOrgs, for toll free numbers is limited to toll free numbers that are accessible within the United States.

<sup>32</sup> A Responsible Organization or RespOrg is a company that manages toll free telephone numbers for subscribers. They use the SMS/800 data base to verify the availability of specific numbers and to reserve the numbers for subscribers. See 47 CFR 52.101(b). ITTA contends that “it makes no sense to collect this fee from entities that already pay regulatory fees as ITSPs.” ITTA Comments at 7–8. In the *FY 2014 Report and Order and FNPRM*, 29 FCC Rcd 10767, 10777–79, paras. 25–28, we explained the issue in some detail. In particular, we noted that there may be many toll free numbers controlled or managed by entities, Responsible Organizations or RespOrgs, that in some cases are not carriers. As a result, the Commission adopted a regulatory fee on Resp Orgs, for each toll free number, because there appears to be many toll free numbers controlled or managed by Resp Orgs that are not carriers, and therefore, have not been paying regulatory fees. Commission FTEs in the Wireline Competition Bureau and the Enforcement Bureau work on toll free numbering issues and other related activities. Because Commission FTEs work on toll free number regulation, we adopted a regulatory fee category for toll free numbers to recover the associated costs. It is also important to note that the amount assessed for toll free numbers reduces the total regulatory fee assessment for ITSPs. In the *FY 2014 Report and Order and FNPRM*, we stated that: “Based on evaluation, the FTEs involved in toll free issues are primarily from the Wireline Competition Bureau. . . . Accordingly, a regulatory fee assessed on toll free numbers reduces the ITSP regulatory fee total.” *FY 2014 Report and Order and FNPRM*, 29 FCC Rcd at 10778, para. 27 (footnote omitted).

<sup>33</sup> *FY 2015 NPRM*, 30 FCC Rcd at 5358, para. 10.

adopt the proposed fee of 12 cents per toll free number.

##### 3. Submarine Cable

12. In the *FY 2014 Report and Order and FNPRM*, we concluded that the regulatory fee assessment for the submarine cable/terrestrial and satellite bearer circuits fee category did not fairly take into account the Commission’s minimal oversight and regulation of the international bearer circuit (IBC) industry. Accordingly, we reduced the total regulatory fee apportionment for submarine cable/terrestrial and satellite bearer circuits by five percent and stated that we would revisit the issue to determine if additional adjustment is warranted.<sup>34</sup> Subsequently, in the *FY 2015 NPRM*, we sought comment on further reducing the regulatory fee allocation for the submarine cable/terrestrial and satellite bearer circuit fee category.<sup>35</sup> In particular, we observed that after the initial licensing process, the regulatory activity concerning submarine cable/terrestrial and satellite bearer circuit systems is primarily limited to reviewing the Circuit Capacity Reports<sup>36</sup> and quarterly reports filed by licensees.<sup>37</sup> Based on our tentative conclusion that the fee remained excessive relative to the minimal Commission oversight and regulation of this industry, we proposed another five percent decrease in fees.<sup>38</sup>

13. NASCA, representing submarine cable operators,<sup>39</sup> argues that the proposed fee remains excessive because the industry would be responsible for 27.6 percent of all International Bureau regulatory fees.<sup>40</sup> Commenters also contend that the apportionment of regulatory fees for submarine cable operators and terrestrial and satellite bearer circuits remains too high due to the small number of FTEs working on

<sup>34</sup> See *FY 2014 Report and Order and FNPRM*, 29 FCC Rcd at 10772, para. 11.

<sup>22</sup> *FY 2015 Fee Reform Report and Order*, 30 FCC Rcd at 5364–5373, paras. 28–41. We also eliminated two additional fee categories. See *id.*, 30 FCC Rcd at 5361–62, paras. 19–22.

<sup>23</sup> See Letter from Messrs. Francisco Montero, Esq. and Jonathan R. Markman, Esq., Counsel for the Puerto Rico Broadcasters Association, filed in Docket No. 14–92, to Marlene Dortch, Secretary, Federal Communications Commission (Dec. 10, 2014) (PRBA Letter).

<sup>24</sup> Earth station fees were previously increased by 7.5 percent. See *FY 2014 Report and Order*, 29 FCC Rcd at 10772–73, para. 12.

<sup>25</sup> This issue was raised previously. See, e.g., *FY 2014 NPRM*, 29 FCC Rcd at 6425–27, paras. 22–27.

<sup>26</sup> Section 9 regulatory fees are mandated by Congress and collected to recover the regulatory costs associated with the Commission’s enforcement, policy and rulemaking, user information, and international activities. 47 U.S.C. 159(a).

<sup>27</sup> Includes satellites, earth stations, and international bearer circuits (submarine cable systems and satellite and terrestrial bearer circuits).

those services.<sup>41</sup> Some commenters observe as well that the high regulatory fees imposed on the submarine cable operators can place the United States at a competitive disadvantage because Canada and Mexico have much lower fees and the submarine cable industry may choose to land new cables in those countries instead.<sup>42</sup> Commenters suggest that this could pose national security issues if the submarine cable operators choose to build out in Canada and Mexico, because those facilities would not be subject to the Communications Assistance for Law Enforcement Act, commonly known as CALEA.<sup>43</sup> EchoStar contends that we have not supported our proposal to reduce the IBC fees with sufficient facts.<sup>44</sup>

14. In 2009, the Commission adopted a new regulatory fee methodology for submarine cable based on a proposal by a large group of submarine cable operators.<sup>45</sup> Under this methodology, after we apportion the IBC revenue requirement between the terrestrial and satellite facilities and submarine cable, we assess the submarine cable systems on a per cable landing license basis, with higher fees for larger systems and lower fees for smaller systems (the regulatory fees for terrestrial and satellite facilities are still assessed on a per bearer circuit basis).<sup>46</sup> The regulatory fees that are now paid by the submarine cable operators cover the services provided to common carriers using the submarine cable circuits in addition to the services that the International Bureau provides to submarine cable operators. The International Bureau's regulatory activity concerning submarine cable includes licensing,<sup>47</sup> reviewing the Circuit Capacity Reports<sup>48</sup> and filed quarterly reports.<sup>49</sup> In addition, all

International Bureau services provided to common carriers using the submarine cable circuits, such as benchmarks enforcement,<sup>50</sup> protection from anticompetitive actions by foreign carriers, foreign ownership rulings (Petitions for Declaratory Rulings, or PDRs), section 214 authorizations, and bilateral and multilateral negotiations and representation of U.S. interests at international organizations, are all provided by the International Bureau on behalf of the common carriers using submarine cable circuits. Upon this further analysis, we conclude that our previous estimate of two FTEs working on IBC issues discussed in *FY 2014 Report and Order*, did not take these issues into account.<sup>51</sup> Nevertheless, as we have discussed previously in the *FY 2013 NPRM*, *FY 2014 NPRM*, and the *FY 2015 NPRM*,<sup>52</sup> the oversight and regulation of the IBC industry may warrant additional adjustment to the fee allocation. For the reasons discussed above, we reduce the regulatory fee apportionment for submarine cable/terrestrial and satellite bearer circuits by 7.5 percent to more accurately reflect the regulation and oversight for the industry.<sup>53</sup> This analysis reflects both the direct work on submarine cable/terrestrial and satellite bearer circuit issues and other common carrier issues by International Bureau FTEs and the indirect FTEs that devote their time to International Bureau regulatees as a whole. We find that this decrease in the regulatory fees paid by IBCs more accurately reflects the level of regulation and oversight for this industry. Also, we reject the speculation that failure to reduce regulatory fees as much as the submarine cable operators might prefer could lead to a change in the cable landing locations. We also reject EchoStar's statement that our proposal lacked factual support. As noted above, the regulatory oversight of this fee category has been explained in detail in

publishes annual industry analysis reports based on that data.

<sup>50</sup> See, e.g., *International Settlement Rates*, IB Docket No. 96-261, Report and Order, FCC 97-280, 12 FCC Rcd 19806 (1997) (*Benchmarks Order*); Report and Order on Reconsideration and Order Lifting Stay, 14 FCC Rcd 9256 (1999) (*Benchmarks Reconsideration Order*); *aff'd sub nom. Cable & Wireless*, 166 F.3d 1224.

<sup>51</sup> *FY 2014 Report and Order*, 29 FCC Rcd at 10772, para. 11.

<sup>52</sup> *FY 2013 NPRM*, 28 FCC Rcd at 7800-7803, paras. 24-29; *FY 2014 NPRM*, 29 FCC Rcd at 6427-28, para. 28; *FY 2015 NPRM*, 30 FCC Rcd at 5358-59, para. 12.

<sup>53</sup> The actual decrease is higher than 7.5 percent due to the reallocation of four direct FTEs, discussed in paragraph 25, because the submarine cable percentage of International Bureau regulatory fees was 31.36 percent in FY 2014 and will be 24.85 percent in 2015, a reduction of more than 20 percent.

this, and prior proceedings,<sup>54</sup> and has been the subject of comments by submarine cable operators for a number of years.

#### 4. Earth Stations

15. In the *FY 2014 NPRM*, the Commission recognized that the International Bureau's oversight and regulation of the satellite industry involves FTEs working on legal, technical, and policy issues pertaining to both space station and earth station operations and is therefore interdependent to some degree.<sup>55</sup> For that reason, we sought comment on whether we should increase the earth station regulatory fee allocation in order to reflect more appropriately the number of FTEs devoted to the regulation and oversight of the earth station portion of the satellite industry.<sup>56</sup> In the FY 2014 regulatory fee proceeding, we increased the regulatory fees paid by earth station licensees by approximately 7.5 percent based on our analysis and review of the record.<sup>57</sup>

16. In the *FY 2015 NPRM*, we sought comment on whether to raise the earth station regulatory fees again.<sup>58</sup> We find, however, that this issue requires further analysis. In particular, due to comments suggesting that we adopt different regulatory fees for different types of earth stations and an ongoing proceeding concerning Part 25 (Satellite Communications) of the Commission's rules which may affect the distribution of FTE work, we plan to further examine and consider this issue for FY 2016.<sup>59</sup> In doing so, we intend to seek comment on EchoStar's proposal to assess different levels of regulatory fees on different types of earth station licenses.<sup>60</sup>

#### 5. FTE Reallocations

17. As explained above in paragraph five, we calculate regulatory fees by classifying FTEs either as direct or indirect. FTEs classified as direct are further associated with one of the core bureaus. The Commission now updates FTE allocations on an annual basis to more accurately reflect the number of FTEs working on regulation and oversight of the regulatees in the various fee categories.<sup>61</sup> The Commission has

<sup>54</sup> See *FY 2013 NPRM*, 28 FCC Rcd at 7800-7803, paras. 24-29; *FY 2014 NPRM*, 29 FCC Rcd at 6427-28, para. 28; *FY 2015 NPRM*, 30 FCC Rcd at 5358-59, para. 12.

<sup>42</sup> Coalition Comments at 8.

<sup>43</sup> Coalition Comments at 8.

<sup>44</sup> EchoStar Comments at 5.

<sup>45</sup> *Assessment and Collection of Regulatory Fees for Fiscal Year 2008*, Second Report and Order, 24 FCC Rcd 4208 (2009) (*Submarine Cable Order*).

<sup>46</sup> *Submarine Cable Order*, 24 FCC Rcd at 4214-17, paras. 13-22.

<sup>47</sup> The International Bureau reviews, processes, analyzes, and grants applications for submarine cable landing license applications, transfers, assignments, and modifications. The bureau also coordinates processing of submarine cable landing license applications with the relevant Executive Branch agencies.

<sup>48</sup> See *Second Report and Order*, 28 FCC Rcd at 601-08, paras. 89-108.

<sup>49</sup> See 47 CFR 1.767(l). The International Bureau reviews Part 43 submarine cable circuit capacity and traffic and revenue filings, and compiles and

also previously determined that some of the International Bureau FTEs should be considered indirect instead of direct.<sup>62</sup> We find that apart from the unique nature of the International Bureau FTEs, the work of all the FTEs in a core bureau contributes to the cost of regulating and overseeing the licensees of that bureau. Therefore, we may reasonably expect that the work of the FTEs in the core bureaus would remain focused on the industry segment regulated by each of those bureaus. The work of the FTEs in the remaining (*i.e.*, indirect) bureaus and offices benefits the Commission and the telecommunications industry and is not specifically focused on the licensees of a particular core bureau. Given the significant implications of reassignment of FTEs in our fee calculation, we make changes to FTE classifications only after performing considerable analysis and finding the clearest case for reassignment.<sup>63</sup>

#### a. Request To Characterize Indirect FTEs as Direct FTEs

18. SIA and EchoStar propose that we consider FTEs working in certain divisions of the Enforcement Bureau and the Consumer & Governmental Affairs Bureau and the Office of Engineering & Technology (*i.e.*, indirect FTEs) as direct FTEs, associated with a core bureau for purposes of regulatory fee calculation.<sup>64</sup> SIA contends that the work in the Market Disputes Resolution Division “is limited to complaints against common carriers and pole attachment disputes”<sup>65</sup> and the “Telecommunications Consumers Division focuses on protecting consumers from fraudulent, misleading, and other harmful practices involving telecommunications, such as slamming.”<sup>66</sup> SIA’s description of these two Enforcement Bureau divisions underestimates the range of issues that they investigate.<sup>67</sup> EchoStar argues that the Office of Engineering &

Technology’s regulatory work suggests that “no more than 7 percent of the applicable FTEs for the OET should be allocated to space-related IB licensees.”<sup>68</sup> This proposal raised by SIA and EchoStar involves more than an analysis of two divisions and one office but rather would require an assessment of how all work done by FTEs in a bureau or office not classified as a core bureau could be associated with the work of a core bureau, such that additional FTEs could be allocated to the core bureau. However, FTEs are assigned as indirect in our regulatory fee calculation where the FTEs work on a variety of issues that cannot be attributed to one particular type of industry or regulatee at this time.

19. The Enforcement Bureau and Consumer & Governmental Affairs FTEs and other indirect FTEs, such as those in the Office of Engineering & Technology, work on a wide range of matters, not all directly assignable to a particular core bureau. We recognize that before the Enforcement Bureau was created, the core bureaus each had an enforcement division and those FTEs would have been assigned to those core bureaus. Currently, however, most enforcement activity is consolidated into the Enforcement Bureau, therefore the FTEs may work on a range of issues and many of their investigations cannot be assigned to a specific core bureau, *e.g.*, investigations that involve more than one service. While SIA suggests that we might track informal complaints filed in the Consumer & Governmental Affairs Bureau and associate them with a core licensing bureau based on the number of informal complaints in each category over a certain time period,<sup>69</sup> we find that this would not be feasible at this time because the types of informal complaints can vary considerably and often cover areas that are not specifically correlated with one core bureau, *e.g.*, billing issues for bundled services. For these reasons, we conclude that reallocating indirect FTEs as direct as suggested by EchoStar and SIA is not feasible at this time. However, we will continue to analyze this issue in future regulatory fee proceedings.

#### b. Request To Associate Direct FTEs With a Different Core Bureau

20. NAB notes that the FTEs in the Media Bureau who work on issues pertaining to the upcoming spectrum

incentive auction to repurpose broadcast television spectrum to wireless use should be reallocated to the Wireless Telecommunications Bureau for regulatory fee purposes.<sup>70</sup> SIA asks us to “re-evaluate whether it is appropriate to exclude auction FTEs in assessing direct costs.”<sup>71</sup> FTE time devoted to developing and implementing the upcoming spectrum incentive auction—direct and indirect costs—is not included in the calculation of fees and is not offset by the collection of regulatory fees. Instead, time devoted to developing and implementing the incentive auction is tracked separately from other work performed by Media Bureau and other FTEs and is offset by the auction proceeds that the Commission is permitted to retain pursuant to section 309(j)(8) of the Communications Act and the Commission’s annual appropriation statute.<sup>72</sup> Thus, the Commission is unable, as a legal matter, to implement these proposals.

#### 6. DBS Rate Issues

21. In the *FY 2015 NPRM*, we sought comment on setting the initial rate for DBS regulatory fees, as a subset of the cable television and IPTV category, at 12 cents per year, or one cent per month.<sup>73</sup> Several commenters contend that we should require DBS operators to pay the same rate as cable television and IPTV.<sup>74</sup> DBS commenters contend that paying the same rate as cable television/IPTV would cause “rate shock” and if we adopt a fee it should be 12 cents as proposed.<sup>75</sup>

22. When adopting the new regulatory fee subcategory for DBS within the cable and IPTV category, we determined a variety of regulatory developments have increased the amount of regulatory activity by the Media Bureau FTEs involving regulation and oversight of MVPDs, including DBS providers.<sup>76</sup> For example, DBS providers (and cable television operators) are permitted to file program access complaints<sup>77</sup> and complaints seeking relief under the retransmission consent good faith

<sup>62</sup> *FY 2013 Report and Order*, 28 FCC Rcd at 12356, para. 14.

<sup>63</sup> *FY 2013 Report and Order*, 28 FCC Rcd at 12357, para. 19. The Commission observed that the International Bureau was a “singular case” because the work of those FTEs “primarily benefits licensees regulated by other bureaus.” *Id.*, 28 FCC Rcd at 12355, para. 14.

<sup>64</sup> SIA Comments at 8–11; EchoStar Comments at 3–4. CTIA observes that excluding one type of licensee, such as satellite providers, from contributing to indirect costs would threaten the administrability of the regulatory fee program. CTIA Reply Comments at 5. We interpret this proposal as asking us to determine how many indirect FTEs work on issues pertaining to all core bureau licensees.

<sup>65</sup> SIA Comments at 8.

<sup>66</sup> SIA Comments at 8.

<sup>67</sup> For a brief description of the Enforcement Bureau divisions, see <https://www.fcc.gov/encyclopedia/enforcement-bureau-organization>.

<sup>68</sup> EchoStar Comments at 4. We note that currently International Bureau licensees are 5.43% of the direct FTEs and therefore 5.43% of the indirect FTEs are assigned to the International Bureau licensees, which is lower than the 7% EchoStar is proposing.

<sup>69</sup> SIA Comments at 10.

<sup>71</sup> SIA Comments at 12.

<sup>72</sup> See, *e.g.* the FCC’s FY 2015 appropriation statute, the Consolidated and Further Continuing Appropriations Act, 2015, Public Law 113–235, 128 Stat. 2130 (2014).

<sup>73</sup> *FY 2015 NPRM*, 30 FCC Rcd at 5358, para. 9.

<sup>74</sup> NCTA & ACA Comments at 2–6 & Reply Comments at 4–6; ITTA Comments at 5–7.

<sup>75</sup> DIRECTV Comments at 3–5 & Reply Comments at 3–4 (arguing that if we adopt a fee it should be the 12 cents proposed); DISH Reply Comments at 4–5.

<sup>76</sup> See *FY 2015 Fee Reform Report and Order*, 30 FCC Rcd at 5367–68, para. 31.

<sup>77</sup> 47 U.S.C. 548; 47 CFR 76.1000–1004.

rules.<sup>78</sup> In addition, DBS providers are subject to MVPD requirements such as those pertaining to program carriage<sup>79</sup> and the requirement to negotiate retransmission consent in good faith.<sup>80</sup> More recently, the Commission adopted a host of requirements that apply to all MVPDs and thus equally apply to DBS providers as part of its implementation of the Commercial Advertisement Loudness Mitigation Act (CALM Act),<sup>81</sup> the Twenty-First Century Communications and Video Accessibility Act of 2010 (CVAA),<sup>82</sup> as well as the Satellite Television Extension and Localism Act (STELA) Reauthorization Act of 2014 (STELAR).<sup>83</sup> Moreover, we recognize that FY 2015 would be the first time the Commission would be applying this regulatory fee subcategory for DBS. Thus, for the above reasons, we find that for FY 2015 the proposed rate of 12 cents per subscriber per year is a sensible fee supported by data and analysis.<sup>84</sup> In the FY 2016 regulatory fee proceeding, we will update this rate for future years, based on relevant information, as necessary for ensuring an appropriate level of regulatory parity and considering the resources dedicated to this new regulatory fee subcategory.<sup>85</sup>

#### 7. Other Rate Issues

**23. Aviation Ground Licenses.** In the FY 2015 NPRM, we proposed an increase in regulatory fees for aviation ground licenses. Commenters contend that we have proposed an unjustified and disproportionate fee increase for

aviation ground licensees.<sup>86</sup> The Aviation Joint Commenters disagree with our contention that the payment units should be adjusted and they observe that we failed to explain why the revenue requirement was increased.<sup>87</sup> These commenters observe that despite no increase in regulation of this industry, the Commission has significantly increased the regulatory fees in FY 2014 and FY 2015.<sup>88</sup> We agree with the Aviation Joint Commenters and, after reviewing additional information, have adjusted the payment units and rate accordingly based on current fiscal year renewals.

**24. Satellite.** Several commenters have raised issues pertaining to the proposed space station fees. SIA and EchoStar object to the proposed increase in fees, contending that we should cap any increases at 7.5 percent.<sup>89</sup> These commenters argue that we should adopt the same cap we adopted for FY 2013. In FY 2013, the 7.5% cap was instituted to address the initial changes in the FTE allocations (not fee rate changes resulting from changes in the unit counts) as a result of GAO recommendations.<sup>90</sup> Such FTE allocation changes could have caused some regulatory fee rates to increase dramatically. To address this issue, the Commission capped the fee rate increase to 7.5% from the prior year. In the current proceeding, some satellite commenters requested that the Commission adopt a 7.5% cap on FY 2015 regulatory fee increases as the Commission did in FY 2013 with respect to the Non-Geostationary Space Station fee category. Although the circumstances in which we instituted the cap in FY 2013 are different than now, any discussion of imposing a cap at this time is not necessary because the satellite fee rate in the FY 2015 Report and Order is nearly the same or slightly lower than in FY 2014. We therefore decline to adopt a cap in this instance.

25. Intelsat asks that we take satellite application fees<sup>91</sup> into consideration in calculating our regulatory fees.<sup>92</sup> We are

required to assess and collect \$339,844,000 in regulatory fees for FY 2015, pursuant to Section 9 of the Communications Act and the Commission's FY 2015 Appropriation.<sup>93</sup> Thus, we are not able to collect less than mandated by Congress in order to take into account section 8 application fees, as Intelsat requests.

26. In addition, Intelsat argues that U.S.-licensed satellite operators should not have to subsidize the non-U.S.-licensed satellite operators' ability to serve the U.S. market.<sup>94</sup> We have sought comment previously on this issue because the number of International Bureau FTEs working on non-U.S.-licensed space stations increases the regulatory fees for the International Bureau regulatees.<sup>95</sup> We also note that non-U.S.-licensed space stations that have been granted access to the U.S. market will eventually communicate with earth stations in the United States, and therefore aspects of the interrelated communications system are apportioned to earth station licensees when accounting for FTE time spent processing requests to access the non-U.S. licensed space station. We conclude that due to: (i) The time spent by International Bureau FTEs in working on these issues; and (ii) the significant number of requests to access the U.S. market by non-U.S.-licensed space stations, the FTEs working on petitions or other matters involving non-U.S.-licensed space stations should be removed from the regulatory fee assessments for U.S.-licensed space stations and considered indirect for regulatory fee purposes. Non-U.S.-licensed space stations granted access to the market in the United States provide a variety of services. Attributing such FTE work as indirect appropriately attributes the regulatory fee burden to the wider telecommunications industry that benefits from such grants of market access. We have reviewed the number of FTEs working on the non-U.S.-licensed space stations and have determined that approximately four FTEs are devoted to this work at this time, therefore, we are reallocating four International Bureau FTEs as indirect FTEs for regulatory fee purposes.<sup>96</sup>

<sup>91</sup> Application fees are assessed under Section 8 of the Communications Act. 47 U.S.C. 158 and are paid directly into the general fund of the U.S. Treasury. 47 U.S.C. 158(e). The Commission is not authorized to retain receipts from application fees for its own use or to use application fees to offset its appropriation.

<sup>92</sup> Intelsat Comments at 1–2.

<sup>93</sup> Section 9 regulatory fees are mandated by Congress and collected to recover the regulatory costs associated with the Commission's enforcement, policy and rulemaking, user information, and international activities. 47 U.S.C. 159(a).

<sup>94</sup> Intelsat Comments at 3–4.

<sup>95</sup> See *FY 2014 NPRM*, 29 FCC Rcd at 6434, para. 50.

<sup>96</sup> The number of market access requests can vary; however, four FTEs is appropriate at this point.

## 8. Puerto Rico Broadcasters Association Petition

27. In the *FY 2015 NPRM*, we sought comment on the petition filed by the Puerto Rico Broadcaster's Association (PRBA) seeking regulatory fee relief.<sup>97</sup> We recognize the challenging circumstances described in the PRBA petition. Due to the complexities of this proposal and time constraints imposed by the annual regulatory fee process, additional time is needed to further consider this petition. We intend to address the PRBA petition in a separate proceeding outside of the regulatory fee rulemaking process. We understand that PRBA is contending that the costs associated with preparing and filing a waiver request would be overly burdensome.<sup>98</sup> We do not agree that PRBA's assertion, that requesting a waiver is a burden, eliminates that option. Our waiver process,<sup>99</sup> is available to PRBA members and any aggrieved party seeking a waiver of our rules.<sup>100</sup>

## 9. Effective Date of Elimination of the Vanity Call Sign and General Mobile Radio Service Regulatory Fee

28. In the Commission's *FY 2015 Fee Reform Report and Order*,<sup>101</sup> the Commission eliminated the regulatory fee component of two fee categories: amateur radio Vanity Call Signs<sup>102</sup> and General Mobile Radio Service (GMRS).<sup>103</sup> The elimination of regulatory fee categories constitutes a "permitted amendment" as defined in section 9(b)(3) of the Act. As required by section 9(b)(4)(B) of the Act, "permitted amendment" letters dated June 4, 2015 were mailed to congressional officials informing them of the elimination of these two fee categories and adoption of the new DBS fee category. Consistent with section 9(b)(4)(B) of the Act, these

<sup>97</sup> *FY 2015 NPRM*, 30 FCC Rcd at 5360–61, paras. 15–18. One commenter addressed the issues in the PRBA petition and suggests that we adopt our second proposal and create a separate fee category for Puerto Rico at a lower rate. ARSO Comments at 6–8.

<sup>98</sup> PRBA Comments at 2.

<sup>99</sup> 47 U.S.C. 159(d); 47 CFR 1.1166.

<sup>100</sup> See the Commission's regulatory fee waiver fact sheet, available at <https://www.fcc.gov/document/fy-2014-regulatory-fees-waiver-fact-sheet>.

<sup>101</sup> *FY 2015 Fee Reform Report and Order*, 30 FCC Rcd at 5361–62, paras. 19–22.

<sup>102</sup> Call signs assigned to newly licensed stations, *i.e.*, a sequential call sign, are assigned based on the licensee's mailing address and class of operator license. 47 CFR 97.17(d). The licensee can request a specific unassigned but assignable call sign, known as a vanity call sign. 47 CFR 97.19. There is no fee for the sequential call sign.

<sup>103</sup> GMRS (formerly Class A of the Citizens Radio Service) is a personal radio service available for the conduct of an individual's personal and family communications. See 47 CFR 95.1.

amendments will take effect 90 days after congressional notification of the permitted amendment letter, dated June 4, 2015. Thus, effective September 3, 2015, the Vanity Call Sign and GMRS regulatory fee categories will be eliminated and licensees will not be required to pay additional regulatory fees for these licenses.<sup>104</sup> Regulatees are still responsible for the payment of all application fees associated with these licenses.

## V. Procedural Matters

### A. Payment of Regulatory Fees

#### 1. Payments by Check Will Not Be Accepted for Payment of Annual Regulatory Fees

29. Pursuant to an Office of Management and Budget (OMB) directive,<sup>105</sup> the Commission is moving towards a paperless environment, extending to disbursement and collection of select federal government payments and receipts.<sup>106</sup> The initiative to reduce paper and curtail check payments for regulatory fees is expected to produce cost savings, reduce errors, and improve efficiencies across government. Accordingly, the Commission will no longer accept checks (including cashier's checks and money orders) and the accompanying hardcopy forms (*e.g.*, Forms 159, 159–B, 159–E, 159–W) for the payment of regulatory fees. This new paperless procedure will require that all payments be made by online ACH payment, online credit card, or wire transfer. Any other form of payment (*e.g.*, checks, cashier's checks, or money orders) will be rejected. For payments by wire, a Form 159–E should still be transmitted via fax so that the Commission can associate the wire payment with the correct regulatory fee information. This change will affect all payments of regulatory fees.<sup>107</sup>

#### 2. Revised Credit Card Transaction Levels

##### 30. In accordance with U.S. Treasury Announcement No. A–2014–04 (July

<sup>104</sup> The letter dated June 4, 2015 also includes the establishment of a DBS regulatory fee which will also be effective September 3, 2015.

<sup>105</sup> Office of Management and Budget (OMB) Memorandum M–10–06, Open Government Directive, Dec. 8, 2009; see also <http://www.whitehouse.gov/the-press-office/2011/06/13/executive-order-13576-delivering-efficient-effective-and-accountable-gov>.

<sup>106</sup> See U.S. Department of the Treasury, Open Government Plan 2.1, Sept. 2012.

<sup>107</sup> Payors should note that this change will mean that to the extent certain entities have to date paid both regulatory fees and application fees at the same time via paper check, they will no longer be able to do so as the regulatory fees payment via paper check will no longer be accepted.

2014), the amount that can be charged on a credit card for transactions with federal agencies has been reduced to \$24,999.99.<sup>108</sup> Previously, the credit card limit was \$49,999.99. This lower transaction amount is effective June 1, 2015. Transactions greater than \$24,999.99 will be rejected. This limit applies to single payments or bundled payments of more than one bill. Multiple transactions to a single agency in one day may be aggregated and treated as a single transaction subject to the \$24,999.99 limit. Customers who wish to pay an amount greater than \$24,999.99 should consider available electronic alternatives such as Visa or MasterCard debit cards, Automated Clearing House (ACH) debits from a bank account, and wire transfers. Each of these payment options is available after filing regulatory fee information in Fee Filer. Further details will be provided regarding payment methods and procedures at the time of FY 2015 regulatory fee collection in Fact Sheets, available at <https://www.fcc.gov/regfees>.

#### 3. Lock Box Bank

31. During the fee season for collecting FY 2015 regulatory fees, regulatees can pay their fees by credit card through Pay.gov,<sup>109</sup> ACH, debit card,<sup>110</sup> or by wire transfer. Additional payment instructions are posted at <http://transition.fcc.gov/fees/regfees.html>.

#### 4. Receiving Bank for Wire Payments

32. The receiving bank for all wire payments is the Federal Reserve Bank, New York, New York (TREAS NYC). When making a wire transfer, regulatees must fax a copy of their Fee Filer generated Form 159–E to the Federal Communications Commission at (202) 418–2843 at least one hour before initiating the wire transfer (but on the

<sup>108</sup> Customers who owe an amount on a bill, debt, or other obligation due to the federal government are prohibited from splitting the total amount due into multiple payments. Splitting an amount owed into several payment transactions violates the credit card network and Fiscal Service rules. An amount owed that exceeds the Fiscal Service maximum dollar amount, \$24,999.99, may not be split into two or more payment transactions in the same day by using one or multiple cards. Also, an amount owed that exceeds the Fiscal Service maximum dollar amount may not be split into two or more transactions over multiple days by using one or more cards.

<sup>109</sup> In accordance with U.S. Treasury Financial Manual Announcement No. A–2014–04 (July 2014), the amount that may be charged on a credit card for transactions with federal agencies has been reduced to \$24,999.99.

<sup>110</sup> In accordance with U.S. Treasury Financial Manual Announcement No. A–2012–02, the maximum dollar-value limit for debit card transactions is eliminated. It should also be noted that only Visa and MasterCard branded debit cards are accepted by Pay.gov.

same business day) so as not to delay crediting their account. Regulatees should discuss arrangements (including bank closing schedules) with their bankers several days before they plan to make the wire transfer to allow sufficient time for the transfer to be initiated and completed before the deadline. Complete instructions for making wire payments are posted at <http://transition.fcc.gov/fees/wiretran.html>.

#### 5. De Minimis Regulatory Fees

33. Regulatees whose total FY 2015 annual regulatory fee liability, including all categories of fees for which payment is due, is \$500 or less are exempt from payment of FY 2015 regulatory fees. The *de minimis* threshold applies only to filers of annual regulatory fees (not regulatory fees paid through multi-year filings), and it is not a permanent exemption. Rather, each regulatee will need to reevaluate their total fee liability each fiscal year to determine whether they meet the *de minimis* exemption.

#### 6. Standard Fee Calculations and Payment Dates

34. The Commission will accept fee payments made in advance of the window for the payment of regulatory fees. The responsibility for payment of fees by service category is as follows:

- *Media Services*: Regulatory fees must be paid for initial construction permits that were granted on or before October 1, 2014 for AM/FM radio stations, VHF/UHF full service television stations, and satellite television stations. Regulatory fees must be paid for all broadcast facility licenses granted on or before October 1, 2014. For providers of Direct Broadcast Service (DBS) service, regulatory fees should be paid based on a subscriber count on or about December 31, 2014. In instances where a permit or license is transferred or assigned after October 1, 2014, responsibility for payment rests with the holder of the permit or license as of the fee due date.

- *Wireline (Common Carrier) Services*: Regulatory fees must be paid for authorizations that were granted on or before October 1, 2014. In instances where a permit or license is transferred or assigned after October 1, 2014, responsibility for payment rests with the holder of the permit or license as of the fee due date. Audio bridging service providers are included in this category.<sup>111</sup> For Responsible Organizations (RespOrgs) that manage Toll Free Numbers (TFN), regulatory

<sup>111</sup> Audio bridging services are toll teleconferencing services.

fees should be paid on all working, assigned, and reserved toll free numbers, including those toll free numbers that are in transit status, or any other status as defined in section 52.103 of the Commission's rules. The unit count should be based on toll free numbers managed by RespOrgs on or about December 31, 2014.

- *Wireless Services*: CMRS cellular, mobile, and messaging services (fees based on number of subscribers or telephone number count): Regulatory fees must be paid for authorizations that were granted on or before October 1, 2014. The number of subscribers, units, or telephone numbers on December 31, 2014 will be used as the basis from which to calculate the fee payment. In instances where a permit or license is transferred or assigned after October 1, 2014, responsibility for payment rests with the holder of the permit or license as of the fee due date.

- *Wireless Services, Multi-year fees*: The first eight regulatory fee categories in our Schedule of Regulatory Fees pay "small multi-year wireless regulatory fees." Entities pay these regulatory fees in advance for the entire amount period covered by the five-year or ten-year terms of their initial licenses, and pay regulatory fees again only when the license is renewed or a new license is obtained. We include these fee categories in our rulemaking (see Table B) to publicize our estimates of the number of "small multi-year wireless" licenses that will be renewed or newly obtained in FY 2015.

- *Multichannel Video Programming Distributor Services (cable television operators and CARS licensees)*: Regulatory fees must be paid for the number of basic cable television subscribers as of December 31, 2014.<sup>112</sup> Regulatory fees also must be paid for CARS licenses that were granted on or before October 1, 2014. In instances where a permit or license is transferred or assigned after October 1, 2014, responsibility for payment rests with the holder of the permit or license as of the fee due date.

- *International Services*: Regulatory fees must be paid for (1) earth stations and (2) geostationary orbit space

<sup>112</sup> Cable television system operators should compute their number of basic subscribers as follows: Number of single family dwellings + number of individual households in multiple dwelling unit (apartments, condominiums, mobile home parks, etc.) paying at the basic subscriber rate + bulk rate customers + courtesy and free service. Note: Bulk-Rate Customers = Total annual bulk-rate charge divided by basic annual subscription rate for individual households. Operators may base their count on "a typical day in the last full week" of December 2014, rather than on a count as of December 31, 2014.

stations and non-geostationary orbit satellite systems that were licensed and operational on or before October 1, 2014. In instances where a permit or license is transferred or assigned after October 1, 2014, responsibility for payment rests with the holder of the permit or license as of the fee due date.

- *International Services: (Submarine Cable Systems)*: Regulatory fees for submarine cable systems are to be paid on a per cable landing license basis based on circuit capacity as of December 31, 2014. In instances where a license is transferred or assigned after October 1, 2014, responsibility for payment rests with the holder of the license as of the fee due date. For regulatory fee purposes, the allocation in FY 2015 will remain at 87.6 percent for submarine cable and 12.4 percent for satellite/terrestrial facilities.

- *International Services: (Terrestrial and Satellite Services)*: Regulatory fees for Terrestrial and Satellite International Bearer Circuits are to be paid by facilities-based common carriers that have active (used or leased) international bearer circuits as of December 31, 2014 in any terrestrial or satellite transmission facility for the provision of service to an end user or resale carrier. When calculating the number of such active circuits, the facilities-based common carriers must include circuits used by themselves or their affiliates. In addition, non-common carrier satellite operators must pay a fee for each circuit they and their affiliates hold and each circuit sold or leased to any customer, other than an international common carrier authorized by the Commission to provide U.S. international common carrier services. For these purposes, "active circuits" include backup and redundant circuits as of December 31, 2014. Whether circuits are used specifically for voice or data is not relevant for purposes of determining that they are active circuits.<sup>113</sup> In instances where a permit or license is transferred or assigned after October 1, 2014, responsibility for payment rests with the holder of the permit or license as of the fee due date. For regulatory fee purposes, the allocation in FY 2015 will remain at 87.6 percent for submarine cable and 12.4 percent for satellite/terrestrial facilities.<sup>114</sup>

<sup>113</sup> We encourage terrestrial and satellite service providers to seek guidance from the International Bureau's Policy Division to verify their IBC reporting processes to ensure that their calculation methods comply with our rules.

<sup>114</sup> We remind facilities-based common carriers to review their reporting processes to ensure that they accurately calculate and report IBCs. As we recently have done with submarine cable capacity holders,

*B. Commercial Mobile Radio Service (CMRS) Cellular and Mobile Services Assessments*

35. The Commission will compile data from the Numbering Resource Utilization Forecast (NRUF) report that is based on “assigned” telephone number (subscriber) counts that have been adjusted for porting to net Type 0 ports (“in” and “out”).<sup>115</sup> This information of telephone numbers (subscriber count) will be posted on the Commission’s electronic filing and payment system (Fee Filer) along with the carrier’s Operating Company Numbers (OCNs).

36. A carrier wishing to revise its telephone number (subscriber) count can do so by accessing Fee Filer and follow the prompts to revise their telephone number counts. Any revisions to the telephone number counts should be accompanied by an explanation or supporting documentation.<sup>116</sup> The Commission will then review the revised count and supporting documentation and either approve or disapprove the submission in Fee Filer. If the submission is disapproved, the Commission will contact the provider to afford the provider an opportunity to discuss its revised subscriber count and/or provide additional supporting documentation. If we receive no response from the provider, or we do not reverse our initial disapproval of the provider’s revised count submission, the fee payment must be based on the number of subscribers listed initially in Fee Filer. Once the timeframe for revision has passed, the telephone number counts are final and are the basis upon which CMRS regulatory fees are to be paid. Providers can view their final telephone counts online in Fee Filer. A final CMRS assessment letter will not be mailed out.

37. Because some carriers do not file the NRUF report, they may not see their telephone number counts in Fee Filer. In these instances, the carriers should compute their fee payment using the standard methodology that is currently in place for CMRS Wireless services (*i.e.*, compute their telephone number counts as of December 31, 2014), and submit their fee payment accordingly. Whether a carrier reviews its telephone

we will review the processes for reporting IBCs in the near future to ensure that all carriers are reporting IBCs in the same manner, consistent with our rules.

<sup>115</sup> See *FY 2005 Report and Order*, 20 FCC Rcd at 12264, paras. 38–44.

<sup>116</sup> In the supporting documentation, the provider will need to state a reason for the change, such as a purchase or sale of a subsidiary, the date of the transaction, and any other pertinent information that will help to justify a reason for the change.

number counts in Fee Filer or not, the Commission reserves the right to audit the number of telephone numbers for which regulatory fees are paid. In the event that the Commission determines that the number of telephone numbers that are paid is inaccurate, the Commission will bill the carrier for the difference between what was paid and what should have been paid.

*C. Enforcement*

38. To be considered timely, regulatory fee payments must be made electronically by the payment due date for regulatory fees. Section 9(c) of the Act requires us to impose a late payment penalty of 25 percent of the unpaid amount to be assessed on the first day following the deadline for filing these fees.<sup>117</sup> Failure to pay regulatory fees and/or any late penalty will subject regulatees to sanctions, including those set forth in section 1.1910 of the Commission’s rules,<sup>118</sup> which generally requires the Commission to withhold action on “applications, including on a petition for reconsideration or any application for review of a fee determination, or requests for authorization by any entity found to be delinquent in its debt to the Commission” and in the DCIA.<sup>119</sup> We also assess administrative processing charges on delinquent debts to recover additional costs incurred in processing and handling the debt pursuant to the DCIA and section 1.1940(d) of the Commission’s rules.<sup>120</sup> These administrative processing charges will be assessed on any delinquent regulatory fee, in addition to the 25 percent late charge penalty. In the case of partial payments (underpayments) of regulatory fees, the payor will be given credit for the amount paid, but if it is later determined that the fee paid is incorrect or not timely paid, then the 25 percent late charge penalty (and other charges and/or sanctions, as appropriate) will be assessed on the portion that is not paid in a timely manner.

39. Pursuant to the “red light rule,” we will withhold action on any applications or other requests for

<sup>117</sup> 47 U.S.C. 159(c).

<sup>118</sup> See 47 CFR 1.1910.

<sup>119</sup> Delinquent debt owed to the Commission triggers the “red light rule,” which places a hold on the processing of pending applications, fee offsets, and pending disbursement payments. 47 CFR 1.1910, 1.1911, 1.1912. In 2004, the Commission adopted rules implementing the requirements of the DCIA. See *Amendment of Parts 0 and 1 of the Commission’s Rules*, MD Docket No. 02–339, Report and Order, 19 FCC Rcd 6540 (2004); 47 CFR part 1, subpart O, Collection of Claims Owed the United States.

<sup>120</sup> 47 CFR 1.1940(d).

benefits filed by anyone who is delinquent in any non-tax debts owed to the Commission (including regulatory fees) and will ultimately dismiss those applications or other requests if payment of the delinquent debt or other satisfactory arrangement for payment is not made.<sup>121</sup> Failure to pay regulatory fees can also result in the initiation of a proceeding to revoke any and all authorizations held by the entity responsible for paying the delinquent fee(s).<sup>122</sup> Pursuant to a pilot program, we have initiated procedures to transfer debt to the Centralized Receivables Service at the U.S. Treasury, as described below.

*D. Transfers of Unpaid Debt to Centralized Receivables Service, U.S. Treasury*

40. Under section 9 of the Act, Commission’s rules, and federal debt collection laws, a licensee’s regulatory fee is due on the first day of the fiscal year and payable at a date established in the Commission’s annual regulatory fee Report and Order. Beginning on or after October 1, 2015, under revised procedures, the Commission will begin transferring unpaid regulatory fee receivables directly to the CRS at the U.S. Treasury instead of working to collect the debt and then transferring the remaining unpaid debts to Treasury. The Commission can transfer delinquent debt to Treasury for further collection action within 120 days after the date of delinquency.<sup>123</sup> We anticipate that the transfer of FY 2015 debts to Treasury will occur much sooner than our current process. Regulatees, however, will not likely see any substantial change in the current procedures of how past due debts are to be paid, except that the debts will be handled by CRS (U.S. Treasury) rather than by the Commission.

*E. Effective Date*

41. Providing a 30 day period after **Federal Register** publication before this *Report and Order* becomes effective as required by 5 U.S.C. 553(d) will not allow sufficient time for the Commission to collect the FY 2015 fees before FY 2015 ends on September 30, 2015. For this reason, pursuant to 5 U.S.C. 553(d)(3), the Commission finds there is good cause to waive the requirements of section 553(d), and this *Report and Order and Further Notice of Proposed Rulemaking* will become effective upon publication in the

<sup>121</sup> See 47 CFR 1.1161(c), 1.1164(f)(5), and 1.1910.

<sup>122</sup> 47 U.S.C. 159.

<sup>123</sup> See 31 U.S.C. 3711(g); 31 CFR 285.12; 47 CFR 1.1917.

**Federal Register.** Because payments of the regulatory fees will not actually be due until the middle of September,

persons affected by this *Report and Order* will still have a reasonable period in which to make their payments and

thereby comply with the rules established herein.

***** Total Estimated Revenue to be Collected .....			339,847,246	341,879,214			340,593,961
***** Total Revenue Requirement .....			339,844,000	339,844,000			339,844,000
Difference .....			3,246	2,035,214			749,961

Notes on Table B

<sup>1</sup>The AM and FM Construction Permit revenues and the Digital (VHF/UHF) Construction Permit revenues were adjusted, respectively, to set the regulatory fee to an amount no higher than the lowest licensed fee for that class of service. Reductions in the Digital (VHF/UHF) Construction Permit revenues were also offset by increases in the revenue totals for various Digital television stations by market size, respectively.

<sup>2</sup>MDS/MMDS category was renamed Broadband Radio Service (BRS). See Amendment of Parts 1, 21, 73, 74 and 101 of the Commission's Rules to Facilitate the Provision of Fixed and Mobile Broadband Access, Educational and Other Advanced Services in the 2150–2162 and 2500–2690 MHz Bands, Report & Order and Further Notice of Proposed Rulemaking, 19 FCC Rcd 14165, 14169, para. 6 (2004).

<sup>3</sup>The chart at the end of Table C lists the submarine cable bearer circuit regulatory fees (common and non-common carrier basis) that resulted from the adoption of the FY 2008 Further Notice, 24 FCC Rcd 6388 and the Submarine Cable Order, 24 FCC Rcd 4208.

<sup>4</sup>The fee amounts listed in the column entitled "Rounded New FY 2015 Regulatory Fee" constitute a weighted average media regulatory fee by class of service. The actual FY 2015 regulatory fees for AM/FM radio station are listed on a grid located at the end of Table C.

<sup>5</sup>As a continuation of our regulatory fee reform for the submarine cable and bearer circuit fee categories, the allocation percentage for these two categories, in relation to the satellite (GSO and NGSO) and earth station fee categories, was reduced by approximately 7.5 per cent proportionally between the submarine cable and bearer circuit fee categories. This allocation reduction of 7.5 per cent resulted in an increase in the allocation for the satellite and earth station fee categories. In addition, four (4) International Bureau FTEs were changed from "direct" to "indirect", thereby reducing the International Bureau's overall FTE allocation percentage.

TABLE C—FY 2015 SCHEDULE OF REGULATORY FEES

[The first eight regulatory fees listed below are collected by the Commission in advance to cover the term of the license and are submitted at the time the application is filed.]

Fee category	Annual regulatory fee (U.S. \$'s)
PLMRS (per license) (Exclusive Use) (47 CFR part 90) .....	30
Microwave (per license) (47 CFR part 101) .....	20
Marine (Ship) (per station) (47 CFR part 80) .....	15
Marine (Coast) (per license) (47 CFR part 80) .....	35
Rural Radio (47 CFR part 22) (previously listed under the Land Mobile category) .....	10
PLMRS (Shared Use) (per license) (47 CFR part 90) .....	10
Aviation (Aircraft) (per station) (47 CFR part 87) .....	10
Aviation (Ground) (per license) (47 CFR part 87) .....	20
CMRS Mobile/Cellular Services (per unit) (47 CFR parts 20, 22, 24, 27, 80 and 90) .....	.17
CMRS Messaging Services (per unit) (47 CFR parts 20, 22, 24 and 90) .....	.08
Broadband Radio Service (formerly MMDS/MDS) (per license) (47 CFR part 27) .....	635
Local Multipoint Distribution Service (per call sign) (47 CFR, part 101) .....	635
AM Radio Construction Permits .....	590
FM Radio Construction Permits .....	750
Digital TV (47 CFR part 73) VHF and UHF Commercial:	
Markets 1–10 .....	46,825
Markets 11–25 .....	43,200
Markets 26–50 .....	27,625
Markets 51–100 .....	16,275
Remaining Markets .....	4,850
Construction Permits .....	4,850
Satellite Television Stations (All Markets) .....	1,575
Low Power TV, Class A TV, TV/FM Translators & Boosters (47 CFR part 74) .....	440
CARS (47 CFR part 78) .....	660
Cable Television Systems (per subscriber) (47 CFR part 76), Including IPTV .....	.96
Direct Broadcast Service (DBS) (per subscriber) (as defined by section 602(13) of the Act) .....	.12
Interstate Telecommunication Service Providers (per revenue dollar) .....	.00331
Toll Free (per toll free subscriber) (47 C.F.R. section 52.101 (f) of the rules) .....	.12
Earth Stations (47 CFR part 25) .....	310
Space Stations (per operational station in geostationary orbit) (47 CFR part 25) also includes DBS Service (per operational station) (47 CFR part 100) .....	119,150

TABLE C—FY 2015 SCHEDULE OF REGULATORY FEES—Continued

[The first eight regulatory fees listed below are collected by the Commission in advance to cover the term of the license and are submitted at the time the application is filed.]

Fee category	Annual regulatory fee (U.S. \$'s)
Space Stations (per operational system in non-geostationary orbit) (47 CFR part 25) .....	132,125
International Bearer Circuits—Terrestrial/Satellites (per 64KB circuit) .....	.03
Submarine Cable Landing Licenses Fee (per cable system) .....	See Table Below

FY 2015 SCHEDULE OF REGULATORY FEES:  
[Continued]

FY 2015 RADIO STATION REGULATORY FEES

Population served	AM Class A	AM Class B	AM Class C	AM Class D	FM Classes A, B1 & C3	FM Classes B, C, C0, C1 & C2
<=25,000 .....	\$775	\$645	\$590	\$670	\$750	\$925
25,001–75,000 .....	1,550	1,300	900	1,000	1,500	1,625
75,001–150,000 .....	2,325	1,625	1,200	1,675	2,050	3,000
150,001–500,000 .....	3,475	2,750	1,800	2,025	3,175	3,925

[International Bearer Circuits—Submarine Cable.]

Submarine Cable Systems (capacity as of December 31, 2014)	Fee amount
<2.5 Gbps .....	\$7,175
2.5 Gbps or greater, but less than 5 Gbps .....	14,350
5 Gbps or greater, but less than 10 Gbps .....	28,675
10 Gbps or greater, but less than 20 Gbps .....	57,350
20 Gbps or greater .....	114,700

**Table D—Sources of Payment Unit Estimates for FY 2015**

In order to calculate individual service fees for FY 2015, we adjusted FY 2014 payment units for each service to more accurately reflect expected FY 2015 payment liabilities. We obtained our updated estimates through a variety of means. For example, we used Commission licensee data bases, actual prior year payment records and industry and trade association projections when available. The databases we consulted include our Universal Licensing System (ULS), International Bureau Filing System (IBFS), Consolidated Database

System (CDBS) and Cable Operations and Licensing System (COALS), as well as reports generated within the Commission such as the Wireless Telecommunications Bureau's *Numbering Resource Utilization Forecast* report.

We sought verification for these estimates from multiple sources and, in all cases, we compared FY 2015 estimates with actual FY 2014 payment units to ensure that our revised estimates were reasonable. Where appropriate, we adjusted and/or rounded our final estimates to take into consideration the fact that certain variables that impact on the number of

payment units cannot yet be estimated with sufficient accuracy. These include an unknown number of waivers and/or exemptions that may occur in FY 2015 and the fact that, in many services, the number of actual licensees or station operators fluctuates from time to time due to economic, technical, or other reasons. When we note, for example, that our estimated FY 2015 payment units are based on FY 2014 actual payment units, it does not necessarily mean that our FY 2015 projection is exactly the same number as in FY 2014. We have either rounded the FY 2015 number or adjusted it slightly to account for these variables.

Fee category	Sources of payment unit estimates
Land Mobile (All), Microwave, Marine (Ship & Coast), Aviation (Aircraft & Ground), Domestic Public Fixed.	Based on Wireless Telecommunications Bureau (WTB) projections of new applications and renewals taking into consideration existing Commission licensee data bases. Aviation (Aircraft) and Marine (Ship) estimates have been adjusted to take into consideration the licensing of portions of these services on a voluntary basis.
CMRS Cellular/Mobile Services .....	Based on WTB projection reports, and FY 14 payment data.
CMRS Messaging Services .....	Based on WTB reports, and FY 14 payment data.
AM/FM Radio Stations .....	Based on CDBS data, adjusted for exemptions, and actual FY 2014 payment units.
Digital TV Stations (Combined VHF/UHF units) .....	Based on CDBS data, adjusted for exemptions, and actual FY 2014 payment units.
AM/FM/TV Construction Permits .....	Based on CDBS data, adjusted for exemptions, and actual FY 2014 payment units.

Fee category	Sources of payment unit estimates
LPTV, Translators and Boosters, Class A Television .....	Based on CDBS data, adjusted for exemptions, and actual FY 2014 payment units.
BRS (formerly MDS/MMDS) .....	Based on WTB reports and actual FY 2014 payment units.
LMDS .....	Based on WTB reports and actual FY 2014 payment units.
Cable Television Relay Service ("CARS") Stations .....	Based on data from Media Bureau's COALS database and actual FY 2013 payment units.
Cable Television System Subscribers, Including IPTV Subscribers.	Based on publicly available data sources for estimated subscriber counts and actual FY 2014 payment units.
Interstate Telecommunication Service Providers .....	Based on FCC Form 499-Q data for the four quarters of calendar year 2014, the Wireline Competition Bureau projected the amount of calendar year 2014 revenue that will be reported on 2015 FCC Form 499-A worksheets in April, 2015.
Earth Stations .....	Based on International Bureau ("IB") licensing data and actual FY 2014 payment units.
Space Stations (GSOs & NGSOs) .....	Based on IB data reports and actual FY 2014 payment units.
International Bearer Circuits .....	Based on IB reports and submissions by licensees, adjusted as necessary.
Submarine Cable Licenses .....	Based on IB license information.

**Table E—Factors, Measurements, and Calculations That Determines Station Signal Contours and Associated Population Coverages**

**AM Stations**

For stations with nondirectional daytime antennas, the theoretical radiation was used at all azimuths. For stations with directional daytime antennas, specific information on each day tower, including field ratio, phase, spacing, and orientation was retrieved, as well as the theoretical pattern root-mean-square of the radiation in all directions in the horizontal plane (RMS) figure (milliVolt per meter (mVm) @1 km) for the antenna system. The standard, or augmented standard if pertinent, horizontal plane radiation pattern was calculated using techniques and methods specified in sections 73.150 and 73.152 of the Commission's rules. Radiation values were calculated for each of 360 radials around the transmitter site. Next, estimated soil conductivity data was retrieved from a

database representing the information in FCC Figure R3. Using the calculated horizontal radiation values, and the retrieved soil conductivity data, the distance to the principal community (5 mVm) contour was predicted for each of the 360 radials. The resulting distance to principal community contours were used to form a geographical polygon. Population counting was accomplished by determining which 2010 block centroids were contained in the polygon. (A block centroid is the center point of a small area containing population as computed by the U.S. Census Bureau.) The sum of the population figures for all enclosed blocks represents the total population for the predicted principal community coverage area.

**FM Stations**

The greater of the horizontal or vertical effective radiated power (ERP) (kW) and respective height above average terrain (HAAT) (m) combination was used. Where the antenna height

above mean sea level (HAMSL) was available, it was used in lieu of the average HAAT figure to calculate specific HAAT figures for each of 360 radials under study. Any available directional pattern information was applied as well, to produce a radial-specific ERP figure. The HAAT and ERP figures were used in conjunction with the Field Strength (50–50) propagation curves specified in 47 CFR 73.313 of the Commission's rules to predict the distance to the principal community (70 dBu (decibel above 1 microVolt per meter) or 3.17 mVm) contour for each of the 360 radials. The resulting distance to principal community contours were used to form a geographical polygon. Population counting was accomplished by determining which 2010 block centroids were contained in the polygon. The sum of the population figures for all enclosed blocks represents the total population for the predicted principal community coverage area.

**TABLE F—FY 2014 SCHEDULE OF REGULATORY FEES**

[The first eleven regulatory fees listed below are collected by the Commission in advance to cover the term of the license and are submitted at the time the application is filed]

Fee category	Annual regulatory fee (U.S. \$'s)
PLMRS (per license) (Exclusive Use) (47 CFR part 90) .....	35
Microwave (per license) (47 CFR part 101) .....	15
218–219 MHz (Formerly Interactive Video Data Service) (per license) (47 CFR part 95) .....	80
Marine (Ship) (per station) (47 CFR part 80) .....	15
Marine (Coast) (per license) (47 CFR part 80) .....	55
General Mobile Radio Service (per license) (47 CFR part 95) .....	5
Rural Radio (47 CFR part 22) (previously listed under the Land Mobile category) .....	10
PLMRS (Shared Use) (per license) (47 CFR part 90) .....	10
Aviation (Aircraft) (per station) (47 CFR part 87) .....	10
Aviation (Ground) (per license) (47 CFR part 87) .....	30
Amateur Vanity Call Signs (per call sign) (47 CFR part 97) .....	2.14
CMRS Mobile/Cellular Services (per unit) (47 CFR parts 20, 22, 24, 27, 80 and 90) .....	.18
CMRS Messaging Services (per unit) (47 CFR parts 20, 22, 24 and 90) .....	.08
Broadband Radio Service (formerly MMDS/MDS) (per license) (47 CFR part 27) .....	715
Local Multipoint Distribution Service (per call sign) (47 CFR, part 101) .....	715
AM Radio Construction Permits .....	590
FM Radio Construction Permits .....	750

TABLE F—FY 2014 SCHEDULE OF REGULATORY FEES—Continued

[The first eleven regulatory fees listed below are collected by the Commission in advance to cover the term of the license and are submitted at the time the application is filed]

Fee category	Annual regulatory fee (U.S. \$'s)
Digital TV (47 CFR part 73) VHF and UHF Commercial:	
Markets 1–10 .....	44,650
Markets 11–25 .....	42,100
Markets 26–50 .....	26,975
Markets 51–100 .....	15,600
Remaining Markets .....	4,750
Construction Permits .....	4,750
Satellite Television Stations (All Markets) .....	1,550
Construction Permits—Satellite Television Stations .....	1,300
Low Power TV, Class A TV, TV/FM Translators & Boosters (47 CFR part 74) .....	410
Broadcast Auxiliaries (47 CFR part 74) .....	10
CARS (47 CFR part 78) .....	605
Cable Television Systems (per subscriber) (47 CFR part 76), Including IPTV .....	.99
Interstate Telecommunication Service Providers (per revenue dollar) .....	.00343
Earth Stations (47 CFR part 25) .....	295
Space Stations (per operational station in geostationary orbit) (47 CFR part 25) also includes DBS Service (per operational station) (47 CFR part 100) .....	122,400
Space Stations (per operational system in non-geostationary orbit) (47 CFR part 25) .....	132,850
International Bearer Circuits—Terrestrial/Satellites (per 64KB circuit) .....	.21
International Bearer Circuits—Submarine Cable .....	See Table Below

FY 2014 SCHEDULE OF REGULATORY FEES: MAINTAIN ALLOCATION

FY 2014 Radio Station Regulatory Fees						
Population served	AM Class A	AM Class B	AM Class C	AM Class D	FM Classes A, B1 & C3	FM Classes B, C, C0, C1 & C2
<=25,000 .....	\$775	\$645	\$590	\$670	\$750	\$925
25,001–75,000 .....	1,550	1,300	900	1,000	1,500	1,625
75,001–150,000 .....	2,325	1,625	1,200	1,675	2,050	3,000
150,001–500,000 .....	3,475	2,750	1,800	2,025	3,175	3,925
500,001–1,200,000 .....	5,025	4,225	3,000	3,375	5,050	5,775
1,200,001–3,000,000 .....	7,750	6,500	4,500	5,400	8,250	9,250
>3,000,000 .....	9,300	7,800	5,700	6,750	10,500	12,025

FY 2014 SCHEDULE OF REGULATORY FEES

[International Bearer Circuits—Submarine Cable]

Submarine cable systems (capacity as of December 31, 2013)	Fee amount
<2.5 Gbps .....	\$10,250
2.5 Gbps or greater, but less than 5 Gbps .....	20,500
5 Gbps or greater, but less than 10 Gbps .....	40,975
10 Gbps or greater, but less than 20 Gbps .....	81,950
20 Gbps or greater .....	163,900

VII. Regulatory Flexibility Analysis

1. As required by the Regulatory Flexibility Act of 1980, as amended (RFA),<sup>124</sup> an Initial Regulatory Flexibility Analysis (IRFA) was included in the *Notice of Proposed Rulemaking*.<sup>125</sup> The Commission sought

written public comment on these proposals including comment on the IRFA. This Final Regulatory Flexibility Analysis (FRFA) conforms to the IRFA.<sup>126</sup>

A. Need for, and Objectives of, the Report and Order

2. In this Report and Order, we conclude the Assessment and Collection of Regulatory Fees for Fiscal Year (FY) 2015 proceeding to collect \$339,844,000 in regulatory fees for FY 2015, pursuant to section 9 of the Communications Act of 1934, as amended.<sup>127</sup> These regulatory fees will be due in September 2015. Under section 9 of the

<sup>124</sup> 5 U.S.C. 603. The RFA, 5 U.S.C. 601–612 has been amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA), Public Law 104–121, Title II, 110 Stat. 847 (1996).

<sup>125</sup> *Assessment and Collection of Regulatory Fees for Fiscal Year 2015*, Notice of Proposed

Rulemaking, Report and Order, and Order, MD Docket No. 15–121, 30 FCC Rcd 5354 (2015) (FY 2015 NPRM).

<sup>126</sup> 5 U.S.C. 604.

<sup>127</sup> 47 U.S.C. 159.

Communications Act, regulatory fees are mandated by Congress and collected to recover the regulatory costs associated with the Commission's enforcement, policy and rulemaking, user information, and international activities in an amount that can be reasonably expected to equal the amount of the Commission's annual appropriation.<sup>128</sup>

3. This FY 2015 Report and Order adopts a regulatory fee schedule that includes the following noteworthy changes from prior years: (1) A reduction in regulatory fees for the submarine cable/terrestrial and satellite bearer circuit category relative to other fee categories in the International Bureau; (2) the first fee rate for Direct Broadcast Satellite (DBS) as a subcategory of the cable television and Internet Protocol Television (IPTV) regulatory fee category; (3) the first fee rate for toll free numbers; and (4) the elimination of the regulatory fee component of two fee categories: Amateur Radio Vanity Call Signs and General Mobile Radio Service (GMRS). In addition, in calculating the FY 2015 fee schedule, the Commission also reallocated four International Bureau full time employees (FTEs) as indirect.

4. With respect to the submarine cable/terrestrial and satellite bearer circuit fee category, after additional review, the Commission concluded that the fee assessed on the submarine cable/terrestrial and satellite bearer circuit fee category was excessive relative to the Commission's oversight and regulation of this industry. As a result, the Commission reduced the percentage of total fees paid by this fee category by 7.5 percent. With respect to the DBS fee category, the Commission instituted the DBS fee after realizing that Media Bureau resources were being used to address DBS and MVPD issues, but these costs were not being recovered from DBS providers. Therefore, the DBS fee is instituted to recover the cost of Media Bureau resources that is spent on MVPD and DBS issues. Similarly, a toll free number regulatory fee is instituted to recover the cost of resources expended by the Wireline Bureau on issues relating to toll free numbers. With respect to Amateur Radio Vanity Call Signs and General Mobile Radio Service (GMRS), the Commission concluded that the administrative costs of processing, reviewing, and enforcing the thousands of Vanity Call Sign and GMRS licenses far exceeds the \$21.40 and \$25 per license regulatory fee rate that is collected, respectively. Many of the Amateur Radio Vanity Call Signs and GMRS licensees are small businesses

and/or individuals. Finally, in calculating the FY 2015 fee schedule, the Commission reallocated four International Bureau full time employees (FTEs) as indirect to reflect work performed by International Bureau staff on non-U.S.-licensed space stations, who are not required to pay regulatory fees.

*B. Summary of the Significant Issues Raised by the Public Comments in Response to the IRFA*

5. None.

*C. Description and Estimate of the Number of Small Entities to Which the Rules Will Apply*

6. The RFA directs agencies to provide a description of, and where feasible, an estimate of the number of small entities that may be affected by the proposed rules and policies, if adopted.<sup>129</sup> The RFA generally defines the term "small entity" as having the same meaning as the terms "small business," "small organization," and "small governmental jurisdiction."<sup>130</sup> In addition, the term "small business" has the same meaning as the term "small business concern" under the Small Business Act.<sup>131</sup> A "small business concern" is one which: (1) Is independently owned and operated; (2) is not dominant in its field of operation; and (3) satisfies any additional criteria established by the SBA.<sup>132</sup> Nationwide, there are a total of approximately 27.9 million small businesses, according to the SBA.<sup>133</sup>

1. Wired Telecommunications Carriers. The U.S. Census Bureau defines this industry as "establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired communications networks. Transmission facilities may be based on a single technology or a combination of technologies. Establishments in this industry use the wired telecommunications network facilities

that they operate to provide a variety of services, such as wired telephony services, including VoIP services, wired (cable) audio and video programming distribution, and wired broadband internet services. By exception, establishments providing satellite television distribution services using facilities and infrastructure that they operate are included in this industry."<sup>134</sup> The SBA has developed a small business size standard for Wired Telecommunications Carriers, which consists of all such companies having 1,500 or fewer employees.<sup>135</sup> Census data for 2007 shows that there were 3,188 firms that operated that year. Of this total, 3,144 operated with less than 1,000 employees.<sup>136</sup> Thus, under this size standard, the majority of firms in this industry can be considered small.

2. Local Exchange Carriers (LECs). Neither the Commission nor the SBA has developed a size standard for small businesses specifically applicable to local exchange services. The closest applicable NAICS Code category is Wired Telecommunications Carriers as defined in paragraph 6 of this FRFA. Under the applicable SBA size standard, such a business is small if it has 1,500 or fewer employees.<sup>137</sup> According to Commission data, census data for 2007 shows that there were 3,188 firms that operated that year. Of this total, 3,144 operated with fewer than 1,000 employees.<sup>138</sup> The Commission therefore estimates that most providers of local exchange carrier service are small entities that may be affected by the rules adopted.

3. Incumbent LECs. Neither the Commission nor the SBA has developed a small business size standard specifically for incumbent local exchange services. The closest applicable NAICS Code category is Wired Telecommunications Carriers as defined in paragraph 6 of this FRFA. Under that size standard, such a business is small if it has 1,500 or fewer employees.<sup>139</sup> According to Commission data, 3,188 firms operated in that year. Of this total, 3,144 operated

<sup>129</sup> 5 U.S.C. 603(b)(3).

<sup>130</sup> 5 U.S.C. 601(6).

<sup>131</sup> 5 U.S.C. 601(3) (incorporating by reference the definition of "small-business concern" in the Small Business Act, 15 U.S.C. 632). Pursuant to 5 U.S.C. 601(3), the statutory definition of a small business applies "unless an agency, after consultation with the Office of Advocacy of the Small Business Administration and after opportunity for public comment, establishes one or more definitions of such term which are appropriate to the activities of the agency and publishes such definition(s) in the **Federal Register**."

<sup>132</sup> 15 U.S.C. 632.

<sup>133</sup> See SBA, Office of Advocacy, "Frequently Asked Questions," [http://www.sba.gov/sites/default/files/FAQ\\_Sept\\_2012.pdf](http://www.sba.gov/sites/default/files/FAQ_Sept_2012.pdf).

<sup>134</sup> <http://www.census.gov/cgi-bin/sssd/naics/naicsrch>.

<sup>135</sup> See 13 CFR 120.201, NAICS Code 517110.

<sup>136</sup> [http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=ECN\\_2007\\_US\\_51SSSZ5&prodType=table](http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=ECN_2007_US_51SSSZ5&prodType=table).

<sup>137</sup> 13 CFR 121.201, NAICS code 517110.

<sup>138</sup> [http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=ECN\\_2007\\_US\\_51SSSZ5&prodType=table](http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=ECN_2007_US_51SSSZ5&prodType=table).

<sup>139</sup> 13 CFR 121.201, NAICS code 517110.

<sup>128</sup> 47 U.S.C. 159(a).

with fewer than 1,000 employees.<sup>140</sup> Consequently, the Commission estimates that most providers of incumbent local exchange service are small businesses that may be affected by the rules and policies adopted. Three hundred and seven (307) Incumbent Local Exchange Carriers reported that they were incumbent local exchange service providers.<sup>141</sup> Of this total, an estimated 1,006 have 1,500 or fewer employees.<sup>142</sup>

4. Competitive Local Exchange Carriers (Competitive LECs), Competitive Access Providers (CAPs), Shared-Tenant Service Providers, and Other Local Service Providers. Neither the Commission nor the SBA has developed a small business size standard specifically for these service providers. The appropriate NAICS Code category is Wired Telecommunications Carriers, as defined in paragraph 6 of this FRFA. Under that size standard, such a business is small if it has 1,500 or fewer employees.<sup>143</sup> U.S. Census data for 2007 indicate that 3,188 firms operated during that year. Of that number, 3,144 operated with fewer than 1,000 employees.<sup>144</sup> Based on this data, the Commission concludes that the majority of Competitive LECs, CAPs, Shared-Tenant Service Providers, and Other Local Service Providers, are small entities. According to Commission data, 1,442 carriers reported that they were engaged in the provision of either competitive local exchange services or competitive access provider services.<sup>145</sup> Of these 1,442 carriers, an estimated 1,256 have 1,500 or fewer employees.<sup>146</sup> In addition, 17 carriers have reported that they are Shared-Tenant Service Providers, and all 17 are estimated to have 1,500 or fewer employees.<sup>147</sup> Also, 72 carriers have reported that they are Other Local Service Providers.<sup>148</sup> Of this total, 70 have 1,500 or fewer employees.<sup>149</sup> Consequently, based on internally researched FCC data, the Commission estimates that most

providers of competitive local exchange service, competitive access providers, Shared-Tenant Service Providers, and Other Local Service Providers are small entities that may be affected by the rules adopted.

5. Interexchange Carriers (IXCs). Neither the Commission nor the SBA has developed a definition for Interexchange Carriers. The closest NAICS Code category is Wired Telecommunications Carriers as defined in paragraph 6 of this FRFA. The applicable size standard under SBA rules is that such a business is small if it has 1,500 or fewer employees.<sup>150</sup> U.S. Census data for 2007 indicates that 3,188 firms operated during that year. Of that number, 3,144 operated with fewer than 1,000 employees.<sup>151</sup> According to internally developed Commission data, 359 companies reported that their primary telecommunications service activity was the provision of interexchange services.<sup>152</sup> Of this total, an estimated 317 have 1,500 or fewer employees.<sup>153</sup> Consequently, the Commission estimates that the majority of interexchange service providers are small entities that may be affected by the rules adopted.

6. Prepaid Calling Card Providers. Neither the Commission nor the SBA has developed a small business size standard specifically for prepaid calling card providers. The appropriate NAICS Code category for prepaid calling card providers is Telecommunications Resellers. This industry comprises establishments engaged in purchasing access and network capacity from owners and operators of telecommunications networks and reselling wired and wireless telecommunications services (except satellite) to businesses and households. Mobile virtual networks operators (MVNOs) are included in this industry.<sup>154</sup> Under the applicable SBA size standard, such a business is small if it has 1,500 or fewer employees.<sup>155</sup> U.S. Census data for 2007 show that 1,523 firms provided resale services during that year. Of that number, 1,522 operated with fewer than 1,000 employees.<sup>156</sup> Thus, under this category

and the associated small business size standard, the majority of these prepaid calling card providers can be considered small entities. According to Commission data, 193 carriers have reported that they are engaged in the provision of prepaid calling cards.<sup>157</sup> All 193 carriers have 1,500 or fewer employees.<sup>158</sup> Consequently, the Commission estimates that the majority of prepaid calling card providers are small entities that may be affected by the rules adopted.

7. Local Resellers. The SBA has developed a small business size standard for the category of Telecommunications Resellers. Under that size standard, such a business is small if it has 1,500 or fewer employees.<sup>159</sup> Census data for 2007 show that 1,523 firms provided resale services during that year. Of that number, 1,522 operated with fewer than 1,000 employees.<sup>160</sup> Under this category and the associated small business size standard, the majority of these local resellers can be considered small entities. According to Commission data, 213 carriers have reported that they are engaged in the provision of local resale services.<sup>161</sup> Of this total, an estimated 211 have 1,500 or fewer employees.<sup>162</sup> Consequently, the Commission estimates that the majority of local resellers are small entities that may be affected by the rules adopted.

8. Toll Resellers. The Commission has not developed a definition for Toll Resellers. The closest NAICS Code Category is Telecommunications Resellers, and the SBA has developed a small business size standard for the category of Telecommunications Resellers. Under that size standard, such a business is small if it has 1,500 or fewer employees.<sup>163</sup> Census data for 2007 show that 1,523 firms provided resale services during that year. Of that number, 1,522 operated with fewer than 1,000 employees.<sup>164</sup> Thus, under this category and the associated small business size standard, the majority of these resellers can be considered small entities. According to Commission data, 881 carriers have reported that they are

<sup>153</sup> *Id.*

<sup>154</sup> *http://www.census.gov/cgi-bin/ssd/naics/naicsrch.*

<sup>155</sup> 13 CFR 121.201, NAICS code 517911.

<sup>156</sup> *http://factfinder.census.gov/faces/tableservices/jsf/pages/*

engaged in the provision of toll resale services.<sup>165</sup> Of this total, an estimated 857 have 1,500 or fewer employees.<sup>166</sup> Consequently, the Commission estimates that the majority of toll resellers are small entities that may be affected by the rules adopted.

9. Other Toll Carriers. Neither the Commission nor the SBA has developed a definition for small businesses specifically applicable to Other Toll Carriers. This category includes toll carriers that do not fall within the categories of interexchange carriers, operator service providers, prepaid calling card providers, satellite service carriers, or toll resellers. The closest applicable NAICS Code category is for Wired Telecommunications Carriers as defined in paragraph 6 of this FRFA. Under the applicable SBA size standard, such a business is small if it has 1,500 or fewer employees.<sup>167</sup> Census data for 2007 shows that there were 3,188 firms that operated that year. Of this total, 3,144 operated with fewer than 1,000 employees.<sup>168</sup> Thus, under this category and the associated small business size standard, the majority of Other Toll Carriers can be considered small. According to internally developed Commission data, 284 companies reported that their primary telecommunications service activity was the provision of other toll carriage.<sup>169</sup> Of these, an estimated 279 have 1,500 or fewer employees.<sup>170</sup> Consequently, the Commission estimates that most Other Toll Carriers are small entities that may be affected by the rules and policies adopted.

10. Wireless Telecommunications Carriers (except Satellite). This industry comprises establishments engaged in operating and maintaining switching and transmission facilities to provide communications via the airwaves, such as cellular services, paging services, wireless internet access, and wireless video services.<sup>171</sup> The appropriate size standard under SBA rules is that such a business is small if it has 1,500 or fewer employees. For this industry, Census data for 2007 show that there were 1,383 firms that operated for the entire year. Of this total, 1,368 firms had fewer than 1,000 employees. Thus under this category and the associated size standard, the Commission estimates

that the majority of wireless telecommunications carriers (except satellite) are small entities. Similarly, according to internally developed Commission data, 413 carriers reported that they were engaged in the provision of wireless telephony, including cellular service, Personal Communications Service (PCS), and Specialized Mobile Radio (SMR) services.<sup>172</sup> Of this total, an estimated 261 have 1,500 or fewer employees.<sup>173</sup> Consequently, the Commission estimates that approximately half of these firms can be considered small. Thus, using available data, we estimate that the majority of wireless firms can be considered small.

11. Cable Television and Other Subscription Programming.<sup>174</sup> Since 2007, these services have been defined within the broad economic census category of Wired Telecommunications Carriers. That category is defined as follows: "This industry comprises establishments primarily engaged in operating and/or providing access to transmission facilities and infrastructure that they own and/or lease for the transmission of voice, data, text, sound, and video using wired telecommunications networks.

<sup>172</sup> *Trends in Telephone Service*, at Table 5.3

<sup>173</sup> *Id.*

<sup>174</sup> In 2014, "Cable and Other Subscription Programming," NAICS Code 515210, replaced a prior category, now obsolete, which was called "Cable and Other Program Distribution." Cable and Other Program Distribution, prior to 2014, was placed under NAICS Code 517110, Wired Telecommunications Carriers. Wired Telecommunications Carriers is still a current and valid NAICS Code Category. Because of the similarity between "Cable and Other Subscription Programming" and "Cable and other Program Distribution," we will, in this proceeding, continue to use Wired Telecommunications Carrier data based on the U.S. Census. The alternative of using data gathered under Cable and Other Subscription Programming (NAICS Code 515210) is unavailable to us for two reasons. First, the size standard established by the SBA for Cable and Other Subscription Programming is annual receipts of \$38.5 million or less. Thus to use the annual receipts size standard would require the Commission either to switch from existing employee based size standard of 1,500 employees or less for Wired Telecommunications Carriers, or else would require the use of two size standards. No official approval of either option has been granted by the Commission as of the time of the release of the *FY 2015 NPRM*. Second, the data available under the size standard of \$38.5 million dollars or less is not applicable at this time, because the only currently available U.S. Census data for annual receipts of all businesses operating in the NAICS Code category of 515210 (Cable and other Subscription Programming) consists only of total receipts for all businesses operating in this category in 2007 and of total annual receipts for all businesses operating in this category in 2012. The data do not provide any basis for determining, for either year, how many businesses were small because they had annual receipts of \$38.5 million or less. See [http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=ECN\\_2012\\_US\\_5112&prodType=table](http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=ECN_2012_US_5112&prodType=table).

Transmission facilities may be based on a single technology or a combination of technologies."<sup>175</sup> The SBA has developed a small business size standard for this category, which is: All such firms having 1,500 or fewer employees.<sup>176</sup> Census data for 2007 shows that there were 3,188 firms that operated that year. Of this total, 3,144 had fewer than 1,000 employees.<sup>177</sup> Thus under this size standard, the majority of firms offering cable and other program distribution services can be considered small and may be affected by rules adopted.

12. Cable Companies and Systems. The Commission has developed its own small business size standards for the purpose of cable rate regulation. Under the Commission's rules, a "small cable company" is one serving 400,000 or fewer subscribers nationwide.<sup>178</sup> Industry data indicate that there are currently 4,600 active cable systems in the United States.<sup>179</sup> Of this total, all but ten cable operators nationwide are small under the 400,000-subscriber size standard.<sup>180</sup> In addition, under the Commission's rate regulation rules, a "small system" is a cable system serving 15,000 or fewer subscribers.<sup>181</sup> Current Commission records show 4,600 cable systems nationwide.<sup>182</sup> Of this total, 3,900 cable systems have less than 15,000 subscribers, and 700 systems have 15,000 or more subscribers, based on the same records.<sup>183</sup> Thus, under this standard as well, we estimate that most cable systems are small entities.

13. Cable System Operators (Telecom Act Standard). The Communications Act of 1934, as amended, also contains a size standard for small cable system operators, which is "a cable operator that, directly or through an affiliate, serves in the aggregate fewer than 1 percent of all subscribers in the United States and is not affiliated with any entity or entities whose gross annual

<sup>169</sup> *Trends in Telephone Service*, at Table 5.3.

<sup>170</sup> *Id.*

<sup>171</sup> NAICS Code 517210. See <http://www.census.gov/cgi-bin/ssd/naics/naicsrch>.

revenues in the aggregate exceed \$250,000,000.”<sup>184</sup> There are approximately 52,403,705 cable video subscribers in the United States today.<sup>185</sup> Accordingly, an operator serving fewer than 524,037 subscribers shall be deemed a small operator if its annual revenues, when combined with the total annual revenues of all its affiliates, do not exceed \$250 million in the aggregate.<sup>186</sup> Based on available data, we find that all but nine incumbent cable operators are small entities under this size standard.<sup>187</sup> We note that the Commission neither requests nor collects information on whether cable system operators are affiliated with entities whose gross annual revenues exceed \$250 million.<sup>188</sup> Although it seems certain that some of these cable system operators are affiliated with entities whose gross annual revenues exceed \$250,000,000, we are unable at this time to estimate with greater precision the number of cable system operators that would qualify as small cable operators under the definition in the Communications Act.

14. All Other Telecommunications. “All Other Telecommunications” is defined as follows: This U.S. industry is comprised of establishments that are primarily engaged in providing specialized telecommunications services, such as satellite tracking, communications telemetry, and radar station operation. This industry also includes establishments primarily engaged in providing satellite terminal stations and associated facilities connected with one or more terrestrial systems and capable of transmitting telecommunications to, and receiving telecommunications from, satellite systems. Establishments providing Internet services or voice over Internet protocol (VoIP) services via client-supplied telecommunications connections are also included in this industry.<sup>189</sup> The SBA has developed a small business size standard for “All Other Telecommunications,” which consists of all such firms with gross annual receipts of \$32.5 million or

less.<sup>190</sup> For this category, census data for 2007 show that there were 2,383 firms that operated for the entire year. Of these firms, a total of 2,346 had gross annual receipts of less than \$25 million.<sup>191</sup> Thus, a majority of “All Other Telecommunications” firms potentially affected by the rules adopted can be considered small.

#### D. Description of Projected Reporting, Recordkeeping and Other Compliance Requirements

15. This Report and Order does not adopt any new reporting, recordkeeping, or other compliance requirements.

#### E. Steps Taken To Minimize Significant Economic Impact on Small Entities, and Significant Alternatives Considered

16. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its approach, which may include the following four alternatives, among others: (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.<sup>192</sup>

17. This Report and Order does not adopt any new reporting requirements. Therefore no adverse economic impact on small entities will be sustained based on reporting requirements. There will be a regulatory fee instituted on DBS providers due to the adoption of a new fee category, but we anticipate that the two primary DBS companies required to pay these fees are not small entities. Similarly, a new regulatory fee for Responsible Organizations (Resp. Org) has also been instituted in FY 2015 for the toll free number fee category that was previously adopted—the fee rate adopted is 12 cents per year. This is not a new reporting requirement, and should not have any adverse economic impact on small Resp. Org. entities because they are able to recover these assessed fees from their customers.

18. In keeping with the requirements of the Regulatory Flexibility Act, we have considered certain alternative means of mitigating the effects of fee increases to a particular industry segment. For example, beginning in FY

2015 the Commission has increased the *de minimis* threshold from under \$10 to \$500 (the total of all regulatory fees), which will impact many small entities that pay regulatory fees for ITSP, paging, cellular, cable, and Low Power Television/FM Translators. Historically, many of these small entities have been late in making their fee payments to the Commission by the due date. This increase in the *de minimis* threshold to \$500 will relieve regulatees both financially and administratively. Finally, regulatees may also seek waivers or other relief on the basis of financial hardship. See 47 CFR 1.1166.

#### F. Federal Rules That May Duplicate, Overlap, or Conflict

19. None.

### VIII. Ordering Clauses

20. Accordingly, *it is ordered* that, pursuant to sections 4(i) and (j), 9, and 303(r) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 154(j), 159, and 303(r), this Report and Order and Further Notice of Proposed Rulemaking is hereby adopted.

21. *It is further ordered* that, as provided in paragraph 41, this Report and Order and Further Notice of Proposed Rulemaking shall be effective September 17, 2015.

22. *It is further ordered* that the Commission’s Consumer & Governmental Affairs Bureau, Reference Information Center, shall send a copy of this Report and Order, including the Final Regulatory Flexibility Analysis, to the Chief Counsel for Advocacy of the U.S. Small Business Administration.

Federal Communications Commission.

#### List of Subjects in 47 CFR Part 1

Administrative practice and procedure. Lawyers, Metric system, Penalties, Reporting and recordkeeping requirements, Telecommunications.

#### Rule Changes

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR, part 1 as follows:

### PART 1—PRACTICE AND PROCEDURE

■ 1. The authority citation for part 1 continues to read as follows:

**Authority:** 15 U.S.C. 79, *et seq.*; 47 U.S.C. 151, 154(i), 154(j), 155, 157, 160, 201, 225, 227, 303, 309, 332, 1403, 1404, 1451, 1452, and 1455.

■ 2. Section 1.1152 is revised to read as follows:

<sup>184</sup> 47 CFR 901 (f) and notes ff. 1, 2, and 3.

<sup>185</sup> See SNL KAGAN at <https://www.snl.com/interactivex/MultichannelIndustryBenchmarks.aspx>.

<sup>186</sup> 47.901(f) and notes ff. 1, 2, and 3.

<sup>187</sup> See SNL KAGAN at [www.snl.com/Interactivex/TopCableMSOs.aspx](http://www.snl.com/Interactivex/TopCableMSOs.aspx)

<sup>188</sup> The Commission does receive such information on a case-by-case basis if a cable operator appeals a local franchise authority’s finding that the operator does not qualify as a small cable operator pursuant to 76.901(f) of the Commission’s rules. See 47 CFR 76.901(f).

<sup>189</sup> <http://www.census.gov/cgi-bin/sssd/naics/naicsrch>.

<sup>190</sup> 13 CFR 121.201; NAICS Code 517919.

<sup>191</sup> [http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=ECN\\_2007\\_US\\_51SSSZ5&prodType=table](http://factfinder.census.gov/faces/tableservices/jsf/pages/productview.xhtml?pid=ECN_2007_US_51SSSZ5&prodType=table).

<sup>192</sup> 5 U.S.C. 603(c)(1) through (c)(4).

**§ 1.1152 Schedule of annual regulatory fees for wireless radio services.**

Exclusive use services (per license)	Fee amount <sup>1</sup>
1. Land Mobile (Above 470 MHz and 220 MHz Local, Base Station & SMRS) (47 CFR part 90):	
(a) New, Renew/Mod (FCC 601 & 159) .....	\$30.00
(b) New, Renew/Mod (Electronic Filing) (FCC 601 & 159) .....	30.00
(c) Renewal Only (FCC 601 & 159) .....	30.00
(d) Renewal Only (Electronic Filing) (FCC 601 & 159) .....	30.00
220 MHz Nationwide:	
(a) New, Renew/Mod (FCC 601 & 159) .....	30.00
(b) New, Renew/Mod (Electronic Filing) (FCC 601 & 159) .....	30.00
(c) Renewal Only (FCC 601 & 159) .....	30.00
(d) Renewal Only (Electronic Filing) (FCC 601 & 159) .....	30.00
2. Microwave (47 CFR part 101) (Private):	
(a) New, Renew/Mod (FCC 601 & 159) .....	20.00
(b) New, Renew/Mod (Electronic Filing) (FCC 601 & 159) .....	20.00
(c) Renewal Only (FCC 601 & 159) .....	20.00
(d) Renewal Only (Electronic Filing) (FCC 601 & 159) .....	20.00
3. Shared Use Services:	
Land Mobile (Frequencies Below 470 MHz—except 220 MHz):	
(a) New, Renew/Mod (FCC 601 & 159) .....	10.00
(b) New, Renew/Mod (Electronic Filing) (FCC 601 & 159) .....	10.00
(c) Renewal Only (FCC 601 & 159) .....	10.00
(d) Renewal Only (Electronic Filing) (FCC 601 & 159) .....	10.00
Rural Radio (Part 22):	
(a) New, Additional Facility, Major Renew/Mod (Electronic Filing) (FCC 601 & 159) .....	10.00
(b) Renewal, Minor Renew/Mod (Electronic Filing) (FCC 601 & 159) .....	10.00
Marine Coast:	
(a) New Renewal/Mod (FCC 601 & 159) .....	35.00
(b) New, Renewal/Mod (Electronic Filing) (FCC 601 & 159) .....	35.00
(c) Renewal Only (FCC 601 & 159) .....	35.00
(d) Renewal Only (Electronic Filing) (FCC 601 & 159) .....	35.00
Aviation Ground:	
(a) New, Renewal/Mod (FCC 601 & 159) .....	20.00
(b) New, Renewal/Mod (Electronic Filing) (FCC 601 & 159) .....	20.00

6. Broadband Radio Service (formerly MMDS and MDS) .....	635
7. Local Multipoint Distribution Service .....	635

■ 3. Section 1.1153 is revised to read as follows:

**§ 1.1153 Schedule of annual regulatory fees and filing locations for mass media services.**

	Fee amount
Radio [AM and FM] (47 CFR part 73):	
1. <i>AM Class A</i> :	
<=25,000 population .....	\$775
25,001–75,000 population .....	1,550
75,001–150,000 population .....	2,325
150,001–500,000 population .....	3,475

<sup>1</sup> Note that “small fees” are collected in advance for the entire license term. Therefore, the annual fee amount shown in this table that is a small fee (categories 1 through 5) must be multiplied by the

5- or 10-year license term, as appropriate, to arrive at the total amount of regulatory fees owed. Also, application fees may apply as detailed in § 1.1102 of this chapter.

<sup>2</sup> These are standard fees that are to be paid in accordance with § 1.1157(b) of this chapter.

<sup>3</sup> These are standard fees that are to be paid in accordance with 1.1157(b) of this chapter.

	Fee amount
500,001–1,200,000 population .....	5,025
1,200,001–3,000,000 population .....	7,750
>3,000,000 population .....	9,300
<b>2. AM Class B:</b>	
<=25,000 population .....	645
25,001–75,000 population .....	1,300
75,001–150,000 population .....	1,625
150,001–500,000 population .....	2,750
500,001–1,200,000 population .....	4,225
1,200,001–3,000,000 population .....	6,500
>3,000,000 population .....	7,800
<b>3. AM Class C:</b>	
<=25,000 population .....	590
25,001–75,000 population .....	900
75,001–150,000 population .....	1,200
150,001–500,000 population .....	1,800
500,001–1,200,000 population .....	3,000
1,200,001–3,000,000 population .....	4,500
>3,000,000 population .....	5,700
<b>4. AM Class D:</b>	
<=25,000 population .....	670
25,001–75,000 population .....	1,000
75,001–150,000 population .....	1,675
150,001–500,000 population .....	2,025
500,001–1,200,000 population .....	3,375
1,200,001–3,000,000 population .....	5,400
>3,000,000 population .....	6,750
<b>5. AM Construction Permit</b> .....	590
<b>6. FM Classes A, B1 and C3:</b>	
<=25,000 population .....	750
25,001–75,000 population .....	1,500
75,001–150,000 population .....	2,050
150,001–500,000 population .....	3,175
500,001–1,200,000 population .....	5,050
1,200,001–3,000,000 population .....	8,250
>3,000,000 population .....	10,500
<b>7. FM Classes B, C, C0, C1 and C2:</b>	
<=25,000 population .....	925
25,001–75,000 population .....	1,625
75,001–150,000 population .....	3,000
150,001–500,000 population .....	3,925
500,001–1,200,000 population .....	5,775
1,200,001–3,000,000 population .....	9,250
>3,000,000 population .....	12,025
<b>8. FM Construction Permits</b> .....	750
<b>TV (47 CFR part 73) Digital TV (UHF and VHF Commercial Stations):</b>	
1. Markets 1 thru 10 .....	46,825
2. Markets 11 thru 25 .....	43,200
3. Markets 26 thru 50 .....	27,625
4. Markets 51 thru 100 .....	16,275
5. Remaining Markets .....	4,850
6. Construction Permits .....	4,850
<b>Satellite UHF/VHF Commercial:</b>	
1. All Markets .....	1,575
<b>Low Power TV, Class A TV, TV/FM Translator, &amp; TV/FM Booster (47 CFR part 74)</b> .....	440

■ 4. Section 1.1154 is revised to read as follows:

**§ 1.1154 Schedule of annual regulatory charges for common carrier services.**

	Fee amount
<b>Radio Facilities:</b>	
1. Microwave (Domestic Public Fixed) (Electronic Filing) (FCC Form 601 & 159) .....	\$20.00.
<b>Carriers:</b>	
1. Interstate Telephone Service Providers (per interstate and international end-user revenues (see FCC Form 499–A) .....	\$.00331.
2. Toll Free Number Fee .....	.12 per Toll Free Number.

■ 5. Section 1.1155 is revised to read as follows:

**§ 1.1155 Schedule of regulatory fees for cable television services.**

	Fee amount
1. Cable Television Relay Service .....	\$660.
2. Cable TV System, Including IPTV (per subscriber) .....	0.96.
3. Direct Broadcast Satellite (DBS) .....	\$.12 per subscriber.

■ 6. Section 1.1156 is revised to read as follows:

**§ 1.1156 Schedule of regulatory fees for international services.**

(a) The following schedule applies for the listed services:

Fee category	Fee amount
Space Stations (Geostationary Orbit) .....	\$119,150
Space Stations (Non-Geostationary Orbit) .....	132,125
Earth Stations: Transmit/Receive & Transmit only (per authorization or registration) .....	310

(b) *International Terrestrial and Satellite*. Regulatory fees for International Bearer Circuits are to be paid by facilities-based common carriers that have active (used or leased) international bearer circuits as of December 31 of the prior year in any terrestrial or satellite transmission facility for the provision of service to an end user or resale carrier, which

includes active circuits to themselves or to their affiliates. In addition, non-common carrier satellite operators must pay a fee for each circuit sold or leased to any customer, including themselves or their affiliates, other than an international common carrier authorized by the Commission to provide U.S. international common carrier services. "Active circuits" for

these purposes include backup and redundant circuits. In addition, whether circuits are used specifically for voice or data is not relevant in determining that they are active circuits.

The fee amount, per active 64 KB circuit or equivalent will be determined for each fiscal year.

International terrestrial and satellite (capacity as of December 31, 2014)	Fee amount
Terrestrial Common Carrier Satellite Common Carrier Satellite Non-Common Carrier .....	\$0.03 per 64 KB Circuit.

(c) *Submarine cable*: Regulatory fees for submarine cable systems will be paid annually, per cable landing license,

for all submarine cable systems operating as of December 31 of the prior

year. The fee amount will be determined by the Commission for each fiscal year.

Submarine cable systems (capacity as of December 31, 2014)	Fee amount
<2.5 Gbps .....	\$7,175
2.5 Gbps or greater, but less than 5 Gbps .....	14,350
5 Gbps or greater, but less than 10 Gbps .....	28,675
10 Gbps or greater, but less than 20 Gbps .....	57,350
20 Gbps or greater .....	114,700

**FEDERAL COMMUNICATIONS COMMISSION**

**47 CFR Parts 27 and 74**

[GN Docket No. 12-268; FCC 14-50]

**Expanding the Economic and Innovation Opportunities of Spectrum Through Incentive Auctions**

AGENCY: Federal Communications Commission.

**ACTION:** Final rule; announcement of effective date.

**SUMMARY:** In this document, the Federal Communications Commission (Commission) announces that the Office of Management and Budget (OMB) has approved, for a period of three years, certain information collection requirements associated with the Commission's Expanding the Economic and Innovation Opportunities of Spectrum Through Incentive Auctions Report and Order (*Incentive Auction Report and Order*), FCC 14-50. This document is consistent with the

*Incentive Auction Report and Order*, which stated that the Commission would publish a document in the **Federal Register** announcing OMB approval and the effective date of the new information collection requirements.

**DATES:** The amendments to 47 CFR 27.14(k), 27.14(t)(6), 27.17(c), 27.19(b), 27.19(c), 74.602(h)(5)(ii), and 74.602(h)(5)(iii), published at 79 FR 48442, August 15, 2014, are effective on September 17, 2015.

**FOR FURTHER INFORMATION CONTACT:** Cathy Williams by email at

Cathy.Williams@fcc.gov and telephone at (202) 418-2918.

**SUPPLEMENTARY INFORMATION:** This document announces that, on August 27, 2015, OMB approved certain information collection requirements contained in the Commission's *Incentive Auction Report and Order*, FCC 14-50, published at 79 FR 48442, August 15, 2014. The OMB Control Number is 3060-1180. The Commission publishes this document as an announcement of the effective date of these information collection requirements.

### Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the FCC is notifying the public that it received OMB approval on August 27, 2015, for the new information collection requirements contained in the Commission's rules at 47 CFR 27.14(k), 27.14(t)(6), 27.17(c), 27.19(b), 27.19(c), 74.602(h)(5)(ii), 74.602(h)(5)(iii). Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Number is 3060-1180.

The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104-13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

*OMB Control Number:* 3060-1180.

*OMB Approval Date:* August 27, 2015.

*OMB Expiration Date:* August 31, 2018.

*Title:* Expanding the Economic and Innovation Opportunities of Spectrum Through Incentive Auctions.

*Form Number:* N/A.

*Respondents:* Business or other for-profit entities, state, local, or tribal government and not for profit institutions.

*Number of Respondents and Responses:* 378 respondents and 378 responses.

*Estimated Time per Response:* .5 hours-2 hours.

*Frequency of Response:* One-time and on occasion reporting requirements, twice within 12 years reporting requirement, 6, 10 and 12-years reporting requirements and third party disclosure requirement.

*Obligation to Respond:* Required to obtain or retain benefits. Statutory authority for these collections are contained in 47 U.S.C. 151, 154, 301, 303, 307, 308, 309, 310, 316, 319, 325(b), 332, 336(f), 338, 339, 340, 399b, 403, 534, 535, 1404, 1452, and 1454 of the Communications Act of 1934.

*Total Annual Burden:* 581 hours.

*Total Annual Cost:* No cost.

*Privacy Impact Assessment:* No impact(s).

*Nature and Extent of Confidentiality:* There is no need for confidentiality with this collection of information.

*Needs and Uses:* The FCC adopted the Expanding the Economic and Innovation Opportunities of Spectrum Through Incentive Auctions Report and Order, FCC 14-50, on May 15, 2014, published at 79 FR 48442 (Aug. 15, 2014). The Commission sought approval from the Office of Management and Budget (OMB) for some of the information collection requirements contained in FCC 14-50. The Commission will use the information to ensure compliance with required filings of notifications, certifications, license renewals, license cancellations, and license modifications. Also, such information will be used to minimize interference and to determine compliance with Commission's rules.

The following is a description of the information collection requirements for which the Commission sought OMB approval:

Section 27.14(k) requires 600 MHz licensees to demonstrate compliance with performance requirements by filing a construction notification with the Commission, within 15 days of the applicable benchmark.

Section 27.14(t)(6) requires 600 MHz licensees to make a renewal showing as a condition of each renewal. The showing must include a detailed description of the applicant's provision of service during the entire license period and address: (i) The level and quality of service provided by the applicant (including the population served, the area served, the number of subscribers, the services offered); (ii) the date service commenced, whether service was ever interrupted, and the duration of any interruption or outage; (iii) the extent to which service is provided to rural areas; (iv) the extent to which service is provided to qualifying tribal land as defined in 47 CFR 1.2110(f)(3)(i); and (v) any other factors associated with the level of service to the public.

Section 27.17(c) requires 600 MHz licensees to notify the Commission

within 10 days of discontinuance if they permanently discontinue service by filing FCC Form 601 or 605 and requesting license cancellation.

Section 27.19(b) requires 600 MHz licensees with base and fixed stations in the 600 MHz downlink band within 25 kilometers of Very Long Baseline Array (VLBA) observatories to coordinate with the National Science Foundation (NSF) prior to commencing operations.

Section 27.19(c) requires 600 MHz licensees that intend to operate base and fixed stations in the 600 MHz downlink band in locations near the Radio Astronomy Observatory site located in Green Bank, Pocahontas County, West Virginia, or near the Arecibo Observatory in Puerto Rico, to comply with the provisions in 47 CFR 1.924.

Section 74.602(h)(5)(ii) requires 600 MHz licensees to notify the licensee of a studio-transmitter link (TV STL), TV relay station, or TV translator relay station of their intent to commence wireless operations and the likelihood of harmful interference from the TV STL, TV relay station, or TV translator relay station to those operations within the wireless licensee's licensed geographic service area. The notification is to be in the form of a letter, via certified mail, return receipt requested and must be sent not less than 30 days in advance of approximate date of commencement of operations.

Section 74.602(h)(5)(iii) requires all TV STL, TV relay station and TV translator relay station licensees to modify or cancel their authorizations and vacate the 600 MHz band no later than the end of the post-auction transition period as defined in 47 CFR 27.4.

These rules which contain information collection requirements are designed to provide for flexible use of this spectrum by allowing licensees to choose their type of service offerings, to encourage innovation and investment in mobile broadband use in this spectrum, and to provide a stable regulatory environment in which broadband deployment would be able to develop through the application of standard terrestrial wireless rules. Without this information, the Commission would not be able to carry out its statutory responsibilities.

Federal Communications Commission.

# Proposed Rules

Federal Register

Vol. 80, No. 180

Thursday, September 17, 2015

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## DEPARTMENT OF ENERGY

[Docket No. EERE-2015-BT-TP-0015]

RIN 1904-AD54

### Energy Conservation Program: Test Procedures for Small, Large, and Very Large Air-Cooled Commercial Package Air Conditioning and Heating Equipment

**AGENCY:** Office of Energy Efficiency and Renewable Energy, Department of Energy.

**ACTION:** Proposed rule; reopening of public comment period.

**SUMMARY:** On August 6, 2015, the U.S. Department of Energy (DOE) published a notice of proposed rulemaking (NPR) in the **Federal Register** regarding proposed amendments to the test procedures for small, large, and very large air-cooled commercial package air conditioning and heating equipment. DOE also held a related public meeting on September 4, 2015. The comment period for the NPR was scheduled to end September 8, 2015. After receiving a request for an additional two weeks to comment, DOE has decided to reopen the comment period for submitting comments and data in response to the NPR regarding test procedures for small, large, and very large air-cooled commercial package air conditioning and heating equipment. The comment period is extended.

**DATES:** The comment period for the NPR regarding test procedures for small, large, and very large air-cooled commercial package air conditioning and heating equipment published on August 6, 2015 (80 FR 46870) is reopened. DOE will accept comments, data, and information in response to the NPR received no later than October 2, 2015.

**ADDRESSES:** Any comments submitted must identify the NPR for Test Procedures for Small, Large, and Very Large Air-Cooled Commercial Package Air Conditioning and Heating Equipment, and provide docket number

EERE-2015-BT-TP-0015 and/or regulatory information number (RIN) number 1904-AD54. Interested persons may submit comments using any of the following methods:

1. *Federal eRulemaking Portal:* [www.regulations.gov](http://www.regulations.gov). Follow the instructions for submitting comments.

2. *Email:* [CommPkgACHeat2015TP0015@ee.doe.gov](mailto:CommPkgACHeat2015TP0015@ee.doe.gov). Include the docket number EERE-2015-BT-TP-0015 and/or RIN 1904-AD54 in the subject line of the message.

3. *Mail:* Ms. Brenda Edwards, U.S. Department of Energy, Building Technologies Office, Mailstop EE-5B, 1000 Independence Avenue SW., Washington, DC 20585-0121. If possible, please submit all items on a compact disc (CD), in which case it is not necessary to include printed copies.

4. *Hand Delivery/Courier:* Ms. Brenda Edwards, U.S. Department of Energy, Building Technologies Office, 950 L'Enfant Plaza SW., Suite 600, Washington, DC 20024. Telephone: (202) 586-2945. If possible, please submit all items on a CD, in which case it is not necessary to include printed copies.

No telefacsimilies (faxes) will be accepted. For detailed instructions on submitting comments and additional information on the rulemaking process, see section V (Public Participation) of the August 6, 2015 NPR for test procedures for small, large, and very large air-cooled commercial package air conditioning and heating equipment.

**Docket:** The docket, which includes **Federal Register** notices, public meeting attendee lists and transcripts, comments, and other supporting documents/materials, is available for review at [www.regulations.gov](http://www.regulations.gov). All documents in the docket are listed in the [www.regulations.gov](http://www.regulations.gov) index. However, not all documents listed in the index may be publicly available, such as those containing information that is exempt from public disclosure.

A link to the docket Web page can be found at: [[www.regulations.gov/#!docketDetail;D=EERE-2015-BT-TP-0015](http://www.regulations.gov/#!docketDetail;D=EERE-2015-BT-TP-0015)]. This Web page contains a link to the docket for this NPR on the [www.regulations.gov](http://www.regulations.gov) site. The [www.regulations.gov](http://www.regulations.gov) Web page contains simple instructions on how to access all documents, including public comments, in the docket.

**FOR FURTHER INFORMATION CONTACT:** Ms. Ashley Armstrong, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE-5B, 1000 Independence Avenue SW., Washington, DC 20585-0121. Telephone: (202) 586-6590. Email: [Ashley.Armstrong@ee.doe.gov](mailto:Ashley.Armstrong@ee.doe.gov).

Mr. Michael Kido, U.S. Department of Energy, Office of the General Counsel, GC-33, 1000 Independence Avenue SW., Washington, DC 20585-0121. Telephone: (202) 586-8145. Email: [Michael.Kido@hq.doe.gov](mailto:Michael.Kido@hq.doe.gov).

For further information on how to submit a comment or review other public comments and the docket, contact Ms. Brenda Edwards at (202) 586-2945 or by email: [Brenda.Edwards@ee.doe.gov](mailto:Brenda.Edwards@ee.doe.gov).

**SUPPLEMENTARY INFORMATION:** The Energy Policy and Conservation Act of 1975 (EPCA), as amended, requires DOE to conduct an evaluation of its test procedures at least once every seven years for each class of covered equipment (including the equipment that is the subject of this rulemaking) to determine if an amended test procedure would more accurately or fully comply with the requirement to be reasonably designed to produce test results that reflect the energy efficiency, energy use, and operating costs during a representative average use cycle. DOE must either prescribe amended test procedures or publish a notice in the **Federal Register** regarding its determination not to amend test procedures. (42 U.S.C. 6314(a)(1)-(2))

On August 6, 2015, DOE published a notice of proposed rulemaking (NPR) in the **Federal Register** regarding potential amendments to the test procedures for small, large, and very large air-cooled commercial package air conditioning and heating equipment (80 FR 46870). The notice provided for the submission of written comments by September 8, 2015, and oral comments were also accepted at a public meeting held on September 4, 2015.

On September 4, 2015, DOE received a request from Goodman Manufacturing Co., seeking an additional two weeks to prepare and submit comments. On September 8, 2015, DOE received a request from Lennox International seeking an additional 30 days to review the technical aspects of the proposed test procedure. After careful

consideration of this request, DOE has determined that extending the public comment period by reopening to allow additional time for interested parties to submit comments is appropriate based on the foregoing reasons. Accordingly, DOE has decided to grant the request and reopen the public comment period on the NOPR for test procedures for small, large, and very large air-cooled commercial package air conditioning and heating equipment for 15 days to allow for additional data and comments to be submitted, especially in light of the public meeting discussion on specific topics. Consequently, DOE will consider any comments in response to the NOPR received by midnight of October 2, 2015, and deems any comments received by that time to be timely submitted.

Issued in Washington, DC, on September 11, 2015.

**Kathleen B. Hogan,**

*Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.*

## DEPARTMENT OF TRANSPORTATION

### Federal Aviation Administration

#### 14 CFR Part 39

[Docket No. FAA-2015-3632; Directorate Identifier 2015-NM-023-AD]

RIN 2120-AA64

#### Airworthiness Directives; Airbus Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Notice of proposed rulemaking (NPRM).

**SUMMARY:** We propose to supersede Airworthiness Directive (AD) 2014-14-06 for all Airbus Model A318-111 and -112 airplanes; Model A319-111, -112, -113, -114, and -115 airplanes; Model A320-111, -211, -212, and -214 airplanes; and Model A321-111, -112, -211, -212, and -213 airplanes. AD 2014-14-06 currently requires inspecting the aft engine mount retainers for surface finish, cracks, and failure, and replacement if necessary. Since we issued AD 2014-14-06, inspection results have shown that the main cause of crack initiation remains the vibration dynamic effect that affects both retainers, either with “dull” or “bright” surface finishes. This proposed AD would require repetitive inspections for damage, cracks, broken, and missing

aft engine mount retainers, and replacement if necessary. We are proposing this AD to detect and correct failure of retainer brackets of the aft engine mount and consequent loss of the locking feature of the nuts of the inner and outer pins; loss of the pins will result in the aft mount engine link no longer being secured to the aft engine mount.

**DATES:** We must receive comments on this proposed AD by November 2, 2015.

**ADDRESSES:** You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Fax:* 202-493-2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For Airbus service information identified in this proposed AD, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email [account.airworth-eas@airbus.com](mailto:account.airworth-eas@airbus.com); Internet <http://www.airbus.com>.

For Goodrich Aerostructures service information identified in this proposed AD, contact Goodrich Aerostructures, 850 Lagoon Drive, Chula Vista, CA 91910-2098; telephone 619-691-2719; email [jan.lewis@goodrich.com](mailto:jan.lewis@goodrich.com); Internet <http://www.goodrich.com/TechPubs>.

You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

#### Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-3632; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800-647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

#### FOR FURTHER INFORMATION CONTACT:

Sanjay Ralhan, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1405; fax 425-227-1149.

#### SUPPLEMENTARY INFORMATION:

##### Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include “Docket No. FAA-2015-3632; Directorate Identifier 2015-NM-023-AD” at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

##### Discussion

On July 3, 2014, we issued AD 2014-14-06, Amendment 39-17901 (79 FR 42655, July 23, 2014). AD 2014-14-06 requires actions intended to address an unsafe condition on all Model A318-111 and -112 airplanes; Model A319-111, -112, -113, -114, and -115 airplanes; Model A320-111, -211, -212, and -214 airplanes; and Model A321-111, -112, -211, -212, and -213 airplanes.

Since we issued AD 2014-14-06, Amendment 39-17901 (79 FR 42655, July 23, 2014), we have determined that additional inspections are necessary to address the identified unsafe condition. The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2015-0021, dated February 13, 2015 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition. The MCAI states:

During in-service inspections, several aft engine mount retainers, fitted on aeroplanes equipped with CFM56-5A/5B engines, have been found broken. The results of the initial investigations highlighted that two different types of surface finish had been applied (respectively bright and dull material finishes), and that dull finish affects the strength of the retainer with regard to fatigue properties of the part. The pins which attach the engine link to the aft mount are secured

by two nuts, which do not have a self-locking feature; this function is provided by the retainer brackets. In case of failure of the retainer bracket, the locking feature of the nuts of the inner and outer pins is lost; as a result, these nuts could subsequently become loose.

In case of full loss of the nuts, there is the potential to also lose the pins, in which case the aft mount link will no longer be secured to the aft engine mount. The same locking feature is used for the three link assemblies of the aft mount.

This condition, if not detected and corrected, could lead to in-flight loss of an aft mount link, possibly resulting in damage to the aeroplane and injury to person on the ground.

To address this potential unsafe condition, EASA issued AD 2013-0050 ([http://ad.easa.europa.eu/blob/easa\\_ad\\_2013\\_0050\\_superseded.pdf](http://ad.easa.europa.eu/blob/easa_ad_2013_0050_superseded.pdf)) AD 2013-0050\_1 [which corresponds to FAA AD 2014-14-06, Amendment 39-17901 (79 FR 42655, July 23, 2014)] to require detailed inspections (DET) of the aft engine mount retainers and the replacement of all retainers with dull finish with retainers having a bright finish.

Since that [EASA] AD was issued, inspection results have shown that the main cause of crack initiation remains the vibration dynamic effect that affects both retainers, either with "dull" or "bright" surface finishes. The non-conforming "dull" surface's pitting is an aggravating factor.

For the reasons described above, this [EASA] AD retains the requirements of EASA AD 2013-0050, which is superseded, and requires repetitive DET of all aft engine mount retainers and, depending on findings [damaged, cracked, broken, or missing retainers], their replacement.

This [EASA] AD is considered to be an interim action, pending development and availability of a final solution.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-3632.

#### **Related Service Information Under 1 CFR Part 51**

Airbus has issued Service Bulletin A320-71-1060, dated October 9, 2014. This service information describes procedures for inspection of the aft engine mount retainers for surface finish (dull or bright), for damaged, cracked, broken, or missing retainers, and replacement.

Goodrich Aerostructures has issued Service Bulletin RA32071-160, dated September 18, 2014. This service information describes procedures for inspection of the aft engine mount inner retainers for cracks or failure, and replacement.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means

identified in the **ADDRESSES** section of this NPRM.

#### **FAA's Determination and Requirements of This Proposed AD**

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of these same type designs.

#### **Explanation of "RC" Procedures and Tests in Service Information**

The FAA worked in conjunction with industry, under the Airworthiness Directive Implementation Aviation Rulemaking Committee (ARC), to enhance the AD system. One enhancement was a new process for annotating which procedures and tests in the service information are required for compliance with an AD. Differentiating these procedures and tests from other tasks in the service information is expected to improve an owner's/operator's understanding of crucial AD requirements and help provide consistent judgment in AD compliance. The procedures and tests identified as Required for Compliance (RC) in any service information have a direct effect on detecting, preventing, resolving, or eliminating an identified unsafe condition.

As specified in a NOTE under the Accomplishment Instructions of the specified Airbus service information, procedures and tests that are identified as RC in any service information must be done to comply with the proposed AD. However, procedures and tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an alternative method of compliance (AMOC), provided the procedures and tests identified as RC can be done and the airplane can be put back in a serviceable condition. Any substitutions or changes to procedures or tests identified as RC will require approval of an AMOC.

#### **Costs of Compliance**

We estimate that this proposed AD affects 922 airplanes of U.S. registry.

The actions required by AD 2014-14-06, Amendment 39-17901 (79 FR 42655, July 23, 2014), and retained in this proposed AD take about 3 work-hours per product, at an average labor rate of \$85 per work-hour. Based on these figures, the estimated cost of the actions that are required by AD 2014-14-06 is \$255 per inspection cycle per product (for two engines).

We also estimate that it would take about 10 work-hours per product to comply with the basic requirements of this proposed AD, and 1 work-hour per product to report inspection findings. The average labor rate is \$85 per work-hour. Based on these figures, we estimate the cost of this proposed AD on U.S. operators to be \$862,070, or \$935 per product.

In addition, we estimate that any necessary follow-on actions would take about 2 work-hours and require parts costing \$10,000, for a cost of \$10,170 per product. We have no way of determining the number of aircraft that might need these actions.

#### **Paperwork Reduction Act**

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB control number. The control number for the collection of information required by this AD is 2120-0056. The paperwork cost associated with this AD has been detailed in the Costs of Compliance section of this document and includes time for reviewing instructions, as well as completing and reviewing the collection of information. Therefore, all reporting associated with this AD is mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at 800 Independence Ave. SW., Washington, DC 20591, ATTN: Information Collection Clearance Officer, AES-200.

#### **Authority for this Rulemaking**

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with

promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

### Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a “significant regulatory action” under Executive Order 12866;
2. Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

### The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

## PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

### § 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2014–14–06, Amendment 39–17901 (79 FR 42655, July 23, 2014), and adding the following new AD:

**Airbus:** Docket No. FAA–2015–3632; Directorate Identifier 2015–NM–023–AD.

#### (a) Comments Due Date

We must receive comments by November 2, 2015.

#### (b) Affected ADs

This AD replaces AD 2014–14–06, Amendment 39–17901 (79 FR 42655, July 23, 2014).

#### (c) Applicability

This AD applies to the Airbus airplanes identified in paragraphs (c)(1) through (c)(4) of this AD, certificated in any category, all manufacturer serial numbers.

- (1) Airbus Model A318–111 and –112 airplanes.
- (2) Airbus Model A319–111, –112, –113, –114, and –115 airplanes.
- (3) Airbus Model A320–211, –212, and –214 airplanes.
- (4) Airbus Model A321–111, –112, –211, –212, and –213 airplanes.

#### (d) Subject

Air Transport Association (ATA) of America Code 71, Powerplant.

#### (e) Reason

This AD was prompted by inspection results that have shown that the main cause of crack initiation in the aft engine mount retainers is the vibration dynamic effect that affects both retainers, either with “dull” or “bright” surface finishes. We are issuing this AD to detect and correct failure of retainer brackets of the aft engine mount and consequent loss of the locking feature of the nuts of the inner and outer pins; loss of the pins will result in the aft mount engine link no longer being secured to the aft engine mount.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

#### (g) Retained Inspection, With No Changes

This paragraph restates the requirements of paragraph (g) of AD 2014–14–06, Amendment 39–17901 (79 FR 42655, July 23, 2014), with no changes. Within 3 months after August 27, 2014 (the effective date of AD 2014–14–06): Do a detailed inspection of the aft engine mount retainers for surface finish (dull or bright), and for cracks and failure, in accordance with Section 4.2.2, “Inspection Requirements,” of Airbus Alert Operators Transmission (AOT) A71N001–12, Rev. 2, dated February 27, 2013, except as specified in paragraph (h) of this AD.

#### (h) Retained Exception to Paragraph (g) of This AD, With No Changes

This paragraph restates the requirements of paragraph (h) of AD 2014–14–06, Amendment 39–17901 (79 FR 42655, July 23, 2014), with no changes. The actions required by paragraph (g) of this AD are not required to be done on airplanes with manufacturer serial numbers 4942 and higher, provided a review of maintenance records verifies that no aft engine mount retainers have been replaced since first flight of the airplane.

#### (i) Retained Repetitive Inspection and Retainer Replacement for Dull Finish Retainers, With No Changes

This paragraph restates the requirements of paragraph (i) of AD 2014–14–06, Amendment 39–17901 (79 FR 42655, July 23, 2014), with

no changes. If, during the detailed inspection required by paragraph (g) of this AD, any installed dull finish aft engine mount retainer is found without cracks and not failed: Do the actions specified in paragraphs (i)(1) and (i)(2) of this AD.

(1) Within 25 flight cycles after doing the actions required by paragraph (g) of this AD: Repeat the detailed inspection specified in paragraph (g) of this AD.

(2) Within 50 flight cycles after doing the first detailed inspection specified in paragraph (g) of this AD: Replace all dull finish retainers with new retainers, in accordance with Section 4.2.3.1, “Replacement Procedure,” of Airbus AOT A71N001–12, Rev. 2, dated February 27, 2013.

#### (j) Retained Replacement of Cracked or Failed Retainers, With No Changes

This paragraph restates the requirements of paragraph (j) of AD 2014–14–06, Amendment 39–17901 (79 FR 42655, July 23, 2014), with no changes. If, during any detailed inspection specified in paragraph (g) of this AD, any installed aft engine mount retainer is found cracked or failed: Before further flight, replace all affected aft engine mount retainers with new retainers, in accordance with Section 4.2.3, “Replacement Procedure,” of Airbus AOT A71N001–12, Rev. 2, dated February 27, 2013.

#### (k) Retained Parts Prohibition, With No Changes

This paragraph restates the requirements of paragraph (k) of AD 2014–14–06, Amendment 39–17901 (79 FR 42655, July 23, 2014), with no changes. As of August 27, 2014 (the effective date of AD 2014–14–06), no person may install any aft engine mount retainer with a dull finish on any airplane. The instructions of Airbus AOT A71N001–12, Rev. 2, dated February 27, 2013; or the Accomplishment Instructions of Goodrich Service Bulletin RA32071–146, Rev. 2, dated July 26, 2012; may be used to verify the correct finish of the part.

#### (l) Retained Credit for Previous Actions, With No Changes

This paragraph restates the provisions of paragraph (l) of AD 2014–14–06, Amendment 39–17901 (79 FR 42655, July 23, 2014), with no changes. This paragraph provides credit for actions required by paragraphs (g), (i), and (j) of this AD, if those actions were performed before August 27, 2014 (the effective date of AD 2014–14–06) using Airbus AOT A71N001–12, Rev. 1, dated August 9, 2012, which is not incorporated by reference in this AD.

#### (m) New Requirement of This AD: Repetitive Inspections

At the latest of the applicable times specified in paragraphs (m)(1), (m)(2), and (m)(3) of this AD: Do a detailed inspection for damaged, cracked, broken, or missing aft engine mount retainers, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–71–1060, dated October 9, 2014; or Goodrich Service Bulletin RA32071–160, dated September 18, 2014. Repeat the inspection of the aft engine mount

retainers thereafter at intervals not to exceed 12 months.

(1) Within 12 months since the date of issuance of the original airworthiness certificate or the date of issuance of the original export certificate of airworthiness.

(2) Within 12 months after installation of new retainers.

(3) Within 9 months after the effective date of this AD.

**(n) New Requirement of This AD: Replacement of Retainers With Findings**

If, during any detailed inspection specified in paragraph (m) of this AD, any installed aft engine mount retainer is found damaged, cracked, broken, or missing: Before further flight, replace all affected aft engine mount retainers with new retainers, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320-71-1060, dated October 9, 2014.

**(o) New Requirement of This AD: No Terminating Action**

Replacement of retainers on an airplane, as required by paragraph (n) of this AD, does not constitute terminating action for the repetitive inspections required by paragraph (m) of this AD for that airplane.

**(p) New Requirement of This AD: Required Reporting**

Submit a report of positive findings of any inspection required by paragraph (m) of this AD to Airbus at the applicable time specified in paragraph (p)(1) or (p)(2) of this AD. The report must include the inspection results, a description of any discrepancies found, the airplane serial number, and the number of landings and flight hours on the airplane.

(1) If the inspection was done on or after the effective date of this AD: Submit the report within 30 days after the inspection.

(2) If the inspection was done before the effective date of this AD: Submit the report within 30 days after the effective date of this AD.

**(q) Other FAA AD Provisions**

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1405; fax 425-227-1149. Information may be emailed to: [9-0ANM-116-AMOC-REQUESTS@faa.gov](mailto:9-0ANM-116-AMOC-REQUESTS@faa.gov). Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer*: As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Reporting Requirements*: A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120-0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES-200.

(4) *Required for Compliance (RC)*: If any Airbus service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in a serviceable condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

**(r) Special Flight Permits**

Special flight permits, as described in Section 21.197 and Section 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199), are not allowed.

**(s) Related Information**

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) European Aviation Safety Agency Airworthiness Directive 2015-0021, dated February 13, 2015, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-3632.

(2) For Airbus service information identified in this AD, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email [account.airworth-eas@airbus.com](mailto:account.airworth-eas@airbus.com); Internet <http://www.airbus.com>.

(3) For Goodrich Aerostructures service information identified in this AD, contact Goodrich Aerostructures, 850 Lagoon Drive, Chula Vista, CA 91910-2098; telephone 619-691-2719; email [jan.lewis@goodrich.com](mailto:jan.lewis@goodrich.com); Internet <http://www.goodrich.com/TechPubs>.

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

Issued in Renton, Washington, on September 9, 2015.

**BILLING CODE 4910-13-P**

**DEPARTMENT OF COMMERCE**

**National Oceanic and Atmospheric Administration**

**15 CFR Part 922**

**Initiation of Review of Management Plan and Regulations of the Monterey Bay National Marine Sanctuary; Intent To Conduct Scoping and Prepare Draft Environmental Impact Statement and Management Plan; Correction**

**AGENCY:** Office of National Marine Sanctuaries (ONMS), National Ocean Service (NOS), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

**ACTION:** Correction.

**SUMMARY:** On August 27, 2015, NOAA published a notice of intent in the **Federal Register** (80 FR 51973) to initiate public scoping for the management plan review for Monterey Bay National Marine Sanctuary (MBNMS). This notice alerts the public of the addition of a public scoping meeting in Half Moon Bay on October 14, 2015. It also makes a correction to the docket number for submission of public comments on the online rulemaking portal at [www.regulations.gov](http://www.regulations.gov). The correct docket number is NOAA-NOS-2015-0099. The end of the scoping period remains October 30, 2015.

**DATES:** NOAA will accept public comments on the notice of intent published at 80 FR 51973 (August 27, 2015) through October 30, 2015. Locations and dates for public scoping meetings remain the same as described in the notice of intent, with the addition of a meeting on October 14, 2015 from 6 p.m. to 8 p.m. at the Half Moon Bay Yacht Club in Half Moon Bay, CA.

**ADDRESSES:** You may submit comments on this document, identified by NOAA-

NOS–2015–0099, by any of the following methods:

- *Electronic Submission:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to [www.regulations.gov](http://www.regulations.gov)

#/docketDetail;D=NOAA-NOS-2015-0099, click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

- *Mail:* 99 Pacific Street, Bldg. 455A, Monterey, California 93940, Attn: Paul Michel, Superintendent.

*Instructions:* Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NOAA. All comments received are a part of the public record and will generally be posted for public viewing [www.regulations.gov](http://www.regulations.gov) without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NOAA will accept anonymous comments (enter “N/A” in the required fields if you wish to remain anonymous). Attachments to electronic comments will be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

**FOR FURTHER INFORMATION CONTACT:**  
Dawn Hayes, 831.647.4256,  
[mbnmsmanagementplan@noaa.gov](mailto:mbnmsmanagementplan@noaa.gov).

**SUPPLEMENTARY INFORMATION:**

On August 27, 2015, NOAA published a notice of intent in the **Federal Register** (80 FR 51973) to initiate public scoping for the management plan review for Monterey Bay National Marine Sanctuary (MBNMS). In that notice, the docket number for submitting comments on the online rulemaking portal at [www.regulations.gov](http://www.regulations.gov) was incorrect. The correct docket number is NOAA–NOS–2015–0099. This notice makes a correction to the docket number for the online submission of public comments.

In addition, this notice alerts the public that NOAA will hold a fourth public scoping meeting in addition to the three meetings listed in the August 27, 2015 notice (80 FR 51973). The fourth meeting will be held at the Half Moon Bay Yacht Club in Half Moon Bay, CA on October 14, 2015 from 6 p.m. to 8 p.m.

RIN 1545–BL94

**Substantiation Requirement for Certain Contributions**

**AGENCY:** Internal Revenue Service (IRS), Treasury.

**ACTION:** Notice of proposed rulemaking.

**SUMMARY:** This document contains proposed regulations to implement the exception to the “contemporaneous written acknowledgement” requirement for substantiating charitable contribution deductions of \$250 or more. These proposed regulations provide rules concerning the time and manner for donee organizations to file information returns that report the required information about contributions (donee reporting).

**DATES:** Written or electronic comments must be received by December 16, 2015.

**ADDRESSES:** Send submissions to CC:PA:LPD:PR (REG–138344–13), Room 5203, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to: CC:PA:LPD:PR (REG–138344–13), Courier’s Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC, or sent electronically via the Federal eRulemaking Portal at [www.regulations.gov](http://www.regulations.gov) (IRS REG–138344–13).

**FOR FURTHER INFORMATION CONTACT:** Concerning the proposed regulations, Robert Basso at (202) 317–7011 (not a toll-free number); concerning comments or a request for a public hearing, Oluwafunmilayo Taylor at (202) 317–6901 (not a toll-free number).

**SUPPLEMENTARY INFORMATION:**

**Paperwork Reduction Act**

The collection of information contained in this notice of proposed rulemaking will be submitted to the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer,

SE:W:CAR:MP:T:T:SP, Washington, DC 20224. Comments on the collection of information should be received by November 16, 2015. Comments are specifically requested concerning:

Whether the proposed collection of information is necessary for the proper performance of the functions of the IRS, including whether the information will have practical utility;

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including the application of automated collection techniques or other forms of information technology; and

Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

The collection of information in these proposed regulations is in § 1.170A–13(f)(18) of the Income Tax Regulations. The collection of information is necessary to properly substantiate charitable contribution deductions under the exception to the general requirements for substantiating charitable contribution deductions of \$250 or more. The collection of information is required to comply with the provisions of section 170(f)(8)(D) of the Internal Revenue Code (Code). The respondents are entities that receive charitable contributions and donors to such entities. The burden for the collection of information contained in proposed regulation § 1.170A–13(f)(18) will be reflected in the burden estimate for a form that the IRS intends to create to request the information specified in the proposed regulation. Once a draft form is available, comments will be invited via a notice in the **Federal Register** and on the IRS Web site.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

## Background

This document contains amendments to the Income Tax Regulations (26 CFR part 1) under Code section 170(f)(8) governing the substantiation of charitable contributions of \$250 or more. Section 170(f)(8) was enacted by Section 13172(a) of the Omnibus Budget Reconciliation Act of 1993, Public Law 103–66 (107 Stat. 312, 455 (1993)), effective for contributions made on or after January 1, 1994. Section 1.170A–13(f) provides rules on substantiation of

charitable contributions of \$250 or more. See TD 8690 (1997–1 CB 68).

Section 170(f)(8)(A) requires a taxpayer who claims a charitable contribution deduction for any contribution of \$250 or more to obtain substantiation in the form of a contemporaneous written acknowledgment (CWA) from the donee organization. Under section 170(f)(8)(B), while the CWA need not be in any particular form, it must contain the following information: (1) The amount of cash and a description of any property other than cash contributed; (2) whether any goods and services were provided by the donee organization in consideration for the contribution; and (3) a description and good faith estimate of the value of any goods and services provided by the donee organization or a statement that such goods and services consist solely of intangible religious benefits.

The CWA must also be contemporaneous. Under sections 170(f)(8)(C) and 1.170A–13(f)(3), a CWA is contemporaneous if it is obtained by the taxpayer on or before the earlier of the date the taxpayer files an original return for the taxable year in which the contribution was made or the due date (including extensions) for filing the taxpayer's original return for that year. In the preamble to TD 8690, the Treasury Department and the IRS further emphasized this requirement, noting that “[a] written acknowledgment obtained after a taxpayer files the original return for the year of the contribution is not contemporaneous within the meaning of the statute.” TD 8690 (1997–1 CB 68).

Section 170(f)(8)(D) provides an exception to the CWA requirement. Under the exception, a CWA is not required if the donee organization files a return, on such form and in accordance with such regulations as the Secretary may prescribe, that includes the information described in section 170(f)(8)(B). When issuing TD 8690 in 1997, the Treasury Department and the IRS specifically declined to issue regulations under section 170(f)(8)(D) to effectuate donee reporting. The present CWA system works effectively, with minimal burden on donors and donees, and the Treasury Department and the IRS have received few requests since the issuance of TD 8690 to implement a donee reporting system.

In recent years, some taxpayers under examination for their claimed charitable contribution deductions have argued that a failure to comply with the CWA requirements of section 170(f)(8)(A) may be cured if the donee organization files an amended Form 990, “Return of

Organization Exempt From Income Tax,” that includes the information described in section 170(f)(8)(B) for the contribution at issue. These taxpayers argue that an amended Form 990 constitutes permissible donee reporting within the meaning of section 170(f)(8)(D), even if the amended Form 990 is submitted to the IRS many years after the purported charitable contribution was made. The IRS has consistently maintained that the section 170(f)(8)(D) exception is not available unless and until the Treasury Department and the IRS issue final regulations prescribing the method by which donee reporting may be accomplished. Moreover, the Treasury Department and the IRS have concluded that the Form 990 is unsuitable for donee reporting.

## Explanation of Provisions

The framework established by these proposed regulations for donee reporting under the section 170(f)(8)(D) exception is intended to provide for timely reporting, while also minimizing reporting burdens on donees and protecting donor privacy.

### *Manner of Donee Reporting*

The present CWA process requires that the acknowledgement provided to the donor contain information useful in preparing the donor's tax return for the year of the contribution. To effectively substitute for the CWA, any donee reporting process would require not only that an information return be filed with the IRS, but also that a copy be provided to the donor for use in preparing the donor's federal income tax return for the year of the contribution.

In order to better protect donor privacy, the Treasury Department and the IRS have concluded that the Form 990 series should not be used for donee reporting. Instead, before finalization of these proposed regulations, the IRS intends to develop a specific-use information return for donee reporting. Donees are not required to adopt donee reporting. Donees who opt to use donee reporting will be required to provide a copy of the information return to the donor at the address the donor provides for this purpose, and the information return will contain only the information related to that donor. The proposed regulations are reserved on the particular form that will be prescribed for this purpose.

Section 170(f)(8)(D) provides that a donee organization must include the information described in section 170(f)(8)(B) on its return for the donor to qualify for the donee reporting exception. Accordingly, the proposed

regulations require that donees who opt to use donee reporting must report that information as well as the donor's name, address, and taxpayer identification number. The donor's taxpayer identification number is necessary in order to properly associate the donation information with the correct donor. Unlike a CWA, which is not sent to the IRS, the donee reporting information return will be sent to the IRS, which must have a means to store, maintain, and readily retrieve the return information for a specific taxpayer if and when substantiation is required in the course of an examination. The Treasury Department and the IRS request comments on the scope of the information necessary to verify substantiation of charitable contribution deductions under donee reporting.

The Treasury Department and the IRS are concerned about the potential risk for identity theft involved with donee reporting given that donees will be collecting donors' taxpayer identification numbers and maintaining those numbers for some period of time. The Treasury Department and the IRS request comments on whether additional guidance is necessary regarding the procedures a donee should use in soliciting and maintaining a donor's taxpayer identification number and address to mitigate the risk.

In order to minimize the burden on donees, the proposed regulations provide that donee reporting is not required, but may be done at the option of a donee organization. If a contribution is not reported using donee reporting, then the donor must obtain a CWA. The Treasury Department and the IRS request comments on these provisions and whether additional guidance is necessary to clarify the requirements for donors and donees if the donee chooses to use donee reporting for some or all of the contributions it receives. Also, because of the potential burden on donee organizations, the Treasury Department and the IRS request comments on how the donee reporting process might be better designed to minimize donee burden, and how it may interact with the requirement under section 6115 to provide donors information regarding quid pro quo contributions.

#### *Time of Donee Reporting*

Section 170(f)(8) is premised on donors receiving timely substantiation of their donations of \$250 or more. The CWA assists a donor preparing a return (as well as the IRS examining the return) in determining whether, and in what amount, a donor may claim a charitable contribution deduction. H.R. Rept. No.

103–111, at 783, 785 (1993), 1993–3 CB 167, 359, 361; *Viralam v. Commissioner*, 136 T.C. 151, 171 (2011); *Addis v. Commissioner*, 118 T.C. 528, 536 (2002), *aff'd*, 374 F.3d 881 (9th Cir. 2004); *DiDonato v. Commissioner*, T.C. Memo. 2011–153. It would be inconsistent with the purpose of section 170(f)(8) to allow an exception to the CWA requirement of section 170(f)(8)(A) based on information that might be reported by a donee on a return that is filed many years after the purported charitable contribution was made. Rather, any alternative method to using a CWA for substantiating charitable contributions through donee reporting must provide timely information to both the IRS and the donor in order to satisfy the purpose of section 170(f)(8).

Accordingly, the proposed regulations provide that any information return under section 170(f)(8)(D) must be filed by the donee no later than February 28th of the year following the year in which the contribution is made, and the donee organization must provide a copy of the information return to the donor by the same date. An information return that is not filed timely with the IRS, with a copy provided to the donor, will not qualify under section 170(f)(8)(D).

February 28th is the date when numerous other information returns concerning transactions with other persons must be filed. See, for example, § 1.6041–6 (information at source), § 1.6045–1(j) (returns of brokers), and § 1.6049–4(g) (returns regarding payment of interest). The requirement that a donee organization provide a copy of the information return to the donor no later than February 28th of the year following the year in which the contribution is made is intended to provide donors with timely information needed to claim appropriate charitable contribution deductions on their returns, as well as to ensure sound tax administration—objectives that will not be met if donee reporting is allowed to occur long after the contribution was made. In addition, for donors to be relieved of the obligation to obtain a CWA, the donee must file the donee reporting information return, and communicate that it has done so to the donor, before the due date for the donor's return. The Treasury Department and the IRS request comments on the use of February 28th as the due date for filing a return and furnishing a copy to a donor.

#### **Proposed Effective Date**

The regulations are proposed to apply to contributions made on or after the date of publication of a Treasury

decision adopting these rules as final regulations in the **Federal Register**.

#### **Special Analyses**

Certain IRS regulations, including this one, are exempt from the requirements of Executive Order 12866, as supplemented and reaffirmed by Executive Order 13563. Therefore, a regulatory impact assessment is not required. It has also been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations.

It is hereby certified that these regulations will not have a significant economic impact on a substantial number of small entities. This certification is based on the fact that, to the extent a donee reporting system is implemented under section 170(f)(8)(D), the statute itself specifies the bulk of the information that needs to be collected for purposes of these regulations. The proposed regulations require that, in order for a donor to be relieved of the current CWA requirement, a donee organization that uses donee reporting must file a return with the IRS reporting certain information and must furnish a copy of the return to the donor whose contribution is reported on such return. These regulations provide the content of the return under section 170(f)(8)(D), the time for filing the return, and the requirement to furnish a copy to the donor. Moreover, any burden associated with the collection of information under the proposed regulations is minimized by the fact that donee reporting under the proposed regulations is optional on the part of any donee, including small entities. Donees need not use this donee reporting process and donors can continue to use the current CWA process. Given the effectiveness and minimal burden of the CWA process, it is expected that donee reporting will be used in an extremely low percentage of cases.

Based on these facts, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required.

Pursuant to section 7805(f) of the Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

#### **Comments and Requests for a Public Hearing**

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments that are submitted timely to the IRS as prescribed in this preamble under the "Addresses"

heading. The Treasury Department and the IRS request comments on all aspects of the proposed rules. All comments will be available at <http://www.regulations.gov> or upon request.

A public hearing will be scheduled if requested in writing by any person who timely submits comments. If a public hearing is scheduled, notice of the date, time, and place for the public hearing will be published in the **Federal Register**.

#### Drafting Information

The principal authors of these regulations are Martin L. Osborne and Robert Basso of the Office of the Associate Chief Counsel (Income Tax and Accounting). However, other personnel from the Treasury Department and the IRS participated in their development.

#### List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

#### Proposed Amendment to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

#### PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 continues to read in part as follows:

**Authority:** 26 U.S.C. 7805 \* \* \*

■ **Par. 2.** Section 170A–13 is amended by revising paragraph (f)(18) and adding paragraph (f)(19) to read as follows:

#### § 1.170A–13. Recordkeeping and return requirements for deductions for charitable contributions.

\* \* \* \* \*

(f) \* \* \*

(18) *Donee organization reporting*—(i) *Prescribed form.* [Reserved]

(ii) *Content of return.* A document will not qualify as a return for purposes of section 170(f)(8)(D) unless it contains all of the following information:

(A) The name and address of the donee;

(B) The name and address of the donor;

(C) The taxpayer identification number of the donor;

(D) The amount of cash and a description (but not necessarily the value) of any property other than cash contributed by the donor to the donee;

(E) Whether any goods and services were provided by the donee organization in consideration, in whole or in part, for the contribution by the donor; and

(F) A description and good faith estimate of the value of any goods and

services provided by the donee organization or a statement that such goods and services consist solely of intangible religious benefits.

(iii) *Time for filing return.* Every donee organization filing a return described in section 170(f)(8)(D) shall file such return on or before February 28 of the year following the calendar year in which the contribution was made. If the return is not filed timely, the return does not qualify under section 170(f)(8)(D), and section 170(f)(8)(A) through (C) applies to the contribution.

(iv) *Furnishing a copy to donor.* Every donee organization filing a return described in section 170(f)(8)(D) shall furnish a copy of the return to the donor whose contribution is reported on such return on or before February 28 of the year following the calendar year in which the contribution was made. The copy of the return shall be provided to the donor at the address the donor provides for this purpose.

(v) *Donee organization reporting at option of donee.* Donee organization reporting is not required. Donee reporting is available solely at the option of a donee organization, and, the requirements of section 170(f)(8)(A) through (C) apply to all contributions that are not reported using donee reporting.

(19) *Effective/applicability date.* Paragraphs (f)(1) through (17) of this section apply to contributions made on or after December 16, 1996. However, taxpayers may rely on the rules of paragraphs (f)(1) through (17) for contributions made on or after January 1, 1994. Paragraph (f)(18) of this section applies to contributions made on or after the date of publication of a Treasury decision adopting these rules as final regulations in the **Federal Register**.

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** The United States Environmental Protection Agency (EPA) proposes to approve a revision to the Nevada Regional Haze State Implementation Plan (SIP) submitted by the Nevada Division of Environmental Protection (NDEP) to document that the existing plan is adequate to achieve established goals for visibility improvement and emissions reductions by 2018. The Nevada Regional Haze SIP revision addresses the Regional Haze Rule (RHR) requirements under the Clean Air Act (CAA) to submit a report describing progress in achieving reasonable progress goals (RPGs) to improve visibility in federally designated Class I areas in Nevada and in nearby states that may be affected by emissions from sources in Nevada. EPA is proposing to approve Nevada's determination that the existing Nevada Regional Haze Implementation Plan is adequate to meet the visibility goals, and requires no substantive revision at this time.

**DATES:** Comments must be received by the designated contact at the address listed below on or before October 19, 2015.

**ADDRESSES:** Submit your comments, identified by Docket ID No. EPA–R09–OAR–2015–0316, to the *Federal eRulemaking Portal*: <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. If you need to include CBI as part of your comment, please visit <http://www.epa.gov/dockets/comments.html> for instructions. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make.

For additional submission methods, the full EPA public comment policy, and general guidance on making effective comments, please visit <http://www.epa.gov/dockets/comments.html>.

The index to the docket (docket number EPA–R09–OAR–2015–0316) for this proposed rule is available electronically at <http://www.regulations.gov>. Although listed in the index, some information is not publicly available, such as CBI or other information that is restricted by statute. Certain other material, such as copyrighted material, is publicly

available only in hard copy form. Publicly available docket materials are available electronically at <http://www.regulations.gov> or in hard copy during normal business hours at the Planning Office of the Air Division, AIR-2, EPA Region 9, 75 Hawthorne Street, San Francisco, CA 94105. To view hard copies of documents listed in the docket index, EPA requests that you contact the individual listed in the **FOR FURTHER INFORMATION CONTACT** section.

**FOR FURTHER INFORMATION CONTACT:** Vijay Limaye, U.S. EPA, Region 9, Planning Office, Air Division, AIR-2, 75 Hawthorne Street, San Francisco, CA 94105. Vijay Limaye may be reached at telephone number (415) 972-3086 and via electronic mail at [Limaye.Vijay@epa.gov](mailto:Limaye.Vijay@epa.gov).

**SUPPLEMENTARY INFORMATION:**

Throughout this document “we,” “us,” or “our” refer to EPA.

**I. Overview of Proposed Action**

EPA is proposing to approve NDEP’s determination that the existing Nevada Regional Haze Implementation Plan<sup>1</sup> is adequate to achieve the established RPGs (*i.e.*, visibility goals) for Class I

<sup>1</sup> The Nevada Regional Haze Implementation Plan consists of the Nevada Regional Haze SIP, submitted to EPA in November 2009 and partially approved and partially disapproved by EPA in several related actions in 2012, and the partial Regional Haze Federal Implementation Plan (FIP) promulgated in 2012 and revised in 2013, as described further below.

areas by 2018, and therefore requires no substantive revision at this time. The State’s determination and EPA’s proposed approval are based on the Nevada Regional Haze 5-Year Progress Report (“Progress Report” or “Report”) submitted by NDEP to EPA on November 18, 2014, that addresses 40 CFR 51.308(g), (h), and (i) of the RHR.<sup>2</sup> Specifically, we propose to find that the Progress Report demonstrates that the emission control measures in the existing Nevada Regional Haze SIP are sufficient to enable Nevada, as well as other states with Class I areas affected by emissions from sources in Nevada, to meet all established RPGs for 2018 in accordance with § 51.308(g). As a result, we propose to approve NDEP’s determination that the existing Implementation Plan is adequate, and requires no further substantive revision at this time to achieve the established goals for visibility improvement in accordance with § 51.308(h). In addition, we are proposing to find that NDEP fulfilled the requirements in § 51.308(i)(2), (3), and (4) regarding State coordination with Federal Land Managers (FLMs). This coordination includes providing FLMs with an opportunity for consultation on the Progress Report, describing how NDEP addressed any comments from the FLMs, and providing procedures for continuing consultation with the FLMs. Finally, we propose to find that NDEP has fulfilled the requirements of CAA 110(a) and (l) and 40 CFR 51.102 regarding reasonable notice and public hearings with regard to the Progress Report.

**II. Background**

*A. Description of Regional Haze*

Regional haze is visibility impairment produced by many sources and activities located across a broad geographic area that emit fine particles that impair visibility by scattering and absorbing light, thereby reducing the clarity, color, and visible distance that one can see. These fine particles also can cause serious health effects and mortality in humans and contribute to environmental impacts, such as acid deposition and eutrophication of water bodies.

The RHR uses the deciview as the principle metric for measuring visibility and for the RPGs that serve as interim visibility goals toward meeting the national goal of achieving natural visibility conditions by 2064. A deciview expresses uniform changes in

<sup>2</sup> The Progress Report was deemed complete by operation of law on May 18, 2015.

haziness in terms of common increments across the entire range of visibility conditions, from pristine to extremely hazy conditions. Deciviews are determined by using air quality measurement to estimate light extinction, and then transforming the value of light extinction using a logarithmic function. A deciview is a more useful measure for tracking progress in improving visibility than light extinction because each deciview change is an equal incremental change in visibility perceived by the human eye. Most people can detect a change in visibility at one deciview.

*B. History of Regional Haze Rule*

In section 169A(a)(1) of the CAA Amendments of 1977, Congress created a program to protect visibility in designated national parks and wilderness areas, establishing as a national goal the “prevention of any future, and the remedying of any existing, impairment of visibility in mandatory Class I Federal areas which impairment results from manmade air pollution.” In accordance with section 169A of the CAA and after consulting with the Department of Interior, EPA promulgated a list of 156 mandatory Class I Federal areas where visibility is identified as an important value.<sup>3</sup> In this notice, we refer to mandatory Class I Federal areas on this list as “Class I areas.” Nevada has one Class I area, Jarbidge Wilderness Area (“Jarbidge”), in the northeast corner of the State.

With the CAA Amendments of 1990, Congress added section 169B to address regional haze issues. EPA promulgated a rule to address regional haze on July 1, 1999, known as the Regional Haze Rule.<sup>4</sup> The RHR revised the existing visibility regulations in 40 CFR 51.308 to integrate provisions addressing regional haze impairment and to establish a comprehensive visibility protection program for Class I areas. As defined in the RHR, the RPGs must provide for an improvement in visibility for the most impaired days (“worst days”) over the period of the implementation plan and ensure no degradation in visibility for the least impaired days (“best days”) over the same period.<sup>5</sup>

*C. Nevada’s Regional Haze Plan*

NDEP submitted its Regional Haze SIP to EPA on November 18, 2009, as required by 40 CFR 51.308 for the first regional haze planning period ending in 2018. EPA approved most of the Nevada

<sup>3</sup> 44 FR 69122, November 30, 1979.

<sup>4</sup> See 64 FR 35713.

<sup>5</sup> 40 CFR 51.308(d)(1).

Regional Haze SIP on March 26, 2012,<sup>6</sup> with the exception of NDEP's determination of best available retrofit technology (BART) to control emissions of nitrogen oxides (NO<sub>x</sub>) at the Reid Gardner Generating Station (Reid Gardner). EPA published a new proposal on April 12, 2012, to approve in part and disapprove in part NDEP's BART determination for NO<sub>x</sub> at Reid Gardner.<sup>7</sup> EPA published a final rule on August 23, 2012, approving NDEP's BART determination for NO<sub>x</sub> on Units 1 and 2, but disapproving NDEP's determination for Unit 3 and the averaging time for the emission limits at all three units.<sup>8</sup> This final rule included a Federal Implementation Plan (FIP) for the disapproved elements. EPA subsequently agreed to reconsider the compliance date for Units 1, 2, and 3 at Reid Gardner in the FIP, which we extended by 18 months.<sup>9</sup>

### III. Requirements for Regional Haze Progress Reports

The RHR requires states to submit a report every five years in the form of a SIP revision to evaluate progress toward achieving the RPGs for each Class I area in the state and for those areas outside the state that may be affected by emissions from within the state.<sup>10</sup> The first progress reports are due five years from the submittal date of each state's initial Regional Haze SIP. Progress reports must be in the form of SIP revisions that comply with the procedural requirements of 40 CFR 51.102 and 51.103. These reports must contain an evaluation of seven elements, at a minimum, and include a determination of the adequacy of the state's existing Regional Haze SIP. In summary,<sup>11</sup> the seven elements are: (1) A description of the status of implementation of all measures included in the current Regional Haze SIP for achieving the RPGs in Class I areas within and outside the state; (2) a summary of the emission reductions achieved in the state through implementation of these measures; (3) an assessment of visibility conditions and changes on the most impaired and least impaired days for each Class I area in the state in terms of five-year averages of the annual values; (4) an analysis of changes in emissions over the past five years contributing to

visibility impairment from all sources and activities within the state based on the most recently updated emissions inventory; (5) an assessment of any significant changes in anthropogenic emissions within or outside the state over the past five years that have limited or impeded progress in reducing pollutant emissions and improving visibility; (6) an assessment of whether the elements and strategies in the current Regional Haze SIP are sufficient to enable the state, or other states affected by its emissions, to achieve the established RPGs; and (7) a review of the state's visibility monitoring strategy and any necessary modifications.

Based on an evaluation of the factors listed above as well as any other relevant information, a state is required to determine the adequacy of its existing Regional Haze SIP.<sup>12</sup> The state must take one of four possible actions based on the analysis in its progress report. In summary, these actions are to (1) provide a negative declaration to EPA that no further substantive revisions to the state's existing Regional Haze SIP is needed to achieve the RPGs; (2) provide notification to EPA and to other states in its region that its Regional Haze SIP is or may be inadequate to ensure reasonable progress due to emissions from sources in other states, and collaborate with other states to develop additional strategies to address the deficiencies; (3) provide notification and available information to EPA that the state's Regional Haze SIP is or may be inadequate to ensure reasonable progress due to emissions from sources in another country; or (4) revise its Regional Haze SIP within one year to address the deficiencies if the state determines that its existing plan is or may be inadequate to ensure reasonable progress in one or more Class I areas due to emissions from sources within the state.<sup>13</sup>

A state also must document that it provided FLMs with an opportunity for consultation prior to holding a public hearing on a Regional Haze SIP or plan revision.<sup>14</sup> A state must include a description of how it addressed any comments from the FLMs, and provide procedures for continuing consultation with the FLMs.<sup>15</sup>

### IV. Context for Understanding Nevada's Progress Report

To facilitate a better understanding of the Progress Report as well as EPA's evaluation of the Report, this section

provides background information on how the regional haze program applies to Nevada. This information describes the framework for measuring visibility progress, a profile of the relevant Class I areas, and the sources of data used in the Progress Report.

#### A. Framework for Measuring Progress

Visibility conditions at Class I areas are described by a "haze index" measured in deciviews and calculated using data collected from the Interagency Monitoring of Protected Visual Environments (IMPROVE) network monitors. Nevada has an IMPROVE monitor at Jarbidge that is designated "JARB1." To measure progress in deciviews, current visibility conditions (2008–2012) are compared to baseline conditions (2000–2004), and to projected conditions at the end of the planning period (2018). A state establishes two RPGs for each of its Class I areas: One for the 20 percent best days and one for the 20 percent worst days. The RPGs must provide for an improvement in visibility on the 20 percent worst days and ensure no degradation in visibility on the 20 percent best days, compared to average visibility conditions during the baseline period. In establishing the RPG, a state must consider the uniform rate of improvement in visibility (from the baseline to natural conditions in 2064) and the emission reductions measures needed to achieve it. Nevada set the RPGs for Jarbidge using atmospheric air quality modeling based on projected emission reductions from control strategies in the Nevada Regional Haze SIP as well as emission reductions expected to result from other Federal, state and local air quality programs, among other factors. The purpose of a progress report is to assess whether a state's plan is adequate to achieve the established RPGs and emissions reductions goals for 2018, and if not, whether additional emission reduction strategies are needed.

#### B. Relevant Class I Areas

Nevada's one Class I area, the Jarbidge Wilderness Area, is located within the Humboldt National Forest in the northeastern corner of the State within the populated Snake River Basin and less than 10 miles from the Idaho border. The baseline visibility conditions (2000–2004) at Jarbidge are 12.07 deciviews (dv) on the worst days and 2.56 dv on the best days. The RPG for the worst days in 2018 at Jarbidge is 11.05 dv, which is slightly under, and therefore better than, the uniform rate of progress (URP) in 2018, which is 11.09

<sup>6</sup> See 77 FR 17334.

<sup>14</sup> 40 CFR 51.308(i)(2).

<sup>15</sup> 40 CFR 51.308(i)(3) and (4).

dv.<sup>16</sup> While a subsequent correction for the worst days in 2018 resulted in projected visibility impairment of 11.8 dv on the worst days,<sup>17</sup> NDEP has retained the RPG of 11.05 dv for Jarbidge. The RPG for the best days in 2018 at Jarbidge is 2.50 dv, which represents a slight improvement from baseline conditions. The Progress Report addresses whether Nevada's RH SIP is making adequate progress from the baseline toward these RPGs.

The Nevada Regional Haze SIP identified 24 other Class I areas located in five neighboring states that are potentially affected by emissions of sulfates and nitrates from sources in Nevada.<sup>18</sup> Based on projections from air quality modeling for 2018, the highest contribution to sulfate extinction on the worst days from Nevada's emissions is 5.6 percent at Zion National Park in Utah, and on the best days is 7.2 percent at Sawtooth Wilderness Area in Idaho. For nitrate extinction in 2018, Nevada's highest contribution on the worst days is 20 percent at Desolation Wilderness in California, and on the best days is 12.4 percent at Joshua Tree National Park in California.<sup>19</sup> The remaining 20 Class I areas outside Nevada are projected to have smaller fractions of haze attributable to Nevada's emissions.

### C. Data Sources

Nevada's Progress Report is based on information available prior to March 2014. For the most part, NDEP relies on technical data and analysis in two reports from the Western Regional Air Partnership (WRAP), the regional planning organization that provides technical support to western states. The WRAP's reports are based on monitoring data from the IMPROVE network and emissions data from EPA's National

<sup>16</sup> The URP is a straight line from the baseline visibility condition (5-year annual average from 2000–2004) to the estimated natural background condition in 2064, as measured on the 20 percent best and worst days. The URP values for 2018 are the number of deciviews where the lines drawn to 2064 for best and worst days intersect 2018.

<sup>17</sup> See 76 FR 36464, June 22, 2011, footnote 18 ("In April 2011, the WRAP issued a draft report regarding an error in its visibility projections for about 15 Class I areas in the West, including Jarbidge. The draft report indicated that, as a result of the error, the projected visibility at Jarbidge in 2018 is 11.8 dv instead of 11.1 dv (rounded up from 11.05 dv).").

<sup>18</sup> Nevada Regional Haze State Implementation Plan, Chapter 4.3.3, October 2009. Light extinction is based on a model known as Particulate Matter Source Attribution Tracking (PSAT).

<sup>19</sup> 76 FR 36459, June 22, 2011.

Emissions Inventory (NEI). The first report is the "Western Regional Air Partnership Regional Haze Rule Reasonable Progress Summary Report," dated June 28, 2013, which includes Section 6.8 Nevada (Appendix A of the Progress Report). This report is based on the time period 2005–2009 and relies on the NEI from 2008. The WRAP updated the inventory before completing a second report titled "West-Wide Jump-Start Air Quality Modeling Study—Final Report" dated September 30, 2013. NDEP also uses NEI data from 2011, State emission inventory data for 2012, acid rain data from EPA's Air Market Program Database, and IMPROVE monitoring data from 2008 to 2012 to provide more current information and additional analysis. NDEP further relies on the WRAP's Technical Support System and the Visibility Information Exchange Web System as analytic tools.

### V. EPA's Evaluation of Nevada's Progress Report

This section describes Nevada's Progress Report and EPA's evaluation of the Report in relation to the seven elements listed in 40 CFR 51.308(g), the determination of adequacy in 40 CFR 51.308(h), the requirement for state and FLM coordination in 40 CFR 51.308(i) and the requirements for public participation in CAA section 110(a) and (l) and 40 CFR 51.102. While the Progress Report focuses on the elements of the Nevada Regional Haze SIP, the requirements in 40 CFR 51.308(g) and (h) apply to "implementation plans," which are defined to include approved SIPs and FIPs.<sup>20</sup> Accordingly, EPA has considered our regional haze BART FIP for Reid Gardner as well as the Nevada Regional Haze SIP in assessing the Progress Report. However, as described further below, all three of the BART-eligible units at Reid Gardner have been shut down. Therefore, the partial disapproval and partial FIP for Reid Gardner does not substantively influence our evaluation of the Progress Report.

#### A. Status of Implementation of All Measures

##### 1. NDEP's Analysis

The Progress Report describes the status of state and federal measures in

the Nevada Regional Haze SIP as well as new programs, rules, and legislation that will provide further emission reductions before the first phase of the regional haze program ends in 2018. Nevada's measures to control or otherwise reduce emissions that contribute to haze are organized into three broad categories: Review of BART Determinations, State Measures Other than BART, and Federal Programs.<sup>21</sup> The status of measures in each of these categories is summarized below.

*BART Implementation:* NDEP describes BART implementation in Nevada and in neighboring states that contribute to visibility impairment at Jarbidge. The four BART facilities in Nevada are Reid Gardner, Tracy Generating Station (Tracy), Fort Churchill Generating Station (Fort Churchill), and Mohave Generating Station (Mohave). Mohave closed in 2005.<sup>22</sup> The Nevada Regional Haze SIP requires the remaining three facilities to meet the emission limits associated with all BART control measures by January 1, 2015, with the exception of NO<sub>x</sub> at Reid Gardner, which has a compliance date of June 30, 2016, as shown in Table 1. As noted in the table, three units at Reid Gardner and two units at Tracy were scheduled to retire by the compliance date. Subsequent to NDEP's submittal of the Progress Report, all five of these units were shut down and are now in the process of being decommissioned and demolished.<sup>23</sup> The retirement of these five units, and the switching of three other units at Tracy and Fort Churchill to natural gas, is largely in response to the passage of Senate Bill (SB) 123 by the Nevada legislature in 2013, which is described in more detail in the next section regarding other State measures.

<sup>21</sup> Progress Report, Chapter Two, Status of Implementation of Control Measures, pages 2–1 thru 2–13.

<sup>22</sup> Even though Mohave's closure in 2005 predates the first phase of the RH program (2008–2018), NDEP addresses Mohave's emissions in its Progress Report because these emissions are included in the inventories and modeling that form the basis for the Nevada Regional Haze SIP. For example, the projected emission inventory for 2018 includes about 19,595 tpy of NO<sub>x</sub> and 8,701 tpy of SO<sub>2</sub> from Mohave.

<sup>23</sup> See Reid Gardner Generating Station Fact Sheet from Nevada Energy (May 2015), Frank A. Tracy Generating Station Fact Sheet from Nevada Energy (June 2015).

<sup>20</sup> 40 CFR 51.302.

TABLE 1—STATUS OF BART CONTROL MEASURES

Facility	Units	BART Control measures
Reid Gardner Generating Station .....	1, 2, 3 .....	NV Energy retired these three units as of December 31, 2014, as approved by the Public Utilities Commission of Nevada (PUCN)
Tracy Generating Station .....	1, 2 .....	NV Energy retired these two units as of December 31, 2014, as approved by the PUCN and in response to SB 123.
	3 .....	NV Energy is relying on alternative control technology and burning only natural gas to comply with the BART emissions limits as of the December 31, 2014, compliance date.
Fort Churchill Generating Station .....	1, 2 .....	NV Energy is relying on alternative control technology and burning only natural gas to comply with the BART emissions limits as of the December 31, 2014, compliance date.
Mohave Generating Station .....	All .....	This facility ceased operations in December 2005 and was subsequently fully decommissioned and demolished.

NDEP explains in the Progress Report that BART implementation in neighboring states is expected to contribute to visibility improvement at Jarbidge, which is located very near the Idaho border and downwind from sources in Oregon. Since source apportionment modeling identified substantial contributions of sulfur dioxide (SO<sub>2</sub>) from point sources in Idaho and Oregon,<sup>24</sup> NDEP provides updates on two facilities in Idaho (Amalgamated Sugar Company in Nampa and Monsanto/P4 Production in Soda Springs) and one facility in Oregon (Boardman Power Plant) that are subject to BART control measures. Each of these three facilities is reportedly in compliance with the required BART emission limits for SO<sub>2</sub> and NO<sub>x</sub>. However, since some of the compliance dates are not yet effective, more emission reductions are expected by 2018.

*Other State Measures:* Other State measures contributing to reasonable progress at Jarbidge and other Class I areas include cancellations of applications to build power plants, State legislation to reduce emissions from coal-fired power plants (*i.e.*, SB 123), an expanded renewable energy portfolio, and implementation of control measures to attain the National Ambient Air Quality Standards (NAAQS) as listed in Table 2. Regarding cancellations, NDEP explains that these measures represent additional emission reductions because the emissions from these unbuilt sources were included in the baseline and projected emission inventories in the Nevada Regional Haze SIP. Of the five proposed power plants that NDEP assumed would be producing emissions, three withdrew applications (White Pine, Toquop, and Copper Mountain), and two were built (Newmont TS Power Plant near Dunphy in northern Nevada

and Chuck Lenzie Generating Station near Las Vegas).<sup>25</sup> The Nevada Legislature in 2013 enacted SB 123 requiring the reduction of emissions from coal-fired power plants in Clark County, Nevada. SB 123 requires the retirement or elimination of not less than 800 megawatts of coal-fired electric generating capacity: 300 MW by December 2014, an additional 250 MW by December 2017, and an additional 250 MW by December 2019. This legislation also mandates the construction or acquisition of 350 MW from new renewable energy facilities. NV Energy must construct or acquire and own facilities with a total capacity of 550 MW to replace the coal-fired capacity eliminated between 2014 and 2019.<sup>26</sup> NV Energy's decision to retire BART units at Reid Gardner and Tracy, and to convert other BART units to natural gas at Tracy and Fort Churchill, was in response to this legislation.

NDEP also reports that Nevada is one of the first states to adopt a renewable portfolio standard that establishes a schedule requiring electric utilities to generate, acquire, or save a percentage of electricity from renewable energy systems or efficiency measures. Not less than 20 percent must come from renewable energy or efficiency measures from 2015 to 2019. The Nevada legislature also has enacted the "Solar Energy Systems Incentive Program," which requires the Public Utilities Commission of Nevada to set incentives and schedules to produce at least 250 MW of capacity from solar energy by 2021. At the time of the Progress Report, Nevada had installed 38 MW of capacity at a cost of \$160 million. Another example of renewable energy is the "Solar Thermal Demonstrations

Program" that promotes the installation of at least 3,000 solar thermal systems in homes, businesses, schools, and government buildings throughout the State. The Progress Report mentions several other programs to establish solar, wind, and waterpower energy systems along with a list of proposed generation plants that will rely on renewable energy.<sup>27</sup>

TABLE 2—STATUS OF OTHER STATE MEASURES

State measure	Effective date
Three Power Plants included in Inventory for 2018.	Never Built.
Legislation to Retire Coal-Fired Plants (800 mw).	2014–2019.
Legislation for New Renewable Energy (350 mw).	2014–2021.
Renewable Energy Portfolio NAAQS Attainment/Maintenance Regulations.	2015–2025. Ongoing.

*Federal Measures:* The Progress Report provides a summary of existing federal measures, those that were included in the Nevada Regional Haze SIP, as well as new federal measures as listed in Table 3. NDEP describes in the Report how each of these federal programs, rules, and standards contribute further reductions in visibility impairing pollutants.<sup>28</sup> All eight areas in Nevada that were designated non-attainment for one more NAAQS either have been redesignated to attainment and are operating under a maintenance plan or have a determination of attainment indicating that the area is attaining the NAAQS. The control measures for attainment that remain in place include fugitive dust regulations, oxygenated fuel programs, gasoline vapor recovery, transportation control measures,

<sup>24</sup> Nevada Regional Haze SIP, Section 4.3, November 2009.

<sup>25</sup> Newmont TS is a 220-megawatt power plant using coal-fired boilers with modern control technologies operating since 2008. Chuck Lenzie is 1,102-megawatt generating station using gas-fired steam engines operating since 2006.

residential wood burning regulations, woodstove replacement programs, and alternative fuel vehicle program.

woodstove replacement programs, and alternative fuel vehicle program.

TABLE 3—STATUS OF FEDERAL MEASURES

Existing Federal Measures	
Heavy Duty Highway Rule (PM, NO <sub>x</sub> , SO <sub>x</sub> )	Phased in 2006–2010.
Tier 2 Vehicle and Gasoline Program (NO <sub>x</sub> , VOC)	Effective in 2005.
Non-Road Mobile Diesel Emissions Program (NO <sub>x</sub> , CO)	Phased in 2004–2012.
Maximum Achievable Control Technology Program	Ongoing Applicability.
New Federal Measures	
Mercury and Air Toxics Rule (Toxic Gases, SO <sub>2</sub> )	Final Rule in 2011.
Revised NAAQS for Sulfur Dioxide	Final Rule in 2010.
Revised NAAQS for Nitrogen Dioxide	Final Rule in 2010.
Revised NAAQS for Fine Particulate Matter	Final Rule in 2012.
North American Emission Control Areas (NO <sub>x</sub> , PM <sub>2.5</sub> , SO <sub>2</sub> )	Effective in 2012; 2015.
Tier 3 Vehicle Emission and Fuel Standards Program (SO <sub>x</sub> )	Effective in 2017.

PM = Particulate Matter.  
 VOC = Volatile Organic Compounds.

2. EPA’s Evaluation

EPA proposes to find that NDEP adequately addresses the requirement in 40 CFR 51.308(g)(1) to describe the status of all measures included in the Nevada Regional Haze SIP. NDEP provides a detailed and comprehensive update of state and federal measures, including new measures that are expected to contribute further to visibility improvement. The Progress Report’s description of BART implementation, legislation, programs, and rules provides a thorough summary of the regulatory requirements that underpin Nevada’s regional haze program.

B. Summary of Emission Reductions Achieved

1. NDEP’s Analysis

The Progress Report focuses on SO<sub>2</sub> and NO<sub>x</sub> emissions, which are the primary pollutants of concern from anthropogenic sources. NDEP reports that SO<sub>2</sub> and NO<sub>x</sub> emissions have decreased substantially in Nevada due to the implementation of control measures as well as other changes in State energy policy and source activity as described above in the status of measures. According to EPA’s acid rain data,<sup>29</sup> annual SO<sub>2</sub> emissions from Electricity Generating Units (EGUs) in Nevada decreased by 44,107 tpy (82 percent) from 53,346 tpy in 2005 to 9,239 tpy in 2006. Similarly, NO<sub>x</sub> emissions from power plants decreased by 23,257 tpy (54 percent) from 43,242 tpy in 2005 to 19,985 tpy in 2006. NDEP points out that while these large decreases from 2005 to 2006 are mostly

due to the closure of Mohave Generating Station, emissions continued to decrease steadily thereafter. From 2006 to 2013, power plant emissions of SO<sub>2</sub> decreased by about 20 percent (9,239 to 7,427 tpy) and NO<sub>x</sub> emissions decreased by about 61 percent (19,985 to 7,796 tpy).<sup>30</sup> The closure of units at Reid Gardner and Tracy, and the implementation of control measures on other units at Tracy and Fort Churchill, should contribute further emission reductions not reflected in the acid rain data for 2013.

The Progress Report also quantifies emission reductions resulting from the cancellation of plans to construct three power plants and lower actual emissions from the two plants that were built. NDEP includes this analysis because projected emissions from these five sources are included in the emission inventory for 2018 that provides the basis for the RPG at Jarbidge. The reductions due to permit cancellations are 5,814 tpy of SO<sub>2</sub>, 6,136 tpy of NO<sub>x</sub>, and 5,814 tpy of particulate matter (PM<sub>10</sub>). Moreover, the two new plants that were built (Newmont and Chuck Lenzie) have combined actual emissions in 2012 that are less than projected for the emission inventory in 2018.<sup>31</sup> NDEP states that these unrealized emissions, in effect, would result in lower modeled visibility impairment in 2018, particularly at Class I areas near southern and eastern Nevada where the two built sources are located and the three cancelled sources had planned to locate.

<sup>30</sup> Progress Report, Chapter 3, Table 3–2, page 3–5.

<sup>31</sup> Progress Report, Chapter 3, Table 3–1, page 3–4.

2. EPA’s Evaluation

EPA proposes to find that NDEP adequately addresses the requirement in 40 CFR 51.308(g)(2) to provide a summary of the emission reductions from implementing the measures in the Nevada Regional Haze SIP. NDEP documents that SO<sub>2</sub> and NO<sub>x</sub> emissions from Nevada’s power plants have decreased substantially, especially due to the closure of Mohave. NDEP makes the case that emissions from the power sector should continue to decline as BART controls and SB 123 are implemented, further reducing emissions from Reid Gardner, Tracy, and Fort Churchill. While it is difficult to quantify emission reductions from other state and federal programs, we agree that other state and federal measures should contribute to declining emissions, particularly from mobile and stationary sources. While the cancellation of proposed facilities does not constitute emission reductions per se, we recognize that the inclusion of these projected emissions in the 2018 inventory likely inflated the projected emissions used as the basis of the RPGs for Jarbidge and Class I areas affected by Nevada’s emissions. We also note that NDEP’s summary of emission reductions is complemented by its analysis of recent changes in emissions from all sources in Section D of this proposal.

C. Assessment of Visibility Conditions and Changes at Jarbidge

1. NDEP’s Analysis

*Current Visibility Conditions:* NDEP reports on current visibility conditions for the 20 percent worst days and 20 percent best days at Jarbidge for the five-

<sup>29</sup> USEPA Clean Air Markets Division, Air Markets Program Data, Acid Rain Program.

years from 2008 to 2012 as displayed in Table 4.<sup>32</sup> The five-year annual average haze index at Jarbidge for this current time period is 12.0 dv on worst days and 1.9 dv on best days. On worst days, the annual averages for visibility impairment are strongly influenced by

light extinction due to particulate organic matter (POM), followed by coarse mass and sulfate. On the best days, visibility impairment is dominated by light extinction due to sulfate, followed by POM and coarse mass. The Progress Report notes that

sources of POM are predominantly natural, while sources of fine soil and coarse mass are about equally split between natural and anthropogenic. The dominant source of sulfate is SO<sub>2</sub> from anthropogenic sources.

TABLE 4—CURRENT ANNUAL AND FIVE-YEAR ANNUAL AVERAGE VISIBILITY CONDITIONS FOR WORST AND BEST DAYS AT JARBIDGE<sup>33</sup>

Year	Haze index (dv)	Sulfate (Mm <sup>-1</sup> )	Nitrate (Mm <sup>-1</sup> )	POM (Mm <sup>-1</sup> )	EC (Mm <sup>-1</sup> )	Soil (Mm <sup>-1</sup> )	Coarse mass (Mm <sup>-1</sup> )	Sea salt (Mm <sup>-1</sup> )

EC = Elemental Carbon.

*Difference between Current and Baseline Visibility Conditions:* NDEP presents the difference between the current five-year annual average (2008–2012) and the baseline five-year annual average (2000–2004) for Jarbidge, as displayed in Table 5, which also includes successive five-year annual averages for the intervening time periods (2005–2009, 2006–2010, and 2007–2011).<sup>34</sup> The differences calculated in the table are between the baseline and the current visibility condition represented by the time period 2008–2012. A negative difference indicates a reduction in haze (*i.e.*, improved visibility). Comparing baseline to current visibility conditions on worst days, the haze index declined slightly (12.1 to 12.0 dv) with corresponding decreases in light extinction for sulfate, nitrate, and elemental carbon, but a noticeable increase in POM. On the best days, the haze index decreases from the baseline

to current visibility conditions (2.6 to 1.9 dv) with corresponding decreases in light extinction for sulfate, nitrate, POM, and elemental carbon, with the three other pollutants remaining the same.

NDEP also analyzes the relative percentage contribution and rank of each pollutant to visibility impairment on the worst and best days for the five-year annual average baseline and successive five-year time periods, as displayed in Table 5.<sup>35</sup> This analysis reveals that POM (ranging from 35.5 to 43.0 percent), coarse mass (21.9 to 26.1 percent), and sulfate (15.1 to 17.0 percent) rank first, second, and third, respectively, as the largest contributors to light extinction on worst days in each of the five-year periods from the baseline to current time period. On the worst days, POM dominates the contributions to visibility impairment for the baseline as well as all subsequent time periods. The data for sulfate and nitrate show small but continued

improvement on worst days based on these five-year annual averages.

On the best days for each five-year period of annual averages, sulfate (ranging from 4.10 to 50.5 percent), POM (15.1 to 26.1 percent), and coarse mass (12.4 to 13.2 percent) rank first, second, and third except for the baseline period in which nitrate is third, contributing 9.8 percent. On average across all five-year periods, nitrate and elemental carbon each contribute about 10 percent to visibility impairment on best days. NDEP explains that the sulfate contribution is most likely high because best days represent times when there are fewer emissions from natural sources, resulting in relatively higher contribution to impairment from anthropogenic emissions. Although the ranking changes from worst days to best days, POM, coarse mass, and sulfate are the three largest contributors to visibility impairment at Jarbidge.

<sup>32</sup> Progress Report, Chapter 4, Table 4–1, page 4–3.

<sup>33</sup> The data on visibility conditions is from the IMPROVE monitor at Jarbidge (JARB1) that measures light extinction in terms of inverse megameters (Mm<sup>-1</sup>) that are directly related to

gaseous and aerosol concentrations. The haze index is measured in deciviews, which is a metric of haze proportional to the logarithm of the light extinction.

<sup>34</sup> See Progress Report, Chapter 4, Table 4–2, page 4–4.

<sup>35</sup> Progress Report, Table 4–4, Percent Contribution to Aerosol Extinction by Species, page 4–10. These results excluded Rayleigh and are expressed as a percentage of Mm<sup>-1</sup>.

To support its analysis of current conditions, NDEP presents a set of rolling five-year averages of the annual averages, and includes the current estimate of natural conditions, as shown in Table 6.<sup>36</sup> The rolling five-year average of the annual averages reveals more clearly the trend in visibility conditions over time.

TABLE 6—FIVE-YEAR ANNUAL AVERAGE HAZE INDEX FOR BASELINE AND SUCCESSIVE TIME PERIODS MEASURED AT JARB1  
[In deciviews]

Days measured (20 Percent)	Baseline conditions	Interim five-year time periods			Current conditions	Natural conditions
	2000–2004	2005–2009	2007–2011	2007–2012	2008–2012	
Worst .....	12.1	12.4	12.2	11.7	12.0	7.9
Best .....	2.6	2.2	2.0	2.0	1.9	1.1

NDEP also presents the change in visibility conditions between the baseline and current period for best and worst days in comparison to the RPG in 2018 using the 2008 to 2012 average as displayed in Table 7.<sup>37</sup> While visibility on the best days shows improvement, only modest progress is shown for the worst days due to significant contribution of POM to light extinction at Jarbidge, particularly in 2012 as shown in Table 4.

TABLE 7—REASONABLE PROGRESS GOAL SUMMARY FOR JARBIDGE  
[In deciviews]

Best days			Worst days				
Baseline (2000–2004)	Current (2008–2012)	Visibility improvement	Baseline (2000–2004)	Current (2008–2012)	Visibility improvement	2018 RPG	Progress in 2012 to 2018 RPG
2.6 .....	1.9	0.7	12.1	12.0	0.1	11.05	9.5%

*Changes in Visibility Impairment over Past Five Years:* The distinguishing feature of annual visibility impairment on the worst days from 2008 to 2012 is the variability of light extinction due to POM and its corresponding effect on the haze index as shown in Table 4. While light extinction for other pollutants is relatively flat during this current five-year period, POM varies by almost 20 Mm<sup>-1</sup>, from a low of 4.33 Mm<sup>-1</sup> in 2010 to a high of 23.97 Mm<sup>-1</sup> in 2012. Levels of POM spiked in 2012, which NDEP attributes to emissions from wildfires. As the table shows, on the worst days POM has a strong influence

on the year-to-year variability in visibility conditions, and can cause a corresponding increase in the 2008–2012 five-year annual average. Visibility impairment on worst days generally has not changed much over the five years except for the variations due to light extinction from POM. Visibility on best

<sup>36</sup> Progress Report Table 4–3, page 4–6.

<sup>37</sup> Progress Report Table 4–6, page 4–14. This table omits the RPG for the best days, which is 2.56 dv.

days, by contrast, generally is improving over the current time period with little variability from year to year. For the best days, there is a noticeable reduction in visibility impairment due to sulfate, nitrate, POM, and elemental carbon.

NDEP presents a trend analysis for the period from 2000 to 2012, focusing on sulfates and nitrates, as an annual average and as a rolling five-year average during this 13-year time period based on IMPROVE data.<sup>38</sup> Analyzing this longer time period demonstrates that on the worst and best days visibility impairment resulting from light extinction due to sulfate and nitrate is improving over time, both on an annual basis as well as five-year annual averages. NDEP also includes an analysis showing the effect of a large spike in nitrates in December 2005 (41 Mm<sup>-1</sup>) that increases the annual average as well as all the five-year averages that include data from 2005.

2. EPA's Evaluation

EPA proposes to find that NDEP adequately addresses the requirement in 40 CFR 51.308(g)(3) to assess the visibility conditions and changes in each of the State's Class I areas for the least and most impaired days in terms of the current conditions, difference between current and baseline conditions, and over the past five years. The analysis indicates that visibility on the best days at Jarbidge is getting better, but that visibility on the worst days is flat or only minimally improving. However, NDEP offers compelling evidence that light extinction due to POM has dominated visibility conditions on the worst days, particularly in 2012 as shown in Table 4.

D. Analysis of Changes in Emissions

1. NDEP's Analysis

NDEP relies on the WRAP's analysis<sup>39</sup> to describe the changes in emissions from the baseline<sup>40</sup> in 2002 to the emissions inventory in 2008, the

beginning of Nevada's current five-year time period. NDEP also uses NEI data from 2008 to 2011 to augment its analysis.<sup>41</sup> As shown in Table 8, emissions of all visibility-impairing pollutants decreased from the baseline inventory to 2008, except for fine soil and coarse mass. Notably, actual emissions in 2008 are lower than the projected 2018 emissions for all pollutants, with the exception of fine soil and coarse mass. For example, point source emissions of SO<sub>2</sub> decreased by 78 percent, while point source emissions of NO<sub>x</sub> decreased by over 50 percent from the baseline to 2008. These large reductions in the anthropogenic emissions of SO<sub>2</sub> and NO<sub>x</sub> represent a successful strategy of reducing anthropogenic emissions within the State. NDEP notes that the increase in fine soil and coarse mass are likely due to updates in inventory development methods rather than actual increases, which is plausible given the small changes in soil and coarse mass observed at the Jarbridge monitor.

TABLE 8—COMPARISON OF EMISSION INVENTORIES IN 2002, 2008, AND 2018 FOR NEVADA OF ALL VISIBILITY IMPAIRING POLLUTANTS<sup>42</sup>

Pollutants	2002 Baseline (tpy)	2008 Inventory (tpy)	2018 Projection (tpy)	2008 Actuals as a percent of 2018 projections
Sulfur Dioxide .....	67,743	17,058	46,224	37
Nitrogen Oxides .....	162,397	119,513	135,496	88
Ammonia .....	12,092	9,382	14,503	65
Volatile Organic Compounds .....	897,102	351,142	897,707	39

Elemental Carbon .....	6,409	4,425	5,638	78
Fine Soil .....	21,208	40,301	24,134	167
Coarse Mass .....	161,142	321,257	188,287	171

NDEP analyzes the differences between the baseline and current emissions based on WRAP's WestJump2008 inventory for eight categories of emissions as summarized below. This analysis focuses on the percentage change in the emissions of each pollutant by source category in 2002 and 2008, and adds an analysis of changes in emissions from 2008 to 2011 where NEI data is available.

*Sulfur Dioxide:* Total anthropogenic emissions of SO<sub>2</sub> decreased by 75 percent from 65,543 tons in 2002 to 16,552 tons in 2008, representing a

significant reduction in particular from point and area sources as shown in Table 9. Point source emissions alone decreased by 78 percent (50,720 to 11,067 tpy) during this period, and area source emissions decreased by 63 percent (12,953 to 4,863 tpy). As a percentage of total statewide emissions, anthropogenic and natural, point source emissions decreased from 75 percent of the total in the 2002 (50,720 of 67,743 tons) to 65 percent of the total in the 2008 (11,067 tons of a total 16,552 tons). Moreover, the NEI inventories show a further decrease in SO<sub>2</sub> emissions from

point sources of 44 percent from 10,409 tpy in 2008 to 5,863 tpy in 2011, primarily due to reductions in coal-fired emissions from power plants. On-road and off-road mobile emissions decreased by 34 percent (454 to 298 tpy) and 77 percent (1,403 to 322 tpy), respectively, from 2002 to 2008. Data from the NEI indicate further reductions in emissions from mobile sources from 2008 to 2011, a 47 percent decrease in on-road emissions (511 to 270 tpy) and a 87 percent decrease in off-road emissions (316 to 41 tpy).

<sup>38</sup> Nevada RH Progress Report, Chapter 4, Figures 4–12 through 4–15, pages 4–15 thru 4–19.

<sup>39</sup> WRAP Regional Haze Rule Reasonable Progress Summary Report, June 28, 2013. *West-Wide Jump-Start Air Quality Modeling Study—Final Report*, September 30, 2013.

<sup>40</sup> WRAP refers to the baseline as 2002, the midyear of the baseline inventory period from 2000 to 2004.

<sup>41</sup> Data from the NEI are slightly different from the WestJump2008 inventory, which leverages more recent inventory development performed by the WRAP.

<sup>42</sup> The WRAP compared data between the baseline (2002) and emission inventory (2008) for nine source categories: Point sources, area sources, oil and gas, on-road mobile, off-road mobile, fugitive dust and road dust, windblown dust, biogenic, and fires.

TABLE 9—CHANGES IN SULFUR DIOXIDE EMISSIONS BY CATEGORY (TPY)

Source category	2002 (Baseline)	2008 (WestJump2008)	Difference (percent change)
<b>Anthropogenic Sources</b>			
Point .....	50,720	11,067	-39,653 (-78%)

Anthropogenic Fire .....	12	2	-10 (-83%)
<b>Total Anthropogenic .....</b>	<b>65,543</b>	<b>16,552</b>	<b>-48,991 (-75%)</b>
<b>Natural Sources</b>			
Natural Fire .....	2,200	506	-1,694 (-77%)
Biogenic .....	0	0	0
Windblown Dust .....	0	0	0
<b>Total Natural .....</b>	<b>2,200</b>	<b>506</b>	<b>-1,694 (-77%)</b>
<b>All Sources</b>			
<b>Total Emissions .....</b>	<b>67,743</b>	<b>17,058</b>	<b>-50,685 (-75%)</b>

*Nitrogen Oxides:* The total statewide inventory of NO<sub>x</sub> emissions from all sources decreased by 26 percent from 162,397 tpy in 2002 to 118,766 tpy in 2008 as shown in Table 10. Over this time period, NO<sub>x</sub> emissions from anthropogenic sources decreased by 23 percent (139,353 tpy to 107,827 tpy), and natural emissions decreased by 53 percent (23,044 tpy to 10,939 tpy). Anthropogenic emissions of NO<sub>x</sub> in Nevada are primarily from point and on-road mobile sources, followed by off-road and area sources. From the 2002 to 2008 inventories, NO<sub>x</sub> emissions from point sources decreased by about 50 percent (59,864 to 29,344 tpy), on-road mobile increased by about 22 percent (41,089 to 50,068 tpy), off-road mobile

decreased by about 48 percent (32,565 to 17,081 tpy), and area sources increased by 98 percent (5,725 to 11,321 tpy). Increases in on-road mobile and area source emission inventories were offset by larger decreases in emissions from point and off-road mobile sources. The NEI point source inventory shows a decrease of 57 percent in NO<sub>x</sub> emissions from 2008 to 2011. NDEP attributes the 22 percent increase in on-road mobile emissions to the use of different air quality models to estimate emissions in 2002 (MOBILE6) and in 2008 (MOVES2010), a growth in the number of vehicles, and the fact that federal vehicle emissions standards were not fully implemented. NEI data from 2008 and 2011 show a 36 percent

increase in on-road mobile NO<sub>x</sub> emissions, possibly related to population growth. The NEI shows a continuing decrease in off-road mobile emissions of 12 percent from 2008 to 2012. NDEP states that the increase in emissions from area sources may be a result of a reclassification of some off-road mobile sources into area source category, which may have contributed to the decrease in emissions from off-road mobile sources. This is consistent with the reclassification of in-flight aircraft emissions and locomotive emissions outside of rail yards from the off-road mobile category to the area source category in the 2008 NEI.<sup>43</sup>

TABLE 10—CHANGES IN NITROGEN OXIDE EMISSIONS BY CATEGORY (TPY)—Continued

Source category	2002 (Baseline)	2008 (WestJump2008)	Difference (percent change)
Biogenic .....	15,018	7,364	-7,654
Windblown Dust .....	0	0	0
Total Natural .....	23,044	10,939	-12,105 (-53%)
<b>All Sources</b>			
Total Emissions .....	162,397	118,766	-43,631 (-26%)

*Ammonia:* Total statewide emissions of ammonia decreased by 22 percent (12,092 to 9,382 tpy) from 2002 to 2008. Of this total, anthropogenic emissions decreased by 34 percent (10,408 to 6,893 tpy) while natural emissions increased by 48 percent (1,684 to 2,490 tpy). The primary source of anthropogenic emissions of ammonia is area sources, and to a lesser extent on-road mobile sources, while fire is the dominant natural source.<sup>44</sup> Area sources of ammonia emissions decreased by about 29 percent (8,009 to 5,717 tpy) from 2002 to 2008. On-road mobile sources, the next largest category of anthropogenic emissions, decreased by about 58 percent (2,030 to 849 tpy). Despite an increase of 48 percent in natural fire (1,684 to 2,490 tpy), there was a net decrease in statewide emissions. Ammonia is not a criteria pollutant and is not included in the NEI, so no data for 2011 were provided.

*Volatile Organic Compounds:* Data from the 2002 and 2008 inventories as well as from the NEI for the 2008 to 2011 time period show large reductions in volatile organic compounds (VOC) emissions from natural sources with lesser reductions from anthropogenic sources. Biogenic emissions from natural sources dominate the Nevada VOC emissions inventory. Total statewide VOC emissions decreased by 61 percent from 897,102 tpy in 2002 to 351,142 tpy in 2008. This large reduction is mostly due to a decrease in biogenic emissions over this time period by 67 percent from 794,139 tpy to 262,912 tpy. NDEP notes that these changes may reflect enhancements to the inventory method, use of different meteorological years, and improved emission factors and data sources. There were also decreases in on-road mobile (36,257 to 21,302 tpy) and natural fire

(17,606 to 4,204 tpy), and an increase in area sources (28,592 to 40,973 tpy), all of which are a very small part of the total inventory. VOC emissions in the NEI show a decrease in point source (17 percent), on-road mobile (20 percent), and off road mobile (18 percent) from 2008 to 2011.

*Primary Organic Aerosol:* Wildfires are the dominant source of primary organic aerosol (POA) emissions, 90 percent of the total in 2002 (22,501 of a total 24,734 tpy) and 58 percent in 2008 (6,831 of a total 11,816 tpy). Anthropogenic sources, namely area and mobile, also are important contributors. Overall, total emissions of POA decreased by 52 percent from 2002 to 2008. Natural fire emissions of POA decreased 70 percent (22,501 to 6,831 tpy), reflecting the high variability of wildfires from year to year. Except for anthropogenic fire, all other categories of anthropogenic sources of POA (primarily area, mobile, and fugitive) increased during this time period with the total anthropogenic emissions increasing by 123 percent from 2,233 to 4,985 tpy.

*Elemental Carbon:* Natural fire (*i.e.*, wildfires) also dominate EC emissions at 73 percent of the 2002 inventory (4,674 of 6,409 tpy), but only 23 percent of the 2008 inventory (1,130 to 4,425 tpy), a reduction of 76 percent (4,674 to 1,130 tpy). Consequently, total emissions decreased by 31 percent (6,409 to 4,425 tpy) mostly due to the decrease in natural fire. Total anthropogenic emissions increased by 90 percent (1,735 to 3,295 tpy) due mostly to an increase in on-road mobile sources from 235 to 1,891 tpy over this time period. On-road mobile is the largest source of elemental carbon in the 2008 inventory at 43 percent, while the next largest category is natural fire emissions contributing 26 percent. Area and point sources, by contrast, contribute less than one percent each to the 2008 inventory.

*Fine Soil:* Total emissions of fine soils increased by 90 percent (21,208 to 40,301 tpy) from the 2002 to the 2008 inventory. The largest increases were in

fugitive dust (6,128 to 19,216 tpy) and windblown dust (10,438 to 17,051 tpy). NDEP reports that increases in these source categories were likely due to updates to inventory development methods rather than actual increases.

*Coarse Mass:* Total emissions of coarse mass increased by about 99 percent (161,142 to 321,257 tpy), mostly due to large increases in anthropogenic fugitive and road dust (56,799 to 161,532 tpy) and in natural windblown dust (93,946 to 153,459 tpy). Fugitive dust includes sources such as agricultural operations, construction, and mining operations. Windblown dust is largely from vacant lands. NDEP attributes these increases in part to updates in the inventory development methods rather than actual increases. Nonetheless, increases in fugitive dust may be due to increases in population, while increases in road dust may be due to increases in vehicle miles traveled. Point source and natural fire emissions decreased.

## 2. EPA's Evaluation

We propose to find that NDEP adequately addresses the requirement in 40 CFR 51.308(g)(4) to analyze the change in emissions over the past five years of pollutants contributing to visibility impairment from all sources and activities within the state, using the most recently updated emission inventories. NDEP's analysis of emission data makes a strong case that the State is reducing emissions of SO<sub>2</sub> and NO<sub>x</sub> from anthropogenic sources, especially point sources.

### E. Assessment of Anthropogenic Emissions Impeding Progress

#### 1. NDEP's Analysis

NDEP reports that progress toward achieving its visibility goal of 11.05 dv at Jarbidge by 2018 has not been impeded by any significant anthropogenic emission changes within or outside the State. NDEP reaches this conclusion by evaluating significant emission changes within Nevada, the effect of emissions from sources outside

<sup>44</sup> The WRAP has created an operational policy level definition of fire activity as discretely natural or anthropogenic. See the *WRAP Regional Haze Rule Reasonable Progress Summary Report*, section 3.2.1 and the WRAP's *Policy for Categorizing Fire Emissions* (November 15, 2001), available at <http://www.wrapair.org/forums/fejff/documents/nbtt/FirePolicy.pdf>.

of Nevada on Jarbidge, and the effect of Nevada's emissions on nearby Class I areas.

*Emission Changes within Nevada and Visibility Conditions at Jarbidge:* NDEP analyzes the baseline and rolling five-year annual averages of light extinction data from the JARB1 monitor for the best and worst days from 2005 through 2012. For the worst days, the data show a reduction in sulfate and nitrate extinction for the three most recent five-year periods (2006–2010, 2007–2011, and 2008–2012), but an increase in POM

extinction, due to a spike in 2012 that NDEP attributes to wildfires.<sup>45</sup> On the best days, visibility impairment is reduced from the baseline to the current period due to decreases in extinction from sulfate, nitrate, POM, and elemental carbon. Light extinction for soil, coarse mass, and sea salt remain fairly constant on best days.

Actual emissions of SO<sub>2</sub>, NO<sub>x</sub>, PM<sub>10</sub>, and VOC from point sources in Nevada<sup>46</sup> have decreased significantly over a 10-year period (2002–2012) and over the last five years (2008–2012) as

presented in Table 11.<sup>47</sup> The years 2002, 2005, 2008, and 2011 are the most complete inventory years submitted to EPA for the NEI. The data for 2012 are actual emission values for major and minor point sources from Nevada's permitting database. As shown in the table, SO<sub>2</sub> emissions from point sources dropped dramatically after the closure of Mohave in 2005, and decreased by another 50 percent from 2008 to 2012. Likewise, NO<sub>x</sub> emissions decreased by 30,000 tpy after 2005, and decreased another 62 percent from 2008 to 2012.

TABLE 11—ACTUAL EMISSIONS OF NEVADA POINT SOURCES (TPY)

Year	SO <sub>2</sub>	NO <sub>x</sub>	PM <sub>10</sub>	VOC
2002	50,619	55,876	6,868	2,132
2005	54,243	52,087	4,643	1,646
2008	10,497	21,680	3,465	1,600
2011	5,959	10,548	3,331	971
2012	5,278	8,324	2,629	986

PM<sub>10</sub> = particulate matter less than 10 microns.

*Emissions from Outside Sources Effecting Jarbidge:* NDEP's analysis focuses on three BART sources in Idaho and Oregon to determine whether these previously identified point sources are impeding progress on the worst days at Jarbidge. Comparing baseline emissions to the NEI in 2011, total SO<sub>2</sub> emissions from these three sources decrease by about 40 percent (26,243 to 15,782 tpy) from 2002 to 2011. Total NO<sub>x</sub> emissions decrease by about 31 percent (11,010 to 7,611 tpy) over the same time period. Moreover, emissions from these sources will continue to decline over time given staggered compliance dates through 2018. With visibility impairment resulting from sulfate and nitrate trending downward at Jarbidge and the implementation of BART controls in Idaho and Oregon, NDEP concludes that there are no significant changes in anthropogenic emissions from outside the State that are impeding progress at Jarbidge.

In assessing point source emissions from Idaho and Oregon, NDEP references source apportionment modeling of particulate sulfate and nitrate extinction for 2018 that was performed by the WRAP for the Nevada Regional Haze SIP.<sup>48</sup> The purpose of the modeling is to determine source areas that contribute to visibility impairment

on the worst days at Jarbidge. The area of greatest sulfate contribution is Outside Domain<sup>49</sup> (43.8 percent), followed by Idaho (10.3 percent), Oregon (7.2 percent), and Pacific Offshore (6.9 percent). The area of greatest nitrate contribution is Idaho (30.3 percent), followed by Outside Domain (27.5 percent), Nevada (13.1 percent), and Utah (10.6 percent). Based on these results, Idaho is the second largest contributor of modeled sulfate and the largest contributor of modeled nitrate concentrations. Oregon is the third largest contributor of modeled sulfate concentrations. While this analysis supports the focus on emissions from Idaho and Oregon, the fact that Outside Domain contributes 43.8 percent of the modeled sulfate and 27.5 percent of the modeled nitrate is another indication that Nevada has limited control over a large subset of the emissions impairing visibility at Jarbidge.

*Nevada's Emissions Effect on Nearby Class I Areas:* NDEP also addresses the potential effect of Nevada's emissions on nearby Class I areas in other states using particulate source apportionment modeling conducted by the WRAP for the first round of regional haze SIPs. This modeling estimated Nevada's projected contributions to light

extinction from sulfates and nitrates at Class I areas in adjacent states in 2018.<sup>50</sup> In light of the 75 percent reduction in Nevada's SO<sub>2</sub> emissions (see Table 9) and 26 percent reduction in NO<sub>x</sub> emissions (see Table 10) between 2002 and 2008, NDEP concludes that Nevada's emission reductions are not impeding progress in reducing visibility impairment at Class I areas in adjacent states.

2. EPA's Evaluation

EPA proposes to find that NDEP adequately addresses the requirement in 40 CFR 51.308(g)(5) to assess any significant changes in anthropogenic emissions within or outside the state over the past five years that have limited or impeded progress in reducing emissions and improving visibility. NDEP provides a comprehensive analysis of emission changes within and outside the State, and examines the potential effect of these changes at Jarbidge and at other Class I areas. All indications are that the total statewide emissions of SO<sub>2</sub> and NO<sub>x</sub> are decreasing (see Tables 9, 10, and 11), and most of the pollutants are already at levels below those in the projected emission inventory for 2018 (see Table 8). Based on NDEP's analysis, EPA proposes to concur with NDEP that

<sup>45</sup> Progress Report, Chapter 6, pages 6–2 thru 6–3.

<sup>46</sup> SO<sub>2</sub> emissions from point sources were 68 percent of the total anthropogenic emissions in Nevada in 2008 (WestJump2008). Area source emissions of SO<sub>2</sub> were 29 percent of total anthropogenic emissions in 2008.

<sup>47</sup> Progress Report, Table 6–1, page 6–4.

<sup>48</sup> Nevada Regional Haze SIP, Chapter 4, Table 4–5: Summary of 2018 Model Results for Jarbidge Wilderness Area, based on Particulate Matter Source Attribution Tracking, page 31.

<sup>49</sup> Outside Domain as a source category represents the background concentrations of pollutants from international sources that enter the modeling

domain, in this case the western United States and portions of Canada and Mexico.

<sup>50</sup> Nevada Regional Haze SIP, Chapter 4, Tables 4–3: Nevada's Sulfate Extinction Contribution to Class I Areas Outside of Nevada and Table 4–4: Nevada's Nitrate Extinction Contribution to Class I Areas Outside of Nevada, pages 14–17.

there is no evidence that any recent changes in emissions from any specific sources or source categories are impeding progress.

*F. Assessment of Plan Elements and Strategy*

1. NDEP's Analysis

The Progress Report concludes that the existing elements and strategies in the Nevada Regional Haze Implementation Plan are sufficient to enable Nevada and other neighboring states to meet the RPGs by 2018 in terms of reducing emissions from anthropogenic sources. Nevada has already achieved significant emission reductions in the first phase of the regional haze program, with additional reductions expected by 2018. Actual emissions of visibility impairing pollutants in 2008, with the exception of fine soil and coarse mass, are already less than the projected emissions in 2018 (see Table 8). Notably actual SO<sub>2</sub> emissions in 2008 are about 40 percent and actual NO<sub>x</sub> emissions are about 90 percent of the respective totals in the projected emission inventory for 2018. The NEI data for 2008 and 2011 also demonstrate further reductions in SO<sub>2</sub> and NO<sub>x</sub> emissions from point sources in Nevada (see Table 11). Moreover, further reductions in anthropogenic emissions are expected from the power sector as a result of BART implementation, shutdowns, and conversions to natural gas or lower sulfur fuels. In the case of Jarbidge, NDEP notes that emissions from natural sources can dominate visibility impairment on the worst days, and

much of the anthropogenic emissions are from out-of-state. NDEP states that given the current and expected SO<sub>2</sub> and NO<sub>x</sub> emission reductions from power plants, further reductions from any other non-utility or industrial point sources are unnecessary at this time.

Regarding visibility conditions, trend analysis of monitoring data at Jarbidge from 2000 to 2012 demonstrates improvement in visibility impairment from sulfate and nitrate on the worst and best days, both on an annual average basis as well as five-year annual averages.<sup>51</sup> NDEP notes that, although the visibility benefit from anthropogenic emission reductions is overshadowed by contributions from natural sources, visibility is slowly improving at Jarbidge on the worst days and shows considerable improvement on the best days (see Tables 5, 6, and 7). Where it appears that visibility improvement on worst days is not keeping pace with emission reductions (e.g., the 14.9 dv annual average for 2012 in Table 4), NDEP asserts that this is due to large contributions from natural sources (e.g., light extinction from POM of 23.97 Mm<sup>-1</sup> in 2012). In terms of anthropogenic sources, NDEP notes that sulfate contributes the most to visibility impairment on worst days at Jarbidge, but most of the sulfate is from out-of-state sources. Nitrate has only a small contribution to visibility impairment on the worst days.

2. EPA's Evaluation

EPA proposes to find that the Progress Report adequately addresses the requirement in 40 CFR 51.308(g)(6) to

assess whether the current elements and strategies in the Regional Haze Implementation Plan are sufficient to enable Nevada, and other states affected by Nevada's emissions, to meet all established RPGs.

In particular, the Report analyzes trends in statewide emissions and visibility conditions at Jarbidge, as well as the additional emission reductions expected through 2018. The Report indicates that anthropogenic emissions of SO<sub>2</sub>, NO<sub>x</sub>, ammonia and VOC are decreasing. In particular, the emission reductions reflect substantial decreases in total anthropogenic emissions of SO<sub>2</sub> and NO<sub>x</sub>. However, anthropogenic emissions of POA, fine soil, elemental carbon and coarse mass are increasing. While these increases may be partially attributable to changes in inventory development methodologies, they highlight the need for greater attention to these pollutants in future planning periods.

With regard to visibility trends, the Progress Report explains that Jarbidge is not on track to meet the 2018 RPG for the worst days due to the large contribution from POM, which NDEP attributes mostly to wildfires and windblown dust. EPA concurs that POM has a large impact on the worst days and that much of the POM is attributable to natural sources, particularly wildfires. Furthermore, we note that the trend of high POM extinction (with significant interannual variability) dominating the worst days at Jarbidge has continued during 2013 and 2014, for which the IMPROVE data are now available, as shown in Tables 12 and 13.

TABLE 12—2013 AND 2014 AVERAGE VISIBILITY CONDITIONS FOR WORST AND BEST DAYS AT JARBIDGE

Year	Haze index (dv)	Sulfate (Mm <sup>-1</sup> )	Nitrate (Mm <sup>-1</sup> )	POM (Mm <sup>-1</sup> )	EC (Mm <sup>-1</sup> )	Soil (Mm <sup>-1</sup> )	Coarse mass (Mm <sup>-1</sup> )	Sea salt (Mm <sup>-1</sup> )
<b>Worst Days</b>								
2013 .....	11.7	3.5	1.0	8.4	1.3	2.7	5.9	0.1
2014 .....	12.2	3.1	0.6	14.5	2.3	2.2	4.5	0.2
<b>Best Days</b>								
2013 .....	1.5	0.9	0.1	0.2	0.0	0.1	0.2	0.0
2014 .....	1.8	1.0	0.2	0.3	0.1	0.1	0.2	0.1

<sup>51</sup> Progress Report, Chapter 4, Section 4.6: Visibility Trends, pages 4–15 thru 4–19.

TABLE 13—FIVE-YEAR ANNUAL AVERAGE VISIBILITY CONDITIONS FOR WORST AND BEST DAYS AT JARBIDGE

Year	Haze index (dv)	Sulfate (Mm <sup>-1</sup> )	Nitrate (Mm <sup>-1</sup> )	POM (Mm <sup>-1</sup> )	EC (Mm <sup>-1</sup> )	Soil (Mm <sup>-1</sup> )	Coarse mass (Mm <sup>-1</sup> )	Sea salt (Mm <sup>-1</sup> )
<b>Worst Days</b>								
2009–2013 .....	12.0	3.8	0.9	10.7	1.5	2.5	5.9	0.2
2010–2014 .....	12.2	3.6	0.9	12.1	1.8	2.5	5.6	0.2
<b>Best Days</b>								
2009–2013 .....	1.9	1.0	0.2	0.4	0.1	0.1	0.3	0.0
2010–2014 .....	1.9	1.0	0.2	0.4	0.1	0.1	0.3	0.0

However, we also note that not all POM is from natural sources. POA and VOC, the precursors to POM, are also emitted by anthropogenic sources, particularly area and mobile sources. Moreover, other pollutants, particularly coarse mass and sulfates, both of which have a significant anthropogenic component, also contribute to impairment on the worst days at Jarbidge. Accordingly, in developing its Regional Haze SIP for the next planning period, NDEP should consider implementing additional control measures to address anthropogenic emissions of POA, VOC, SO<sub>2</sub>, and coarse mass.

Nonetheless, given the substantial reductions in anthropogenic emissions of SO<sub>2</sub> and NO<sub>x</sub>, improvement in visibility conditions on the best days, and evidence that the worst days are slowly improving, we propose to find that the current plan is sufficient for meeting the RPGs.

*G. Review of Visibility Monitoring Strategy*

1. NDEP’s Analysis

The primary monitoring network, nationally and in Nevada, for the measurement and characterization of pollutants contributing to regional haze is the IMPROVE network. NDEP intends to rely on the continued availability of quality assured data collected through the IMPROVE network to comply with the regional haze monitoring requirements in the RHR. NDEP finds that the IMPROVE site at Jarbidge, Nevada’s only Class I area, is sufficiently representative to support a determination of reasonable progress. NDEP concludes that no modification to the State’s visibility monitoring strategy is necessary at this time.

2. EPA’s Evaluation

EPA proposes to find that NDEP adequately addresses the requirement in 40 CFR 51.308(g)(7) to review its visibility monitoring strategy and make

any modifications as necessary. We are not aware of any evidence of a need to modify Nevada’s monitoring strategy for measuring visibility at this time.

*H. Determination of Adequacy*

1. NDEP’s Determination

NDEP has determined that no substantive revision of the Nevada Regional Haze Implementation Plan is warranted at this time in order to achieve the RPGs in 2018 for visibility improvement at Jarbidge and at other Class I areas affected by emissions from Nevada. NDEP concludes that no additional controls are necessary based on the evidence presented in the Progress Report regarding the first half of the first phase of the program. The Report documents a substantial reduction in anthropogenic emissions in Nevada as well as an improvement in visibility at Jarbidge even though BART controls and other state and federal measures are not yet fully implemented. Further changes in source activity that were not included in the State’s plan further support the conclusion that progress is adequate.

2. EPA’s Evaluation

EPA proposes to find that NDEP adequately addresses the requirements in 40 CFR 51.308(h) by determining that the existing Nevada Regional Haze Implementation Plan requires no substantive revisions at this time to achieve the established RPGs at Jarbidge and at other Class I areas affected by emissions from Nevada. We propose to concur with the State’s negative declaration based on the analysis and documentation presented in the Progress Report.

NDEP demonstrates that emissions from anthropogenic sources within the State are decreasing as are emissions from point sources in Idaho and Oregon that contribute to visibility impairment at Jarbidge. While the monitoring data indicates that best days at Jarbidge are getting better, we are concerned that

visibility conditions on the worst days are relatively flat or only slightly improving. However, this lack of progress on the worst days is largely attributable to the impact of POM, which results primarily from natural sources. Therefore, we propose to approve NDEP’s determination that the Nevada Regional Haze Implementation Plan requires no substantive revisions at this time.

*I. Consultation With Federal Land Managers*

1. NDEP’s Consultation

NDEP provided FLMs with a draft Progress Report on June 14, 2014, for a 60-day review prior to the public comment period, received comments from the U.S. Department of Interior National Parks Service (NPS) and the U.S. Department of Agriculture Forest Service (USFS), and responded to those comments as documented in Appendix C of the Progress Report. The letter from NPS dated August 15, 2014, supported the Report’s findings, and provided four short comments on how to improve specific aspects of the analyses. The letter from USFS dated August 29, 2014, acknowledged the opportunity to work with NDEP, but provided no specific comments. In the Progress Report, NDEP reaffirmed its commitment to continue participating in the WRAP and consulting with other states, FLMs, and tribes regarding SIP revisions and implementation of other programs that may contribute to visibility impairment.

2. EPA’s Evaluation

EPA proposes to find that NDEP has addressed the requirements in 40 CFR 51.308(i)(2), (3), and (4) to provide FLMs with an opportunity for consultation in person and at least 60 days prior to a public hearing on the revised plan; include a description in the revised plan of how it addressed any comments from the FLMs; and provide procedures for continuing consultation between the State and FLMs. These

procedural requirements for the Progress Report, a revision to the Regional Haze SIP in this case, are documented in Appendices C and D attached to the Report.

#### J. Public Participation

##### 1. NDEP's Public Process

NDEP provided a 30-day public comment period on the draft Progress Report as well as an opportunity for a public hearing. The public hearing, scheduled for October 15, 2014, was cancelled because no request for a hearing was received. During the public comment period, NDEP received one set of comments from the Sierra Club and National Parks Conservation Association in a letter dated October 16, 2014.<sup>52</sup> These organizations questioned whether NDEP's analysis supports its determination that progress in implementing the Nevada Regional Haze Implementation Plan is adequate to achieve the 2018 RPGs for Jarbidge and other Class I areas affected by Nevada's emissions. NDEP provided detailed responses to these comments in Appendix D of the Progress Report.

##### 2. EPA's Evaluation

EPA proposes to find that NDEP has fulfilled the requirements of CAA 110(a) and (l) and 40 CFR 51.102 regarding reasonable notice and public hearings.

#### VI. EPA's Proposed Action

EPA is proposing to approve the Nevada Regional Haze Progress Report submitted to EPA on November 18, 2014, as meeting the applicable requirements of the CAA and RHR.

#### VII. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations.<sup>53</sup> Thus, in reviewing SIP submissions, EPA's role is to approve state decisions, provided that they meet the criteria of the CAA. Accordingly, this proposed action is to approve state law as meeting Federal requirements, and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under

Executive Order 12866 (58 FR 51735, October 4, 1993);

- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);

- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because it does not involve technical standards; and

- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed action does not apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

#### List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen oxides, Organic carbon, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Visibility, Volatile organic compounds.

RIN 0648-BD76

#### Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Dolphin and Wahoo Fishery Off the Atlantic States and Snapper-Grouper Fishery of the South Atlantic Region; Amendments 7/33

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of availability; request for comments.

**SUMMARY:** The South Atlantic Fishery Management Council (Council) has submitted Amendment 7 to the Fishery Management Plan (FMP) for the Dolphin and Wahoo Fishery off the Atlantic States (Dolphin and Wahoo FMP) and Amendment 33 to the FMP for the Snapper-Grouper Fishery of the South Atlantic Region (Snapper-Grouper FMP) (Amendments 7/33) for review, approval, and implementation by NMFS. Amendments 7/33 propose actions to revise the landing fish intact provisions for vessels that lawfully harvest dolphin, wahoo, or snapper-grouper in or from Bahamian waters and return to the U.S. exclusive economic zone (EEZ). The U.S. EEZ as described in this document refers to the Atlantic EEZ for dolphin and wahoo and the South Atlantic EEZ for snapper-grouper. The purpose of Amendments 7/33 is to improve the consistency and enforceability of Federal regulations with regards to landing fish intact and to increase the social and economic benefits related to the recreational harvest of these species.

**DATES:** Written comments must be received on or before November 16, 2015.

**ADDRESSES:** You may submit comments on Amendments 7/33 identified by "NOAA-NMFS-2015-0047" by any of the following methods:

- *Electronic submissions:* Submit electronic comments via the Federal e-Rulemaking Portal: <http://www.regulations.gov>. Go to [www.regulations.gov/#/docketDetail;D=NOAA-NMFS-2015-0047](http://www.regulations.gov/#/docketDetail;D=NOAA-NMFS-2015-0047), click the "Comment Now!" icon, complete the required fields, and enter or attach your comments.

- *Mail:* Submit written comments to Nikhil Mehta, Southeast Regional

<sup>52</sup> The letter to Adele Malone, NDEP, is signed by David VonSeggern, Chair, Sierra Club Toiyabe Chapter; Gloria Smith, Managing Attorney, Sierra Club; and Lynn Davis, Senior Program Manager, Nevada Field Office, National Parks Conservation Association.

**Instructions:** Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public viewing on [www.regulations.gov](http://www.regulations.gov) without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous).

Electronic copies of Amendments 7/33, which includes an environmental assessment, a Regulatory Flexibility Act analysis, and a regulatory impact review, may be obtained from the Southeast Regional Office Web site at [http://sero.nmfs.noaa.gov/sustainable\\_fisheries/s\\_atl/generic/2015/dw7\\_sg33/index.html](http://sero.nmfs.noaa.gov/sustainable_fisheries/s_atl/generic/2015/dw7_sg33/index.html).

**FOR FURTHER INFORMATION CONTACT:**

Nikhil Mehta, Southeast Regional Office, telephone: 727-824-5305, or email: [nikhil.mehta@noaa.gov](mailto:nikhil.mehta@noaa.gov).

**SUPPLEMENTARY INFORMATION:**

The dolphin and wahoo fishery is managed under the Dolphin and Wahoo FMP and the snapper-grouper fishery is managed under the Snapper-Grouper FMP. The FMPs were prepared by the Council and are implemented through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act). The Magnuson-Stevens Act also requires that NMFS, upon receiving a plan or amendment, publish an announcement in the **Federal Register** notifying the public that the plan or amendment is available for review and comment.

**Background**

Current Federal regulations require that dolphin or wahoo or snapper-grouper species harvested in or from the U.S. EEZ must be maintained with the heads and fins intact and not be in fillet form. However, as implemented through Amendment 8 to the Snapper-Grouper FMP, an exception applies to snapper-grouper species that are lawfully harvested in Bahamian waters and are onboard a vessel returning to the U.S. through the EEZ (63 FR 38298, July 16, 1998). Amendment 8 to the Snapper-Grouper FMP allows that in the South Atlantic EEZ, snapper-grouper lawfully harvested in Bahamian waters are exempt from the requirement that they

be maintained with head and fins intact, provided valid Bahamian fishing and cruising permits are on board the vessel and the vessel is in transit through the South Atlantic EEZ. A vessel is in transit through the South Atlantic EEZ when it is on a direct and continuous course through the South Atlantic EEZ and no one aboard the vessel fishes in the EEZ.

The Bahamas does not allow for the commercial harvest of dolphin, wahoo, or snapper-grouper species by U.S. vessels in Bahamian waters. Therefore, the measures proposed in Amendments 7/33 only apply to the recreational harvest of these species in The Bahamas and on a vessel returning from Bahamian water to the U.S. EEZ.

**Actions Contained in Amendments 7/33**

Amendments 7/33 would revise the landing fish intact provisions for vessels that lawfully harvest dolphin, wahoo, and snapper-grouper in Bahamian waters and return to the U.S. EEZ. Amendments 7/33 would allow for dolphin and wahoo fillets to enter the U.S. EEZ after lawful harvest in Bahamian waters; specify the condition of any dolphin, wahoo, and snapper-grouper fillets; describe how the recreational bag limit would be determined for any fillets; explicitly prohibit the sale or purchase of any dolphin, wahoo, or snapper-grouper recreationally harvested in Bahamian waters; specify the required documentation to be onboard any vessels that have these fillets, and specify transit and stowage provisions for any vessels with these fillets.

*Landing Fish Intact*

Currently, all dolphin and wahoo in or from the Atlantic EEZ are required to be maintained with head and fins intact. These fish may be eviscerated, gilled, and scaled, but must otherwise be maintained in a whole condition. Amendments 7/33 would allow for dolphin and wahoo lawfully harvested in Bahamian waters to be exempt from this provision when returning to the Atlantic EEZ. Dolphin or wahoo lawfully harvested in or from Bahamian waters would be able to be stored on ice more effectively for transit through the U.S. EEZ in fillet form, given the coolers generally used on recreational vessels. Allowing fishers on these vessels to be exempt from the landing fish intact regulations would increase the social and economic benefits for recreational fishers returning to the U.S. EEZ from Bahamian waters. This proposed exemption would also allow for increased consistency between the dolphin and wahoo and snapper-

grouper regulations. This proposed action would not be expected to substantially increase recreational fishing pressure or otherwise change recreational fishing behavior, because these species would not be exempt from U.S. recreational bag limits, fishing seasons, size limits, or other management measures in place in the U.S. EEZ, including prohibited species (e.g., goliath grouper and Nassau grouper). Therefore, the Council and NMFS anticipate that there are likely to be neither positive nor negative additional biological effects to these species.

Snapper-grouper possessed in the South Atlantic EEZ are currently exempt from the landing fish intact requirement if the vessel lawfully harvests snapper-grouper in The Bahamas. This action would retain this exemption for snapper-grouper species and revise it to include additional requirements.

*Condition of Fillets*

To better allow for identification of the species of any fillets in the U.S. EEZ, Amendments 7/33 would require that the skin be left intact on the entire fillet of any dolphin, wahoo, or snapper-grouper carcass (fillet) transported from Bahamian waters through the U.S. EEZ. This requirement will assist law enforcement in identifying fillets to determine whether they are only of the species to be exempted by Amendments 7/33.

*Recreational Bag Limits*

Currently, all dolphin, wahoo, and snapper-grouper harvested or possessed in or from the EEZ must adhere to the U.S. bag and possession limits. Amendments 7/33 would not revise those bag and possession limits, but would specify how fillets are counted with respect to determining the number of fish onboard a vessel in transit from Bahamian waters through the U.S. EEZ and ensuring compliance with U.S. bag and possession limits. Amendments 7/33 would specify that for any dolphin, wahoo, or snapper-grouper species lawfully harvested in Bahamian waters and onboard a vessel in the U.S. EEZ in fillet form, two fillets of the respective species of fish, regardless of the length of each fillet, is equivalent to one fish. This measure is intended to assist law enforcement by helping ensure compliance with the relevant U.S. bag and possession limits.

*Sale and Purchase Restrictions of Recreationally Harvested Dolphin, Wahoo or Snapper-Grouper*

Amendments 7/33 would explicitly prohibit the sale or purchase of any dolphin, wahoo, and snapper-grouper recreationally harvested in The Bahamas and transported through the U.S. EEZ. The Council determined that establishing a specific prohibition to the sale or purchase of any of these species from The Bahamas was necessary to ensure consistency with the current Federal regulations that prohibit recreational bag limit sales of these species. The Council wanted to ensure that Amendments 7/33 and the accompanying rulemaking do not create an opportunity for these fish to be sold or purchased.

*Required Documentation*

Amendments 7/33 would revise the documentation requirements for snapper-grouper species and implement documentation requirements for dolphin and wahoo lawfully harvested in Bahamian waters and in transit through the U.S. EEZ. For snapper-grouper lawfully harvested under the exemption, the current requirement is that valid Bahamian fishing and cruising permits are on the vessel. Amendments 7/33 would retain the current requirement that valid Bahamian fishing and cruising permits are onboard and additionally require that all vessel passengers have stamped and dated government passports. These documentation requirements would apply to individuals onboard a vessel in transit through the U.S. EEZ from Bahamian waters with dolphin, wahoo, or snapper-grouper fillets. Requiring vessel passengers to have a valid government passport with current stamps and dates from The Bahamas will increase the likelihood that the vessel was lawfully fishing in The Bahamas and that any dolphin, wahoo, or snapper-grouper fillets on the vessel were harvested in Bahamian waters and not in the U.S. EEZ.

*Transit and Stowage Provisions*

Snapper-grouper vessels operating under the current exemption have specific transit requirements when in the South Atlantic EEZ as described in § 622.186(b). These vessels are required to be in transit when they enter the South Atlantic EEZ with Bahamian snapper-grouper onboard. A vessel is in transit through the South Atlantic EEZ when it is on “a direct and continuous course through the South Atlantic EEZ and no one aboard the vessel fishes in the EEZ.” Amendments 7/33 would

revise the snapper-grouper transit provisions, also apply the transit provisions to vessels operating under the proposed exemption for dolphin and wahoo, and require fishing gear to be appropriately stowed on vessels transiting through the U.S. EEZ with fillets of these species. The proposed definition for “fishing gear appropriately stowed” would mean that “terminal gear (*i.e.*, hook, leader, sinker, flasher, or bait) used with an automatic reel, bandit gear, buoy gear, handline, or rod and reel must be disconnected and stowed separately from such fishing gear. Sinkers must be disconnected from the down rigger and stowed separately.” The Council determined that specifying criteria for transit and fishing gear stowage for vessels returning from The Bahamas under the exemption would assist in the enforceability of the proposed regulations and increase consistency with the state of Florida’s gear stowage regulations.

A proposed rule that would implement measures outlined in Amendments 7/33 has been drafted. In accordance with the Magnuson-Stevens Act, NMFS is evaluating Amendment 7/33 and the proposed rule to determine whether it is consistent with the FMP, the Magnuson-Stevens Act, and other applicable law. If the determination is affirmative, NMFS will publish the proposed rule in the **Federal Register** for public review and comment.

**Consideration of Public Comments**

The Council submitted Amendments 7/33 for Secretarial review, approval, and implementation on May 1, 2015.

Comments received on or before November 16, 2015, will be considered by NMFS in the approval, partial approval, or disapproval decision regarding Amendments 7/33. Comments received after that date will not be considered by NMFS in this decision. All relevant comments received by NMFS on the amendment or the proposed rule during their respective comment periods will be addressed in the final rule.

**Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; Greater Amberjack Management Measures**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Proposed rule; request for comments.

**SUMMARY:** NMFS proposes to implement management measures described in a framework action to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP), as prepared by the Gulf of Mexico Fishery Management Council (Council). If implemented, this action would revise the commercial and recreational annual catch limits (ACLs) and annual catch targets (ACTs), the commercial trip limit, and the recreational minimum size limit for greater amberjack in the Gulf of Mexico (Gulf) exclusive economic zone. Additionally, this rule would correct an error in the Gulf gray triggerfish recreational accountability measures (AMs). The purpose of this rule is to modify Gulf greater amberjack management measures to end overfishing and achieve optimal yield for the greater amberjack resource.

**DATES:** Written comments must be received on or before October 19, 2015.

**ADDRESSES:** You may submit comments on the proposed rule, identified by “NOAA-NMFS-2015-0094” by any of the following methods:

- **Electronic Submission:** Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to [www.regulations.gov/#/docketDetail;D=NOAA-NMFS-2015-0094](http://www.regulations.gov/#/docketDetail;D=NOAA-NMFS-2015-0094), click the “Comment Now!” icon, complete the required fields, and enter or attach your comments.

- **Mail:** Submit written comments to Richard Malinowski, Southeast Regional Office, NMFS, 263 13th Avenue South, St. Petersburg, FL 33701.

**Instructions:** Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and will generally be posted for public

viewing on [www.regulations.gov](http://www.regulations.gov) without change. All personal identifying information (e.g., name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender will be publicly accessible. NMFS will accept anonymous comments (enter "N/A" in the required fields if you wish to remain anonymous).

Electronic copies of the framework action, which includes an environmental assessment, a regulatory impact review, and a Regulatory Flexibility Act (RFA) analysis may be obtained from the Southeast Regional Office Web site at [http://sero.nmfs.noaa.gov/sustainable\\_fisheries/gulf\\_fisheries/reef\\_fish/2015/greater\\_amberjack\\_framework/index.html](http://sero.nmfs.noaa.gov/sustainable_fisheries/gulf_fisheries/reef_fish/2015/greater_amberjack_framework/index.html).

**FOR FURTHER INFORMATION CONTACT:** Richard Malinowski, Southeast Regional Office, NMFS, telephone: 727-824-5305, email: [rich.malinowski@noaa.gov](mailto:rich.malinowski@noaa.gov).

**SUPPLEMENTARY INFORMATION:** The Gulf reef fish fishery is managed under the FMP. The FMP was prepared by the Council and is implemented through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

### Background

The Magnuson-Stevens Act requires NMFS and regional fishery management councils to achieve on a continuing basis the optimum yield from federally managed fish stocks. This mandate is intended to ensure that fishery resources are managed for the greatest overall benefit to the nation, particularly with respect to providing food production and recreational opportunities, while also protecting marine ecosystems.

The greater amberjack resource in the Gulf was declared overfished by NMFS on February 9, 2001. Secretarial Amendment 2 established a greater amberjack rebuilding plan that started in 2003 and was scheduled to rebuild the stock in 2012 (68 FR 39898, July 3, 2003). In 2006, a Southeast Data, Assessment and Review (SEDAR) benchmark stock assessment (SEDAR 9) occurred and was subsequently updated in 2010 (SEDAR 9 Update). In response to new scientific information from SEDAR 9 and the SEDAR 9 Update, the rebuilding plan was revised in both Amendments 30A and 35 to the FMP (73 FR 38139, July 3, 2008, and 77 FR 67574, December 13, 2012). However, the rebuilding time period ended in 2012, without the stock being rebuilt.

A 2014 stock assessment indicates the Gulf greater amberjack stock remains overfished and is undergoing overfishing. The Council's Scientific and Statistical Committee (SSC) reviewed this assessment at their June 2014 meeting and used the acceptable biological catch (ABC) control rule to recommend an ABC equivalent to 75 percent of the maximum fishing mortality threshold to end overfishing and rebuild the stock. The ABCs recommended by the Council's SSC in this framework action are: 1,720,000 lb (780,179 kg) for 2015; 2,230,000 lb (1,011,511 kg) for 2016; 2,490,000 lb (1,129,445 kg) for 2017; and 2,620,000 lb (1,188,412 kg) for 2018.

In August 2014, pursuant to section 304(e)(2) of the Magnuson-Stevens Act, NMFS notified the Council of the 2014 stock assessment results that indicated that the greater amberjack stock continued to be overfished and undergoing overfishing. Following that notification, the Council was required under section 304(e)(3) of the Magnuson-Stevens Act to prepare a plan amendment or regulations within 2 years to end overfishing immediately and rebuild the greater amberjack stock.

For this framework action, the Council chose to reduce the current stock ACL of 1,780,000 lb (807,394 kg) to the SSC's ABC recommendation for 2015 of 1,720,000 lb (780,179 kg). Furthermore, the Council decided to maintain the 2015 catch levels through 2018, which results in an ABC and stock ACL that will be 49 percent of the 2018 overfishing limit (OFL), and is expected to rebuild the stock by 2019. The Council also considered an alternative in the framework action that would have set the stock ACL at zero. However, this alternative, which is projected to rebuild the stock by 2017, would have the greatest negative socio-economic impacts on fishing communities for relatively little biological benefit.

Although the Council did not explicitly discuss its obligations under section 304(e)(3) of the Magnuson-Stevens Act, the framework action and this proposed rule fulfill the Council's responsibility to "prepare and implement a fishery management plan, plan amendment, or proposed regulations for the fishery" under that provision. Consistent with the requirements of sections 304(e)(3) and (4), the framework action and proposed rule are projected to end overfishing immediately and rebuild the stock in as short as time possible, taking into account the needs of fishing communities. The specified time for rebuilding is 4 years, well below the

maximum time of 10 years specified in section 304(4)(A)(ii) of the Magnuson-Stevens Act, and the harvest restrictions are fairly and equitably allocated between the commercial and recreational sectors by virtue of the established ACL allocation, the increased recreational size limit, and the decreased commercial trip limit.

### Management Measures Contained in This Proposed Rule

This rule would revise the commercial and recreational ACLs and ACTs (which are expressed as quotas in the regulatory text), the commercial trip limit, and the recreational minimum size limit for greater amberjack in the Gulf.

#### *Commercial and Recreational ACLs and ACTs*

This rule would revise the commercial and recreational ACLs and ACTs for Gulf greater amberjack. All ACL and ACT weights are described in round weight. The final rule for Amendment 35 to the FMP set the current commercial ACL at 481,000 lb (218,178 kg) and the current commercial ACT at 409,000 lb (185,519 kg). That final rule also set the current recreational ACL at 1,299,000 lb (589,216 kg) and the current recreational ACT at 1,130,000 lb (512,559 kg).

This proposed rule would reduce the commercial and recreational ACLs and ACTs. The current sector allocation of 27 percent for the commercial sector and 73 percent for the recreational sector would not change through this framework action. The commercial ACL would be set at 464,400 lb (210,648 kg) and the commercial ACT would be set at 394,740 lb (179,051 kg). The recreational ACL would be set at 1,255,600 lb (569,531 kg) and the recreational ACT would be set at 1,092,372 lb (495,492 kg).

#### *Commercial Trip Limit*

The current greater amberjack commercial trip limit was established in Amendment 35 to the FMP at 2,000 lb (907 kg), round weight, in an effort to reduce harvest rates, prevent commercial ACL overages, and provide a longer fishing season for the commercial sector (77 FR 67574, November 13, 2012). However, in 2013, the commercial ACL and ACT were still exceeded by approximately 12 percent, triggering the commercial AMs and closing the commercial sector in season. This rule would reduce the commercial trip limit to 1,500 lb (680 kg), gutted weight; 1,560 lb (708 kg), round weight. The Council determined that the proposed trip limit would further

reduce the likelihood of exceeding the commercial ACL and ACT and could extend the length of the commercial fishing season.

#### *Recreational Size Limit*

This rule would revise the greater amberjack recreational minimum size limit. In 2008, Amendment 30A to the FMP set the greater amberjack recreational minimum size limit at 30 inches (76 cm), fork length (FL), (73 FR 38139, July 3, 2008).

A greater amberjack with a 30-inch (76-cm), FL, is approximately 2 years old and the majority of the fish at that size have likely not yet reached sexual maturity. At the proposed recreational minimum size limit of 34 inches (86.4 cm), FL, it is estimated that 85 percent of females are reproductively mature. Additionally, based upon a review of greater amberjack recreational landings from 2012 through 2013, 34 inches (86.4 cm), FL, was the most frequently landed size of greater amberjack. The Council determined that increasing the recreational minimum size limit from 30 inches (76 cm), FL, to 34 inches (86.4 cm), FL, would provide an opportunity for a greater number of sexually mature greater amberjack to spawn, which could assist in Council efforts to end overfishing and rebuild the stock.

#### **Other Actions Contained in the Framework Action**

In addition to the measures being proposed in this rule, the framework action would revise the greater amberjack ABC and OFL based upon the results of SEDAR 33 and the Council's SSC recommendation. All ABC and OFL weights are described in round weight. The current greater amberjack ABC is 1,780,000 lb (807,394 kg) and the current OFL is 2,380,000 lb (1,079,550 kg), which were established in Amendment 35 to the FMP (77 FR 67574, November 13, 2012). This framework action would revise the ABC and OFL for 4 years, beginning in 2015. The ABC, which is equal to the stock ACL would be set at 1,720,000 lb (780,179 kg). The OFL would be set at 2,660,000 lb (1,206,556 kg) for 2015; 3,210,000 lb (1,456,032 kg) for 2016; 3,420,000 lb (1,551,286 kg) for 2017; and 3,510,000 lb (1,592,109 kg) for 2018, and subsequent years.

The framework action also contained an action to modify the greater amberjack recreational closed season. However, the Council decided not to revise the recreational season at this time. Therefore, the current recreational closed season of June 1 through July 31 remains in effect.

#### **Additional Proposed Changes to Codified Text**

Amendment 30A to the FMP implemented ACLs and AMs for Gulf gray triggerfish (73 FR 38139, July 3, 2008). The recreational AM was a post-season AM that reduced the length of the following recreational fishing season by the amount necessary to ensure recreational landings did not exceed the recreational ACT the following fishing year. To determine a reduced season, recreational landings were evaluated relative to the recreational ACL based on a moving multi-year average of landings. In Amendment 37 to the FMP, this post-season AM was replaced with an in-season AM (which is based on a single season of landings data), so the recreational sector closes when the recreational ACT is reached or projected to be reached (78 FR 27084, May 9, 2013). However, during the implementation of Amendment 37, the last sentence in § 622.41(b)(2)(iii), which states that "Recreational landings will be evaluated relative to the ACL based on a moving multi-year average of landings, as described in the FMP," was not removed. NMFS has only recently noticed this error. This rule corrects this error by removing this sentence. The recreational ACL and ACT for gray triggerfish implemented in Amendment 37 to the FMP remain unchanged.

#### **Classification**

Pursuant to section 304(b)(1)(A) of the Magnuson-Stevens Act, the Assistant Administrator has determined that this proposed rule is consistent with the framework action, the FMP, the Magnuson-Stevens Act, and other applicable law, subject to further consideration after public comment.

This proposed rule has been determined to be not significant for purposes of Executive Order 12866.

NMFS prepared an IRFA for this rule, as required by section 603 of the RFA, 5 U.S.C. 603. The IRFA describes the economic impact that this proposed rule, if implemented, would have on small entities. A description of the proposed rule, why it is being considered, and the objectives of, and legal basis for this proposed rule are contained at the beginning of this section in the preamble and in the **SUMMARY** section of the preamble. A copy of the full analysis is available from the NMFS (see **ADDRESSES**). A summary of the IRFA follows.

The Magnuson-Stevens Act provides the statutory basis for this rule. No duplicative, overlapping, or conflicting Federal rules have been identified. In addition, no new reporting, record-

keeping, or other compliance requirements are introduced by this proposed rule. Accordingly, this rule does not implicate the Paperwork Reduction Act.

This proposed rule, if implemented, would be expected to directly affect all commercial vessels that harvest Gulf greater amberjack under the FMP. Changes to recreational ACLs, ACTs, and/or minimum size limits in this proposed rule would not directly apply to or regulate charter vessel and headboat (for-hire) businesses. Any impact to the profitability or competitiveness of for-hire fishing businesses would be the result of changes in for-hire angler demand and would therefore be indirect in nature. The RFA does not consider recreational anglers, who would be directly affected by this proposed rule, to be small entities, so they are outside the scope of this analysis and only the effects on commercial vessels were analyzed.

As of March 25, 2015, there were 863 vessels with valid or renewable Gulf reef fish commercial vessel permits. On average (2009 through 2013), 211 vessels commercially landed greater amberjack each year from Gulf Federal waters. Their average annual vessel-level revenue for 2009 through 2013 was approximately \$130,000 (2013 dollars), of which \$2,400 was from greater amberjack.

No other small entities that would be directly affected by this proposed rule have been identified.

The Small Business Administration (SBA) has established size criteria for all major industry sectors in the U.S., including commercial finfish harvesters (NAICS code 114111). A business primarily involved in finfish harvesting is classified as a small business if it is independently owned and operated, is not dominant in its field of operation (including its affiliates), and has combined annual receipts not in excess of \$20.5 million for all its affiliated operations worldwide. All of the vessels directly regulated by this rule are believed to be small entities based on the SBA size criteria.

Because all entities expected to be affected by this proposed rule are small entities, NMFS has determined that this proposed rule would affect a substantial number of small entities. Moreover, the issue of disproportionate effects on small versus large entities does not arise in the present case.

This proposed rule would reduce the current greater amberjack commercial ACT by 14,260 lb (6,468 kg), round weight, from 409,000 lb (185,519 kg) to 394,740 lb (179,051 kg), round weight, or 3.5 percent. Additionally, this

proposed rule would reduce the greater amberjack commercial trip limit from 2,000 lb (907 kg), round weight, to 1,560 lb (708 kg), round weight; 1,500 lb (680 kg), gutted weight. On its own, the reduction in the commercial ACT would be expected to result in a shorter fishing season and fewer commercial trips that harvest greater amberjack. Conversely, the reduced commercial trip limit would be expected to increase the commercial fishing season length and the overall number of trips necessary to harvest the full commercial ACT. When the actions to reduce the commercial ACT and the trip limit are analyzed together, the expected recurring annual reduction in total ex-vessel revenue from this proposed rule is estimated to be \$20,703 (2013 dollars), assuming there is no substitution of other species and no change in effort, harvest rates, or prices. In addition, the season is predicted to be 5 days longer under the preferred commercial ACT and trip limit alternatives than under the no action alternatives for these actions. Assuming the reduction in greater amberjack revenues is distributed evenly across the average number of vessels that commercially harvest greater amberjack per year (211 vessels), the annual per-vessel loss would be \$98 (2013 dollars), or less than 1 percent of the average annual revenue earned by these vessels for all species harvested. Because this estimate is based on average performance, some vessels may be affected more or less than others, depending on their overall catch composition, landing capacity, and fishing behavior.

Thirty vessels, on average per year (2009 through 2013), were identified that commercially landed greater amberjack in excess of 1,500 lb (680 kg), gutted weight, on a single trip (14 percent of the average number of vessels that harvested greater amberjack each year). In 2013, the total weight of greater amberjack harvested in excess of 1,500 lb (680 kg), gutted weight, per trip accounted for approximately 10 percent of total greater amberjack landings. Thus, for the 211 vessels that commercially harvest greater amberjack, the proposed reduction in the commercial trip limit, assuming effort remains constant, would be expected to reduce total commercial greater amberjack harvests by approximately 39,000 lb (17,690 kg), round weight, and \$46,800 (2013 dollars) in total ex-vessel revenue annually. Averaged across the 30 vessels per year with trip harvests above 1,500 lb (680 kg), gutted weight, this reduction would equal approximately \$1,560 (2013 dollars) per

vessel, or approximately 1 percent of their average annual revenue. These losses would be reduced if increased landings of other species can be substituted for greater amberjack landings or if new trips harvesting greater amberjack were to occur. It is assumed that the full commercial ACT would be harvested under the preferred trip limit alternative. Therefore, if the trip limit change implemented by this proposed rule results in a decrease in greater amberjack landings and revenues for some vessels, it would result in an increase in greater amberjack landings and revenues for other vessels.

The following discussion analyzes the alternatives that were not selected as preferred by the Council. Only the actions which contain alternatives that would have direct economic effects on small entities merit inclusion in the following discussion.

Four alternatives were considered for the action to modify the commercial and recreational ACLs and ACTs for Gulf greater amberjack. The first alternative, the no action alternative, would not be expected to have any direct economic effects. This alternative was not selected because the stock ACL would exceed the ABC calculated by the most recent greater amberjack assessment and recommended by the SSC and would, therefore, be inconsistent with the NS 1 guidelines. The second alternative would set the stock ACL from 2015 through 2018 equal to the ABC values recommended by the SSC. This alternative included two sub-options. The first sub-option would use the Council's ACL/ACT control rule as established in the Generic ACL/AM Amendment (76 FR 82044, December 29, 2011), which would set the commercial ACT at a level reduced by 15 percent from the commercial ACL for greater amberjack and set the recreational ACT at a level reduced by 13 percent from the recreational ACL. The second sub-option would not use the ACL/ACT control rule and instead would apply a 20-percent buffer that would reduce both the recreational and commercial ACLs by 20 percent to establish the recreational and commercial ACTs. This alternative would increase the stock ACL each year from 2015 through 2018, which would be expected to result in greater economic benefits than the preferred alternative in the framework action. However, this alternative was not selected as preferred by the Council as a result of the following factors: the stock remains overfished and is undergoing overfishing, the 10-year rebuilding plan time period ended and the stock has not been rebuilt, and the

stock biomass has been relatively stable (at overfished levels) since 2000, while experiencing harvest levels below what is currently projected to rebuild the stock in upcoming years. The third alternative is the preferred alternative, which would set a constant stock ACL equal to the 2015 ABC value recommended by the SSC. The same two sub-options for setting the ACT that were considered for the second alternative were also considered for the third alternative. The first sub-option, selected as preferred by the Council, would apply a 15-percent buffer to the commercial ACL to set the commercial ACT and apply a 13-percent buffer to the recreational ACL to set the recreational ACT. The second sub-option would not use the ACL/ACT control rule and instead would apply a 20-percent buffer that would reduce both the recreational and commercial ACLs by 20 percent to establish the recreational and commercial ACTs. The fourth alternative would set the stock ACL and stock ACT at zero. The fourth alternative would stop all directed harvest of greater amberjack and would be expected to result in greater economic losses than the preferred ACL/ACT alternative.

Five alternatives were considered for the action to modify the greater amberjack commercial trip limit. The first alternative, the no action alternative, would maintain the current 2,000 lb (907 kg), round weight, trip limit and would not be expected to have any direct economic effects. The second alternative is the preferred alternative, which would establish a 1,500 lb (680 kg), gutted weight, trip limit for greater amberjack. The third, fourth, and fifth alternatives would have established 1,000 lb (454 kg), 750 lb (340 kg), and 500 lb (227 lb), gutted weight trip limits, respectively. Although these three alternatives would be expected to extend the season, they would increase the likelihood that trips are no longer profitable and decrease the likelihood that the full commercial ACT would be harvested during the fishing year. As such, these three alternatives would be expected to result in greater economic losses to affected small entities than the preferred trip limit alternative.

An item contained in this proposed rule that is not part of the framework action is the removal of the last sentence in § 622.41(b)(2)(iii), "Recreational landings will be evaluated relative to the ACL based on a moving multi-year average of landings, as described in the FMP." This sentence, which pertains to the evaluation of recreational landings of gray triggerfish relative to the ACL, was inadvertently not removed in the

final rule implementing Amendment 37 to the FMP (78 FR 27084, May 9, 2013). The removal of this sentence will clarify the criteria used to trigger recreational AMs as written in the Federal regulations; however, it is not expected to have any effect on current management practices. This is because NMFS has managed gray triggerfish in accordance with the preferred alternatives specified in Amendment 37 since its implementation. Therefore, this is an administrative change only and is not expected to have any direct economic effects on small entities. As such, this component of the proposed rule is outside the scope of the RFA.

**List of Subjects in 50 CFR Part 622**

Commercial, Fisheries, Fishing, Greater amberjack, Gulf, Recreational, Reef fish.

Dated: September 11, 2015.

**Samuel D. Rauch III,**

*Deputy Assistant Administrator for Regulatory Programs, National Marine Fisheries Service.*

For the reasons set out in the preamble, 50 CFR part 622 is proposed to be amended as follows:

**PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC**

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

■ 2. In § 622.37, revise paragraph (c)(4) to read as follows:

**§ 622.37 Size Limits.**

\* \* \* \* \*

(c) \* \* \*

(4) *Greater amberjack*—34 inches (86.4 cm), fork length, for a fish taken by a person subject to the bag limit specified in § 622.38(b)(1) and 36 inches (91.4 cm), fork length, for a fish taken by a person not subject to the bag limit.

\* \* \* \* \*

■ 3. In § 622.39, revise paragraphs (a)(1)(v) and (a)(2)(ii) to read as follows:

**§ 622.39 Quotas.**

\* \* \* \* \*

(a) \* \* \*

(1) \* \* \*

(v) *Greater amberjack*—394,740 lb (179,051 kg), round weight.

\* \* \* \* \*

(2) \* \* \*

(ii) *Recreational quota for greater amberjack*. The recreational quota for greater amberjack is 1,092,372 lb (495,492 kg), round weight.

\* \* \* \* \*

■ 4. In § 622.41, revise paragraphs (a)(1)(iii), (a)(2)(iii), and (b)(2)(iii) to read as follows:

**§ 622.41 Annual catch limits (ACLs), annual catch targets (ACTs), and accountability measures (AMs).**

(a) \* \* \*

(1) \* \* \*

(iii) The commercial ACL for greater amberjack is 464,400 lb (210,648 kg), round weight.

(2) \* \* \*

(iii) The recreational ACL for greater amberjack is 1,255,600 lb (569,531 kg), round weight.

(b) \* \* \*

(2) \* \* \*

(iii) The recreational ACL for gray triggerfish is 241,200 lb (109,406 kg), round weight. The recreational ACT for gray triggerfish is 217,100 lb (98,475 kg), round weight.

\* \* \* \* \*

■ 5. In § 622.43, revise paragraph (a) to read as follows:

**§ 622.43 Commercial trip limits.**

\* \* \* \* \*

(a) *Gulf greater amberjack*. Until the quota specified in § 622.39(a)(1)(v) is reached, 1,500 lb (680 kg), gutted weight; 1,560 lb (708 kg), round weight. See § 622.39(b) for the limitations regarding greater amberjack after the quota is reached.

Federal Register

Vol. 80, No. 180

Thursday, September 17, 2015

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

## AGENCY FOR INTERNATIONAL DEVELOPMENT

### Meeting: Board for International Food and Agricultural Development

Pursuant to the Federal Advisory Committee Act, notice is hereby given of the public meeting of the Board for International Food and Agricultural Development (BIFAD). The meeting will be held from 8:30 a.m. to 4 p.m. EDT on Wednesday, October 21, 2015 in the South Ballroom of the Memorial Union at Purdue University, 101 N Grant St, West Lafayette, Indiana. The meeting will be streamed live on the Internet. The link to the global live stream is on BIFAD's home page: <http://www.usaid.gov/bifad>.

The central theme of this public meeting will be *Crossroads: Science, Innovation, Markets, and Policy for Feeding the World*. Dr. Brady Deaton, BIFAD Chair, will preside over the public business meeting, which will begin promptly at 8:30 a.m. EDT with opening remarks. At this meeting, the Board will address old and new business and hear updates from USAID, the university community, and other experts on climate-smart agriculture, plant sciences and the role of various constituents in feeding the world's population.

Starting at 9 a.m., Dr. Waded Cruzado, BIFAD Board Member will present the BIFAD Award for Scientific Excellence which recognizes individual researchers and/or a team of researchers for significant achievements in work performed through USAID's Feed the Future Innovation Labs.

Starting at 9:30 a.m., BIFAD will hear from the first panel hosted by Dr. Jeffrey Dukes, Director of the Purdue Climate Change Research Center and Professor of Forestry & Natural Resources and Biological Sciences. Dr. Thomas Hertel, Distinguished Professor of Agriculture will moderate the panel titled *Climate-Smart Agriculture—Closing the Yield*

*Gap in a Changing Climate*. Presenters for this panel are Dr. Mitch Tuinstra, Professor of Plant Breeding and Genetics and Wickersham Chair; Dr. Linda Prokopy, Associate Professor, Natural Resource Science; and an additional panelist to be determined. The panel will conclude with a 15 minute comment period.

Starting at 11:15 a.m., Dr. Karen Plaut, Senior Associate Dean for Research and Faculty Affairs, will moderate a panel on *Plant Sciences Research and Education Pipeline*. Presenters for this panel are Dr. Melba Crawford, Associate Dean of Engineering for Research; Dr. Katy Rainey, Assistant Professor of Agronomy; and Dr. Jian Kang Zhu, Distinguished Professor of Plant Biology. This panel will conclude with a 15 minute comment period.

Starting at 2:15 p.m., Dr. Jay Akridge, Glen W. Sample Dean of Agriculture, will moderate a panel on *US Ag Industry's Role in Feeding the World*. Presenters for this panel are Ted McKinney, Director of the Indiana State Department of Agriculture; and Jim Moseley, a local farmer.

At 3:30 p.m., Chairman Deaton will moderate a half-hour public comment period. At 4 p.m. EDT Dr. Deaton, will make closing remarks and adjourn the public meeting. At 4 p.m., after the meeting has been adjourned, BIFAD and members of the public are invited to view the Purdue University poster display.

Those wishing to attend the meeting or obtain additional information about BIFAD should contact Susan Owens, Executive Director and Designated Federal Officer for BIFAD in the Bureau for Food Security at USAID. Interested persons may write to her in care of the U.S. Agency for International Development, Ronald Reagan Building, Bureau for Food Security, 1300 Pennsylvania Avenue NW., Room 2.09-067, Washington, DC, 20523-2110 or telephone her at (202) 712-0218.

#### Susan Owens,

*Executive Director and USAID Designated Federal Officer for BIFAD, Bureau for Food Security, U.S. Agency for International Development.*

**BILLING CODE P**

## DEPARTMENT OF AGRICULTURE

### Animal and Plant Health Inspection Service

[Docket No. APHIS-2015-0047]

#### Oral Rabies Vaccine Trial; Availability of a Supplement to an Environmental Assessment and Finding of No Significant Impact

**AGENCY:** Animal and Plant Health Inspection Service, USDA.

**ACTION:** Notice.

**SUMMARY:** We are advising the public that the Animal and Plant Health Inspection Service has prepared a supplement to an environmental assessment and finding of no significant impact relative to an oral rabies vaccination field trial in New Hampshire, New York, Ohio, Vermont, and West Virginia. Based on its finding of no significant impact, the Animal and Plant Health Inspection Service has determined that an environmental impact statement need not be prepared.

**FOR FURTHER INFORMATION CONTACT:** Mr. Richard Chipman, Rabies Program Coordinator, Wildlife Services, APHIS, 59 Chennell Drive, Suite 7, Concord, NH 03301; (603) 223-9623. To obtain copies of the supplement to the environmental assessment and the finding of no significant impact, contact Ms. Beth Kabert, Environmental Coordinator, Wildlife Services, 140-C Locust Grove Road, Pittstown, NJ 08867; (908) 735-5654, fax (908) 735-0821, email: [beth.e.kabert@aphis.usda.gov](mailto:beth.e.kabert@aphis.usda.gov).

**SUPPLEMENTARY INFORMATION:** The Wildlife Services (WS) program in the Animal and Plant Health Inspection Service (APHIS) cooperates with Federal agencies, State and local governments, and private individuals to research and implement the best methods of managing conflicts between wildlife and human health and safety, agriculture, property, and natural resources. Wildlife-borne diseases that can affect domestic animals and humans are among the types of conflicts that APHIS-WS addresses. Wildlife is the dominant reservoir of rabies in the United States.

On July 17, 2015, we published in the **Federal Register** (80 FR 42467-42469, Docket No. APHIS-2015-0047) a

notice<sup>1</sup> in which we announced the availability, for public review and comment, of a supplement to an environmental assessment (EA) that examined the potential environmental impacts associated with the proposed field trial to test the safety and efficacy of an experimental oral rabies vaccine for wildlife in New Hampshire, New York, Ohio, Vermont, and West Virginia. In addition, the supplement analyzed the geographic shift of the field trial zone in Ohio and an increase in bait distribution density in portions of West Virginia.

We solicited comments on the EA for 30 days ending August 17, 2015. We received one comment by that date, which supported the oral rabies vaccination program.

In this document, we are advising the public of our finding of no significant impact (FONSI) regarding the implementation of a field trial to test the safety and efficacy of the ONRAB wildlife rabies vaccine in New Hampshire, New York, Ohio, Vermont, and West Virginia, including portions of U.S. Department of Agriculture Forest Service National Forest System lands, but excluding Wilderness Areas. The finding, which is based on the EA, the 2013 supplement to the EA, and the 2015 supplement to the EA, reflects our determination that the distribution of this experimental wildlife rabies vaccine will not have a significant impact on the quality of the human environment.

The 2015 supplement to the EA and the FONSI may be viewed on the APHIS Web site at <http://www.aphis.usda.gov/wildlifedamage/nepa> and on the Regulations.gov Web site (see footnote 1). Copies of the 2015 supplement to the EA and the FONSI are also available for public inspection at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect copies are requested to call ahead on (202) 799-7039 to facilitate entry into the reading room. In addition, copies may be obtained as described under **FOR FURTHER INFORMATION CONTACT**.

The 2015 supplement to the EA and the FONSI have been prepared in accordance with: (1) The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321 *et seq.*); (2) regulations of the Council on Environmental Quality for

implementing the procedural provisions of NEPA (40 CFR parts 1500-1508); (3) USDA regulations implementing NEPA (7 CFR part 1b); and (4) APHIS' NEPA Implementing Procedures (7 CFR part 372).

Done in Washington, DC, this 14th day of September 2015.

**Kevin Shea,**

*Administrator, Animal and Plant Health Inspection Service.*

## DEPARTMENT OF AGRICULTURE

### Forest Service

#### National Advisory Committee for Implementation of the National Forest System Land Management Planning Rule

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of meetings.

**SUMMARY:** The National Advisory Committee for Implementation of the National Forest System Land Management Planning Rule Committee (Committee) will meet in Tempe, Arizona. Attendees may also participate via webinar and conference call. The Committee operates in compliance with the Federal Advisory Committee Act (FACA) (Pub. L. 92-463). Additional information relating to the Committee, including the meeting summary/minutes, can be found by visiting the Committee's Web site at: <http://www.fs.usda.gov/main/planningrule/committee>.

**DATES:** The meetings will be held in-person and via webinar/conference call on the following dates and times:

- Monday, October 5, 2015 from 9:00 a.m. to 5:00 p.m. MST
- Tuesday, October 6, 2015 from 9:00 a.m. to 5:00 p.m. MST
- Wednesday, October 7, 2015 from 9:00 a.m. to 5:00 p.m. MST
- Thursday, October 8, 2015 from 9:00 a.m. to 2:00 p.m. MST.

All meetings are subject to cancellation. For updated status of meetings prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

**ADDRESSES:** The meeting will be held at the Sheraton Phoenix Airport Hotel Tempe, 1600 S. 52nd Street, Tempe, Arizona. For anyone who would like to attend via webinar and/or conference call, please visit the Web site listed above or contact the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. Written comments may be submitted as described under

**SUPPLEMENTARY INFORMATION.** All comments, including names and addresses, when provided, are placed in the record and available for public inspection and copying. The public may inspect comments received at the USDA Forest Service Washington Office—Yates Building, 201 14th Street SW., Mail Stop 1104, Washington, DC, 20250-1104. Please call ahead to facilitate entry into the building.

#### **FOR FURTHER INFORMATION CONTACT:**

Chalonda Jasper, Committee Coordinator, by phone at 202-260-9400, or by email at [cjasper@fs.fed.us](mailto:cjasper@fs.fed.us).

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

**SUPPLEMENTARY INFORMATION:** The purpose of this meeting is to provide:

1. Continued deliberations on formulating advice for the Secretary,
2. Discussion of Committee work group findings,
3. Dialogue with key Forest Service personnel and stakeholders from Region 3, the Southwestern Region, regarding the land management plan revision processes currently underway in the region,
4. Hearing public comments, and
5. Administrative tasks.

This meeting is open to the public. The agenda will include time for people to make oral comments of three minutes or less. Individuals wishing to make an oral comment should submit a request in writing by September 30, 2015, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the Committee may file written statements with the Committee's staff before or after the meeting. Written comments and time requests for oral comments must be sent to Chalonda Jasper, USDA Forest Service, Ecosystem Management Coordination, 201 14th Street SW., Mail Stop 1104, Washington, DC, 20250-1104, or by email at [cjasper@fs.fed.us](mailto:cjasper@fs.fed.us). The agenda and summary of the meeting will be posted on the Committee's Web site within 21 days of the meeting.

**Meeting Accommodations:** If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices or other reasonable accommodation for access to the facility or proceedings by contacting the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

<sup>1</sup> To view the notice, the EA, and the FONSI, go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2015-0047>.

Dated: September 10, 2015.

### Forest Service

#### Pacific Northwest National Scenic Trail Advisory Council

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of meeting.

**SUMMARY:** The Pacific Northwest National Scenic Trail Advisory Council (Council) will meet in Sandpoint, Idaho. The Council is authorized under Section 5(d) of the National Trails System Act of 1968 (Act) and operates in compliance with the Federal Advisory Committee Act (FACA). Additional information concerning the Council, including the meeting summary/minutes, can be found by visiting the Council's Web site at: <http://www.fs.usda.gov/main/pnt/working-together/advisory-committees>.

**DATES:** The meeting will be held on the following dates and times:

- Wednesday, October 14, 2015 from 8 a.m. to 5 p.m. PDT
- Thursday, October 15, 2015 from 8 a.m. to 5 p.m. PDT

All meetings are subject to cancellation. For updated status of meeting prior to attendance, please contact the person listed under **FOR FURTHER INFORMATION CONTACT**.

**ADDRESSES:** The meeting will be held at the Best Western Edgewater Resort, 56 Bridge Street, Sandpoint, Idaho. Written comments may be submitted as described under **SUPPLEMENTARY INFORMATION**. All comments, including names and addresses, when provided, are placed in the record and available for public inspection and copying. The public may inspect comments received at the Pacific Northwest Regional Office of the United States Forest Service: 1220 SW 3rd Avenue, Portland, OR 97204. Please call ahead at 503-808-2468 to facilitate entry into the building.

**FOR FURTHER INFORMATION CONTACT:** Matt McGrath, Pacific Northwest National Scenic Trail Program Manager, by phone at 425-583-9304, or by email at [mtmcgrath@fs.fed.us](mailto:mtmcgrath@fs.fed.us).

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8 a.m. and 8 p.m., Eastern Standard Time, Monday through Friday.

**SUPPLEMENTARY INFORMATION:** The purpose of the meeting is to provide:

1. Overview of legislation, policy, and interagency planning requirements for National Scenic Trails;
2. Discussion of planning approach, process, and schedule for the Pacific Northwest National Scenic Trail comprehensive plan; and
3. Recommendations regarding the work, priorities, and schedule for the Advisory Council.

The meeting is open to the public. The agenda will include time for people to make oral statements of three minutes or less. Individuals wishing to make an oral statement should submit a request in writing by October 2, 2015, to be scheduled on the agenda. Anyone who would like to bring related matters to the attention of the Council may file written statements with the Council's staff before or after the meeting. Written comments and time requests for oral comments must be sent to Matt McGrath, Pacific Northwest National Scenic Trail Program Manager, 2930 Wetmore Avenue, Suite 3A, Everett, Washington 98201, or by email to [mtmcgrath@fs.fed.us](mailto:mtmcgrath@fs.fed.us).

**Meeting Accommodations:** If you are a person requiring reasonable accommodation, please make requests in advance for sign language interpreting, assistive listening devices or other reasonable accommodation for access to the facility or proceedings by contacting the person listed in the section titled **FOR FURTHER INFORMATION CONTACT**. All reasonable accommodation requests are managed on a case by case basis.

Dated: September 10, 2015.

### Rural Utilities Service

#### Energy Answers Arecibo, LLC: Extension of Comment Period for a Draft Environmental Impact Statement

**AGENCY:** Rural Utilities Service, USDA.

**ACTION:** Extension of comment period for a Draft Environmental Impact Statement.

**SUMMARY:** The Rural Utilities Service (RUS), an agency within the U.S. Department of Agriculture (USDA), has issued a Draft Environmental Impact Statement (EIS) for Energy Answers Arecibo, LLC's (Energy Answers) proposed Waste to Energy Project

(Project) in Arecibo, Puerto Rico. RUS published a notice of availability and public hearing on August 7, 2015, that provided a comment period ending on the date announced in the U.S. Environmental Protection Agency's (USEPA) EIS receipt notice of September 28, 2015. RUS is extending the public comment period for the Draft EIS by an additional 45 days to November 12, 2015.

**DATES:** With this notice, RUS extends the public comment period to November 12, 2015. Comments submitted to RUS regarding the Draft EIS prior to this announcement do not need to be resubmitted as a result of this extension to the comment period.

**ADDRESSES:** Written comments on the Draft EIS and questions about the proposed project may be submitted to: Ms. Lauren McGee Rayburn at the contact information provided in this notice. The Draft EIS is available in both Spanish and English at the following Web site: <http://www.rd.usda.gov/publications/environmental-studies/impact-statements/arecibo-waste-energy-generation-and-resource>. Requests for CD or hardcopies may be directed to Ms. McGee Rayburn, Environmental Scientist, Rural Utilities Service, 84 Coxe Ave., Suite 1E, Ashville, North Carolina 28801, *telephone:* (202) 695-2540, *fax:* (202) 690-0649, or *email:* [Lauren.McGee@wdc.usda.gov](mailto:Lauren.McGee@wdc.usda.gov).

**FOR FURTHER INFORMATION CONTACT:** Ms. Lauren McGee Rayburn, Environmental Scientist, Rural Utilities Service, 84 Coxe Ave., Suite 1E, Ashville, North Carolina 28801, *telephone:* (202) 695-2540, *fax:* (202) 690-0649, or *email:* [Lauren.McGee@wdc.usda.gov](mailto:Lauren.McGee@wdc.usda.gov).

**SUPPLEMENTARY INFORMATION:** RUS has issued a Draft EIS for Energy Answers' proposed Waste to Energy Project (Project) in Arecibo, Puerto Rico. RUS issued the Draft EIS to inform interested parties and the general public about the proposed Project and to invite the public to comment on the scope, proposed action, and other issues addressed in the Draft EIS. The Draft EIS addresses the construction, operation, and maintenance of Energy Answers' proposed Project, a waste-to-energy generation and resource recovery facility in the Cambalache Ward of Arecibo, Puerto Rico. RUS prepared the EIS in accordance with the National Environmental Policy Act (NEPA), as amended, the Council on Environmental Quality's Regulation for Implementing the Procedural Provisions of the NEPA (40 CFR parts 1500-1508), and RUS's Environmental Policies and Procedures (7 CFR part 1794). RUS published a

notice of availability and public hearing in the **Federal Register** at 80 FR 47452 on August 7, 2015, that provided a comment period ending on the date announced in the U.S. Environmental Protection Agency's (USEPA) EIS receipt notice or September 28, 2015. RUS is extending the public comment period for the Draft EIS to November 12, 2015.

The Draft EIS is available in both Spanish and English for review at the following Web site: <http://www.rd.usda.gov/publications/environmental-studies/impact-statements/arecibo-waste-energy-generation-and-resource>. The Draft EIS will be available for review and comment until November 12, 2015. Following this review period, RUS may prepare a Final EIS. After a 30-day review period of the Final EIS, RUS may publish a Record of Decision (ROD). Notices announcing the availability of the Final EIS and ROD will be published in the **Federal Register** and in local newspapers.

Any final action by RUS related to the proposed Project will be subject to, and contingent upon, compliance with all relevant presidential executive orders and federal, state, and local environmental laws and regulations in addition to the completion of the environmental review requirements as prescribed in RUS's Environmental Policies and Procedures, 7 CFR part 1794, as amended.

Dated: September 10, 2015.

## DEPARTMENT OF COMMERCE

[Docket No. 150817729-5729-01]

### Privacy Act of 1974; Amended System of Records

**AGENCY:** National Oceanic and Atmospheric Administration, U.S. Department of Commerce.

**ACTION:** Notice of Proposed Amendment to Privacy Act System of Records: COMMERCE/NOAA-14, Dr. Nancy Foster Scholarship Program.

**SUMMARY:** In accordance with the Privacy Act of 1974, as amended, 5 U.S.C. 552a(e)(4) and (11), the Department of Commerce proposes to amend the system of records entitled "COMMERCE/NOAA-14, Dr. Nancy Foster Scholarship Program" to update the routine uses to include (1) disclosure for breach notifications, (2) disclosure to the appropriate agency (whether Federal, state, local, or foreign) for law enforcement purposes, (3) disclosure to the medical advisor if disclosure to the individual could have an adverse effect upon the individual, (4) disclosure pursuant to an Office of Management and Budget (OMB) request in connection to private relief legislation as set forth in OMB Circular No. A-19, and (5) disclosure to a contractor of the Department having need for the information in performance of the contract; and to change the system name to "Dr. Nancy Foster Scholarship Program; Office of Education, Educational Partnership Program (EPP); Ernest F. Hollings Undergraduate Scholarship Program and National Marine Fisheries Service Recruitment, Training, and Research Program." We invite public comment on the amended information collection announced in this publication.

**DATES:** To be considered, written comments must be submitted on or before October 19, 2015. Unless comments are received, the new system of records will become effective as proposed on the date of publication of a subsequent notice in the **Federal Register**.

**ADDRESSES:** Comments may be mailed to:

Program Administrator, Dr. Nancy Foster Scholarship Program, National Ocean Service, Office of the Assistant Administrator, 1305 East-West Highway, 13th Floor, Silver Spring, MD 20910-3281.

Deputy Director of NOAA Education, Educational Partnership Program and Ernest F. Hollings Undergraduate Scholarship Program, Office of Education, 1315 East-West Highway,

10th Floor, Silver Spring, MD 20910-3281.

Administrative Assistant, Mendy Willis, National Marine Fisheries Service Recruitment, Training, Research Program at the University of Florida, P.O. Box 110240, Gainesville, FL 32611.

**FOR FURTHER INFORMATION CONTACT:** Program Administrator, Dr. Nancy Foster Scholarship Program, National Ocean Service, Office of the Assistant Administrator, 1305 East-West Highway, 13th Floor, Silver Spring, MD 20910-3281.

Deputy Director of NOAA Education, Educational Partnership Program and Ernest F. Hollings Undergraduate Scholarship Program, Office of Education, 1315 East-West Highway, 10th Floor, Silver Spring, MD 20910-3281.

Administrative Assistant, Mendy Willis, National Marine Fisheries Service Recruitment, Training, Research Program at the University of Florida, P.O. Box 110240, Gainesville, FL 32611.

**SUPPLEMENTARY INFORMATION:** The purpose of this amendment is to add information on the Ernest F. Hollings Undergraduate Scholarship Program; Educational Partnership Program's (EPP)—Undergraduate Scholarship Program, Graduate Sciences Program, Cooperative Science Centers, and Environmental Entrepreneurship Program and the (NMFS)—Recruiting, Training, and Research Program alumni form to this information collection. Recently, the Dr. Nancy Foster Scholarship Program's alumni form, and this NMFS alumni form became part of the EPP's information collection under the Paperwork Reduction Act (PRA) approved under OMB Control No. 0648-0568. Because these information collections are associated under the PRA, to the information collected should be maintained in the same system of records.

Additionally, the purpose of this amendment is to update the routine uses for this system of records as follows: (a) Add routine uses that were not included in the original notice, published in the **Federal Register** on the October 17, 2002 (67 FR 64085-64086); and (b) add the breach notification routine use, published in the **Federal Register** on August 10, 2007 (72 FR 45009-45010), for all Department systems of records.

**Authority:** National Marine Sanctuaries Amendments Act of 2000 (Pub. L. 106-513 sec. 318); Section 4002 of the America Creating Opportunities to Meaningfully Promote Excellence in Technology, Education, and Science (COMPETES) Act (Public Law 110-69). Under Appendix I to OMB Circular No. A-130, para. 3a(8), we are

required to conduct biennial reviews of SORNs and update them as needed.

##### SYSTEM LOCATION:

a. The National Ocean Service, Office of the Assistant Administrator, 1305 East-West Highway, 13th Floor, Silver Spring, MD 20910-3281.

b. NOAA Office of the Chief Information Officer, 1315 East-West Highway, 9th Floor, Silver Spring, MD 20910-3281.

c. The National Marine Fisheries Service Recruitment, Training, and Research Program at the University of Florida, P.O. Box 110240, Gainesville, FL 32611 (database only, not associated with a system).

##### CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Scholarship applicants; recipients of scholarship awards; and alumni, who are scholarship recipients that have completed their studies under the Dr. Nancy Foster or EPP scholarship programs.

##### CATEGORIES OF RECORDS IN THE SYSTEM:

Application packages, including: General Information Sheet (name, citizenship, current school, grade point average, major field of study, year of study, current and permanent address, telephone number, and email address, extracurricular activities, school honors and awards, non-academic work and volunteer activities, essay on college education plan and career goals), Statement of Intent, Institute Certification, Transcripts, and Letters of Recommendation; Annual Progress Reports; Tuition Statements and Receipts.

Student tracking information: Name, citizenship, funding, area of study, performance, activities, publications.

Alumni information: Scholarship program name; general information (last name, first name, email address, program completion dates, last name if different from last name while in program, graduation date, optional—gender, race/ethnicity); post educational information (institution name,

institution state, degree field of study and area of discipline); current employment information (occupation, field of work, area of work and industry sector).

##### AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

National Marine Sanctuaries Amendments Act of 2000 (Pub. L. 106-513 sec. 318). The Administrator of the National Oceanic and Atmospheric Administration (NOAA) is authorized by Section 4002 of the America Creating Opportunities to Meaningfully Promote Excellence in Technology, Education, and Science (COMPETES) Act, Public Law 110-69, to establish and administer education programs such as the Educational Partnership Program (EPP) Graduate Sciences Program and EPP Undergraduate Scholarship Program to enhance the understanding of ocean, coastal, Great Lakes, and atmospheric science and stewardship to the general public and other coastal stakeholders, including groups underrepresented in the ocean and atmospheric sciences and in policy careers.

##### PURPOSES:

Records will be used to track scholarship recipients' academic progress, to make annual financial awards, and to track scholarship recipients' graduate studies and career progress.

##### ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

1. In the event that a system or records maintained by the Department to carry out its functions indicates a violation or potential violation of law or contract, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute or contract, or rule, regulation, or order issued pursuant thereto, or the necessity to protect an interest of the Department, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether Federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute or contract, or rule, regulation or order issued pursuant thereto, or protecting the interest of the Department.

2. A record from this system of records may be disclosed to a Federal, state or local agency maintaining civil, criminal or other relevant enforcement information, or other pertinent information, such as current licenses, if necessary to obtain information relevant

to a Department decision concerning the assignment, hiring or retention of an individual, the issuance of a security clearance, the letting of a contract, or the issuance of a license, grant, or other benefit.

3. A record from this system of records may be disclosed to a Federal, state, local, or international agency, in response to its request, in connection with the assignment, hiring, or retention of an individual, the issuance of a security clearance, the reporting of an investigation of an individual, the letting of a contract, or the issuance of a license, grant, or other benefit by the requesting agency, to the extent that the information is relevant and necessary to the requesting agency's decision on the matter.

4. A record from this system of records may be disclosed in the course of presenting evidence to a court, magistrate, or administrative tribunal, including disclosures to opposing counsel in the course of settlement negotiations.

5. A record in this system of records may be disclosed to a Member of Congress submitting a request involving an individual when the individual has requested assistance from the Member with respect to the subject matter of the record.

6. A record in this system of records which contains medical information may be disclosed, as a routine use, to the medical advisor of any individual submitting a request for access to the record under the Act and 15 CFR part 4b if, in the sole judgment of the Department, disclosure to the individual could have an adverse effect upon the individual, under the provision of 5 U.S.C. 552a(f)(3) and implementing regulations at 15 CFR 4b.6.

7. A record in this system of records may be disclosed to the Department of Justice in connection with determining whether disclosure thereof is required by the Freedom of Information Act (5 U.S.C. 552).

8. A record in this system may be transferred to the Office of Personnel Management or to the National Science Foundation, National Center for Science and Engineering Statistics (NCSES) or to an evaluation contractor for personnel research purposes, as a data source for management information; for the production of summary descriptive statistics and analytical studies in support of the function for which the records are collected and maintained; or for related manpower studies.

9. A record from this system of records may be disclosed to the Administrator, General Services Administration (GSA), or his designee,

during an inspection of records conducted by GSA as part of that agency's responsibility to recommend improvements in records management practices and programs, under authority of 44 U.S.C. 2904 and 2906. Such disclosure shall be made in accordance with the GSA regulations governing inspection of records for this purpose and any other relevant (*i.e.* GSA or Commerce) directive. Such disclosure shall not be used to make determinations about individuals.

10. A record in this system of records may be disclosed, as a routine use, to the Office of Management and Budget in connection with the review of private relief legislation as set forth in OMB Circular No. A-19 at any stage of the legislative coordination and clearance process as set forth in that Circular.

11. A record in this system of records may be disclosed, as a routine use, to a contractor of the Department having need for the information in the performance of the contract, but not operating a system of records within the meaning of 5 U.S.C. 552a(m).

12. A record in this system of records may be disclosed to appropriate agencies, entities and persons when (1) it is suspected or determined that the security or confidentiality of information in the system of records has been compromised; (2) the Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or whether systems or programs (whether maintained by the Department or another agency or entity) that rely upon the compromised information; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Department's efforts to respond to the suspected or confirmed compromise and to prevent, minimize, or remedy such harm.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

Not applicable.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Electronic databases, with restricted access, and hard copy files, kept in a locked cabinet.

**RETRIEVABILITY:**

Scholarship recipient files will be alphabetized by recipient's last name, and the student databases can be searched by last name.

**SAFEGUARDS:**

Buildings employ security systems. Records are maintained in areas accessible only to authorized personnel who are properly screened and cleared.

**RETENTION AND DISPOSAL:**

Records retention and disposal is in accordance with the agency's records disposition schedule, the NOAA Records Schedule Chapter: [http://www.corporateservices.noaa.gov/audit/records\\_management/schedules/chapter\\_400\\_finance.pdf](http://www.corporateservices.noaa.gov/audit/records_management/schedules/chapter_400_finance.pdf)

**SYSTEM MANAGER(S) AND ADDRESS:**

For records at location a.: Program Administrator, Dr. Nancy Foster Scholarship Program, National Ocean Service, Office of the Assistant Administrator, 1305 East-West Highway, 13th Floor, Silver Spring, MD 20910-3281.

For records at location b.: Deputy Director of NOAA Education, Educational Partnership Program and Ernest F. Hollings Undergraduate Scholarship Program, Office of Education, 1315 East-West Highway, 10th Floor, Silver Spring, MD, 20910-3281.

For records at location c.: Administrative Assistant, Mendy Willis, National Marine Fisheries Service Recruitment, Training, Research Program at the University of Florida, P.O. Box 110240, Gainesville, FL 32611.

**NOTIFICATION PROCEDURE:**

Information may be obtained from: For records at location a.: Program Administrator, Dr. Nancy Foster Scholarship Program, National Ocean Service, Office of the Assistant Administrator, 1305 East-West Highway, 13th Floor, Silver Spring, MD 20910-3281.

For records at location b.: Deputy Director of NOAA Education, Educational Partnership Program and Ernest F. Hollings Undergraduate Scholarship Program, Office of Education, 1315 East-West Highway, 10th Floor, Silver Spring, MD 20910-3281.

For records at location c.: Administrative Assistant, Mendy Willis, National Marine Fisheries Service Recruitment, Training, Research Program at the University of Florida, P.O. Box 110240, Gainesville, FL 32611.

**RECORD ACCESS PROCEDURES:**

Requests from individuals should be addressed to:

For records at location a.: Program Administrator, Dr. Nancy Foster Scholarship Program, National Ocean Service, Office of the Assistant

Administrator, 1305 East-West Highway, 13th Floor, Silver Spring, MD 20910-3281.

For records at location b.: Deputy Director of NOAA Education, Educational Partnership Program and Ernest F. Hollings Undergraduate Scholarship Program, Office of Education, 1315 East-West Highway, 10th Floor, Silver Spring, MD 20910-3281.

For records at location c.: Administrative Assistant, Mendy Willis, National Marine Fisheries Service Recruitment, Training, Research Program at the University of Florida, P.O. Box 110240, Gainesville, FL 32611.

**CONTESTING RECORD PROCEDURES:**

The Department's rules for access, for contesting contents, and for appealing initial determination by the individual concerned appear in 15 CFR part 4. Use addresses in the RECORDS ACCESS PROCEDURES section above for desired locations.

**RECORD SOURCE CATEGORIES:**

Scholarship and grant applicants and recipients.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

None.

Dated: September 9, 2015.

[FR Doc. 2015-23133 Filed 9-16-15; 8:45 am]

**BILLING CODE 3510-22-P**

**DEPARTMENT OF COMMERCE**

[Docket No. 150806684-5684-01]

**Privacy Act of 1974, Altered System of Records**

**AGENCY:** U.S. Census Bureau, U.S. Department of Commerce.

**ACTION:** Notice of amendment, Privacy Act System of Records, COMMERCE/CENSUS-9, Longitudinal Employer-Household Dynamics System.

**SUMMARY:** In accordance with the Privacy Act of 1974, as amended, 5 U.S.C. 552A(e)(4) and (11); and Office of Management and Budget (OMB) Circular A-130, Appendix I, "Federal Agency Responsibilities for Maintaining Records About Individuals," the Department of Commerce is issuing this notice to amend the system of records under, COMMERCE/CENSUS-9, Longitudinal Employer-Household Dynamics System, to update the categories of records, the authorities for maintenance of the system, the routine uses, the system manager(s) and

address, and the policies and practices for storing, retaining, disposing, and safeguarding of the records, and to add three new sections to the system addressing the notification procedure, record access procedures, and contesting procedures. The purpose of Longitudinal Employer-Household Dynamics system of records is to enable the Census Bureau to undertake studies intended to improve the quality of its core demographic and economic censuses and surveys and to conduct policy-relevant research. By using administrative record data from other agencies, the Census Bureau will be able to improve the quality and usefulness of its data, while reducing costs and respondent burden. We invite public comment on the system amendment announced in this publication.

**DATES:** To be considered, written comments on the proposed amendments must be submitted on or before October 19, 2015. Unless comments are received, the amended system of records will become effective as proposed on the date of publication of a subsequent notice in the **Federal Register**.

**ADDRESSES:** Please address comments to: Byron Crenshaw, Privacy Compliance Branch, Room—8H021, U.S. Census Bureau, Washington, DC 20233–3700.

**FOR FURTHER INFORMATION CONTACT:** Chief, Privacy Compliance Branch, Room—8H021, U.S. Census Bureau, Washington, DC 20233–3700.

**SUPPLEMENTARY INFORMATION:** The Department of Commerce proposes to amend the system of records under, COMMERCE/CENSUS–9, Longitudinal Employer-Household Dynamics System. The purpose of Longitudinal Employer-Household Dynamics system of records is to enable the Census Bureau to undertake studies intended to improve the quality of its core demographic and economic censuses and surveys and to conduct policy-relevant research. By using administrative record data from other agencies, the Census Bureau will be able to improve the quality and usefulness of its data, while reducing costs and respondent burden.

This amendment makes the following seven changes to the information provided under the system. The first change updates the categories of records in the system to provide additional information and details surrounding the records including the use of administrative records. The second change updates the authorities for maintenance of the system by specifying which sections of Title 13 of the United States Code (U.S.C.) applies to this system of records. The third change

updates the routine uses of records maintained by the system of records to indicate that the records in this system of records are solely for statistically purposes. The fourth change clarifies the storage of records including those obtained from source datasets. The fifth change updates the system manager and address to reflect that the system of records is being maintained in another program area. The sixth change updates the policies and practices for storing, retaining, disposing, and safeguarding of the records. The last change adds three new sections that address the notification procedure, record access procedures, and contesting procedures, to this system; these section were not included in the last publication of this notice in the **Federal Register** on May 10, 2002 (67 FR 31766). The entire resulting system of records, as amended, appears below.

**COMMERCE/CENSUS–9  
SYSTEM NAME:**

COMMERCE/CENSUS–9,  
Longitudinal Employer-Household  
Dynamics System.

**SECURITY CLASSIFICATION:**

None.

**SYSTEM LOCATION:**

Bowie Computer Center, U.S. Census  
Bureau, 17101 Melford Boulevard,  
Bowie, MD 20715.

**CATEGORIES OF INDIVIDUALS COVERED BY THE  
SYSTEM:**

The population of the United States. In order to approximate coverage of the entire U.S. population, the U.S. Census Bureau (Census Bureau) will combine administrative record files from the Internal Revenue Service, the Social Security Administration, selected Census Bureau economic and demographic censuses and surveys, and comparable data from selected state agencies.

**CATEGORIES OF RECORDS IN THE SYSTEM:**

Records in this system of records consist of working statistical files (*i.e.*, those files being analyzed to produce survey results), survey data files (*i.e.*, those files containing answers directly from the respondent), and/or data contact files (*i.e.*, those files used for contacting respondents). Some records in this system of records may be obtained from datasets maintained by the COMMERCE/CENSUS–8, Statistical Administrative Records System where direct identifiers have been replaced with a unique nonidentifying code (called the Protected Identification Key (PIK)) prior to delivery to this system of records, and, therefore are not on the

working statistical files. These categories of records are maintained on unique data sets that are extracted or combined on an as needed basis using the unique non-identifying codes but with the original identifiers removed. Additionally, some records from this system of records may be obtained from the Internal Revenue Service, the Social Security Administration, selected Census Bureau economic and demographic censuses and surveys, and comparable data from selected state agencies. Records in this system of records may contain information such as: Demographic Information—*e.g.*, gender, race, ethnicity, education, marital status, tribal affiliation, veterans status; Geographic Information—*e.g.*, address; Economic Information—*e.g.*, income, job information, total assets; Business information—*e.g.*, business name, revenues, number of employees, and industry codes in support of economic statistical products; Respondent contact information—*e.g.*, name, address, telephone number, age, and sex in support of survey and census data collection efforts; and Processing Information—*e.g.*, processing codes and quality indicators. See the COMMERCE/CENSUS–8, Statistical Administrative Records System SORN for more information.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

13 U.S.C. 6 and 9.

**PURPOSES:**

The purpose of Longitudinal Employer-Household Dynamics system of records is to enable the Census Bureau to undertake studies intended to improve the quality of its core demographic and economic censuses and surveys and to conduct policy-relevant research. By using administrative record data from other agencies, the Census Bureau will be able to improve the quality and usefulness of its data, while reducing costs and respondent burden.

**ROUTINE USES OF RECORDS MAINTAINED IN THE  
SYSTEM, INCLUDING CATEGORIES OF USERS AND  
PURPOSES OF SUCH USES:**

A record in this system of records may be disclosed to appropriate agencies, entities and persons when: (1) It is suspected or determined that the security or confidentiality of information in the system of records has been compromised; (2) the Department has determined that as a result of the suspected or confirmed compromise there is a risk of harm to economic or property interests, identity theft or fraud, or harm to the security or integrity of this system or whether

systems or programs (whether maintained by the Department or another agency or entity) that rely upon the compromised information; and (3) the disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with the Department's efforts to respond to the suspected or confirmed compromise and to prevent, minimize, or remedy such harm.

**DISCLOSURE TO CONSUMER REPORTING AGENCIES:**

None.

**POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**

**STORAGE:**

Records will be stored in a secure computerized system and on magnetic tape; output data will be either electronic or paper copy. Paper copies or magnetic media will be stored in a secure area within a locked drawer or cabinet. Source data sets containing personal identifiers will be maintained in a secure restricted-access environment.

**RETRIEVABILITY:**

Records are maintained within a secure, restricted access environment where direct identifiers have been deleted and replaced by unique serial identification numbers (PIK). The records can be retrieved by the PIK by only a limited number of persons sworn to uphold the confidentiality of Census Bureau data and who have a need to know. The purpose of these identifiers is not to facilitate retrieval of information concerning specific individuals, but only to develop matched data sets for subsequent statistical extracts.

**SAFEGUARDS:**

The Census Bureau is committed to respecting respondent privacy and protecting confidentiality. Through the Data Stewardship Program, we have implemented management, operational, and technical controls and practices to ensure high-level data protection to respondents of our census and surveys. (1) The Census Bureau unauthorized browsing policy protects respondent information from casual or inappropriate use by any person with access to data protected by Title 13 of the United States Code (U.S.C.). (2) All employees permitted to access the system are subject to the restrictions, penalties, and prohibitions of 13 U.S.C. 9 and 214 as modified by 18 U.S.C. 3551, *et seq.*, the Privacy Act of 1974 (5 U.S.C. 552a(b)(4)); 26 U.S.C. 7213,

7213A, and 7431; and 42 U.S.C. 1306, as well as any additional restrictions imposed by statutory authority of a sponsor. (3) All Census Bureau employees and persons with special sworn status will be regularly advised of regulations issued pursuant to Title 13 U.S.C. governing the confidentiality of the data, and will be required to complete an annual Title 13 awareness program; and those who have access to Federal Tax Information data will be regularly advised of regulations issued pursuant to Title 26 U.S.C. governing the confidentiality of the data, and will be required to complete an annual Title 26 awareness program. (4) All computer systems that maintain sensitive information are in compliance with the Federal Information Security Management Act, which includes auditing and controls over access to restricted data. (5) The use of unsecured telecommunications to transmit individually identifiable information is prohibited. (6) Paper copies that contain sensitive information are stored in secure facilities in a locked drawer or file cabinet behind a locked door. (7) Additional data files containing direct identifiers will be maintained solely for the purpose of data collection activities, such as respondent contact and preloading an instrument for a continued interview, and will not be transferred to, or maintained on, working statistical files. (8) While the original data are housed at the Census Bureau they are afforded the same protections as data held confidential under 13 U.S.C. 9.

**RETENTION AND DISPOSAL:**

Records are retained in accordance with the General Records Schedule and Census Bureau's records control schedules that are approved by the National Archives and Records Administration. Records are retained in accordance with agreements developed with sponsoring agencies or source entity. Federal tax information administrative record data will be retained and disposed of in accordance with Publication 1075, *Tax Information Security Guidelines for Federal, State, and Local Agencies and Entities*. The Census Bureau issues an Annual Safeguard Activity Report that includes information on the retention and disposal of federal administrative record source data. Due to IRS regulation, Title 26 data cannot be transferred to the National Archive and Records Administration (NARA). Permanent data will be archived at the Census Bureau. Generally, records are retained for less than 10 years, unless a longer period required by the survey sponsor is

necessary for statistical purposes or for permanent archival retention.

**SYSTEM MANGER(S) AND ADDRESS:**

Associate Director for Research and Methodology, U.S. Census Bureau, 4600 Silver Hill Road, Washington, DC 20233.

**Custodian:**

Director, Longitudinal Employer-Household Dynamics Program, Center for Economic Studies, Research and Methodology Directorate, U.S. Census Bureau, 4600 Silver Hill Road, Washington, DC 20233.

**NOTIFICATION PROCEDURE:**

None.

**RECORD ACCESS PROCEDURES:**

None.

**CONTESTING RECORD PROCEDURES:**

None.

**RECORD SOURCE CATEGORIES:**

The Internal Revenue Service, the Social Security Administration, selected Census Bureau economic and demographic censuses and surveys, and comparable data from selected State Employment Security Agencies.

**EXEMPTIONS CLAIMED FOR THE SYSTEM:**

Pursuant to 5 U.S.C. 552 a(k)(4), this system of records is exempted from the notification, access, and contest requirements of the agency procedures (under 5 U.S.C. Section 552a(c)(3), (d), (e)(1), (e)(4)(G), (H), and (I), and (f)). This exemption is applicable as the data are maintained by the Census Bureau and required by Title 13 to be used solely as statistical records and are not used in whole or in part in making any determination about an identifiable individual or establishment. This exemption is made in accordance with the Department's rules, which appear in 15 CFR part 4 Subpart B, and in accordance with agency rules published in this **Federal Register** notice.

Dated: September 9, 2015.

**BILLING CODE 3510-07-P**

**DEPARTMENT OF COMMERCE****National Telecommunications and Information Administration****First Responder Network Authority****First Responder Network Authority Board Meetings**

**AGENCY:** First Responder Network Authority (FirstNet), Commerce.

**ACTION:** Notice of public meetings.

**SUMMARY:** The Board of the First Responder Network Authority (FirstNet) will convene an open public meeting on October 2, 2015, preceded by open public meetings of the Board Committees on October 1, 2015.

**DATES:** On October 1, 2015 between 8 a.m. and 4:30 p.m. Eastern Daylight Time, there will be two open public meetings of FirstNet's four Board Committees. The first meeting is a joint meeting of the Governance and Personnel and Finance Committee and will be held between 8–11:30 a.m. Eastern Daylight Time. The second meeting is a joint meeting of the Technology and Consultation Committee and will be held between 1–4:30 p.m. The full FirstNet Board will hold an open public meeting on October 2, 2015 between 8 a.m. and 11 a.m. Eastern Daylight Time.

**ADDRESSES:** The meetings on October 1 and October 2, 2015 will be held at John Wesley Powell Federal Building, 12201 Sunrise Valley Drive, M/S 243, Reston, VA 20192.

**FOR FURTHER INFORMATION CONTACT:** Uzoma Onyeije, Secretary, FirstNet, 12201 Sunrise Valley Drive, M/S 243, Reston, VA 20192; telephone: (703) 648–4165; email: [uzoma.onyeije@firstnet.gov](mailto:uzoma.onyeije@firstnet.gov). Please direct media inquiries to Ryan Oremland at (703) 648–4114.

**SUPPLEMENTARY INFORMATION:** This notice informs the public that the Board of FirstNet will convene an open public meeting on October 2, 2015, preceded by open public meetings of the Board Committees on October 1, 2015.

*Background:* The Middle Class Tax Relief and Job Creation Act of 2012 (Act), Public Law 112–96, 126 Stat. 156 (2012), established FirstNet as an independent authority within the National Telecommunications and Information Administration that is headed by a Board. The Act directs FirstNet to ensure the building, deployment, and operation of a nationwide, interoperable public safety broadband network. The FirstNet Board is responsible for making strategic decisions regarding FirstNet's

operations. The FirstNet Board held its first public meeting on September 25, 2012.

*Matters to be Considered:* FirstNet will post detailed agendas of each meeting on its Web site, <http://www.firstnet.gov>, prior to the meetings. The agenda topics are subject to change. Please note that the subjects that will be discussed by the Committees and the Board may involve commercial or financial information that is privileged or confidential, personnel matters, or other legal matters affecting FirstNet. As such, the Committee chairs and Board Chair may call for a vote to close the meetings only for the time necessary to preserve the confidentiality of such information, pursuant to 47 U.S.C. § 1424(e)(2).

*Times and Dates of Meetings:* On October 1, 2015 between 8 a.m. and 4:30 p.m. Eastern Daylight Time, there will be two open public meetings of FirstNet's four Board Committees. The first meeting is a joint meeting of the Governance and Personnel and Finance Committee and will be held between 8–11:30 a.m. Eastern Daylight Time. The second meeting is a joint meeting of the Technology and Consultation Committee and will be held between 1–4:30 p.m. The full FirstNet Board will hold an open public meeting on October 2, 2015 between 8 a.m. and 11 a.m. Eastern Daylight Time.

*Place:* The meetings on October 1 and October 2, 2015 will be held at John Wesley Powell Federal Building, 12201 Sunrise Valley Drive, M/S 243, Reston, VA 20192.

*Other Information:* These meetings are open to the public and press on a first-come, first-served basis. Space is limited. In order to get an accurate headcount, all expected attendees are asked to provide notice of intent to attend by sending an email to [BoardRSVP@firstnet.gov](mailto:BoardRSVP@firstnet.gov). If the number of RSVPs indicates that expected attendance has reached capacity, FirstNet will respond to all subsequent notices indicating that capacity has been reached and that in-person viewing may no longer be available but that the meeting may still be viewed by webcast as detailed below. For access to the meetings, valid government issued photo identification may be requested for security reasons.

The meetings are accessible to people with disabilities. Individuals requiring accommodations, such as sign language interpretation or other ancillary aids, are asked to notify Uzoma Onyeije, Secretary, FirstNet, at (703) 648–4165 or [uzoma.onyeije@firstnet.gov](mailto:uzoma.onyeije@firstnet.gov), at least five (5) business days before the applicable meeting(s).

The meetings will also be webcast. Please refer to FirstNet's Web site at [www.firstnet.gov](http://www.firstnet.gov) for webcast instructions and other information. Viewers experiencing any issues with the live webcast may email [support@sparkstreetdigital.com](mailto:support@sparkstreetdigital.com) or call 202.684.3361 x9 for support. A variety of automated troubleshooting tests are also available via the "Troubleshooting Tips" button on the webcast player. The meetings will also be available to interested parties by phone. To be connected to the meetings in listen-only mode by telephone, please dial 888–997–9859 and passcode 3572169.

*Records:* FirstNet maintains records of all Board proceedings. Minutes of the Board Meeting and the Committee meetings will be available at [www.firstnet.gov](http://www.firstnet.gov).

Dated: September 10, 2015.

**SUPPLEMENTARY INFORMATION:**

**Background**

On September 26, 2012, the Department initiated an administrative review of the antidumping duty order on CORE from Korea for the period August 1, 2011, through July 31, 2012.<sup>6</sup> On March 19, 2013, as a result of the International Trade Commission's determination in the third sunset review, the Department published a notice that the antidumping duty order on CORE from Korea would be revoked, but that it would complete any pending reviews of entries made prior to February 14, 2012, the effective date of revocation.<sup>7</sup> For the *Preliminary Results*, published on September 9, 2013, the Department shortened the POR for the ongoing administrative review to reflect the effective date of revocation of the

antidumping order.<sup>8</sup> In its preliminary dumping calculations, the Department truncated the sales databases to conform to the shortened POR. However, in conducting the sales below cost and cost recovery tests to determine the pool of home market sales available for the calculation of normal value, the Department used the cost of production database submitted by Dongbu covering the original August 1, 2011, through July 31, 2012, review period. For the *Final Results*, the Department continued to use Dongbu's weighted-average cost data for the full-year POR in its antidumping calculations.<sup>9</sup> The Department also used Dongbu's weighted-average dumping margin as the rate for non-examined respondent Union Steel, because it was the only rate that was not zero, *de minimis*, or based on total facts available.<sup>10</sup>

Before the Court, Dongbu and Union Steel challenged the Department's determination to use the 12-month cost of production data in both the cost recovery and sales below cost tests, arguing that the language of the cost recovery test in section 773(b)(2)(D) of the Tariff Act of 1930, as amended (the Act) requires that prices be measured for cost recovery against the weighted-average cost of production for the shortened POR, and that the Department accordingly should have requested new cost data for the revised POR and recalculated the weighted-average dumping margin.<sup>11</sup> Dongbu and Union Steel further argued that the Department's use of costs outside the POR in the sales below cost test was unlawful because the statute requires that the cost of production "reasonably reflect the costs associated with the production and sale of the merchandise, during the period of review."<sup>12</sup>

In its *Remand Order*, the Court held that the language of the statute "unambiguously prohibited the Department from using cost data for a period other than the POR to calculate the weighted average cost of production for purposes of the cost recovery test," and that "[n]othing in the statutory framework contradicts the cost recovery test's plain language regarding the POR."<sup>13</sup> The Court rejected the

Department's remaining arguments regarding the cost recovery test provision.<sup>14</sup>

In addition, the Court agreed that the Department has discretion to include costs outside of the POR in conducting the sales below cost test, but found the Department's explanation as to why it included post-review period cost data inadequate, and remanded to the Department to "explain its decision in this case that the costs incurred after the POR reasonably reflect the costs of the product under review."<sup>15</sup>

After reopening the record to obtain cost of production data reflecting the revised POR from Dongbu, issuing a draft remand redetermination, and soliciting comments, the Department issued the Final Remand Redetermination on July 24, 2015. In the Final Remand Redetermination, the Department modified its dumping calculations by comparing Dongbu's home market sales against cost data from the revised POR to determine whether such sales were made at prices that would provide for the recovery of costs.<sup>16</sup> The Department relied on this same cost data in administering the sales below cost test for Dongbu.<sup>17</sup> Finally, the Department assigned Dongbu's revised dumping margin to Union Steel.<sup>18</sup>

**Timken Notice**

In *Timken*, 893 F.2d at 341, as clarified by *Diamond Sawblades*, the CAFC held that, pursuant to section 516A(e) of the Act, the Department must publish a notice of a court decision that is not "in harmony" with a Department determination and must suspend liquidation of entries pending a "conclusive" court decision. The Court's judgment sustaining the Final Remand Redetermination constitutes a final decision of the Court that is not in harmony with the Department's *Final Results*. This notice is published in fulfillment of the publication requirement of *Timken*. Accordingly, the Department will continue the suspension of liquidation of the subject merchandise pending the expiration of the period of appeal or, if appealed, pending a final and conclusive court decision. In the event the Court's ruling is not appealed or, if appealed, upheld by the CAFC, the Department will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on unliquidated entries of subject

<sup>3</sup> See *Diamond Sawblades Mfrs. Coalition v. United States*, 626 F.3d 1374 (Fed. Cir. 2010) (*Diamond Sawblades*).

merchandise exported by the producers and/or exporters listed below at the rates listed below.

**Amended Final Results**

Because there is now a final court decision, the Department is amending the *Final Results* with respect to Dongbu and Union Steel, plaintiffs in this case. The revised weighted-average dumping margins for these producers/exporters during the period August 1, 2011, through February 14, 2012, are as follows:

WEIGHTED-AVERAGE DUMPING MARGINS	
Producer/Exporter	Weighted-average dumping margin (percent)
Dongbu .....	5.38
Union Steel .....	5.38

**Cash Deposit Requirements**

The Department notified CBP to discontinue the collection of cash deposits on entries of the subject merchandise, entered or withdrawn from warehouse, on or after February 14, 2012.<sup>19</sup> Therefore, no cash deposit requirements will be imposed in response to these amended final results.

This notice is issued and published in accordance with sections 516A(e)(1), 751(a)(1), and 777(i)(1) of the Act.

Dated: September 10, 2015.

**DEPARTMENT OF COMMERCE**

**National Institute of Standards and Technology**

**Proposed Information Collection; Comment Request; National Institute of Standards and Technology (NIST), Generic Clearance for Usability Data Collections**

**AGENCY:** National Institute of Standards and Technology (NIST), Commerce.

**ACTION:** Notice.

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information

collections, as required by the Paperwork Reduction Act of 1995.

**DATES:** Written comments must be submitted on or before November 16, 2015.

**ADDRESSES:** Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at [jjessup@doc.gov](mailto:jjessup@doc.gov)).

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or copies of the information collection instrument and instructions should be directed to Amy Egan, Management Analyst, NIST, 100 Bureau Drive, MS 1710, Gaithersburg, MD 20899-1710, telephone 301-975-2819, or via email to [amy.egan@nist.gov](mailto:amy.egan@nist.gov).

**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

This is a request to renew or extend the expiration date of this currently approved information collection.

In accordance with the Executive Order 12862, the National Institute of Standards and Technology (NIST), a non-regulatory agency of the Department of Commerce, proposes to conduct a number of data collection efforts—both quantitative and qualitative. The data collections will be designed to determine requirements and evaluate the usability and utility of NIST research for measurement and standardization work. These data collections efforts may include, but may not be limited to electronic methodologies, empirical studies, video and audio collections, interviews, and questionnaires. For example, data collection efforts may include the password generation study and the user perceptions of online privacy and security study. NIST will limit its inquiries to data collections that solicit strictly voluntary opinions or responses and will not collect information that is required or regulated. The results of the data collected will be used to guide NIST research. Steps will be taken to ensure anonymity of respondents in each activity covered under this request.

**II. Method of Collection**

NIST will collect this information by electronic means when possible, as well as by mail, fax, telephone and person-to-person interviews.

**III. Data**

*OMB Control Number:* 0693-0043.  
*Form Number:* None.

*Type of Review:* Regular submission (extension of a currently approved information collection.)

*Affected Public:* Individuals or households, State, local or tribal government, Federal government.

*Estimated Number of Respondents:* 8,500.

*Estimated Time per Response:* Varied, dependent upon the data collection method used. The possible response time to complete a questionnaire may be 15 minutes or 2 hours to participate in an empirical study.

*Estimated Total Annual Burden Hours:* 5,000.

*Estimated Total Annual Cost to Public:* \$0.

**IV. Request for Comments**

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: September 11, 2015.

**Proposed Information Collection; Comment Request; Vessel Monitoring System Requirements Under the Western and Central Pacific Fisheries Convention**

**AGENCY:** National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice.

**SUMMARY:** The Department of Commerce, as part of its continuing

<sup>19</sup> See *CORE Revocation*, 78 FR at 16833.

effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

**DATES:** Written comments must be submitted on or before November 16, 2015.

**ADDRESSES:** Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at [Jjessup@doc.gov](mailto:Jjessup@doc.gov)).

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or copies of the information collection instrument and instructions should be directed to Tom Graham, (808) 725-5032 or [Tom.Graham@noaa.gov](mailto:Tom.Graham@noaa.gov).

**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

This request is for an extension of a currently approved information collection. National Marine Fisheries Service (NMFS) has issued regulations under authority of the Western and Central Pacific Fisheries Convention Implementation Act (WCPFCIA; 16 U.S.C. 6901 *et seq.*) to carry out the obligations of the United States under the Convention on the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (Convention), including implementing the decisions of the Commission for the Conservation and Management of Highly Migratory Fish Stocks in the Western and Central Pacific Ocean (Commission). The regulations include a requirement for the owners and operators of U.S. vessels that fish for highly migratory species on the high seas in the Convention Area to carry and operate near real-time satellite-based position-fixing transmitters ("VMS units") at all times except when the vessel is in port. As part of this requirement, vessel owners and operators must transmit: (1) "on/off reports" to NMFS whenever the VMS unit is turned off while the vessel is in port, (2) "activation reports" to NMFS prior to the first use of a VMS unit, and (3) automatic "position reports" from the VMS unit to NOAA and the Commission as part of a vessel monitoring system (VMS) operated by the Commission (50 CFR 300.45). Under this information collection, it is expected that vessel owners and operators would also need to purchase, install, and occasionally maintain the VMS units.

The information collected from the vessel position reports is used by NOAA and the Commission to help ensure compliance with domestic laws and the Commission's conservation and management measures, and are necessary in order to the United States to satisfy its obligations under the Convention.

**II. Method of Collection**

Respondents may submit on/off reports by facsimile or email, and they may submit activation reports by mail, facsimile or email. Position reports are transmitted electronically and automatically from the VMS unit.

**III. Data**

*OMB Control Number:* 0648-0596.

*Form Number(s):* None.

*Type of Review:* Regular submission (extension of a currently approved collection).

*Affected Public:* Business or other for-profit organizations; individuals or households.

*Estimated Number of Respondents:* 78.

*Estimated Time per Response:* VMS unit purchase and installation, 1 hr; activation reports, 5 min; on/off reports, 5 min; VMS unit maintenance, 1 hr.

*Estimated Total Annual Burden Hours:* 192 hours.

*Estimated Total Annual Cost to Public:* \$78,000 in capital costs and \$58,111 in recordkeeping/reporting costs.

**IV. Request for Comments**

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: September 14, 2015.

**Pacific Island Fisheries; Public Meeting**

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice; public meeting.

**SUMMARY:** NMFS announces that the Center for Independent Experts will meet to review methods for reviewing modified integrated assessments (based on catch-MSY model) for data-poor stocks.

**DATES:** See **SUPPLEMENTARY INFORMATION** section for meeting dates and times.

**ADDRESSES:** The meeting will be held in the Pelagic Suite Conference Room, Western Pacific Fishery Management Council, 1164 Bishop St., Suite 1400, Honolulu, HI 96813.

**FOR FURTHER INFORMATION CONTACT:** Ben Richards, NMFS Pacific Islands Fisheries Science Center, (808) 725-5320 or [benjamin.richards@noaa.gov](mailto:benjamin.richards@noaa.gov).

**SUPPLEMENTARY INFORMATION:** The meeting schedule and agenda are as follows:

1. *Tuesday, October 13, 2015 (9:30 a.m.–5 p.m.)*

- Introduction
- Background information—Objectives and Terms of Reference
- Coral reef fisheries in the Pacific Islands Region
- Data: Fishery-dependent data collection systems in the Pacific Islands, Coral Reef Ecosystem Division surveys, biological data, other data
- Discussion

2. *Wednesday, October 14, 2015 (8:30 a.m.–4 p.m.)*

- Review of modified integrated Catch-MSY stock assessment
- Discussion

3. *Thursday, October 15, 2015 (8:30 a.m.–4 p.m.)*

- Continue assessment review (1/2 day)
- Discussion
- Panel discussions (Closed)

4. *Friday, October 16, 2015 (8:30 a.m.–4 p.m.)*

- Panel discussions (1/2 day)
- Present results (afternoon)
- Adjourn

The agenda order may change. The meetings will run as late as necessary to

complete scheduled business. Although non-emergency issues not contained in this agenda may come up at the meeting for discussion, those issues may not be the subject of formal action during the meeting. Action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the intent to take final action to address the emergency.

#### Special Accommodations

These meetings are physically accessible to people with disabilities. Direct requests for sign language interpretation or other auxiliary aids to Beth Lumsden, (808) 725-5330 or [beth.lumsden@noaa.gov](mailto:beth.lumsden@noaa.gov) at least 5 days prior to the meeting date.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### Proposed Information Collection; Comment Request; Mail Survey To Collect Economic Data From Federal Gulf of Mexico and South Atlantic For-Hire Permit Holders

**AGENCY:** National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice.

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

**DATES:** Written comments must be submitted on or before November 16, 2015.

**ADDRESSES:** Direct all written comments to Jennifer Jessup, Departmental Paperwork Clearance Officer, Department of Commerce, Room 6616, 14th and Constitution Avenue NW., Washington, DC 20230 (or via the Internet at [Jjessup@doc.gov](mailto:Jjessup@doc.gov)).

#### FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument and instructions should be directed to Christopher Liese, Industry Economist, SEFSC, NMFS, 75 Virginia Beach Drive, Miami FL 33149, (305) 365-4109 or [Christopher.Liese@noaa.gov](mailto:Christopher.Liese@noaa.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

This request is for a new information collection.

The National Oceanic and Atmospheric Administration's (NOAA) Fisheries, Southeast Fisheries Science Center, proposes to collect very basic socioeconomic data from federally-permitted for-hire operators in the Gulf of Mexico and South Atlantic fisheries, using a mail sample survey. The National Marine Fisheries Service (NMFS) does not systematically collect information on for-hire trip prices and trip costs in the Southeast. The population consists of those for-hire operators who possess a federal for-hire permit for dolphin-wahoo, coastal migratory pelagics, snapper-grouper, or reef fish species in the South Atlantic or Gulf of Mexico. Each year we will sample approximately a third of the population. The two-page survey will be designed to collect basic data on trip revenues and trip costs as well as other related information. These data are needed to conduct socioeconomic analyses in support of management of the for-hire fishing industry and to satisfy legal requirements. The data will be used to assess how fishermen will be impacted by and respond to federal regulation likely to be considered by fishery managers.

##### II. Method of Collection

The information will be collected on paper using a mail survey.

##### III. Data

*OMB Control Number:* 0648-xxxx.

*Form Number(s):* None.

*Type of Review:* Regular (request for a new information collection).

*Affected Public:* Business or other for-profit organizations; individuals or households.

*Estimated Number of Respondents:* 1000.

*Estimated Time per Response:* 12 minutes.

*Estimated Total Annual Burden Hours:* 200 hours.

*Estimated Total Annual Cost to Public:* \$0 in recordkeeping/reporting costs.

## IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: September 14, 2015.

## DEPARTMENT OF DEFENSE

### Department of the Navy

#### Record of Decision for the Final Supplemental Environmental Impact Statement for Guam and Commonwealth of the Northern Mariana Islands Military Relocation

**AGENCY:** Department of the Navy, DoD.

**ACTION:** Notice.

**SUMMARY:** The Department of the Navy (DON), after carefully considering the environmental consequences of the proposed action, as well as strategic, operational, and training requirements, obligations under treaties and other international agreements, and cost, announces its decision to construct and operate a main base (cantonment area), a family housing area, a live-fire training range complex (LFTRC), and associated infrastructure on Guam to support the relocation of a substantially reduced number of Marines and dependents than previously analyzed in a 2010 Final Environmental Impact Statement (EIS) (Guam and Commonwealth of the Northern Mariana Islands (CNMI) Military Relocation; Relocating Marines from Okinawa, Visiting Aircraft Carrier Berthing, and Army Air and Missile Defense Task Force).

The proposed action will be accomplished as set out in Alternatives

E and 5 as identified in the 2015 Final Supplemental Environmental Impact Statement (SEIS) as the preferred alternatives. Alternatives E and 5 consist of a cantonment at Naval Computer and Telecommunications Station Finegayan (Finegayan) and family housing at Andersen Air Force Base (AAFB), and a LFTRC at AAFB—Northwest Field (NWF). The LFTRC also includes a stand-alone hand grenade range at Andersen South. Under these selected alternatives, the DON will be able to meet current and future DON and Department of Defense (DoD) training and operational requirements.

The Record of Decision (ROD) documents why the DoD has chosen to implement the preferred alternatives as described in the 2015 Final SEIS. The ROD includes descriptions and discussions of the anticipated environmental impacts of the proposed action. It also includes descriptions and discussions of all related actions and their anticipated impacts.

**FOR FURTHER INFORMATION CONTACT:** Director, Joint Guam Program Office Forward, P.O. Box 153246, Santa Rita, Guam 96915.

**SUPPLEMENTARY INFORMATION:** The complete text of the ROD is available for public viewing at [www.guambuildupeis.us](http://www.guambuildupeis.us). Hard copies of the ROD will be available at the following locations: University of Guam Robert F. Kennedy Memorial Library, Government Documents Tan Siu Lin Building, UOG Station, Mangilao, GU 96923 and Nieves M. Flores Memorial Library, 254 Martyr Street, Hagåtña, GU 96910.

Dated: September 9, 2015.

## DEPARTMENT OF EDUCATION

[Docket No. ED–2015–ICCD–0076]

### Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; Borrower Defenses Against Loan Repayment

**AGENCY:** Federal Student Aid (FSA), Department of Education (ED).

**ACTION:** Notice.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is

proposing an extension of an existing information collection.

**DATES:** Interested persons are invited to submit comments on or before October 19, 2015.

**ADDRESSES:** To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED–2015–ICCD–0076. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E103, Washington, DC 20202–4537.

**FOR FURTHER INFORMATION CONTACT:** For specific questions related to collection activities, please contact Beth Grebeldinger (202) 377–4018.

**SUPPLEMENTARY INFORMATION:** The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

*Title of Collection:* Borrower Defenses Against Loan Repayment.

*OMB Control Number:* 1845–0132.

*Type of Review:* An extension of an existing information collection.

*Respondents/Affected Public:* Individuals or Households.

*Total Estimated Number of Annual Responses:* 150,000.

*Total Estimated Number of Annual Burden Hours:* 150,000.

*Abstract:* This is a request to for an extension of the emergency clearance that was granted on this collection on June 5, 2015 to facilitate the continued collection of information from borrowers who believe they have cause to invoke the borrower defenses against repayment of a student loan as noted in regulation. The regulations for borrower defenses are specified in 34 CFR 685.206(c). The regulation states, in part, “(c)(1) [i]n any proceeding to collect on a Direct Loan, the borrower may assert as a defense against repayment, an act or omission of the school attended by the student that would give rise to a cause of action against the school under applicable State law.” Prior to 2015, the borrower defense identified above was rarely asserted by any borrowers and no specific methods of collecting information was defined or found necessary.

These processes are being offered to aid in preserving borrowers rights and to meet the fiduciary responsibilities of the federal student loan programs. These collections will allow the Department of Education to inform borrowers and loan servicers of the information needed to review and adjudicate requests for relief under borrower defenses regulations.

Dated: September 14, 2015.

### Agency Information Collection Activities; Comment Request; Middle Grades Longitudinal Study of 2017–2018 (MGLS:2017) Recruitment for 2017 Operational Field Test

**AGENCY:** National Center for Education Statistics (NCES), Department of Education (ED).

**ACTION:** Notice.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. chapter 3501 *et seq.*), ED is proposing a revision of an existing information collection.

**DATES:** Interested persons are invited to submit comments on or before November 16, 2015.

**ADDRESSES:** To access and review all the documents related to the information collection listed in this notice, please use <http://www.regulations.gov> by searching the Docket ID number ED–2015–ICCD–0111. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at <http://www.regulations.gov> by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Information Collection Clearance Division, U.S. Department of Education, 400 Maryland Avenue SW., LBJ, Room 2E103, Washington, DC 20202–4537.

**FOR FURTHER INFORMATION CONTACT:** For specific questions related to collection activities, please contact Kashka Kubzdela, 202–502–7411 or by email [kashka.kubzdela@ed.gov](mailto:kashka.kubzdela@ed.gov).

**SUPPLEMENTARY INFORMATION:** The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use

of information technology. Please note that written comments received in response to this notice will be considered public records.

**Title of Collection:** Middle Grades Longitudinal Study of 2017–2018 (MGLS:2017) Recruitment for 2017 Operational Field Test.

**OMB Control Number:** 1850–0911.

**Type of Review:** A revision of an existing information collection.

**Respondents/Affected Public:** Individuals.

**Total Estimated Number of Annual Responses:** 1,224.

**Total Estimated Number of Annual Burden Hours:** 438.

**Abstract:** The Middle Grades Longitudinal Study of 2017–2018 (MGLS:2017) is the first study sponsored by the National Center for Education Statistics (NCES), within the Institute of Education Sciences (IES) of the U.S. Department of Education (ED), to follow a nationally-representative sample of students as they enter and move through the middle grades (grades 6–8). The data collected through repeated measures of key constructs will provide a rich descriptive picture of the academic experiences and development of students during these critical years and will allow researchers to examine associations between contextual factors and student outcomes. The study will focus on student achievement in mathematics and literacy along with measures of student socioemotional wellbeing and other outcomes. The study will also include a special sample of students with different types of disabilities that will provide descriptive information on their outcomes, educational experiences, and special education services. Baseline data for the MGLS:2017 will be collected from a nationally-representative sample of 6th grade students beginning in January 2018, with annual follow-ups beginning in January 2019 and in January 2020 when most of the students in the sample will be in grades 7 and 8, respectively. This request is to contact and recruit public school districts and public and private schools, beginning in January 2016, to participate in the MGLS:2017 Operational Field Test (OFT) which will take place from January to June 2017. The primary purpose of the OFT is to obtain information on recruiting, particularly for the targeted disability groups; obtaining a tracking sample that can be used to study mobility patterns in subsequent years; and testing protocols and administrative procedures. The OFT will inform the materials and procedures for the main study base year and follow-up data

collections. The base year data collection will begin in January 2018.

Dated: September 14, 2015.

## DEPARTMENT OF EDUCATION

### Meeting: National Board for Education Sciences

**AGENCY:** Institute of Education Sciences, ED.

**ACTION:** Announcement of an open meeting.

**SUMMARY:** This notice sets forth the schedule and proposed agenda of an upcoming meeting of the National Board for Education Sciences (NBES). The notice also describes the functions of the Committee. Notice of this meeting is required by Section 10(a) (2) of the Federal Advisory Committee Act and is intended to notify the public of their opportunity to attend the meeting.

**DATES:** The NBES meeting will be held on October 2, 2015, from 9 a.m. to 4:30 p.m. Eastern Standard Time.

**ADDRESSES:** 80 F Street NW., Large Board Room, Washington, DC 20001.

**FOR FURTHER INFORMATION CONTACT:** Ellie Pelaez, Designated Federal Official, NBES, U.S. Department of Education, 555 New Jersey Avenue NW., Room 600 E, Washington, DC 20208; phone: (202) 219–0644; fax: (202) 219–1402; email: [Ellie.Pelaez@ed.gov](mailto:Ellie.Pelaez@ed.gov).

**SUPPLEMENTARY INFORMATION:** NBES's Statutory Authority and Function: The National Board for Education Sciences is authorized by Section 116 of the Education Sciences Reform Act of 2002 (ESRA), 20 U.S.C. 9516. The Board advises the Director of the Institute of Education Sciences (IES) on, among other things, the establishment of activities to be supported by the Institute and the funding for applications for grants, contracts, and cooperative agreements for research after the completion of peer review. The Board also reviews and evaluates the work of the Institute.

**Meeting Agenda:** On October 2, 2015, starting at 9 a.m., the Board meeting will commence and members will approve the agenda. From 9:05 a.m. to 10:30 a.m., the Board will hear presentations from the Commissioners of the IES Centers for Education Research, Special Education Research, Education Evaluation and Regional Assistance, and

Education Statistics. This session will be followed by a question and answer period for board members, regarding the Commissioners' reports. A break will take place from 10:30 a.m. to 10:45 a.m.

The Board meeting will resume from 10:45 a.m. to 12 p.m. when the Board will discuss the IES Standards and Review Office. Anne Ricciuti, Deputy Director for Science, will provide opening remarks followed by a roundtable discussion with board members. The meeting will break for lunch from 12 p.m. to 1 p.m.

From 1 p.m. to 2:30 p.m., the board will participate in a discussion on the National Center for Education Statistics (NCES). Peggy Carr, Acting Commissioner, National Center for Education Statistics, will provide opening remarks, followed by a panel discussion with the Associate Commissioners of the National Center for Education Statistics. Roundtable discussion by board members will take place after the panel discussion. A break will take place from 2:30 p.m. to 2:45 p.m.

The meeting will resume at 2:45 p.m. to 4:15 p.m. when the Board will hold a panel discussion with National Center for Education Statistics stakeholders. Peggy Carr will provide opening remarks, followed by a panel discussion.

Closing remarks will take place from 4:15 p.m. to 4:30 p.m., with adjournment scheduled for 4:30 p.m.

*Submission of comments regarding the Board's policy recommendations:* There will not be an opportunity for public comment. However, members of the public are encouraged to submit written comments related to NBES to Ellie Pelaez (see contact information above) no later than September 23, 2015. A final agenda is available from Ellie Pelaez (see contact information above) and is posted on the Board Web site <http://ies.ed.gov/director/board/agendas/index.asp>.

*Access to Records of the Meeting:* The Department will post the official report of the meeting on the NBES Web site no later than 90 days after the meeting. Pursuant to the FACA, the public may also inspect the materials at 555 New Jersey Avenue NW., 6th Floor, Washington, DC, by emailing [Ellie.Pelaez@ed.gov](mailto:Ellie.Pelaez@ed.gov) or by calling (202) 219-0644 to schedule an appointment.

*Reasonable Accommodations:* The meeting site is accessible to individuals with disabilities. If you will need an auxiliary aid or service to participate in the meeting (e.g., interpreting service, assistive listening device, or materials in an alternate format), notify the contact person listed in this notice by or before

September 23, 2015. Although we will attempt to meet a request received after September 23, 2015, we may not be able to make available the requested auxiliary aid or service because of insufficient time to arrange it.

*Electronic Access to this Document:* The official version of this document is the document published in the **Federal Register**. Free Internet access to the official edition of the **Federal Register** and the Code of Federal Regulations is available via the Federal Digital System at: [www.gpo.gov/fdsys](http://www.gpo.gov/fdsys). At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Adobe Portable Document Format (PDF). To use PDF, you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: [www.federalregister.gov](http://www.federalregister.gov). Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

**Authority:** Section 116 of the Education Sciences Reform Act of 2002 (ESRA), 20 U.S.C. 9516

**Ruth Neild,**

*Deputy Director for Policy and Research, Delegated Duties of the Director, Institute of Education Sciences.*

## DEPARTMENT OF ENERGY

### Secretary of Energy Advisory Board Meeting; Correction

**AGENCY:** Department of Energy.

**ACTION:** Notice of open meeting; Correction.

**SUMMARY:** The Department of Energy (DOE), on September 10, 2015, published a notice of open meeting announcing an open meeting of the Secretary of Energy Advisory Board. Due to the scheduled transportation delays and security issues near the meeting venue, the meeting is being rescheduled. The date is now October 15, 2015, 8:30 a.m.–12:30 p.m. As a result, the language is being corrected in this notice.

#### Corrections

In the **Federal Register** of September 10, 2015, in FR DOC. 2015-22809, on pages 54558-54559, please make the following corrections:

In the **DATES** heading, third column, first and second lines, replace text with

“Thursday, October 15, 2015, 8:30 a.m.–12:30 p.m. (EDT)”.

In the **SUPPLEMENTARY INFORMATION** heading, *Tentative Agenda*: third column, twelfth line, please remove “September 25th” and replace with “October 15th.” And under Public Participation, twenty-fifth line, please remove “Monday, September 21, 2015”, and replace text with “Friday, October 9, 2015”.

On page 54559, first column, twenty-first line, please remove “September 25th” and replace text with “October 15th”.

Issued in Washington, DC, on September 11, 2015.

**LaTanya R. Butler,**

*Deputy Committee Management Officer.*

## DEPARTMENT OF ENERGY

### National Coal Council Meeting

**AGENCY:** Department of Energy.

**ACTION:** Notice of Open Meetings.

**SUMMARY:** This notice announces a meeting of the National Coal Council (NCC). The Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770) requires that public notice of these meetings be announced in the **Federal Register**.

**DATES:** Thursday, November 5, 2015, 8:45 a.m. to 12:15 p.m.

**ADDRESSES:** National Energy Technology Laboratory, 1501 Wallace Road, Pittsburgh, Pennsylvania 15129.

**FOR FURTHER INFORMATION CONTACT:** Dr. Robert J. Wright, U.S. Department of Energy, 4G-036/Forrestal Building, 1000 Independence Avenue SW., Washington, DC 20585-0001; Telephone: 202-586-0429.

**SUPPLEMENTARY INFORMATION:** *Purpose of the Council:* The National Coal Council provides advice and recommendations to the Secretary of Energy, on general policy matters relating to coal and the coal industry.

*Purpose of Meeting:* The 2015 Spring meeting of the National Coal Council.

*Tentative Agenda:*

1. Call to order and opening remarks by Jeff Wallace, Chair, National Coal Council
2. Remarks by Dr. Grace Bochenek, Director, National Energy Technology Laboratory, U.S. Department of Energy
3. Presentation by Dr. Sean Plasynski, Director Strategic Center for Coal, National Energy Technology Laboratory, U.S. Department of Energy

4. Presentation by Dr. Jared Moore, Independent Energy Researcher, Meridian Energy Policy on The Increasing Competitiveness of CCUS Generation Under Deep Decarbonization
5. Presentation by Dr. Robert Williams, Sr. Research Scientist & Associated Faculty, Princeton Environmental Institute, Princeton University on CO2 Capture Technology Cost Buydown in EOR Applications with Alternative Financing Mechanisms
6. Council Business:
  - a. Finance report by Finance Committee Chair Greg Workman
  - b. Coal Policy Committee report by Coal Policy Committee Chair Fred Palmer
  - c. Communications Committee report by Communications Committee Chair Holly Krutka
  - d. NCC Business Report by NCC Executive Vice President & COO Janet Gellici
7. Other business
8. Adjourn

Visiting NETL requires compliance with site safety and security requirements. Please see <http://www.netl.doe.gov/about/visiting-netl> for full details. Due to security requirements, attendees are requested to register in advance for the meeting at: <https://www.eiseverywhere.com/ereg/index.php?eventid=137597&>.

Transportation to NETL will be provided for meeting registrants from the Crowne Plaza Pittsburgh South hotel (164 Fort Couch Road, Pittsburgh, PA 15241). Bus departs hotel at 7:30 a.m. and 7:55 a.m. Return transportation will be provided at 1:15 p.m. following lunch and at 3:15 p.m. following a tour of NETL's facilities.

**Public Participation:** The meeting is open to the public. If you would like to file a written statement with the Council, you may do so either before or after the meeting. If you would like to make oral statements regarding any item on the agenda, you should contact Dr. Robert J. Wright, 202-586-0429 or [robert.wright@hq.doe.gov](mailto:robert.wright@hq.doe.gov) (email). You must make your request for an oral statement at least 5 business days before the meeting. Reasonable provision will be made to include oral statements on the scheduled agenda. The Chairperson of the Council will lead the meeting in a manner that facilitates the orderly conduct of business. Oral statements are limited to 10-minutes per organization and per person.

**Minutes:** A link to the transcript of the meeting will be posted on the NCC Web site at: <http://www.nationalcoalcoalition.org/>.

Issued at Washington, DC, on September 11, 2015.

**LaTanya R. Butler,**

## DEPARTMENT OF ENERGY

### Environmental Management Site-Specific Advisory Board, Oak Ridge Reservation

**AGENCY:** Department of Energy.

**ACTION:** Notice of open meeting.

**SUMMARY:** This notice announces a meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Oak Ridge Reservation. The Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770) requires that public notice of this meeting be announced in the **Federal Register**.

**DATES:** Wednesday, October 14, 2015, 6:00 p.m.

**ADDRESSES:** Department of Energy Information Center, Office of Science and Technical Information, 1 Science.gov Way, Oak Ridge, Tennessee 37830.

**FOR FURTHER INFORMATION CONTACT:** Melyssa P. Noe, Federal Coordinator, Department of Energy Oak Ridge Operations Office, P.O. Box 2001, EM-90, Oak Ridge, TN 37831. Phone (865) 241-3315; Fax (865) 576-0956 or email: [melyssa.noe@orem.doe.gov](mailto:melyssa.noe@orem.doe.gov) or check the Web site at <http://energy.gov/orem/services/community-engagement/oak-ridge-site-specific-advisory-board>.

**SUPPLEMENTARY INFORMATION:** *Purpose of the Board:* The purpose of the Board is to make recommendations to DOE-EM and site management in the areas of environmental restoration, waste management, and related activities.

#### Tentative Agenda

- Welcome and Announcements
- Comments from the Deputy Designated Federal Officer
- Comments from the DOE, Tennessee Department of Environment and Conservation, and Environmental Protection Agency Liaisons
- Public Comment Period
- Presentation—Progress Made at East Tennessee Technology Park
- Additions/Approval of Agenda
- Motions/Approval of September 9, 2015 Meeting Minutes
- Status of Recommendations with DOE
- Committee Reports
- Federal Coordinator Report

#### • Adjourn

**Public Participation:** The EM SSAB, Oak Ridge, welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Melyssa P. Noe at least seven days in advance of the meeting at the phone number listed above. Written statements may be filed with the Board either before or after the meeting. Individuals who wish to make oral statements pertaining to the agenda item should contact Melyssa P. Noe at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comments will be provided a maximum of five minutes to present their comments.

**Minutes:** Minutes will be available by writing or calling Melyssa P. Noe at the address and phone number listed above. Minutes will also be available at the following Web site: <http://energy.gov/orem/services/community-engagement/oak-ridge-site-specific-advisory-board>.

Issued at Washington, DC, on September 11, 2015.

### Federal Energy Regulatory Commission

[Project No. 14706-000]

#### Empire State Hydro 303, LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On August 26, 2015, Empire State Hydro 303, LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of the Rock Bottom Dam Hydroelectric Project (project) to be located on the Susquehanna River, near the city of Binghamton, Broome County, New York. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A

preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed project would consist of the following: (1) An existing 9-foot-high, 460-foot-long gravity dam; (2) a proposed concrete powerhouse approximately 100 feet long by 40 feet wide housing eight low-head, horizontal bulb turbines having a total installed capacity of 1,992 kilowatts; (3) a proposed concrete tailrace wall extending approximately 100 feet downstream; (4) a proposed 500-foot-long, 12,700-volt transmission line interconnecting with the local utility; and (5) appurtenant facilities. The proposed project would have an average annual generation of about 10 megawatt-hours.

**Applicant Contact:** Mr. Mark Boumansour, Gravity Renewables, Inc., 1401 Walnut Street, Suite 220, Boulder, CO 80302; phone: (303) 440-3378.

**FERC Contact:** Timothy Looney; phone: (202) 502-6096.

Deadline for filing comments, motions to intervene, competing applications (without notices of intent), or notices of intent to file competing applications: 60 days from the issuance of this notice. Competing applications and notices of intent must meet the requirements of 18 CFR 4.36.

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, notices of intent, and competing applications using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov), (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P-14706-000.

More information about this project, including a copy of the application, can be viewed or printed on the "eLibrary" link of the Commission's Web site at <http://www.ferc.gov/docs-filing/elibrary.asp>. Enter the docket number (P-14706) in the docket number field to access the document. For assistance, contact FERC Online Support.

Dated: September 10, 2015.

**Kimberly D. Bose,**

Secretary.

BILLING CODE 6717-01-P

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Project No. 2197-108]

#### Alcoa Power Generating, Inc.; Notice of Application Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. *Type of Application:* Request for a Temporary Variance from Minimum Flow and Reservoir Level Requirements—Article 33.

b. *Project No.:* 2197-108.

c. *Date Filed:* September 4, 2015.

d. *Applicant:* Alcoa Power Generating, Inc. (licensee).

e. *Name of Project:* Yadkin Hydroelectric Project.

f. *Location:* Davidson, Davie, Montgomery, Rowan, and Stanly counties, North Carolina.

g. *Filed Pursuant to:* Federal Power Act, 16 U.S.C. 791(a)-825(r).

h. *Applicant Contact:* Mark Gross, Vice President of Hydro Operations, (704) 422-5774, or [mark.gross@alcoa.com](mailto:mark.gross@alcoa.com).

i. *FERC Contact:* Alicia Burtner, (202) 502-8038, or [alicia.burtner@ferc.gov](mailto:alicia.burtner@ferc.gov).

j. *Deadline for filing comments, motions to intervene, protests, and recommendations is 30 days from the issuance date of this notice by the Commission.*

All documents may be filed electronically via the Internet. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site at <http://www.ferc.gov/docs-filing/efiling.asp>. If unable to be filed electronically, documents may be paper-filed. To paper-file, an original and seven copies should be mailed to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments.

Please include the project number (P-2197-108) on any comments, motions, or recommendations filed.

k. *Description of Request:* The licensee requests a temporary variance from the requirements of license Article 33, which mandates the implementation of the Reservoir Operating Guides. The requirements, as amended in 1968, pertain to minimum flows and reservoir levels at the four project developments. The licensee is required to maintain a minimum 900 cubic feet per second (cfs) daily average flow and a 1,400 cfs weekly average minimum flow. Article 33 also stipulates a rule curve relating reservoir levels of the upstream High Rock reservoir to the downstream Badin (Narrows) reservoir level seasonally. The licensee indicates that, as a result of ongoing drought conditions throughout the watershed, it consulted with its Drought Management Team to determine alternative operating procedures to conserve water. The licensee requests that the weekly minimum flow requirement be reduced to a 1,200 cfs average, and it outlines additional modifications to daily and weekly minimum flows based on conditions, updated mid-month.

l. *Locations of the Application:* A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street NE., Room 2A, Washington, DC 20426, or by calling (202) 502-8371. This filing may also be viewed on the Commission's Web site at <http://www.ferc.gov/docs-filing/elibrary.asp>. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1-866-208-3676 or email [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov), for TTY, call (202) 502-8659. A copy is also available for inspection and reproduction at the address in item (h) above.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must

be received on or before the specified comment date for the particular application.

*o. Filing and Service of Responsive Documents:* Any filing must (1) bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE" as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). All comments, motions to intervene, or protests should relate to minimum flows and/or impoundment levels at the Yadkin Hydroelectric Project, which are the subject of the variance. Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. If an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

Dated: September 10, 2015.

**Kimberly D. Bose,**

BILLING CODE 6717-01-P

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Docket No. ER15-2620-000]

#### Little Elk Wind Project, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding Little Elk Wind Project, LLC's application for market-based rate authority, with an

accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is September 30, 2015.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. ### Federal Energy Regulatory Commission

[Docket No. ER15-2631-000]

#### Odell Wind Farm, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request for Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced proceeding of Odell Wind Farm, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is September 30, 2015.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at <http://www.ferc.gov>. To facilitate electronic service, persons with Internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically should submit an original and 5 copies of the intervention or protest to the Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426.

The filings in the above-referenced proceeding are accessible in the Commission's eLibrary system by clicking on the appropriate link in the above list. They are also available for electronic review in the Commission's Public Reference Room in Washington, DC. There is an eSubscription link on the Web site that enables subscribers to receive email notification when a document is added to a subscribed docket(s). For assistance with any FERC Online service, please email

FERCOnlineSupport@ferc.gov or call (866) 208-3676 (toll free). For TTY, call (202) 502-8659.

Dated: September 10, 2015.

#### Notice of Proposed Restricted Service List for a Programmatic Agreement for Managing Properties Included in or Eligible for Inclusion in the National Register of Historic Places

Rule 2010 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure<sup>1</sup> provides that, to eliminate unnecessary expense or improve administrative efficiency, the Secretary may establish a restricted service list for a particular phase or issue in a proceeding. The restricted service list should contain the names of persons on the service list who, in the judgment of the decisional authority establishing the list, are active participants with respect to the phase or issue in the proceeding for which the list is established.

The Commission staff is consulting with the Ohio Historical Society (Ohio SHPO) and the Advisory Council on Historic Preservation (Advisory Council) pursuant to the Advisory Council's regulations, 36 CFR part 800, implementing section 106 of the National Historic Preservation Act, as amended, (54 U.S.C. 306108), to prepare

Programmatic Agreements for managing properties included in, or eligible for inclusion in, the National Register of Historic Places that could be affected by issuance of an original license for each of the following projects: (1) Beverly Lock & Dam Water Power Project No. 13404; (2) Devola Lock & Dam Water Power Project No. 13405; (3) Malta Lock & Dam Water Power Project No. 13406; (4) Lowell Lock & Dam Water Power Project No. 13407; (5) Philo Lock & Dam Water Power Project No. 13408; (6) and Rokeby Lock & Dam Water Power Project No. 13411.

The Programmatic Agreements, when executed by the Commission and the Ohio SHPO, would satisfy the Commission's section 106 responsibilities for all individual undertakings carried out in accordance with the licenses until the licenses expire or are terminated (36 CFR 800.13[e]). The Commission's responsibilities pursuant to section 106 for the projects would be fulfilled through the Programmatic Agreements, which the Commission staff proposes to draft in consultation with certain parties listed below. The executed Programmatic Agreements would be incorporated into any Order issuing a license for each project.

Clean River Power MR-3, LLC, Clean River Power MR-1, LLC, Clean River Power MR-5, LLC, Clean River Power MR-2, LLC, Clean River Power MR-7, LLC, and Clean River Power MR-6, LLC as applicants for the Beverly Lock and Dam Water Power Project, Devola Lock and Dam Water Power Project, Malta/McConnelsville Lock and Dam Water Power Project, Lowell Lock and Dam Water Power Project, Philo Lock and Dam Water Power Project, and Rokeby Lock and Dam Water Power Project, respectively, the Peoria Tribe Indians of Oklahoma, the Miami Tribe of Oklahoma, and the Hannahville Indian Community have expressed an interest in these proceedings and are invited to participate in consultations to develop the Programmatic Agreements. For purposes of commenting on the Programmatic Agreements, we propose to restrict the service list for Projects Nos. 13404, 13405, 12406, 13407, 13408, and 13411 as follows:

John Eddins or Representative, Advisory Council on Historic Preservation, 401 F Street NW., Suite 803, Washington, DC 2001-2637.

David Snyder or Representative, Ohio State Historic Preservation Office, Ohio History Connection, 800 E 17th Ave., Columbus, OH 43211.

Ramya Swaminathan or Representative, Clean River Power MR-3, LLC et al.,

<sup>1</sup> 18 CFR 385.2010.

745 Atlantic Avenue, 8th Floor,  
Boston, MA 02111.

Dave Anthony or Representative,  
Business & Government Affairs,  
Manager, Hannahville Indian  
Community, N14911 Hannahville B1  
Road, Wilson, MI 49896.

Logan Pappenfort, Section 106  
Representative, Peoria Tribe of  
Indians of Oklahoma, 118 S. Eight  
Tribes Trail, P.O. Box 1527, Miami,  
OK 74355.

George J. Strack, THPO, Miami Tribe of  
Oklahoma, P.O. Box 1326, Miami, OK  
74355.

Any person on the official service list for the above-captioned proceeding may request inclusion on the restricted service list, or may request that a restricted service list not be established, by filing a motion to that effect within 15 days of this notice date. In a request for inclusion, please identify the reason(s) why there is an interest to be included. Also please identify any concerns about historic properties, including Traditional Cultural Properties. If historic properties are to be identified within the motion, please use a separate page, and label it NON-PUBLIC Information.

The Commission strongly encourages electronic filing. Please file motions using the Commission's eFiling system at <http://www.ferc.gov/docs-filing/efiling.asp>. For assistance, please contact FERC Online Support at [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov), (866) 208-3676 (toll free), or (202) 502-8659 (TTY). In lieu of electronic filing, please send a paper copy to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. The first page of any filing should include docket number P-1256-031.

If no such motions are filed, the restricted service list will be effective at the end of the 15 day period. Otherwise, a further notice will be issued ruling on any motion or motions within the 15-day period.

Dated: September 10, 2015.

**Kimberly D. Bose,**  
Secretary.

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Project No. 1267-108]

#### Greenwood County, South Carolina; Notice of Application Accepted for Filing, Soliciting Comments, Motions To Intervene, and Protests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

- a. *Type of Application*: Request for a Temporary Variance from Reservoir Level Requirements—Article 407.
- b. *Project No.*: 1267-108.
- c. *Date Filed*: August 14, 2015.
- d. *Applicant*: Greenwood County, South Carolina (licensee).
- e. *Name of Project*: Buzzards Roost Hydroelectric Project.
- f. *Location*: Greenwood, Laurens, and Newberry counties, South Carolina.
- g. *Filed Pursuant to*: Federal Power Act, 16 U.S.C. 791(a)-825(r).
- h. *Applicant Contact*: Toby Chappell, County Manager, (864) 942-8596, or [tchappell@greenwoodsc.gov](mailto:tchappell@greenwoodsc.gov).
- i. *FERC Contact*: Joy Kurtz, (202) 502-6760, or [joy.kurtz@ferc.gov](mailto:joy.kurtz@ferc.gov).
- j. *Deadline for filing comments, motions to intervene, protests, and recommendations* is 30 days from the issuance date of this notice by the Commission.

All documents may be filed electronically via the Internet. See, 18 CFR 385.2001(a)(1)(iii) and the instructions on the Commission's Web site at <http://www.ferc.gov/docs-filing/efiling.asp>. If unable to be filed electronically, documents may be paper-filed. To paper-file, an original and seven copies should be mailed to: Secretary, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426. Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at <http://www.ferc.gov/docs-filing/ecomment.asp>. You must include your name and contact information at the end of your comments.

Please include the project number (P-1267-108) on any comments, motions, or recommendations filed.

k. *Description of Request*: The licensee requests a temporary variance from the requirements of license Article 407, which requires the licensee to maintain water levels in Lake Greenwood (*i.e.* reservoir) in accordance with the 1994 rule curve. Specifically, Article 407, as amended in 2010, requires the licensee to maintain a

reservoir elevation of 439 feet mean sea level (msl) between April 15 and November 1, and then gradually descend to 437 feet msl from November 1 to December 1, and then to 434.5 feet msl between December 1 and January 15, where it shall remain until January 31. Finally, between February 1 and April 15, the licensee must gradually increase the reservoir level from 434.5 to 439 feet msl. The licensee indicates that, as a result of ongoing drought conditions throughout the watershed, it cannot simultaneously maintain the reservoir level and release the minimum flows required by Article 408. Because priority must be given to provide the required minimum flow in order to protect aquatic resources downstream of the project, a temporary variance from Article 407 is needed until inflows into Lake Greenwood reach normal inflow rates, or until April 15, 2016, whichever occurs first.

l. *Locations of the Application*: A copy of the application is available for inspection and reproduction at the Commission's Public Reference Room, located at 888 First Street NE., Room 2A, Washington, DC 20426, or by calling (202) 502-8371. This filing may also be viewed on the Commission's Web site at <http://www.ferc.gov/docs-filing/elibrary.asp>. Enter the docket number excluding the last three digits in the docket number field to access the document. You may also register online at <http://www.ferc.gov/docs-filing/esubscription.asp> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, call 1-866-208-3676 or email [FERCOnlineSupport@ferc.gov](mailto:FERCOnlineSupport@ferc.gov), for TTY, call (202) 502-8659. A copy is also available for inspection and reproduction at the address in item (h) above.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene*: Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

*o. Filing and Service of Responsive Documents:* Any filing must (1) bear in all capital letters the title "COMMENTS", "PROTEST", or "MOTION TO INTERVENE" as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis and otherwise comply with the requirements of 18 CFR 4.34(b). All comments, motions to intervene, or protests should relate to impoundment levels at the Buzzards Roost Hydroelectric Project, which is the subject of the variance. Agencies may obtain copies of the application directly from the applicant. A copy of any protest or motion to intervene must be served upon each representative of the applicant specified in the particular application. If an intervener files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency. A copy of all other filings in reference to this application must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 4.34(b) and 385.2010.

Dated: September 10, 2015.

**Kimberly D. Bose,**  
Secretary.

**BILLING CODE 6717-01-P**

## FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-xxxx, 3060-0214, 3060-0113, 3060-0922, 3060-1065]

### Information Collections Being Submitted for Review and Approval to the Office of Management and Budget

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice and request for comments.

**SUMMARY:** As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the Federal Communications

Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

**DATES:** Written comments should be submitted on or before October 19, 2015. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

**ADDRESSES:** Direct all PRA comments to Nicholas A. Fraser, OMB, via email [Nicholas.A.Fraser@omb.eop.gov](mailto:Nicholas.A.Fraser@omb.eop.gov); and to Cathy Williams, FCC, via email [PRA@fcc.gov](mailto:PRA@fcc.gov) and to [Cathy.Williams@fcc.gov](mailto:Cathy.Williams@fcc.gov). Include in the comments the OMB control number as shown in the "Supplementary Information" section below.

**FOR FURTHER INFORMATION CONTACT:** For additional information or copies of the information collection, contact Cathy Williams at (202) 418-2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the Web page <<http://www.reginfo.gov/public/do/PRAMain>>, (2) look for the section of the Web page called "Currently Under Review," (3) click on the downward-pointing arrow in the "Select Agency" box below the "Currently Under Review" heading, (4) select "Federal Communications Commission" from the list of agencies presented in the "Select Agency" box, (5) click the "Submit" button to the right of the "Select Agency" box, (6) when the list of FCC ICRs currently

under review appears, look for the OMB control number of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

#### SUPPLEMENTARY INFORMATION:

*OMB Control Number:* 3060-xxxx.

*Title:* SDARS Political Broadcasting Requirements.

*Form Number:* N/A.

*Type of Review:* New collection.

*Respondents:* Business or other for-profit entities.

*Number of Respondents and Responses:* 1 respondent; 1 response.

*Estimated Time per Response:* 10 hours.

*Frequency of Response:* Recordkeeping requirement; on occasion reporting requirements; third party disclosure requirement.

*Obligation to Respond:* Required to obtain or retain benefits. The statutory authority which covers this information collection is contained in 47 U.S.C. 309(a) and 307(a) of the Communications Act of 1934, as amended.

*Total Annual Burden:* 20 hours.

*Total Annual Cost:* No cost.

*Nature and Extent of Confidentiality:* Although the Commission does not believe that any confidential information will need to be disclosed in order to comply with the information collection requirements, applicants are free to request that materials or information submitted to the Commission be withheld from public inspection. (See 47 CFR 0.459 of the Commission's Rules.)

*Privacy Impact Assessment:* No impact(s).

*Needs and Uses:* In 1997, the Commission imposed political broadcasting requirements on Satellite Digital Audio Broadcasting Service ("SDARS") licensees. See Establishment of Rules and Policies for the Digital Audio Radio Satellite Service in the 2310-2360 MHz Frequency Band, 12 FCC Rcd 5754, 5792, para. 92 (1997) ("1997 SDARS Order"), FCC 97-70. The Commission stated that SDARS licensees should comply with the same substantive political debate provisions as broadcasters: The federal candidate access provision (47 U.S.C. Section 312(a)(7)) and the equal opportunities provision (47 U.S.C. Section 315). The 1997 SDARS Order imposes the following requirements on SDARS licensees:

Lowest unit charge: Similar to broadcasters, SDARS licensees must disclose any practices offered to commercial advertisers that enhance the value of advertising spots and different

classes of time. SDARS licensees must also calculate the lowest unit charge and are required to review their advertising records throughout the election period to determine whether compliance with this rule section requires that candidates receive rebates or credits. See 47 CFR 73.1942.

**Political file:** Similar to broadcasters, SDARS licensees must also keep and permit public inspection of a complete record (political file) of all requests for SDARS origination time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the system of such requests, and the charges made, if any, if the request is granted. The disposition includes the schedule of time purchased, when the spots actually aired, the rates charged, and the classes of time purchased. Also, when free time is provided for use by or on behalf of candidates, a record of the free time provided is to be placed in the political file as soon as possible and maintained for a period of two years. See 47 CFR 73.1943.

**OMB Control Number:** 3060–0214.

**Title:** Sections 73.3526 and 73.3527, Local Public Inspection Files; Sections 76.1701 and 73.1943, Political Files.

**Form Number:** N/A.

**Type of Review:** Revision of a currently approved collection.

**Respondents:** Business or other for-profit entities; not for profit institutions; individuals or households.

**Number of Respondents and Responses:** 24,559 respondents; 63,235 responses.

**Estimated Time per Response:** 1–104 hours.

**Frequency of Response:** Recordkeeping requirement; on occasion reporting requirements; third party disclosure requirement.

**Obligation to Respond:** Required to obtain or retain benefits. The statutory authority which covers this information collection is contained in Sections 151, 152, 154(i), 303, 307 and 308 of the Communications Act of 1934, as amended.

**Total Annual Burden:** 2,375,337 hours.

**Total Annual Cost:** \$882,631.

**Nature and Extent of Confidentiality:** Most of the documents comprising the public file consist of materials that are not of a confidential nature.

Respondents complying with the information collection requirements may request that the information they submit be withheld from disclosure. If confidentiality is requested, such requests will be processed in accordance with the Commission's rules, 47 CFR 0.459.

**Privacy Impact Assessment:** Should respondents submit any PII as part of the information collection requirements, the FCC has an existing system of records, FCC/MB–1, "Ownership of Commercial Broadcast Stations," that may partially cover this PII. In addition, the Commission has prepared a second system of records notice, FCC/MB–2, "Broadcast Station Public Inspection Files," that will cover the PII contained in the broadcast station public inspection files to be located on the Commission's Web site. The Commission is also drafting a PIA for the records covered by this SORN.

**Needs and Uses:** Satellite Radio (also referred to as "Satellite Digital Audio Radio Services" or "SDARS") licensees are required to comply with the Commission's EEO broadcast rules and policies, including public file obligations and periodic submissions to the Commission. See Applications for Consent to the Transfer of Control of Licenses, XM Satellite Radio Holdings Inc., Transferor, to Sirius Satellite Radio Inc., Transferee, 23 FCC Rcd 12348, 12426,) 174, and note 551 (2008) ("XM-Sirius Merger Order"). See also Establishment of Rules and Policies for the Digital Audio Radio Satellite Service in the 2310–2360 MHz Frequency Band, 12 FCC Rcd 5754, 5791–92,) 91–92 (1997) ("SDARS Order"), FCC 97–70. This collection is being revised to reflect the burden associated with the EEO public file requirements.

**OMB Control Number:** 3060–0113.

**Title:** Broadcast EEO Program Report, FCC Form 396.

**Form Number:** FCC Form 396.

**Type of Review:** Revision of a currently approved collection.

**Respondents:** Business or other for-profit entities; not for profit institutions.

**Number of Respondents and Responses:** 2,001 respondents; 2,001 responses.

**Estimated Time per Response:** 1.5 hours.

**Frequency of Response:** On renewal reporting requirement.

**Obligation to Respond:** Required to obtain or retain benefits. The statutory authority which covers this information collection is contained in Section 154(i) and 303 of the Communications Act of 1934, as amended.

**Total Annual Burden:** 3,002 hours.

**Total Annual Cost:** \$300,300.

**Nature and Extent of Confidentiality:** There is no need for confidentiality with this collection of information.

**Privacy Impact Assessment:** No impact(s).

**Needs and Uses:** The Broadcast Equal Employment Opportunity (EEO)

Program Report, FCC Form 396, is a device that is used to evaluate a broadcaster's EEO program to ensure that satisfactory efforts are being made to comply with FCC's EEO requirements. FCC Form 396 is required to be filed at the time of renewal of license by all AM, FM, TV, Low Power TV and International stations. Licensees in the Satellite Digital Audio Radio Service ("SDARS") also must file FCC Form 396.

The recordkeeping requirements for FCC Form 396 are covered under OMB control number 3060–0214.

**Revised Collection Requirement:** In 1997, the Commission determined that SDARS licensees must comply with the Commission's EEO requirements. See Establishment of Rules and Policies for the Digital Audio Radio Satellite Service in the 2310–2360 MHz Frequency Band, 12 FCC Rcd 5754, 5791,) 91 (1997) ("1997 SDARS Order"), FCC 97–70. In 2008, the Commission clarified that SDARS licensees must comply with the Commission's EEO broadcast rules and policies, including the same recruitment, outreach, public file, Web site posting, record-keeping, reporting, and self-assessment obligations required of broadcast licensees, consistent with 47 CFR 73.2080, as well as any other Commission EEO policies. See Applications for Consent to the Transfer of Control of Licenses, SM Satellite Radio Holdings Inc., Transferor, to Sirius Satellite Radio Inc., Transferee, 23 FCC Rcd 12348, 12426,) 174, and note 551 (2008) ("XM-Sirius Merger Order").

The Commission is making this submission to the Office of Management and Budget for approval to add SDARS licensees to this information collection.

**OMB Control Number:** 3060–0922.

**Title:** Broadcast Mid-Term Report, FCC Form 397.

**Form Number:** FCC Form 397.

**Type of Review:** Revision of a currently approved collection.

**Respondents:** Business or other for-profit entities; not-profit institutions.

**Number of Respondents and Responses:** 1,181 respondents; 1,181 responses.

**Estimated Time per Response:** 0.5 hours.

**Frequency of Response:** Mid-point reporting requirement.

**Obligation to Respond:** Required to obtain or retain benefits. The statutory authority which covers this information collection is contained in Sections 154(i) and 303 of the Communications Act, as amended.

**Total Annual Burden:** 591 hours.

**Total Annual Cost:** No cost.

*Nature and Extent of Confidentiality:* There is no need for confidentiality with this collection of information.

*Privacy Impact Assessment:* No impact(s).

*Needs and Uses:* The Broadcast Mid-Term Report (FCC Form 397) is required to be filed by each broadcast television station that is part of an employment unit with five or more full-time employees and each broadcast radio station that is part of an employment unit with more than ten full-time employees. It is a data collection device used to assess broadcast compliance with EEO outreach requirements in the middle of license terms that are eight years in duration. FCC Form 397 must also be filed by Satellite Digital Audio Radio Services (SDARS) licensees to assess compliance with EEO outreach requirements.

Revised Information Collection Requirements Which Require Approval and Review by the Office of Management and Budget (OMB): Satellite Radio (also referred to as "Satellite Digital Audio Radio Services" or "SDARS") licensees are required to comply with the Commission's EEO broadcast rules and policies. They must engage in the same recruitment, outreach, public file, Web site posting, record-keeping, reporting, and self-assessment obligations required of broadcast licensees, consistent with 47 CFR 73.2080, and are subject to the same EEO policies. See Applications for Consent to the Transfer of Control of Licenses, XM Satellite Radio Holdings Inc., Transferor, to Sirius Satellite Radio Inc., Transferee, 23 FCC Rcd 12348, 12426, 174, and note 551 (2008) ("XM-Sirius Merger Order").

See also Establishment of Rules and Policies for the Digital Audio Radio Satellite Service in the 2310–2360 MHz Frequency Band, 12 FCC Rcd 5754, 5791–92, 91–92 (1997) ("SDARS Order"), FCC 97–70. This collection is being revised to reflect the burden associated with filing FCC Form 397 by SDARS licensees. Therefore, these respondents are being added as respondents to this collection. The form is not being revised.

*OMB Control Number:* 3060–1065.

*Title:* Section 25.701 of the Commission's Rules, Direct Broadcast Satellite Public Interest Obligations.

*Form Number:* N/A.

*Type of Review:* Reinstatement of a previously approved collection.

*Respondents:* Business or other for-profit entities.

*Number of Respondents and*

*Responses:* 2 respondents; 2 responses.

*Estimated Time per Response:* 1–10 hours.

*Frequency of Response:* Recordkeeping requirement; on occasion reporting requirement; one time reporting requirement; annual reporting requirement; Third party disclosure requirement.

*Obligation to Respond:* Required to obtain or retain benefits. The statutory authority which covers this information collection is contained in Section 335 of the Communications Act of 1934, as amended.

*Total Annual Burden:* 50 hours.

*Total Annual Cost:* No cost.

*Nature and Extent of Confidentiality:* Although the Commission does not believe that any confidential information will need to be disclosed in order to comply with the information collection requirements, applicants are free to request that materials or information submitted to the Commission be withheld from public inspection. (See 47 CFR 0.459 of the Commission's Rules).

*Privacy Impact Assessment:* No impact(s).

*Needs and Uses:* The Commission vacated an Order on Reconsideration, In the Matter of Implementation Of Section 25 Of The Cable Television Consumer Protection And Competition Act Of 1992, Direct Broadcast Satellite Public Interest Obligations, MM No. Docket 93–25 FCC 03–78, adopted April 9, 2003 and adopted in its place, in the same proceeding, a Second Order on Reconsideration of the First Report and Order, Sua Sponte Order on Reconsideration ("Second Order") and accompanying rules FCC 04–44, released March 25, 2004. The Second Order differs from the Order on Reconsideration with respect to two issues: (1) The political broadcasting requirements, and (2) the guidelines concerning commercialization of children's programming.

47 CFR 25.701(c)(1)(i)(C) states DBS providers may establish and define their own reasonable classes of immediately preemptible time so long as the differences between such classes are based on one or more demonstrable benefits associated with each class and are not based solely upon price or identity of the advertiser. Such demonstrable benefits include, but are not limited to, varying levels of preemption protection, scheduling flexibility, or associated privileges, such as guaranteed time sensitive make goods. DBS providers may not use class distinctions to defeat the purpose of the lowest unit charge requirement. All classes must be fully disclosed and made available to candidates.

47 CFR 25.701(c)(1)(i)(D) states DBS providers may establish reasonable

classes of preemptible with notice time so long as they clearly define all such classes, fully disclose them and make them available to candidates.

47 CFR 25.701(c)(1)(i)(E) states DBS providers may treat non preemptible and fixed position as distinct classes of time provided that they articulate clearly the differences between such classes, fully disclose them, and make them available to candidates.

47 CFR 25.701(c)(1)(i)(I) states DBS providers shall review their advertising records periodically throughout the election period to determine whether compliance with this section requires that candidates receive rebates or credits. Where necessary, DBS providers shall issue such rebates or credits promptly.

47 CFR 25.701(c)(1)(i)(M) states DBS providers must disclose and make available to candidates any make good policies provided to commercial advertisers. If a DBS provider places a make good for any commercial advertiser or other candidate in a more valuable program or daypart, the value of such make good must be included in the calculation of the lowest unit charge for that program or daypart.

47 CFR 25.701(c)(1)(ii) states at any time other than the respective periods set forth in paragraph (c)(1)(i) of this section, DBS providers may charge legally qualified candidates for public office no more than the charges made for comparable use of the facility by commercial advertisers. The rates, if any, charged all such candidates for the same office shall be uniform and shall not be rebated by any means, direct or indirect. A candidate shall be charged no more than the rate the DBS provider would charge for comparable commercial advertising. All discount privileges otherwise offered by a DBS provider to commercial advertisers must be disclosed and made available upon equal terms to all candidates for public office.

47 CFR 25.701(d) states each DBS provider shall keep and permit public inspection of a complete and orderly political file and shall prominently disclose the physical location of the file, and the telephonic and electronic means to access the file.

(1) The political file shall contain, at a minimum:

(i) A record of all requests for DBS origination time, the disposition of those requests, and the charges made, if any, if the request is granted. The "disposition" includes the schedule of time purchased, when spots actually aired, the rates charged, and the classes of time purchased; and

(ii) A record of the free time provided if free time is provided for use by or on behalf of candidates.

(2) DBS providers shall place all records required by this section in a file available to the public as soon as possible and shall be retained for a period of four years until December 31, 2006, and thereafter for a period of two years.

47 CFR 25.701(e)(3) requires DBS providers airing children's programming must maintain records sufficient to verify compliance with this rule and make such records available to the public. Such records must be maintained for a period sufficient to cover the limitations period specified in 47 U.S.C. 503(b)(6)(B).

47 CFR 25.701(f)(6) states that each DBS provider shall keep and permit public inspection of a complete and orderly record of:

(A) Quarterly measurements of channel capacity and yearly average calculations on which it bases its four percent reservation, as well as its response to any capacity changes;

(B) A record of entities to whom noncommercial capacity is being provided, the amount of capacity being provided to each entity, the conditions under which it is being provided and the rates, if any, being paid by the entity;

(C) A record of entities that have requested capacity, disposition of those requests and reasons for the disposition.

(ii) All records required by this paragraph shall be placed in a file available to the public as soon as possible and shall be retained for a period of two years.

The statutory authority which covers this information collection is contained in 47 U.S.C. 335 of the Communications Act of 1934, as amended.

#### Revised Information Collection Requirements:

The Commission is reinstating this collection into the Office of Management and Budget's (OMB's) inventory because after further evaluation the Commission has determined that this collection is still needed by the Commission because DBS providers make up the majority of their universe of respondents. Since this is the case, OMB approval is still need for this collection.

Federal Communications Commission.

#### Marlene H. Dortch,

Secretary, Office of the Secretary.

## FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-0999]

### Information Collection Being Submitted for Review and Approval to the Office of Management and Budget

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice and request for comments.

**SUMMARY:** As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

**DATES:** Written comments should be submitted on or before October 19, 2015. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

**ADDRESSES:** Direct all PRA comments to Nicholas A. Fraser, OMB, via email [Nicholas.A.Fraser@omb.eop.gov](mailto:Nicholas.A.Fraser@omb.eop.gov); and to Cathy Williams, FCC, via email [PRA@fcc.gov](mailto:PRA@fcc.gov) and to [Cathy.Williams@fcc.gov](mailto:Cathy.Williams@fcc.gov). Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** section below.

**FOR FURTHER INFORMATION CONTACT:** For additional information or copies of the information collection, contact Cathy Williams at (202) 418-2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the Web page <http://www.reginfo.gov/public/do/PRAMain>, (2) look for the section of the Web page called "Currently Under Review," (3) click on the downward-pointing arrow in the "Select Agency" box below the "Currently Under Review" heading, (4) select "Federal Communications Commission" from the list of agencies presented in the "Select Agency" box, (5) click the "Submit" button to the right of the "Select Agency" box, (6) when the list of FCC ICRs currently under review appears, look for the OMB control number of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

#### SUPPLEMENTARY INFORMATION:

*OMB Control No.:* 3060-0999.

*Title:* Hearing Aid Compatibility Status Report and Section 20.19, Hearing Aid-Compatible Mobile Handsets (Hearing Aid Compatibility Act).

*Form Number:* FCC Form 655.

*Type of Review:* Extension of a currently approved collection.

*Respondents:* Business or other for-profit entities.

*Number of Respondents:* 925 respondents; 925 responses.

*Estimated Time per Response:* 13.041081 hours per response (average).

*Frequency of Response:* On occasion and annual reporting requirements and third party disclosure requirement.

*Obligation to Respond:* Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. Sections 151, 154(i), 157, 160, 201, 202, 208, 214, 301, 303, 308, 309(j), 310 and 610 of the Communications Act of 1934, as amended.

*Total Annual Burden:* 12,063 hours.

*OMB Control No.:* 3060-0999.

*Title:* Hearing Aid Compatibility Status Report and Section 20.19, Hearing Aid-Compatible Mobile Handsets (Hearing Aid Compatibility Act).

*Form Number:* FCC Form 655.

*Type of Review:* Extension of a currently approved collection.

*Respondents:* Business or other for-profit entities.

*Number of Respondents:* 925 respondents; 925 responses.

*Estimated Time per Response:* 13.041081 hours per response (average).

*Frequency of Response:* On occasion and annual reporting requirements and third party disclosure requirement.

*Obligation to Respond:* Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. Sections 151, 154(i), 157, 160, 201, 202, 208, 214, 301, 303, 308, 309(j), 310 and 610 of the Communications Act of 1934, as amended.

*Total Annual Burden:* 12,063 hours.

*Total Annual Cost:* No costs.

*Privacy Impact Assessment:* No impact(s).

*Total Cost:* No costs.

*Privacy Impact Assessment:* No impact(s).

*Nature and Extent of Confidentiality:* Information requested in the reports may include confidential information. However, covered entities are allowed to request that such materials submitted to the Commission be withheld from public inspection.

*Needs and Uses:* The Commission will submit this information collection as an extension to the Office of Management and Budget (OMB) after this 60-day comment period to obtain the full three year clearance for the collection. There is no change in number of respondents/responses, total annual burden hours, or total annual cost from the previously approved estimates. As part of the extension request, the Commission will submit certain non-substantive changes for approval, as described below.

The collection is necessary to implement certain disclosure requirements that are part of the Commission's wireless hearing aid compatibility rule. In a Report and Order in WT Docket No. 01-309, FCC 03-168, adopted and released in September 2003, implementing a mandate under the Hearing Aid Compatibility Act of 1988, the Commission required digital wireless phone manufacturers and service providers to make certain digital wireless phones capable of effective use with hearing aids, label certain phones they sold with information about their compatibility with hearing aids, and report to the Commission (at first every six months, then on an annual basis) on the numbers and types of hearing aid-compatible phones they were producing or offering to the public. These reporting requirements were subsequently amended on several occasions, and the existing, OMB-approved collection under this OMB control number includes these modifications.

As part of this extension request, the Commission is requesting approval of certain non-substantive changes to the

form and instructions. Changes to the form include updating the edition form date for the electronic form to reflect the current date, and adding certain additional language drawn from the instructions to the question on device disclosures through Public Web sites. In the instructions, the Commission is updating the edition form date to reflect the current date, updating a Web site link that has become inactive, adding certain informational text to make the instructions easier to understand, and updating figures as necessary to reflect the non-substantive changes in the form.

Federal Communications Commission.

**Marlene H. Dortch,**

*Secretary, Office of the Secretary.*

## FEDERAL DEPOSIT INSURANCE CORPORATION

### Notice to All Interested Parties of the Termination of the Receivership of 10303, Progress Bank of Florida, Tampa, Florida

*Notice is hereby given* that the Federal Deposit Insurance Corporation ("FDIC") as Receiver for Progress Bank of Florida, Tampa, Florida ("the Receiver") intends to terminate its receivership for said institution. The FDIC was appointed receiver of Progress Bank of Florida on October 22, 2010. The liquidation of the receivership assets has been completed. To the extent permitted by available funds and in accordance with law, the Receiver will be making a final dividend payment to proven creditors.

Based upon the foregoing, the Receiver has determined that the continued existence of the receivership will serve no useful purpose. Consequently, notice is given that the receivership shall be terminated, to be effective no sooner than thirty days after the date of this Notice. If any person wishes to comment concerning the termination of the receivership, such comment must be made in writing and sent within thirty days of the date of this Notice to: Federal Deposit Insurance Corporation, Division of Resolutions and Receiverships, Attention: Receivership Oversight Department 32.1, 1601 Bryan Street, Dallas, TX 75201.

No comments concerning the termination of this receivership will be considered which are not sent within this time frame.

Dated: September 14, 2015.

Federal Deposit Insurance Corporation.

**Robert E. Feldman,**

*Executive Secretary.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Medicare & Medicaid Services

[CMS-1640-FN]

#### Medicare Program; Approval of Request for an Exception to the Prohibition on Expansion of Facility Capacity Under the Hospital Ownership and Rural Provider Exceptions to the Physician Self-Referral Prohibition

**AGENCY:** Centers for Medicare & Medicaid Services (CMS), HHS.

**ACTION:** Final notice.

**SUMMARY:** This final notice announces our decision to approve the request from Doctors Hospital at Renaissance for an exception to the prohibition against expansion of facility capacity.

**DATES:** *Effective Date:* This notice is effective on September 11, 2015.

**FOR FURTHER INFORMATION CONTACT:** Patricia Taft, (410) 786-4561 or Teresa Walden, (410) 786-3755.

**SUPPLEMENTARY INFORMATION:**

#### I. Background

Section 1877 of the Social Security Act (the Act), also known as the physician self-referral law—(1) prohibits a physician from making referrals for certain "designated health services" (DHS) payable by Medicare to an entity with which he or she (or an immediate family member) has a financial relationship (ownership or compensation), unless the requirements of an applicable exception are satisfied; and (2) prohibits the entity from filing claims with Medicare (or billing another individual, entity, or third party payer) for those DHS furnished as a result of a prohibited referral.

Section 1877(d)(2) of the Act provides an exception, known as the rural provider exception, for physician ownership or investment interests in rural providers. In order for an entity to qualify for the rural provider exception, the DHS must be furnished in a rural area (as defined in section 1886(d)(2)(D) of the Act) and substantially all the DHS furnished by the entity must be furnished to individuals residing in a rural area.

Section 1877(d)(3) of the Act provides an exception, known as the hospital

ownership exception, for physician ownership or investment interests held in a hospital located outside of Puerto Rico, provided that the referring physician is authorized to perform services at the hospital and the ownership or investment interest is in the hospital itself (and not merely in a subdivision of the hospital).

Section 6001(a)(3) of the Patient Protection and Affordable Care Act (Pub. L. 111–148) as amended by the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111–152) (hereafter referred to together as “the Affordable Care Act”) amended the hospital ownership and rural provider exceptions to the physician self-referral prohibition to impose additional restrictions on physician ownership and investment in hospitals. Since March 23, 2010, a physician-owned hospital that seeks to avail itself of either exception is prohibited from expanding facility capacity unless it qualifies as an “applicable hospital” or “high Medicaid facility” (as defined in sections 1877(i)(3)(E), (F) of the Act and 42 CFR 411.362(c)(2), (3) of our regulations) and has been granted an exception to the facility expansion prohibition by the Secretary of the Department of Health and Human Services (the Secretary). Section 1877(i)(3)(A)(ii) of the Act provides that individuals and entities in the community in which the provider requesting the exception is located must have an opportunity to provide input with respect to the provider’s request for an exception. Section 1877(i)(3)(H) of the Act states that the Secretary shall publish in the **Federal Register** the final decision with respect to a request for an exception to the prohibition against facility expansion not later than 60 days after receiving a complete application.

## II. Exception Approval Process

On November 30, 2011, we published a final rule in the **Federal Register** (76 FR 74122, 74517 through 74525) that, among other things, finalized § 411.362(c), which specifies the process for submitting, commenting on, and reviewing a request for an exception to the prohibition on expansion of facility capacity. We published a subsequent final rule in the **Federal Register** on November 10, 2014 (79 FR 66770, 66987 through 66997) that made certain revisions. These revisions include, among other things, permitting the use of data from an external data source, as defined in our regulations, or from the Hospital Cost Report Information System (HCRIS) for specific eligibility criteria.

As stated in our regulations at § 411.362(c)(5), we solicit community

input on a request for an exception by publishing a notice of the request in the **Federal Register**. Individuals and entities have 30 days to submit written comments on the request, which may include documentation demonstrating that the physician-owned hospital requesting the exception does or does not qualify as an “applicable hospital” or “high Medicaid facility,” as defined in § 411.362(c)(2) and (c)(3), respectively. We notify the hospital of comments received, and the hospital has 30 days after such notice to submit a rebuttal statement (§ 411.362(c)(5)(ii)). Section 411.362(c)(5) also specifies the timing for when CMS deems a request for an exception to the facility expansion prohibition complete.

If we grant the request for an exception, the expansion may occur only in facilities on the hospital’s main campus and may not result in the number of operating rooms, procedure rooms, and beds for which the hospital is licensed to exceed 200 percent of the hospital’s baseline number of operating rooms, procedure rooms, and beds (§ 411.362(c)(6)).

## III. Public Response to Notice With Comment Period

On May 8, 2015, we published a notice in the **Federal Register** (80 FR 26566) entitled, “Request for an Exception to the Prohibition on Expansion of Facility Capacity under the Hospital Ownership and Rural Provider Exceptions to the Physician Self-Referral Prohibition.” In the May 8, 2015 notice, we stated that as permitted by section 1877(i)(3) of the Act and our regulations at § 411.362(c), the following physician-owned hospital requested an exception to the prohibition on expansion of facility capacity:

*Name of Facility:* Doctors Hospital at Renaissance (DHR).

*Location:* 5501 South McColl Road, Edinburg, Texas 78539.

*Basis for Exception Request:* Applicable Hospital.

In the May 8, 2015 notice, we also solicited comments from individuals and entities in the community in which DHR is located.

We received 21 comments, 14 of which were variations of a form letter, and commenters generally opposed DHR’s request to expand.

One or more of the commenters raised questions or concerns regarding:

- Whether DHR’s request conforms to the procedural requirements set forth at § 411.362(c);
- Whether DHR demonstrated that it satisfied the population growth criterion using the data required under § 411.362(c)(2)(i);

- Whether the data source used by DHR to demonstrate satisfaction of the inpatient Medicaid admissions criterion at § 411.362(c)(2)(ii) was permissible;

- Whether DHR satisfied the non-discrimination criterion at § 411.362(c)(2)(iii);

- How a facility expansion by DHR would affect the community in which it is located; and

- The amount of increased facility capacity requested by DHR.

On June 16, 2015, as required by § 411.362(c)(5)(ii), we notified DHR that we received comments in response to the May 8, 2015 notice and that these comments were available for public viewing at <http://www.regulations.gov>. DHR submitted a rebuttal statement on July 15, 2015. The statement rebutted each of the commenters’ assertions regarding the applicable hospital eligibility criteria and addressed the concerns expressed by the commenters regarding an expansion by the hospital.

## IV. Decision

This final notice announces our decision to approve DHR’s request for an exception to the prohibition against expansion of facility capacity. As required by our current regulations and public guidance documents, DHR submitted the data and certifications necessary to demonstrate that it satisfies the criteria to qualify as an applicable hospital. Further, CMS considered the assertions of the commenters about DHR’s compliance with the procedural requirements set forth at § 411.362(c), the population growth criterion under § 411.362(c)(2)(i), the data source used by DHR to demonstrate satisfaction of the inpatient Medicaid admissions criterion at § 411.362(c)(2)(ii), and the non-discrimination criterion at § 411.362(c)(2)(iii). Following our review of the information provided by the commenters, we are not persuaded that DHR failed to satisfy one or more of the applicable hospital eligibility criteria or that its request failed to conform to our procedural requirements. Also, CMS cannot consider any concerns unrelated to the statutory and regulatory eligibility criteria when determining whether to grant an exception to a requesting hospital. In addition, if a hospital qualifies as either an applicable hospital or high Medicaid facility, CMS does not have the discretion to grant less than the requested increase in facility capacity.

In accordance with section 1877(i)(3) of the Act, we are granting DHR’s request for an exception to the prohibition against expansion of facility capacity based on the following criteria:

- DHR is located in Hidalgo County, which has a percentage increase in population that is at least 150 percent of the percentage increase in Texas' population during the most recent 5-year period for which data was available as of the date that DHR submitted its request;

- DHR has an annual percentage of total inpatient admissions under Medicaid that is equal to or greater than the average percentage with respect to such admissions for all hospitals located in Hidalgo County during the most recent 12-month period for which data are available as of the date that DHR submitted its request;

- DHR certified and provided satisfactory documentation that it does not discriminate against beneficiaries of Federal health care programs and does not permit physicians practicing at the hospital to discriminate against such beneficiaries;

- DHR is located in Texas, which has an average bed capacity that is less than the national average bed capacity during the most recent fiscal year for which HCRIS, as of the date that the hospital submitted its request, contained data from a sufficient number of hospitals to determine Texas' average bed capacity and the national average bed capacity; and

- DHR has an average bed occupancy rate that is greater than the average bed occupancy rate in Texas during the most recent fiscal year for which HCRIS, as of the date that DHR submitted its request, contained data from a sufficient number of hospitals to determine its average bed occupancy rate and Texas' average bed occupancy rate.

In determining that DHR satisfied the Medicaid inpatient admissions, bed capacity and bed occupancy criteria, we deemed the HCRIS and Texas State Medicaid Agency data used by DHR to satisfy the standards set forth in the regulations published on November 10, 2014, for those criteria.

Our approval grants DHR's request to add a total of 551 operating rooms, procedure rooms, and beds for which DHR is licensed. Pursuant to § 411.362(c)(6), the expansion may occur only in facilities on the hospital's main campus and may not result in the number of operating rooms, procedure rooms, and beds for which the hospital is licensed to exceed 200 percent of the hospital's baseline number of operating rooms, procedure rooms, and beds. DHR certified that its baseline number of operating rooms, procedure rooms, and beds for which it was licensed as of March 23, 2010, was 551. Accordingly, we find that granting the additional 551 operating rooms, procedure rooms, and beds will not exceed the limitation on a permitted expansion.

**IV. Collection of Information Requirements**

This document does not impose information collection requirements, that is, reporting, recordkeeping or third-party disclosure requirements. Consequently, there is no need for review by the Office of Management and Budget under the authority of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Dated: September 4, 2015.

**Andrew M. Slavitt,**  
*Acting Administrator, Centers for Medicare & Medicaid Services.*

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Administration for Children and Families**

**Submission for OMB Review; Comment Request**

*Title:* Goal-Oriented Adult Learning in Self-Sufficiency Study

*OMB No.:* New Collection

*Description:* The Administration for Children and Families (ACF) is proposing a data collection activity as part of the Goal-Oriented Adult Learning in Self-Sufficiency (GOALS) study. The purpose of the GOALS project is to address the nexus between the growing knowledge base in the psychological sciences and long-standing approaches to self-sufficiency programs targeted to adults and young adults. The project will explore the programmatic implications of existing research on psychological processes associated with goal-directed behaviors, including socio-emotional regulation and cognitive skills, executive functioning, and related areas. The project will synthesize current research on these topics; address how insights gained from research can be used to promote economic advancement among low-income populations, identify promising strategies, or strengthen underlying skills in these areas; and inform measurement of changes and developments in skill acquisition.

The proposed information collection activity consists of exploratory calls with program directors and administrators, semi-structured interviews with key program staff and community partner organization staff, and focus group discussions with program participants. ACF seeks to gain an in-depth, systematic understanding of program administration and implementation, service delivery and operation, outputs and outcomes, and identify promising practices and other areas for further study.

*Respondents:* Key program directors and administrators, program staff and community partner organization staff, and program participants at selected program sites.

**ANNUAL BURDEN ESTIMATES**

Instrument	Total number of respondents	Annual number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Exploratory telephone call semi-structured interview—program directors and administrators .....	24	12	1	1	12
Site visit semi-structured interview—program staff and community partner organization staff .....	180	90	1	1.25	113
Site visit group discussion—program participants .....	84	42	1	1.25	53

*Estimated Total Annual Burden Hours:* 178.

*Additional Information:* Copies of the proposed collection may be obtained by writing to the Administration for

Children and Families, Office of Planning, Research and Evaluation, 370 L'Enfant Promenade SW., Washington, DC 20447, Attn: OPRE Reports Clearance Officer. All requests should

be identified by the title of the information collection. Email address: [OPREinfocollection@acf.hhs.gov](mailto:OPREinfocollection@acf.hhs.gov).

*OMB Comment:* OMB is required to make a decision concerning the

collection of information between 30 and 60 days after publication of this document in the **Federal Register**.

Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication. Written comments and recommendations for the proposed information collection should be sent directly to the following: Office of Management and Budget, Paperwork Reduction Project, Email: [OIRA\\_SUBMISSION@OMB.EOP.GOV](mailto:OIRA_SUBMISSION@OMB.EOP.GOV), Attn: Desk Officer for the Administration for Children and Families.

**Robert Sargis,**

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket No. FDA-2015-N-3287]

#### Agency Information Collection Activities; Proposed Collection; Comment Request; Medical Device User Fee Small Business Qualification and Certification

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on Form FDA 3602 and Form FDA 3602A, which will allow domestic and foreign applicants to certify that they qualify as a small business and pay certain medical device user fees at reduced rates.

**DATES:** Submit either electronic or written comments on the collection of information by November 16, 2015.

**ADDRESSES:** Submit electronic comments on the collection of information to <http://www.regulations.gov>. Submit written comments on the collection of information to the Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852. All

comments should be identified with the docket number found in brackets in the heading of this document.

**FOR FURTHER INFORMATION CONTACT:** FDA PRA Staff, Office of Operations, Food and Drug Administration, 8455 Colesville Rd., COLE-14526, Silver Spring, MD 20993-0002, [PRAStaff@fda.hhs.gov](mailto:PRAStaff@fda.hhs.gov).

**SUPPLEMENTARY INFORMATION:** Under the PRA (44 U.S.C. 3501-3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA's functions, including whether the information will have practical utility; (2) the accuracy of FDA's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

#### Medical Device User Fee Small Business Qualification and Certification—OMB Control Number 0910-0508—Extension

Section 101 of the Medical Device User Fee and Modernization Act (MDUFMA) (Pub. L. 107-250) amends the Federal Food, Drug, and Cosmetic Act, to provide for user fees for certain medical device applications. FDA published a **Federal Register** notice on August 3, 2015 (80 FR 46033), announcing fees for fiscal year (FY) 2016. To avoid harming small

businesses, MDUFMA provides for reduced or waived fees for applicants who qualify as a small business. This means there are two levels of fees; a standard fee and a reduced or waived small business fee. You can qualify for a small business fee discount under MDUFMA if you reported gross receipts or sales of no more than \$100 million on your Federal income tax return for the most recent tax year. If you have any affiliates, partners, or parent firms, you must add their gross receipts or sales to yours, and the total must be no more than \$100 million. If your gross receipts or sales are no more than \$30 million, including all of your affiliates, partners, and parent firms, you will also qualify for a waiver of the fee for your first (ever) premarket application (product development protocol, biologics licensing application, or premarket report). An applicant must pay the full standard fee unless it provides evidence demonstrating to FDA that it meets the small business criteria (Form FDA 3602, "FY 2016 MDUFMA Small Business Qualification Certification—For a Business Headquartered in the United States"). The evidence required by MDUFMA is a copy of the most recent Federal income tax return of the applicant, and any affiliate, partner, or parent firm. FDA will review these materials and decide whether an applicant is a small business within the meaning of MDUFMA.

The 2007 Amendments provide an alternative way for a foreign business to qualify as a small business eligible to pay a significantly lower fee when a medical device user fee must be paid (Form FDA 3602A, "FY 2016 MDUFMA Foreign Small Business Qualification Certification—For a Business Headquartered Outside the United States"). Before passage of the 2007 Amendments, the only way a business could qualify as a small business was to submit a Federal (U.S.) income tax return showing its gross receipts or sales that did not exceed a statutory threshold, currently, \$100 million. If a business could not provide a Federal income tax return, it did not qualify as a small business and had to pay the standard (full) fee. Because many foreign businesses have not, and cannot, file a Federal (U.S.) income tax return, this requirement has effectively prevented those businesses from qualifying for the small business fee rates. Thus, foreign governments, including the European Union, have objected. In lieu of a Federal income tax return, the 2007 Amendments will allow a foreign business to qualify as a small business by submitting a

certification from its national taxing authority, the foreign equivalent of our Internal Revenue Service. This certification, referred to as a “National Taxing Authority Certification”, must: Be in English; be from the national taxing authority of the country in which the business is headquartered; provide the business’ gross receipts or sales for the most recent year, in both the local currency and in U.S. dollars, and the exchange rate used in converting local currency to U.S. dollars; provide the dates during which the reported receipts or sales were collected; and bear the

official seal of the national taxing authority.

Both Forms FDA 3602 and FDA 3602A are available in the guidance document, “FY 2016 Medical Device User Fee Small Business Qualification and Certification; Guidance for Industry, Food and Drug Administration Staff, and Foreign Governments” available on the Internet at: <http://www.fda.gov/ucm/groups/fdagov-public/@fdagov-meddev-gen/documents/document/ucm456779.pdf>. This guidance describes the criteria FDA will use to decide whether an entity qualifies as a MDUFMA small business and will help

prospective applicants understand what they need to do to meet the small business criteria for FY 2016.

The estimated burden is based on the number of applications received in the last 3 years and includes time required to collect the required information. Based on our experience with Form FDA 3602, FDA believes it will take each respondent 1 hour to complete the form. Based on our experience with Form FDA 3602A, FDA also believes that it will take each respondent 1 hour to complete.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN <sup>1</sup>

FDA form no.	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
FDA 3602—FY 2016 MDUFA Small Business Qualification and Certification For a Business Headquartered in the United States .....	3,600	1	3,600	1	3,600
FDA 3602A—FY 2016 MDUFA Foreign Small Business Qualification and Certification For a Business Headquartered Outside the United States .....	1,400	1	1,400	1	1,400
Total .....					5,000

<sup>1</sup> There are no capital costs or operating and maintenance costs associated with this collection of information.

Dated: September 11, 2015.

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Food and Drug Administration**

[Docket No. FDA–2012–D–0429]

**Agency Information Collection Activities; Proposed Collection; Comment Request; Guidance on Meetings With Industry and Investigators on the Research and Development of Tobacco Products**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, and to allow 60 days for

public comment in response to the notice. This notice solicits comments on FDA’s meetings with tobacco manufacturers, importers, researchers, and/or investigators relating to their plans to conduct research to inform the regulation of tobacco products, or support the development or marketing of tobacco products.

**DATES:** Submit either electronic or written comments on the collection of information by November 16, 2015.

**ADDRESSES:** Submit electronic comments on the collection of information to <http://www.regulations.gov>. Submit written comments on the collection of information to the Division of Dockets Management (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

**FOR FURTHER INFORMATION CONTACT:** FDA PRA Staff, Office of Operations, Food and Drug Administration, 8455 Colesville Rd., COLE–14526, Silver Spring, MD 20993–0002, [PRAStaff@fda.hhs.gov](mailto:PRAStaff@fda.hhs.gov).

**SUPPLEMENTARY INFORMATION:** Under the PRA (44 U.S.C. 3501–3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of

information they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, FDA is publishing notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, FDA invites comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA’s functions, including whether the information will have practical utility; (2) the accuracy of FDA’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use

of automated collection techniques, when appropriate, and other forms of information technology.

### Guidance on Meetings With Industry and Investigators on the Research and Development of Tobacco Products

(OMB Control Number 0910-0731)—  
*Extension*

The Family Smoking Prevention and Tobacco Control Act (Pub. L. 111-31) offers tobacco product manufacturers several pathways to obtain an order from FDA to authorize the marketing of a tobacco product before it may be introduced or delivered into interstate commerce. To provide assistance with these pathways to market particular products, FDA will meet with tobacco product manufacturers, importers, researchers, and investigators (or their representatives) when appropriate. This guidance is intended to assist persons who seek meetings with FDA relating to their research to inform the regulation of tobacco products, or to support the development or marketing of tobacco products. In the guidance, the Agency discusses, among other things:

- What information FDA recommends persons include in a meeting request,
- How and when to submit a request, and
- What information FDA recommends persons submit prior to a meeting.

This guidance describes two collections of information: (1) The submission of a meeting request containing certain information and (2) the submission of an information package in advance of the meeting. The purpose of this proposed information collection is to allow FDA to conduct meetings with tobacco manufacturers, importers, researchers, and investigators in an effective and efficient manner. FDA issued this guidance as a level 2 guidance consistent with FDA's good guidance practices regulations (21 CFR 10.115).

*Meeting Requests:* Section IV.E of the guidance sets forth FDA's recommendations for materials to be included in a request for a meeting with FDA to discuss the research and development of tobacco products. In the guidance, FDA recommends that the

following information be included in the meeting request:

1. Product name and FDA-assigned Submission Tracking Number (if applicable);
2. Product category (e.g., cigarettes, smokeless tobacco) (if applicable);
3. Product use (indicate for consumer use or for further manufacturing);
4. Contact information for the authorized point of contact for the company requesting the meeting;
5. The topic of the meeting being requested;
6. A brief statement of the purpose of the meeting, which could include a discussion of the types of studies or data to be discussed at the meeting, the general nature of the primary questions to be asked, and where the meeting fits in the overall product development plans;
7. A draft list of the specific objectives/outcomes expected from the meeting;
8. A preliminary proposed agenda, including estimated amounts of time needed for each agenda item and designated speaker(s);
9. A draft list of specific questions, grouped by discipline (e.g., chemistry, clinical, nonclinical);
10. A list of all individuals (including titles and responsibilities) who will attend the meeting on behalf of the tobacco product manufacturer, importer, researcher, or investigator;
11. The approximate date on which supporting documentation (i.e., the meeting information package) will likely be received by FDA; and
12. Suggested dates and times for the meeting (note that generally a meeting will be scheduled for 1 hour).

This information will be used by the Agency to: (1) Determine the utility of the meeting, (2) identify Agency staff necessary to discuss proposed agenda items, and (3) schedule the meeting.

*Meeting Information Packages:* An individual submitting a meeting information package to FDA in advance of a meeting should provide summary information relevant to the product and supplementary information pertaining to any issue raised by the individual or FDA to be discussed at the meeting. As stated in section IV.K of the guidance, FDA recommends that meeting information packages generally include

updated information from the meeting request (see items 1 through 8 in section III.A of this document) and:

1. Product composition and design (as applicable);
2. Manufacturing and process control data summary (as applicable);
3. Nonclinical data summary (as applicable);
4. Clinical data summary (as applicable);
5. Behavioral and product use data summary (as applicable);
6. User and nonuser perception data summary (as applicable); and
7. Investigational plans for studies and surveillance of the tobacco product, including a summary of proposed study protocols containing the following information (as applicable):
  - a. Study objective(s),
  - b. Study hypotheses,
  - c. Study design,
  - d. Study population (inclusion/exclusion criteria, comparison group(s)),
  - e. Human subject protection information, including Institutional Review Board information,
  - f. Primary and secondary endpoints (definition and success criteria),
  - g. Sample size calculation,
  - h. Data collection procedures,
  - i. Duration of follow up and baseline and follow up assessments, and
  - j. Data analysis plan(s).

The purpose of the information package is to provide Agency staff the opportunity to adequately prepare for the meeting, including the review of relevant data concerning the product. In the Agency's experience, reviewing such information is critical to achieving a productive meeting. For the information that was previously submitted in the meeting request, the information package should provide updated information that reflects the most current and accurate information available.

*Description of Respondents:* The respondents to this collection of information are manufacturers, importers, researchers, and investigators of tobacco products who seek to meet with FDA to discuss their plans regarding the development or marketing of a tobacco product.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN<sup>1</sup>

Activity	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
Meeting Requests					
Combining and Sending Meeting Request Letters for Manufacturers, Importers, and Researchers .....	67	1	67	10	670
Meeting Information Packages					
Combining and Submitting Meeting Information Packages for Manufacturers, Importers, and Researchers .....	67	1	67	18	1,206
Total .....					1,876

<sup>1</sup> There are no capital costs or operating and maintenance costs associated with this collection of information.

FDA's estimate of the number of respondents for meeting requests in Table 1 of this document is based on the number of meeting requests to be received over the next 3 years.

In the next three years of this collection, FDA estimates that 67 pre-application meetings will be requested. The number is not expected to change, as the public is more experienced in submitting applications for substantial equivalence, requests for non-substantial equivalence, etc.

Thus, FDA estimates the number of manufacturers, importers, researchers, and investigators who are expected to submit meeting requests in Table 1 of this document to be 67 (50 year 1 requests + 100 year 2 requests + 50 year 3 requests divided by 3). The hours per response, which is the estimated number of hours that a respondent would spend preparing the information recommended by this guidance to be submitted with a meeting request is estimated to be approximately 10 hours each, and the total burden hours are 670 hours (10 hours preparation/ mailing times 67 average respondents per year). Based on FDA's experience, the Agency expects it will take respondents this amount of time to prepare, gather, copy, and submit brief statements about the product and a description of the purpose and details of the meeting.

FDA's estimate of the number of respondents for compiling meeting information packages in Table 1 of this document is based on 67 respondents each preparing copies of their information package and submitting them to FDA, for a total of 1,206 hours annually. The hours per response, which is the estimated number of hours that a respondent would spend preparing the information package as recommended by the guidance, is estimated to be approximately 18 hours per information package. Based on FDA's experience, the Agency expects

that it will take respondents 1,206 hours of time (67 respondents times 18 hours) to gather, copy, and submit brief statements about the product, a description of the details of the anticipated meeting, and data and information that generally would already have been generated for the planned research and/or product development.

The total number of burden hours for this collection of information is 1,876 hours (67 hours to prepare and submit meeting requests and 1,206 hours to prepare and submit information packages).

Dated: September 11, 2015.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket No. FDA-2012-N-0021]

#### Agency Information Collection Activities; Proposed Collection; Comment Request; Substances Generally Recognized as Safe; Notification Procedure

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA or we) is announcing an opportunity for public comment on the proposed collection of certain information by the Agency. Under the Paperwork Reduction Act of 1995 (the PRA), Federal Agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an

existing collection of information, and to allow 60 days for public comment in response to the notice. This notice solicits comments on the information collection provisions of the Notification Procedure for Substances Generally Recognized as Safe (GRAS).

**DATES:** Submit either electronic or written comments on the collection of information by November 16, 2015.

**ADDRESSES:** Submit electronic comments on the collection of information to <http://www.regulations.gov>. Submit written comments on the collection of information to the Division of Dockets Management (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852. All comments should be identified with the docket number found in brackets in the heading of this document.

**FOR FURTHER INFORMATION CONTACT:** FDA PRA Staff, Office of Operations, Food and Drug Administration, 8455 Colesville Rd., COLE-14526, Silver Spring, MD 20993-0002, [PRAStaff@fda.hhs.gov](mailto:PRAStaff@fda.hhs.gov).

**SUPPLEMENTARY INFORMATION:** Under the PRA (44 U.S.C. 3501-3520), Federal Agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes Agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal Agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this

requirement, we are publishing this notice of the proposed collection of information set forth in this document.

With respect to the following collection of information, we invite comments on these topics: (1) Whether the proposed collection of information is necessary for the proper performance of FDA’s functions, including whether the information will have practical utility; (2) the accuracy of our estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques, when appropriate, and other forms of information technology.

**Substances Generally Recognized as Safe: Notification Procedure—21 CFR 170.36 and 570.36**

(OMB Control Number 0910–0342)—  
Extension

Section 409 of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 348) establishes a premarket approval requirement for “food additives”;

section 201(s) of the FD&C Act (21 U.S.C. 321(s)) provides an exclusion to the definition of “food additive” and thus from the premarket approval requirement, for uses of substances that are GRAS by qualified experts. In the **Federal Register** of April 17, 1997 (62 FR 18938), we published a proposed rule that would establish a voluntary procedure whereby manufacturers would notify us about a view of a particular use (or uses) of a substance is not subject to the statutory premarket approval requirements based on a determination that such use is GRAS. Under an interim policy announced in the proposed rule, we invited manufacturers to submit notices of their independent determinations for review under the framework of the proposed rule during the period between issuance of the proposal and any final rule based on the proposal. The proposed regulations (proposed 21 CFR 170.36 and 21 CFR 570.36) provide a standard format for the voluntary submission of a notice.

To assist respondents in submissions to our Center for Food Safety and Applied Nutrition (CFSAN), we developed Form FDA 3667 entitled “Generally Recognized as Safe Notice.”

The form, and elements prepared as attachments to the form, may be submitted in electronic format via the Electronic Submission Gateway (ESG), or may be submitted in paper format, or as electronic files on physical media with paper signature page. While we do not expect Form FDA 3667 to reduce reporting time for respondents, use of the form helps to expedite our review of the information being submitted. For submissions to our Center for Veterinary Medicine (CVM), respondents may continue to send GRAS notices in letter format to the Agency, as instructed in our **Federal Register** notice of June 4, 2010 (75 FR 31800).

Presently, we have committed to issuing a final rule regarding “Substances Generally Recognized as Safe” in 2016, as part of a settlement agreement with the Center for Food Safety, which filed a lawsuit in 2014 seeking to vacate our 1997 proposed rule.

*Description of Respondents:* The respondents to this collection of information are manufacturers of substances used in food and feed.

We estimate the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN <sup>1</sup>

21 CFR part	FDA Form No. <sup>2</sup>	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
170.36 (CFSAN) .....	FDA 3667 <sup>3</sup> .....	40	1	40	150	6,000
570.36 (CVM) .....	N/A .....	20	1	20	150	3,000
Total .....	.....	.....	.....	.....	.....	9,000

<sup>1</sup> There are no capital costs or operating and maintenance costs associated with this collection of information.

<sup>2</sup> Only CFSAN uses Form FDA 3667.

<sup>3</sup> Form FDA 3667 may be submitted electronically via the ESG.

TABLE 2—ESTIMATED ANNUAL RECORDKEEPING BURDEN <sup>1</sup>

21 CFR part	Number of recordkeepers	Number of records per recordkeeper	Total annual records	Average burden per recordkeeping	Total hours
170.36(c)(v) (CFSAN) .....	40	1	40	15	600
570.36(c)(v) (CVM) .....	20	1	20	15	300
Total .....	.....	.....	.....	.....	900

<sup>1</sup> There are no capital costs or operating and maintenance costs associated with this collection of information.

For purposes of this extension request, we are retaining our 2012 estimates. The PRA analysis for the GRAS final rule will take into account any changes to the GRAS notification procedure as set forth in the final rule and we will revise the collection accordingly.

Dated: September 11, 2015.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket No. FDA-2015-N-0001]

#### Pediatric Oncology Subcommittee of the Oncologic Drugs Advisory Committee; Notice of Meeting

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). The meeting will be open to the public.

*Name of Committee:* Pediatric Oncology Subcommittee of the Oncologic Drugs Advisory Committee.

*General Function of the Committee:* To provide advice and recommendations to the Agency on FDA's regulatory issues.

*Date and Time:* The meeting will be held on November 19, 2015, from 8 a.m. to 1 p.m.

*Location:* FDA White Oak Campus, 10903 New Hampshire Ave., Bldg. 31 Conference Center, the Great Room (Rm. 1503), Silver Spring, MD 20993-0002. Answers to commonly asked questions including information regarding special accommodations due to a disability, visitor parking, and transportation may be accessed at: <http://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm>.

*Contact Person:* Lauren D. Tesh, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 31, Rm. 2417, Silver Spring, MD 20993-0002, 301-796-9001, FAX: 301-847-8533, [ODAC@fda.hhs.gov](mailto:ODAC@fda.hhs.gov), or FDA Advisory Committee Information Line, 1-800-741-8138 (301-443-0572 in the Washington, DC area). A notice in the **Federal Register** about last minute modifications that impact a previously

announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the Agency's Web site at <http://www.fda.gov/AdvisoryCommittees/default.htm> and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before coming to the meeting.

*Agenda:* Information will be presented to gauge investigator interest in exploring potential pediatric development plans for two products in various stages of development for adult cancer indications. The subcommittee will consider and discuss issues concerning diseases to be studied, patient populations to be included, and possible study designs in the development of these products for pediatric use. The discussion will also provide information to the Agency pertinent to the formulation of written requests for pediatric studies, if appropriate. The products under consideration are: (1) ABT-414, application submitted by AbbVie, Inc., and (2) Lenvatinib, application submitted by Eisai, Inc.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its Web site prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA's Web site after the meeting. Background material is available at <http://www.fda.gov/AdvisoryCommittees/Calendar/default.htm>. Scroll down to the appropriate advisory committee meeting link.

*Procedure:* Interested persons may present data, information, or views, orally or in writing, on issues pending before the subcommittee. Written submissions may be made to the contact person on or before November 4, 2015. Oral presentations from the public will be scheduled between approximately 9:05 a.m. to 9:35 a.m., and 11:30 a.m. to 12 noon. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before October 27, 2015. Time allotted for each presentation may be limited. If the number of registrants

requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by October 28, 2015.

Persons attending FDA's advisory committee meetings are advised that the Agency is not responsible for providing access to electrical outlets.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact Lauren D. Tesh at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our Web site at <http://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm> for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: September 14, 2015.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Health Resources and Services Administration

#### Alliance for Innovation on Maternal and Child Health Cooperative Agreement

**AGENCY:** Health Resources and Services Administration (HRSA), Department of Health and Human Services (HHS).

**ACTION:** Notice of Single-Case Deviation from Competition Requirement for the Alliance for Innovation on Maternal and Child Health Cooperative Agreement at the Association of State and Territorial Health Officials, Grant Number UC4MC28036.

**SUMMARY:** HRSA announces the award of a program expansion supplement in the amount of \$100,000 for the Alliance for Innovation on Maternal and Child Health (AIM) cooperative agreement. The purpose of the AIM cooperative agreement, as stated in the funding

opportunity announcement (FOA), is to expand access to care for the maternal and child health (MCH) populations through the following program focus areas: (1) Ensuring continuity of coverage and care for pregnant women and children; (2) improving systems of care for children with special health care needs; and (3) promoting the use of Bright Futures Guidelines for all children. The program expansion supplement will provide funds to the Association of State and Territorial State Health Officials (ASTHO), the cooperative agreement awardee, during the budget period of September 30, 2015, through September 29, 2016, to provide targeted technical assistance to two States at risk for rapid transmission of HIV and Hepatitis C virus (HCV) through injection drug use, to build capacity and expand access to care, document and share best practices with other State Health Officials also seeking to prevent HIV and HCV infection through injection drug use.

**SUPPLEMENTARY INFORMATION:** Intended Recipient of the Award: The Association of State and Territorial Health Officials  
*Amount of the Non-Competitive Award:* \$100,000  
*CFDA Number:* 93.110  
*Current Project Period:* 9/30/2014–9/29/2017  
*Period of Supplemental Funding:* 9/30/2015–9/29/2016

**Authority:** Social Security Act, Title V, § 501(a)(2) (42 U.S.C. 701(a)(2)).

**Justification:** On April 24, 2015, the Governor of Indiana declared a public health disaster emergency in Scott County, Indiana, attributable to the HIV

epidemic in that county. On the same day, the Centers for Disease Control and Prevention issued a Health Alert Network Advisory to inform other public health departments and healthcare providers of the possibility of HIV outbreaks among persons who inject drugs and to provide guidance to assist in the identification and prevention of such outbreaks. As of August 28, 2015, the Indiana outbreak is now 181 (177 confirmed and 4 presumptive positive) adult and adolescent HIV infections, including a small number of pregnant women. Though there are HIV prevention best practices to inform States, additional innovative practices are needed to reach women of child-bearing age, adolescents, and young adults within high risk counties, which do not routinely access health care.

As stated in the FOA, the Alliance for Innovation on Maternal and Child Health (AIM) is a Maternal and Child Health Bureau (MCHB) collaborative program of awardee organizations for the purpose of expanding access to care for the maternal and child health (MCH) populations. Per the FOA, AIM Collaborative Engagement awardees are responsible for engaging key State agencies and offices (*i.e.*, Public Health and Medicaid) in AIM activities and raising awareness of best practices.

In 2014, following objective review of its application, HRSA awarded the Association of State and Territorial Health Officials (ASTHO) cooperative agreement funding as an AIM Collaborative Engagement program. If approved, this would be the first

program expansion supplement for this cooperative agreement.

ASTHO is the national nonprofit organization representing public health agencies in the United States, the U.S. Territories, the District of Columbia, and over 100,000 public health professionals these agencies employ. As part of its AIM cooperative agreement, ASTHO identifies and disseminates best practices to meet the needs of MCH populations. At the time of the FOA and application, expanding access to care among high risk populations to prevent HIV infection through injection drug use was not yet identified as a need of MCH populations. As such, the FOA and application did not address it.

To meet this emerging need, ASTHO submitted a prior approval request to expand the scope of its AIM cooperative agreement award to work with States at risk for rapid transmission of HIV and HCV through injection drug use. ASTHO, working with MCHB, would provide targeted technical assistance to two states to build capacity and expand access to care among high risk populations to prevent HIV and HCV infection through injection drug use. ASTHO would also document and share best practices and other technical assistance resources from the two targeted states to its network of State Health Officials.

**BILLING CODE 4165-15-P**

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Health Resources and Services Administration**

**Centers of Excellence in Maternal and Child Health in Education, Science, and Practice Program**

**AGENCY:** Health Resources and Services Administration (HRSA), Department of Health and Human Services (HHS).

**ACTION:** Notice of Single-Case Deviation from Competition Requirements for Program Expansion Supplement Request for Centers of Excellence in Maternal and Child Health in

Education, Science, and Practice program Award to the University of Washington, Grant Number T76MC00011.

**SUMMARY:** HRSA announces the award of a program expansion supplement in the amount of \$40,000 for the Centers of Excellence in Maternal and Child Health (MCH) in Education, Science, and Practice grant. The purpose of the Centers of Excellence in MCH program is for the training of graduate and post-graduate public health professionals in an interdisciplinary MCH setting. The purpose of this notice is to award supplemental funds to conduct a rigorous evaluation of the Pediatric

Obesity Collaborative Improvement and Innovation Network (CoIIN) to spread evidence-based practices, and to translate knowledge into practice by the University of Washington, the awardee who serves as the Centers of Excellence in MCH, during the budget period of June 1, 2015, through May 31, 2016.

**SUPPLEMENTARY INFORMATION:**

*Intended Recipient of the Award:* University of Washington  
*Amount of Each Non-Competitive Award:* \$40,000  
*Period of Supplemental Funding:* 6/1/2015–5/31/2016  
*CFDA Number:* 93.110

**Authority:** Social Security Act as amended, Title V, Section 501(a)(2) (42 U.S.C. 701(a)(2))

**Justification:** The purpose of the Centers of Excellence in MCH program is for the training of graduate and post-graduate public health professionals in an interdisciplinary MCH setting. The Centers of Excellence in MCH program supports HRSA’s Maternal and Child Health Bureau’s (MCHB) mission to provide national leadership and to work, in partnership with states, communities, public-private partners, and families to strengthen the MCH infrastructure and build the knowledge and human resources in order to assure continued improvement in the health,

safety, and well-being of the MCH population, which includes all U.S. women, infants, children, youth and their families, including fathers and children with special health care needs (CSHCN). It does so by training current and future workforce in applied research and state-of-the-art public health management, planning, and leadership principles to promote healthier children, families, and communities and in the identification and solution of current MCH problems while anticipating the challenges of the future. It assures a prominent focus on MCH content and competencies such as inter-professional practice, systems integration, and quality improvement within schools of public health.

In the summer of 2014, MCHB initiated a CoIIN on Pediatric Obesity in collaboration with the University of Washington and the Association of State Public Health Nutritionists (ASPHN). The work on this project (by the University of Washington) was funded through an administrative supplement in fiscal year (FY) 2014 to a previous grant, and the amount provided only allowed the grantee and its subcontractor to engage a limited number of steps in the CoIIN process.

This supplement will allow the University of Washington, in

collaboration with ASPHN, to complete the final phases of the evaluation component for the previously initiated Pediatric Obesity CoIIN. The goal of this CoIIN project is to apply quality improvement methodologies through a CoIIN framework to support state Title V agencies and others leverage for state MCH program capacity to reduce childhood obesity rates on a population level. Specifically, state teams are working to affect systems changes through the adoption of policies and practices in early care and education settings that support healthy weight behaviors and are using the CoIIN model to gather best practices, promote evidence-based strategies, and increase nutrition resources provided to young children and their families. A rigorous evaluation of this CoIIN is a critical and essential component in order to spread evidence-based practices—including qualitative and quantitative process and outcome measures—and translate knowledge into practice.

**BILLING CODE 4165-15-P**

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Health Resources and Services Administration**

**Bridging the Word Gap Competition Challenge**

**AGENCY:** Health Resources and Services Administration (HRSA, Department of Health and Human Services (HHS)).

**ACTION:** Notice.

**SUMMARY:** The Health Resources and Services Administration (HRSA), Maternal and Child Health Bureau (MCHB), announces the funding

opportunity for the Bridging the Word Gap Incentive Prize Challenge.

MCHB is sponsoring the Word Gap Challenge (Challenge) to spur innovative solutions to promote the early language environment and address the “word gap,” the large difference in exposure to language for children from low-income families as compared to children from higher-income families. This Challenge will reward the development and testing of scalable innovations that drive behavior change among parents and caregivers.

The goal of the Challenge is to develop a low-cost, scalable technologically-based intervention that drives parents and caregivers to talk and engage in more back-and-forth interactions with their young children (ages 0–4).

This Challenge, structured in three phases, with a narrowing of applicants through each phase to result in one final winner, will reach a diverse population of innovators and solvers, including

coders, public health experts, individuals affiliated with academic institutions, research and development communities in the private sector, and others.

All submissions will be evaluated; separate prizes will be awarded for each of the three phases below.

- Phase 1: Design
- Phase 2: Development and Small Scale Testing
- Phase 3: Scaling

The statutory authority for this challenge competition is Section 105 of the America COMPETES Reauthorization Act of 2010 (COMPETES Act, *Pub. L. 111-358*).

Estimated dates for each phase are as follows:

- Phase 1: Effective on September 30, 2015
- Phase 1 Submission ends: December 31, 2015, 11:59 p.m. ET
- Phase 1 Judging Period: January 1–January 31, 2016

Phase 1 Winners Announced: February 10, 2016  
 Phase 2 Begins: February 11, 2016  
 Phase 2 Submission Period Ends: July 11, 2016  
 Phase 2 Judging Period: July 12–August 12, 2016  
 Phase 2 Winners Announced: August 20, 2016  
 Phase 3 Begins: August 21, 2016  
 Phase 3 Submission Period Ends: February 21, 2017  
 Phase 3 Winner Announced: March 1, 2017

**FOR FURTHER INFORMATION CONTACT:**

Jessie Buerlein, MSW, 301–443–8931, or James Resnick, 301–443–3222.

**SUPPLEMENTARY INFORMATION:**

**Subject of Challenge Competition**

There is evidence that socioeconomic status (SES) is a strong indicator of school achievement, and that children from lower SES backgrounds exhibit a delay in early literacy skills, a slower vocabulary acquisition rate, and lower school readiness rates.<sup>1</sup> Once American children enter kindergarten, there is a significant, prevalent gap between children from higher versus lower SES backgrounds in average oral language skills,<sup>2</sup> referred to as the “word gap.” There is also growing evidence that early language exposure for children may not only have a significant influence on language development and school achievement, but on the overall trajectory of children’s lives, including later academic and occupation success.<sup>3</sup> Existing literature reveals several key themes in addressing the language gap, including the significant role of the caregiver in the home, and the effectiveness of engaging parents in language interventions.<sup>4</sup> A significant influence on children’s language development is the context of parenting and parent responsiveness to children’s early language acquisition.<sup>5</sup> Research in

this area shows that both the quality and quantity of speech spoken at home during daily interactions influences the relationship between SES and child language skills at school entry.<sup>6</sup> However, research also shows that interventions engaging parents and increasing their knowledge of child development and the importance of child-directed talk may be an effective route to preventing and addressing the SES language gap.<sup>7</sup>

The research base has improved markedly over the last two decades, making a strong case that addressing the word gap is a critical social challenge that may help promote equitable opportunity for all children. The frequency and quality of child-directed talk and back and forth interactions between children and their parents have consequences for what is learned and is associated with significant disparities in vocabulary size, school readiness, and long-term educational outcomes.

Technologies now exist to support low-cost, broadly scalable approaches to helping parents and caregivers focus on the early language environment, and the technical expertise exists to address the issue in creative ways. This challenge aims to cultivate an environment to attract a broad array of innovators from outside disciplines to propose inventive, creative, and effective ideas to address the word gap by encouraging higher frequency and higher quality interaction between parents/caregivers and children. This is an opportunity for applicants to get national visibility, by the leading experts and organizations in the field, for new ideas on solving this problem of national importance. This is also an opportunity for applicants to access testing environments and design expertise as they move forward through the Challenge phases.

When developing submissions, participants should consider the context of the user. The submission should be easily utilized by those of diverse cultural, socioeconomic, and literacy level backgrounds, including parents and children who are dual language speakers.

**Eligibility Rules for Participating in the Competition**

To be eligible to win a prize under this challenge, an individual or entity—

(1) Shall have registered to participate in the competition under the rules

promulgated by the Health Resources and Services Administration and the U.S. Department of Health and Human Services.

(2) Shall have complied with all the requirements under this section.

(3) In the case of a private entity, shall be incorporated in and maintain a primary place of business in the United States, and in the case of an individual, whether participating singly or in a group, shall be a citizen or permanent resident of the United States.

(4) May not be a federal entity or federal employee acting within the scope of their employment.

(5) Shall not be an HHS employee working on their applications or submissions during assigned duty hours.

(6) May not be employees of HRSA or any other company, organization, or individual involved with the design, production, execution, judging, or distribution of the Challenge and their immediate family (*i.e.*, spouse, parents and step-parents, siblings and step-siblings, and children and step-children) and household members (*i.e.*, people who share the same residence at least 3 months out of the year).

(7) In the case of a federal grantee, may not use federal funds to develop COMPETES Act challenge applications unless consistent with the purpose of their grant award.

(8) In the case of a federal contractor, may not use federal funds from a contract to develop COMPETES Act challenge applications or to fund efforts in support of a COMPETES Act challenge submission.

(9) Shall not be deemed ineligible because the individual or entity used federal facilities or consulted with federal employees during a competition if the facilities and employees are made equitably available to all individuals and entities participating in the competition.

(10) Must agree to assume any and all risks and waive claims against the federal government and its related entities, except in the case of willful misconduct, for any injury, death, damage, or loss of property, revenue, or profits, whether direct, indirect, or consequential, arising from my participation in this prize contest, whether the injury, death, damage, or loss arises through negligence or otherwise.

(11) Must also agree to indemnify the federal government against third party claims for damages arising from or related to competition activities.

(12) Shall not be currently on the Excluded Parties List (<https://www.epls.gov/>).

## Submission Requirements

The Challenge has three phases.

### Phase 1—Design

The first stage of the prize competition aims to attract a large set of ideas and innovators. The target product of the first stage will be the conceptualization of the most promising innovations to help support parental and caregiver behavior change around the early language environment. The submissions should aim to demonstrate that the proposed intervention will be accessible across diverse backgrounds and easily implemented by users.

The Phase 1 Submission shall include:

1. A comprehensive description of the proposed intervention in 5 pages or less, including:

- a. A one-paragraph executive summary that clearly states the question to be solved;
- b. Background information linking the evidence to support the intervention;
- c. A descriptive analysis of how the applicant arrived at their idea;
- d. Descriptions of the methods and technologies involved in implementation of the intervention; and

2. An assessment describing the applicant's ability to execute the proposed solution in Phase 2 and 3.

### Phase 2—Development and Small Scale Testing

The winners of Phase 1 of the prize competition will then advance to a second stage focused on prototyping the intervention, and testing the effectiveness of the intervention. Using support from the Phase 1 prize funding, intervention developers will test the efficacy of their models to show that the proposed intervention demonstrates an impact on the outcomes of interest for children and families. The applicants should demonstrate both the evidence base for the intervention and its usability. Mentors will be made available to help solvers design appropriate testing methodologies and learn more about the evidence base.

### Phase 3—Scaling

The winners of Phase 2 will move to the final phase of the Word Gap Incentive Prize, which will involve testing the most promising models at greater scale through rollout at the program or community level. This will test the scalability of the device at low-cost, the feasibility of implementation, and the impact on the intended outcomes. Applicants will be assisted in matching their submission with a community or program.

## Registration Process for Participants

Participants can find out more information at <https://www.challenge.gov/list/>.

### Prizes

- Total: Up to \$300,000 in Prizes
  - Phase 1: 7–10 winners, up to \$10,000 each
  - Phase 2: 3–5 winners; up to \$25,000 each
  - Phase 3: 1 winner; up to \$100,000

### Payment of the Prizes

Prize will be paid by HRSA's Maternal and Child Health Bureau.

### Basis for Winner Selection

The challenge entries will be de-identified and then will be judged by a review panel composed of HHS employees and experts in compliance with the requirements of the COMPETES Act and the Department of Health and Human Services judging guidelines: <http://www.hhs.gov/idealab/wp-content/uploads/2014/04/HHS-COMPETITION-JUDGING-GUIDELINES.pdf>. The review panel will make selections based upon the following criteria:

#### Phase 1

In Phase 1, proposed interventions to be judged on the following criteria:

#### Accessibility

- Is the proposed intervention able to be easily utilized by parents of diverse economic, social, and cultural backgrounds? Is it functional across disciplines/users?

#### Measurability

- How easily will the proposed intervention be evaluated in order to determine its efficacy (in both lab testing and in the real world)? Is the proposed intervention measurable among various audiences?

#### Sustainability

- Is the proposed intervention "sticky?" Does it fit into daily life? Is it fun to use?

#### Impact

- Does the applicant present a theory or explanation of how the proposed intervention would inspire behavior change?

#### Phase 2

In Phase 2, interventions will be judged on the following criteria:

#### Impact

- How did the intervention impact target outcomes for parents/caregivers and children? What did the data show?

#### Evidence base

- Is the intervention grounded in existing science related to the word gap, behavior change, etc.?

#### Sustainability

- Was the intervention "sticky" among users? Did users want to continuously engage with the program?

#### Implementation

- How feasible is the intervention? How much support for implementation will the intervention require (estimated financial and time commitment)?

#### Phase 3

In Phase 3, interventions will be judged on the following criteria:

#### Impact

- How effective was the intervention when implemented at scale? Did the impacts on parents/caregivers from Phase 2 remain consistent?

#### Implementation

- How feasible was the intervention on a larger scale? How much support for implementation did the model require (financial and time commitment)? How challenging was the actual program implementation?

#### Scalability

- How costly was the intervention in a real-world setting? How likely are cost efficiencies for program delivery at greater scale? Can the device be used in existing platforms?

In order for an entry to be eligible to win this Challenge, it must meet the following requirement:

#### Additional Information

General Conditions: HRSA reserves the right to cancel, suspend, and/or modify the contest, or any part of it, for any reason, at HRSA's sole discretion.

The interventions submitted across all phases should not use the HHS or HRSA logos or official seals in the submission, and must not claim endorsement.

#### Intellectual Property

- Each entrant retains full ownership and title in and to their submission. Entrants expressly reserve all intellectual property rights not expressly granted under the challenge agreement.
- By participating in the challenge, each entrant hereby irrevocably grants to HRSA a limited, non-exclusive, royalty-free, worldwide license and right to reproduce, publically perform, publically display, and use the submission for internal HHS business and to the extent necessary to

administer the challenge, and to publically perform and publically display the submission, including, without limitation, for advertising and promotional purposes relating to the challenge.

- **Record Retention and FOIA:** All materials submitted to HRSA as part of a submission become HRSA records and cannot be returned. Any confidential commercial information contained in a submission should be designated at the time of submission. Submitters will be notified of any Freedom of Information Act requests for their submissions in accordance with 45 CFR 5.65.

Dated: September 14, 2015.

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Enabling Bioanalytical and Imaging Technologies.

*Date:* October 20, 2015.

*Time:* 8:00 a.m. to 8:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Residence Inn Washington, DC Downtown, 1199 Vermont Ave NW., Washington, DC 20005.

*Contact Person:* Kenneth Ryan, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3218, MSC 7717, Bethesda, MD 20892, 301-435-0229, [kenneth.ryan@nih.hhs.gov](mailto:kenneth.ryan@nih.hhs.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Urologic and Urogynecologic Applications.

*Date:* October 22, 2015.

*Time:* 8:00 a.m. to 6:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Crowne Plaza Washington National Airport, 1489 Jefferson Davis Hwy, Arlington, VA 22202.

*Contact Person:* Ryan G. Morris, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4205, MSC 7814, Bethesda, MD 20892, 301-435-1501, [morrisr@csr.nih.gov](mailto:morrisr@csr.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Fellowship: Immunology.

*Date:* October 22–23, 2015.

*Time:* 8:00 a.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Embassy Suites at the Chevy Chase Pavilion, 4300 Military Road NW., Washington, DC 20015.

*Contact Person:* Alok Mulky, Ph.D., Scientific Review Officer, Center for Scientific Review (CSR), National Institutes of Health (NIH), 6701 Rockledge Dr, Room 4203, Bethesda, MD 20817, (301) 435-3566, [alok.mulky@nih.gov](mailto:alok.mulky@nih.gov).

*Name of Committee:* Molecular, Cellular and Developmental Neuroscience Integrated Review Group; Synapses, Cytoskeleton and Trafficking Study Section.

*Date:* October 22–23, 2015.

*Time:* 8:00 a.m. to 11:00 a.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Pier 2620 Hotel Fisherman's Wharf, 2620 Jones Street, San Francisco, CA 94133.

*Contact Person:* Christine A. Piggee, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4186, MSC 7850, Bethesda, MD 20892, 301-435-0657, [christine.piggee@nih.gov](mailto:christine.piggee@nih.gov).

*Name of Committee:* Immunology Integrated Review Group; Immunity and Host Defense Study Section.

*Date:* October 22–23, 2015.

*Time:* 8:00 a.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Hilton Washington/Rockville, 1750 Rockville Pike, Rockville, MD 20852.

*Contact Person:* Scott Jakes, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4198, MSC 7812, Bethesda, MD 20892, 301-435-1506, [jakesse@mail.nih.gov](mailto:jakesse@mail.nih.gov).

*Name of Committee:* Bioengineering Sciences & Technologies Integrated Review Group; Nanotechnology Study Section.

*Date:* October 22–23, 2015.

*Time:* 8:00 a.m. to 3:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Hilton Garden Inn, 7301 Waverly Street, Bethesda, MD 20814.

*Contact Person:* James J. Li, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5148, MSC 7849, Bethesda, MD 20892, 301-806-8065, [lijames@csr.nih.gov](mailto:lijames@csr.nih.gov).

*Name of Committee:* Biological Chemistry and Macromolecular Biophysics Integrated Review Group; Macromolecular Structure and Function C Study Section.

*Date:* October 22–23, 2015.

*Time:* 8:00 a.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Hotel Palomar, 2121 P Street NW., Washington, DC 20037.

*Contact Person:* William A. Greenberg, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4168, MSC 7806, Bethesda, MD 20892, (301) 435-1726, [greenbergwa@csr.nih.gov](mailto:greenbergwa@csr.nih.gov).

*Name of Committee:* Endocrinology, Metabolism, Nutrition and Reproductive Sciences Integrated Review Group; Integrative Physiology of Obesity and Diabetes Study Section.

*Date:* October 22–23, 2015.

*Time:* 8:00 a.m. to 3:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Hilton McLean Tyson's Corner, 7920 Jones Branch Drive, McLean, VA 22102.

*Contact Person:* Elaine Sierra-Rivera, Ph.D., Scientific Review Officer, Genes, Genomes,

and Genetics IRG, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 2200, MSC 7890, Bethesda, MD 20892, 301 435-2514, [riverase@csr.nih.gov](mailto:riverase@csr.nih.gov).

*Name of Committee:* Digestive, Kidney and Urological Systems Integrated Review Group; Gastrointestinal Mucosal Pathobiology Study Section.

*Date:* October 22–23, 2015.

*Time:* 8:00 a.m. to 6:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Sheraton Silver Spring Hotel, 8777 Georgia Ave., Silver Spring, MD 20910.

*Contact Person:* Aiping Zhao, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Rm 2188, MSC7818, Bethesda, MD 20892-7818, (301) 435-0682, [zhaoa2@csr.nih.gov](mailto:zhaoa2@csr.nih.gov).

*Name of Committee:* Brain Disorders and Clinical Neuroscience Integrated Review Group; Developmental Brain Disorders Study Section.

*Date:* October 22–23, 2015.

*Time:* 8:00 a.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Beacon Hotel and Corporate Quarters, 1615 Rhode Island Avenue NW., Washington, DC 20036.

*Contact Person:* Pat Manos, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5200, MSC 7846, Bethesda, MD 20892, 301-408-9866, [manospa@csr.nih.gov](mailto:manospa@csr.nih.gov).

*Name of Committee:* Cardiovascular and Respiratory Sciences Integrated Review Group; Myocardial Ischemia and Metabolism Study Section.

*Date:* October 22–23, 2015.

*Time:* 8:00 a.m. to 6:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Melrose Hotel, 2430 Pennsylvania Ave. NW., Washington, DC 20037.

*Contact Person:* Kimm Hamann, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 4118A, MSC 7814, Bethesda, MD 20892, 301-435-5575, [hamannkj@csr.nih.gov](mailto:hamannkj@csr.nih.gov).

*Name of Committee:* Biobehavioral and Behavioral Processes Integrated Review Group; Adult Psychopathology and Disorders of Aging Study Section.

*Date:* October 22–23, 2015.

*Time:* 8:30 a.m. to 2:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Westin Crystal City Hotel, 1800 Jefferson Davis Highway, Arlington, VA 22202.

*Contact Person:* Serena Chu, Ph.D., Scientific Review Officer, BBBP IRG, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3178, MSC 7848, Bethesda, MD 20892, (301) 500-5829, [sechu@csr.nih.gov](mailto:sechu@csr.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; PAR-14-166: Early Phase Clinical Trials in Imaging and Image-Guided Interventions.

*Date:* October 22, 2015.

*Time:* 10:00 a.m. to 2:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892 (Virtual Meeting).

*Contact Person:* Chiayeng Wang, Ph.D., Scientific Review Officer, Center for Scientific Review, 6701 Rockledge Drive, Room 5213, MSC 7852, Bethesda, MD 20892, 301-435-2397, [chiayeng.wang@nih.gov](mailto:chiayeng.wang@nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; PAR-12-259: Lymphatics in Health and Disease in the Digestive, Urinary, Cardiovascular and Pulmonary Systems.

*Date:* October 22, 2015.

*Time:* 1:00 p.m. to 3:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892 (Telephone Conference Call).

*Contact Person:* Mushtaq A. Khan, DVM, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 2176, MSC 7818, Bethesda, MD 20892, 301-435-1778, [khanm@csr.nih.gov](mailto:khanm@csr.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; PAR13-392: Computational Methods for Functional Variants in Mental Disorders.

*Date:* October 22, 2015.

*Time:* 12:00 p.m. to 1:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Doubletree Hotel Washington, 1515 Rhode Island Ave NW., Washington, DC 20005.

*Contact Person:* Barbara J. Thomas, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 2218, MSC 7890, Bethesda, MD 20892, 301-435-0603, [bthomas@csr.nih.gov](mailto:bthomas@csr.nih.gov).

*Name of Committee:* Endocrinology, Metabolism, Nutrition and Reproductive Sciences Integrated Review Group; Cellular, Molecular and Integrative Reproduction Study Section.

*Date:* October 23, 2015.

*Time:* 8:00 a.m. to 6:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Hotel Monaco Baltimore, 2 N Charles Street, Baltimore, MD 21201.

*Contact Person:* Gary Hunnicutt, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 6164, MSC 7892, Bethesda, MD 20892, 301-435-0229, [hunnicuttgr@csr.nih.gov](mailto:hunnicuttgr@csr.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; PAR 13-293: Gut Microbiota-Derived Factors in the Integrated Physiology and Pathophysiology of Diseases within NIDDK's mission.

*Date:* October 23, 2015.

*Time:* 8:00 a.m. to 6:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Sheraton Silver Spring Hotel, 8777 Georgia Ave., Silver Spring, MD 20910.

*Contact Person:* Aiping Zhao, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Rm 2188, MSC7818, Bethesda, MD 20892-7818, (301) 435-0682, [zhaoa2@csr.nih.gov](mailto:zhaoa2@csr.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; Bioinformatics in Surgical Sciences, Imaging and Independent Living.

*Date:* October 23, 2015.

*Time:* 8:30 a.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, 6701 Rockledge Drive, Bethesda, MD 20892.

*Contact Person:* Guo Feng Xu, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5122, MSC 7854, Bethesda, MD 20892, 301-237-9870, [xuguofen@csr.nih.gov](mailto:xuguofen@csr.nih.gov).

*Name of Committee:* Infectious Diseases and Microbiology Integrated Review Group; Vector Biology Study Section.

*Date:* October 23, 2015.

*Time:* 8:30 a.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Courtyard Philadelphia Downtown, 21 North Juniper Street, Philadelphia, PA 19107.

*Contact Person:* Liangbiao Zheng, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 3214, MSC 7808, Bethesda, MD 20892, 301-402-5671, [zhengli@csr.nih.gov](mailto:zhengli@csr.nih.gov).

*Name of Committee:* Center for Scientific Review Special Emphasis Panel; RFA-CA-15-006: Big Data to Knowledge (BD2K) Advancing Biomedical Science Using Crowdsourcing and Interactive Digital Media (UH2).

*Date:* October 23, 2015.

*Time:* 8:30 a.m. to 5:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* Courtyard by Marriott, 5520 Wisconsin Avenue, Chevy Chase, MD 20815.

*Contact Person:* Raymond Jacobson, Ph.D., Scientific Review Officer, Center for Scientific Review, National Institutes of Health, 6701 Rockledge Drive, Room 5858, MSC 7849, Bethesda, MD 20892, 301-996-7702, [jacobsonrh@csr.nih.gov](mailto:jacobsonrh@csr.nih.gov).

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5830-C-07]

### 60-Day Notice of Proposed Information Collection; Legal Instructions Concerning Applications for Full Insurance Benefits—Assignment of Multifamily Mortgages to the Secretary; Correction of Web Site Address for Form

**AGENCY:** Office of the General Counsel, HUD.

**ACTION:** Notice.

**SUMMARY:** On September 10, 2015, HUD published in the **Federal Register** a notice seeking approval from the Office of Management and Budget (OMB) for the information collection described in the September 10, 2015, notice. The September 10, 2015, notice provided a web address where the existing information collection document and proposed to be changed could be found, but the web address was incorrect. This document provides the corrected webaddress, which is <http://portal.hud.gov/hudportal/documents/huddoc?id=leginstrfullinsben.pdf>. All remaining information in the September 10, 2015, is unchanged.

**FOR FURTHER INFORMATION CONTACT:** For information about this technical correction, Camille E. Acevedo, Associate General Counsel for Legislation and Regulations, Office of General Counsel, Department of Housing and Urban Development, 451 7th Street SW., Room 10282, Washington, DC 20410-0500, telephone (202) 708-3055 (this is not a toll-free number).

**SUPPLEMENTARY INFORMATION:** On September 10, 2015, at 80 FR 54581, HUD published in the **Federal Register** a notice seeking approval from the Office of Management and Budget (OMB) on the information collection, as proposed to be revised, in HUD's Legal Instructions Concerning Applications for Full Insurance Benefits—Assignment of Multifamily Mortgage. To assist interested parties in understanding the information that HUD proposed to change in this document, HUD cited to a web address where the current document could be found. However, the web address was incorrect. The correct web address is <http://portal.hud.gov/hudportal/documents/huddoc?id=leginstrfullinsben.pdf>. All other information in the September 10, 2015, notice remains unchanged.

Dated: September 14, 2015.

**Camille E. Acevedo,**

*Associate General Counsel for Regulations and Legislation.*

**DEPARTMENT OF THE INTERIOR**

**Fish and Wildlife Service**

[FWS-HQ-IA-2015-N179;  
FXIA16710900000-156-FF09A30000]

**Endangered Species; Marine Mammals; Issuance of Permits**

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of issuance of permits.

**SUMMARY:** We, the U.S. Fish and Wildlife Service (Service), have issued the following permits to conduct certain activities with endangered species, marine mammals, or both. We issue these permits under the Endangered Species Act (ESA) and Marine Mammal Protection Act (MMPA).

**ADDRESSES:** Brenda Tapia, U.S. Fish and Wildlife Service, Division of Management Authority, Branch of Permits, MS: IA, 5275 Leesburg Pike, Falls Church, VA 22041; fax (703) 358-2281; or email [DMAFR@fws.gov](mailto:DMAFR@fws.gov).

**FOR FURTHER INFORMATION CONTACT:** Brenda Tapia, (703) 358-2104

(telephone); (703) 358-2281 (fax); [DMAFR@fws.gov](mailto:DMAFR@fws.gov) (email).

**SUPPLEMENTARY INFORMATION:** On the dates below, as authorized by the provisions of the ESA (16 U.S.C. 1531 *et seq.*), as amended, and/or the MMPA, as amended (16 U.S.C. 1361 *et seq.*), we issued requested permits subject to certain conditions set forth therein. For each permit for an endangered species, we found that (1) The application was filed in good faith, (2) The granted permit would not operate to the disadvantage of the endangered species, and (3) The granted permit would be consistent with the purposes and policy set forth in section 2 of the ESA.

### Endangered Species; Receipt of Applications for Permit

**AGENCY:** Fish and Wildlife Service, Interior.

**ACTION:** Notice of receipt of applications for permit.

**SUMMARY:** We, the U.S. Fish and Wildlife Service, invite the public to comment on the following applications to conduct certain activities with endangered species. With some exceptions, the Endangered Species Act (ESA) prohibits activities with listed species unless Federal authorization is acquired that allows such activities.

**DATES:** We must receive comments or requests for documents on or before October 19, 2015.

**ADDRESSES:** Brenda Tapia, U.S. Fish and Wildlife Service, Division of Management Authority, Branch of Permits, MS: IA, 5275 Leesburg Pike, Falls Church, VA 22041; fax (703) 358-2281; or email [DMAFR@fws.gov](mailto:DMAFR@fws.gov).

**FOR FURTHER INFORMATION CONTACT:** Brenda Tapia, (703) 358-2104 (telephone); (703) 358-2281 (fax); [DMAFR@fws.gov](mailto:DMAFR@fws.gov) (email).

#### SUPPLEMENTARY INFORMATION:

#### I. Public Comment Procedures

*A. How do I request copies of applications or comment on submitted applications?*

Send your request for copies of applications or comments and materials concerning any of the applications to the contact listed under **ADDRESSES**.

Please include the **Federal Register** notice publication date, the PRT-number, and the name of the applicant in your request or submission. We will not consider requests or comments sent to an email or address not listed under **ADDRESSES**. If you provide an email address in your request for copies of applications, we will attempt to respond to your request electronically.

Please make your requests or comments as specific as possible. Please confine your comments to issues for which we seek comments in this notice, and explain the basis for your comments. Include sufficient information with your comments to allow us to authenticate any scientific or commercial data you include.

The comments and recommendations that will be most useful and likely to influence agency decisions are: (1) Those supported by quantitative information or studies; and (2) Those that include citations to, and analyses of, the applicable laws and regulations. We will not consider or include in our administrative record comments we receive after the close of the comment period (see **DATES**) or comments delivered to an address other than those listed above (see **ADDRESSES**).

*B. May I review comments submitted by others?*

Comments, including names and street addresses of respondents, will be available for public review at the street address listed under **ADDRESSES**. The public may review documents and other information applicants have sent in support of the application unless our allowing viewing would violate the Privacy Act or Freedom of Information Act. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

#### II. Background

To help us carry out our conservation responsibilities for affected species, and in consideration of section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*) along with Executive Order 13576, “Delivering an Efficient, Effective, and Accountable Government,” and the President’s Memorandum for the Heads of Executive Departments and Agencies of January 21, 2009—Transparency and

Open Government (74 FR 4685; January 26, 2009), which call on all Federal agencies to promote openness and transparency in Government by disclosing information to the public, we invite public comment on these permit applications before final action is taken.

#### III. Permit Applications

##### *Endangered Species*

Applicant: Michael Braun, Smithsonian Institute of Natural History, Washington, DC; PRT-70015B

The applicant requests a permit to import biological samples from wild-caught red siskin (*Carduelis cucullata*) from Guyana for the purpose of scientific research.

Applicant: Houston Zoo, INC., Houston, TX; PRT-63550B

The applicant requests a permit to import three captive-bred African wild dog, (*Lycyaon pictus pictus*), for the purpose of enhancement of the survival of the species. This notification covers activities to be conducted by the applicant over a 1-year period.

Applicant: Alaska Department of Fish and Game, Juneau, AK; PRT-43954A

The applicant requests a captive-bred wildlife registration under 50 CFR 17.21(g) for wood bison (*Bison bison athabasca*) to enhance the species propagation or survival. This notification covers activities to be conducted by the applicant over a 5-year period.

Applicant: Rare Species Conservatory Foundation, Loxahatchee, FL; PRT-756101

The applicant requests amendment of a captive-bred wildlife registration under 50 CFR 17.21(g) to add red siskin (*Carduelis cucullata*) to enhance the species propagation or survival. This notification covers activities to be conducted by the applicant over a 5-year period.

Applicant: Six Flags Discovery Kingdom, Vallejo, CA; PRT-676508

The applicant requests amendment of a captive-bred wildlife registration under 50 CFR 17.21(g) to add the following species to enhance species propagation or survival: African penguin (*Spheniscus demersus*). This notification covers activities to be conducted by the applicant over a 5-year period.

Applicant: Richard Papapietro, Saratoga, CA; PRT-74210B

The applicant requests a permit to import sport-hunted trophies of three

male bontebok (*Damaliscus pygargus pygargus*) culled from a captive herd maintained under the management program of the Republic of South Africa, for the purpose of enhancement of the survival of the species.

Applicant: David Florance, Carlisle, PA; PRT-74205B

The applicant requests a permit to import sport-hunted trophies of two male bontebok (*Damaliscus pygargus pygargus*) culled from a captive herd maintained under the management program of the Republic of South Africa, for the purpose of enhancement of the survival of the species.

### Office of the Secretary

[156D0102DM DS61100000  
DLSN00000.000000 DX61101]; [OMB Control  
Number 1094-0001]

### Proposed Renewal of Information Collection: The Alternatives Process in Hydropower Licensing

**AGENCY:** Office of Environmental Policy and Compliance, Office of the Secretary, Interior.

**ACTION:** Notice and request for comments.

**SUMMARY:** In compliance with section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the Office of Environmental Policy and Compliance, Office of the Secretary, Department of the Interior is announcing its intention to request renewal for the collection of information for Alternatives Process in Hydropower Licensing. This collection request has been forwarded to the Office of Management and Budget (OMB) for review and approval. The information collection request describes the nature of the information collection and the expected burden and cost.

**DATES:** OMB has up to 60 days to approve or disapprove the information collection request, but may respond after 30 days; therefore, public comments should be submitted to OMB by October 19, 2015, in order to be assured of consideration.

**ADDRESSES:** Submit comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for the

Department of Interior (1094-0001), by telefax at (202) 395-5806 or via email to [OIRA\\_Submission@omb.eop.gov](mailto:OIRA_Submission@omb.eop.gov). Also, please send a copy of your comments to Shawn Alam, Office of Environmental Policy and Compliance, U.S.

Department of the Interior, MS 2462-MIB, 1849 C Street, NW., Washington, DC 20240, or send an email to [Shawn\\_Alam@ios.doi.gov](mailto:Shawn_Alam@ios.doi.gov). Additionally, you may telefax them to him at (202) 208-6970. Individuals providing comments should reference Alternatives Process in Hydropower Licensing.

**FOR FURTHER INFORMATION CONTACT:** To receive a copy of the information collection request, contact Dr. Shawn Alam at (202) 208-5465. You may also contact Dr. Shawn Alam electronically at [Shawn\\_Alam@ios.doi.gov](mailto:Shawn_Alam@ios.doi.gov). To see a copy of the entire ICR submitted to OMB, go to: <http://www.reginfo.gov/public/do/PRAMain>.

### SUPPLEMENTARY INFORMATION:

#### I. Abstract

The OMB regulations at 5 CFR part 1320, which implement the Paperwork Reduction Act of 1995, 44 U.S.C. 3501 *et seq.*, require that interested members of the public and affected agencies have an opportunity to comment on information collection and recordkeeping activities (see 5 CFR 1320.8 (d)).

On March 31, 2015, the Departments of Agriculture, the Interior, and Commerce published revised interim final rule they originally published in November 2005 at 7 CFR part 1, 43 CFR part 45, and 50 CFR part 221, to implement section 241 of the Energy Policy Act of 2005 (EP Act), Public Law 109-58, which the President signed into law on August 8, 2005. Section 241 of the EP Act added a new section 33 to the Federal Power Act (FPA), 16 U.S.C. 823d, that allowed the license applicant or any other party to the license proceeding to propose an alternative to a condition or prescription that one or more of the Departments develop for inclusion in a hydropower license issued by the Federal Energy Regulatory Commission (FERC) under the FPA. This provision required that the Department of Agriculture, the Department of the Interior, and the Department of Commerce collect the information covered by 1094-0001.

Under FPA section 33, the Secretary of the Department involved must accept the proposed alternative if the Secretary determines, based on substantial evidence provided by a party to the license proceeding or otherwise available to the Secretary, (a) that the alternative condition provides for the

adequate protection and utilization of the reservation, or that the alternative prescription will be no less protective than the fishway initially proposed by the Secretary, and (b) that the alternative will either cost significantly less to implement or result in improved operation of the project works for electricity production.

In order to make this determination, the regulations require that all of the following information be collected: (1) A description of the alternative, in an equivalent level of detail to the Department's preliminary condition or prescription; (2) an explanation of how the alternative: (i) If a condition, will provide for the adequate protection and utilization of the reservation; or (ii) if a prescription, will be no less protective than the fishway prescribed by the bureau; (3) an explanation of how the alternative, as compared to the preliminary condition or prescription, will: (i) Cost significantly less to implement; or (ii) result in improved operation of the project works for electricity production; (4) an explanation of how the alternative or revised alternative will affect: (i) Energy supply, distribution, cost, and use; (ii) flood control; (iii) navigation; (iv) water supply; (v) air quality; and (vi) other aspects of environmental quality; and (5) specific citations to any scientific studies, literature, and other documented information relied on to support the proposal.

This notice of proposed renewal of an existing information collection is being published by the Office of Environmental Policy and Compliance, Department of the Interior, on behalf of all three Departments, and the data provided below covers anticipated responses (alternative conditions/prescriptions and associated information) for all three Departments.

#### II. Data

(1) Title: 7 CFR part 1; 43 CFR part 45; 50 CFR part 221; the Alternatives Process in Hydropower Licensing.

*OMB Control Number:* 1094-0001.

*Current Expiration Date:* November 30, 2015.

*Type of Review:* Information Collection Renewal.

*Affected Entities:* Business or for-profit entities.

*Estimated annual number of respondents:* 5.

*Frequency of responses:* Once per alternative proposed.

(2) Annual reporting and recordkeeping burden:

*Total annual reporting per response:* 500 hours.

*Total number of estimated responses:*

5.

*Total annual reporting:* 2,500 hours.  
(3) Description of the need and use of the information: The purpose of this information collection is to provide an opportunity for license parties to propose an alternative condition or prescription to that proposed by the Federal Government for inclusion in the hydropower licensing process.

As required under 5 CFR 1320.8(d), a **Federal Register** notice soliciting comments on the collection of information was published on May 7, 2015 (88 FR 26290). No comments were received. This notice provides the public with an additional 30 days in which to comment on the proposed information collection activity.

### III. Request for Comments

The Departments invite comments on:

(a) Whether the collection of information is necessary for the proper performance of the functions of the agencies, including whether the information will have practical utility;

(b) The accuracy of the agencies' estimate of the burden of the collection of information and the validity of the methodology and assumptions used;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(d) Ways to minimize the burden of the collection of information on respondents, including through the use of appropriate automated, electronic, mechanical, or other forms of information technology.

"Burden" means the total time, effort, and financial resources expended by persons to generate, maintain, retain, disclose, or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install, and use technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, and to complete and review the collection of information; and to transmit or otherwise disclose the information.

It is our policy to make all comments available to the public for review. Before including Personally Identifiable Information (PII), such as your address, phone number, email address, or other personal information in your comment(s), you should be aware that your entire comment (including PII) may be made available to the public at

any time. While you may ask us in your comment to withhold PII from public view, we cannot guarantee that we will be able to do so.

If you wish to view any comments received, you may do so by scheduling an appointment with the Office of Environmental Policy and Compliance by calling (202) 208-3891. A valid picture identification is required for entry into the Department of the Interior.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget control number.

**Willie R. Taylor,**

*Director, Office of Environmental Policy and Compliance.*

**BILLING CODE 4312–51–P**

**INTERNATIONAL TRADE COMMISSION**

**[Investigation Nos. 701–TA–540–544 and 731–TA–1283–1290 (Preliminary)]**

**Cold-Rolled Steel Flat Products From Brazil, China, India, Japan, Korea, Netherlands, Russia, and the United Kingdom****Determinations**

On the basis of the record<sup>1</sup> developed in the subject investigations, the United States International Trade Commission (“Commission”) determines,<sup>2</sup> pursuant to the Tariff Act of 1930 (“the Act”), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of cold-rolled steel flat products from Brazil, China, India, Japan, Korea, Russia, and the United Kingdom, provided for in subheadings 7209.15, 7209.16, 7209.17, 7209.18, 7209.25, 7209.26, 7209.27, 7209.28, 7209.90, 7210.70, 7211.23, 7211.29, 7211.90, 7212.40, 7225.50, 7225.99, and 7226.92 of the Harmonized Tariff Schedule of the United States, that are allegedly sold in the United States at less than fair value (“LTFV”), and by imports of cold-

rolled steel flat products that are allegedly subsidized by the governments of Brazil, China, Korea, and Russia. The Commission also determines, pursuant to the Act, that there is a reasonable indication that an industry in the United States is threatened with material injury by reason of imports of cold-rolled steel flat products that are allegedly subsidized by the government of India.

The Commission further determines that imports of cold-rolled steel flat products from the Netherlands are negligible pursuant to section 771(24) of the Act, and its investigation with regard to cold-rolled steel flat products from this country is thereby terminated pursuant to section 733(a)(1) of the Act.

**Commencement of Final Phase Investigations**

Pursuant to section 207.18 of the Commission’s rules, the Commission also gives notice of the commencement of the final phase of its investigations. The Commission will issue a final phase notice of scheduling, which will be published in the **Federal Register** as provided in section 207.21 of the Commission’s rules, upon notice from the Department of Commerce (“Commerce”) of affirmative preliminary determinations in the investigations under sections 703(b) or 733(b) of the Act, or, if the preliminary determinations are negative, upon notice of affirmative final determinations in those investigations under sections 705(a) or 735(a) of the Act. Parties that filed entries of appearance in the preliminary phase of the investigations need not enter a separate appearance for the final phase of the investigations. Industrial users, and, if the merchandise under investigation is sold at the retail level, representative consumer organizations have the right to appear as parties in Commission antidumping and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

**Background**

On July 28, 2015, AK Steel Corporation (West Chester, Ohio), ArcelorMittal USA LLC (Chicago, Illinois), Nucor Corporation (Charlotte, North Carolina), Steel Dynamics, Inc. (Fort Wayne, Indiana), and United States Steel Corporation (Pittsburgh, Pennsylvania) filed a petition with the Commission and Commerce, alleging that an industry in the United States is materially injured or threatened with material injury by reason of subsidized

imports of cold-rolled steel flat products from Brazil, China, India, Korea, and Russia and LTFV imports of cold-rolled steel flat products from Brazil, China, India, Japan, Korea, Netherlands, Russia, and the United Kingdom. Accordingly, effective July 28, 2015, the Commission, pursuant to sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)), instituted countervailing duty investigation Nos. 701–TA–540–544 and antidumping duty investigation Nos. 731–TA–1283–1290 (Preliminary).

Notice of the institution of the Commission’s investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of August 3, 2015 (80 FR 46047). The conference was held in Washington, DC, on August 18, 2015, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission made these determinations pursuant to sections 703(a) and 733(a) of the Tariff Act of 1930 (19 U.S.C. 1671b(a) and 1673b(a)). It completed and filed its determinations in these investigations on September 11, 2015. The views of the Commission are contained in USITC Publication 4564 (September 2015), entitled *Cold-Rolled Steel Flat Products from Brazil, China, India, Japan, Korea, Netherlands, Russia, and the United Kingdom: Investigation Nos. 701–TA–540–544 and 731–TA–1283–1290 (Preliminary)*.

By order of the Commission.

Issued: September 11, 2015.

**INTERNATIONAL TRADE COMMISSION**

**[Investigation No. 337–TA–926]**

**Certain Marine Sonar Imaging Systems, Products Containing the Same, and Components Thereof; Commission Determination to Review a Final Initial Determination Finding a Violation of Section 337; Schedule for Filing Written Submissions on the Issues Under Review and on Remedy, the Public Interest and Bonding**

**AGENCY:** U.S. International Trade Commission.

<sup>1</sup> The record is defined in sec. 207.2(f) of the Commission’s Rules of Practice and Procedure (19 CFR 207.2(f)).

<sup>2</sup> Commissioner F. Scott Kieff not participating.

**ACTION:** Notice.

**SUMMARY:** Notice is hereby given that the U.S. International Trade Commission has determined to review the final initial determination (“ID”) issued by the presiding administrative law judge (“ALJ”) on July 13, 2015, finding a violation of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), as to certain asserted patent claims in this investigation.

**FOR FURTHER INFORMATION CONTACT:** Panyin A. Hughes, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202–205–3042. Copies of non-confidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street SW., Washington, DC 20436, telephone 202–205–2000. General information concerning the Commission may also be obtained by accessing its Internet server (<http://www.usitc.gov>). The public record for this investigation may be viewed on the Commission’s electronic docket (EDIS) at <http://edis.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission’s TDD terminal on 202–205–1810.

**SUPPLEMENTARY INFORMATION:** The Commission instituted this investigation on August 21, 2014, based on a complaint filed by Johnson Outdoors Inc. of Racine, Wisconsin and Johnson Outdoors Marine Electronics, Inc. of Eufaula, Alabama (collectively, “Johnson Outdoors”). 79 FR 49536 (Aug. 21, 2014). The complaint alleges violations of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain marine sonar imaging systems, products containing the same, and components thereof by reason of infringement of one or more of claims 1, 2, 17, 25, 26, 31, 32, 35, 36, 41–43, 53, and 56 of U.S. Patent No. 7,652,952 (“the ’952 patent”); claims 1, 5, 7, 8, 21, 22, 24, 25, 28, and 29 of U.S. Patent No. 7,710,825 (“the ’825 patent”); and claims 14, 18, 21–23, 25, and 33 of U.S. Patent No. 7,755,974 (“the ’974 patent”). *Id.* The notice of investigation named the following respondents: Garmin International, Inc.; Garmin North America, Inc.; Garmin USA, Inc. all of Olathe, Kansas; and Garmin Corporation of New Taipei City, Taiwan

(collectively, “Garmin”). *Id.* The Office of Unfair Import Investigations is not a party to the investigation.

On January 30, 2015, the parties entered into a stipulation that the domestic industry requirement was met. The parties also agreed to a stipulation regarding importation of Garmin accused products. That same day, Johnson Outdoors filed two unopposed motions for summary determination: (1) That Garmin’s importation and sales satisfy the importation requirement and (2) that Johnson Outdoors satisfies the domestic industry requirement. On March 24, 2015, the ALJ granted Johnson Outdoors’ summary determination motions in Order Nos. 14 and 15, respectively. The Commission determined not to review. *See* Notice of Commission Determination Not to Review Two Initial Determinations Granting Unopposed Motions for Summary Determinations of Importation and the Existence of a Domestic Industry That Practices the Asserted Patents (April 22, 2015).

On July 13, 2015, the ALJ issued his final ID, finding a violation of section 337 by Garmin in connection with claims 14, 18, 21, 22, 23, and 33 of the ’974 patent. The ALJ found no violation of section 337 in connection with the asserted claims of the ’952 and ’825 patents; and claim 25 of the ’974 patent. Specifically, the ALJ found that the Commission has subject matter jurisdiction, *in rem* jurisdiction over the accused products, and *in personam* jurisdiction over Garmin. ID at 21. The ALJ further found that the accused products infringe asserted claims 14, 18, 21, 22, 23, and 33 of the ’974 patent but do not infringe the asserted claims of the ’952 and ’825 patents or claim 25 of the ’974 patent. *See* ID at 55–57, 58–59, 60–62. The ALJ also found that Garmin failed to establish by clear and convincing evidence that the asserted claims of the ’952, ’825, or ’974 patents were anticipated or rendered obvious by the cited prior art references. *See id.* at 68–80, 89–100. Finally, the ALJ found that the ’952, ’825, and ’974 patents are not unenforceable due to inequitable conduct and that the ’952 patent is not invalid under 35 U.S.C. 102(f) for derivation. ID at 80–83, 100–109.

On July 27, 2015, Garmin filed a petition for review of the ID. That same day, Johnson Outdoors filed a contingent petition for review of the ID. On August 4, 2015, the parties filed responses to the petitions.

Having examined the record of this investigation, including the ALJ’s final ID, the petitions for review, and the responses thereto, the Commission has

determined to review the final ID on all issues petitioned.

The parties are requested to provide any comments they may have as to the Commission’s proposed construction below with reference to the applicable law and the evidentiary record. In connection with its review, the Commission is particularly interested in a response to the following:

If the Commission were to construe the claim term “mounted to a boat” to mean “proximately secured to the boat in a fixed manner,” please discuss any impact this construction may have on the ID’s findings.

In connection with the final disposition of this investigation, the Commission may (1) issue an order that could result in the exclusion of the subject articles from entry into the United States, and/or (2) issue one or more cease and desist orders that could result in the respondent being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered. If a party seeks exclusion of an article from entry into the United States for purposes other than entry for consumption, the party should so indicate and provide information establishing that activities involving other types of entry either are adversely affecting it or likely to do so. For background, see *Certain Devices for Connecting Computers via Telephone Lines*, Inv. No. 337–TA–360, USITC Pub. No. 2843 (December 1994) (Commission Opinion).

If the Commission contemplates some form of remedy, it must consider the effects of that remedy upon the public interest. The factors the Commission will consider include the effect that an exclusion order and/or cease and desist orders would have on (1) the public health and welfare, (2) competitive conditions in the U.S. economy, (3) U.S. production of articles that are like or directly competitive with those that are subject to investigation, and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation.

If the Commission orders some form of remedy, the U.S. Trade Representative, as delegated by the President, has 60 days to approve or disapprove the Commission’s action. *See* Presidential Memorandum of July 21, 2005. 70 FR 43251 (July 26, 2005). During this period, the subject articles would be entitled to enter the United

States under bond, in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving submissions concerning the amount of the bond that should be imposed if a remedy is ordered.

**Written Submissions:** The parties to the investigation are requested to file written submissions on the issues identified in this notice. Parties to the investigation, interested government agencies, and any other interested parties are encouraged to file written submissions on the issues of remedy, the public interest, and bonding. Such submissions should address the recommended determination by the ALJ on remedy and bonding. Complainants are requested to submit proposed remedial orders for the Commission's consideration. Complainants are also requested to state the date that the patents expire and the HTSUS numbers under which the accused products are imported. Complainants are further requested to supply the names of known importers of the Garmin products at issue in this investigation. The written submissions and proposed remedial orders must be filed no later than close of business on September 21, 2015. Reply submissions must be filed no later than the close of business on September 28, 2015. Such submissions should address the ALJ's recommended determinations on remedy and bonding. No further submissions on any of these issues will be permitted unless otherwise ordered by the Commission.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above and submit eight true paper copies to the Office of the Secretary by noon the next day pursuant to section 210.4(f) of the Commission's Rules of Practice and Procedure (19 CFR 210.4(f)). Submissions should refer to the investigation number ("Inv. No. 337-TA-926") in a prominent place on the cover page and/or the first page. (See Handbook for Electronic Filing Procedures, [http://www.usitc.gov/secretary/fed\\_reg\\_notices/rules/handbook\\_on\\_electronic\\_filing.pdf](http://www.usitc.gov/secretary/fed_reg_notices/rules/handbook_on_electronic_filing.pdf)). Persons with questions regarding filing should contact the Secretary (202-205-2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. See 19 CFR 201.6. Documents

for which confidential treatment by the Commission is properly sought will be treated accordingly. A redacted non-confidential version of the document must also be filed simultaneously with any confidential filing. All non-confidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: September 11, 2015.

**Lisa R. Barton,**

*Secretary to the Commission.*

## DEPARTMENT OF LABOR

### Mine Safety and Health Administration

[OMB Control No. 1219-0011]

#### Revision of a Currently Approved Collection; Respirable Coal Mine Dust Sampling

**AGENCY:** Mine Safety and Health Administration, Labor.

**ACTION:** Request for public comments.

**SUMMARY:** The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995, 44 U.S.C. 3506(c)(2)(A). This program helps to assure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for Respirable Coal Mine Dust Sampling.

**DATES:** All comments must be received on or before November 16, 2015.

**ADDRESSES:** Comments concerning the information collection requirements of this notice may be sent by any of the methods listed below.

• *Federal E-Rulemaking Portal:* <http://www.regulations.gov>. Follow the

on-line instructions for submitting comments for docket number MSHA-2015-0022.

• *Regular Mail:* Send comments to USDOL-MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202-5452.

• *Hand Delivery:* USDOL-Mine Safety and Health Administration, 201 12th Street South, Suite 4E401, Arlington, VA 22202-5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

**FOR FURTHER INFORMATION CONTACT:** Sheila McConnell, Acting Director, Office of Standards, Regulations, and Variances, MSHA, at [MSHA.information.collections@dol.gov](mailto:MSHA.information.collections@dol.gov) (email); 202-693-9440 (voice); or 202-693-9441 (facsimile).

#### SUPPLEMENTARY INFORMATION:

##### I. Background

Chronic exposure to respirable coal mine dust causes lung diseases including coal workers' pneumoconiosis (CWP), emphysema, silicosis, and chronic bronchitis, known collectively as "black lung." These diseases are debilitating and can result in disability and premature death. While considerable progress has been made in lowering dust levels since 1970 and, consequently, lowering the prevalence rate of black lung among coal miners, severe forms of black lung continue to be identified. Information from the federally funded Coal Workers' Health Surveillance Programs administered by the National Institute for Occupational Safety and Health (NIOSH) clearly indicates that black lung remains a key occupational health risk among our nation's coal miners. According to NIOSH, 933 or 3.7 percent of the 25,558 underground coal miners x-rayed between January 2003 and September 2011 were found to have CWP. Also, in FY 2011, over 28,600 former coal miners and the dependents of miners received \$417 million in "black lung" benefits. Since inception of the federal Black Lung Benefits Program in 1970, over \$45 billion in total benefits have been paid out to former miners and their dependents.

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty to protect the safety and health of miners. Further, Section 101(a) of the Mine Act, 30 U.S.C. 811(a), authorizes the Secretary to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the

protection of life and prevention of injuries in coal or other mines. This Information Collection 1219-0011 reflects requirements of MSHA's final rule, Lowering Miners' Exposure to Respirable Coal Mine Dust, Including Continuous Personal Dust Monitors (79 FR 24814; May 1, 2014) related to respirable coal mine dust sampling in effect on February 1, 2016, and respirable dust standards in effect on August 1, 2016.

MSHA's standards in 30 CFR parts 70, 71, and 90 require each mine operator of an underground coal mine, surface coal mine and, surface work areas of an underground coal mine, and each coal mine operator who employs a Part 90 miner, to protect miners from exposure to excessive respirable coal mine dust levels. Parts 70 and 71 require each coal mine operator to continuously maintain the average concentration of respirable coal mine dust in the mine atmosphere where miners normally work or travel at or below 1.5 milligrams per cubic meter ( $\text{mg}/\text{m}^3$ ). This standard is reduced using the formula 10 divided by the percent of quartz when the respirable dust contains more than 5 percent quartz. Overexposure to respirable coal mine dust containing quartz has been associated with silicosis (black lung). These lung diseases are irreversible and may be fatal, but they are preventable. Parts 70 and 71 also require each coal mine operator to continuously maintain the average concentration of respirable dust in intake airways at underground mines at or below  $0.5 \text{ mg}/\text{m}^3$ .

If a Part 90 miner is employed at the mine, the coal mine operator is required to continuously maintain the average concentration of respirable dust in the mine atmosphere during each shift to which the Part 90 miner in the active workings of the mine is exposed at or below  $0.5 \text{ mg}/\text{m}^3$ . This standard is also reduced if more than 5 percent quartz is found in the mine atmosphere during each shift to which the Part 90 miner is exposed.

MSHA's standards require that coal mine operators sample respirable coal mine dust quarterly and submit these samples to MSHA for analysis to determine if the mine is complying with the applicable dust standards. Underground coal mine operators must sample: The Designated Occupation (DO) and Other Designated Occupation (ODO) in each Mechanized Mining Unit (MMU) under 30 CFR 70.208 and each Designated Area (DA) at locations specified in the operator's approved mine ventilation plan under 30 CFR 70.209. In addition, Designated Work Positions (DWP) at surface coal mines and surface work areas of underground

coal mines must be sampled under 30 CFR 71.206. Furthermore, each part 90 miner must be sampled under 30 CFR 90.207.

Sampling, General and Technical Requirements under Parts 70, 71, and 90: Section 70.201(b)(2) requires that DAs identified by the underground coal mine operator be sampled quarterly only with an approved Coal Mine Dust Personal Sampling Unit (CMDPSU) unless the operator notifies the District Manager in writing that only an approved Continuous Personal Dust Monitor (CPDM) will be used for all DA sampling at the mine. With respect to DWP sampling, section 71.201(a) requires each mine operator of a surface coal mine and each mine operator of an underground coal mine with surface work areas who is sampling on the surface to sample with an approved CMDPSU, however, the operator may use an approved CPDM if the operator notifies the District Manager in writing that only an approved CPDM will be used for all DWP sampling at the mine. MSHA does not expect underground coal mine operators to use the CPDM to conduct DA sampling underground, or DWP sampling on the surface area of the underground mine. Also, MSHA does not expect surface coal mine operators to use the CPDM to conduct DWP sampling. Thus, there are no notifications to the MSHA District Manager and therefore no burdens to operators for sections 70.201(b)(2) and 71.201(a).

Sections 70.201(e), 71.201(d), and 90.201(f) require that coal mine operators make records showing the length of: Each production shift for each MMU; each normal work shift for each DWP; and each shift for each part 90 miner respectively. These provisions also require that the records be retained for at least six months, made available for inspection by authorized representatives of the Secretary and, except in the case of part 90 miners, by the representative of miners. The records must also be submitted to the District Manager when requested in writing.

Section 70.211(c)(5) requires that, when CPDMs are used for sampling, underground coal mine operators print, sign and post a paper record (Dust Data Card) with the shift length. Under section 90.209(c)(5), when CPDMs are used for sampling, coal mine operators must print, sign and provide to each part 90 miner a Dust Data Card with the shift length. Under sections 70.210(c) and 71.207(c), if using a CMDPSU, the operator must complete a dust card, which includes recording the shift length.

There are no separate burdens shown for recording shift lengths for sections 70.201(e) for underground coal mines and 90.201(f) related to part 90 miners when sampling is conducted because records of shift length are accounted for under sections 70.211(c) and 90.209(c) when a CPDM Dust Data Card is printed and signed. However, burdens for recording shift lengths when sampling is not conducted are shown under sections 70.201(e) and 90.201(f).

For surface work areas of underground coal mines and surface coal mines, there is no burden shown for section 71.201(d) when DWP sampling is conducted because records of shift length are accounted for under section 71.207(c) when a CMDPSU Dust Data Card is completed. However, the burden for recording shift length when sampling is not conducted is shown under section 71.201(d).

Sections 70.201(f), 71.201(e), and 90.201(g) require that upon request from the District Manager, the operator must submit the date and time any respirable dust sampling required by part 70, 71, or 90 will begin. The mine operator must submit this information to MSHA at least 48 hours prior to scheduled sampling. In addition, under section 71.201(f), a mine operator may request, in writing, that the rain restriction for a normal work shift as defined in section 71.2 be waived by the District Manager.

Sections 70.210(d), 71.207(d), and 90.208(d) require that all operator samples be considered to be taken to fulfill the sampling requirements of parts 70, 71, and 90, respectively, unless the sample has been identified in writing by the operator to the District Manager, prior to the intended sampling shift, as a sample to be used for another purpose.

Section 70.201(g) requires that to establish a normal production shift, the operator must record the amount of run-of-mine material produced by each MMU during each shift to determine the average production for the most recent 30 production shifts or for all production shifts if fewer than 30 shifts of production data are available. It also requires that the production records must be retained for at least six months and be made available for inspection by authorized representatives of the Secretary and the representative of miners.

Sections 70.201(j) and 90.201(j) allow the mine operator of an anthracite mine that uses the full box, open breast, or slant breast mining method to use either a CPDM or a CMDPSU for respirable coal mine dust sampling required under part 70 or part 90. However, if the mine operator chooses not to use a CPDM, he

must notify the District Manager in writing of this decision. To estimate the full cost impact upon coal mine operators, MSHA assumed that these operators will use the CPDM for the required sampling. Therefore, no burden was estimated at this time for these operators to notify the District Manager of their choice not to use the CPDM. Operators may reevaluate whether to use the CPDM. Therefore, future updates to this package may result in a burden for these provisions.

Sampling under Parts 70, and 71: Sections 70.205(b)(2) and 71.205(b)(2) require that if a CMDPSU is used to sample respirable coal mine dust, each approved sampling device must be examined each shift by a person certified in sampling during the last hour of operation to assure that the sampling device is operating properly and at the proper flowrate. If the proper flowrate is not maintained, the respirable dust sample must be transmitted to MSHA with a notation by the certified person on the back of the Dust Data Card stating that the proper flowrate was not maintained. Other events occurring during the collection of respirable coal mine dust samples that may affect the validity of the sample, such as dropping of the sampling head assembly onto the mine floor, must also be noted on the back of the Dust Data Card. The burdens for these requirements are included in the burdens estimated to complete the Dust Data Cards under sections 70.210(c) and 71.207(c).

Quarterly Sampling Requirements for Parts 70, 71, and 90: Quarterly sampling requirements are in section 70.208 for MMUs, section 70.209 for DAs, and section 90.207 for part 90 miners. Sections 70.208(e)(3), 70.209(c)(3), and 90.207(c)(3) require that when a valid representative sample meets or exceeds the ECV that corresponds to the applicable standard and particular sampling device used for either an MMU or DA, respectively, or that corresponds to the applicable standard and particular sampling device used for part 90 miner sampling, the operator must make, upon implementation of corrective actions, a record of the actions taken. The record must be certified by the mine foreman or equivalent mine official, no later than the end of the mine foreman's or equivalent official's next regularly scheduled working shift. The record must be made in a secure book that is not susceptible to alteration or electronically in a computer system so as to be secure and not susceptible to alteration. Such records must be retained at a surface location at the mine

for at least 1 year and be made available for inspection by authorized representatives of the Secretary and, except for part 90 miners, the representative of miners. Also, the records must be made available for inspection by the affected part 90 miner who was sampled.

Sections 70.208(h)(3), 70.209(f)(3), and 90.207(f)(3) require that mine operators, upon issuance of a citation for violation of the applicable standard for either an MMU, DA, or part 90 miner, respectively, must make, upon implementation of the corrective actions, a record of the actions taken. The record must be certified by the mine foreman or equivalent mine official, no later than the end of the mine foreman's or equivalent official's next regularly scheduled working shift. The record must be made in a secure book that is not susceptible to alteration or electronically in a computer system so as to be secure and not susceptible to alteration. Such records must be retained at a surface location at the mine for at least 1 year and be made available for inspection by authorized representatives of the Secretary and, except for part 90 miners, the representative of miners. Also, the records must be made available for inspection by the affected part 90 miner who was sampled.

DWPs at surface coal mines and surface work areas of underground coal mines must be sampled quarterly under section 71.206. Under section 71.206(d), operators with multiple work positions that are specified in section 71.206(c)(2) and (c)(3) must sample the DWP exposed to the greatest respirable dust concentration in each work position performing the same activity or task at the same location at the mine and exposed to the same dust generation source. Each operator must provide the District Manager with a list identifying the specific work positions where DWP samples will be collected for: Active mines; new mines; and DWPs with a change in operational status that increases or reduces the number of active DWPs.

Section 71.206(e) requires that each DWP sample must be taken on a normal work shift. If a normal work shift is not achieved, the respirable dust sample must be transmitted to MSHA with a notation by the person certified in sampling on the back of the Dust Data Card stating that the sample was not taken on a normal work shift. Section 71.207(c) requires that a person certified in sampling properly complete the Dust Data Card that is provided by the manufacturer for each filter cassette. The card must have an identification

number identical to that on the cassette used to take the sample and be submitted to MSHA with the sample. Each card must be signed by the certified person who actually performed the required examinations during the sampling shift and include that person's MSHA Individual Identification Number (MIIN). A separate burden has not been included for section 71.206(e) since MSHA assumed that any notations can be made at the same time that the Dust Data Card is completed under section 71.207(c).

Section 71.206(h)(3) requires that when a valid representative sample taken in accordance with this section meets or exceeds the ECV that corresponds to the applicable standard and particular sampling device used, the operator must make, upon implementation of the corrective actions, a record of the actions taken. The record must be certified by the mine foreman or equivalent mine official, no later than the end of the mine foreman's or equivalent official's next regularly scheduled working shift. The record must be made in a secure book that is not susceptible to alteration or electronically in a computer system so as to be secure and not susceptible to alteration. Such records must be retained at a surface location at the mine for at least 1 year and be made available for inspection by authorized representatives of the Secretary and the representative of miners. There are no separate burden estimates projected for section 71.206(h)(3). MSHA assumed that surface samples that meet or exceed the applicable ECV will result in a citation, and this burden appears under section 71.206(k)(3).

Section 71.206(k)(3) requires that upon issuance of a citation for violation of the applicable standard, the operator must make, upon implementation of the corrective actions, a record of the actions taken. The record must be certified by the mine foreman or equivalent mine official, no later than the end of the mine foreman's or equivalent official's next regularly scheduled working shift. The record must be made in a secure book that is not susceptible to alteration or electronically in a computer system so as to be secure and not susceptible to alteration. Such records must be retained at a surface location at the mine for at least 1 year and be made available for inspection by authorized representatives of the Secretary and the representative of miners.

Transmission of Respirable Coal Mine Dust Samples by the Operator under Parts 70, 71, and 90: Sections 70.210(a) and 71.207(a) require that if a CMDPSU

is used to sample, the operator must transmit within 24 hours after the end of the sampling shift all samples collected to fulfill the requirements of part 70, 71, or 90, including control filters, in containers provided by the manufacturer of the filter cassette to: Respirable Dust Processing Laboratory, Pittsburgh Safety and Health Technology Center, Cochran Mill Road, Building 38, P.O. Box 18179, Pittsburgh, Pennsylvania 15236-0179, or to any other address designated by the District Manager.

Sections 70.210(c) and 71.207(c) require that a person certified in sampling properly complete the Dust Data Card that is provided by the manufacturer for each filter cassette. The card must have an identification number identical to that on the cassette used to take the sample and be submitted to MSHA with the sample. Each card must be signed by the certified person who actually performed the required examinations during the sampling shift and include that person's MSHA Individual Identification Number (MIIN). Respirable dust samples with data cards not properly completed may be voided by MSHA.

Sections 70.210(f), 71.207(f), and 90.208(f) require that if a CPDM is used to sample, the person certified in sampling must validate, certify and transmit electronically to MSHA within 24 hours after the end of each sampling shift all sample data file information collected and stored in the CPDM, including the sampling status conditions encountered when sampling. All CPDM data files transmitted electronically to MSHA must be maintained by the operator for at least 12 months.

The burdens for sections 70.210(a), (c), and (f), 71.207(a) and (c), and 90.208(f) are included in the burdens for sections 70.210, 71.207, and 90.208. Section 71.207(f) pertains only to using the CPDM. However, operators of surface coal mines and operators of surface work areas of underground coal mines are only required to use the CPDM for part 90 miner sampling, and MSHA does not expect them to use the CPDM to conduct DWP sampling. Thus, the burden for section 71.207(f) is accounted for in the burden for section 90.208(f).

Report to the Operator of Respirable Dust Samples; Post or Provide Results and Report under Parts 70, 71, and 90: Sections 70.211(b) and 71.208(b) require that upon receipt of the sampling report that contains sampling results from MSHA, the operator must post the data for at least 31 days on the mine bulletin board. Sections 70.211(c) and 71.208(c)

require, if using a CPDM, the person certified in sampling, within 12 hours after the end of each sampling shift, to print, sign, and post on the mine bulletin board a paper record (Dust Data Card) of each sample run. This hard-copy record must include the data entered when the sample run was first programmed and the following: The mine identification number; the locations within the mine or the DWP at the mine from which the samples were taken; the concentration of respirable dust, expressed as an equivalent concentration reported and stored for each sample; the sampling status conditions encountered for each sample; and the shift length. Section 71.208(c) requires that when CPDMs are used for DWP sampling, underground coal mine operators that have surface work areas and surface coal mine operators print, sign, and post a paper record (Dust Data Card) with the shift length and other information regarding sampling for each location sampled under Part 71. MSHA does not expect that the CPDM will be used for DWP sampling by underground coal mine operators on the surface area of the underground mine, or by surface coal mine operators. Therefore, no burden was estimated at this time for Section 71.208(c).

For part 90 miners, section 90.209(b) requires that upon receipt of the sampling report from MSHA, the operator must provide a copy to the part 90 miner only. Section 90.209(c) requires that if using a CPDM, the person certified in sampling must print, sign, and provide to each part 90 miner, a paper record (Dust Data Card) of the sample run within one hour after the start of the part 90 miner's next work shift. This hard copy record must include the data entered when the sample run was first programmed, and the following: The mine identification number; the location within the mine from which the sample was taken; the concentration of respirable dust, expressed as an equivalent concentration reported and stored for each sample; the sampling status conditions encountered for each sample; the shift length; and the part 90 miner's MSHA Individual Identification Number (MIIN).

Operational Status Changes under Parts 70, 71, and 90: Sections 70.212(a), 71.209(a), and 90.210 require that if there is a change in operational status that affects the respirable dust sampling requirements of part 70, 71, or 90, respectively, the operator must report the change in operational status of the mine, MMU, DA, DWP, or part 90 miner (such as the part 90 miner entering a

terminated, injured or ill status, or returning to work) to the MSHA District Office or to any other MSHA office designated by the District Manager. Status changes must be reported in writing or electronically within 3 working days after the status change has occurred.

Revised Dust Control Parameters in the Mine Ventilation Plan in Response to Violations of the Applicable Standard under Part 70: Sections 70.208(i)(2) and 70.209(g)(2) provide that a citation for violation of the applicable standard shall be terminated by MSHA when the operator has submitted to the District Manager revised dust control parameters as part of the mine ventilation plan applicable to the MMU, or the DA, respectively, in the citation and such changes have been approved by the District Manager. The revised parameters must reflect the control measures used by the operator to abate the violation.

Dust Control Plan Provisions in Response to Violations of the Applicable Standard under Part 71: Section 71.300(a) requires that the operator must submit to the District Manager for approval a written respirable dust control plan applicable to the DWP identified in the citation within 15 calendar days after the termination date of a citation for violation of the applicable standard. The respirable dust control plan and revisions must be suitable to the conditions and the mining system of the coal mine and be adequate to continuously maintain respirable dust within the applicable standard at the DWP identified in the citation.

Section 71.300(a)(1) requires that the mine operator must notify the representative of miners at least 5 days prior to submission to MSHA of a respirable dust control plan and any revision to a dust control plan. If requested, the mine operator must provide a copy to the representative of miners at the time of notification.

Section 71.300(a)(3) requires that a copy of the proposed respirable dust control plan, and a copy of any proposed revision, submitted for Agency approval must be posted on the mine bulletin board at the time of submittal. The proposed plan or proposed revision must remain posted until it is approved, withdrawn, or denied.

Under section 71.301(d)(1), the approved respirable dust control plan and any revisions must be provided upon request to the representative of the miners by the operator following notification of approval.

Under section 71.301(d)(3), the plan or revisions must be posted on the mine bulletin board within 1 working day following notification of approval and remain posted for the period that the plan is in effect.

Under section 71.301(e), the operator may review respirable dust control plans and submit proposed revisions to such plans to the District Manager for approval.

Dust Control Plan Provisions in Response to Violations of the Applicable Standard under Part 90: Section 90.300(a) requires that if an operator abates a violation of the applicable standard by reducing the respirable dust level in the position of the part 90 miner, the operator must submit to the District Manager for approval a written respirable dust control plan for the part 90 miner in the position identified in the citation within 15 calendar days after the citation is terminated. The respirable dust control plan and revisions thereof must be suitable to the conditions and the mining system of the coal mine and be adequate to continuously maintain respirable dust within the applicable standard for that part 90 miner.

Section 90.301(d) requires the operator to provide a copy of the current respirable dust control plan to the part 90 miner.

Under section 90.301(e), the operator may review respirable dust control plans and submit proposed revisions to such plans to the District Manager for approval.

Mine Ventilation Plan, Revisions, Notify Miners' Representatives, Provide Copy, and Posting: Section 75.370(a)(3)(i) requires underground coal mine operators to notify the miners' representative at least 5 days prior to submission of mine ventilation plan and any revision and, if requested, provide a copy to the miners' representative at the time of notification. Section 75.370(a)(3)(iii) and (f)(3) require the operator to post a copy of the proposed plan and any proposed revision, and the MSHA-approved plan and any revisions, respectively, on the mine bulletin board. In addition, section 75.370(f)(1) requires the operator to provide a copy of the MSHA-approved plan and any revisions to the miners' representative, if requested.

## II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Respirable Coal Mine Dust Sampling. MSHA is particularly interested in comments that:

- Evaluate whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information has practical utility;
- Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on [www.regulations.gov](http://www.regulations.gov) and [www.reginfo.gov](http://www.reginfo.gov).

The public may also examine publicly available documents at USDOL-Mine Safety and Health Administration, 201 12th Street South, Suite 4E401, Arlington, VA 22202-5452. Sign in at the receptionist's desk on the 4th floor via the East elevator.

Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION CONTACT** section of this notice.

## III. Current Actions

This request for collection of information contains provisions for Respirable Coal Mine Dust Sampling. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request.

*Type of Review:* Revision of a currently approved collection.

*Agency:* Mine Safety and Health Administration.

*OMB Number:* 1219-0011.

*Affected Public:* Business or other for-profit.

*Number of Respondents:* 1,035.

*Frequency:* On occasion.

*Number of Responses:* 1,704,366.

*Annual Burden Hours:* 94,478 hours.

*Annual Respondent or Recordkeeper Cost:* \$40,967.

*MSHA Forms:* Miner Operator Dust Data Card.

Comments submitted in response to this notice will be summarized and

included in the request for Office of Management and Budget approval of the information collection request; they will also become a matter of public record.

**Sheila McConnell,**

*Certifying Officer.*

## NUCLEAR REGULATORY COMMISSION

[NRC-2015-0220]

### Seismic Design Classification for Nuclear Power Plants

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Draft regulatory guide; request for comment.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft regulatory guide (DG), DG-1315, "Seismic Design Classification for Nuclear Power Plants." The DG describes a method that the NRC staff considers acceptable for use in identifying and classifying those features of light-water-reactor (LWR) nuclear power plants that must be designed to withstand the effects of the safe-shutdown earthquake (SSE). DG-1315 is proposed revision 5 of Regulatory Guide (RG) 1.29.

**DATES:** Submit comments by November 16, 2015. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date.

Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

**ADDRESSES:** You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specified subject):

- Federal Rulemaking Web site: Go to <http://www.regulations.gov> and search for Docket ID NRC-2015-0220. Address questions about NRC dockets to Carol Gallagher; telephone: 301-415-3463; email: [Carol.Gallagher@nrc.gov](mailto:Carol.Gallagher@nrc.gov). For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- Mail comments to: Cindy Bladey, Office of Administration, Mail Stop: OWFN-12H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

For additional direction on accessing information and submitting comments, see “Obtaining Information and Submitting Comments” in the **SUPPLEMENTARY INFORMATION** section of this document.

**FOR FURTHER INFORMATION CONTACT:** Yiu Law, Office of New Reactors, telephone: 301-415-0523, email: [Yiu.Law@nrc.gov](mailto:Yiu.Law@nrc.gov) or Edward O'Donnell, Office of Nuclear Regulatory Research, telephone: 301-415-3317, email: [Edward.ODonnell@nrc.gov](mailto:Edward.ODonnell@nrc.gov). Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001.

#### **SUPPLEMENTARY INFORMATION:**

### **I. Obtaining Information and Submitting Comments**

#### *A. Obtaining Information*

Please refer to Docket ID NRC-2015-0220 when contacting the NRC about the availability of information regarding this document. You may obtain publically-available information related to this document by the following methods:

- Federal Rulemaking Web site: Go to <http://www.regulations.gov> and search for Docket ID NRC-2015-0220.

- NRC's Agencywide Documents Access and Management System (ADAMS): You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to [pdr.resource@nrc.gov](mailto:pdr.resource@nrc.gov). The DG is electronically available in ADAMS under Accession No. ML15061A048.

- NRC's PDR: You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

#### *B. Submitting Comments*

Please include Docket ID NRC-2015-0220 in the subject line of your comment submission.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC will post all comment submissions at <http://www.regulations.gov> as well as enters the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submissions. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

### **II. Additional Information**

The NRC is issuing for public comment a DG in the NRC's “Regulatory Guide” series. This series was developed to describe and make available to the public such information as methods that are acceptable to the NRC staff for implementing specific parts of the NRC's regulations, techniques that the staff uses in evaluating specific issues or postulated events, and data that the staff needs in its review of applications for permits and licenses.

The DG, entitled, “Seismic Design Classification for Nuclear Power Plants,” is temporarily identified by its task number, DG-1315. DG-1315 is proposed revision 5 of RG 1.29. The guide describes a method that the staff of the NRC considers acceptable for use in identifying and classifying those features of LWR nuclear power plants that must be designed to withstand the effects of the SSE.

This DG does not present new regulatory requirements, but is intended to clarify content in Section C, “Staff Regulatory Guidance,” by (1) addition of a reference to the definition of the reactor coolant pressure boundary in section 50.2 of Title 10 of the *Code of Federal Regulations* (CFR), and (2) a reorganization of systems and subsystems to add clarity to the staff guidance. It also adds a reference to a related international standard, and it was reformatted to align with current program guidance for regulatory guides.

### **III. Backfitting and Issue Finality**

DG-1315 describes a method that the staff of the NRC considers acceptable for use in identifying and classifying those features of LWR nuclear power plants that must be designed to withstand the effects of the SSE. Issuance of this DG, if finalized, would not constitute backfitting as defined in 10 CFR 50.109 (the Backfit Rule) and would not otherwise be inconsistent with the issue finality provisions in 10 CFR part 52. As discussed in the “Implementation” section of this DG, the NRC has no current intention to impose this guided,

if finalized, on holders of current operating licenses or combined licenses.

This DG may be applied to applications for operating licenses, combined licenses, early site permits, and certified design rules docketed by the NRC as of the date of issuance of the final regulatory guide, as well as future applications submitted after the issuance of the regulatory guide. Such action would not constitute backfitting as defined in the Backfit Rule or be otherwise inconsistent with the applicable issue finality provision in 10 CFR part 52, inasmuch as such applicants are not within the scope of entities protected by the Backfit Rule or the relevant issue finality provisions in part 52.

Dated at Rockville, Maryland, this 14th day of September, 2015.

For the Nuclear Regulatory Commission.

## **NUCLEAR REGULATORY COMMISSION**

[NRC-2015-0102]

### **Information Collection: Destinations of Released Patients Following Treatment with Iodine-131 and Estimation of Doses to Members of the Public at Locations Other Than Conventional Residences Receiving Such Patients**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Proposed information collection; request for comment.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a proposed collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, “Destinations of Released Patients Following Treatment with Iodine-131 and Estimation of Doses to Members of the Public at Locations other than Conventional Residences Receiving Such Patients.”

**DATES:** Submit comments by October 19, 2015.

**ADDRESSES:** Submit comments directly to OMB reviewer at: Vlad Dorjets, Desk Officer, Office of Information and Regulatory Affairs (3150-XXXX), NEOB-10202, Office of Management and Budget, Washington, DC 20503;

telephone: 202-395-7315, email: [oira\\_submission@omb.eop.gov](mailto:oira_submission@omb.eop.gov).

**FOR FURTHER INFORMATION CONTACT:**

Tremaine Donnell, Office of Information Services, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-6258; email: [INFOCOLLECTS.Resource@NRC.GOV](mailto:INFOCOLLECTS.Resource@NRC.GOV).

**SUPPLEMENTARY INFORMATION:**

**I. Obtaining Information and Submitting Comments**

*A. Obtaining Information*

Please refer to Docket ID NRC-2015-0102 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- Federal rulemaking Web site: Go to <http://www.regulations.gov> and search for Docket ID NRC-2015-0102. A copy of the collection of information and related instructions may be obtained without charge by accessing Docket ID NRC-2015-0102 on this Web site.

- NRC's Agencywide Documents Access and Management System (ADAMS): You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select "ADAMS Public Documents" and then select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to [pdr.resource@nrc.gov](mailto:pdr.resource@nrc.gov). A copy of the collection of information and related instructions may be obtained without charge by accessing ADAMS Accession No. ML15209A593. The supporting statement available in ADAMS under Accession No. ML15209A605.

- NRC's PDR: You may examine and purchase copies of public documents at the NRC's PDR, Room O1-F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

- NRC's Clearance Officer: A copy of the collection of information and related instructions may be obtained without charge by contacting NRC's Clearance Officer, Tremaine Donnell, Office of Information Services, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-6258; email: [INFOCOLLECTS.Resource@NRC.GOV](mailto:INFOCOLLECTS.Resource@NRC.GOV).

*B. Submitting Comments*

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your

comment submission. All comment submissions are posted at <http://www.regulations.gov> and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

**II. Background**

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a proposed collection of information to OMB for review entitled, "Destinations of Released Patients Following Treatment with Iodine-131 and Estimation of Doses to Members of the Public at Locations other than Conventional Residences Receiving Such Patients." The NRC hereby informs potential responses that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on Tuesday, May 19, 2015 (80 FR 28715).

1. *The title of the information collection:* Destinations of Released Patients Following Treatment with Iodine-131 and Estimation of Doses to Members of the Public at Locations other than Conventional Residences Receiving Such Patients.

2. *OMB approval number:* An OMB control number has not yet been assigned to this proposed information collection.

3. *Type of submission:* New.

4. *The form number, if applicable:* N/A.

5. *How often the collection is required or requested:* One-time.

6. *Who will be required or asked to respond:* Institutions that treat thyroid cancer patients with I-131 and the thyroid cancer patients who have been treated.

7. *The estimated number of annual responses:* 5,175 (175 for treating institutions and 5000 for individuals).

8. *The estimated number of annual respondents:* 5,175.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 1,675 (175 hours for treating institution and 1500 hours for individuals).

10. *Abstract:* Although most patients return to their home after receiving diagnostic or therapeutic of Iodine-131, some patients released by the licensee may stay at another location (such as a hotel) for a few days. However, the extent of this practice is unclear. The same uncertainty exists regarding patients returning to nursing homes and other institutional settings. Therefore, one of the main objectives of this study is to obtain reliable statistical data that provides good estimates of the prevalence of these practices. The second objective is to determine, by measurements, the external and internal doses received by members of the general public at hotels, nursing homes, or other institutional settings that receive treated patients immediately after their release.

Dated at Rockville, Maryland, this 14th day of September, 2015.

For the Nuclear Regulatory Commission.

**Tremaine Donnell,**

*NRC Clearance Officer, Office of Information Services.*

**BILLING CODE 7590-01-P**

**NUCLEAR REGULATORY COMMISSION**

[NRC-2015-0214]

**Independent Assessment of Nuclear Material Control and Accounting Systems**

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Draft regulatory guide; request for comment.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) is issuing for public comment draft regulatory guide (DG), DG-5049, "Independent Assessment of Nuclear Material Control and Accounting Systems." This DG provides guidance from experience gained since the regulatory guide was initially published in June 1975. In particular, the guidance for performing independent assessments has been expanded to include process monitoring and item monitoring for Category I fuel cycle facilities, and to include guidance for uranium enrichment facilities. In addition, this revision addresses changes in Material Control & Accounting (MC&A) terminology; for

example, the term “management review” has been replaced by “independent assessment,” and “material unaccounted for” by “inventory difference.”

**DATES:** Submit comments by November 16, 2015. Comments received after this date will be considered if it is practical to do so, but the NRC is able to ensure consideration only for comments received on or before this date. Although a time limit is given, comments and suggestions in connection with items for inclusion in guides currently being developed or improvements in all published guides are encouraged at any time.

**ADDRESSES:** You may submit comments by any of the following methods (unless this document describes a different method for submitting comments on a specified subject):

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC–2015–0214. Address questions about NRC dockets to Carol Gallagher; telephone: 301–415–3463; email: [Carol.Gallagher@nrc.gov](mailto:Carol.Gallagher@nrc.gov). For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

- *Mail comments to:* Cindy Bladey, Office of Administration, Mail Stop: OWFN–12H08, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

For additional direction on accessing information and submitting comments, see “Obtaining Information and Submitting Comments” in the **SUPPLEMENTARY INFORMATION** section of this document.

**FOR FURTHER INFORMATION CONTACT:** Glenn Tuttle, Office of Nuclear Material Safety and Safeguards, telephone: 301–415–7230, email: [Glenn.Tuttle@nrc.gov](mailto:Glenn.Tuttle@nrc.gov), or Mekonen Bayssie, Office of Nuclear Regulatory Research, telephone: 301–415–1699, email: [Mekonen.Bayssie@nrc.gov](mailto:Mekonen.Bayssie@nrc.gov); U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

#### **SUPPLEMENTARY INFORMATION:**

### **I. Obtaining Information and Submitting Comments**

#### *A. Obtaining Information*

Please refer to Docket ID NRC–2014–0214 when contacting the NRC about the availability of information regarding this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking Web site:* Go to <http://www.regulations.gov> and search for Docket ID NRC–2015–0214.

- *NRC’s Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at <http://www.nrc.gov/reading-rm/adams.html>. To begin the search, select “ADAMS Public Documents” and then select “Begin Web-based ADAMS Search.” For problems with ADAMS, please contact the NRC’s Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to [pdr.resource@nrc.gov](mailto:pdr.resource@nrc.gov). The DG is electronically available in ADAMS under Accession No. ML14310A339.

- *NRC’s PDR:* You may examine and purchase copies of public documents at the NRC’s PDR, Room O1–F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852.

#### *B. Submitting Comments*

Please include Docket ID NRC–2015–0214 in the subject line of your comment submission, in order to ensure that the NRC is able to make your comment submission available to the public in this docket.

The NRC cautions you not to include identifying or contact information that you do not want to be publicly disclosed in your comment submission. The NRC posts all comment submissions at <http://www.regulations.gov> as well as enters the comment submissions into ADAMS. The NRC does not routinely edit comment submissions to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that the NRC does not routinely edit comment submissions to remove such information before making the comment submissions available to the public or entering the comment submissions into ADAMS.

### **II. Additional Information**

The NRC is issuing for public comment a DG in the NRC’s “Regulatory Guide” series. This series was developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the NRC’s regulations, techniques that the staff uses in evaluating specific issues or postulated events, and data that the staff needs in its review of applications for permits and licenses.

The DG entitled “Independent Assessment of Nuclear Material Control and Accounting Systems” is a proposed revision temporarily identified by its task number, DG–5049. This DG is proposed Revision 1 of Regulatory Guide (RG) 5.51, “Management Review of Nuclear Material Control and Accounting Systems.”

This DG provides guidance that conforms with revisions to 10 CFR part 74, “Material Control and Accounting of Special Nuclear Material,” as well as incorporates experience gained since the RG was initially published in June 1975. In particular, the guidance for performing independent assessments has been expanded to include process monitoring and item monitoring for Category I fuel cycle facilities, and to include guidance for uranium enrichment facilities. In addition, this revision addresses changes in MC&A terminology since the RG was published in 1975; for example, the term “management review” has been replaced by “independent assessment,” and “material unaccounted for” by “inventory difference.”

### **III. Backfitting**

This DG provides guidance on recordkeeping and reporting requirements with respect to material control and accounting, as set forth in 10 CFR part 74. The regulatory position held in this guidance demonstrates the method that the NRC staff finds acceptable for an applicant or licensee to meet the requirements of the underlying NRC regulations. The issuance of the guidance in this DG is not backfitting, as that term is defined in 10 CFR 70.76, 72.62, or 76.76, because information collection and reporting requirements with respect to material control and accounting are not included within the scope of the NRC’s backfitting protections.

Dated at Rockville, Maryland, this 11th day of September, 2015.

For the Nuclear Regulatory Commission.

**Thomas H. Boyce,**

*Chief, Regulatory Guidance and Generic Issues Branch, Division of Engineering, Office of Nuclear Regulatory Research.*

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-75902; File No. SR-BATS-2015-74]

### Self-Regulatory Organizations; BATS Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Related to Fees To Adopt a Tape B Volume Tier

September 11, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on September 9, 2015, BATS Exchange, Inc. (the "Exchange" or "BATS") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Exchange has designated the proposed rule change as one establishing or changing a member due, fee, or other charge imposed by the Exchange under Section 19(b)(3)(A)(ii) of the Act<sup>3</sup> and Rule 19b-4(f)(2) thereunder,<sup>4</sup> which renders the proposed rule change effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange filed a proposal to amend its fees and rebates applicable to Members<sup>5</sup> of the Exchange pursuant to Rule 15.1(a) and (c) ("Fee Schedule") to adopt a Tape B Volume Tier.

The text of the proposed rule change is available at the Exchange's Web site at [www.batstrading.com](http://www.batstrading.com), at the principal office of the Exchange, and at the Commission's Public Reference Room.

#### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the

places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

##### A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

###### 1. Purpose

Currently, the Exchange offers a rebate of \$0.0020 per share as the standard rebate for orders with fee code B, which applies to orders that add liquidity to the Exchange in Tape B securities. The Exchange also offers various tiers that provide Members with the opportunity to earn higher rebates by meeting certain volume metrics, including the Cross-Asset Tape B Tier which provides a \$0.0031 per share rebate to a Member's orders with a fee code of B for which the Member: (1) Has a Tape B Step-Up Add TCV<sup>6</sup> from February 2015 that is equal to or greater than 0.06%; and (2) has an Options Market Maker Add TCV<sup>7</sup> that is equal to or greater than 0.75% on the BATS Options.

The Exchange is proposing to adopt a new tier in footnote 13 titled "Tape B Volume Tier." Under the Tape B Volume Tier, the Exchange is proposing to provide a \$0.0027 per share rebate to a Member's orders with a fee code of B for which the Member's Tape B ADAV as a percentage of TCV is equal to or greater than 0.08%. As is the case with any other rebates on the fee schedule, to the extent that a Member qualifies for higher rebates than those provided under the proposed Tape B Volume Tier, the higher rebates shall apply.

###### Implementation Date

The Exchange proposes to implement this amendment to its Fee Schedule immediately.<sup>8</sup>

<sup>6</sup> As provided in the fee schedule, for purposes of BATS Equities pricing, "Tape B Step-Up Add TCV" means ADAV in Tape B securities as a percentage of TCV in the relevant baseline month subtracted from current ADAV in Tape B securities as a percentage of TCV.

<sup>7</sup> As provided in the fee schedule, for purposes of BATS Equities pricing, "Options Market Maker Add TCV" for purposes of equities pricing means ADAV resulting from Market Maker orders as a percentage of TCV, using the definitions of ADAV, Market Maker and TCV as provided under the Exchange's fee schedule for BATS Options.

<sup>8</sup> The Exchange initially filed the proposed fee change on August 31, 2015 (SR-BATS-2015-66). On September 2, 2015, the Exchange withdrew that filing and submitted filing SR-BATS-2015-70. On that same day, the Exchange withdrew SR-BATS-2015-70 and submitted SR-BATS-2015-72. On September 9, 2015, the Exchange withdrew SR-BATS-2015-72 and submitted this filing.

###### 2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the objectives of Section 6 of the Act,<sup>9</sup> in general, and furthers the objectives of Section 6(b)(4),<sup>10</sup> in particular, as it is designed to provide for the equitable allocation of reasonable dues, fees and other charges among its Members and other persons using its facilities. The Exchange also notes that it operates in a highly-competitive market in which market participants can readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive. The proposed rule change reflects a competitive pricing structure designed to incent market participants to direct their order flow to the Exchange. The Exchange believes that the proposed rates are equitable and non-discriminatory in that they apply uniformly to all Members. The Exchange believes the fees and credits remain competitive with those charged by other venues and therefore continue to be reasonable and equitably allocated to Members.

Volume-based rebates and fees such as the proposed Tape B Volume Tier have been widely adopted by equities and options exchanges and are equitable because they are open to all Members on an equal basis and provide additional benefits or discounts that are reasonably related to the value to an exchange's market quality associated with higher levels of market activity, such as higher levels of liquidity provision and/or growth patterns, and introduction of higher volumes of orders into the price and volume discovery processes.

The Exchange believes that the proposal to add a Tape B Volume Tier is a reasonable, fair and equitable, and not unfairly discriminatory allocation of fees and rebates because it will provide Members with an additional incentive to reach certain thresholds on both [sic] the Exchange in Tape B securities. Such pricing programs thereby reward a Member's growth pattern in Tape B securities and such increased volume increases potential revenue to the Exchange, and will allow the Exchange to continue to provide and potentially expand the incentive programs operated by the Exchange. Further, the proposed changes will result in Members receiving either the same or an increased rebate than they would currently receive. The Exchange also notes that the proposed Tape B Volume Tier is similar to pricing tier already employed by the Exchange as well as on

<sup>9</sup> 15 U.S.C. 78f.

<sup>10</sup> 15 U.S.C. 78f(b)(4).

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>5</sup> A Member is defined as "any registered broker or dealer that has been admitted to membership in the Exchange." See Exchange Rule 1.5(n).

other exchanges, including EDGX Exchange, Inc. (“EDGX”), which maintains a Tape B Step Up tier to incentivize added liquidity in Tape B securities.<sup>11</sup>

#### *B. Self-Regulatory Organization’s Statement on Burden on Competition*

The Exchange does not believe its proposed amendments to its Fee Schedule would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed changes represent a significant departure from previous pricing offered by the Exchange or pricing offered by the Exchange’s competitors. Additionally, Members may opt to disfavor the Exchange’s pricing if they believe that alternatives offer them better value. Accordingly, the Exchange does not believe that the proposed change will impair the ability of Members or competing venues to maintain their competitive standing in the financial markets.

The Exchange does not believe that the proposed new tier would burden competition, but instead, enhances competition, as they [sic] are intended to increase the competitiveness of and draw additional volume to the Exchange. As stated above, the Exchange notes that it operates in a highly competitive market in which market participants can readily direct order flow to competing venues if the deem fee structures to be unreasonable or excessive. The proposed changes are generally intended to enhance the rebates for liquidity added to the Exchange, which is intended to draw additional liquidity to the Exchange. The Exchange does not believe the proposed tier would burden intramarket competition as they [sic] would apply to all Members uniformly.

#### *C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

### **III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)

of the Act<sup>12</sup> and paragraph (f) of Rule 19b–4 thereunder.<sup>13</sup> At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

### **IV. Solicitation of Comments**

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

#### *Electronic Comments*

- Use the Commission’s Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR–BATS–2015–74 on the subject line.

#### *Paper Comments*

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–BATS–2015–74. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission’s Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from

submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BATS–2015–74, and should be submitted on or before October 8, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>14</sup>

## **SECURITIES AND EXCHANGE COMMISSION**

[Release No. 34–75899; File No. SR–NSCC–2015–803]

### **Self-Regulatory Organizations; National Securities Clearing Corporation; Notice of Filing of Advance Notice To Enhance NSCC’s Margining Methodology as Applied to Family-Issued Securities of Certain NSCC Members**

September 11, 2015.

Pursuant to section 806(e)(1) of title VIII of the Dodd-Frank Wall Street Reform and Consumer Protection Act entitled the Payment, Clearing, and Settlement Supervision Act of 2010<sup>1</sup> (“Clearing Supervision Act”) and Rule 19b–4(n)(1)(i)<sup>2</sup> under the Securities Exchange Act of 1934 (“Act”), notice is hereby given that on August 14, 2015, National Securities Clearing Corporation (“NSCC”) filed with the Securities and Exchange Commission (“Commission”) the advance notice SR–NSCC–2015–803 (“Advance Notice”) as described in Items I and II below, which Items have been prepared by NSCC.<sup>3</sup> The Commission is publishing this notice to solicit comments on the Advance Notice from interested persons.

#### **I. Clearing Agency’s Statement of the Terms of Substance of the Advance Notice**

This Advance Notice consists of amendments to NSCC’s Rules & Procedures (“Rules”) in order to enhance NSCC’s margining methodology as applied to family-issued

<sup>14</sup> 17 CFR 200.30–3(a)(12).

<sup>1</sup> 12 U.S.C. 5465(e)(1).

<sup>2</sup> 17 CFR 240.19b–4(n)(1)(i).

<sup>3</sup> On August 14, 2015, NSCC filed this Advance Notice as a proposed rule change (SR–NSCC–2015–003) with the Commission pursuant to section 19(b)(1) of the Act, 15 U.S.C. 78s(b)(1), and Rule 19b–4, 17 CFR 240.19b–4. A copy of the proposed rule change is available at <http://www.dtcc.com/legal/sec-rule-filings.aspx>.

<sup>11</sup> See EDGX fee schedule, footnote 2.

securities of those NSCC Members<sup>4</sup> that are placed on NSCC's "Watch List", *i.e.* those Member [sic] who present a heightened credit risk to NSCC or have demonstrated higher risk related to their ability to meet settlement, as more fully described below.

## II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Advance Notice

In its filing with the Commission, NSCC included statements concerning the purpose of and basis for the Advance Notice and discussed any comments it received on the Advance Notice. The text of these statements may be examined at the places specified in Item IV below. NSCC has prepared summaries, set forth in sections A and B below, of the most significant aspects of such statements.

### (A) Clearing Agency's Statement on Comments on the Advance Notice Received From Members, Participants, or Others

In November 2013, NSCC engaged in outreach to its Members by providing those Members with a description of the proposal and the results of an impact study showing the potential impact of this proposal on Members' Clearing Fund required deposits. NSCC did not receive any written comments relating to this proposal in response to this outreach. NSCC will notify the Commission of any written comments received by NSCC.

### (B) Advance Notice Filed Pursuant to Section 806(e) of the Payment, Clearing and Settlement Supervision Act

#### Description of Change

NSCC is proposing to enhance its margin methodology as applied to the family-issued securities of its Members that are on its Watch List<sup>5</sup> by excluding these securities from the volatility component, or "VaR" charge, and then charging an amount calculated by multiplying the absolute value of the long net unsettled positions in that Member's family-issued securities by a percentage that is no less than 40%. The haircut rate to be charged would be

<sup>4</sup> Terms not defined herein are defined in the Rules, available at [http://dtcc.com/-/media/Files/Downloads/legal/rules/nscs\\_rules.pdf](http://dtcc.com/-/media/Files/Downloads/legal/rules/nscs_rules.pdf).

<sup>5</sup> As part of its ongoing monitoring of its membership, NSCC utilizes an internal credit risk rating matrix to rate its risk exposures to its Members based on a scale from 1 (the strongest) to 7 (the weakest). Members that fall within the higher risk rating categories (*i.e.* 5, 6, and 7) are considered on NSCC's "Watch List", and may be subject to enhanced surveillance or additional margin charges, as permitted under NSCC's Rules. See Section 4 of Rule 2B and section I(B)(1) of Procedure XV of NSCC's Rules, *supra* Note 1 [sic].

determined based on the Member's rating on the credit risk rating matrix and the type of family-issued security submitted to NSCC. Fixed income securities that are family-issued securities would be charged a haircut rate of no less than 80% for firms that are rated 6 or 7 on the credit risk rating matrix, and no less than 40% for firms that are rated 5 on the credit risk rating matrix; and equity securities that are family-issued securities would be charged a haircut rate of 100% for firms that are rated 6 or 7 on the credit risk rating matrix, and no less than 50% for firms that are rated 5 on the credit risk rating matrix. NSCC would have the authority to adjust these haircut rates from time to time within these parameters as described in Procedure XV of NSCC's Rules without filing a proposed rule change with the Commission pursuant to section 19(b)(1) of the Act,<sup>6</sup> and the rules thereunder, or an advance notice with the Commission pursuant to section 806(e)(1) of the Clearing Supervision Act,<sup>7</sup> and the rules thereunder.

#### Anticipated Effect on and Management of Risk

As a central counterparty, NSCC occupies an important role in the securities settlement system by interposing itself between counterparties to financial transactions and thereby reducing the risk faced by participants and contributing to global financial stability. The effectiveness of a central counterparty's risk controls and the adequacy of its financial resources are critical to achieving these risk-reducing goals. In that context, NSCC continuously reviews its margining methodology in order to ensure the reliability of its margining in achieving the desired coverage. In order to be most effective, NSCC must take into consideration the risk characteristics specific to certain securities when margining those securities.

Among the various risks that NSCC considers when evaluating the effectiveness of its margining methodology are its counterparty risks and identification and mitigation of "wrong-way" risk, particularly specific wrong-way risk, defined as the risk that an exposure to a counterparty is highly likely to increase when the creditworthiness of that counterparty deteriorates.<sup>8</sup> NSCC has identified an

exposure to wrong-way risk when it acts as central counterparty to a Member with respect to positions in securities that are issued by that Member or that Member's affiliate. These positions are referred to as "family-issued securities." In the event that a Member with unsettled long positions in family-issued securities defaults, NSCC would close out those positions following a likely drop in the credit-worthiness of the issuer, possibly resulting in a loss to NSCC.

Therefore, the overall impact of NSCC's proposal, as described above, on risks presented by NSCC would be to reduce NSCC's exposure to this type of wrong-way risk by enhancing its margin methodology as applied to the family-issued securities of its Members that are on its Watch List, and present a heightened credit risk to the clearing agency or have demonstrated higher risk related to their ability to meet settlement. NSCC believes a reduction in its exposures to wrong-way risk through a margining methodology that more effectively capture [sic] the risk characteristics of these positions would contribute to the goal of maintaining financial stability in the event of a Member default and reduce systemic risk overall. Because NSCC Members that are on its Watch List present a heightened credit risk to the clearing agency or have demonstrated higher risk related to their ability to meet settlement, NSCC believes that this charge would more effectively capture the risk characteristics of these positions and can help mitigate NSCC's exposure to wrong-way risk.

NSCC will continue to evaluate its exposures to wrong-way risk, specifically wrong-way risk presented by family-issued securities, including by reviewing the impact of expanding the application of the proposed margining methodology to the family-issued securities of those Members that are not on the Watch List. NSCC is proposing to apply the enhanced margining methodology to the family-issued securities of Members that are on the Watch List at this time because, as stated above, these Members present a heightened credit risk to the clearing agency or have demonstrated higher risk related to their ability to meet settlement. As such, there is a clear and more urgent need to address NSCC's exposure to wrong-way risk presented by these firms' family-issued securities. However, any future change to the margining methodology as applied to the family-issued securities of Members

<sup>6</sup> 15 U.S.C. 78s(b)(1).

<sup>7</sup> 12 U.S.C. 5465(e)(1).

<sup>8</sup> See *Principles for financial market infrastructures*, issued by the Committee on Payment and Settlement Systems and the Technical Committee of the International Organization of

Securities Commissions 47 n.65 (April 2012), available at <http://www.bis.org/publ/cpss101a.pdf>.

that are not on the Watch List would be subject to a separate proposed rule change pursuant to section 19(b)(1) of the Act,<sup>9</sup> and the rules thereunder and an advance notice pursuant to section 806(e)(1) of the Clearing Supervision Act,<sup>10</sup> and the rules thereunder.

*Consistency with the Clearing Supervision Act.* The objectives and principles of section 805(b)(1) of the Clearing Supervision Act specify the promotion of robust risk management, promotion of safety and soundness, reduction of systemic risks and support of the stability of the broader financial system.<sup>11</sup> Rule 17Ad-22(b)(1), promulgated under the Act, requires NSCC to measure its credit exposures to its participants at least once a day and limit its exposures to potential losses from defaults by its participants under normal market conditions so that the operations of the clearing agency would not be disrupted and non-defaulting participants would not be exposed to losses that they cannot anticipate or control.<sup>12</sup> Rule 17Ad-22(b)(2), promulgated under the Act, requires NSCC to use risk-based models for setting margin requirements.<sup>13</sup>

By enhancing the margin methodology as applied to the family-issued securities of its Members that are on its Watch List the proposal would assist NSCC in collecting margin that more accurately reflects the risk characteristics of these securities, thereby limiting NSCC's exposures to potential losses from defaults by these Members under normal market conditions. By more closely capturing the risk characteristics of these positions, the proposed enhancement to the margining methodology would also assist NSCC in its continuous efforts to ensure the reliability and effectiveness of its risk-based margining methodology. In this way, the proposal would help NSCC, as a central counterparty, maintain effective risk controls, contributing to the goal of maintaining financial stability in the event of a Member default. Therefore, NSCC believes the proposal is consistent with the requirements of section 805(b)(1) of the Clearing Supervision Act and Rule 17Ad-22(b)(1) and (2), promulgated under the Act, cited above.

### III. Date of Effectiveness of the Advance Notice, and Timing for Commission Action

The proposed change may be implemented if the Commission does not object to the proposed change within 60 days of the later of (i) the date that the proposed change was filed with the Commission or (ii) the date that any additional information requested by the Commission is received. NSCC shall not implement the proposed change if the Commission has any objection to the proposed change.

The Commission may extend the period for review by an additional 60 days if the proposed change raises novel or complex issues, subject to the Commission providing NSCC with prompt written notice of the extension. The proposed change may be implemented in less than 60 days from the date the Advance Notice is filed, or the date further information requested by the Commission is received, if the Commission notifies NSCC in writing that it does not object to the proposed change and authorizes NSCC to implement the proposed change on an earlier date, subject to any conditions imposed by the Commission.

NSCC shall post notice on its Web site of proposed changes that are implemented.

The proposal shall not take effect until all regulatory actions required with respect to the proposal are completed.

### IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the Advance Notice is consistent with the Clearing Supervision Act. Comments may be submitted by any of the following methods:

#### *Electronic Comments*

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-NSCC-2015-803 on the subject line.

#### *Paper Comments*

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-NSCC-2015-803. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use

only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the Advance Notice that are filed with the Commission, and all written communications relating to the Advance Notice between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of NSCC and on DTCC's Web site (<http://dtcc.com/legal/sec-rule-filings.aspx>). All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NSCC-2015-803 and should be submitted on or before October 8, 2015.

By the Commission.

**Brent J. Fields,**  
Secretary.

## SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 31819; 812-14416]

### Pomona Investment Fund, et al.; Notice of Application

September 11, 2015.

**AGENCY:** Securities and Exchange Commission ("Commission").

**ACTION:** Notice of an application under section 6(c) of the Investment Company Act of 1940 (the "Act") for an exemption from sections 18(c) and 18(i) of the Act and for an order pursuant to section 17(d) of the Act and rule 17d-1 under the Act.

**SUMMARY OF APPLICATION:** Applicants request an order to permit certain registered closed-end management investment companies to issue multiple classes of shares ("Shares") and to impose asset-based distribution and service fees and contingent deferred sales loads ("CDSCs").

<sup>9</sup> 15 U.S.C. 78s(b)(1).

<sup>10</sup> 12 U.S.C. 5465(e)(1).

<sup>11</sup> 12 U.S.C. 5464(b)(1).

<sup>12</sup> 17 CFR 240.17Ad-22(b)(1).

<sup>13</sup> 17 CFR 240.17Ad-22(b)(2).

**APPLICANTS:** Pomona Investment Fund (the "Fund"), Pomona Management LLC (the "Adviser") and Voya Investments Distributor, LLC (the "Distributor").

**FILING DATES:** The application was filed on January 13, 2015, and amended on May 28, 2015 and August 10, 2015.

**HEARING OR NOTIFICATION OF HEARING:** An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on October 6, 2015, and should be accompanied by proof of service on the applicants, in the form of an affidavit, or, for lawyers, a certificate of service. Pursuant to rule 0-5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

**ADDRESSES:** Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090; Applicants, c/o Michael Granoff, Pomona Management LLC, 780 3rd Avenue, New York, New York 10017.

**FOR FURTHER INFORMATION CONTACT:** Deepak T. Pai, Senior Counsel, at (202) 551-6876 or Mary Kay Frech, Branch Chief, at (202) 551-6821 (Division of Investment Management, Office of Investment Company Regulation).

**SUPPLEMENTARY INFORMATION:** The following is a summary of the application. The complete application may be obtained via the Commission's Web site by searching for the file number, or an applicant using the Company name box, at <http://www.sec.gov/search/search.htm> or by calling (202) 551-8090.

### Applicants' Representations

1. The Fund is a non-diversified closed-end management investment company registered under the Act and organized as a Delaware statutory trust. The Adviser, a Delaware limited liability company, is registered as an investment adviser under the Investment Advisers Act of 1940 and serves as investment adviser to the Fund. The Distributor, a broker-dealer registered under the Securities Exchange Act of 1934 ("1934 Act"), acts as principal underwriter of the Fund. The Distributor is under common control with the Adviser and is an

affiliated person, as defined in section 2(a)(3) of the Act, of the Adviser.

2. The Fund is engaged in a continuous public offering of Shares pursuant to its currently effective registration statement under the Securities Act of 1933 ("Securities Act").<sup>1</sup> The Fund's Shares are not listed on any securities exchange and are not traded on an over-the-counter system such as Nasdaq. Applicants do not expect that any secondary market will develop for the Fund's Shares.

3. The Fund currently issues a single class of Shares (the "Class A") at net asset value per share ("NAV"), subject to a front-end sales load and an asset-based distribution and services fee. The Fund proposes to offer multiple classes of Shares (each a "New Class") at NAV and may also charge a front-end sales load and an annual asset-based distribution and/or service fee. Each class of Shares would comply with the provisions of rule 12b-1 under the Act, as if the rule applied to closed-end management investment companies.

4. In order to provide a limited degree of liquidity to shareholders, the Fund may from time to time offer to repurchase Shares at their then-current NAV in accordance with rule 13e-4 under the 1934 Act. Repurchases of the Fund's Shares will be made at such times, in such amounts and on such terms as may be determined by the Fund's board of trustees (the "Board") in its sole discretion.<sup>2</sup> The Adviser expects that it will generally recommend to the Board that the Fund offer to repurchase Shares from shareholders quarterly.

5. Applicants request that the order also apply to any continuously-offered registered closed-end management investment company existing now or in the future for which the Adviser or the Distributor, or any entity controlling, controlled by, or under common control with the Adviser or the Distributor, acts as investment adviser or principal underwriter, and which provides periodic liquidity with respect to its Shares through tender offers conducted

<sup>1</sup> Shares of the Fund will only be sold to "accredited investors," as defined in Regulation D under the Securities Act.

<sup>2</sup> For Class A, a 2% early repurchase fee will be charged by the Fund with respect to any repurchase of Shares from a shareholder at any time prior to the one-year anniversary of the shareholder's purchase of the respective Shares. Any early repurchase fee, and the Fund's waiver of, scheduled variation in, or elimination of, such early repurchase fee, will equally apply to all shareholders of the Fund, regardless of class, consistent with section 18 of the Act and rule 18f-3 thereunder. To the extent the Fund determines to waive, impose scheduled variations of, or eliminate the early repurchase fee, it will do so consistently with the requirements of rule 22d-1 under the Act.

pursuant to rule 13e-4 under the 1934 Act (collectively with the Fund, the "Funds").<sup>3</sup>

6. Applicants represent that any asset-based distribution and/or service fees will comply with the provisions of rule 2830(d) of the Conduct Rules of the National Association of Securities Dealers, Inc. ("NASD Conduct Rule 2830").<sup>4</sup> Applicants also represent that the Fund will disclose in its prospectus, the fees, expenses and other characteristics of each class of Shares offered for sale by the prospectus, as is required for open-end, multiple class funds under Form N-1A. As if it were an open-end management investment company, the Fund will disclose fund expenses in shareholder reports, and disclose in its prospectus any arrangements that result in breakpoints in, or elimination of, sales loads.<sup>5</sup> Each Fund and the Distributor will also comply with any requirements that may be adopted by the Commission or FINRA regarding disclosure at the point of sale and in transaction confirmations about the costs and conflicts of interest arising out of the distribution of open-end investment company shares, and regarding prospectus disclosure of sales loads and revenue sharing arrangements as if those requirements applied to the Fund and the Distributor.<sup>6</sup>

7. The Fund will allocate all expenses incurred by it among the various classes of Shares based on net assets of the Fund attributable to each such class, except that the NAV and expenses of each class will reflect the expenses associated with the distribution fees paid pursuant to a plan adopted in compliance with rule 12b-1 of that class (if any), shareholder servicing fees attributable to a particular class (as well as transfer agency fees, if any) and any other incremental expenses particular to that class. Expenses of the Fund allocated to a particular class of the

<sup>3</sup> Any Fund relying on this relief will do so in a manner consistent with the terms and conditions of the application. Applicants represent that each investment company presently intending to rely on the requested order is listed as an applicant.

<sup>4</sup> Any references to NASD Conduct Rule 2830 include any successor or replacement Financial Industry Regulatory Authority ("FINRA") rule to NASD Conduct Rule 2830.

<sup>5</sup> See Shareholder Reports and Quarterly Portfolio Disclosure of Registered Management Investment Companies, Investment Company Act Release No. 26372 (Feb. 27, 2004) (adopting release); and Disclosure of Breakpoint Discounts by Mutual Funds, Investment Company Act Release No. 26464 (June 7, 2004) (adopting release).

<sup>6</sup> See Confirmation Requirements and Point of Sale Disclosure Requirements for Transactions in Certain Mutual Funds and Other Securities, and Other Confirmation Requirement Amendments, and Amendments to the Registration Form for Mutual Funds, Investment Company Act Release No. 26341 (Jan. 29, 2004) (proposing release).

Fund's Shares will be borne on a pro rata basis by each outstanding Share of that class. Applicants state that the Fund will comply with the provisions of rule 18f-3 under the Act as if it were an open-end investment company.

8. In the event the Funds impose a CDSC, applicants will comply with the provisions of rule 6c-10 under the Act, as if that rule applied to closed-end management investment companies. With respect to any waiver of, scheduled variation in, or elimination of the CDSC, the Fund will comply with the requirements of rule 22d-1 under the Act as if the Fund were an open-end investment company.

### Applicants' Legal Analysis

#### *Multiple Classes of Shares*

1. Section 18(c) of the Act provides, in relevant part, that a closed-end investment company may not issue or sell any senior security if, immediately thereafter, the company has outstanding more than one class of senior security. Applicants state that the creation of multiple classes of Shares of the Fund may be prohibited by section 18(c).

2. Section 18(i) of the Act provides that each share of stock issued by a registered management investment company will be a voting stock and have equal voting rights with every other outstanding voting stock. Applicants state that permitting multiple classes of the Fund may violate section 18(i) of the Act because each class would be entitled to exclusive voting rights with respect to matters solely related to that class.

3. Section 6(c) of the Act provides that the Commission may exempt any person, security or transaction or any class or classes of persons, securities or transactions from any provision of the Act, or from any rule under the Act, if and to the extent such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants request an exemption under section 6(c) from sections 18(c) and 18(i) to permit the Fund to issue multiple classes of Shares.

4. Applicants submit that the proposed allocation of expenses and voting rights among multiple classes is equitable and will not discriminate against any group or class of shareholders. Applicants submit that the proposed system would permit the Fund to facilitate the distribution of Shares through diverse distribution channels and would provide investors with a broader choice of shareholder

options. Applicants assert that the proposed closed-end investment company multiple class structure does not raise the concerns underlying section 18 of the Act to any greater degree than open-end investment companies' multiple class structures that are permitted by rule 18f-3 under the Act. Applicants state the Fund will comply with the provisions of rule 18f-3 as if it were an open-end investment company.

#### *CDSCs*

5. Applicants believe that the requested relief meets the standards of section 6(c) of the Act. Rule 6c-10 under the Act permits open-end investment companies to impose CDSCs, subject to certain conditions. Applicants state that any CDSC imposed by the Fund will comply with rule 6c-10 under the Act as if that rule were applied to closed-end investment companies. The Fund also will make all required disclosures in accordance with the requirements of Form N-1A concerning CDSCs. Applicants further state that, in the event the Fund imposes CDSCs, the Fund will apply the CDSCs (and any waivers, scheduled variations, or eliminations of the CDSCs) uniformly to all shareholders in a given class and consistently with the requirements of rule 22d-1 under the Act.

#### *Asset-Based Service and/or Distribution Fees*

6. Section 17(d) of the Act and rule 17d-1 under the Act prohibit an affiliated person of a registered investment company or an affiliated person of such person, acting as principal, from participating in or effecting any transaction in which such registered company is a joint or a joint and several participant unless the Commission issues an order permitting the transaction. In reviewing applications submitted under section 17(d) and rule 17d-1, the Commission considers whether the participation of the investment company in a joint enterprise or joint arrangement is consistent with the provisions, policies and purposes of the Act, and the extent to which the participation is on a basis different from or less advantageous than that of other participants.

7. Rule 17d-3 under the Act provides an exemption from section 17(d) and rule 17d-1 to permit open-end investment companies to enter into distribution arrangements pursuant to rule 12b-1 under the Act. Applicants request an order under section 17(d) and rule 17d-1 under the Act to permit the Fund to pay asset-based distribution and/or service fees. Applicants have

agreed to comply with rules 12b-1 and 17d-3 as if those rules applied to closed-end investment companies.

### Applicants' Condition

Applicants agree that any order granting the requested relief will be subject to the following condition:

Applicants will comply with the provisions of rules 6c-10, 12b-1, 17d-3, 18f-3 and 22d-1 under the Act, as amended from time to time or replaced, as if those rules applied to closed-end management investment companies, and will comply with the NASD Conduct Rule 2830, as amended from time to time, as if that rule applied to all closed-end management investment companies.

For the Commission, by the Division of Investment Management, under delegated authority.

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-75903; File No. SR-C2-2015-023]

### Self-Regulatory Organizations; C2 Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Fees Schedule

September 11, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that, on September 1, 2015 C2 Options Exchange, Incorporated (the "Exchange" or "C2") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend its Fees Schedule. The text of the proposed rule change is available on the Exchange's Web site (<http://www.c2exchange.com/Legal/>), at the Exchange's Office of the Secretary, and

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

at the Commission's Public Reference Room.

## II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

### A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

#### 1. Purpose

The Exchange proposes to amend its Fees Schedule. Specifically, the Exchange proposes to increase the Linkage Routing fee from \$0.65 per contract to \$0.70 per contract in addition to the applicable C2 taker fee. The Linkage Routing fee is assessed to all orders routed pursuant to the Options Order Protection and Locked/Crossed Market Plan. The purpose of the proposed change is to help offset the costs associated with routing orders through Linkage and paying the transaction fees for such executions at other exchanges.

#### 2. Statutory Basis

In particular, the Exchange's proposal to increase the Linkage Routing fee from \$0.65 per contract to \$0.70 per contract is reasonable because such increase will help offset the costs associated with routing orders through Linkage and paying the transaction fees for such executions at other exchanges. The Exchange believes the proposed increase is equitable and not unfairly discriminatory because it will apply to all orders routed via Linkage.

### B. Self-Regulatory Organization's Statement on Burden on Competition

C2 does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. In particular, the increase to the Linkage Routing Fee will apply equally to all orders routed via linkage and will help offset costs associated with routing orders via linkage. The Exchange does not believe that the proposed change to the Linkage Routing fee will impose any burden on

intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act because it only applies to trading on the Exchange [sic] and orders sent from the Exchange to other exchanges via Linkage. Should the proposed change make C2 a more attractive trading venue for market participants at other exchanges, such market participants may elect to become market participants at C2.

### C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

## III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act<sup>3</sup> and paragraph (f) of Rule 19b-4<sup>4</sup> thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

## IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

#### Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-C2-2015-023 on the subject line.

#### Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-C2-2015-023. This file number should be included on the

subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-C2-2015-023 and should be submitted on or before October 8, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>5</sup>

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-75904; File No. SR-BX-2015-056]

### Self-Regulatory Organizations; NASDAQ OMX BX, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Exchange Rule 7018

September 11, 2015.

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),<sup>1</sup> and Rule 19b-4 thereunder,<sup>2</sup> notice is hereby given that on September 1, 2015, NASDAQ OMX BX, Inc. ("BX" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed

<sup>3</sup> 17 CFR 200.30-3(a)(12).

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 17 CFR 240.19b-4.

<sup>3</sup> 15 U.S.C. 78s(b)(3)(A).

<sup>4</sup> 17 CFR 240.19b-4(f).

rule change as described in Items I, II and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

### **I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change**

The Exchange proposes to amend the fee schedule under Exchange Rule 7018(a) with respect to execution and routing of orders in securities priced at \$1 or more per share and to amend a credit under BX Rule 7018(e).

While the changes proposed herein are effective upon filing, the Exchange has designated that the amendments be operative on September 1, 2015.

The text of the proposed rule change is also available on the Exchange's Web site at <http://nasdaqomxbx.cchwallstreet.com>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

### **II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change**

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

#### *A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

##### **1. Purpose**

The Exchange is proposing to amend the fee schedule under BX Rule 7018(a), relating to charges and credits provided for orders in securities priced and \$1 or more per share that execute on BX, as well as to reduce a credit provided in connection with the Retail Price Improvement ("RPI") program under BX Rule 7018(e).

Under BX Rule 7018(a), the Exchange provides credits to member firms that access certain levels of liquidity on BX per month. The Exchange is proposing to amend several of the credit tiers for orders that access liquidity (excluding orders with midpoint pegging and excluding orders that receive price improvement and execute against an

order with midpoint pegging), as well as modify the criteria for receiving certain of the credits. The Exchange also proposes a few minor changes made for the purposes of clarity and conformity.

Specifically, the Exchange proposes to add a new credit tier of \$0.0016 per share executed, which will be provided for orders that access liquidity, excluding orders with midpoint pegging<sup>3</sup> and orders that receive price improvement and execute against an order with midpoint pegging, entered by a member that accesses liquidity equal to or exceeding 0.15% of total consolidated volume<sup>4</sup> ("Consolidated Volume") during a month. Additionally, the Exchange proposes to amend the credit tier of \$0.0015 per share executed, which is provided for orders that access liquidity, excluding orders with midpoint pegging and orders that receive price improvement and execute against an order with midpoint pegging, entered by a member that accesses liquidity equal to or exceeding 0.10% of Consolidated Volume by reducing the Consolidated Volume threshold to 0.09%.

BX also proposes to eliminate the credit tier of \$0.0012 per share executed, which currently is provided for orders that access liquidity, excluding orders with midpoint pegging and orders that receive price improvement and execute against an order with midpoint pegging, entered by a member that accesses liquidity equal to or exceeding 0.10% [sic] of total Consolidated Volume during a month.

Next, the Exchange proposes to revise the criteria for a member to qualify for the credit tier of \$0.0008 per share executed, which will be provided for orders that access liquidity, excluding orders with midpoint pegging and orders that receive price improvement and execute against an order with midpoint pegging, entered by a member that accesses (rather than adds as is

<sup>3</sup> A Midpoint Peg order has its priced based upon the national best bid and offer, excluding the effect that the Midpoint Peg Order itself has on the inside bid or inside offer. Primary Pegged Orders with an offset amount and Midpoint Pegged Orders will never be displayed. A Midpoint Pegged Order may be executed in sub-pennies if necessary to obtain a midpoint price. A new timestamp is created for the order each time it is automatically adjusted.

<sup>4</sup> Consolidated Volume is defined as the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of a member's trading activity, expressed as a percentage of or ratio to Consolidated Volume, the date of the annual reconstitution of the Russell Investments Indexes shall be excluded from both total Consolidated Volume and the member's trading activity. See Rule 7018(a).

currently stated) liquidity equal to or exceeding 0.05% (rather than 0.02% that is the current level), of total Consolidated Volume during a month.

BX is also proposing to slightly increase the charge for providing liquidity through the NASDAQ OMX BX Equities System ("System") for a displayed order entered by a member that (i) adds liquidity equal to or exceeding 0.25% of total Consolidated Volume during a month; and (ii) adds and accesses liquidity equal to or exceeding 0.50% of total Consolidated Volume during a month from \$0.0014 per share executed to \$0.0016 per share executed.

Currently, a firm may become a Qualified Market Maker ("QMM") by being a member that provides through one or more of its BX System MPIDs more than 0.15% of Consolidated Volume during the month. For a member qualifying under this method, the member must have at least one Qualified MPID, that is, an MPID through which, for at least 200 securities, the QMM quotes at the national best bid and offer ("NBBO") an average of at least 50% of the time during regular market hours (9:30 a.m. through 4:00 p.m.) during the month. The Exchange is proposing to increase the Consolidated Volume requirement from 0.15% to 0.20% during the month and to eliminate the additional requirement that the member must also provide an average daily volume of 1.5M shares or more of non-displayed liquidity during the month.

Lastly, the Exchange is proposing to amend a credit provided under the Retail Price Improvement ("RPI") program in BX Rule 7018(e). The Exchange's RPI program provides incentives to member firms (or a division thereof) approved by the Exchange to participate in the program (a "Retail Member Organization") to submit designated "Retail Orders"<sup>5</sup> for the purpose of seeking price improvement. The Exchange is proposing to decrease the credit of \$0.0002 per share executed to \$0.0000 per share executed that is provided for a Retail Order that receives price improvement (when the accepted price of an order is different than the

<sup>5</sup> A Retail Order is defined in BX Rule 4780(a)(2), in part, as "an agency or riskless principal order that satisfies the criteria of FINRA Rule 5320.03, that originates from a natural person and is submitted to the Exchange by a Retail Member Organization, provided that no change is made to the terms of the order with respect to price (except in the case that a market order is changed to a marketable limit order) or side of market and the order does not originate from a trading algorithm or any other computerized methodology."

executed price of an order) and accesses non-RPI order with midpoint pegging.

## 2. Statutory Basis

BX believes that the proposed rule change is consistent with the provisions of section 6 of the Act,<sup>6</sup> in general, and with sections 6(b)(4) and 6(b)(5) of the Act,<sup>7</sup> in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility or system which the Exchange operates or controls, and is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest; and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that the new and amended credit tiers for orders that access liquidity (excluding orders with midpoint pegging and excluding orders that receive price improvement and execute against an order with midpoint pegging), as well as the modified criteria for receiving certain of the credits based on Consolidated Volume together, as well as related clarifying changes, under BX Rule 7018(a) are reasonable because they provide additional opportunities for market participants to receive credits for participation on BX.

Specifically, the Exchange is proposing a new of [sic] \$0.0016 per share executed credit tier, which requires liquidity accessed of 0.15% or more of Consolidated Volume during the month. The Exchange is also proposing a [sic] eliminate the \$0.0012 per share executed credit tier, which currently requires liquidity accessed of 0.05% or more of Consolidated Volume during the month. Additionally, the Exchange is modifying the existing credit tier of \$0.0008 per share executed by increasing the minimum total Consolidated Volume required from 0.02% to 0.05% and making it applicable to members that access rather than add liquidity. As such, the Exchange is generally providing increased credits for member firms that remove increasing amounts of liquidity from the Exchange. With respect to the accesses Consolidated Volume

requirement to receive the \$0.0008 credit, the Exchange believes this is reasonable because for firms to receive the increased credit they must remove a certain amount of Consolidated Volume, which will improve market quality for all participants.

The Exchange believes that the proposed credits noted above are equitably allocated and are not unfairly discriminatory as they are provided to all member firms that achieve the minimum level of Consolidated Volume required by the tier, with the member firms that remove the greatest level of Consolidated Volume receiving the greatest credit. Additionally, the Exchange believes that this proposed rule change being changed from a member that adds liquidity to being applicable to a member that accesses liquidity is reasonable because the Exchange desires to further incentivize member firms to participate in the Exchange by removing liquidity.

The Exchange believes that elimination of the \$0.0012 per share executed credit tier is reasonable because the Exchange has added a \$0.0016 credit tier per share executed, discussed above, and the Exchange desires to further incentivize member firms to participate in the Exchange by removing liquidity, generally. The Exchange believes that the proposed addition of the \$0.0016 credit tier per share executed and elimination of the \$0.0012 per share executed credit tier, are both an equitable allocation and are not unfairly discriminatory because the \$0.0012 per share executed credit tier is a no longer needed incentive for [sic] market participant and member firms will continue to have the opportunity to qualify for a higher credit based on their participation in BX by removing liquidity.

Additionally, the Exchange believes reducing the Consolidated Volume threshold for the credit tier of \$0.0015 per share executed, which is provided for orders that access liquidity (excluding orders with midpoint pegging and orders that receive price improvement and execute against an order with midpoint pegging) and that is entered by a member that accesses liquidity, from equal or exceeding 0.10% of Consolidated Volume to 0.09%, is reasonable because it will make it easier for members to receive a rebate at that level and encourage market participant activity and will also support price discovery and liquidity provision. The Exchange also believes this proposed rule change is an equitable allocation and is not unfairly discriminatory because it will apply

uniformly to all member firms that so qualify.

The Exchange believes that the proposed change to slightly increase the charge assessed a member for entering a displayed order is reasonable because the exchange must balance the cost of credits provided for orders removing liquidity and the desire to provide QMMs with incentives to provide displayed orders. The Exchange notes that the proposed charge continues to be lower than the default charge assessed for all other displayed orders that do not otherwise qualify for a lower charge, and as such continues to act as an incentive to market participants to provide such liquidity. The Exchange believes that the proposed change is both equitably allocated and is not unfairly discriminatory because the slightly increased charge applies uniformly to all member firms that previously had qualified to receive such a credit.

The Exchange believes that the proposed increase to the monthly Consolidated Volume requirement from 0.15% to 0.20% for a firm to become a QMM is reasonable because member firms are being required to provide through one or more of its BX System MPIDs increased Consolidated Volume to qualify, which will increase liquidity in the market overall. Additionally, for a member qualifying under this method, the member must have at least one Qualified MPID, that is, an MPID through which, for at least 200 securities, the QMM quotes at the NBBO an average of at least 50% of the time during regular market hours (9:30 a.m. through 4:00 p.m.) during the month. BX also believes it is reasonable to eliminate the additional requirement that the member must also provide an average daily volume of 1.5M shares or more of non-displayed liquidity during the month because the Exchange believes removing this criteria will allow QMMs to focus on making better markets.

The Exchange also believes that the proposed increase to the monthly Consolidated Volume requirement from 0.15% to 0.20% for a firm to become a QMM is both equitably allocated and is not unfairly discriminatory because it [sic] the slightly higher Consolidated Volume requirement applies uniformly to firms seeking to qualify as a QMM. The Exchange also believes that the proposed changes to the criteria for a firm to qualify as a QMM expands the opportunity for firms to qualify as a QMM and further perfects the mechanism of a free and open market by making it easier to qualify for this beneficial, market improving program

<sup>6</sup> 15 U.S.C. 78f.

<sup>7</sup> 15 U.S.C. 78f(b)(4) and (5).

and bolster displayed liquidity by eliminating the additional requirement that the member must also provide an average daily volume of 1.5M shares or more of non-displayed liquidity during the month.

BX believes that the proposed change to decrease the credit of \$0.0002 per share executed to \$0.0000 per share executed that is provided for a Retail Order that receives price improvement (when the accepted price of an order is different than the executed price of an order) and accesses non-RPI order with midpoint pegging is reasonable because this incentive is no longer needed to improve the market for retail order flow. Also, the Exchange must continually adjust its incentives to remain competitive with other exchanges. The Exchange also believes the reduced credit is equitably allocated and is not unfairly discriminatory because it applies uniformly to all firms.

Finally, BX notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive. In such an environment, BX must continually adjust its fees to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. The changes reflect this environment because although they reflect changes to both credits and charges, with the price increases being minor, while [sic] the amended credits are designed overall to incentivize changes in market participant behavior to the benefit of the market overall.

#### *B. Self-Regulatory Organization's Statement on Burden on Competition*

The Exchange does not believe that the proposed rule changes will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.<sup>8</sup> BX notes that it operates in a highly competitive market in which market participants can readily favor dozens of different competing exchanges and alternative trading systems if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, BX must continually adjust its fees to remain competitive with other exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing

practices, BX believes that the degree to which fee changes in this market may impose any burden on competition is extremely limited.

In this instance, the modification to the fee schedule, as well as modifications to the criteria to become a QMM, do not impose a burden on competition because it is optional and is the subject of competition from other exchanges. The Exchange does not believe that the proposed change will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets. Moreover, because there are numerous competitive alternatives to the use of the Exchange, it is likely that BX will lose market share as a result of the changes if they are unattractive to market participants.

Accordingly, BX does not believe that the proposed rule change will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

#### *C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

No written comments were either solicited or received.

### **III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action**

The foregoing change has become effective pursuant to section 19(b)(3)(A) of the Act<sup>9</sup> and paragraph (f) of Rule 19b-4<sup>10</sup> thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

### **IV. Solicitation of Comments**

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

#### *Electronic Comments*

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-BX-2015-056 on the subject line.

#### *Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-BX-2015-056. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BX-2015-056, and should be submitted on or before October 8, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>11</sup>

**Brent J. Fields,**

## SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-75901; File No. SR-NYSEArca-2015-77]

### Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Proposed Rule Change To List and Trade Shares of the Following Under NYSE Arca Equities Rule 8.600: First Trust Heitman Global Prime Real Estate ETF

September 11, 2015.

Pursuant to section 19(b)(1)<sup>1</sup> of the Securities Exchange Act of 1934 (the “Act”)<sup>2</sup> and Rule 19b-4 thereunder,<sup>3</sup> notice is hereby given that, on August 28, 2015, NYSE Arca, Inc. (the “Exchange” or “NYSE Arca”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

#### I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to list and trade shares of the following under NYSE Arca Equities Rule 8.600 (“Managed Fund Shares”): First Trust Heitman Global Prime Real Estate ETF. The text of the proposed rule change is available on the Exchange’s Web site at [www.nyse.com](http://www.nyse.com), at the principal office of the Exchange, and at the Commission’s Public Reference Room.

#### II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

#### A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

##### 1. Purpose

The Exchange proposes to list and trade the shares (“Shares”) of the following under NYSE Arca Equities Rule 8.600, which governs the listing and trading of Managed Fund Shares<sup>4</sup> on the Exchange: First Trust Heitman Global Prime Real Estate ETF (“Fund”).<sup>5</sup> The Shares will be offered by First Trust Exchange-Traded Fund IV (the “Trust”), which is organized as a Massachusetts business trust and is registered with the Commission as an open-end management investment company.<sup>6</sup> The investment adviser to the Fund will be First Trust Advisors L.P. (the “Adviser” or “First Trust”). Heitman Real Estate Securities LLC (“Sub-Adviser”) will be the sub-adviser to the Fund. Heitman International Real Estate Securities HK Limited and Heitman International Real Estate Securities GmbH (“Sub-Sub-Advisers”) will be the sub-sub-advisers to the Fund. First Trust Portfolios L.P. (the “Distributor”) will be the principal underwriter and distributor of the

<sup>4</sup> A Managed Fund Share is a security that represents an interest in an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a-1) (“1940 Act”) organized as an open-end investment company or similar entity that invests in a portfolio of securities selected by its investment adviser consistent with its investment objectives and policies. In contrast, an open-end investment company that issues Investment Company Units, listed and traded on the Exchange under NYSE Arca Equities Rule 5.2(j)(3), seeks to provide investment results that correspond generally to the price and yield performance of a specific foreign or domestic stock index, fixed income securities index or combination thereof.

<sup>5</sup> The Commission has previously approved listing and trading on the Exchange of a number of actively managed funds under Rule 8.600. *See, e.g.*, Securities Exchange Act Release Nos. 57801 (May 8, 2008), 73 FR 27878 (May 14, 2008) (SR-NYSEArca-2008-31) (order approving Exchange listing and trading of twelve actively-managed funds of the WisdomTree Trust); 60460 (August 7, 2009), 74 FR 41468 (August 17, 2009) (SR-NYSEArca-2009-55) (order approving listing of Dent Tactical ETF); 62502 (July 15, 2010), 75 FR 42471 (July 21, 2010) (SR-NYSEArca-2010-57) (order approving listing of AdvisorShares WCM/BNY Mellon Focused Growth ADR ETF); 69251 (March 28, 2013), 78 FR 20162 (April 3, 2013) (SR-NYSEArca-2013-14) (order approving listing of Cambria Shareholder Yield ETF).

<sup>6</sup> The Trust is registered under the 1940 Act. On August 27, 2015, the Trust filed with the Commission an amendment to its registration statement on Form N-1A under the Securities Act of 1933 (“1933 Act”) and under the 1940 Act relating to the Fund (File Nos. 333-174332 and 811-22559) (“Registration Statement”). The description of the operation of the Trust and the Fund herein is based, in part, on the Registration Statement. In addition, the Commission has issued an order granting certain exemptive relief to the Trust under the 1940 Act. *See* Investment Company Act Release No. 28468 (October 27, 2008) (File No. 812-13477) (“Exemptive Order”).

Fund’s Shares. BNY Mellon Investment Servicing (US) Inc. (the “Administrator” or “BNY”) will serve as administrator, custodian and transfer agent for the Fund.

Commentary .06 to Rule 8.600 provides that, if the investment adviser to the investment company issuing Managed Fund Shares is affiliated with a broker-dealer, such investment adviser shall erect a “fire wall” between the investment adviser and the broker-dealer with respect to access to information concerning the composition and/or changes to such investment company portfolio. In addition, Commentary .06 further requires that personnel who make decisions on the open-end fund’s portfolio composition must be subject to procedures designed to prevent the use and dissemination of material nonpublic information regarding the open-end fund’s portfolio.<sup>7</sup> Commentary .06 to Rule 8.600 is similar to Commentary .03(a)(i) and (iii) to NYSE Arca Equities Rule 5.2(j)(3); however, Commentary .06 in connection with the establishment of a “fire wall” between the investment adviser and the broker-dealer reflects the applicable open-end fund’s portfolio, not an underlying benchmark index, as is the case with index-based funds. The Adviser, the Sub-Adviser and the Sub-Sub-Advisers are not broker-dealers, but the Adviser is affiliated with First Trust Portfolios L.P., a broker-dealer, and the Sub-Adviser and the Sub-Sub-Advisers are affiliated with Heitman Securities LLC and Heitman UK Limited, each a broker-dealer. The Adviser, the Sub-Adviser and the Sub-Sub-Advisers have each implemented fire walls with respect to

<sup>7</sup> An investment adviser to an open-end fund is required to be registered under the Investment Advisers Act of 1940 (the “Advisers Act”). As a result, the Adviser, Sub-Adviser and Sub-Sub-Advisers and their related personnel are subject to the provisions of Rule 204A-1 under the Advisers Act relating to codes of ethics. This Rule requires investment advisers to adopt a code of ethics that reflects the fiduciary nature of the relationship to clients as well as compliance with other applicable securities laws. Accordingly, procedures designed to prevent the communication and misuse of non-public information by an investment adviser must be consistent with Rule 204A-1 under the Advisers Act. In addition, Rule 206(4)-7 under the Advisers Act makes it unlawful for an investment adviser to provide investment advice to clients unless such investment adviser has (i) adopted and implemented written policies and procedures reasonably designed to prevent violation, by the investment adviser and its supervised persons, of the Advisers Act and the Commission rules adopted thereunder; (ii) implemented, at a minimum, an annual review regarding the adequacy of the policies and procedures established pursuant to subparagraph (i) above and the effectiveness of their implementation; and (iii) designated an individual (who is a supervised person) responsible for administering the policies and procedures adopted under subparagraph (i) above.

<sup>1</sup> 15 U.S.C. 78s(b)(1).

<sup>2</sup> 15 U.S.C. 78a.

<sup>3</sup> 17 CFR 240.19b-4.

their respective broker-dealer affiliate(s) regarding access to information concerning the composition and/or changes to the portfolio. In the event (a) the Adviser, the Sub-Adviser or either Sub-Sub-Adviser becomes registered as a broker-dealer or newly affiliated with a broker-dealer, or (b) any new adviser, sub-adviser or sub-sub-adviser is a registered broker-dealer or becomes affiliated with a broker-dealer, it will implement a fire wall with respect to its relevant personnel or its broker-dealer affiliate regarding access to information concerning the composition and/or changes to the portfolio, and will be subject to procedures designed to prevent the use and dissemination of material non-public information regarding such portfolio.

#### Principal Investments

According to the Registration Statement, under normal market conditions,<sup>8</sup> the Fund will seek to achieve its investment objective by investing at least 80% of its net assets in U.S. and non-U.S. exchange-traded real estate securities, which includes real estate investment trusts (“REITs”), real estate operating companies (“REOCs”)<sup>9</sup> and common stocks or “Depository Receipts” of companies primarily engaged in the real estate industry (collectively, “Real Estate Securities”).<sup>10</sup> The Fund may invest in

<sup>8</sup> The term “under normal market conditions” includes, but is not limited to, the absence of extreme volatility or trading halts in the equity markets or the financial markets generally; operational issues causing dissemination of inaccurate market information; or force majeure type events such as systems failure, natural or man-made disaster, act of God, armed conflict, act of terrorism, riot or labor disruption or any similar intervening circumstance.

<sup>9</sup> According to the Registration Statement, REITs and REOCs are companies that own and most often actively manage income-generating commercial real estate. Some REITs and REOCs make or invest in loans and other obligations that are secured by real estate collateral. REITs distribute most of their income to investors and therefore receive special tax considerations and are typically a highly liquid method of investing in real estate. REOCs reinvest most income into their operations and therefore do not get the same benefits of lower corporate taxation that are a common characteristic of REITs.

REITs and REOCs are generally categorized as equity, mortgage or hybrid in nature. Equity REITs and REOCs invest in and own properties, and thus are responsible for the equity or value of their real estate assets. Their revenues come principally from their properties’ rents. Mortgage REITs and REOCs deal in investment and ownership of property mortgages. These companies loan money for mortgages to owners of real estate or purchase existing mortgages or mortgage-backed securities. Their revenues are generated primarily by the interest that they earn on the mortgage loans. Hybrid REITs and REOCs combine the investment strategies of equity REITs and REOCs and mortgage REITs and REOCs by investing in both properties and mortgages.

<sup>10</sup> The Fund’s investments in Real Estate Securities and certain non-U.S. companies (as

non-U.S. securities (including securities of certain non-U.S. companies), which include securities issued or guaranteed by companies organized under the laws of countries other than the United States (including emerging markets). The Fund may invest in restricted securities (Rule 144A securities). During the initial invest-up period, the Fund may depart from its principal investment strategies and invest a larger amount or all of its assets in cash equivalents or it may hold cash.

The Fund will seek to provide investors access to a real estate securities portfolio consisting of shares of public companies with professional management teams that own top-tier, prime properties in the world’s dominant cities. The Fund’s portfolio managers will select Real Estate Securities by implementing an investment process that is outlined below.

As a first screen, all securities in the Global Industry Classification Standard (GICS®) real estate industry will be filtered for size and liquidity, based upon free float market capitalization for size and a threshold daily trading volume for liquidity. The purpose of these quantitative screens will be to ensure that the investment strategy can be executed in a buy and hold manner without undue stress.

In the second stage, screening will be conducted using a combination of qualitative and quantitative tools. From a qualitative perspective, portfolio analysts will maintain a close coverage

referred to below under “Non-Principal Investments”) may be in the form of Depository Receipts, which include American Depository Receipts (“ADRs”), Global Depository Receipts (“GDRs”) and European Depository Receipts (“EDRs”). ADRs are receipts typically issued by an American bank or trust company that evidence ownership of underlying securities issued by a foreign corporation. EDRs are receipts issued by a European bank or trust company evidencing ownership of securities issued by a foreign corporation. GDRs are receipts issued throughout the world that evidence a similar arrangement. ADRs, EDRs and GDRs may trade in foreign currencies that differ from the currency the underlying security for each ADR, EDR or GDR principally trades in. Global shares are the actual (ordinary) shares of a non-U.S. company which trade both in the home market and the United States. Generally, ADRs, in registered form, are designed for use in the U.S. securities markets. EDRs, in registered form, are used to access European markets. GDRs, in registered form, are tradable both in the United States and in Europe and are designed for use throughout the world. All Depository Receipts in which the Fund invests will be traded on a U.S. or a non-U.S. exchange. Not more than 10% of the net assets of the Fund in the aggregate invested in equity securities (other than non-exchange-traded investment company securities) shall consist of equity securities whose principal market is not a member of the Intermarket Surveillance Group (“ISG”) or is a market with which the Exchange does not have a comprehensive surveillance sharing agreement. See note 27, *infra*.

universe and will be in regular contact with the management of potential investments, regularly visiting properties and markets to see as many of the properties in person as is reasonably possible. In addition to their own research, the analysts will have access to other property experts and sell-side professionals within their organization who also evaluate their companies. The task of the analysts will be to identify those companies that meet the test of two quantitative filters. The issuers in which the Fund will invest must generally have (1) more than 75% of their gross asset value in prime markets and (2) more than 50% of their assets under management in prime assets.

According to the Registration Statement, executing the quantitative and qualitative screens will produce a universe of companies that meet the size, liquidity, and concentration in prime markets and assets tests. From this universe of prime assets and markets, the portfolio managers’ regional teams will construct a high conviction portfolio that offers the best expected risk/return profile of the names within the prime universe. Consideration for inclusion in the portfolio includes the issuer’s balance sheet, assessment of management’s acumen and the projected long-term growth profile of the company.

#### Non-Principal Investments

According to the Registration Statement, while the Fund, under normal circumstances, will invest at least 80% of its net assets in securities and financial instruments described above, the Fund may invest up to 20% of its net assets in the following securities and financial instruments.

Equity securities, other than Real Estate Securities, in which the Fund will invest may include common and preferred stocks. The Fund may also invest in warrants and rights related to common stocks. The Fund may also invest in preferred equity securities.

The Fund may invest in exchange-traded pooled investment vehicles,<sup>11</sup> open-end or closed-end investment company securities, other exchange-traded funds (“ETFs”)<sup>12</sup> and business

<sup>11</sup> Pooled investment vehicles include Trust Issued Receipts (as described in NYSE Arca Equities Rule 8.200); Commodity-Based Trust Shares (as described in NYSE Arca Equities Rule 8.201); Currency Trust Shares (as described in NYSE Arca Equities Rule 8.202); Commodity Index Trust Shares (as described in NYSE Arca Equities Rule 8.203); and Trust Units (as described in NYSE Arca Equities Rule 8.500).

<sup>12</sup> The ETFs in which the Fund may invest will be registered under the 1940 Act and include

development companies that invest primarily in securities of the types in which the Fund may invest directly.

The Fund may invest in companies that are considered to be “passive foreign investment companies” (“PFICs”), which are generally certain non-U.S. corporations that receive at least 75% of their annual gross income from passive sources (such as interest, dividends, certain rents and royalties or capital gains) or that hold at least 50% of their assets in investments producing such passive income.

Fixed income investments and cash equivalents held by the Fund may include, the types of investments set forth below:

(1) The Fund may invest in U.S. government securities, including bills, notes and bonds differing as to maturity and rates of interest, which are either issued or guaranteed by the U.S. Treasury or by U.S. government agencies or instrumentalities.

(2) The Fund may invest in certificates of deposit issued against funds deposited in a bank or savings and loan association. Such certificates are for a definite period of time, earn a specified rate of return and are normally negotiable. If such certificates of deposit are non-negotiable, they will be considered illiquid securities and be subject to the Fund’s 15% restriction on investments in illiquid assets. The Fund may only invest in certificates of deposit issued by U.S. banks with at least \$1 billion in assets.

(3) The Fund may invest in bankers’ acceptances, which are short-term credit instruments used to finance commercial transactions.<sup>13</sup>

(4) The Fund may invest in repurchase agreements, which involve purchases of debt securities with counterparties that are deemed by the Adviser to present acceptable credit risks. In such an action, at the time the Fund purchases the security, it simultaneously agrees to resell and redeliver the security to the seller, who

Investment Company Units (as described in NYSE Arca Equities Rule 5.2(j)(3)); Portfolio Depository Receipts (as described in NYSE Arca Equities Rule 8.100); and Managed Fund Shares (as described in NYSE Arca Equities Rule 8.600). Such ETFs all will be listed and traded in the U.S. on registered exchanges. While the Fund may invest in inverse ETFs, the Fund will not invest in leveraged or inverse leveraged (e.g., 2X, -2X, 3X or -3X) ETFs.

<sup>13</sup> Generally, an acceptance is a time draft drawn on a bank by an exporter or an importer to obtain a stated amount of funds to pay for specific merchandise. The draft is then “accepted” by a bank that, in effect, unconditionally guarantees to pay the face value of the instrument on its maturity date. The acceptance may then be held by the accepting bank as an asset or it may be sold in the secondary market at the going rate of interest for a specific maturity.

also simultaneously agrees to buy back the security at a fixed price and time.

(5) The Fund may invest in bank time deposits, which are monies kept on deposit with banks or savings and loan associations for a stated period of time at a fixed rate of interest.

(6) The Fund may invest in commercial paper, which are short-term unsecured promissory notes, including variable rate master demand notes issued by corporations to finance their current operations. Master demand notes are direct lending arrangements between the Fund and a corporation.

(7) The Fund may invest in shares of money market funds, as consistent with its investment objective and policies.

The Fund may invest in non-U.S. fixed income securities (including securities of certain non-U.S. companies), which include securities issued or guaranteed by companies organized under the laws of countries other than the United States (including emerging markets), securities issued or guaranteed by foreign, national, provincial, state, municipal or other governments with taxing authority or by their agencies or instrumentalities and debt obligations of supranational governmental entities such as the World Bank or European Union.<sup>14</sup> Non-U.S. securities may also include U.S. dollar-denominated debt obligations, such as “Yankee Dollar” obligations, of foreign issuers and of supra-national government entities. Yankee Dollar obligations are U.S. dollar-denominated obligations issued in the U.S. capital markets by foreign corporations, banks and governments. Foreign securities also may be traded on foreign securities exchanges.

The Fund may from time to time purchase securities on a “when-issued” or other delayed-delivery basis.

The Fund may invest in forward foreign currency exchange contracts. Forward foreign currency exchange contracts may be used to protect the value of the Fund’s portfolio against uncertainty in the level of future currency exchange rates.<sup>15</sup> The Fund will only enter into transactions in forward foreign currency exchange contracts with counterparties that the Adviser and/or the Sub-Adviser (or a Sub-Sub-Adviser) reasonably believes

<sup>14</sup> Under normal market conditions, the Fund will generally seek to invest in corporate bond issuances that have at least \$100,000,000 par amount outstanding in developed countries and at least \$200,000,000 par amount outstanding in emerging market countries.

<sup>15</sup> The Fund may also enter into foreign currency transactions on a spot (*i.e.*, cash) basis.

are capable of performing under the applicable agreement.<sup>16</sup>

#### Investment Restrictions

The Fund may hold up to an aggregate amount of 15% of its net assets in illiquid assets (calculated at the time of investment), including Rule 144A securities and non-negotiable certificates of deposit deemed illiquid by the Adviser.<sup>17</sup> The Fund will monitor its portfolio liquidity on an ongoing basis to determine whether, in light of current circumstances, an adequate level of liquidity is being maintained, and will consider taking appropriate steps in order to maintain adequate liquidity if, through a change in values, net assets, or other circumstances, more than 15% of the Fund’s net assets are held in illiquid assets. Illiquid assets include securities subject to contractual or other restrictions on resale and other instruments that lack readily available markets as determined in accordance with Commission staff guidance.<sup>18</sup>

The Fund intends to qualify annually and to elect to be treated as a regulated

<sup>16</sup> The Fund will seek, where possible, to use counterparties, as applicable, whose financial status is such that the risk of default is reduced; however, the risk of losses resulting from default is still possible. The Adviser and/or the Sub-Adviser (or a Sub-Sub-Adviser) will evaluate the creditworthiness of counterparties on an ongoing basis. In addition to information provided by credit agencies, the Adviser’s and/or Sub-Adviser’s (or Sub-Sub-Adviser’s) analysis will evaluate each approved counterparty using various methods of analysis and may consider the Adviser’s and/or Sub-Adviser’s (or Sub-Sub-Adviser’s) past experience with the counterparty, its known disciplinary history and its share of market participation.

<sup>17</sup> In reaching liquidity decisions, the Adviser may consider the following factors: The frequency of trades and quotes for the security; the number of dealers wishing to purchase or sell the security and the number of other potential purchasers; dealer undertakings to make a market in the security; and the nature of the security and the nature of the marketplace trades (*e.g.*, the time needed to dispose of the security, the method of soliciting offers, and the mechanics of transfer).

<sup>18</sup> The Commission has stated that long-standing Commission guidelines have required open-end funds to hold no more than 15% of their net assets in illiquid securities and other illiquid assets. *See* Investment Company Act Release No. 28193 (March 11, 2008), 73 FR 14618 (March 18, 2008), footnote 34. *See also*, Investment Company Act Release No. 5847 (October 21, 1969), 35 FR 19989 (December 31, 1970) (Statement Regarding “Restricted Securities”); Investment Company Act Release No. 18612 (March 12, 1992), 57 FR 9828 (March 20, 1992) (Revisions of Guidelines to Form N-1A). A fund’s portfolio security is illiquid if it cannot be disposed of in the ordinary course of business within seven days at approximately the value ascribed to it by the fund. *See* Investment Company Act Release No. 14983 (March 12, 1986), 51 FR 9773 (March 21, 1986) (adopting amendments to Rule 2a-7 under the 1940 Act); Investment Company Act Release No. 17452 (April 23, 1990), 55 FR 17933 (April 30, 1990) (adopting Rule 144A under the 1933 Act).

investment company (“RIC”) under the Internal Revenue Code.<sup>19</sup>

The Fund’s investments will be consistent with the Fund’s investment objective and will not be used to enhance leverage. That is, while the Fund will be permitted to borrow as permitted under the 1940 Act, the Fund’s investments will not be used to seek performance that is the multiple or inverse multiple (*i.e.*, 2Xs and 3Xs) of the Fund’s broad-based securities market index (as defined in Form N-1A).

#### Creations and Redemptions

According to the Registration Statement, the Fund will issue and redeem Shares on a continuous basis, at net asset value (“NAV”), only in large specified blocks each consisting of 50,000 Shares (each such block of Shares, called a “Creation Unit”). The Creation Units will be issued and redeemed for securities in which the Fund will invest, cash or both securities and cash.

The consideration for purchase of Creation Units of the Fund may consist of (i) cash in lieu of all or a portion of a basket of securities (“Deposit Securities”), and/or (ii) a designated portfolio of securities generally held by the Fund as determined by First Trust per each Creation Unit (“Fund Securities”) and generally an amount of cash (the “Cash Component”). Together, the Deposit Securities and the Cash Component (including the cash in lieu amount) constitute the “Fund Deposit,” which represents the minimum initial and subsequent investment amount for a Creation Unit of the Fund.

BNY, through the National Securities Clearing Corporation (“NSCC”), will make available on each business day, prior to the opening of business of the New York Stock Exchange (“NYSE”) (currently 9:30 a.m., Eastern time (“E.T.”)), the list of the names and the required number of shares of each Deposit Security to be included in the current Fund Deposit (based on information at the end of the previous business day) for the Fund.

In addition to the list of names and numbers of securities constituting the current Deposit Securities of a Fund Deposit, BNY, through the NSCC, also will make available on each business day, the estimated Cash Component, effective through and including the previous business day, per Creation Unit of the Fund.

All orders to create or redeem Creation Units must be received by the transfer agent no later than the closing

time of the regular trading session on the NYSE (ordinarily 4:00 p.m., E.T.) in each case on the date such order is placed in order for creation or redemption of Creation Units to be effected based on the NAV of Shares of the Fund as next determined on such date after receipt of the order in proper form.

Fund Shares may be redeemed only in Creation Units at their NAV next determined after receipt of a redemption request in proper form by the Fund through the transfer agent and only on a business day. The Fund will not redeem Shares in amounts less than a Creation Unit. With respect to the Fund, BNY, through the NSCC, will make available prior to the opening of business on the NYSE (currently 9:30 a.m., E.T.) on each business day, the identity of the Fund Securities that will be applicable (subject to possible amendment or correction) to redemption requests received in proper form on that day. Fund Securities received on redemption may not be identical to Deposit Securities that are applicable to creations of Creation Units.

Unless cash redemptions are available or specified for the Fund, the redemption proceeds for a Creation Unit generally will consist of Fund Securities—as announced on the business day of the request for redemption received in proper form—plus or minus cash in an amount equal to the difference between the NAV of the Fund Shares being redeemed, as next determined after a receipt of a request in proper form, and the value of the Fund Securities, less the applicable redemption transaction fee as described in the Registration Statement and, if applicable, any operational processing and brokerage costs, transfer fees or stamp taxes.<sup>20</sup>

The Fund may suspend the right of redemption for the Fund only under the following circumstances: (i) When the NYSE is closed (other than weekends and holidays) or trading is restricted; (ii) when trading in the markets normally utilized is restricted, or when an emergency exists as determined by the Commission so that disposal of the Fund’s investments or determination of its net assets is not reasonably practicable; or (iii) during any period when the Commission may permit.

#### Net Asset Value

The Fund’s NAV will be determined as of the close of regular trading on the

NYSE on each day the NYSE is open for trading. If the NYSE closes early on a valuation day, the NAV will be determined as of that time. NAV per Share will be calculated for the Fund by taking the value of the Fund’s total assets, including interest or dividends accrued but not yet collected, less all liabilities, including accrued expenses and dividends declared but unpaid, and dividing such amount by the total number of Shares outstanding. The result, rounded to the nearest cent, will be the NAV per Share. All valuations will be subject to review by the Board of Trustees of the Trust (“Trust Board”) or its delegate.

The Fund’s investments will be valued daily at market value or, in the absence of market value with respect to any investments, at fair value. Market value prices represent last sale or official closing prices from a national securities exchange or foreign exchange (*i.e.*, a regulated market) and will primarily be obtained from third party pricing services (each, a “Pricing Service”). Fair value prices represent any prices not considered market value prices and will either be obtained from a Pricing Service or determined by the pricing committee of the Adviser (the “Pricing Committee”),<sup>21</sup> in accordance with valuation procedures (which may be revised from time to time) adopted by the Trust Board (the “Valuation Procedures”), and in accordance with provisions of the 1940 Act. The information summarized below is based on the Valuation Procedures as currently in effect.

Under normal circumstances, daily calculation of the NAV will utilize the last closing sale price of each security held by the Fund at the close of the market on which such security is principally traded. In determining NAV, portfolio securities for the Fund will be valued as follows:

(1) Common stocks and other equity securities listed on any national or foreign exchange other than The NASDAQ Stock Market (“NASDAQ”) and the London Stock Exchange Alternative Investment Market (“AIM”) will be valued at the last sale price on the business day as of which such value is being determined. Securities listed on NASDAQ or AIM will be valued at the official closing price on the business day as of which such value is being determined. Portfolio securities traded on more than one securities exchange will be valued at the last sale price or

<sup>20</sup> The Adviser represents that, to the extent the Trust effects the creation or redemption of Shares in cash, such transactions will be effected in the same manner for all Authorized Participants.

<sup>21</sup> The Pricing Committee will be subject to procedures designed to prevent the use and dissemination of material non-public information regarding the Fund’s portfolio.

<sup>19</sup> 26 U.S.C. 851.

official closing price, as applicable, on the business day as of which such value is being determined at the close of the exchange representing the principal market for such securities.

(2) Securities traded in the over-the-counter (“OTC”) market will be fair valued at the mean of the most recent bid and the asked price, if available, and otherwise at their closing bid price.

(3) Forward foreign currency contracts will be fair valued at the current day’s interpolated foreign exchange rate, as calculated using the current day’s spot rate, and the 30-, 60-, 90- and 180-day forward rates provided by a Pricing Service or by certain independent dealers in such contracts.

(4) Corporate bonds, corporate notes and other debt securities will be fair valued on the basis of valuations provided by dealers who make markets in such securities or by a Pricing Service approved by the Trust Board, which may use the following valuation inputs when available: (i) Benchmark yields; (ii) reported trades; (iii) broker/dealer quotes; (iv) issuer spreads; (v) benchmark securities; (vi) bids and offers; and (vii) reference data including market research publications.

(5) Fixed income and other debt securities having a remaining maturity of 60 days or less when purchased will be fair valued at cost adjusted for amortization of premiums and accretion of discounts (amortized cost), provided the Adviser’s Pricing Committee has determined that the use of amortized cost is an appropriate reflection of fair value given market and issuer specific conditions existing at the time of the determination.

(6) Repurchase agreements will be valued as follows. Overnight repurchase agreements will be fair valued at cost. Term repurchase agreements (*i.e.*, those whose maturity exceeds seven days) will be fair valued by First Trust at the average of the bid quotations obtained daily from at least two recognized dealers.

Certain securities may not be able to be priced by pre-established pricing methods. Such securities may be valued by the Trust Board or its delegate, the Adviser’s Pricing Committee, at fair value. These securities generally include but are not limited to, restricted securities (securities that may not be publicly sold without registration under the 1933 Act) for which a Pricing Service is unable to provide a market price; securities whose trading has been formally suspended; a security whose market or fair value price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to

materially affect the value of the security after the market has closed but before the calculation of Fund’s NAV (as may be the case in foreign markets on which the security is primarily traded) or is likely to make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the Pricing Service, does not reflect the security’s fair value.

The value of any portfolio security held by the Fund for which market quotations are not readily available will be determined by First Trust in a manner that most fairly reflects fair market value of the security on the valuation date, based on a consideration of all available information.

General factors for determining fair value include, without limitation, the fundamental business data relating to the issuer or borrower; and an evaluation of the forces which influence the market in which these securities are purchased and sold. Specific factors for determining fair value may include, without limitation, type of holding; financial statements of the borrower; cost at date of purchase; size of holding; credit quality and cash flow of issuer, based on the Pricing Committee’s or external analysis; information as to any transactions in or offers for the holding; price and extent of public trading in similar securities (or equity securities) of the issuer/borrower, or comparable companies; coupon payments; quality, value and saleability of collateral securing the loan; business prospects of the issuer/borrower, including any ability to obtain money or resources from a parent or affiliate; the Pricing Committee’s and/or the market’s assessment of the borrower’s management; prospects for the borrower’s industry, and multiples (of earnings and/or cash flow) being paid for similar businesses in that industry; borrower’s competitive position within the industry; borrower’s ability to access additional liquidity through public and/or private markets; and other relevant factors.

#### Availability of Information

The Fund’s Web site ([www.ftportfolios.com](http://www.ftportfolios.com)), which will be publicly available prior to the public offering of Shares, will include a form of the prospectus for the Fund that may be downloaded. The Fund’s Web site will include additional quantitative information updated on a daily basis, including, for the Fund, (1) daily trading volume, the prior business day’s reported closing price, NAV and mid-point of the bid/ask spread at the time of calculation of such NAV (the “Bid/

Ask Price”),<sup>22</sup> and a calculation of the premium and discount of the Bid/Ask Price against the NAV, and (2) data in chart format displaying the frequency distribution of discounts and premiums of the daily Bid/Ask Price against the NAV, within appropriate ranges, for each of the four previous calendar quarters. On each business day, before commencement of trading in Shares in the Core Trading Session (9:30 a.m. to 4:00 p.m. E.T.) on the Exchange, the Fund will disclose on its Web site the Disclosed Portfolio as defined in NYSE Arca Equities Rule 8.600(c)(2) that will form the basis for the Fund’s calculation of NAV at the end of the business day.<sup>23</sup>

On a daily basis, the Fund will disclose on the Fund’s Web site the following information regarding each portfolio holding, as applicable to the type of holding: Ticker symbol, CUSIP number or other identifier, if any; a description of the holding (including the type of holding); the identity of the security, commodity, index or other asset or instrument underlying the holding, if any; maturity date, if any; coupon rate, if any; effective date, if any; market value of the holding; and the percentage weighting of the holding in the Fund’s portfolio. The Web site information will be publicly available at no charge.

In addition, a basket composition file, which will include the security names and share quantities required to be delivered in exchange for the Fund’s Shares, together with estimates and actual cash components, will be publicly disseminated daily prior to the opening of the NYSE via the NSCC. The basket will represent one Creation Unit of the Fund.

Information regarding the intra-day value of the Shares of the Fund, which is the Portfolio Indicative Value (“PIV”) as defined in NYSE Arca Equities Rule 8.600 (c)(3), will be widely disseminated every 15 seconds throughout the Exchange’s Core Trading Session by one or more major market data vendors.<sup>24</sup> The PIV should not be viewed as a “real-time” update of the

<sup>22</sup> The Bid/Ask Price of Shares of the Fund will be determined using the mid-point of the highest bid and the lowest offer on the Exchange as of the time of calculation of the Fund’s NAV. The records relating to Bid/Ask Prices will be retained by the Fund and its service providers.

<sup>23</sup> Under accounting procedures followed by the Fund, trades made on the prior business day (“T”) will be booked and reflected in NAV on the current business day (“T+1”). Accordingly, the Fund will be able to disclose at the beginning of the business day the portfolio that will form the basis for the NAV calculation at the end of the business day.

<sup>24</sup> Currently, it is the Exchange’s understanding that several major market data vendors widely disseminate PIVs taken from the Consolidated Tape Association (“CTA”) or other data feeds.

NAV per Share of the Fund because the PIV may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The price of a non-U.S. security that is primarily traded on a non-U.S. exchange shall be updated, using the last sale price, every 15 seconds throughout the trading day, provided, that upon the closing of such non-U.S. exchange, the closing price of the security, after being converted to U.S. dollars, will be used. Furthermore, in calculating the PIV of the Fund's Shares, exchange rates may be used throughout the Core Trading Session that may differ from those used to calculate the NAV per Share of the Fund and consequently may result in differences between the NAV and the PIV.

The Adviser represents that the Trust, First Trust and BNY will not disseminate non-public information concerning the Trust.

Investors can also obtain the Trust's Statement of Additional Information ("SAI"), the Fund's Shareholder Reports, and the Trust's Form N-CSR and Form N-SAR, filed twice a year. The Trust's SAI and Shareholder Reports are available free upon request from the Trust, and those documents and the Form N-CSR and Form N-SAR may be viewed on-screen or downloaded from the Commission's Web site at [www.sec.gov](http://www.sec.gov). Information regarding market price and trading volume of the Shares will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services. Information regarding the previous day's closing price and trading volume information for the Shares will be published daily in the financial section of newspapers. Quotation and last sale information for the Shares will be available via the CTA high-speed line. The intra-day, closing and settlement prices of the portfolio securities are also readily available from the national securities exchanges trading such securities (as applicable), automated quotation systems, published or other public sources, or on-line information services such as Bloomberg or Reuters.

#### Trading Halts

With respect to trading halts, the Exchange may consider all relevant factors in exercising its discretion to halt or suspend trading in the Shares of the Fund.<sup>25</sup> Trading in Shares of the Fund will be halted if the circuit breaker parameters in NYSE Arca Equities Rule 7.12 have been reached. Trading also

may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable. These may include: (1) The extent to which trading is not occurring in the securities and/or the financial instruments comprising the Disclosed Portfolio of the Fund; or (2) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present. Trading in the Shares will be subject to NYSE Arca Equities Rule 8.600(d)(2)(D), which sets forth circumstances under which Shares of the Fund may be halted.

#### Trading Rules

The Exchange deems the Shares to be equity securities, thus rendering trading in the Shares subject to the Exchange's existing rules governing the trading of equity securities. Shares will trade on the NYSE Arca Marketplace from 4:00 a.m. to 8:00 p.m., E.T. in accordance with NYSE Arca Equities Rule 7.34 (Opening, Core, and Late Trading Sessions). The Exchange has appropriate rules to facilitate transactions in the Shares during all trading sessions. As provided in NYSE Arca Equities Rule 7.6, Commentary .03, the minimum price variation ("MPV") for quoting and entry of orders in equity securities traded on the NYSE Arca Marketplace is \$0.01, with the exception of securities that are priced less than \$1.00 for which the MPV for order entry is \$0.0001.

The Shares will conform to the initial and continued listing criteria under NYSE Arca Equities Rule 8.600. The Exchange represents that, for initial and/or continued listing, the Fund will be in compliance with Rule 10A-3<sup>26</sup> under the Act, as provided by NYSE Arca Equities Rule 5.3. A minimum of 100,000 Shares for the Fund will be outstanding at the commencement of trading on the Exchange. The Exchange will obtain a representation from the issuer of the Shares that the NAV per Share will be calculated daily and that the NAV and the Disclosed Portfolio will be made available to all market participants at the same time.

#### Surveillance

The Exchange represents that trading in the Shares will be subject to the existing trading surveillances, administered by the Financial Industry Regulatory Authority ("FINRA") on behalf of the Exchange, which are designed to detect violations of Exchange rules and applicable federal securities laws. The Exchange

represents that these procedures are adequate to properly monitor Exchange trading of the Shares in all trading sessions and to deter and detect violations of Exchange rules and federal securities laws applicable to trading on the Exchange.<sup>27</sup>

The surveillances referred to above generally focus on detecting securities trading outside their normal patterns, which could be indicative of manipulative or other violative activity. When such situations are detected, surveillance analysis follows and investigations are opened, where appropriate, to review the behavior of all relevant parties for all relevant trading violations.<sup>28</sup>

FINRA, on behalf of the Exchange, will communicate as needed regarding trading in the Shares and certain exchange-traded equity securities with other markets and other entities that are members of the ISG, and FINRA, on behalf of the Exchange, may obtain trading information regarding trading in the Shares and certain exchange-traded equity securities from such markets and other entities. In addition, the Exchange may obtain information regarding trading in the Shares and certain exchange-traded equity securities from markets and other entities that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement.

Not more than 10% of the net assets of the Fund in the aggregate invested in equity securities (other than non-exchange-traded investment company securities) shall consist of equity securities whose principal market is not a member of the ISG or is a market with which the Exchange does not have a comprehensive surveillance sharing agreement.<sup>29</sup>

In addition, the Exchange also has a general policy prohibiting the distribution of material, non-public information by its employees.

#### Information Bulletin

Prior to the commencement of trading, the Exchange will inform its Equity Trading Permit ("ETP") Holders in an Information Bulletin ("Bulletin") of the special characteristics and risks associated with trading the Shares. Specifically, the Bulletin will discuss

<sup>27</sup> FINRA surveils trading on the Exchange pursuant to a regulatory services agreement. The Exchange is responsible for FINRA's performance under this regulatory services agreement.

<sup>28</sup> For a list of the current members of ISG, see [www.isgportal.org](http://www.isgportal.org). The Exchange notes that not all components of the Disclosed Portfolio may trade on markets that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement.

<sup>29</sup> See note 10, *supra*.

<sup>25</sup> See NYSE Arca Equities Rule 7.12.

<sup>26</sup> 17 CFR 240.10A-3.

the following: (1) The procedures for purchases and redemptions of Shares in Creation Units (and that Shares are not individually redeemable); (2) NYSE Arca Equities Rule 9.2(a), which imposes a duty of due diligence on its ETP Holders to learn the essential facts relating to every customer prior to trading the Shares; (3) the risks involved in trading the Shares during the Opening and Late Trading Sessions when an updated PIV will not be calculated or publicly disseminated; (4) how information regarding the PIV will be disseminated; (5) the requirement that ETP Holders deliver a prospectus to investors purchasing newly issued Shares prior to or concurrently with the confirmation of a transaction; and (6) trading information.

In addition, the Bulletin will reference that the Fund will be subject to various fees and expenses described in the Registration Statement. The Bulletin will discuss any exemptive, no-action, and interpretive relief granted by the Commission from any rules under the Act. The Bulletin will also disclose that the NAV for the Shares will be calculated after 4:00 p.m., E.T. each trading day.

## 2. Statutory Basis

The basis under the Act for this proposed rule change is the requirement under section 6(b)(5)<sup>30</sup> that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

The Exchange believes that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices in that the Shares will be listed and traded on the Exchange pursuant to the initial and continued listing criteria in NYSE Arca Equities Rule 8.600. The Adviser, the Sub-Adviser and the Sub-Sub-Advisers have each implemented fire walls with respect to their respective broker-dealer affiliate(s) regarding access to information concerning the composition and/or changes to the portfolio. The Exchange has in place surveillance procedures that are adequate to properly monitor trading in the Shares in all trading sessions and to deter and detect violations of Exchange rules and applicable federal securities laws. FINRA, on behalf of the Exchange, will communicate as needed regarding trading in the Shares and certain

exchange-traded equity securities with other markets and other entities that are members of the ISG and FINRA, on behalf of the Exchange, may obtain trading information regarding trading in the Shares and certain exchange-traded equity securities from such markets and other entities. In addition, the Exchange may obtain information regarding trading in the Shares and certain exchange-traded equity securities from markets and other entities that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement. Not more than 10% of the net assets of the Fund in the aggregate invested in equity securities (other than non-exchange-traded investment company securities) shall consist of equity securities whose principal market is not a member of the ISG or is a market with which the Exchange does not have a comprehensive surveillance sharing agreement. The Fund's investments will be consistent with the Fund's investment objectives and will not be used to enhance leverage.

The proposed rule change is designed to promote just and equitable principles of trade and to protect investors and the public interest in that the Exchange will obtain a representation from the issuer of the Shares that the NAV per Share will be calculated daily and that the NAV and the Disclosed Portfolio will be made available to all market participants at the same time. In addition, a large amount of information is publicly available regarding the Fund and the Shares, thereby promoting market transparency. Moreover, the PIV will be widely disseminated by one or more major market data vendors at least every 15 seconds during the Exchange's Core Trading Session. On each business day, before commencement of trading in Shares in the Core Trading Session on the Exchange, the Fund will disclose on its Web site the Disclosed Portfolio that will form the basis for the Fund's calculation of NAV at the end of the business day. Information regarding market price and trading volume of the Shares will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services, and quotation and last sale information will be available via the CTA high-speed line. The Web site for the Fund will include a form of the prospectus for the Fund and additional data relating to NAV and other applicable quantitative information. Moreover, prior to the commencement of trading, the Exchange will inform its ETP Holders in a Bulletin of the special characteristics and risks

associated with trading the Shares. Trading in Shares of the Fund will be halted if the circuit breaker parameters in NYSE Arca Equities Rule 7.12 have been reached or because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable, and trading in the Shares will be subject to NYSE Arca Equities Rule 8.600(d)(2)(D), which sets forth circumstances under which Shares of the Fund may be halted. In addition, as noted above, investors will have ready access to information regarding the Fund's holdings, the PIV, the Disclosed Portfolio, and quotation and last sale information for the Shares.

The proposed rule change is designed to perfect the mechanism of a free and open market and, in general, to protect investors and the public interest in that it will facilitate the listing and trading of an additional type of actively-managed exchange-traded product that will enhance competition among market participants, to the benefit of investors and the marketplace. As noted above, the Exchange has in place surveillance procedures relating to trading in the Shares and may obtain information via ISG from other exchanges that are members of ISG or with which the Exchange has entered into a comprehensive surveillance sharing agreement. In addition, as noted above, investors will have ready access to information regarding the Fund's holdings, the PIV, the Disclosed Portfolio, and quotation and last sale information for the Shares.

### *B. Self-Regulatory Organization's Statement on Burden on Competition*

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purpose of the Act. The Exchange notes that the proposed rule change will facilitate the listing and trading of an additional type of actively-managed exchange-traded product that primarily holds equity securities, which will enhance competition among market participants, to the benefit of investors and the marketplace.

### *C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

No written comments were solicited or received with respect to the proposed rule change.

<sup>30</sup> 15 U.S.C. 78f(b)(5).

### III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) By order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

### IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

#### *Electronic Comments*

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to [rule-comments@sec.gov](mailto:rule-comments@sec.gov). Please include File Number SR-NYSEArca-2015-77 on the subject line.

#### *Paper Comments*

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-NYSEArca-2015-77. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for

inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR-NYSEArca-2015-77, and should be submitted on or before October 8, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.<sup>31</sup>

**Brent J. Fields,**

*Secretary.*

## DEPARTMENT OF TRANSPORTATION

### Federal Transit Administration

[FTA Docket No. FTA-2015-0024]

#### Agency Information Collection Activity Under OMB Review

**AGENCY:** Federal Transit Administration, DOT.

**ACTION:** Notice of request for comments.

**SUMMARY:** The Federal Transit Administration invites public comment about its intention to request the Office of Management and Budget's (OMB) approval to extend the approval of the following information collection:

#### Fixed Guideway Capital Investment Grants—New Starts Section 5309

The information collected is necessary to permit an assessment of program effectiveness and ensure the proper and timely expenditure of federal funds within the scope of the program. The **Federal Register** notice with a 60-day comment period soliciting comments for the Fixed Guideway Capital Investment Grants—New Starts Section 5309 was published on June 24, 2015 (Citation 80 FR 121). No comments were received from that notice.

**DATES:** Comments must be submitted before October 19, 2015. A comment to OMB is most effective, if OMB receives it within 30 days of publication.

**FOR FURTHER INFORMATION CONTACT:** Tia Swain, Office of Administration, Office of Management Planning, (202) 366-0354.

**ADDRESSES:** All written comments must refer to the docket number that appears at the top of this document and be submitted to the Office of Information

and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, Attention: FTA Desk Officer.

Comments are invited on whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

#### SUPPLEMENTARY INFORMATION:

*Title:* Fixed Guideway Capital Investment Grants—New Starts Section 5309 (OMB Number: 2132-0561)

*Abstract:* The Federal Transit Administration (FTA) administers the discretionary Capital Investment Grant (CIG) grant program under 49 U.S.C. Section 5309 that provides funding for major transit capital investments including rapid rail, light rail, commuter rail, bus rapid transit, and ferries. Three types of eligible projects are outlined in law: smaller scaled corridor-based transit capital projects known as "Small Starts"; new fixed guideway transit systems and extensions to existing fixed guideway systems known as "New Starts"; and projects to improve capacity at least 10 percent in existing fixed guideway corridors that are at capacity today or will be in five years, known as "Core Capacity". The CIG program has a longstanding requirement that FTA evaluate proposed projects against a prescribed set of statutory criteria at specific points during the projects' development including when they seek to enter a subsequent phase of the process or a construction grant agreement. In addition, FTA must report on its evaluations and ratings annually to Congress.

The Moving Ahead for Progress Act in the 21st Century (MAP-21) enacted on July 6, 2012, made significant changes to the CIG program, including creation of an entirely new category of eligible projects called Core Capacity. MAP-21 also reduced the number of steps in the CIG process projects must follow to receive funds, created a new congestion relief evaluation criterion FTA must use to evaluate and rate projects, and specified that "warrants" (ways projects can qualify for automatic ratings) should be developed and used to the extent practicable. The requirement for CIG

<sup>31</sup> 17 CFR 200.30-3(a)(12).

project ratings has been in place since 1998. Thus, the requirements for project evaluation and data collection for these proposed projects are not new. In general, the information used by FTA for CIG project evaluation and rating should arise as a part of the normal project planning process.

FTA has been collecting project evaluation information from project sponsors under the existing OMB approval for this program (OMB No. 2132-0561). However, due to the addition of the Core Capacity eligibility, the changes to the steps in the CIG process made by MAP-21, and the proposed implementation of "warrants," it became apparent that some information now required might be beyond the scope of ordinary planning activities.

*Estimated Total Annual Burden:*  
68,840 hours.

**Matthew M. Crouch,**  
*Associate Administrator for Administration.*

## DEPARTMENT OF TRANSPORTATION

### Maritime Administration

[Docket No. MARAD-2015 0102]

#### Requested Administrative Waiver of the Coastwise Trade Laws: Vessel ADRENALINE; Invitation for Public Comments

**AGENCY:** Maritime Administration, Department of Transportation.

**ACTION:** Notice.

**SUMMARY:** As authorized by 46 U.S.C. 12121, the Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below.

**DATES:** Submit comments on or before October 19, 2015.

**ADDRESSES:** Comments should refer to docket number MARAD-2015-0102. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590. You may also send comments electronically via the Internet at <http://www.regulations.gov>. All comments will become part of this

docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at <http://www.regulations.gov>.

**FOR FURTHER INFORMATION CONTACT:** Linda Williams, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Room W23-453, Washington, DC 20590. Telephone 202-366-0903, Email [Linda.Williams@dot.gov](mailto:Linda.Williams@dot.gov).

**SUPPLEMENTARY INFORMATION:** As described by the applicant the intended service of the vessel ADRENALINE is:

*Intended Commercial Use of Vessel:*  
"Sailing charters for up to 6 passengers"

*Geographic Region:* "Massachusetts"

The complete application is given in DOT docket MARAD-2015-0102 at <http://www.regulations.gov>. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

#### Privacy Act

Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477-78).

By Order of the Maritime Administrator.

## DEPARTMENT OF TRANSPORTATION

### Maritime Administration

[Docket No. MARAD-2015 0100]

#### Requested Administrative Waiver of the Coastwise Trade Laws: Vessel ALANA MCCREE; Invitation for Public Comments

**AGENCY:** Maritime Administration, Department of Transportation.

**ACTION:** Notice.

**SUMMARY:** As authorized by 46 U.S.C. 12121, the Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below.

**DATES:** Submit comments on or before October 19, 2015.

**ADDRESSES:** Comments should refer to docket number MARAD-2015-0100. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590. You may also send comments electronically via the Internet at <http://www.regulations.gov>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at <http://www.regulations.gov>.

**FOR FURTHER INFORMATION CONTACT:** Linda Williams, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Room W23-453, Washington, DC 20590. Telephone 202-366-0903, Email [Linda.Williams@dot.gov](mailto:Linda.Williams@dot.gov).

**SUPPLEMENTARY INFORMATION:** As described by the applicant the intended service of the vessel ALANA MCCREE is:

*Intended Commercial Use Of Vessel:*  
"Private pleasure day and week crewed charters. Passengers only."

*Geographic Region:* "Maryland, Delaware, New Jersey, and Virginia".

The complete application is given in DOT docket MARAD-2015-0100 at <http://www.regulations.gov>. Interested

parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

[Docket No. MARAD–2015 0104]

#### Requested Administrative Waiver of the Coastwise Trade Laws: Vessel WAVE DANCER; Invitation for Public Comments

**AGENCY:** Maritime Administration, Department of Transportation.

**ACTION:** Notice.

**SUMMARY:** As authorized by 46 U.S.C. 12121, the Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below.

**DATES:** Submit comments on or before October 19, 2015.

**ADDRESSES:** Comments should refer to docket number MARAD–2015–0104. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590. You may also send comments electronically via the Internet at <http://www.regulations.gov>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at <http://www.regulations.gov>.

**FOR FURTHER INFORMATION CONTACT:** Linda Williams, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Room W23–453, Washington, DC 20590. Telephone 202–366–0903, Email [Linda.Williams@dot.gov](mailto:Linda.Williams@dot.gov).

**SUPPLEMENTARY INFORMATION:** As described by the applicant the intended service of the vessel WAVE DANCER is: *Intended Commercial Use of Vessel:* “There are several intended commercial uses of this vessel which are:

1. CHARTERS
  - a. Day Trips—Take passengers out for sightseeing and touring of waterways and notable landmarks. May include half/full day lunch/dinner trips.
  - b. Overnight Trips—Take passengers on passage-making adventures along the Atlantic coast and/or inland waterways from Massachusetts to Florida. Charter may originate or terminate at any point between Massachusetts and Florida.
  - c. Captained Charters—Conduct Captained charters of vessel for overnight outings of one or more days covering various distances along the Atlantic coast and intercoastal waterways.
  - d. Bare Boat Charters—charter boat to qualified individuals (must be American citizens) for use without a licensed captain.

2. SPORT FISHING—trolling for fish while sailing/motoring, bottom fishing and/or drift fishing.

3. INSTRUCTION—Teach sailing, seamanship and navigation skills to students (*i.e.*, passengers) looking to safely operate a pleasure sailing vessel.

4. FUNERALS/BURIALS—Perform privately conducted services at sea to spread cremation ashes on open waters as allowed by governmental guidelines and regulations.

5. MARRIAGES—Perform marriages at sea.”

*Geographic Region:* Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, District of Columbia, North Carolina, South Carolina, Georgia and Florida.

The complete application is given in DOT docket MARAD–2015–0104 at <http://www.regulations.gov>. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. **BILLING CODE 4910-81-P**

**DEPARTMENT OF TRANSPORTATION****National Highway Traffic Safety Administration**

[Docket No. NHTSA–2014–0025]

**Request for Comments on New Information Collection****ACTION:** Notice and request for comments.

**SUMMARY:** In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below is being submitted to the Office of Management and Budget (OMB) for review and comments.

**DATES:** Written comments should be submitted by October 19, 2015.

**ADDRESSES:** Send comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street NW., Washington, DC 20503, Attention NHTSA Desk Officer.

**FOR FURTHER INFORMATION CONTACT:** For additional information or access to background documents, contact Julie Kang, Ph.D., Vehicle Safety Research, National Highway Traffic Safety Administration (NHTSA), U.S. Department of Transportation, 1200 New Jersey Avenue SE., Washington, DC 20590. Dr. Kang's telephone number is (202) 366–5195.

**SUPPLEMENTARY INFORMATION:** Before a Federal agency can collect certain information from the public, it must receive approval from the Office of Management and Budget (OMB). In compliance with these requirements, this notice announces that the following information collection request has been forwarded to OMB. A **Federal Register** notice with a 60-day comment period soliciting comments on the following information collection was published on March 13, 2014 (79 FR 14335).

NHTSA received one comment from the Insurance Institute for Highway Safety (IIHS) on the proposed information collection. In NHTSA's original proposed study, each driver would have experienced a one week baseline period and two one week periods where each driver would use each technology. IIHS stated a within-subject design may result in a carryover effect in which changes in behavior resulting from exposure to the first technology may influence behavioral responses to the second technology in a subsequent week. IIHS's concern is that the reinforcement contingencies drivers learn with the first technology may

carry over to a subsequent phase of study and potentially confound the measurement of the second technology's effect on belt use. Based on IIHS's suggestion, NHTSA has changed the experimental design from a within-subjects design (32 participants, 3 weeks) to a between-subject design (48 participants, 3 weeks). In this between-subject design experiment, each participant will only experience one of the two seat belt interlock technologies. This new design holds reasonable statistical analysis power and clears out the concern of the behavior carry-on effect.

*OMB Control Number:* Not assigned.

*Title:* Recruitment and Debriefing of Human Subjects for Field Test of Vehicle Occupant Protection Technologies.

*Form Numbers:* None.

*Type of Review:* New Information Collection.

*Background:* NHTSA's mission is to save lives, prevent injuries, and reduce economic losses resulting from motor vehicle crashes. Increasing seat belt use is one of the agency's highest priorities. Seat belt use has shown an increasing trend since 1995, accompanied by a steady decline in the percentage of unrestrained passenger vehicle occupant fatalities during daytime. In 2013, the nationwide seat belt use reached 87 percent for drivers and front seat passengers.<sup>1</sup> Despite gains in seat belt usage, data from the 2011 Fatality Analysis Reporting System (FARS) indicates that 52 percent of all passenger vehicle crash fatalities<sup>2</sup> were unbelted occupants.<sup>3</sup> The age group 21 to 24 had the highest percentage of unrestrained occupants killed: 2,172 fatalities, of which 1,385 (64 percent) were unrestrained. The second highest percentage of unrestrained passenger vehicle occupant fatalities was 63 percent among 25- to 34-year-olds.<sup>3</sup> Use of lap/shoulder seat belts reduces the risk of fatal injury to front-seat passenger car occupants by 45 percent and the risk of moderate-to-critical injury by 50 percent. In 2011 alone, seat belts saved an estimated 11,949 lives.<sup>3</sup>

The proposed study will examine seat belt use, users' acceptance of emerging

vehicle technologies designed to increase seat belt use, the likelihood of and potential strategies to circumvent the system, and unintended consequences. The study method consists of a field operational test to collect objective and subjective data about two prototype technologies developed by automakers to increase seat belt use. In response to comments received during the 60-day comment period, NHTSA has changed the experimental design, from a within-subjects design (32 participants, 3-week) to a between-subject design (48 participants, 3-week). This new design holds reasonable statistical analysis power and clears out the concern of the behavior carry-on effect. A total of 48 drivers from two age groups would be recruited to participate in the study, 24 non-seat belt users (12 young drivers; 12 middle-aged drivers), and 24 part-time users (12 young drivers; 12 middle-aged drivers). The study sample would have equal numbers of male and female drivers from each age group. The research team acknowledges that it may be difficult to recruit non-users given the high seat belt use rate in Michigan (more than 90 percent). As a result, the research team will also draw from the University of Michigan Transportation Research Institute's (UMTRI) previous field operational test study participant pool of low seat belt users. This pool of previous participants have indicated that they would be willing to do other studies; therefore, it is expected that this strategy will greatly expedite the recruitment process. The estimated burden hours are shown for a maximum of 391 respondents to respond to the recruitment advertisements. The number of call-ins was calculated based on:

- A 93 percent seat belt use rate in Michigan, so it takes about 343 call-ins to find the 24 non-seat belt users for screening purposes;
- It is estimated at least 50 percent of the part-time seat belt users from previous studies will participate in the current study (pulling from those who have indicated that they would be interested in participating in future studies), so it takes about 48 call-ins to find 24 part-time seat belt users.

Each driver will be presented with one baseline condition and one vehicle occupant protection technology. Each condition will last one week. Therefore, each participant will drive the research vehicles for two weeks. A data acquisition system will record system state (*i.e.*, door, ignition, driver seat belt buckle) and video inside the vehicle cabin. The University of Michigan

<sup>1</sup> Pickrell, T.M., & Liu, C. (2014, January). *Seat Belt Use in 2013—Overall Results*. (Traffic Safety Facts Research Note. Report No. DOT HS 811 875). Washington, DC: National Highway Traffic Safety Administration.

<sup>2</sup> The 2012 and 2013 data on the percent of unrestrained passenger vehicle occupant fatalities during daytime is not yet available.

<sup>3</sup> NHTSA. (2013, June) *Occupant Protection* (Traffic Safety Facts 2011 Data. Report No. DOT HS 811 729). Washington, DC: National Highway Traffic Safety Administration. <http://www-nrd.nhtsa.dot.gov/Pubs/811729.pdf>

Transportation Research Institute, in collaboration with the Virginia Tech Transportation Institute and Montana State University, Western Transportation Institute, will conduct this study under a research contract with NHTSA.

*Description of the Need for the Information and Proposed Use of the Information:* The collection of information consists of: (1) An eligibility questionnaire, (2) a demographic questionnaire; and (3) post-study questionnaires. In the revised study design, minor changes were also made to the three instruments to reflect the study changes. Example changes include deleting the question asking for driver's social security number in the demographic questionnaire, and adding more open-end questions in the post-study questionnaires.

The information to be collected will be used to:

- *Eligibility questionnaire(s)* will be used to obtain self-reported driving history information. Individuals interested in participating in the study will be asked to provide information about their driving history. People who

have been convicted of felony motor convictions will be excluded. Individuals who pass the initial screening will be asked to provide their driver's license number and consent to review their driving records to confirm self-reported driving history information. Drivers' consent and driving license numbers will be used to obtain official driving records from the state of Michigan. Individuals will be excluded from participating in the study if they refuse to grant UMTRI permission to review their public driving records or if they have been convicted of felony motor convictions in the last 2 years. This exclusion criterion is used to reduce the liability risk of providing participants with research vehicles.

- *Demographic questionnaire* will be used to obtain demographic information to confirm that the study group includes participants from various groups (e.g., age; gender; part-time seat belt users or those who sometimes wear their belts; non-users or those who never wear a seat belt; etc. Other demographic information will be collected to describe

the study sample (e.g., annual travel distance).

- *Post-study questionnaire(s)* will be used to get information about drivers' beliefs and attitude towards each occupant protection technology tested, and to identify potential problems associated with each system. These questionnaires will also be used to assess perceived usability of the systems in terms of acceptance and satisfaction, as well as willingness to have this technology in their vehicle. Each driver will complete a post-study questionnaire once, at the end of the second week.

*Respondents:* Michigan drivers with a valid driver license.

*Estimated Number of Respondents:* 50 to 391.

*Estimated Number of Responses:* One to three responses per person, 17 to 85 questions total.

*Estimated Total Annual Burden:* 10 to 45 minutes per respondent (95.2 hours total).

*Estimated Frequency:* One-time for the eligibility; demographic questionnaire; and the post-study questionnaire.

TABLE 1—ESTIMATED BURDEN HOURS

Instrument	Number of respondents <sup>4</sup>	Frequency of responses	Number of questions	Estimated individual burden (minutes)	Total estimated burden hours	Total annualize cost to respondents <sup>5</sup>
Eligibility questionnaire .....	391	1	17	10	65.2	\$1377.60
Demographic questionnaire .....	60	1	23	5	5	105.70
Post-study questionnaire .....	50	1	45	30	25	528.50
<b>Total .....</b>					<b>95.2</b>	<b>2011.80</b>

<sup>4</sup> The number of respondents in this table includes drop-out rates.

<sup>5</sup> Estimated based on the mean hourly rate for Michigan (all occupations) is \$21.14 as reported in the May 2011 Occupational Employment and Wage Estimates, Bureau of Labor Statistics. [http://www.bls.gov/oes/oes\\_dl.htm](http://www.bls.gov/oes/oes_dl.htm)

Comments are invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

**Authority:** The Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended; 5 CFR part 1320; and 49 CFR 1.95.

Issued in Washington, DC.

**BILLING CODE 4910-59-P**

**DEPARTMENT OF TRANSPORTATION**

**Surface Transportation Board**

[Docket No. AB 290 (Sub-No. 378X)]

**Norfolk Southern Railway Company—  
 Abandonment Exemption—in  
 Nottoway County, VA**

Norfolk Southern Railway Company (NSR) has filed a verified notice of exemption under 49 CFR part 1152 subpart F—*Exempt Abandonments* to abandon approximately 0.70 miles of

railroad line (the Line). The Line extends between mileposts N 133.4 (near Atwood Street) and N 134.1 (near Highway 460 and Burkes Tavern Road), in Nottoway County, Va., and traverses United States Postal Service Zip Code 23922.

NSR has certified that: (1) No local traffic has moved over the Line for at least two years; (2) there is no overhead traffic on the Line that would have to be rerouted over other lines; (3) no formal complaint filed by a user of rail service on the Line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the Line either is pending with the Surface Transportation Board (Board) or with any U.S. District Court or has been decided in favor of complainant within the two-year period; and (4) the requirements at 49 CFR 1105.7(c)

(environmental report), 49 CFR 1105.11 (transmittal letter), 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the abandonment shall be protected under *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance (OFA) has been received, this exemption may become effective on October 17, 2015, unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues,<sup>1</sup> formal expressions of intent to file an

<sup>1</sup> The Board will grant a stay if an informed decision on environmental issues (whether raised by a party or by the Board's Office of Environmental Analysis (OEA) in its independent investigation) cannot be made before the exemption's effective date. See *Exemption of Out-of-Serv. Rail Lines*, 5 I.C.C. 2d 377 (1989). Any request for a stay should be filed as soon as possible so that the Board may take appropriate action before the exemption's effective date.

OFA under 49 CFR 1152.27(c)(2),<sup>2</sup> and interim trail use/rail banking requests under 49 CFR 1152.29 must be filed by September 28, 2015. Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by October 7, 2015, with the Surface Transportation Board, 395 E Street SW., Washington, DC 20423-0001.

A copy of any petition filed with the Board should be sent to NSR's representative: William A. Mullins, Baker & Miller PLLC, 2401 Pennsylvania Ave. NW., Suite 300, Washington, DC 20037.

If the verified notice contains false or misleading information, the exemption is void *ab initio*.

NSR has filed a combined environmental and historic report that address the effects, if any, of the abandonment on the environment and historic resources. OEA will issue an environmental assessment (EA) by September 22, 2015. Interested persons may obtain a copy of the EA by writing to OEA (Room 1100, Surface Transportation Board, Washington, DC 20423-0001) or by calling OEA at (202) 245-0305. Assistance for the hearing

<sup>2</sup> Each OFA must be accompanied by the filing fee, which is currently set at \$1,600. See 49 CFR 1002.2(f)(25).

impaired is available through the Federal Information Relay Service at (800) 877-8339. Comments on environmental and historic preservation matters must be filed within 15 days after the EA becomes available to the public.

Environmental, historic preservation, public use, or interim trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Pursuant to the provisions of 49 CFR 1152.29(e)(2), NSR shall file a notice of consummation with the Board to signify that it has exercised the authority granted and fully abandoned the Line. If consummation has not been effected by NSR's filing of a notice of consummation by September 17, 2016, and there are no legal or regulatory barriers to consummation, the authority to abandon will automatically expire.

Board decisions and notices are available on our Web site at "[www.stb.dot.gov](http://www.stb.dot.gov)."

Decided: September 14, 2015.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Food and Drug Administration

21 CFR Parts 1, 11, 16, 106, 110, *et al.*

Current Good Manufacturing Practice, Hazard Analysis, and Risk-Based Preventive Controls for Human Food; Final Rule

**DEPARTMENT OF HEALTH AND HUMAN SERVICES****Food and Drug Administration**

**21 CFR Parts 1, 11, 16, 106, 110, 114, 117, 120, 123, 129, 179, and 211**

[Docket No. FDA-2011-N-0920]

**Current Good Manufacturing Practice, Hazard Analysis, and Risk-Based Preventive Controls for Human Food**

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Final rule.

**SUMMARY:** The Food and Drug Administration (FDA or we) is amending our regulation for Current Good Manufacturing Practice In Manufacturing, Packing, or Holding Human Food in two fundamental ways. First, we are modernizing the long-standing current good manufacturing practice requirements. Second, we are adding requirements for domestic and foreign facilities that are subject to our regulation for Registration of Food Facilities to establish and implement hazard analysis and risk-based preventive controls for human food. We also are revising certain definitions in our regulation for Registration of Food Facilities to clarify the scope of the exemption from registration requirements provided for “farms” and, in so doing, to clarify which domestic and foreign facilities are subject to the requirements for hazard analysis and risk-based preventive controls for human food. We are taking this action as part of our announced initiative to revisit the current good manufacturing practice requirements since they were last revised in 1986 and to implement new statutory provisions in the FDA Food Safety Modernization Act. The rule is intended to build a food safety system for the future that makes modern, science- and risk-based preventive controls the norm across all sectors of the food system.

**DATES:** This rule is effective November 16, 2015, except for the amendment to part 110 in instruction 13, which is effective September 17, 2018 and paragraph (2) of the definition of “qualified auditor” in § 117.3, and §§ 117.5(k)(2), 117.8, 117.405(a)(2), 117.405(c), 117.410(d)(2)(ii), 117.430(d), 117.435(d), 117.475(c)(2) and 117.475(c)(13). FDA will publish a document in the **Federal Register** announcing the effective dates of paragraph (2) of the definition of “qualified auditor” in § 117.3, and §§ 117.5(k)(2), 117.8, 117.405(a)(2), 117.405(c), 117.410(d)(2)(ii), 117.430(d),

117.435(d), 117.475(c)(2), and 117.475(c)(13). See section LVI for the compliance dates.

Jenny Scott, Center for Food Safety and Applied Nutrition (HFS-300), Food and Drug Administration, 5100 Paint Branch Pkwy., College Park, MD 20740, 240-402-2166.

**SUPPLEMENTARY INFORMATION:**

**Table of Contents**

Executive Summary  
Purpose and Coverage of the Rule  
Summary of the Major Provisions of the Rule  
Costs and Benefits

I. Background  
A. FDA Food Safety Modernization Act  
B. Stages in the Rulemaking for the Human Preventive Controls Rule  
C. Summary of the Major Provisions of Proposed Human Preventive Controls Rule  
D. Draft Risk Assessment  
E. Definition of “Retail Food Establishment”  
F. Public Comments

II. Legal Authority  
A. Changes to Current 21 CFR Part 1, Subparts H, I, and J  
B. Changes to Current 21 CFR Part 110  
C. Hazard Analysis and Risk-Based Preventive Controls  
D. Comments on Legal Authority

III. General Comments on the Proposed Rule

IV. Comments on Proposed Revisions to the Definitions in the Section 415 Registration Regulations (21 CFR Part 1, Subpart H) and the Section 414 Recordkeeping Regulations (21 CFR Part 1, Subpart J)  
A. Definitions That Impact a Determination of Whether an Establishment Is a “Farm”  
B. Proposed Revisions to the Definition of Farm  
C. Proposed New Definition of Harvesting  
D. Proposed Revision to the Definition of Holding  
E. Proposed Revision to the Definition of Manufacturing/Processing  
F. Proposed New Definition of Mixed-Type Facility  
G. Proposed Revision to the Definition of Packing

V. Comments on the Organizing Principles for How the Status of a Food as a Raw Agricultural Commodity or as a Processed Food Affects the Requirements Applicable to a Farm Under Sections 415 and 418 of the FD&C Act

VI. Rulemaking Required by Section 103(c) of FSMA: On-Farm Activities  
A. Section 103(c)(1)(C) of FSMA  
B. Comments on Qualitative Risk Assessment of On-Farm Activities Outside of the Farm Definition  
C. Comments Regarding an Exemption for Small and Very Small Farm Mixed-Type Facilities Under Section 421 of the FD&C Act

VII. Comments on Proposed General Revisions to Current Part 110 (Final Part 117)

A. Title of Part 117  
B. Proposed Revisions for Consistency of Terms  
C. Proposed Additions Regarding Allergen Cross-Contact  
D. Proposed Revisions for Consistency With the Definition of “Food”  
E. Proposed Revisions To Address Guidance in Current Part 110  
F. Proposed Editorial Changes  
G. General Comments on Current Part 110 (Final Part 117)

VIII. Subpart A: Comments on Proposed § 117.1—Applicability and Status  
A. Comments on Proposed § 117.1(a)—Applicability  
B. Comments on Proposed § 117.1(b)—Prohibited Act  
C. Comments on Proposed § 117.1(c)—Specific CGMP Requirements

IX. Subpart A: Comments on Proposed § 117.3—Definitions  
A. Redesignation  
B. Definitions in Current Part 110 That We Proposed To Delete  
C. Definitions That We Proposed To Establish in Part 117  
D. Comments Asking FDA To Establish Additional Definitions or Otherwise Clarify Terms Not Defined in the Rule  
E. Additional Definitions To Clarify Terms Not Defined in the Proposed Rule

X. Subpart A: Comments on Qualifications of Individuals Who Manufacture, Process, Pack, or Hold Food  
A. Applicability and Qualifications of All Individuals Engaged in Manufacturing, Processing, Packing, or Holding Food (Final § 117.4(a), (b), and (d))  
B. Additional Requirements Applicable to Supervisory Personnel (Final § 117.4(c))

XI. Subpart A: Comments on Proposed § 117.5—Exemptions  
A. General Comments on the Proposed Exemptions  
B. Proposed § 117.5(a)—Exemption Applicable to a Qualified Facility  
C. Proposed § 117.5(b) and (c)—Exemptions Applicable to Food Subject to HACCP Requirements for Fish and Fishery Products (21 CFR Part 123) or for Juice (21 CFR Part 120)  
D. Proposed § 117.5(d)—Exemption Applicable to Food Subject to Part 113—Thermally Processed Low-Acid Foods Packaged In Hermetically Sealed Containers  
E. Proposed § 117.5(e)—Exemption Applicable to a Facility That Manufactures, Processes, Packages, or Holds a Dietary Supplement  
F. Proposed § 117.5(f)—Exemption Applicable to Activities Subject to Standards for Produce Safety in Section 419 of the FD&C Act  
G. Proposed §§ 117.5(g) and (h)—Exemptions Applicable to On-Farm Low-Risk Activity/Food Combinations Conducted by a Small or Very Small Business  
H. Proposed § 117.5(i)—Exemption Related to Alcoholic Beverages  
I. Proposed § 117.5(j)—Exemption Applicable to Facilities Solely Engaged in Storage of Raw Agricultural Commodities Other Than Fruits and

- Vegetables Intended for Further Distribution or Processing
- J. Proposed § 117.5(k)—Exemption Applicable to Farms, Fishing Vessels, Activities of “Farm Mixed-Type Facilities” Within the Definition of “Farm,” the Holding or Transportation of One or More Raw Agricultural Commodities, and Specified Activities Conducted on Specified Raw Agricultural Commodities
- K. Comments Requesting Additional Exemptions
- XII. Subpart A: Comments on Proposed § 117.7—Applicability of Part 117 to a Facility Solely Engaged in the Storage of Unexposed Packaged Food
- XIII. Subpart B: Comments on Proposed § 117.10—Personnel
- A. Management Responsibility for Requirements Applicable to Personnel
- B. Proposed § 117.10(a)—Disease Control
- C. Proposed § 117.10(b)—Cleanliness
- XIV. Subpart B: Comments on Proposed § 117.20—Plant and Grounds
- A. Proposed § 117.20(a)—Grounds
- B. Proposed § 117.20(b)—Plant Construction and Design
- XV. Subpart B: Comments on Proposed § 117.35—Sanitary Operations
- A. Proposed § 117.35(a)—General Maintenance
- B. Proposed § 117.35(b)—Substances Used in Cleaning and Sanitizing; Storage of Toxic Materials
- C. Proposed § 117.35(c)—Pest Control
- D. Proposed § 117.35(d)—Sanitation of Food-Contact Surfaces
- E. Proposed § 117.35(d)(1)—Food-Contact Surfaces Used for Manufacturing/Processing or Holding
- F. Proposed § 117.35(d)(2)—Wet Cleaning
- G. Proposed § 117.35(d)(3)—Single-Service Articles
- H. Proposed § 117.35(e)—Sanitation of Non-Food-Contact Surfaces
- I. Proposed § 117.35(f)—Storage and Handling of Cleaned Portable Equipment and Utensils
- XVI. Subpart B: Comments on Proposed § 117.37—Sanitary Facilities and Controls
- A. Proposed § 117.37(a)—Water Supply
- B. Proposed § 117.37(b)—Plumbing
- C. Proposed § 117.37(c)—Sewage Disposal
- D. Proposed § 117.37(d)—Toilet Facilities
- E. Proposed § 117.37(e)—Hand-Washing Facilities
- XVII. Subpart B: Comments on Proposed § 117.40—Equipment and Utensils
- A. Proposed § 117.40(a)—Design, Construction, Use, Installation, and Maintenance of Equipment and Utensils
- B. Proposed § 117.40(b)—Seams on Food-Contact Surfaces
- C. Proposed § 117.40(c)—Construction of Equipment
- D. Proposed § 117.40(d)—Holding, Conveying, and Manufacturing Systems
- E. Proposed § 117.40(e)—Freezer and Cold Storage Compartments
- F. Proposed § 117.40(f)—Accurate and Precise Instruments and Controls
- G. Proposed § 117.40(g)—Compressed Air or Other Gases
- XVIII. Subpart B: Comments on Proposed § 117.80(a)—General Processes and Controls
- A. Proposed § 117.80(a)(1)—Adequate Sanitation Principles
- B. Proposed § 117.80(a)(2)—Quality Control Operations
- C. Proposed § 117.80(a)(3)—Supervision of Overall Sanitation
- D. Proposed § 117.80(a)(4)—Production Procedures
- E. Proposed § 117.80(a)(5)—Chemical, Microbial, or Extraneous-Material Testing Procedures
- F. Proposed § 117.80(a)(6)—Contaminated Food
- XIX. Subpart B: Comments on Proposed § 117.80(b)—Processes and Controls for Raw Materials and Other Ingredients
- A. Proposed § 117.80(b)(1)—Inspection, Segregation and Handling of Raw Materials and Other Ingredients
- B. Proposed § 117.80(b)(2)—Levels of Microorganisms in Raw Materials and Other Ingredients
- C. Proposed § 117.80(b)(3)—Natural Toxins in Raw Materials and Other Ingredients
- D. Proposed § 117.80(b)(4)—Pests, Undesirable Microorganisms and Extraneous Materials in Raw Materials and Other Ingredients
- E. Proposed § 117.80(b)(5)—Holding Raw Materials, Other Ingredients, and Rework in Bulk
- F. Proposed § 117.80(b)(7)—Liquid or Dry Raw Materials and Other Ingredients
- G. Proposed § 117.80(b)(8)—Raw Materials and Other Ingredients That Are Food Allergens
- XX. Subpart B: Comments on Proposed § 117.80(c)—Manufacturing Operations
- A. Proposed § 117.80(c)(1)—Condition of Equipment, Utensils, and Finished Food Containers
- B. Proposed § 117.80(c)(2)—Conditions and Controls for Food Manufacturing, Processing, Packing, and Holding
- C. Proposed § 117.80(c)(3)—Food That Can Support the Rapid Growth of Undesirable Microorganisms
- D. Proposed § 117.80(c)(4)—Measures To Destroy or Prevent the Growth of Undesirable Microorganisms
- E. Proposed § 117.80(c)(5)—Work-in-Process and Rework
- F. Proposed § 117.80(c)(6)—Finished Food
- G. Proposed § 117.80(c)(7)—Equipment, Containers, and Utensils
- H. Proposed § 117.80(c)(8)—Metal or Other Extraneous Material
- I. Proposed § 117.80(c)(9)—Disposal of Adulterated Food, Raw Materials, and Other Ingredients
- J. Proposed § 117.80(c)(10)—Performing Manufacturing Steps
- K. Proposed § 117.80(c)(11)—Heat Blanching and Growth and Contamination by Thermophilic Microorganisms During Manufacturing Operations
- L. Proposed § 117.80(c)(12)—Batters, Breeding, Sauces, Gravies, Dressings, and Other Similar Preparations
- M. Proposed § 117.80(c)(13)—Filling, Assembling, Packaging and Other Operations
- N. Proposed § 117.80(c)(14)—Food That Relies on the Control of Water Activity for Preventing the Growth of Undesirable Microorganisms
- O. Proposed § 117.80(c)(15)—Food That Relies on the Control of pH for Preventing the Growth of Undesirable Microorganisms
- P. Proposed § 117.80(c)(16)—Requirements for Ice Used in Contact With Food
- Q. Proposed Deletion of Current § 110.80(b)(17)—Food-Manufacturing Areas and Equipment
- XXI. Subpart B: Comments on Proposed § 117.93—Warehousing and Distribution
- XXII. Subpart B: Comments on Proposed § 117.110—Natural or Unavoidable Defects in Food for Human Use That Present No Health Hazard
- XXIII. Subpart C: Comments on Overall Framework for Hazard Analysis and Risk-Based Preventive Controls
- XXIV. Subpart C: Comments on Proposed § 117.126—Food Safety Plan
- A. Proposed § 117.126(a)(1)—Requirement for a Food Safety Plan
- B. Proposed § 117.126(a)(2)—Preparation of the Food Safety Plan by a Preventive Controls Qualified Individual
- C. Proposed § 117.126(b)—Contents of a Food Safety Plan
- D. Proposed § 117.126(c)—Records
- E. Comments on Potential Requirements for Submission of a Facility Profile to FDA
- XXV. Subpart C: Comments on Proposed § 117.130—Hazard Analysis
- A. Proposed § 117.130(a)—Requirement for a Written Hazard Analysis
- B. Proposed § 117.130(b)—Hazard Identification
- C. Proposed § 117.130(c)—Evaluation of Whether a Hazard Requires a Preventive Control
- XXVI. Subpart C: Comments on Proposed § 117.135—Preventive Controls
- A. Proposed § 117.135(a)—Requirement To Identify and Implement Preventive Controls
- B. Proposed § 117.135(b)—Requirement for Written Preventive Controls
- C. Proposed § 117.135(c)(1)—Process Controls
- D. Proposed § 117.135(c)(2)—Food Allergen Controls
- E. Proposed § 117.135(c)(3)—Sanitation Controls
- F. Proposed § 117.135(c)(4)—Supply-Chain Controls
- G. Proposed § 117.135(c)(5)—Recall Plan
- H. Proposed § 117.135(c)(6)—Other Controls
- XXVII. Subpart C: Circumstances in Which the Owner, Operator, or Agent in Charge of a Manufacturing/Processing Facility Is Not Required To Implement a Preventive Control (Final §§ 117.136 and 117.137)
- XXVIII. Subpart C: Comments on Proposed Requirements for a Recall Plan (Final § 117.139)
- A. Proposed § 117.139(a)—Requirement for a Written Recall Plan (Final § 117.139(a))
- B. Proposed § 117.139(b)—Procedures That Describe the Steps To Be Taken, and Assign Responsibility for Taking Those Steps (Final § 117.139(b))

- XXIX. Comments on Proposed § 117.140—Preventive Control Management Components
- A. Proposed § 117.140(a)—Flexible Requirements for Monitoring, Corrective Actions and Corrections, and Verification
- B. Proposed § 117.140(b)—Applicability of Preventive Control Management Components to the Supply-Chain Program
- C. Proposed § 117.140(c)—Recall Plan is Not Subject to Preventive Control Management Components
- XXX. Subpart C: Comments on Proposed § 117.145—Monitoring
- A. Our Tentative Conclusion To Require Monitoring of the Performance of Preventive Controls
- B. Proposed § 117.145(a)—Flexibility in Requirements for Monitoring
- C. Proposed § 117.145(b)—Records
- XXXI. Subpart C: Comments on Proposed § 117.150—Corrective Actions and Corrections
- A. Proposed § 117.150(a)(1)—Requirement To Establish and Implement Corrective Action Procedures
- B. Proposed § 117.150(a)(2)—Content of Corrective Action Procedures
- C. Proposed § 117.150(b)—Corrective Action in the Event of an Unanticipated Problem
- D. Proposed § 117.150(c)—Corrections
- E. Proposed § 117.150(d)—Records
- XXXII. Subpart C: Comments on Proposed § 117.155—Verification
- A. Flexibility in Requirements for Verification
- B. Proposed § 117.155(a)—Verification Activities
- C. Proposed § 117.155(b)—Documentation of Verification Activities
- D. Comments on Potential Requirements Regarding Complaints
- XXXIII. Subpart C: Comments on Proposed § 117.160—Validation
- A. Flexibility in the Requirements To Validate Preventive Controls
- B. Proposed § 117.160(b)(1)—When Validation Must Be Performed and Role of the Preventive Controls Qualified Individual in Validation
- C. Proposed § 117.160(b)(2)—What Validation Must Include
- D. Proposed § 117.160(b)(3)—Preventive Controls for Which Validation Is Not Required
- XXXIV. Subpart C: Comments on Proposed § 117.165—Verification of Implementation and Effectiveness
- A. Flexibility in the Requirements To Conduct Activities To Verify Implementation and Effectiveness
- B. Proposed § 117.165(a)(1)—Calibration
- C. Comments Directed to Proposed Requirements for Both Product Testing (Proposed § 117.165(a)(2) and (b)(2)) and Environmental Monitoring (Proposed § 117.165(a)(3) and (b)(3))
- D. Proposed § 117.165(a)(2)—Product Testing
- E. Proposed § 117.165(a)(3)—Environmental Monitoring
- F. Proposed § 117.165(a)(4)—Review of Records
- G. Proposed § 117.165(b)—Written Procedures
- XXXV. Subpart C: Comments on Proposed § 117.170—Reanalysis
- A. Proposed § 117.170(a)—Circumstances Requiring Reanalysis
- B. Proposed § 117.170(b)—Timeframe To Complete Reanalysis
- C. Proposed § 117.170(c)—Requirement To Revise the Written Food Safety Plan or Document Why Revisions Are Not Needed
- D. Proposed § 117.170(d)—Requirement for Oversight of Reanalysis by a Preventive Controls Qualified Individual
- E. Proposed § 117.170(e)—Reanalysis on the Initiative of FDA
- XXXVI. Subpart C: Comments on Proposed § 117.180—Requirements Applicable to a Preventive Controls Qualified Individual and a Qualified Auditor
- A. Proposed § 117.180(a) and (b)—What a Preventive Controls Qualified Individual or Qualified Auditor Must Do or Oversee
- B. Proposed § 117.180(c)—Qualification Requirements
- C. Proposed § 117.180(d)—Records
- XXXVII. Subpart C: Comments on Proposed § 117.190—Implementation Records
- A. Proposed § 117.190(a)—List of Required Records
- B. Proposed § 117.190(b)—Applicability of Subpart F
- XXXVIII. Subpart D: Comments on Proposed § 117.201—Modified Requirements That Apply to a Qualified Facility
- A. Comments on Submission of a Certification Statement
- B. General Comments on Modified Requirements That Apply to a Qualified Facility
- C. Proposed § 117.201(a)—Documentation To Be Submitted
- D. Proposed § 117.201(b)—Procedure for Submission
- E. Proposed § 117.201(c)—Frequency of Determination and Submission
- F. Proposed § 117.201(d)—Notification to Consumers (Final § 117.201(e))
- G. Proposed § 117.201(e)—Records (Final § 117.201(f))
- XXXIX. Subpart D: Comments on Proposed § 117.206—Modified Requirements That Apply to a Facility Solely Engaged in the Storage of Unexposed Packaged Food
- A. Proposed § 117.206(a)—Modified Requirements for Unexposed Refrigerated Packaged Food That Requires Time/Temperature Controls
- B. Proposed § 117.206(b)—Records
- XL. Subpart E: Comments on Proposed New Provisions for Withdrawal of a Qualified Facility Exemption
- A. Proposed § 117.251—Circumstances That May Lead FDA To Withdraw a Qualified Facility Exemption
- B. Proposed § 117.254—Issuance of an Order To Withdraw a Qualified Facility Exemption
- C. Proposed § 117.257—Contents of an Order To Withdraw a Qualified Facility Exemption
- D. Proposed § 117.260—Compliance With, or Appeal of, an Order To Withdraw a Qualified Facility Exemption
- E. Proposed § 117.264—Procedure for Submitting an Appeal
- F. Proposed § 117.267—Procedure for Requesting an Informal Hearing
- G. Proposed § 117.270—Requirements Applicable to an Informal Hearing
- H. Proposed § 117.287—Reinstatement of a Qualified Facility Exemption That Was Withdrawn
- I. Conforming Amendment to 21 CFR part 16
- J. Other Comments on the Withdrawal Provisions
- XLI. Subpart F: Comments on Proposed New Recordkeeping Requirements
- A. Proposed § 117.301—Records Subject to the Requirements of Subpart F
- B. Proposed § 117.305—General Requirements Applying to Records
- C. Proposed § 117.310—Additional Requirements Applying to the Food Safety Plan
- D. Proposed § 117.315—Requirements for Record Retention
- E. Proposed § 117.320—Requirements for Official Review
- F. Proposed § 117.325—Public Disclosure
- G. Proposed § 117.330—Use of Existing Records
- H. Final § 117.335—Special Requirements Applicable to a Written Assurance
- I. Other Comments on the Recordkeeping Requirements of Subpart F
- XLII. Subpart G: General Comments on Proposed Requirements for a Supply-Chain Program
- XLIII. Subpart G: Comments on Requirement To Establish and Implement a Supply-Chain Program
- A. Requirement for a Written Supply-Chain Program (Final § 117.405(a)(1) and (b))
- B. Circumstances That Do Not Require a Written Supply-Chain Program (Final § 117.405(a)(2))
- C. Exemption for Food Supplied for Research or Evaluation (Final § 117.405(a)(3))
- D. Additional Requirements for Non-Suppliers (Final § 117.405(c))
- E. Proposed General Requirements for the Supply-Chain Program That We Are Not Including in the Final Rule (Proposed § 117.136(a)(4) and (5))
- XLIV. Subpart G: Comments on General Requirements Applicable to a Supply-Chain Program
- A. Description of What the Supply-Chain Program Must Include (Final § 117.410(a))
- B. Appropriate Supplier Verification Activities ((Final § 117.410(b))
- C. Purpose of Supplier Verification Activities for Raw Materials and Other Ingredients (Final § 117.410(c))
- D. Factors That Must Be Considered When Approving Suppliers and Determining Appropriate Supplier Verification Activities for Raw Materials and Other Ingredients (Final § 117.410(d))
- E. Supplier Non-Conformance (Final § 117.410(e))
- XLV. Subpart G: New Requirement Specifying Responsibilities of the Receiving Facility (Final § 117.415)
- XLVI. Subpart G: Comments on Using Approved Suppliers and Determining Appropriate Supplier Verification Activities

- A. Using Approved Suppliers (Final § 117.420)
- B. Determining Appropriate Verification Activities (Final § 117.425)
- XLVII. Subpart G: Comments on Conducting Supplier Verification Activities for Raw Materials and Other Ingredients
- A. Requirement to Conduct One or More Supplier Verification Activities (Final § 117.430(a))
- B. Requirement for an Onsite Audit as a Verification Activity When a Hazard Has a Reasonable Probability of Resulting in Serious Adverse Health Consequences or Death to Humans (Final § 117.430(b))
- C. Alternative Verification Activity When the Supplier Is a Qualified Facility (Final § 117.430(c))
- D. Alternative Verification Activity When the Supplier Is a Produce Farm That Is Not a “Covered Farm” for the Purposes of the Future Produce Safety Rule (Final § 117.430(d))
- E. Alternative Verification Activity When the Supplier Is a Shell Egg Producer That Has Less Than 3,000 Laying Hens (Final § 117.430(e))
- F. Independence of Persons Who Conduct Supplier Verification Activities (Final § 117.430(f))
- XLVIII. Subpart G: Comments on Onsite Audit
- A. Requirements Applicable to an Onsite Audit (Final § 117.435(a) and (b))
- B. Substitution of Inspection by FDA or an Officially Recognized or Equivalent Food Safety Authority
- C. Onsite Audit by a Third-Party Auditor Accredited for the Purposes of Section 808 of the FD&C Act
- XLIX. Subpart G: Comments on Records Documenting the Supply-Chain Program
- A. Applicability of the Recordkeeping Requirements of Subpart F (Final § 117.475(a))
- B. Requirement To Review Records of the Supply-Chain Program (Final § 117.475(b))
- C. Documentation Demonstrating Use of the Written Procedures for Receiving Raw Materials and Other Ingredients (Final § 117.475(c)(5))
- D. Documentation of the Conduct of an Onsite Audit (Final § 117.475(c)(7))
- E. Documentation of Sampling and Testing (Final § 117.475(c)(8))
- F. Documentation of Other Appropriate Supplier Verification Activity (Final § 117.475(c)(10))

## Executive Summary

### Purpose and Coverage of the Rule

This rule is part of FDA’s implementation of the FDA Food Safety Modernization Act (FSMA), which intends to better protect public health by, among other things, adopting a modern, preventive, and risk-based approach to food safety regulation. This rule creates certain new requirements for the production of human food by registered food facilities, and revises previous requirements, in three key ways.

First, this rule creates new requirements for certain domestic and foreign facilities to establish and implement hazard analysis and risk-based preventive controls for human food. In general, these requirements apply to establishments that are required to register with FDA as a food “facility.” This portion of the rule requires registered food facilities to maintain a food safety plan, perform a hazard analysis, and institute preventive controls for the mitigation of those hazards, unless an exemption applies. Facilities must also monitor their controls, conduct verification activities to ensure the controls are effective, take appropriate corrective actions, and maintain records documenting these actions.

Second, this rule modernizes FDA’s long-standing current good manufacturing practice (CGMP) regulations regarding the manufacturing, processing, packing, or holding of human food. We have updated, revised, and otherwise

clarified certain requirements within the CGMP regulations, which were last updated in 1986.

Third, this rule clarifies the scope of the exemption for “farms” in FDA’s current food facility registration regulations and makes corresponding revisions to FDA’s current regulations for the establishment, maintenance, and availability of records. These revisions affect who is subject to the existing regulations for registration and recordkeeping, as well as the new requirements for hazard analysis and risk-based preventive controls requirements established here.

This final rule is the result of significant stakeholder engagement, beginning before the proposed rule. In response to extensive stakeholder input on the proposed rule, we revised key provisions in a supplemental notice of proposed rulemaking. After the supplemental notice of proposed rulemaking, we conducted even more outreach to the stakeholder community to ensure that the risk-based, preventive requirements in this final rule are practical and protective of public health.

### Summary of the Major Provisions of the Rule

The final rule implements the requirements of FSMA for covered facilities to establish and implement a food safety system that includes a hazard analysis and risk-based preventive controls. Specifically, the rule establishes requirements for:

- A written food safety plan;
- Hazard analysis;
- Preventive controls;
- Monitoring;
- Corrective actions and corrections;
- Verification;
- Supply-chain program;
- Recall plan; and
- Associated records.

We have added flexibility and clarity to these provisions in response to comments. Although there are similarities between these requirements of FSMA and the requirements of food safety systems known as Hazard Analysis and Critical Control Point (HACCP) systems, not every provision in FSMA is identical to the provisions of HACCP systems, and we have revised much of our terminology to distinguish FSMA’s requirements for hazard analysis and risk-based preventive controls from HACCP requirements. A facility subject to the rule must conduct a hazard analysis to identify and evaluate known or reasonably foreseeable hazards for each type of food manufactured, processed, packed, or held at the facility to determine whether

there are any hazards requiring preventive controls. The first step of a hazard analysis is hazard identification, which must consider known or reasonably foreseeable hazards, including biological, chemical, and physical hazards. The hazard analysis must consider hazards that may be present in the food because they occur naturally, are unintentionally introduced, or are intentionally introduced for purposes of economic gain. We continue to believe that hazards that may be intentionally introduced for economic gain will need preventive controls in rare circumstances, usually in cases where there has been a pattern of economically motivated adulteration in the past. Economically motivated adulteration that affects product integrity or quality, for example, but not food safety, is out of the scope of this rule.

A facility subject to the rule must identify and implement preventive controls to provide assurances that any hazards requiring a preventive control will be significantly minimized or prevented and the food manufactured, processed, packed, or held by the facility will not be adulterated. The rule establishes preventive control management components (monitoring, corrective actions and corrections, and verification) as appropriate to ensure the effectiveness of the preventive controls. One way we have clarified the risk-based flexibility of these requirements is by clearly stating in the final rule that a facility must take into account the nature of the preventive control and the facility's food safety system when considering which activities are appropriate for that facility.

We have also added flexibility and made risk-based modifications for specific preventive control management components. For example, the final rule allows flexibility for the specific records required to document monitoring of refrigeration controls during storage of a food that requires time/temperature control for safety. These records can be either affirmative records demonstrating temperature is controlled or "exception records" demonstrating loss of temperature control. As another example, the rule includes tailored, less burdensome requirements for corrections. A correction is defined in this rule as an action to identify and correct a problem that occurred during the production of food, without other actions associated with a corrective action procedure (such as actions to reduce the likelihood that the problem will recur, evaluate all affected food for safety, and prevent affected food from entering commerce). The final rule

clarifies that corrections must be taken in a timely manner and must be recorded when appropriate, but they do not, for example, need to be included in a written plan or accompanied by a reanalysis of the written food safety plan.

As a third example, the final rule provides flexibility for which verification activities must occur. In general, a facility is required to conduct verification activities, as appropriate to the nature of the preventive control and its role in the facility's food safety system, including validation, verification of monitoring, verification of corrective actions, verification of implementation and effectiveness, and reanalysis. Validation is not required for all controls. For example, the rule specifies that validation is not required for certain types of preventive controls (*i.e.*, food allergen controls, sanitation controls, supply-chain controls, and the recall plan) and provides flexibility for the facility to not validate other preventive controls with a written justification based on factors such as the nature of the hazard, and the nature of the preventive control and its role in the facility's food safety system. Product testing and environmental monitoring are listed as possible verification activities, but, like other preventive control management components in general, they are only required as appropriate to the food, facility, the nature of the preventive control, and the preventive control's role in the facility's food safety system. In many cases, neither product testing nor environmental monitoring will be appropriate. For example, there would be little or no benefit to product testing or environmental monitoring in facilities that pack or hold produce raw agricultural commodities that are rarely consumed raw, such as potatoes.

A facility must reanalyze the food safety plan as a whole at least once every three years. The final rule provides the flexibility for a facility to only reanalyze the applicable portion of the food safety plan under certain other circumstances, such as when a facility becomes aware of new information about potential hazards associated with a food.

The final rule also adds flexibility to the preventive controls requirements and recognizes the reality of modern distribution chains by not requiring a manufacturing/processing facility to implement a preventive control in certain circumstances when the hazard requiring a preventive control will be controlled by another entity in the distribution chain. For example, if a facility's customer (or another entity in

the distribution chain) will control the hazard, then that facility can rely on its customer to provide written assurance that the identified hazard will be controlled by an entity in the distribution chain, with flexibility for how the customer provides that written assurance depending on whether the customer, or an entity subsequent to the customer, will control the hazard. We have identified four specific circumstances in which a manufacturing/processing facility can rely on another entity in the distribution chain to control a hazard, with practical solutions explained further in section XXVII. We also have provided flexibility for a facility to establish, document, and implement an alternative system that ensures adequate control, at a later distribution step, of the hazards in the food product distributed by a manufacturing/processing facility such that the facility would not need to implement a preventive control.

We revised the proposed provisions for a supplier program to add flexibility, recognizing that the receiving facility and the supplier may be separated by several entities in a supply chain. We are allowing entities such as distributors, brokers, and aggregators to determine, conduct, and document appropriate supplier verification activities as a service to the receiving facility, provided that the receiving facility reviews and assesses applicable documentation provided by the other entity and documents that review and assessment. However, because the approval of suppliers is ultimately the responsibility of the receiving facility, the rule specifies that only a receiving facility can approve suppliers. To improve clarity and readability we redesignated the proposed provisions into eight distinct sections of regulatory text in a newly established subpart G (Supply-Chain Program).

Each facility subject to the rule must have a recall plan for a food with a hazard requiring a preventive control.

Many activities required by the final rule must be conducted (or overseen) by a preventive controls qualified individual, a new term we are coining here. A preventive controls qualified individual is a qualified individual who has successfully completed certain training in the development and application of risk-based preventive controls or is otherwise qualified through job experience to develop and apply a food safety system.

The rule establishes several exemptions (including modified requirements in some cases) from the requirements for hazard analysis and risk-based preventive controls. All of

these exemptions are expressly authorized by FSMA. A facility that manufactures, processes, packs, or holds food and that is required to register with FDA would be required to comply with the requirements for hazard analysis and risk-based preventive controls unless it is covered by an exemption, as shown in the following table.

PROPOSED EXEMPTIONS FROM THE NEW REQUIREMENTS FOR HAZARD ANALYSIS AND RISK-BASED PREVENTIVE CONTROLS

Who or what is exempt from the requirements for hazard analysis and risk-based preventive controls	Notes
<p>“Qualified Facility” as defined by FSMA:</p> <ul style="list-style-type: none"> <li>• Business with average annual sales of &lt;\$500,000 and at least half the sales to consumers or local retailers or restaurants (within the same state or within 275 miles); or.</li> <li>• Very small business, which the rule defines as a business (including any subsidiaries and affiliates) averaging less than \$1,000,000, adjusted for inflation, per year, during the 3-year period preceding the applicable calendar year in sales of human food plus the market value of human food manufactured, processed, packed, or held without sale (e.g., held for a fee).</li> </ul> <p>• Low-risk, on-farm activities performed by small business (&lt;500 full-time equivalent employees).</p> <p>-or-</p> <p>• Low-risk, on-farm activities performed by a very small business (dollar threshold of \$1,000,000, as described previously).</p> <p>Activities that are subject to the seafood HACCP requirements of part 123 (21 CFR part 123).</p> <p>Activities that are subject to the juice HACCP requirements of part 120 (21 CFR part 120).</p> <p>Activities that are subject to the “low-acid canned food” requirements of part 113 (21 CFR part 113).</p> <p>The manufacturing, processing, packaging, or holding of a dietary supplement that is subject to the CGMP requirements of part 111 (21 CFR part 111).</p> <p>Activities of a facility that are subject to section 419 of the Federal Food, Drug, and Cosmetic Act (Standards for Produce Safety).</p> <p>Alcoholic beverages at a facility that is required to obtain a permit from, register with, or obtain approval of a notice or application from the Secretary of the Treasury as a condition of doing business in the United States.</p> <p>Facilities that are solely engaged in the storage of raw agricultural commodities (other than fruits and vegetables) intended for further distribution or processing.</p> <p>A facility solely engaged in the storage of packaged food that is not exposed to the environment.</p>	<p>Modified requirements apply—i.e., a qualified facility is required to:</p> <ul style="list-style-type: none"> <li>• Notify FDA about its status; and</li> <li>• Either: <ul style="list-style-type: none"> <li>○ Notify FDA that it is addressing hazards through preventive controls and monitoring; or</li> <li>○ Notify FDA that it complies with applicable non-Federal food safety regulations, and notify consumers of the name and complete business address of the facility where the food was manufactured or processed.</li> </ul> </li> <li>• The notification is in the form of an attestation, and must be submitted every two years, during the same timeframe as the facility is required to update its facility registration.</li> </ul> <p>Small and very small on-farm businesses conducting only the specified low-risk activities are exempt from the requirements for hazard analysis and risk-based preventive controls.</p> <p>We define the low-risk, on-farm activities that qualify for the exemption, including the specific foods to which they relate (such as making jams, jellies, and preserves from acid fruits, and making milled grain products such as cornmeal).</p> <p>The facility must be in compliance with part 123.</p> <p>The facility must be in compliance with part 120.</p> <ul style="list-style-type: none"> <li>• The exemption applies only with respect to microbiological hazards regulated under part 113.</li> <li>• The facility must be in compliance with part 113.</li> <li>• The facility must be in compliance with part 111.</li> <li>• The facility must be in compliance with requirements for serious adverse event reporting for dietary supplements.</li> </ul> <p>These activities will be established in FDA’s forthcoming rule for produce safety.</p> <p>The exemption also applies to food other than alcoholic beverages at such a facility, provided that the food is in prepackaged form and constitutes not more than 5 percent of the overall sales of the facility.</p> <p>A facility that stores raw agricultural commodities that are fruits and vegetables is not exempt.</p> <p>Modified requirements apply for the storage of unexposed packaged food that must be refrigerated for safety.</p>

The rule includes procedures for withdrawing a qualified facility exemption, in the event of an active investigation of a foodborne illness outbreak that is directly linked to the facility, or if FDA determines that it is necessary to protect the public health and prevent or mitigate a foodborne illness outbreak based on relevant conditions or conduct associated with the qualified facility. The final rule provides procedures for a facility to appeal an order to withdraw a qualified facility exemption, for a facility to request an informal hearing, for the conduct of an informal hearing, for an appeal, for revoking an order to withdraw a qualified facility exemption, and for reinstating an exemption that was withdrawn.

The rule finalizes recordkeeping provisions associated with the new provisions for hazard analysis and risk-based preventive controls. These records allow facilities to show, and FDA to determine, compliance with the new requirements. To meet these requirements, a facility may use existing records as appropriate.

In addition to finalizing new requirements for hazard analysis and risk-based preventive controls as required by FSMA, the rule does two more key things. First, it modernizes the existing CGMPs. Second, it revises the “farm” definition.

The rule makes several revisions to the CGMPs to update and clarify them. For example, the final CGMPs do not include nonbinding provisions, because

it is no longer FDA’s practice to include guidance in the regulatory text. The rule finalizes some of the previously nonbinding provisions in the CGMPs as binding requirements, including a requirement for education and training, but deletes other nonbinding provisions. We have revised some key terms for consistency and clarity. And we have clarified FDA’s long-standing position that the CGMPs address allergen cross-contact by making that explicit in the regulatory text. Finally, the rule revises a long-standing exemption from the CGMP requirements regarding specific activities conducted on raw agricultural commodities to reflect the contemporary regulatory framework associated with the “farm” definition. In addition, elsewhere in this issue of the **Federal**

**Register**, in a final rule that establishes requirements for hazard analysis and risk-based preventive controls for food for animals, FDA is establishing an additional revision to the human food CGMPs to address comments about the practice of human food manufacturers sending by-products to local farmers or animal food manufacturers for use as animal food. Because we proposed these requirements as part of the rulemaking for the animal preventive controls rule, we are finalizing these provisions in the final animal preventive controls rule rather than in this rule.

Finally, the rule clarifies the “farm” definition that is central to the determination of whether certain entities must register as a food facility and, thus, become subject to the new requirements for hazard analysis and risk-based preventive controls. The final “farm” definition reflects current farming practices, differentiates between two types of farm operations (*i.e.*, a “primary production farm” and a “secondary activities farm”), and allows for a consistent—although not identical—regulatory approach across similar operations, to the extent possible. In general, a “primary production farm” is an operation under one management in one general (but not necessarily contiguous) physical location devoted to the growing of

crops, the harvesting of crops, the raising of animals (including seafood), or any combination of these activities. A farm packs and holds raw agricultural commodities and may conduct certain manufacturing/processing activities (*i.e.*, drying/dehydrating raw agricultural commodities to create a distinct commodity (such as drying/dehydrating grapes to produce raisins), treatment to manipulate the ripening of raw agricultural commodities (such as by treating produce with ethylene gas), and packaging and labeling). The term farm also now includes a “secondary activities farm,” which is an operation, not located on a primary production farm, devoted to the key farming operations of harvesting, packing, and/or holding of raw agricultural commodities, provided that the primary production farm(s) that grow, harvest, and/or raise the majority of the raw agricultural commodities harvested, packed, and/or held by the secondary activities farm owns, or jointly owns, a majority interest in the secondary activities farm. A secondary activities farm may also conduct those additional activities allowed on a primary production farm.

**Costs and Benefits**

This final regulation requires domestic and foreign facilities to adopt a food safety plan, perform a hazard

analysis, and to institute preventive controls for the mitigation of those hazards. It also includes requirements for facilities to institute risk-based environmental monitoring, product testing, and a supply-chain program as appropriate to the food, the facility, and the nature of the preventive controls, as well as a requirement to institute controls to help prevent hazards associated with economically motivated adulteration. The total annualized domestic costs are estimated to be approximately \$381 million per year, estimated with a 3 percent discount rate, and \$382 million per year, estimated at 7 percent when discounted over 10 years. We estimate that processed foods covered by this rulemaking are responsible for approximately 903,000 foodborne illnesses each year, at a total cost to the American public of approximately \$2.2 billion. Our break-even analysis shows that for the rule to be cost effective, it would have to prevent \$382 million worth of foodborne illness; approximately 17 percent of the total annual illnesses, or approximately 157,000 illnesses when using a discount rate of 7 percent. For the rule to be cost effective using a discount rate of 3 percent, it would have to prevent \$381 million worth of foodborne illness (about 17 percent or 156,000 illnesses).

**COSTS AND HEALTH BENEFITS**  
[\$ millions]

PCHF Provision	One-time cost first yr compliance period	One-time cost second yr compliance period (small businesses <500 FTE's)	One-time cost third yr compliance period (very small businesses <\$1 million)	Annual cost (annually recurring costs)	Total annualized cost at 7%	Total Annualized cost at 3%

**I. Background**

*A. FDA Food Safety Modernization Act*

The FDA Food Safety Modernization Act (FSMA) (Pub. L. 111–353), signed into law by President Obama on January 4, 2011, is intended to allow FDA to better protect public health by helping to ensure the safety and security of the food supply. FSMA enables us to focus more on preventing food safety problems rather than relying primarily

on reacting to problems after they occur. The law also provides new enforcement authorities to help achieve higher rates of compliance with risk-based, prevention-oriented safety standards and to better respond to and contain problems when they do occur. In addition, the law contains important new tools to better ensure the safety of imported foods and encourages partnerships with State, local, tribal,

and territorial authorities. A top priority for FDA are those FSMA-required regulations that provide the framework for industry's implementation of preventive controls and enhance our ability to oversee their implementation for both domestic and imported food. To that end, we proposed the seven foundational rules listed in table 1 and requested comments on all aspects of these proposed rules.

TABLE 1—PUBLISHED FOUNDATIONAL RULES FOR IMPLEMENTATION OF FSMA

Foreign Supplier Verification Programs (FSVP) for Importers of Food for Humans and Animals.	2014 supplemental FSVP notice ...	79 FR 58574, September 29, 2014

As FDA finalizes these seven foundational rulemakings, we are putting in place a framework for food safety that is modern and brings to bear the most recent science on provisions to enhance food safety, that is risk-based and focuses effort where the hazards are reasonably likely to occur, and that is flexible and practical given our current knowledge of food safety practices. To achieve this, FDA has engaged in a great deal of outreach to the stakeholder community to find the right balance in these regulations of flexibility and accountability.

Since FSMA was enacted in 2011, we have been involved in approximately 600 engagements on FSMA and the proposed rules, including public meetings, webinars, listening sessions, farm tours, and extensive presentations and meetings with various stakeholder groups (Ref. 1) (Ref. 2). As a result of this stakeholder dialogue, FDA decided to issue the four supplemental notices of proposed rulemaking to share our current thinking on key issues and get additional stakeholder input on those issues. As we move forward into the next phase of FSMA implementation, we intend to continue this dialogue and collaboration with our stakeholders, through guidance, education, training, and assistance, to ensure that everyone understands and engages in their role in food safety. FDA believes these seven foundational final rules, when implemented, will fulfill the paradigm shift toward prevention that was envisioned in FSMA and be a major step

forward for food safety that will protect consumers into the future.

*B. Stages in the Rulemaking for the Human Preventive Controls Rule*

With regard to this rulemaking, we published proposed provisions in the 2013 proposed human preventive controls rule and we published new and re-proposed provisions in the 2014 supplemental human preventive controls notice. In the 2014 supplemental human preventive controls notice, we reopened the comment period only with respect to specific proposed provisions. In addition, we emphasized that the re-proposed provisions we included in the regulatory text were based on a preliminary review of the comments.

In this document, we use the broad term “proposed human preventive controls rule” to refer to the complete proposed regulatory text, including both the proposed provisions we published in the 2013 proposed human preventive controls rule and the new and re-proposed provisions we published in the 2014 supplemental human preventive controls notice. We use the narrow terms “2013 proposed human preventive controls rule” and “2014 supplemental human preventive controls notice” to refer to specific text published in the **Federal Register** of January 16, 2013 (78 FR 3646) and September 29, 2014 (79 FR 58524), respectively. We use the terms “final human preventive controls rule” and “this rule” to refer to the regulations we are establishing as a result of this rulemaking.

We issued a notice correcting several typographical and stylistic errors in the 2013 proposed human preventive controls rule and a mistake in the date of a reference (78 FR 17142, March 20, 2013). In that correction notice, we republished the Appendix in its entirety (78 FR 17142 at 17143 through 17155; the corrected Appendix) because all the references to the Appendix as published in the 2013 proposed human preventive controls rule (78 FR 3646 at 3812 through 3824) had been numbered incorrectly. We also extended the comment periods for the 2013 proposed human preventive controls rule, its information collection provisions, and a related risk assessment (see section I.D) in response to several requests that we do so.

*C. Summary of the Major Provisions of Proposed Human Preventive Controls Rule*

As part of our announced initiative (Ref. 3) to revisit the CGMP requirements since they were last revised in 1986, we proposed to amend our regulation for Current Good Manufacturing Practice In Manufacturing, Packing, or Holding Human Food (currently established in part 110 (21 CFR part 110)) to: (1) Modernize it; (2) adjust and clarify what activities fall within the long-standing exemption from the CGMP requirements for establishments engaged solely in the harvesting, storage, or distribution of one or more raw agricultural commodities (RACs) based on experience and changes in related areas

of the law since issuance of the CGMP regulation; (3) delete some non-binding provisions of current part 110; and (4) re-establish the provisions of current part 110 in new part 117 (21 CFR part 117). We also requested comment on: (1) Additional proposed revisions or clarifications to our CGMP regulations, including whether to further implement opportunities for CGMP modernization, such as on how best to revise the current provisions for training; and (2) whether to revise some non-binding provisions to establish new requirements in proposed part 117, or to simply retain them as useful provisions of a comprehensive CGMP.

As part of our implementation of new statutory provisions in FSMA, we also proposed to add, in newly established part 117, requirements for certain domestic and foreign facilities to establish and implement hazard analysis and risk-based preventive controls for human food. As directed by FSMA (see section 418 of the Federal Food, Drug, and Cosmetic Act (FD&C Act)), these new provisions would apply to domestic and foreign facilities that are required to register under section 415 of the FD&C Act and our regulation for Registration of Food Facilities (21 CFR part 1, subpart H; the section 415 registration regulations). As directed by FSMA (see sections 418(l) and (m) of the FD&C Act), we proposed to establish modified requirements for certain facilities. We requested comment on all aspects of the proposed requirements, including an opportunity for public comment on potential requirements for product testing, environmental monitoring, a supply-chain program, and hazards that may be intentionally introduced for purposes of economic gain.

As directed by section 103 of FSMA, we proposed to clarify the scope of the exemption from the section 415 registration regulations for “farms” by revising the “farm” definition and by adding or modifying the definitions for certain activities (*i.e.*, for “harvesting,” “holding,” “manufacturing/processing,” and “packing” activities) that govern, in part, whether a business that is devoted to the growing of crops, the raising of animals, or both is within the “farm” definition. We also proposed to add or revise these definitions in our current regulation (implementing section 414 of the FD&C Act) for Establishment and Maintenance of Records for Foods (21 CFR part 1, subpart J; the section 414 recordkeeping regulations), which also have an exemption for “farms.”

We proposed to establish the requirements for CGMPs, for hazard analysis and risk-based preventive

controls, and related requirements in new part 117 as shown in table 3:

TABLE 3—PROPOSED SUBPARTS IN NEW PART 117

Sub-part	Title
A .....	General Provisions.
B .....	Current Good Manufacturing Practice.
C .....	Hazard Analysis and Risk-Based Preventive Controls.
D .....	Modified Requirements.
E .....	Withdrawal of an Exemption Applicable to a Qualified Facility.
F .....	Requirements Applying to Records That Must Be Established and Maintained.

*D. Draft Risk Assessment*

We issued for public comment a “Draft Qualitative Risk Assessment: Risk of Activity/Food Combinations for Activities (Outside the Farm Definition) Conducted in a Facility Co-Located on a Farm” (the section 103(c)(1)(C) draft RA) (78 FR 3824, January 16, 2013). The purpose of the section 103(c)(1)(C) draft RA was to provide a science-based risk analysis of those activity/food combinations that would be considered low risk when conducted in a facility co-located on a farm. We used the tentative conclusions of the section 103(c)(1)(C) draft RA to propose to exempt food facilities that are small or very small businesses that are engaged only in specific types of on-farm manufacturing, processing, packing, or holding activities from the requirements for hazard analysis and risk-based preventive controls. We are including the final risk assessment (the section 103(c)(1)(C) RA) in the docket established for this document (Ref. 4).

*E. Definition of “Retail Food Establishment”*

An establishment that meets the definition of “retail food establishment” is exempt from the requirements of the section 415 registration regulations and, thus, from FSMA’s requirements for hazard analysis and risk-based preventive controls. Section 102(c) of FSMA requires that we revise the definition of “retail food establishment” in § 1.227 to clarify its intent. We are addressing the requirements of section 102(c) of FSMA in a separate rulemaking and issued a separate proposed rule to amend the definition of “retail food establishment” in the section 415 registration regulations and the section 414 recordkeeping regulations (80 FR 19160, April 9, 2015). We intend to issue a final rule to amend the definition of “retail food

establishment” in the section 415 registration regulations in the near future.

*F. Public Comments*

We received more than 8,000 public submissions on the 2013 proposed human preventive controls rule, and more than 1,300 public submissions on the 2014 preventive controls supplemental notice, each containing one or more comments. We received submissions from diverse members of the public, including food facilities (including facilities co-located on a farm); farms; cooperatives; coalitions; trade organizations; consulting firms; law firms; academia; public health organizations; public advocacy groups; consumers; consumer groups; Congress; Federal, State, local, and tribal Government Agencies; and other organizations. Some submissions included signatures and statements from multiple individuals. Comments address virtually every provision of the proposed human preventive controls rule. In the remainder of this document, we describe these comments, respond to them, and explain any revisions we made to the proposed human preventive controls rule.

Some comments address issues that are outside the scope of this rule. For example, some comments express concern over pesticides being used on local crops being harmful to the honeybee population. Other comments address the requirements of the proposed produce safety rule, such as standards for water quality. Other comments express concern about the use of bioengineered food ingredients, and ask that foods containing such ingredients be labeled so that consumers can identify such foods and choose whether to consume them. Other comments assert that the rules should address social issues. We do not discuss such comments in this document.

**II. Legal Authority**

The proposed rule contained an explanation of its legal basis under authorities in the FDA Food Safety Modernization Act, the FD&C Act, and the Public Health Service Act. After considering comments received in response to the 2013 proposed human preventive controls rule and 2014 supplemental human preventive controls notice, FDA made changes in the final rule. The legal authorities relied on for the final rule are the same as in the proposed rule unless otherwise described in the sections that follow.

### A. Changes to Current 21 CFR Part 1, Subparts H, I, and J

Sections 103(c)(2)(A) and (B) of FSMA require that the Secretary adopt final rules for purposes of section 415 of the FD&C Act (Registration of Food Facilities) with respect to “activities that constitute on-farm packing or holding of food that is not grown, raised, or consumed on such farm or another farm under the same ownership” and “activities that constitute on-farm manufacturing or processing of food that is not consumed on that farm or on another farm under common ownership.” In section IV, we discuss our revision of the section 415 registration regulations (21 CFR part 1, subpart H) to clarify the types of activities that are included as part of the definition of the term “facility” under section 415 of the FD&C Act and the scope of the exemption for “farms” provided by section 415 of the FD&C Act. The final rule also makes corresponding changes in part 1, subpart I (Prior Notice of Imported Food) and in part 1, subpart J (Establishment, Maintenance, and Availability of Records). FDA’s legal authority to modify these regulations is derived from section 103(c) of FSMA and sections 414, 415, 381(m) and 371(a) of the FD&C Act (21 U.S.C. 350c, 350d, 801(m), and 701(a)).

### B. Changes to Current 21 CFR Part 110

The changes to the current CGMP regulation finalized in this document clarify the existing requirements of the regulation and update existing requirements to reflect changes in the food industry and in scientific understanding of food safety since issuance of the current regulation. FDA’s legal authority to require Current Good Manufacturing Practices derives from sections 402(a)(3), (a)(4) and 701(a) of the FD&C Act (21 U.S.C. 342(a)(3), 342(a)(4), and 371(a)). Section 402(a)(3) of the FD&C Act provides that a food is adulterated if it consists in whole or in part of any filthy, putrid, or decomposed substance, or if it is otherwise unfit for food. Section 402(a)(4) of the FD&C Act provides that a food is adulterated if it has been prepared, packed, or held under insanitary conditions whereby it may have become contaminated with filth, or whereby it may have been rendered injurious to health. Under section 701(a) of the FD&C Act, FDA is authorized to issue regulations for the efficient enforcement of the FD&C Act. The revisions we are making to the current CGMP regulation are necessary to prevent food from containing filthy,

putrid, or decomposed substances, being otherwise unfit for food, or being prepared, packed, or held under insanitary conditions whereby it may have become contaminated with filth, or whereby it may have been rendered injurious to health.

In addition to the FD&C Act, FDA’s legal authority for the changes to current CGMP requirements derives from the PHS Act to the extent such measures are related to communicable disease. Authority under the PHS Act is derived from the provisions of sections 311, 361, and 368 (42 U.S.C. 243, 264, and 271) that relate to communicable disease. The PHS Act authorizes the Secretary to make and enforce such regulations as “are necessary to prevent the introduction, transmission, or spread of communicable diseases from foreign countries into the States \* \* \* or from one State \* \* \* into any other State” (section 361(a) of the PHS Act). (See sec. 1, Reorg. Plan No. 3 of 1966 at 42 U.S.C. 202 for transfer of authority from the Surgeon General to the Secretary.) The revisions we are making to the current CGMP regulation are necessary to prevent the spread of communicable disease.

### C. Hazard Analysis and Risk-Based Preventive Controls

Section 103 of FSMA, Hazard Analysis and Risk-Based Preventive Controls, amends the FD&C Act to create a new section 418, which mandates rulemaking. Section 418(n)(1)(A) of the FD&C Act requires that the Secretary issue regulations “to establish science-based minimum standards for conducting a hazard analysis, documenting hazards, implementing preventive controls, and documenting the implementation of the preventive controls. . . .” Section 418(n)(1)(B) of the FD&C Act requires that the regulations define the terms “small business” and “very small business,” taking into consideration the study of the food processing sector required by section 418(l)(5) of the FD&C Act. Further, section 103(e) of FSMA creates a new section 301(uu) in the FD&C Act (21 U.S.C. 331(uu)) to prohibit “[t]he operation of a facility that manufactures, processes, packs, or holds food for sale in the United States if the owner, operator, or agent in charge of such facility is not in compliance with section 418 [of the FD&C Act].”

In addition to rulemaking requirements, section 418 contains requirements applicable to the owner, operator, or agent in charge of a facility required to register under section 415. Section 418(a) is a general provision that requires the owner, operator, or

agent in charge of a facility to evaluate the hazards that could affect food manufactured, processed, packed, or held by the facility, identify and implement preventive controls, monitor the performance of those controls, and maintain records of the monitoring. Section 418(a) specifies that the purpose of the preventive controls is to “prevent the occurrence of such hazards and provide assurances that such food is not adulterated under section 402 [of the FD&C Act] or misbranded under section 403(w) [of the FD&C Act]. . . .” In addition to the general requirements in section 418(a) of the FD&C Act, sections 418(b)–(i) contain more specific requirements applicable to facilities. These include hazard analysis (section 418(b)), preventive controls (section 418(c)), monitoring (section 418(d)), corrective actions (section 418(e)), verification (section 418(f)), recordkeeping (section 418(g)), a written plan and documentation (section 418(h)), and reanalysis of hazards (section 418(i)).

Section 103(c)(2)(C) of FSMA requires that the Secretary adopt a final rule with respect to the requirements under sections 418 and 421 of the FD&C Act from which the Secretary may issue exemptions or modifications of the requirements for certain types of facilities. Sections 418(j)–(m) of the FD&C Act and sections 103(c)(1)(D) and (g) of FSMA provide authority for certain exemptions and modifications to the requirements of section 418 of the FD&C Act. These include provisions related to seafood and juice HACCP, and low-acid canned food (section 418(j)); activities of facilities subject to section 419 of the FD&C Act (Standards for Produce Safety) (section 418(k)); qualified facilities (section 418(l)); facilities that are solely engaged in the production of food for animals other than man, the storage of raw agricultural commodities (other than fruits and vegetables) intended for further distribution or processing, or the storage of packaged foods that are not exposed to the environment (section 418(m)); facilities engaged only in certain low-risk on-farm activities on certain foods conducted by small or very small businesses (section 103(c)(1)(D) of FSMA), and dietary supplements (section 103(g) of FSMA). In sections XI, XII, XXXVIII, and XXXIX, we discuss provisions that implement these exemptions and modified requirements.

In the 2014 supplemental human preventive controls notice, we included potential requirements for a supplier program, environmental monitoring, and product testing. We are including provisions for such activities in the final

rule. Section 418(o)(3) of the FD&C Act provides supplier verification activities and an environmental monitoring program as examples of preventive controls. Section 418(f)(4) of the FD&C Act provides for the use of environmental and product testing programs as part of required verification that the preventive controls are effectively and significantly minimizing or preventing the occurrence of identified hazards.

In certain circumstances, the final rule does not require a manufacturing/processing facility to implement a preventive control for a hazard requiring a preventive control. Instead, the facility is permitted to rely on a subsequent entity in the distribution chain to significantly minimize or prevent the hazard. In such a circumstance, a facility must disclose in documents accompanying the food, that the food is “not processed to control [identified hazard].” This requirement is supported by sections 418 and 701(a) of the FD&C Act (21 U.S.C. 350g and 371(a)). The requirement that facilities apply preventive controls to significantly minimize or prevent hazards is fundamental to the public health benefits of the rule. To accommodate the realities of modern food production, the rule allows a facility to rely on a subsequent entity in the distribution chain rather than requiring that facility to apply the control. A food may pass through multiple entities in the distribution chain before it reaches consumers. Further, ordinarily it is not apparent from visual examination of the food whether a hazard requiring a preventive control has been addressed. Consequently, without labeling, a facility might not know that a facility upstream in the supply chain has not applied a preventive control and is relying on a downstream entity to do so. Therefore, the agency concludes that information that food has not been processed to control an identified hazard is necessary for a facility to fulfil its obligation under section 418 when a facility is relying on a subsequent entity to control the hazard. The agency also concludes that such labeling is necessary for the efficient enforcement of the Act because the labelling is critical for FDA to hold facilities responsible for their obligations under this regulatory scheme. Further, when the hazard can cause a communicable disease, FDA concludes that the requirement is necessary to prevent the spread of communicable disease from one state into another state and relies on sections 311, 361, and 368 of the PHS Act.

FDA concludes that the provisions in subpart C and related requirements in subparts A, D, F, and G should be applicable to activities that are intrastate in character. Facilities are required to register under section 415 of the FD&C Act regardless of whether the food from the facility enters interstate commerce (§ 1.225(b)). The plain language of section 418 of the FD&C Act applies to facilities that are required to register under section 415 (section 418(o)(2) of the FD&C Act) and does not exclude a facility from the requirements because food from such a facility is not in interstate commerce. Further, the prohibited act provision associated with section 418 (section 301(uu) of the FD&C Act) does not require interstate commerce for a violation.

FDA also is issuing the provisions in subpart C and related requirements in Subparts A, D, F, and G, under sections 402(a)(3), 402(a)(4), 403(w), and 701(a) of the FD&C Act to the extent such requirements are necessary to prevent food from being held under insanitary conditions whereby it may become contaminated with filth or rendered injurious to health, or being unfit for food; and to the extent necessary to prevent food from being misbranded under section 403(w). FDA also is finalizing those provisions under sections 311, 361, and 368 of the PHS Act relating to communicable disease to the extent those provisions are necessary to prevent the interstate spread of communicable disease.

#### *D. Comments on Legal Authority*

(Comment 1) One comment asserts that FDA does not have authority to regulate intrastate commercial activities. Another comment asserts that FDA does not have authority to regulate farms that are selling wholly intrastate.

(Response 1) With regard to farms, this rule does not apply. With respect to farms that engage in activities outside the farm definition (*i.e.*, farm mixed-type facilities), this rule applies to the non-farm portion of the operation.

FDA disagrees with the comments regarding application of this rule to activities that are intrastate in character. Facilities are required to register under section 415 of the FD&C Act regardless of whether the food from the facility enters interstate commerce (§ 1.225(b)). The plain language of section 418 of the FD&C Act applies to facilities that are required to register under section 415 (section 418(o)(2) of the FD&C Act) and does not exclude a facility because food from such a facility is not in interstate commerce. Section 301(uu) of the FD&C Act (21 U.S.C. 331(uu)) provides that “the operation of a facility that

manufactures, processes, packs, or holds food for sale in the United States if the owner, operator, or agent in charge of such facility is not in compliance with section 418” is a prohibited act. Notably, other subsections in section 301 of the FD&C Act, and section 304 of the FD&C Act (21 U.S.C. 334) demonstrate that Congress has included a specific interstate commerce nexus in the provisions of the FD&C Act when that is its intent. Accordingly, it is reasonable to interpret sections 418 and 301(uu) of the FD&C Act as not limiting the application of the rule only to those facilities with a direct connection to interstate commerce.

FDA is mindful that its interpretation of FSMA and the FD&C Act should not cast doubt on their constitutionality. (See *Solid Waste Agency of Northern Cook County v. U.S.*, 531 U.S. 159 (2001)). FDA has considered the relevant provisions of FSMA and the FD&C Act, FDA’s responsibilities in implementing those laws, and the law interpreting the commerce clause of the Constitution (Article I, section 8). Congress’ power to legislate under the commerce clause is very broad. However, such power is not without limits, see *United States v. Lopez*, 514 U.S. 549, 567 (1995); *U.S. v. Morrison*, 529 U.S. 598, 618 (2000), and these limits have been construed in light of relevant and enduring precedents. In particular, in *Lopez*, *supra*, the Supreme Court acknowledged the continuing vitality of *Wickard v. Filburn*, 317 U.S. 111 (1942), noting that “although *Filburn*’s own contribution to the demand for wheat may have been trivial by itself, that was not ‘enough to remove him from the scope of Federal regulation where, as here, his contribution, taken together with that of many others similarly situated, is far from trivial.’” (514 U.S. at 556.) See also *Gonzales v. Raich*, 545 U.S. 1, 17–25 (2005). This principle applies to the application of sections 418 and 301(uu) of the FD&C Act, as added by section 104 of FSMA. Accordingly, given the collective impact on commerce of facilities that manufacture, process, pack, or hold food that is sold in intrastate commerce, FDA concludes that such facilities should be subject to the rule. FDA notes that to the extent these facilities are very small, they are subject to modified requirements under § 117.201. This outcome regarding intrastate commerce is consistent with section 709 of the FD&C Act (21 U.S.C. 379a), which states that in any action to enforce the act’s requirements respecting foods, drugs, devices, and cosmetics, any necessary connection

with interstate commerce is presumed. Likewise, this outcome is consistent with FSMA's risk-based, preventive approach to food safety because the risk presented by unsafe food can be significant, whether or not the food moves from one state to another.

### III. General Comments on the Proposed Rule

(Comment 2) Several comments ask us to develop guidance to accompany the rule, particularly with respect to the new requirements for hazard analysis and risk-based preventive controls. For example, comments ask us to provide guidance on topics such as hazard analysis, environmental monitoring, and validation. Some of these comments ask that drafts of the guidance first be made available for public comment.

Other comments emphasize the importance of education and outreach and ask us to provide support for ongoing education and outreach, including an active role in providing needed instructional examples and lessons learned from current investigations and foodborne outbreaks. Some comments ask us to convene a scientific workgroup that includes experts in food and laboratory science, public health, proficiency testing, quality control, and other areas on at least an annual basis to assess what pathogens should be addressed in a food safety plan.

Some comments ask that funding and information on funding for training be provided. Other comments assert that we must make available adequate resources to support outreach and technical assistance delivered by State regulatory agencies, as well as Cooperative Extension programs and non-governmental organizations that work directly with farmers and facilities.

(Response 2) We are developing several guidance documents, including general guidance on hazard analysis and preventive controls, as well as guidance on specific aspects such as environmental monitoring and food allergen control (Ref. 5). We also intend to develop guidance specific to a variety of food types based in part on technical information we obtained through a grant for this purpose, as well as on other topics, such as validation. We will develop and issue this guidance in accordance with our good guidance practices regulation, which establishes criteria for when we issue a guidance document as an initial draft, invite public comment, and prepare a final version of the guidance document that incorporates suggested changes, when appropriate (§ 10.115(g)) (21 CFR

10.115(g)). The public may submit comments on any guidance document at any time (§ 10.115(g)(5)).

We agree with comments that stress the importance of education and outreach. A central element of our strategy to gain industry compliance is to help make available to facilities subject to this rule the education and technical assistance they need to understand and implement the requirements (Ref. 6). Within the Agency we are establishing a Food Safety Technical Assistance Network and seeking funding to increase FDA staffing to provide a central source of information to support industry understanding and implementation of FSMA standards (Ref. 6). This will allow us to respond in a timely and consistent way to industry questions on preventive controls technical and compliance issues (Ref. 6).

We also are working in collaboration with the Food Safety Preventive Controls Alliance (FSPCA) to develop training materials and establish training and technical assistance programs (Ref. 5) and (Ref. 7). The Alliance includes members from FDA, State food protection agencies, the food industry, and academia. It is funded by a grant to the Illinois Institute of Technology's Institute for Food Safety and Health, a nationally-recognized leader in food safety. In addition to developing a standardized preventive controls training curriculum, the FSPCA is developing selected sections of model food safety plans for several food types that will provide needed instructional examples. Although we have provided funding to the FSPCA to develop a standardized preventive controls training curriculum, we are unable to fund training for individual groups who might need particular training materials.

We also are partnering with the National Institute of Food and Agriculture (NIFA) of the U.S. Department of Agriculture (USDA) to administer the FSMA-mandated National Food Safety Training, Education, Extension, Outreach, and Technical Assistance Program, a grant program to provide technical assistance for FSMA compliance to owners and operators of small and medium-size farms and small food processors (Ref. 8). Such efforts will help ensure widespread voluntary compliance by encouraging greater understanding and adoption of established food safety standards, guidance, and protocols.

At this time, we intend to rely on scientific publications and epidemiological findings to assess the potential that new pathogens, or more virulent pathogenic strains, have

emerged, and do not intend to convene annual workgroups to assess that data and information.

(Comment 3) Several comments ask us to classify specific on-farm activities as harvesting, packing, holding, or manufacturing/processing so that an operation that conducts these activities on a farm can determine whether conducting that specific activity is within, or outside, the "farm" definition. These comments emphasize that a farm operation needs to know when a specific activity that it conducts would be outside the "farm" definition for the purposes of the requirements to register as a food facility and, thus, require that the farm operation both register as a food facility and comply with the new requirements for hazard analysis and risk-based preventive controls. Some of these comments focus on activities that we have previously classified in more than one way (*e.g.*, "washing," which we have previously classified as both "harvesting" and "manufacturing/processing," depending on when the activity occurs) (See table 1 in the Appendix to the 2014 supplemental human preventive controls rule, 79 FR 58524 at 58571–58572.) Other comments ask us to periodically review our lists of harvesting, packing, holding, and manufacturing/processing activities to ensure that they reflect current practices. Some comments ask us to make a table of activities prominently available on our Internet site for easy access whenever the public seeks out information regarding the forthcoming produce safety rule and the human preventive controls rule.

(Response 3) We have added several examples of "harvesting," "packing," "holding," and "manufacturing/processing" to the regulatory text (see §§ 1.227, 1.328, and 117.3 and Response 27, Response 28, Response 29, Response 31, Response 37, Response 38 and Response 39). However, it is not practical to include every possible activity conducted by farm operations in the regulatory text. Attempting to include a more extensive set of examples in the regulatory text has the potential to signal—incorrectly—that any activity not specified in the regulatory text cannot be considered to be within the definition of that activity. In addition, we have not previously discussed our approach to classifying some of the activities mentioned in the comments, and we believe that we should provide an opportunity for public comment on a more extensive list of activities classified as "harvesting," "packing," "holding," or "manufacturing/processing."

To address these comments, in the near future we intend to issue a draft guidance with our current thinking on the classification of activities as “harvesting,” “packing,” “holding,” or “manufacturing/processing.” In accordance with our regulation on good guidance practices (§ 10.115(g)(1)), we will review any comments received and prepare the final version of the guidance document that incorporates suggested changes, when appropriate; publish a notice in the **Federal Register** announcing that the guidance document is available; and post the guidance document on the Internet and make it available in hard copy. Under our good guidance practices regulation (§ 10.115(g) and (h)), the public can comment on any guidance document at any time, and we will revise guidance documents in response to public comments when appropriate.

In addition, our previously issued “Guidance for Industry: Questions and Answers Regarding Food Facility Registration” (Ref. 9) is in its sixth edition, and we intend to update it in the near future to reflect the changes to the definitions of “farm,” “harvesting,” “packing,” “holding,” and “manufacturing/processing” that we are establishing in this rulemaking.

(Comment 4) Some comments ask us to prepare a table or flow chart of activities that make an operation a farm, a retail food establishment, or a facility because food businesses will need to be able to easily determine their regulatory classification to comply with the applicable regulations. Other comments ask us to amend the definition of “manufacturing/processing” to ensure that community supported agriculture (CSA) programs will not become subject to the requirements for hazard analysis and risk-based preventive controls. Other comments ask us to clarify how the revised definitions we are establishing in the section 415 registration regulations will affect entities classified as research and development entities, pilot plants, test kitchens, shared use storage facilities, co-packers, sales offices, corporate offices, private residences, and registered foreign facilities that only send samples to the United States. Some comments ask us to clarify how the revised definitions we are establishing in the section 415 registration regulations will affect a determination of whether an entity or program (such as a farmers’ market, roadside stand, CSA program, commissary kitchen, community and incubator kitchens) is a retail food establishment that is not required to register as a food facility in the human preventive controls rule

rather than through a separate rulemaking. One comment notes that its farm has a store and a café that use products from the farm, and it is not clear if the store and café will be under regulations while nearby restaurants and grocery stores are not. Some comments ask us to define farmers’ markets, CSA programs, roadside stands, and other direct-to-consumer programs as retail food establishments not subject to registration as part of the human preventive controls rulemaking rather than through a separate rulemaking.

(Response 4) Section 102(c) of FSMA requires that we revise the definition of “retail food establishment” in § 1.227 to clarify that, in determining the primary function of an establishment or a retail food establishment under the section 415 registration regulations, the sale of food products directly to consumers by such establishments includes the sale of such food products or food directly to consumers by such establishment at a roadside stand or farmers’ market where such stand or market is located other than where the food was manufactured or processed; the sale and distribution of such food through a CSA program; and the sale and distribution of such food at any other such direct sales platform as determined by the Secretary of HHS. As discussed in section I.E, we have begun the process of amending the definition of “retail food establishment” in a separate rulemaking conducted under section 102(c) of FSMA, and are continuing that separate rulemaking by issuing a separate final rule. We intend to issue a final rule to amend the definition of “retail food establishment” in the section 415 registration regulations in the near future. We also intend to update our previously issued “Guidance for Industry: Questions and Answers Regarding Food Facility Registration” (Ref. 9) to reflect any changes to a determination of whether an entity is a retail food establishment as a result of that rulemaking. In the meantime, commenters may find our existing guidance helpful in addressing their questions.

(Comment 5) Some comments ask us to explain how we will enforce the rule, particularly with respect to coordination with State and local authorities and with other Federal agencies. For example, some comments ask whether FDA or the States will pay for inspections, whereas other comments ask us to coordinate inspection of imports with USDA’s Food Safety and Inspection Service (FSIS) or ask us to combine our inspections with those of USDA where possible (such as when USDA conducts inspections for

adherence to organic standards). Some comments express concern about the time gap between the effective date of this rule and the time it will take to incorporate applicable provisions into State law.

(Response 5) We are working through the Partnership for Food Protection (PFP) (a group of dedicated professionals from Federal, State, local, tribal, and territorial governments with roles in protecting the food supply and public health) to develop and implement a national Integrated Food Safety System consistent with FSMA’s emphasis on establishing partnerships for achieving compliance (see section 209(b) of FSMA). For an example of our current thinking on establishing partnerships for achieving compliance, see the “best practices” document made available by PFP (Ref. 10). This “best practices” document provides information to FDA field and State programs on a variety of issues, including how to coordinate compliance activities. Our document entitled “Operational Strategy for Implementing FSMA” also recognizes the importance of developing operational partnerships with States and other government counterparts to optimize the effectiveness, efficiency, and consistency of FSMA implementation domestically (Ref. 11).

We are implementing a new inspection paradigm focused on whether firms are implementing systems that effectively prevent food contamination, requiring fundamentally different approaches to food safety inspection and compliance (Ref. 12). This new paradigm involves a major reorientation and retraining, for which we are seeking funding, of more than 2,000 FDA inspectors, compliance officers, and other staff involved in food safety activities, as well as thousands of State, local, and tribal inspectors (Ref. 12).

(Comment 6) Some comments ask us to specify that the human preventive controls rule does not apply to activities subject to the animal preventive controls rule.

(Response 6) The human preventive controls rule does not apply to activities subject to the animal preventive controls rule. The title of the rule (*i.e.*, Current Good Manufacturing Practice, Hazard Analysis, and Risk-Based Preventive Controls for Human Food) narrows its applicability to human food. Moreover, regulations directed to food for animals are established in subchapter E of 21 CFR (*i.e.*, Animal Drugs, Feeds, and Related Products, parts 500–599), whereas regulations directed to human food are established

in subchapter B of 21 CFR (*i.e.*, Food For Human Consumption, parts 100–199).

(Comment 7) Some comments ask us to look to existing industry information technology solutions where possible to lower the burden on industry for implementation. These comments also ask us to adopt a centralized information technology solution with robust functionality to facilitate tracking stakeholders' compliance with the rule.

(Response 7) The rule allows for use of any available information technology (*e.g.*, in the creation and retention of records) that will allow industry to comply with the rule, and we encourage the use of information technology to streamline compliance. The long-standing CGMP requirements allow for the use of automated systems (see § 117.40(d)). We are developing new electronic systems to track compliance. However, our internal procedures for tracking compliance are outside the scope of this rule.

(Comment 8) Some comments ask us to re-evaluate the proposed human preventive controls rule, compare it with existing programs, and identify a mechanism for integrating compliance verification with existing industry and governmental programs. These comments note that many handlers/processors use and understand voluntary food safety management systems such as HACCP and HACCP-based certification programs (*e.g.*, certification to Global Food Safety Initiative (GFSI) benchmark schemes) and ask us why we proposed to create a separate inspection framework for FSMA, without integrating that inspection framework with existing programs.

(Response 8) We decline this request. As previously discussed, we are establishing this rule as required by section 103 of FSMA (78 FR 3646 at 3657–3659 and 3668–3669). However, where compliance with this rule mirrors compliance with existing regulatory requirements, there is no need to duplicate existing records, which may be supplemented as necessary to include all of the required information. (See also Response 5 regarding implementation of a national Integrated Food Safety System.)

(Comment 9) Some comments ask us to make the various rules we are establishing to implement FSMA consistent with each other.

(Response 9) We have aligned the provisions of the various rules to the extent practicable. For example, we use the same definitions of “farm” and the same terms used in the definition of “farm” (*i.e.*, harvesting, packing, holding, and manufacturing/processing)

in this rule, the animal preventive controls rule, and the proposed produce safety rule. However, the statutory direction is not the same for all the rules, and this difference in statutory direction does lead to some differences between the rules. For example, section 418(l) of the FD&C Act (which relates to this rule) provides for modified requirements for facilities that are very small businesses in addition to facilities that satisfy criteria for sales to qualified end-users, but section 419(f) of the FD&C Act (which relates to the proposed produce safety rule) only provides for modified requirements for direct farm marketing.

Likewise, we have worked to align the provisions of this rule with the provisions of the FSVP rule. Again, however, there are statutory differences that lead to some differences between the rules. For example, section 805 of the FD&C Act (21 U.S.C. 348a) applies to an importer whereas section 418 of the FD&C Act applies to a facility that is required to register under section 415 of the FD&C Act.

(Comment 10) Some comments ask us to clarify how the requirements for hazard analysis and risk-based preventive controls will apply to an establishment that supplies raw materials and other ingredients to a registered facility.

(Response 10) The requirements for hazard analysis and risk-based preventive controls apply to facilities that are required to register under section 415 of the FD&C Act. If an establishment that supplies raw materials and other ingredients to a registered facility is itself a facility that is required to register under section 415 of the FD&C Act, that establishment is subject to the requirements for hazard analysis and risk-based preventive controls. If that establishment is not itself a facility that is required to register under section 415 of the FD&C Act, that establishment is not subject to the requirements for hazard analysis and risk-based preventive controls. However, such facilities may be subject to verification activities of manufacturers/processors that are required to verify controls implemented by their suppliers.

(Comment 11) Some comments express concern about the potential for unfair enforcement of the rule relating to business size. Some comments assert that we should strictly enforce the rule for big industry, but be lenient towards small farms.

(Response 11) We intend to enforce the rule in a fair and reasonable manner. We note that farms are not covered by this rule, and the rule contains special

provisions applicable to a farm mixed-type facility that is a small or very small business. Specifically, a small or very small business that is a farm mixed-type facility is exempt from the requirements for hazard analysis and risk-based preventive controls if the only activities that it conducts are the low-risk activity/food combinations listed in § 117.5(g) and (h). A very small business that is a farm mixed-type facility, but does not satisfy the criteria for the exemptions for only conducting low-risk activity/food combinations, is eligible for modified requirements as a qualified facility, and we will enforce the modified requirements, rather than the full requirements for hazard analysis and risk-based preventive controls, for such very small businesses.

(Comment 12) Some comments express concern that we will enforce the rule more strictly for domestic facilities than for foreign facilities—*e.g.*, because we lack the funds and manpower to enforce the rule for foreign facilities. Other comments assert that it is unprecedented for importing countries to regulate the production processes in exporting countries and that no scientific evidence supports such regulation. These comments express concern that this regulatory requirement will greatly increase trading costs and might constitute a barrier to trade for exporting countries.

(Response 12) We intend to enforce this rule in a consistent manner to ensure that imported and domestically produced foods are in full compliance with the requirements of this rule. We note that the forthcoming FSVP rule will require importers to help ensure that food imported into the United States is produced in compliance with processes and procedures, including reasonably appropriate risk-based preventive controls, that provide the same level of public health protection as those required under this rule. The implementation of these supplier verification programs by U.S. importers will thus provide assurances that imported food is in compliance with this regulation.

We disagree that we are seeking to “regulate the production processes in exporting countries” inappropriately. This rule provides for a flexible set of principles and a framework for hazard analysis and risk-based preventive controls to be applied to a given production process in order to ensure the production of safe food destined for the United States. Mandating that a finished food is manufactured under general methods applicable to all foods (*e.g.*, good manufacturing practices) is a widely accepted regulatory practice and

fundamentally different than mandating that food be produced in a certain way. We note that many countries have adopted food safety regulations that mandate certain principles and conditions be applied to food manufacturing. These include mandatory HACCP programs for seafood and other foods. For example, in a guidance document on food safety import requirements, the European Commission stated: “The EU rules on food hygiene confirm that all food businesses in third countries after primary production must put in place, implement and maintain a procedure based on the HACCP principles.” The mandate that preventive controls be applied to control hazards in the production of foods in this rule is similar to the European Union (EU) rules. Because the requirements being implemented by FDA under this regulation are flexible and not prescriptive, we do not agree that this regulation will significantly increase costs or impede trade.

We also disagree that there is no scientific evidence supporting this rule. In the 2013 proposed preventive controls rule, we provided an extensive background discussing the scientific evidence and international food safety standards upon which this rule is based (78 FR 3646 at 3659 through 3667, January 16, 2013). That discussion reviews a number of well documented food safety risks and how they can be controlled by modern food safety systems including the Codex HACCP principles contained in the HACCP Annex of the Codex General Principles of Food Hygiene (78 FR 3646 at 3667, January 16, 2013). In that discussion we stated: “The proposed rule would require that a food safety system similar to HACCP be implemented in food facilities and would harmonize our requirements with the recommendations and requirements of internationally recognized food safety experts/authorities, such as experts/authorities in [Codex Alimentarius], [Food Safety Authority Australia New Zealand], [Canadian Food Inspection Agency], and the European Union.” (78 FR 3646 at 3663, January 16, 2013) In addition, the Appendix to the 2013 proposed preventive controls rule provided additional scientific information on activities such as product testing and environmental monitoring to support their role in ensuring safe food and how these align with international standards such as those of Codex Alimentarius (78 FR 3646 at 3818–3820); republished in its entirety with corrected reference

numbers on March 20, 2013, 78 FR 17142 at 17149–17151).

(Comment 13) Some comments assert that the rule should be more concise, and that the average person without a team of experts should be able to understand the rule and manage the application of the rule.

(Response 13) We agree the rule needs to be understandable. We have incorporated plain language techniques—*e.g.*, by using active voice in the new requirements for hazard analysis and risk-based preventive controls. We also have established additional definitions that enable us to improve readability (*e.g.*, “qualified facility exemption,” “raw agricultural commodity,” “unexposed packaged food,” and “you.”) The comprehensive nature of the new requirements for hazard analysis and risk-based preventive controls reflects the extensive statutory provisions they implement and the broad range of activities and foods covered. We have used examples in the regulatory text, where relevant, and provided examples throughout the preamble to assist with understanding the requirements. Likewise, the long-standing CGMP requirements need to be comprehensive, because they are broadly directed to all stages of the production of food. We will be producing guidance documents that will be helpful in understanding the rule (see Response 2).

We will issue a Small Entity Compliance Guide (SECG) in accordance with section 212 of the Small Business Regulatory Enforcement Fairness Act (Pub. L. 104–121). A Small Entity Compliance Guide is a guidance that explains the actions a small or very small business must take to comply with a rule.

(Comment 14) Some comments ask whether we will translate the rule into foreign languages, such as Japanese.

(Response 14) We do not intend to translate the rule. As discussed in Response 13, to help small and very small businesses comply with a rule we issue a SECG. We are considering whether to translate the SECG and outreach and technical assistance materials into additional languages.

(Comment 15) Some comments assert that the rule incorrectly assumes that all bacteria are harmful.

(Response 15) We have long recognized that some bacteria have a role in food production, such as the lactic-acid producing bacteria that our regulations explicitly acknowledge as being added to yogurt (see, *e.g.*, the standards of identity for yogurt, low fat yogurt, and nonfat yogurt, in 21 CFR 131.200, 131.203, and 131.206,

respectively). The rule defines the terms “microorganism” and “pathogen,” and the definition of “microorganism” explains that the term “undesirable microorganism” includes those microorganisms that are pathogens, that subject food to decomposition, that indicate that food is contaminated with filth, or that otherwise may cause food to be adulterated. The CGMP provisions directed to either preventing the growth of undesirable microorganisms or preventing contamination with undesirable microorganisms are long-standing, and these comments do not provide any examples of how we have interpreted the CGMP requirements in the past in a way that does not recognize that some bacteria have a role in food production or that creates practical problems for the future. With regard to biological hazards, the new requirements for hazard analysis and risk-based preventive controls focus on pathogens.

(Comment 16) Some comments assert that the rule will disproportionately affect New England farmers because they are small and production costs are higher compared to elsewhere in the country and that the cost of the rule will have negative consequences on New England’s food supply. Other comments assert that the rule will force small farmers out of business, forcing us to rely on foreign suppliers who are under very little FDA oversight, and that FDA oversight should be reduced so that the public can continue supporting small, local farmers. Other comments express concern that excessive rules will discourage farmers from supplying the Farm to School market.

(Response 16) We believe that the “farm” definition that we are establishing in this rule greatly reduces the impact on farms of all size, because several operations that would have been required to register as a food facility under the section 415 registration regulations as established in 2003 (68 FR 58894, October 10, 2003) will no longer be required to do so. (See the discussion of the changes to the “farm” definition in section IV.B) In addition, a farm mixed-type facility that is a small or very small business, and that only conducts low-risk activity/food combinations for manufacturing, processing, packing, and holding foods that are not RACs, is exempt from the new requirements for hazard analysis and risk-based preventive controls. A farm mixed-type facility that does not satisfy these criteria for exemption, but is a very small business, is a qualified facility that is subject to modified requirements. All of these factors will reduce the burden on small farms.

(Comment 17) Some comments express concern about contamination of produce and other food in open containers by sulfuric hydrogen being discharged from lead acid batteries that are used to operate forklifts.

(Response 17) The long-standing CGMP provisions require that the food establishment must appropriately use equipment to avoid the adulteration of food with such contaminants (see § 117.40(a)(2)).

(Comment 18) Some comments assert that we do not address comments submitted by individuals.

(Response 18) We address comments on the provisions of the rule regardless of who submits the comments. However, we group similar comments together, and do not discuss the specific text of each submitted comment letter when the point being made by one comment letter can be included in a general discussion of several comment letters that express similar points of view.

(Comment 19) Some comments assert that we need specific standards and quantifiable guidelines for compressed air.

(Response 19) We agree that specific standards and quantifiable guidelines for material such as compressed air could be useful to food establishments that use such material in the production of food. However, we disagree that such standards and guidelines need to be included in the rule. The rule is intended to establish procedures for the safe manufacturing, processing, packing, and holding of food, and for hazard analysis and risk-based preventive controls in the production of food, rather than to set standards for specific levels of contaminants in specific raw materials and other ingredients. If a facility believes that its use of compressed air should be addressed in its food safety plan, then it should do so.

(Comment 20) Some comments ask us to address model laboratory standards and accreditation to ensure that laboratories are using sound and reliable test methods for detecting and identifying pathogens.

(Response 20) We decline this request. A separate section of FSMA addresses “Laboratory Accreditation For Analyses Of Foods” (see section 202 of FSMA). This rule focuses on section 103 of FSMA (section 418 of the FD&C Act).

#### **IV. Comments on Proposed Revisions to the Definitions in the Section 415 Registration Regulations (21 CFR Part 1, Subpart H) and the Section 414 Recordkeeping Regulations (21 CFR Part 1, Subpart J)**

##### *A. Definitions That Impact a Determination of Whether an Establishment Is a “Farm”*

We previously described section 103(c) of FSMA (78 FR 3646 at 3674). In brief, section 103(c) of FSMA directs us to conduct rulemaking to clarify the on-farm manufacturing, processing, packing, and holding activities that would trigger a requirement for a farm to register as a food facility and, thus, be subject to section 418 of the FD&C Act. We discussed the current legal and regulatory framework for farms under sections 415 and 418 of the FD&C Act, and explained how the status of a food as a RAC or a processed food affects the requirements applicable to a farm under sections 415 and 418 of the FD&C Act. We then articulated a comprehensive set of organizing principles that formed the basis for proposed revisions to the section 415 registration regulations. Because these definitions also are established in the section 414 recordkeeping regulations, these organizing principles also formed the basis for proposed revisions to definitions in the section 414 recordkeeping regulations.

Our previous description (78 FR 3646 at 3675–3676) of the current legal and regulatory framework that governs the determination of when an establishment is required to register as a food facility in accordance with the section 415 registration regulations focused on the framework that governs whether an establishment that grows and harvests crops or raises animals satisfies the definition of “farm,” because the facility registration requirements of section 415 of the FD&C Act do not apply to “farms.” Under that framework, a key factor in whether an establishment falls within the definition of “farm,” even with respect to crops it grows and harvests itself, is whether the activities conducted by the establishment fall within definitions of “harvesting,” “packing” or “holding” (which are within the “farm” definition). Another key factor is whether activities conducted by the establishment fall within the definition of manufacturing/processing (which have been outside the “farm” definition).

We previously described comments regarding proposed revisions to the definitions of “farm,” “harvesting,” “packing” and “holding,” as well as comments regarding the triggers for an

activity to be considered manufacturing/processing (79 FR 58524 at 58530–58538). In the 2014 supplemental human preventive controls notice, we proposed additional revisions to the definitions of “farm,” “harvesting,” “packing,” and “holding” to address these comments.

Even after the revisions we proposed in the 2014 supplemental human preventive controls notice, some comments assert that the overall “farm” definition still presents an unrealistic and incomplete understanding of how most farms in the United States are structured with regard to their physical location(s) and business models. Most of the comments suggest alternative or additional regulatory text (see, e.g., Comment 22, Comment 23, Comment 24, Comment 25, Comment 27, Comment 37, Comment 39, and Comment 50) or ask us to clarify how we will interpret the provisions (see, e.g., Comment 26, Comment 28, Comment 29, Comment 40, Comment 41, Comment 42, Comment 43, Comment 44, Comment 47, and Comment 48).

As discussed in section I.A, there are several FSMA-required regulations that provide the framework for industry’s implementation of preventive controls and enhance our ability to oversee their implementation for both domestic and imported food (see the seven foundational rules listed in table 1). Two of the proposed rules listed in table 1 (i.e., the 2013 proposed animal preventive controls rule and the 2013 proposed intentional adulteration rule) proposed to include a cross-reference to the “farm” definition in § 1.227, and a third proposed rule (i.e., the 2013 proposed produce safety rule) proposed to establish the same “farm” definition as would be in § 1.227. A fourth proposed rule (i.e., the 2013 proposed FSVP rule) did not propose to establish the “farm” definition (or a cross-reference to the “farm” definition in § 1.227), but under its proposed definition of “foreign supplier” some foreign suppliers would be farms—i.e., establishments that harvest food that is exported to the United States. As a result, we received comments relevant to the “farm” definition for all of these rules. The majority of the comments submitted to these other rulemakings addressed issues that were the same as, or similar to, the issues raised in the comments submitted to this rulemaking. One comment submitted to the proposed rulemaking for the forthcoming FSVP rule requested clarification regarding harvesting companies, and we are also providing

that clarification in this rulemaking. See Response 32.

We proposed to redesignate all definitions in § 1.227 in the section 415 registration regulations (*i.e.*, current § 1.227) to eliminate paragraph designations (such as (a) and (b)). We received no comments that disagreed with our proposed redesignations and are finalizing them as proposed.

We proposed several technical amendments and conforming changes to the section 415 registration regulations and to the section 414 recordkeeping regulations. No comments opposed the proposed technical amendments and conforming changes, except for

comments noting that our proposed technical amendment to § 1.361 was unnecessary because we had already made this change in a different rulemaking (see 77 FR 10662, February 23, 2012). We are finalizing these technical amendments and conforming changes without change.

In the following sections, we discuss comments that ask us to clarify the proposed requirements or that disagree with, or suggest one or more changes to, the proposed requirements. After considering these comments, we have revised the proposed definitions as shown in table 4, with editorial and conforming changes as shown in table

52. We also are establishing a new provision to allow off-farm establishments that package, pack, and hold RACs that are produce as will be defined in the produce safety rule to comply with the CGMPs in part 117, subpart B by complying with the applicable requirements for packing and holding that will be established in the final produce safety rule (see § 117.8 and Response 25). Because the new provision refers to provisions in a future produce safety rule, we will publish a document in the **Federal Register** announcing the effective date of § 117.8 once we finalize the produce safety rule.

TABLE 4—REVISIONS TO THE PROPOSED DEFINITIONS IN THE SECTION 415 REGISTRATION REGULATIONS AND THE SECTION 414 RECORDKEEPING REGULATIONS

Definition	Revision
Farm .....	<ul style="list-style-type: none"> <li>• A farm is an “operation” rather than an “establishment.”</li> </ul>
Primary production farm .....	<ul style="list-style-type: none"> <li>• There are two types of farms: (1) Primary production farm; and (2) secondary activities farm.</li> <li>• A primary production farm is “under one management” rather than “under one ownership.”</li> <li>• Although a primary production farm continues to be “in one general physical location,” we have clarified that “one general physical location” is “not necessarily contiguous.”</li> <li>• A primary production farm is an operation devoted to the growing of crops, the harvesting of crops, the raising of animals (including seafood), or any combination of these activities. Although some primary production farms both grow and harvest crops, other primary production farms grow crops but do not harvest them, and other primary production farms harvest crops but do not grow them.</li> <li>• Treatment to manipulate the ripening of RACs, and packaging and labeling the treated RACs, without additional manufacturing/processing, is within the “farm” definition.</li> <li>• We added an example of drying/dehydrating RACs to create a distinct commodity that would fall within the “farm” definition (<i>i.e.</i>, drying/dehydrating grapes to produce raisins), as well as an example of additional manufacturing/processing that would cause an operation that dries/dehydrates RACs to create a distinct commodity to fall outside the “farm” definition (<i>i.e.</i>, slicing).</li> <li>• We added an example of additional manufacturing/processing that can cause an operation that packages and labels RACs to fall outside the “farm” definition (<i>i.e.</i>, irradiation).</li> </ul>
Secondary activities farm .....	<ul style="list-style-type: none"> <li>• A “secondary activities farm” is an operation, not located on a primary production farm, devoted to harvesting (such as hulling or shelling), packing, and/or holding of RACs, provided that the primary production farm(s) that grows, harvests, and/or raises the majority of the RACs harvested, packed, and/or held by the secondary activities farm owns, or jointly owns, a majority interest in the secondary activities farm.</li> <li>• A secondary activities farm may also conduct those additional activities allowed on a primary production farm.</li> </ul>
Harvesting .....	<ul style="list-style-type: none"> <li>• We added additional examples of harvesting activities.</li> </ul>
Holding .....	<ul style="list-style-type: none"> <li>• We added additional examples of holding activities.</li> </ul>
Manufacturing/Processing .....	<ul style="list-style-type: none"> <li>• We added additional examples of manufacturing/processing activities.</li> </ul>

*B. Proposed Revisions to the Definition of Farm*

We proposed to revise the “farm” definition to: (1) Provide for on-farm packing and holding of RACs to remain within the farm definition regardless of ownership of the RACs; (2) include, within the “farm” definition, a description of packing activities that include packaging RACs grown or raised on a farm without additional manufacturing/processing; and (3) provide for drying/dehydrating RACs to create a distinct commodity (such as the on-farm drying of grapes to produce raisins), and packaging and labeling such commodities, without additional manufacturing/processing, to remain within the farm definition. We also

requested comment on whether we should retain, remove, or modify the phrase “in one general physical location” in the “farm” definition.

(Comment 21) Most of the comments support our proposed revision to provide for on-farm packing and holding of RACs to remain within the farm definition regardless of ownership of the RACs. However, some comments oppose this proposed revision. Some comments ask us to require that a farm that packs, packs and sells, commingles lots, and holds produce grown on a farm under different ownership comply with the requirements of this rule for hazard analysis and risk-based preventive controls for six reasons: (1) Commingling. Contamination from one farm could find its way to another farm,

leading to potential contamination of products from both farms, making it difficult to pinpoint the source of contamination in the event of a recall. (2) Recall Plan. It is critical for everyone in the produce supply chain to be “recall ready,” especially those packing, commingling lots, and selling produce grown on another farm under different ownership. (3) Traceability. It is important that produce be traceable from the specific farm where it was grown to the end-user, and from the end-user back to the farm where it was grown. (4) Exemptions. A covered farmer packing, packing and selling, commingling lots, or holding others’ produce might be doing so from a farm that is exempt from the produce safety rule. (5) Supplier program. Under the

human preventive controls rule a farmer would be required to have a valid supplier program. (We note that a farmer might be a supplier to a facility that is subject to the human preventive controls rule, and could be subject to the facility's supplier program, but would not itself be required to "have a valid supplier program.") With this requirement, receiving facilities could purchase in confidence knowing that if the farm did pack others' produce it was produced in accordance with the rules required by FSMA. (6) Conflict with the National Organic Program (NOP). Under the NOP, a grower that purchases produce from another farm under different ownership, packs produce from another farm, or mixes produce is no longer considered a crop producer and must seek certification as a handler—an operation that has additional requirements to approve suppliers, segregate product, and maintain records necessary to demonstrate compliance. Comments assert that this NOP requirement is logical and is a practice that FDA should take into consideration.

Other comments assert that allowing a farm to pack produce from another farm must account for the problem created by our proposal to exempt farm vehicles transporting RACs from the sanitary transportation rule. These comments argue that unless we revise that rule to prevent possible contamination during transport, we should develop guidance for farms packing produce that is transported from another farm, particularly where the commodity is high risk.

(Response 21) The final "farm" definition continues to provide for on-farm packing and holding of RACs to remain within the farm definition regardless of ownership of the RACs. We have acknowledged that doing so would have consequences such as those described in these comments, as well as other consequences (see 79 FR 58524 at 58532). Although comments pointed out consequences that we had already considered, they did not point to any other consequences. Therefore, we affirm our tentative conclusion that impacts such as these, while not always optimal, are necessary to establish a sensible framework of risk-based regulations that both implement FSMA and reflect common farm activities. We intend to issue the final produce safety rule in the near future and respond to comments related to traceability of produce, including whether to include a requirement that a farm supplying produce to another farm that will pack or hold that produce should provide to the farm that receives the produce its

name, complete business address, and description of the produce in any individual shipment, as well as respond to comments on whether it would be appropriate to also require the farm that receives the shipment maintain such record of information and, if so, for what specified period of time.

In the 2014 proposed sanitary transportation rule, we explained our reasons for tentatively concluding that the sanitary transportation practices that would be required by that proposed rule are not necessary to prevent RACs from becoming adulterated during transportation by farms (79 FR 7006 at 7016, February 5, 2014). For example, we explained that we are not aware of instances in which insanitary conditions (e.g., improper temperature control, improper equipment construction, inadequate equipment cleaning) with regard to transportation operations conducted by farms involving the transportation of RACs have contributed to foodborne illness, regardless of whether the farms are conducting transportation operations for their own RACs or for others' RACs. We will consider comments we receive on our proposal to exempt farm vehicles transporting RACs from the sanitary transportation rule when we issue a final sanitary transportation rule. We will consider necessary guidance in light of the final sanitary transportation rule, but we note that good transportation practices are already included in our 1998 guidance for industry entitled "Guide to Minimize Microbial Food Safety Hazards for Fresh Fruits and Vegetables" (Ref. 13).

(Comment 22) Some comments assert that farms are neither facilities nor establishments. These comments ask us to revise the "farm" definition to use a term more suited to the nature of farming.

(Response 22) We consider a farm to be a type of "establishment" but have nonetheless revised the "farm" definition to refer to an "operation" rather than an "establishment" as requested by these comments.

(Comment 23) Many comments address the role of "ownership" in the "farm" definition. Some of these comments emphasize that farming operations are complex, with complex business structures, and are often not held under sole ownership. Some comments describe the role of multiple business models (such as cooperatives, on-farm packinghouses under ownership by multiple growers, food aggregators, and food hubs) in modern farming and ask us to revise the "farm" definition to provide for such business models. Other comments emphasize

ownership of the land on which crops are grown or animals are raised, noting that some farms are operated by "tenant" farmers who do not own the land used in the farm's operations. Some comments ask us to replace the concept of ownership with the concept of a responsible party, such as a "farm operator" and to define a farm operator as "the person or entity that has operational control over the farm and benefits in whole or in part from the farm's normal operation. A farm operator may be an owner, a tenant, a partner, or an employee."

Some comments ask us to remove the phrase "under one ownership" to allow sugar makers who share equipment and sugarhouses to qualify as a farm. Other comments ask us to clarify how renting or leasing storage rooms or facilities would affect the definition of a farm.

(Response 23) We have revised the "farm" definition by replacing the phrase "under one ownership" with the phrase "under one management." Although the original phrase "under one ownership" was not referring to a single owner, we agree that the "farm" definition should reflect modern business models (such as cooperatives, on-farm packinghouses under ownership by multiple growers, food aggregators, and food hubs) and use language that the modern farming community understands. We decline the request to define and introduce a new term, such as "farm operator." The term "management" has a common meaning that captures the request of these comments and is suitable for the purposes of the farm definition.

(Management. The person or persons controlling and directing the affairs of a business, institution, etc.) (Ref. 14).

Under either the previous or the revised "farm" definition, leasing land to grow or store crops or raise animals does not impact whether an operation is within the "farm" definition. Under the previous definition, "ownership" focused on ownership of the business entity conducting farm operations, not ownership of the land. Leasing land is a business practice common to a variety of business types, not just farms. Likewise, leasing buildings to store RACs does not impact whether an operation is within the "farm" definition. See also Response 24 regarding comments on "one general physical location."

To the extent that sugar makers who share equipment and sugarhouses only conduct activities that are within the "farm" definition, the revision from "under one ownership" to "under one management" should clarify that those operations would be within the "farm"

definition. However, when sugar makers conduct operations outside the “farm” definition, they are facilities that are required to register under the section 415 registration regulations, not “farms” that are exempt from that registration requirement. A sugar maker that is a small or very small farm mixed-type facility that only conducts the low-risk activity/food combinations listed in the exemptions in § 117.5(g) and (h) (such as making syrup and sugar (e.g., making maple syrup from maple sap)) is exempt from the requirements of this rule. However, a farm mixed-type facility that is not a small or very small business as those terms are defined in this rule, or that conducts activities in addition to the low-risk activity/food combinations listed in the exemptions in § 117.5(g) and (h), is subject to the requirements for hazard analysis and risk-based preventive controls. Consistent with the discussion in Response 228, a farm mixed-type facility that must comply with the requirements for hazard analysis and risk-based preventive controls and makes sugar from sugarcane or sugar beets can consider the findings of the section 103(c)(1)(C) RA (i.e., that this is a low-risk activity/food combination) in determining whether there are any hazards requiring a preventive control. A facility that appropriately determines through its hazard analysis that there are no hazards requiring preventive controls would document that determination in its written hazard analysis but would not need to establish preventive controls and associated management components. For additional information about the section 103(c)(1)(C) RA and the exemptions for on-farm low-risk activity/food combinations for farm mixed-type facilities that are small or very small businesses, see sections VI and XI.G.

(Comment 24) Many comments address the role of “one general physical location” in the “farm” definition and ask us to revise the “farm” definition to acknowledge that farms may be composed of multiple parcels, buildings, or structures that may or may not be contiguous. Some comments point out that there are many farming operations that may fall under the same management and ownership, but are separated by either a strip of land, body of water, or another structure, particularly with respect to sites designated for packing and holding operations. Some comments assert that as long as an economic unit is operating a farm it should be irrelevant where the land is located, and state that this interpretation is consistent with a USDA

definition of a “farm operator.” Some comments note that sugar makers rely on sap from existing stands of trees that are often not concentrated in a single area or even nearby the sugarhouse where the maple products are made. Some comments suggest that the term “reasonable distance” could be used to better define “general physical location.” Some comments ask us to issue guidance that will clarify and further designate the boundaries of “one general physical location.”

Some comments note that the “farm” definition we proposed in the 2014 supplemental human preventive controls notice correctly considers a farm operation to remain within the “farm” definition even if it packs and holds produce from another farm. However, these comments state that it is confusing that if the same two farms pack and hold produce together at an off-farm location, using the exact same practices, that packing location is considered a “facility” even though there is no difference in risk. Other comments state that both in-line and off-line egg production facilities should be considered farms. According to these comments, off-line egg production facilities receive eggs laid by hens at nearby farms, whereas in-line egg production facilities receive eggs laid by hens in henhouses adjacent to the plant and located on the same property.

Some comments ask us to retain “one general physical location” in the “farm” definition because the word “farm,” and USDA’s definition of “farm,” are “place-based.” Other comments assert that if we delete the phrase “in one general physical location” then a fully integrated operation could be a single farm even though it was made up of numerous distinct farms possibly in several different states. Other comments ask us to retain “one general physical location” in the “farm” definition because different locations may have different food safety risks, different water sources, different personnel, and even different types of crops. Some comments assert that considering each unique and individually State-permitted dairy farm to be an individual “farm” regardless of common ownership or geographic proximity will prevent conflict and interference with the permitting and inspection activities of the Grade “A” program while maintaining food safety. Other comments state that regardless of whether we retain “one general physical location” in the “farm” definition, we must interpret the term “farm” to cover a very limited geographic area and that separate locations that are not in close

proximity to each other should not be considered the same “farm.”

(Response 24) We have revised the “farm” definition to specify that a farm is “in one general (but not necessarily contiguous) physical location.” We have concluded that adding “not necessarily contiguous” makes it clear that farming operations that are under one management but have some physical separation (e.g., with respect to the location of packing operations) can remain within the “farm” definition and that both in-line and off-line egg production facilities would be considered “farms.”

We agree that separate locations that are not in close proximity to each other should not be considered the same “farm.” As the comments point out, there already is a framework of State inspections for farms such as dairy farms, and we will need to work with our State regulatory partners to identify farms covered by the produce safety rule. However, even without the new phrase “not necessarily contiguous,” some situations would be complex. We intend to address these types of situations with our State food safety partners. (See Response 5.)

We do not see that adding “not necessarily contiguous” creates a “farm” definition that is not “place-based,” as was asserted by some comments, because the definition continues to specify “in one general physical location.” We also do not see that adding “not necessarily contiguous” presents any food safety concerns, as asserted by comments noting that different locations may have different food safety risks, different water sources, different personnel, and different types of crops. For example, a farm that will be covered by the forthcoming produce safety rule will be subject to standards for all of its water sources, all of its personnel, and all food subject to that rule. Likewise, we also do not believe that adding “not necessarily contiguous” affects a determination of whether a fully integrated operation could be a single farm.

(Comment 25) Some comments ask us to consider revising the regulatory text to ensure that similar activities would be treated the same way under either the produce safety rule or the human preventive controls rule and be held to the same risk-based requirements. These comments point out some of the differences between the requirements that would be established under the proposed human preventive controls rule and the requirements that would be established under the proposed produce safety rule. For example, comments state that the proposed human

preventive controls rule, but not the proposed produce safety rule, would require off-farm packinghouses and off-farm cooling and storage facilities to have a written hazard analysis; written preventive controls; written procedures for monitoring and corrective actions; validation of process controls; a written recall plan; environmental monitoring and product testing requirements; and a written supplier program. As another example, comments state that off-farm packing and holding operations would be required to comply with the human preventive controls rule one year earlier than we proposed that similar sized on-farm packing and holding operations would be required to comply with the forthcoming produce safety rule.

Some comments recommend options to achieve the goal of regulating on-farm and off-farm packinghouses the same way. These options include adding an exclusion to the “farm” definition in the produce safety rule; adding provisions to the human preventive controls rule to enable off-farm packinghouses to meet their obligation by complying with specified, applicable subparts of the produce safety rule; shortening the “farm” definition to simply state “Farm means an establishment under one ownership devoted to the growing and/or harvesting of crops, the raising of animals (including seafood), or any or all of these activities;” addressing off-farm establishments engaged solely in “low-risk” farming and harvesting activities by adding low-risk activities such as hulling, shelling, and drying of tree nuts; expanding the scope of the produce safety rule to include registered facilities; and allowing modified requirements in the human preventive controls rule to allow off-farm packinghouses to be subject to requirements (and exemptions) of the produce safety rule within the framework of the human preventive controls rule.

Some comments emphasize that farm activities are farm activities, regardless of where they happen. Some comments assert that establishments that are engaged solely in traditional harvesting, holding, or packing activities associated with a RAC that will be covered by the produce safety rule should be subject to the produce safety rule, rather than the human preventive controls rule, regardless of physical location, ownership, or legal ties to an operation devoted to the growing and harvesting of produce. Some comments assert that an off-farm operation that packs and holds RACs could be regulated in an identical fashion to an on-farm operation that packs and holds RACs without changing the section 415

requirement for registration by making them subject to the requirements of the produce safety rule for compliance purposes. Some comments ask us to provide an exemption from, or waiver for, the requirements of the human preventive controls rule if a business entity provides documentation that the entity is following the standards of the produce safety rule even though it is not on a farm. Other comments ask us to clarify that a farm can pack or hold RACs that have already undergone packing or holding activities by another farm.

Some comments ask to revise the “farm” definition to include establishments solely engaged in “packing” and “holding” activities performed on RACs, regardless of whether the establishment grows crops. Other comments emphasize that any revisions to the “farm” definition must allow genuine farm operators to carry out harvesting, packing, and holding without opening loopholes for packing and processing businesses. Some comments ask us to revise the “farm” definition to provide for a multi-ownership operation provided that all of the partial owners are themselves farmers.

Some comments ask us to provide that off-farm packing and holding operations that do not change the status of a RAC into a processed food should be able to comply with either the produce safety rule or with the CGMPs in subpart B of the human preventive controls rule. According to these comments, we could simply apply the same logic that we applied when providing that the packing and holding of RACs that have been dried/dehydrated to create a distinct commodity that is a processed food (*i.e.*, no longer a RAC) may achieve compliance with the CGMP requirements by complying either with subpart B of the human preventive controls rule or by complying with the applicable requirements for packing and holding produce RACs in the produce safety rule (see § 117.5(k)(2)).

(Response 25) We have revised the “farm” definition to provide for two types of farms: (1) A primary production farm and (2) a secondary activities farm (see § 117.3). We use the term “primary production farm” to refer to the “farm” definition as proposed, with the revisions described in this final rule. We use the term “secondary activities farm” to mean an operation, not located on a primary production farm, devoted to harvesting (such as hulling or shelling), packing, and/or holding of RACs, provided that the primary production farm(s) that grows, harvests, and/or

raises the majority of the RACs harvested, packed, and/or held by the secondary activities farm owns, or jointly owns, a majority interest in the secondary activities farm. A secondary activities farm may also conduct those additional activities allowed on a primary production farm. With the added definition of “secondary activities farm,” off-farm packinghouses that are managed by a business entity (such as a cooperative) that is different from the business entity growing crops (such as individual farms) can be within the “farm” definition. We are making these changes to reflect the current reality of what it means to be a farm. The changes will allow farms that use certain business models to harvest, pack, and/or hold produce to be able to comply with the produce safety rule for all of their operations. We believe that this flexibility allows for the requirements of the produce safety rule to apply to a wider array of activities than our original proposal without opening the “farm” definition to operations that have no connection to the growing of crops or the raising of animals—the core activities of a farm. By specifying that the farms that grow or raise the majority of the RACs harvested, packed, and/or held by the operation must own, or jointly own, a majority interest in the secondary activities farm, the revised “farm” definition does, as requested by comments, allow “farms” to carry out harvesting, packing, and holding activities in the same way as the produce safety rule.

We are, as requested by some comments, establishing a new provision to allow off-farm establishments that package, pack, and hold RACs that are produce as will be defined in the produce safety rule to comply with the CGMPs in part 117, subpart B by complying with the applicable requirements for packing and holding that will be established in the final produce safety rule (see § 117.8). Because the new provision refers to provisions in a future produce safety rule, we will publish a document in the **Federal Register** announcing the effective date of that provision once we finalize the produce safety rule.

However, the revised “farm” definition does not, as requested by some comments, establish the exact same regulatory framework for operations, such as certain packinghouses and hulling/shelling operations, that are within the “farm” definition as for operations that conduct similar activities but are outside the “farm” definition by allowing off-farm operations to be subject to the produce

safety rule rather than the requirements for hazard analysis and risk-based preventive controls. We disagree that the statutory framework provides flexibility for entities such as packinghouses and hulling/shelling operations that do not have a connection to a farm to be subject to the requirements of the produce safety rule for compliance purposes. (See the discussion at 79 FR 58524 at 58536.) We continue to believe that an off-farm packinghouse that is subject to this rule will be able to draw from the provisions of the produce safety rule in developing its food safety plan and establishing preventive control management components that are appropriate in light of the nature of the preventive controls and their role in the facility's food safety system. For example, as previously discussed (79 FR 58524 at 58536) we expect that the food safety plan for an off-farm packinghouse would focus on a few key preventive controls, including some that would have counterparts in the proposed produce safety rule, such as maintaining and monitoring the temperature of water used during packing (which would have counterparts under proposed § 112.46(c) in the proposed produce safety rule). We also expect that an off-farm packinghouse would establish sanitation controls to address the cleanliness of food-contact surfaces (including food-contact surfaces of utensils and equipment) and the prevention of cross-contamination from insanitary objects and from personnel to food, food-packaging material, and other food-contact surfaces. On-farm packinghouses would be subject to similar, but not identical, requirements (see *e.g.*, proposed § 112.111(b) for cleanliness of food-contact surfaces and proposed § 112.113 for protection against contamination).

We acknowledge that some of the provisions of the human preventive controls rule have no explicit counterparts in the proposed produce safety rule (*e.g.*, the requirements for product testing and environmental monitoring as verification activities). As discussed in Response 525, we do not expect either product testing or environmental monitoring to be common in facilities that process, pack, or hold produce RACs.

Finally, in response to comments that ask for a clarification that a farm can pack or hold RACs that have already undergone packing or holding activities by another farm, we presume that the commenter was asking about a case where the farm that did the previous packing and holding activities was not the farm on which the RACs were grown

and harvested. The definition of "farm" allows packing and holding of one's own RACs and other's RACs, even if they have been previously packed or held by another farm that was not the farm on which the RACs were grown and harvested.

(Comment 26) Some comments ask us to clarify whether the "and" between provisions that allow a farm to dry/dehydrate RACs to create a distinct commodity, and provisions that allow a farm to package and label RACs, means that an operation must do both of these activities to remain within the farm definition. These comments state that they do not think this is the intended (or logical) outcome, which is to provide that farms can do either or both activities and still be within the farm definition and ask us to consider editorial changes (such as replacing "and" with "or," or adding a new paragraph that would encompass both activities).

(Response 26) The rule does not require a farm to do both activities (*i.e.*, drying/dehydrating RACs to create a distinct commodity, and packaging and labeling RACs) to remain within the farm definition.

(Comment 27) Some comments ask us to add artificial ripening of RACs as an activity that is within the farm definition. Some comments assert that artificial ripening of RACs is not manufacturing/processing because artificial ripening does not transform a RAC into a processed food.

(Response 27) We have revised the "farm" definition to specify that treatment to manipulate the ripening of RACs (such as by treating produce with ethylene gas), and packaging and labeling the treated RACs, without additional manufacturing/processing, are within the "farm" definition. We agree that a treatment such as artificial ripening does not transform a RAC into a processed food but disagree that such a treatment is not manufacturing/processing. To make that clearer, we have added "treating to manipulate ripening" to the list of examples of manufacturing/processing in the definition of that term. As discussed during the rulemaking to establish the section 415 registration regulations, artificial ripening constitutes manufacturing/processing because it involves treating, modifying, or manipulating food (68 FR 58894 at 58912, October 10, 2003). See also our previous statements about artificial ripening in this rulemaking (78 FR 3646 at 3683 and 79 FR 58524 at 58572).

As previously discussed, the activities that transform a RAC into a processed food (and are sometimes therefore

referred to as "processing" in the context of a food's status as a RAC or processed food) are not coextensive with the activities described in our definition of "manufacturing/processing" (78 FR 3646 at 3679). When we first established the section 415 registration regulations, a key criterion in determining whether a business entity was a "farm" or a "facility" was whether the operation conducted activities classified as "manufacturing/processing." Indeed, in the 2013 proposed preventive controls rule we continued to rely on that key criterion in proposing revisions to the "farm" definition. However, as already discussed, some changes to the "farm" definition are necessary to establish a sensible framework of risk-based regulations that both implement FSMA and reflect common farm activities (see Response 21). One of these changes is to specify those manufacturing/processing activities that are within the "farm" definition, rather than attempt to reclassify an activity that arguably is manufacturing/processing as harvesting, packing, or holding in order to provide for the activity to remain within the "farm" definition.

(Comment 28) Some comments disagree that we should provide for drying/dehydrating RACs to create a distinct commodity to be within the "farm" definition because this activity is a manufacturing/processing activity and should be subject to the requirements for hazard analysis and risk-based preventive controls. Other comments agree that we should provide for this activity but assert that "drying/dehydrating RACs to create a distinct commodity" is confusing to the average reader and ask us to add examples of what this means. Some comments ask us to clarify whether this activity applies to specific situations, such as drying/baling of hops (because hops are a low-risk product and beer brewing should eliminate any pathogens on the hops), drying plums to create prunes, and concentrating maple sap into maple syrup, cream, and candy. Some comments assert that maple syrup should be considered a RAC because the process of producing maple syrup mirrors the regulatory text "drying/dehydrating RACs to create a distinct commodity," because maple syrup can only be produced through the concentration of maple sap and the process of that concentration is akin to the harvesting of other raw products. Other comments assert that the processing of sap is more appropriately viewed as a harvesting activity (rather than food manufacturing).

Other comments ask us to clarify the specific methods of drying/dehydrating that we would consider to be within the “farm” definition—*e.g.*, whether drying/dehydrating is constrained to in situ, with no heat or mechanical air circulation, because the example we discussed in the 2014 supplemental preventive controls notice was “natural condition raisins.” These comments ask us to specify the allowable methods of drying to avoid confusion, and assert that there is no food safety reason to exclude use of heat or air, especially if sun and light are to be permitted. Other comments ask us to clarify what we mean by “without additional manufacturing/processing.”

(Response 28) We are retaining drying/dehydrating RACs to create a distinct commodity as an activity that is within the “farm” definition even though it is manufacturing/processing. As previously discussed, the processes (described in comments to the 2013 proposed human preventive controls rule) for drying grapes to “natural condition raisins” are akin to other harvesting activities traditionally conducted by farms on RACs grown and harvested on farms, because they are traditionally performed by farms for the purpose of removing RACs from the place they were grown or raised and preparing them for use as food (79 FR 58524 at 58533). As also previously discussed, the information provided by the comments to the 2013 proposed human preventive controls rule included information that “natural condition raisins” are produced with either sun-drying or artificial dehydration (79 FR 58524 at 58533). We did not intend to limit the processes for drying/dehydrating RACs to sun-drying, and the regulatory text includes no such limitation. We decline the request to specify specific methods of drying/dehydrating that would remain within the “farm” definition because doing so could imply that the list of methods was exhaustive and preclude use of new technology in the future.

However, we are adding “boiling” and “evaporating” to the list of activities that we classify as manufacturing/processing to preclude interpretations, such as those expressed in some of these comments, that the processes to produce products such as maple syrup, maple cream, and maple candy are “drying/dehydrating.” In the 2013 proposed human preventive controls rule we included “Boiling/evaporation of maple sap to make maple syrup” as a low-risk manufacturing/processing activity/food combination in the exemption for small and very small businesses that only conduct specified

on-farm low-risk activity/food combinations (proposed § 117.5(h)), and we have retained—and broadened—that activity/food combination as an on-farm, low-risk manufacturing/processing activity/food combination in the final human preventive controls rule (see § 117.5(h), which includes making sugar and syrup from fruits and vegetables (*e.g.*, dates), grains (*e.g.*, rice, sorghum), other grain products (*e.g.*, malted grains such as barley), saps (*e.g.*, agave, birch, maple, palm), sugar beets, and sugarcane). Processes such as “boiling,” “concentrating,” and “evaporating” are not “drying/dehydrating” as the term “drying/dehydrating” is used in this rule, and maple syrup is a processed food, not a RAC. See also the discussion in Response 23 regarding how a farm mixed-type facility that makes sugar from sugarcane or sugar beets can consider the findings of the section 103(c)(1)(C) RA (*i.e.*, that this is a low-risk activity/food combination) in determining whether there are any hazards requiring a preventive control. A farm mixed-type facility that makes maple products from maple sap could follow the same approach.

We have added “slicing” to the regulatory text as an example of additional manufacturing/processing that would be outside the “farm” definition. We also have added “drying/dehydrating grapes to produce raisins” to the regulatory text as an example of what we mean by “drying/dehydrating RACs to create a distinct commodity.” Drying plums to produce prunes is another example of drying/dehydrating RACs to create a distinct commodity. Drying/baling hops is within the “farm” definition, but as a “holding” activity because drying/baling hops does not create a distinct commodity. As discussed in Response 39, we have revised the definition of “holding” to add drying/dehydrating RACs when the drying/dehydrating does not create a distinct commodity (such as drying/dehydrating hay or alfalfa) as an example of a holding activity.

(Comment 29) Some comments agree that the activities of packaging and labeling RACs should remain within the “farm” definition but ask us to reclassify these activities so that they are not considered manufacturing/processing because they do not transform a RAC into a processed food or change the nature of the RAC. These comments ask us to add examples to regulatory text to explain what we mean by “packaging and labeling without additional manufacturing/processing.” As an example, these comments ask whether a farm that packs produce

grown by another farm, and washes the produce before packing it, would be conducting “additional manufacturing/processing.”

Other comments ask us to clarify whether packaged RACs are processed food because “packaging” is defined as a manufacturing/processing operation. These comments also ask us to clarify whether a farm would be precluded from holding RACs packaged in retail form because the packaged RACs are processed food.

(Response 29) See Response 27. We decline the request to reclassify packaging and labeling so that they would not be considered manufacturing/processing. Although we classify packaging and labeling as manufacturing/processing, packaging and labeling RACs do not transform the RACs into processed food, and we classify “packaged RACs” as RACs.

We classify washing RACs as a harvesting or packing activity when done on RACs before or during packing or packaging, regardless of whether a farm is packing or packaging its own RACs or others’ RACs. As requested by the comments, we have added an example of additional manufacturing/processing that would not be within the “farm” definition—*i.e.*, irradiating—to both the “farm definition” and to the definition of “manufacturing/processing.” This example is different from the example we used in the preamble of the 2014 supplemental human preventive controls notice to describe a limitation on activities within the “farm definition”—*i.e.*, “modified atmosphere packaging” (see 79 FR 58524 at 58532). We have decided to not restrict the specific types of packaging procedures that are within the “farm” definition because doing so could be confusing. Moreover, the specific safety concern that can be associated with modified atmosphere packaging (*i.e.*, the production of *Clostridium botulinum* toxin), would be addressed by a proposed provision in the forthcoming produce safety rule, if that provision is finalized (see proposed § 112.115; 78 FR 3504 at 3589 and 3638). To clarify that “modified atmosphere packaging” is a type of “packaging,” we have revised the definition of “manufacturing/processing” to specify “packaging (including modified atmosphere packaging)” as an example of a manufacturing/processing activity.

(Comment 30) Some comments assert that non-produce botanicals require treatments that do not create a new commodity and ask us to recognize these treatments as farm activities rather than manufacturing/processing activities. As examples, these comments

assert that activities such as cutting, slicing, drying, freezing, wet or dry heat treating to kill plant tissues, and aging or fermenting are all activities that are traditionally performed by farms on non-produce botanicals for the purpose of removing non-produce botanical RACs from the place where they were grown and preparing them for use as food. These comments also assert that we have been inconsistent in our activity classifications because we both state that “heat treatment” is a food processing activity and state that activities traditionally performed by farmers to prepare crops for use are farm activities. These comments express concern that farmers won’t use heat treatments to control pests, based on a misunderstanding of what constitutes “food processing.”

(Response 30) We note that these comments used the term “non-produce botanicals,” which is not a term we have used or defined, and it is not clear to us what the commenters intended this term to represent. In this document, we are not addressing the question of whether certain “botanicals” are or are not “produce.” The term “produce” was proposed to be defined in the forthcoming produce safety rule, and we intend to define it in that rule.

However, we can address in this rule these commenters’ questions about activity classification. Some of these activities are within the “farm” definition. For example, drying/dehydrating a RAC without creating a distinct commodity is part of “holding” and drying/dehydrating a RAC that creates a distinct commodity, without additional manufacturing/processing, is manufacturing/processing that is included within the “farm” definition. (See Response 28.) Cutting (or otherwise separating) the edible portion of the RAC from the crop plant and removing or trimming part of the RAC (*e.g.*, foliage, husks, roots or stems) are harvesting activities. (See Response 37.) We have revised the definition of “holding” to include the example of “fumigating food during storage.” (See Response 39.) We decided to include this example of a holding activity based on previous discussions of how we classify fumigating as a type of pest control (*see, e.g.*, 78 FR 3646 at 3682 and 79 FR 28524 at 28571). Although we have not previously classified heat treatment for purposes of pest control, we agree that we should classify heat treatment for purposes of pest control the same way that we have classified fumigating for purposes of pest control—*i.e.*, as a holding activity. Regarding classification of the other

activities listed in these comments, see Response 3.

(Comment 31) Some comments assert that the “farm” definition is too limited and ask us to include standard farm activities such as culling, conveying, sorting, waxing, labeling, storing, packaging and shipping of raw, whole produce. These comments assert that these normal activities do not change the shape or structure of RACs, or alter the hazards, and should be covered under the produce safety rule rather than the human preventive controls rule.

(Response 31) All of the activities described by these comments could be within the “farm” definition (*see* 79 FR 58524 at 58571–58572), either because they are specified in the “farm” definition itself or because they are examples of activities within the definition of “packing” or holding.” Packaging and labeling RACs, without additional manufacturing/processing, are specified in the regulatory text of the “farm” definition. Sorting and culling are included in the regulatory text of the definition of “packing.” Storing is simply another term for “holding.” We had already included “weighing and conveying” as an example of a low-risk packing or holding activity in the exemption applicable to on-farm low-risk activity/food combinations (§ 117.5(g)). To give more prominence to this packing activity, we have added it to the definition of “packing” as well.

(Comment 32) One comment, submitted to Docket No. FDA–2011–N–0143 for the FSVP rulemaking, notes that RACs often are harvested by a contract harvest company (Ref. 16). This comment asks us to clarify what is meant by “establishment that harvests a food” in the definition of “foreign supplier” and whether, in such circumstances, the supplier of the RAC would be the contract harvest company or the establishment that owns the crop and sells it to an importer.

(Response 32) The 2014 supplemental human preventive controls notice had similar phrasing (“establishment that harvests the food”) in the definition of “supplier.” In the final rule the definition of “supplier” has changed in relevant part to include the “establishment that grows the food,” consistent with changes to the farm definition and as described in the following paragraphs.

There are several different business models in which RACs are harvested by a contract harvester (Ref. 17). In one business model, a grower contracts with a harvester to perform harvesting on behalf of the grower. In another business model, a third-party handler enters into

separate contracts with the grower and the harvester. In another business model, a grower sells its crop to an entity that contracts with a separate harvester to harvest the RACs and then packs the RACs. There are variations on these business models, such as when a grower sells its crop to an entity that both harvests and packs the RACs, without a contract with a separate harvester.

Growing and harvesting operations are not under the same management in some of these business models. As discussed in Comment 23, comments emphasize that farming operations can have complex business structures, and ask us to revise the “farm” definition to provide for these business models. To explicitly include these business models in the “farm” definition, we have revised the “farm” definition to mean an operation under one management in one general (but not necessarily contiguous) physical location devoted to the growing of crops, the harvesting of crops, the raising of animals (including seafood), or any combination of these activities. With this revision, an operation can be within the “farm” definition if it grows crops but does not harvest them or if it harvests crops but does not grow them.

The “farm” definition established in the section 415 registration regulations in 2003 (68 FR 58894), and the proposed revisions to the “farm” definition in the 2013 proposed human preventive controls rule and the 2014 supplemental human preventive controls notice, all describe a “farm” as an entity “devoted to the growing *and* harvesting of crops” (emphasis added). In light of the revision to the “farm” definition and as discussed more fully in section IX.C.35, we have revised the “supplier” definition to include the establishment that “grows the food” rather than the establishment that “harvests the food.” With this change in the “supplier” definition, the supplier is the farm that grows the food regardless of the business model for harvesting the food.

(Comment 33) Some comments ask us to modify the “farm” definition to exclude feed mills that provide feed to more than 5 other farms. These comments assert that egg farms are most likely to be company owned and the median number of farms owned by a company is under 8 and cite USDA as the source of this information. These comments assert that setting the limit at 5 would not automatically exempt feed mills operated by these large egg laying businesses from the animal preventive controls rule.

(Response 33) We decline this request. The statutory exemption from

the section 415 registration regulations (and, thus, from the requirements for hazard analysis and risk-based preventive controls) for “farms” is based on the activities that an operation conducts rather than on the size of the operation.

(Comment 34) Some comments assert that the hulling or dehydration of walnuts should not be considered processing and, thus, that an establishment that conducts hulling or dehydration activities on tree nuts such as walnuts should not be considered a facility subject to the requirements for hazard analysis and risk-based preventive controls. These comments also assert that all growers who hull and dry should operate under the same rules, regardless of whether or not they own their own crop. Some comments assert that the hulling and shelling operations in the nut industry are part of the harvesting operation in which the outer shells are removed. These comments state that regardless of whether activities are conducted on the farm in which they are grown or at an off-farm facility that provides hulling and shelling services, the food is a RAC, the activity is low-risk and does not transform the RAC into a processed food, and the product is delivered to a processing facility and is not distributed in commerce. The comments argue that for all these reasons and because hulling and shelling activities are not subject to subpart B, it is not appropriate to subject facilities that conduct such activities to subpart C. Comments request that hulling, shelling, and drying of tree nuts be considered “on farm” for the purposes of this rule. Other comments ask us to specify that the production of “natural dried raisins,” dried plums, and dried hops are within the “farm” definition.

(Response 34) Hulling of tree nuts (such as walnuts, almonds, and pistachios) is a harvesting activity that is within the “farm” definition when conducted on a farm or the farm part of a farm mixed-type facility. Drying/dehydrating RACs without creating a distinct commodity (such as drying walnuts and hops) is a holding activity that also is within the “farm” definition when conducted on a farm or farm mixed-type facility. As discussed in Response 25, we have revised the “farm” definition to provide that an operation, not located on a primary production farm, devoted to harvesting (such as hulling or shelling), packing, and/or holding of RACs is within the “farm” definition (as a “secondary activities farm”), provided that the primary production farm(s) that grows, harvests, and/or raises the majority of

the RACs harvested, packed, and/or held by the secondary activities farm owns, or jointly owns, a majority interest in the secondary activities farm.

Drying/dehydrating RACs (such as grapes and plums) to create a distinct commodity, and packaging and labeling such commodities, without additional manufacturing/processing is within the “farm” definition when conducted on a farm or farm mixed-type facility. (See Response 28.) However, additional manufacturing/processing activities (such as removing pits from dried plums) are outside the “farm” definition, and a farm or farm mixed-type facility that conducts such activities becomes a facility that is required to register and is subject to the requirements for hazard analysis and risk-based preventive controls for those activities outside the farm definition. The exception is when a farm is a small or very small business eligible for the exemptions in § 117.5(g) and (h) for a farm mixed-type facility that only conducts low-risk activity/food combinations. Such a small or very small business must still register as a food facility, but will be exempt from the requirements for hazard analysis and risk-based preventive controls. (See also the discussion in the 2014 supplemental human preventive controls notice (79 FR 58524 at 58533–58534 and table 1 in the Appendix to the 2014 supplemental human preventive controls notice (79 FR 58524 at 58571–58572)).

(Comment 35) Some comments assert that we have referred to raw milk as being “inherently dangerous” and should not consider any activities that result in the preparation of an inherently unsafe product for sale to consumers to be within the “farm” definition (*i.e.*, production of raw milk for direct human consumption should not be considered “harvesting” or “packing”). These comments ask us to re-consider the definition of “farm” as it applies to the production of raw milk for human consumption. Specifically, these comments ask us to consider such activities to be outside the traditional business of a dairy farm and to subject businesses that conduct such activities to FSMA’s requirements for hazard analysis and risk-based preventive controls requirements as a means of advancing public health.

(Response 35) We decline this request. Producing milk is a traditional activity of a dairy farm, regardless of whether the milk produced by that dairy farm is pasteurized and introduced into interstate commerce in accordance with § 1240.61 (Mandatory pasteurization for all milk and milk products in final

package form intended for direct human consumption) or sold unpasteurized to consumers within a State consistent with applicable State laws and regulations. Distributing raw milk in interstate commerce would be unlawful, but would not form the basis for a decision that the business is “not a farm.”

(Comment 36) Some comments express concern that farmers who grow seed that is sold as animal feed must register as a food facility. These comments ask why sales of grain for animal feed are included in a rule that is focused on the safety of human food and ask us to exempt this category of farms and their sales of grain for animal feed from the registration rule.

(Response 36) Establishments that satisfy the “farm” definition, including farms that grow seed that is sold as animal food, are not required to register as a food facility. These comments may mistakenly believe that we intended any food establishment that is required to register as a food facility to comply with the regulations we are establishing in part 117 regarding human food, regardless of whether the facility produces food for consumption by humans or food for consumption by animals. This is not the case. We simply proposed to revise definitions in the section 415 registration regulations relevant to the definition of “facility” in the same notice in which we proposed to modernize the current CGMPs for food and establish requirements for hazard analysis and risk-based preventive controls for human food, because section 103 of FSMA addresses the definitions in the section 415 registration regulations, as well as the requirements for hazard analysis and risk-based preventive controls. If a facility sells grain for use as animal food, and is not exempt from the section 415 registration regulations, that facility would be subject to the animal preventive controls rule, not the human preventive controls rule that is the subject of this document.

### C. Proposed New Definition of Harvesting

We proposed to define “Harvesting,” as a new definition in §§ 1.227 and 1.328, to apply to farms and farm mixed-type facilities and to mean activities that are traditionally performed by farms for the purpose of removing RACs from the place they were grown or raised and preparing them for use as food. We proposed that harvesting be limited to activities performed on RACs on a farm, and that harvesting does not include activities that transform a RAC into a processed

food. The proposed definition included examples of activities that would be harvesting. As noted in table 52 of this document, we have reorganized the listed examples of harvesting to present them in alphabetical order. We also have modified the proposal that harvesting be limited to activities performed on RACs on a farm to provide that harvesting can also be performed on processed foods created by drying/dehydrating a RAC without additional manufacturing/processing, because processed foods created by drying/dehydrating RACs are within the “farm” definition. See Response 28 and 79 FR 58524 at 58533 regarding drying/dehydrating RACs to create a distinct commodity.

(Comment 37) Some comments ask us to provide more examples of harvesting activities, in the regulatory text and in guidance. Examples of the requested activities include braiding; bunching; cutting the edible portion of the crop from the plant; hydro-cooling; maintaining hydration of product; refrigerating; removing foliage; removing free water from (*e.g.*, spinning); removing or trimming roots; trimming the tops of bunches of allium crops such as leeks, chives, or garlic and root crops such as carrots, beets, turnips, parsnips, etc. to prepare them for sale; and trimming the lower stems of harvested herb crops such as parsley, basil, or cilantro, or the lower stems of leafy greens. Other comments ask us to specify that harvesting also encompasses seed conditioning (*i.e.*, cleaning the seed, including removal of leaves, stems, and husks to prepare for marketing), ripening (artificial or natural) of fruit, and waxing or coating of RACs.

(Response 37) We have added or modified several examples of harvesting in the regulatory text (*i.e.*, cutting (or otherwise separating) the edible portion of the RAC from the crop plant, removing or trimming part of the RAC (*e.g.*, foliage, husks, roots or stems), field coring, and hulling). In table 1 in the Appendix to the 2014 supplemental human preventive controls notice (79 FR 58524 at 58571–58572), we provided a more extensive list of examples of harvesting activities, including examples that are not in the regulatory text. Although we have classified some of these activities in more than one way (see 79 FR 58524 at 58571–58572), in general these activities would fall within the “farm” definition when conducted on RACs that are not otherwise processed. For example, coating RACs with wax/oil/resin for the purpose of storage or transport can be a packing (not harvesting) activity, but

waxing also has long been considered a manufacturing/processing activity during the production of processed food (because it involves making food from one or more ingredients, or synthesizing, preparing, treating, modifying or manipulating food) (see 78 FR 3646 at 3679). Artificial ripening of fruit is manufacturing/processing (not harvesting), but is now within the “farm” definition (see § 117.3 and Response 27). Regarding classification of the other activities listed in these comments, see Response 3.

(Comment 38) Some comments assert that fermenting cocoa beans and coffee beans should be classified as “harvesting” rather than “holding.”

(Response 38) We agree that the process of fermenting cocoa beans and coffee beans begins as a “harvesting” activity, when the pods are harvested and the beans are removed; it continues as “holding,” while the harvested beans ferment. Thus, fermenting cocoa beans and coffee beans has elements of both “harvesting” and “holding,” which are both within the “farm” definition. It is not necessary to place the process of fermenting cocoa beans and coffee beans squarely in one activity or the other for the regulatory purpose of determining whether an operation is within the “farm” definition. See also Response 41.

#### *D. Proposed Revision to the Definition of Holding*

We proposed to revise the definition of “Holding” in §§ 1.227 and 1.328 to add that holding also includes activities performed incidental to storage of a food, but does not include activities that transform a RAC into a processed food. Holding facilities could include warehouses, cold storage facilities, storage silos, grain elevators, and liquid storage tanks.

(Comment 39) Some comments ask us to provide more examples of holding activities, in the regulatory text and in guidance. Examples of the requested activities include fumigating RACs; application of chemicals (including fungicides, sanitizers, and anti-oxidants); application of ripening agents; using wax as a carrier of fungicides or anti-oxidants applied before storage; and waxing or coating of RACs, including “coating” grain RACs with diatomaceous earth to control insects. According to these comments, these activities are incidental to storage and do not transform RACs into processed food.

(Response 39) We have added or modified several examples of holding in the regulatory text (*i.e.*, fumigating food during storage, and drying/dehydrating RACs when the drying/dehydrating

does not create a distinct commodity (such as drying/dehydrating hay or alfalfa)). In table 1 in the Appendix to the 2014 supplemental human preventive controls notice (79 FR 58524 at 58571–58572), we provided a more extensive list of examples of holding activities, including examples that are not in the regulatory text. We have previously classified some of these activities in more than one way (see 79 FR 58524 at 58571–58572) depending on when the activity occurs. For example, sorting, culling, and grading RACs can be either a holding activity or a packing activity. Drying/dehydrating RACs is holding when the drying/dehydrating does not create a distinct commodity, but is manufacturing/processing when the drying/dehydrating creates a distinct commodity (see Response 28). Regarding classification of the other activities listed in these comments, see Response 3.

(Comment 40) Some comments ask us to clarify that mixing or blending intact RACs is considered “holding” regardless of whether the RACs are the same or different.

(Response 40) We use the term “blending” when referring to RACs such as grain and when the RACs are the same. For example, we consider the activity of “blending” different lots of the same grain to meet a customer’s quality specifications to be a practical necessity for product distribution and, thus, to be within the definition of “holding” (see 79 FR 58524 at 58537). However, we use the term “mixing” when the RACs are different. For example, we consider the activity of “mixing” corn and oats in the production of animal food to be manufacturing/processing, because mixing two different foods is “making food from one or more ingredients” (which is our definition of “manufacturing/processing”), and the animal food produced by mixing corn and oats is a processed food.

We classify “mixing” intact RACs that does not create a processed food as incidental to, and therefore part of, “packing” or “holding” as applicable.

(Comment 41) Some comments ask us to clarify whether the expanded definition of holding that we proposed in the 2014 supplemental human preventive controls notice would mean that a warehouse that both stores cocoa beans and fumigates the cocoa beans to prevent pest infestation would be exempt from the requirements for hazard analysis and risk-based preventive controls for a facility solely engaged in the storage of RACs (other than fruits and vegetables) for further distribution or processing (§ 117.5(j)).

(Response 41) Fumigating RACs such as cocoa beans to prevent pest infestation would be within the definition of “holding.” Therefore, such fumigation would not prevent a facility that stores RACs (other than fruits and vegetables) from being eligible for the exemption in § 117.5(j), provided that the facility does not conduct other activities not classified as “holding.” However, a threshold question for any facility solely engaged in the storage of RACs is whether the stored RACs are fruits or vegetables. We classify cocoa beans within the category of “fruits and vegetables” (78 FR 3646 at 3690) and, thus, a facility that stores cocoa beans is not eligible for the exemption in § 117.5(j).

(Comment 42) Some comments ask us to clarify whether there is a timeframe associated with holding and to better distinguish between “holding” and “storage.”

(Response 42) There is no timeframe (maximum or minimum) associated with holding. The definition of holding states “Holding means storage of food” and, thus, there is no distinction between “holding” and “storing.”

(Comment 43) Some comments ask us to clarify how the definition of holding relates to practices, such as fumigation, on almond hull stockpiles held on a farm, a farm mixed-type facility, or off-farm.

(Response 43) Practices that are incidental to storage of food, such as fumigation of almond hull stockpiles, are holding, regardless of whether they are conducted on-farm, on a farm mixed-type facility, or off-farm.

(Comment 44) Some comments ask us to clarify that value added activities (such as repacking and blast freezing) conducted in facilities such as warehouses would be considered holding when product is not exposed to the environment.

(Response 44) We consider the activities described in these comments to be activities performed as a practical necessity for the distribution of the food and, thus, to be within the definition of holding.

(Comment 45) Some express concern that the definition of holding would prevent a facility that samples food (such as sugar) for grading or quality control purposes from qualifying for the exemption for facilities engaged solely in holding unexposed packaged food because they would temporarily expose otherwise unexposed packaged food to the environment. These comments ask us to make clear that the requirements for hazard analysis and risk-based preventive controls only apply to the sampling activities and that engaging in

sampling activities does not remove a warehouse’s exemption altogether.

(Response 45) We consider that sampling food in the manner described by this comment is a practical necessity for the distribution of the food within the definition of “holding,” and that the exemption still applies to a facility that conducts such sampling. Importantly, the sampling must be in done in accordance with CGMPs such that the exposure does not result in contamination of the food.

#### *E. Proposed Revision to the Definition of Manufacturing/Processing*

We proposed to revise the definition of “Manufacturing/Processing” in §§ 1.227 and 1.328 by adding to the existing definition a criterion applicable to farms and farm mixed-type facilities. As noted in table 52, we have reorganized the listed examples of manufacturing/processing to present them in alphabetical order.

(Comment 46) Some comments express concern that some activities included in the definition of “manufacturing/processing” overlap with activities (such as trimming, washing, and cooling) included in the definition of “harvesting.”

(Response 46) We acknowledge that there is some overlap in the activities that the regulatory text lists as examples of both “manufacturing/processing” and “harvesting,” because some activities can occur during more than one operation (see also the discussion at 79 FR 58524 at 58538 and table 1 in the Appendix to the 2014 supplemental human preventive controls notice (79 FR 58524 at 58571–58572)). For example, “cutting” the core of the lettuce from the crop plant can occur on-farm in the field where the lettuce is harvested, and “cutting” the core of the lettuce from the rest of the harvested lettuce also can occur in a fresh-cut processing facility. An important consequence of the multiple revisions we have made to the “farm” definition in this rulemaking is that there are fewer situations in which classification of a particular activity is the only trigger for an operation to be subject to the section 415 registration regulations. For example, the revised “farm” definition no longer classifies the packing and holding of others’ RACs to be a manufacturing/processing activity that triggers the registration requirement. As another example, the revised “farm” definition specifies three manufacturing/processing activities that are within the “farm” definition. We conclude that the overlap in the examples of activities listed in the definitions of “harvesting” and

“manufacturing/processing” does not create problems with determining the status of an operation as a “farm” or a “facility” and we are retaining examples in both definitions because doing so reflects current practices on farms and in manufacturing/processing facilities.

(Comment 47) Some comments ask us to clarify that the traditional activities of a packing shed—cleaning and packing intact fruits and vegetables—do not constitute “manufacturing/processing” that would trigger the requirement to register as a facility.

(Response 47) Packing activities are within the definition of “packing,” and holding activities are within the definition of “holding,” regardless of whether the packing or holding activities take place on-farm or off-farm. In other words, neither packing produce nor holding produce would be classified as manufacturing/processing merely because the business entity conducting the activity is a facility that is subject to the section 415 registration regulations. As discussed in Response 25, we have revised the “farm” definition to provide that an operation devoted to harvesting (such as hulling or shelling), packing, and/or holding of RACs is within the “farm” definition (as a “secondary activities farm”), provided that the primary production farm(s) that grows, harvests, and/or raises the majority of the RACs harvested, packed, and/or held by the secondary activities farm owns, or jointly owns, a majority interest in the secondary activities farm. With this revision, some off-farm packinghouses that are managed by a business entity (such as a cooperative) that is different from the business entity growing crops (such as individual farms) can be within the “farm” definition, provided that the primary production farm(s) that grows, harvests, or raises the majority of the RACs harvested, packed, and/or held by the secondary activities farm owns, or jointly owns, a majority interest in the packing operation.

(Comment 48) Some comments ask us to make clear, in our response to comments in the final rule, that any adjustments we make to the definition of manufacturing/processing in no way change the definitions of “raw agricultural commodity,” “processing,” and “processed food,” which were mutually agreed to by EPA and FDA (Ref. 15) to address regulatory responsibilities for antimicrobials applied to food, process water contacting food, or hard food-contact surfaces.

(Response 48) The revisions we made to the “farm” definition, and to the classification of activities relevant to the

“farm” definition, do not change the statutory definitions of “raw agricultural commodity,” and “processed food,” or impact our interpretation of the definition of “processing,” with respect to regulatory jurisdiction for antimicrobials applied to food, process water contacting food, or hard food-contact surfaces.

#### F. Proposed New Definition of Mixed-Type Facility

We proposed to define “Mixed-type facility,” as a new definition in §§ 1.227 and 1.328, to mean an establishment that engages in both activities that are exempt from registration under section 415 of the FD&C Act and activities that require the establishment to be registered. We specified in the regulatory text that an example of such a facility is a “farm mixed-type facility,” which is an establishment that grows and harvests crops or raises animals and may conduct other activities within the farm definition, but also conducts activities that require the establishment to be registered. As a conforming change associated with the revisions to the “farm” definition, we have revised the example of a “farm mixed-type facility” to specify that it is an establishment that is a farm, but also conducts activities outside the farm definition that require the establishment to be registered.

(Comment 49) Some comments assert that there is no scientific basis for the definition of mixed-type facility.

(Response 49) The proposed definition is not a science-based definition. It is a descriptive term that we are using to refer to certain food establishments. We used this same term during the rulemaking to establish the section 415 registration regulations (see response to comment 46, 68 FR 58894 at 58906, October 10, 2003).

(Comment 50) Some comments ask us to revise the definition to add more details about activities that are inside the farm definition and activities that are outside the farm definition.

(Response 50) We decline the request of these comments. Adding such details would detract from the focus of the definition—*i.e.*, that it refers to a facility that conducts both activities that are inside the farm definition and activities that are outside the farm definition. We have included additional examples of “harvesting,” “packing,” and “holding” activities in the regulatory text of the definitions for those terms (see §§ 1.227, 1.328 and 117.3 and Response 31, Response 37 and Response 39). (See also Response 3.)

(Comment 51) Some comments ask us to revise the definition to exclude those establishments that only conduct low-

risk activities specified in the exemptions for on-farm, low-risk activity/food combinations (§ 117.5(g) and (h)).

(Response 51) We decline this request. Whether a particular establishment that falls within the definition of “mixed-type facility” is subject to the requirements for hazard analysis and risk-based preventive controls is governed by the exemptions established in this rule.

#### G. Proposed Revision to the Definition of Packing

We proposed to revise the definition of “Packing” in §§ 1.227 and 1.328 by adding that packing includes activities performed incidental to packing a food, but does not include activities that transform a RAC into a processed food. We have revised the definition to clarify that packing includes “re-packing.”

(Comment 52) Some comments ask us to include minimal “manufacturing/processing” of RACs in the definition of packing when the minimal “manufacturing/processing” does not transform the RAC into a processed food. The comments describe waxing of fresh fruit (such as apples) and vegetables as examples of activities that do not transform a RAC into a processed food.

(Response 52) As already discussed, the activities that transform a RAC into a processed food (and are sometimes therefore referred to as “processing” in the context of a food’s status as a RAC or processed food) are not coextensive with the activities described in our definition of “manufacturing/processing.” (See Response 27.) Although waxing has long been considered a manufacturing/processing activity during the production of processed food (because it involves making food from one or more ingredients, or synthesizing, preparing, treating, modifying or manipulating food), we classify coating RACs with wax/oil/resin for the purpose of storage or transport as a packing activity. (See Response 37.)

(Comment 53) Some comments ask us to clarify the distinction between “packing” and “packaging” because the terms are different but seem to be used interchangeably. These comments express concern that “placing food into containers” on farms that have traditionally done so will be classified as “manufacturing/processing” and trigger the requirement to register as a food facility and ask us to reclassify “packaging” within the definition of “packing.” Other comments ask us to remove the words “other than packaging of food” from the definition of

“packing.” Some comments state that when a RAC is packed in the field and/or is placed into a clamshell container, as a practical matter it is considered to have been “packed,” not “packaged.”

(Response 53) We acknowledge that farms traditionally refer to field packing, including placing RACs into clamshell containers that will serve as a consumer package, as “packing,” not “packaging.” Indeed, in the 2013 human preventive controls rule we proposed to revise the definition of “packing” to specify that, for farms and farm mixed-type facilities, “packing” includes “packaging.”

However, in the 2014 supplemental human preventive controls notice we proposed a simpler approach to accommodate requests such as those in these comments, by simply specifying in the “farm” definition that packaging and labeling RACs, without additional manufacturing/processing, is within the “farm” definition. We conclude that the distinctions between the terms “packing” and “packaging” do not create problems with determining the status of an operation as a “farm” or a “facility.” Further, we note that we have given these terms identical meanings across multiple FDA regulations that are applicable to facilities.

(Comment 54) Some comments refer to discussions at a “listening session” regarding harvesting several varieties of lettuce, washing them, and combining heads or bunches of the different varieties in one bag that is sealed with a knot or twist tie. During these discussions, this type of activity was classified as being within the “farm” definition. These comments ask how this activity can be classified as being within the “farm” definition when mixing and washing are listed as manufacturing/processing activities that trigger registration as a food facility and whether there is a discrepancy between what the rule requires and what they heard at the listening session. Other comments express the view that mixing RACs that have not been transformed into processed food (such as bagging mixed greens or different types of whole produce, such as potatoes, beets, and carrots) should not put a farm in the category of a mixed-type facility.

(Response 54) Removing several varieties of lettuce from the place in which they were grown, washing them on the farm, and combining heads or bunches of the different varieties in one bag that is sealed with a knot or twist tie on the farm are all activities within the “farm” definition. We classify “washing” and “mixing” in more than one way depending on when the activity occurs, and the “farm” definition now specifies that

“packaging” RACs (without additional manufacturing/processing, such as slicing) is a farm activity, even though it is a type of “manufacturing/processing.” We have recognized “washing” as a harvesting activity since we first issued the section 415 registration regulations (68 FR 58894 at 58961, October 10, 2003), even though we also classify “washing” RACs as “manufacturing/processing” when done in a food processing facility (such as a fresh-cut processing facility). We classify “mixing” intact RACs that does not create a processed food as incidental to, and therefore part of, “packing” or “holding” as applicable. Mixing heads or bunches of lettuce as described in the example does not create a processed food, because he mixing has not created a distinct commodity, but only a set of mixed RACs. On the other hand, mixing that creates a processed food is not “packing” or “holding.” The definitions of both “packing” and “holding” are limited so that they do not include activities that transform a RAC into processed food. Some kinds of mixing of RACs do create a distinct commodity (for example, mixing corn and oats to make animal food). In such cases, the mixing is manufacturing/processing and is not within the farm definition. Likewise, although we classify placing RACs in a plastic bag with a twist tie as “packaging” rather than “packing” when the plastic bag is the container that the consumer receives, we have provided for “packaging” RACs as an activity within the “farm” definition.

**V. Comments on the Organizing Principles for How the Status of a Food as a Raw Agricultural Commodity or as a Processed Food Affects the Requirements Applicable to a Farm Under Sections 415 and 418 of the FD&C Act**

In the 2014 supplemental human preventive controls notice, we discussed comments on the organizing principles that formed the basis for proposed revisions to the section 415 registration regulations and the section 414 recordkeeping regulations (79 FR 58524 at 58538). We also explained how our proposed revisions to the “farm” definition would require us to reconsider those organizing principles (79 FR 58524 at 58538).

(Comment 55) Some comments assert that we should revise the organizing principles to reflect the realities and range of activities that farms conduct to prepare their crops for market and to make the organizing principles consistent with FSMA’s risk-based mandate. These comments ask us to revise the organizing principles as follows: (1) The basic purpose of farms is to produce RACs and deliver them for sale to end-users or other buyers; (2) activities that involve RACs and that farms perform for the purposes of selling their own RACs, including growing them, harvesting them, preparing them for consumption in their raw and unprocessed state, and packing, sorting, grading, packaging, labeling, holding, transporting, marketing, and delivering them, should all be within the definition of “farm;” (3) even though farms traditionally also do a wide variety of activities that may be considered processing, for the purpose of these organizing principles, activities should be classified based on whether

the activity transforms a RAC into a processed food (as defined by these rules); (4) manufacturing/processing, packing, or holding food—whether RACs or processed foods, from any source—for consumption on the farm should remain within the farm definition.

(Response 55) We have revised the “farm” definition to refer to farms as “operations” rather than “facilities” or “establishments”; reflect modern business models (such as cooperatives, on-farm packinghouses under ownership by multiple growers, food aggregators, and some types of food hubs (e.g., those that consolidate and distribute RACs but do not conduct activities that transform the RACs into a processed food)); specify that a farm is in one general (but not necessarily contiguous) physical location; and provide that an operation devoted to harvesting (such as hulling or shelling), packing, and/or holding of RACs is within the “farm” definition as a secondary activities farm, provided that the primary production farm(s) that grows, harvests, and/or raises the majority of the RACs harvested, packed, and/or held by the secondary activities farm owns, or jointly owns, a majority interest in the secondary activities farm (e.g., an off-farm produce packinghouse owned by farmers or a farmer-owned tree nut hulling and drying operation). (See Response 22, Response 23, Response 24, and Response 25.) All of these changes to the “farm” definition do, as requested by these and other comments, reflect the realities and range of activities that farms conduct. See table 5 for organizing principles regarding classification of activities on-farm and off-farm in light of the changes to the “farm” definition.

TABLE 5—ORGANIZING PRINCIPLES REGARDING CLASSIFICATION OF ACTIVITIES ON-FARM AND OFF-FARM

No.	Organizing principle
1	The basic purpose of farms is to produce RACs, and RACs are the essential products of farms.
2	A farm is in one general (but not necessarily contiguous) location.
3	Farm operations include business models such as cooperatives, on-farm packinghouses under ownership by multiple growers, food aggregators, and some types of food hubs.
4	Activities that involve RACs and that farms traditionally do for the purposes of growing RACs, removing them from the growing areas, and preparing them for use as a food RAC, and for packing, holding, and transporting them, are all within the “farm” definition.
5	Activities are classified based in part whether the activity transforms a RAC into a processed food.
6	A limited number of traditional operations that farms do for the purpose of preparing RACs for use as a food RAC, but that are classified as “manufacturing/processing,” are within the “farm” definition. These are: (1) Drying/dehydrating RACs to create a distinct commodity, and packaging and labeling such commodities, without additional manufacturing/processing; (2) treatment to manipulate the ripening of RACs, and packaging and labeling the treated RACs, without additional manufacturing/processing; and (3) packaging and labeling RACs, when these activities do not involve additional manufacturing/processing.
7	Manufacturing/processing, packing, or holding food—whether RACs or processed foods, from any source—for consumption on the farm is within the farm definition.

## VI. Rulemaking Required by Section 103(c) of FSMA: On-Farm Activities

### A. Section 103(c)(1)(C) of FSMA

We previously described provisions of FSMA that direct us to conduct a science-based risk analysis to cover specific types of on-farm packing, holding, and manufacturing/processing activities that would be outside the “farm” definition and, thus, subject to the requirements for hazard analysis and risk-based preventive controls (see section 103(c)(1)(C) of FSMA and 78 FR 3646 at 3674 and 3689–3691). Consistent with this statutory direction, we developed the section 103(c)(1)(C) draft RA and made it available for public comment (Ref. 18 and 78 FR 3824). We are including the final risk assessment (the section 103(c)(1)(C) RA) in the docket established for this document (Ref. 4).

We previously described provisions of FSMA that direct us to consider the results of the science-based risk analysis and exempt facilities that are small or very small businesses from the requirements for hazard analysis and risk-based preventive controls (or modify these requirements, as we determine appropriate), if such facilities are engaged only in specific types of on-farm activities that we determine to be low risk involving specific foods that we determine to be low risk (see section 103(c)(1)(D) of FSMA and 78 FR 3646 at 3675, 3691, and 3705–3707). Later in this document (see section XI.G), we discuss the provisions we are establishing in § 117.5(g) and (h), based on the results of the section 103(c)(1)(C) RA, to exempt farm mixed-type facilities that are small or very small businesses from requirements for hazard analysis and risk-based preventive controls if the only activities that the business conducts that are subject to those requirements are low-risk activity/food combinations.

We also previously described provisions of FSMA that direct us to: (1) Identify high risk-facilities and allocate resources to inspect facilities according to the known safety risks of the facilities (as determined by several factors) and immediately increase the frequency of inspection of all facilities (see the discussion of section 421 of the FD&C Act at 78 FR 3646 at 3654–3655); and (2) consider a possible exemption from or modification of requirements of section 421 of the FD&C Act as we deem appropriate (see the discussion of section 103(c)(1)(D) of FSMA at 78 FR 3646 at 3658). We tentatively concluded that we should not exempt or modify the frequency requirements under section 421 based solely upon whether

a facility only engages in low-risk activity/food combinations and is a small or very small business and requested comment on this tentative conclusion.

### B. Comments on Qualitative Risk Assessment of On-Farm Activities Outside of the Farm Definition

(Comment 56) Some comments address the qualitative nature of the section 103(c)(1)(C) draft RA and assert that it is based on professional judgment rather than data. These comments ask us to update the section 103(c)(1)(C) draft RA when more data become available. Some comments assert that we should not rely on data from the Food Processing Sector Study (Ref. 19), but instead collect data from large-scale surveys of actual farm mixed-type facilities and their activities. Other comments ask us to dedicate resources and enter into agreements with agencies/organizations to collect, analyze, and interpret data. Some comments ask us to consult with subject matter experts to ensure that the final risk assessment reflects sufficient geographic diversity.

(Response 56) We have acknowledged the limitations of the section 103(c)(1)(C) draft RA (Ref. 18; see section I.F in that document). Rather than limit public input to subject matter experts, we requested comment from all interested persons, and received a number of comments alerting us to activity/food combinations conducted on farms and farm mixed-type facilities, including comments from diverse geographic areas. We also received comments about activity/food combinations focused on botanicals that might be used in the production of dietary ingredients. We disagree that we need to conduct large scale surveys, or enter into agreements with agencies/organizations, to collect additional information in light of the previous opportunity for broad public input regarding the activity/food combinations conducted on farms and farm mixed-type facilities. (See also Response 139 regarding the Food Processing Sector Study.)

(Comment 57) Some comments state that it is not clear how certain high- or moderate-risk practices (e.g., washing), which are necessary to move product from the field, will affect exemptions. These comments recommend that future risk assessments examine the impact of these practices by commodity and volume of intact fruits and vegetables marketed through small and very small farm mixed-type facilities. Other comments ask us to re-examine our data sources in assessing commodity-specific

risks, and assert that it is likely that many will be found to be low risk. Other comments suggest that the Centers for Disease Control and Prevention (CDC) expand its data analysis effort (Ref. 20) to separate out commodities to assess attribution of foodborne illnesses for additional commodities.

(Response 57) Because of changes we made to the farm definition, practices such as washing that are necessary to move product from the field are within the farm definition and are not addressed in the section 103(c)(1)(C) RA. We disagree that we should re-examine our data sources in assessing commodity-specific risks. As we discussed in the section 103(c)(1)(C) draft RA, we focused on considering the risk of activity/food combinations rather than separately considering the risk of specific food categories because doing so would better enable us to focus on whether a specific manufacturing, processing, packing, or holding activity conducted on food by a farm mixed-type facility warranted an exemption from, or modified requirements for, the provisions of section 418 of the FD&C Act. The comments did not identify additional data sources to use in assessing commodity-specific risks. However, we did revise the section 103(c)(1)(C) draft RA by taking into consideration: (1) Comments submitted to Docket FDA–2012–N–1258 on the section 103(c)(1)(C) Draft RA; (2) comments submitted to Docket FDA–2011–N–0920 on the proposed rule relevant to activities conducted on foods on farms; and (3) a revised Food Processing Sector Study on domestic establishments co-located on farms (Ref. 21). This led us to include additional activity/food combinations in our evaluation, and many were found to be low risk. With respect to CDC expanding its data analysis effort, the CDC publication cited by the comments (Ref. 20) is the most up-to-date publication available, and more finely grained data for additional commodities are not currently available.

(Comment 58) Some comments assert that we should revise the section 103(c)(1)(C) draft RA and then make it available for additional public comment before finalizing the rule.

(Response 58) As we previously noted (78 FR 3824 at 3826, January 16, 2013), we subjected the section 103(c)(1)(C) draft RA to peer review in accordance with the requirements of the Final Information Quality Bulletin for Peer Review (issued by the Office of Management and Budget to implement the Information Quality Act (Pub. L. 106–554)) before we made it available for broader public comment during a

time period that exceeded 10 months. The additional iterative process recommended by these comments is not necessary and would go beyond the processes we routinely apply for public input on a risk assessment.

*C. Comments Regarding an Exemption for Small and Very Small Farm Mixed-Type Facilities Under Section 421 of the FD&C Act*

1. Request for Comment on Data Submission Requirements

We requested comment on whether we should establish data submission requirements that would allow us to identify types of facilities in order to exempt them from the inspection frequencies, or modify the inspection frequencies that apply to them, under section 421 of the FD&C Act. We provided examples of such data elements, including identification of a facility as a farm mixed-type facility, annual monetary value of sales, number of employees, and food category/activity type. We also requested comment on any other criteria that may be appropriate for the purposes of allocating inspection resources to these facilities.

Comments did not support these data submission requirements. We are not establishing any data submission requirements that would allow us to identify types of facilities in order to exempt them from the inspection frequencies, or modify the inspection frequencies that apply to them, under section 421 of the FD&C Act.

2. Request for Comment on an Exemption From the Requirements of Section 421 of the FD&C Act

We received no comments that disagreed with our tentative conclusion that we should not exempt or modify the inspection frequency requirements under section 421 based solely upon whether a facility only engages in low-risk activity/food combinations and is a small or very small business. We are not establishing any exemption from, or modification to, the inspection frequency requirements under section 421 for facilities that only engage in low-risk activity/food combinations and are a small or very small business.

**VII. Comments on Proposed General Revisions to Current Part 110 (Final Part 117)**

We proposed some general revisions to the CGMP requirements in part 110, including revising the title; redesignating the provisions in part 117; revising some terms for consistency within the rule; referring to the “owner, operator, or agent in charge” rather than to “plant management” or “operator”; revising provisions directed to preventing contamination of food and food-contact substances so that they also are consistently directed to preventing contamination of food-packaging materials; revising several provisions to explicitly address allergen cross-contact, as well as contamination; referring to “raw materials and ingredients” rather than “raw materials and other ingredients”; deleting some non-binding provisions; and making some editorial revisions (78 FR 3646 at 3692 to 3693).

Some comments support one or more of these proposed general revisions

without change. For example, some comments agree that there is no meaningful distinction between “manufacturing/processing,” “packing,” and “holding” as defined in the proposed revisions to §§ 1.227 and 1.328 and those terms as they have been used in the long-standing CGMP requirements. These comments also agree that consistent use of these terms throughout proposed part 117, in reference to activities taking place in food facilities, establishments, or plants, would make the regulations more clear and have no substantive effect on the current requirements. Other comments support the proposed replacement of the term “facility” or “facilities” in the CGMP requirements with the term “establishment” or “plant” whenever the term “facility” or “facilities” could be confused with the firms that are subject to the proposed requirements for hazard analysis and risk-based preventive controls. Other comments agree that it is appropriate to replace the word “shall” with the term “must.” Some comments that support the proposed provisions suggest alternative or additional regulatory text (see, e.g., Comment 59, Comment 63, and Comment 65).

We received no comments that disagreed with our proposed redesignations and are finalizing them as proposed. In the following sections, we discuss comments that ask us to clarify the proposed requirements or that disagree with, or suggest one or more changes to, the proposed requirements. After considering these comments, we have revised the proposed provisions as shown in table 6.

TABLE 6—OUTCOME OF THE PROPOSED GENERAL REVISIONS TO PART 110

Proposed revision	Outcome
Establish the title of part 117 .....	We have revised the title to read “Current Good Manufacturing Practice, Hazard Analysis, and Risk-Based Preventive Controls for Human Food.”
Consistency of terms: Activities subject to part 117.	We are establishing in part 117 the same definitions for the terms “manufacturing/processing,” “packing,” and “holding” as we are establishing in the section 415 registration regulations and the section 414 recordkeeping regulations.
Consistency of terms: Facility .....	We have made the following changes to the proposed rule: 1. We have revised the definition of “plant” to focus it on the building, structure, or parts thereof, used for or in connection with the manufacturing, processing, packing, or holding of human food. 2. We have revised applicable provisions to use “establishment” rather than “plant” when focusing on a business entity rather than on buildings or other structures. 3. We have made conforming changes throughout the rule.
Consistency of terms: Owner, operator, or agent in charge.	We are: (1) Defining the term “you” to mean, for purposes of part 117, the owner, operator, or agent in charge of a facility and (2) limiting use of the term “you” to provisions directed to “facilities” (i.e., provisions in subparts C, D, E, and G).
Consistency of terms: Food-packaging materials.	We received no comments that disagreed with our proposal that provisions of current part 110 directed to preventing contamination of food and food-contact substances consistently be directed to preventing contamination of food-packaging materials as well and are finalizing the applicable provisions as proposed.
Additions regarding allergen cross-contact.	The CGMPs that we are establishing in subpart B explicitly address allergen cross-contact.

TABLE 6—OUTCOME OF THE PROPOSED GENERAL REVISIONS TO PART 110—Continued

Proposed revision	Outcome
Revisions for consistency with the definition of “food”.	We have retained the current phrase “raw materials and other ingredients” (rather than the proposed phrase “raw materials and ingredients”) throughout the rule to make it clear that raw materials are ingredients.
Revisions to delete some non-binding provisions.	We are deleting those nonbinding provisions of current part 110 that we proposed to delete. (For a list of these deleted provisions, see table 8 in the 2013 proposed human preventive controls rule, 78 FR 3646 at 3714).
Revisions to re-establish some non-binding provisions of part 110 as binding provisions in part 117.	With one exception, we are, as proposed, re-establishing certain non-binding provisions of part 110 in part 117 as binding provisions. See table 11 in the 2013 proposed human preventive controls rule (78 FR 3646 at 3728). The exception is one provision of § 110.80(b)(1) regarding inspecting containers of raw materials on receipt, which we are deleting rather than re-establishing it as a requirement.
Editorial changes .....	We are finalizing the proposed editorial changes regarding “Federal Food, Drug, and Cosmetic Act,” “includes, but is not limited to,” “must,” “adulteration,” and “when” as proposed, except that we are retaining the term “such as” in place of the proposed term “including” in two provisions.

A. Title of Part 117

We proposed to re-establish the provisions of current part 110 in new part 117 and to establish the title of part 117 as “Current Good Manufacturing Practice and Hazard Analysis and Risk-Based Preventive Controls for Human Food” (78 FR 3646 at 3691). (Note that in the 2013 proposed human preventive controls rule, we described this as revising the title of “current subpart B.” We should have described this as revising the title of current part 110.)

(Comment 59) Some comments ask us to revise the title to read “Current Good Manufacturing Practice, Hazard Analysis, and Risk-Based Preventive Controls for Human Food.”

(Response 59) We have revised the title of the rule as requested.

B. Proposed Revisions for Consistency of Terms

1. Activities Subject to Proposed Part 117

We noted that we had previously described activities that may be considered “manufacturing, processing, packing, or holding” by establishing definitions for these terms in the section 415 registration regulations and the section 414 recordkeeping regulations (78 FR 3646 at 3692). We proposed to revise these existing definitions (see sections IV.D, IV.E, and IV.G) and to incorporate the revised definitions in part 117. We tentatively concluded that there is no meaningful distinction between these terms as we would define them in the revised definitions and these terms as they had been used in the CGMPs. We also tentatively concluded that consistent use of these terms throughout part 117, in reference to activities taking place in food facilities, establishments, or plants, would make the regulations more clear and have no substantive effect on the current requirements (78 FR 3646 at 3692). In the 2014 preventive controls

supplemental notice, we proposed revisions to the definitions of “holding” and “packing” after considering comments submitted to the 2013 proposed human preventive controls rule.

(Comment 60) Some comments ask us to clarify how we were “revising” the definitions of the terms manufacturing, processing, packing, and holding because these terms had not been defined in the CGMPs in part 110.

(Response 60) The comments are correct that these terms had not been defined in the CGMPs in part 110. We proposed to “revise” these definitions in the section 415 registration regulations and the section 414 recordkeeping regulations and then establish in part 117 those revised definitions.

(Comment 61) Some comments from the produce industry state that it is difficult to assess whether there is a meaningful distinction between “packing” and “holding” as would be defined in the proposed human preventive controls rule and as had been used in the CGMPs in part 110 because most harvesting and post-harvest handling activities of RACs had been excluded from the CGMP requirements under § 110.19.

(Response 61) We assume that these comments are concerned about distinguishing “packing” from “holding” because some exemptions (e.g., the exemption in § 117.5(k) from the CGMP requirements for holding RACs and the exemption in § 117.5(j) from the requirements for hazard analysis and risk-based preventive controls) apply to “holding” RACs. As previously discussed, we have previously classified several on-farm activities in more than one way (79 FR 58524 at 58538 and 58571) depending on when the activity occurs. For example, sorting, culling, and grading RACs can occur during both packing and holding activities. However, we

disagree that the full regulatory text of the definitions for “packing” and “holding” are not adequate to provide a meaningful distinction between the two terms. “Packing” means, in part, “placing food into a container” whereas holding means, in part “storage of food.” “Placing food into a container” is in no way similar to “storage of food.”

(Comment 62) Some comments disagree with our tentative conclusion that there is no meaningful distinction between “manufacturing/processing,” “packing,” and “holding” as we would define them in the revised definitions and these terms as they had been used in the CGMPs. These comments ask us to define these terms differently in the human preventive controls rule. These comments state that although they do not object to the consistent use of these terms throughout part 117 in reference to activities taking place in food facilities, establishments, or plants, they believe there are significant distinctions in these terms that need to be considered when finalizing the requirements of part 117.

(Response 62) These comments provide neither specific suggestions for how we should define these terms for the purpose of the human preventive controls rule nor specific reasons for their assertion that there are significant distinctions in these terms that need to be considered when finalizing the requirements of part 117. Without more specific information, we assume that the changes we have made to the definitions of “farm,” “holding,” and “packing” adequately address these comments.

2. The Term “Facility”

We proposed to replace the term “facility” or “facilities” in current part 110 with the term “establishment” or “plant” in proposed part 117 whenever the term “facility” or “facilities” could be confused with the firms that are subject to the proposed requirements for hazard analysis and risk-based

preventive controls required by section 418 of the FD&C Act (78 FR 3646 at 3692). However, we tentatively concluded that it would not be necessary to replace the use of the term “facilities” in current requirements directed to specific functional parts of a plant or establishment, such as “toilet facilities” and “hand-washing facilities,” because the use of the term “facilities” in these contexts would not create confusion.

(Comment 63) Some comments state that it would not be helpful to use “plant” interchangeably with “establishment” when referring to a business that is not required to register. These comments ask us to consistently use one of these terms and to define a term that would mean “a business that is not required to register” to help distinguish such businesses from “facilities.”

(Response 63) We agree that it is appropriate to consistently use one term when referring to a business entity. However, we disagree that it is necessary to establish a definition for a business entity that is not required to register. A business that meets the definition of “facility” is required to register; a business that is not required to register is simply a business that does not meet the definition of “facility.”

To address these comments, we have revised provisions of the rule in three ways. First, we have revised the definition of “plant” to focus it on the building, structure, or parts thereof, used for or in connection with the manufacturing, processing, packing, or holding of human food, rather than on the “building or establishment.” Second, we have revised applicable provisions of part 117 to use “establishment” rather than “plant” when focusing on a business entity rather than on buildings or other structures. Third, we have revised provisions that use the terms “plant,” “establishment,” or both to conform to the definition of “plant” and the described usage of “establishment.” For example, § 117.10 establishes requirements for “the management of the establishment” rather than “plant management,” because “establishment” is the term focusing on the business entity. As another example, § 117.20(a)(1) establishes requirements for properly storing equipment, removing litter and waste, and cutting weeds or grass within the immediate vicinity of the “plant” rather than within the immediate vicinity of the “plant buildings or structures,” because the defined term “plant” focuses on the buildings and structures, and it is not necessary to repeat “buildings and

structures” when the term “plant” is used.

### 3. Owner, Operator, or Agent in Charge

In the 2013 proposed human preventive controls rule, we requested comment on whether there is any meaningful difference between the persons identified in current part 110 and the “owner, operator, or agent in charge” identified in section 418 of the FD&C Act. We also requested comment on whether it would be appropriate to refer to the “owner, operator, or agent in charge” of a plant, establishment, or facility throughout proposed part 117 and, if so, whether the requirements would be clear if we revised the proposed rule to use pronouns (such as “you” and “your”) within proposed part 117 (78 FR 3646 at 3693). In the 2014 supplemental human preventive controls notice, we described comments on these issues and we tentatively concluded that we could simplify the regulations directed to the “owner, operator, or agent in charge of a facility” in provisions in subparts C, D, and E by using pronouns, without creating confusion, if we (1) define the term “you” to mean, for purposes of part 117, the owner, operator, or agent in charge of a facility and (2) limit use of the term “you” to provisions in proposed subparts C, D, and E (79 FR 58524 at 58556).

We received no comments that disagreed with the proposed definition of “you” and are finalizing that proposed definition without change.

### 4. Food-Packaging Materials

We proposed that provisions of current part 110 directed to preventing contamination of food and food-contact surfaces consistently be directed to preventing contamination of food-packaging materials as well (78 FR 3646 at 3693). We received no comments that disagreed with this proposal and are finalizing provisions directed to preventing contamination of food-packaging materials as proposed. For additional discussion regarding the term “food-packaging materials,” see Comment 107.

#### *C. Proposed Additions Regarding Allergen Cross-Contact*

We proposed to revise several CGMP provisions to explicitly address cross-contact (see 78 FR 3646 at 3693 and table 10 of the 2013 proposed human preventive controls rule, 78 FR 3646 at 3718–3719). In the 2014 supplemental human preventive controls notice, we proposed to define and use the term “allergen cross-contact” rather than “cross-contact,” and we are finalizing

the definition of the term “allergen cross-contact” in this rule (see § 117.3). As discussed in sections XIII–XXII, the CGMPs that we are establishing in subpart B explicitly address allergen cross-contact, with some revisions requested by comments.

(Comment 64) Some comments ask us to clarify that allergen cross-contact has a meaning that is distinct from “contamination.”

(Response 64) We previously noted that, in the past, inadvertent incorporation of an allergen into a food was referred to as “contamination” or “cross-contamination,” but that more recently the term “cross-contact” (rather than “contamination” or “cross-contamination”) has been applied with respect to unintentional transfer of allergenic proteins from a food containing the proteins to one that does not, because an allergen is a normal component of food, and not itself a contaminant (78 FR 3646 at 3693). Given this shift in the scientific literature distinguishing “cross-contact” from “contamination” and “cross-contamination,” we tentatively concluded that we should begin using the term “cross-contact” (now “allergen cross-contact”) to describe inadvertent incorporation of an allergen into food, rather than the general term “contamination,” for purposes of clarity. In this final rule, we affirm that tentative conclusion.

To further improve clarity, we reviewed the provisions of the rule directed to preventing both allergen cross-contact and preventing contamination and made editorial changes throughout. For example, § 117.10(b)(1) requires that hygienic practices must include wearing outer garments suitable to the operation in a manner that protects against allergen cross-contact and against the contamination of food, food-contact surfaces, or food-packaging materials. For additional provisions that include these editorial changes, see table 52.

#### *D. Proposed Revisions for Consistency With the Definition of “Food”*

We proposed to retain the definition for “food” as already defined in § 110.3 (78 FR 3646 at 3693). Food means food as defined in section 201(f) of the FD&C Act and includes raw materials and ingredients. For consistency with the definition of food (which refers to “raw materials and ingredients” rather than “raw materials and other ingredients”), we proposed to change the title of current § 110.80(a) (which would be proposed § 117.80(b)) to “Raw materials and ingredients” rather than “Raw materials and other ingredients.” As a

companion change to this change in title, we proposed to substitute “ingredients” for “other ingredients” throughout provisions in current § 110.80 that refer to both raw materials and ingredients (78 FR 3646 at 3693–3694).

(Comment 65) Some comments ask us to add a definition for “raw materials.”

(Response 65) We decline this request. During a previous rulemaking to revise the umbrella CGMPs, we explained that it is not possible to categorically distinguish raw materials and other ingredients because raw materials are ingredients, and both raw materials and ingredients are food within the meaning of the FD&C Act (51 FR 22458 at 22461, June 19, 1986). We have broadly defined “food” in this rule to include both raw materials and ingredients.

However, we have decided to retain the current phrase “raw materials and other ingredients” (rather than the proposed phrase “raw materials and ingredients”) throughout the rule to make it clear that raw materials are ingredients. See the regulatory text of §§ 117.80(b), 117.80(c)(6), (7), and (9); and 117.130(c)(2)(iii).

(Comment 66) Some comments ask us to revise the current definition of food

(see Comment 87, Comment 88, and Comment 89).

(Response 66) See Response 87, Response 88, and Response 89 for our reasons for declining to revise the definition of “food” in this rule.

*E. Proposed Revisions To Address Guidance in Current part 110*

We proposed to delete some non-binding provisions of current part 110 (e.g., provisions using “should” or “compliance may be achieved by”) (78 FR 3646 at 3694 and 3714–3717). We also requested comment on whether to revise other non-binding provisions to establish new requirements in proposed part 117 or to simply retain them as useful provisions of a comprehensive CGMP (78 FR 3646 at 3694 and 3728–3729).

(Comment 67) Some comments ask us to retain the provisions we proposed to delete—e.g., because the information helps to clarify the intended effect of the regulations, suggests means of compliance with the requirements, and can educate small, new, or foreign companies. These comments assert that the benefits to both the regulated industry and to the general public of retaining the information we proposed to delete far outweigh any stylistic or

other concerns. Likewise, some comments ask us to retain any non-binding provisions that we proposed to re-establish as requirements if, after considering comments, we do not finalize these provisions as requirements.

(Response 67) We agree that the non-binding provisions we proposed to delete, or considered re-establishing as requirements, provide useful information for reasons such as those mentioned in the comments. However, these provisions are more appropriately included in guidance, and we are deleting those non-binding provisions of part 110 that we are not establishing as requirements. We intend to transfer some of the CGMP recommendations that are currently in part 110, but that will be deleted from part 117, to guidance with editorial changes and changes that reflect current technology and industry practices. For a list of non-binding provisions that we are deleting, see table 7 in this document and table 8 in the 2013 proposed human preventive controls rule (78 FR 3646 at 3714–3717). See Response 321 for a discussion of our reasons for deleting the recommendation listed in table 7 in this document.

TABLE 7—NONBINDING PROVISIONS THAT WE ARE DELETING IN ADDITION TO THE NON-BINDING PROVISIONS LISTED IN TABLE 8 IN THE 2013 PROPOSED HUMAN PREVENTIVE CONTROLS RULE

Designation in part 110	Description
§ 110.80(a)(1) (Processes and controls—raw materials and ingredients—final sentence).	Containers and carriers of raw materials should be inspected on receipt to ensure that their condition has not contributed to the contamination or deterioration of food.

*F. Proposed Editorial Changes*

We proposed to revise current part 110 to make five editorial changes: (1) Refer to the “Federal Food, Drug, and Cosmetic Act” rather than to “the act”; (2) replace the term “shall” with the term “must”; (3) replace the phrase “includes, but is not limited to” with “includes”; (4) replace the phrase “adulteration within the meaning of the act” with the single term “adulteration”; and (5) replace the term “whenever” with “when.”

We received no comments that disagreed with our proposed editorial changes regarding “Federal Food, Drug, and Cosmetic Act,” “must,” “adulteration,” and “when” and are finalizing these editorial changes as proposed.

(Comment 68) Some comments ask us to either retain “includes, but is not limited to” wherever the list which follows is not intended to be exhaustive,

or replace “includes, but is not limited to” with “such as,” to make clear that a following list is not complete.

(Response 68) The word “include” means to have (someone or something) as part of a group or total; to contain (someone or something) in a group or as a part of something (Ref. 22). The word “includes” does not need to be followed by “but is not limited to” to clearly communicate that a following list is not complete.

We proposed that two provisions (proposed § 117.80(c)(14) and (15)) replace the term “such as” with the term “including” (or variations of “including”). In light of the comment’s view that “such as” would be clearer, we have retained the term “such as” in those provisions. We decline the request to more broadly revise the rule to replace “includes” with “such as.” In many cases the term “such as” cannot replace “includes” when used as a verb. We note that several provisions of the

rule do use “such as” when that term is grammatically appropriate, such as in parenthetical phrases (see, e.g., the definitions of “holding” and “packing” in § 117.3).

*G. General Comments on Current Part 110 (Final Part 117)*

We proposed specific revisions and deletions to our long-standing umbrella CGMP requirements to modernize them. We also proposed to redesignate some of these CGMP requirements. For example, we proposed to redesignate the provisions found in six sentences that precede current § 110.80(a) by creating paragraph designations (a)(1) through (6) in new § 117.80. As corresponding changes, we proposed to redesignate current § 110.80(a) as § 117.80(b) and to redesignate current § 110.80(b) as § 117.80(c).

Several comments suggest specific modifications to the umbrella CGMPs beyond what we proposed to revise. In

this section and in sections XIII through XXII, we address these specific suggestions and have amended the regulatory text where warranted.

(Comment 69) Some comments ask us to reorganize some of the current provisions to reduce redundancy, such as by combining provisions that address similar topics or deleting some provisions that the comments view as unnecessary in light of other provisions. For example, one comment suggests we move § 117.80(b)(5) (storage of raw materials, other ingredients, and rework) to § 117.80(a)(1) (general requirements) and another comment suggests we delete requirements in § 117.80(b)(1) for storing raw materials and ingredients because they are redundant with the storage requirements in § 117.80(b)(7).

(Response 69) We decline these requests. We acknowledge that there is some redundancy in subpart B and that we could improve the logical structure of subpart B by moving some of the requirements as recommended by some comments. However, these provisions have been in effect for decades, either since 1969 (when the umbrella CGMPs were first established (34 FR 6977, April 26, 1969) or since 1986 (when we last revised the umbrella CGMPs (51 FR

22458, June 19, 1986), and the comments do not provide examples of how we have been interpreting these provisions in a way that does not accomplish the goal of the umbrella CGMPs. Furthermore, we disagree with some of the comments on whether some provisions are redundant. For example, we disagree that § 117.80(b)(1) is redundant with § 117.80(b)(7) because § 117.80(b)(7) is narrowly directed to raw materials and other ingredients received in bulk and § 117.80(b)(1) is more generally directed to all raw materials and other ingredients.

Rather than reorganize and combine requirements, or delete requirements that some comments view as redundant with other requirements, we have focused on comments requesting specific changes to the current requirements to reflect current practices in the manufacturing, processing, packing, and holding of human food and to make these current requirements clearer (see sections XIII through XXII). Doing so is consistent with the goals of modernizing the umbrella CGMP requirements. However, we have declined many of these requests to make specific changes to particular CGMP provisions. In general, in evaluating the requested specific changes, we

considered whether the comments described a problem with the current regulatory text, or instead focused on hypothetical problems that could occur in the future. Because most of these comments do not explain how the long-standing regulatory text has created a problem, we have declined many of these requests.

Likewise, in this document, we describe several editorial revisions that we made to improve the clarity of the CGMP requirements. However, we do not discuss comments that suggest editorial changes that simply suggest using different words in the regulatory text, but without explaining why the editorial revisions would improve the clarity of the provisions. These long-standing CGMPs have been in place and interpreted for decades, and we see no reason to revise them without a reason to do so.

(Comment 70) Some comments ask us to specify that several of the CGMP requirements in subpart B only apply “where the potential for contamination exists.” (See table 8.) Other comments ask us to change some requirements to recommendations or to specify that they only apply “as appropriate.” (See table 8.)

TABLE 8—CGMP REQUIREMENTS THAT COMMENTS ASK US TO APPLY “WHERE THE POTENTIAL FOR CONTAMINATION EXISTS” OR ASK US TO CHANGE TO RECOMMENDATIONS

Examples of CGMP requirements that comments ask us to apply “where the potential for contamination exists”	Examples of CGMP requirements that comments ask us to change to recommendations
§ 117.20(a)—Management responsibility for maintaining grounds ..... § 117.20(b)—Suitability of plant construction and design ..... § 117.35(a)—General maintenance ..... § 117.35(c)—Pest control ..... § 117.37—Sanitary facilities and controls ..... § 117.40(a)(1)—Design of plant equipment and utensils ..... § 117.40(a)(3)—Installation and maintenance of equipment ..... § 117.40(b)—Seams on food-contact surfaces ..... § 117.40(c)—Construction of equipment ..... § 117.40(d)—Holding, conveying, and manufacturing systems. § 117.80(a)(1)—Adequate sanitation principles. § 117.80(a)(3)—Supervision of overall sanitation.	§ 117.35(a)—General maintenance. § 117.35(b)(1)—Cleaning Compounds and Sanitizing Agents. § 117.35(b)(2)—Identification and Storage of Toxic Materials. § 117.35(c)—Pest control. § 117.35(d)—Sanitation of food-contact surfaces. § 117.40(a)(6)—Maintenance of food-contact surfaces. § 117.40(b)—Seams on food-contact surfaces. § 117.40(c)—Construction of equipment. § 117.40(e)—Freezer and cold storage compartments.

(Response 70) We decline these requests. These long-standing provisions apply generally to the plant, equipment and utensils in the plant, sanitary operations and sanitary facilities in a plant, and operations conducted in a plant. To suggest otherwise is inconsistent with the precepts of good manufacturing practices.

For example, as required by § 117.20(a), an establishment must have control of its grounds regardless of the specific food being produced, because litter, waste, weeds, and grass can all attract and harbor pests, and the first

step for pest control in the plant is to avoid attracting pests. As required by § 117.20(b), a plant requires suitable construction and design regardless of the specific potential for contamination at any particular location in the plant. Each of the seven more specific provisions governed by § 117.20(b) adds the context that the requirements are directed to what is “adequate” (e.g., adequate space, adequate precautions, and adequate cleaning), and the defined term “adequate” provides context that the purpose of the requirements for plant construction and design are related to public health. As required by

§ 117.40, a plant requires clean and sanitary equipment regardless of the specific potential for contamination associated with a particular piece of equipment or the type of food being produced, because dirty equipment at one location in a plant can attract pests or become a harborage for environmental pathogens that can eventually lead to contamination in multiple locations in the plant. As required by § 117.80(a)(10), a food plant requires adequate sanitation regardless of the specific potential for contamination, and the term “adequate” provides flexibility for how an

establishment designs and implements its sanitation program when the potential for contamination is low. As required by § 117.80(a)(3), a plant requires adequate sanitation regardless of the specific potential for contamination, and someone must be in charge of sanitation to determine what needs to be done, where it needs to be done, and how often it needs to be done. The individual(s) who supervises the sanitation of the plant has flexibility in the design and implementation of a sanitation program when the potential for contamination is low.

In addition, the CGMP requirements are flexible requirements that each establishment can adapt to its own operations, equipment, and food products. For example, § 117.35(a) requires that buildings, fixtures, and other physical facilities of the plant must be maintained in a clean and sanitary condition and must be kept in repair adequate to prevent food from becoming adulterated. Cleaning and sanitizing of utensils and equipment must be conducted in a manner that protects against allergen cross-contact and against contamination of food, food-contact surfaces, or food-packaging materials. The standards established by the requirement are to protect against contamination and allergen cross-contact, and the defined term “adequate” provides the context that the specific measures adopted by an establishment are related to public health.

(Comment 71) Some comments ask us to change the phrase “work-in-process” to “in-process materials” in several provisions throughout proposed subpart B because they believe “in-process materials” to be more familiar, straightforward, and commonly understood than “work-in-process.”

(Response 71) “Work-in-process” is the common industry term used in widely disseminated industry publications (Ref. 23) (Ref. 24) and has been in use for more than 30 years in the umbrella CGMPs. In addition, we did not receive any comments objecting to the use of this term when we proposed to include it in previous revisions to the umbrella CGMPs (proposed rule 44 FR 33238 at 33247, June 8, 1979; final rule, 51 FR 22458, June 19, 1986). Therefore, we have retained the phrase “work-in-process” in the final rule.

#### VIII. Subpart A: Comments on Proposed § 117.1—Applicability and Status

We proposed to redesignate § 110.5 as proposed § 117.1, and to add a provision relevant to FSMA’s statutory provisions

for a prohibited act under section 301(uu) of the FD&C Act (21 U.S.C. 331(uu)). Some comments support the proposed provisions without change. For example, one comment expresses the view that one strength of the long-standing CGMPs is their applicability to the broad spectrum of food manufacturing, from the manufacture of processed products and packaging of fresh produce to production of food additives and GRAS substances. (We note that some packaging of fresh produce (e.g., packaging of RACs on a farm) is not subject to the CGMPs.)

Some comments that support the proposed provisions ask us to clarify how we will interpret the provisions (see, e.g., Comment 72).

In the following paragraphs, we discuss comments that ask us to clarify the proposed requirements or that disagree with, or suggest one or more changes to, the proposed requirements. After considering these comments, we are finalizing the provisions as proposed, with editorial and conforming changes as shown in table 52.

##### A. Comments on Proposed § 117.1(a)—Applicability

We proposed that the criteria and definitions in part 117 apply in determining whether a food is adulterated: (1) Within the meaning of section 402(a)(3) of the FD&C Act in that the food has been manufactured under such conditions that it is unfit for food; or (2) within the meaning of section 402(a)(4) of the FD&C Act in that the food has been prepared, packed, or held under insanitary conditions whereby it may have become contaminated with filth, or whereby it may have been rendered injurious to health. We also proposed that the criteria and definitions in part 117 also apply in determining whether a food is in violation of section 361 of the Public Health Service Act (42 U.S.C. 264).

(Comment 72) Some comments ask us to clarify that part 117 does not apply to activities that are subject to the requirements for CGMPs, hazard analysis and risk-based preventive controls for animal food and feed by inserting “intended for consumption by humans” after “food” in § 117.1(a).

(Response 72) We decline this request. As discussed in Response 6, the applicability of these regulations to human food is specified in the regulatory text by the title of the rule and by its placement in Subchapter B, rather than Subchapter E, of 21 CFR.

(Comment 73) Some comments assert that there is a clear difference between the criteria in proposed § 117.1(a)(1) used to describe adulterated food and

the referenced criteria in section 402(a)(3) of the FD&C Act, in that proposed § 117.1(a)(1) describes manufacturing conditions whereas section 402(a)(3) of the FD&C Act describes actual adulterated product.

(Response 73) We disagree with these comments. We interpret “otherwise unfit for food” in this long-standing statement of applicability to be broader than physical properties of the food and to apply to the manufacturing conditions of the food.

(Comment 74) Some comments note that FSMA granted FDA mandatory recall authority for adulterated food. These comments express concern that theoretically we could use a violation of the requirements for hazard analysis and risk-based preventive controls to determine that food is adulterated, thereby providing the basis for a mandatory recall of that food. These comments raise three issues regarding how we will apply § 117.1(a), with consequences for a potential mandatory recall of food.

First, these comments note that the regulatory text stating that the “criteria and definitions” apply in making a determination of adulteration appears to encompass the entirety of the rule. As a result, farms or facilities that violate any of the requirements in the proposed rule, including components not directly related to the safety of the food (such as recordkeeping requirements), could face a risk that we would deem their food adulterated.

Second, these comments assert that the regulatory text suggests that we would not automatically consider a food adulterated as a result of a violation of the proposed rule, because it states that the criteria and definitions “apply in determining” whether a food will be considered adulterated, rather than that the food “is” adulterated.

Third, these comments state that it is not clear how the exemption applicable to qualified facilities is included in the “criteria and definitions” used in making a determination of adulteration. These comments ask us to clarify that we will not just automatically assume that qualified facilities are selling adulterated food because they are by definition exempt from the requirements for hazard analysis and risk-based preventive controls.

(Response 74) The comments are correct that the criteria and definitions “apply in determining” whether a food will be considered adulterated, rather than that the food “is” adulterated. In determining whether a food that is manufactured, processed, packed, or held in violation of part 117 (including a violation of the recordkeeping

requirement) is adulterated, we would consider the totality of the available data and information about the violation and the food before reaching a conclusion that the food is adulterated.

Although this rule does not address the mandatory recall provisions of FSMA, the statutory provisions establish two basic criteria. (See section 423(a) of the FD&C Act (21 U.S.C. 350l).) First, we must determine that there is a “reasonable probability” that the food is adulterated under section 402 of the FD&C Act or misbranded under section 403(w) of the FD&C Act. A violation of part 117 would be relevant to determining whether a food is adulterated under section 402. Second, we must determine that there is a reasonable possibility that the use of, or exposure to, that food will cause serious adverse health consequences or death to humans or animals. Not all food that is adulterated has a reasonable probability of causing serious adverse health consequences or death to humans or animals. For examples of food contamination with a reasonable probability of causing serious adverse health consequences or death to humans or animals, see the annual reports of the Reportable Food Registry (RFR) (Ref. 25) (Ref. 26) (Ref. 27) (Ref. 28).

A facility that is exempt from any requirement of part 117, including the requirements for hazard analysis and risk-based preventive controls, would not be in violation of part 117 if it did not comply with provisions that it is not subject to.

*B. Comments on Proposed § 117.1(b)—Prohibited Act*

We proposed that the operation of a facility that manufactures, processes, packs, or holds food for sale in the United States is a prohibited act under section 301(uu) of the FD&C Act (21 U.S.C. 331(uu)) if the owner, operator,

or agent in charge of such facility is required to comply with, and is not in compliance with, section 418 of the FD&C Act or subparts C, D, E, or F of part 117 (proposed § 117.1(b)).

(Comment 75) Some comments from State regulatory agencies note that this new provision is not covered under the applicable State statute and that making any changes to the State statute can be a lengthy process that takes up to 3 years to complete.

(Response 75) See Response 5 for a discussion of our approach to working with our food safety partners in the States.

*C. Comments on Proposed § 117.1(c)—Specific CGMP Requirements*

We proposed to redesignate § 110.5(b) as proposed § 117.1(c) with no changes. We received no comments that disagreed with our proposal, and are finalizing the proposed provision without change.

**IX. Subpart A: Comments on Proposed § 117.3—Definitions**

We proposed to revise some definitions that had been established in part 110, redesignate and re-establish the remaining definitions in part 117 (except for the definition of “shall,” which we proposed to delete), and establish several new definitions in part 117. Some comments support one or more of these proposed definitions without change. For example, some comments state that they support the proposed definitions for the following terms with no suggested revisions: critical control point, facility, food allergen, food-contact surfaces, microorganism, mixed-type facility, monitor, plant, safe-moisture level, subsidiary, and validation. Some comments support our proposal, in the 2014 supplemental preventive controls notice, to use the phrase “chemical (including radiological)” in the

definition of “hazard,” noting that doing so is consistent with FSMA, current industry practice, and Codex and global HACCP standards. Some comments that support a proposed definition suggest alternative or additional regulatory text, such as adding examples to make the definition clearer (see, e.g., Comment 81 and Comment 87). Some comments that support a proposed definition ask us to clarify how we will interpret the definition (see, e.g., Comment 77 and Comment 87).

In the following sections, we discuss comments that ask us to clarify the proposed definitions or that disagree with, or suggest one or more changes to, the proposed definitions. After considering these comments, we have revised the proposed requirements as shown in table 9, with editorial and conforming changes as shown in table 52. We also have deleted the definition of “should,” because the final rule does not use that term.

We also discuss definitions for additional terms (*i.e.*, “audit,” “correction,” “defect action level,” “full-time equivalent employee,” “qualified facility exemption,” “raw agricultural commodity,” “supply-chain-applied control,” “written procedures for receiving raw materials and other ingredients,” and “unexposed packaged food”) that we are establishing in the final rule to simplify the regulatory text throughout the regulations and improve clarity. We also discuss a new name (*i.e.*, “preventive controls qualified individual”) for the definition of a term that we had proposed to name “qualified individual” and are establishing a new definition for the term “qualified individual.” Finally, we discuss definitions that comments ask us to add, but that we did not add, to the final rule.

TABLE 9—DEFINITIONS THAT WE PROPOSED TO ESTABLISH IN § 117.3

Definition	Current definition (§ 110.3) or new definition?	If current, did we propose any revisions?	Did we receive any comments that disagreed with the definition we proposed to include in part 117?	Did we make any changes to the proposed definition other than the editorial and conforming changes listed in Table 52?
Acid foods or acidified foods .....	Current .....	No .....	No .....	No.
Adequate .....	Current .....	No .....	Yes .....	No.
Affiliate .....	New .....	N/A .....	Yes .....	No.
Allergen cross-contact .....	New .....	N/A .....	Yes .....	No.
Audit .....	New in the final rule ....	N/A .....	N/A .....	N/A.
Batter .....	Current .....	No .....	No .....	No.
Blanching .....	Current .....	No .....	No .....	No.
Calendar day .....	New .....	N/A .....	No .....	No.
Correction .....	New in the final rule ....	N/A .....	N/A .....	N/A.
Critical control point .....	Current .....	Yes .....	Yes .....	No.
Defect action level .....	New in the final rule ....	N/A .....	N/A .....	N/A.
Environmental pathogen .....	New .....	N/A .....	Yes .....	Yes.

TABLE 9—DEFINITIONS THAT WE PROPOSED TO ESTABLISH IN § 117.3—Continued

Definition	Current definition (§ 110.3) or new definition?	If current, did we propose any revisions?	Did we receive any comments that disagreed with the definition we proposed to include in part 117?	Did we make any changes to the proposed definition other than the editorial and conforming changes listed in Table 52?
Facility .....	New .....	N/A .....	Yes .....	No.
Farm .....	New .....	N/A .....	See discussion of § 1.227 in section IV.B.	No. <sup>1</sup>
FDA .....	New .....	N/A .....	No .....	No.
Food .....	Current .....	No .....	Yes .....	No.
Food allergen .....	New .....	N/A .....	Yes .....	No.
Food-contact surfaces .....	Current .....	Yes .....	No .....	No.
Full-time equivalent employee .....	New in the final rule .....	N/A .....	N/A .....	N/A.
Harvesting .....	New .....	N/A .....	See discussion of § 1.227 in section IV.C.	Yes.
Hazard .....	New .....	N/A .....	Yes .....	Yes.
Holding .....	New .....	N/A .....	See discussion of § 1.227 in section IV.D.	Yes.
Known or reasonably foreseeable hazard ...	New .....	N/A .....	Yes .....	Yes.
Lot .....	Current .....	No .....	Yes .....	Yes.
Manufacturing/processing .....	New .....	N/A .....	See discussion of § 1.227 in section IV.E.	Yes.
Microorganisms .....	Current .....	Yes .....	Yes .....	No.
Mixed-type facility .....	New .....	N/A .....	See discussion of § 1.227 in section IV.F.	No.
Monitor .....	New .....	N/A .....	Yes .....	Yes.
Packaging (when used as a verb) .....	New .....	N/A .....	Yes .....	The final rule does not include a definition of packaging (when used as a verb).
Packing .....	New .....	N/A .....	See discussion of § 1.227 in section IV.G.	No.
Pathogen .....	New .....	N/A .....	Yes .....	No.
Pest .....	Current .....	No .....	Yes .....	No.
Plant .....	Current .....	Yes .....	Yes .....	Replace the term “establishment” with “structure”.
Preventive controls .....	New .....	N/A .....	Yes .....	No.
Preventive controls qualified individual .....	New .....	N/A .....	Yes .....	No, except to change the name of the term from “qualified individual” to “preventive controls qualified individual”.
Qualified auditor .....	New .....	N/A .....	Yes .....	Yes.
Qualified end-user .....	New .....	N/A .....	Yes .....	Yes.
Qualified facility .....	New .....	N/A .....	Yes .....	No.
Qualified facility exemption .....	New in the final rule .....	N/A .....	N/A .....	N/A.
Qualified individual .....	New in the final rule .....	N/A .....	N/A .....	N/A.
Quality control operation .....	Current .....	No .....	No .....	No.
Raw agricultural commodity .....	New in the final rule .....	N/A .....	N/A .....	N/A.
Ready-to-eat (RTE) food .....	New .....	N/A .....	Yes .....	No.
Receiving facility .....	New .....	N/A .....	Yes .....	No.
Rework .....	Current .....	No .....	No .....	No.
Safe-moisture level .....	Current .....	Yes .....	No .....	No.
Sanitize .....	Current .....	Yes .....	Yes .....	Yes.
Should .....	Current .....	No .....	No .....	Deleted the definition.
Significant hazard .....	New .....	N/A .....	Yes .....	Yes, including changing the term to “hazard requiring a preventive control”.
Significantly minimize .....	New .....	N/A .....	Yes .....	No.
Small business .....	New .....	N/A .....	Yes .....	Yes.
Subsidiary .....	New .....	N/A .....	Yes .....	No.
Supplier .....	New .....	N/A .....	Yes .....	Yes.
Supply-chain -applied control .....	New in the final rule .....	N/A .....	N/A .....	N/A.
Unexposed packaged food .....	New in the final rule .....	N/A .....	N/A .....	N/A.

TABLE 9—DEFINITIONS THAT WE PROPOSED TO ESTABLISH IN § 117.3—Continued

Definition	Current definition (§ 110.3) or new definition?	If current, did we propose any revisions?	Did we receive any comments that disagreed with the definition we proposed to include in part 117?	Did we make any changes to the proposed definition other than the editorial and conforming changes listed in Table 52?
Validation .....	New .....	N/A .....	Yes .....	Yes.
Verification .....	New .....	N/A .....	Yes .....	Yes.
Very small business .....	New .....	N/A .....	Yes .....	Yes.
Water activity .....	Current .....	No .....	No .....	No.
Written procedures for receiving raw materials and other ingredients.	New in the final rule .....	N/A .....	N/A .....	N/A.
You .....	New .....	N/A .....	No .....	No.

<sup>1</sup> The “farm” definition in § 117.3 is a cross-reference to the “farm” definition in the section 415 registration regulations. Although we did revise the “farm” definition in the section 415 registration regulations (see section IV.B), the cross-reference we are establishing in § 117.3 is unchanged.

*A. Redesignation*

We proposed to redesignate all definitions in § 110.3(a) through (r) as proposed § 117.3, eliminate paragraph designations (such as (a), (b), and (c)), and add new definitions in alphabetical order. We received no comments that disagreed with our proposal, and are finalizing the proposed redesignations.

*B. Definitions in Current Part 110 That We Proposed To Delete*

We proposed to delete the definition of “shall” and use “must” instead. We received no comments that disagreed with our proposal, and are deleting the definition of “shall” as proposed.

*C. Definitions That We Proposed To Establish in Part 117*

1. Adequate

We proposed to define the term “adequate” to mean that which is needed to accomplish the intended purpose in keeping with good public health practice.

(Comment 76) Some comments assert that the definition is vague and ask us to clarify what constitutes “adequate” for systems such as operating systems for waste treatment and disposal. Other comments ask us to develop guidance on thresholds and processes that qualify as “adequate.” Other comments assert that the word “adequate” must be used in combination with the word “reasonable” to properly describe the intended measures and precautions. As an example, these comments assert that the definition of “adequate” could lead to excessive requirements when applied to the provisions for disease control and hygiene (§ 117.10).

(Response 76) We disagree that this long-standing definition of the term “adequate” is vague. The comments do not provide any examples of how we have interpreted this definition in the past in a way that creates practical

problems when applying CGMP requirements, including requirements directed to the management of waste or the provisions for disease control and hygiene. Our intent in using the term “adequate” is to provide flexibility for a food establishment to comply with the requirement in a way that is most suitable for its establishment. We decline the request to develop guidance to explicitly address “thresholds” or to describe processes that qualify as adequate. The CGMPs established in this are broadly applicable procedures and practices rather than very specific procedures and practices where additional interpretation from FDA might be appropriate.

2. Affiliate and Subsidiary

We proposed to define the term “affiliate” to mean any facility that controls, is controlled by, or is under common control with another facility. We proposed to define the term “subsidiary” to mean any company which is owned or controlled directly or indirectly by another company. These proposed definitions would incorporate the definition in sections 418(l)(4)(A) and (D) of the FD&C Act and would make the meanings of these terms clear when used in the proposed definition of “qualified facility.”

(Comment 77) Some comments ask us to clarify that a facility that has no material connection with another food processing operation would not be considered as an “affiliate” of that operation.

(Response 77) It is not clear what the comments mean by “no material connection with another food processing operation.” To the extent that a facility does not control, is not controlled by, or is not under common control with another facility, we agree that the facility would not be considered an affiliate of that food processing operation.

(Comment 78) Some comments assert that the definitions of “affiliate” and “subsidiary” fail to account for the legal differences between a piece of property (*i.e.*, a facility) and a business entity or person. These comments ask us to consider amending the proposed definition of “qualified facility” to clarify what sales to include in determining whether a facility so qualifies.

(Response 78) See Response 118.

3. Allergen Cross-Contact

We proposed to define the term “allergen cross-contact” to mean the unintentional incorporation of a food allergen into a food.

(Comment 79) Some comments assert that the term “incorporation” used in the definition is a vague term that has entirely different meanings when used by different segments of the food industry (*e.g.*, the term would mean something different to a produce wholesaler than to a cereal manufacturer). These comments ask us to provide either a clarification or a definition for the term “incorporation.”

(Response 79) By “unintentional incorporation of a food allergen into food” we mean that the food allergen would be in a food when the producer of the food did not intend it to be in the food—*e.g.*, if a milk-based beverage contains soybeans in addition to milk. Several provisions of the rule require that a facility take steps to prevent such unintentional incorporation of a food allergen into food. See our previous discussion of the importance of preventing allergen cross-contact (78 FR 3646 at 3693).

4. Critical Control Point

We proposed to revise the definition for “critical control point” to mean a point, step, or procedure in a food process at which control can be applied and is essential to prevent or eliminate

a food safety hazard or reduce such hazard to an acceptable level.

(Comment 80) Some comments ask us to specify that a critical control point is essential to reduce the presence of hazards such as microorganisms to “minimize the risk of foodborne illness” rather than to “reduce such hazard to an acceptable level.” These comments assert that this revision would be consistent with the approach in the proposed produce safety rule. Other comments disagree with the proposed definition because it does not define a term (*i.e.*, acceptable level) used in the definition.

(Response 80) We decline to modify the definition as requested by these comments. The proposed definition matches the statutory definition in section 418(o)(1) of the FD&C Act and is consistent with definitions in the NACMCF HACCP guidelines, the Codex HACCP Annex, and Federal HACCP regulations for seafood, juice, and meat and poultry (78 FR 3646 at 3695). The proposed produce safety rule, which did not propose to define “critical control point,” focused on biological hazards. However, critical control points may be established to control chemical or physical hazards in addition to biological hazards. The standard suggested by the comments is not inconsistent with the definition we proposed for “critical control point” in the human preventive controls rule, because preventing or eliminating a food safety hazard or reducing such hazard to an acceptable level would minimize the risk of foodborne illness. However, the standard suggested by the comments was narrowly directed to biological hazards, because chemical and physical hazards generally cause injury rather than illness.

We do not need to define every term used in the definition. By specifying that a point, step, or procedure in a food safety process would reduce a hazard to an “acceptable level,” the definition provides flexibility for a facility to determine an appropriate level in a particular circumstance. Consistent with the approach recommended in the proposed produce safety rule (78 FR 3504 at 3545), a facility could use current FDA guidance on microbiological hazards (*e.g.*, Ref. 29 and Ref. 30) to inform its decision on what constitutes an acceptable level. In those documents, we use the phrase “adequately reduce” to mean capable of reducing the presence of *Salmonella* to an extent sufficient to prevent illness. The extent of reduction sufficient to prevent illness usually is determined by the estimated extent to which *Salmonella* spp. may be present in the

food combined with a safety factor to account for uncertainty in that estimate. For example, if it is estimated that there would be no more than 1000 (*i.e.*, 3 logs) *Salmonella* organisms in the food, and a safety factor of 100 (*i.e.*, 2 logs) is employed, a process adequate to reduce *Salmonella* spp. would be a process capable of reducing *Salmonella* spp. by 5 logs.

##### 5. Environmental Pathogen

We proposed to define the term “environmental pathogen” to mean a pathogen capable of surviving and persisting within the manufacturing, processing, packing, or holding environment such that food may be contaminated and may result in foodborne illness if that food is consumed without treatment to significantly minimize or prevent the environmental pathogen. We also proposed to specify that environmental pathogen does not include the spores of pathogenic sporeformers.

(Comment 81) Some comments ask us to include *Salmonella* spp. and *L. monocytogenes* in the regulatory text as examples of environmental pathogens because of the likelihood that these environmental pathogens could contaminate ready-to-eat (RTE) food. Other comments ask us to provide a broader list (including *Escherichia coli*, *Campylobacter*, pathogenic *Vibrio*, *Staphylococcus aureus*, *Clostridium botulinum*, *Shigella*, *Yersinia enterocolitica*, and viruses such as rotoviruses and noroviruses) in the preamble to the final rule or in guidance, and to make clear that the list is not all-inclusive. Some comments emphasize the need for flexible language because any list of microorganisms might change over time, particularly as new environmental pathogens emerge.

Some comments ask us to include the indicator organism *Listeria* spp. in the regulatory text, because analysis of *Listeria* spp. is faster than analysis of *L. monocytogenes*. Other comments ask us to include pathogens that have been associated with RACs, as reported by CDC.

(Response 81) We agree that *Salmonella* spp. and *L. monocytogenes* are useful examples of environmental pathogens and have added these two examples to the proposed definition, which had not included examples. As the comments point out, adding these two examples to the definition does not mean that these two pathogens are the only environmental pathogens that a facility must consider in its hazard analysis. New environmental pathogens can emerge at any time, and other

pathogens (*e.g.*, *Cronobacter* spp.) can also be environmental pathogens (78 FR 3646 at 3816).

We have not included the indicator organism *Listeria* spp. as an example of an environmental pathogen, whether in the regulatory text, in the preamble of this document, or in guidance. Although we agree that *Listeria* spp. is an appropriate indicator organism when conducting verification testing for sanitation controls, the definition in question is for a pathogen, not for indicators of a pathogen. Other provisions of the rule are more appropriate to provide the context that a facility has flexibility for how to conduct verification testing for an environmental pathogen, including an option to test for an indicator organism. (See, *e.g.*, § 117.165(a)(2) and (3).)

*L. monocytogenes*, *Salmonella* spp., and some of the other pathogens mentioned in the comments have been associated with RACs. To the extent that the comments are asking us to identify some environmental pathogens that have been associated with RACs, by identifying these pathogens in the regulatory text or in this preamble we have done so. However, it is important to note that the term “environmental pathogen” as defined in this rule is directed to pathogens in the food processing environment (such as the insanitary conditions in a facility that packed cantaloupes linked to an outbreak of listeriosis (78 FR 3646 at 3814)), not to pathogens present in the growing environment for a RAC.

(Comment 82) Some comments ask us to define “environmental pathogen” as a microorganism that is of public health significance and is capable of surviving and persisting within the manufacturing, processing, packing, and holding environment of the food being prepared.

(Response 82) We decline this request. The definition of “environmental pathogen” should not change depending on the food being prepared in a particular facility. As a practical matter, the facility will consider the manufacturing, processing, packing, and holding environment of the food being prepared when it conducts its hazard analysis (§ 117.130).

(Comment 83) Some comments ask us to focus attention on the areas where environmental monitoring is particularly important by modifying the definition to address the risk of contamination to RTE food and to foods exposed to the environment after a lethality step. Other comments ask us to consider the number and types of different products produced, the complexity of processing procedures,

the amount of product produced, and whether an environmental sampling program is in place.

(Response 83) We decline these requests, which are asking us to specify in a definition factors associated with developing an environmental monitoring program. The purpose of a definition is to simply explain what a term means, not to establish requirements, or provide guidance about requirements, that use the term.

(Comment 84) Some comments ask us to clarify the meaning of the term “persisting” as used in the definition, such as whether it means that a sanitation process will not remove the microorganism.

(Response 84) We use the term “persisting” to mean that a pathogen can become established if cleaning is not adequate. Once a pathogen becomes established, appropriate sanitation measures can remove the pathogen. However, sanitation procedures necessary to eliminate an environmental pathogen that has become established generally are more aggressive than routine sanitation procedures.

(Comment 85) Some comments ask us to revise the definition to specify that the microorganisms are “potentially” of public health significance.

(Response 85) We decline this request. The definition is only directed at those microorganisms that are of public health significance.

(Comment 86) One comment asserts that the proposed definition of “environmental pathogen” excludes the waterborne pathogens *Cyclospora* and *Cryptosporidium* and asks us to revise the definition so that these pathogens will be considered “environmental pathogens” for the purposes of the human preventive controls rule. The comment asserts that excluding these waterborne pathogens does not take into account the considerable food safety hazard of “spores” of “pathogenic sporeformers” that can be present in and delivered to a food processing facility by processing and ingredient water, both well water and surface water from either private or municipal supply, in both domestic and foreign facilities. The comment asks us to delete the statement that an environmental pathogen does not include the spores of pathogenic sporeformers so that, according to the comment, *Cyclospora* and *Cryptosporidium* would fall within the definition of “environmental pathogen.”

(Response 86) We disagree that the pathogens *Cyclospora* and *Cryptosporidium* should be considered “environmental pathogens” as we use that term in this rule. Our definition of

“environmental pathogen” is directed to those pathogens that are capable of surviving and persisting within the manufacturing, processing, packing, or holding environment of a food establishment, not the water that is used in a food processing establishment. See the discussion of environmental pathogens in the food processing environment in section I.D of the Appendix to the 2013 proposed human preventive controls rule (78 FR 3646 at 3813–3815, with corrected reference numbers at 78 FR 17142 at 17144–17146). As discussed in that Appendix, the available data and information associate insanitary conditions in food facilities with contamination of a number of foods with *Salmonella* spp. and *L. monocytogenes*. Such contamination has led to recalls and to outbreaks of foodborne illness. As a result, the rule includes several provisions directed to those pathogens, such as *Salmonella* spp. and *L. monocytogenes*, that are capable of surviving and persisting within a food establishment (thereby serving as a source of contamination of the food establishment environment) and uses the defined term “environmental pathogens” to describe those pathogens. These specific provisions do not apply to waterborne pathogens that do not survive and persist within a food establishment.

By “pathogenic sporeformers,” we mean “pathogenic sporeforming bacteria,” and we are substituting the term “pathogenic sporeforming bacteria” for “pathogenic sporeformers” in the definition of “environmental pathogen” to make that clearer. Both of the waterborne pathogens discussed by this comment are protozoan parasites, not bacteria (Ref. 31).

The fact that waterborne organisms such as *Cyclospora* and *Cryptosporidium* are not “environmental pathogens” as that term is used in this rule does not mean that a facility has no responsibility to evaluate whether *Cyclospora* or *Cryptosporidium* are known or reasonably foreseeable hazards that require a preventive control. For example, when a fresh-cut produce processing facility receives produce from a geographic region where *Cyclospora* or *Cryptosporidium* have been associated with food safety problems, the facility likely would address the potential for contamination of incoming produce with *Cyclospora* or *Cryptosporidium* in its supply-chain program (see subpart G for the requirements of the supply-chain program).

## 6. Facility

We proposed to define the term “facility” to mean a domestic facility or a foreign facility that is required to register under section 415 of the FD&C Act in accordance with the requirements of 21 CFR part 1, subpart H. Comments directed to the meaning of the term “facility” address its meaning as established in the section 415 registration regulations, rather than this definition established in part 117. See Comment 4 and Response 4.

## 7. Farm

We proposed to define the term “farm” by reference to the definition of that term in proposed § 1.227 rather than by repeating the full text of the “farm” definition in part 117. See section IV.B for a discussion of the “farm” definition that we are establishing in § 1.227.

## 8. Food

We proposed to define the term “food” to mean food as defined in section 201(f) of the FD&C Act and to include raw materials and ingredients. Under section 201(f), the term “food” means: (1) Articles used for food or drink for man or other animals, (2) chewing gum, and (3) articles used for components of any such article.

(Comment 87) Some comments ask us to include examples in the definition, particularly dietary supplements and dietary ingredients. These comments also ask us to clarify whether the definition applies to food for human consumption, animal consumption, or both.

(Response 87) We decline the request to include examples in the definition. Dietary supplements and dietary ingredients are articles used for food or drink for man, as are many other articles. There are many examples of food and adding a limited list of examples could be confusing rather than helpful. Although the definition of food includes food for both human consumption and animal consumption, the provisions of the rule are clearly directed to food for human consumption (see Response 6 and Response 72).

(Comment 88) Some comments ask us to consider fundamental and important differences between food additives and GRAS substances and finished food. These comments explain that food additives and GRAS substances may be synthesized using various chemical and biochemical processes, or may be extracted, hydrolyzed or otherwise modified from their natural sources, and result in food safety hazards that are quite different from finished food

preparations. These comments also explain that food additives and GRAS substances are often produced using processes that minimize microbial contamination hazards and are almost always used in food products that undergo further downstream processing. These comments assert that food additives and GRAS substances generally present a significantly lower public health hazard compared to finished food and should be regulated accordingly.

(Response 88) Substances such as food additives and GRAS substances are food and are subject to the requirements of this rule. Both the CGMP requirements in subpart B and the requirements for hazard analysis and risk-based preventive controls in subparts C and G provide flexibility to address all types of food. (As discussed in section XLII, the final rule establishes the requirements for a supply-chain program in subpart G, rather than within subpart C as proposed. As a result, this document refers to subparts C and G when broadly referring to the requirements for preventive controls.) Some comments point out that one strength of the long-standing CGMPs is their applicability to the broad spectrum of food manufacturing, from the manufacture of processed products to production of food additives and GRAS substances (see section VIII). A manufacturer of a food additive or GRAS substance has flexibility to comply with the requirements of the rule based on the nature of the production processes and the outcome of the hazard analysis for that food substance. (See also Response 221.)

(Comment 89) Some comments ask us to limit the definition of “food” as it would apply to the new requirements for hazard analysis and risk-based preventive controls to only cover produce and processed foods covered by the rules, rather than all food (human and animal, produce and non-produce, low-risk and high-risk).

(Response 89) We decline this request. It is not necessary to modify the definition of “food” to limit applicability of the rule to human food. (See Response 6.) The umbrella CGMPs that we are establishing in subpart B are long-standing provisions that establish basic requirements for the manufacturing, processing, packing, and holding of food to prevent adulteration and are not “one-size-fits-all.” (See Response 221.) The new requirements for hazard analysis and risk-based preventive controls likewise are not “one-size-fits-all,” and facilities that are subject to the rule would consider the risk presented by the products as part of

their hazard evaluation; a facility that appropriately determines through its hazard analysis that there are no hazards requiring preventive controls would document that determination in its written hazard analysis but would not need to establish preventive controls and associated management components. (See Response 222.)

#### 9. Food Allergen

We proposed to define the term “food allergen” to mean a major food allergen as defined in section 201(qq) of the FD&C Act.

(Comment 90) Some comments ask us to narrow the definition of food allergen by specifying that a substance is only a food allergen when it is not disclosed on the product label.

(Response 90) We decline this request, which appears to confuse the distinction between what a food allergen is and when a product would be misbranded under section 403(w) of the FD&C Act. The substances listed in section 201(qq) of the FD&C Act are food allergens; if any of those substances are not disclosed on the product label, then the product would be misbranded under section 403(w) of the FD&C Act.

(Comment 91) Some comments ask us to expand the existing exemption for RACs from the definition of major food allergen in section 403(w)(1) of the FD&C Act to include raw fish.

(Response 91) This comment is unclear and appears to be confusing the definition of “major food allergen” in section 201(qq) of the FD&C Act with criteria for when a food shall be deemed to be misbranded under section 403(w) of the FD&C Act. Under section 403(w), a food shall be deemed misbranded if it is not a raw agricultural commodity and it is, or it contains an ingredient that bears or contains, a major food allergen, unless certain labeling requirements are met. Under section 201(r) of the FD&C Act, the term “raw agricultural commodity” means any food in its raw or natural state, including all fruits that are washed, colored, or otherwise treated in their unpeeled natural form prior to marketing. Fish are food and, thus, raw, unprocessed fish are RACs within the meaning of section 403(w). Thus, the misbranding provisions of section 403(w) would not apply to raw, unprocessed fish, because those misbranding provisions do not apply to RACs. However, the exemption in section 403(w) from the conditions under which a food shall be deemed to be misbranded do not establish an exemption for RACs in the definition of “major food allergen” in section 201(qq).

To the extent that the comment is asking us to revise either the statutory definition of “major food allergen” in section 201(qq) of the FD&C Act, or to revise the criteria for when a food shall be deemed misbranded under section 403(w) of the FD&C Act, we do not have authority to do so.

(Comment 92) Some comments ask us to include an example of an ingredient derived from an allergen in the definition.

(Response 92) We decline this request. The definition of “major food allergen” in section 201(qq) of the FD&C Act is sufficient to define the term. Casein and whey protein, each of which are derived from milk, are examples of ingredients that would satisfy the definition of “major food allergen” in section 201(qq).

#### 10. Harvesting

We proposed to establish in § 117.3 the same definition of “harvesting” as we proposed to establish in §§ 1.227 and 1.328. See section IV.C for a discussion of comments we received to the proposed definition of “harvesting” in §§ 1.227 and 1.328, and our responses to those comments.

#### 11. Hazard

We proposed to define the term “hazard” to mean any biological, chemical (including radiological), or physical agent that is reasonably likely to cause illness or injury in the absence of its control.

(Comment 93) Some comments express concern that the rule would refer to four levels of “hazard”—*i.e.*, “hazard,” “known or reasonably foreseeable hazard,” “significant hazard,” and “serious adverse health consequences or death to humans or animals” hazard. These comments ask us to provide sufficient clarity to be able to distinguish between these types of hazards and to provide examples in guidance as to how these terms will be applied in determining compliance with the rule. Other comments express concern that the definitions do not establish a meaningful distinction between “hazard” and “significant hazards” and do not sufficiently distinguish between the hazards identified in the first and second steps of the hazard analysis (first narrowing hazards to “known or reasonably foreseeable hazards” and then narrowing the “known or reasonably foreseeable hazards” to “significant hazards”).

(Response 93) The rule uses three of these terms (*i.e.*, “hazard,” “known or reasonably foreseeable hazard,” and the proposed term “significant hazard”) to

establish a tiered approach to the requirements for hazard analysis and risk-based preventive controls. The term “hazard” is the broadest of these three terms—any biological, chemical (including radiological), or physical agent that is reasonably likely to cause illness or injury. To conduct its hazard analysis, a facility starts by first narrowing down the universe of all potential hazards to those that are “known or reasonably foreseeable” for each type of food manufactured, processed, packed, or held at its facility. The outcome of the facility’s hazard analysis is a determination of “significant hazards”—*i.e.*, the subset of those known or reasonably foreseeable hazards that require a preventive control.

To make this clearer, we have: (1) Revised the proposed definition of “hazard”; (2) changed the term “significant hazard” to “hazard requiring a preventive control”; and revised the definition of “hazard requiring a preventive control” (formerly “significant hazard”). See Response 94, Response 126, Response 127, Response 128, and Response 129.

The rule does not define the term “serious adverse health consequences or death to humans or animals” hazard. However, the requirements for a supply-chain program refer to a hazard for which there is a reasonable probability that exposure to the hazard will result in serious adverse health consequences or death to humans (see § 117.430(b)). For additional information on how we interpret “serious adverse health consequences or death to humans or animals,” see our guidance regarding the Reportable Food Registry (Ref. 32) (Ref. 33), which addresses statutory requirements regarding “reportable foods.” As explained in that guidance, a “reportable food” is an article of food (other than dietary supplements or infant formula) for which there is a reasonable probability that the use of, or exposure to, such article of food will cause serious adverse health consequences or death to humans or animals. The guidance includes examples of circumstances under which food might be reportable.

(Comment 94) Some comments assert that the distinction between the definitions of “hazard” and “significant hazard” is not discernable because the proposed definition of “hazard” currently takes into account whether or not a “hazard” is or is not controlled. These comments ask us to delete the phrase “in the absence of its control” from the definition of “hazard” to clarify that hazards are simply the agents that are reasonably likely to

cause illness or injury. Likewise, other comments assert that any hazard that is “reasonably likely to cause illness or injury in the absence of its control” will, if known or reasonably foreseeable, likely be controlled by any knowledgeable person.

(Response 94) We have deleted the phrase “in the absence of its control” from the definition of “hazard.” As previously discussed, the phrase “in the absence of its control” is not included in the definition of “hazard” in the Codex HACCP Annex, our HACCP regulation for seafood, or the HACCP regulation for meat and poultry, although it is included in the NACMCF HACCP Guidelines and our HACCP regulation for juice (78 FR 3646 at 3697). We agree that deleting this phrase from the definition of “hazard” will more clearly distinguish between the terms “hazard” and “hazard requiring a preventive control” that we are establishing in this rule. We see no reason to propose an analogous change to the definition of “hazard” in our HACCP regulation for juice because that regulation only defines the single term “hazard” and, thus, the issue discussed in these comments does not apply.

We also replaced the phrase “that is reasonably likely to cause illness or injury” with “that has the potential to cause illness or injury” to more clearly distinguish “hazard” from “known or reasonably foreseeable hazard.” This increases the alignment of the definition of “hazard” in this rule with the Codex definition of “hazard.”

(Comment 95) Some comments ask us to add that the term hazard also means any agent that would cause a food to become adulterated under section 402 of the FD&C Act.

(Response 95) The suggested addition is inconsistent with current national and international understanding of what constitutes a hazard (Ref. 34) (Ref. 35) because it would include agents such as filth, which would adulterate food within the meaning of section 402(a)(4) of the FD&C Act but would be unlikely to cause illness or injury (Ref. 36).

## 12. Holding

We proposed to establish in § 117.3 the same definition of “holding” as we proposed to establish in §§ 1.227 and 1.328. See section IV.D for a discussion of comments we received to the proposed definition of “holding” in §§ 1.227 and 1.328, and our responses to those comments.

## 13. Known or Reasonably Foreseeable Hazard

We proposed to define the term “known or reasonably foreseeable

hazard” to mean a biological, chemical (including radiological), or physical hazard that has the potential to be associated with the facility or the food.

(Comment 96) Some comments support the definition as proposed, noting that it implies that the implementation of a preventive control is based both on the severity and likelihood of the hazard, can help to distinguish between the requirements of this rule and HACCP requirements, and provides for the proper consideration of both the food and the facility when determining whether a hazard is “known or reasonably foreseeable.” Other comments ask us to modify the definition to specify that the term means a hazard “that is known to be, or has the potential to be,” associated with the facility or the food” to better align with the term as FDA proposed to define it in the proposed FSVP rule. (See 79 FR 58574 at 58595.)

(Response 96) We have revised the definition as requested by the comments to better align with the proposed FSVP rule.

(Comment 97) Some comments ask us to revise the definition so that it addresses a hazard that is known to be, or has the potential to be, associated with a food, the facility in which it is manufactured/processed, or the location or type of farm on which it is grown or raised. These comments assert that the type of farm may affect those hazards that are known or reasonably foreseeable.

(Response 97) We decline this request, which appears related to another difference between the definition proposed in this rule and the definition of this term in the proposed FSVP rule. The proposed FSVP rule would define “known or reasonably foreseeable hazard” as a hazard that is known to be, or has the potential to be, associated with a food or the facility “in which it is manufactured/processed.” (See 79 FR 58574 at 58595.) In this rule, we do not need to specify that the applicable facility is the one “in which the food is manufactured/processed” because this rule applies to the owner, operator, or agent in charge of the facility in which the food is manufactured, processed, packed, or held, and that applicability does not need to be repeated in each provision. To the extent that this comment is expressing concern about raw materials or other ingredients that a facility would receive from a farm, those concerns would be considered in the facility’s hazard analysis, which would include a hazard evaluation that considers factors such as those related to the source of

raw materials and other ingredients (see § 117.130(c)(2)(iii)).

(Comment 98) Some comments ask us to include “food allergens” in the parenthetical where we list radiological hazards as a type of chemical hazard.

(Response 98) We decline this request. As previously discussed, the definitions of “hazard” or “food hazard” in the NACMCF HACCP guidelines, the Codex HACCP Annex, and Federal HACCP regulations for seafood, juice, and meat and poultry all define hazard with respect to biological, chemical, and physical agents, and we proposed to include radiological agents to implement section 418(b)(1)(A) of the FD&C Act (78 FR 3646 at 3697). We subsequently proposed to include radiological hazards as a subset of chemical hazards because comments recommended that we do so, and we believe that facilities in the past have considered radiological hazards as chemical hazards when conducting a hazard analysis for the development of HACCP plans (79 FR 58524 at 58557).

In this document, we affirm our proposal to implement section 418(b)(1)(A) of the FD&C Act by specifically including radiological hazards in the definition of hazard. We acknowledge that food allergen hazards (together with pesticide and drug residues, natural toxins, decomposition, and unapproved food or color additives) also are a subset of chemical hazards but do not find it necessary to list all examples of chemical hazards in the definition of hazard, just as we do not find it necessary to list multiple examples of biological and physical hazards in the definition of hazard. The requirement to consider food allergen hazards in the hazard analysis is already explicit in the requirements for hazard identification (see § 117.130(b)(1)(ii)).

(Comment 99) Some comments suggest using the phrase “reasonably anticipated contaminants” as a useful phrase that clearly defines all hazards, whether deliberate or accidental, that can cause adulteration in the food supply.

(Response 99) We decline this request. We see no meaningful difference between “reasonably expected” and “reasonably anticipated.” We also see no benefit in specifying that a hazard is a “contaminant” rather than an “agent” (which is the term used in the definition of “hazard”).

#### 14. Lot

We proposed to define “lot” to mean the food produced during a period of time indicated by a specific code.

(Comment 100) Some comments ask us to modify the proposed definition to make it more flexible and robust. These comments assert that the proposed definition appears to ignore other potential definitions, such as products with common characteristics (such as origin, variety, type of packing, packer, consignor, markings) and that multiple “lots” can be produced during the same time but with different lot designations. Other comments ask us to modify the proposed definition so that it is not limited by a period of time and suggest using an approach that would allow for a lot to be defined by either time or by a specific identifier. Other comments express the view that the individual operators should be able to define their lot designations and make these definitions available to FDA upon request. Other comments assert that the proposed definition is too prescriptive and inflexible in that timeframe is not necessarily the most logical way to identify a lot (*e.g.*, for batch production). Some comments suggest specific changes to the text of the proposed definition, such as “Lot means a body of food designated by the facility with common characteristics, *e.g.*, origin, variety, type of packing, packer, consignor, markings or time of harvest, packing or processing, which is separable by such characteristics from other bodies of food.”

(Response 100) As judged by these comments, the long-standing definition of “lot” has the potential to be misinterpreted to mean that the “specific code” must be based on time, such as a date. This is not the case. Although the term “lot” is associated with a period of time, an establishment has flexibility to determine the code, with or without any indication of time in the code. For example, a code could be based on a date, time of day, production characteristic (such as those mentioned in the comments), combination of date/time/production characteristic, or any other method that works best for the establishment. To clarify that the rule does not require that time be “indicated” by the code, and emphasize the establishment’s flexibility to determine the code, we have revised “period of time indicated by a specific code” to “period of time and identified by an establishment’s specific code.”

(Comment 101) Some comments ask us to clarify the purpose of the “specific code” associated with the lot (*i.e.*, that it should give insight into production history of the associated food) and to define a term such as “lot code” or “production code.”

(Response 101) The purpose of the specific code associated with a lot is to identify the food and associated production records—*e.g.*, when investigating a food safety problem or conducting a recall. We decline the request to define a term such as “lot code” or “production code.” The definition of “lot” is intended to provide flexibility for an establishment to determine the mechanism of assigning a code that is best suited to the food it produces.

(Comment 102) Some comments ask us to clarify the factors that can affect the size of a “lot.” These comments assert that minimizing the size of a lot could be beneficial to an establishment if a recall is needed and express concern that our proposed definition may differ from that used by a specific establishment.

(Response 102) The definition provides a company with flexibility to determine an appropriate size of a lot.

#### 15. Manufacturing/Processing

We proposed to establish in § 117.3 the same definition of “manufacturing/processing” as we proposed to establish in §§ 1.227 and 1.328. See section IV.E for a discussion of comments we received to the proposed definition of “manufacturing/processing” in §§ 1.227 and 1.328, and our responses to those comments.

#### 16. Microorganisms

We proposed to define the term “microorganisms” to mean yeasts, molds, bacteria, viruses, protozoa, and microscopic parasites and include species having public health significance. We also proposed that the term “undesirable microorganisms” includes those microorganisms that are of public health significance, that subject food to decomposition, that indicate that food is contaminated with filth, or that otherwise may cause food to be adulterated.

(Comment 103) Some comments express concern that the term “undesirable microorganisms” includes microorganisms that subject food to decomposition. These comments assert that the definition would expand regulation beyond food safety and ask us to clarify that decomposition means a degradation of product that is only relevant when it affects the safety of the product, rather than simple spoilage, because the presence of microorganisms that can cause spoilage is an unavoidable condition of fresh produce.

(Response 103) We have not modified the regulatory text of this long-standing definition of the term “undesirable microorganisms” regarding

microorganisms that subject food to decomposition. As we noted during the rulemaking to first establish this definition, the regulations are designed to prevent the growth of undesirable microorganisms, and the scope of the definition is not limited to pathogens because these regulations are also concerned with sanitation, decomposition, and filth (51 FR 22458 at 22460). The comments do not provide any examples of how we have interpreted this provision in the past in a way that creates practical problems to the fresh produce industry when applying CGMP requirements directed to preventing the growth of undesirable microorganisms.

(Comment 104) Some comments ask us to specify that the term “undesirable microorganisms” includes microorganisms that are resistant to drugs or antibiotics.

(Response 104) We decline this request. The requirements of this rule directed to preventing contamination with microorganisms are intended to keep microorganisms out of food regardless of whether a particular strain of a specific microorganism (including a pathogen, a microorganism that subjects food to decomposition, and a microorganism that indicates that food is contaminated with filth) has the particular characteristic of being resistant to drugs or antibiotics.

(Comment 105) Some comments ask us to provide lists of microorganisms that we consider indicative of “contamination with filth” and our rationale for such consideration.

(Response 105) We decline this request, which is better suited for guidance. In other circumstances, we have discussed coliforms and fecal coliforms as indicators that food has been contaminated by manufacturing practices conducted under insanitary conditions (see, e.g., the discussion in the proposed rule to establish Current Good Manufacturing Practice, Quality Control Procedures, Quality Factors, Notification Requirements, and Records and Reports, for the Production of Infant Formula, 61 FR 36154 at 36171, July 9, 1996). As another example, “Compliance Policy Guide Sec. 527.300 Dairy Products—Microbial Contaminants and Alkaline Phosphatase Activity” provides that dairy products may be considered adulterated within the meaning of section 402(a)(4) of the FD&C Act (21 U.S.C. 342(a)(4)), in that they have been prepared, packed, or held under insanitary conditions whereby they may have become contaminated with filth, when (nontoxicogenic) *E. coli* is found at certain levels (Ref. 37).

#### 17. Mixed-Type Facility

We proposed to establish in § 117.3 the same definition of “mixed-type facility” as we proposed to establish in §§ 1.227 and 1.328. See section IV.F for a discussion of comments we received to the proposed definition of “mixed-typed facility” in §§ 1.227 and 1.328, and our responses to those comments.

#### 18. Monitor

We proposed to define the term “monitor” to mean to conduct a planned sequence of observations or measurements to assess whether a process, point, or procedure is under control and to produce an accurate record for use in verification.

(Comment 106) Some comments assert that our proposed definition of monitoring is directed to the narrow circumstance of monitoring that would be applied to a CCP under the NACMCF HACCP guidelines and the Codex HACCP Annex. These comments also assert that, using such definitions, monitoring would not apply to control measures for which parameters cannot be established and that are not amenable to documentation. These comments suggest that we use a definition of monitoring consistent with that provided in ISO 22000:2005 (conducting a planned sequence of observations or measurements to assess whether control measures are operating as intended) to clarify that monitoring may be conducted where appropriate for preventive controls that are not CCPs. (ISO is an abbreviation for “International Organization for Standardization.” ISO develops and publishes international standards.) According to these comments, an advantage of this definition is that it also would clarify the difference between monitoring activities (observations conducted during the operation of a control measure to ensure that it is under control) and verification activities (to evaluate performance of a control measure).

(Response 106) We have revised the definition of monitor to mean to conduct a planned sequence of observations or measurements to assess whether control measures are operating as intended. We agree that the revised definition, which reflects an international standard, more effectively communicates that monitoring also applies to controls that are not at CCPs and may apply to control measures for which parameters cannot be established. However, we disagree that this definition signals that it is not possible to obtain documentation when monitoring preventive controls that are

not at CCPs, such as for controls that are not process controls and do not involve parameters and maximum or minimum values, or combinations of values, to which a parameter must be controlled to significantly minimize or prevent a hazard requiring a preventive control. For example, it is possible to monitor that a specific sanitation control activity has taken place, such as the cleaning of a piece of equipment to prevent allergen cross-contact.

The requirement for documenting monitoring in records is established by the requirements for monitoring, not by the definition of monitor. As discussed in Response 468, we have made several revisions to the regulatory text, with associated editorial changes, to clarify that monitoring records may not always be necessary.

#### 19. Packaging (When Used as a Verb)

We proposed to establish in § 117.3 the same definition of “packaging (when used as a verb)” as we proposed to establish in §§ 1.227 and 1.328.

(Comment 107) Some comments express concern about establishing the definition of “packaging (when used as a verb)” in part 117. These comments ask us to clarify how this proposed definition relates to other uses of the word “packaging” in part 117, including use as an adjective in the common phrase “food-packaging materials,” and including some provisions directed to controlling allergen cross-contact and contamination in “food-packaging materials.” Some comments ask us to establish definitions for terms such as “food-packaging materials” or “primary packaging” to clarify the meaning of the term “packaging” as it has previously been used in part 110. Other comments ask us to clarify that provisions directed to preventing allergen cross-contact and contamination in “food-packaging materials” apply only to “food-contact packaging,” not “secondary packaging.” Some comments focus on the differences between the definition of the term “packing” and “packaging” with respect to activities conducted on RACs. Some comments ask us to clarify how the term “packaging (when used as a noun)” would apply when used in part 117, even though we did not propose to establish a definition for “packaging (when used as a noun)” in part 117.

(Response 107) We have decided not to establish the definition “packaging (when used as a verb)” in part 117. That definition was established in the section 415 registration regulations, in part, to identify those food establishments that would be subject to those regulations based, in part, on the activity of placing food into a container that directly

contacts the food and that the consumer receives. In addition, because the term “packaging” (when used as a noun) can be used in a very general way to refer to both the container that directly contacts the food and to the outer packaging of food that does not contact the food, the section 414 recordkeeping regulations established a definition of “packaging” (when used as a noun) to narrowly refer to “the outer packaging of food that bears the label and does not contact the food,” because this narrow definition was also necessary for the purposes of those recordkeeping regulations.

However, the term “packaging” has long been used as a noun in the CGMPs to generally refer to the container that directly contacts the food, rather than to the outer packaging of food that does not contact the food (as it means in the section 414 recordkeeping regulations). Thus, the very specific connotation for the term “packaging” (when used as a noun) that was established in the section 414 recordkeeping regulations does not apply, and is causing confusion. As the comments point out, our proposed definition of “packaging (when used as a verb)” is already causing confusion in the context of part 117. Therefore, for clarity and simplicity in part 117 we are not including in the final rule a definition of “packaging (when used as a verb).” A definition for “packaging (when used as a verb)” remains in the section 415 registration regulations, where a business can continue to use the definition for purposes of determining whether either or both of those regulations applies to its business.

Part 117 establishes requirements for manufacturing, processing, packing, and holding human food. The definition of “manufacturing/processing” we are establishing in this rule makes clear that “packaging” (when used as a verb) is a manufacturing/processing activity and, thus, that requirements that apply to manufacturing or processing activities apply to packaging activities. Because part 117 is not the regulation that describes whether a food establishment is subject to the section 415 registration regulations or the section 414 recordkeeping regulations, it is not necessary for part 117 to do more.

The comments that express concern about the distinction between “packing” and “packaging (when used as a verb)” with respect to activities conducted on RACs no longer apply in light of the revised “farm” definition that we are establishing in the section 415 registration regulations. The revised “farm” definition provides for packaging RACs when packaging does

not involve additional manufacturing/processing (such as cutting).

#### 20. Packing

We proposed to establish in § 117.3 the same definition of “packing” as we proposed to establish in §§ 1.227 and 1.328. See section IV.G for a discussion of comments we received to the proposed definition of “packing” in §§ 1.227 and 1.328, and our responses to those comments.

#### 21. Pathogen

We proposed to define the term “pathogen” to mean a microorganism of public health significance.

(Comment 108) Some comments ask us to revise the definition to mean a “microorganism of such severity and exposure that it would be deemed of public health significance” because the significance of pathogens to public health depends on the organism’s severity and the nature of exposure.

(Response 108) We decline this request. Our purpose in defining the term pathogen was to simplify the regulations, including our long-standing CGMP regulations, by substituting a single term (*i.e.*, “pathogen”) for a more complex term (*i.e.*, “microorganism of public health significance”) throughout the regulations. These comments appear to be objecting to the use of the long-standing phrase “microorganism of public health significance,” which has been in our CGMP regulations for decades, rather than to our proposal to define and use a simpler term in its place. These comments fail to explain how we have interpreted the current term “microorganism of public health significance” in a way that does not take into account factors such as the severity of illness and the route of exposure.

#### 22. Pest

We proposed to define the term “pest” to refer to any objectionable animals or insects including birds, rodents, flies, and larvae.

(Comment 109) Some comments ask us to include reptiles in the definition due to a past instance of *Salmonella* linked to lizard feces in an RTE nut-manufacturing facility.

(Response 109) We decline this request. This long-standing definition does not limit pests to those already included as examples. Reptiles are objectionable animals that are known to carry human pathogens and are considered pests.

(Comment 110) Some comments ask us to clarify the meaning of the term “objectionable.” These comments state that, under the Canadian Pest Control Products Act, objectionable means that

an animal does not belong in a food processing environment and suggest that we follow this meaning of “objectionable.” These comments also note that there may be circumstances where the presence of an animal is acceptable, such as the use of guide dogs.

(Response 110) We decline this request. The meaning of the term “objectionable” as described in these comments is consistent with our interpretation of this long-standing definition of “pest,” but we do not believe it is necessary to provide a definition. See the provisions for pest control (§ 117.35(c)), which allow the use of guard, guide, and pest-detecting dogs.

#### 23. Plant

We proposed to define the term “plant” to mean the building or establishment or parts thereof, used for or in connection with the manufacturing, processing, packing, or holding of human food. See Comment 63 for the comments on the definition of “plant” and Response 63 for our response to those comments.

#### 24. Preventive Controls

We proposed to define the term “preventive controls” to mean those risk-based, reasonably appropriate procedures, practices, and processes that a person knowledgeable about the safe manufacturing, processing, packing, or holding of food would employ to significantly minimize or prevent the hazards identified under the hazard analysis that are consistent with the current scientific understanding of safe food manufacturing, processing, packing, or holding at the time of the analysis.

(Comment 111) Some comments ask us to clarify the meaning of “current scientific understanding” because scientific understanding can vary depending on the risk profile of a commodity.

(Response 111) By “current scientific understanding,” we mean to emphasize that scientific information changes over time and a facility needs to keep current regarding safe handling and production practices such that the facility has the information necessary to apply appropriate handling and production practices.

#### 25. Preventive Controls Qualified Individual

We proposed to define the term “qualified individual” to mean a person who has successfully completed training in the development and application of risk-based preventive

controls at least equivalent to that received under a standardized curriculum recognized as adequate by the FDA or is otherwise qualified through job experience to develop and apply a food safety system. We have changed the proposed term “qualified individual” to “preventive controls qualified individual” because we are establishing a new definition for “qualified individual,” with a meaning distinct from “preventive controls qualified individual.” To minimize the potential for confusion for when the term “qualified individual” refers to the proposed meaning of the term and when the term “qualified individual” refers to the meaning of that term as finalized in this rule, in the remainder of this document we use the new term “preventive controls qualified individual” whenever we mean “a person who has successfully completed training in the development and application of risk-based preventive controls at least equivalent to that received under a standardized curriculum recognized as adequate by the FDA or is otherwise qualified through job experience to develop and apply a food safety system,” even though the proposed rule used the term “qualified individual.” Likewise, we use the new term “preventive controls qualified individual” for the proposed term “qualified individual” when describing the comments to the proposed rule, even though those comments use the term “qualified individual.”

In the following paragraphs, we discuss comments on this proposed definition. (See also our discussion (in section XXXVI) of the requirements applicable to the preventive controls qualified individual (§ 117.180(c)).)

(Comment 112) Some comments assert that the proposed definition of preventive controls qualified individual is ambiguous.

(Response 112) The comments provide no basis for asserting that this definition is ambiguous, such as difficulties in how we have interpreted similar regulatory text in enforcing our HACCP regulations for seafood and juice (§§ 123.10 and 120.13(b), respectively). The proposed definition includes a performance standard (qualified to develop and apply a food safety system), two criteria for how a person can become qualified (specialized training or job experience), and a description of the type of applicable training (development and application of risk-based preventive controls at least equivalent to that received under a standardized curriculum). The proposed definition

provides flexibility for how an individual can become qualified, but this flexibility does not make the definition ambiguous.

(Comment 113) Some comments ask us to expand the definition so that it includes a team of preventive controls qualified individuals, not just a single person.

(Response 113) We decline this request. The definition applies to each preventive controls qualified individual that a facility relies on to satisfy the requirements of the rule without limiting the number of such preventive controls qualified individuals. The requirements of the rule make clear that a facility may rely on more than preventive controls qualified individual (see, e.g., § 117.180(a)).

(Comment 114) One comment asks us to include “trusted trader” (*i.e.*, a company or entity in the supply chain proven to be low risk) in the definition of preventive controls qualified individual.

(Response 114) We decline this request. The concept of “trusted trader” applies to a facility’s suppliers, not to individuals qualified to develop and apply a food safety system.

#### 26. Qualified Auditor

We proposed to define the term “qualified auditor” to mean a person who is a preventive controls qualified individual as defined in this part and has technical expertise obtained by a combination of training and experience appropriate to perform the auditing function as required by § 117.180(c)(2). As discussed in Response 569, we have revised the definition to specify that “qualified auditor” means a person who is a “qualified individual” as that term is defined in this final rule, rather than a “preventive controls qualified individual,” because some auditors may be auditing businesses (such as produce farms) that are not subject to the requirements for hazard analysis and risk-based preventive controls, and it would not be necessary for such an auditor to be a “preventive controls qualified individual.” We also have clarified that the technical expertise is obtained through education, training, or experience (or a combination thereof) necessary to perform the auditing function to align the description of applicable education, training, and experience with the description of “qualified individual” (see § 117.3).

(Comment 115) Some comments ask us to revise the definition of qualified auditor to include persons who have technical expertise obtained by a

combination of training, experience, or education appropriate to perform audits. Some comments ask us to recognize that training and/or experience can make a person a qualified auditor; the comments state that people with experience performing audits likely have applicable training but might not have completed a specific regimen of courses. Some comments maintain that we should recognize the role of the education of a potential qualified auditor, as well as training and experience to meet the criteria.

(Response 115) We agree that a qualified auditor might obtain the necessary auditing expertise in part through education, as well as through training and experience, and we have revised the definition of qualified auditor accordingly. However, we conclude that a person must have at least some actual experience in auditing to meet the definition of a qualified auditor, *i.e.*, the necessary technical expertise cannot be obtained solely through education and/or training. Therefore, the revised definition retains the proposed criterion that a qualified auditor has technical expertise obtained by experience, as well as by education and training.

(Comment 116) Some comments that support the proposed definition ask us to revise the definition to specify certain individuals who would be considered qualified auditors, such as FDA inspectors, properly trained Federal auditors, and State and private auditors operating under a contract with the Federal Government.

(Response 116) We have revised the regulatory text to specify that examples of a qualified auditor include: (1) A government employee, including a foreign government employee and (2) an audit agent of a certification body that is accredited in accordance with regulations in part 1, subpart M (*i.e.*, regulations in our forthcoming third-party certification rule implementing section 808 of the FD&C Act (21 U.S.C. 348d)). Although we agree that it is useful to include examples of individuals who would have the appropriate qualifications, the example of an audit agent of a certification body that has been accredited in accordance with regulations in our forthcoming third-party certification rule adds context about the standard for such individuals. Because paragraph (2) of the new provision refers to provisions in a future third-party certification rule, we will publish a document in the **Federal Register** announcing the effective date of paragraph (2) once we finalize the third-party certification rule.

## 27. Qualified End-user

We proposed to define the term “qualified end-user” to mean, with respect to a food, the consumer of the food (where the term consumer does not include a business); or a restaurant or retail food establishment (as those terms are defined in § 1.227) that: (1) Is located (a) in the same State as the qualified facility that sold the food to such restaurant or establishment; or (b) not more than 275 miles from such facility; and (2) is purchasing the food for sale directly to consumers at such restaurant or retail food establishment. We have revised the definition of “qualified end-user” to add “or the same Indian reservation” to clarify for purposes of this rule so that “in the same State” under section 418(l)(4)(B)(ii)(I) of the FD&C Act includes both within a State and within the reservation of a Federally-Recognized Tribe.

(Comment 117) Some comments object to the description of a qualified end-user as being not more than 275 miles from a facility that sold the food and assert that there is no scientific or risk-based reason to support the distance of 275 miles. Other comments ask us to clarify whether the criterion of not more than 275 miles from a facility that sold the food would provide for qualified end-users to be located across State lines and/or international borders relative to the facility that sold the food. Other comments ask us to revise the definition of “restaurant or retail food establishment” to include businesses such as supermarkets, supermarket distribution centers, food hubs, farm stands, farmers markets, and CSA.

(Response 117) We have not revised the definition of “qualified end-user,” which reflects section 418(l)(4) of the FD&C Act, in response to these comments. As discussed in Response 581, we intend to focus on records demonstrating that a facility is a very small business (*i.e.*, financial records demonstrating that a business averages less than a specified dollar threshold) rather than records demonstrating sales directly to qualified end-users. Likewise, we have not revised the definition of “restaurant or retail food establishment” to clarify whether particular businesses such as those mentioned in the comments would be considered as “qualified end-users.” Focusing on whether a facility is a very small business makes it unnecessary to determine whether an enterprise that receives the food is a retail food establishment. However, as discussed in section I.E, we have issued a separate proposed rule to amend the definition of

“retail food establishment” in the section 415 registration regulations. We intend to issue a final rule to amend the definition of “retail food establishment” in the section 415 registration regulations in the near future. (See also Response 4.)

## 28. Qualified Facility

We proposed to define “qualified facility” by incorporating the description of “qualified facility” in section 418(l)(1) of the FD&C Act with editorial changes to improve clarity. That definition includes two types of facilities: (1) A facility that is a very small business as defined in this rule; and (2) A facility to which certain statutory criteria apply regarding the average monetary value of food sold by the facility and the entities to whom the food was sold.

Some comments discuss issues related to the definition of very small business. See Comment 154, Comment 156, Comment 157, and Comment 158 and our associated responses.

(Comment 118) Some comments assert that the definitions of “affiliate” and “subsidiary” in the definition of “qualified facility” fail to account for the legal differences between a piece of property (*i.e.*, a facility) and a business entity or person. These comments ask us to consider revising the proposed definition of “qualified facility” to clarify what sales to include in determining whether a facility so qualifies.

(Response 118) We have not revised the proposed definition of “qualified facility” as requested by these comments. The sales to be included when a facility determines whether it meets the definition of a qualified facility are the sales of human food by a business entity, which includes the parent company and all its subsidiaries and affiliates. The total sales are applicable to each entity, whether it is the parent, the subsidiary, or the affiliate. We intend to address issues such as these in guidance as directed by section 418(l)(2)(B)(ii) of the FD&C Act. (See also Comment 77 regarding the definitions of “affiliate” and “subsidiary” and our associated responses. See also Response 154 regarding the applicability of the monetary threshold of sales of human food plus the market value of human food manufactured, processed, packed, or held without sale (*e.g.*, held for a fee).)

(Comment 119) Some comments ask us to clarify who will determine whether a particular facility is a qualified facility.

(Response 119) Any facility that determines that it satisfies the criteria for a “qualified facility” must notify FDA of that determination (see § 117.201) and, thus, the first determination will be made by the facility itself. During inspection, the investigator could ask to see the records that support the facility’s determination to verify the facility’s determination.

(Comment 120) Some comments address that part of the definition that discusses “average annual monetary value of the food manufactured, processed, packed, or held at such facility, that is sold.” These comments ask us to clarify whether the operative word in the clause is “held” or “sold.”

(Response 120) The operative word, for the purpose of calculating the average monetary value of that food, is “sold.” (See also Response 154 regarding the applicability of the monetary threshold of sales of human food plus the market value of human food manufactured, processed, packed, or held without sale (*e.g.*, held for a fee).)

## 29. Ready-to-Eat Food (RTE Food)

We proposed to define the term “ready-to-eat food” to mean any food that is normally eaten in its raw state or any other food, including processed food, for which it is reasonably foreseeable that the food would be eaten without further processing that will significantly minimize biological hazards.

(Comment 121) Some comments ask us to substitute “reasonably expected” for “reasonably foreseeable.”

(Response 121) We decline this request. We see no substantive difference between “reasonably expected” and “reasonably foreseeable.” The term “reasonably foreseeable” is used in other provisions of the rule, including the defined term “known or reasonably foreseeable hazard.”

(Comment 122) Some comments ask us to clarify the distinction between a food that satisfies the definition of “ready-to-eat” and a food that satisfies the definition of a RAC. Some of these comments express concern that if tree fruits are classified as “RTE food” rather than as a RAC, we could force packers to do mandatory product testing.

(Response 122) The terms RTE food and RAC are not mutually exclusive. Some RACs (such as lettuce, tomatoes, berries, and apples) are ready-to-eat, whereas other RACs (such as artichokes and potatoes) are not. The requirements for product testing as a verification activity are flexible requirements that depend on the facility, the food, and the

nature of the preventive control (see § 117.165). See also Response 525.

### 30. Receiving Facility

We proposed to define the term “receiving facility” to mean a facility that is subject to subpart C of this part and that manufactures/processes a raw material or ingredient that it receives from a supplier.

(Comment 123) Some comments ask us to modify the definition to specify that the receiving facility could receive the raw material or ingredient directly from a supplier or by means of an intermediary entity. These comments assert that without this added regulatory text the proposed definition implies that the material or ingredient must be received directly from the supplier.

(Response 123) We decline this request. As discussed in Response 658, the two parties that are critical to the supplier verification program are the receiving facility and the supplier, even if there are entities in the supply chain between the two. The definition of receiving facility does not preclude the participation of intermediary entities in the supply chain, and the rule does provide for such participation (see Response 657). However, the definition of receiving facility does highlight the fact that a receiving facility must have a link to a supplier.

(Comment 124) Some comments that support the definition of receiving facility ask us to clarify that a cold storage facility is not by definition a receiving facility because it is not engaged in manufacturing/processing, but could be a supplier if temperature controls are needed to control a significant hazard.

(Response 124) We agree that a cold storage facility is not likely to be a receiving facility if it is not engaged in manufacturing/processing. However, it is the nature of the activity as manufacturing/processing, rather than the use of a preventive control for purposes other than manufacturing/processing, that is relevant here. By definition, the supplier must also be engaged in manufacturing/processing, raising animals, or growing food (see the definition of “supplier” in § 117.3). A cold storage facility has a responsibility to maintain foods that require temperature control for safety at an appropriate temperature, but generally does not engage in manufacturing/processing. However, a cold storage facility in the supply chain between the supplier and the receiving facility could participate in supplier verification activities (see Response 657).

### 31. Sanitize

We proposed to define “sanitize” to mean to adequately treat cleaned food-contact surfaces by a process that is effective in destroying vegetative cells of microorganisms of public health significance, and in substantially reducing numbers of other undesirable microorganisms, but without adversely affecting the product or its safety for the consumer. We proposed to revise this otherwise long-standing definition by inserting the term “cleaned” before “food-contact surfaces” because chemical sanitizers can be inactivated by organic material and, thus, are not effective unless used on clean surfaces (78 FR 3646 at 3697).

(Comment 125) Some comments ask us to adopt a definition of “sanitize” similar to that found in the Pasteurized Milk Ordinance (PMO), which recognizes that cleaning and sanitizing do not always have to be separate, sequential steps. These comments report that the definition in the PMO is “the application of any effective method or substance to properly cleaned surfaces for the destruction of pathogens, and other microorganisms, as far as is practicable.” Other comments agree with the proposed definition as it applies to chemical sanitizers, but disagree that clean surfaces are required for effective sanitizing for those systems that use steam and dry heat, such as those authorized by Appendix F of the PMO. These comments ask us to clarify that the “cleaning” should be appropriate to the specific food system and method used for sanitizing, and that cleaning should only be required when the sanitizing process alone would not be effective without a prior cleaning step.

Some comments express concern about whether the proposed definition of “sanitize” would preclude the continued, routine use of dry cleaning methods with no sanitizing step. These comments note that adding routine aqueous-based cleaning and sanitizing procedures could create a public health risk in certain operations such as low-moisture food production. These comments also note that dry cleaning procedures can result in equipment that, while sanitary, is neither visibly clean nor suitable for aqueous chemical sanitizers.

(Response 125) We consider that systems such as steam systems clean the surfaces, as well as sanitize them and, thus, satisfy the definition of “sanitize.” The definition of “sanitize” does not preclude the continued use of dry cleaning methods with no sanitizing step because the definition describes the

meaning of the term “sanitize” without establishing any requirement for when equipment must be sanitized.

We have revised the definition so that it means adequately treating “surfaces” rather than “food-contact surfaces.” Doing so is consistent with the definition of “sanitize” in the PMO. As a technical matter, adequately treating any surface—regardless of whether it is a food-contact surface—by a process that is effective in destroying vegetative cells of pathogens, and in substantially reducing numbers of other undesirable microorganisms, but without adversely affecting the product or its safety for the consumer, is “sanitizing” the surface. Clarifying this technical meaning of the term “sanitize” imposes no requirements to sanitize surfaces other than food-contact surfaces; the requirements for sanitizing surfaces are established by provisions such as § 117.37(d), not by the definition of the term “sanitize.”

### 32. Significant Hazard (Hazard Requiring a Preventive Control)

We proposed to define the term “significant hazard” to mean a known or reasonably foreseeable hazard for which a person knowledgeable about the safe manufacturing, processing, packing, or holding of food would, based on the outcome of a hazard analysis, establish controls to significantly minimize or prevent the hazard in a food. The rule would use the term “significant hazard” rather than “hazard reasonably likely to occur” to reduce the potential for a misinterpretation that all necessary preventive controls must be established at CCPs (79 FR 58524 at 58526).

(Comment 126) Comments support using a term other than “hazard reasonably likely to occur” and agree that using a term other than “hazard reasonably likely to occur” throughout the rule will reduce the potential for a misinterpretation that all necessary preventive controls must be established at CCPs.

Some comments support the regulatory text of the proposed definition of the term “significant hazard.” These comments state that the proposed regulatory text more closely aligns with the principles in FSMA (“reasonably foreseeable” and “significantly minimize or prevent”) and provides operators the flexibility to implement a range of preventive controls that are commensurate with the risk and probability posed by a specific hazard. Some comments agree that the proposed regulatory text can clarify the difference between HACCP rules and the human preventive controls rule.

Some comments state that the proposed regulatory text plainly reflects the concept that significant hazards are those hazards to be addressed through the very broad category of preventive controls, and the rule is explicit that preventive controls may be controls other than at CCPs. Some comments state that the definition reflects the risk-based nature (*i.e.*, both the severity of a potential hazard and the probability that the hazard will occur) of the requirements and provides additional flexibility so that facilities can take into account the nature of the preventive control in determining when and how to establish and implement appropriate preventive control management components. Some comments support including the phrase “based on the outcome of a hazard analysis” in the definition because it ensures that identification of significant hazards will be risk based. Some comments ask us to preserve in the final definition two key aspects that grant the food industry the flexibility that it needs: (1) The logical conclusion that not all hazards will have the same impact or will even constitute “significant hazards” at all, depending on the facility’s products and position in the supply chain; and (2) the fact that a “person knowledgeable about the safe manufacturing, processing, packing, or holding of food” must be knowledgeable about the specific food produced at that facility and in that specific sector of the food industry.

Some of the comments that support the regulatory text of the proposed

definition nonetheless express concern about the term “significant hazard.” Some of these comments express concern that a facility may not recognize hazards that need to be controlled because they do not rise to the commonly understood meaning of “significant.” Other comments express concern that the adjective “significant” is subject to many interpretations and suggest that the term “hazard requiring control” would be more straightforward, accurate, and suitable.

Other comments express concern that the term “significant hazard” could cause confusion because it has implications in HACCP systems. For example, “significant hazard” is often used in the context of CCPs, and preventive controls are not necessarily established at CCPs. Some of these comments suggest that we eliminate the term and instead use the full regulatory text of the proposed definition in place of “significant hazard” throughout the regulations. Other comments suggest using a term such as “food safety hazard” or “actionable hazard” instead of “significant hazard” to avoid a term that has HACCP implications. Other comments state that the term “significant hazard” has implications for facilities that follow the Codex HACCP Annex and express concern that foreign facilities would be especially likely to be confused by the term “significant hazard.”

Some comments ask us to ensure that the term “significant hazard” is used consistently and express the view that some regulatory text refers to a “hazard”

or “known or reasonably foreseeable hazard” where “significant hazard” should instead be used. As discussed in Comment 93, some comments express concern that the rule would refer to multiple levels of hazard and ask us to provide sufficient clarity to be able to distinguish between these types of hazards.

(Response 126) We have changed the term “significant hazard” to “hazard requiring a preventive control.” The new term uses the explicit language of FSMA (*i.e.*, “preventive control”), is consistent with the specific suggestion of one comment (*i.e.*, hazard requiring a control”), and is not commonly associated with HACCP systems. We decline the request to use the term “food safety hazard” because that term already is established in Federal HACCP regulations for seafood and meat/poultry, and the comments are particularly concerned about using a term that has implications for HACCP systems. We also decline the request to use the term “actionable hazard,” because the term “actionable” is associated with violations at a food processing plant.

We reviewed the full regulatory text of proposed subpart C and replaced “significant hazard” with “hazard requiring a preventive control” in most cases. See table 10 for the provisions where we made that change and for an explanation of those provisions where we replaced “significant hazard” with “hazard” or “hazard requiring a process control.”

TABLE 10—SUBSTITUTIONS FOR THE TERM “SIGNIFICANT HAZARD”

Section	Description	Term substituted for “significant hazard”	Reason for substituting a term other than “hazard requiring a preventive control”
117.130(a)(1) .....	Requirement to conduct a hazard analysis.	Hazard requiring a preventive control.	N/A. <sup>1</sup>
117.135(a)(1) .....	Requirement to identify and implement preventive controls.	Hazard requiring a preventive control.	N/A. <sup>1</sup>
117.135(c)(2)(ii) .....	Maximum and minimum values associated with process controls.	Hazard requiring a process control.	The provision is narrowly directed to a specific category of preventive controls— <i>i.e.</i> , process controls.
117.139 .....	Recall plan .....	Hazard requiring a preventive control.	N/A. <sup>1</sup>
117.160 .....	Validation .....	Hazard .....	Specifying that a facility must validate that the preventive controls are adequate to control “the hazard” adequately communicates the requirement. In contrast, specifying that a facility must validate that the preventive controls are adequate to control the “hazard requiring a preventive control” would be unnecessarily bulky and awkward.

TABLE 10—SUBSTITUTIONS FOR THE TERM “SIGNIFICANT HAZARD”—Continued

Section	Description	Term substituted for “significant hazard”	Reason for substituting a term other than “hazard requiring a preventive control”
117.165(a) .....	Activities for verification of implementation and effectiveness of preventive controls.	Hazard .....	Specifying that a facility must verify that the preventive controls are consistently implemented and are effectively and significantly minimizing or preventing “the hazards” adequately communicates the requirement. In contrast, specifying that a facility must verify that the preventive controls are consistently implemented and are effectively and significantly minimizing or preventing “the hazards requiring a preventive control” would be unnecessarily bulky and awkward.
117.165(a)(3) .....	Requirement for environmental monitoring to verify implementation and effectiveness of preventive controls.	Hazard requiring a preventive control.	N/A. <sup>1</sup>

<sup>1</sup> N/A = Not applicable.

We also reviewed the full regulatory text of proposed subpart C to evaluate whether there were any circumstances where the regulatory text should more appropriately refer to “hazard requiring a preventive control” rather than “hazard” or “known or reasonably foreseeable hazard.” The term “known or reasonably foreseeable hazard” appears only once, in the requirement for a facility to conduct a hazard analysis (§ 117.130(a)). We are retaining “known or reasonably foreseeable hazard” in that requirement because it is necessary to implement the tiered approach to the requirements for hazard analysis and risk-based preventive controls (see Response 93). To reinforce this tiered approach, and emphasize that the facility only conducts a hazard analysis for known or reasonably foreseeable hazards, we revised “hazard” to “known or reasonably foreseeable hazard” in two additional provisions in the requirements for hazard identification (see the introductory regulatory text for § 117.130(b)(1) and (2)).

In our review of the full regulatory text of proposed subpart C, we did not identify any circumstances where we believe it is appropriate and necessary to specify “hazard requiring a preventive control” in place of “hazard.” It is not necessary for the regulatory text of requirements for preventive controls, the supply-chain program, the recall plan, corrective actions, and verification to specify “hazard requiring a preventive control” every time that the requirements use the term “hazard” because the context of

the requirement establishes the applicability to “hazards requiring a preventive control.” Although we acknowledge that using “hazard requiring a preventive control” in place of “hazard” throughout applicable provisions of proposed subpart C would emphasize the tiered approach to the requirements for hazard analysis and risk-based preventive controls, doing so would make the regulatory text unnecessarily bulky and awkward and would be inconsistent with comments that ask us to make the regulatory text understandable (see Comment 13).

(Comment 127) Some comments express concern that the proposed definition of “significant hazard,” which contains the phrase “for which a person . . . would establish controls” is problematic in that facilities are likely to have already established preventive controls for a variety of hazards that may not rise to the level of control management required for a “significant hazard” and would instead routinely be addressed in “prerequisite programs.” These comments express particular concern that identification of these hazards in and of themselves should not elevate control of these hazards to the category of being a “significant hazard.” Some comments ask us to allow facilities to continue to implement existing controls outside the framework of this rule (*i.e.*, outside the framework that requires preventive control management components as appropriate to ensure the effectiveness of the preventive controls, taking into account the nature of the preventive control and its role in the food safety system) when

a hazard addressed by the existing controls does not rise to the level of “significant hazard.”

Other comments express concern that the term “significant hazard” may create a disincentive for facilities to voluntarily implement preventive controls for hazards that only pose a remote risk or are very rarely encountered, because implementing preventive controls for hazards of very low probability and severity may be misinterpreted as requiring preventive controls applicable to a “significant hazard” even if the hazard does not meet the definition of “significant hazard” established in the rule. Some comments ask us to revise the definition to provide facilities with the flexibility and discretion to establish appropriate preventive controls for hazards that do not rise to the criteria of a “significant hazard,” as well as ensuring that preventive controls that address remote or very unlikely hazards not be subject to the preventive control management requirements for a “significant hazard.”

(Response 127) We have revised the definition to specify that the term “hazard requiring a preventive control” applies when a knowledgeable person would, based on the outcome of a hazard analysis, “establish one or more preventive controls” rather than “establish controls.” By narrowing “controls” to “one or more preventive controls,” we mean to signify that the proposed term “significant hazard” (which we now refer to as “hazard requiring a preventive control”) only applies to those controls that the facility establishes to comply with the

requirements of subparts C and G for hazard analysis and risk-based preventive controls. A facility that establishes other controls (such as those that the comments describe as “prerequisite programs,” or controls directed to hazards of very low probability and severity) for hazards that are not, based on the outcome of the facility’s hazard analysis, “hazards requiring a preventive control” would not need to establish preventive control management components for such controls. However, some controls previously established in “prerequisite programs” would be considered “preventive controls.” We provide some flexibility for facilities with respect to how they manage preventive controls, and the preventive control management components may be different for hazards that have been managed as “prerequisite programs” compared to those managed with CCPs. A facility that is concerned about the potential for an investigator to disagree during inspection that certain controls are not directed to “hazards requiring a preventive control” could, for example, include information relevant to its classification of those other controls in its hazard analysis, whether by merely listing the “other controls” or by providing a brief explanation why such controls are not “preventive controls” as that term is defined in this rule.

(Comment 128) Some comments assert that the proposed definition of “significant hazard” is tautological because it essentially establishes a “significant hazard” to be a known or reasonably foreseeable hazard (*i.e.*, the type of hazards identified in the first step of the analysis) for which preventive controls should be implemented. These comments assert that the proposed definition of “significant hazard” would collapse the second step of hazard analysis into the first, which in turn would lead to the unintended consequence of facilities identifying the same hazards in the second step as in the first. Other comments ask us to revise the definition to clarify and distinguish the two steps of the hazard analysis by specifying within the definition that a significant hazard is a known or reasonably foreseeable hazard for which there is a reasonable probability, based on experience, illness data, scientific reports, or other information relevant to the food or the facility, that adverse health consequence or death will occur in the absence of its control. Some comments ask us to revise the definition to include evaluation of severity and probability, because these concepts are

integral for making a proper determination of whether a hazard is significant. Other comments ask us to revise the definition to better reflect the risk-based approach that preventive controls be implemented to control hazards that have a higher probability of resulting in public health consequence in the absence of control.

(Response 128) We have revised the definition of “significant hazard” (which we now refer to as “hazard requiring a preventive control”) to specify that the hazard analysis includes an assessment of the severity of the illness or injury if the hazard were to occur and the probability that the hazard will occur in the absence of preventive controls. By specifying that the determination of a “significant hazard” is based on the outcome of a hazard analysis, the proposed definition did, as requested by the comments, include the risk-based nature of the determination. However, explicitly adding that the hazard analysis is based on probability and severity (*i.e.*, risk) makes the risk-based nature of the determination clearer.

We disagree that the proposed definition was tautological and would collapse the second step of hazard analysis into the first. As discussed in Response 93, a facility begins its hazard analysis by narrowing down the universe of all hazards to those that are “known or reasonably foreseeable” for each type of food manufactured, processed, packed, or held at its facility. The outcome of the facility’s hazard analysis is a determination of a subset of those known or reasonably foreseeable hazards—*i.e.*, those hazards requiring a preventive control. To the extent that these comments are asserting that the tautology was created by the phrase “in the absence of its control” in the proposed definition of “hazard,” we have deleted that phrase from the final definition of “hazard” (see Response 94).

We decline the request to modify the definition to specify that a hazard requiring a preventive control is one for which there is a reasonable probability, based on experience, illness data, scientific reports, or other information relevant to the food or the facility, that adverse health consequence or death will occur in the absence of its control. The standard for harm in the definition of “hazard” is illness or injury. We disagree that the standard for harm in the definition of “hazard requiring a preventive control” should be different from (*i.e.*, adverse health consequences), or greater than (*i.e.*, death), the standard for harm in the definition of “hazard.” We also disagree that the definition of

“hazard requiring a preventive control” needs to be modified to state that preventive controls are implemented to control hazards that have a higher probability of resulting in public health consequence in the absence of control. The definition already communicates the role of risk (*i.e.*, severity and probability) in conducting the hazard analysis that identifies those hazards requiring a preventive control.

We also decline the request to repeat in the definition of “hazard requiring a preventive control” the requirement for the types of information that a facility would consider in conducting its hazard analysis. The requirements for hazard analysis clearly specify that a facility must conduct its hazard analysis based on experience, illness data, scientific reports, and other information (see § 117.130(a)).

(Comment 129) Some comments that broadly address the overall framework for the new requirements for hazard analysis and risk-based preventive controls ask us to consistently refer to “the nature of the preventive control” (rather than simply to “the preventive control”) when communicating the flexibility that a facility has in identifying preventive controls and associated preventive control management components. (See Comment 455). Other comments that broadly address the overall framework for the new requirements for hazard analysis and risk-based preventive controls ask us to emphasize that the requirements for preventive control management components convey not only that the application of a particular element is appropriate (*i.e.*, capable of being applied), but also necessary for food safety. Some comments recommend that we do so by specifying that preventive control management components take into account the role of the preventive control in the food safety system. (See Comment 455.)

(Response 129) We agree with these comments and have revised the definition of “hazard requiring a preventive control” to specify that preventive control management components are established as appropriate to “the nature of the preventive control and its role in the facility’s food safety system.” (See also Response 455, where we describe additional provisions that we have revised to clarify that preventive control management components are established as appropriate to the nature of the preventive control and its role in the facility’s food safety system.)

(Comment 130) Some comments ask us to modify the definition of “significant hazard” to specify that the

preventive control management components be established as appropriate to both the food and the intended use of the food.

(Response 130) We decline this request. It is not necessary to repeat in the definition of “hazard requiring a preventive control” the requirement for the hazard evaluation to consider the intended use of the food. The requirements for hazard evaluation clearly specify that a facility must consider the intended or reasonably foreseeable use of the food (see § 117.130(c)(2)(viii)).

(Comment 131) Some comments assert that the problem is how to separate the hazards addressed by “HACCP” from those addressed by CGMPs. These comments suggest that control measures that are implemented for hazards from ingredients and food-contact packaging material, and from production and process, be called CCPs and that control measures that are implemented for hazards from personnel, equipment, and the plant be called preventive controls.

(Response 131) The facility must control hazards through the application of CGMPs and preventive controls as appropriate to the hazard. Although some preventive controls will be established at CCPs, and “CCP” is a term commonly used in HACCP systems, this rule establishes requirements for hazard analysis and risk-based preventive controls, not “HACCP,” and this rule provides that preventive controls include controls at CCPs, if there are any CCPs, as well as controls, other than those at CCPs, that are also appropriate for food safety (see § 117.135(a)(2)).

Under the rule, some hazards may be addressed by CGMPs and others by preventive controls. For example, if a facility manufactures egg biscuit sandwiches, it could establish a preventive control, as a CCP, for cooking the eggs and establish CGMP controls to address the potential for personnel to contaminate the cooked egg and the egg biscuit sandwiches. As another example, a facility could control a physical hazard such as metal using screens and magnets under CGMPs and then use a metal detector as a preventive control. See also Response 437, in which we give examples regarding when a facility might control food allergen hazards through a combination of CGMP controls and “food allergen controls,” which are a particular type of preventive control (see § 117.135(c)(2)).

(Comment 132) Some comments ask us to add examples throughout the regulatory text (e.g., in the requirements for hazard analysis, preventive controls,

and recall plan) to reflect food allergens as a significant hazard.

(Response 132) We decline this request. Food allergens are included as an example of a chemical hazard that a facility must consider when determining whether there are any known or reasonably foreseeable hazards requiring a preventive control (§ 117.130(b)(1)(ii)), and the rule specifically provides for food allergen controls where relevant. It is not necessary to include examples of food allergens as hazards requiring a preventive control throughout the regulatory text.

(Comment 133) Some comments express concern that too much flexibility may make it harder for us to inspect conditions in a facility over time. These comments emphasize that we must not permit facilities to interpret the term “significant hazard” as allowing them to substitute inadequate sanitation programs—which may not require documentation of monitoring or verification measures—for necessary critical control points.

(Response 133) We acknowledge that there can be a tension between the need for flexible requirements that must apply to diverse food processing facilities and the regulatory need to evaluate compliance with requirements. See Response 5 regarding our approach to enforcing the rule. Although preventive controls, such as sanitation controls, are not always directed to critical control points (see § 117.135(a)(2)(ii)), we agree that there could be circumstances where we would disagree with a facility about the measures it has in place regarding sanitation. We will address such circumstances on a case-by-case basis.

(Comment 134) Some comments express concern that the term “significant hazard” may lead to misunderstanding by medium and smaller processors and ask how businesses with limited food safety experience will understand the difference between a food safety hazard that is “reasonably likely to occur” (and, thus, must be controlled by a full HACCP Plan) and a “Significant Hazard” that can be controlled by a preventive control plan.

(Response 134) In most cases, it will not be necessary for a food processor to understand the difference between a hazard that is “reasonably likely to occur” in the concept of HACCP requirements and a “hazard requiring a preventive control” in the context of this rule. Instead, a food processor must identify those regulations that apply to it. For example, a processor of juice products is subject to our HACCP

regulations for juice, but is not subject to the requirements of this rule.

(Comment 135) Some comments express concern about the potential for divergent interpretations of the definition by industry and regulators. Some comments state that a baseline understanding between industry and regulatory officials will need to be established as to what constitutes a “significant hazard” and what preventive controls will be deemed to be adequate to control such a hazard. Some comments ask us to provide guidance or allow “inter-state compacts” to provide guidelines on what constitutes significant hazards in major food industries. Other comments assert that the FSPCA provides the best forum to identify what constitutes “significant hazards” in food, and to develop timely and appropriate guidance and training for addressing such hazards. Other comments ask to engage with us early and often on the development of applicable guidance documents regarding what constitutes a “significant hazard” for produce industry operations and provide an opportunity to explain and discuss current industry best practices and preventive controls to address identified significant hazards. Some comments ask us to develop an administrative procedure to adjudicate differences in professional opinion between a regulated firm and a Federal or State regulatory agency regarding hazard “significance.”

(Response 135) We agree that guidance will help create an understanding between industry and regulatory officials as to FDA recommendations for hazards that require preventive controls and appropriate preventive controls for those hazards. See Response 2 and Response 5. We decline the request to develop an administrative procedure to adjudicate differences in professional opinion between a regulated firm and a Federal or State regulatory agency regarding hazard “significance.” We note that existing procedures provide for an outside party to obtain internal agency review of a decision by an employee other than the Commissioner (see § 10.75). The comments do not explain what they mean by “inter-state compacts” or provide any examples of “inter-state compacts” and, thus, it is not clear what, if any, role an “inter-state compact” could play in determining what constitutes a significant hazard in major food industries.

(Comment 136) Some comments ask us to concur that “temporal hazards” in milk and dairy products (specifically,

aflatoxin, pesticides, and radiological contamination) do not represent “significant hazards” that require monitoring and verification activities on an ongoing basis. These comments also ask us to acknowledge that in many cases the testing done by FDA and others is sufficient for protecting public health and that it is not necessary to require ongoing monitoring by individual dairy facilities to comply with the rule.

(Response 136) We decline these requests because such a determination should be facility specific. However, we have revised the considerations for the hazard evaluation to clarify that in making the determination as to what hazards require preventive controls, the facility can consider factors such as the temporal nature of the hazard (see § 117.130(c)(2)(x) and Response 407). In determining the appropriate preventive control management components, the facility can take into account the nature of the preventive control and its role in the facility’s food safety system (see § 117.140(a)).

(Comment 137) One commenter asserts that municipal drinking water supplies can be variable such that they could be a hazard that is reasonably likely to occur and that relying on municipal water will compromise food safety. The commenter asks us to “close the gap” in Federal risk assessment policies by adding regulatory text to the proposed definition of “significant hazard” to specify that the hazards are based on the outcome of a hazard analysis that includes any water used by the facility, whatever its source. The commenter further asserts that FDA must require full scientific water risk analysis and written water safety plans and water treatment where necessary and that the written water safety plans must comply with FSMA standards for accurate and precise measurement instruments, monitoring, verification, and documentation. The commenter asserts that in lieu of a full assessment and testing, the plant could disinfect all incoming water to a preventive control standard, and track and document compliance. The commenter further asserts that its commercially available technology provides the most cost effective disinfection for a wide range of sporeformers, bacteria, viruses, algae and molds.

In addition, the commenter asserts that food manufacturers who are not required to make a special effort to understand the status of their water supply through a required risk assessment process will not be aware of the need to institute preventive controls for their water supply. To support its

position, the commenter makes assertions about the purpose of water standards established by the U.S. Environmental Protection Agency (EPA), the risk presented by water quality to the production of safe food, and the impact to food safety of EPA’s 2013 changes to the National Primary Drinking Water regulations (EPA’s NPDW regulations; 41 CFR parts 141 and 142) regarding total coliforms (EPA’s total coliform rule) (78 FR 10270, February 13, 2013).

The commenter asserts that EPA’s NPDW regulations hold public water suppliers to a standard that is protective of drinking water, not food manufacturing water. For example, the commenter describes EPA’s NPDW regulations as requiring water suppliers to treat at least 95 percent of the water they distribute to the public to the treatment technique standard of the treatment they use and then argues that a user of the water would not necessarily know if it was getting some of the “allowable 5 percent off-spec water.” The commenter also asserts that current standards in EPA’s NPDW regulations are not universally achieved by all public water systems. The commenter also asserts that EPA’s total coliforms rule further reduces the applicability of municipal water standards to food manufacturing (*e.g.*, because it reduced the frequencies of water monitoring and public notices about water quality and instead shifted the regulatory scheme towards corrective action).

According to the commenter 95,000 public water systems do not disinfect the water they provide to the public, and some studies have found infective viruses in drinking water samples in communities that did not disinfect their water. According to the commenter, water supplies close to aquifers that were not disinfected before distribution have recently had boil water advisories, demonstrating that problems with the water supply are reasonably likely to occur. The commenter questions whether the food manufacturing plants using that water had water safety back-up plans, stopped production, had monitoring measures in place to determine the impact of the unsafe water, or recalled product manufactured during the period when the municipal water systems had coliform positive tests but had not yet confirmed these tests and therefore had not yet issued the advisory. The commenter also asks whether the facilities relied on the traditional assumption that if they use municipal water their food safety risk analysis does not have to cover water, they do not need a written water safety

plan, and they do not need to monitor the safety of their water.

(Response 137) We decline the request to change the regulatory text to explicitly require that the hazard analysis address any water used by the facility, whatever its source. Many of the commenter’s assertions address issues under the jurisdiction of EPA, such as “allowing” “5 percent off-spec water”; whether current standards are universally achieved by all public water systems; and whether it is appropriate to allow some water systems to not disinfect the water they supply. Such issues that are under the jurisdiction of EPA are outside the scope of this rulemaking. We consider that water standards directed to drinking water for household use would also be adequate for the production of food products and, thus, have no reason to question whether a facility can rely on the standards in EPA’s NPDW regulations to satisfy the long-standing CGMP requirement that any water that contacts food, food-contact surfaces, or food-packaging materials must be safe and of adequate sanitary quality (§ 117.37(a)). For example, we consider that water standards that EPA concludes are appropriate for drinking water are also appropriate for the production of water-based beverages, which are mostly water. We also see no reason to specifically require that a facility that satisfies the CGMP requirement for water also address water quality in its hazard analysis. Further, if a facility chooses to address the safety of water in its hazard analysis (*e.g.*, water used in washing fresh-cut produce), we consider it more likely that the facility would treat the water onsite, obtain the water supplier’s records documenting the results of its water testing, or simply test the water on a periodic basis, rather than conduct a risk assessment for the water source.

Under § 117.37(a), we expect any food establishment—regardless of whether it is a facility subject to FSMA’s requirements for hazard analysis and risk-based preventive controls—to be vigilant regarding public health advisories such as a “boil water advisory” and to take appropriate action in light of such advisories. It is not necessary for the regulatory text to specify each potential problem or to specify the actions a food establishment must take to address each potential problem.

### 33. Significantly Minimize

We proposed to define the term “significantly minimize” to mean to reduce to an acceptable level, including to eliminate.

(Comment 138) Some comments assert that the definition of “acceptable level” for fresh produce is unclear because of the presence of spoilage microorganisms, which subject food to decomposition and reduce quality, but are not a public health concern. These comments ask us to revisit and change regulatory text that either does not clarify, or over-steps the intention of, the rule.

(Response 138) We proposed to define “significantly minimize” to give context to the term used in FSMA to define “preventive control.” Thus, in this rule the term “significantly minimize” relates to hazards that will be addressed by preventive controls. The term “significantly minimize” would not be relevant to spoilage microorganisms unless the facility determines, through its hazard analysis, that the spoilage microorganisms are a hazard requiring a preventive control. The standard of “acceptable level” is a flexible standard. By “acceptable level,” we mean a level that will not cause illness or injury or result in adulterated food.

#### 34. Small Business

We proposed to define the term “small business” to mean, for the purposes of part 117, a business employing fewer than 500 persons. As previously discussed, we conducted a Food Processing Sector Study as required by section 418(l)(5) of the FD&C Act (Ref. 19) and used the results of the study in defining the term “small business” (78 FR 3646 at 3700 to 3701). We made the results of the Food Processing Sector Study available in Docket No. FDA-2011-N-0920 and requested public comment on that study.

(Comment 139) Some comments express concern that the Food Processing Sector Study is not comprehensive. Some comments assert that FDA did not sufficiently collaborate with USDA, and that FDA significantly underestimated the number of mixed-use facilities, particularly by neglecting to count farms that perform the processing steps on RACs to become a processed food. Other comments assert that the Food Processing Sector Study is woefully inadequate and must be undertaken again to comply with the law.

(Response 139) We previously acknowledged the limitations of the Food Processing Sector Study (78 FR 3646 at 3700–3701). We have revised and extended the results of our earlier study by expanding our data sources and by including representatives from USDA’s Economic Research Service, USDA’s Agricultural Marketing Service,

and the American Farm Bureau to help oversee the revised study. The revised Food Processing Sector Study is available in the docket of this rule (Ref. 21).

Our original analysis was based on the merger of Dun & Bradstreet data and FDA’s Food Facility Registration data to help us estimate the number of manufacturing facilities that are also classified as farms. We have updated that data source and added data sources. To better account for farms that perform processing activities, we included Census of Agriculture (Ag Census) data both to provide a count of total U.S. farms and to estimate the number of farms conducting food processing activities, to the extent that the data identifies processing activities. We also included the Agricultural Resource Management Survey (ARMS) data because it included questions about some processing activities for select commodities.

Both the Ag Census and ARMS are silent about many processing activities. Therefore, we also obtained estimates from commodity specialists at trade associations, USDA, and universities with in-depth knowledge of the processing activities for specific agricultural commodities. We also reached out to directors of promotion and marketing boards, and considered marketing agreements and marketing orders for various vegetables, fruits, and tree nuts to obtain information about the portion of farms that conduct food processing activities for use in this study.

(Comment 140) Some comments ask us to explain how to calculate the number of full-time equivalent employees—*e.g.*, with respect to temporary workers, seasonal workers, and part-time workers.

(Response 140) As previously discussed, we proposed to establish the same definition for small business as that which has been established by the U.S. Small Business Administration (SBA) under 13 CFR part 121 for most food manufacturers, and the limit of 500 employees would include all employees of the business rather than be limited to the employees at a particular facility (78 FR 3646 at 3701). We will base the calculation on “full-time equivalent employees” and use the same approach to calculating full-time equivalent employees for the purpose of this rule as we used to calculate full-time equivalent employees in the section 414 recordkeeping regulations (see § 1.328). This approach is similar to the approach we used to calculate the small business exemption for nutrition labeling of food (21 CFR 101.9(j)(18)(iv)(D)). Under this

approach, the number of full-time equivalent employees is determined by dividing the total number of hours of salary or wages paid directly to employees of the business entity claiming the exemption and of all of its affiliates and subsidiaries by the number of hours of work in 1 year, 2,080 hours (*i.e.*, 40 hours × 52 weeks).

We received similar comments during the rulemaking to establish the section 414 recordkeeping regulations, and in response to those comments we established the definition of “full-time equivalent employee” in the definitions for that rule. As with the section 414 recordkeeping regulations and the nutrition labeling regulations, the calculation for the number of employees affects exemptions (*i.e.*, the exemptions for on-farm, low-risk activity/food combinations in § 117.5(g) and (h), which apply only to small and very small businesses), not just compliance dates. Therefore, we are establishing the definition of “full-time equivalent employee” in the definitions for this rule (§ 117.3) and modifying the definition of “small business” to use the term “500 full-time equivalent employees” rather than “500 persons.”

(Comment 141) Some comments ask us to base the definition of “small business” on the amount of sales, rather than on the number of employees, for consistency with the definition of “very small business.”

(Response 141) We decline this request. As previously discussed, we based the definition of “very small business” on sales because the criterion of being a “very small business” plays a significant role in determining whether a facility is a “qualified facility,” and because the other principal criterion for being a “qualified facility” is based on sales (section 418(l)(1)(C) of the FD&C Act; see 79 FR 58524 at 58556). In contrast, section 418(l) of the FD&C Act does not specify any particular criterion (whether sales or number of employees) for the definition of “small business,” other than direct us to consider the results of the Food Processing Sector Study. Basing the definition of “small business” on the number of employees is consistent with our approach to defining “small business” for our HACCP regulation for juice (§ 120.1(b)(1)), the section 414 recordkeeping regulations (69 FR 71562, December 9, 2004), and our CGMP regulation for manufacturing, packaging, labeling, or holding operations for dietary supplements (72 FR 34752, June 25, 2007).

(Comment 142) Some comments assert that the specified number of

employees (*i.e.*, 500) has no relevance to food safety.

(Response 142) The definition of “small business” is relevant to two aspects of this rule. First, it is relevant to the compliance date for the establishment, and provides an additional year for establishments satisfying the definition to comply with the rule. As discussed in the Final Regulatory Impact Analysis (FRIA) (Ref. 38), we estimate that the number of small businesses that will be eligible is 45,936, accounting for 5.4 percent of the food supply. Although the purpose of the rule is to improve food safety, delaying the effective date for approximately 6 percent of the food supply will not significantly affect food safety in the long term.

Second, the definition of “small business” is relevant to the statutory exemptions for on-farm, low-risk activity/food combinations for manufacturing/processing, packing, and holding food by farm mixed-type facilities. These statutory exemptions, although expressly authorized only for small and very small businesses, encompass risk and are limited, because a small or very small farm mixed-type facility is only eligible for the exemption if the only activities that the facility conducts are the specified on-farm low-risk activity/food combinations.

(Comment 143) Some comments assert that the specified number of employees (*i.e.*, 500) may or may not be indicative of business size. As an example, the comment notes that harvest employees may operate under contract rather than be the grower’s employees.

(Response 143) If a farm mixed-type facility that is subject to this rule employs harvest employees under contract, the facility would include these employees in its calculation of full-time equivalent employees and would adjust for the temporary, seasonal nature of the increased number of employees when it calculates the 12 month average number of full-time equivalent employees. (See Response 140 for the calculation of full-time equivalents.)

(Comment 144) Some comments assert that the human preventive controls rule and the produce safety rule should use the same definition of “small business.”

(Response 144) We tailored the definitions of “small business” to the characteristics of the sectors of industry subject to the two rules.

(Comment 145) Some comments assert that the definition of a small business as less than 500 employees

makes the very small business exemption irrelevant. These comments ask us to create a simple and broad small business exemption for any small business conducting “low-risk activities.”

(Response 145) We disagree that the definition of a small business makes the very small business exemption irrelevant and decline the request to create a “simple and broad small business exemption” for any small business conducting “low-risk activities.” Although both small and very small businesses are eligible for the exemption for such businesses that only conduct specified low-risk activity/food combinations, other provisions apply solely to very small businesses. For example, the compliance date for a very small business is different from the compliance date for a small business, and a very small business (but not a small business) is eligible for modified requirements.

### 35. Supplier

We proposed to define the term “supplier” to mean the establishment that manufactures/processes the food, raises the animal, or harvests the food that is provided to a receiving facility without further manufacturing/processing by another establishment, except for further manufacturing/processing that consists solely of the addition of labeling or similar activity of a *de minimis* nature.

As discussed in Response 32, we have revised the “farm” definition to explicitly include business models in which one operation grows crops but does not harvest them, and another operation, not under the same management, harvests crops but does not grow them. As also discussed in Response 32, this revision represents a change from the existing and proposed “farm” definitions, which describe a “farm” as an entity “devoted to the growing *and* harvesting of crops” (emphasis added). We proposed the “supplier” definition in the context of a single business entity “devoted to the growing *and* harvesting of crops” (emphasis added). We used the term “harvesting,” rather than “growing,” to reflect the last stage of production on a farm, except for packing.

Because the proposed “supplier” definition contemplated that the same business entity that grows crops also harvests them, we have revised the “supplier” definition so that the grower remains the supplier when the harvester is under separate management. Specifically, “supplier” is now defined to include an establishment that “grows” food rather than an

establishment that “harvests” food. Doing so focuses the requirements for the supply-chain program (see subpart G) on the entity that produces the food, rather than on the entity that removes the food from the growing area, when the grower and the harvester are not under the same management. Doing so also simplifies the determination of who the supplier is in complex business models, such as when a “handler” arranges for harvest by another business entity.

As discussed in Response 22, we consider a farm to be a type of “establishment” even though we revised the “farm” definition to refer to an “operation” rather than an “establishment” within that definition.

(Comment 146) Some comments assert that the definition of supplier is not workable because the status of warehouses and brokers is unclear in the definition. Other comments ask us to modify the definition to specify, in addition to the proposed definition, that the supplier could be an intermediary entity that takes responsibility on behalf of the receiving facility to ensure that the food meets the requirements of this part.

(Response 146) As discussed in Response 657, we agree that the role of intermediaries in the supply chain is critical, and we have added options for entities other than the receiving facility to perform certain supplier verification activities, provided that the receiving facility reviews and assesses the documentation produced by the other entity and documents that review and assessment. However, this does not mean that these entities take on the role of the supplier. As discussed in Response 658 and Response 123, we believe it is important to supplier verification to retain the identities of two parties involved—the receiving facility and the supplier. Therefore, we are retaining our definition of supplier.

(Comment 147) Some comments regarding RACs ask us to modify the definition of supplier in the case of commingled RACs, such that the supplier would be the person immediately back from the receiving facility in the supply chain provided that this entity (presumably a warehouse or aggregator) voluntarily complies with the requirements of subpart C of this part.

(Response 147) We decline this request. As discussed in Response 657, we recognize that doing supplier verification with commingled products will be a challenge. However, we believe it is important that there be a link between the receiving facility (which is manufacturing/processing the

food) and the supplier (who controlled the hazard(s) in the food). We are allowing an entity such as an aggregator or distributor to perform some verification activities, so the outcome requested by these comments will be achieved while maintaining the identities of the two primary parties in the supplier verification relationship (see Response 657).

(Comment 148) One comment asks us to clarify who would be the supplier in a situation in which dairy farms are providing milk to a cooperative collecting milk.

(Response 148) In this example, the dairy farms would be the suppliers because they are raising the animals.

(Comment 149) One comment asks us to clarify that the proposed definition of supplier does not include sources of processing aids or chemicals required for post-harvest treatments and packing processes (including waxes, fungicides, detergents and sanitizers).

(Response 149) As defined, the supplier is the establishment growing the food, not those establishments providing inputs (such as waxes, fungicides, detergents and sanitizers) to that entity.

### 36. Validation and Verification

We proposed to define the term “validation” to mean that element of verification focused on collecting and evaluating scientific and technical information to determine whether the food safety plan, when properly implemented, will effectively control the identified hazards. We proposed to define the term “verification” to mean those activities, other than monitoring, that establish the validity of the food safety plan and that the system is operating according to the plan.

(Comment 150) Some comments ask us to revise the definitions of “validation” and “verification” to be consistent with the Codex definitions. (Codex defines “validation” to mean obtaining evidence that a control measure or combination of control measures, if properly implemented, is capable of controlling the hazard to a specified outcome. Codex defines “verification” to mean the application of methods, procedures, tests and other evaluations, in addition to monitoring, to determine whether a control measure is or has been operating as intended (Ref. 39).)

Some comments ask us to more clearly distinguish between “validation” and “verification.” Some comments assert that validation is not an element of verification as stated in our proposed definition and suggest that we clearly separate requirements for

validation from requirements for verification—*e.g.*, by moving the proposed requirements for verification to a distinct section in the regulatory text.

(Response 150) We have explained how our proposed definitions for “validation” and “verification” align with a variety of widely recognized definitions, including definitions established by Codex, the NACMCF HACCP guidelines, and Federal HACCP regulations for seafood, juice, and meat and poultry (78 FR 3646 at 3700). We disagree that validation is not an element of verification, but acknowledge it is not necessary to say so within the definition of “validation.” Although we have moved the details of the requirements for validation from its proposed location within the requirements for verification (*i.e.*, proposed § 117.155(a)) to a separate section (§ 117.160), we did so as an editorial change to improve clarity and readability rather than as a substantive change to signal that validation is not an element of verification (see table 8 in the 2014 supplemental human preventive controls notice, 79 FR 58524 at 58557).

We agree that validation can apply to a specific control measure as specified in the Codex definition. We also agree that validation can apply to a combination of control measures as specified in the Codex definition. The food safety plan is one example of a combination of control measures.

Although we likewise agree that verification can apply to a specific control measure as specified in the Codex definition, we disagree that to be consistent with the Codex definition we should adopt a definition that excludes the application of verification to the food safety plan. It is well established that some verification measures, such as testing for a pathogen, verify that multiple control measures operated as intended. (See, *e.g.*, Codex’s discussion of verification for uncooked fermented sausages (Ref. 39)).

To more clearly distinguish between “validation” and “verification,” the definition of “validation” we are establishing in this rule specifies that validation means obtaining and evaluating scientific evidence that a control measure, combination of control measures, or the food safety plan as a whole, *when properly implemented*, is capable of effectively controlling the identified hazards (emphasis added). We also made conforming changes associated with the revised definition of “validation” in the requirements for validation (see § 117.160(b)(2)). The definition of “verification” we are

establishing in this rule specifies that verification means the application of methods, procedures, tests and other evaluations, in addition to monitoring, to determine whether a control measure or combination of control measures *is or has been operating as intended* and to establish the validity of the food safety plan as a whole (emphasis added). Consistent with the request of the comments, the definition of “verification” uses the Codex description of verification as the application of methods, procedures, tests and other evaluations, in addition to monitoring.

### 37. Very Small Business

We proposed to define the term “very small business” to mean, for the purposes of proposed part 117, a business that has less than \$1,000,000 in total annual sales of human food, adjusted for inflation. As discussed in the proposed rule, we conducted a Food Processing Sector Study as required by section 418(l)(5) of the FD&C Act (Ref. 19) and used the results of the study in defining the term “very small business” (78 FR 3646 at 3700 to 3702). We made the results of the Food Processing Sector Study available in Docket No. FDA–2011–N–0920 and requested public comment on that study. As discussed in Response 139, we have updated that study (Ref. 21).

(Comment 151) Some comments support the proposed dollar threshold of \$1,000,000, noting that it would provide sufficient flexibility to companies that receive the exemption to allow them to continue to operate. Some comments that support the proposed dollar threshold of \$1,000,000 state that this threshold is consistent with Congress’s mandate that the FSMA rules provide flexibility for all sizes and types of businesses and facilities, including small processing facilities co-located on farms, and provide special considerations for small and very small businesses. These comments also state that our proposal to adopt the \$1,000,000 threshold is appropriate in light of the two options Congress provided for facilities to qualify for modified requirements, and that although Congress directed us to consider the Food Processing Sector Study in establishing the very small business definition, it did not otherwise establish parameters for us to use in setting this definition, leaving it largely to our discretion. These comments argue that although Congress set out two options whereby facilities could qualify for modified requirements, Congress did not bind us to using both options. These comments express the view that when

Congress is silent on an issue, the agency may reasonably interpret its authority. These comments state that proposing the \$1,000,000 threshold for a very small business is entirely reasonable given that businesses this size account for such a small percentage of the food supply, and given Congress's mandate that FDA establish flexible standards considering the effects of the rules on small and very small businesses.

Other comments disagree with the proposed dollar threshold of \$1,000,000. Some of these comments assert that the proposed dollar threshold of \$1,000,000 would create a new category of exemption not contemplated by FSMA and will create confusion for both those who may be subject to the rule and those trying to enforce it. These comments ask us to instead adopt the \$500,000 threshold we considered as "Option 2" in the 2013 proposed preventive controls rule (78 FR 3646 at 3702). Some comments assert that the proposed \$1,000,000 threshold would expose a larger number of consumers to a heightened risk of contracting a foodborne illness.

Other comments reiterate their previous assertions that any dollar threshold that exceeds \$250,000 would be contrary to Congressional intent and conflict with section 418(l) of the FD&C Act. Some of these comments assert that adopting a \$1,000,000 threshold would conflict with the statutory structure of the qualified facility program in a way that effectively nullifies a section of the law. Some of these comments assert that the discussion in the 2014 supplemental human preventive controls notice did not adequately address their comments submitted to the 2013 proposed human preventive controls rule because that discussion does not explain why we believe the proposed \$1,000,000 threshold is consistent with the statute's definitions of a qualified facility in section 418(l)(1) of the FD&C Act. These comments assert that the discussion in the 2014 supplemental human preventive controls notice clearly indicates that the definition is intended to abrogate the definition of a qualified facility under section 418(l)(1)(C) of the FD&C Act because the "definition would . . . simplify a facility's determination of whether it is a qualified facility because the facility would only need to calculate its total sales of human food rather than determine how much food was sold to qualified end-users." The comments assert that this discussion shows that we have made a deliberate decision to write qualified facilities under section 418(l)(1)(C) and the limitations on sales

under section 418(l)(4)(B) out of the law and state that an agency has no authority to repeal a well-considered act of Congress by fiat in a rulemaking.

(Response 151) We are establishing a \$1,000,000 threshold for the definition of "very small business." We disagree that a \$1,000,000 threshold would create a new category of exemption not contemplated by FSMA. Under section 418(l)(1)(A) and (B) of the FD&C Act, a very small business is a qualified facility; under the exemption authorized in section 418(l)(2) of the FD&C Act, a qualified facility is subject to modified requirements rather than the requirements for hazard analysis and risk-based preventive controls. We have acknowledged that a \$1,000,000 threshold exempts a greater portion of the food supply than thresholds of either \$250,000 or \$500,000 (79 FR 58524 at 58555), but reaffirm that under the \$1,000,000 threshold the businesses that would be exempt from the requirements for hazard analysis and risk-based preventive controls would represent a small portion of the potential risk of foodborne illness; businesses that fall within this definition of "very small business," collectively, produce less than 0.6 percent of the food supply (Ref. 38). In addition, most of these facilities will be subject to the CGMP requirements in subpart B; the only exemption from those CGMP requirements is the exemption in § 117.5(k) (which applies to: (1) Farms; (2) certain fishing vessels; (3) establishments solely engaged in the holding and/or transportation of one or more RACs; (4) activities of "farm mixed-type facilities" that fall within the definition of "farm"; and (5) establishments solely engaged in hulling, shelling, drying, packing, and/or holding nuts (without additional manufacturing/processing)).

We disagree that a \$1,000,000 threshold for the definition of "very small business" will create confusion for both those who may be subject to the rule and those trying to enforce it; in contrast, it is our view that a \$1,000,000 threshold will be less burdensome for both the qualified facilities and FDA. (See Response 581, where we explain that for compliance purposes we intend to focus on financial records demonstrating that a business averages less than the specified dollar threshold rather than records demonstrating that the average annual monetary value of the food manufactured, processed, packed, or held at such facility that is sold directly to qualified end-users during a three-year period exceeded the average annual monetary value of the

food sold by the facility to all other purchasers.)

We reaffirm our view, expressed in the 2014 supplemental human preventive controls notice, that section 418 of the FD&C Act does not limit how we may define "very small business" other than by requiring us to consider the Food Processing Sector Study, and we have done so. (See also Response 152.) Therefore, we disagree that adopting a \$1,000,000 threshold would conflict with the statutory structure of the qualified facility program in a way that effectively nullifies an entire section of the law. We also disagree that our explanation in the 2014 supplemental human preventive controls notice demonstrates that we have made a deliberate decision to write qualified facilities under section 418(l)(1)(C) of the FD&C Act, and the limitations on sales under section 418(l)(4)(B) of the FD&C Act, out of the law. Likewise, we disagree that we are in any way "repealing" a well-considered act of Congress by fiat in a rulemaking.

(Comment 152) Some comments that support a dollar threshold of \$250,000 rather than \$1,000,000 assert that the rationale we presented in the 2014 supplemental human preventive controls notice for a \$1,000,000 threshold is inconsistent with the rationale we presented in our "original draft" of the 2013 proposed human preventive controls rule. These comments quote that "original draft" of the 2013 proposed human preventive controls rule as follows: "FDA is proposing to define the term 'very small business' to mean, for the purposes of part 110, a business that has less than \$250,000 in total annual sales of foods, adjusted for inflation. We are proposing to define very small business using a dollar amount that is, for practical purposes, the same as the dollar amount of sales by a qualified facility to end users other than those that would satisfy the definition of 'qualified end users.'" The proposed definition is consistent with the findings of a study that we conducted as required by section 418(l)(5) of the FD&C Act." These comments note that we acknowledged, in the 2014 supplemental preventive controls notice, that section 418(n)(1)(B) of the FD&C Act requires us to consider the Food Processing Sector Study for the purpose of defining "very small business" (79 FR 58524 at 58555) and argue that it is difficult to see how the same study that supported defining a very small business as one that has less than \$250,000 in total annual sales of food now supports a definition that puts that threshold at less than \$1,000,000.

(Response 152) These comments are citing a rationale in a draft version of the 2013 proposed human preventive controls rule, which we submitted to the Office of Management and Budget in 2011 (Ref. 40, p. 259). In that draft, we proposed a single option for the definition of “very small business” (*i.e.*, less than \$250,000) and explained the reasons for proposing that single option, including an explanation that the option was consistent with the findings of the Food Processing Sector Study. In contrast, in the published 2013 proposed human preventive controls rule that we issued for public comment we identified three options as part of a co-proposal for the definition of very small business, and provided a basis to support each option. For each option of the co-proposal, we made the same statement regarding the Food Processing Sector Study when we discussed the impact of the option on mixed-type facilities—*i.e.*, that it is apparent that the number of co-located facilities is concentrated at the smaller end of the size spectrum. We see no conflict between a statement (made in the context of a single proposed option for the definition of “very small business”) that a specific proposed definition was consistent with the findings of the Food Processing Sector Study and a statement (made in the context of three proposed options for the definition of “very small business”) that it is apparent that the number of co-located facilities is concentrated at the smaller end of the size spectrum. (See also Response 139 regarding the Food Processing Sector Study.)

(Comment 153) Some comments assert that the proposed \$1,000,000 threshold would be inconsistent with our explanation, in the 2014 proposed sanitary transportation rule, of the definition of a “non-covered business” as one having less than \$500,000 in total annual sales. These comments note that we considered whether a less than \$1 million threshold should be applied but concluded: “[W]e believe such an expansion would result in a greater risk of food becoming adulterated during transport due to insanitary food transportation practices.” (Ref. 41) These comments assert that if we were to apply the same analysis we used in the 2014 proposed sanitary transportation rule to the human preventive controls rule, the threshold for a very small business would be below \$500,000.

(Response 153) The \$500,000 threshold we proposed in the 2014 proposed sanitary transportation rule would apply to “non-covered businesses”—*i.e.*, businesses that would

be completely exempt from the requirements of the sanitary transportation rule. In contrast, the \$1,000,000 threshold we are establishing in this rule applies to very small businesses that will be subject to modified requirements rather than be completely exempt. A very small business will have two options to comply with the modified requirements in the human preventive controls rule (the food safety practices option and the option to demonstrate compliance with other applicable non-Federal food safety law; see § 117.201(a)(2) and the discussion in sections XXXVIII.C.2 and XXXVIII.C.3). Regardless of which option a very small business chooses to comply with the modified requirements, we will inspect the business for compliance with the CGMPs and the modified requirements. In contrast, if the final sanitary transportation rule excludes a “non-covered business” as would be defined in that rule, that business would be completely exempt rather than subject to modified requirements and, thus, would be not be inspected for compliance with any aspect of the sanitary transportation rule.

(Comment 154) Some comments ask us to clarify how to classify the size of a business that does not take ownership of or directly sell food (*e.g.*, warehouses and re-packing facilities) to determine status as a qualified facility.

(Response 154) We have revised the definition to specify that the \$1,000,000 threshold applies to sales of human food plus the market value of human food manufactured, processed, packed, or held without sale (*e.g.*, held for a fee). When there are no sales of human food, market value of the human food manufactured, processed, packed, or held without sale is a reasonable approach to calculating the dollar threshold for very small business.

(Comment 155) Some comments ask us to specify that the monetary threshold for the definition be based on average sales during a three-year period on a rolling basis because otherwise firms may be subject to significant changes in status from year to year. These comments also ask us to clarify that the sales are to be evaluated retrospectively, not prospectively.

(Response 155) We have revised the definition of very small business to specify that it is based on an average during the 3-year period preceding the applicable calendar year in sales of human food plus the market value of human food manufactured, processed, packed, or held without sale (*e.g.*, held for a fee). The applicable calendar year is the year after the 3 calendar years

used to determine whether a facility is a very small business. The most recent applicable calendar year is the current year. For example, on June 3, 2024, 2024 is the most recent applicable calendar year and is the applicable calendar year when the 3 calendar years used to determine whether a facility is a very small business are 2021–2023. The exception is when 3 calendar years of records are not available, such as when a facility begins business after the compliance date for very small businesses. In such situations the applicable calendar year refers to the year during which the calculation is made but is not preceded by 3 calendar years used to determine whether a facility is a very small business.

As a companion change, we are explicitly requiring that a facility determine and document its status as a qualified facility on an annual basis by no later than July 1 of each calendar year (see § 117.201(c)(1)). Although this requirement was implicit in the proposed requirement that a facility must resubmit a notification to FDA if its status changes as a qualified facility (proposed § 117.201(c)(2), which we are finalizing as § 117.201(c)(3)), we are making this requirement explicit to clarify the responsibility of the facility to affirmatively determine its status when the calendar years that apply to the 3-year average change. The July 1 deadline for a facility to determine its status provides facilities with 6 months to make the determination after the end of the previous 3 calendar years.

We also are establishing an earlier compliance date for the financial records that a facility maintains to support its status as a very small business that is eligible for the qualified facility exemption in § 117.5(a). Specifically, the compliance date for a facility to retain records to support its status as a qualified facility is January 1, 2016. Even with this earlier compliance date for these records, we realize that although the calculation for “very small business” in the regulatory text is based on 3 calendar years, a facility will only be required to have 2 calendar years of records as of the general compliance date for very small businesses. Specifically, by September 17, 2018 a facility that begins retaining applicable financial records on January 1, 2016, would only have such records for 2 previous calendar years. Therefore, it would be reasonable for a facility to make the calculation based on the 2 previous calendar years. If a facility has records for 3 previous calendar years, the facility could make the calculation based on the longer time period. During inspection in 2018, when a facility has

records for the preceding 2 calendar years, but not for the preceding 3 previous calendar years, we will accept records for the preceding 2 calendar years as adequate to support status as a qualified facility. We note that in some situations, a shorter time period is sufficient to determine that a facility is not a very small business. For example, a facility with sales exceeding \$3,000,000 for the preceding calendar year cannot qualify as a very small business because no amount of sales from other years will reduce average sales below the threshold of \$1,000,000.

The available financial records for a facility that begins operations between January 1, 2017 and September 17, 2018 would not cover even 2 calendar years by September 17, 2018. During the first 3 years of such a facility's operation, it would be reasonable for a facility to make the calculation based on records it has (*i.e.*, for one or two preceding calendar years), and we will accept records for the preceding one or two years as adequate to support status as a qualified facility in these circumstances.

When a facility does not begin operations until after January 1, 2018, it would be reasonable for the facility to rely on a projected estimate of revenue (or market value) when it begins operations. We would evaluate the credibility of the projection considering factors such as the facility's number of FTEs. After the facility has records for one or two preceding years, it would be reasonable for the facility to make the calculation based on records it has (*i.e.*, for one or two preceding calendar years) and we will accept records for the preceding one or two calendar years as adequate to support status as a qualified facility in these circumstances.

(Comment 156) Some comments ask us to only include the total annual sales of food in the United States, adjusted for inflation, for foreign facilities that export food to the United States.

(Response 156) We decline this request. The purpose of the definition of "very small business" is principally to enable such businesses to comply with modified requirements, because they have fewer resources to direct to full compliance with the rule. A foreign business that sells more than the threshold dollar amount of food has more resources than the businesses being excluded, even if less than that threshold dollar amount reflects sales to the United States. Likewise, a domestic business that sells more than the threshold dollar amount of food has more resources than the businesses being excluded, even if that domestic business exports some of its food and, as a result, less than that threshold

dollar amount reflects sales within the United States.

As discussed in Response 154, to address facilities such as those warehouses and re-packing facilities that do not take ownership or directly sell food we have revised the definition of "very small business" to specify that the \$1,000,000 threshold applies to sales of human food plus the market value of human food manufactured, processed, packed, or held without sale (*e.g.*, held for a fee). As with "sales," facilities such as those warehouses and re-packing facilities that pack or hold more than the \$1,000,000 threshold would have more resources than the facilities being excluded.

(Comment 157) Some comments ask us to apply the rule to dairy farms with sales greater than \$1 million annually of processed or packaged dairy products, rather than bulk sales of fluid milk. Other comments ask us to only include the annual monetary value of food covered by the preventive controls rule, rather than all human food. In particular, these comments argue that food covered by the produce safety rule should not be counted in the calculation of the sales of food for the purpose of defining very small business for the preventive controls rule. Some of these comments assert that basing the threshold on the monetary value of food covered by the preventive controls rule, rather than all human food, would be necessary to be consistent with the approach used in the proposed animal preventive controls rule, in which the sales threshold was based on sales of animal food (*i.e.*, the product regulated by the rule).

(Response 157) We decline these requests. As discussed in Response 156, the purpose of the definition of "very small business" is principally to enable such businesses to comply with modified requirements, because they have fewer resources to direct to full compliance with the rule. Because of the exemptions in the human preventive controls rule (*e.g.*, for processors of seafood, juice, low-acid canned foods (LACF), and dietary supplements), basing the threshold on the monetary value of food covered by the preventive controls rule, rather than all human food, could lead to a situation where a very large food processor (such as a juice processor with more than \$20,000,000 in annual sales) would not need to comply with the human preventive controls rule for milk- and soy-based beverages that it produces, if the annual sales of milk- and soy-based beverages is less than \$1,000,000.

We disagree that a threshold based on sales of human food, rather than food

covered by the preventive controls rule, would be inconsistent with the threshold we proposed for the animal preventive controls rule. The threshold we proposed for the animal preventive controls rule was based on "total annual sales of food for animals, adjusted for inflation," which is exactly parallel to our proposal to base the threshold on "total annual sales of human food, adjusted for inflation." We proposed several exemptions to the animal preventive controls rule (see proposed § 507.5 (proposed 21 CFR 507.5)) and, thus, not all food for animals will be subject to the animal preventive controls rule.

(Comment 158) Some comments ask us to base the threshold on the total "volume of product" or "amount of product" handled or sold. These comments assert that an approach using product volume or amount would be more risk-based because it would correlate more closely to consumer exposures than dollar amounts, which can be skewed by product values.

(Response 158) We use sales as a proxy for volume. We acknowledge that dollar amounts can be skewed by product values and, thus, sales are an imperfect proxy for volume. However, we are not aware of a more practical way to identify a threshold based on volume or amount of product that could be applied across all product sectors, and the comments provide no suggestions for how their recommendation could be carried out.

(Comment 159) Some comments assert that our conclusion that our proposed definition of very small business is controlled by the two references in sections 418(l)(5) and 418(n)(1)(B) of the FD&C Act does not provide a reasonable justification for our decision. These comments assert that it is equally true that those two provisions would not prevent us from adopting one threshold (less than \$250,000) for purposes of defining a qualified facility (and for a very small business conducting on-farm low-risk activity/food combinations) and another (less than \$1 million) for setting compliance dates. These comments also assert that this is exactly the determination we made for our proposed animal preventive controls rule, where we proposed to define very small business, under the constraints of these same two references, as one with less than \$2,500,000 in sales. To give full effect to the design of the qualified facility program while providing an adequate compliance deadline, these comments ask us to revise the definition of very small business to mean "a business that has less than \$250,000 in total annual

sales of human food, adjusted for inflation, except that for purposes of the effective dates in section 103(i) of the FDA Food Safety Modernization Act (21 U.S.C. 350g note) the term means less than \$1,000,000 in total annual sales of human food.”

(Response 159) These comments are unclear. We agree that we proposed to define very small business, for the purposes of the animal preventive controls rule, as one with less than \$2,500,000 in sales (79 FR 58476 at 58510), but disagree that we proposed to adopt one threshold for purposes of defining a qualified facility and another threshold for setting compliance dates. Regardless, we decline the request to adopt a threshold lower than \$1,000,000 for purposes of defining a qualified facility, which appears to be the principal request of these comments (see Response 151).

(Comment 160) Some comments support the proposed dollar threshold of \$1,000,000, provided that we also make changes to the “farm” definition to encompass activities of food hubs performing low-risk packing and holding activities on RACs for distribution in local food markets. If we do not revise the “farm” definition to encompass such activities, these comments assert that a threshold dollar amount of \$2,000,000 would be necessary to allay concerns that making food hubs subject to the requirements for hazard analysis and risk-based preventive controls would cause many food hubs to fail, and would prevent the start of new food hubs.

(Response 160) See Response 23 and Response 25. Food hubs that pack and hold RACs are covered by the “farm” definition if the farm(s) that grow or raise the majority of the RACs packed and held by the food hub own, or jointly own, a majority interest in the food hub. Thus some food hubs will not be required to register as a food facility and, thus, will not be subject to the requirements for hazard analysis and risk-based preventive controls. Those food hubs that exceed the specified dollar threshold for a very small business and are not within the “farm” definition would be subject to the requirements for hazard analysis and risk-based preventive controls. However, the preventive controls that the food hub would establish and implement would depend on the food hub, the food, and the outcome of the facility’s hazard analysis, and the preventive control management components that the food hub would establish and implement for its preventive controls would be established as appropriate to ensure the

effectiveness of the preventive controls, taking into account the nature of the preventive control and its role in the facility’s food safety system. A facility that appropriately determines through its hazard analysis that there are no hazards requiring preventive controls would document that determination in its written hazard analysis but would not need to establish preventive controls and associated management components. (See Response 222).

(Comment 161) Some comments express concern that establishing a threshold based on U.S. dollars would place domestic firms at a disadvantage relative to foreign firms whose sales are often denominated in currencies valued lower than the dollar and often reflect much lower costs for factors such as land, labor, and environmental compliance. These comments ask us to base the threshold on an alternate measure, such as number of employees, or to calculate the sales of foreign very small businesses using an appropriate measure of purchasing power parity, if there is a straightforward way to do so.

(Response 161) We decline these requests. As previously discussed, we use dollar estimates to evaluate the percentage of all food produced in the United States that would not be covered by the rule (79 FR 58524 at 58555). We acknowledge that the definition of “small business” is based on number of employees, and that two exemptions (*i.e.*, the exemptions in § 117.5(g) and (h) for on-farm, low-risk activity/food combinations) apply to small businesses. However, the exemptions for on-farm, low-risk activity/food combinations are limited to a narrow sector of the food industry, whereas the exemption applicable to a very small business will apply to all sectors of the food industry.

We do not know of a straightforward way to calculate the sales of foreign very small businesses using an appropriate measure of purchasing power parity and are basing the threshold only on U.S. dollars.

(Comment 162) Some comments assert that the reach of potential harm from foods imported from very small businesses that would meet the proposed threshold of \$1,000,000 may be greater because they are more likely to be ingredients, such as spices, and argue that small amounts of spice can contaminate a large volume of food and, thus, cause widespread illnesses. Other comments assert that it is very likely that more facilities in exporting countries will be exempt under the definition, thus putting those located in the United States at a disadvantage. These comments assert that the

definition of “very small business” should reflect the probability and severity of potential hazards in order to align with the rest of the regulation and promote public health interests.

(Response 162) We acknowledge that ingredients such as spices, which have been associated with outbreaks of foodborne illness and large recalls, can contaminate a large volume of food (78 FR 3646 at 3665 and 3737). However, the suggestion that we define “very small business” in a way that reflects the probability and severity of potential hazards is neither practical nor aligned with a size-based nature of the term.

The comments asserting that it is very likely that more facilities in exporting countries will be exempt under the definition, thus putting those located in the United States at a disadvantage, provided no basis for the assertion. As discussed in Response 156, we have declined the request to only include the total annual sales of food in the United States, adjusted for inflation, for foreign facilities that export food to the United States.

(Comment 163) Some comments express concern that the Food Processing Sector Study is not comprehensive.

(Response 163) See Response 139 regarding the Food Processing Sector Study.

### 38. You

We proposed to define the term “you” for purposes of part 117, to mean the owner, operator, or agent in charge of a facility. We received no comments that disagreed with this proposed definition and are finalizing it as proposed.

### *D. Comments Asking FDA To Establish Additional Definitions or Otherwise Clarify Terms Not Defined in the Rule*

#### 1. Corrections

(Comment 164) Some comments assert that clearly distinguishing between the terms “corrective actions” and “corrections” will be imperative for industry to comply with the rule and for regulators to enforce the rule. Some comments ask us to use the ISO definitions of “corrective actions” and “corrections.” (According to ISO 22000:2005 definition 3.13, a “correction” is action to eliminate a detected nonconformity; according to ISO 22000:2005 definition 3.14, corrective action is action to eliminate the cause of a detected nonconformity or other undesirable situation.) Other comments ask us to eliminate the term “correction” and instead revise the rule to clarify the type of situation in which “corrective actions” are neither

necessary nor appropriate. As an example, these comments suggest that the proposed provisions for corrections could refer to “prompt actions taken in response to minor and isolated deviations that do not directly impact product safety.”

Other comments agree with the concept of simple “corrections” but assert that the term “corrections” is unnecessary and could be confusing because different facilities may use the term differently. These comments explain that sometimes “correction” is used to refer to the action taken to fix a deviation, and may or may not be part of an overall corrective action taken to identify the root cause of the deviation and to prevent a similar occurrence. These comments suggest that the provisions explain that prompt actions taken to address minor and isolated deviations are not subject to the same requirements as corrective actions to address potentially systemic concerns, without defining the term “corrections.”

(Response 164) We are defining the term “correction” to mean an action to identify and correct a problem that occurred during the production of food, without other actions associated with a corrective action procedure (such as actions to reduce the likelihood that the problem will recur, evaluate all affected food for safety, and prevent affected food from entering commerce). We agree that clearly distinguishing between the terms “corrective actions” and “corrections” will be important for both industry and regulators. We acknowledge that one way to distinguish between “corrective actions” and actions that we would consider “corrections” could be to avoid the term “corrections” and instead say what we mean each time the rule uses the term “corrections.” However, after reviewing the full regulatory text of proposed subpart C we concluded that it was not practical to do so, because the term “corrections” was used more often in a title or a cross-reference than in a provision where the full text of what we mean by the term “corrections” is necessary to communicate a requirement. Our definition of “corrections” focuses on the first step in a “corrective action procedure” (*i.e.*, identify and correct the problem) and also specifies those aspects of a corrective action procedure that do not apply to a correction (*i.e.*, actions to reduce the likelihood that the problem will recur, evaluate all affected food for safety, and prevent affected food from entering commerce). (A note to the ISO 22000:2005 definition of corrective action indicates that it includes cause analysis and is taken to prevent

recurrence.) We believe that this definition will be adequate to distinguish “corrective actions” from “corrections.”

As an example, if a facility applies sanitation controls for an environmental pathogen such as *L. monocytogenes* and food residue is observed on “clean” equipment prior to production, corrections would involve re-cleaning and sanitizing the equipment before it is used. Because the observation of food residue was made prior to production of food, no food is affected, and no actions are needed with respect to food. Although there are actions that can be taken to prevent reoccurrence, such as re-training sanitation personnel, these types of actions are not always needed.

## 2. Defect Action Level

(Comment 165) Some comments that address the proposed provisions regarding “defect action levels” (proposed § 117.110) ask us to define that term so that its meaning will be clear.

(Response 165) We have added a definition of the term “defect action level” to mean a level of a non-hazardous, naturally occurring, unavoidable defect at which FDA may regard a food product “adulterated” and subject to enforcement action under section 402(a)(3) of the FD&C Act. This definition derives from the definition in our long-standing “Defect Levels Handbook” (Ref. 36), which we continue to reference in the provisions established in this rule regarding defect action levels. This definition also derives from the long-standing provisions in § 110.110, which referred to natural or unavoidable defects in food for human use that present no health hazard and noted that some foods contain natural or unavoidable defects that at low levels are not hazardous to health. These long-standing provisions also noted that we establish maximum levels for these defects in foods produced under current good manufacturing practice and use these levels in deciding whether to recommend regulatory action.

## 3. Food-Packaging Material

(Comment 166) Some comments point out that the proposed human preventive controls rule would amend certain provisions requiring prevention of contamination and allergen cross-contact of food and food-contact surfaces to add “food-packaging materials,” a term which is not defined. These comments ask us to clarify that “food-packaging materials” is limited to packaging materials that are capable of contaminating food and does not

include shipping containers such as cartons and crates that pose no risk of introducing contaminants or food allergens into food.

(Response 166) For the purposes of the provisions that require protection against allergen cross-contact and against contamination of food, food-contact surfaces, and food-packaging materials, the term “food-packaging materials” does not include shipping containers such as cartons and crates that pose no risk of introducing contaminants or food allergens into food. We are not adding a definition of “food-packaging materials” to the definitions in § 117.3 because the provisions requiring protection against contamination are long-standing provisions that have been applied in the manner requested by the comment and, thus, adding a definition is not necessary to address the comment’s request.

## 4. Must

(Comment 167) Some comments ask us to define the term “must.”

(Response 167) We decline this request. The term “must” has a common meaning, and it is not necessary to establish a specific meaning for this term specifically for this rule.

## 5. Parameter and Value as Used in the Requirements for Process Controls

(Comment 168) Some comments ask us to define the terms “parameter” and “value” used in the requirements for preventive controls (§ 117.135). These comments ask us to define “parameter” as a measurable attribute and “value” as a specific measurement.

(Response 168) We decline this request. Both of these terms are used in the context of process controls and both have common meanings when associated with process controls. Therefore, it is not necessary for the rule to define them.

## 6. Raw Materials

Some comments ask us to define “raw materials” (see Comment 65). As discussed in Response 65, we have declined to do so.

## 7. Qualified Facility Exemption

(Comment 169) Some comments note that some of the terminology associated with the exemption for qualified facilities in the human preventive controls rule is different from terminology associated with an exemption in the proposed produce safety rule. These comments point out that the exemption in the proposed produce safety rule refers to “qualified exemptions” (§ 112.5), whereas the

exemption in the proposed human preventive controls rule refers to “exemptions” and “qualified facilities” (§ 117.5(a)). These comments ask us to harmonize the terminology associated with the exemption for qualified facilities in the human preventive controls rule with the terminology associated with “qualified exemptions” in the proposed produce safety rule.

(Response 169) We have revised the human preventive controls rule in two ways to better harmonize the terminology associated with the exemption for qualified facilities in the human preventive controls rule with an analogous exemption in the proposed produce safety rule. First, we have added a definition for the term “qualified facility exemption,” to mean an exemption applicable to a qualified facility under § 117.5(a) (see the regulatory text in § 117.3). Second, we also have made conforming changes throughout the rule to use the term “qualified facility exemption” when it applies. (See table 52.) It is not practical to fully harmonize the relevant terminology in these two rules due to differences in the framework applicable to food businesses subject to section 418 of the FD&C Act compared to the framework applicable to farms subject to section 419 of the FD&C Act. For example, a farm is not a “facility” and, thus, it would be confusing to refer to the applicable exemption established in the final produce safety rule as a “qualified facility exemption” or to refer to the business entities that would be exempt from the final produce safety rule as “qualified facilities.”

#### 8. Unexposed Packaged Food

As discussed in section XII, some comments ask us to clarify that modified requirements for packaged food that is not exposed to the environment only apply to such food that requires time/temperature control for safety (TCS food). To do so, we are defining the term “unexposed packaged food” to mean packaged food that is not exposed to the environment and using this term throughout the rule. Doing so simplifies the regulatory text and makes it clearer.

(Comment 170) Some comments note that certain fruits and vegetables must be stored and distributed in vented packaging to allow for proper air circulation and the escape of gases produced in the ripening process. These comments ask us to interpret “not exposed to the environment” in a way that would include produce packed in such vented crates. Some comments assert that “exposed to the environment” must be meaningful from

a food-safety standpoint and that produce shipped in vented crates presents virtually no food-safety risk because its environmental exposure is minimal. Some comments state that they do not believe Congress intended the term “not exposed to the environment” to mean only airtight, sealed containers.

(Response 170) We acknowledge that certain fruits and vegetables may need to be distributed in vented crates but disagree that such produce is “packaged food not exposed to the environment.” We consider “packaged food not exposed to the environment” and “unexposed packaged food” to mean that the food is in a form that prevents any direct human contact with the food (78 FR 3646 at 3712). Although environmental exposure to produce packed in vented crates would be less than environmental exposure to produce packed in open crates, a vented crate can subject produce to contamination from condensate in aerosols carried by the air handling system, moisture dripping onto containers, particulates blown through the facility by the air handling system, fingers of handlers during handling of crates, objects that may be inadvertently inserted through the vents, pests that can access the produce through the vents, etc. We believe it is appropriate for facilities storing produce in vented crates to conduct a hazard analysis and evaluate whether there are hazards that would require a preventive control.

(Comment 171) Some comments ask us to interpret “not exposed to the environment” to mean packaged with food grade material that is impermeable to outside bacteria or other contamination. These comments state that materials that prevent human contact with the food can nonetheless permit passage of contaminants and express concern about migration of chemicals, not approved as food-contact substances, from outer wrappers.

(Response 171) We decline this request. A facility that packages “unexposed packaged food” is responsible for complying with all applicable requirements for the production of the food, including requirements established under section 409 of the FD&C Act (21 U.S.C. 348) regarding indirect food additives and food contact substances when packaging food. Likewise, a facility that packs “unexposed packaged food” in outer wrappers is responsible to ensure the safety of the food it packed, including ensuring that food is not contaminated from chemicals in the outer wrappers. The exemption applicable to “unexposed packaged food” applies to

the storage of such foods, not the manufacturing, processing, or packing of such foods. For practical purposes, food that is not exposed to the environment will be protected from outside bacteria by the packaging. See also the discussions in Response 170 and Response 232 regarding produce packed in “vented crates,” which is not “unexposed packaged food.”

#### E. Additional Definitions To Clarify Terms Not Defined in the Proposed Rule

##### 1. Audit

As already noted, some comments ask us to make the various rules we are establishing to implement FSMA consistent with each other, and we have worked to align the provisions of this rule with the provisions of the FSVP rule to the extent practicable. (See Comment 9 and Response 9.) To align these provisions, we are establishing in this final rule a definition of “audit” analogous to the definition of “audit” we proposed for the FSVP rule. For the purposes of this rule, “audit” means the systematic, independent, and documented examination (through observation, investigation, records review, discussions with employees of the audited entity, and, as appropriate, sampling and laboratory analysis) to assess a supplier’s food safety processes and procedures.

##### 2. Full-Time Equivalent Employee

As discussed in Response 140, we have established a definition for “full-time equivalent employee” as a term used to represent the number of employees of a business entity for the purpose of determining whether the business qualifies for the small business exemption. The number of full-time equivalent employees is determined by dividing the total number of hours of salary or wages paid directly to employees of the business entity and of all of its affiliates and subsidiaries by the number of hours of work in 1 year, 2,080 hours (*i.e.*, 40 hours × 52 weeks). If the result is not a whole number, round down to the next lowest whole number.

##### 3. Raw Agricultural Commodity

We have added a definition of the term “raw agricultural commodity” to have the meaning given in section 201(r) of the FD&C Act. We decided to define this term in the rule to simplify the provisions in part 117 that refer to raw agricultural commodities.

##### 4. Supply-Chain-Applied Control

We have added a definition of the term “supply-chain-applied control” to mean a preventive control for a hazard

in a raw material or other ingredient when the hazard in the raw material or other ingredient is controlled before its receipt. We decided to define this term in the rule to simplify the provisions in part 117, and in the discussions in this document, that refer to preventive controls applied by a supplier before receipt by a receiving facility.

5. Written Procedures for Receiving Raw Materials and Other Ingredients

We have added a definition of the term “written procedures for receiving raw materials and other ingredients” to mean written procedures to ensure that raw materials and other ingredients are received only from suppliers approved by the receiving facility (or, when necessary and appropriate, on a temporary basis from unapproved suppliers whose raw materials or other ingredients are subjected to adequate verification activities before acceptance for use). We decided to define this term in the rule to simplify the provisions in part 117, and in this document, that refer to these procedures.

6. Qualified Individual

As discussed in section X.A., we are clarifying in new § 117.4(b)(1) that each individual engaged in manufacturing, processing, packing, or holding food (including temporary and seasonal personnel) or in the supervision thereof must have the education, training, or experience (or a combination thereof) necessary to manufacture, process, pack, or hold clean and safe food as appropriate to the individual’s assigned duties. To better align with the FSVP rule, we using the term “qualified individual” in new § 117.4(b)(1) and are defining the term “qualified individual” to mean a person who has the education, training, or experience (or a combination thereof) necessary to manufacture, process, pack, or hold clean and safe food as appropriate to the individual’s assigned duties. A qualified individual may be, but is not required to be, an employee of the establishment.

**X. Subpart A: Comments on Qualifications of Individuals Who Manufacture, Process, Pack, or Hold Food**

In 2002, FDA convened a CGMP Modernization Working Group (CGMP Working Group) to determine whether part 110 is in need of further revision. In 2005, the CGMP Working Group issued a report (CGMP Working Group Report) summarizing the comments we received, as well as our key findings (78 FR 3646 at 3651). One of the specific areas identified in the CGMP Working Group Report that presented an opportunity to modernize the regulation was to “require appropriate training for supervisors and workers to ensure that they have the necessary knowledge and expertise in food hygiene, food protection, employee health and personal hygiene to produce safe food products.” (78 FR 3646 at 3729)

As previously discussed, FSMA recognizes the importance of both training and CGMPs in preventing hazards from occurring in foods in its definition of preventive controls, which identifies supervisor, manager, and employee hygiene training, and CGMPs under part 110, as some of the procedures, practices, and processes that may be included as preventive controls (see sections 418(o)(3)(B) and 418(o)(3)(F) of the FD&C Act, respectively) (78 FR 3646 at 3729).

We proposed to re-establish part 110’s recommendations for training as proposed § 117.10(c) (FR 3646 at 3720). In addition, we requested comment on how best to revise part 110’s current recommendations to implement section 418(o)(3) of the FD&C Act and the recommendations of the CGMP Working Group with respect to training (FR 3646 at 3729). Specifically, we requested comment on whether we should merely replace the current recommendations for personnel education and experience with requirements or whether more detail would be appropriate. As examples of additional specificity, we requested comment on whether the rule

should specify that each person engaged in food manufacturing, processing, packing, or holding (including temporary and seasonal personnel and supervisors) must receive training as appropriate to the person’s duties; specify the frequency of training (e.g., upon hiring and periodically thereafter); specify that training include the principles of food hygiene and food safety, including the importance of employee health and personal hygiene, as applied at the facility; and specify that records document required training of personnel and, if so, specify minimum requirements for the documentation (e.g., the date of the training, the type of training, and the person(s) trained). We also requested comment on whether to establish some or all of the potential requirements for education and training in subpart B, subpart C, or both.

In the following paragraphs, we discuss comments that respond to our requests for comment on potential requirements for education and training and for whether to establish any requirements in subpart B, subpart C, or both. After considering these comments, we are establishing requirements for the qualifications of individuals engaged in manufacturing, processing, packing, or holding food in new § 117.4 in subpart A, with associated recordkeeping requirements established in § 117.9 in subpart A. The regulatory text makes clear that these requirements, established in subpart A, apply to individuals engaged in manufacturing, processing, packing, or holding food regardless of whether the individuals conduct these activities under the framework of the CGMPs established in subpart B or the framework for hazard analysis and risk-based preventive controls established in subparts C, D, E, and G. The regulatory text also makes clear that the qualification requirements apply to the recordkeeping requirements of subpart F. See table 11 for a description of these provisions.

TABLE 11—PROVISIONS FOR QUALIFICATIONS OF INDIVIDUALS WHO MANUFACTURE, PROCESS, PACK, OR HOLD FOOD

Final section designation	Proposed section designation	Description
117.4(a)(1) .....	N/A .....	Applicability to individuals who manufacture, process, pack, or hold food subject to subparts B and F.
117.4(a)(2) .....	N/A .....	Applicability to individuals who manufacture, process, pack, or hold food subject to subparts C, D, E, F, or G.
117.4(b)(1) .....	N/A .....	Each individual engaged in manufacturing, processing, packing, or holding food must have the education, training, or experience (or combination thereof) necessary to manufacture, process, pack, or hold clean and safe food as appropriate to the individual’s assigned duties.
117.4(b)(2) .....	117.10(c) .....	Required training in the principles of food hygiene and food safety, including the importance of employee health and personal hygiene.
117.4(c) .....	117.10(d) .....	Additional qualifications of supervisory personnel.
117.4(d) .....	N/A .....	Records of required training.

TABLE 11—PROVISIONS FOR QUALIFICATIONS OF INDIVIDUALS WHO MANUFACTURE, PROCESS, PACK, OR HOLD FOOD—Continued

Final section designation	Proposed section designation	Description
117.9 .....	N/A .....	The required records are subject to the recordkeeping requirements of subpart F.

*A. Applicability and Qualifications of All Individuals Engaged in Manufacturing, Processing, Packing, or Holding Food (Final § 117.4(a), (b), and (d))*

(Comment 172) Some comments support changing the current recommendations for training to requirements, e.g., by replacing “should” with “must.” However, some of these comments also ask that the requirement allow sufficient flexibility for establishments to determine the scope and frequency of the training based on the establishment, types of products, and job responsibilities of the employee. Some of these comments assert that this position is consistent with the concept in the food safety plan of tailoring controls to the specific facility and operations, and also aligns with the Global Food Safety Initiative guidance document, which was based on the recommendations of the Codex Alimentarius Commission (Codex). Some of these comments ask that we specify “as applicable to the plant operation” and “applicable to their assigned duties” to allow establishments flexibility in establishing risk-based training requirements specific to their operations.

Other comments prefer more detail and ask that we establish requirements addressing all of the recommendations of the CGMP Working Group. Some of these comments note that doing so would be consistent with the proposed training requirements for the produce safety rule.

Other comments prefer that we continue to only provide recommendations for education and training and allow the food industry to determine the appropriate level of specific employee training that may be needed. These comments assert that overly prescriptive and binding requirements may not consider variables such as training course content, training provider, effectiveness of the course, and instructor and frequency of training per topic. In addition, comments assert that factors such as an employee’s type and length of experience, nature of formal education, and the food product type and point in the food supply chain at which the employee works with the

food product (close to the farm or close to the fork) will need to be considered. Other comments ask us to establish the recommendations of the CGMP Working Group in guidance rather than in the rule.

Some comments recommend that employees be trained “initially” and “periodically thereafter” but ask that we recognize the seasonal nature of a facility’s workforce. Some comments ask that the training include the principles of food hygiene and food safety, including the importance of employee health and personal hygiene as applied at the facility.

Some comments ask that training requirements be established in subpart B so that the requirements apply to all establishments that manufacture, process, pack, or hold food, including establishments that are not subject to FSMA’s requirements for hazard analysis and risk-based preventive controls. These comments assert that this broad training requirement would improve food safety overall. Some comments that recommend establishing the training requirement in subpart B assert that training is more appropriately considered a prerequisite program than a preventive control that would belong in subpart C.

Other comments ask that the training and related recordkeeping requirements for the facility’s preventive controls qualified individuals be established under subpart C because this is directly related to the facility’s food safety plan. Other comments ask that training requirements be established in both subpart B and subpart C. Other comments assert that including requirements for education and training in both subparts B and C would be confusing.

(Response 172) We are establishing a series of requirements for the qualifications of individuals engaged in manufacturing, processing, packing, or holding food in new § 117.4. First, to clarify how these qualification requirements apply to establishments subject to subparts B and F, we are requiring that the management of an establishment ensure that all individuals who manufacture, process, pack, or hold food subject to subparts B and F are qualified to perform their

assigned duties (§ 117.4(a)(1)). To clarify how these qualification requirements apply to facilities, we are requiring that the owner, operator, or agent in charge of a facility ensure that all individuals who manufacture, process, pack, or hold food subject to subparts C, D, E, F, or G are qualified to perform their assigned duties (§ 117.4(a)(2)).

We are not requiring training specific to the person’s assigned duties. Each establishment engaged in the manufacturing, processing, packing, and holding of food for human consumption would already have procedures in place to ensure that all individuals who manufacture, process, pack, or hold food know how to do their jobs.

However, to emphasize that we expect all individuals who conduct such activities to know how to do their jobs, we are specifying that each individual engaged in manufacturing, processing, packing, or holding food (including temporary and seasonal personnel) or in the supervision thereof must have the education, training, or experience (or a combination thereof) necessary to manufacture, process, pack, or hold clean and safe food as appropriate to the individual’s assigned duties (§ 117.4(b)(1)). To better align with the forthcoming FSVP rule, we are using the term “qualified individual” in new § 117.4(b)(1) and are defining the term “qualified individual” to mean a person who has the education, training, or experience (or a combination thereof) necessary to manufacture, process, pack, or hold clean and safe food as appropriate to the individual’s assigned duties. A qualified individual may be, but is not required to be, an employee of the establishment. See the discussion of the term “preventive controls qualified individual” in section IX.C.25, including a discussion of how we have changed the proposed term “qualified individual” to “preventive controls qualified individual” because we are establishing a new definition for “qualified individual,” with a meaning distinct from “preventive controls qualified individual.”

We also are requiring that each individual engaged in manufacturing, processing, packing, or holding food (including temporary and seasonal personnel) or in the supervision thereof,

receive training in the principles of food hygiene and food safety, including the importance of employee health and personal hygiene, as appropriate to the food, the facility and the person's assigned duties (see § 117.4(b)(2)). Records that document this required training must be established and maintained and are subject to the recordkeeping requirements of subpart F (§§ 117.4(d) and 117.9). The rule does not specify the frequency of the required training. We expect that production employees will receive training before working in production operations. Based on a 2010 survey of the domestic food manufacturing industry, we expect that most facilities will also provide some form of refresher training (Ref. 54).

We disagree that we should continue to only provide recommendations for education and training. Although the comments express concern about overly prescriptive requirements that may not consider variables that would affect an establishment's training program (such as training course content, training provider, effectiveness of the course and instructor and frequency of training per topic, an employee's type and length of experience, nature of formal education, and the food product type and point in the food supply chain at which the employee works with the food product), the training requirement we are establishing in the rule provides flexibility for each establishment to provide training, and determine the scope and frequency of the training, in a way that works best for the establishment.

We agree that it is appropriate to establish training requirements so that the requirements apply to all establishments that manufacture, process, pack, or hold food, including establishments that are not subject to FSMA's requirements for hazard analysis and risk-based preventive controls, and we are establishing the qualification and training requirements in subpart A to clarify the applicability of these requirements to all establishments and facilities subject to part 117. Although we agree that employees in facilities that are subject to the requirements for hazard analysis and risk-based preventive controls need to understand their responsibilities under the facility's food safety plan, we are setting forth a training requirement focused on the principles of food hygiene and food safety, including the importance of employee health and personal hygiene, as recommended in the report of the CGMP Working Group (Ref. 3). We consider training in the principles of food hygiene and food safety, including the importance of

employee health and personal hygiene, to be fundamental to the concept of CGMPs. We agree that establishing a training requirement in both subpart B and subpart C could be confusing.

(Comment 173) Some comments ask that training not be limited to a narrow class of processors. Other comments assert that anyone who works in the food industry should have mandatory training and re-training.

(Response 173) The training applies to all individuals engaged in manufacturing, processing, packing, or holding food, consistent with the requests of these comments.

(Comment 174) Some comments agree that training should be documented and assert that those records should show the date of training, a description of the training, and the name of the person trained. However, comments ask that we allow flexibility in the way these records are kept. Other comments assert that requiring that records document required training of personnel is burdensome, arbitrary, and capricious.

(Response 174) The rule requires that records that document training required by § 117.4(b)(2) be established and maintained without prescribing any content of those records. Although one approach to documenting training would be to provide the date of training, a description of the training, and the name of the person trained, the rule provides flexibility for each establishment to document its training in a way that works best for that establishment. We disagree that requiring records to document required training is burdensome, arbitrary, and capricious in light of the strong support in the comments regarding CGMP modernization for records documenting training and the flexibility provided by the rule for the content of training records.

(Comment 175) Some comments that support mandatory training nonetheless caution us to be flexible towards the development and deployment of mandatory training, including issuance of certificates, so as not to create road blocks for third-party service providers. These comments state that education and training and/or capacity building is a growing, rapidly evolving, and well-developed third-party service industry today, and that food companies often deliver their training to other raw material suppliers and contract manufacturers. Some comments assert that the training and education programs should be developed and implemented in close cooperation with State agencies, public institutions, and stakeholder organizations.

(Response 175) The requirements do not address issuance of certificates or any other provisions that could create road blocks for third-party providers. An establishment has flexibility to develop or otherwise provide training in cooperation with public and private organizations in a manner that suits its needs.

(Comment 176) Some comments agree that any requirements should include training appropriate to the person's duties but emphasize that the decision as to what is appropriate to the person's assigned duties should be determined by the establishment.

(Response 176) The requirement for employees to receive training in the principles of food hygiene and food safety, including the importance of employee health and personal hygiene, as appropriate to the person's assigned duties, provides flexibility for the establishment to provide training that is appropriate for its employees in light of each person's assigned duties. However, the rule does not require training specific to the person's assigned duties.

(Comment 177) Some comments assert that the training requirement would be an unreasonable burden for small businesses and that companies may incur substantial cost for the time that workers would be in training rather than in production. Some comments ask us to provide non-specific training recommendations for smaller food processors that need flexibility to control the cost of training. Some comments assert that the training and education requirements must be accessible and flexible enough to allow employers to bring in temporary help when demand is high without causing a delay in hiring.

Some comments assert that we must provide ongoing education, training, and outreach for previously regulated firms, newly regulated firms, regulators that will be responsible for implementing the rules, and educators who will help farmers and facilities understand and manage the new requirements. Some comments assert that training is needed to educate farmers, the food industry, and State and local authorities as well.

(Response 177) All employees will need enough training to do their jobs and understand the importance of hygiene for food safety. The training offered does not need to be expensive (e.g., off-site training or off-the-shelf purchased training) and we expect that much of the training will be provided in-house by knowledgeable employees. As discussed in Response 2, the FSPCA is developing a preventive controls training curriculum. These training

materials will be available online, and we expect these training materials to be useful to small businesses to use for in-house training.

(Comment 178) Some comments ask us to continue to work with foreign governments on access to training and education to ensure that the industry as a whole is moving towards better advancements in food safety practices, no matter the size, channels of distribution, or geographic location.

(Response 178) As discussed in Response 717, we intend to work with the food industry, education organizations, USDA, the U.S. Agency for International Development, and foreign governments to develop tools and training programs to facilitate implementation of this rule.

(Comment 179) Some comments assert that the preventive controls qualified individual should perform the trainings. Some comments assert that the preventive controls qualified individual should be responsible for determining the appropriate frequency and scope of training for each facility and employee, and the records necessary to document that appropriate training has been conducted.

(Response 179) We decline these requests. Although we agree that the person delivering such training should be knowledgeable, we are providing flexibility for facilities to provide training as appropriate to the facility, including through on-line CGMP or other food safety courses.

(Comment 180) Some comments ask that this rule provide FDA (and those States under contract) the ability to require certification of industry managers and training of employees if serious operational hazards are found and management and staff are unable to

answer basic questions concerning hazards and controls in the facility.

(Response 180) We decline this request. We address each compliance situation on a case-by-case basis.

*B. Additional Requirements Applicable to Supervisory Personnel (Final § 117.4(c))*

We received no comments that disagreed with our proposal to retain the requirement in part 110 that responsibility for ensuring compliance by all personnel with all requirements of this subpart must be clearly assigned to competent supervisory personnel. We are correcting “all requirements of this subpart” to “all requirements of this part.” As a conforming change for consistency with the provisions of § 117.4(b), we are replacing the phrase “competent supervisory personnel” with the phrase “supervisory personnel who have the education, training, or experience (or a combination thereof) necessary to supervise the production of clean and safe food.”

**XI. Subpart A: Comments on Proposed § 117.5—Exemptions**

We proposed to establish a series of exemptions from the requirements for hazard analysis and risk-based preventive controls that would be established in subpart C, with modified requirements in some cases. We also proposed to redesignate § 110.19(a) (a pre-existing exemption from CGMP requirements applicable to establishments engaged solely in the harvesting, storage, or distribution of one or more RACs) as § 117.5(k) and to revise this exemption to adjust and clarify what activities fall within this exemption based on experience and changes in related areas of the law since issuance of the CGMP regulation.

Some comments support one or more of the proposed exemptions without change. For example, some comments note that the exemptions are specified in FSMA and, thus, reflect the intent of Congress. Some comments state that some exemptions (*i.e.*, those for products already subject to our HACCP regulations for seafood and juice, or to regulations for the control of microbiological hazards for LACF) make sense because they are risk-based. Other comments that support one or more of the proposed exemptions ask us to clarify particulars associated with these exemptions (*see, e.g.*, Comment 209, Comment 210, Comment 211, and Comment 212) or expand the scope of some of these exemptions (*see, e.g.*, Comment 185, Comment 196, Comment 197, Comment 208, and Comment 221). Other comments ask us to include additional exemptions in the rule (*see section XI.K*).

In the remainder of this section, we discuss comments that ask us to clarify the proposed exemptions or that disagree with, or suggest one or more changes to, the proposed exemptions. We also discuss comments that ask us to include additional exemptions in the rule. After considering these comments, we have revised the proposed exemptions as shown in table 12 with editorial and conforming changes as shown in table 52. A key conforming change that affects all proposed exemptions from the requirements of subpart C is that the final exemptions are from the requirements of subpart G, as well as subpart C. As discussed in section XLII, the final rule establishes the requirements for a supply-chain program in subpart G, rather than within subpart C as proposed.

TABLE 12—REVISIONS TO THE PROPOSED EXEMPTIONS

Section	Exemption	Modification
117.5(g) .....	From the requirements of subpart C for on-farm packing or holding of food by a small or very small business if the only packing and holding activities subject to section 418 of the FD&C Act that the business conducts are the specified low-risk packing or holding activity/food combinations.	<ul style="list-style-type: none"> <li>• Made changes consequential to the revised “farm” definition—<i>i.e.</i>, no longer identifying any packing or holding activities for any RACs.</li> <li>• Clarified that the modified requirements do not apply to on-farm packing or holding of food by a very small business if the only packing and holding activities subject to section 418 of the FD&amp;C Act that the business conducts are the listed low-risk packing or holding activity/food combinations.</li> <li>• Updated food categories consistent with the food categories included in table 1 in the section 103(c)(1)(C) RA.</li> <li>• Added low-risk packing or holding activity/food combinations as a result of an updated risk assessment.</li> <li>• Added a description of the food categories included in § 117.5(g) and (h).</li> </ul>

TABLE 12—REVISIONS TO THE PROPOSED EXEMPTIONS—Continued

Section	Exemption	Modification
117.5(h) .....	From the requirements of subpart C for on-farm manufacturing/processing activities conducted by a small or very small business for distribution into commerce if the only manufacturing/processing activities subject to section 418 of the FD&C Act that the business conducts are the specified low-risk manufacturing/processing activity/food combinations.	<ul style="list-style-type: none"> <li>• Made changes consequential to the revised “farm” definition—<i>i.e.</i>:</li> <li>—No longer distinguish between manufacturing/processing activities conducted on a farm mixed-type facility’s own RACs and manufacturing/processing activities conducted on food other than the farm mixed-type facility’s own RACs; and</li> <li>—Eliminated activities, conducted on others’ RACs, that would no longer be classified as manufacturing/processing and instead would be classified as harvesting, packing, or holding.</li> <li>• Clarified that the modified requirements do not apply to on-farm manufacturing/processing activities conducted by a very small business for distribution into commerce, if the only manufacturing/processing activities subject to section 418 of the FD&amp;C Act that the business conducts are the listed low-risk manufacturing/processing activity/food combinations.</li> <li>• Updated food categories consistent with the food categories included in table 1 in the section 103(c)(1)(C) RA.</li> <li>• Added low-risk manufacturing/processing activity/food combinations as a result of an updated risk assessment.</li> </ul>
117.5(k)(1)(iii) .....	From the requirements of subpart B for the holding and transportation of RACs.	Changed from an exemption for specific activities ( <i>i.e.</i> , holding and transportation of RACs) to establishments solely engaged in one or both of those activities.
117.5(k)(1)(v) .....	From the requirements of subpart B for certain activities conducted on nuts (without additional manufacturing/processing).	Changed from an exemption for specific activities to establishments solely engaged in those activities.

*A. General Comments on the Proposed Exemptions*

(Comment 181) Some comments ask us to provide the same flexibility for foreign small businesses as for domestic small businesses.

(Response 181) The exemptions apply to both foreign small businesses and domestic small businesses.

(Comment 182) Some comments note that proposed § 117.10(c) recommends, but would not require, that the responsible individual at a food establishment have a background of education, experience or a combination of both to provide a level of competence necessary to produce clean and safe food. These comments ask us to make this a requirement, rather than a recommendation, for the responsible individual at any facility that is exempt from the requirements for hazard analysis and risk-based preventive controls. These comments also ask us to require presentation of the training information to us before an exemption is granted.

(Response 182) We decline these requests. The statute does not require that we pre-qualify a facility for an exemption.

(Comment 183) Some comments ask us to clarify whether an establishment that is exempt from the requirements for hazard analysis and risk-based preventive controls in subpart C

remains subject to the CGMP requirements in subpart B.

(Response 183) An establishment that is exempt from the requirements for hazard analysis and risk-based preventive controls in subparts C and G remains subject to the CGMP requirements in subpart B, unless that establishment is exempt from subpart B under § 117.5(k) (which applies to: (1) Farms; (2) certain fishing vessels; (3) establishments solely engaged in the holding and/or transportation of one or more RACs; (4) activities of “farm mixed-type facilities” that fall within the definition of “farm”; and (5) establishments solely engaged in hulling, shelling, drying, packing, and/or holding nuts (without additional manufacturing/processing)).

*B. Proposed § 117.5(a)—Exemption Applicable to a Qualified Facility*

We proposed that subpart C would not apply to a qualified facility, except as provided by subpart E (Withdrawal of an Exemption Applicable to a Qualified Facility), and that qualified facilities would be subject to the modified requirements in § 117.201.

(Comment 184) Some comments support the proposed exemption for a qualified facility and assert that all farms should be eligible for this exemption until it is shown that food obtained from these farms makes people

sick. Other comments oppose this proposed exemption, asserting that it is not risk based and expressing concern that qualified facilities would cause significant food safety problems. Some comments ask us to strictly construct and narrowly apply the exemptions to as few businesses as possible.

Some comments do not agree that qualified facilities should be subject to modified requirements because even the modified requirements are burdensome. Some comments assert that qualified facilities having an average annual value of food sold during the previous three-year period of \$25,000 or less should be exempt from all requirements related to hazard analysis and risk-based preventive controls, including modified requirements.

(Response 184) The exemption for qualified facilities, including the criteria for being a qualified facility and the applicability of modified requirements, is expressly directed by section 418(l) of the FD&C Act. In defining “very small business” to mean a business (including any subsidiaries and affiliates) averaging less than \$1,000,000, adjusted for inflation, per year, during the 3-year period preceding the applicable calendar year in sales of human food plus the market value of human food manufactured, processed, packed, or held without sale (*e.g.*, held for a fee), we constructed this exemption to apply

to businesses that, collectively, produce less than 0.6 percent of the food supply (Ref. 38). In addition, as discussed in Response 151, most of these facilities will be subject to the CGMP requirements in subpart B.

(Comment 185) Some comments assert that a qualified facility should be exempt from the CGMP requirements of subpart B, as well as the requirements for hazard analysis and risk-based preventive controls in subpart C.

(Response 185) The exemption for qualified facilities is expressly directed by section 418(l) of the FD&C Act and is limited to an exemption from the requirements for hazard analysis and risk-based preventive controls in subparts C and G. The comments provide no basis for why new statutory requirements for hazard analysis and risk-based preventive controls should in any way impact the long-standing CGMPs requirements that apply to the manufacturing, packing, and holding of human food. CGMPs provide the basic requirements for ensuring production of safe and sanitary food. Following the CGMPs is essential to properly address public health risks from very small facilities that are provided an exemption from subparts C and G in order to minimize the burden on such facilities. (See also Response 221.)

(Comment 186) Some comments ask us to clarify how the exemption applies to diversified farms that produce both exempt and non-exempt products.

(Response 186) We assume that this comment is referring to a farm mixed-type facility that produces some products (such as juice or dietary supplements) that are exempt from the requirements for hazard analysis and risk-based preventive controls, as well as some products that are not exempt from these requirements. The exemption only applies to products that are not otherwise exempt from the requirements for hazard analysis and risk-based preventive controls. However, see the discussion in Response 157 with our response to comments requesting that we base the dollar threshold for the definition of very small business only on the annual monetary value of food covered by the preventive controls rule, rather than all human food; we declined that request.

(Comment 187) Some comments ask us to provide that a qualified facility may voluntarily choose to comply with the requirements for hazard analysis and risk-based preventive controls.

(Response 187) A qualified facility may voluntarily choose to comply with the requirements for hazard analysis and risk-based preventive controls

without a specific provision authorizing it to do so.

(Comment 188) Some comments ask us to specify in guidance that a qualified facility is not required to prepare and implement a food safety plan.

(Response 188) We intend to recommend in guidance how a qualified facility could comply with the modified requirements in § 117.201 without satisfying all of the requirements in subparts C and G.

*C. Proposed § 117.5(b) and (c)—Exemptions Applicable to Food Subject to HACCP Requirements for Fish and Fishery Products (21 CFR Part 123) or for Juice (21 CFR Part 120)*

We proposed that subpart C would not apply with respect to activities that are subject to part 123 (21 CFR part 123) at a facility if the owner, operator, or agent in charge of the facility is required to comply with, and is in compliance with, part 123 with respect to such activities. We also proposed that subpart C would not apply with respect to activities that are subject to part 120 (21 CFR part 120) at a facility if the owner, operator, or agent in charge of the facility is required to comply with, and is in compliance with, part 120 with respect to such activities. We requested comment on the criteria that should be used to determine whether a facility is in compliance with part 123 or part 120 (78 FR 3646 at 3704).

(Comment 189) Some comments ask us to clarify whether a seafood allergen that is identified as a hazard should be included in a seafood HACCP plan or in a facility's food safety plan. These comments also ask whether a food allergen that is identified as a hazard in juice subject to part 120 should be included in a juice HACCP plan or in a facility's food safety plan.

(Response 189) There is no specific requirement in the seafood HACCP regulation in part 123 that food allergen hazards be addressed in the seafood HACCP plan. However, Chapter 19 in our guidance entitled "Fish and Fishery Products Hazards and Controls Guidance (Fourth Edition)" includes recommendations for the control of undeclared food allergens (Ref. 42). The juice HACCP regulation in part 120 requires that a juice processor consider the presence of undeclared ingredients that may be food allergens as part of its hazard analysis, and several sections in our guidance entitled "Juice HACCP Hazards and Controls Guidance (First Edition)" include recommendations for the control of food allergens (Ref. 43). Both seafood processors and juice processors would also address allergen hazards through application of CGMPs.

Facilities that are exempt from the requirements of subparts C and G with respect to activities that are subject to part 120 or part 123 are not required to prepare and implement a food safety plan in addition to their HACCP plans.

(Comment 190) Some comments note that our HACCP regulations for juice and seafood do not require facilities subject to those regulations to address radiological hazards and ask how radiological hazards should be addressed for activities that are subject to part 120 or part 123.

(Response 190) A facility that conducts activities that are subject to part 120 or part 123 is not required to address radiological hazards in its HACCP plan if the facility is required to comply with, and is in compliance with, part 120 or part 123 with respect to such activities. However, under some circumstances radiological hazards might need to be considered. Moreover, the facility would be subject to the CGMP requirement that storage and transportation of food must be under conditions that will, among other things, protect against chemical (including radiological) contamination of food (§ 117.93).

(Comment 191) Some comments state that what is needed to assess compliance with the applicable HACCP regulation is evidence of compliance with each specific requirement of the regulation, such as compliance with requirements for a written hazard analysis and Sanitation Standard Operating Procedures (SSOPs). Other comments ask us to provide guidance to industry and the regulatory community regarding the criteria that will be used to determine when a facility is "in compliance with" part 120 or part 123. Some comments note that any determination of compliance with one of our HACCP regulations would be product specific, and that we would only be able to assess compliance on the inspected product, not all of the products being produced at the facility. Some comments ask us to establish a transparent process to follow when determining when to nullify an exemption applicable to food subject to HACCP in part 120 or part 123. These comments made specific suggestions for such a process, including through a HACCP inspection of a domestic facility or a review of a facility's HACCP plan and corresponding HACCP records for a foreign facility. These comments assert that FDA actions such as issuing inspectional observations, issuing a Warning Letter, or making an imported product subject to detention without physical examination, should not be the basis for determining non-compliance

because in such situations a facility would have an opportunity to respond to FDA with its approach to correcting problems.

Some comments assert that the key question for us to answer is when a situation will be so severe that it warrants requiring compliance with the human preventive controls rule rather than the applicable HACCP regulation. These comments raise questions about the practicality of requiring compliance with the human preventive controls rule for some products manufactured at a facility while continuing to require compliance with the applicable HACCP regulation for other products manufactured at that facility. These comments ask us to specify the added food safety protections that the human preventive controls rule can provide that cannot be obtained by compliance with the applicable HACCP regulation. These comments also ask us to consider the likelihood that a facility that cannot comply with the applicable HACCP regulation would be able to comply with the human preventive controls rule. Other comments ask whether we will modify existing guidance on compliance with applicable HACCP regulations to help facilities and inspectors understand what is needed for a facility to maintain its exemption.

Some comments assert that the statutory intent for compliance would be satisfied by enforcement actions (such as administrative detention, registration suspension, or mandatory recall) that will either ensure compliance with the applicable HACCP regulation, or prohibit that facility from distributing food.

(Response 191) We acknowledge the issues raised by these comments and agree that in many situations the appropriate action for us to take when a facility is out of compliance with an applicable HACCP regulation will be to employ existing enforcement tools to bring the facility into compliance with the applicable regulation. However, we also believe that there may be circumstances where an added food safety benefit could be achieved by requiring compliance with the human preventive controls rule when a facility does not comply with an applicable HACCP regulation. For example, the seafood HACCP regulation recommends—but does not require—that a seafood processor have and implement a written SSOP. In contrast, the human preventive controls rule requires that all preventive controls be written, and that preventive controls include, as appropriate to the facility and the food, sanitation controls, which include procedures, practices, and

processes to ensure that the facility is maintained in a sanitary condition adequate to significantly minimize or prevent hazards such as environmental pathogens, biological hazards due to employee handling, and food allergen hazards (§ 117.135(c)(3)). A seafood processing facility that has ongoing sanitation problems and contamination with, for example, an environmental pathogen, but does not have a written SSOP, may be better able to address its sanitation problems by a combination of written sanitation controls and verification of those sanitation controls through environmental monitoring (§ 117.165(a)(3)). Likewise, a juice processor that has ongoing problems with microbial contamination of fruit it receives for processing may be better able to address its supply of fruit by complying with the specific requirements of the human preventive controls rule for a supply-chain program (subpart G).

We expect that situations in which enforcement actions to ensure compliance with an applicable HACCP regulation are insufficient to correct problems, and lead to a facility losing its exemption from the requirements of subparts C and G, will be rare and will depend on very specific circumstances. Therefore, at this time we do not anticipate issuing guidance on when violations of one of our HACCP regulations would cause us to require compliance with subparts C and G.

(Comment 192) Some comments ask us to revise our HACCP regulations for seafood and juice to be consistent with subpart C to avoid the burden of having two systems within facilities that produce seafood or juice products, as well as other foods.

(Response 192) We decline this request. Our HACCP regulations are already consistent with—though not identical to—subpart C. Further, it is not clear that such facilities would need two separate systems, given the similarities in requirements and flexibility we have provided for implementing preventive controls. The food safety plan for the products not subject to the HACCP regulations is likely to be very similar to that for the foods subject to the HACCP regulations (which includes monitoring of SSOPs). To the extent that subparts C and G contain additional requirements, a facility is free to perform similar actions for its products produced under a HACCP regulation.

(Comment 193) Some comments ask us to exempt the production of fresh cider from the rule.

(Response 193) Fresh cider is juice. A facility that produces fresh cider is eligible for the exemption for products

subject to our HACCP regulation for juice.

*D. Proposed § 117.5(d)—Exemption Applicable to Food Subject to Part 113—Thermally Processed Low-Acid Foods Packaged in Hermetically Sealed Containers*

We proposed that subpart C would not apply with respect to activities that are subject to part 113 at a facility if the owner, operator, or agent in charge of the facility is required to comply with, and is in compliance with, part 113 with respect to such activities. We also proposed that this exemption would apply only with respect to the microbiological hazards that are regulated under part 113. We requested comment on the criteria that should be used to determine whether a facility is in compliance with part 113 (78 FR 3646 at 3704).

(Comment 194) Some comments express concern that the partial exemption for products subject to part 113 could generate confusion for both regulators and regulated facilities. These comments also assert that the partial exemption for products subject to part 113 would generate duplicative recordkeeping requirements under the two rules.

(Response 194) We acknowledge the potential for confusion and expect any confusion to decrease over time as both regulators and facilities gain experience with the new requirements. We also expect that in most instances a facility that is subject to part 113, and that evaluates potential microbiological hazards as part of its hazard analysis, would conclude that the potential hazards are controlled by the targeted requirements of part 113 and conclude there are no microbiological hazards that require preventive controls to significantly minimize or prevent the hazards.

We disagree that the partial exemption for products subject to part 113 would generate duplicative recordkeeping requirements. The requirements of part 113 to control biological hazards are different from the requirements of subparts C and G to conduct a hazard evaluation for chemical and physical hazards, and implement preventive controls and associated preventive control management components to address significant chemical and physical hazards. Likewise, the records associated with the control of biological hazards under part 113 are not the same as the records associated with a hazard analysis, preventive controls, and associated preventive control management components for control of

chemical and physical hazards. However, to the extent that a facility appropriately determines that existing records required by part 113 can be used to demonstrate compliance with the requirements of subparts C and G, a facility may rely on those records (see § 117.330).

(Comment 195) Some comments ask us to provide guidance to industry and the regulatory community regarding the criteria that will be used to determine when a facility is “in compliance with” part 113.

(Response 195) We discuss similar comments regarding the exemptions for products subject to one of our HACCP regulations in Response 191. As an example, an LACF manufacturing facility that has ongoing problems controlling biological hazards may be better able to address biological hazards by preparing and implementing a written food safety plan. As with facilities subject to our HACCP regulations, we expect that situations in which enforcement actions to ensure compliance with part 113 are insufficient to correct problems, and lead to a facility losing its exemption from the requirements of subparts C and G, will be rare and will depend on very specific circumstances. Therefore, at this time we do not anticipate issuing guidance on when violations of part 113 could lead to this outcome.

*E. Proposed § 117.5(e)—Exemption Applicable to a Facility That Manufactures, Processes, Packages, or Holds a Dietary Supplement*

We proposed that subpart C would not apply to any facility with regard to the manufacturing, processing, packing, or holding of a dietary supplement that is in compliance with the requirements of part 111 (Current Good Manufacturing Practice in Manufacturing, Packing, Labeling, or Holding Operations for Dietary Supplements) and section 761 (Serious Adverse Event Reporting for Dietary Supplements) of the FD&C Act. We requested comment on the criteria that should be used to determine whether a facility is in compliance with part 111 and section 761 of the FD&C Act (78 FR 3646 at 3705). As noted in table 52, we corrected the exemption to match the title of part 111—*i.e.*, “Current Good Manufacturing Practice in Manufacturing, Packaging, Labeling, or Holding Operations for Dietary Supplements.”

(Comment 196) Some comments assert that the entire facility should be exempt from the requirements of subpart C if the facility implements the dietary supplement CGMP regulation

even if the facility also makes food products that are not dietary supplements. Some comments assert that the exemption applicable to the manufacturing, processing, packing, or holding of a dietary supplement should also apply to the manufacturing, processing, packing, or holding of a dietary ingredient if the facility chooses to follow the dietary supplement CGMP regulation.

(Response 196) The proposed exemption is directed by section 103(g) of FSMA. None of these comments explain how the desired expansion of the exemption is consistent with section 103(g), which limits the provision to “the manufacturing, processing, packing, or holding of a dietary supplement” (78 FR 3646 at 3705).

(Comment 197) Some comments ask us to revise the exemption applicable to dietary supplements to add that subparts B and F do not apply to any facility with regard to the manufacturing, processing, packing, or holding of a dietary supplement that is in compliance with the requirements of part 111. These comments assert that it would be illogical to subject the dietary supplement industry to industry-specific CGMPs (part 111), as well as a more general (and inherently less applicable) CGMP standard in part 117. These comments also assert that the intent of the CGMPs in part 117 is to regulate industries and industry segments that have not previously been regulated and that failing to acknowledge the regulations already applicable to dietary supplements would be duplicative, redundant, and provide no additional safety or public health protection.

(Response 197) As discussed in the final rule establishing the dietary supplement CGMP regulation, we included in part 111 the existing requirements in part 110 that we believe are common to dietary supplement manufacturing (72 FR 34752 at 34764, June 25, 2007). We recognized that there may be operations related to the manufacturing of dietary supplements for which certain provisions in part 110 (now largely subpart B of part 117) apply, but that we did not determine to be common to most dietary supplement manufacturing operations (*e.g.*, for dietary supplements that are dehydrated and rely on the control of moisture consistent with current § 110.80(b)(14) (proposed § 117.80(c)(14)). As was the case when we issued the final rule to establish dietary supplement CGMPs and continues to be the case now, a manufacturer would be required to comply with the CGMP regulations in subpart B of part 117 in addition to the

regulations in part 111, unless the regulations conflict. To the extent that the regulations conflict, the dietary supplement manufacturer would comply with the regulation in part 111.

(Comment 198) Some comments ask us to clarify how the exemption applies to foods, other than dietary supplements, that may be held in a facility that conducts activities in compliance with the dietary supplement CGMP regulation.

(Response 198) The exemption does not apply to foods, other than dietary supplements, that may be held in a facility that conducts activities in compliance with the dietary supplement CGMP regulation. The owner, operator, or agent in charge of a facility that produces both dietary supplements and foods that are not dietary supplements must comply with the requirements of this rule for hazard analysis and risk-based preventive controls, unless another exemption applies as specified in § 117.5.

(Comment 199) Some comments ask us to use information collected in the biennial food facility registration to help determine whether a facility is in compliance with part 111.

(Response 199) We decline this request. It would be the observations and findings from an inspection, rather than information in a facility’s registration, that could help us determine whether a facility is in compliance with part 111. Information collected during registration provides information on how we should inspect a facility, but has no bearing on whether the facility is complying with applicable regulations.

*F. Proposed § 117.5(f)—Exemption Applicable to Activities Subject to Standards for Produce Safety in Section 419 of the FD&C Act*

We proposed that subpart C would not apply to activities of a facility that are subject to section 419 (Standards for Produce Safety) of the FD&C Act (21 U.S.C. 350h). We received no comments that disagreed with this proposal and are finalizing it as proposed.

*G. Proposed §§ 117.5(g) and (h)—Exemptions Applicable to On-Farm Low-Risk Activity/Food Combinations Conducted by a Small or Very Small Business*

As discussed in section VI.A, consistent with the statutory direction in section 103(c) of FSMA, including conducting a qualitative risk assessment, we proposed three exemptions for on-farm activity/food combinations conducted by farm-mixed-type facilities that are small or very

small businesses (proposed §§ 117.5(g), (h)(1), and (h)(2)).

1. General Comments on the Proposed Exemptions Applicable to On-Farm Low-Risk Activity/Food Combinations Conducted by a Small or Very Small Business

(Comment 200) Some comments assert that conducting a low-risk activity/food combination should be sufficient to qualify any facility for exemption from subpart C, regardless of whether the activity is conducted on-farm or off-farm, or meets the economic threshold for a small or very small business.

(Response 200) The statute provides specific direction for those facilities that can qualify for this exemption. (See sections 418(l) and 418(o)(2) of the FD&C Act.) See also Response 184 and Response 222.

(Comment 201) Some comments ask why the activity/food combinations listed in proposed § 117.5(g) are not consistent with the activity/food combinations listed in proposed § 117.5(h). Some comments state that the exemptions for farming activities are confusing.

(Response 201) The items listed in § 117.5(g) only specify the food or food category (rather than an activity/food combination) because the activities addressed in § 117.5(g) are, in all cases, the same—*i.e.*, packing and holding activities. In contrast, the items listed in § 117.5(h) specify a particular activity (*e.g.*, coating, mixing) in addition to a food or food category (*e.g.*, peanuts and tree nuts) because there are multiple manufacturing/processing activities, each associated with a particular food or food category, listed in the provisions.

Although these exemptions are more complex than other exemptions (*e.g.*, because they are directed to specific activities conducted on specific foods or food categories), the final “farm” definition has simplified them to the extent practicable. For example, under the “farm” definition in the 2013 proposed preventive controls rule, whether an activity was packing or manufacturing/processing depended, in part, on whether the RACs being packed were the farm’s own RACs or others’ RACs. In contrast, under the “farm” definition established in this rule, packing RACs is a “packing” activity, regardless of ownership of the RACs being packed.

(Comment 202) Some comments note a distinction between the exemptions for on-farm low-risk activity/food combinations conducted by small and very small businesses and the exemption for qualified facilities.

Specifically, a farm mixed-type facility that only conducts low-risk activity/food combinations (such as making certain jams or syrups) would be exempt from the requirements of subpart C, whereas an off-farm qualified facility making those same jams and syrups, while exempt from the requirements of subpart C, would nonetheless be subject to modified requirements in § 117.201. These comments ask whether it would be better for a farm or farm mixed-type facility that satisfies criteria for a small or very small business, and also satisfies criteria for a qualified facility, to classify itself as a small or very small business or to classify itself as a qualified facility.

(Response 202) In light of the final “farm” definition, these comments no longer apply with respect to activities within the farm definition.

For activities conducted by a farm mixed-type facility, we acknowledge that the exemptions provided by § 117.5(g) and (h) for on-farm low-risk activity/food combinations are different from the exemption provided by § 117.5(a) for a qualified facility. A farm mixed-type facility that only conducts low-risk activity/food combinations listed in § 117.5(g) and (h) is fully exempt from the requirements of subparts C and G, and is not subject to the modified requirements in § 117.201, even if that farm mixed-type facility is also a very small business (and, thus, also is a qualified facility). To make this clear, we have revised proposed § 117.5(g) to specify that § 117.201 does not apply to on-farm packing or holding of food by a very small business if the only packing and holding activities subject to section 418 of the FD&C Act that the business conducts are the listed low-risk packing or holding activity/food combinations. Likewise, we have revised proposed § 117.5(h) to specify that § 117.201 does not apply to on-farm manufacturing/processing activities conducted by a very small business for distribution into commerce, if the only manufacturing/processing activities subject to section 418 of the FD&C Act that the business conducts are the listed low-risk manufacturing/processing activity/food combinations.

With these changes, a farm mixed-type facility that is a very small business and that only conducts the low-risk activity/food combinations listed in § 117.5(g) and/or (h) may find it advantageous to classify itself as a very small business eligible for the exemption in § 117.5(g) and/or (h) rather than as a qualified facility, which would be subject to the modified requirements in § 117.201.

(Comment 203) Some comments ask us to list activity/food combinations that

are not low-risk activity/food combinations, or that should have modified requirement rather than be exempt (*e.g.*, if the foods have been the subject of Class I recalls or outbreaks of foodborne illness).

(Response 203) We decline this request. With few exceptions, the exemptions are established by specifying the activities that are not subject to the requirements for hazard analysis and risk-based preventive controls, rather than the activities that are subject to these requirements. When an exemption does specify activities that are subject to certain requirements of the rule, the specified activities are a narrow exception (see § 117.5(k)). In the case of the exemptions for the low-risk activity/food combinations listed in § 117.5(g) and (h), the activity/food combinations that are subject to the requirements of subparts C and G are extensive and it is not feasible to identify and list all of them.

In developing the low-risk activity/food combinations that are exempt from the requirements, we conducted a qualitative risk assessment (Ref. 4) that considered whether manufacturing, processing, packing, or holding activities conducted on a farm mixed-type facility had been implicated in food that has been the subject of a Class I recall or outbreak of foodborne illness. However, whether specific types of food had been the subject of a Class I recall or outbreak of foodborne illness was only one factor we considered. For example, we also considered factors that impact the frequency and levels of contamination of the food (Ref. 4). For additional discussion, see the section 103(c)(1)(C) RA (Ref. 4).

(Comment 204) Some comments ask for a process to keep the list of low-risk activity/food combinations up to date, such as through guidance.

(Response 204) We decline this request. The exemptions established in this rule are binding, whereas any list of additional activity/food combinations established in a guidance document would not be binding. We established the list of activity/food combinations included in these exemptions through an extensive public process, including a request for comments on the section 103(c)(1)(C) draft RA. From this time forward, the process available to a person who wishes us to consider an additional activity/food combination is to submit a citizen petition in accordance with 21 CFR 10.30.

2. Proposed § 117.5(g)—Exemption Applicable to On-Farm Low-Risk Packing or Holding Activity/Food Combinations Conducted by a Small or Very Small Business

We proposed that subpart C would not apply to on-farm packing or holding of food by a small or very small business if the only packing and holding activities subject to section 418 of the FD&C Act that the business conducts are low-risk packing or holding activity/food combinations on food not grown, raised, or consumed on that farm mixed-type facility or another farm or farm mixed-type facility under the same ownership. As a consequential change in light of the final “farm” definition, the final exemption no longer identifies any packing or holding activities for any RACs (whether the farm’s own RACs or others’ RACs), because an on-farm establishment would no longer be subject to the requirements for hazard analysis and risk-based preventive controls when it packs or holds RACs, regardless of whether it is packing and holding its own RACs or others’ RACs.

(Comment 205) Some comments ask us to expand the list of on-farm low-risk packing and holding activities to include packing and holding of food products not expressly covered by the proposed exemption. See the food products listed in table 13 and table 14.

(Response 205) We considered these comments within the context of the section 103(c)(1)(C) RA. Table 1 in the section 103(c)(1)(C) draft RA listed activity/food combinations that we identified as likely to be conducted by farm mixed-type facilities using broad food categories such as “grain” and “grain products.” In light of comments such as those described in Comment 205, table 1 in the final section

103(c)(1)(C) RA lists more types of food categories. The purpose of listing more types of food categories was to make it clearer when a particular food is encompassed within a particular activity/food combination. As one example, table 1 in the final section 103(c)(1)(C) RA lists food categories such as baked goods, milled grain products, and other grain products (e.g. dried pasta), in place of the original category “grain products.” As another example, table 1 in the section 103(c)(1)(C) RA lists the broad term “sap” and provides examples of different types of sap to make clear that activity/food combinations regarding sap are broader than “maple sap.”

We have revised the final exemption to list food categories consistent with the food categories included in table 1 in the section 103(c)(1)(C) RA and include those packing and holding activity/food combinations that the section 103(c)(1)(C) RA determines to be low-risk. For additional details about the outcome of the section 103(c)(1)(C) RA on the specific activity/food combinations described in the comments, see the section 103(c)(1)(C) RA (Ref. 4).

We also revised the proposed exemption to add two sets of information that we believe will be useful to a farm mixed-type facility when evaluating whether the farm’s packing activities satisfy the criteria for the exemption.

First, we have added a new provision (§ 117.5(g)(1)) explaining that the exemption in § 117.5(g) applies to packing or holding of processed foods on a farm mixed-type facility, except for processed foods produced by drying/dehydrating RACs to create a distinct commodity (such as drying/dehydrating grapes to produce raisins, and drying/

dehydrating fresh herbs to produce dried herbs), and packaging and labeling such commodities, without additional manufacturing/processing (such as chopping and slicing), the packing and holding of which are within the “farm” definition in § 1.227. Activities that are within the “farm” definition, when conducted on a farm mixed-type facility, are not subject to the requirements of subparts C and G of this part and therefore do not need to be specified in the exemption.

Second, we have added a provision (§ 117.5(g)(2)) describing the food categories listed in the exemption. For example, this provision explains that “milled grain products” include processed food products such as flour, bran, and cornmeal.

The first column in table 13 lists the food or food category that comments ask us to include in the exemption for on-farm, low-risk packing and holding activities. The second column lists the regulatory citation for the relevant exemption for on-farm packing and holding. Importantly, the full regulatory text of the exemption includes some limitations that were not specified in the comments, and table 13 should not be viewed as equating the requests of the comments with the final regulatory text of the exemption. For example, § 117.5(g)(2)(ix) specifies that the food category “baked goods” includes processed food products such as breads, brownies, cakes, cookies, and crackers, but does not include products that require time/temperature control for safety (such as cream-filled pastries). See § 117.5(g)(2) for a description of those food categories listed in the exemption for on-farm, low-risk packing and holding activity/food combinations in table 13.

TABLE 13—REQUESTED FOOD OR FOOD CATEGORY AND RELEVANT EXEMPTION FOR ON-FARM LOW-RISK PACKING AND HOLDING ACTIVITIES

Food or food category requested in the comments	Relevant regulatory section
<ul style="list-style-type: none"> <li>• Barley malt syrup .....</li> <li>• Barley malt extract .....</li> <li>• Other concentrated grain malt products in liquid or powder form.</li> </ul>	<ul style="list-style-type: none"> <li>§ 117.5(g)(3)(xix)—Sugar.</li> <li>§ 117.5(g)(3)(xx)—Syrups.</li> <li>§ 117.5(g)(3)(xxii)—Vinegar.</li> <li>§ 117.5(g)(3)(xxiii)—Any other processed food that does not require time/temperature control for safety.</li> </ul>
<ul style="list-style-type: none"> <li>• Birch sap and syrup .....</li> <li>• Cane syrup .....</li> <li>• Coconut sap and sugar.</li> <li>• Date sugar.</li> <li>• Palm sap and sugar.</li> <li>• Sorghum juice and syrup.</li> <li>• Other concentrated natural sweetener having a water activity lower than 0.85 and made with an adequate microbial reduction step.</li> </ul>	<ul style="list-style-type: none"> <li>§ 117.5(g)(3)(xix)—Sugar.</li> <li>§ 117.5(g)(3)(xx)—Syrups.</li> </ul>

TABLE 13—REQUESTED FOOD OR FOOD CATEGORY AND RELEVANT EXEMPTION FOR ON-FARM LOW-RISK PACKING AND HOLDING ACTIVITIES—Continued

Food or food category requested in the comments	Relevant regulatory section
Crude “dietary ingredient botanicals” in cut, chopped, or powdered form.	§ 117.5(g)(3)(xiii)—Other fruit and vegetable products.
• Dried cereal	§ 117.5(g)(3)(xv) Other herb and spice products.
• Dried pasta.	§ 117.5(g)(3)(xiv)—Other grain products.
Dried herbs and spices, chopped or ground	§ 117.5(g)(3)(xv)—Other herb and spice products.
Dry legume products (e.g., chickpea flour)	§ 117.5(g)(3)(xiii)—Other fruit and vegetable products.
Dry, unsulfited, fruits and vegetables in cut, chopped, sliced, shredded, or other form.	§ 117.5(g)(3)(xiii)—Other fruit and vegetable products.
Gums and resins	§ 117.5(g)(3)(vii)—Gums, latexes, and resins that are processed foods.
Herbal extracts (e.g., in solvents such as glycerin, alcohol and oil).	§ 117.5(g)(3)(xv)—Other herb and spice products.
• Honey infused with dried herbs or spices	§ 117.5(g)(3)(xv)—Other herb and spice products.
• Oil and/or vinegar infused with dried herbs or spices.	
Jerky	§ 117.5(g)(3)(vi)—Game meat jerky.
Molasses and treacle	§ 117.5(g)(3)(xi)—Molasses and treacle.
Potato starch	§ 117.5(g)(3)(xiii)—Other fruit and vegetable products.
Popcorn	§ 117.5(g)(3)(xiv)—Other grain products.
Salt, baking powder	§ 117.5(g)(3)(xxiii)—Any other processed food that does not require time/temperature control for safety.
Vitamins, minerals, and processed dietary ingredients (e.g., bone meal) in powdered, granular, or other solid form.	§ 117.5(g)(3)(xxiii)—Any other processed food that does not require time/temperature control for safety.

In table 14, we list those foods or food categories, requested by comments, that are not included in the exemption for on-farm, low-risk packing and holding activities, and explain why.

TABLE 14—WHY CERTAIN REQUESTED FOOD CATEGORIES ARE NOT INCLUDED IN THE EXEMPTION FOR ON-FARM LOW-RISK PACKING AND HOLDING ACTIVITIES

Food or food group requested in the comments	Why the food or food group is not listed in the exemption
Barley malt and other grain malts	Malting increases the potential for a hazard, e.g., growth of microbial pathogens such as <i>Salmonella</i> , during the germination process. (However, the risk is mitigated when malting is done in conjunction with making sugar, syrups or vinegar.)
Crude “dietary ingredient botanicals” in whole, form	These are RACs, so packing and holding them is within the farm definition.
Dates (RACs)	These are RACs, so packing and holding them is within the farm definition
Dried intact herbs and spices	Although these are processed foods, packing and holding them is specifically included within the farm definition.
Dried legumes	Although these are processed foods, packing and holding them is specifically included within the farm definition.
Gums, resins, and exudates in solid, powdered, granular, or paste form.	Gums, resins and exudates (including latexes such as chicle) are RACs, so packing and holding them is within the “farm” definition. These products are made into processed foods in some cases, such as by boiling or cutting. The powdered, granular and paste forms from further processing are considered in the risk assessment as “any other processed food that does not require time/temperature control for safety.”

3. Proposed § 117.5(h)—Exemption Applicable to On-Farm Low-Risk Manufacturing/Processing Activity/Food Combinations Conducted by a Small or Very Small Business

We proposed that subpart C would not apply to on-farm low-risk manufacturing/processing activities conducted by a small or very small business if the only manufacturing/processing activities subject to section 418 of the FD&C Act that the business conducts are those listed in the proposed exemption. The proposed exemption specified those activity/food combinations that would be exempt when conducted on a farm mixed-type

facility’s own RACs and those activity/food combinations that would be exempt when conducted on food other than the farm mixed-type facility’s own RACs for distribution into commerce.

As a consequential change in light of the final “farm” definition, the final exemption no longer distinguishes between manufacturing/processing activities conducted on a farm mixed-type facility’s own RACs and manufacturing/processing activities conducted on food other than the farm mixed-type facility’s own RACs. As another consequential change, the exemption has been revised to eliminate activities, conducted on others’ RACs,

which no longer are classified as manufacturing/processing and instead are classified as harvesting, packing, or holding. In addition, as discussed in Response 205 we have revised the final exemption to list food categories consistent with the food categories included in table 1 in the section 103(c)(1)(C) RA.

We also revised the proposed exemption to add two sets of information that we believe will be useful to a farm mixed-type facility when evaluating whether the farm’s manufacturing/processing activities satisfy the criteria for the exemption.

First, we have added a new provision (§ 117.5(h)(1)) explaining that the exemption in § 117.5(h) applies to manufacturing/processing of foods on a farm mixed-type facility, except for manufacturing/processing that is within the “farm” definition in § 1.227. Drying/dehydrating RACs to create a distinct commodity (such as drying/dehydrating grapes to produce raisins, and drying/dehydrating fresh herbs to produce dried herbs), and packaging and labeling such commodities, without additional manufacturing/processing (such as chopping and slicing), are within the “farm” definition in § 1.227. In addition, treatment to manipulate the ripening of RACs (such as by treating produce with ethylene gas), and packaging and labeling the treated RACs, without additional manufacturing/processing, is within the “farm” definition. In addition, coating intact fruits and vegetables with wax, oil, or resin used for the purpose of storage or transportation is within the “farm” definition. Activities that are within the “farm” definition, when conducted on a farm mixed-type facility, are not subject to the requirements of subparts C and G of this part and therefore do not need to be specified in the exemption.

Second, we have added a provision (§ 117.5(h)(2)) specifying that § 117.5(g)(2) describes the food categories listed in the exemption.

(Comment 206) Some comments ask us to include in the exemption a single list of low-risk manufacturing/processing activity/food combinations applicable to farm mixed-type facilities conducting activities on their own RACs and farm mixed-type facilities conducting activities on other’s RACs.

(Response 206) These comments no longer apply. As a consequence of the “farm” definition established by this rule, the exemption no longer distinguishes between manufacturing/processing activities conducted on a farm mixed-type facility’s own RACs and manufacturing/processing activities conducted on food other than the farm mixed-type facility’s own RACs.

(Comment 207) Some comments ask us to include additional activity/food combinations in the exemption. See table 15 and table 16 for a list of the requested additional activity/food combinations.

(Response 207) We evaluated each of the requested activity/food combinations within the qualitative risk assessment (Ref. 4), unless the activity/food combination was out of scope of this rule (for example, if the requested activity/food combination was directed to animal food rather than human food). See table 15 and table 16 for the outcome of our evaluation of these requests, based on the findings of the section 103(c)(1)(C) RA as to whether the requested activity/food combination

satisfies the criteria in that risk assessment for a low-risk activity/food combination. When we determined through the section 103(c)(1)(C) RA that the requested activity/food combination did not satisfy the criteria for a low-risk activity/food combination, table 16 explains why. See § 117.5(g)(2) for a description of the food categories listed in the exemption for on-farm, low-risk manufacturing/processing activity/food combinations in table 15 and table 16.

The first column in table 15 lists the activity/food combination that comments ask us to include in the exemption for on-farm, low-risk manufacturing/processing activity/food combinations. The second column lists the regulatory citation for the relevant exemption for an on-farm manufacturing/processing activity/food combination. Importantly, the full regulatory text of the exemption includes some limitations that were not specified in the comments, and table 15 should not be viewed as equating the requests of the comments with the final regulatory text of the exemption. For example, § 117.5(g)(2)(ix) specifies that the food category “baked goods” includes processed food products such as breads, brownies, cakes, cookies, and crackers, but does not include products that require time/temperature control for safety (such as cream-filled pastries).

TABLE 15—REQUESTED ACTIVITY/FOOD COMBINATIONS AND RELEVANT EXEMPTION FOR ON-FARM LOW-RISK MANUFACTURING/PROCESSING ACTIVITIES

Activity/food combination requested in the comments	Regulatory section listing the exemption
Baking activities involving grain products .....	§ 117.5(h)(3)(ix)—Making baked goods from milled grain products (e.g., breads and cookies).
Chopping, coring, cutting, peeling, pitting, shredding, and slicing. .... • Crackers, dry bread, bread crumbs .....	§ 117.5(h)(3)(ii)—Chopping, coring, cutting, peeling, pitting, shredding, and slicing: • Baked goods • Other grain products • Gums/latexes/resins • Game meat jerky.
• Dry cereal, popcorn .....	
• Gums, resins and exudates .....	
• Jerky .....	
Cooking low-moisture foods with dry heat .....	§ 117.5(h)(3)(xxv)—Roasting and toasting baked goods.
Drying/dehydrating cut fruits and vegetables that are immediately moved into a drying process.	§ 117.5(h)(3)(iv)—Drying/dehydrating (that includes additional manufacturing or is performed on processed foods) other fruit and vegetable products with pH less than 4.2, and other herb and spice products (e.g., chopped fresh herbs, including tea).
• Distilling mint .....	§ 117.5(h)(3)(v)—Extracting (including by pressing, by distilling, and by solvent extraction) from:
• Extracting virgin olive oil .....	• Dried/dehydrated herb and spice products
• Extracting oils from seeds (e.g., sunflower seeds, flax seeds) .....	• Fresh herbs
• Making liquid botanical extracts from dry botanical raw material with solvents such as glycerin, ethanol, vinegar, honey.	• Fruits and vegetables • Grains • Other herb and spice products.
Grinding/milling/cracking/crushing: .....	§ 117.5(h)(3)(vii)—Grinding/milling/cracking/crushing:
• Crackers, dry bread, bread crumbs .....	• Baked goods
• Dry cereal, dry pasta, popcorn .....	• Other grain products
• Dry legumes .....	• Dried/dehydrated fruit and vegetable products.
Mixing .....	§ 117.5(h)(3)(xxii)—Mixing other herb and spice products.
• Honey infused with dried herbs or spices .....	
• Oil and/or vinegar infused with dried herbs or spices .....	
Making maple cream, maple sugar, and molded maple candy .....	§ 117.5(h)(3)(x)—Making candy.

TABLE 15—REQUESTED ACTIVITY/FOOD COMBINATIONS AND RELEVANT EXEMPTION FOR ON-FARM LOW-RISK MANUFACTURING/PROCESSING ACTIVITIES—Continued

Activity/food combination requested in the comments	Regulatory section listing the exemption
Making molasses and treacle from sugarcane and sugar beets ..... • Making apple syrup ..... • Making syrups from sorghum, rice ..... • Making syrups from malted barley ..... • Making syrups such as birch and walnut syrup .....	§ 117.5(h)(3)(xiv)—Making molasses and treacle. § 117.5(h)(3)(xix)—Making sugar and syrup from: • Fruits and vegetables • Grains • Other grain products • Saps.
Making vinegar, including infused and flavored vinegars .....	§ 117.5(h)(3)(xxi)—Making vinegar from fruits and vegetables, other fruit and vegetable products, and other grain products.
Processing tea .....	§ 117.5(h)(3)(xxii)—Mixing other herb and spice products. § 117.5(h)(3)(iv)—Drying/dehydrating (that includes additional manufacturing or is performed on processed foods) other fruit and vegetable products with pH less than 4.2, and other herb and spice products (e.g., chopped fresh herbs, including tea).

TABLE 16—WHY CERTAIN REQUESTED ACTIVITY/FOOD COMBINATIONS ARE NOT INCLUDED IN THE EXEMPTION FOR ON-FARM LOW-RISK MANUFACTURING/PROCESSING ACTIVITIES

Food or food group requested in the comments	Why the food or food group is not listed in the exemption
Acidifying, pickling, and fermenting low-acid fruits and vegetables made in compliance with CGMPs.	Acidifying, pickling, and fermenting activities control microbial hazards and, thus, are not low-risk activities.
Cucumbers, garlic scapes, peppers, and other low-acid foods that are preserved.	The production of low-acid processed foods must control the microbial hazard <i>C. botulinum</i> and, thus, is not a low-risk activity.
Drying/dehydrating tea leaves (e.g., by withering) .....	Drying/dehydrating tea leaves is within the “farm” definition.
Fermentation of vegetables .....	Fermenting activities control microbial hazards and, thus, are not low-risk activities.
Food processing conducted in compliance with relevant State regulation.	It is the risk associated with the activity/food combination, not the regulatory oversight by a State, that is relevant of this exemption.
Freezing fruit juices .....	Fruit juices are outside the scope of the RA based on the statutory framework of FSMA.
Low-acid fruits and vegetables manufactured in compliance with CGMPs under the FD&C Act.	The production of low-acid processed foods must control the microbial hazard <i>C. botulinum</i> and, thus, is not a low-risk activity.
Making pickles and salsa .....	The processes for making pickles and salsa must control microbial hazards and, thus, are not low-risk activities.
Roasting grains for animal feed .....	This activity involves the production of animal food, which is subject to the animal preventive controls rule rather than the human preventive controls rule.

*H. Proposed § 117.5(i)—Exemptions Related to Alcoholic Beverages*

Section 116 of FSMA (21 U.S.C. 2206) (Alcohol-Related Facilities) provides a rule of construction for certain facilities engaged in the manufacturing, processing, packing, or holding of alcoholic beverages and other food. In the proposed human preventive controls rule, we discussed our interpretation of section 116 of FSMA and requested comment on our interpretation. Based on our interpretation, we proposed that subpart C would not apply with respect to alcoholic beverages at facilities meeting two specified conditions (78 FR 3646 at 3707 to 3709). We also proposed that subpart C would not apply with respect to food other than alcoholic beverages at facilities described in the exemption, provided such food is in prepackaged form that prevents direct human contact with the food and constitutes not more than 5 percent of the overall sales of the facility.

(Comment 208) Some comments ask us to include the production of spent grains, distillers’ grains, grape pomace, and other by-products of the manufacturing process within the alcohol exemption. These comments argue that the mere act of separating and disposing of those by-products by sale or otherwise should not trigger an obligation to meet the requirements of subpart C.

(Response 208) The exemption established under the rule of construction in section 116 of FSMA applies to alcoholic beverages, not to any other food (see section 116(c) of FSMA (21 U.S.C. 2206(c)), and we have revised the exemption to make the statutory applicability clearer (see table 52 and the regulatory text of § 117.5(i)). As previously discussed (79 FR 58524 at 58558), the by-products described in these comments appear to be products that would be used in food for animals rather than in human food, and we addressed these by-products in the 2014

supplemental animal preventive controls notice (79 FR 58476 at 58487–58489). (See also the discussion in section L regarding the specific CGMP provisions that will apply to these foods.)

*I. Proposed § 117.5(j)—Exemption Applicable to Facilities Solely Engaged in Storage of Raw Agricultural Commodities Other Than Fruits and Vegetables Intended for Further Distribution or Processing*

We proposed that subpart C would not apply to facilities that are solely engaged in the storage of RACs (other than fruits and vegetables) intended for further distribution or processing. In the following paragraphs, we discuss comments that ask us to clarify how the proposed exemption would apply to specific circumstances.

(Comment 209) Some comments ask whether this proposed exemption (proposed § 117.5(j)) would apply to facilities such as peanut buying points or bean elevators and assert that such

commodities are analogous to grains and the activities conducted at such facilities are analogous to those performed by grain elevators.

(Response 209) We classify peanuts and beans (such as kidney beans, lima beans, and pinto beans) within the category of “fruits and vegetables”; we classify soybeans as grain (see the discussion of fruits and vegetables, 78 FR 3646 at 3690 and proposed §§ 112.1 and 112.2 in the proposed produce safety rule). The exemption for facilities solely engaged in storage of RACs intended for further distribution or processing does not apply to facilities that store fruit and vegetable RACs and, thus, does not apply to facilities such as peanut buying points and bean elevators. As discussed in Response 25, we have revised the “farm” definition to provide that an operation devoted to harvesting (such as hulling or shelling), packing, and/or holding of RACs is within the “farm” definition as a secondary activities farm, provided that the primary production farm(s) that grows, harvests, and/or raises the majority of the RACs harvested, packed, and/or held by the secondary activities farm owns, or jointly owns, a majority interest in the secondary activities farm. With this revision, some operations dedicated to holding RACs, including fruit and vegetable RACs, will be within the “farm” definition.

Peanut buying points and bean elevators that do not meet the revised farm definition are storing RACs that are “fruits and vegetables” and do not meet the criteria for exemption under § 117.5(j). However, we would not expect such facilities to need an extensive food safety plan. A facility that appropriately determines through its hazard analysis that there are no hazards requiring preventive controls would document that determination in its written hazard analysis but would not need to establish preventive controls and associated management components.

(Comment 210) Some comments refer to our statement that there would not be significant public health benefit to be gained by subjecting facilities that solely store non-fruit and vegetable RACs intended for further distribution or processing to the requirements of subpart C (78 FR 3646 at 3709) and assert that the same conclusion applies to those portions of oilseed processing facilities that are devoted solely to RAC storage. According to these comments, in the overwhelming majority of cases the inclusion of a separate RAC storage area in the same building as the oilseed processing area will not introduce additional risk either to the processing

area or to the operations that take place there and that storage areas, whether standing alone as a separate facility or incorporated into a larger processing facility, store RACs safely. These comments ask us to recognize that storage activities may include grain drying to standardize moisture levels and preserve product quality. These comments also ask us to expand the exemption in § 117.5(j) to also apply to distinct and physically separate storage areas that are used solely for storage of RACs (other than fruits and vegetables) intended for further distribution or processing.

(Response 210) The activities included within the definition of holding include activities that are performed as a practical necessity for the distribution of RACs. In the 2014 supplemental human preventive controls notice, we explained that facilities that conduct operations similar to those conducted at grain elevators and silos, such as some facilities that hold oilseeds, may satisfy the criteria for exemption if activities other than storage are performed as a practical necessity for the distribution of RACs (see 79 FR 58524 at 58537 and the definition of “holding” in § 117.3). Examples of holding activities include drying/dehydrating RACs when the drying/dehydrating does not create a distinct commodity (see § 117.3). Thus, the specific example of drying grains to standardize moisture levels and preserve product quality would fall within the definition of holding as a practical necessity for the distribution of RACs. A facility that stores oilseeds, and dries them as a practical necessity for the distribution of RACs, would be covered by the exemption in § 117.5(j).

However, we decline the request to modify the exemption in § 117.5(j) to also apply to distinct and physically separate storage areas that are used solely for storage of RACs (other than fruits and vegetables) intended for further distribution or processing. To the extent that the comments are asking us to do so to provide for facilities that conduct activities as a practical necessity for the distribution of RACs to be eligible for the exemption, doing so is not necessary in light of the definition of holding. To the extent that the comments are asking us to do so to provide for facilities that conduct manufacturing/processing activities in addition to holding activities, we disagree that doing so would be consistent with the statutory direction in FSMA. As previously discussed, section 418(m) of the FD&C Act provides in relevant part that we may by regulation exempt or modify the

requirements for compliance under section 418 of the FD&C Act with respect to facilities that are solely engaged in the storage of RACs (other than fruits and vegetables) intended for further distribution or processing (78 FR 3646 at 3709). The plain meaning of “solely” is only, completely, entirely; without another or others; singly; alone (Ref. 44). Facilities that conduct manufacturing/processing activities in addition to holding activities are not “solely” engaged in the storage of RACs (other than fruits and vegetables) intended for further distribution or processing. See also Response 233 regarding a similar request regarding the applicability of the requirements for hazard analysis and risk-based preventive controls to a facility solely engaged in the storage of unexposed packaged food.

*J. Proposed § 117.5(k)—Exemption Applicable to Farms, Fishing Vessels, Activities of “Farm Mixed-Type Facilities” Within the Definition of “Farm,” the Holding or Transportation of One or More Raw Agricultural Commodities, and Specified Activities Conducted on Specified Raw Agricultural Commodities*

We proposed to redesignate § 110.19(a) as proposed § 117.5(k) and revise the exemption that had been in § 110.19(a) to provide that subpart B would not apply to: (1) Farms; (2) fishing vessels that are not required to register as a food facility; (3) the holding or transportation of one or more RACs; (4) activities of “farm mixed-type facilities” that fall within the definition of “farm”; and (5) hulling, shelling, and drying nuts (without manufacturing/processing, such as roasting nuts).

(Comment 211) Some comments ask us to clarify whether the proposed exemption for the holding or transportation of one or more RACs (proposed § 117.5(k)) would apply to any food establishment, or only apply to farms and farm mixed-type facilities.

(Response 211) The exemption applies to any food establishment.

(Comment 212) Some comments ask us to clarify that CGMP requirements (such as requirements for the plant design to permit the taking of adequate precautions to protect food in outdoor bulk vessels (§ 117.20(b)(3)) and requirements for warehousing and distribution (§ 117.93) do not apply to the bulk outdoor storage of RACs for further processing.

(Response 212) We are returning to the long-standing approach that the exemption applies to establishments “solely engaged” in specific activities. Under the exemption we are

establishing in § 117.5(k)(1)(iii), those activities are holding and/or transportation of RACs. Under the exemption we are establishing in § 117.5(k)(1)(v), those activities are hulling, shelling, drying, packing, and/or holding nuts. We explain why in the following paragraphs.

These comments appear to interpret the proposed exemption in a way that goes beyond the long-standing “RAC exemption” in § 110.19 and is inconsistent with our intent in updating § 110.19 to adjust and clarify what activities fall within this exemption based on experience and changes in related areas of the law since issuance of this exemption from the CGMPs (78 FR 3646 at 3710). The suggestion of these comments—*i.e.*, that CGMPs should not apply to the holding of RACs in a facility that manufactures, processes, or packs RACs—would not make sense in some circumstances and would create difficulties for establishments (in determining how to comply with the CGMP requirements) and for regulators (in determining how to enforce the CGMP requirements). For example, it does not make sense for the part of a facility that holds RACs prior to processing to be exempt and the parts of the facility that are processing the RACs and storing them after processing to be covered. Likewise, it does not make sense for part of a transportation vehicle to be covered and part to be exempt.

By revising these two proposed exemptions that derive from the “RAC exemption” so that they apply only to establishments “solely engaged” in the storage and/or transportation of RACs, and to establishments “solely engaged” in the hulling, shelling, drying, packing, and/or holding of nuts, we are providing for a predictable framework for interpreting exemptions for facilities “solely engaged” in other activities. For example, as discussed in Comment 209, comments ask us to expand the exemption (in § 117.5(j)) from the requirements for hazard analysis and risk-based preventive controls for facilities that are “solely engaged” in the storage of RACs (other than fruits and vegetables) intended for further distribution or processing to also apply to distinct and physically separate storage areas that are used solely for storage of such RACs. In our response, we noted that facilities that conduct manufacturing/processing activities in addition to holding activities are not “solely engaged” in the storage of such RACs (see Response 209). In addition, as discussed in Comment 233, comments ask us to apply the exemption (in § 117.7) from the requirements for

hazard analysis and risk-based preventive controls for facilities that are “solely engaged” in the storage of unexposed packaged food to storage areas of facilities that also engage in food processing activities—*e.g.*, for distributors that are engaged in limited food processing, such as cutting vegetables or packing ready-to-eat foods. In our response, we noted that such distributors are not “solely” engaged in the storage of unexposed packaged food (see Response 233).

The questions raised by these comments led us to reexamine the reasons we gave, in the 2013 proposed human preventive controls rule and the 2014 supplemental human preventive controls notice, for describing these exemption in terms of the activities conducted without specifying that the establishment is “solely engaged” in conducting these activities. For example, in the 2013 proposed human preventive controls rule we explained our assumption that if activities subject to the CGMPs take place in the same establishment, compliance with the CGMPs with respect to those activities should provide necessary protection. The comments led us to question that assumption. For example, with respect to the question posed by the comments about the outdoor bulk storage of RACs for further processing, it is not clear how conducting subsequent activities on the RACs in accordance with the CGMP requirements would protect the RACs during outdoor bulk storage. As discussed more fully in Response 660, processing fresh produce into fresh-cut products increases the risk of bacterial growth and contamination. RACs stored in bulk outdoors before being processed into fresh-cut produce must be stored in clean containers or vessels such that these do not contribute to contamination of the produce before it is processed. In addition, as already noted in this response, in interpreting the exemptions from subparts C and G for facilities that are solely engaged in the storage of RACs (other than fruits and vegetables) intended for further distribution or processing (§ 117.5(j)) and for facilities solely engaged in the storage of unexposed packaged food (§ 117.7), we do not consider that the exemption for these “holding” activities applies when holding is part of other operations conducted by the facility. For example, the exemption in § 117.7 would not apply to a packaged food warehouse of a processing facility, even if the warehouse only stores unexposed packaged food.

In the 2013 proposed human preventive controls rule we tentatively concluded that it would be reasonable

to revise the RAC exemption in § 110.19 so that it would exempt the specifically identified activities when performed on RACs, regardless of whether the establishment that conducts those activities also conducts other activities that do not qualify for the exemption, in part because the exemptions in section 418(j)(1) applied to “activities” (*i.e.*, covered by parts 120, 123, and 113) (see 78 FR 3646 at 3710). However, section 418(j)(1) is premised on the existence of similar mandatory requirements for those specific foods. In contrast, there are no requirements similar to subpart B in some situations that would be exempt under an exemption broadly directed to the activities of holding and transportation. For example, there would be no other requirements similar to subpart B (*e.g.*, for pest control) applicable to an off-farm establishment that stores apples in a controlled atmosphere storage facility or to an establishment that stores harvested dry beans. We now believe that a better comparison is to other exemptions in FSMA, such as the exemption in section 103(c)(1)(D)(i) of FSMA for facilities engaged only in specific types of on-farm manufacturing, processing, packing or holding activities, and the exemption in section 418(m) of the FD&C Act for facilities solely engaged in storage of RACs (other than fruits and vegetables) intended for further distribution or processing. It is reasonable to infer that one reason for the use of “solely” in the statutory provisions in section 103(c)(1)(D)(i) of FSMA and in section 418(m) of the FD&C Act is to avoid some of the problems we have discussed in this response.

In the 2013 proposed human preventive controls rule, we stated our belief that activities should be regulated the same way regardless of whether activities subject to the CGMP requirements take place in same establishment. However, as with the exemptions in section 103(c)(1)(D)(i) of FSMA and section 418(m) of the FD&C Act, this is a situation where context matters. RACs that are the sole food in a warehouse are different from RACs being held in a manufacturing operation. As already noted in this response and as discussed more fully in Response 660, processing fresh produce into fresh-cut products increases the risk of bacterial growth and contamination, and produce being stored before processing into fresh-cut produce must be protected against contamination while being stored.

The exemptions we are establishing in this rule for establishments solely engaged in the storage and/or

transportation of RACs, and for establishments solely engaged in hulling, shelling, drying, packing, and/or holding nuts (without additional manufacturing/processing, such as roasting nuts), remain consistent with our announced intent to adjust and clarify what activities fall within this exemption based, in part, on changes in related areas of the law since this exemption from the CGMP requirements was first issued. As discussed in section IV, we have made a number of changes to the “farm” definition, including changes that provide for an operation devoted to harvesting, packing, and/or holding of RACs to be a “farm” (*i.e.*, a “secondary activities farm”) (and, thus, be exempt from the CGMP requirements under § 117.5(k)(1)(i) even though the operation does not grow RACs (see § 117.3). With this revised “farm” definition, some establishments that had relied on the “RAC exemption” in § 110.19 to be exempt from CGMP requirements as establishments solely engaged in the “storage” of RACs, or because they were solely engaged in the harvesting (such as hulling and shelling) and storage (which includes drying) of nuts, will be exempt from the CGMP requirements because they are a “farm.” As a result, there are fewer operations that need to rely on exemptions that are an outgrowth of the long-standing RAC exemption in § 110.19.

#### *K. Comments Requesting Additional Exemptions*

##### 1. Introduction

(Comment 213) We received comments requesting several additional exemptions from the requirements for hazard analysis and risk-based preventive controls in subpart C, the CGMP requirements of subpart B, or both. See the remainder of section XI.K for a description of the specific requests.

(Response 213) Each year, about 48 million Americans (1 in 6) get sick, 128,000 are hospitalized, and 3,000 die from foodborne diseases, according to recent estimates from the Centers for Disease Control and Prevention (CDC) (Ref. 45). This is a significant public health burden that is largely preventable. We believe that improvements to our CGMP regulations, coupled with implementation of FSMA’s directives to focus more on preventing food safety problems than on reacting to problems after they occur, can play an important role in reducing foodborne illness (other than foodborne illnesses that are the result of improper food handling practices in the home and food service settings, which would not be addressed by this rule). We did not

propose any exemptions or exceptions from the requirements of subpart C other than those contained in section 103 of FSMA (78 FR 3646 at 3657). Likewise, we did not propose any additional exemptions from the CGMP requirements other than to adjust and clarify what activities fall within a long-standing exemption related to RACs based on experience and changes in related areas of the law since issuance of the CGMP regulation (78 FR 3646 at 3709–3711).

In the remainder of section XI.K, we respond to the specific requests for additional exemptions from the requirements of subparts C and G for hazard analysis and risk-based preventive controls. None of these specific requests describe (or otherwise provide) evidence demonstrating that the regulatory framework associated with the request would address all of the requirements of subparts C and G. Therefore, we have declined all of these requests. In some cases, a facility that is subject to other Federal, State, or local regulations that have some of the same requirements as subparts C and G will not have to repeat the same activity and will be able to use any existing records to demonstrate compliance and supplement those actions and records as necessary to demonstrate compliance with the remaining requirements of subparts C and G (see, *e.g.*, 79 FR 58524 at 58542, Response 215, Response 216, Response 219, and the discussion of § 117.330 in section XLI.G). In one case (for facilities subject to the PMO; see Response 214), we have extended the date for compliance with the requirements of subparts C and G in light of comments expressing an intent to revise the current requirements of a Federal/State cooperative program to incorporate the requirements of this rule. In other cases, a facility may determine and document through its hazard analysis that no preventive controls are necessary to prevent its food products from being adulterated under section 402 of the FD&C Act or misbranded under section 403(w) of the FD&C Act (see, *e.g.*, Response 222, Response 226, Response 229, and the discussion of § 117.130 in section XXV). Such facilities, although not exempt, will have a reduced burden to comply with the rule, if the outcome of their hazard analysis is that there are no hazards requiring preventive controls.

Likewise, in the remainder of section XI.K we respond to the specific requests for additional exemptions from the CGMP requirements of subpart B. None of these requests provide a basis for why the long-standing CGMP provisions that establish basic requirements for the

manufacturing, processing, packing, and holding of food to prevent adulteration should no longer apply to a particular type of food establishment and, thus, we have declined these requests.

##### 2. Facilities That Comply With the Pasteurized Milk Ordinance

(Comment 214) Some comments discuss facilities that comply with the Grade “A” PMO and are regulated under the National Conference on Interstate Milk Shipments (NCIMS) system (PMO facilities). NCIMS has been part of a cooperative program among the U.S. Public Health Service/FDA, the States and the dairy industry since 1950. Procedures for Governing the Cooperative Program of the NCIMS include procedures establishing milk sanitation standards, rating procedures, sampling procedures, laboratory procedures, laboratory evaluation and sample collector procedures. As previously discussed (78 FR 3646 at 3662), the PMO is a model regulation published and recommended by the U.S. Public Health Service/FDA for voluntary adoption by State dairy regulatory agencies to regulate the production, processing, storage and distribution of Grade “A” milk and milk products to help prevent milkborne disease. Appendix K—HACCP Program of the PMO—describes a voluntary, NCIMS HACCP Program alternative to the traditional inspection system. A milk plant, receiving station or transfer station may not participate in the voluntary NCIMS HACCP Program unless the regulatory agency responsible for the oversight of the facility agrees to participate with the dairy plant(s), receiving station(s) and transfer station(s) in the NCIMS HACCP Program. Currently all 50 States, the District of Columbia, and Puerto Rico have adopted the PMO by reference or have codified the PMO or similar provisions in State regulations. At its biennial conferences, the NCIMS considers changes and modifications to the Grade “A” PMO to further enhance the safety of Grade “A” milk and milk products, including the administrative and technical details on how to obtain satisfactory compliance. Changes ultimately accepted by NCIMS voting delegates (representatives from States and territories) are forwarded to FDA for concurrence before they become effective.

Some comments recommend that we make full use of the existing milk safety system of State regulatory oversight for Grade “A” milk and milk products provided through the NCIMS and the food safety requirements of the PMO. Some comments assert that we are

exceeding our authority by requiring PMO-regulated facilities to comply with both the PMO and the requirements of FSMA for hazard analysis and risk-based preventive controls.

Some comments ask us to exempt PMO-regulated facilities (or the PMO-regulated part of a PMO facility that also produces food products not covered by the PMO) from the requirements of the rule for hazard analysis and risk-based preventive controls, or to otherwise determine that facilities operating in compliance with the PMO are also in compliance with those requirements. These comments suggest we could, as an interim step if we find it necessary, stay the application of these requirements to PMO-regulated facilities and work with the NCIMS cooperative program to enact any modifications to the PMO as may be needed to warrant an exemption or comparability determination. The comments characterize these changes as “minor.”

Some comments ask for clarification as to whether the human preventive controls rule would preempt the PMO if there are any conflicts or duplications between the human preventive controls rule and the PMO. Some comments ask us to explain our position concerning the interstate movement of milk and milk products and imported milk if the final rule does not recognize that PMO-regulated facilities are also in compliance with the requirements of the human preventive controls rule for hazard analysis and risk-based preventive controls. These comments ask: (1) Whether the final rule will become the de facto standard or the standard enforced by the FDA for the movement of milk in interstate commerce and for imported milk; (2) how the final rule will affect States that have adopted the PMO as their law/regulation for the production and processing of products such as fluid milk products and cottage cheese; and (3) how a final rule that does not recognize the PMO and the products made under the PMO will affect other Federal rules, policy, procedures, or practices that require compliance with the PMO.

(Response 214) We agree that we should make use of the existing system of State regulatory oversight for Grade “A” milk and milk products provided through the NCIMS and the food safety requirements of the PMO. The NCIMS program has been effective from a regulatory standpoint, and has likely had a significant public health impact in reducing the incidence of foodborne illness attributable to milk and milk products. FDA is committed to the mission of the NCIMS and ensuring the

continuance of an effective milk safety system with State regulatory oversight. However, the PMO does not address all of the requirements of subparts C and G, such as requirements relevant to the potential presence of environmental pathogens in the food processing environment (see, e.g., §§ 117.130(c)(1)(ii) and 117.150(a)(1)(iii)(B)). Such provisions could help to prevent food safety problems from the consumption of food produced by PMO facilities and play an important role in reducing foodborne illness. For example, in 2007, contamination of a PMO-regulated facility with the environmental pathogen *L. monocytogenes* was the cause of three deaths via listeriosis (Ref. 46). As another example, there have been large-scale recalls as a result of contamination of dried milk with the environmental pathogen *Salmonella* (Ref. 47).

In addition, the NCIMS HACCP Program is a voluntary program and, as of March 17, 2015, had been utilized by only 11 of approximately 625 PMO facilities (Ref. 48). Further, the current NCIMS HACCP Program does not address all of the requirements of subparts C and G, such as environmental monitoring as a verification of sanitation controls for environmental pathogens and a supply-chain program for non-dairy ingredients (Ref. 49). The PMO also does not address food allergen controls, which are appropriate for those Grade “A” facilities that also handle food containing allergens other than milk. The comments do not provide a basis for why we should exempt PMO facilities from the rule in light of the differences between the requirements of this rule and the requirements of the PMO.

NCIMS has initiated work to modify the PMO and that work is expected to include all of the requirements in a final human preventive controls rule. FDA has committed resources to work with the appropriate NCIMS Committees to make the necessary changes. However, the NCIMS process will not be complete in time for PMO facilities to meet the first two compliance dates for this rule (i.e., September 19, 2016 for businesses other than small and very small businesses, and September 18, 2017 for small businesses), because the next scheduled Conference following the publication of this final rule would be April 2017. Therefore, to make use of the existing system of State regulatory oversight for Grade “A” milk and milk products provided through the NCIMS and the food safety requirements of the PMO, we are extending the compliance

date for PMO-regulated facilities to comply with the requirements of subparts C and G to September 17, 2018. Doing so is consistent with the request of comments asking us to “stay” the application of the requirements for hazard analysis and risk-based preventive controls to PMO-regulated facilities and work with the NCIMS cooperative program to effect the necessary modifications to the PMO so that it will include all of the requirements in the human preventive controls rule. The extended compliance date is not equivalent to an exemption. Regardless of whether the PMO is modified to include the requirements of a final human preventive controls rule by the extended compliance date, PMO facilities must comply with the human preventive controls rule on September 17, 2018.

The extended compliance date also is responsive to comments that identified complex implementation issues concerning the interstate movement of milk and milk products and imported milk. If the requirements of this rule for hazard analysis and risk-based preventive controls are incorporated into the PMO by the compliance date, such implementation issues will be moot, because a facility that complies with the revised PMO would also comply with this rule. As the compliance date approaches, it will be clearer as to whether any or all of the necessary revisions to the PMO will be in place by the compliance date for PMO facilities. If it appears that these revisions will not be in place by the compliance date for PMO facilities, we will take steps to address implementation issues specific to this Federal/State cooperative program.

In establishing a compliance date of September 17, 2018 for PMO facilities, we considered: (1) The extent of revisions that must be made to incorporate the requirements of this rule for hazard analysis and risk-based preventive controls into the PMO; (2) the process to revise the PMO; and (3) the date at which the necessary revisions to the PMO could begin to be made. We discuss each of these considerations in the following paragraphs.

We disagree that the necessary revisions to incorporate the requirements of this rule for hazard analysis and risk-based preventive controls into the PMO are “minor.” There are gaps between the requirements of this rule and the current required and voluntary provisions of the PMO (Ref. 49), and gaps such as provisions directed to environmental

monitoring, supply-chain controls, and food allergen controls are not “minor.”

With respect to process, NCIMS considers changes and modifications to the Grade “A” PMO at its biennial conferences, and proposals with the necessary changes must be voted on at such a biennial meeting. The next scheduled biennial conference is in the spring of 2017. Although it may be possible for NCIMS to convene a special conference in 2016 for the purpose of voting on proposals to revise the PMO to make it comply with the requirements of this rule, practicalities such as the availability of funds for a special conference could interfere with any plans for a special conference. In addition, given that we do not view the necessary changes as “minor,” it could take more than one round of proposals for revising the PMO before a proposal receives the votes necessary to be adopted. Because the provisions of this rule will not be established until the date of publication of this final rule, any preliminary drafts of proposals to modify the PMO (*e.g.*, to incorporate the provisions that we proposed in the 2014 supplemental preventive controls notice) before today’s date may need revision to reflect the final provisions of the rule.

In light of all these considerations, we are establishing September 17, 2018 as the date for PMO facilities to comply with the requirements for hazard analysis and risk-based preventive controls in part 117, subparts C and G. The compliance date for PMO facilities to comply with the CGMP requirements of subpart B is also September 17, 2018, and PMO facilities will continue to comply with part 110 until that date. Under NCIMS procedures, changes agreed to by the voting delegates at the 2017 NCIMS conference (and to which FDA concurs) would be effective within one year of the electronic publication of the NCIMS documents; or by official notification by FDA to the States and the dairy industry of “Actions from the 2017 NCIMS Conference;” or by a previously determined effective date (*e.g.*, September 17, 2018). We believe that the date of September 17, 2018 appropriately balances the need to realize the benefits of FSMA’s requirements for hazard analysis and risk-based preventive controls with the practicalities associated with revising the PMO to incorporate the requirements of this rule.

### 3. Facilities That Have an Established HACCP Program

(Comment 215) Some comments ask us to recognize operations that have an established HACCP Program

implemented by a trained individual as meeting the requirements of the human preventive controls rule. Some of these comments note that the NCIMS HACCP Program describes a voluntary, NCIMS HACCP Program alternative to the traditional inspection system. Other comments discuss the EU Dairy HACCP Program and assert that the preventive controls system mandated by FSMA is a HACCP-like system but is not as robust as the EU Dairy HACCP Program. Other comments ask us to support and recognize industry-driven, mandatory programs that afford the same level of public health protection as the human preventive controls rule.

Other comments note that facilities such as pizza manufacturing facilities are “dual jurisdiction” facilities, regulated and inspected by both FDA and USDA’s Food Safety and Inspection Service (FSIS). These comments assert that such facilities already are operating under FSIS-approved HACCP plans, and their HACCP plans cover FDA-regulated products, as well as FSIS-regulated products. These comments acknowledge that there are differences between FSIS’ HACCP regulation and FDA’s proposed requirements for hazard analysis and risk-based preventive controls but nonetheless assert that requiring dual jurisdiction facilities to operate under two different food safety plans would result in unnecessary duplication of effort and confusion.

(Response 215) Whether a particular HACCP program implemented by a trained individual would satisfy the requirements of the human preventive controls rule will depend on whether the particular HACCP program satisfies all of the requirements of the rule. (See Response 213.) For operations that have implemented HACCP programs that are generally similar to the provisions of part 117, the burden of complying should be minimal in light of the provisions of § 117.330, which provides for use of existing records. As an example, if a facility has an existing HACCP plan (or multiple HACCP plans for different types of foods), supported by certain prerequisite programs that include food safety controls, the facility would not need to duplicate or re-write its existing HACCP plans or prerequisite programs, as long as the existing HACCP plans and prerequisite programs contain all of the required information and satisfy the requirements of subpart F, or are supplemented as necessary to include all of the required information and satisfy the requirements of subpart F (see § 117.330(a)). Because the rule also provides that the required information does not need to be kept in one set of records, a facility may

supplement existing records associated with its HACCP plans and prerequisite programs with other required components of a food safety plan (such as recall plan and, when applicable, a supply-chain program and written verification procedures for environmental monitoring) (see § 117.330(b)). Moreover, the rule provides additional flexibility for a facility that relies on both existing records and newly established records to keep the records either separately or combined (see § 117.330(b)).

The flexibility provided by the provisions for use of existing records also enables a facility to comply with the requirement (in § 117.310) for the owner, operator, or agent in charge of a facility to sign and date the facility’s food safety plan, even when components of the food safety plan are kept separately. For example, when the food safety plan consists of one or more existing HACCP plans, one or more prerequisite programs that include food safety controls, a recall plan, a written supply-chain program, written verification procedures such as environmental monitoring, and any other components required by the rule, one approach for signing and dating the food safety plan could be to collect all these documents in a single location (*e.g.*, a binder or folder) with a cover page containing the signature of the owner, operator, or agent in charge of the facility and the date on which the cover page was signed. However, because the food safety plan also could be a set of documents kept in different locations within the facility, a facility could sign and date a list of the relevant documents (*e.g.*, as in a Table of Contents). (See also the discussion in Response 369 that a food safety plan may be prepared as a set of documents kept in different locations within the facility (*e.g.*, based on where they will be used)).

### 4. Facilities That Are Subject to Requirements for Acidified Foods

(Comment 216) Some comments ask us to exempt (or partially exempt) facilities that produce acidified foods from the requirements of subpart C, because acidified foods are subject to the specific food safety regulation in part 114 (21 CFR part 114) in addition to the CGMP requirements in subpart B. If we do not do so, these comments ask us to clarify whether a scheduled process established for an acidified food would be accepted as a process that had been validated as a preventive control for a microbiological hazard. Some of these comments mention specific acidified food products, such as salsa.

Other comments ask us to withdraw part 114 and regulate acidified foods under part 117 to avoid confusion, and then consider acidification as a preventive control.

(Response 216) We agree that the specific CGMP requirements already established in part 114 play a key role in the safe production of acidified foods, but disagree that it would be appropriate to exempt facilities that are subject to part 114 from the requirements of subparts C and G. As the comments suggest, the long-standing requirements of part 114 could function as a type of preventive control.

However, part 114 does not address all of the requirements of subparts C and G, such as the requirement to address chemical and physical hazards.

We also disagree that we should withdraw part 114 and simply consider acidification as a preventive control under subparts C and G. The long-standing requirements of part 114 provide many details that do not fit within the framework of this rule, and we do not believe that it is in the best interest of public health to simply eliminate those details.

A processor of acidified foods can consider its current scheduled processes, established in accordance with part 114, when conducting the hazard analysis required by this rule (§ 117.130). A processor of acidified foods could, through its hazard analysis, determine and document that the microbiological hazards associated with its products are addressed by preventive controls in its scheduled processes established under part 114. To the extent that the processor considers an existing scheduled process to be a preventive control as that term is defined in this rule, the processor would establish and implement preventive control management components (*i.e.*, monitoring, corrective actions and corrections, and verification (including validation)) as appropriate to ensure the effectiveness of that preventive control, taking into account the nature of the preventive control. Again, a processor of acidified foods can consider its current procedures, established in accordance with part 114, when determining what preventive control management components to establish and implement. For example, a facility that previously validated a scheduled process can rely on its existing validation records and would not need to repeat the validation or make a new record. Processes issued by a process authority for acidified foods are generally accepted as validated processes. As another example, a facility can consider its current procedures for

complying with the requirements of part 114, including frequent pH testing and recording of results, to exercise sufficient control so that the finished equilibrium pH values for acidified foods are not higher than 4.6 (§ 114.80(a)(2)), and to address deviations from scheduled processes (§ 114.89). A facility that produces acidified foods could demonstrate compliance with the requirements of subparts C and G of this rule by relying on the records it is currently required to establish and maintain (§ 114.100), as applicable, supplemented as necessary (see § 117.330).

(Comment 217) Some comments ask whether a qualified facility with activities that are subject to part 114 (Acidified Foods) would be exempt from the requirements of Subpart C.

(Response 217) A qualified facility is exempt from the requirements of subparts C and G, and instead subject to the modified requirements in § 117.201, for all foods that it produces, including acidified foods.

#### 5. Egg Facilities

(Comment 218) Some comments ask us to exempt shell egg facilities that are also regulated by USDA and by State shell egg grading programs from the requirements of both subpart B and subpart C or at least recognize these establishments as meeting the requirements for subpart B and Subpart C without further routine FDA inspection. Some comments ask us to exempt shell egg establishments subject to part 118 (21 CFR part 118) (Production, Storage, And Transportation Of Shell Eggs) from the requirements of subpart C because part 118 already requires shell egg establishments to take specific, concrete, steps to prevent the hazard *Salmonella* from contaminating eggs on the farm and from further growth during storage and transportation.

(Response 218) Shell eggs are RACs. The on-farm production of shell eggs is exempt from both the CGMP requirements in subpart B (see the exemption for farms in § 117.5(k)(1)(i)) and from the requirements for hazard analysis and risk-based preventive controls in subparts C and G (because a “farm” is exempt from the requirement to register as a food facility). Likewise, the packing of shell eggs by egg packinghouses that are within the “farm” definition established during this rulemaking are exempt from both the CGMP requirements in subpart B and the requirements for hazard analysis and risk-based preventive controls in subparts C and G, (see Response 25).

Establishments that are solely engaged in the holding or transportation of shell eggs are exempt from the CGMP requirements in subpart B (see the exemption for establishments solely engaged in the holding or transportation of one or more RACs in § 117.5(k)(1)(iii)). Facilities that are required to register, but are solely engaged in the storage of shell eggs intended for further distribution or processing, are exempt from the requirements for hazard analysis and risk-based preventive controls in subparts C and G (see the exemption in § 117.5(j)).

Shell egg processing facilities that are regulated exclusively, throughout the entire facility, by USDA under the Egg Products Inspection Act (21 U.S.C. 1031 *et seq.*) are exempt from the section 415 registration regulations and, thus, are not subject to the requirements of this rule for hazard analysis and risk-based preventive controls (subparts C and G).

#### 6. Facilities That Produce Infant Formula

(Comment 219) Some comments ask us to exempt the production of infant formula from the requirements of subpart C after we issue a final rule establishing requirements for CGMPs and quality control procedures for infant formula.

(Response 219) We issued an interim final rule entitled “Current Good Manufacturing Practices, Quality Control Procedures, Quality Factors, Notification Requirements, and Records and Reports, for Infant Formula” on February 10, 2014 (79 FR 7934) and a final rule (the infant formula rule) adopting, with some modifications, that interim final rule on June 10, 2014 (79 FR 33057).

We agree that the requirements of the infant formula rule play a key role in the safe production of infant formula, but disagree that it would be appropriate to exempt facilities that are subject to the infant formula rule from the requirements of subparts C and G. The infant formula rule does not address all of the requirements of subparts C and G, such as requirements relevant to the potential presence of environmental pathogens in the food processing environment (see, *e.g.*, §§ 117.130(c)(1)(ii) and 117.150(a)(1)(ii)(B)). As with products such as acidified foods (see Response 216), a manufacturer of infant formula could demonstrate compliance with the requirements of subparts C and G of this rule by relying on the records it is currently required to establish and maintain (§ 106.100), as applicable,

supplemented as necessary (see § 117.330).

#### 7. Small Businesses

(Comment 220) Some comments ask us to provide more exemptions for small farms and small facilities.

(Response 220) We decline this request. As discussed in Response 213, the exemptions we are establishing are those provided by section 103 of FSMA. Small farm that only conduct activities within the “farm” definition are not subject to the human preventive controls rule. Small farms that also conduct activities outside the “farm” definition (such as manufacturing jams or jellies) (and, thus, are farm mixed-type facilities) are eligible for an exemption if the only such activities they conduct are the low-risk activity/food combinations specified in the exemptions in § 117.5(g) and (h). Small farms that are subject to this rule as farm mixed-type facilities, and other small businesses, will have an extra year to comply with the rule. As discussed in Response 222, the new requirements for hazard analysis and risk-based preventive controls are flexible, and the preventive controls (if any) that a facility would establish and implement would depend on the outcome of the facility’s hazard analysis and therefore would be tailored to the operation. These aspects of this rulemaking provide ample flexibility to small businesses.

#### 8. Exemptions Based on Risk

(Comment 221) Some comments ask us to exempt facilities identified as conducting low-risk activities from the CGMP requirements.

(Response 221) We decline this request. The umbrella CGMPs that we are establishing in subpart B are long-standing provisions that establish basic requirements for the manufacturing, processing, packing, and holding of food to prevent adulteration. For example, food that is exposed must be protected against contamination from the plant’s grounds, the design and construction of the plant, and sanitary operations regardless of whether the uncontaminated food could be “high-risk” or “low-risk”; contamination introduced during the production of food can adulterate any food. In addition, these umbrella CGMPs are not “one-size-fits-all” in that many provisions provide flexibility to tailor specific practices to the nature of the food and the activities being conducted. For example, many provisions establish a performance standard in which the measures taken must be “adequate” to comply with the rule, where adequate is

defined as that which is needed to accomplish the intended purpose in keeping with good public health practice. As another example, provisions directed to raw materials require that they be washed or cleaned “as necessary” to remove soil or other contamination (see § 117.80(b)(1)). Moreover, some comments point out that one strength of the long-standing CGMPs is their applicability to the broad spectrum of food manufacturing, from the manufacture of processed products and packaging of fresh produce to production of food additives and GRAS substances (see section VIII). (As already noted, some packaging of fresh produce (e.g., packaging of RACs on a farm) is not subject to the CGMPs.)

(Comment 222) Some comments assert that we should not base the requirements for hazard analysis and risk-based preventive controls on the status of a business as a facility that is required to register under the section 415 registration regulations if there is no risk from consumption of food produced by that business. Some comments assert that a food safety plan should only be required for high-risk processing facilities because adhering to CGMPs is sufficient for low-risk facilities. Some comments assert a food safety plan should be required for large businesses, but not for small and medium-size businesses, including small businesses that manufacture low-risk foods that are sterilized before being eaten and already undergo a 48-point inspection twice a year.

Some comments ask us to adopt a commodity-specific approach to the exemptions and to only apply the requirements for hazard analysis and risk-based preventive controls to RACs that fall within the five highest-risk commodity groups and to any other specific commodities that we determine pose a comparable risk based on outbreak history and the commodity’s characteristics.

Other comments note that some States provide “exemptions” for “non-potentially-hazardous foods.” These comments assert that there should be national agreement on what such foods are and, if such foods are truly low risk, there should not be onerous requirements regardless of the size of the business.

(Response 222) We decline these requests to establish additional exemptions based on risk, other than the exemptions for on-farm low-risk activity/food combinations provided by section 103(c)(1)(D) of FSMA (§ 117.5(g) and (h)). The applicability of the requirements of the human preventive controls rule to facilities that are

required to register is required by the statute (see the definition of facility in section 418(o)(2) of the FD&C Act). Section 418(h) of the FD&C Act requires that a facility prepare and implement a food safety plan, unless an exemption applies. Neither FSMA nor this rule establishes a broad exemption for “low-risk” facilities, including “low-risk” facilities that are regularly inspected by State, local, or tribal government agencies. As discussed in Response 213, the exemptions we are establishing are those specifically authorized by the statute.

The new requirements for hazard analysis and risk-based preventive controls are not “one-size-fits-all,” and facilities that are subject to the rule would consider the risk presented by the products as part of their hazard evaluation. (See § 117.130(c)(1)(i), which requires that the hazard analysis include an evaluation of identified known or reasonably foreseeable hazards to assess the severity of the illness or injury if the hazard were to occur and the probability that the hazard will occur in the absence of preventive controls.) Although each facility subject to the rule must prepare and implement a food safety plan, the preventive controls that the facility would establish and implement would depend on the facility, the food, and the outcome of the facility’s hazard analysis (§§ 117.130 and 117.135(c)). In addition, the preventive control management components (*i.e.*, monitoring, corrective actions and corrections, and verification) that a facility would establish and implement for its preventive controls would be established as appropriate to ensure the effectiveness of the preventive controls, taking into account the nature of the preventive control and its role in the facility’s food safety system (§ 117.140(a)). A facility that appropriately determines through its hazard analysis that no preventive controls are necessary to prevent its food products from being adulterated under section 402 of the FD&C Act or misbranded under section 403(w) of the FD&C Act would document that determination in its written hazard analysis but would not need to establish preventive controls and associated preventive control management components for its products. A facility that is a very small business as that term is defined in this rule is exempt from the requirements of subparts C and G, including the requirement to prepare and implement a food safety plan, and is instead subject to the modified requirements in § 117.201.

We expect that there will be many circumstances in which a facility appropriately determines that certain biological, chemical, or physical hazards are not hazards requiring a preventive control that must be addressed in the food safety plan. There are several types of food products for which a facility may determine that there are no hazards requiring a preventive control. Such products could include, but are not limited to: many crackers, most bread, dried pasta, many cookies, many types of candy (hard candy, fudge, maple candy, taffy and toffee), honey, molasses, sugar, syrup, soft drinks, and jams, jellies, and preserves from acid fruits.

#### 9. Hullers/Shellers

(Comment 223) Some comments ask us to clarify whether an operation solely engaged in hulling/shelling would qualify for the exemption from the requirements for hazard analysis and risk-based preventive controls for facilities that solely are engaged in the storage of RACs (other than fruits and vegetables) intended for further distribution or processing (§ 117.5(j)). Other comments ask us to clarify whether an operation that is solely engaged in hulling/shelling and, thus, is exempt from the CGMP requirements of subpart B would also be exempt from the requirements for hazard analysis and risk-based preventive controls in subpart C. Some of these comments assert that it seems contrary to the principles of HACCP that a facility that is not required to implement CGMPs (which is a foundation of HACCP) would still need to develop a food safety plan. Some comments assert that requiring these operations to apply HACCP standards to what is an extension of harvesting is overkill, because the consumer is ultimately protected by processes at the handler (processor) level. Other comments assert that our clarification that operations that hull/shell/dry nuts are exempt from the CGMP requirements recognizes that hulling/shelling activities are low risk and do not alter the status of a RAC. Because the requirements for hazard analysis and risk-based preventive controls will be applied by those receiving product from the huller/sheller, it does not seem appropriate for an operation that is explicitly exempt from CGMP requirements to be required to conduct a hazard analysis, implement controls, conduct monitoring, etc.

(Response 223) Under the revised “farm” definition, some hulling/shelling operations will be within the “farm” definition (*i.e.*, if the primary production farm(s) that grows, harvests,

and/or raises the majority of the nuts owns, or jointly owns, a majority interest in the hulling/shelling operation). Because hulling/shelling is a harvesting activity, not a holding activity, those hulling/shelling operations that are not within the “farm” definition are not eligible for the exemption for facilities solely engaged in the storage of RACs (other than fruits and vegetables) intended for further distribution or processing (§ 117.5(j)). As discussed in Response 222, there is no exemption for “low-risk operations.” However, a facility that appropriately determines through its hazard analysis that there are no hazards requiring preventive controls would document that determination in its written hazard analysis but would not need to establish preventive controls and associated management components.

#### 10. Fruit and Vegetable RACs

(Comment 224) Some comments ask us to clarify the two exemptions applicable to RACs—*i.e.*, the exemption from CGMP requirements for the holding or transportation of one or more RACs (§ 117.5(k)) and the exemption from the requirements for hazard analysis and risk-based preventive controls for facilities solely engaged in the storage of RACs (other than fruits and vegetables) intended for further distribution or processing (§ 117.5(j)). These comments ask whether an off-farm holding facility that strictly deals with fruit and vegetable RACs would be exempt from subpart B, but not subpart C.

Some comments assert that operations that pack RACs other than fruits and vegetables intended for further distribution or processing should be exempt from both CGMP requirements and requirements for hazard analysis and risk-based preventive controls. These comments ask us to expand the exemption from CGMP requirements for the holding or transportation of one or more RACs to include the packing of RACs (other than fruits and vegetables). These comments also ask us to include packing RACs in the exemption from subpart C for facilities solely engaged in the storage of RACs (other than fruits and vegetables) intended for further distribution or processing.

(Response 224) Under the revised “farm” definition, some operations that pack RACs will be within the “farm” definition (*i.e.*, if the farms that grow or raise the majority of the RACs own, or jointly own, a majority interest in the packing operation). Packing operations that are within the “farm” definition are exempt from the CGMP requirements (§ 117.5(k)(1)). However, the packing of

RACs is not otherwise exempt from either the CGMP requirements or the requirements for hazard analysis and risk-based preventive controls. As discussed in Response 221, the umbrella CGMPs that we are establishing in subpart B are long-standing provisions that establish basic requirements for the manufacturing, processing, packing, and holding of food to prevent adulteration.

Packing operations that are within the “farm” definition are exempt from the requirements for hazard analysis and risk-based preventive controls (because “farms” are exempt from the section 415 registration requirements for “facilities”). As discussed more fully in Response 222, the new requirements for hazard analysis and risk-based preventive controls are not “one-size-fits-all.” Although each facility subject to the rule must prepare and implement a food safety plan, the preventive controls that the facility would establish and implement would depend on the facility, the food, and the outcome of the facility’s hazard analysis. In addition, the preventive control management components that a facility would establish and implement for its preventive controls would be established as appropriate to ensure the effectiveness of the preventive controls, taking into account the nature of the preventive control and its role in the facility’s food safety system.

#### 11. Enclosed Outdoor Vessels

(Comment 225) Some comments ask us to exempt enclosed outdoor vessels from the specific CGMP provisions (such as requirements for the plant design to permit the taking of adequate precautions to protect food in outdoor bulk vessels (§ 117.20(b)(3)) and requirements for warehousing and distribution (§ 117.93)) if they are properly “risk assessed” and covered by appropriate procedures for preventing contamination, and system verification is implemented.

(Response 225) We decline this request. The long-standing CGMP requirements are comprehensive, interrelated provisions intended to prevent the adulteration of food. Specifying particular provisions that would not apply if a food establishment appropriately implements other provisions would be contrary to this comprehensive approach to food safety, in addition to being both impractical and difficult to administer. If a food establishment has appropriately determined that its procedures for preventing contamination adequately address the requirements for the safe storage of food in enclosed outdoor

vessels, it should have no difficulty demonstrating that during inspection.

#### 12. Supermarket Distribution Centers

(Comment 226) Some comments ask us to exempt supermarket distribution centers from the requirements of subpart C and instead require them to have written CGMPs. If this request is not accepted, then these comments ask us to either exempt supermarket distribution centers from the requirements of subpart C for those packaged foods not exposed to the environment (with modified requirements for unexposed, refrigerated, packaged TCS foods), or specify that there are no significant hazards for such a facility to address in a food safety plan.

(Response 226) A supermarket distribution center must register as a food facility because it holds food for human consumption and does not satisfy any of the criteria for entities that are not required to register (see § 1.226). As discussed in Response 222, the preventive controls that a facility would establish and implement would depend on the facility, the food, and the outcome of the facility's hazard analysis, and any preventive control management components associated with a facility's preventive controls would be established as appropriate to ensure the effectiveness of the preventive controls, taking into account the nature of the preventive control and its role in the facility's food safety system. In the case of a facility that is a supermarket distribution center, the facility would, as part of its evaluation, determine whether any preventive controls are necessary for unexposed, non-refrigerated packaged foods. The facility might determine that the modified requirements in § 117.206 for unexposed, refrigerated, packaged TCS foods are appropriate to apply to such foods that it holds. If so, the facility could establish its food safety plan by building on the provisions established in § 117.206.

#### 13. Local and Regional Facilities Such as Kitchen Incubators, Food Hubs, and Grower Marketing Cooperatives

(Comment 227) Some comments ask us to provide flexibility to local and regional facilities that do not qualify for an exemption from subpart C (e.g., "kitchen incubators" and farm mixed-type facilities that are subject to State or local laws). Some comments ask us to exempt (or partially exempt) food hubs, grower marketing cooperatives, "produce auctions," and similar entities. Some comments ask us not to cover facilities with less than \$25,000 in annual sales (similar to a provision

being considered under the 2013 proposed produce safety rule) or to establish a higher sales limit (i.e., \$100,000) applicable to both the human preventive controls rule and the produce safety rule.

(Response 227) We decline the requests to exempt (or partially exempt) the business models described in these comments. (See Response 213.) None of these requests describe or provide evidence that the regulatory framework associated with the business model would address all of the requirements of subparts C and G. Many of the types of facilities listed have multiple business models that conduct different types of activities. For example, USDA defines a regional food hub as "a business or organization that actively manages the aggregation, distribution, and marketing of source-identified food products primarily from local and regional producers to strengthen their ability to satisfy wholesale, retail, and institutional demand." (Ref. 50). Some food hubs have facilities at which they conduct activities, including dry and cold storage, grading, packing, labeling, and light processing (trimming, cutting, and freezing), whereas other food hubs never physically handle the product sold but instead rely on farmers and contract trucking firms to provide aggregation and transportation services (Ref. 50). Some food hubs have a farm-to-business model (e.g., selling to food cooperatives, grocery stores, institutional foodservice companies, and restaurants), while others have a farm-to-consumer model (i.e., selling directly to the consumer, e.g., through a CSA), and some are hybrids that do both (Ref. 50). Some food hubs combine produce distribution with food processing operations (shared commercial processing space, or "incubator kitchens"). Thus, some of these operations could be exempt. For example, some of these operations may fall within the revised "farm" definition (e.g., if the farms that grow or raise the majority of the RACs own, or jointly own, a majority interest in a food hub or a grower marketing cooperative and the food hub or grower marketing cooperative does not conduct any activities outside of the "farm" definition). Other operations could be exempt if they fall within the definition of "retail food establishment" (see Response 4). With respect to produce auction houses, to the extent that these operations are simply a location for buyers and sellers to meet and to sell and transfer produce and the food is not stored, we do not consider such facilities to be holding food and would

not expect them to register; therefore these operations would not be subject to the requirements of subparts C and G for hazard analysis and risk-based preventive controls.

We also decline the request not to cover facilities with less than \$25,000 or \$100,000 in annual sales. (See the discussion in Response 220, in which we declined the request to provide more exemptions for small farm mixed-type facilities and other small facilities). However, if a local or regional facility such as those described in the comments is a very small business, the facility would be subject to modified requirements (§ 117.201) rather than to the full requirements for hazard analysis and risk-based preventive controls. When such an operation is not a farm, a retail food establishment, or a very small business, the preventive controls that a facility would establish and implement would depend on the facility, the food, and the outcome of the facility's hazard analysis, and any preventive control management components associated with a facility's preventive controls would be established as appropriate to ensure the effectiveness of the preventive controls, taking into account the nature of the preventive control and its role in the facility's food safety system. (See Response 222.)

#### 14. Production of Raw Sugar

(Comment 228) Some comments ask us to exempt the production of raw sugar that is destined for refining from the requirements in subpart C for hazard analysis and risk-based preventive controls.

(Response 228) Making sugar from sugarcane or sugar beets is a low-risk activity/food combination (see § 117.5(h)), and the statutory exemption in § 117.5(h) would apply to a small or very small business that makes sugar on-farm if the only other activities it conducts outside the farm definition are the low-risk activity/food combinations in § 117.5(g) and (h).

We decline the request to extend this exemption to a small or very small business that makes sugar off-farm or to a business that is not a small or very small business (see Response 213). As discussed in Response 222, the preventive controls that such businesses would establish and implement would depend on the facility, the food, and the outcome of the facility's hazard analysis, and any preventive control management components associated with a facility's preventive controls would be established as appropriate to ensure the effectiveness of the preventive controls, taking into account

the nature of the preventive control and its role in the facility's food safety system. An off-farm facility that makes sugar from sugarcane or sugar beets can consider the findings of the section 103(c)(1)(C) RA (*i.e.*, that this is a low-risk activity/food combination) in determining whether there are any hazards requiring a preventive control. A facility that appropriately determines through its hazard analysis that there are no hazards requiring preventive controls would document that determination in its written hazard analysis but would not need to establish preventive controls and associated management components.

15. Biological Hazards in Olive Oil

(Comment 229) Some comments ask us to establish an exemption for the consideration of biological hazards such as *Salmonella* and pathogenic *E. coli* in olive oil.

(Response 229) We decline this request. The rule requires the facility to conduct a hazard analysis to determine hazards requiring a preventive control. If the facility appropriately determines through its hazard analysis that biological hazards such as *Salmonella* and pathogenic *E. coli* are not hazards requiring a preventive control in its product, then these hazards would not be addressed in the facility's food safety plan.

We expect that there will be many circumstances in which a facility appropriately determines that certain

biological, chemical, or physical hazards are not hazards requiring a preventive control that must be addressed in the food safety plan. The provisions of the rule that allow a facility to appropriately determine that a particular hazard is not a hazard requiring a preventive control in certain food products are not equivalent to an exemption from the rule. For example, a facility that appropriately determines that there are no hazards requiring a preventive control associated with its food products must document that determination in its written hazard analysis (§ 117.130(a)(2)); however, no preventive controls, including supplier verification activities, and associated management components would be required in such a situation. As discussed in Response 222, there are several types of food products for which a facility may determine that there are no hazards requiring a preventive control.

**XII. Subpart A: Comments on Proposed § 117.7—Applicability of Part 117 to a Facility Solely Engaged in the Storage of Unexposed Packaged Food**

We proposed that subpart C would not apply to a facility solely engaged in the storage of packaged food that is not exposed to the environment (proposed § 117.7(a)). We also proposed that a facility solely engaged in the storage of packaged food that is not exposed to the environment would be subject to the modified requirements that would be

established in § 117.206 of subpart D (proposed § 117.7(b)).

Some comments support these proposed provisions without change. For example, one comment expresses the view that the safety of these products would be ensured during the manufacturing process by companies that comply with the stringent requirements of the proposed rule, and no new hazards will be introduced to the food at these facilities. Other comments that support the proposed provisions ask us to clarify some aspects of the provisions (*see, e.g.*, Comment 230) or to clarify how the provisions will apply in particular circumstances (*see, e.g.*, Comment 231 and Comment 232). Other comments that support the proposed provisions ask us to broaden them (*see, e.g.*, Comment 233, Comment 234, and Comment 235).

In the following paragraphs, we discuss comments that ask us to clarify the proposed requirements or that disagree with, or suggest one or more changes to, the proposed requirements. After considering these comments, we have revised the proposed requirements as shown in table 17, with editorial and conforming changes as shown in table 52. A key conforming change that affects § 117.7 is that the final exemption is from the requirements of subpart G, as well as subpart C. As discussed in section XLII, the final rule establishes the requirements for a supply-chain program in subpart G, rather than within subpart C as proposed.

TABLE 17— REVISIONS TO THE PROPOSED APPLICABILITY OF SUBPARTS C AND D TO A FACILITY SOLELY ENGAGED IN THE STORAGE OF UNEXPOSED PACKAGED FOOD

Section	Description	Revision
117.7(b) .....	Applicability of subpart D.	Clarification that subpart D only applies to those unexposed packaged foods that require time/temperature control to significantly minimize or prevent the growth of, or toxin production by, pathogens.

(Comment 230) Some comments ask us to clarify the interplay between the proposed exemption (proposed § 117.7) and the proposed modified requirements (proposed § 117.206) to better reflect that the modified requirements would apply only to TCS foods. Some comments ask us to clarify that if a facility stores both TCS food and non-TCS food (*i.e.*, unexposed packaged food that does not require time/temperature control for safety), then the modified requirements only apply for the portion of the facility that holds the TCS foods.

(Response 230) We have revised § 117.7(b) to clarify that a facility solely engaged in the storage of unexposed

packaged food, including unexposed packaged food that requires time/temperature control to significantly minimize or prevent the growth of, or toxin production by, pathogens is subject to the modified requirements in § 117.206 of subpart D for any unexposed packaged food that requires time/temperature control to significantly minimize or prevent the growth of, or toxin production by, pathogens.

(Comment 231) Some comments ask us to revise the regulatory text to be explicit that frozen unexposed packaged food is not a TCS food subject to modified requirements.

(Response 231) We decline this request. In the 2013 proposed human preventive controls rule, we tentatively concluded that it would be rare for a frozen food to be a TCS food (78 FR 3646 at 3774), and we affirm that conclusion in this document. However, specifying in the regulatory text that a frozen food is not a TCS food would require us to conclude that a frozen food would “never” (rather than “rarely”) be a TCS food, and we lack information to support “never.”

(Comment 232) Some comments assert that a hazard analysis of the risks associated with storage of produce in vented crates would reveal no significant hazards and, thus, that even

if we do not agree that produce packaged in vented crates satisfies the criterion “not exposed to the environment,” we should exercise enforcement discretion for produce packaged in vented crates.

(Response 232) As discussed in Response 170, produce stored in vented crates is not “unexposed packaged food.” Although environmental exposure to produce packed in vented crates would be less than environmental exposure to produce packed in open crates, a vented crate can subject produce to contamination. Thus, we disagree that we should not enforce the provisions of the rule for such produce. A facility that stores produce packed in vented crates must conduct a hazard analysis and evaluate whether there are any hazards requiring a preventive control. However, as discussed in Response 222, the preventive controls that the facility would establish and implement would depend on the facility, the food, and the outcome of the facility’s hazard analysis, and any preventive control management components associated with a facility’s preventive controls would be established as appropriate to ensure the effectiveness of the preventive controls, taking into account the nature of the preventive control and its role in the facility’s food safety system. A facility that appropriately determines through its hazard analysis that there are no hazards requiring a preventive control associated with its food products would document that determination in its written hazard analysis (§ 117.130(a)(2)) but would not need to establish preventive controls and associated preventive control management components for its products.

(Comment 233) Some comments ask us to apply the exemption to storage areas of facilities that also engage in food processing activities—*e.g.*, for distributors that are engaged in limited food processing, such as cutting vegetables or packing RTE foods. These comments assert that the intent of the term “solely” is to make clear that a facility that conducts an activity subject to the exemption does not escape responsibility for complying with the requirements for hazard analysis and risk-based preventive controls when conducting activities that are not exempt. In the comment’s example, a facility that cuts vegetables or packs RTE foods would prepare and implement a food safety plan for cutting vegetables and packing RTE foods, but would not conduct a hazard analysis to determine whether there are significant hazards for storing unexposed packaged food.

(Response 233) We disagree with the comment’s interpretation of the term “solely.” The plain meaning of “solely” is only, completely, entirely; without another or others; singly; alone (Ref. 44). The facility described in the comment is not “solely” engaged in the storage of unexposed packaged food.

Such a facility must conduct a hazard analysis that addresses all activities conducted by the facility. As discussed in Response 222, the preventive controls that the facility would establish and implement would depend on the facility, the food, and the outcome of the facility’s hazard analysis, and any preventive control management components associated with a facility’s preventive controls would be established as appropriate to ensure the effectiveness of the preventive controls, taking into account the nature of the preventive control and its role in the facility’s food safety system. A facility that stores unexposed packaged food that is not a TCS food could, for example, determine that no preventive controls and associated management components would be necessary for those foods. A facility that stores unexposed refrigerated packaged TCS food could, for example, determine that preventive controls and management components patterned after the modified requirements in § 117.206 are adequate to address hazards requiring a preventive control associated with that food.

(Comment 234) Some comments ask us to allow a facility to designate a storage area as a separate facility for purposes of compliance with the requirements for hazard analysis and risk-based preventive controls. In the comments’ view, an area solely engaged in the storage of unexposed packaged food could fall within the exemption in § 117.7 even though other areas would be subject to the requirements for hazard analysis and risk-based preventive controls.

Some comments contrast our proposed approach to applying the statutory provision for facilities “solely engaged in . . . storage” with our proposed approach to applying section 418 of the FD&C Act to farm mixed-type facilities and facilities that conduct activities subject to one of our HACCP regulations. These comments point out that, for farm mixed-type facilities, we determined that section 418 applies only with respect to the activities that trigger registration (78 FR 3646 at 3705). Likewise, these comments point out that for facilities that conduct activities subject to our HACCP regulations for seafood or juice, we determined that the facilities can be exempt from the

requirements of section 418 with respect to the activities subject to those regulations but not with respect to other activities (78 FR 3646 at 3704).

(Response 234) We disagree that a designated storage area in an establishment that conducts manufacturing, processing, or packing in addition to storage can fall within the exemption for facilities “solely engaged in . . . storage.” The statute provides authority for us to exempt or modify the requirements for compliance with respect to “facilities” that are solely engaged in the storage of packaged foods that are not exposed to the environment (section 418(m) of the FD&C Act). The statute defines “facility” as a domestic facility or a foreign facility that is required to register under section 415 of the FD&C Act (section 418(o)(2) of the FD&C Act). The section 415 registration regulations define facility as “any establishment, structure, or structures under one ownership at one general physical location . . .” The comment’s interpretation that we could view “areas” of registered facilities to be “facilities that are solely engaged in . . . the storage of packaged foods that are not exposed to the environment” is inconsistent with the statutory and regulatory framework under sections 415 and 418 of the FD&C Act.

See also the discussion in Response 233 regarding how a facility that both stores unexposed packaged food and conducts activities such as food processing or packing could address the requirements for hazard analysis and risk-based preventive controls for the storage activities conducted by the facility.

(Comment 235) Some comments ask us to consider an alternative to the exemption for unexposed packaged foods when a facility conducts manufacturing, processing, packing, or holding activities in addition to storing unexposed packaged food. Specifically, these comments ask us to recognize that the minimal risks of storing unexposed packaged foods can be addressed through a combination of compliance with the modified requirements for TCS foods (if applicable) and the CGMPs in subpart B and state that doing so would be consistent with our discussion in the 2013 proposed human preventive controls rule.

(Response 235) These comments appear to suggest the outcome of a facility’s hazard analysis for storing unexposed packaged food—*i.e.*, that the only hazards requiring a preventive control are the potential for growth of pathogens in refrigerated unexposed packaged foods and that the preventive controls and preventive control

management components specified in the modified requirements for TCS food are adequate to address such hazards. It is the responsibility of the facility's preventive controls qualified individual to identify the hazards requiring a preventive control associated with the facility and the food it stores, as well as the appropriate preventive controls and preventive control management components. However, we agree that in some cases the approach suggested in these comments would be appropriate.

(Comment 236) Some comments assert that it is difficult to identify TCS foods and that the benefits of undertaking that work are unclear when existing CGMP requirements protect public health. These comments ask us to work with industry and professional organizations to develop guidance on when the modified requirements apply. Other comments ask us to specify that specific foods such as yogurt are not TCS foods and provide scientific information to support their request.

(Response 236) This document does not include guidance on whether specific foods, such as yogurt, are TCS foods. Information on whether specific foods are TCS foods is already widely available—e.g., in Annex 3, Chapter 1 (Purpose and Definitions) of the Food Code (Ref. 51) and in a report prepared for us under contract by the Institute of

Food Technologists (Ref. 52). A facility solely engaged in storage of unexposed packaged food can consult the Food Code or work with the manufacturer of the food to identify TCS food. Alternatively, such a facility could simply treat any refrigerated food as a TCS food.

Although we agree with comments that in general yogurt would not be a TCS food, whether a particular yogurt is a TCS food would depend on what is added to the yogurt. For example, in 1989 an outbreak of foodborne botulism in the United Kingdom from the consumption of yogurt containing added hazelnut conserve (puree) caused 27 illnesses and one death (Ref. 53). The hazelnut puree had not been adequately processed to prevent toxin production by *C. botulinum*. Even though this particular outbreak was not related to the question of whether yogurt is a TCS food, it demonstrates the importance of having a preventive controls qualified individual consider all hazards associated with a product to determine whether there are hazards requiring a preventive control, including temperature control.

**XIII. Subpart B: Comments on Proposed § 117.10—Personnel**

We proposed to re-establish the provisions of § 110.10 in new § 117.10

with some revisions to modernize them. Some comments agree with one or more of these proposed provisions without change. For example, some comments state that the proposed provisions for disease control are already widely practiced across the produce industry and are part of most food safety guidance and standards. Some comments that support the proposed revisions suggest alternative or additional regulatory text (see, e.g., Comment 243 and Comment 244) or ask us to clarify how we will interpret the revised provision (see, e.g., Comment 239). Other comments that support provisions that we proposed to re-establish in part 117 without change ask us to revise or clarify those provisions (see, e.g., Comment 237, Comment 238, Comment 240, and Comment 241).

In the following sections, we discuss comments that ask us to clarify the proposed provisions or that disagree with, or suggest one or more changes to, the proposed provisions, including comments on provisions that we proposed to re-establish in § 117.10 with no changes. After considering these comments, we have revised the proposed provisions as shown in table 18, with editorial and conforming changes as shown in table 52.

TABLE 18—PERSONNEL PROVISIONS

Provision	Did we propose revisions or request comment on potential revisions?	Did we get comments that disagreed with the proposed provision?	Did we modify the proposed regulatory text?
§ 117.10—Management Responsibility .....	No .....	Yes .....	Yes.
§ 117.10(a)—Disease Control .....	No .....	Yes .....	Yes.
§ 117.10(b)—Cleanliness .....	Yes .....	No .....	No.
§ 117.10(b)(1)—Outer Garments .....	Yes .....	Yes .....	No.
§ 117.10(b)(2)—Personal Cleanliness .....	No .....	No .....	No.
§ 117.10(b)(3)—Washing Hands .....	No .....	No .....	No.
§ 117.10(b)(4)—Unsecured Jewelry and Other Objects .....	Yes .....	Yes .....	No.
§ 117.10(b)(5)—Gloves .....	Yes .....	Yes .....	No.
§ 117.10(b)(6)—Hair Restraints .....	No .....	No .....	No.
§ 117.10(b)(7)—Clothing and Other Personal Belongings .....	Yes .....	Yes .....	No.
§ 117.10(b)(8)—Eating Food, Drinking Beverages, and Using Tobacco .....	Yes .....	Yes .....	Yes.
§ 117.10(b)(9)—Any Other Necessary Precautions .....	Yes .....	Yes .....	No.
§ 117.10(c)—Education and Training .....	Yes .....	Yes .....	Shifted to § 117.4 as a requirement rather than a recommendation.
§ 117.10(d)—Supervision .....	Yes .....	No .....	Shifted to § 117.4.

*A. Management Responsibility for Requirements Applicable to Personnel*

We proposed no revisions to the requirement that plant management must take all reasonable measures and precautions to ensure compliance with the provisions for disease control, cleanliness, and training.

(Comment 237) Some comments ask us to remove “all” because it is too extreme and prescriptive. These comments ask us to instead specify that the intended measures and precautions must be “adequate.”

(Response 237) We have revised the regulatory text to delete “all.” We

disagree that the term “all” in this long-standing provision is too extreme and prescriptive, but find that the term “all” is not necessary to communicate the intent of the requirement. We decline the request to add “adequate.” The intent of the requirement is to communicate our expectation that these

measures and precautions are reasonable. Other, more specific provisions that management must address specify that particular measures and precautions must be “adequate” (see § 117.10(b)(2), (3), and (4)).

*B. Proposed § 117.10(a)—Disease Control*

We proposed no revisions to the requirement that any person who, by medical examination or supervisory observation, is shown to have, or appears to have, an illness, open lesion, including boils, sores, or infected wounds, or any other abnormal source of microbial contamination by which there is a reasonable possibility of food, food-contact surfaces, or food-packaging materials becoming contaminated, must be excluded from any operations which may be expected to result in such contamination until the condition is corrected. Personnel must be instructed to report such health conditions to their supervisors.

(Comment 238) Some comments ask us to provide flexibility to not exclude from operations personnel who have an open lesion (such as boils, sores or any other infected wounds) that is covered completely using appropriate first aid materials.

(Response 238) We have revised the regulatory text to reflect flexibility such as that provided in FDA’s Food Code (Ref. 51). Under the Food Code, workers need not be excluded if an open lesion on hands and wrists, or on exposed portions of arms, is protected by an impermeable cover, and workers need not be excluded if an open lesion on other parts of the body is covered by a dry, durable, tight-fitting bandage.

*C. Proposed § 117.10(b)—Cleanliness*

1. Proposed § 117.10(b)(1)—Outer Garments

We proposed that the methods for maintaining cleanliness include wearing outer garments suitable to the operation in a manner that protects against the contamination of food, food-contact surfaces, or food-packaging materials and to protect against the cross-contact of food.

(Comment 239) Some comments ask us to clarify whether the newly proposed requirement to prevent allergen cross-contact would require a line worker to change outer garments when switching between individual food-production lines if separate major allergens are present on the food production lines.

(Response 239) The provision does not prescribe the specific methods by which wearing outer garments must

protect against allergen cross-contact and, thus, the establishment has flexibility to take appropriate steps to satisfy the requirements in the context of the establishment and the food it produces. Requiring a line worker to change outer garments when switching between individual food-production lines could be an appropriate precaution for some establishments. When a facility that is subject to the requirements for hazard analysis and risk-based preventive controls determines that it is necessary to require a line worker to change outer garments to prevent allergen cross-contact between food-production lines, the facility could decide to establish such a procedure as a food allergen control under § 117.135(c)(2).

2. Proposed § 117.10(b)(4)—Unsecured Jewelry and Other Objects

We proposed to require that the methods for maintaining cleanliness include removing all unsecured jewelry and other objects that might fall into food, equipment, or containers, and removing hand jewelry that cannot be adequately sanitized during periods in which food is manipulated by hand. If such hand jewelry cannot be removed, it may be covered by material which can be maintained in an intact, clean, and sanitary condition and which effectively protects against the contamination by these objects of the food, food-contact surfaces, or food-packaging materials.

(Comment 240) Some comments ask us to modify the requirements to provide that they only apply as appropriate to each operation and recommend that jewelry be removed when the company’s hazard analysis determines that it is a hazard. These comments acknowledge that jewelry is a physical hazard in some instances, but assert that objects such as jewelry are not a physical hazard for operations conducted on many medium- to large-sized RACs (e.g., melons, apples, oranges, potatoes).

(Response 240) We decline this request. We included this long-standing provision of the umbrella CGMPs during our last revision of the food CGMPs based on public comments during that rulemaking (51 FR 22458 at 22463). The provision provides flexibility for an establishment to do what is appropriate in the context of its own operations—e.g., by limiting some requirements to “unsecured” jewelry and by providing options to cover hand jewelry during periods in which food is manipulated by hand. Although a facility could decide to also establish preventive controls for jewelry as a physical hazard following a hazard analysis, such

preventive controls would be distinct from the more general CGMP requirements in this provision.

3. Proposed § 117.10(b)(5)—Gloves

We proposed that the methods for maintaining cleanliness include maintaining gloves, if they are used in food handling, in an intact, clean, and sanitary condition. We also proposed to delete a recommendation that gloves should be of an impermeable material. Although some comments ask us to retain this nonbinding recommendation, as discussed in Response 67 we are deleting those non-binding recommendations of part 110 that we are not establishing as requirements.

4. Proposed § 117.10(b)(7)—Clothing and Other Personal Belongings

We proposed to require that the methods for maintaining cleanliness include storing clothing or other personal belongings in areas other than where food is exposed or where equipment or utensils are washed.

(Comment 241) Some comments ask us to specify that the requirements only apply to “extra” clothing. These comments express concern that the requirement otherwise might be interpreted to mean that no personal clothing is allowed in these areas (e.g., that employees are permitted to wear only company-issued uniforms).

(Response 241) We decline this request. This long-standing provision of the umbrella GMPs has been in place for decades. The comments do not provide any examples of how we have interpreted this provision in the past to mean that employees must wear company-issued uniforms.

5. Proposed § 117.10(b)(8)—Eating Food, Drinking Beverages, and Using Tobacco

We proposed to require that the methods for maintaining cleanliness include confining the following to areas other than where food may be exposed or where equipment or utensils are washed: eating food, drinking beverages, or using tobacco.

(Comment 242) Some comments note that the provision would no longer require that chewing gum be confined to areas other than where food may be exposed or where equipment or utensils are washed. These comments ask us whether this omission was intentional, or whether we are simply considering that requirements applicable to “chewing gum” are covered by those for “eating food.” Some comments state that it would not be immediately obvious to many laypersons as to whether the chewing of gum is included in “eating food.”

(Response 242) We agree that removing the phrase “chewing gum” from this provision could make it unclear that this long-standing requirement regarding chewing gum still applies and we have revised the proposed regulatory text to retain the express requirement regarding chewing gum. As the comments point out, the statute includes chewing gum in its definition of “food” (see section 201(f) of the FD&C Act). However, in this long-standing provision, the term “chewing gum” is used to mean “the act of chewing” rather than to refer to the gum itself.

(Comment 243) Some comments regarding processes conducted on RACs ask us to modify the regulatory text to distinguish “drinking beverages” from “drinking water.” These comments note that this provision is of concern to their industry because drinking water needs to be readily available to workers.

(Response 243) We decline this request. We acknowledge that workers may need ready access to drinking water when conducting activities on RACs, particularly in an environment that is largely outdoors (such as in an off-farm packinghouse that has a roof but is otherwise largely unenclosed). However, this provision does not apply to on-farm activities such as harvesting of RACs. During packing activities

covered by this rule, workers must move away from the packing operations to get a drink. The establishment can make drinking water available in a designated area that is nearby, and provide multiple designated areas when appropriate to make drinking water readily available to all workers.

6. Proposed § 117.10(b)(9)—Any Other Necessary Precautions

We proposed that the methods for maintaining cleanliness include taking any other necessary precautions to protect against contamination of food, food-contact surfaces, or food-packaging materials with microorganisms or foreign substances (including perspiration, hair, cosmetics, tobacco, chemicals, and medicines applied to the skin) and to protect against cross-contact of food.

(Comment 244) Some comments ask us to specify that the provision applies to “medicines or other products” applied to the skin.

(Response 244) We decline this request. The comment does not explain what “other products” applied to the skin are not already covered by “cosmetics” and “medicines.” For example, powders and lotions applied as “make-up” generally would be cosmetics and products such as

sunscreen generally are classified as over-the-counter medicines.

**XIV. Subpart B: Comments on Proposed § 117.20—Plant and Grounds**

We proposed to re-establish the provisions of § 110.20 in new § 117.20 with some revisions to modernize them. Some comments agree with one or more of these proposed revisions without change. Some comments that support the proposed revisions suggest alternative or additional regulatory text (see, e.g., Comment 251 and Comment 256) or ask us to clarify how we will interpret the revised provision (see, e.g., Comment 253). Other comments that support provisions that we proposed to re-establish in part 117 without change ask us to revise or clarify those provisions (see, e.g., Comment 246, Comment 247, Comment 248, Comment 250, and Comment 254).

In the following sections, we discuss comments that ask us to clarify the proposed provisions or that disagree with, or suggest one or more changes to, the proposed provisions, including comments on provisions that we proposed to re-establish in § 117.20 with no changes. After considering these comments, we have revised the proposed provisions as shown in table 19, with editorial and conforming changes as shown in table 52.

TABLE 19—PROVISIONS FOR PLANT AND GROUNDS

Provision	Did we propose revisions or request comment on potential revisions?	Did we get comments that disagreed with the proposed provision?	Did we modify the proposed regulatory text?
§ 117.20(a)—Grounds	No	Yes	No.
§ 117.20(a)(1)—Equipment, Litter, Waste, Weeds, and Grass	No	Yes	No.
§ 117.20(a)(2)—Roads, Yards, and Parking Lots	No	No	No.
§ 117.20(a)(3)—Draining Areas	No	No	No.
§ 117.20(a)(4)—Operating Systems for Waste Treatment and Disposal	No	Yes	Yes.
§ 117.20(a)(5)—Grounds Not Under the Operator’s Control	Yes	Yes	Yes.
§ 117.20(b)—Plant Construction and Design	Yes	Yes	No.
§ 117.20(b)(1)—Space for Equipment and Materials	No	Yes	Yes.
§ 117.20(b)(2)—Food Safety Controls, Operating Practices, or Design	Yes	Yes	Yes.
§ 117.20(b)(3)—Outdoor Bulk Vessels	Yes	Yes	Yes.
§ 117.20(b)(4)—Plant Construction	Yes	No	No.
§ 117.20(b)(5)—Lighting	No	Yes	Yes.
§ 117.20(b)(6)—Ventilation	Yes	Yes	Yes.
§ 117.20(b)(7)—Screening or Other Protection	No	Yes	No.

**A. Proposed § 117.20(a)—Grounds**

**1. Proposed § 117.20(a)—Management Responsibility for Maintaining Grounds**

We proposed no revisions to the requirement that the grounds about a food plant under the control of the operator must be kept in a condition

that will protect against the contamination of food.

(Comment 245) Some comments ask us to specify that the requirements do not apply to test/pilot kitchens.

(Response 245) We decline this request. An establishment must have control of the grounds under its control regardless of the specific food or amount

of food being produced, because litter, waste, weeds, and grass can all attract and harbor pests, and the first step for pest control in the plant is to avoid attracting pests.

## 2. Proposed § 117.20(a)(1)—Equipment, Litter, Waste, Weeds, and Grass

We proposed no revisions to the requirement that the methods for adequate maintenance of grounds include properly storing equipment, removing litter and waste, and cutting weeds or grass within the immediate vicinity of the plant buildings or structures that may constitute an attractant, breeding place, or harborage for pests.

(Comment 246) Some comments ask us to specify “immediately adjacent to” rather than “the immediate vicinity.” These comments also ask us to provide guidance on the importance of pollinator habitat so that inspectors will view such areas within the greater context of the farm and not immediately see that the farm is out of compliance.

(Response 246) We decline the request to modify the regulatory text of this long-standing provision. We note that a “farm” is not subject to the CGMP requirements of subpart B (see § 117.5(k)). We do not see that the suggested modification would provide any specific information to investigators who are inspecting a food establishment (such as a farm mixed-type facility or packing shed) that has pollinator habitat near plant buildings or structures. We expect that investigators will adapt their inspection programs to account for such circumstances and food establishments will take steps to prevent weeds or grass in a pollinator habitat from leading to problems with pests in the plant.

## 3. Proposed § 117.20(a)(4)—Operating Systems for Waste Treatment and Disposal

We proposed no revisions to the requirement that the methods for adequate maintenance of grounds must include operating systems for waste treatment and disposal in an adequate manner so that they do not constitute a source of contamination in areas where food is exposed. If the plant grounds are bordered by grounds not under the operator’s control and not maintained in the manner described in § 117.20(a)(1) through (a)(3), care must be exercised in the plant by inspection, extermination, or other means to exclude pests, dirt, and filth that may be a source of food contamination.

(Comment 247) Some comments assert that the term “adequate” has been added to this provision and is ambiguous when used to describe the way in which “operating systems for waste treatment and disposal” must be managed, even though that term is defined in the rule. These comments ask us to clarify what constitutes

“adequate” for the purpose of this provision, such as whether it requires compliance with local plumbing codes.

(Response 247) The term “adequate” has been in § 110.20(a) and (a)(4) since 1986 (51 FR 22477). This long-standing provision addresses matters under FDA’s jurisdiction rather than local plumbing codes. An example of waste disposal under FDA’s jurisdiction is an operating system for water disposal. Such an operating system would be inadequate if it allowed water to accumulate on the facility grounds and become an attractant for pests.

(Comment 248) Some comments ask us to clarify how the requirements in § 117.20(a) would apply to potential problems associated with neighboring grounds. Other comments note that we proposed to address potential problems with neighboring grounds within the final sentence of this provision (proposed § 117.20(a)(4)) and suggest editorial changes to more clearly identify the requirements regarding grounds under the control of a neighboring entity.

(Response 248) These provisions do not require an establishment to take action on its neighbor’s property to protect against contamination, but do require an establishment to be aware of any problems that may affect its own grounds. For example, if a neighbor’s grass is long, the establishment is not required to mow the neighbor’s grass, but if the long grass in the neighbor’s property provides a breeding ground for pests, the establishment needs to be aware of this potential for contamination and may need to take mitigating actions (e.g., enhanced pest control in the bordering areas).

We have clarified the proposed requirements by redesignating the final sentence of proposed § 117.20(a)(4) as § 117.20(a)(5) and specifying that the requirements of newly designated § 117.20(a)(5) apply if the plant grounds are bordered by grounds not under the operator’s control and not maintained in the manner described in § 117.20(a)(1) through (a)(4) (rather than in § 117.20(a)(1) through (a)(3)).

## B. Proposed § 117.20(b)—Plant Construction and Design

### 1. Proposed § 117.20(b)—Suitability of Plant Construction and Design

We proposed that the plant buildings and structure must be suitable in size, construction, and design to facilitate maintenance and sanitary operations for food-production purposes (i.e., manufacturing, processing, packing, and holding).

(Comment 249) Some comments ask us to specify that the requirements for suitability of plant construction and design apply only where the potential for contamination exists.

(Response 249) We decline this request. A plant requires suitable construction and design regardless of the specific potential for contamination at any particular location in the plant. Each of the seven more specific provisions governed by § 117.20(b) adds the context that the requirements are directed to what is “adequate” (e.g., adequate space, adequate precautions, and adequate cleaning). The defined term “adequate” provides context that the purpose of the requirements for plant construction and design are related to public health.

### 2. Proposed § 117.20(b)(1)—Placement of Equipment and Storage of Materials

We proposed no revisions to the requirement that the plant must provide sufficient space for such placement of equipment and storage of materials as is necessary for the maintenance of sanitary operations and the production of safe food.

(Comment 250) Some comments assert that the phrase “maintenance of sanitary operations” is unclear because it does not clearly communicate that maintenance of equipment and the facility is necessary for the production of safe food. These comments ask us to revise the provision to specify that the plant must provide sufficient space for such placement of equipment and storage of materials as is necessary for maintenance, sanitary operations, and the production of safe food.

(Response 250) We agree that the suggested revision adds clarity and have modified the provision as requested. The revised requirement is consistent with the governing paragraph in § 117.20(b), which clearly addresses both maintenance and sanitary operations.

### 3. Proposed § 117.20(b)(2)—Reduce Potential for Contamination and Allergen Cross-Contact Through Adequate Food Safety Controls and Operating Practices or Effective Design

We proposed that the plant must permit the taking of proper precautions to reduce the potential for contamination of food, food-contact surfaces, or food-packaging materials with microorganisms, chemicals, filth, and other extraneous material, and to reduce the potential for cross-contact. The potential for cross-contact and contamination may be reduced by adequate food safety controls and operating practices or effective design,

including the separation of operations in which cross-contact and contamination are likely to occur, by one or more of the following means: Location, time, partition, air flow, enclosed systems, or other effective means.

(Comment 251) Some comments ask us to specify both air flow systems and dust control systems as examples of separation of operations in which allergen cross-contact and contamination are likely to occur.

(Response 251) We agree that both air flow systems and dust control systems are appropriate examples of separation of operations and have added these examples as requested.

#### 4. Proposed § 117.20(b)(3)—Food in Outdoor Bulk Vessels

We proposed that the plant must permit the taking of proper precautions to protect food in outdoor bulk vessels by any effective means, including using protective coverings, controlling areas over and around the vessels to eliminate harborage for pests, checking on a regular basis for pests and pest infestation, and skimming fermentation vessels.

(Comment 252) Some comments express concern about applying these provisions to the transport of large RACs such as watermelons and assert that there would be no food safety advantage to doing so after the RACs had spent the growing season in an uncovered environment.

(Response 252) The comments are mistaken about these requirements, which relate to installed bulk vessels such as outdoor tanks, silos, etc. Moreover, this section addresses the construction and design of the plant, not transportation. To make this clearer, we have revised the provision to specify that it applies to “installed outdoor bulk vessels.”

(Comment 253) Some comments ask us to clarify that the requirements do not apply to open containers of RACs that are subject to further processing. Other comments assert that lugs, totes, corrugated bins, and harvest containers used to hold fruit are not bulk vessels that are subject to the provision. The comments explain that these containers are designed and built to be open at the top, with air holes on the sides and bottom that provide an adequate air flow to the fruit.

(Response 253) The requirement applies to installed bulk vessels, not containers (including lugs, totes, corrugated bins, and harvest containers generally) that are delivered to a food establishment for packing or processing. (See discussion in Response 252.) Thus,

the provision does not preclude the use of such containers. Although the provision specifies the use of protective coverings, it does so only as an example of an effective means of precautions to protect food held in outdoor vessels. Other specified examples of precautions to protect food held in outdoor bulk vessels include controlling areas over and around the vessels to eliminate harborage for pests, and checking on a regular basis for pests and pest infestation. Such measures to protect against pests are appropriate when food such as fruit is held in outdoor containers. (See also Response 327.)

We agree that the measures taken by the establishment are those applicable to public health protection. To make this clearer, we have revised the provision to refer to “adequate precautions” rather than “proper precautions,” because the defined term “adequate” focuses on public health.

#### 5. Proposed § 117.20(b)(5)—Lighting

We proposed no revisions to the requirement that the plant must provide adequate lighting in hand-washing areas, dressing and locker rooms, and toilet rooms and in all areas where food is examined, processed, or stored and where equipment or utensils are cleaned; and provide safety-type light bulbs, fixtures, skylights, or other glass suspended over exposed food in any step of preparation or otherwise protect against food contamination in case of glass breakage.

(Comment 254) Some comments ask us to add that the plant must provide adequate lighting in areas where food is packed and to substitute the term “shatter-resistant” for the term “safety-type.”

(Response 254) We have revised the provision to specify that it applies to areas in the plant where food is examined, manufactured, processed, packed, or held. Doing so makes the terms in this provision consistent with terms used throughout the CGMPs (78 FR 3646 at 3692). We also have substituted the term “shatter-resistant” for the term “safety-type.” “Shatter-resistant” is a more modern term describing the safety features that are specified in the provision.

#### 6. Proposed § 117.20(b)(6)—Ventilation

We proposed that a plant must provide adequate ventilation or control equipment to minimize odors and vapors in areas where they may contaminate food; and locate and operate fans and other air-blowing equipment in a manner that minimizes the potential for contaminating food-contact surfaces and for cross-contact.

(Comment 255) Some comments ask us to specify “where necessary” to modify “adequate.”

(Response 255) We decline this request because “where necessary” is captured by “is needed” in the long-standing definition of “adequate.”

(Comment 256) Some comments ask us to specify that the provision requires minimizing dust and that the applicable areas include areas where dust could cause allergen cross-contact.

(Response 256) We agree that it is important to minimize dust (e.g., dust from milk powder that could be a source of allergen cross-contact) and have modified the provision as requested.

#### 7. Proposed § 117.20(b)(7)—Screening

We proposed no revisions to the requirement that the plant must provide, where necessary, adequate screening or other protection against pests.

(Comment 257) Some comments ask us to add examples of adequate screening, such as by window screens, door sweeps, gap sealant, or other appropriate measures.

(Response 257) We decline this request. Although the examples suggested by the comment appear to be acceptable, examples of screening are not necessary in this long-standing requirement.

### XV. Subpart B: Comments on Proposed § 117.35—Sanitary Operations

We proposed to re-establish the provisions of § 110.35 in new § 117.35 with some revisions to modernize them. Some comments agree with one or more of these proposed provisions without change. Some comments that support the proposed revisions suggest alternative or additional regulatory text (see, e.g., Comment 258, Comment 261, Comment 263, Comment 269, Comment 272, and Comment 273) or ask us to clarify how we will interpret the revised provision (see, e.g., Comment 260, Comment 267, Comment 268, and Comment 270). We also proposed to delete current § 110.35(d)(5) (requirements for sanitizing agents) because it would be redundant with another proposed provision (proposed § 117.35(b)(1)). We received no comments that disagreed with this proposed deletion and are not re-establishing current § 110.35(d)(5) in part 117.

In the following sections, we discuss comments that ask us to clarify the proposed provisions or that disagree with, or suggest one or more changes to, the proposed provisions. After considering these comments, we have revised the proposed provisions as

shown in table 20, with editorial and conforming changes as shown in table 52.

TABLE 20—PROVISIONS FOR SANITARY OPERATIONS

Provision	Did we propose revisions or request comment on potential revisions?	Did we get comments that disagreed with the proposed provision?	Did we modify the proposed regulatory text?
§ 117.35(a)—General Maintenance .....	Yes .....	Yes .....	Yes.
§ 117.35(b)(1)—Substances Used in Cleaning and Sanitizing .....	Yes .....	Yes .....	Yes.
§ 117.35(b)(2)—Storage of Toxic Materials .....	Yes .....	Yes .....	No.
§ 117.35(c)—Pest Control .....	Yes .....	Yes .....	Yes.
§ 117.35(d)—Sanitation of Food-Contact Surfaces .....	Yes .....	Yes .....	No.
§ 117.35(d)(1)—Food-Contact Surfaces Used for Manufacturing/Processing or Holding .....	Yes .....	Yes .....	Yes.
§ 117.35(d)(2)—Wet Cleaning .....	Yes .....	Yes .....	Yes.
§ 117.35(d)(3)—Single-Service Articles .....	Yes .....	Yes .....	Yes.
§ 117.35(e)—Sanitation of Non-Food-Contact Surfaces .....	Yes .....	Yes .....	Yes.
§ 117.35(f)—Storage and Handling of Cleaned Portable Equipment and Utensils .....	Yes .....	Yes .....	No.

*A. Proposed § 117.35(a)—General Maintenance*

We proposed that buildings, fixtures, and other physical facilities of the plant must be maintained in a sanitary condition and must be kept in repair sufficient to prevent food from becoming adulterated. Cleaning and sanitizing of utensils and equipment must be conducted in a manner that protects against cross-contact and contamination of food, food-contact surfaces, or food packaging materials.

(Comment 258) Some comments ask us to specify that buildings, fixtures, and other physical facilities of the plant must be maintained in a “clean” condition in addition to a “sanitary” condition.

(Response 258) We have revised the requirement as requested. Doing so is consistent with other provisions of subpart B that specify clean and sanitary conditions (e.g., the personnel cleanliness provisions in § 117.10(b)(4) and (5)), including the requirements for sanitary operations (see the requirements for substances used in cleaning and sanitizing in § 117.35(b)(1) and the requirements for sanitation of food-contact surfaces in § 117.35(d)).

(Comment 259) Some comments ask us to qualify the level of sanitation required for different areas of the plant because the degree of sanitation required for a warehouse or utility room is different from the degree of sanitation required for a processing room.

(Response 259) We decline this request. The requirement is a long-standing provision that has been used in this context for decades. The comments do not provide any examples of how we have interpreted this provision in the past in a manner that does not

acknowledge the appropriate degree of sanitation required in different areas of a plant. Importantly, however, the fact that the degree of sanitation may be different does not mean that it could be appropriate, for example, for pests to be present in areas, like utility rooms, that may not need the same degree of sanitation as a processing room.

(Comment 260) Some comments assert that by its nature, the operations of some facilities generate dust and debris. For example, although equipment such as conveyors and screens used for hulling and shelling almonds can be cleaned before use, as soon as operations begin dust will accumulate on the surfaces of the equipment. Some comments ask us to clarify that the intent of the CGMP requirements for sanitary operations is to ensure that equipment is clean prior to use, with the understanding that once operations commence, dust will accumulate and that the presence of this type of dust and debris does not necessarily mean that sanitation is not being regularly conducted.

(Response 260) We agree that the intent of the CGMP requirements for sanitary operations is to ensure that equipment is clean prior to use. However, the fact that dust and debris can accumulate during some production operations does not excuse the establishment from taking appropriate steps to prevent food from becoming contaminated. The timing and extent of such steps would depend on the nature of the food and the production operation.

*B. Proposed § 117.35(b)—Substances Used in Cleaning and Sanitizing; Storage of Toxic Materials*

1. Proposed § 117.35(b)(1)—Cleaning Compounds and Sanitizing Agents

We proposed that cleaning compounds and sanitizing agents used in cleaning and sanitizing procedures must be free from undesirable microorganisms and must be safe and adequate under the conditions of use. We also proposed that mechanisms to comply with provisions related to cleaning compounds and sanitizing agents must be safe and effective and provided examples of ways to achieve such compliance (78 FR 3646 at 3721). Only the toxic materials listed in this provision may be used or stored in a plant where food is processed or exposed.

(Comment 261) Some comments ask us to specify that “Cleaning and sanitizing agents used on food-contact surfaces must contain only ingredients which are generally recognized as safe or are approved in § 178.1010 for use in cleaning and sanitizing food-contact surfaces” because this information will be useful to processors who may be unaware of the specific kinds of substances approved for food-contact surfaces. Other comments ask us to specify that residual levels of cleaning and sanitizing agents which are generally recognized as safe or are approved for use on food-contact surfaces are permissible.

(Response 261) We decline these requests. Requirements such as those applicable to substances added to food or substances used in cleaning and sanitizing food-contact surfaces are available elsewhere in our regulations and it is neither practical nor necessary

to use the CGMP requirements of part 117 as a means to communicate some or all of these other requirements. For example, the manufacturer of a food product must also comply with food labeling regulations ranging from declaration of ingredients (§ 101.4) to health claims (part 101, subpart E).

## 2. Proposed § 117.35(b)(2)— Identification and Storage of Toxic Materials

We proposed that toxic cleaning compounds, sanitizing agents, and pesticide chemicals must be identified, held, and stored in a manner that protects against contamination of food, food-contact surfaces, or food-packaging materials. We also proposed to remove a recommendation for following all relevant regulations promulgated by other Federal, State, and local government agencies for the application, use, or holding of toxic cleaning compounds, sanitizing agents, and pesticides.

(Comment 262) Some comments ask us to specify that we require that the compounds, agents, and pesticides be used according to the manufacturer's instructions.

(Response 262) We decline this request. Such a recommendation is more properly addressed by the applicable Federal, State, and local government agencies. See the discussion at 78 FR 3646 at 3721.

## C. Proposed § 117.35(c)—Pest Control

We proposed that pests must not be allowed in any area of a food plant. Guard or guide dogs may be allowed in some areas of a plant if the presence of the dogs is unlikely to result in contamination of food, food-contact surfaces, or food-packaging materials. Effective measures must be taken to exclude pests from the manufacturing, processing, packing, and holding areas and to protect against the contamination of food on the premises by pests. The use of insecticides or rodenticides is permitted only under precautions and restrictions that will protect against the contamination of food, food-contact surfaces, and food-packaging materials.

(Comment 263) Some comments ask us to specify “pest-detection” dogs in addition to guard and guide dogs because the use of animals to detect pests is widespread in the professional pest management industry for concealed and difficult to find pests. Comments assert that like guard and guide dogs, detection dogs are well trained and should be permissible in areas of the plant where the presence of the dog is unlikely to result in contamination of

the food, food-contact surfaces or food-packaging materials.

Other comments ask us to specify that pests must not be allowed in any area of a food plant “where appropriate” or “where the potential for contamination exists.” Other comments assert that animals should be excluded from all areas that are used by production or packaging employees or that communicate with food processing, packing, or storage areas. Some comments ask us to clarify whether this provision includes administrative offices, cafeterias, and other rooms that are not directly involved in the processing, packing, or holding of food because the provision applies to “any area of a food plant.”

(Response 263) We have revised the regulatory text to account for “pest-detection dogs.” However, we have not otherwise modified the regulatory text of this long-standing provision as a result of these comments. Areas of the food plant (such as a cafeteria) that are not directly involved with production may nonetheless be a source of contamination (e.g., if there are pests in that area). We have long provided that specified types of dogs may be allowed in some areas of a plant provided that the presence of the dogs is unlikely to result in contamination, and the comments provide no basis for why this qualified exception is no longer appropriate.

(Comment 264) Some comments ask us to specify that insecticides and rodenticides are types of pesticides and that the use of these substances is permitted in accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) label precautions and restrictions.

(Response 264) We have revised the regulatory text to specify the “use of pesticides” rather than the “use of insecticides and rodenticides” to use the broader term “pesticides.” We also modified the regulatory text to clarify that the restrictions on use of pesticides is when the pesticides are used “to control pests.” We made this modification because we are aware that some food processing processes (such as fumigating almonds) involve treating food with substances that are classified as “pesticides.” Without this modification, the provision could mistakenly appear to prevent establishments from conducting such processes.

We decline to modify the text to account for FIFRA label precautions and restrictions. See (Response 262).

(Comment 265) Some comments express concern that the phrases “must not be allowed” and “exclude” suggest

that it is always possible to prevent all types of pests. Some comments assert that it is not always possible to prevent all types of pests, especially on farms and in areas where pests are prevalent because of the presence of conditions over which the food manufacturer has no control. Some comments assert that a food establishment should be required to take all reasonable measures to exclude pests, but an outright “exclude” is unrealistic.

(Response 265) The requirements apply to activities conducted in a plant and do not apply to activities that are within the “farm” definition, such as harvesting RACs and on-farm packing of RACs. We disagree that effective measures cannot be taken to exclude pests from a plant that is fully enclosed. When a plant is only partially enclosed (e.g., a partially enclosed area that processes seafood taken off a fishing vessel, or a partially enclosed building on an off-farm establishment that packs RACs), we would interpret the provision in a manner consistent with the provisions of previous guidance, such as our 2005 “Guide to Produce Farm Investigations” and the final provisions of the produce safety rule. We are not modifying the requirement to incorporate this interpretation because pest control in buildings that are only partially enclosed will be a concern for only a small percentage of establishments subject to subpart B.

## D. Proposed § 117.35(d)—Sanitation of Food-Contact Surfaces

We proposed that all food-contact surfaces, including utensils and food-contact surfaces of equipment, must be cleaned as frequently as necessary to protect against cross-contact and contamination of food.

(Comment 266) Some comments ask us to specify that all food-contact surfaces must also be sanitized.

(Response 266) We decline this request. These long-standing requirements identify specific circumstances when food-contact surfaces must be sanitized (see § 117.35(d)(2), which specifies circumstances when food-contact surfaces must be sanitized when used in wet processing operations). The comment provided no basis for why food-contact surfaces must be sanitized when they will be used in manufacturing/processing or holding low-moisture food or why food-contact surfaces must be sanitized when used in wet processing operations other than the circumstances specified in § 117.35(d)(2). There are some situations in which food-contact surfaces do not need to be sanitized. For example, raw

materials and other ingredients for processing may be held in clean containers prior to processing with steps lethal to microorganisms; sanitizing such containers is not necessary for the production of safe food.

(Comment 267) Some comments ask us to clarify that we are not requiring an absolutely allergen-free environment, but rather that the expectation is that the manufacturer will take steps to identify potential sources of allergen cross-contact and implement preventive measures. Some comments ask us to also clarify that dedicated lines or equipment are not required for effective preventive control of food allergens. Some comments discuss practical difficulties that arise when balancing the need to control microorganisms such as *Salmonella* in chocolate and low-moisture confectionary products (through procedures such as dry cleaning) with the control of allergens (which may be controlled better when wet cleaning procedures are used).

(Response 267) See also the discussion of food allergen controls in Response 429. This rule does not establish a particular standard for preventing allergen cross-contact. In general, when we do establish a standard we avoid “absolute” standards such as the “absolutely allergen-free” standard mentioned by the comment. Likewise, the rule does not require the use of dedicated lines or equipment for effective prevention of allergen cross-contact. As the comments suggest, the intent of the requirement is for the manufacturer to take steps to identify potential sources of allergen cross-contact and implement preventive measures.

(Comment 268) Some comments ask us to clarify that the use of advisory label statements is appropriate when allergen cross-contact has been reduced to the greatest extent possible, but cannot be eliminated with certainty.

(Response 268) See Response 434 for a discussion about the use of advisory label statements.

*E. Proposed § 117.35(d)(1)—Food-Contact Surfaces Used for Manufacturing/Processing or Holding*

We proposed that food-contact surfaces used for manufacturing/processing or holding low-moisture food must be in a clean, dry, sanitary condition at the time of use. When the surfaces are wet-cleaned, they must, when necessary, be sanitized and thoroughly dried before subsequent use.

(Comment 269) Some comments ask us to specify “packing” for clarity and completeness.

(Response 269) We have revised the provision to specify that it applies to food-contact surfaces used for manufacturing, processing, packing, or holding low-moisture food. Doing so makes the terms in this provision consistent with terms used throughout the CGMPs (78 FR 3646 at 3692).

(Comment 270) Some comments ask us to clarify that the proposed requirement to maintain food-contact surfaces in a sanitary condition is not a requirement to sanitize all product contact surfaces. These comments also ask us to specifically allow the continued use of cleaning methods based on a risk assessment, including dry cleaning with no sanitizing step. Some comments ask us to clarify that “sanitary condition” is not synonymous with “sanitized” from an antimicrobial standpoint.

(Response 270) See Response 266. This provision does not require that all product contact surfaces be sanitized and, thus, it is not necessary to specify that dry cleaning methods with no sanitizing step are acceptable in certain circumstances. We do not consider “sanitary condition” to be synonymous with “sanitized.” We consider “sanitary condition” to be a state of cleanliness. Terms such as “sanitize” and “sanitizing” are associated with the reduction of microorganisms.

(Comment 271) Some comments ask us to specify different requirements for food-contact surfaces used during different stages of manufacturing/processing or holding. These comments explain that the provision does not accommodate initial processing steps prior to moisture removal where food-contact surfaces will be exposed to moist (non-dry) conditions. These comments also explain that the provision also does not recognize that food-contact surfaces may not appear to be “sanitary” when raw materials handled at initial processing steps have not yet undergone subsequent processes designed to eliminate microorganisms of public health concern. Some comments ask us to specify that food-contact surfaces only need to be clean and sanitary “before use and after any interruption during which the food-contact surfaces may have become contaminated.” Comments also ask us to specify that “finished product low-moisture food-contact surfaces must be maintained in a clean, dry, and sanitary condition.”

(Response 271) We decline these requests. This long-standing provision has been used in this context for decades. The full requirements for sanitation of food-contact surfaces (§ 117.35(d), (d)(1), and (d)(2)) address

both processing of low-moisture foods and wet processing. It is not practical to describe all variations of complex manufacturing scenarios that may involve both wet processing and low-moisture foods. Instead, we expect both industry and regulators to appropriately apply the specific requirements associated with the sanitary condition of food-contact surfaces during such complex manufacturing scenarios. The comments do not provide any examples of how we have interpreted this provision in the past in a way that does not accommodate manufacturing processes such as those it describes.

(Comment 272) Some comments ask us to specify that food-contact surfaces used for manufacturing/processing or holding low-moisture food be in a clean, dry, sanitary condition “prior to use or the start of production” instead of “at time of use” to more accurately reflect the reality of food processing. Some comments express concern that properly cleaned and sanitized food-contact surfaces begin to accumulate small dust particles on the surface of conveyors, sizing screens, and other equipment surfaces as soon as operations commence. These comments assert that it is unrealistic to keep the equipment in a clean, dry, sanitary condition during the entire operation.

(Response 272) We have revised the regulatory text to specify that the requirement applies “before use.” We agree that “before use” more accurately describes the intent of the requirement.

*F. Proposed § 117.35(d)(2)—Wet Cleaning*

We proposed that in wet processing, when cleaning is necessary to protect against cross-contact and the introduction of microorganisms into food, all food-contact surfaces must be cleaned and sanitized before use and after any interruption during which the food-contact surfaces may have become contaminated. Where equipment and utensils are used in a continuous production operation, the utensils and food-contact surfaces of the equipment must be cleaned and sanitized as necessary.

(Comment 273) Some comments ask us to specify that this requirement applies when cleaning is necessary to protect against allergen cross-contact or the introduction of microorganisms into food, not only when both conditions are satisfied.

(Response 273) We have revised the regulatory text to specify “necessary to protect against allergen cross-contact or the introduction of microorganisms into food.”

*G. Proposed § 117.35(d)(3)—Single-Service Articles*

We proposed that single-service articles (such as utensils intended for one-time use, paper cups, and paper towels) should be stored in appropriate containers and must be handled, dispensed, used, and disposed of in a manner that protects against cross-contact and contamination of food, food-contact surfaces, or food-packaging materials. We also requested comment on whether to require, rather than recommend, that single-service articles be stored in appropriate containers (78 FR 3646 at 3721).

(Comment 274) Comments are mixed regarding whether to require, rather than recommend, that single-service articles be stored in appropriate containers. Some comments ask us to keep this provision as a recommendation, whereas other comments ask us to change this recommendation to a requirement. One comment asking us to retain the provision as a recommendation asserts that these practices have never resulted in a food safety risk.

Other comments ask us to specify that “single-service articles must be handled in a manner that protects against allergen cross-contact and contamination of food.” These comments assert that the proposed use of “must” and “appropriate” in the same sentence will lead to inconsistency in determining what is “appropriate” for each individual situation. In addition, the comments assert that the common definition of “handling” encompasses “appropriate storage, dispensing, usage, and disposal.”

(Response 274) We have decided to establish this provision as a requirement rather than as a recommendation. Articles used in the manufacturing, processing, packing, or holding of food must not cause allergen cross-contact or contamination of food, food-contact surfaces, or food-packaging materials, regardless of whether the articles are single-service or would be used multiple times.

We have revised the regulatory text to accept some, but not all, of the suggestions in these comments. We deleted “in appropriate containers” so as not to prescribe a specific mechanism for complying with the requirement. We also deleted “dispensed” and “used” because we agree that these terms are captured by the term “handled.” We have not deleted “stored” because other provisions of these long-standing CGMPs refer to both storage and handling (see § 117.35(f)) and, thus, we

have not previously considered that the term “handling” includes “storage” in this context. See the regulatory text for the final provision containing all of these modifications.

*H. Proposed § 117.35(e)—Sanitation of Non-Food-Contact Surfaces*

We proposed that non-food-contact surfaces of equipment used in the operation of a food plant should be cleaned in a manner and as frequently as necessary to protect against cross-contact and contamination of food, food-contact surfaces, and food-packaging materials. We also requested comment on whether to establish these recommendations as requirements (78 FR 3646 at 3722).

(Comment 275) Some comments ask us to change this recommendation to a requirement to prevent the creation of insanitary conditions and the adulteration of product.

(Response 275) We have revised the regulatory text to establish this recommendation as a requirement.

(Comment 276) Some comments assert that it is impractical to sanitize all non-food-contact surfaces in a farm mixed-type facility and that this provision should only apply to those areas where a RAC is being transformed into a processed food.

(Response 276) These comments appear to misinterpret the proposed provision, which does not require sanitizing any non-food-contact surfaces, but rather requires cleaning the non-food-contact surfaces of equipment. (See also Response 278.)

(Comment 277) Some comments ask us to specify that this provision applies to non-food-contact surfaces of equipment used “where food is exposed or in the food production sections.”

(Response 277) We decline these requests. The provision clearly addresses equipment used in the operation of a food plant, which includes food storage in addition to food production. Non-food-contact surfaces can become harborage for environmental pathogens (Ref. 55). Specifying that non-food-contact surfaces be cleaned as frequently as necessary to protect against allergen cross-contact and against contamination provides flexibility for industry and regulators to interpret this long-standing provision as appropriate to the establishment and the food being processed.

(Comment 278) Some comments ask us to specify that non-food-contact surfaces be sanitized or “sanitized where appropriate.” Other comments assert that sanitizing of high touch areas in the non-processing areas of a food

facility will help prevent transmission of public health pathogens into food processing areas. Some comments assert that sanitizing non-food-contact surfaces could also assist with minimizing risks from possible pathogen transfer to food-contact surfaces.

(Response 278) We decline these requests. We acknowledge that there could be some benefit to sanitizing non-food-contact surfaces with substances that would reduce pathogens but disagree that treating non-food-contact surfaces with substances that would reduce pathogens is necessary if the surfaces are kept clean. The provision does not preclude an establishment from sanitizing non-food-contact surfaces in addition to cleaning them, if the establishment determines that doing so is necessary or prudent for its operations. See also Response 125.

(Comment 279) Some comments ask us not to designate the frequency for cleaning of non-food-contact surfaces because doing so would create an unnecessary burden for smaller facilities.

(Response 279) The provision does not specify the frequency for cleaning of non-food-contact surfaces. Instead, it specifies that the surfaces be cleaned “as frequently as necessary.”

*I. Proposed § 117.35(f)—Storage and Handling of Cleaned Portable Equipment and Utensils*

We proposed that cleaned and sanitized portable equipment with food-contact surfaces and utensils should be stored in a location and manner that protects food-contact surfaces from cross-contact and contamination. We also requested comment on whether to establish this provision as a requirement rather than a recommendation (78 FR 3646 at 3722).

(Comment 280) Comments are mixed regarding whether to require, rather than recommend, provisions for cleaned and sanitized portable equipment with food-contact surfaces and utensils. Some comments ask us to keep this provision a recommendation, whereas other comments ask us to change this recommendation to a requirement. Some comments agree that it is important that these food-contact surfaces are clean and sanitary when used, but because storage of equipment and utensils could be for an extended period of time, the comments ask us to specify that this requirement applies before the subsequent use of the equipment and utensils.

(Response 280) The intent of the provision is to emphasize that equipment that is cleaned and sanitized at one location has the potential to

become contaminated or be subject to allergen cross-contact before or during movement to a location in which the equipment is used. Examples of such equipment are portable mixing kettles, tables, and slicers. We are establishing the provision as a requirement because of the importance of ensuring that food-contact surfaces are clean and sanitary at time of use.

(Comment 281) Some comments assert that the manner in which this equipment is stored includes the location and therefore such wording is redundant. These comments ask us to modify the language to remove “location.”

(Response 281) We acknowledge that “manner” in which the equipment is stored could be interpreted to include “location” but disagree that this interpretation would be universal. The storage location can affect the potential for the equipment to become contaminated or subject to allergen cross-contact, and we are retaining it in the rule.

(Comment 282) Some comments state that they support the proposed revision for “all new equipment installations being away from the wall,” but request a waiver for equipment installed before this rule is issued. These comments ask for a clear definition of “portable

equipment” because some large, stationary pieces of equipment may have wheels.

(Response 282) The provision is directed to the storage of equipment that does not remain stationary in a given establishment, regardless of whether the equipment is designed in such a way so that it could readily be moved in that establishment or another establishment. These comments appear to misinterpret the proposed provision, which does not specify that equipment be installed away from a wall. (See also Response 296.)

(Comment 283) Some comments ask us to clarify this provision to adapt industry practices for transport of watermelons because it is unrealistic and impractical to clean the carpet or replace the cardboard lining the harvest buses that transport watermelons on a regular basis. Other comments ask that the use of wooden totes to transport nuts from the field to the wash and dryer operators remains an option for this industry.

(Response 283) These comments appear to have misinterpreted this provision, which relates to the storage and handling of cleaned portable equipment and utensils used within an establishment rather than to vehicles or

equipment used to transport food to a location other than the establishment.

**XVI. Subpart B: Comments on Proposed § 117.37—Sanitary Facilities and Controls**

We proposed to re-establish the provisions of § 110.37 in new § 117.37 with some revisions to modernize them. Some comments agree with one or more of these proposed provisions without change. Some comments that support the proposed provisions suggest alternative or additional regulatory text (see, e.g., Comment 285 and Comment 286). Other comments that support the proposed provisions ask us to revise or clarify current provisions that we proposed to re-establish in part 117 without change (see, e.g., Comment 290).

In the following sections, we discuss comments that ask us to clarify the proposed provisions or that disagree with, or suggest one or more changes to, the proposed provisions, including comments on provisions that we proposed to re-establish in § 117.37 with no changes. After considering these comments, we have revised the proposed provisions as shown in table 21, with editorial and conforming changes as shown in table 52.

TABLE 21—PROVISIONS FOR SANITARY FACILITIES AND CONTROLS

Provision	Did we propose revisions or request comment on potential revisions?	Did we get comments that disagreed with the proposed provision?	Did we modify the proposed regulatory text?
§ 117.37(a)—Water Supply .....	Yes .....	Yes .....	No.
§ 117.37(b)—Plumbing .....	No .....	No .....	No.
§ 117.37 (b)(1), (2), and (3) .....	No .....	No .....	No.
§ 117.37(b)(4)—Adequate floor drainage .....	No .....	Yes .....	No.
§ 117.37(b)(5)—Backflow .....	Yes .....	No .....	No.
§ 117.37(c)— Sewage Disposal .....	No .....	Yes .....	Yes.
§ 117.37(d)—Toilet Facilities .....	Yes .....	Yes .....	No.
§ 117.37(e)—Hand-Washing Facilities .....	Yes .....	Yes .....	No.
§ 117.37(f) —Rubbish and Offal Disposal .....	Yes .....	No .....	No.

*A. Proposed § 117.37(a)—Water Supply*

We proposed that the water supply must be sufficient for the operations intended and must be derived from an adequate source. Any water that contacts food, food-contact surfaces, or food-packaging materials must be safe and of adequate sanitary quality. Running water at a suitable temperature, and under pressure as needed, must be provided in all areas where required for the processing of food, for the cleaning of equipment, utensils, and food-packaging materials, or for employee sanitary facilities.

(Comment 284) Some comments express concern that because the provision does not define specific microbial limits, it is possible that a packer or processor that is subject to the CGMPs for human food could have more flexibility in interpreting and following water quality expectations than a farm that will be subject to the produce safety rule.

(Response 284) We expect that most facilities subject to this rule will have access to a public water supply that would not, under the provisions of the proposed produce safety rule, require testing to demonstrate that it complies

with defined microbial standards. When facilities that pack or process produce subject to the produce safety rule use untreated ground water or surface water to wash produce, the measures described in the proposed produce safety rule are appropriate measures to demonstrate that water used in packing and processing of produce is safe and of adequate sanitary quality when the produce does not undergo any processing to reduce pathogens.

(Comment 285) Some comments ask us to modify the requirement that water must be safe and of adequate sanitary quality by specifying that the standard

for water quality is “as defined in 40 CFR part 141.” These comments also ask us to specify that compliance with this requirement may be verified by any effective means, such as examination of the supplier’s specifications or test reports; purchase of the water under a supplier’s guarantee or certification; or analyzing the water.

(Response 285) We decline these requests. The CGMP provisions apply to diverse establishments, including some establishments that do not have access to water that satisfies the drinking water requirements of 40 CFR part 141. For example, seafood processing vessels may need to use seawater to clean areas of the ship used for food processing. This long-standing provision has been in place since the umbrella CGMPs were first established and the comments do not provide any examples of food safety problems that would have been addressed by the proposed change. Moreover, the CGMP Working Group report (Ref. 3) did not identify the water quality standard as something that needed to be changed.

(Comment 286) Some comments ask us to specify that running water be provided only “at appropriate locations.”

(Response 286) We decline this request. We agree that running water must be provided only “at appropriate locations.” However, in the context of this provision “appropriate locations” means “in all areas where required for the processing of food, for the cleaning of equipment, utensils, and food-packaging materials, or for employee sanitary facilities” as has been specified for decades.

#### B. Proposed § 117.37(b)—Plumbing

We proposed that plumbing must be of adequate size and design and adequately installed and maintained to:

- (1) Carry sufficient quantities of water to required locations throughout the plant;
- (2) properly convey sewage and liquid disposable waste from the plant;
- (3) avoid constituting a source of contamination to food, water supplies, equipment, or utensils or creating an unsanitary condition;
- (4) provide adequate floor drainage in all areas where floors are subject to flooding-type cleaning or where normal operations release or discharge water or other liquid waste on the floor; and
- (5) provide that there is not backflow from, or cross-connection between, piping systems that discharge waste water or sewage and piping systems that carry water for food or food manufacturing.

(Comment 287) Some comments assert that requirements for adequate floor drainage are overly prescriptive

and do not allow for any standing water subsequent to washing and sanitizing activities.

(Response 287) This provision does not prohibit standing water—*e.g.*, during vegetable or other wet processing operations. However, floors should provide for drainage, *e.g.*, be sloped towards drains, and standing water should be minimized to the extent possible to reduce the potential for contamination of food and food-contact surfaces. This is a long-standing provision and the comment does not provide any information as to how this has been interpreted in the past to not allow for standing water during processing or subsequent to washing and sanitizing activities.

#### C. Proposed § 117.37(c)—Sewage Disposal

We proposed that sewage disposal must be made into an adequate sewerage system or disposed of through other adequate means.

(Comment 288) Some comments ask us to specify that sewage “must be disposed.”

(Response 288) We have revised the regulatory text to consistently use the verb “dispose” rather than to use a noun (*i.e.*, “disposal”) in the first clause.

#### D. Proposed § 117.37(d)—Toilet Facilities

We proposed to replace the existing CGMP requirements for toilets (*i.e.*, that each plant provide its employees with adequate, readily accessible toilet facilities, along with recommendations for how to comply with these requirements) with a requirement that each plant must provide its employees with adequate, readily accessible toilet facilities. We proposed that toilet facilities must be kept clean and must not be a potential source of contamination of food, food-contact, or food-packaging materials. We also proposed to delete the guidance on how to comply with the requirements.

(Comment 289) Some comments ask us to retain the guidance we proposed to delete. Some comments ask us to retain some of the guidance and make some of it optional to allow for flexibility based on the design of the facility. Some comments provide specific editorial suggestions to include the guidance in this provision.

(Response 289) We decline these requests. As noted in the final rule establishing CGMPs for dietary supplements (72 FR 34752 at 34817), it is unnecessary to require specific features because an establishment may be able to achieve compliance through

other means better suited to its operations.

#### E. Proposed § 117.37(e)—Hand-Washing Facilities

We proposed to replace the existing CGMP requirements for hand-washing facilities (*i.e.*, that hand-washing facilities must be adequate and convenient and be furnished with running water at a suitable temperature, along with recommendations for how to comply with these requirements) with a requirement that each plant must provide hand-washing facilities designed to ensure that an employee’s hands are not a source of contamination of food, food-contact surfaces, or food-packaging materials, by providing facilities that are adequate, convenient, and furnish running water at a suitable temperature. We also proposed to delete the guidance on how to comply with the requirements.

(Comment 290) Some comments ask us to clarify the meaning of “suitable temperature” in this provision.

(Response 290) By “suitable temperature,” we mean a temperature that does not discourage employees from adequately washing hands, or from washing hands at all, because the water is either too cold or too hot.

(Comment 291) Some comments ask that we specify that hot water should be provided so that this provision is more consistent with similar rules for most State and local jurisdictions that interpret “suitable temperature” as “hot.” Some comments ask whether we are deleting a current requirement for hot water to be provided at a hand-wash station.

(Response 291) We are not deleting a current requirement for hot water to be provided at a hand-wash station. The comments may be mistaking our CGMP requirements with the provisions of our Food Code, which specify that a hand-washing sink shall be equipped to provide water at a temperature of at least 38 degrees C (110 degrees F) through a mixing valve or combination faucet (See section 5–202.12 of the Food Code) (Ref. 51).

We decline the request to modify the regulatory text so that it requires that “hot water” be provided. This long-standing requirement for a “suitable temperature,” without specifying a requirement for “hot water,” means that the water should be neither too hot nor too cold to discourage personnel from washing their hands. We continue to believe that it is not necessary to specify a particular temperature or to use the subjective term “hot.”

**XVII. Subpart B: Comments on Proposed § 117.40—Equipment and Utensils**

We proposed to re-establish the provisions of § 110.40 in new § 117.40 with some revisions to modernize them. Some comments agree with one or more of these proposed provisions without change. Some comments that support the proposed provisions suggest alternative or additional regulatory text (see, e.g., Comment 301, Comment 305, and Comment 307) or ask us to clarify

how we will interpret the provision (see, e.g., Comment 308). Other comments that support the proposed provisions ask us to revise or clarify current provisions that we proposed to re-establish in part 117 without change (see, e.g., Comment 292, Comment 300, and Comment 310).

We also proposed to reorganize provisions found in current § 110.40(a) by creating paragraph designations (a)(1) through (a)(6) with associated editorial changes. We received no comments that disagreed with this proposed

redesignation and are finalizing it as proposed.

In the following sections, we discuss comments that ask us to clarify the proposed requirements or that disagree with, or suggest one or more changes to, the proposed provisions, including comments on provisions that we proposed to re-establish in § 117.40 with no changes. After considering these comments, we have revised the proposed provisions as shown in table 22, with editorial and conforming changes as shown in table 52.

TABLE 22—PROVISIONS FOR EQUIPMENT AND UTENSILS

Provision	Did we propose revisions or request comment on potential revisions?	Did we get comments that disagreed with the proposed provision?	Did we modify the proposed regulatory text?
§ 117.40(a)(1)—Design of Plant Equipment and Utensils .....	No .....	Yes .....	No.
§ 117.40(a)(2)—Design Construction, and Use of Equipment and Utensils .....	No .....	Yes .....	Yes.
§ 117.40(a)(3)—Installation and Maintenance of Equipment .....	Yes .....	Yes .....	Yes.
§ 117.40(a)(4)—Corrosion-Resistant Food-Contact Surfaces .....	No .....	Yes .....	No.
§ 117.40(a)(5)—Food-Contact Surfaces and Nontoxic Materials .....	No .....	Yes .....	Yes.
§ 117.40(a)(6)—Maintenance of Food-Contact Surfaces .....	Yes .....	Yes .....	No.
§ 117.40(b)—Seams on Food-Contact Surfaces .....	Yes .....	Yes .....	No.
§ 117.40(c)—Construction of Equipment .....	No .....	Yes .....	Yes.
§ 117.40(d)—Holding, Conveying, and Manufacturing Systems .....	No .....	Yes .....	Yes.
§ 117.40(e)—Freezer and Cold Storage Compartments .....	Yes .....	Yes .....	No.
§ 117.40(f)—Accurate and Precise Instruments and Controls .....	Yes .....	Yes .....	No.
§ 117.40(g)—Compressed Air or Other Gases .....	No .....	Yes .....	No.

*A. Proposed § 117.40(a)—Design, Construction, Use, Installation, and Maintenance of Equipment and Utensils*

1. Proposed § 117.40(a)(1)—Design of Plant Equipment and Utensils

We proposed no revisions to the requirement that all plant equipment and utensils must be so designed and of such material and workmanship as to be adequately cleanable, and must be properly maintained.

(Comment 292) Some comments ask us to specify that this provision only applies to equipment and utensils used for, or in connection with, food manufacturing, processing, packing, or holding and appropriate to the stage of production it is used in. These comments assert that “all plant equipment and utensils” is too broad and that the requirements for cleanliness of the equipment and utensils differ at various stages of production. Other comments ask us to specify “as needed to protect against allergen cross-contact and contamination.”

(Response 292) We agree that it is not necessary to apply the provision to all plant equipment and utensils, regardless of what the equipment is and whether it has any role in the production of food. For example, we agree that it is not

necessary to apply the requirement to equipment such as welding equipment used in an establishment’s machine shop. Accordingly, we have made the following modifications to the provision: (1) Specify that the provision applies to all plant equipment and utensils “used in manufacturing, processing, packing, or holding food”; (2) specify that equipment and utensils must be “adequately” maintained, rather than “properly” maintained, to emphasize the public health goal of the requirement; and (3) specify that the purpose of the requirement is to protect against allergen cross-contact and contamination.

2. Proposed § 117.40(a)(2)—Design, Construction, and Use of Equipment and Utensils

We proposed no revisions to the requirement that the design, construction, and use of equipment and utensils must preclude the adulteration of food with lubricants, fuel, metal fragments, contaminated water, or any other contaminants.

(Comment 293) Some comments suggest editorial changes to the provision to improve clarity.

(Response 293) We agree that the suggested changes improve the clarity of

the provision and have incorporated them into the regulatory text.

3. Proposed § 117.40(a)(3)—Installation and Maintenance of Equipment

We requested comment on whether to establish the current recommendation that all equipment be so installed and maintained as to facilitate the cleaning of the equipment and of all adjacent spaces as a requirement (78 FR 3646 at 3723).

(Comment 294) Some comments assert that we should establish this recommendation as a requirement in light of recent findings of the pathogen *L. monocytogenes* in environmental swab samples taken from food processing plants.

(Response 294) We agree with these comments that an additional reason to establish this recommendation as a requirement, in addition to the reasons we provided in the 2013 proposed preventive controls rule (78 FR 3646 at 3728), is that it could facilitate cleaning for environmental pathogens. We have revised the regulatory text to change “should” to “must.”

(Comment 295) Some comments suggest that we make editorial changes, for clarity and completeness, to read “so as to facilitate the cleaning and maintenance” rather than “so installed

and maintained as to facilitate the cleaning.”

(Response 295) We agree that the suggested changes improve the clarity of the provision and have incorporated them into the regulatory text.

(Comment 296) Some comments support the proposed revision for “all new equipment installations being away from the wall,” but ask that we provide a waiver for equipment that has been installed prior to the issuance of this rulemaking.

(Response 296) These comments appear to misinterpret the proposed provision, which does not specify that equipment be installed away from a wall. The requirement is to install equipment so as to facilitate both cleaning and maintenance. This provision has been a long-standing recommendation. Moreover, if the existing equipment is installed in a way that it cannot be cleaned, it would not have been in compliance with existing CGMP requirements for the design and construction of the plant (§ 110.20). For example, the current CGMPs have long required that the design and construction of the plant must provide sufficient space for such placement of equipment and storage of materials as is necessary for the maintenance of sanitary operations and the production of safe food (§ 110.20(a)(1)).

#### 4. Proposed § 117.40(a)(4)—Corrosion-Resistant Food-Contact Surfaces

We proposed no revisions to the requirement that food-contact surfaces must be corrosion-resistant when in contact with food.

(Comment 297) Some comments ask us to specify that the requirement only applies where appropriate for food safety. Other comments ask us to specify that the food-contact surfaces be corrosion-resistant as appropriate to the type of food and other substances with which they come in contact.

(Response 297) We decline these requests. We disagree with the implication that the condition of some food-contact surfaces would not be relevant to food safety. We also disagree that it would be acceptable for some food products to be in contact with surfaces susceptible to corrosion, regardless of the nature of the food product.

#### 5. Proposed § 117.40(a)(5)—Food-Contact Surfaces and Nontoxic Materials

We proposed no revisions to the requirement that food-contact surfaces must be made of nontoxic materials and designed to withstand the environment of their intended use and the action of

food, and, if applicable, cleaning compounds and sanitizing agents.

(Comment 298) Some comments assert that food-contact surfaces or utensils could be dedicated to allergens only or non-allergens only.

(Response 298) We agree that dedicating food-contact surfaces and utensils is one way to comply with various requirements of this rule to prevent allergen cross-contact, but disagree that we should require this particular mechanism to prevent allergen cross-contact. Other mechanisms can prevent allergen cross-contact, such as adequately cleaning equipment and surfaces between uses.

(Comment 299) Some comments ask us to specify that food-contact surfaces must be made of food-grade materials and suitably durable.

(Response 299) We decline these requests. Food-grade materials must be non-toxic. The comment provides no examples of circumstances in which the long-standing criterion of “nontoxic” is inadequate. We agree that “suitably durable” could be interpreted to capture the general intent of the current text that specifies “designed to withstand the environment of their intended use and the action of food, and, if applicable, cleaning compounds and sanitizing agents,” but disagree that this interpretation would be universal and are retaining the long-standing regulatory text.

(Comment 300) Some comments ask us to specify that food-contact surfaces must be designed to withstand cleaning procedures.

(Response 300) We have revised the regulatory text to include cleaning procedures. For example, food-contact surfaces must be designed to withstand the actions of scrubbing utensils that could scratch or pit the equipment, creating cracks and crevices that could be difficult to clean and lead to a niche where environmental pathogens could lodge and potentially contaminate food produced using the equipment.

#### 6. Proposed § 117.40(a)(6)—Maintenance of Food-Contact Surfaces

We proposed that food-contact surfaces must be maintained to protect food from cross-contact and from being contaminated by any source, including unlawful indirect food additives. As an inadvertent error, we specified that this requirement would be designated as § 117.40(a)(5); we intended to specify that it be designated § 117.40(a)(6).

(Comment 301) Some comments ask us to specify that this requirement also applies to equipment and utensils but does not apply to single-use items.

(Response 301) We decline these requests. As proposed, the requirement applies to all food-contact surfaces, including those on equipment and utensils; it is not necessary to separately specify that the requirement applies to equipment and utensils. We are not specifying that single-use food-contact surfaces do not need to be maintained. Using equipment or utensils that have single-use food-contact surfaces may be one way to satisfy the requirements of the provision, although single use items may still need to be protected from allergen cross-contact and from contamination, *e.g.*, by protective packaging.

(Comment 302) Some comments ask us to require that the surfaces also be appropriately cleaned and sanitized.

(Response 302) We decline this request. Cleaning and sanitizing of food-contact surfaces is covered by § 117.35(d) and does not need to be repeated here.

(Comment 303) Some comments ask us to strike the phrase “including unlawful indirect food additives.” These comments assert that the wording would be equally effective without the phrase and that striking it would result in a stronger and more absolute requirement.

(Response 303) We decline this request. Although some persons might realize that the provision requires them to protect against unlawful indirect food additives, such an interpretation may not be universal.

#### B. Proposed § 117.40(b)—Seams on Food-Contact Surfaces

We proposed that seams on food-contact surfaces must be smoothly bonded or maintained so as to minimize accumulation of food particles, dirt, and organic matter, and thus minimize the opportunity for growth of microorganisms and cross-contact.

(Comment 304) Some comments assert that this provision should not apply to all establishments—*e.g.*, that it seems directed towards bakeries but inapplicable to establishments that pack produce.

(Response 304) The provision requires an establishment to minimize accumulation of food particles, dirt, and organic matter in seams on food-contact surfaces to minimize the opportunity for growth of microorganisms and allergen cross-contact and provides flexibility for how to comply with the requirement (*i.e.*, through smoothly bonded seams or through maintenance). Minimizing the accumulation of food particles, dirt, and organic matter in seams on food-contact surfaces is appropriate for all establishments that produce food.

*C. Proposed § 117.40(c)—Construction of Equipment*

We proposed that equipment that is in the manufacturing or food-handling area and that does not come into contact with food must be so constructed that it can be kept in a clean condition.

(Comment 305) Some comments ask us to specify “areas where food is manufactured, processed, or packed” and clarify that the equipment must be constructed so that it can be kept “appropriately clean and sanitary.”

(Response 305) We have revised the provision to specify that it applies to areas in the plant where food is manufactured, processed, packed, or held. Doing so makes the terms in this provision consistent with terms used throughout the CGMPs (78 FR 3646 at 3692). Consistent with (Response 258, we also have modified the provision to specify that the equipment must be constructed so that it can be kept “clean and sanitary.”

(Comment 306) Some comments ask us to consider inserting technical language to address systems used for sanitizing in food processing environments to ensure they meet generally accepted design principles for food grade equipment. Some comments ask us to specify that the equipment must be constructed of materials that will not get corroded by cleaning chemicals and that welded joints must be of non-corrosive materials and “dressed” to eliminate porous surfaces and occlusions.

(Response 306) We decline these requests. It is not necessary to specify every type of equipment that could be used in a food processing environment or every situation that must be addressed to satisfy the specific requirements of this provision and the more general requirements of § 117.40(a).

*D. Proposed § 117.40(d)—Holding, Conveying, and Manufacturing Systems*

We proposed no revisions to the requirement that holding, conveying, and manufacturing systems, including gravimetric, pneumatic, closed, and automated systems, must be of a design and construction that enables them to be maintained in an appropriate sanitary condition.

(Comment 307) Some comments ask us to specify that these systems also need to be maintained in an appropriately clean condition in addition to a sanitary condition.

(Response 307) Consistent with Response 258, we have revised the provision to specify that the equipment must be constructed so that it can be kept “clean and sanitary.”

*E. Proposed § 117.40(e)—Freezer and Cold Storage Compartments*

We proposed that each freezer and cold storage compartment used to store and hold food capable of supporting growth of microorganisms must be fitted with an indicating thermometer, temperature measuring device, or temperature-recording device so installed as to show the temperature accurately within the compartment. We also proposed to delete the recommendation that each freezer and cold storage compartment used to store and hold food capable of supporting growth of microorganisms be fitted with an automatic control for regulating temperature or with an automatic alarm system to indicate a significant temperature change in a manual operation.

(Comment 308) Some comments ask us to clarify that this requirement is only for foods that require temperature control for food safety, and does not apply to any intact fruits or vegetables that are only held at specific temperatures for quality and shelf-life purposes. Some comments ask us to change this requirement to a recommendation for the same reason. Some comments assert that temperature control for intact fruits and vegetables is likely not always necessary or even desirable (e.g., to avoid chill damage).

(Response 308) We decline this request. The requirement applies to refrigerated storage when the establishment has placed food in a refrigerated storage compartment, whether for food safety or for food quality (e.g., to prevent the growth of spoilage microorganisms). The provision, which is an existing requirement in § 110.40, does not specify which foods must be refrigerated or what the refrigeration temperature must be. However, once the establishment has determined that refrigerated storage is appropriate, either for food safety or food quality, it is appropriate to require that the establishment have evidence that it is refrigerating the food as it has decided to do.

*F. Proposed § 117.40(f)—Accurate and Precise Instruments and Controls*

We proposed that instruments and controls used for measuring, regulating, or recording temperatures, pH, acidity, water activity, or other conditions that control or prevent the growth of undesirable microorganisms in food must be accurate and precise and adequately maintained, and adequate in number for their designated uses.

(Comment 309) Some comments ask us to specify “calibrated” for clarity, accuracy, and completeness. Some comments assert that proper calibration of such equipment is essential to ensure food safety, and does not entail so large a cost as to preclude even small companies from compliance.

(Response 309) We decline this request. The request of this comment is already addressed by our proposal to revise this long-standing provision to require that these types of instruments be accurate, as well as precise. As discussed in Comment 519 and Response 519, some types of instruments generally are subject to accuracy checks rather than to calibration.

*G. Proposed § 117.40(g)—Compressed Air or Other Gases*

We proposed no revisions to the requirement that compressed air or other gases mechanically introduced into food or used to clean food-contact surfaces or equipment must be treated in such a way that food is not contaminated with unlawful indirect food additives.

(Comment 310) Some comments ask us to specify that compressed air or other gases must be “filtered or otherwise treated” for clarity.

(Response 310) We decline this request. We agree that filtration is a common treatment to prevent contamination, but disagree that it is necessary to modify this long-standing requirement to add this particular example of a treatment to prevent contamination with unlawful indirect food additives. As written, the provision provides flexibility for an establishment to determine the appropriate treatment for compressed air or other gases in a manner that works best for its plant.

(Comment 311) Some comments ask us to strike the phrase “with unlawful indirect food additives.” These comments assert that the wording would be equally effective without the phrase and that striking it would result in a stronger and more absolute requirement.

(Response 311) We decline this request. Although some persons might realize that the provision requires them to protect against unlawful indirect food additives, such an interpretation may not be universal.

**XVIII. Subpart B: Comments on Proposed § 117.80(a)—General Processes and Controls**

We proposed to re-establish the provisions of § 110.80 in new § 117.80(a) with some revisions to modernize them and with some

redesignations. Some comments support one or more of these proposed provisions without change. Some comments that support the proposed provisions suggest alternative or additional regulatory text (see, e.g., Comment 316) or ask us to clarify how we will interpret the provision (see, e.g.,

Comment 317). Other comments that support the proposed provisions ask us to revise or clarify current provisions that we proposed to re-establish in part 117 without change (see, e.g., Comment 312 and Comment 320).  
 In the following sections, we discuss comments that ask us to clarify the proposed provisions or that disagree

with, or suggest one or more changes to, the proposed provisions, including comments on provisions that we did not propose to revise. After considering these comments, we have revised the proposed provisions as shown in table 23, with editorial and conforming changes as shown in table 52.

TABLE 23—PROVISIONS FOR GENERAL PROCESSES AND CONTROLS

Provision	Did we propose revisions or request comment on potential revisions?	Did we get comments that disagreed with the proposed provision?	Did we modify the proposed regulatory text?
§ 117.80(a)(1)—Adequate sanitation principles .....	No .....	Yes .....	No.
§ 117.80(a)(2)—Quality control operations .....	No .....	Yes .....	No.
§ 117.80(a)(3)—Supervising overall sanitation .....	No .....	Yes .....	No.
§ 117.80(a)(4)—Production procedures .....	Yes .....	Yes .....	Yes.
§ 117.80(a)(5)—Chemical, microbial, or extraneous-material testing procedures ..	Yes .....	Yes .....	No.
§ 117.80(a)(6)—Contaminated food .....	No .....	Yes .....	No.

*A. Proposed § 117.80(a)(1)—Adequate Sanitation Principles*

We proposed no revisions to the requirements of current § 110.80 (proposed § 117.80(a)(1)) that all operations in the manufacturing, processing, packing, and holding of food (including operations directed to receiving, inspecting, transporting, and segregating) be conducted in accordance with adequate sanitation principles.

(Comment 312) Some comments ask us to clarify “adequate sanitation principles.” Some of these comments express concern that facilities receiving raw produce that will be further cleaned or processed will be unable to meet this requirement and assert that this requirement will not provide additional public health benefits.

(Response 312) These comments fail to explain how we have interpreted the provision in a way that has been problematic such that clarification is necessary. The term “adequate” is a long-standing term that we defined in its current form when we first established the umbrella CGMPs in 1969 (34 FR 6977 at 6978). Furthermore, during a previous rulemaking to revise the umbrella CGMPs and establish current § 110.80 we explained that the phrase “adequate sanitation principles” must be broad so that industry can easily adapt sanitation principles to its existing procedures (51 FR 22458 at 22461).

(Comment 313) Some comments ask us to specify that operations be conducted in accordance with adequate sanitation principles “specific to the operation” to provide for extended time intervals between sanitation procedures. These comments explain that in the case

of low-moisture almonds, sanitation intervals may be extended in order to minimize addition of water into the facility.

(Response 313) We decline this request. By specifying that sanitation principles must be “adequate,” the provision already provides flexibility such as that requested by these comments. In addition, the rule does not specify any time intervals for conducting sanitation operations and, thus, the provision needs no qualification to provide flexibility for an establishment to adopt a frequency of sanitation procedures consistent with its operations.

*B. Proposed § 117.80(a)(2)—Quality Control Operations*

We proposed no revisions to the requirements of current § 110.80 (proposed § 117.80(a)(2)) that appropriate quality control operations be employed to ensure that food is suitable for human consumption and that food-packaging materials are safe and suitable.

(Comment 314) Some comments assert that specifying that food-packaging materials must be “safe and suitable” is confusing because the definition for “safe and suitable” at § 130.3(d) defines the phrase with respect to ingredients.

(Response 314) The requirement is a long-standing provision that has been used in this context for decades. When we first proposed this provision during a previous rulemaking to revise the umbrella CGMPs, we included this exact phrase and did not receive any comments regarding its use (44 FR 33238 at 33246). Furthermore, as

evidence that industry commonly understands the use of the term “suitable” in the context of CGMP requirements in addition to requirements applicable to ingredients used in standardized foods, we note that we substituted the term “suitable” for “fit” in another provision (§ 110.80(a)(1)) in response to comments from industry stating that “suitable” was a more familiar term than “fit” (51 FR 22458 at 22470).

*C. Proposed § 117.80(a)(3)—Supervision of Overall Sanitation*

We proposed no revisions to the requirements of current § 110.80 (proposed § 117.80(a)(3)) that overall sanitation of the plant be under the supervision of one or more competent individuals assigned responsibility for this function.

(Comment 315) Some comments ask us to revise this provision to specify that it applies to overall cleaning of the plant, as well as overall sanitation of the plant.

(Response 315) We decline this request. Sanitation is a general term that already encompasses cleaning (and, as appropriate, sanitizing).

*D. Proposed § 117.80(a)(4)—Production Procedures*

We proposed that all reasonable precautions must be taken to ensure that production procedures do not contribute to cross-contact and contamination from any source.

(Comment 316) Some comments assert that the phrase “all reasonable precautions” is too extreme and prescriptive and suggest that “adequate” would be more appropriate than “all” to

describe the intended measures and precautions.

(Response 316) We agree that “adequate” is more appropriate than “all” and have substituted the word “adequate” for “all reasonable” in the final rule.

*E. Proposed § 117.80(a)(5)—Chemical, Microbial, or Extrinsic-Material Testing Procedures*

We proposed that chemical, microbial, or extraneous-material testing procedures must be used where necessary to identify sanitation failures or possible cross-contact and food contamination.

(Comment 317) Some comments ask whether the word “must” in the provision means that testing will always be required, including for food allergens. Other comments assert that testing should only be used when there is reason to suspect a specific problem has occurred and when methods are available.

(Response 317) Testing is not always required. The provision provides flexibility for an establishment to test when appropriate, such as when a facility determines that it is necessary to use rapid ATP (adenosine triphosphate) swabs as an indicator of microbial or food residue contamination to verify cleaning of a line prior to running a different product (Ref. 56). Facilities commonly conduct tests on food for microorganisms that indicate sanitation failures, such as testing for total plate count, generic *E. coli*, total coliforms, etc. (Ref. 57). When the number of such organisms exceeds expectation, sanitation or other failures are suspected and the facility can take actions to determine the source of the problem.

(Comment 318) Some comments oppose any implication that food manufacturers are required to develop test methods or analytical standards, or search out methods that are not readily available, for this or any other purpose.

(Response 318) The provision does not require food manufacturers to develop test methods or analytical standards, or search out methods that are not readily available.

(Comment 319) Some comments suggest that testing as part of an environmental monitoring program should be risk-based and include allergens, but should not be required for finished product.

(Response 319) The provision does not use the term “environmental monitoring,” which is a term that has come to be associated with monitoring

for environmental pathogens rather than for other substances that may contaminate the food processing environment. Likewise, the provision does not establish requirements for environmental monitoring for finished product. As discussed in Response 317, the provision provides flexibility for an establishment to test when testing is appropriate, such as when the facility determines testing would be useful to verify adherence to CGMPs or when there is a problem such as allergen cross-contact.

*F. Proposed § 117.80(a)(6)—Contaminated Food*

We proposed no revisions to the requirements of current § 110.80 (proposed § 117.80(a)(6)) that all food that has become contaminated to the extent that it is adulterated be rejected, or if permissible, treated or processed to eliminate the contamination.

(Comment 320) Some comments assert that the use of the phrase “if permissible” is vague and confusing and should be replaced by a statement of precisely what is impermissible.

(Response 320) We acknowledge that the phrase “if permissible” does not communicate the circumstances under which it is permissible to treat or process a food to eliminate contamination. Rather than add such circumstances to the rule, we have replaced the phrase “if permissible” with “if appropriate.” In the following paragraphs, we discuss examples of when treatment or processing to eliminate contamination would or would not be appropriate.

Some RACs, such as cocoa beans, can become adulterated with insects or filth but may be fumigated or cleaned in accordance with an application for reconditioning submitted to FDA to bring the product into compliance. Acid or acidified canned goods with microbial contamination due to a container defect may be reconditioned by sorting out the defective containers to ensure that containers released into commerce are intact and the product is not contaminated. Tree nuts with signs of mold growth can be reconditioned using methods that separate the moldy nuts from those that are not contaminated. Tree nuts found to be contaminated with *Salmonella* may be treated by processes such as steam or propylene oxide when such treatments have been validated to provide an adequate reduction of *Salmonella*. A heat-treated food contaminated from the environment, such as a heat-treated,

dried protein product, can sometimes be rehydrated, and a food establishment could repeat the processing to reduce pathogens. Other products, such as many types of produce, are not normally processed to reduce pathogens, and product quality may be impacted by such treatments. Even though processing techniques such as irradiation have the potential to reduce pathogens, irradiation is a food additive that requires approval. For example, as of January 15, 2015, irradiation had been approved for control of foodborne pathogens and extension of shelf-life in fresh iceberg lettuce and fresh spinach, but not in other fresh leafy greens. Using irradiation for a purpose that has not been approved (such as for the irradiation of fresh leafy greens other than fresh iceberg lettuce and fresh spinach) would render the food adulterated under section 402(a)(2)(C)(i) of the FD&C Act and, thus, it would not be appropriate to treat or process fresh leafy greens other than fresh iceberg lettuce and fresh spinach using irradiation.

**XIX. Subpart B: Comments on Proposed § 117.80(b)—Processes and Controls for Raw Materials and Other Ingredients**

We proposed to re-establish the provisions of § 110.80(a) in new § 117.80(b) with some revisions to modernize them. Some comments support one or more of these proposed provisions without change. For example, some comments support a new provision that would require raw materials and ingredients that are food allergens, and rework that contains food allergens, to be identified and held in a manner that prevents allergen cross-contact. Some comments that support the proposed provisions suggest alternative or additional regulatory text (see, e.g., Comment 324, Comment 325, Comment 328, and Comment 329) or ask us to clarify how we will interpret the provision (see, e.g., Comment 323 and Comment 327).

In the following sections, we discuss comments that ask us to clarify the proposed provisions or that disagree with, or suggest one or more changes to, the proposed provisions, including comments on provisions that we did not propose to revise. After considering these comments, we have revised the proposed provisions as shown in table 24, with editorial and conforming changes as shown in table 52.

TABLE 24—PROVISIONS FOR PROCESSES AND CONTROLS FOR RAW MATERIALS AND OTHER INGREDIENTS

Provision	Did we propose revisions or request comment on potential revisions?	Did we get comments that disagreed with the proposed provision?	Did we modify the proposed regulatory text?
§ 117.80(b)(1)—Inspection, storage, and handling of raw materials and other ingredients.	Yes .....	Yes .....	Yes.
§ 117.80(b)(2)—Levels of microorganisms in raw materials and other ingredients	Yes .....	Yes .....	No.
§ 117.80(b)(3)—Natural toxins in raw materials and other ingredients .....	Yes .....	Yes .....	No.
