

FEDERAL REGISTER

Vol. 80

Friday,

No. 228

November 27, 2015

Book 1 of 2 Books

Pages 73943–74352

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.ofr.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.fdsys.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 80 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 80, No. 228

Friday, November 27, 2015

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

NATIONAL SCIENCE FOUNDATION

2 CFR Part 2500

RIN 3145-AA57

Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards

AGENCY: National Science Foundation.

ACTION: Final rule.

SUMMARY: NSF has adopted as final its interim final rule outlining uniform administrative requirements, cost principles, and audit requirements for Federal awards, pursuant to the approval NSF received from OMB to implement requirements via use of a policy, rather than a regulation. In order to establish a single location for each of the Departments' and Agencies' implementation of the Uniform Guidance, NSF has provided a link to its policy implementation of OMB's Uniform Guidance for inclusion in this issuance.

DATES: This rule is effective on November 27, 2015.

ADDRESSES: The Foundation's implementation document, the NSF Proposal and Award Policies and Procedures Guide, may be found at: <http://www.nsf.gov/pubs/policydocs/pappguide/nsf16001/?org=NSF>.

FOR FURTHER INFORMATION CONTACT: Erin Dawson, Assistant General Counsel, Office of the General Counsel, National Science Foundation, 4201 Wilson Boulevard, Room 1265, Arlington, VA 22230; (703) 292-8060, edawson@nsf.gov (please include RIN 3145-AA57 in the subject line of the message).

SUPPLEMENTARY INFORMATION: On December 19, 2014, the Office of Management and Budget (OMB) published an Interim Final Rule that implemented for all Federal award-making agencies, including NSF, OMB's final guidance on Uniform

Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards, 79 FR 75871. OMB published the uniform rules as 2 CFR part 200. As part of that rulemaking, NSF adopted part 200 through an agency-specific addendum at 2 CFR part 2500. The Foundation's implementation document, the NSF Proposal and Award Policies and Procedures Guide, may be found at: <http://www.nsf.gov/pubs/policydocs/pappguide/nsf16001/?org=NSF>.

NSF received no comments in response to its adoption of the Interim Final Rule. Therefore, 2 CFR part 2500 as described in the Interim Final Rule, is adopted with no changes.

Regulatory Findings

For the regulatory findings regarding this rulemaking, please refer to the analysis prepared by OMB in the Interim Final Rule, which is incorporated herein. 79 FR at 75876.

Accordingly, the Interim Final Rule adding 2 CFR part 2500, which was published at 79 FR 75871 on December 19, 2014, is adopted as a Final Rule without change.

Dated: November 20, 2015.

Lawrence Rudolph,

General Counsel, National Science Foundation.

RIN 3170-AA11

Appraisals for Higher-Priced Mortgage Loans Exemption Threshold

AGENCY: Board of Governors of the Federal Reserve System (Board); Bureau of Consumer Financial Protection (Bureau); and Office of the Comptroller of the Currency, Treasury (OCC).

ACTION: Final rule; official interpretations; technical amendment.

SUMMARY: The OCC, the Board and the Bureau are publishing final rules amending the official interpretations for their regulations that implement section 129H of the Truth in Lending Act (TILA). Section 129H of TILA establishes special appraisal requirements for "higher-risk mortgages," termed "higher-priced mortgage loans" or "HPMLs" in the agencies' regulations. The OCC, the Board, the Bureau, the Federal Deposit Insurance Corporation (FDIC), the National Credit Union Administration (NCUA) and the Federal Housing Finance Agency (FHFA) (collectively, the Agencies) issued joint final rules implementing these requirements, effective January 18, 2014. The Agencies' rules exempted, among other loan types, transactions of \$25,000 or less, and required that this loan amount be adjusted annually based on any annual percentage increase in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W). If there is no annual percentage increase in the CPI-W, the OCC, the Board and the Bureau will not adjust this

exemption threshold from the prior year. Based on the annual percentage decrease in the CPI-W as of June 1, 2015, the exemption threshold will remain at \$25,500 through December 31, 2016.

DATES: This final rule is effective January 1, 2016.

FOR FURTHER INFORMATION CONTACT:

Bureau: James Wylie, Counsel, Office of Regulations, Bureau of Consumer Financial Protection, at (202) 435-7700.

SUPPLEMENTARY INFORMATION:

I. Background

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act) amended the Truth in Lending Act (TILA) to add special appraisal requirements for “higher-risk mortgages.”¹ In January 2013, the Agencies issued a joint final rule implementing these requirements and adopted the term “higher-priced mortgage loan” (HPML) instead of “higher-risk mortgage” (the January 2013 Final Rule).² In July 2013, the Agencies proposed additional exemptions from the January 2013 Final Rule (the 2013 Supplemental Proposed Rule).³ In December 2013, the Agencies issued a supplemental final rule with additional exemptions from the January 2013 Final Rule (the December 2013 Supplemental Final Rule).⁴ Among other exemptions, the Agencies adopted an exemption from the new HPML appraisal rules for transactions of \$25,000 or less, to be adjusted annually for inflation.

The Bureau’s, the OCC’s, and the Board’s versions of the January 2013 Final Rule and December 2013 Supplemental Final Rule and corresponding official interpretations are substantively identical. The FDIC, NCUA, and FHFA adopted the Bureau’s version of the regulations under the

January 2013 Final Rule and December 2013 Supplemental Final Rule.⁵

Section 34.203(b)(2) of Subpart G of part 34 of the OCC’s regulations, § 226.43(b)(2) of the Board’s Regulation Z, and § 1026.35(c)(2)(ii) of the Bureau’s Regulation Z, and their accompanying interpretations, provide that the exemption threshold for smaller loans will be adjusted effective January 1 of each year based on any annual percentage increase in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W) that was in effect on the preceding June 1. Any increase in the threshold amount will be rounded to the nearest \$100 increment. For example, if the annual percentage increase in the CPI-W would result in a \$950 increase in the threshold amount, the threshold amount will be increased by \$1,000. However, if the annual percentage increase in the CPI-W would result in a \$949 increase in the threshold amount, the threshold amount will be increased by \$900.⁶ If there is no annual percentage increase in the CPI-W, the Agencies will not adjust the threshold amounts from the prior year.⁷

II. Adjustment and Commentary Revision

Effective January 1, 2016, the exemption threshold amount remains at \$25,500. This threshold amount is based on the CPI-W in effect on June 1, 2015, which was reported on May 22, 2015. The Bureau of Labor Statistics publishes consumer-based indices monthly, but does not report a Consumer Price Index change on June 1; adjustments are reported in the middle of the month. The CPI-W is a subset of the Consumer Price Index for All Urban Consumers (CPI-U) and represents approximately 28 percent of the U.S. population. Because there was a 0.8 percent decrease in the CPI-W from April 2014 to April 2015, the OCC, the Board, and the Bureau are not adjusting the exemption threshold amount. The OCC, the Board, and the Bureau are revising the interpretations to their respective regulations to add new comments as follows:

⁵ See NCUA: 12 CFR 722.3; FHFA: 12 CFR part 1222. Although the FDIC adopted the Bureau’s version of the regulation, the FDIC did not issue its own regulation containing a cross-reference to the Bureau’s version. See 78 FR 10368, 10370 (Feb. 13, 2013).

⁶ See 12 CFR part 34, Appendix C to Subpart G, comment 203(b)(2)-1 (OCC); 12 CFR part 226, Supplement I, comment 43(b)(2)-1 (Board); and 12 CFR part 1026, Supplement I, comment 35(c)(2)(ii)-1 (Bureau).

⁷ See 78 FR 48547, 48565 (Aug. 8, 2013) (“Thus, under the proposal, if the CPI-W decreases in an annual period, the percentage increase would be zero, and the dollar amount threshold for the exemption would not change.”).

- Comment 203(b)(2)-1.iii to 12 CFR part 34, Appendix C to Subpart G (OCC);
- Comment 43(b)(2)-1.iii to Supplement I of 12 CFR part 226 (Board); and
- Comment 35(c)(2)(ii)-1.iii in Supplement I of 12 CFR part 1026 (Bureau).

These new comments state that, from January 1, 2016, through December 31, 2016, the threshold amount is \$25,500. These revisions are effective January 1, 2016.

III. Administrative Law Matters

Administrative Procedure Act

Under the Administrative Procedure Act (APA), notice and opportunity for public comment are not required if an agency finds that notice and public comment are impracticable, unnecessary, or contrary to the public interest.⁸ The amendment in this notice is technical and applies the method previously set forth in the 2013 Supplemental Proposed Rule.⁹ For these reasons, the OCC, the Board, and the Bureau have determined that publishing a notice of proposed rulemaking and providing opportunity for public comment are unnecessary. Therefore, the amendments are adopted in final form.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) does not apply to a rulemaking where a general notice of proposed rulemaking is not required.¹⁰ As noted previously, the Agencies have determined that it is unnecessary to publish a general notice of proposed rulemaking for this joint final rule. Accordingly, the RFA’s requirements relating to an initial and final regulatory flexibility analysis do not apply.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995,¹¹ the Agencies reviewed this final rule. No collections of information pursuant to the Paperwork Reduction Act are contained in the final rule.

Unfunded Mandates Reform Act

The OCC analyzes proposed rules for the factors listed in Section 202 of the Unfunded Mandates Reform Act of 1995, before promulgating a final rule

⁸ 5 U.S.C. 553(b)(B).

⁹ See 78 FR 48547, 48565 (Aug. 8, 2013) (“Thus, under the proposal, if the CPI-W decreases in an annual period, the percentage increase would be zero, and the dollar amount threshold for the exemption would not change.”).

Consumer Leasing (Regulation M)

AGENCIES: Board of Governors of the Federal Reserve System (Board); and Bureau of Consumer Financial Protection (Bureau).

¹² 12 U.S.C. 1532.

ACTION: Final rules, official interpretations and commentary.

SUMMARY: The Board and the Bureau are publishing final rules amending the official interpretations and commentary for the agencies' regulations that implement the Consumer Leasing Act (CLA). The Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) amended the CLA by requiring that the dollar threshold for exempt consumer leases be adjusted annually by the annual percentage increase in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W). If there is no annual percentage increase in the CPI-W, the Board and Bureau will not adjust this exemption threshold from the prior year. Based on the annual percentage decrease in the CPI-W as of June 1, 2015, the exemption threshold will remain at \$54,600 through December 31, 2016.

Because the Dodd-Frank Act also requires similar adjustments in the Truth in Lending Act's threshold for exempt consumer credit transactions, the Board and the Bureau are making similar amendments to each of their respective regulations implementing the Truth in Lending Act elsewhere in this issue of the **Federal Register**.

DATES: This final rule is effective January 1, 2016.

FOR FURTHER INFORMATION CONTACT:

Board: Vivian W. Wong, Counsel, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, at (202) 452-3667; for users of Telecommunications Device for the Deaf (TDD) only, contact (202) 263-4869.

Bureau: James Wylie, Counsel, Office of Regulations, Bureau of Consumer Financial Protection, at (202) 435-7700.

SUPPLEMENTARY INFORMATION:

I. Background

The Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (Dodd-Frank Act) increased the threshold in the Consumer Leasing Act (CLA) for exempt consumer leases from \$25,000 to \$50,000, effective July 21, 2011.¹ In addition, the Dodd-Frank Act requires that this threshold be adjusted annually for inflation by the annual percentage increase in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W), as published by the Bureau of Labor Statistics. In April 2011, the Board issued a final rule amending Regulation M (which implements the CLA) consistent with

these provisions of the Dodd-Frank Act along with a similar final rule amending Regulation Z (which implements the Truth in Lending Act) (collectively, the Board Final Threshold Rules).²

Title X of the Dodd-Frank Act transferred rulemaking authority for a number of consumer financial protection laws from the Board to the Bureau, effective July 21, 2011. In connection with this transfer of rulemaking authority, the Bureau issued its own Regulation M implementing the CLA in an interim final rule, 12 CFR part 1013 (Bureau Interim Final Rule).³ The Bureau Interim Final Rule substantially duplicated the Board's Regulation M, including the revisions to the threshold for exempt transactions made by the Board in April 2011. Although the Bureau has the authority to issue rules to implement the CLA for most entities, the Board retains authority to issue rules under the CLA for certain motor vehicle dealers covered by section 1029(a) of the Dodd-Frank Act, and the Board's Regulation M continues to apply to those entities.⁴

Section 213.2(e)(1) of the Board's Regulation M and § 1013.2(e)(1) of the Bureau's Regulation M, and their accompanying commentaries, provide that the exemption threshold will be adjusted annually effective January 1 of each year based on any annual percentage increase in the CPI-W that was in effect on the preceding June 1. Any increase in the threshold amount will be rounded to the nearest \$100 increment. For example, if the annual percentage increase in the CPI-W would result in a \$950 increase in the threshold amount, the threshold amount

² 76 FR 18349 (Apr. 4, 2011); 76 FR 18354 (Apr. 4, 2011).

³ 76 FR 78500 (Dec. 19, 2011).

⁴ Section 1029(a) of the Dodd-Frank Act states: "Except as permitted in subsection (b), the Bureau may not exercise any rulemaking, supervisory, enforcement, or any other authority . . . over a motor vehicle dealer that is predominantly engaged in the sale and servicing of motor vehicles, the leasing and servicing of motor vehicles, or both." 12 U.S.C. 5519(a). Section 1029(b) of the Dodd-Frank Act states: "Subsection (a) shall not apply to any person, to the extent that such person (1) provides consumers with any services related to residential or commercial mortgages or self-financing transactions involving real property; (2) operates a line of business (A) that involves the extension of retail credit or retail leases involving motor vehicles; and (B) in which (i) the extension of retail credit or retail leases are provided directly to consumers; and (ii) the contract governing such extension of retail credit or retail leases is not routinely assigned to an unaffiliated third party finance or leasing source; or (3) offers or provides a consumer financial product or service not involving or related to the sale, financing, leasing, rental, repair, refurbishment, maintenance, or other servicing of motor vehicles, motor vehicle parts, or any related or ancillary product or service." 12 U.S.C. 5519(b).

will be increased by \$1,000. However, if the annual percentage increase in the CPI-W would result in a \$949 increase in the threshold amount, the threshold amount will be increased by \$900.⁵ As stated in the Board Final Threshold Rules, if there is no annual percentage increase in the CPI-W, the Board and Bureau will not adjust the exemption threshold from the prior year.⁶

II. Adjustment and Commentary Revision

Effective January 1, 2016, the exemption threshold amount remains at \$54,600. This is based on the CPI-W in effect on June 1, 2015, which was reported on May 22, 2015. The Bureau of Labor Statistics publishes consumer-based indices monthly, but does not report a CPI change on June 1; adjustments are reported in the middle of the month. The CPI-W is a subset of the CPI-U index (based on all urban consumers) and represents approximately 28 percent of the U.S. population. Because the CPI-W reported on May 22, 2015 reflects a 0.8 percent decrease in the CPI-W from April 2014 to April 2015, the Board and the Bureau are not adjusting the exemption threshold amount. The Board and the Bureau are revising the commentaries to their respective regulations to add new comment 2(e)-9.vii to state that, from January 1, 2016 through December 31, 2016, the threshold amount is \$54,600. These revisions are effective January 1, 2016.

III. Administrative Law Matters

Administrative Procedure Act

Under the Administrative Procedure Act, notice and opportunity for public comment are not required if the Board and the Bureau find that notice and public comment are impracticable, unnecessary, or contrary to the public interest.⁷ The amendment in this notice is technical and applies the method previously set forth in the Board Final Threshold Rules.⁸ For these reasons, the Board and the Bureau have determined that publishing a notice of proposed rulemaking and providing opportunity for public comment are unnecessary. Therefore, the amendments are adopted in final form.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) does not apply to a rulemaking where a

Truth in Lending (Regulation Z)

AGENCIES: Board of Governors of the Federal Reserve System (Board); and Bureau of Consumer Financial Protection (Bureau).

ACTION: Final rules, official interpretations and commentary.

SUMMARY: The Board and the Bureau are publishing final rules amending the official interpretations and commentary

for the agencies' regulations that implement the Truth in Lending Act (TILA). The Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) amended TILA by requiring that the dollar threshold for exempt consumer credit transactions be adjusted annually by the annual percentage increase in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W). If there is no annual percentage increase in the CPI-W, the Board and Bureau will not adjust this exemption threshold from the prior year. Based on the annual percentage decrease in the CPI-W as of June 1, 2015, the exemption threshold will remain at \$54,600 through December 31, 2016.

Because the Dodd-Frank Act also requires similar adjustments in the Consumer Leasing Act's threshold for exempt consumer leases, the Board and the Bureau are making similar amendments to each of their respective regulations implementing the Consumer Leasing Act elsewhere in this issue of the **Federal Register**.

DATES: This final rule is effective January 1, 2016.

FOR FURTHER INFORMATION CONTACT:

Board: Vivian W. Wong, Counsel, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, at (202) 452–3667; for users of Telecommunications Device for the Deaf (TDD) only, contact (202) 263–4869.

Bureau: James Wylie, Counsel, Office of Regulations, Bureau of Consumer Financial Protection, at (202) 435–7700.

SUPPLEMENTARY INFORMATION:

I. Background

The Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act) increased the threshold in the Truth in Lending Act (TILA) for exempt consumer credit transactions¹ from \$25,000 to \$50,000, effective July 21, 2011.² In addition, the Dodd-Frank Act requires that this threshold be adjusted annually for inflation by the annual percentage increase in the Consumer Price Index for Urban Wage Earners and Clerical Workers (CPI-W), as published by the Bureau of Labor Statistics. In April 2011, the Board issued a final rule amending Regulation Z (which implements TILA) consistent

¹ Although consumer credit transactions above the threshold are generally exempt, loans secured by real property or by personal property used or expected to be used as the principal dwelling of a consumer and private education loans are covered by TILA regardless of the loan amount. See 12 CFR 226.3(b)(1)(i) and 12 CFR 1026.3(b)(1)(i).

² Public Law 111–203 section 1100E, 124 Stat. 1376 (2010).

⁹ See 5 U.S.C. 603 and 604.

¹⁰ 44 U.S.C. 3506; 5 CFR part 1320.

with these provisions of the Dodd-Frank Act along with a similar final rule amending Regulation M (which implements the Consumer Leasing Act) (collectively, the Board Final Threshold Rules).³

Title X of the Dodd-Frank Act transferred rulemaking authority for a number of consumer financial protection laws from the Board to the Bureau, effective July 21, 2011. In connection with this transfer of rulemaking authority, the Bureau issued its own Regulation Z implementing TILA in an interim final rule, 12 CFR part 1026 (Bureau Interim Final Rule).⁴ The Bureau Interim Final Rule substantially duplicated the Board's Regulation Z, including the revisions to the threshold for exempt transactions made by the Board in April 2011. Although the Bureau has the authority to issue rules to implement TILA for most entities, the Board retains authority to issue rules under TILA for certain motor vehicle dealers covered by section 1029(a) of the Dodd-Frank Act, and the Board's Regulation Z continues to apply to those entities.⁵

Section 226.3(b)(1)(ii) of the Board's Regulation Z and § 1026.3(b)(1)(ii) of the Bureau's Regulation Z, and their accompanying commentaries, provide that the exemption threshold will be adjusted annually effective January 1 of each year based on any annual percentage increase in the CPI-W that was in effect on the preceding June 1. Any increase in the threshold amount will be rounded to the nearest \$100 increment. For example, if the annual percentage increase in the CPI-W would result in a \$950 increase in the

threshold amount, the threshold amount will be increased by \$1,000. However, if the annual percentage increase in the CPI-W would result in a \$949 increase in the threshold amount, the threshold amount will be increased by \$900.⁶ As stated in the Board Final Threshold Rules, if there is no annual percentage increase in the CPI-W, the Board and Bureau will not adjust the exemption threshold from the prior year.⁷

II. Adjustment and Commentary Revision

Effective January 1, 2016, the exemption threshold amount remains at \$54,600. This is based on the CPI-W in effect on June 1, 2015, which was reported on May 22, 2015. The Bureau of Labor Statistics publishes consumer-based indices monthly, but does not report a CPI change on June 1; adjustments are reported in the middle of the month. The CPI-W is a subset of the CPI-U index (based on all urban consumers) and represents approximately 28 percent of the U.S. population. Because the CPI-W reported on May 22, 2015 reflects a 0.8 percent decrease in the CPI-W from April 2014 to April 2015, the Board and the Bureau are not adjusting the exemption threshold amount. The Board and the Bureau are revising the commentaries to their respective regulations to add new comment 3(b)-1.vii to state that, from January 1, 2016 through December 31, 2016, the threshold amount is \$54,600. These revisions are effective January 1, 2016.

III. Administrative Law Matters

Administrative Procedure Act

Under the Administrative Procedure Act, notice and opportunity for public comment are not required if the Board and the Bureau find that notice and public comment are impracticable, unnecessary, or contrary to the public interest.⁸ The amendment in this notice is technical and applies the method previously set forth in the Board Final Threshold Rules.⁹ For these reasons, the Board and the Bureau have determined that publishing a notice of proposed rulemaking and providing opportunity for public comment are unnecessary. Therefore, the amendments are adopted in final form.

⁶ See comments 3(b)-1 in Supplements I of 12 CFR part 226 and 12 CFR part 1026.

⁷ 76 FR 18354, 18355 n.1 (Apr. 4, 2011) (“[A]n annual period of deflation or no inflation would not require a change in the threshold amount.”).

⁸ 5 U.S.C. 553(b)(B).

⁹ See *supra* note 7.

Regulatory Flexibility Act

The Regulatory Flexibility Act (RFA) does not apply to a rulemaking where a general notice of proposed rulemaking is not required.¹⁰ As noted previously, the agencies have determined that it is unnecessary to publish a general notice of proposed rulemaking for this joint final rule. Accordingly, the RFA's requirements relating to an initial and final regulatory flexibility analysis do not apply.

Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995,¹¹ the agencies reviewed this final rule. No collections of information pursuant to the Paperwork Reduction Act are contained in the final rule.

List of Subjects

12 CFR Part 226

BOARD OF GOVERNORS OF THE FEDERAL RESERVE SYSTEM

Text of Final Revisions

For the reasons set forth in the preamble, the Board amends Regulation Z, 12 CFR part 226, as set forth below:

PART 226—TRUTH IN LENDING (REGULATION Z)

- 1. The authority citation for part 226 continues to read as follows:

Authority: 12 U.S.C. 3806; 15 U.S.C. 1604, 1637(c)(5), and 1639(l); Pub. L. 111-24, section 2, 123 Stat. 1734; Pub. L. 111-203, 124 Stat. 1376.

- 2. In Supplement I to part 226, under *Section 226.3—Exempt Transactions*, under *3(b) Credit over applicable threshold amount*, paragraph 1.vii is added to read as follows:

Supplement I to Part 226—Official Staff Interpretations

* * * * *

Subpart A—General

* * * * *

¹⁰ 5 U.S.C. 603 and 604.

¹¹ 44 U.S.C. 3506; 5 CFR part 1320.

Section 226.3—Exempt Transactions

* * * * *

3(b) Credit over applicable threshold amount.

1. * * *

vii. From January 1, 2016 through December 31, 2016, the threshold amount is \$54,600.

* * * * *

BUREAU OF CONSUMER FINANCIAL PROTECTION**Authority and Issuance**

For the reasons set forth in the preamble, the Bureau amends Regulation Z, 12 CFR part 1026, as set forth below:

PART 1026—TRUTH IN LENDING (REGULATION Z)

■ 3. The authority citation for part 1026 continues to read as follows:

Authority: 12 U.S.C. 2601, 2603–2605, 2607, 2609, 2617, 3353, 5511, 5512, 5532, 5581; 15 U.S.C. 1601 *et seq.*

■ 4. In Supplement I to part 1026, under Section 1026.3—Exempt Transactions, under 3(b) Credit Over Applicable Threshold Amount, paragraph 1.vii is added to read as follows:

Supplement I to Part 1026—Official Interpretations

* * * * *

Subpart A—General

* * * * *

Section 1026.3—Exempt Transactions

* * * * *

3(b) Credit Over Applicable Threshold Amount

1. * * *

vii. From January 1, 2016 through December 31, 2016, the threshold amount is \$54,600.

* * * * *

By order of the Board of Governors of the Federal Reserve System, November 18, 2015.

Robert deV. Frierson,

Secretary of the Board.

Dated: September 22, 2015.

RIN 2120–AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for certain The Boeing Company Model 737–100,–200,–200C,–300,–400, and –500 series airplanes. This AD was prompted by reports of cracks in fuselage frames, and a report of a missing strap that was not installed on a fuselage frame during production. This AD requires an inspection to determine if the strap adjacent to a certain stringer is installed, and repair if it is missing; repetitive inspections of the frame for cracking or a severed frame web; and related investigative and corrective actions if necessary. This AD also provides optional actions to terminate certain repetitive inspections. We are issuing this AD to detect and correct missing fuselage frame straps and frame cracking that can result in severed frames which, with multiple adjacent severed frames, or the combination of a severed frame and fuselage skin chemical mill cracks, can result in uncontrolled decompression of the airplane.

DATES: This AD is effective January 4, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 4, 2016.

ADDRESSES: For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone 206–544–5000, extension 1; fax 206–766–5680; Internet <https://www.myboeingfleet.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2014–0346.”

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2014–0346; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The address for the Docket Office (phone: 800–647–5527) is Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Galib Abumeri, Aerospace Engineer, Airframe Branch, ANM–120L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, CA 90712–4137; phone: 562–627–5324; fax: 562–627–5210; email: galib.abumeri@faa.gov.

SUPPLEMENTARY INFORMATION:**Discussion**

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to certain The Boeing Company Model 737–100,–200,–200C–300,–400, and–500 series airplanes. The NPRM published in the **Federal Register** on June 30, 2014 (79 FR 36672). The NPRM was prompted by reports of cracks in fuselage frames, and a report of a missing strap that was not installed on a fuselage frame during production. The NPRM proposed to require an inspection to determine if the strap adjacent to a certain stringer is installed, and repair if it is missing; repetitive inspections of the frame for cracking or a severed frame web; and related investigative and corrective actions if necessary. The NPRM also provided optional actions to terminate certain repetitive inspections. We are issuing this AD to detect and correct missing fuselage frame straps and frame cracking that can result in severed frames. Continued operation of the airplane with multiple adjacent severed frames, or the combination of a severed frame and fuselage skin chemical mill cracks, can result in uncontrolled decompression of the airplane.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM (79 FR 36672,

June 30, 2014) and the FAA's response to each comment.

Effect of Winglets on AD

Aviation Partners Boeing stated that installation of winglets per Supplemental Type Certificate (STC) ST01219SE ([http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgstc.nsf/0/ebd1cec7b301293e86257cb30045557a/\\$FILE/ST01219SE.pdf](http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgstc.nsf/0/ebd1cec7b301293e86257cb30045557a/$FILE/ST01219SE.pdf)) does not affect the actions specified in the NPRM (79 FR 36672, June 30, 2014).

We concur with the commenter. We have redesignated paragraph (c) of the proposed AD (79 FR 36672, June 30, 2014) as paragraph (c)(1) of this AD, and have added a new paragraph (c)(2) to this AD to state that installation of STC ST01219SE ([http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgstc.nsf/0/ebd1cec7b301293e86257cb30045557a/\\$FILE/ST01219SE.pdf](http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgstc.nsf/0/ebd1cec7b301293e86257cb30045557a/$FILE/ST01219SE.pdf)) does not affect the ability to accomplish the actions required by this AD. Therefore, for airplanes on which STC ST01219SE is installed, a "change in product" alternative method of compliance (AMOC) approval request is not necessary to comply with the requirements of 14 CFR 39.17.

Request To Revise Preamble Wording

Boeing noted that the SUMMARY of the NPRM (79 FR 36672, June 30, 2014) explained that some optional actions would terminate "certain" repetitive inspections. Boeing requested that we use this same wording in the Proposed AD Requirements section of the NPRM (which omitted the word "certain").

Although we agree with the commenter's statement, the Proposed AD Requirements section is not repeated in a final rule. Since the referenced omission does not affect the required actions or the unsafe condition, no changes to this final rule are needed.

Request To Specify Inspection Method

Boeing requested that we add an inspection in paragraph (g) of the proposed AD (79 FR 36672, June 30, 2014). Boeing stated that this is consistent with the compliance information described in Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013.

We agree with the commenter's request. We inadvertently omitted the inspection requirement in paragraph (g) of the proposed AD (79 FR 36672, June 30, 2014), which is described in Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013. We have revised paragraph (g) of this AD to require that the inspection and

applicable repair be done by using a method approved in accordance with the procedures specified in paragraph (q) of this AD. Paragraph (g) of this AD applies only to airplanes identified as Group 1 in Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013. Currently, there are no Group 1 airplanes in service in the United States, so notice of this new requirement is not necessary.

Request To Revise Terminating Action Wording

Boeing requested that we revise the wording in paragraphs (i) and (j) of the proposed AD (79 FR 36672, June 30, 2014) to state the following actions.

- Doing the repair or preventive modification of the frame at station 328 terminates the applicable repetitive inspection requirements.
- Doing the preventive modification of the frame at station 360 terminates the applicable station 360 inspection requirements.
- Doing the repair or preventive modification of the frame at station 328, and doing the preventive modification of the frame at station 360 terminates the applicable repetitive inspection requirements of the frame at station 344, and the Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, skin inspections.

Boeing stated that the proposed wording in paragraphs (i) and (j) of the proposed AD (79 FR 36672, June 30, 2014) is not clear. Boeing stated that inspections of the frame at station 328 or at station 360 can be terminated by a single action (applicable repair or modification). Boeing explained that accomplishing both specified actions at station 328 and station 360 terminates the station 344 frame inspections and the option 2 skin inspections.

We agree to clarify the acceptable terminating actions. We have added new paragraph (m) of this AD, which provides the following terminating actions. We have redesignated subsequent paragraphs accordingly.

- Accomplishing the repair or preventive modification of the frame at station 328 terminates the inspections of that frame required by paragraphs (i), (j), and (k) of this AD.
- Accomplishing the repair or preventive modification of the frame at station 328 and the preventive modification of the frame at station 360, terminates the inspections of the frame at station 344 and the fuselage skin inspections required by paragraphs (i) and (j) of this AD.
- Accomplishing the repair or preventive modification of the frame at station 360 terminates the inspections of

that frame required by paragraphs (i) and (j) of this AD.

- Accomplishing the repair or preventive modification of the frame at station 328 terminates the fuselage skin inspections and the station 328 frame inspections required by paragraphs (i) and (j) of this AD.

Recommendation To Specify Optional Preventive Modification

Boeing recommended that we specify in paragraphs (i) and (j) of the proposed AD (79 FR 36672, June 30, 2014) that the station 328 repair described in Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, can be used as an optional preventive modification.

We partially agree with the commenter's request. The commenter's request is already addressed in the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013. However, additional text might help clarify this provision. We have added additional text to paragraphs (i), (j), and (k) of this AD that operators may do the repair of the frame at station 328, as specified in paragraph (m) of this AD, as an optional preventive modification for that frame.

Requests To Revise Paragraph Format and Inspection Method

Boeing requested that we revise paragraphs (i) and (j) of the proposed AD (79 FR 36672, June 30, 2014) by moving the requirements for Group 6 airplanes to a new paragraph. Boeing stated that the service information for Group 6 airplanes provides directed inspection instructions for the station 328 frame only, as provided in table 5 of paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013. Boeing added that for Group 6 airplanes, there are no directed inspections for station 344 or station 360, but there are related investigative and corrective actions for detailed inspections of the frame at station 312 and station 344.

Southwest Airlines (SWA) requested that we specify that the frame at station 344 requires detailed inspections, not detailed and eddy current inspections. SWA stated that Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, describes only detailed inspections at station 344.

We partially agree with both commenters. We disagree with making the changes requested by the commenters. However, we agree that certain actions are only done at certain locations and for certain airplanes. The inspections at station 344 are detailed inspections only. Application of the

appropriate inspection method to a given frame is addressed by the phrase “as applicable,” *i.e.*, actions are applicable to the frames identified in the service information for each group of airplane. We have revised paragraphs (i)(1), (i)(2)(i), (i)(2)(ii), (j)(1), and (j)(2) of this AD by adding “as applicable” after the station locations. This revision clarifies that those actions are done only as specified in the service information.

Request To Add Sub-Paragraph Headers

Boeing requested that we add the subtitles “Initial Inspections” and “Follow-on Inspections” to paragraphs (i)(1) and (i)(2), respectively, of the proposed AD (79 FR 36672, June 30, 2014). Boeing also requested that we change the wording in paragraph (i)(2) of the proposed AD to “Accomplishing the follow-on inspections required by paragraph (i)(2) of this AD,” instead of “Accomplishing the initial inspections” Boeing stated that paragraph (i) of the proposed AD would mandate the inspections for airplanes with fewer than 28,300 total flight cycles, where compliance (tables 4, 7, and 8 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013) consists of initial inspections and then follow-on inspections that contain options. Boeing explained that paragraph (i)(1) of the proposed AD would mandate the initial inspections, and paragraph (i)(2) of the proposed AD would mandate the follow-on inspections. Boeing also explained that paragraph (i)(2) of the proposed AD phrase “accomplishing the initial inspections” is understood to refer to the first follow-on inspection directed by the compliance time (threshold).

We do not agree with the commenter’s request. Paragraph (i)(2) of this AD follows the format of Boeing’s service bulletin compliance tables, which has a different repeat interval from the inspections specified in paragraph (i)(1) of this AD. Paragraphs (i)(1) and (i)(2) of this AD contain both initial and repetitive inspections as well as related investigative actions. We have not changed this AD in this regard.

Request To Revise Repetitive Inspection Wording

Boeing requested that we revise the last sentence of paragraph (i)(2)(ii) of the proposed AD (79 FR 36672, June 30, 2014) to state, “Repeat the inspections specified in this paragraph thereafter” Boeing stated that this wording would then match the wording for the repetitive inspections specified in paragraph (i)(2)(i) of the proposed AD.

We agree with the commenter’s request. In this case, similar wording will provide consistent paragraph wording without changing the intent of the NPRM (79 FR 36672, June 30, 2014). We have revised the wording in paragraph (i)(2)(ii) of this AD to “Repeat the inspections specified in this paragraph thereafter at the applicable time and intervals specified in”

Request To Clarify a Certain Compliance Time

Europe Airpost requested that, in order to avoid any confusion, we clearly state a compliance time for paragraph (j) of the proposed AD (79 FR 36672, June 30, 2014) for airplanes that have 28,300 total flight cycles or more. The commenter asked whether those airplanes would fall under the condition 28,300 total flight cycles but less than 32,800 total flight cycles, or 32,800 total flight cycles or more.

We agree that clarification is necessary. In this case, paragraph (j) of this AD states to use the applicable times specified in tables 4, 5, 7, and 8, of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013. Individual airplanes within an operator’s fleet could fall into different categories and thus have different compliance times. Operators are to use the appropriate compliance times and repetitive intervals based upon the applicable number of total flight cycles that have been accumulated on each airplane as of the effective date of this AD. We have added new paragraph (n)(3) of the AD to inform operators that the “Condition” columns of the compliance tables also contain compliance information that corresponds to the effective date of the AD. We have also revised paragraphs (i)(1) and (j)(1) of this AD to refer to paragraph (n)(3) of this AD.

Request To Clarify Terminating Action Wording

SWA requested that we revise the terminating action portion of paragraph (j) of the proposed AD (79 FR 36672, June 30, 2014) to clarify the specified actions. SWA stated that, as written, the terminating action statement seems to imply that the operator is required to accomplish both the preventive modification of the frame at station 360 and the repair of the frame at station 328 to terminate the repetitive inspection requirements for any of the station 328, 344, and 360 frames. SWA also stated that the terminating action in paragraph (j) of the proposed AD does not specify actions or terminating actions if a repair is installed at the station 344 frame.

SWA explained that Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, contains terminating action in the footnotes of the compliance tables in paragraph 1.E., “Compliance,” which the commenter thinks should be restated in the AD.

We agree with the commenter’s request. For clarity, we have moved the terminating action provisions that were specified in paragraphs (i)(1), (i)(2), (j), and (k) of the proposed AD (79 FR 36672, June 30, 2014) to new paragraphs (m)(1) through (m)(4) of this AD. We have redesignated subsequent paragraphs accordingly.

Requests To Specify Eddy Current Inspection

Europe Airpost requested that we clarify whether we meant to exclude the eddy current inspection at station 328 described in Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, in paragraph (k) of the proposed AD (79 FR 36672, June 30, 2014). Boeing requested that we add the eddy current inspection at station 328 described in Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, in paragraph (k) of the proposed AD.

We agree with Boeing’s request to specify the eddy current inspection and Europe Airpost’s request to clarify the eddy current inspection requirement. We inadvertently omitted the eddy current inspection from paragraph (k) of the proposed AD (79 FR 36672, June 30, 2014) which applies to Group 7 airplanes. Our intention was to match the actions described in Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013. In the NPRM (79 FR 36672, June 30, 2014), we did not identify any differences with Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, in regards to the required inspections, which includes repetitive eddy current inspections at station 328. For Groups 2 through 7 airplanes, paragraphs (i) and (j) of the proposed AD do specify detailed and HFEC inspections for Groups 2 through 6 airplanes. Therefore, we have revised paragraph (k) of this AD to specify doing eddy current inspections, in addition to the detailed inspections, of the frame at station 328 for Group 7 airplanes.

Request To Specify Terminating Actions for Station 380

SWA requested that we specify procedures or terminating actions for repairs installed at the station 380 frame, since paragraph (l) of the proposed AD (79 FR 36672, June 30, 2014) does not specify such actions.

We do not agree with the commenter's request. Boeing has not provided such repairs for our approval in Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013. Therefore, we have no specific engineering data to review and approve. We have not changed this AD in this regard.

Request for Credit for Certain Repairs

SWA requested that we revise paragraphs (i) through (l) of the proposed AD (79 FR 36672, June 30, 2014) to include provisions for existing repairs that were done using the service repair manual (SRM) or the original equipment manufacturer (OEM) instructions. SWA requested that the NPRM be revised to either terminate the inspections or include alternative actions if existing repairs inhibit the ability to perform the inspections.

We partially agree with the commenter's request. We agree that repairs approved by Boeing via FAA Form 8100-9 (Statement of Compliance with Airworthiness Standards) would have also included the appropriate inspections. We disagree that SRM repairs would necessarily provide the same level of safety. The commenter did

not specify for which SRM repairs it was requesting approval. Such repairs might or might not have included consideration of the safety issues addressed by Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, and this AD (e.g., skin cracking combined with frame cracking). We have added a new paragraph (p) to this AD to provide credit for repairs of the station 328, 344, 360, and 380 frames in the areas addressed by this AD that have been approved by the Boeing ODA via FAA Form 8100-9 prior to the effective date of this AD for the repairs specified in paragraphs (i), (j), (k), and (l) of this AD. We have redesignated subsequent paragraphs accordingly.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD with the changes described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (79 FR 36672, June 30, 2014) for correcting the unsafe condition; and

- Do not add any additional burden upon the public than was already proposed in the NPRM (79 FR 36672, June 30, 2014).

We also determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013. The service information describes procedures for inspection for cracking and missing straps, modification, and repair of certain fuselage frames. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section of this AD.

Costs of Compliance

We estimate that this AD affects 417 airplanes of U.S. registry.

We estimate the following costs to comply with this AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspections	21 work-hours × \$85 per hour = \$1,785 per inspection cycle.	\$0	\$1,785 per inspection cycle.	\$744,345 per inspection cycle.

We have received no definitive data that would enable us to provide cost estimates for certain on-condition

actions specified in this AD. However, we estimate the following costs to do any necessary repairs of the station 328

frame and the station 360 frame. We have no way of determining the number of aircraft that might need these repairs:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Frame 328 repair	25 work-hours × \$85 per hour = \$2,125	Negligible ...	\$2,125
Frame 360 repair	5 work-hours × \$85 per hour = \$425	Negligible ...	425

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations

for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the

distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2015–23–08 The Boeing Company:

Amendment 39–18324; Docket No. FAA–2014–0436; Directorate Identifier 2014–NM–010–AD.

(a) Effective Date

This AD is effective January 4, 2016.

(b) Affected ADs

None.

(c) Applicability

(1) This AD applies to The Boeing Company Model 737–100, –200, –200C, –300, –400, and –500 series airplanes, certificated in any category, as identified in Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013.

(2) Installation of Supplemental Type Certificate (STC) ST01219SE ([http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgstc.nsf/0/ebd1cec7b301293e86257cb30045557a/\\$FILE/ST01219SE.pdf](http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgstc.nsf/0/ebd1cec7b301293e86257cb30045557a/$FILE/ST01219SE.pdf)) does not affect the ability to accomplish the actions required by this AD. Therefore, for airplanes on which STC ST01920SE is installed, a “change in product” alternative method of compliance (AMOC) approval request is not necessary to comply with the requirements of 14 CFR 39.17.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by reports of cracks in fuselage frames, and a report of a missing strap that was not installed on a fuselage frame during production. We are issuing this AD to detect and correct missing fuselage frame straps and frame cracking that can result in severed frames. Continued operation of the airplane with multiple adjacent severed frames, or the combination of a severed frame and fuselage skin chemical mill cracks, can result in uncontrolled decompression of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Actions for Group 1 Airplanes

For airplanes identified as Group 1 in Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013: At the applicable time specified in table 1 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, except as provided by paragraph (n)(1) of this AD, do the inspection for cracking of the frames and applicable repairs using a method approved in accordance with the procedures specified in paragraph (q) of this AD.

(h) Groups 2 Through 7 Airplanes: Inspection for Strap Installation at Station 312

For airplanes identified as Groups 2 through 7 in Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013: At the applicable time specified in tables 2 and 3 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, except as provided by paragraph (n)(1) of this AD, do a general visual inspection of the frame at station 312 to determine if the strap adjacent to stringer S–22 right is installed, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013. If the strap is not installed, before further flight, repair using a method approved in accordance with the procedures specified in paragraph (q) of this AD.

(i) Groups 2 Through 6 Airplanes With Less Than 28,300 Total Flight Cycles: Repetitive Inspections, Related Investigative Actions, and Corrective Actions at Stations 328, 344, and 360

For airplanes identified as Groups 2 through 6 in Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, that have accumulated less than 28,300 total flight cycles as of the effective date of this AD: Do the actions required by paragraphs (i)(1) and (i)(2) of this AD. Operators may do the repair of the frame at station 328 as specified in paragraph (m) of this AD as an optional preventive modification for that frame.

(1) At the applicable times specified in tables 4, 5, 7, and 8 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, except as provided by paragraphs (n)(1) and (n)(3) of this AD: Do detailed and eddy current inspections of the frame at stations 328, 344, and 360, as applicable, for cracking or a severed frame web; and do all applicable related investigative and corrective actions; in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, except as specified in paragraph (n)(2) of this AD. Do all applicable related investigative and corrective actions before further flight. Repeat the applicable inspections thereafter at the applicable time and intervals specified in paragraph 1.E., “Compliance,” of Boeing

Alert Service Bulletin 737–53A1323, dated December 6, 2013, until the inspection required by paragraph (i)(2) of this AD is done.

(2) At the applicable time specified in tables 4, 5, 7, and 8 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, do the actions specified in paragraph (i)(2)(i) or (i)(2)(ii) of this AD. Accomplishing the initial inspections required by paragraph (i)(2) of this AD terminates the inspections required by paragraph (i)(1) of this AD.

(i) Do detailed and eddy current inspections of the frame at stations 328, 344, and 360, as applicable, for cracking or a severed frame web; and do all applicable related investigative and corrective actions; in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, except as specified in paragraph (n)(2) of this AD. Do all applicable related investigative and corrective actions before further flight. Repeat the inspections specified in this paragraph thereafter at the applicable time and intervals specified in paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013.

(ii) Do detailed and eddy current inspections of the frame at stations 328, 344, and 360, as applicable, for cracking or a severed frame web; and external detailed and eddy current inspections of the fuselage skin for cracking; and do all applicable related investigative and corrective actions; in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, except as specified in paragraph (n)(2) of this AD. Do all applicable related investigative and corrective actions before further flight. Repeat the inspections specified in this paragraph thereafter at the applicable time and intervals specified in paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013.

(j) Groups 2 Through 6 Airplanes With 28,300 Total Flight Cycles or More: Repetitive Inspections, Related Investigative Actions, and Corrective Actions at Stations 328, 344, and 360

For airplanes identified as Groups 2 through 6 in Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, that have accumulated 28,300 total flight cycles or more as of the effective date of this AD: At the applicable times specified in tables 4, 5, 7, and 8 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, except as provided by paragraphs (n)(1) and (n)(3) of this AD, do the inspections specified in paragraph (j)(1) or (j)(2) of this AD; and do all applicable related investigative and corrective actions; in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1323, dated December 6, 2013, except as specified in paragraph (n)(2) of this AD. Do all applicable related investigative and corrective actions before further flight. Repeat the applicable inspections specified in paragraph (j)(1) or

(j)(2) of this AD thereafter at the applicable time and intervals specified in paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013. Operators may do the repair of the frame at station 328, as specified in paragraph (m) of this AD, as an optional preventive modification for that frame.

(1) Do detailed and eddy current inspections of the frame at stations 328, 344, and 360, as applicable, for cracking or a severed frame web.

(2) Do detailed and eddy current inspections of the frame at stations 328, 344, and 360, as applicable, for cracking or a severed frame web; and external detailed and eddy current inspections of the fuselage skin for cracking.

(k) Group 7 Airplanes: Repetitive Inspections, Related Investigative Actions, and Corrective Actions at Station 328

For airplanes identified as Group 7 in Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013: At the applicable time specified in table 6 of paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, except as provided by paragraph (n)(1) of this AD, do a detailed inspection and eddy current inspection of the frame at station 328 for cracking or a severed frame web; and do all applicable related investigative and corrective actions; in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, except as specified in paragraph (n)(2) of this AD. Do all applicable related investigative and corrective actions before further flight. Repeat the inspections specified in this paragraph thereafter at the applicable time and intervals specified in paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013. Operators may do the repair of the frame at station 328, as specified in paragraph (m) of this AD, as an optional preventive modification for that frame.

(l) Groups 2 Through 5 Airplanes: Repetitive Inspections, Related Investigative Actions, and Corrective Actions at Station 380

For airplanes identified as Groups 2 through 5 in Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013: At the applicable time specified in tables 9 and 10 of paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, except as provided by paragraph (n)(1) of this AD, do detailed and eddy current inspections of the frame at station 380 for cracking or a severed frame web; and do all applicable corrective actions; in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, except as specified in paragraph (n)(2) of this AD. Do all applicable corrective actions before further flight. Repeat the inspections specified in this paragraph thereafter at the applicable time and intervals specified in paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013.

(m) Terminating Actions for Airplanes Identified as Groups 2, 3, 4, 5, 6, and 7

(1) For airplanes identified as Groups 2, 3, 4, 5, and 7 in Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013: Accomplishing the repair or preventive modification of the frame at station 328, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, except as required by paragraph (n)(2) of this AD, terminates the inspections of that frame required by paragraphs (i), (j), and (k) of this AD.

(2) For airplanes identified as Groups 2, 3, 4, and 5 in Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013: Accomplishing the repair or preventive modification of the frame at station 328 and the preventive modification of the frame at station 360, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, except as required by paragraph (n)(2) of this AD, terminates the inspections of the frame at station 344 and the fuselage skin inspections required by paragraphs (i) and (j) of this AD.

(3) For airplanes identified as Groups 2, 3, 4, and 5 in Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013: Accomplishing the repair or preventive modification of the frame at station 360, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, except as required by paragraph (n)(2) of this AD, terminates the inspections of that frame required by paragraphs (i) and (j) of this AD.

(4) For airplanes identified as Group 6 in Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013: Accomplishing the repair or preventive modification of the frame at station 328, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, except as required by paragraph (n)(2) of this AD, terminates the fuselage skin inspections and the station 328 frame inspections required by paragraphs (i) and (j) of this AD.

(n) Exceptions to Service Information

(1) Where Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, specifies a compliance time after the "original issue date of this service bulletin," this AD requires compliance within the specified compliance time after the effective date of this AD.

(2) If any cracking is found during any inspection required by this AD, and Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, specifies to contact Boeing for appropriate action: Before further flight, repair the cracking using a method approved in accordance with the procedures specified in paragraph (q) of this AD.

(3) The Condition column of Tables 4, 5, 7, and 8 in paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, refers to total flight cycles "at the original issue date of this service bulletin." This AD, however, applies to the airplanes with the specified total flight cycles as of the effective date of this AD.

(o) Post-Repair Inspections and Post-Modification Inspections

(1) The post-repair and post-modification inspections specified in tables 13 through 15 of paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, are not required by this AD.

(2) The post-repair and post-modification inspections specified in Tables 13 through 15 of paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, may be used in support of compliance with section 121.1109(c)(2) or 129.109(b)(2) of the Federal Aviation Regulations (14 CFR 121.1109(c)(2) or 14 CFR 129.109(b)(2)). The corresponding actions specified in the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013, are not required by this AD.

(p) Credit for Previous Actions

This paragraph provides credit for repairs of the station 328, 344, 360, and 380 frames in the areas addressed by this AD that have been approved by the Boeing Organization Designation Authorization (ODA) via FAA Form 8100-9 (Statement of Compliance with Airworthiness Standards) prior to the effective date of this AD for the repairs specified in paragraphs (i), (j), (k), and (l) of this AD.

(q) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Los Angeles Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (r) of this AD. Information may be emailed to: 9-ANM-LAACO-AMOC-Requests@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization that has been authorized by the Manager, Los Angeles ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(r) Related Information

For more information about this AD, contact Galib Abumeri, Aerospace Engineer, Airframe Branch, ANM-120L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, CA 90712-4137; phone: 562-627-5324; fax: 562-627-5210; email: galib.abumeri@faa.gov.

(s) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference

(IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Boeing Alert Service Bulletin 737-53A1323, dated December 6, 2013.

(ii) Reserved.

(3) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P.O. Box 3707, MC 2H-65, Seattle, WA 98124-2207; telephone 206-544-5000, extension 1; fax 206-766-5680; Internet <https://www.myboeingfleet.com>.

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Renton, Washington, on October 30, 2015.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2015-3642; Directorate Identifier 2015-CE-028-AD; Amendment 39-18335; AD 2015-24-03]

RIN 2120-AA64

Airworthiness Directives; SOCATA Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for SOCATA Model TB 9, TB 10, TB 20, TB 21, and TB 200 airplanes. This AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as corrosion of the horizontal stabilizer. We are issuing this AD to require actions to address the unsafe condition on these products.

DATES: This AD is effective January 4, 2016.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in the AD as of January 4, 2016.

ADDRESSES: You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-3642; or in person at Document Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

For service information identified in this AD, contact SOCATA NORTH AMERICA, North Perry Airport, 601 NE 10 Street, Pompano Beach, Florida 33060; phone: (954) 366-3331; Internet: <http://www.socatanorthamerica.com/default.htm>. You may view this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329-4148. It is also available on the Internet at <http://www.regulations.gov> by searching for Docket No. FAA-2015-3642.

FOR FURTHER INFORMATION CONTACT:

Albert J. Mercado, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4119; fax: (816) 329-4090; email: albert.mercado@faa.gov.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to SOCATA Models TB 9, TB 10, TB 20, TB 21, and TB 200 airplanes. The NPRM was published in the **Federal Register** on August 28, 2015 (80 FR 52215). The NPRM proposed to correct an unsafe condition for the specified products and was based on mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country. The MCAI states:

During accomplishment of SOCATA Service Bulletin (SB) SB10-152-55 at original issue, some operators reported finding heavy corrosion of the horizontal stabilizer (HS) spar.

The results of the technical investigation have identified that the corrosion was caused by humidity ingress in the HS on aeroplanes subject to severe environmental conditions.

This condition, if not detected and corrected, could result in buckling and permanent HS distortion, possibly resulting in reduced control of the aeroplane.

To address this unsafe condition, SOCATA issued SB 10-152-55 Revision 1 to provide

instructions for inspection and corrective action.

For the reasons described above, this AD requires repetitive inspections of the affected area of the HS and, depending on findings, accomplishment of applicable corrective action(s).

The MCAI can be found in the AD docket on the Internet at: <http://www.regulations.gov/#!documentDetail;D=FAA-2015-3642-0001>.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comment received on the proposal and the FAA's response to the comment.

Request

Anthony Pynes commented that that he does not believe the methodology used and the foundational data available supports the need for this AD, and thus he believes that this AD is not necessary.

We do not agree. The FAA, in working with the State of Design airworthiness authority (EASA), determined that the actions of this AD on the horizontal stabilizer of the affected airplanes are necessary to correct an unsafe condition. Included in this is the risk in establishing such actions at the required compliance times. No changes to the AD have been made based on this comment.

Conclusion

We reviewed the relevant data, considered the comment received, and determined that air safety and the public interest require adopting the AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (80 FR 52215, August 28, 2015) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (80 FR 52215, August 28, 2015).

Related Service Information Under 14 CFR Part 51

We reviewed DAHER-SOCATA TB Aircraft Mandatory Service Bulletin SB 10-152, Amendment 1, dated April 2015. The service information describes procedures for inspection for corrosion on the horizontal stabilizer spar and repair, if necessary. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of the AD.

Costs of Compliance

We estimate that this AD will affect 195 products of U.S. registry. We also estimate that it would take about 2 work-hours per product to comply with the basic requirements of this proposed AD. The average labor rate is \$85 per work-hour.

Based on these figures, we estimate the cost of this AD on U.S. operators to be \$33,150, or \$170 per product.

In addition, we estimate that any necessary follow-on actions would take about 15 to 38 work-hours and require parts costing \$250 to \$400 depending on the type of repair, for a cost of \$2,325 to \$4,280 per product. The cost may vary depending on the extent of damage found. We have no way of determining the number of products that may need these actions.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and
- (4) Will not have a significant economic impact, positive or negative,

on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-3642; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new AD:

2015-24-03 SOCATA: Amendment 39-18335; Docket No. FAA-2015-3642; Directorate Identifier 2015-CE-028-AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective January 4, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to SOCATA Models TB 9, TB 10, TB 20, TB 21, and TB 200 airplanes, all manufacturer serial numbers, certificated in any category.

(d) Subject

Air Transport Association of America (ATA) Code 55: Stabilizers.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as corrosion of the horizontal stabilizer. We are issuing this AD to detect and correct corrosion of the

horizontal stabilizer (HS) spar, which could result in buckling and permanent HS distortion, possibly resulting in reduced control.

(f) Actions and Compliance

Unless already done, do the actions in paragraphs (f)(1) through (f)(5) of this AD:

(1) Within 13 months after January 4, 2016 (the effective date of this AD) and repetitively thereafter at intervals not to exceed 72 months, do a special detailed inspection of the HS spar following the instructions of DAHER-SOCATA TB Aircraft Mandatory Service Bulletin SB 10-152, Amendment 1, dated April 2015.

(2) If no discrepancy is detected during any inspections required by paragraph (f)(1) of this AD, protect the HS spar following the instructions of DAHER-SOCATA TB Aircraft Mandatory Service Bulletin SB 10-152, Amendment 1, dated April 2015.

(3) If any discrepancy is detected during any inspection required by paragraph (f)(1) of this AD, before further flight, do the applicable corrective action(s) following the instructions of DAHER-SOCATA TB Aircraft Mandatory Service Bulletin SB 10-152, Amendment 1, dated April 2015.

(4) Accomplishment of protection or corrective actions on an airplane as required by paragraph (f)(2) or (f)(3) of this AD, as applicable, does not constitute terminating action for the repetitive inspections as required by paragraph (f)(1) of this AD for that airplane.

(5) Inspections and corrective actions on an airplane done before January 4, 2016 (the effective date of this AD) following the instructions of DAHER-SOCATA TB Aircraft Recommended Service Bulletin SB 10-152, dated May 2013, are acceptable to comply with the requirements of this AD for that airplane. After January 4, 2016 (the effective date of this AD), repetitive inspections and applicable corrective actions, as required by this AD, must be done as required by paragraph (f)(1) of this AD following the instructions of DAHER-SOCATA TB Aircraft Mandatory Service Bulletin SB 10-152, Amendment 1, dated April 2015.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Albert Mercado, Aerospace Engineer, FAA, Small Airplane Directorate, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329-4119; fax: (816) 329-4090; email: albert.mercado@faa.gov. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product:* For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority

(or their delegated agent). You are required to assure the product is airworthy before it is returned to service.

(h) Related Information

Refer to MCAI European Aviation Safety Agency (EASA) AD No. 2015-0130, dated July 7, 2015; and DAHER-SOCATA TB Aircraft Recommended Service Bulletin SB 10-152, dated May 2013, for related information. The MCAI can be found in the AD docket on the Internet at: <http://www.regulations.gov/>#!/documentDetail;D=FAA-2015-3642-0001.

(i) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) DAHER-SOCATA TB Aircraft Mandatory Service Bulletin SB 10-152, Amendment 1, dated April 2015.

(ii) Reserved.

(3) For SOCATA service information identified in this AD, contact SOCATA NORTH AMERICA, North Perry Airport, 601 NE 10 Street, Pompano Beach, Florida 33060; phone: (954) 366-3331; Internet: <http://www.socatanorthamerica.com/default.htm>.

(4) You may review this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329-4148. In addition, you can access this service information on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-3642.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Kansas City, Missouri, on November 17, 2015.

Melvin Johnson,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2015-3073; Directorate Identifier 2015-CE-017-AD; Amendment 39-18334; AD 2015-24-02]

RIN 2120-AA64

Airworthiness Directives; Viking Air Limited Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for Viking Air Limited Model DHC-3 Airplanes. This AD results from mandatory continuing airworthiness information (MCAI) issued by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as corrugation cracking found at various wing stations and on the main spar lower cap. We are issuing this AD to require actions to address the unsafe condition on these products.

DATES: This AD is effective January 4, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in the AD as of January 4, 2016.

ADDRESSES: You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-3073; or in person at Document Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

For service information identified in this AD, contact Viking Air Limited Technical Support, 1959 De Havilland Way, Sidney, British Columbia, Canada, V8L 5V5; Fax: 250-656-0673; telephone: (North America) 1-800-663-8444; email: technical.support@vikingair.com; Internet: <http://www.vikingair.com/support/service-bulletins>. You may view this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329-4148. It is also available on the Internet at <http://www.regulations.gov> by searching for Docket No. FAA-2015-3073.

FOR FURTHER INFORMATION CONTACT: Aziz Ahmed, Aerospace Safety Engineer, FAA, New York Aircraft Certification Office (ACO), 1600 Steward Avenue, suite 410, Westbury, New York 11590; telephone: (516) 228-7329; fax: (516) 794-5531; email: aziz.ahmed@faa.gov.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to add an AD that would apply to Viking Air Limited Model DHC-3 airplane. The NPRM was published in the **Federal Register** on July 28, 2015 (80 FR 44892). The NPRM proposed to correct an unsafe condition for the specified products and was based on mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country. The MCAI states:

An operator found cracks on the upper inner wing skin corrugations emanating from the rib attachment points. As a result, Viking Air Limited released Service Bulletin (SB) V3/0002, Revision NC to inspect for possible corrugation cracking between wing stations 34 and 110. Subsequently, operators discovered additional corrugation cracking at multiple wing stations and on the main spar lower cap.

These cracks, if not detected and rectified, may compromise the structural integrity of the wing. In order to address this potentially unsafe condition, Viking Air Limited has issued SB V3/0002, Revision C, specifying repetitive internal borescope and visual inspections. This AD is issued to mandate compliance with that SB.

The MCAI can be found in the AD docket on the Internet at: <http://www.regulations.gov/>#!/documentDetail;D=FAA-2015-3073-0002.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comment received on the proposal and the FAA's response to the comment.

Request From Viking

Viking has reviewed the FAA NPRM (80 FR 44892, July 28, 2015) and found that paragraph (f)(4) is not applicable or relevant to Viking SB V3/0002 Revision C. All cycle information is with respect to the wing. Viking noted that it is important to make the distinction between the airplane and the wings. The possibility has come to Viking's attention that some operators may rotate wings within their airplane fleet. Additionally, the Model DHC-3 airplane nominal cycles to hours ratio used by Viking is 1.33 cycles per hour. In most cases, Viking would consider an

average flight length to be 45 minutes. Therefore, Viking recommends that the calculation of the proposed AD paragraph (f)(4) not be part of the mandated actions.

We agree and will remove paragraph (f)(4) of the proposed AD and state in paragraph (f)(1) of this AD that the operator may contact Viking to help determine wing flight cycles. We will also change all reference of “flight cycles” to “wing flight cycles.” We redesignated paragraph (f)(5) of the proposed AD as paragraph (f)(4) of this AD.

Conclusion

We reviewed the relevant data, considered the comment received, and determined that air safety and the public interest require adopting the AD with the change described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (80 FR 44892, July 28, 2015) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (80 FR 44892, July 28, 2015).

Related Service Information Under 14 CFR Part 51

We reviewed Viking DHC-3 Otter Service Bulletin No. V3/0002, Revision “C”, dated April 30, 2014; and Viking DHC-3 Otter Service Bulletin 3-STC (03-50)-001, Revision “NC”, dated July 3, 2013. The service information describes procedures for installing additional wing inspection access panels and inspecting the wings using borescope and visual methods. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this AD.

Costs of Compliance

We estimate that this AD will affect 38 products of U.S. registry. We also estimate that it would take about 36 work-hours per product to comply with the basic requirements of this proposed AD. The average labor rate is \$85 per work-hour. Required parts would cost about \$5,000 per product.

Based on these figures, we estimate the cost of the AD on U.S. operators to be \$306,280, or \$8,060 per product.

The scope of damage found in the required inspection could vary significantly from airplane to airplane. We have no way of determining how much damage may be found on each

airplane or the cost to repair damaged parts on each airplane.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. “Subtitle VII: Aviation Programs,” describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in “Subtitle VII, Part A, Subpart III, Section 44701: General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-3073; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains the NPRM, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (telephone (800) 647-5527) is in the **ADDRESSES** section.

Comments will be available in the AD docket shortly after receipt.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new AD:

2015-24-02 Viking Air Limited:

Amendment 39-18334; Docket No. FAA-2015-3073; Directorate Identifier 2015-CE-017-AD.

(a) Effective Date

This airworthiness directive (AD) becomes effective January 4, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Viking Air Limited DHC-3 airplanes, all serial numbers, certificated in any category.

(d) Subject

Air Transport Association of America (ATA) Code 57: Wings.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as corrugation cracking found at various wing stations and on the main spar lower cap. We are issuing this proposed AD to detect cracking and correct as necessary to address the unsafe condition on these products.

(f) Actions and Compliance

Unless already done, do the following actions in paragraphs (f)(1) through (f)(4) of this AD:

(1) Within 30 days after January 4, 2016 (the effective date of this AD), determine the accumulated wing flight cycles or wing flight hours for each wing by contacting Technical Support at Viking Air Limited. You can find contact information for Viking Air Limited in paragraph (i) of this AD.

(2) Within 30 days after January 4, 2016 (the effective date of this AD), determine all installed supplemental type certificates (STC) or modifications affecting the wings. Based on the accumulated air time determined from

paragraph (f)(1) of this AD and before the initial inspection required in paragraph (f)(3) of this AD, install access panels as follows:

(i) If the airplane is free of STCs or any other modifications affecting the wings, install additional inspection access panels following the Accomplishment Instructions Part A of Viking DHC-3 Otter Service Bulletin No. V3/0002, Revision "C", dated April 30, 2014.

(ii) If the airplane is fitted with STC SA2009NY (which can be found on the internet at: http://rgl.faa.gov/Regulatory_and_Guidance_Library/rgstc.nsf/0/F7309B7D9B008C588625734F00730144?OpenDocument&Highlight=sa02009ny), incorporate additional inspection access panels following the Accomplishment Instructions of Viking Air Limited SB 3-3TC (03-50)-001, Revision "NC", dated July 3, 2013.

Note 1 to paragraph (f)(2)(ii) of this AD: STC SA03-50 would be the Canadian equivalent of the United States (FAA) STC SA2009NY.

(iii) If there are other STCs or modifications affecting the wings the operator must contact the FAA to request an FAA-approved alternative method of compliance using the procedures in

paragraph (g)(1) of this AD and 14 CFR 39.19. To develop these procedures, we recommend you contact the STC holder for guidance in developing substantiating data.

(3) Based on the accumulated air time on the wings determined in paragraph (f)(1) of this AD, perform initial and repetitive borescope and visual inspections of both the left-hand and right-hand wing box following Part B of the Accomplishment Instructions of Viking DHC-3 Otter Service Bulletin V3/0002, Revision "C", dated April 30, 2014, using the inspection schedules specified in Table 1 of paragraph (f)(3) of this AD:

TABLE 1 OF PARAGRAPH (f)(3) OF THIS AD—INSPECTION SCHEDULE

Effectivity	Initial inspection	Repetitive inspection
If Viking Air Limited SB V3/0002, Revision "A", dated February 22, 2013; or Viking Air Limited SB V3/0002, Revision "B", dated July 3, 2013; were complied with prior to January 4, 2016 (the effective date of this AD).	The initial inspection is not required since the inspection was accomplished while complying with Revision "A" or "B" of Viking Air Limited SB V3/0002.	Repetitively inspect not to exceed every 1,600 wing flight hours accumulated after the last inspection or 2,100 wing flight cycles after the last inspection, whichever occurs first.
If, as of January 4, 2016 (the effective date of this AD), the airplane has less than 31,200 wing flight hours.	Inspect within 800 wing flight hours after January 4, 2016 (the effective date of this AD), or within 6 months January 4, 2016 (the effective date of this AD), whichever occurs first.	Repetitively inspect not to exceed every 1,600 wing flight hours accumulated after the last inspection or 2,100 wing flight cycles after the last inspection, whichever occurs first.
If, as of January 4, 2016 (the effective date of this AD), the airplane has 31,200 wing flight hours or more but less than 31,600 wing flight hours.	Inspect upon or before accumulating 32,000 wing flight hours or within 6 months after January 4, 2016 (the effective date of this AD), whichever occurs first.	Repetitively inspect not to exceed every 1,600 wing flight hours accumulated after the last inspection or 2,100 wing flight cycles after the last inspection, whichever occurs first.
If, as of January 4, 2016 (the effective date of this AD), the airplane has 31,600 wing flight hours or more.	Inspect within 400 wing flight hours accumulated after January 4, 2016 (the effective date of this AD) or 3 months after January 4, 2016 (the effective date of this AD), whichever occurs first.	Repetitively inspect not to exceed every 1,600 wing flight hours accumulated after the last inspection or 2,100 wing flight cycles after the last inspection, whichever occurs first.

(4) If any cracks are found, contact Technical Support at Viking Air Limited for an FAA-approved repair and incorporate the repair before further flight. You can find contact information for Viking Air Limited in paragraph (i) of this AD. The FAA-approved repair must specifically reference this AD.

(g) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, Standards Office, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Aziz Ahmed, Aerospace Safety Engineering, FAA, New York Aircraft Certification Office (ACO), 1600 Stewart Avenue, Suite 410, Westbury, New York 11590; telephone: (516) 228-7329; fax: (516) 794-5531; email: aziz.ahmed@faa.gov. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(2) *Airworthy Product*: For any requirement in this AD to obtain corrective actions from a manufacturer or other source, use these actions if they are FAA-approved. Corrective actions are considered FAA-approved if they are approved by the State of Design Authority (or their delegated agent). You are required

to assure the product is airworthy before it is returned to service.

(3) *Reporting Requirements*: For any reporting requirement in this AD, a federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB Control Number. The OMB Control Number for this information collection is 2120-0056. Public reporting for this collection of information is estimated to be approximately 5 minutes per response, including the time for reviewing instructions, completing and reviewing the collection of information. All responses to this collection of information are mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at: 800 Independence Ave. SW., Washington, DC 20591, Attn: Information Collection Clearance Officer, AES-200.

(h) Related Information

Refer to MCAI Transport Canada AD No. CF-2015-05, dated March 18, 2015, for related information. The MCAI can be found in the AD docket on the Internet at: <http://www.regulations.gov/#/documentDetail;D=FAA-2015-3073-0002>.

(i) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Viking DHC-3 Otter Service Bulletin No. V3/0002, Revision "C", dated April 30, 2014.

(ii) Viking DHC-3 Otter Service Bulletin 3-3TC (03-50)-001, Revision "NC", dated July 3, 2013.

(3) For Viking Air Limited service information identified in this AD, contact Viking Air Limited Technical Support, 1959 De Havilland Way, Sidney, British Columbia, Canada, V8L 5V5; Fax: 250-656-0673; telephone: (North America) 1-800-663-8444; email: technical.support@vikingair.com; Internet: <http://www.vikingair.com/support/service-bulletins>.

(4) You may review this referenced service information at the FAA, Small Airplane Directorate, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329-4148.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on

the availability of this material at NARA, call 202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Kansas City, Missouri, on November 16, 2015.

Melvin Johnson,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2014-0928; Directorate Identifier 2014-NM-040-AD; Amendment 39-18333; AD 2015-24-01]

RIN 2120-AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all Airbus Model A330-200 Freighter, A330-200, A330-300, A340-200, A340-300, A340-500, and A340-600 series airplanes. This AD was prompted by a report of skin disbonding on a composite side panel of a rudder installed on an A310 airplane. This AD requires a review of the maintenance records of the rudder to determine if any composite side shell panel repair has been done; a thermography inspection limited to the repair areas or complete side shells, as applicable, to identify possible in-service rudder repairs, damages, or fluid ingress; and applicable related investigative and corrective actions. We are issuing this AD to detect and correct the rudder skin disbonding, which could affect the structural integrity of the rudder, and could result in reduced controllability of the airplane.

DATES: This AD becomes effective January 4, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of January 4, 2016.

ADDRESSES: You may examine the AD docket on the Internet at <http://www.regulations.gov> or in person at the Docket Management Facility, U.S. Department of Transportation, Docket Operations, M-

30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC.

For service information identified in this AD, contact Airbus SAS, Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email airworthiness.A330-A340@airbus.com; Internet <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2014-0928.

FOR FURTHER INFORMATION CONTACT:

Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1138; fax 425-227-1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Airbus Model A330-200 Freighter, A330-200, A330-300, A340-200, A340-300, A340-500, and A340-600 series airplanes. The NPRM published in the **Federal Register** on December 29, 2014 (79 FR 77972).

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2014-0033, dated February 4, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for all Airbus Model A330-200 Freighter, A330-200, A330-300, A340-200, A340-300, A340-500, and A340-600 series airplanes. The MCAI states:

A case of skin disbonding was reported on a composite side panel of a rudder installed on an A310 aeroplane.

The investigation results revealed that this disbonding started from a skin panel area previously repaired in-service in accordance with the Structural Repair Manual (SRM).

The initial damage has been identified as a disbonding between the core and skin of the repaired area. This damage may not be visually detectable and likely propagates during normal operation due to the variation of pressure during ground-air-ground cycles.

Composite rudder side shell panels are also installed on A330 and A340 aeroplanes, which may have been repaired in-service using a similar method.

This condition, if not detected and corrected, could affect the structural integrity of the rudder, possibly resulting in reduced control of the aeroplane.

For the reasons described above, this [EASA] AD requires a one-time thermography inspection of a repaired rudder or a rudder whose maintenance records are incomplete and, depending on findings, accomplishment of applicable corrective and follow-up actions [including repetitive inspections].

The related investigative actions in this AD include, as applicable, an ultrasonic inspection, an elasticity laminate checker inspection, a tap test inspection, detailed inspections, and thermography inspections, and ventilation of the core. The repetitive inspections include detailed inspections and thermography inspections. The corrective actions in this AD include repairs.

The compliance time for the related investigative actions is before further flight after accomplishing the applicable inspection required by paragraph (g)(1) or (g)(2)(ii) of this AD.

The intervals for the repetitive inspections are either 900 flight hours or 1,000 flight cycles, depending on the applicable conditions identified in the service information.

The compliance times for the corrective actions range, depending on the applicable conditions identified in the service information, from before further flight to within 4,500 flight cycles but not to exceed 24 months after accomplishing the applicable inspection required by paragraph (g)(1) or (g)(2)(ii) of this AD.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> or in person at the Docket Management Facility, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2014-0928.

Comments

We gave the public the opportunity to participate in developing this AD. The following presents the comments received on the NPRM (79 FR 77972, December 29, 2014) and the FAA's response to each comment.

Request To Use the Latest Service Information

American Airlines (AAL) and Delta Airlines (DAL) requested that we revise the NPRM (79 FR 77972, December 29, 2014) to cite the latest service information.

We agree with the commenters' request. Airbus has issued Airbus Service Bulletin A330-55-3043, Revision 1, dated August 20, 2014, Airbus Service Bulletin A340-55-4039, Revision 1, dated August 20, 2014, and Airbus Service Bulletin A340-55-5007,

Revision 1, dated August 20, 2014. The new service information requires no additional work, and there are no new actions required by this AD. We have updated the AD with the latest service information, and we have also added a credit paragraph for previous actions done before the effective date of this AD using the service information cited in the NPRM (79 FR 77972, December 29, 2014).

Request To Clarify the Structural Repair Manual Repairs That Are Affected

AAL requested that the NPRM (79 FR 77972, December 29, 2014) clarify the specific structural repair manual (SRM) repairs that are affected. AAL stated that paragraph (j) of the proposed AD states specific serial number ranges that are not affected by the AD provided that it is determined that no repair has been accomplished on the composite side shell panel of that rudder since first installation on the airplane. AAL believes this last sentence is too broad and not in line with the intent of the service information requirements. AAL commented that stating no repair has been accomplished limits acceptable repairs covered by an Airbus repair design approval sheet, designated engineering representative repairs, and other SRM repairs not affected by the improper practices that are the subject of the NPRM. AAL stated that paragraphs (g)(1) and paragraph (l) of the proposed AD list the affected SRM repairs in the service information figures.

We agree with the commenter's request. We have revised paragraph (j) of this AD to clarify the specific repairs accomplished as described in the SRM procedures identified in Figure A–GBBAA (Sheet 01 and 02) or Figure A–GBCAA (Sheet 02) of the service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD, as applicable.

Request To Add the Manufacturer Part Number

DAL requested that the NPRM (79 FR 77972, December 29, 2014) include the manufacturer part numbers of the rudder serial numbers specified in paragraph (j), which provides only a list of rudder serial numbers not affected by the requirements of paragraphs (g) and (h) of the proposed AD. DAL commented that in the event of future aircraft acquisitions or rudder (component only) purchases, operators will need the manufacturer part numbers associated with the listed serial numbers to determine AD applicability.

We disagree with the commenter's request to add part numbers to paragraph (j) of this AD. The rudder serial number, regardless of the part number, is the key to identifying whether the rudder is not affected. Only rudders that have certain serial numbers that meet the conditions specified in paragraph (j) of this AD are exempt from the actions required by paragraphs (g) and (h) of this AD. Airbus has informed us that rudders with the same manufacturer part number might or might not be affected; it is the serial number that determines whether it is an affected rudder. We have not changed the AD in this regard.

Conclusion

We reviewed the relevant data, considered the comments received, and determined that air safety and the public interest require adopting this AD with the changes described previously and minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (79 FR 77972, December 29, 2014) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (79 FR 77972, December 29, 2014).

We also determined that these changes will not increase the economic burden on any operator or increase the scope of this AD.

Related Service Information Under 1 CFR Part 51

Airbus has issued the following service information:

- Airbus Service Bulletin A330–55–3043, Revision 1, dated August 20, 2014.
- Airbus Service Bulletin A340–55–4039, Revision 1, dated August 20, 2014.
- Airbus Service Bulletin A340–55–5007, Revision 1, dated August 20, 2014.

The service information describes procedures for a review of the maintenance records of the rudder to determine if any composite side shell panel repair has been done; a thermography inspection limited to the repair areas or complete side shells, as applicable, to identify possible in-service rudder repairs, damages, or fluid ingress; and applicable related investigative and corrective actions. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this AD.

Costs of Compliance

We estimate that this AD affects 55 airplanes of U.S. registry.

We also estimate that it would take about 45 work-hours per product to comply with the basic requirements of this AD. The average labor rate is \$85 per work-hour. Required parts would cost about \$0 per product. Based on these figures, we estimate the cost of this AD on U.S. operators to be \$210,375, or \$3,825 per product.

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this AD.

Paperwork Reduction Act

A federal agency may not conduct or sponsor, and a person is not required to respond to, nor shall a person be subject to penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a current valid OMB control number. The control number for the collection of information required by this AD is 2120–0056. The paperwork cost associated with this AD has been detailed in the Costs of Compliance section of this document and includes time for reviewing instructions, as well as completing and reviewing the collection of information. Therefore, all reporting associated with this AD is mandatory. Comments concerning the accuracy of this burden and suggestions for reducing the burden should be directed to the FAA at 800 Independence Ave. SW., Washington, DC 20591, ATTN: Information Collection Clearance Officer, AES–200.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a “significant regulatory action” under Executive Order 12866;
2. Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov/#!docketDetail;D=FAA-2014-0928>; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800-647-5527) is in the ADDRESSES section.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2015-24-01 Airbus: Amendment 39-18333. Docket No. FAA-2014-0928; Directorate Identifier 2014-NM-040-AD.

(a) Effective Date

This AD becomes effective January 4, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all airplanes identified in paragraphs (c)(1) and (c)(2) of this AD, certificated in any category.

(1) Airbus Model A330-201, -202, -203, -223, -223F, -243, -243F, -301, -302, -303, -321, -322, -323, -341, -342, and -343 airplanes, all manufacturer serial numbers.

(2) Airbus Model A340-211, -212, -213, -311, -312, -313, -541, and -642 airplanes, all manufacturer serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 55, Stabilizers.

(e) Reason

This AD was prompted by a report of skin disbonding on a composite side panel of a rudder installed on an A310 airplane. We are issuing this AD to detect and correct the rudder skin disbonding, which could affect the structural integrity of the rudder, and could result in reduced controllability of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Review the Maintenance Records

Within 24 months after the effective date of this AD: Review the maintenance records of the rudder to determine if any composite side shell panel repair has been accomplished on the rudder since first installation on an airplane.

(1) If, based on the maintenance record review, any repair identified in Figure A-GBBAA (Sheet 01 and 02) or Figure A-GBCAA (Sheet 02) of the service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD is found: Within 24 months after the effective date of this AD, do a thermography inspection for repair, damages, and fluid ingress, limited to the repaired areas, in accordance with the Accomplishment Instructions of the applicable service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD:

(i) Airbus Service Bulletin A330-55-3043, Revision 1, dated August 20, 2014 (for Model A330-201, -202, -203, -223, -223F, -243, -243F, -301, -302, -303, -321, -322, -323, -341, -342, and -343 airplanes).

(ii) Airbus Service Bulletin A340-55-4039, Revision 1, dated August 20, 2014 (for Model A340-211, -212, -213, -311, -312, and -313 airplanes).

(iii) Airbus Service Bulletin A340-55-5007, Revision 1, dated August 20, 2014 (for Model A340-541 and -642 airplanes).

(2) For a rudder for which maintenance records are unavailable or incomplete, do the actions specified in paragraphs (g)(2)(i) and (g)(2)(ii) of this AD:

(i) No later than 3 months before accomplishment of the thermography inspection, as required by paragraph (g)(2)(ii) of this AD, contact Airbus to request related rudder manufacturing data by submitting the serial number of the rudder to Airbus.

(ii) Within 24 months after the effective date of this AD: Do a thermography inspection for any repair on complete side shells to identify and mark any repair, in accordance with the Accomplishment Instructions of the applicable service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD.

(h) Related Investigative Actions, Corrective Actions, and Repetitive Inspections

After the inspection as required by paragraph (g)(1) or (g)(2) of this AD: At the applicable compliance times specified in paragraph 1.E., “Compliance,” of Tables 3, 4A, 4B, 4C, 4D, and 5 of the applicable service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD, accomplish all applicable related investigative and corrective actions, in accordance with the Accomplishment Instructions of the applicable service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD; except as provided by paragraphs (i)(1) and (i)(2) of this AD. Options provided in the service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD for accomplishing the actions are acceptable for the corresponding requirements of this paragraph provided that the related investigative and corrective actions are done at the applicable times specified in paragraph 1.E., “Compliance,” of the applicable service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD, including applicable repetitive inspection intervals, except as required by paragraphs (i)(1) and (i)(2) of this AD. Thereafter repeat the inspections of the restored and repaired areas at the applicable compliance time specified in paragraph 1.E., “Compliance,” of Tables 3, 4A, 4B, 4C, 4D, and 5 of the applicable service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD.

(i) Exceptions to the Service Information

(1) Where the applicable service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD specifies a compliance time relative to the date of the service information, this AD requires compliance within the specified compliance time after the effective date of this AD.

(2) If the service information in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD specifies to contact Airbus: At the applicable compliance times specified in paragraph 1.E., “Compliance,” of the applicable service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD, repair using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus’s EASA Design Organization Approval (DOA).

(j) Provisions for Certain Airplanes

Airplanes fitted with a rudder having a serial number (S/N) that is not in the range of S/N TS-1001 through S/N TS-1043 inclusive, S/N TS-2001 through S/N TS-2074 inclusive, S/N TS-3000 through S/N TS-3525 inclusive, S/N TS-4001 through S/N TS-4170 inclusive, S/N TS-6001 through S/N TS-6246 inclusive, or S/N TS-5001 through S/N TS-5138 inclusive, are not

affected by the requirements of paragraphs (g) and (h) of this AD provided that it is determined that no repair has been accomplished as described in the procedures identified in Figure A–GBBAA (Sheet 01 and 02) or Figure A–GBCAA (Sheet 02) of the service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD, as applicable, on the composite side shell panel of that rudder since first installation on an airplane.

(k) Parts Installation Limitations

As of the effective date of this AD, no person may install, on any airplane, a rudder, unless the record review and thermography inspection specified in paragraph (g) of this AD has been done on that rudder and thereafter all applicable related investigative actions, repetitive inspections, and corrective actions are done as required by paragraph (h) of this AD, except as provided in paragraph (j) of this AD.

(l) Repair Prohibition

As of the effective date of this AD, no person may accomplish a side shell repair on any rudder using a structure repair manual procedure identified in Figure A–GBBAA (Sheet 01 and 02) or Figure A–GBCAA (Sheet 02) of the service information specified in paragraphs (g)(1)(i) through (g)(1)(iii) of this AD, as applicable, on any airplane.

(m) Credit for Previous Actions

This paragraph provides credit for the actions specified in this AD, if those actions were performed before the effective date of this AD using the service information in paragraphs (m)(1), (m)(2), and (m)(3) of this AD.

(1) Airbus Service Bulletin A330–55–3043, dated February 7, 2013.

(2) Airbus Service Bulletin A340–55–4039, dated February 7, 2013.

(3) Airbus Service Bulletin A340–55–5007, dated February 7, 2013.

(n) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1138; fax 425–227–1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain corrective

actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the EASA; or Airbus's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(o) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2014–0033, dated February 4, 2014, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2014–0928.

(2) Service information identified in this AD that is not incorporated by reference is available at the addresses specified in paragraphs (p)(3) and (p)(4) of this AD.

(p) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Airbus Service Bulletin A330–55–3043, Revision 1, dated August 20, 2014.

(ii) Airbus Service Bulletin A340–55–4039, Revision 1, dated August 20, 2014.

(iii) Airbus Service Bulletin A340–55–5007, Revision 1, dated August 20, 2014.

(3) For service information identified in this AD, contact Airbus SAS, Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email airworthiness.A330-A340@airbus.com; Internet <http://www.airbus.com>.

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued in Renton, Washington, on November 9, 2015.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 2015–29851 Filed 11–25–15; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2014–1048; Directorate Identifier 2014–NM–055–AD; Amendment 39–18332; AD 2015–23–14]

RIN 2120–AA64

Airworthiness Directives; Fokker Services B.V. Airplanes

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: We are adopting a new airworthiness directive (AD) for all Fokker Services B.V. Model F.28 Mark 0070 and 0100 airplanes. This AD was prompted by reports that cracks can occur in a frame of the tail section on certain airplanes. This AD requires a one-time detailed inspection of the oblique frame 67–2 for any cracking, and repair if necessary. We are issuing this AD to detect and correct such cracking, which could lead to failure of the oblique frame 67–2, and consequent loss of the structural integrity of the tail section.

DATES: This AD becomes effective January 4, 2016.

The Director of the Federal Register approved the incorporation by reference of certain publications listed in this AD as of January 4, 2016.

ADDRESSES: You may examine the AD docket on the Internet at <http://www.regulations.gov/#/docketDetail;D=FAA-2014-1048> or in person at the Docket Management Facility, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC.

For service information identified in this AD, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone +31 (0)88–6280–350; fax +31 (0)88–6280–111; email technicalservices@fokker.com; Internet <http://www.myfokkerfleet.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2014–1048.

FOR FURTHER INFORMATION CONTACT: Tom Rodriguez, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, Washington WA 98057-3356; telephone (425) 227-1137; fax (425) 227-1149.

SUPPLEMENTARY INFORMATION:

Discussion

We issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Fokker Services B.V. Model F.28 Mark 0070 and 0100 airplanes. The NPRM published in the **Federal Register** on January 23, 2015 (80 FR 3500). We are issuing this AD to detect and correct cracking of the oblique frame 67-2, which could lead to failure of the oblique frame 67-2, and consequent loss of the structural integrity of the tail section.

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2014-0039, dated February 20, 2014, dated (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for all Fokker Services B.V. Model F.28 Mark 0070 and 0100 airplanes. The MCAI states:

Service experience has shown that cracks can occur in oblique frame 67-2 in the tail section on aeroplanes with more than 29 000 flight cycles (FC).

This condition, if not detected and corrected, can result in an exponential crack growth rate, possibly leading to failure of the oblique frame 67-2 over a certain length and consequent loss of the structural integrity of the tail section of the aeroplane.

For the reasons described above, this [EASA] AD requires a one-time [detailed] inspection of the oblique frame 67-2 for cracks and, depending on findings, accomplishment of a repair.

Repetitive inspections are planned to be incorporated into a revision of Fokker Services Report SE-623, which is part of the Airworthiness Limitations Section of the Instructions for Continued Airworthiness, for which a separate [EASA] AD is expected to be published.

Fokker Services All Operators Message AOF100.187#02 provides additional information concerning the subject addressed by this [EASA] AD.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov/#!documentDetail;D=FAA-2014-1048-0002>.

Comments

We gave the public the opportunity to participate in developing this AD. We received no comments on the NPRM (80

FR 3500, January 23, 2015) or on the determination of the cost to the public.

Conclusion

We reviewed the relevant data and determined that air safety and the public interest require adopting this AD as proposed except for minor editorial changes. We have determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM (80 FR 3500, January 23, 2015) for correcting the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM (80 FR 3500, January 23, 2015).

Related Service Information Under 1 CFR Part 51

Fokker Services B.V. has issued Service Bulletin SBF100-53-124, dated January 23, 2014; and Service Bulletin SBF100-53-125, Revision 1, dated February 13, 2014. The service information describes procedures for a one-time detailed inspection of the oblique frame 67-2 for any cracking, and repair if necessary. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this AD.

Costs of Compliance

We estimate that this AD affects 8 airplanes of U.S. registry.

We also estimate that it will take about 1 work-hour per product to comply with the basic requirements of this AD. The average labor rate is \$85 per work-hour. Based on these figures, we estimate the cost of this AD on U.S. operators to be \$680, or \$85 per product.

In addition, we estimate that any necessary follow-on actions will take about 12 work-hours and require parts costing \$0, for a cost of \$1,020 per product. We have no way of determining the number of aircraft that might need this action.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. “Subtitle VII: Aviation Programs,” describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in “Subtitle VII, Part A, Subpart III, Section 44701: General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in

air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

1. Is not a “significant regulatory action” under Executive Order 12866;
2. Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov/#!docketDetail;D=FAA-2014-1048>; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800-647-5527) is in the **ADDRESSES** section.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

2015-23-14 Fokker Services B.V.:

Amendment 39-18332. Docket No. FAA-2014-1048; Directorate Identifier 2014-NM-055-AD.

(a) Effective Date

This AD becomes effective January 4, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Fokker Services B.V. Model F.28 Mark 0070 and 0100 airplanes, certificated in any category, all serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Reason

This AD was prompted by reports that cracks can occur in the oblique frame 67-2 in the tail section on certain airplanes. We are issuing this AD to detect and correct such cracking, which could lead to failure of the oblique frame 67-2, and consequent loss of the structural integrity of the tail section.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Inspection and Repair

For airplanes that have accumulated more than 29,000 total flight cycles since the airplane's first flight as of the effective date of this AD: Within 500 flight cycles or 12 months after the effective date of this AD, whichever occurs first, do a one-time detailed inspection of the oblique frame 67-2 for any cracking, in accordance with the Accomplishment Instructions of Fokker Service Bulletin SBF100-53-124, dated January 23, 2014. For the purposes of this AD, a detailed inspection is an intensive examination of a specific item, installation, or assembly to detect damage, failure, or irregularity. Available lighting is normally supplemented with a direct source of good lighting at an intensity deemed appropriate. Inspection aids such as mirror, magnifying lenses, etc., may be necessary. Surface cleaning and elaborate procedures may be required.

(h) Corrective Action

If any cracking is found during the inspection required by paragraph (g) of this AD, before further flight, repair the oblique frame 67-2, in accordance with the Accomplishment Instructions of Fokker Service Bulletin SBF100-53-125, Revision 1, dated February 13, 2014.

(i) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International

Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Tom Rodriguez, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, Washington WA 98057-3356; telephone (425) 227-1137; fax (425) 227-1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Fokker B.V. Service's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(j) Related Information

Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2014-0039, dated February 20, 2014, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov/#/documentDetail;D=FAA-2014-1048-0002>.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) Fokker Service Bulletin SBF100-53-124, dated January 23, 2014.

(ii) Fokker Service Bulletin SBF100-53-125, Revision 1, dated February 13, 2014.

(3) For service information identified in this AD, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone +31 (0)88-6280-350; fax +31 (0)88-6280-111; email technicalservices@fokker.com; Internet <http://www.myfokkerfleet.com>.

(4) You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call

202-741-6030, or go to: <http://www.archives.gov/federal-register/cfr/ibr-locations.html>.

BILLING CODE 4910-13-P

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission****18 CFR Part 35**

[Docket No. RM15-2-000; Order No. 819]

Third-Party Provision of Primary Frequency Response Service

AGENCY: Federal Energy Regulatory Commission, Department of Energy.

ACTION: Final rule.

SUMMARY: The Federal Energy Regulatory Commission (Commission) is revising its regulations to foster competition in the sale of primary frequency response service. Specifically, the Commission amends its regulations governing market-based rates for public utilities pursuant to the Federal Power Act (FPA) to permit the sale of primary frequency response service at market-based rates by sellers with market-based rate authority for sales of energy and capacity.

DATES: This Final Rule will become effective February 25, 2016.

FOR FURTHER INFORMATION CONTACT:

Rahim Amerkhalil (General Information), Office of Energy Policy and Innovation, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426, (202) 502-8266.

SUPPLEMENTARY INFORMATION:**Order No. 819****Final Rule**

(Issued November 20, 2015)

1. The Federal Energy Regulatory Commission (Commission) is revising

its regulations to foster competition in the sale of primary frequency response service.¹ Specifically, the Commission amends its regulations to revise Subpart H to Part 35 of Title 18 of the Code of Federal Regulations governing market-based rates for public utilities pursuant to sections 205 and 206 of the Federal Power Act (FPA)² to permit the sale of primary frequency response service at market-based rates by sellers with market-based rate authority for sales of energy and capacity.

2. This proceeding derives from Order No. 784,³ in which the Commission revised Part 35 of its regulations to reflect reforms to its *Avista* policy⁴ governing the sale of certain ancillary services at market-based rates to public utility transmission providers. Specifically, Order No. 784 found that when appropriate intra-hour transmission scheduling practices are in place, the *Avista* restrictions need not apply to the sale of Energy Imbalance, Generator Imbalance, Operating Reserve-Spinning and Operating Reserve-Supplemental services, because with those scheduling practices in place the existing market power screens for sales of energy and capacity can also be applied to sales of those ancillary services.⁵

3. However, because of the unique technical and geographic requirements associated with Reactive Supply and Voltage Control (under OATT Schedule 2) and Regulation and Frequency Response (under OATT Schedule 3),⁶

the Commission only allowed market-based rate sales of Schedule 2 and Schedule 3 services to a public utility that is purchasing ancillary services to satisfy its OATT requirements if either: (a) The sale is made pursuant to a competitive solicitation that meets certain specified requirements; or (b) the sale is made at or below the buying public utility transmission provider's own Schedule 2 or 3 rate, as applicable. The Commission further stated its intention to gather more information regarding the technical, economic and market issues concerning the provision of these services in a separate proceeding.

4. Commission staff held a workshop on April 22, 2014 in this proceeding and then issued a notice of proposed rulemaking that distinguished between regulation service and primary frequency response service, and proposed to allow sales of primary frequency response service at market-based rates by entities granted market-based rate authority for sales of energy and capacity.⁷ In response to the NOPR, 19 sets of comments were submitted.

I. Background

5. The Commission in Order No. 888⁸ delineated two categories of ancillary services: Those that the transmission provider is required to provide to all of its basic transmission customers⁹ and those that the transmission provider is only required to *offer* to provide to transmission customers serving load in the transmission provider's control area.¹⁰ With respect to the second

provide autonomous, pre-programmed changes in output to rapidly arrest large changes in frequency until dispatched resources can take over while regulation service is centrally dispatched through automatic generation control (AGC) and is not focused exclusively on frequency control.

⁷ *Third-Party Provision of Primary Frequency Response Service*, Notice of Proposed Rulemaking (NOPR), 80 FR 10,426 (Feb. 26, 2015), FERC Stats. & Regs. ¶ 32,705 (2015).

⁸ See *Promoting Wholesale Competition Through Open Access Non-Discriminatory Transmission Services by Public Utilities; Recovery of Stranded Costs by Public Utilities and Transmitting Utilities*, Order No. 888, FERC Stats. & Regs. ¶ 31,036 (1996), *order on reh'g*, Order No. 888-A, FERC Stats. & Regs. ¶ 31,048, *order on reh'g*, Order No. 888-B, 81 FERC ¶ 61,248 (1997), *order on reh'g*, Order No. 888-C, 82 FERC ¶ 61,046 (1998), *aff'd in relevant part sub nom. Transmission Access Policy Study Group v. FERC*, 225 F.3d 667 (D.C. Cir. 2000), *aff'd sub nom. New York v. FERC*, 535 U.S. 1 (2002).

⁹ The first category consists of Scheduling, System Control and Dispatch service and Reactive Supply and Voltage Control from Generation Sources service.

¹⁰ The second category consists of Regulation and Frequency Response service, Energy Imbalance service, Operating Reserve-Spinning service, and Operating Reserve-Supplemental service. Order No. 890 later added an additional ancillary service to this category: Generator Imbalance service. See *Preventing Undue Discrimination and Preference in*

category, the Commission reasoned that the transmission provider is not always uniquely qualified to provide the services, and customers may be able to more cost-effectively self-supply them or procure them from other entities. The Commission contemplated that third parties (*i.e.*, parties other than a transmission provider supplying ancillary services pursuant to its OATT obligation) could provide these ancillary services on other than a cost-of-service basis if such pricing was supported, on a case-by-case basis, by analyses that demonstrated that the seller lacks market power in the relevant product market.¹¹

6. Subsequently, in *Avista*,¹² the Commission adopted a policy allowing third-party ancillary service providers that could not perform a market power study to sell certain ancillary services at market-based rates with certain restrictions.¹³

7. As noted earlier, the instant proceeding derives from Order No. 784 in which the Commission found that when appropriate intra-hour transmission scheduling practices are in place, the *Avista* restrictions need not apply to the sale of Energy Imbalance, Generator Imbalance, Operating Reserve-Spinning and Operating Reserve-Supplemental services, because with those practices in place, the results of the existing market power screens for sales of energy and capacity can also be applied to sales of these ancillary services.¹⁴

Transmission Service, Order No. 890, FERC Stats. & Regs. ¶ 31,241, at P 85, *order on reh'g*, Order No. 890-A, FERC Stats. & Regs. ¶ 31,261 (2007), *order on reh'g*, Order No. 890-B, 123 FERC ¶ 61,299 (2008), *order on reh'g*, Order No. 890-C, 126 FERC ¶ 61,228 (2009), *order on clarification*, Order No. 890-D, 129 FERC ¶ 61,126 (2009).

¹¹ Order No. 888, FERC Stats. & Regs. ¶ 31,036 at 31,720–21.

¹² See *supra* n.4.

¹³ These ancillary services included: Regulation and Frequency Response, Energy Imbalance, Operating Reserve-Spinning, and Operating Reserve-Supplemental. The Commission did not extend this *Avista* policy to Reactive Supply and Voltage Control from Generation Sources service, which means that third parties wishing to sell this ancillary service at market-based rates would be required to present specific evidence of a lack of market power in the provision of this specific product before the Commission would authorize sales of this service at market-based rates. The Commission also did not extend the *Avista* policy to Scheduling, System Control and Dispatch service. Because only balancing area operators can provide this ancillary service, it does not lend itself to competitive supply. Order No. 784, FERC Stats. & Regs. ¶ 31,349 at n.17.

¹⁴ Because energy and generator imbalance services merely require the ability to respond to dispatch within the hour, the Commission found that any sub-hourly transmission scheduling interval would be sufficient. Order No. 784-A, 146 FERC ¶ 61,114 at P 12 (2012). As the operating reserve services require more rapid response within

¹ As described in more detail below, this Final Rule defines primary frequency response service as a resource standing by to provide autonomous, pre-programmed changes in output to rapidly arrest large changes in frequency until dispatched resources can take over.

² 16 U.S.C. 824d, 824e (2012).

³ *Third-Party Provision of Ancillary Services; Accounting and Financial Reporting for New Electric Storage Technologies*, Order No. 784, 78 FR 46,178 (July 30, 2013), FERC Stats. & Regs. ¶ 31,349 (2013).

⁴ *Avista Corp.*, 87 FERC ¶ 61,223, *order on reh'g*, 89 FERC ¶ 61,136 (1999) (*Avista*). Outside the markets operated by regional transmission organizations and independent system operators, *Avista* authorizes suppliers who cannot show a lack of market power with respect to certain ancillary services to nevertheless sell such services, subject to certain restrictions. As relevant to this Final Rule, these restrictions prohibit sales to a public utility that is purchasing ancillary services to satisfy its own Open Access Transmission Tariff (OATT) requirements to offer ancillary services to its own customers, or sales to a traditional, franchised public utility affiliated with the third-party seller, or where the underlying transmission service is on the transmission system of the affiliated public utility.

⁵ Order No. 784, FERC Stats. & Regs. ¶ 31,349 at P 4, PP 57–58.

⁶ *Id.* PP 59–61. Although the title of Schedule 3 addresses both frequency response and regulation, the two services are distinct from each other. Frequency response is a resource standing by to

8. However, the Commission also found in Order No. 784 that the record developed to that point did not support expanding these market-based rate authorizations to include sales of Reactive Supply and Voltage Control (under OATT Schedule 2) (Schedule 2 service) and Regulation and Frequency Response (under OATT Schedule 3) services (Schedule 3 service).¹⁵ Instead, the Commission allowed market-based rate sales of Schedule 2 and Schedule 3 services to a public utility that is purchasing ancillary services to satisfy its OATT requirements, provided the sale is made pursuant to a competitive solicitation that meets certain specified requirements¹⁶ or the sale is made at or below the buying public utility transmission provider's own Schedule 2 or 3 rate, as applicable.¹⁷ The Commission further stated its intention to gather more information regarding the technical, economic and market issues concerning the provision of these services in a separate proceeding that considers, among other things, the ease and cost-effectiveness of relevant equipment upgrades, the need for and availability of appropriate special arrangements such as dynamic scheduling or pseudo-tie arrangements, and other technical requirements related to the provision of Schedule 2 and Schedule 3 services.¹⁸

9. Pursuant to that directive, Commission staff held a workshop on April 22, 2014 to obtain input from interested persons regarding the technical, economic and market issues concerning the provision of Schedule 2 and Schedule 3 services.¹⁹ Among other things, the workshop explored issues surrounding the sale of these services at market-based rates. Comments submitted in response to the workshop that discussed the characteristics associated with a primary frequency response product indicated that market-

the hour (spinning reserves must be available immediately and supplemental reserves must be available within a short period of time), the Commission required potential sellers of operating reserve services to satisfactorily explain, in their market-based rate applications, how the particular intra-hour transmission scheduling practices or other protocols in their regions permit resources in one balancing authority area to respond to contingencies in a neighboring balancing authority area within these tight time frames. Order No. 784-A, 146 FERC ¶ 61,114 at PP 13–15.

¹⁵ Order No. 784, FERC Stats. & Regs. ¶ 31,349 at PP 59–61.

¹⁶ *Id.* PP 99–101.

¹⁷ *Id.* PP 82–85.

¹⁸ *Id.* P 61.

¹⁹ See *Third-Party Provision of Reactive Supply and Voltage Control and Regulation and Frequency Response Services*, Final Agenda, Docket No. AD14–7–000 (Apr. 22, 2014).

based rate sales of such a product are feasible.²⁰

10. Separately, the Commission on January 16, 2014 issued a Final Rule approving reliability standard BAL–003–1²¹ under which a balancing authority²² must maintain a minimum frequency response obligation.²³ While most balancing authorities should be able to meet the new reliability standard using their own resources,²⁴ some may nevertheless be interested in purchasing primary frequency response service from others if doing so would be economically beneficial.

11. Based upon information received at the workshop and in the subsequently-filed 11 written comments, the Commission issued a NOPR that differentiated between regulation service and primary frequency response service, analyzed the technical characteristics of primary frequency response service to show why the existing market power screens for sales of energy and capacity could be used to show lack of market power for sales of primary frequency response as well, and therefore proposed to allow sales of primary frequency response service at market-based rates by entities granted market-based rate authority for sales of energy and capacity.²⁵ The NOPR sought comment on all aspects of this proposal.²⁶

12. Most of the 19 sets of comments submitted in response to the NOPR are supportive of the proposal, with some commenters seeking clarification of

²⁰ For example, most commenters echo Edison Electric Institute's (EII) arguments that virtually all generators can provide primary frequency response, and because it is provided at the interconnection level, balancing authority areas have more flexibility on the location of the resource than they would for other products. See, e.g., Edison Electric Institute Post-Workshop Comments, Docket No. AD14–7–000, at 7–8 (filed June 3, 2014).

²¹ Reliability standards proposed by the North American Electric Reliability Corporation (NERC) are subject to the Commission's jurisdiction under section 215 of the Federal Power Act, 16 U.S.C. 824o(d). The Commission has authority to approve or reject such standards, and to enforce those that are approved.

²² The NERC Glossary defines a balancing authority as "(t)he responsible entity that integrates resource plans ahead of time, maintains load-interchange-generation balance within a Balancing Authority Area, and supports Interconnection frequency in real time." See http://www.nerc.com/pa/Stand/Glossary%20of%20Terms/Glossary_of_Terms.pdf.

²³ See *Frequency Response and Frequency Bias Setting Reliability Standard*, Order No. 794, 146 FERC ¶ 61,024 (2014).

²⁴ *Id.* PP 62–63.

²⁵ NOPR, FERC Stats. & Regs. ¶ 32,705 (2015). With respect to the remainder of the issues discussed in the workshop and associated written comments, the Commission did not see sufficient evidence to pursue generic reforms through this rulemaking proceeding. *Id.* P 10.

²⁶ *Id.* P 30.

various issues. Meanwhile, the limited set of adverse comments fall into two broad categories: (1) Comments seeking to contest the technical arguments regarding market power relied upon by the NOPR; and (2) comments that do not relate to market power screening but rather relate to various aspects of the implementation of actual primary frequency response transactions.

13. For the reasons described more fully below, the Commission finds that it is appropriate to finalize the NOPR proposal to permit voluntary sales of primary frequency response service at market-based rates for entities granted market-based rate authority for sales of energy and capacity. We also address various requests for clarification, as discussed more fully below. We emphasize that this Final Rule does not place any limits on the types of transactions available to procure primary frequency response service; they may be cost-based or market-based, bundled with other services or unbundled as discussed further below, and inside or outside of organized markets. This Final Rule focuses solely on how jurisdictional entities can qualify for market-based rates for primary frequency response service in the context of voluntary bilateral sales.

II. Discussion

14. In the NOPR in this proceeding, the Commission proposed to define primary frequency response service as the "autonomous, automatic, and rapid action of a generator, or other resource, to change its output (within seconds) to rapidly dampen large changes in frequency."²⁷ Elsewhere in the NOPR, the Commission discussed the idea that individual autonomous responses to large changes in frequency will be of short duration, sustained only until dispatched regulation or operating reserve resources begin responding.²⁸ As there are aspects of both statements that are important to properly defining this product, in this Final Rule the Commission will refine and clarify the NOPR's definition to state that primary frequency response service is defined as a resource standing by to provide autonomous, pre-programmed changes in output to rapidly arrest large changes in frequency until dispatched resources can take over.

²⁷ *Id.* P 12.

²⁸ *Id.* P 24.

A. Technical Issues Related to the Application of Existing Market Power Screens to Primary Frequency Response Service

1. Geographic Market and the Impact of Resource Distance

15. The Commission analyzes horizontal market power for market-based sales of energy and capacity²⁹ using two indicative screens, the wholesale market share screen and the pivotal supplier screen, to identify sellers that raise no horizontal market power concerns and can otherwise be considered for market-based rate authority.³⁰ The wholesale market share screen measures whether a seller has a dominant position in the relevant geographic market in terms of the number of megawatts of uncommitted capacity owned or controlled by the seller, as compared to the uncommitted capacity of the entire market.³¹ A seller whose share of the relevant market is less than 20 percent during all seasons passes the wholesale market share screen.³² The pivotal supplier screen evaluates the seller's potential to exercise horizontal market power based on the seller's uncommitted capacity at the time of annual peak demand in the relevant market.³³ A seller satisfies the pivotal supplier screen if its uncommitted capacity is less than the net uncommitted supply in the relevant market.³⁴

16. Passing both the wholesale market share screen and the pivotal supplier screen creates a rebuttable presumption that the seller does not possess horizontal market power; failing either screen creates a rebuttable presumption that the seller possesses horizontal market power.³⁵ A seller that fails one of the screens may present evidence, such as a delivered price test, to rebut the presumption of horizontal market

power.³⁶ In the alternative, a seller may accept the presumption of horizontal market power and adopt some form of cost-based mitigation.³⁷

17. Three of the key components of the analysis of horizontal market power are the definition of products, the determination of appropriate geographic scope of the relevant market for each product, and the identification of the uncommitted generation supply within the relevant geographic market. In Order No. 697, the Commission adopted a default relevant geographic market for sales of energy and capacity.³⁸ Specifically, the Commission generally uses a seller's balancing authority area plus directly interconnected (first-tier) balancing authority areas, or uses the Regional Transmission Organization (RTO) or Independent System Operator (ISO) market if applicable, as the default relevant geographic market. However, where the Commission has made a specific finding that there is a submarket within an RTO/ISO, that submarket becomes the default relevant geographic market for sellers located within the submarket for purposes of the market-based rate analysis. The Commission also provided guidance as to the factors the Commission will consider in evaluating whether, in a particular case, to adopt an alternative larger or smaller geographic market instead of relying on the default geographic market.³⁹

18. The Commission stated in the NOPR that, because primary frequency response service can be effectively supplied by any resource throughout an interconnection and have the same

ability to dampen harmful changes in interconnection-wide frequency, the geographic market for market power analysis of a primary frequency response product could be the entire interconnection within which the buyer resides, and in any event would be no smaller than the geographic market represented in the existing market power screens;⁴⁰ *i.e.*, the home balancing authority area of the seller plus first-tier balancing authority areas or the RTO/ISO market if applicable. The Commission therefore proposed to apply the existing market power screens used for energy and capacity sales, without modification as to geographic market, to sales of primary frequency response service.

19. Most commenters either express specific support for this finding,⁴¹ or are silent on the issue.⁴² However, American Public Power Association, the National Rural Electric Cooperative Association, and the Transmission Access Policy Study Group (together, TAPS), PJM Interconnection, L.L.C. (PJM), and Midcontinent Independent System Operator, Inc. (MISO) raise limited, technical concerns regarding this finding.

20. TAPS argues that while remote generators may be capable of responding, there is reason to be concerned that frequency response from a distant generator would be less effective than frequency response from a nearby generator, and that this alleged impact of distance would upset the Commission's proposal to rely on the existing market-based rate screens used for energy and capacity sales to ensure that sellers of primary frequency response service lack market power when making sales to public utility transmission providers.⁴³

21. PJM similarly asserts, without elaboration, that questions remain as to whether there is sufficient substitutability of units across the Eastern Interconnection so as to support the conclusion that market power issues are of limited concern in the provision of primary frequency response. PJM also asserts that the kind of communications infrastructure, protocols, and compensation policies necessary to permit PJM to obtain primary frequency

Mont. Consumer Counsel v. FERC*, 659 F.3d 910 (9th Cir. 2011), *cert. denied*, 133 S. Ct. 26 (2012). See also 18 CFR 35.37(b), (c)(1) (2015).

³¹ Order No. 697, FERC Stats. & Regs. ¶ 31,252 at P 43.

³² *Id.* PP 43-44, 80, 89.

³³ 18 CFR 35.37(c)(1) (2015).

³⁴ Order No. 697, FERC Stats. & Regs. ¶ 31,252 at P 42.

³⁵ 18 CFR 35.37(c)(1) (2015).

³⁶ 18 CFR 35.37(c)(2) (2015). For purposes of rebutting the presumption of horizontal market power, sellers may use the results of the delivered price test to perform pivotal supplier and market share analyses and market concentration analyses using the Herfindahl-Hirschman Index (HHI). The HHI is a widely accepted measure of market concentration, calculated by squaring the market share of each firm competing in the market and summing the results. The Commission has stated that a showing of an HHI less than 2,500 in the relevant market for all season/load periods for sellers that have also shown that they are not pivotal and do not possess a market share of 20 percent or greater in any of the season/load periods would constitute a showing of a lack of horizontal market power, absent compelling contrary evidence from intervenors. Order No. 697, FERC Stats. & Regs. ¶ 31,252 at P 111.

³⁷ 18 CFR 35.37(c)(3) (2015).

³⁸ Order No. 697, FERC Stats. & Regs. ¶ 31,252 at P 15.

³⁹ A necessary condition that must be satisfied to justify an alternative market is a demonstration regarding whether there are frequently binding transmission constraints during historical peak seasons examined in the screens and at other competitively significant times that prevent competing supply from reaching customers within the proposed alternative geographic market. *Id.* P 268.

⁴⁰ NOPR, FERC Stats. & Regs. ¶ 32,705 at P 23.

⁴² See Dominion Resources Services, Inc. (Dominion) at 2; Duke Energy Corporation (Duke) at 3; Electric Power Supply Association (EPSA) at 3; Energy Storage Association (ESA) at 1; Idaho Power Company (Idaho Power) at 2; Public Interest Organizations at 2.

⁴³ TAPS at 5-6.

response from resources outside of its market do not yet exist.⁴⁴

22. MISO argues that, while the NOPR is correct that any resource anywhere in an interconnection can help stabilize the frequency of that interconnection following a load or resource loss, there may be negative reliability impacts caused by flows to very remote locations, particularly if there are weak or transmission-limited interfaces.⁴⁵

Commission Determination

23. We adopt the NOPR proposal to apply the existing market power screens used for energy and capacity sales, without modification as to geographic market, to sales of primary frequency response service. With respect to TAPS's arguments, the Commission finds that the delay in sensing a change in frequency associated with resource distance does not undermine the NOPR's proposal to rely upon the default geographic market reflected in the existing market power screens for sales of energy and capacity; *i.e.*, the home balancing authority area of the seller plus first-tier balancing authority areas or the RTO/ISO market if applicable. While TAPS is correct that a resource located far across an interconnection from the site of a contingency event should sense the resulting change in frequency later than would a closer resource, studies of this issue⁴⁶ indicate that this delay would be within the NOPR's product definition that requires primary frequency response resources to change their output within seconds in response to a large change in frequency.⁴⁷

24. With respect to PJM's assertion that questions remain as to the substitutability of units across the Eastern Interconnection, PJM has not explained what those questions may be, and in any event the NOPR does not propose to test market power based on an interconnection-wide geographic market.

25. With respect to PJM's argument that the kind of communications infrastructure, protocols, and compensation policies necessary to permit PJM to obtain primary frequency response from resources outside of its market do not yet exist, the Commission partially agrees and partially disagrees

as described below, but even where we partially agree, this would not impact the NOPR proposal regarding market power screening.

26. With respect to communications protocols, the Commission agrees that in order to effectuate actual voluntary primary frequency response transactions, it may be necessary to further develop or refine existing communications protocols, as more detailed data may be needed for purposes of verifying primary frequency response activity than for other activities. However, this refinement should not pose such a fundamental barrier to sales of primary frequency response service from one balancing authority area to another that it calls into question the default geographic market of the existing market power screens. This is because, as will be discussed further below, there are existing information sharing systems and protocols that should be able to accommodate the more detailed information associated with primary frequency response transactions without requiring an unreasonable amount of effort from affected parties. Hence, for market power screening purposes, resources in first-tier balancing authority areas should remain viable competitors to supply primary frequency response to the home balancing authority area.

27. With respect to compensation policies, the Commission disagrees with PJM that compensation policies necessary to support this Final Rule do not yet exist. As will be further discussed below, this Final Rule does not require development of organized markets for primary frequency response service, but rather is focused on voluntary bilateral sales of primary frequency response at market-based rates. In bilateral markets, compensation would be negotiated between the buyer and the seller pursuant to the seller's market-based rate authority. As such, bilateral transactions will be strictly voluntary and the buyer will presumably only agree to them if it sees an economic reason to do so. Therefore, no further compensation policies are necessary in connection with this Final Rule.

28. Finally, MISO argues that there may be negative reliability impacts caused by flows to very remote locations, particularly if there are weak or transmission-limited interfaces. The Commission agrees but sees this as a practical consideration relevant to particular bilateral transactions rather than a universal issue that invalidates the use of existing market power screens to show lack of market power for sales

of primary frequency response service. Accordingly, this argument does not invalidate the NOPR proposal regarding market power screening for sellers of primary frequency response service.

2. Need for Transmission Reservation and Scheduling

29. With respect to potential barriers related to transmission scheduling or reservation, the Commission stated in the NOPR that primary frequency response service should not require any transmission reservation or scheduling, because by definition individual frequency responses would not be sustained for long enough periods to trigger a need for transmission service or schedule changes. Rather, such individual primary frequency responses should be rapidly replaced by resources centrally dispatched by the relevant balancing authority.⁴⁸

30. Most commenters either specifically agree that transmission scheduling and reservation should not be necessary in connection with the temporary, autonomous changes in output associated with primary frequency response service,⁴⁹ or remain silent on the issue. However, EEI asserts that transmission reservation or scheduling may be needed in some cases. According to EEI, the duration of primary frequency response products could range from a minute or two to supplement a response for only large events, to an unbounded number of minutes for as long as frequency remains beyond a given frequency deadband. In the case of longer durations, according to EEI, transmission providers may have to assess the potential transmission impact of third-party resources providing primary frequency response through their service territory for extended periods of time.⁵⁰ Duke makes similar arguments.⁵¹

31. Similarly, TAPS argues that the Commission did not adequately examine in the NOPR the implications of remote provision of primary frequency response on transmission availability and co-optimization of energy and ancillary services. TAPS argues the Commission should provide additional analysis of how remote supply of frequency response service will affect transmission reserve margin and available transfer capability, how the associated costs are borne, and whether this will have adverse

⁵¹ Duke at 7–8.

consequences for market efficiency, particularly in RTOs.⁵²

Commission Determination

32. The Commission continues to believe that transmission reservation and scheduling will not create a barrier to sales of frequency response within an interconnection. While the Commission concedes that in some cases transmission capacity may need to be reserved to support a sale of primary frequency,⁵³ we continue to believe that in the vast majority of cases the sale of primary frequency response service should not require any transmission reservation or scheduling because, by definition, individual frequency responses would not be sustained for long enough periods to trigger a need for transmission service or schedule changes. With respect to EEI's arguments, the Commission disagrees that primary frequency response, as defined in this Final Rule, could last for an unbounded number of minutes. By the definition of primary frequency response provided in this Final Rule, individual primary frequency responses shall be short, lasting only until dispatched resources can take over. Thus, even if a deviation from target frequency lasts longer than the typical short responses envisioned by our primary frequency response product definition, this does not necessarily mean that a particular resource that continues to respond to that deviation is doing so through extended periods of primary frequency response service as EEI suggests.

33. Rather, after the initial autonomous response, any continuing response would be deemed to occur as a result of dispatch instructions from the relevant balancing authority, which would most likely constitute either use of regulation or operating reserves. Accordingly, while a transmission reservation may sometimes be needed to support a sale of primary frequency response, there should never be a need to actually schedule transmission or change a transmission schedule in connection with primary frequency response service. Hence, transmission scheduling should pose no barrier to sales of primary frequency response service, and in the open access transmission environment created by

Order No. 888, reservation by itself does not present any undue barrier to participation. Indeed, all other ancillary service transactions, at least in bilateral markets, are expected to include needed transmission reservation.

34. With respect to TAPS's argument, the Commission agrees that transmission providers may in some cases need to set aside additional transmission capacity to support particular sales of primary frequency response from remote resources. However, the possibility that particular transactions involving remote resources may require additional transmission capacity to be set aside does not undermine the NOPR proposal to grant market-based rate authority for voluntary sales of primary frequency response to entities that pass the existing market power screens for sales of energy and capacity. These screens already limit consideration of imports from first-tier balancing authority areas based on simultaneous transmission import limits as a way to test market power under realistic conditions based on a reasonable simulation of historical conditions.⁵⁴ No further consideration of transmission impacts is necessary to test for seller market power. Analysis of (1) how remote supply of primary frequency response service in particular transactions might affect transmission reserve margin and available transfer capability; (2) how the associated costs would be borne; or (3) whether this might have adverse consequences for market efficiency are concerns that are not relevant to the Commission's market power assessment. Rather, these are concerns that may impact a balancing authority's decision as to whether to enter into any given primary frequency response transaction, or that may become relevant if any RTO or ISO voluntarily chooses to develop an organized market for primary frequency response—something that is not required by this Final Rule.

35. With respect to TAPS's arguments regarding potential distortion of co-optimized RTO/ISO energy and ancillary service markets, this Final Rule merely clarifies the appropriate method for ex ante market power screening for potential sellers of primary frequency response service. It does not require any entity, including RTOs and ISOs, to purchase primary frequency response. Nor does it require RTOs and ISOs to develop organized markets for primary frequency response. The Commission finds it reasonable to assume that if an RTO or ISO ever

decides to purchase primary frequency response service, it will only do so if the RTO or ISO can address its and its stakeholders' concerns as to the impact on its co-optimized markets.

Furthermore, if such purchases require any tariff modifications, the RTO or ISO would also need to submit a filing to the Commission for its review addressing such issues. Accordingly, in the context of this Final Rule focusing on market power screens, these concerns are premature and beyond the scope.

B. Requests for Clarification

1. Purchases Required or Optional

36. A variety of entities request clarification that this Final Rule does not require purchases of primary frequency response or the development of organized markets for primary frequency response.⁵⁵ At the other end of the spectrum, Calpine argues that RTOs and ISOs should be given a deadline to develop tariff changes that would enable them to implement primary frequency response compensation mechanisms.⁵⁶

37. The Commission grants the requests to clarify that this Final Rule does not require any entity to purchase primary frequency response from third parties or to develop an organized market for primary frequency response. This Final Rule is limited to issues associated with market power screening for voluntary bilateral sellers of primary frequency response service. In light of this clarification, we deny Calpine's request for RTOs and ISOs to be given a deadline to develop tariff changes that would enable them to implement primary frequency response compensation mechanisms.

2. Interaction With Regulation Service

38. EEI and Duke both request that sellers be able to retain the reference to "Regulation and Frequency Response Service" in their current market-based rate tariffs, and that the Final Rule make clear that providing market-based rate authorization for primary frequency response service is not intended to limit the options that buyers have in procuring these ancillary services.⁵⁷

39. The Commission does not intend to limit the options that buyers have in procuring these ancillary services but will nevertheless affirm the NOPR proposal to require a separate listing of regulation service and primary frequency response service in market-

⁵² TAPS at 9–11.

⁵³ The Commission expects that sales of primary frequency response from resources in transmission constrained areas would constitute the most likely scenario where a reservation of transmission capacity might be needed to support the sale. Naturally, the added cost of such transmission purchases would likely be considered by the potential purchaser in deciding whether or not to enter into such purchase.

⁵⁵ EEI at 1–2; California Independent System Operator Corporation (CAISO) at 2; MISO at 1; PJM at 2, 5.

⁵⁶ Calpine at 9.

⁵⁷ EEI at 4; Duke at 3–7.

based rate tariffs. However, to address EEI's and Duke's concerns, the Commission clarifies that, even though we require that regulation service and primary frequency response service be separately listed in sellers' market-based rate tariffs, this does not mean that buyers and sellers cannot agree to combined transactions involving both regulation service and primary frequency response service with appropriate restrictions. Those restrictions involve the need for the market-based regulation service component to be limited to the buyer's OATT rate for regulation or the outcome of a competitive solicitation as described in Order No. 784.⁵⁸ No such restrictions would apply to the primary frequency response service component of such combined transactions.

40. Duke also expresses concern as to what impact splitting the services in the "Third Party Provider" section of the market-based rate tariff would have on transmission providers and any transmission customers self-providing service under Schedule 3 of the OATT.⁵⁹

41. The Commission clarifies that OATT Schedule 3 serves a different purpose from the market-based rate tariff (cost-based sales from the OATT provider versus market-based sales from third parties), and so OATT Schedule 3 does not need modification as a result of this Final Rule. However, to the extent that a particular OATT provider purchases primary frequency response from a third party in order to help serve its OATT customers, it may propose in a section 205 filing to include such costs in its OATT Schedule 3 rates.

3. Information Sharing and Measurement and Verification

42. A variety of entities emphasize the importance of adequate information sharing and measurement and verification if primary frequency response service is to be traded.⁶⁰ In this regard, SmartSenseCom, Inc. (SmartSenseCom) also argues that in order to support the broadest base of available resources to provide primary frequency response services, potential providers should have flexibility in their ability to select any monitoring device that meets or exceeds applicable industry standards for accuracy as a means to measure frequency and trigger the primary frequency response at a given set point.⁶¹

43. The Commission agrees that these matters are important, and expects that potential buyers will ensure that the resources from which they purchase are capable of providing the service in a useful manner, consistent with relevant NERC requirements and guidelines as discussed earlier. This would require that, among other things, the parties agree to appropriate information sharing and measurement and verification. At this stage, and given the voluntary nature of any primary frequency response transactions that may result from this Final Rule, the Commission sees no need to be more prescriptive regarding specific methods of information sharing and measurement and verification.

44. In a related matter, TAPS asserts that the NOPR's statement that telemetry sharing should not pose any significant barrier to the use of remote resources for the purposes of market-based rates requires further evaluation. TAPS argues that transmitting the telemetry data from one balancing authority area to just one other balancing authority area effectively doubles (or more) the number of points at which the data can be intercepted or attacked. Thus, TAPS argues that the Commission should provide additional analysis to evaluate whether these potential technical barriers will impede the ability of remote generators to compete to make market-based rate sales of primary frequency response across balancing authorities and to multiple balancing authorities.⁶²

45. As mentioned earlier, the Commission finds that balancing authorities already share with their neighbors the same type of operational information contemplated here, both on a day-to-day basis, and occasionally through special arrangements like pseudo-ties or dynamic schedules, though they may not do so with as much detail as would be required for primary frequency response. In sharing such information, they use secure protocols such as Inter-Control Center Communications Protocol.⁶³ There appears to be nothing unique about information related to primary frequency response transactions, which would largely involve the real-time operational state of the resources in question as a way of verifying both their readiness to respond and actual responses to relevant frequency

deviations, that could not be accommodated by this existing secure protocol widely used by the electric utility industry. As a result, the Commission continues to believe that the information sharing required to facilitate sales of primary frequency response service will not create a barrier to such sales and thus we find in this Final Rule that the market power screens used for energy and capacity are valid for primary frequency response service.

4. Definition of Primary Frequency Response Service

46. Parties request various clarifications regarding the definition of primary frequency response service. Calpine and EPSA assert that the product definition for primary frequency response service should include both inertial response from conventional "spinning mass" generators and primary frequency response from discretionary turbine-governor settings.⁶⁴ Similarly, Union of Concerned Scientists argues for the inclusion of synchronous and/or synthetic inertia as a market product that can be used to provide primary frequency response, and requests that the Commission clarify whether the creation of markets for inertia is within the scope of changes that were envisioned by the Commission when it issued this NOPR.⁶⁵

47. The Commission emphasizes that this Final Rule addresses market-based rate authority for sales of services that fit the definition of primary frequency response services, *i.e.*, resources standing by to provide autonomous, pre-programmed changes in output to rapidly arrest large changes in frequency until dispatched resources can take over. True inertia, while also serving an important function, does not fit this definition because it does not arrest large changes in frequency, but rather acts to oppose all changes in frequency. The term "synthetic inertia" is more complicated to address because it is not clear from the record whether there is actual industry consensus on what the term means. However, if it is assumed to mean a resource standing by to provide autonomous, pre-programmed changes in output to rapidly arrest large changes in frequency until dispatched resources can take over, then the Commission would simply consider it a form of primary frequency response subject to this Final Rule. In contrast, if the "synthetic inertia" response either cannot be sustained until dispatched

⁶⁵ Union of Concerned Scientists at 8.

resources take over, or is merely aimed at slowing all changes in frequency instead of arresting large changes, then “synthetic inertia” would not be a form of primary frequency response, and sales of it would not be encompassed by this Final Rule.

48. Several commenters assert that the product definition must differentiate based on response time in addition to magnitude of response.⁶⁶ Consistent with this idea, SmartSenseCom asks the Commission to amend section 35.28 of its regulations by adding a new paragraph that states the following:

Primary frequency response in ancillary service markets. Each Commission approved independent system operator or regional transmission organization that has a tariff that provides for the compensation for primary frequency response service must provide such compensation based upon the actual service provided, include a capacity payment that takes into account the speed of primary frequency response-providing resources and a payment for performance that reflects the quantity of primary frequency response provided by a resource in response to a frequency deviation.⁶⁷

49. The Commission finds that the Final Rule’s product definition, summarized at the beginning of the discussion section above, already sufficiently incorporates the importance of speed. The Commission finds that no further differentiation based on response time or magnitude is necessary in connection with this Final Rule, which deals only in the appropriate ex ante market power screening of potential sellers of primary frequency response service. For this reason, and because this Final Rule does not require development of organized markets for primary frequency response, the Commission also denies as unnecessary the requested addition to the Commission’s regulations related to organized RTO and ISO markets for primary frequency response.

50. Grid Storage Consulting, LLC (Grid Storage Consulting) and Public Interest Organizations argue that the product definition for this service should require response that is immediate, bi-directional, proportional to the frequency deviation, continuous in the sense of not being prematurely interrupted by competing controls or physical limitations, and certain.⁶⁸ The Commission clarifies that potential voluntary buyers and sellers of primary frequency response service are free to

negotiate any refinements to the basic product definition in this Final Rule that they see fit, so long as such refinements remain consistent with the basic definition. Obviously, any market-based rate authority granted as a result of this Final Rule would only apply to products that are consistent with the definition of primary frequency response service described at the beginning of the discussion section above.

51. SmartSenseCom urges the Commission to define primary frequency response directly within the Commission’s regulations.⁶⁹ The Commission denies this request as unnecessary. The Commission’s regulations do not include definitions of every particular product subject to its jurisdiction; it is sufficient for such product definitions to be described in relevant Commission orders such as this one.

5. Miscellaneous Requests for Clarification

52. EEI encourages the Commission to make clear in the Final Rule that a potential third-party provider would not be disqualified from competing on the basis that it is interconnected to an affiliated transmission provider. According to EEI, not addressing the affiliate restriction provisions of the *Avista* policy could unnecessarily limit the pool of third-party generators that would be eligible to compete to provide market-based primary frequency response service.⁷⁰

53. EEI’s concern relates to the component of the *Avista* restrictions highlighted below:

(2) to address affiliate abuse concerns, the approach [permitting market-based rate sales of ancillary services without a corresponding market power analysis] will not apply to sales to a traditional, franchised public utility affiliated with the third-party supplier, or to sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier.⁷¹

54. As the Commission noted in the *Avista* passage quoted above, this second *Avista* restriction was meant to address affiliate abuse. However, EEI’s concern that potential third-party providers should not be disqualified from competing on the basis that they are interconnected to an affiliated transmission provider appears to be based on an overly broad interpretation of the language highlighted above; *i.e.*, one that would prevent sales that only

tangentially involve the affiliated public utility transmission provider’s system. While the Commission understands this concern, we do not believe it is justified because the highlighted language targets a much narrower set of circumstances.

55. In particular, in *Ameren Marketing*,⁷² the Commission approved a case-by-case request for market-based rates for ancillary services sales by a third-party seller to transmission customers located on the transmission system of the seller’s public utility transmission provider affiliate where the seller offered several safeguards to protect against the potential for affiliate abuse.⁷³ *Ameren Marketing* demonstrates the narrow scope of the Commission’s concern related to this *Avista* restriction; namely, third-party sales to customers located on the transmission systems of affiliates. Only in these situations does the second *Avista* restriction apply, and in these situations, we remain willing to consider requests for market-based rate authority for sales of primary frequency response service on a case-by-case basis. In response to EEI’s concern, the Commission clarifies that where the customer is not located on the transmission system of the third-party seller’s affiliate, this aspect of the *Avista* restrictions does not apply.

56. EEI also recommends that the Commission clarify in the Final Rule that the location of primary frequency response purchases be deemed to be where the customer is located within an interconnection, rather than where the underlying generation resides. According to EEI, this would address a potential ambiguity in how the NOPR proposal is described in paragraph 28 of the NOPR, where the Commission stated that “. . . sellers passing existing market-based rate screens in a given geographic market should be granted a rebuttable presumption that they lack market power for sales of primary frequency response in that market.”⁷⁴ EEI states that if a generator has passed the Commission’s existing market power screens (or if the screens are not required to be submitted based on the location of the generation) for the geographic market in which the buyer is located, then the generator should benefit from the rebuttable presumption

⁶⁶ Calpine at 7; AWEA at 4; Grid Storage Consulting at 2–4; Public Interest Organizations at 4; SmartSenseCom at 8.

⁶⁷ SmartSenseCom at Ex. A.

⁶⁸ Grid Storage Consulting at 4–7; Public Interest Organizations at 4.

⁷² *Ameren Energy Marketing Co.*, 95 FERC ¶ 61,448, at 62,626 (2001) (*Ameren Marketing*).

⁷³ With respect to all three *Avista* restrictions, the Commission expressed its willingness to consider requests for market-based rate authority under the conditions associated with the restrictions on a case-by-case basis. *Avista Corp.*, 87 FERC ¶ 61,223 at n.12.

⁷⁴ EEI at 7 (citing NOPR, FERC Stats. & Regs. ¶ 32,705 at P 28).

that it lacks market power with respect to sales of primary frequency response service throughout the entire interconnection.⁷⁵

57. EEI appears to be concerned that the language in paragraph 28 might be interpreted to mean that market-based rate sales of primary frequency response are only authorized in specific geographic markets. As will be explained next, this would be similar to how market-based rate sales of operating reserves are handled pursuant to Order No. 784, but different from how authority for market-based rate sales of energy and capacity is granted. With respect to energy and capacity, the Commission's normal practice is to test for market power in the seller's home balancing authority area, and, if the seller is vertically-integrated, first-tier balancing authority areas, because this is where the seller's market power likely would be greatest. However, the market-based rate authority granted based on passage of these market power screens permits sales anywhere that the seller is capable of transacting. In Order No. 784, the Commission had to depart from this standard practice with respect to market-based rate sales of operating reserves because of the special transmission scheduling practices associated with those services. Order No. 784 required sellers of operating reserves to first demonstrate that the scheduling practices in the regions within which they wish to sell could support sales of operating reserves from one balancing authority area to another, and market-based rate authority for sales of operating reserves would only be granted for regions where such showing was made successfully by the seller.⁷⁶ Because primary frequency response is autonomous and individual responses are of short duration, no special scheduling practices would be required. Hence, the Commission finds that market-based rate authority for sales of primary frequency response should be granted on the same basis as sales of energy and capacity; *i.e.*, while market power is tested at the resource's location, authority is granted for sales anywhere the seller is capable of transacting. The Commission, therefore, clarifies the description in paragraph 28 of the NOPR accordingly.

58. AWEA, ESA, Union of Concerned Scientists, and Grid Storage Consulting argue that there may be some resources that have been authorized to sell ancillary services at market-based rates but not energy and capacity, or that are

otherwise eligible to participate in Commission-authorized and supervised markets. They recommend that any such resources be permitted to sell primary frequency response service at market-based rates as well.⁷⁷ In a similar vein, Public Interest Organizations ask the Commission to consider whether there is any class or potential class of emerging resources that sell only ancillary services and not energy or capacity, and if so, whether such resources should be exempted from existing market power screens in exchange for some more appropriate market power analysis.⁷⁸

59. In response to these comments, the Commission clarifies that for resources capable of injecting electric energy onto the interstate transmission grid,⁷⁹ authority to sell at market-based rates, even exclusively in organized RTO or ISO markets, is only granted to entities that either pass the existing market power screens for sales of energy and capacity or where any market power concerns have been adequately mitigated. Thus, even if such sellers only sell ancillary services today, their authorization to do so was granted based in part upon either passage of the existing market power screens for sales of energy and capacity or where there was a demonstration that any market power concerns have been adequately mitigated.⁸⁰ The only current exception to this rule involves demand response resources. If a third-party seller exclusively uses demand response resources to participate in RTO/ISO markets, it does not need to seek market-based rate authority or place any tariff on file with the Commission, because demand response resources do not inject electric energy onto the interstate transmission grid. However, if

⁷⁷ AWEA at 4; ESA at 4–5; Union of Concerned Scientists at 3; Grid Storage Consulting at 10.

⁷⁸ Public Interest Organizations at 5–6.

⁷⁹ Pursuant to section 201(a) of the FPA, the Commission is charged with regulating the transmission of electric energy in interstate commerce and the sale of electric energy at wholesale in interstate commerce. 16 U.S.C. 824(a) (2012). Section 201(b) provides that the Commission shall have jurisdiction over facilities for wholesale sales of electric energy in interstate commerce or for transmission of electric energy in interstate commerce. *Id.* 824(b). In section 201(e), a public utility is defined as a person who owns or operates facilities subject to the jurisdiction of the Commission. *Id.* 824(e).

⁸⁰ In the event that sellers fail the existing market power screens for the RTO/ISO markets, the Commission allows such sellers to seek to obtain or retain market-based rate authority by relying on Commission-approved RTO/ISO monitoring and mitigation. See *Refinements to Policies and Procedures for Market-Based Rates for Wholesale Sales of Electric Energy, Capacity and Ancillary Services by Public Utilities*, Order No. 816, 80 FR 67056, (Oct. 30, 2015), 153 FERC ¶ 61,065, at P 28 (2015).

it ever markets services from other types of resources that result in it injecting electric energy onto the grid, then it would need market-based rate authority and a tariff on file.⁸¹ Accordingly, all sellers with market-based rate authority using resources that can inject electric energy onto the interstate transmission grid, even if they only sell ancillary services today, are already eligible to make use of the rebuttable presumption related to primary frequency response in this Final Rule. Similarly, sellers exclusively using demand response resources are already exempted from the need to submit market power analyses to gain authorization for their sales, and Public Interest Organizations have provided no reason why any new class of resources should be exempted.

60. Union of Concerned Scientists, ESA, and Public Interest Organizations all ask that the Commission clarify that the current Final Rule applies for all resources that can provide primary frequency response.⁸² Steel Producers Alliance makes similar arguments, emphasizing that resources other than generators are able to provide primary frequency response service and should be permitted to compete to provide the service.⁸³ The Commission clarifies that this Final Rule applies to jurisdictional market-based rate sellers of primary frequency response service, irrespective of what specific equipment they may choose to use to make such sales.

61. MISO asserts that certain technical statements within the NOPR require limited clarification. First, while MISO agrees with the NOPR that 60 Hertz (Hz) is the target frequency in North America, MISO notes that scheduled frequency may be offset at times to correct time error.⁸⁴ Second, in response to the NOPR's description of how each balancing authority's automatic generation control system will issue dispatch instructions to regulation resources to try to return the systems frequency to 60 Hz, MISO argues that typically the contingent balancing authority uses a combination of automatic generation control and contingency reserves for this purpose.⁸⁵ The Commission agrees with these clarifications, but finds that they do not alter any fundamental underpinning of the NOPR proposal.

62. Union of Concerned Scientists seeks clarification that procurement of, and payment for, primary frequency

⁸¹ *EnergyConnect, Inc.*, 130 FERC ¶ 61,031, at PP 26–33 (2010).

⁸² Union of Concerned Scientists at 5; ESA at 2–4; Public Interest Organizations at 2–3.

⁸⁵ *Id.* at 6.

⁷⁵ *Id.* at 7–8.

⁷⁶ Order No. 784, FERC Stats. & Regs. ¶ 31,349 at P 58.

response service would be allowed if the sale of primary frequency response service under market-based rates were allowed. It suggests that the Commission state that markets for primary frequency response service are allowed, subject to petition by appropriate utilities and approval by the Commission.⁸⁶ Union of Concerned Scientists also asks that market eligibility and participation as a seller should not be constrained by disproportionate administrative burdens.⁸⁷ The Commission agrees that market-based rate sales by entities that have been granted authorization for such sales are allowed; that is, of course, the object of a market-based rate application. With respect to the authority for potential buyers to purchase primary frequency response service, this Final Rule only involves market power screening of potential sellers. As with most products in voluntary bilateral markets, potential buyers do not need the Commission's permission. Similarly, the Commission clarifies that RTOs and ISOs remain free to develop organized markets for primary frequency response if they so choose, though nothing in this Final Rule requires them to do so, and if they choose to do so, only then will the Commission review such issues as eligibility requirements for participation.

6. Requests Outside the Scope of This Proceeding

63. AWEA and Public Interest Organizations both request that the Commission permit sales of regulation service at market-based rates by entities with authority for market-based rate sales of energy and capacity.⁸⁸ AWEA further requests that the Commission: (a) Explore the role that dynamic transfer capability, or lack thereof, plays in protecting against exertion of market power;⁸⁹ (b) consider relaxing interconnection standards for resources that only sell ancillary services;⁹⁰ and (c) consider whether entities in bilateral market areas should be required to develop platforms for the sale of primary frequency response, even if on a limited basis such as through open seasons.⁹¹

64. Monitoring Analytics, LLC (Monitoring Analytics) notes that, while the NOPR is mainly concerned with the market power screens typically used in

connection with authorizations to charge market-based rates, in organized markets like PJM's, such rates are granted in significant part based on the market power mitigation rules of the RTO or ISO. Accordingly, Monitoring Analytics recommends that if PJM develops a market for primary frequency response service, the rules for such market should incorporate the three pivotal supplier test that is already used for market power mitigation in PJM's other markets.⁹²

65. ESA argues that fast responding energy storage resources should be allowed to supply both primary frequency response and regulation services simultaneously. In this regard, ESA asserts that the Commission should not inadvertently create a system where all providers of primary frequency response must provide such service for at least 5–10 minutes until the slowest regulation resources can be brought online.⁹³ ESA requests that the Commission ensure that ancillary service market designs and procurement mechanisms are reasonably consistent across regions and reflect non-market compensated benefits in the determination of operational needs for particular capabilities, such as fast response.⁹⁴

66. Grid Storage Consulting argues that balancing authorities should not be able to mandate that primary frequency response be provided as part of other market products,⁹⁵ and that in some circumstances it may be appropriate to permit the costs of dedicated primary frequency response resources to be recovered in transmission rate base.⁹⁶

67. If an RTO seeks to create an organized market for primary frequency response, then Dominion recommends that the Commission require a market design similar to those used currently to procure other ancillary services such as regulation and operating reserves. Alternatively, Dominion also supports allowing RTOs to procure primary frequency response at cost-based rates, in a manner similar to how reactive power is procured. Dominion also argues that generators should either be exempt from charges such as operating reserve and balancing energy when deviating from their schedules in order to provide primary frequency response service or their compensation should include credits to offset such charges.⁹⁷

68. SmartSenseCom asserts that there is a difference in value between resources capable of delivering a rapid response to changing frequency and slower-responding units. Accordingly, SmartSenseCom asks the Commission to require public utility transmission providers to take into account the speed and accuracy of primary frequency response resources when determining reserve requirements for primary frequency response, as the Commission did for regulation service in Order No. 784. SmartSenseCom claims this "is particularly necessary in this instance in light of the language set forth in Order No. 784 and in the instant NOPR that distinguishes [primary frequency response] from regulation and the different requirements that will now exist for each service."⁹⁸

69. The Commission finds all of these issues to be beyond the scope of this Final Rule. This Final Rule deals only with market-based pricing for voluntary bilateral primary frequency response sellers. While some of the issues raised above might be relevant in other proceedings,⁹⁹ none of the issues raised above is relevant to the topic of market-based rates in voluntary bilateral markets. Accordingly, there is no need to address these issues here.

III. Compliance and Implementation

70. In Order No. 697, the Commission provided standard tariff provisions that sellers must include in their market-based rate tariffs to the extent they are applicable based on the services provided by the seller,¹⁰⁰ including a provision for sales of ancillary services as a third-party provider.¹⁰¹ The Commission hereby revises the "Third Party Provider" ancillary services provision to change the reference to "Regulation and Frequency Response Service" to "Regulation Service" and to add a reference to "Primary Frequency Response Service." The new language is as follows:

Third-party ancillary services: Seller offers [include all of the following that the seller is offering: Regulation Service, Reactive Supply and Voltage Control Service, Energy and Generator Imbalance Service, Operating

⁹⁸ SmartSenseCom at 8.

⁹⁹ For example, if an RTO or ISO eventually proposes to develop an organized market for primary frequency response service, or if the Commission at some point in the future decides to require such development, then several of the issues raised above might become relevant at that stage.

¹⁰⁰ Order No. 697, FERC Stats. & Regs. ¶ 31,252 at Appendix C.

¹⁰¹ In Order No. 784, the Commission revised the standard third party provider provision to reflect the changes adopted in Order No. 784. Order No. 784, FERC Stats. & Regs. ¶ 31,349 at P 200.

Reserve-Spinning, Operating Reserve-Supplemental, and Primary Frequency Response Service]. Sales will not include the following: (1) sales to an RTO or an ISO, *i.e.*, where that entity has no ability to self-supply ancillary services but instead depends on third parties; and (2) sales to a traditional, franchised public utility affiliated with the third-party supplier, or sales where the underlying transmission service is on the system of the public utility affiliated with the third-party supplier. Sales of Operating Reserve-Spinning and Operating Reserve-Supplemental will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except where the Commission has granted authorization. Sales of Regulation Service and Reactive Supply and Voltage Control Service will not include sales to a public utility that is purchasing ancillary services to satisfy its own open access transmission tariff requirements to offer ancillary services to its own customers, except at rates not to exceed the buying public utility transmission provider's OATT rate for the same service or where the Commission has granted authorization.

71. The Commission finds that a seller that already has market-based rate authority as of the effective date of this Final Rule is authorized as of that date to make sales of primary frequency response service at market-based rates. Such a seller will be required to revise the third-party provider ancillary services provision of its market-based rate tariff to reflect that it wishes to make sales of primary frequency response service at market-based rates. However, while this authorization is effective for sellers with existing market-based rate authority as of the effective date of this Final Rule, in order

to reduce their administrative burden, the Commission permits such sellers to wait to file this tariff revision until the next time they make a market-based rate filing with the Commission, such as a notice of change in status filing or a triennial update.

72. As noted in the NOPR, consistent with the existing requirements of Order No. 2001, any entity selling primary frequency response service will need to report such sales in the Electric Quarterly Report,¹⁰² and the Commission will update its Electric Quarterly Report system to include a specific product name option for primary frequency response service.¹⁰³

IV. Information Collection Statement

73. The Paperwork Reduction Act (PRA)¹⁰⁴ requires each federal agency to seek and obtain Office of Management and Budget (OMB) approval before undertaking a collection of information directed to ten or more persons or contained in a rule of general applicability. OMB regulations require approval of certain information collection requirements imposed by agency rules.¹⁰⁵ Upon approval of a collection(s) of information, OMB will assign an OMB control number and an expiration date. Respondents subject to the filing requirements of an agency rule will not be penalized for failing to respond to the collection of information unless the collection of information displays a valid OMB control number.

74. The Commission will submit the revised information collection requirements to OMB for its review and approval. The Commission solicits public comments on its need for this information, whether the information

will have practical utility, the accuracy of burden and cost estimates, ways to enhance the quality, utility, and clarity of the information to be collected or retained, and any suggested methods for minimizing respondents' burden, including the use of automated information techniques.

75. *Burden Estimate and Information Collection Costs:* While, to the Commission's knowledge, no entity currently sells primary frequency response service on an unbundled basis,¹⁰⁶ there is no reason why primary frequency response service could not be sold today under cost-based rates. Such cost-based sales, if they occurred, would face all of the burdens associated with cost-of-service regulation, including a variety of requirements from which market-based rate sellers frequently seek and are granted waiver.¹⁰⁷ Furthermore, just like market-based rate sellers, cost-based rate sellers must report all transactions in the Electric Quarterly Report. Accordingly, the Commission views this Final Rule as providing potential market-based rate sellers of primary frequency response service with the opportunity to avoid cost-of-service regulation for such sales and the associated substantial reporting burdens.

76. Below, we discuss the expected increases in burden as a result of this Final Rule. The Commission expects the additional burden to be greatly outweighed by the reduction in burden from avoiding cost-of-service regulation. The additional estimated annual public reporting burdens and costs for the requirements in this Final Rule are as follows.

CHANGES IN FINAL RULE IN RM15-2¹⁰⁸

Number of respondents (a)	Annual number of responses per respondent (b)	Total number of responses (a)×(b)=(c)	Average burden & cost per response (d)	Total annual burden hours & total annual cost (c)×(d)=(e)	Cost per response (e)/(c)
FERC-516 (Electric Rate Schedules and Tariff Filings) (one time, phased in)					
1,585 ¹⁰⁹	110 ⁰ .163	259	6 hrs.; \$432	1,554 hrs.; \$111,888.	\$432

¹⁰² See *Revised Public Utility Filing Requirements*, Order No. 2001, FERC Stats. & Regs. ¶ 31,127, *reh'g denied*, Order No. 2001-A, 100 FERC ¶ 61,074, *reh'g denied*, Order No. 2001-B, 100 FERC ¶ 61,342, *order directing filing*, Order No. 2001-C, 101 FERC ¶ 61,314 (2002), *order directing filing*, Order No. 2001-D, 102 FERC ¶ 61,334, *order refining filing requirements*, Order No. 2001-E, 105 FERC ¶ 61,352 (2003), *order on clarification*, Order No. 2001-F, 106 FERC ¶ 61,060 (2004), *order revising filing requirements*, Order No. 2001-G, 120 FERC ¶ 61,270, *order on reh'g and clarification*, Order No. 2001-H, 121 FERC ¶ 61,289 (2007), *order*

revising filing requirements, Order No. 2001-I, FERC Stats. & Regs. ¶ 31,282 (2008).
¹⁰³ NOPR, FERC Stats. & Regs. ¶ 32,705 at P 29.
¹⁰⁴ 44 U.S.C. 3501-3520 (2012).
¹⁰⁵ See 5 CFR 1320 (2015).
¹⁰⁶ It is likely that some customers purchase primary frequency response service along with other services on a bundled basis, such as through full requirements contracts, but this Final Rule is focused on unbundled sales of primary frequency response service.
¹⁰⁷ Such burdens would include, for example, the need to maintain Open Access Transmission Tariffs

and Open Access Same-Time Information Systems related to any jurisdictional transmission facilities owned by the entity, the need to adhere to the Commission's standards of conduct, the need to adhere to the detailed cost-of-service related requirements of subparts B and C of Part 35 of the Commission's regulations, the need to adhere to the accounting and reporting requirements of Parts 41, 101, and 141 of the Commission's regulations, and the need to seek separate authorizations for issuances of securities and assumptions of liabilities under FPA section 204 and Part 34 of the Commission's regulations.

CHANGES IN FINAL RULE IN RM15-2 ¹⁰⁸—Continued

Number of respondents (a)	Annual number of responses per respondent (b)	Total number of responses (a)×(b)=(c)	Average burden & cost per response (d)	Total annual burden hours & total annual cost (c)×(d)=(e)	Cost per response (e)/(c)
FERC-920 (Electric Quarterly Report) (one-time, phased in)					
1,585	¹¹¹ 0.163	259	2 hrs.; \$144	518 hrs.; \$37,296.	144

Titles: FERC-516 (Electric Rate Schedules and Tariff Filings) and FERC-920 (Electric Quarterly Report (EQR)).

Action: Revision of Currently Approved Collection of Information. *OMB Control Nos.:* 1902-0096 (FERC-516) and 1902-0255 (FERC-920). *Respondents:* Public utilities. *Frequency of responses:* One-time, phased in (for both FERC-516 and FERC-920).

¹⁰⁸ For purposes of burden estimation, the NOPR assumed that industry staff members are similarly situated to FERC, in terms of hourly cost per full time employee, and no commenter disputes this assumption. Therefore, the estimated average hourly cost (salary plus benefits) is \$72.00.

¹⁰⁹ The 1,585 respondent universe includes existing sellers (1,999 total market-based rate sellers—697 Category 1 sellers + 70 Category 1 sellers = 1,372 sellers estimated to sell primary frequency response services) plus 213 new market-based rate applicants (as estimated in Docket No. RM14-14). (We estimate that ten percent (or 70, as indicated above) of the Category 1 sellers may choose to sell primary frequency response services.)

¹¹⁰ We expect respondents to enter the primary frequency response market gradually. For each of the next three years, we expect all 213 new market-based rate applicants per year (or 639 total during Years 1-3), to include the primary frequency response language in their tariffs.

Additionally, during the three-year period, we expect a total of ten percent of the existing 1,372 respondents (or 137 respondents), to decide to sell primary frequency response services and to make the corresponding FERC-516 rate filing. The corresponding annual estimate is 46 of the existing respondents (an average of 3.4% annually). Therefore, the annual estimate, including both new respondents and existing respondents, is an average of 259 (213 + 46) respondents and responses per year.

¹¹¹ As respondents decide to sell primary frequency response services, they would report the new offering in their Electric Quarterly Report (FERC-920), and would continue to report in subsequent EQRs. When a filer adds the new service, we estimate the one-time burden to be two hours. We expect any additional burden associated with reporting the new service in the EQR to be negligible after the first implementation as it would become part of the respondent's normal reporting practice in the EQR and would only involve selecting the 'primary frequency response' option from a list of product names. On average, we expect filers of the new primary frequency response service to phase in:

- Year 1, 259 respondents or 16.3 percent of EQR filers.
- Year 2, 259 respondents or 16.3 percent of EQR filers.
- Year 3, 259 respondents or 16.3 percent of EQR filers.

Necessity of the Information: Regarding FERC-516, section 205(c) of the Federal Power Act requires public utilities to file with the Commission schedules showing all rates and charges for any transmission or sale subject to the Commission's jurisdiction. Accordingly, entities wishing to sell primary frequency response service at market-based rates must amend their market-based rate tariffs to include the language included in this Final Rule. Regarding FERC-920, the Commission is revising the EQR to ensure that public utilities that may sell primary frequency response service at market-based rates report those sales in the EQR, consistent with their filing obligations under section 205(c).

Internal Review: The Commission has reviewed the requirements associated with the proposed revisions to the information collections and determined they are necessary to ensure that rates remain just, reasonable, and not unduly discriminatory.

77. These requirements conform to the Commission's need for efficient information collection, communication, and management within the energy industry. The Commission has assured itself, through internal review, that there is specific, objective support for the burden estimates associated with the information collection requirements.

78. Interested persons may obtain information on the reporting requirements by contacting the following: Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC 20426 [Attention: Ellen Brown, Office of the Executive Director], email: DataClearance@ferc.gov, Phone (202) 502-8663, fax: (202) 273-0873. Comments on the collections of information and associated burden estimates in the Final Rule should be sent to the Commission in this docket and may also be sent to the Office of Information and Regulatory Affairs, Office of Management and Budget, Washington, DC 20503 [Attention: Desk Officer for the Federal Energy Regulatory Commission]. For security reasons, comments to OMB should be

submitted by email to: oir_submission@omb.eop.gov. Please refer to OMB Control No. 1902-0096 (FERC-516) and OMB Control No. 1902-0255 (FERC-920).

V. Environmental Analysis

79. The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment.¹¹² The Commission concludes that neither an Environmental Assessment nor an Environmental Impact Statement is required for this Final Rule under section 380.4(a)(15) of the Commission's regulations, which provides a categorical exemption for approval of actions under sections 205 and 206 of the FPA relating to the filing of schedules containing all rates and charges for the transmission or sale subject to the Commission's jurisdiction, plus the classification, practices, contracts, and regulations that affect rates, charges, classifications, and services.¹¹³

VI. Regulatory Flexibility Act

80. The Regulatory Flexibility Act of 1980 (RFA)¹¹⁴ generally requires a description and analysis of proposed and final rules that will have significant economic impact on a substantial number of small entities.

81. The Small Business Administration's (SBA) Office of Size Standards develops the numerical definition of a small business.¹¹⁵ The SBA revised its size standard for electric utilities (effective January 22, 2014) from a standard based on megawatt hours to a standard based on the number of employees, including affiliates.¹¹⁶ Under SBA's current size

¹¹² *Regulations Implementing the National Environmental Policy Act of 1969*, Order No. 486, 52 FR 47,897 (Dec. 17, 1987), FERC Stats. & Regs., Regulations Preambles 1986-1990 ¶ 30,783 (1987).

¹¹³ 18 CFR 380.4(a)(15) (2015).

¹¹⁴ 5 U.S.C. 601-612 (2012).

¹¹⁵ 13 CFR 121.101 (2015).

¹¹⁶ SBA Final Rule on "Small Business Size Standards: Utilities," 78 FR 77,343 (Dec. 23, 2013).

standards, the entities with market-based rates which are affected by this Final Rule likely come under the following categories¹¹⁷ with the indicated thresholds (in terms of number of employees¹¹⁸):

- Hydroelectric Power Generation, 500 employees.
- Fossil Fuel Electric Power Generation, 750 employees.
- Nuclear Electric Power Generation, 750 employees.
- Solar Electric Power Generation, 250 employees.
- Wind Electric Power Generation, 250 employees.
- Geothermal Electric Power Generation, 250 employees.
- Biomass Electric Power Generation, 250 employees.
- Other Electric Power Generation, 250 employees.

82. The categories for the applicable entities have a size threshold ranging from 250 employees to 750 employees. For the analysis in this Final Rule, we are using the threshold of 750 employees for all categories. We anticipate that a maximum of 82 percent of the entities potentially affected by this Final Rule are small. In addition, we expect that not all of those entities will be able to or will choose to offer primary frequency response service.

83. Based on the estimates above in the Information Collection section, we expect a one-time cost of \$576 (including the burden cost related to filing both the tariff and the EQR) for each entity that decides to offer primary frequency response service.

84. The Commission does not consider the estimated cost per small entity to impose a significant economic impact on a substantial number of small entities. Accordingly, the Commission certifies that this Final Rule will not have a significant economic impact on a substantial number of small entities.

VII. Document Availability

85. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the Internet through the Commission's Home Page (<http://www.ferc.gov>) and in the Commission's Public Reference Room during normal business hours (8:30 a.m. to 5:00 p.m. Eastern time) at 888 First Street NE., Room 2A, Washington, DC 20426.

86. From the Commission's Home Page on the Internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

87. User assistance is available for eLibrary and the Commission's Web site during normal business hours from the Commission's Online Support at 202-502-6652 (toll free at 1-866-208-3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502-8371, TTY (202) 502-8659. Email the Public Reference Room at public.referenceroom@ferc.gov.

VIII. Effective Date and Congressional Notification

88. The Final Rule is effective February 25, 2016. The Commission has determined, with the concurrence of the Administrator of the Office of Information and Regulatory Affairs of OMB, that this Final Rule is not a "major rule" as defined in section 351 of the Small Business Regulatory Enforcement Fairness Act of 1996. This Final Rule is being submitted to the Senate, House, Government Accountability Office, and Small Business Administration.

List of Subjects in 18 CFR Part 35

Electric power rates; Electric utilities; Reporting and recordkeeping requirements.

By the Commission.

Issued: November 20, 2015.

Nathaniel J. Davis, Sr.,
Deputy Secretary.

In consideration of the foregoing, the Commission amends Part 35, Chapter I, Title 18, *Code of Federal Regulations*, as follows.

PART 35—FILING OF RATE SCHEDULES AND TARIFFS

- 1. The authority citation for Part 35 continues to read as follows:

Authority: 16 U.S.C. 791a–825r, 2601–2645; 31 U.S.C. 9701; 42 U.S.C. 7101–7352.

- 2. In § 35.37, revise paragraph (c)(1) to read as follows:

§ 35.37 Market power analysis required.

* * * * *

(c)(1) There will be a rebuttable presumption that a Seller lacks horizontal market power with respect to sales of energy, capacity, energy imbalance service, generation imbalance service, and primary frequency response

service if it passes two indicative market power screens: a pivotal supplier analysis based on annual peak demand of the relevant market, and a market share analysis applied on a seasonal basis. There will be a rebuttable presumption that a Seller lacks horizontal market power with respect to sales of operating reserve-spinning and operating reserve-supplemental services if the Seller passes these two indicative market power screens and demonstrates in its market-based rate application how the scheduling practices in its region support the delivery of operating reserve resources from one balancing authority area to another. There will be a rebuttable presumption that a Seller possesses horizontal market power with respect to sales of energy, capacity, energy imbalance service, generation imbalance service, operating reserve-spinning service, operating reserve-supplemental service, and primary frequency response service if it fails either screen.

* * * * *

BILLING CODE 6717-01-P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 40

[Docket No. RM15-16-000, Order No. 817]

Transmission Operations Reliability Standards and Interconnection Reliability Operations and Coordination Reliability Standards

AGENCY: Federal Energy Regulatory Commission, Energy.

ACTION: Final rule.

SUMMARY: The Commission approves revisions to the Transmission Operations and Interconnection Reliability Operations and Coordination Reliability Standards, developed by the North American Electric Reliability Corporation, which the Commission has certified as the Electric Reliability Organization responsible for developing and enforcing mandatory Reliability Standards. The Commission also directs NERC to make three modifications to the standards within 18 months of the effective date of the final rule.

DATES: This rule will become effective January 26, 2016.

FOR FURTHER INFORMATION CONTACT: Robert T. Stroh (Legal Information), Office of the General Counsel, Federal Energy Regulatory Commission, 888 First Street NE., Washington, DC

¹¹⁷ 13 CFR 121.201, Sector 22, Utilities.

¹¹⁸ SBA's regulations at 13 CFR 121.201 state that "[t]he number of employees . . . indicates the maximum allowed for a concern and its affiliates to be considered small."

SUPPLEMENTARY INFORMATION:

Order No. 817

Final Rule

(Issued November 19, 2015)

1. Pursuant to section 215 of the Federal Power Act (FPA),¹ the Commission approves revisions to the Transmission Operations (TOP) and Interconnection Reliability Operations and Coordination (IRO) Reliability Standards, developed by the North American Electric Reliability Corporation (NERC), the Commission-certified Electric Reliability Organization (ERO). The TOP and IRO Reliability Standards improve on the currently-effective standards by providing a more precise set of Reliability Standards addressing operating responsibilities and improving the delineation of responsibilities between applicable entities. The revised TOP Reliability Standards eliminate gaps and ambiguities in the currently-effective TOP requirements and improve efficiency by incorporating the necessary requirements from the eight currently-effective TOP Reliability Standards into three comprehensive Reliability Standards. Further, the standards clarify and improve upon the currently-effective TOP and IRO Reliability Standards by designating requirements in the proposed standards that apply to transmission operators for the TOP standards and reliability coordinators for the IRO standards. Thus, we conclude that there are benefits to clarifying and bringing efficiencies to the TOP and IRO Reliability Standards, consistent with the Commission's policy promoting increased efficiencies in Reliability Standards and reducing requirements that are either redundant with other

currently-effective requirements or have little reliability benefit.²

2. The Commission also finds that NERC has adequately addressed the concerns raised by the Commission in the Notice of Proposed Rulemaking issued in November 2013 concerning the proposed treatment of system operating limits (SOLs) and interconnection reliability operating limits (IROLs) and concerns about outage coordination.³ Further, the Commission approves the definitions for operational planning analysis and real-time assessment, the implementation plans and the violation severity level and violation risk factor assignments. However, the Commission directs NERC to make three modifications to the standards as discussed below within 18 months of the effective date of this Final Rule.

3. We also address below the four issues for which we sought clarifying comments in the June 18, 2015, Notice of Proposed Rulemaking (NOPR) proposing to approve the TOP and IRO Reliability Standards: (A) Possible inconsistencies in identifying IROLs; (B) monitoring of non-bulk electric system facilities; (C) removal of the load-serving entity as an applicable entity for proposed Reliability Standard TOP-001-3; and (D) data exchange capabilities. In addition we address other issues raised by commenters.

I. Background

A. Regulatory Background

4. Section 215 of the FPA requires a Commission-certified ERO to develop mandatory and enforceable Reliability Standards, subject to Commission review and approval.⁴ Once approved, the Reliability Standards may be enforced by the ERO subject to Commission oversight, or by the Commission independently.⁵ In 2006, the Commission certified NERC as the ERO pursuant to FPA section 215.⁶

² *Electric Reliability Organization Proposal to Retire Requirements in Reliability Standards*, Order No. 788, 145 FERC ¶ 61,147 (2013).

³ *Monitoring System Conditions—Transmission Operations Reliability Standard, Transmission Operations Reliability Standards, Interconnection Reliability Operations and Coordination Reliability Standards*, Notice of Proposed Rulemaking, 145 FERC ¶ 61,158 (2013) (Remand NOPR). Concurrent with filing the proposed TOP/IRO standards in the immediate proceeding, NERC submitted a motion to withdraw the earlier petition that was the subject of the Remand NOPR. No protests to the motion were filed and the petition was withdrawn pursuant to 18 CFR 385.216(b).

⁴ 16 U.S.C. 824o(c) and (d).

⁵ See *id.* 16 U.S.C. 824o(e).

⁶ *North American Electric Reliability Corp.*, 116 FERC ¶ 61,062, *order on reh'g and compliance*, 117 FERC ¶ 61,126 (2006), *aff'd sub nom. Alcoa Inc. v. FERC*, 564 F.3d 1342 (D.C. Cir. 2009).

5. The Commission approved the initial TOP and IRO Reliability Standards in Order No. 693.⁷ On April 16, 2013, in Docket No. RM13-14-000, NERC submitted for Commission approval three revised TOP Reliability Standards to replace the eight currently-effective TOP standards.⁸ Additionally, on April 16, 2013, in Docket No. RM13-15-000, NERC submitted for Commission approval four revised IRO Reliability Standards to replace six currently-effective IRO Reliability Standards. On November 21, 2013, the Commission issued the Remand NOPR in which the Commission expressed concern that NERC had "removed critical reliability aspects that are included in the currently-effective standards without adequately addressing these aspects in the proposed standards."⁹ The Commission identified two main concerns and asked for clarification and comment on a number of other issues. Among other things, the Commission expressed concern that the proposed TOP Reliability Standards did not require transmission operators to plan and operate within all SOLs, which is a requirement in the currently-effective standards. In addition, the Commission expressed concern that the proposed IRO Reliability Standards did not require outage coordination.

B. NERC Petition

6. On March 18, 2015, NERC filed a petition with the Commission for approval of the proposed TOP and IRO Reliability Standards.¹⁰ As explained in the Petition, the proposed Reliability Standards consolidate many of the currently-effective TOP and IRO Reliability Standards and also replace the TOP and IRO Reliability Standards that were the subject of the Remand NOPR. NERC stated that the proposed Reliability Standards include

⁷ See *Mandatory Reliability Standards for the Bulk-Power System*, Order No. 693, FERC Stats. & Regs. ¶ 31,242, at P 508, *order on reh'g*, Order No. 693-A, 120 FERC ¶ 61,053 (2007). In addition, in Order No. 748, the Commission approved revisions to the IRO Reliability Standards. *Mandatory Reliability Standards for Interconnection Reliability Operating Limits*, Order No. 748, 134 FERC ¶ 61,213 (2011).

⁸ On April 5, 2013, in Docket No. RM13-12-000, NERC proposed revisions to Reliability Standard TOP-006-3 to clarify that transmission operators are responsible for monitoring and reporting available transmission resources and that balancing authorities are responsible for monitoring and reporting available generation resources.

⁹ Remand NOPR, 145 FERC ¶ 61,158 at P 4.

¹⁰ The TOP and IRO Reliability Standards are not attached to the Final Rule. The complete text of the Reliability Standards is available on the Commission's eLibrary document retrieval system in Docket No. RM15-16 and is posted on the ERO's Web site, available at: <http://www.nerc.com>.

¹ 16 U.S.C. 824o (2012).

improvements over the currently-effective TOP and IRO Reliability Standards in (1) operating within SOLs and IROs; (2) outage coordination; (3) situational awareness; (4) improved clarity and content in foundational definitions; and (5) requirements for operational reliability data. NERC stated that the proposed TOP and IRO Reliability Standards address outstanding Commission directives relevant to the proposed TOP and IRO Reliability Standards. NERC stated that the proposed Reliability Standards provide a comprehensive framework for reliable operations, with important improvements to ensure the bulk electric system is operated within pre-established limits while enhancing situational awareness and strengthening operations planning. NERC explained that the proposed Reliability Standards establish or revise requirements for operations planning, system monitoring, real-time actions, coordination between applicable entities, and operational reliability data. NERC contended that the proposed Reliability Standards help to ensure that reliability coordinators and transmission operators work together, and with other functional entities, to operate the bulk electric system within SOLs and IROs.¹¹ NERC also provided explanations of how the proposed Reliability Standards address the reliability issues identified in the report on the Arizona-Southern California Outages on September 8, 2011, Causes and Recommendations (“2011 Southwest Outage Blackout Report”).

7. NERC proposed three TOP Reliability Standards to replace the existing suite of TOP standards. The proposed TOP Reliability Standards generally address real-time operations and planning for next-day operations, and apply primarily to the responsibilities and authorities of transmission operators, with certain requirements applying to the roles and responsibilities of the balancing authority. Among other things, NERC stated that the proposed revisions to the TOP Reliability Standards help ensure that transmission operators plan and operate within all SOLs. The proposed IRO Reliability Standards, which complement the proposed TOP

Standards, are designed to ensure that the bulk electric system is planned and operated in a coordinated manner to perform reliably under normal and abnormal conditions. The proposed IRO Reliability Standards set forth the responsibility and authority of reliability coordinators to provide for reliable operations. NERC stated that, in the proposed IRO Reliability Standards, reliability coordinators must continue to monitor SOLs in addition to their obligation in the currently effective Reliability Standards to monitor and analyze IROs. These obligations require reliability coordinators to have the wide-area view necessary for situational awareness and provide them the ability to respond to system conditions that have the potential to negatively affect reliable operations.

8. NERC also proposed revised definitions for “operational planning analysis” and “real-time assessment.” For all standards except proposed Reliability Standards TOP-003-3 and IRO-010-2, NERC proposed the effective date to be the first day of the first calendar quarter twelve months after Commission approval. According to NERC’s implementation plan, for proposed TOP-003-3, all requirements except Requirement R5 will become effective on the first day of the first calendar quarter nine months after the date that the standard is approved. For proposed IRO-010-2, Requirements R1 and R2 would become effective on the first day of the first calendar quarter that is nine months after the date that the standard is approved. Proposed TOP-003-3, Requirement R5 and IRO-010-2, Requirement R3 would become effective on the first day of the first calendar quarter twelve months after the date that the standard is approved. The reason for the difference in effective dates for proposed TOP-003-3 and IRO-010-2 is to allow applicable entities to have time to properly respond to the data specification requests from their reliability coordinators, transmission operators, and/or balancing authorities.

C. Notice of Proposed Rulemaking

9. On June 18, 2015, the Commission issued a Notice of Proposed Rulemaking proposing to approve the TOP and IRO Reliability Standards pursuant to FPA section 215(d)(2), along with the two new definitions referenced in the proposed standards, the assigned violation risk factors and violation severity levels, and the proposed implementation plan for each standard.¹²

¹² *Transmission Operations Reliability Standards and Interconnection Reliability Operations and*

10. In the NOPR, the Commission explained that the proposed TOP and IRO Reliability Standards improve on the currently-effective standards by providing a more precise set of Reliability Standards addressing operating responsibilities and improving the delineation of responsibilities between applicable entities. The Commission also proposed to find that NERC has adequately addressed the concerns raised by the Remand NOPR issued in November 2013.

11. In the NOPR, the Commission also discussed the following specific matters and asked for further comment: (A) Possible inconsistencies in identifying IROs; (B) monitoring of non-bulk electric system facilities; (C) removal of the load-serving entity as an applicable entity for proposed Reliability Standard TOP-001-3; and (D) data exchange capabilities.

12. Timely comments on the NOPR were filed by: NERC; Arizona Public Service Company (APS), Bonneville Power Administration (BPA), Dominion Resources Services, Inc. (Dominion), the Edison Electric Institute (EEI); Electric Reliability Council of Texas, Inc. (ERCOT), Independent Electricity System Operator (IESO), ISO/RTOs,¹³ International Transmission Company (ITC); Midcontinent Independent System Operator, Inc., Northern Indiana Public Service Company (NIPSCO), Occidental Energy Ventures, LLC (Occidental), Peak Reliability (Peak), and Transmission Access Policy Study Group (TAPS).

II. Discussion

13. Pursuant to section 215(d) of the FPA, we adopt our NOPR proposal and approve NERC’s revisions to the TOP and IRO Reliability Standards, including the associated definitions, violation risk factors, violation severity levels, and implementation plans, as just, reasonable, not unduly discriminatory or preferential and in the public interest. We note that all of the commenters that address the matter support, or do not oppose, approval of the revised suite of TOP and IRO Reliability Standards. We determine that NERC’s approach of consolidating requirements and removing redundancies generally has merit and is consistent with Commission policy

Coordination Reliability Standards, 151 FERC ¶ 61,236 (2015) (NOPR).

¹³ ISO/RTOs include Independent Electricity System Operator, ISO New England Inc., Midcontinent Independent System Operator, New York Independent System Operator, Inc., PJM Interconnection LLC, and Southwest Power Pool, Inc.

¹¹ The NERC Glossary of Terms defines IROL as “[a] System Operating Limit that, if violated, could lead to instability, uncontrolled separation, or cascading outages that adversely impact the reliability of the Bulk Electric System.” In turn, NERC defines SOL as “[t]he value (such as MW, MVar, Amperes, Frequency or Volts) that satisfies the most limiting of the prescribed operating criteria for a specified system configuration to ensure operation within acceptable reliability criteria. . . .”

promoting increased efficiencies in Reliability Standards and reducing requirements that are either redundant with other currently-effective requirements or have little reliability benefit.¹⁴

14. We also determine that the proposed TOP and IRO Reliability Standards should improve reliability by defining an appropriate division of responsibilities between reliability coordinators and transmission operators.¹⁵ The proposed TOP Reliability Standards will eliminate multiple TOP standards, resulting in a more concise set of standards, reducing redundancy and more clearly delineating responsibilities between applicable entities. In addition, we find that the proposed Reliability Standards provide a comprehensive framework as well as important improvements to ensure that the bulk electric system is operated within pre-established limits while enhancing situational awareness and strengthening operations planning. The TOP and IRO Reliability Standards address the coordinated efforts to plan and reliably operate the bulk electric system under both normal and abnormal conditions.

15. In the NOPR, the Commission proposed to find that NERC adequately addressed the concerns raised by the Commission in the Remand NOPR with respect to (1) the treatment of SOLs in the proposed TOP Reliability Standards, and (2) the IRO standards regarding planned outage coordination, both of which we address below.

Operational Responsibilities and Actions of SOLs and IROs

16. In the Remand NOPR, the Commission expressed concern that the initially proposed (now withdrawn) TOP standards did not have a requirement for transmission operators to plan and operate within all SOLs. The Commission finds that the TOP Reliability Standards that NERC subsequently proposed address the Commission's Remand NOPR concerns by requiring transmission operators to plan and operate within all SOLs, and to monitor and assess SOL conditions within and outside a transmission operator's area. Further, the TOP/IRO Standards approved herein address the possibility that additional SOLs could develop or occur in the same-day or real-time operational time horizon and, therefore, would pose an operational risk to the interconnected transmission network if not addressed. Likewise, the

Reliability Standards give reliability coordinators the authority to direct actions to prevent or mitigate instances of exceeding IROs because the primary decision-making authority for mitigating IRO exceedances is assigned to reliability coordinators while transmission operators have the primary responsibility for mitigating SOL exceedances.¹⁶

17. Furthermore, the revised definitions of operational planning analysis and real-time assessment are critical components of the proposed TOP and IRO Reliability Standards and, together with the definitions of SOLs, IROs and operating plans, work to ensure that reliability coordinators, transmission operators and balancing authorities plan and operate the bulk electric system within all SOLs and IROs to prevent instability, uncontrolled separation, or cascading. In addition, the revised definitions of operational planning analysis and real-time assessment address other concerns raised in the Remand NOPR as well as multiple recommendations in the 2011 Southwest Outage Blackout Report.¹⁷

Outage Coordination

18. In the NOPR, the Commission explained that NERC had addressed concerns raised in the Remand NOPR with respect to the IRO standards regarding planned outage coordination. In the Remand NOPR, the Commission expressed concern with NERC's proposal because Reliability Standards IRO-008-1, Requirement R3 and IRO-010-1a (subjects of the proposed remand and now withdrawn by NERC) did not require the coordination of outages, noting that outage coordination is a critical reliability function that should be performed by the reliability coordinator.¹⁸

19. In the NOPR, the Commission noted that Reliability Standard IRO-017-1, Requirement R1 requires each reliability coordinator to develop, implement and maintain an outage coordination process for generation and transmission outages within its reliability coordinator area. Additionally, Reliability Standard IRO-014-3, Requirement R1, Part 1.4 requires reliability coordinators to include the exchange of planned and

unplanned outage information to support operational planning analyses and real-time assessments in the operating procedures, processes, and plans for activities that require coordination with adjacent reliability coordinators. We believe that these proposed standards adequately address our concerns with respect to outage coordination as outlined in the Remand NOPR. However, as we discuss below we direct NERC to modify the standards to include transmission operator monitoring of non-BES facilities, and to specify that data exchange capabilities include redundancy and diverse routing; as well as testing of the alternate or less frequently used data exchange capability, within 18 months of the effective date of this Final Rule.

20. Below we discuss the following matters: (A) Possible inconsistencies of identifying IROs; (B) monitoring of non-bulk electric system facilities; (C) removal of the load-serving entity function from proposed Reliability Standard TOP-001-3; (D) data exchange capabilities, and (E) other issues raised by commenters.

A. Possible Inconsistencies in IROs Across Regions

NOPR

21. In the NOPR, the Commission noted that in Exhibit E (SOL White Paper) of NERC's petition, NERC stated that, with regard to the SOL concept, the SOL White Paper brings "clarity and consistency to the notion of establishing SOLs, exceeding SOLs, and implementing Operating Plans to mitigate SOL exceedances."¹⁹ The Commission further noted that IROs, as defined by NERC, are a subset of SOLs that, if violated, could lead to instability, uncontrolled separation, or cascading outages that adversely impact the reliability of the bulk electric system. The Commission agreed with NERC that clarity and consistency are important with respect to establishing and implementing operating plans to mitigate SOL and IRO exceedances. However, the Commission noted that NERC, in its 2015 State of Reliability report, had stated that the Western Interconnection reliability coordinator definition of an IRO has additional criteria that may not exist in other reliability coordinator areas.²⁰ The

¹⁴ See Order No. 788, 145 FERC ¶ 61,147.

¹⁵ See, e.g., Order No. 748, 134 FERC ¶ 61,213, at PP 39-40.

¹⁶ See Remand NOPR, 145 FERC ¶ 61,158 at P 85. Further, currently-effective Reliability Standard IRO-009-1, Requirement R4 states that "[w]hen actual system conditions show that there is an instance of exceeding an IRO in its Reliability Coordinator Area, the Reliability Coordinator shall, without delay, act or direct others to act to mitigate the magnitude and duration of the instance of exceeding that IRO within the IRO's Tv."

¹⁷ NERC Petition at 17-18.

²⁰ NOPR, 151 FERC ¶ 61,236 at P 51, citing NERC 2015 State of Reliability report at 44, available at www.nerc.com. See also WECC Reliability Coordination System Operating Limits Methodology for the Operations Horizon, Rev. 7.0 (effective March 3, 2014) at 18 (stating that "SOLs

Commission stated that it is unclear whether NERC regions apply a consistent approach to identifying IROLs. The Commission, therefore, sought comment on (1) identification of all regional differences or variances in the formulation of IROLs; (2) the potential reliability impacts of such differences or variations, and (3) the value of providing a uniform approach or methodology to defining and identifying IROLs.

Comments

22. Commenters generally agree that there are variations in IROL formulation but maintain that the flexibility is needed due to different system topographies and configurations. EEI and other commenters, also suggest that, to the extent there are variations, such resolution should be addressed by NERC and the Regional Entities in a standard development process rather than by a Commission directive. NERC requests that the Commission refrain from addressing these issues in this proceeding. NERC contends that the TOP and IRO Reliability Standards do not address the methods for the development and identification of SOLs and IROLs and that requirements governing the development and identification of SOLs and IROLs are included in the Facilities Design, Connections and Maintenance (FAC) Reliability Standards. NERC states that the current FAC Reliability Standards provide reliability coordinators flexibility in the manner in which they identify IROLs.²¹ NERC adds that it recently initiated a standards development project (Project 2015–09 Establish and Communicate System Operating Limits) to evaluate and modify the FAC Reliability Standards that address the development and identification of SOLs and IROLs. NERC explains that the Project 2015–09 standard drafting team will address the clarity and consistency of the requirements for establishing both SOLs and IROLs. According to NERC, it would be premature for NERC or the Commission to address issues regarding the identification of IROLs in this proceeding without the benefit of the complete analysis of the Project 2015–09 standard drafting team. NERC

qualify as IROLs when . . . studies indicate that instability, Cascading, or uncontrolled separation may occur resulting in uncontrolled interruption of load equal to or greater than 1000 MW”), available at <https://www.wecc.biz/Reliability/PhaseII%20WECC%20RC%20SOL%20Methodology%20FINAL.pdf>.

²¹ See also Peak Comments at 4–5. Peak points to Reliability Standards FAC–011–2 and FAC–014–2 as support for regional variation in establishing IROLs.

commits to working with stakeholders and Commission staff during the Project 2015–09 standards development process to address the issues raised in the NOPR.

23. ERCOT comments that the existing Reliability Standards provide a consistent but flexible structure for IROL identification that provides maximum benefit to interconnected transmission network. ERCOT believes that the Reliability Standards should continue to permit regional variations that will encourage flexibility for consideration of system-specific topology and characteristics as well as the application of operational experience and engineering judgment. ERCOT states that regional differences exist in terms of the specific processes and methodologies utilized to identify IROLs. However, according to ERCOT, appropriate consistency in IROL identification is driven by the definition of an IROL, the Reliability Standards associated with the identification of SOLs, and the communication and coordination among responsible entities. Further, ERCOT argues that allowing regional IROL differences benefits the bulk electric system by allowing the entities with the most operating experience to recognize the topology and operating characteristics of their areas, and to incorporate their experience and judgment into IROL identification.

24. Peak supports allowing regions to vary in their interpretation and identification of IROLs based on the level of risk determined by that region, as long as that interpretation is transparent and consistent within that region. Peak understands the definition of IROL to recognize regional differences and variances in the formulation of IROLs. Peak contends that such regional variation is necessary due to certain physical system differences. Thus, according to Peak, a consistent approach from region to region is not required, and may not enhance the overall reliability of the system. Peak explains that, in the Western United States, the evaluation of operating limits and stability must take into account the long transmission lines and greater distance between population centers, a situation quite different than the dense, interwoven systems found in much of the Eastern Interconnection. Peak adds that the Western Interconnection more frequently encounters localized instability because of the sparsity of the transmission system and the numerous small load centers supplied by few transmission lines, and these localized instances of instability have little to no impact on

the overall reliability of the bulk electric system. Peak encourages the Commission to recognize that differences among the regions may require flexibility to determine, through its SOL methodology, the extent and severity of instability and cascading that warrant the establishment of an IROL.

25. While Peak supports retaining the flexibility of a region by region application of the IROL definition, Peak notes that the current definition is not without some confusing ambiguity in the application of IROL that should be addressed, including ambiguity and confusion around the term “instability,” the phrase “that adversely impact the reliability of the Bulk Electric System” and “cascading.” Peak suggests that one method to eliminate confusion on the definition and application of IROLs would be to expand NERC’s whitepaper to address concerns more specific to IROLs. Peak contends that further guidance from NERC in the whitepaper may remedy the confusion on the limits on the application of IROLs for widespread versus localized instability.

26. Peak requests that, if the Commission or NERC determines that a one-size-fits all approach is necessary for the identification of IROLs and eliminates the current flexibility for regional differences, that the Commission recognizes the limitations this will place on reliability coordinators to evaluate the specific conditions within their reliability coordinator area. The Commission should require that any standardized application of the IROL definition would need to address specific thresholds and implementation triggers for IROLs based on the risk profile and challenges facing specific regions, to avoid the downfalls of inaccurate or overbroad application, as discussed above.

Commission Determination

27. While it appears that regional discrepancies exist regarding the manner for calculating IROLs, we accept NERC’s explanation that this issue is more appropriately addressed in NERC’s Facilities Design, Connections and Maintenance or “FAC” Reliability Standards. NERC indicates that an ongoing FAC-related standards development project—NERC Project 2015–09 (Establish and Communicate System Operating Limits)—will address the development and identification of SOLs and IROLs. We conclude that NERC’s explanation, that the Project 2015–09 standard drafting team will address the clarity and consistency of the requirements for establishing both SOLs and IROLs, is reasonable.

Therefore, we will not direct further action on IROLs in the immediate TOP and IRO standard-related rulemaking. However, when this issue is considered in Project 2015–19, the specific regional difference of WECC’s 1,000 MW threshold in IROLs should be evaluated in light of the Commission’s directive in Order No. 802 (approving Reliability Standard CIP–014) to eliminate or clarify the “widespread” qualifier on “instability” as well as our statement in the Remand NOPR that “operators do not always foresee the consequences of exceeding such SOLs and thus cannot be sure of preventing harm to reliability.”²²

B. Monitoring of Non-Bulk Electric System Facilities

NOPR

28. In the NOPR the Commission proposed to find that the proposed Reliability Standards adequately address the 2011 Southwest Outage Blackout Report recommendation regarding monitoring sub-100 kV facilities, primarily because of the responsibility of the reliability coordinator under proposed Reliability Standard IRO–002–4, Requirement R3 to monitor non-bulk electric system facilities to the extent necessary. The Commission noted, however, that “the transmission operator may have a more granular perspective than the reliability coordinator of its necessary non-bulk electric system facilities to monitor,” and it is not clear whether or how the transmission operator would provide information to the reliability coordinator regarding which non-BES facilities should be monitored.²³ The Commission sought comment on how NERC will ensure that the reliability coordinator will receive such information.

29. The Commission stated that including such non-bulk electric system facilities in the definition of bulk electric system through the NERC Rules of Procedure exception process could be an option to address any potential gaps for monitoring facilities but notes that there may be potential efficiencies gained by using a more expedited method to include non-bulk electric

system facilities that requires monitoring. The Commission sought comment on whether the BES exception process should be used exclusively in all cases. Alternatively, the Commission sought comment on whether this concern can be addressed through a review process of the transmission operators’ systems to determine if there are important non-bulk electric system facilities that require monitoring.

Comments

30. Nearly all commenters support the Reliability Standards as proposed as sufficient for identifying and monitoring non-bulk electric system facilities, and do not support the alternatives offered by the Commission in the NOPR.²⁴ NERC submits that the proposed data specification and collection Reliability Standards IRO–010–2 and TOP–003–3, in addition to the exceptions process will help ensure that the reliability coordinator can work with transmission operators, and other functional entities, to obtain sufficient information to identify the necessary non-bulk electric system facilities to monitor. In support, NERC points to Reliability Standard IRO–010–2, which provides a mechanism for the reliability coordinator to obtain the information and data it needs for reliable operations and to help prevent instability, uncontrolled separation, or cascading outages. Further, NERC cites Reliability Standard TOP–003–3, which allows transmission operators to obtain data on non-bulk electric system facilities, necessary to perform their operational planning analyses, real-time monitoring, and real-time assessments from applicable entities. NERC explains that any data that the transmission operator obtains regarding non-bulk electric system facilities under Reliability Standard TOP–003–3 can be passed on to the reliability coordinator pursuant to a request under proposed Reliability Standard IRO–010–2. Accordingly, NERC states that it would be premature to develop an alternative process before the data specification and bulk electric system exception process are allowed to work.

31. EEI states that this issue has been thoroughly studied by NERC through Project 2010–17 Phase 2 (Revisions to the Definition of Bulk Electric System) that led to modification of the definition of bulk electric system. EEI believes that the current process provides all of the necessary tools and processes to ensure that insights by TOPs are fully captured and integrated into existing monitoring

systems that would ensure that all non-BES elements that might impact BES reliability are fully monitored. EEI does not support the alternative process proposed by the Commission. EEI warns that an alternative, parallel review process of the transmission operators’ systems to determine if there are important non-bulk electric system facilities that require monitoring would either circumvent the revised bulk electric system definition process or arbitrarily impose NERC requirements (*i.e.*, monitoring) onto non-bulk electric system elements.

32. APS agrees with the Commission that there would be a reliability benefit for the reliability coordinator to be able to identify facilities within the transmission operators’ areas that may have a material impact on reliability. APS believes this benefit can be achieved using the method deployed in the Western Interconnection by the Western Electricity Coordinating Council (WECC). APS explains that the WECC planning coordination committee has published a bulk electric system inclusion guideline that categorizes non-bulk electric system facilities that are to be identified by each planning authority and transmission planner when performing their system planning and operations reliability assessments, and the identified facilities are then reported to NERC. APS proposes a similar exception process be used in all cases. According to APS, each reliability coordinator would publish a guideline on how to identify non-bulk electric system facilities critical to reliability appropriate for their reliability coordinator area, and each planning coordinator and transmission planner would run studies according to the reliability coordinator guideline at least once every three years.

33. ERCOT states that performance of sufficient studies and evaluations of reliability coordinator areas occurs in cooperation and coordination with associated transmission operators, rendering an additional review process unnecessary. However, to avoid any potential gaps in monitoring non-bulk electric system facilities and ensure that existing agreements and monitoring processes are respected, ERCOT states that the Commission should direct NERC to modify the TOP and IRO Reliability Standards to refer not only to sub-100 kV facilities identified as part of the bulk electric system through the Rules of Procedure exception process, but also to other sub-100 kV facilities as requested or agreed by the responsible entities.²⁵ ERCOT also states that

²² *Physical Security Reliability Standard*, Order No. 802, 149 FERC ¶ 61,140 (2014) and Remand NOPR, 145 FERC ¶ 61,158 at P 52. *See also* FPA section 215(a)(4) defining Reliable Operation as “operating the elements of the bulk-power system within equipment and electric system thermal, voltage, and stability limits so that instability, uncontrolled separation, or cascading failures of such system will not occur as a result of a sudden disturbance, including a cybersecurity incident, or unanticipated failure of system elements.”

²³ NOPR, 151 FERC ¶ 61,236 at P 58.

²⁴ *E.g.* NERC, EEI, TAPS, Occidental, and NIPSCO.

²⁵ *See also* ISO/RTOs Comments at 3.

because “non-bulk electric system facilities” fall outside the scope of the NERC Reliability Standards, use of this terminology should be avoided. ERCOT advocates for the Commission to permit monitoring of other sub-100 kV facilities to be undertaken as agreed to between the reliability coordinator and the transmission operator. ERCOT and ISO/RTOs suggest that the phrase “non-BES facilities” in Reliability Standard IRO-002-4, Requirement R3 should be replaced with “sub-100 kV facilities identified as part of the BES through the BES exception process or as otherwise agreed to between the Reliability Coordinator and Transmission Operator” and the phrase “non-BES data” in Reliability Standards IRO-010-2 (Requirement R1.1) and TOP-003-3 (Requirement R1.1) should be replaced with “data from sub-100 kV facilities identified as part of the BES through the BES exception process, as otherwise requested by the Responsible Entity, or as agreed to between the Transmission Operator and the Responsible Entity.”²⁶

34. ITC does not support the Commission’s proposal. ITC states that transmission operators are required to incorporate any non-bulk electric system data into operational planning analysis and real-time assessments and monitoring, which therefore requires transmission operators to regularly review their models to identify impacting non-bulk electric system facilities. Conversely, ITC explains that conducting a one-time or periodic review and analysis of a transmission operator’s model ignores the fact that changes in system conditions can cause the list of impacting non-bulk electric system facilities to change frequently.

Commission Determination

35. We agree with NERC, TAPS, and EEI that the BES exception process can be a mechanism for identifying non-BES facilities to be included in the BES definition.²⁷ Indeed, *once* a non-BES facility is included in the BES definition under the BES exception process, the “non-BES facility” becomes a BES “Facility” under TOP-001-3, Requirement R10, and real-time monitoring is required of “Facilities.”²⁸

²⁶ See also ISO/RTOs Comments at 4-6.

²⁷ NERC TOP/IRO Petition, Exh. G at 9 states in response to the 2011 Southwest Outage Recommendation #17, “If a non-BES facility impacts the BES, such as by contributing to an SOL or IROL, then the SDT expects that facility to be incorporated into the BES through the official BES Exception Process and it would be covered in proposed TOP-001-3, Requirement R10, Parts 10.1 and 10.2 by use of the defined term ‘Facilities.’”

²⁸ NERC Glossary of Terms defines Facility as: “A set of electrical equipment that operates as a single

However, we are concerned that in some instances the absence of real-time monitoring of non-BES facilities by the transmission operator within and outside its TOP area as necessary for determining SOL exceedances in proposed TOP-001-3, Requirement R10 creates a reliability gap. As the 2011 Southwest Outage Report indicates, the Regional Entity “should lead other entities, including TOPs and BAs, to ensure that all facilities that can adversely impact BPS reliability are either designated as part of the BES or otherwise incorporated into planning and operations studies and *actively monitored* and alarmed in [real-time contingency analysis] systems.”²⁹ Such monitoring of non-BES facilities could provide a “stop gap” during the period where a sub-100 kV facility undergoes analysis as a possible BES facility, allowing for monitoring in the interim until such time the non-bulk electric system facilities become “BES Facilities” or the transmission operator determines that a non-bulk electric system facility is no longer needed for monitoring to determine a system operating limit exceedance in its area.³⁰ We believe that the operational planning analyses and real-time assessments performed by the transmission operators as well as the reliability coordinators will serve as the basis for determining which “non-BES facilities” require monitoring to determine system operating limit and interconnection reliability operating limit exceedances. In addition, we believe that monitoring of certain non-BES facilities that are occasional system operating limit exceedance performers may not qualify as a candidate for inclusion in the BES definition, yet should be monitored for reliability purposes.³¹ Accordingly, pursuant to

Bulk Electric System Element (e.g., a line, a generator, a shunt compensator, transformer, etc.)”

²⁹ NOPR, 151 FERC ¶ 61,236 at P 55, citing Recommendation 17 of the 2011 Southwest Outage Blackout Report (emphasis added).

³⁰ NERC’s BES Frequently Asked Questions, Version 1.6, February 25, 2015, Section 5.6. “How long will the process take?” at page 14 states: “In general, assuming a complete application, no appeals, and taking the allotted time for each subtask, the process could take up to 11.5 months, but is anticipated to be shorter for less complicated Exception Requests. If the Exception Request is appealed to the NERC Board of Trustees Compliance Committee pursuant to Section 1703 of the NERC Rules of Procedure, the process could take an additional 8.5 months, totaling 20 months. This does not include timing related to an appeal to the applicable legal authority or Applicable Governmental Authority. A Regional Entity, upon consultation with NERC, may extend the time frame of the substantive review process. . . .” <http://www.nerc.com/pa/RAPA/BES%20DL/BES%20FAQs.pdf>.

³¹ See, e.g., NERC TOP/IRO Petition at 18 and 27-28.

section 215(d)(5) of the FPA, we direct NERC to revise Reliability Standard TOP-001-3, Requirement R10 to require real-time monitoring of non-BES facilities. We believe this is best accomplished by adopting language similar to Reliability Standard IRO-002-4, Requirement R3, which requires reliability coordinators to monitor non-bulk electric system facilities to the extent necessary. NERC can develop an equally efficient and effective alternative that addresses our concerns.³²

36. To be clear, we are not directing that all current “non-BES” facilities that a transmission operator considers worthy of monitoring also be included in the bulk electric system. We believe that such monitoring may result in some facilities becoming part of the bulk electric system through the exception process; however it is conceivable that others may remain non-BES because they are occasional system operating limit exceedance performers that may not qualify as a candidate for inclusion in the BES definition.

C. Removal of Load-Serving Entity Function From TOP-001-3

NOPR

37. NERC proposed the removal of the load-serving entity function from proposed Reliability Standard, TOP-001-3, Requirements R3 through R6, as a recipient of an operating instruction from a transmission operator or balancing authority. NERC supplemented its initial petition with additional explanation for the removal of the load-serving entity function from proposed Reliability Standard TOP-001-3.³³ NERC explained that the proposed standard gives transmission operators and balancing authorities the authority to direct the actions of certain other functional entities by issuing an operating instruction to maintain reliability during real-time operations.

38. In the NOPR, the Commission noted that NERC was required to make a compliance filing in Docket No. RR15-4-000, regarding NERC’s Risk-Based Registration initiative, and that the Commission’s decision on that filing

³² Reliability Standard IRO-002-4, Requirement R3 states: Each Reliability Coordinator shall monitor Facilities, the status of Special Protection Systems, and non-BES facilities identified as necessary by the Reliability Coordinator, within its Reliability Coordinator Area and neighboring Reliability Coordinator Areas to identify any System Operating Limit exceedances and to determine any Interconnection Reliability Operating Limit exceedances within its Reliability Coordinator Area.

³³ The Commission also notes that Reliability Standards TOP-003-3 and IRO-010-2 also include “load-serving entity” as an applicable entity.

will guide any action in this proceeding. On March 19, 2015, the Commission approved, in part, NERC's Risk-Based Registration initiative, but denied, without prejudice, NERC's proposal to eliminate the load-serving entity function from the registry process, finding that NERC had not adequately justified its proposal.³⁴ In doing so, the Commission directed NERC to provide additional information to support this aspect of its proposal to address the Commission's concerns. On July 17, 2015, NERC submitted a compliance filing in response to the March 19 Order.

Comments

39. NERC states that while load-serving entities play a role in facilitating interruptible (or voluntary) load curtailments, that role is to simply communicate requests for voluntary load curtailments and does not necessitate requiring load-serving entities to comply with a transmission operator's or balancing authority's operating instructions issued pursuant to Reliability Standard TOP-001-3. In short, the load-serving entity's role in carrying out interruptible load curtailment is not the type of activity that rises to the level of requiring an operating instruction. EEI and TAPS contend it is appropriate to omit the load-serving entity function from TOP-001-3 applicability. TAPS explains that because the load-serving entity function does not own or operate equipment, the load-serving entity function cannot curtail load or perform other corrective actions subject to reliability standards. Dominion asserts that a load-serving entity does not own or operate bulk electric system facilities or equipment or the facilities or equipment used to serve end-use customers and is not aware of any entity, registered solely as a load-serving entity, which is responsible for operating one or more elements or facilities.

Commission Determination

40. In an October 15, 2015 order in Docket No. RR15-4-001, the Commission accepted a NERC compliance filing, finding that NERC complied with the March 17 Order with respect to providing additional information justifying the removal of the load-serving entity function.³⁵ The Commission also found that NERC addressed the concerns expressed regarding an accurate estimate of the

load-serving entities to be deregistered and the reliability impact of doing so, and how load data will continue to be available and reliability activities will continue to be performed even after load-serving entities would no longer be registered.³⁶ Because the load-serving entity category is no longer a NERC registration function, no further action is required in this proceeding.³⁷

D. Data Exchange Capabilities

41. The Commission approved Reliability Standards COM-001-2 (Communications) and COM-002-4 (Operating Personnel Communications Protocols) in Order No. 808, and noted that in the NOPR underlying that order (COM NOPR) it had raised concerns as to whether Reliability Standard COM-001-2 addresses facilities that directly exchange or transfer data.³⁸ In response to that concern in the COM NOPR, NERC clarified that Reliability Standard COM-001-2 did not need to include requirements regarding data exchange capability because such capability is covered under other existing and proposed standards. Based on that explanation, the Commission decided not to make any determinations in Order No. 808 and stated that it would address the issue in this TOP and IRO rulemaking proceeding.³⁹

NOPR

42. In the NOPR, the Commission stated that facilities for data exchange capabilities appear to be addressed in NERC's TOP/IRO petition. However, the Commission sought additional explanation from NERC regarding how it addresses data exchange capabilities in the TOP and IRO Standards in the following areas: (a) Redundancy and diverse routing; and (b) testing of the alternate or less frequently used data exchange capability.

1. Redundancy and Diverse Routing of Data Exchange Capabilities

NOPR

43. In the NOPR, the Commission agreed that proposed Reliability Standard TOP-001-3, Requirements

³⁶ *Id.*

³⁷ In its response to comments in Docket No. RR15-4-000, NERC stated that, once the Commission approved the proposed deactivation of the load-serving entity registration function, it would make any needed changes to the Reliability Standards through the Reliability Standard Development Process. See January 26, 2016, NERC Motion to File Limited Answer at 6 in Docket No. RR15-4-000.

³⁸ See NOPR, 151 FERC ¶ 61,236 at P 67, citing *Communications Reliability Standards*, Order No. 808, 151 FERC ¶ 61,039 (2015).

³⁹ *Id.* citing Order No. 808, 151 FERC ¶ 61,039 at P 54.

R19 and R20 require some form of "data exchange capabilities" for the transmission operator and balancing authority and that proposed Reliability Standard TOP-003-3 addresses the operational data itself needed by the transmission operator and balancing authority. In addition, the Commission agreed that Reliability Standard IRO-002-4, Requirement R1 requires "data exchange capabilities" for the reliability coordinator and that proposed Reliability Standard IRO-010-2 addresses the operational data needed by the reliability coordinator and that proposed Reliability Standard IRO-002-4 Requirement R4 requires a redundant infrastructure for system monitoring. However, the Commission was concerned that it is not clear whether redundancy and diverse routing of data exchange capabilities were adequately addressed in proposed Reliability Standards TOP-001-3 and IRO-002-4 for the reliability coordinator, transmission operator, and balancing authority and sought explanation or clarification on how the standards address redundancy and diverse routing or an equally effective alternative. The Commission also stated that, if NERC or others believe that redundancy and diverse routing are not addressed, they should address whether there are associated reliability risks of the interconnected transmission network for any failure of data exchange capabilities that are not redundant and diversely routed.

Comments

44. NERC and EEI state that the requirements in the TOP and IRO Reliability Standards covering data exchange are results-based, articulating a performance objective without dictating the manner in which it is met. NERC adds that, in connection with their compliance monitoring activities, NERC and the Regional Entities will review whether applicable entities have met that objective, and will consider whether the applicable entity has redundancy and diverse routing, and whether the applicable entity tests these capabilities. EEI also argues that Reliability Standard EOP-008-1, Requirements R1, R1.2, R1.2.2, R7, and EOP-001-2.1b, Requirements R6 and R6.1 provide specific requirements for maintaining or specifying reliable back-up data exchange capability necessary to ensure BES Reliability and the testing of those capabilities.

45. ERCOT asserts that the Reliability Standards already appropriately provide for redundancy and diversity of routing of data exchange capabilities, as both the existing and proposed standards

³⁴ *North American Electric Reliability Corp.* 150 FERC ¶ 61,213 (2015) (March 19 Order).

³⁵ *North American Electric Reliability Corp.* 153 FERC ¶ 61,024 (2015).

either explicitly or implicitly require responsible entities to ensure availability of data and data exchange capabilities. ERCOT states that, should the Commission seek to provide further clarification on this issue, such clarification should be consistent with existing explicit requirements regarding the redundancy of data exchange capabilities, such as Requirement R4 of Reliability Standard IRO-002-4.

46. ISOs/RTOs and ERCOT explain the suite of currently-effective standards and the proposed TOP and IRO standards establish performance-based requirements for reliability coordinators, balancing authorities, and transmission operators, that create the need for those entities to have diverse and redundantly routed data communication systems. In the event of a failure of data communications, ISOs/RTOs explain that the functional entity should be able to rely on the redundant and diversely routed *voice capabilities* required in the COM standards.

Commission Determination

47. We agree with NERC and other commenters that there is a reliability need for the reliability coordinator, transmission operator and balancing authority to have data exchange capabilities that are redundant and diversely routed. However, we are concerned that the TOP and IRO Standards do not clearly address redundancy and diverse routing so that registered entities will unambiguously recognize that they have an obligation to address redundancy and diverse routing as part of their TOP and IRO compliance obligations. NERC's comprehensive approach to establishing communications capabilities necessary to maintain reliability in the COM standards is applicable to data exchange capabilities at issue here.⁴⁰ Therefore, pursuant to section 215(d)(5) of the FPA, we direct NERC to modify Reliability Standards TOP-001-3, Requirements R19 and R20 to include the requirement that the data exchange capabilities of the transmission operators and balancing authorities

require redundancy and diverse routing. In addition, we direct NERC to clarify that "redundant infrastructure" for system monitoring in Reliability Standards IRO-002-4, Requirement R4 is equivalent to redundant and diversely routed data exchange capabilities.

48. Further, we disagree with commenter arguments that Reliability Standard EOP-008-1 provides alternatives to data exchange redundancy and diverse routing. The NERC standard drafting team that developed the COM standards addressed this issue in the standards development process, responding to a commenter seeking clarification on the relationship between communication capabilities, alternative communication capabilities, primary control center functionality and backup control center functionality. The standard drafting team responded that "Interpersonal Communication and Alternative Interpersonal Communication *are not related to EOP-008*," even though Reliability Standard EOP-008-1 Requirement R1 applies equally to data communications and voice communications.⁴¹ To the extent the standard drafting team asserted that Reliability Standard EOP-008 did not supplant the redundancy requirements of the COM Reliability Standards, we believe the same is true for data communications. Redundancy for data communications is no less important than the redundancy explicitly required in the COM standards for voice communications.

2. Testing of the Alternate or Less Frequently Used Data Exchange Capability

NOPR

49. In the NOPR, the Commission expressed concern that the proposed TOP and IRO Reliability Standards do not appear to address testing requirements for alternative or less frequently used mediums for data exchange to ensure they would properly function in the event that the primary or more frequently used data exchange capabilities failed. Accordingly, the Commission sought comment on whether and how the TOP and IRO Reliability Standards address the testing of alternative or less frequently used data exchange capabilities for the transmission operator, balancing authority and reliability coordinator.

⁴¹ See NERC COM Petition, Exh. M, (Consideration of Comments on Initial Ballot, February 25-March 7, 2011) at 30 (emphasis added).

Comments

50. Commenters assert that the existing standards have sufficient testing requirements. NERC points to Reliability Standard EOP-008-1, Requirement R7, which requires that applicable entities conduct annual tests of their operating plan that demonstrates, among other things, backup functionality. Similarly, EEI cites EOP-008-1 Requirements R1, R1.2, R1.2.2, R7 and EOP-001-2.1b Requirements R6 and R6.1 as providing specific requirements for maintaining and testing of data exchange capabilities. ITC suggests that NERC's proposed Standard TOP-001-3 provides ample assurance that the data exchange capabilities are regularly tested and also points to Reliability Standards EOP-001-2.1b and EOP-008-1 which require entities, including those covered by TOP-001-3, to maintain reliable back-up data exchange capability as necessary to ensure reliable BES operations, and require that such capabilities be thoroughly and regularly tested.

Commission Determination

51. We agree with NERC and other commenters that there is a reliability need for the reliability coordinator, transmission operator and balancing authority to test alternate data exchange capabilities. However, we are not persuaded by the commenters' assertions that the need to test is implied in the TOP and IRO Standards. Rather, we determine that testing of alternative data exchange capabilities is important to reliability and should not be left to what may or may not be implied in the standards.⁴² Therefore, pursuant to section 215(d)(5) of the FPA, we direct NERC to develop a modification to the TOP and IRO standards that addresses a data exchange capability testing framework for the data exchange capabilities used in the primary control centers to test the alternate or less frequently used data exchange capabilities of the reliability coordinator, transmission operator and balancing authority. We believe that the structure of Reliability Standard COM-001-2, Requirement R9 could be a

⁴² In NERC's COM Petition, Exh. M, (Consideration of Comments, Index to Questions, Comments and Responses) at 35, the standard drafting team stated that the "requirement [COM-001-2, Requirement R9 which addresses testing of alternative interpersonal communication] applies to the primary control center" and "EOP-008 applies to the back up control center."

⁴⁰ See, e.g., Order No. 808, 151 FERC ¶ 61,039 at P 8: "NERC stated in its [COM] petition that Reliability Standard COM-001-2 establishes requirements for Interpersonal Communication capabilities necessary to maintain reliability. NERC explained that proposed Reliability Standard COM-001-2 applies to reliability coordinators, balancing authorities, transmission operators, generator operators, and distribution providers. The proposed Reliability Standard includes eleven requirements and two new defined terms, "Interpersonal Communication" and "Alternative Interpersonal Communication," that, according to NERC, collectively provide a comprehensive approach to establishing communications capabilities necessary to maintain reliability."

model for use in the TOP and IRO Standards.⁴³

E. Other Issues Raised by Commenters

1. Emergencies and Emergency Assistance Under Reliability Standard TOP-001-3

52. Reliability Standard TOP-001-3, Requirement R7 requires each transmission operator to assist other transmission operators within its reliability coordinator area, if requested and able, provided that the requesting transmission operator has implemented its comparable emergency procedures. NIPSCO contends that this requirement limits the ability of an adjacent transmission operator that is located along the seam in another reliability coordinator area from rendering assistance in an emergency because Requirement R7 only requires each transmission operator to assist other transmission operators within its reliability coordinator area. NIPSCO points to Reliability Standard IRO-014-3, Requirement R7 which requires each reliability coordinator to assist other reliability coordinators and, according to NIPSCO, a similar requirement in Reliability Standard TOP-001-3 will make the two sets of requirements consistent with each other.

53. In addition, Reliability Standard TOP-001-3, Requirement R8 states:

Each Transmission Operator shall inform its Reliability Coordinator, known impacted Balancing Authorities, and known impacted Transmission Operators of its actual or expected operations that result in, or could result in, an Emergency.

BPA contends that the phrase “could result in” in Requirement R8 of TOP-001-3 is overly broad and suggests corrective language underscored below:

Each Transmission Operator shall inform its Reliability Coordinator, known impacted Balancing Authorities, and known impacted Transmission Operators of its actual or expected operations that result in an Emergency, or could result in an Emergency *if a credible Contingency were to occur.*

As an alternative to changing the language of the requirement, BPA asks the Commission to clarify that it is in the transmission operator’s discretion to determine what “could result” in an emergency, based on the transmission operator’s experience and judgment.

⁴³ 43 COM-001-2, Requirement R9 states: “Each Reliability Coordinator, Transmission Operator, and Balancing Authority shall test its Alternative Interpersonal Communication capability at least once each calendar month. If the test is unsuccessful, the responsible entity shall initiate action to repair or designate a replacement Alternative Interpersonal Communication capability within 2 hours.”

Commission Determination

54. With regard to NIPSCO’s concern, we do not believe that the requirements as written limit the ability of an adjacent transmission operator located along the seam in another reliability coordinator area from rendering assistance in an emergency. We agree with NIPSCO that proposed Reliability Standard TOP-001-3, Requirement R7 requires each transmission operator to assist other transmission operators within its reliability coordinator area and further agree with NIPSCO that proposed Reliability Standard IRO-014-3, Requirement R7 requires each reliability coordinator to assist other reliability coordinators.⁴⁴ In addition, we understand that an adjacent transmission operator in another reliability coordinator area can render assistance when directed to do so by its own reliability coordinator.⁴⁵ Having a similar requirement in Reliability Standard TOP-001-3 compared to Reliability Standard IRO-014-3, Requirement R7 is unnecessary and could complicate the clear decision-making authority NERC developed in the TOP and IRO Reliability Standards. Thus, we determine that no further action is required.

55. With regard to clarification of emergencies in Reliability Standard TOP-001-3, Requirement R8, we do not see a need to modify the language as suggested by BPA. The requirement as written implies that the transmission operator has discretion to determine what could result in an emergency, based on its experience and judgment. In addition, we note that the transmission operators’ required next-day operational planning analysis, real-time assessments and real-time monitoring under the TOP Reliability Standards provide evaluation, assessment and input in determining what “could result” in an emergency.

2. Reliability Coordinator Authority in Next-Day Operating Plans

56. Reliability Standard TOP-002-4, Requirements R2 and R4 require transmission operators and balancing authorities to have operating plans. Reliability Standard TOP-002-4, Requirements R6 and R7 require transmission operators and balancing authorities to provide their operating plans to their reliability coordinators and Reliability Standard IRO-008-2, Requirement R2 requires reliability coordinators to develop a coordinated

⁴⁴ See Reliability Standards TOP-001-3 and IRO-014-3.

⁴⁵ See Reliability Standard IRO-001-4, Requirement R2.

operating plan that considers the operating plans provided by the transmission operators and balancing authorities.

57. NIPSCO is concerned about the absence of any required direct coordination between transmission operators and balancing authorities as well as the absence of any guidance regarding the resolution of potential conflicts between the transmission operator and balancing authority operating plans. NIPSCO contends that the Reliability Standards provide only a limited coordination process in which reliability coordinators are required to notify those entities identified with its coordinated operating plan of their roles. NIPSCO argues that there is no provision for modifications to operating plans based on the reliability coordinator’s coordinated operating plan or based on potential conflicts between the transmission operator and balancing authority operating plans. NIPSCO is concerned that a potential disconnect between operating plans could lead to confusion or a failure of coordination of reliable operations.

Commission Determination

58. We believe that proposed Reliability Standards TOP-002-4 and IRO-008-2 along with NERC’s definition of reliability coordinator address NIPSCO’s concern.⁴⁶ Although the transmission operator and balancing authority develop their own operating plans for next-day operations, both the transmission operator and balancing authority notify entities identified in the operating plans as to their role in those plans. Further, each transmission operator and balancing authority must provide its operating plan for next-day operations to its reliability coordinator.⁴⁷ In Reliability Standard IRO-008-2, Requirement R2, the reliability coordinator must have a coordinated operating plan for next-day operations to address potential SOL and IROL exceedances while considering the operating plans for the next-day provided by its transmission operators

⁴⁶ NERC Glossary of Terms defines the Reliability Coordinator as “The entity that is the highest level of authority who is responsible for the reliable operation of the Bulk Electric System, has the Wide Area view of the Bulk Electric System, and has the operating tools, processes and procedures, including the authority to prevent or mitigate emergency operating situations in both next-day analysis and real-time operations. The Reliability Coordinator has the purview that is broad enough to enable the calculation of Interconnection Reliability Operating Limits, which may be based on the operating parameters of transmission systems beyond any Transmission Operator’s vision.”

⁴⁷ Reliability Standard TOP-002-4 (Operations Planning).

and balancing authorities. Also, Reliability Standard IRO-008-2, Requirement R3 requires that the reliability coordinator notify impacted entities identified in its operating plan as to their role in such plan. Based on the notification and coordination processes of Reliability Standards TOP-002-4 (for the transmission operator and balancing authority) and IRO-008-2 (for the reliability coordinator) for next-day operating plans, as well as the fact that the reliability coordinator is the entity that is the highest level of authority who is responsible for the reliable operation of the bulk electric system, we believe that the reliability coordinator has the authority and necessary next-day operational information to resolve any next-day operational issues within its reliability coordinator area. Accordingly, we deny NIPSCO's request.

3. Reliability Coordinator Authority in Next-Day Operations and the Issuance of Operating Instructions

59. NIPSCO is concerned with the elimination of the explicit requirement in currently-effective Reliability Standard IRO-004-2 that each transmission operator, balancing authority, and transmission provider comply with the directives of a reliability coordinator based on next-day assessment in the same manner as would be required in real-time operating conditions. NIPSCO claims that, while the Reliability Standards appear to address the Commission's concerns regarding directives issued in other than emergency conditions through the integration of the term "operating instruction," the standards only allow for the issuance of directives in real-time. NIPSCO points to Reliability Standard TOP-001-3, Requirements R1 and R2, and IRO-001-4, Requirement R1, where transmission operators, balancing authorities, and reliability coordinators are explicitly given authority and responsibility to issue operating instructions to address reliability in their respective areas. NIPSCO states that "operating instruction" is "clearly limited to real-time operations" as it underscored below:

A command by operating personnel responsible for the *Real-time operation* of the interconnected Bulk Electric System to *change or preserve the state, status, output, or input of an Element* of the Bulk Electric System or Facility of the Bulk Electric System. (A discussion of general information and of potential options or alternatives to resolve Bulk Electric System operating concerns is not a command and is not considered an Operating Instruction.)

NIPSCO contends that there are no clear requirements addressing potential conflicts between operating plans, no clear requirements authorizing the issuance of a directive to address issues identified in next-day planning, and no clear requirement to comply with any directive so issued. NIPSCO is concerned that this raises the possibility that potential next-day problems identified in the operational planning analyses may not get resolved in the next-day planning period because the reliability coordinator's authority to issue operating instructions is limited to real-time operation. According to NIPSCO, this limitation undermines some of the usefulness of the next-day planning and the performance of operational planning analyses.

Commission Determination

60. We do not share NIPSCO's concern. Rather, we believe that, because the reliability coordinator is required to have a coordinated operating plan for the next-day operations, the reliability coordinator will perform its task of developing a coordinated operating plan in good faith, with inputs not only from its transmission operators and balancing authorities, but also from its neighboring reliability coordinators.⁴⁸ A reliability coordinator has a wide-area view and bears the ultimate responsibility to maintain the reliability within its footprint, "including the authority to prevent or mitigate emergency operating situations in both next-day analysis and real-time operations."⁴⁹

61. In addition, we do not agree with NIPSCO's claim that operating instructions are "clearly limited to real-time operations." The phrase "real-time operation" in the definition of operating instruction as emphasized by NIPSCO applies to the entity that issues the operating instruction which is "operating personnel responsible for the Real-time operation." The definition of operating instruction is "[a] command by operating personnel responsible for the Real-time operation of the interconnected Bulk Electric System. . . ." In addition, the time horizons associated with the issuance of or compliance with an operating instruction are not found in the definition of operating instructions, but found in the individual requirement(s) applicable to issuing an operating instruction. For example, Reliability Standard TOP-001-3, Requirements R1

through R6 and IRO-001-4, Requirements R1 through R3 are all requirements associated with the issuance or compliance of operating instructions. In all nine requirements, the defined time horizon is "same-day operations" and "real-time operations."⁵⁰ Accordingly, we deny NIPSCO's request on this issue.

4. Updating Operational Planning Analyses and Real-Time Assessments

62. NIPSCO is concerned that the proposed Reliability Standards are not clear as to whether updates or additional analyses are required. NIPSCO points to Reliability Standards IRO-008-2 and TOP-002-4, which require reliability coordinators to perform—and transmission operators and balancing authorities to have—an operational analysis for the next-day, but do not specify when such analysis must be performed or if it needs to be updated in next-day planning based on any change in inputs. Similarly, NIPSCO asserts that the proposed Reliability Standards require the performance of a real-time assessment every 30 minutes but do not address the need to potentially update operating plans based on changes in system conditions (including unplanned outages of protection system degradation) and do not require the performance of additional real-time assessments or other studies with more frequency based on changes in system conditions. NIPSCO explains that it is not clear if or when, based on the operational planning analysis results, some type of additional study or analysis would need to be undertaken prior to the development of an operating plan. According to NIPSCO, the text of the requirements and the definition do not specifically require additional studies; however, it seems that when issues associated with protection system degradation or outages are identified, further study of these issues would be required and/or additional analyses required to update results as protection system status or transmission or generation outages change.

Commission Determination

63. We do not share NIPSCO's concern. Reliability Standards IRO-008-2 and TOP-002-4 require reliability coordinators to perform and

⁴⁸ See Reliability Standards IRO-008-2, Requirements R1 and R2, and IRO-014-3, Requirement R1.

⁴⁹ See *supra* n. 46.

⁵⁰ NERC's "Time Horizons" document defines "Same-Day Operations" time horizon as "routine actions required within the timeframe of a day, but not real-time" and defines "Real-Time Operations" time horizon as "actions required within one hour or less to preserve the reliability of the bulk electric system." See http://www.nerc.com/files/Time_Horizons.pdf.

transmission operators to have an operational planning analysis to assess whether its planned operations for next-day will exceed any of its SOLs (for the transmission operator) and SOLs/IROLs (for the reliability coordinator). Both are required to have an operating plan(s) to address potential SOL and/or IROL exceedances based on its operational planning analysis results. We believe that, if the applicable inputs of the operational planning analysis change from one operating day to the next operating day, and because an operational planning analysis is an "evaluation of projected system conditions," a new operational planning analysis must be performed to include the change in applicable inputs. Based on the results of the new operational planning analysis for next-day, operating plans may need updating to reflect the results of the new operational planning analysis. Likewise with the real-time assessment, as system conditions change and the applicable inputs to the real-time assessment change, a new assessment would be needed to accurately reflect applicable inputs, as stated in the real-time assessment definition.⁵¹

5. Performing a Real-Time Assessment When Real-Time Contingency Analysis Is Unavailable

64. Reliability Standard TOP-001-3, Requirement R13 requires transmission operators to ensure a real-time assessment is performed at least every 30 minutes. NIPSCO states that NERC's definition of real-time assessment anticipates that real-time assessments must be performed through the use of either an internal tool or third-party service.⁵² NIPSCO believes that compliance with the requirement to perform a real-time assessment should not be dependent on the availability of a system or tool. According to NIPSCO, if a transmission operators' tools are unavailable for 30 minutes or more, they should be permitted to meet the requirement to assess existing conditions through other means.

⁵¹ Real-time assessment is defined as "An evaluation of system conditions using Real-time data to assess existing (pre-Contingency) and potential (post-Contingency) operating conditions. The assessment shall reflect applicable inputs including, but not limited to: Load, generation output levels, known Protection System and Special Protection System status or degradation, Transmission outages, generator outages, Interchange, Facility Ratings, and identified phase angle and equipment limitations. (Real-time Assessment may be provided through internal systems or through third-party services)."

⁵² See *supra* n. 48.

Commission Determination

65. Reliability Standard TOP-001-3, Requirement R13 requires the transmission operator to ensure the assessment is performed at least once every 30 minutes, but does not state that the transmission operator on its own must perform the assessment and does not specify a system or tool. This gives the transmission operator flexibility to perform its real-time assessment. Further supporting this flexibility, NERC's definition of real-time assessment states that a real-time assessment "may be provided through internal systems or through third-party services."⁵³ Therefore, we believe that Reliability Standard TOP-001-3, Requirement R13 does not specify the system or tool a transmission operator must use to perform a real-time assessment. In addition, NERC explains that Reliability Standard TOP-001-3, Requirement R13 and the definition of real-time assessment "do not specify the manner in which an assessment is performed nor do they preclude Reliability Coordinators and Transmission Operators from taking 'alternative actions' and developing procedures or off-normal processes to mitigate analysis tool (RTCA) outages and perform the required assessment of their systems. As an example, the Transmission Operator could rely on its Reliability Coordinator to perform a Real-time Assessment or even review its Reliability Coordinator's Contingency analysis results when its capabilities are unavailable and vice-versa."⁵⁴ Accordingly, we conclude that TOP-001-3 adequately addresses NIPSCO's concern, namely, if a transmission operators' tools are unavailable for 30 minutes or more, the transmission operator has the flexibility to meet the requirement to assess system conditions through other means.

6. Valid Operating Limits

66. IESO is concerned that the revised TOP standards do not compel an entity to verify existing limits or re-establish limits following an event that results in conditions not previously assessed within an acceptable time frame as is specified in the currently-effective Reliability Standard TOP-004-2 Requirement R4.⁵⁵ IESO disagrees that

⁵³ NERC TOP/IRO Petition at 18.

⁵⁴ NERC TOP/IRO Petition, Exh. K (Summary of Development History and Complete Record of Development), Consideration of Comments May 19, 2014 through July 2, 2014) at 61.

⁵⁵ Requirement R4 states: "If a Transmission Operator enters an unknown operating state (*i.e.* any state for which valid operating limits have not been determined), it will be considered to be in an emergency and shall restore operations to respect

this is sufficient because there is no requirement in the Reliability Standard TOP-001-3 standard to derive a new set of limits, particularly transient stability limits, or verify that an existing set of limits continue to be valid for the prevailing conditions within an established timeframe. IESO contends that a real-time assessment is useful only if the system conditions are assessed against a valid set of limits and is unable to verify or re-establish stability-restricted SOLs with which to assess system conditions to address reliability concerns. IESO believes that an explicit requirement to verify or re-establish SOLs when entering into an unstudied state must therefore be imposed to fill this reliability gap.

67. Further, IESO asserts that implementing operating plans to mitigate an SOL exceedance does not require transmission operators to determine a valid set of limits with which to compare the prevailing system conditions (*i.e.* whether or not the limits are exceeded). While the IESO supports performing a real-time assessment every 30 minutes, it asserts that performing an assessment without first validating the current set of limits or re-establishing a new set of limits as the boundary conditions leaves a reliability gap.

Commission Determination

68. We agree with IESO that valid operating limits, including transient stability limits, are essential to the reliable operation of the interconnected transmission network and that a transmission operator must not enter into an unknown operating state. Further, we agree with IESO that Reliability Standard TOP-001-3 has no requirements to derive a new set of limits or verify an existing set of limits for prevailing operating conditions within an established timeframe. However, IESO's concerns regarding the establishment of transient stability operating limits are addressed collectively through proposed Reliability Standard TOP-001-3, certain currently-effective Facilities Design, Connections, and Maintenance (FAC) Reliability Standards and NERC's Glossary of Terms definition of SOLs.

69. In its SOL White Paper, NERC stated that the intent of the SOL concept is to bring clarity and consistency for establishing SOLs, exceeding SOLs, and implementing operating plans to mitigate SOL exceedances.⁵⁶ In

proven reliable power system limits within 30 minutes."

⁵⁶ NERC Petition, Exh. E (White Paper on System Operating Limit Definition and Exceedance Clarification) at 1. NIPSCO requests clarification as to how NERC's SOL White Paper can be used in

addition, “transient stability ratings” are included in the SOL definition. Further, in the SOL White Paper, NERC states that the “concept of SOL determination is not complete without looking at the approved NERC FAC standards FAC-008-3, FAC-011-2 and FAC-014-2.”⁵⁷ Specific to IESO’s concerns of establishing transient stability limits, we agree with NERC that approved Reliability Standard FAC-011-2, Requirement R2 requires that the reliability coordinator’s SOL methodology include a requirement that SOLs provide a certain level of bulk electric system performance including among other things, that the “BES shall demonstrate transient, dynamic and voltage stability” and that “all Facilities shall be within their . . . stability limits” for both pre- and post-contingency conditions.⁵⁸ In addition, we note that currently-effective Reliability Standard FAC-011-2, Requirement R2.1 states that “[i]n the determination of SOLs, the BES condition used shall reflect current or expected system conditions and shall reflect changes to system topology such as Facility outages.”⁵⁹

70. With respect to Reliability Standard TOP-001-3, we agree with NERC that Requirement R13 specifies that transmission operators must perform a real-time assessment at least once every 30 minutes, which by

definition is an evaluation of system conditions to assess existing and potential operating conditions. The real-time assessment provides the transmission operator with the necessary knowledge of the system operating state to initiate an operating plan, as specified in Requirement R14, when necessary to mitigate an exceedance of SOLs. In addition, the SOL White Paper provides technical guidance for including timelines in the required operating plans to return the system to within prescribed ratings and limits.⁶⁰ Accordingly, we conclude that the establishment of transient stability operating limits is adequately addressed collectively through proposed Reliability Standard TOP-001-3, currently-effective Reliability Standards FAC-011-2 and FAC-014-2 and NERC’s Glossary of Terms definition of SOLs.⁶¹

III. Information Collection Statement

71. The collection of information contained in this Final Rule is subject to review by the Office of Management and Budget (OMB) regulations under section 3507(d) of the Paperwork Reduction Act of 1995 (PRA).⁶² OMB’s regulations require approval of certain informational collection requirements imposed by agency rules.⁶³ Upon approval of a collection(s) of information, OMB will assign an OMB control number and an expiration date. Respondents subject to the filing

requirements of a rule will not be penalized for failing to respond to these collections of information unless the collections of information display a valid OMB control number.

Public Reporting Burden: The number of respondents below is based on an estimate of the NERC compliance registry for the balancing authority, transmission operator, generator operator, distribution provider, generator owner, load-serving entity, purchasing-selling entity, transmission service provider, interchange authority, transmission owner, reliability coordinator, planning coordinator, and transmission planner functions. The Commission based its paperwork burden estimates on the NERC compliance registry as of May 15, 2015. According to the registry, there are 11 reliability coordinators, 99 balancing authorities, 450 distribution providers, 839 generator operators, 80 purchasing-selling entities, 446 load-serving entities, 886 generator owners, 320 transmission owners, 24 interchange authorities, 75 transmission service providers, 68 planning coordinators, 175 transmission planners and 171 transmission operators. The estimates are based on the change in burden from the current standards to the standards approved in this Final Rule. The following table illustrates the burden to be applied to the information collection:

RM15–16–000 (TRANSMISSION OPERATIONS RELIABILITY STANDARDS, INTERCONNECTION RELIABILITY OPERATIONS AND COORDINATION RELIABILITY STANDARDS)

	Number of respondents ⁶⁴	Annual number of responses per respondent	Total number of responses	Average burden & cost per response ⁶⁵	Total annual burden hours & total annual cost	Cost per respondent (\$)
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)

determining compliance. NIPSCO requests that any substantive content that is treated as containing enforceable compliance requirements be filed with the Commission for approval. NERC developed the SOL White Paper as a guidance document which provides links between relevant reliability standards and reliability concepts to establish a common understanding necessary for developing effective operating plans to mitigate SOL

exceedances. Guidelines are illustrative but not mandatory and enforceable compliance requirements. See, e.g. *North American Electric Reliability Corp.*, 143 FERC ¶ 61,271, at P 15 (2013). Accordingly, we see no need for further revisions to the Reliability Standards to incorporate the SOL White Paper as requested by NIPSCO.

Title: FERC-725Z, Mandatory Reliability Standards: IRO Reliability Standards, and FERC-725A, Mandatory Reliability Standards for the Bulk-Power System.

Action: Proposed Changes to Collections.

OMB Control Nos: 1902-0276 (FERC-725Z); 1902-0244 (FERC-725A).

Respondents: Business or other for-profit and not-for-profit institutions.

Frequency of Responses: On-going.

72. Necessity of the Information and Internal review: The Commission has reviewed the requirements of Reliability Standards TOP-001-3, TOP-002-4, TOP-003-3, IRO-001-4, IRO-002-4, IRO-008-2, IRO-010-2, IRO-014-3, and IRO-017-1 and made a determination that the standards are necessary to implement section 215 of the FPA. The Commission has assured itself, by means of its internal review, that there is specific, objective support for the burden estimates associated with the information requirements.

73. Interested persons may obtain information on the reporting

⁶⁴ the number of respondents is the number of entities for which a change in burden from the current standards to the proposed exists, not the total number of entities from the current or proposed standards that are applicable.

⁶⁵ The estimated hourly costs (salary plus benefits) are based on Bureau of Labor Statistics (BLS) information, as of April 1, 2015, for an electrical engineer (\$66.35/hour). These figures are available at http://blsgov/oes/current/naics3_221000.htm#17-0000.

⁶⁶ IRO-001-4 is a revised standard with no increase in burden.

requirements by contacting the Federal Energy Regulatory Commission, Office of the Executive Director, 888 First Street NE., Washington, DC 20426 [Attention: Ellen Brown, email: DataClearance@ferc.gov, phone: (202) 502-8663, fax: (202) 273-0873].

74. Comments on the requirements of this rule may also be sent to the Office of Management and Budget, Office of Information and Regulatory Affairs [Attention: Desk Officer for the Federal Energy Regulatory Commission]. For security reasons, comments should be sent by email to OMB at the following email address: oira_submission@omb.eop.gov. Please reference OMB Control Nos. 1902-0276 (FERC-725Z) and 1902-0244 (FERC-725A) in your submission.

IV. Environmental Analysis

75. The Commission is required to prepare an Environmental Assessment or an Environmental Impact Statement for any action that may have a significant adverse effect on the human environment.⁶⁷ The Commission has categorically excluded certain actions from this requirement as not having a significant effect on the human environment. Included in the exclusion are rules that are clarifying, corrective, or procedural or that do not substantially change the effect of the

⁶⁷ Regulations Implementing the National Environmental Policy Act of 1969, Order No. 486, 52 FR 47897 (Dec. 17, 1987), FERC Stats. & Regulations Preambles 1986-1990 ¶ 30,783 (1987).

regulations being amended.⁶⁸ The actions approved herein fall within this categorical exclusion in the Commission's regulations.

V. Regulatory Flexibility Act Analysis

76. The Regulatory Flexibility Act of 1980 (RFA) generally requires a description and analysis of Proposed Rules that will have significant economic impact on a substantial number of small entities.⁶⁹ The Small Business Administration's (SBA) Office of Size Standards develops the numerical definition of a small business.⁷⁰ The SBA revised its size standard for electric utilities (effective January 22, 2014) to a standard based on the number of employees, including affiliates (from a standard based on megawatt hours).⁷¹ Reliability Standards TOP-001-3, TOP-002-4, TOP-003-3, IRO-001-4, IRO-002-4, IRO-008-2, IRO-010-2, IRO-014-3, and IRO-017-1 are expected to impose an additional burden on 196 entities (reliability coordinators, transmission operators, balancing authorities, transmission service providers, and planning authorities). Comparison of the applicable entities with the Commission's small business data indicates that approximately 82 of these entities are small entities that will be

⁶⁸ 18 CFR 380.4(a)(2)(ii).

⁶⁹ 5 U.S.C. 601-12.

⁷⁰ 13 CFR 121.101.

⁷¹ SBA Final Rule on "Small Business Size Standards: Utilities," 78 FR 77343 (Dec. 23, 2013).

affected by the proposed Reliability Standards.⁷² As discussed above, Reliability Standards TOP-001-3, TOP-002-4, TOP-003-3, IRO-001-4, IRO-002-4, IRO-008-2, IRO-010-2, IRO-014-3, and IRO-017-1 will serve to enhance reliability by imposing mandatory requirements for operations planning, system monitoring, real-time actions, coordination between applicable entities, and operational reliability data. The Commission estimates that each of the small entities to whom the proposed Reliability Standards TOP-001-3, TOP-002-4, TOP-003-3, IRO-001-4, IRO-002-4, IRO-008-2, IRO-010-2, IRO-014-3, and IRO-017-1 applies will incur costs of approximately \$147,364 (annual ongoing) per entity. The Commission does not consider the estimated costs to have a significant economic impact on a substantial number of small entities.

VI. Document Availability

77. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the Internet through FERC's Home Page (<http://www.ferc.gov>) and in FERC's Public Reference Room during normal business hours (8:30 a.m. to 5:00 p.m. Eastern time) at 888 First Street NE., Room 2A, Washington, DC 20426.

78. From FERC's Home Page on the Internet, this information is available on eLibrary. The full text of this document is available on eLibrary in PDF and Microsoft Word format for viewing, printing, and/or downloading. To access this document in eLibrary, type the docket number excluding the last three digits of this document in the docket number field.

79. User assistance is available for eLibrary and the FERC's Web site during normal business hours from FERC Online Support at 202-502-6652 (toll free at 1-866-208-3676) or email at ferconlinesupport@ferc.gov, or the Public Reference Room at (202) 502-8371, TTY (202) 502-8659. Email the Public Reference Room at public.referenceroom@ferc.gov.

⁷² The Small Business Administration sets the threshold for what constitutes a small business. Public utilities may fall under one of several different categories, each with a size threshold based on the company's number of employees, including affiliates, the parent company, and subsidiaries. For the analysis in this NOPR, we are using a 750 employee threshold for each affected entity to conduct a comprehensive analysis.

VII. Effective Date and Congressional Notification

80. This final rule is effective January 26, 2016. The Commission has determined, with the concurrence of the Administrator of the Office of Information and Regulatory Affairs of OMB, that this rule is not a "major rule" as defined in section 351 of the Small Business Regulatory Enforcement Fairness Act of 1996.

By the Commission.
Issued: November 19, 2015.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

Department of the Navy

[No. USN-2013-0011]

RIN 0703-AA92

32 CFR Part 776

Professional Conduct of Attorneys Practicing Under the Cognizance and Supervision of the Judge Advocate General; Correction

AGENCY: Department of the Navy, DoD.

ACTION: Final rule; correction.

SUMMARY: On November 4, 2015, the Department of the Navy (DoN) published a final rule to comport with current policy as stated in JAG Instruction 5803.1 (Series) governing the professional conduct of attorneys practicing under the cognizance and supervision of the Judge Advocate General. The content of one of its CFRs is better codified as an appendix, and this correction amends the CFR accordingly.

DATES: This correction is effective December 4, 2015.

FOR FURTHER INFORMATION CONTACT: Commander Noreen A. Hagerty-Ford, JAGC, U.S. Navy, Office of the Judge Advocate General (Administrative Law), Department of the Navy, 1322 Patterson Ave. SE., Suite 3000, Washington Navy Yard, DC 20374-5066, telephone: 703-614-7408.

SUPPLEMENTARY INFORMATION: The DoN published a rule at 80 FR 68388 on November 4, 2015, to revise 32 CFR part 776, to comport with current policy as stated in JAG Instruction 5803.1 (Series) governing the professional conduct of attorneys practicing under the cognizance and supervision of the Judge Advocate General. The content of

§ 776.94 is more appropriate as an appendix, and this correction amends the CFR accordingly, redesignating § 776.94 as an appendix to subpart D. In addition, because § 776.94 becomes an appendix to its subpart, DoN is redesignating § 776.95 in the November 4 rule as § 776.94.

Correction

In FR Rule Doc. 2015-26982 appearing on page 68388 in the **Federal Register** of Wednesday, November 4, 2015, the following corrections are made:

- 1. On page 68390, in the first column, third line, revise "776.94 Outside Law Practice Questionnaire and Request." to read "Appendix to Subpart D of Part 776—Outside Law Practice Questionnaire and Request." and in the seventh line, revise "776.95 Relations with Non-USG Counsel." to read "776.94 Relations with Non-USG Counsel.";
- 2. On page 68408, in the third column, second line, revise "§ 776.94 of this part" to read "appendix to subpart D of part 776";
- 3. On page 68408, in the third column, revise the section heading "§ 776.94 Outside Law Practice Questionnaire and Request." to read "Appendix to Subpart D of Part 776—Outside Law Practice Questionnaire and Request."; and
- 4. On page 68409, in the second column under the Subpart E heading, revise "§ 776.95 Relations with Non-USG Counsel." to read "§ 776.94 Relations with Non-USG Counsel.".

Dated: November 20, 2015.

N.A. Hagerty-Ford,

Commander, Office of the Judge Advocate General, U.S. Navy, Federal Register Liaison Officer.

Program Integrity Issues

AGENCY: Office of Postsecondary Education, Department of Education.

ACTION: Final regulations; clarification and additional information.

SUMMARY: On October 29, 2010, the Department of Education published in the **Federal Register** final regulations for improving integrity in the programs authorized under title IV of the Higher

Education Act of 1965, as amended (HEA) (October 29, 2010, final regulations). The preamble to those regulations was revised in a **Federal Register** notice of March 22, 2013. This document clarifies and provides additional information about the October 29, 2010, final regulations.

DATES: This clarification and additional information apply to the October 29, 2010, regulations (75 FR 66832), which were generally effective July 1, 2011.

FOR FURTHER INFORMATION CONTACT: Scott Filter, U.S. Department of Education, 1990 K Street NW., Room 8014, Washington, DC 20006. Telephone: (202) 219-7031 or by email at Scott.Filter@ed.gov.

If you use a telecommunications device for the deaf (TDD), call the Federal Relay Service (FRS), toll free, at 1-800-877-8339.

Individuals with disabilities can obtain this document in an accessible format (e.g., braille, large print, audiotape, or compact disc) by contacting the contact person listed in this section.

SUPPLEMENTARY INFORMATION: The October 29, 2010, final regulations (75 FR 66832) amended the regulations for Institutional Eligibility Under the HEA, the Secretary's Recognition of Accrediting Agencies, the Secretary's Recognition Procedures for State Agencies, the Student Assistance General Provisions, the Federal Family Education Loan (FFEL) Program, the William D. Ford Federal Direct Loan Program, the Teacher Education Assistance for College and Higher Education (TEACH) Grant Program, the Federal Pell Grant Program, and the Academic Competitiveness Grant (AGC) and the National Science and Mathematics Access to Retain Talent Grant (National Smart Grant) Programs. On March 22, 2013 (78 FR 17598), the Department revised the preamble discussion to the October 29, 2010, final regulations in response to the remand in *Ass'n of Private Sector Colls. & Univs. (APSCU) v. Duncan*, 681 F.3d 427 (D.C. Cir. 2012) (78 FR 17598). This document clarifies and provides additional information about the October 29, 2010, final regulations in accordance with a subsequent district court order in *APSCU v. Duncan*, 70 F. Supp. 3d 446 (D.D.C. 2014).

Clarification and Additional Information

Graduation-Based and Completion-Based Compensation. In *APSCU v. Duncan*, 70 F. Supp. 3d 446 (D.D.C. 2014), the district court determined that the Department had not adequately explained or supported its decision to ban compensation to an educational institution's recruiters of students based on the students' graduation from or completion of educational programs offered by the institution. The regulations at 34 CFR 668.14(b)(22), implementing the statutory ban on enrollment-based compensation to recruiters of students, 20 U.S.C. 1094(a)(20), do not contain a ban on graduation-based or completion-based compensation. Although the Department removed the safe harbor that permitted certain graduation-based or completion-based compensation and previously indicated that it interpreted the amended regulations to ban such compensation, *see, e.g.*, 75 FR 66874, the Department hereby indicates, in response to the district court's decision, that the Department has reconsidered its interpretation and does not interpret the regulations to proscribe compensation for recruiters that is based upon students' graduation from, or completion of, educational programs. Correspondingly, the Department will not view the references in the regulations to recruiter enrollment activities that may occur "through completion" by a student of an educational program, 34 CFR 668.14(b)(22)(iii)(B) (introduction), and (iii)(B)(2)(ii), as prohibiting graduation-based or completion-based compensation to recruiters.

The Department has changed its interpretation because, at this time, it lacks sufficient evidence to demonstrate that schools are using graduation-based or completion-based compensation as a proxy for enrollment-based

compensation. In assessing the legality of a compensation structure, the Department will focus on the substance of the structure rather than on the label given the structure by an institution. Thus, although compensation based on students' graduation from, or completion of, educational programs is not *per se* prohibited, the Department reserves the right to take enforcement action against institutions if compensation labeled by an institution as graduation-based or completion-based compensation is merely a guise for enrollment-based compensation, which is prohibited. Compensation that is based upon success in securing enrollments, even if one or more other permissible factors are also considered, remains prohibited.

Impact on Minority Enrollment. The district court found that the Department failed to respond adequately to two commenters who questioned whether the amended regulations "might adversely affect minority outreach." *Id.* at 456; *see also APSCU v. Duncan*, 681 F.3d 427, 449 (D.C. Cir. 2012). The district court remanded the matter for the Department to address "the potential effect on minority recruitment, *i.e.*, whether minority enrollment could decline under the new regulations." *APSCU v. Duncan*, 70 F. Supp. 3d at 456.

The particular comments were included in two submissions that also included comments on other aspects of the proposed regulations. The first commenter asked:

Can schools increase compensation to personnel involved in diversity outreach programs for successfully assembling a diverse student body? Does the Department intend to foreclose schools' ability to compensate their staffs for successfully managing outreach programs for students from disadvantaged backgrounds like the eight TRIO programs administered by the Department?

DeVry to Jessica Finkel (August 1, 2010), AR—3386. The second commenter asked:

How will the new regulations apply to employees who are not involved in general student recruiting, but who are involved in recruiting certain types of students? Examples would include college coaches who recruit student athletes, and employees in college diversity offices who recruit minority students. We see nothing in the proposed regulations that excludes these types of employees from the scope of the incentive compensation law. Thus, coaches who recruit student athletes would not be able to be compensated, in any part, on the number or caliber of students they recruited or the volume of university revenue generated by the teams on which the athletes played. Similarly, employees responsible for

recruiting minority students would not be able to be compensated, in any part, on an increase in minority students who enroll at the college. We believe both of these practices are widespread and promote desirable goals, and are another example of how unclear, and potentially far-reaching, the Department's proposed regulations are. We request the Department's guidance on how to apply the law to compensation of these particular practices.

Career Education Corporation to Jessica Finkel (August 1, 2010) AR-3308.

The ban on the payment of incentive compensation precludes institutions from paying their recruiters, or enrollment counsellors, bonuses based upon the number of students they enroll, irrespective of the student's minority or other status and irrespective of whether the goal of the recruiters is to increase diversity. The statute and accompanying regulations address the powerful incentive that such pay provides for the recruiter to close the sale—whether or not the training offered is really what the individual needs. The ban exists to shelter all students from abusive practices that have historically occurred when recruiters were rewarded based on the number of students enrolled, as opposed to a more fulsome evaluation of a student's particular needs and an institution's capacity to meet those needs. Congress had no basis to expect (nor do we) that recruiters paid by incentive-based compensation who focus their recruitment efforts on minorities (or any other group, including athletes) would disregard their personal gain as they persuade individuals to enroll.

Minority student enrollment is not a goal in itself; minority student success matters, not just enrollment. Although the ban on incentive compensation may cause minority student enrollment numbers to decline, we expect that the minority students who do ultimately enroll will have a better chance at success, because they will have enrolled based on a decision made free of pressured sales tactics, and they presumably would be a good fit for the school they select. Indeed, as the Department has stated, “[m]inority and low income students are often the targeted audience of recruitment abuses, and our regulatory changes are intended to end that abuse. It is our expectation and objective that enrollment of students, including minority students, against their best educational interests would be reduced with the elimination of improper incentive compensation.” 78 FR 17600 (2013).

In response to the district court's remand and the commenters' questions, the Department hereby acknowledges

that the amended regulations could negatively affect outreach and enrollment generally, as well as student outreach that is specifically targeted at promoting diversity, which could result in fewer minority students recruited and enrolled. However, neither the statute nor any information presented by the commenters or in the administrative record provides a basis for treating a recruitment program directed at minority students differently than an institution's general or other specific recruitment programs. And, as explained below, there are ample ways for schools to maintain or increase their enrollment of minority students (and other students) that are likely to achieve a positive result from their enrollment besides providing compensation based on recruiters' enrollment numbers.

For several reasons, estimating how significant the effect on minority recruitment or enrollment may be is difficult. A robust assessment of the effect of incentive-based compensation on minority outreach and enrollment would require a comparison between schools with similar characteristics, one group of which paid its recruiters with incentive-based compensation for minority enrollments, and the other group which did not. We have not conducted such an experiment, and we have found no such study or analysis of this issue in the literature.

Another way to estimate the effect of the incentive compensation ban on institutions' recruitment of minority students would be to estimate how schools that pay incentive compensation to staff who recruit minorities would change their practices as a result of the ban on enrollment-based incentive compensation. If recruiting minority students is more difficult than recruiting other students, we expect schools would need to take steps to achieve the same level of success achieved by paying recruiters compensation based on the number of minority students they enroll, and that this would include, among other things, hiring more recruiters or changing their salary schedules in order to attract more talented recruiters, or both. We believe that schools that devote special efforts to recruit minority students and that used incentive compensation payments to drive those efforts in the past devoted significant resources to those payments, though we have no data quantifying those costs. We would expect those schools to redirect those resources if they wanted to ensure continued success in recruiting and enrolling minority students. Such steps could include increasing salaries to attract more capable recruiters or developing

new or enhancing existing outreach activities. We expect that those for-profit schools that currently enroll substantial numbers and high percentages of minority students would take such steps.

Accepting for purposes of this analysis the assertion that efforts to recruit minority students are specialized and thus require more resources than ordinary recruiting efforts generally used, we consider it reasonable to expect that some schools may conclude that the cost of those resources outweighs the benefits of maintaining or increasing special recruiting efforts for minority students. The group of schools more likely to choose not to allocate the added resources needed for specialized minority recruiting would appear to be those schools which depend less on minority enrollments, specifically: For-profit schools that offer longer programs (2 year and 4 year programs), and public or non-profit institutions. Minority enrollment might decline at some institutions in this group, because institutions in this group, compared to those for-profit institutions offering shorter programs, appear to depend less on minority enrollment than for-profit institutions offering shorter programs. They would be more likely to consider the expenses of increasing salaries or adding staff for specialized minority recruiting to outweigh the benefits of maintaining their minority recruiting efforts at the same level as before the ban. Nevertheless, the size of reductions in minority enrollments that would be fairly attributable to the ban—as opposed to other causes—remains difficult to predict.

Next, we would need to determine to what extent recruiters engaged under any revised schemes would be likely to succeed in recruiting minority students without the sales tactics that the ban is intended to deter. Last, for schools affected by the ban, we would need to distinguish those effects that are fairly attributed to the incentive compensation ban itself from those effects that could be attributed to other factors such as competitors' minority student recruitment efforts or a program's performance under the Department's gainful employment regulations, which apply to the same kinds of programs at for-profit schools that are being promoted by such recruiters. No data exists from which one can make these determinations.

While there is uncertainty about the size of any adverse effect of the ban on institutions' recruitment of minority students, the evidence that is available does not support an assertion that the Department's rule will seriously

undermine efforts to obtain educational diversity. In “For Profit Higher Education: The Failure to Safeguard the Federal Investment and Ensure Student Success,”¹ the Senate HELP Committee referred to GAO’s 2011 study of student outcomes at for-profit schools. In that study, GAO observed that African American and Hispanic students already comprised some 48 percent of all students enrolled in for-profit schools—more than the percent of students enrolled at for-profit schools who are non-Hispanic white (46 percent; Asian-Pacific Islanders and other non-Hispanic white students account for the other 6 percent of for-profit school students), double the percentage of students enrolled at private non-profit schools who are minority students, and far more than the percentage (28 percent) of students enrolled in public institutions who are minority students.² In addition, we note that the pattern observed in the GAO report continued in succeeding years, and was reflected at each credential level.³ These data demonstrate that for-profit schools at each credential level already enroll disproportionately large percentages of minority students compared to non-minority students and therefore call into question one of the commenter’s claims that minority recruitment efforts by the for-profit institutions to which the ban applies are needed to successfully assemble a diverse student body. (AR –3386, 3429, 3430). For-profit schools clearly already have diverse student bodies, dramatically different than student bodies at public or private non-profit institutions.

¹ For Profit Higher Education: The Failure to Safeguard the Federal Investment and Ensure Student Success, Senate HELP Committee, Majority Committee Staff Report, July 30, 2012, at 46, 47.

² *Id.*

³ Smith, Peter & Parrish, Leslie (2014), Do Students of Color Profit from For-Profit College? Poor Outcomes and High Debt Hamper Attendees’ Futures, Center for Responsible Lending, at 9, available at <http://higherednotdebt.org/tag/center-for-responsible-lending>. 2011 data show that of African Americans who enroll in schools that offer only short-term (non-degree) programs (less than 2-year), 91 percent do so at for-profit schools; of Hispanic students who enrolled in those schools, 85 percent enrolled at for-profit schools, but of white students in such programs, only 76 percent enrolled at for-profit schools. Of students who enroll at 2-year institutions, the pattern continues: 10 percent of African Americans and 8 percent of Hispanic students who enroll in 2-year institutions do so at for-profit schools, while only 5 percent of white students who enroll in 2-year schools do so at for-profit schools. Of African American and Hispanic students who enroll at 4-year institutions, 28 percent and 15 percent, respectively, enroll at for-profit schools, while only 10 percent of white students who enroll at 4-year institutions do so. *Id.* at 9.

Although the data show that for-profit schools already enrolled a significant percentage of minority students, estimating whether this diversity has been the result of the payment of incentive compensation, and whether the incentive compensation ban will negatively affect this already very diverse enrollment, would require a reliable estimate of the prevalence of incentive-based compensation in recruiting efforts directed at these minority students, as opposed to other students. The Department has no evidence to show what percentage of these minority students were enrolled on account of incentive-based compensation, as opposed to other features of for-profit schools.⁴ However, we do know that the percentage of enrolled students who were minority students in degree-granting institutions increased from fall 2010 to fall 2013, after the regulations became effective: minority enrollment as a percentage of all enrollment increased from 39.5 percent in 2010 to 43.1 percent in 2013.⁵ Similarly, minority student enrollment as a percentage of total

⁴ Although the percentage of revenue spent by for-profit institutions on advertising and recruiting, the numbers of recruiters, and the abusive recruiting tactics used by for-profit schools have been reported in, e.g., the HELP committee report, that report simply states variously that “some companies” or “many companies” used the practice. *Id.*, at 3, 4, 50, 51. A commenter asserted that incentive compensation payments are “widespread” (AR 3308).

⁵ National Center for Education Statistics (NCES) (2014) Digest of Education Statistics (Table 306.50) available at http://nces.ed.gov/programs/digest/d14/tables/dt14_306.50.asp, and NCES (2011) Digest of Education Statistics (Table 241), available at http://nces.ed.gov/programs/digest/d11/tables/dt11_241.asp. The numbers of students are those identified as the “fall enrollment” students, from the Integrated Postsecondary Education Data System (IPEDS) maintained by the National Center for Education Statistics and derived from periodic reports from postsecondary institutions. The fall enrollment is the annual component of IPEDS that collects data on the number of students enrolled in the fall at postsecondary institutions. Students reported are those enrolled in courses creditable toward a degree or other formal award; students enrolled in courses that are part of a vocational or occupational program, including those enrolled in off-campus or extension centers; and high school students taking regular college courses for credit. Institutions report annually the number of full—and part-time students, by gender, race/ethnicity, and level (undergraduate, graduate, first-professional); the total number of undergraduate entering students (first-time, full-and part-time students, transfer-ins, and non-degree students); and retention rates. In even-numbered years, data are collected for State of residence of first-time students and for the number of those students who graduated from high school or received high school equivalent certificates in the past 12 months. Also in even-numbered years, 4-year institutions are required to provide enrollment data by gender, race/ethnicity, and level for selected fields of study. In odd-numbered years, data are collected for enrollment by age category by student level and gender. <http://nces.ed.gov/ipeds/glossary/?charindex=F>

enrollments in for-profit degree-granting institutions increased from fall 2010 to fall 2013: from 49.3 percent (4-year institutions) and 56 percent (2-year institutions) in 2010 to 54 percent (4-year institutions) and 61 percent (2-year institutions) in 2013.⁶ These changes may be the result of many factors that are difficult to weigh or distinguish with respect to their effects on enrollment, including that institutions have already made changes needed to recruit in a manner compliant with the ban. However, these data do not support a claim that the incentive compensation ban has in fact negatively affected minority enrollment.

The Department continues to support all lawful efforts to promote diversity in enrollment, and nothing in the amended regulations changes that fact. Schools can implement effective recruiting programs generally, and effective minority outreach programs specifically, without compensating recruiters based on the number of students enrolled. Considerable efforts have already been made by this and other agencies, and non-governmental entities, to explore techniques to reach minority students and persuade them that postsecondary education is both available to them and worth their investment.⁷ It is beyond the scope of this clarification and additional information to incorporate that literature or summarize the findings. The commenters did not seek Department guidance on how to conduct outreach to minority students, and any institution interested in methods of such outreach can access resources and information on methods of outreach through Department and other sources.⁸ The commenters directly asked only for guidance about how to apply the compensation ban to minority recruitment practices, and we respond simply that the ban prohibits compensating those performing outreach and recruitment activities for minority students on the basis of the number of students enrolled. As we note above, minority students are often the target of recruitment practices that lead

⁶ *Id.* Some of the data cited here post-dates the promulgation of the final regulations, but the Department is including such data for illustrative purposes.

⁷ In addition, as one commenter notes, Title IV of the Higher Education Act authorizes the Trio Grant Programs to finance activities to encourage “qualified individuals from disadvantaged backgrounds” to prepare for and enroll in postsecondary education, and that for-profit institutions qualify for grants under these programs. 20 U.S.C. 1070a–11 *et seq.*

⁸ See, e.g., list of resources on minority student outreach available through the Department’s Web site: <http://findit.ed.gov/search?utf8=%E2%9C%93&affiliate=ed.gov&query=minority+outreach+>

to enrollment in courses of study that do not further their educational or vocational goals and are contrary to their economic interests, and the rule is intended to reduce that occurrence.

We acknowledge that some institutions may need to revise their diversity outreach operations if they depend more on the financial motivation of the recruiter than the design of the recruiting or outreach plan or the relative value of the programs touted by the recruiter. The regulations address only the payment of incentives to recruiters, not the activities the school requires recruiters to perform. Thus, the regulations do not prevent an institution from holding a recruiter accountable for implementing an effective recruiting or minority outreach plan adopted by the institution.

In sum, the Department acknowledges that the amended regulations may result in some negative impact on minority recruitment and enrollment. But neither the statute nor any information presented by the commenters or in the administrative record provides a basis for treating a recruitment program directed at minority students differently than an institution's general or other specific recruitment programs.

BILLING CODE 4000-01-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R03-OAR-2015-0686; FRL-9939-38-Region 3]

Approval and Promulgation of Air Quality Implementation Plans; Virginia; Revision to the Definition of Volatile Organic Compound

AGENCY: Environmental Protection Agency (EPA).

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking direct final action to approve a revision to the Commonwealth of Virginia's State Implementation Plan (SIP). The revision adds a compound to the list of substances not considered to be volatile organic compounds (VOCs). EPA is approving this revision in accordance with the requirements of the Clean Air Act (CAA).

DATES: This rule is effective on January 26, 2016 without further notice, unless EPA receives adverse written comment by December 28, 2015. If EPA receives such comments, it will publish a timely withdrawal of the direct final rule in the **Federal Register** and inform the public that the rule will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID Number EPA-R03-OAR-2015-0686 by one of the following methods:

A. www.regulations.gov. Follow the on-line instructions for submitting comments.

B. *Email:* fernandez.cristina@epa.gov.

C. *Mail:* EPA-R03-OAR-2015-0686, Cristina Fernandez, Associate Director, Office of Air Program Planning, Air Protection Division, Mailcode 3AP30, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103.

D. *Hand Delivery:* At the previously-listed EPA Region III address. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA-R03-OAR-2015-0686. EPA's policy is that all comments received will be included in the public docket without change, and may be made available online at www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI, or otherwise protected, through www.regulations.gov or email. The www.regulations.gov Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through www.regulations.gov, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the electronic docket are listed in the www.regulations.gov index. Although listed in the index, some information is not publicly available, *i.e.*, CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available in

www.regulations.gov or may be viewed during normal business hours at the Air Protection Division, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. Copies of the State submittal are available at the Virginia Department of Environmental Quality, 629 East Main Street, Richmond, Virginia 23219.

FOR FURTHER INFORMATION CONTACT: Irene Shandruk, (215) 814-2166, or by email at shandruk.irene@epa.gov.

SUPPLEMENTARY INFORMATION:

I. Background

Tropospheric ozone, commonly known as smog, is formed when VOCs and nitrogen oxides react in the atmosphere in the presence of sunlight. Because of the harmful health effects of ozone, EPA and state governments limit the amount of VOCs that can be released into the atmosphere. VOCs have different levels of reactivity, that is, some VOCs react slowly or form less ozone, and therefore, changes in their emissions have limited effects on local or regional ozone pollution episodes. It has been EPA's policy that VOCs with a negligible level of reactivity should be excluded from the regulatory definition of VOC contained at 40 CFR 51.100(s) so as to focus control efforts on compounds that do significantly increase ozone concentrations. This is accomplished by adding the substance to a list of compounds not considered to be VOCs, and thus, excluded from the definition of VOC. EPA believes that exempting such compounds creates an incentive for industry to use negligibly reactive compounds in place of more highly reactive compounds that are regulated as VOCs. On March 27, 2014 (79 FR 17037), EPA revised the definition of VOC contained in 40 CFR 51.100 to exclude one substance from the definition of VOC. The compound excluded from the definition of VOC is 2-amino-2-methyl-1-propanol (AMP).

II. Summary of SIP Revision

On September 17, 2015, the Commonwealth of Virginia (Virginia) submitted a formal revision to its SIP which consists of adding AMP to the list of substances that are not considered VOCs found at 9VAC5-10-20. The September 17, 2015 SIP revision will allow the Virginia SIP to mirror the Federal definition of VOC. EPA believes that by excluding this negligibly reactive compound from the definition of VOC an incentive is created for industry to use negligibly reactive compounds in place of more highly reactive compounds; therefore, the air quality in Virginia will not be negatively

affected by the approval of this SIP revision particularly as EPA has found this compound negligibly reactive for ozone formation.

III. Final Action

EPA is approving the SIP revision to the definition of VOC submitted by Virginia on September 17, 2015. EPA is publishing this rule without prior proposal because EPA views this as a noncontroversial amendment and anticipates no adverse comment. However, in the "Proposed Rules" section of today's **Federal Register**, EPA is publishing a separate document that will serve as the proposal to approve the SIP revision if adverse comments are filed. This rule will be effective on *January 26, 2016* without further notice unless EPA receives adverse comment by *December 28, 2015*. If EPA receives adverse comment, EPA will publish a timely withdrawal in the **Federal Register** informing the public that the rule will not take effect. EPA will address all public comments in a subsequent final rule based on the proposed rule. EPA will not institute a second comment period on this action. Any parties interested in commenting must do so at this time.

IV. General Information Pertaining to SIP Submittals From the Commonwealth of Virginia

In 1995, Virginia adopted legislation that provides, subject to certain conditions, for an environmental assessment (audit) "privilege" for voluntary compliance evaluations performed by a regulated entity. The legislation further addresses the relative burden of proof for parties either asserting the privilege or seeking disclosure of documents for which the privilege is claimed. Virginia's legislation also provides, subject to certain conditions, for a penalty waiver for violations of environmental laws when a regulated entity discovers such violations pursuant to a voluntary compliance evaluation and voluntarily discloses such violations to the Commonwealth and takes prompt and appropriate measures to remedy the violations. Virginia's Voluntary Environmental Assessment Privilege Law, Va. Code Sec. 10.1-1198, provides a privilege that protects from disclosure documents and information about the content of those documents that are the product of a voluntary environmental assessment. The Privilege Law does not extend to documents or information that: (1) Are generated or developed before the commencement of a voluntary environmental assessment; (2) are prepared independently of the

assessment process; (3) demonstrate a clear, imminent and substantial danger to the public health or environment; or (4) are required by law.

On January 12, 1998, the Commonwealth of Virginia Office of the Attorney General provided a legal opinion that states that the Privilege Law, Va. Code § 10.1-1198, precludes granting a privilege to documents and information "required by law," including documents and information "required by Federal law to maintain program delegation, authorization or approval," since Virginia must "enforce Federally authorized environmental programs in a manner that is no less stringent than their Federal counterparts. . . ." The opinion concludes that "[r]egarding § 10.1-1198, therefore, documents or other information needed for civil or criminal enforcement under one of these programs could not be privileged because such documents and information are essential to pursuing enforcement in a manner required by Federal law to maintain program delegation, authorization or approval." Virginia's Immunity law, Va. Code Sec. 10.1-1199, provides that "[t]o the extent consistent with requirements imposed by Federal law," any person making a voluntary disclosure of information to a state agency regarding a violation of an environmental statute, regulation, permit, or administrative order is granted immunity from administrative or civil penalty. The Attorney General's January 12, 1998 opinion states that the quoted language renders this statute inapplicable to enforcement of any Federally authorized programs, since "no immunity could be afforded from administrative, civil, or criminal penalties because granting such immunity would not be consistent with Federal law, which is one of the criteria for immunity."

Therefore, EPA has determined that Virginia's Privilege and Immunity statutes will not preclude the Commonwealth from enforcing its program consistent with the Federal requirements. In any event, because EPA has also determined that a state audit privilege and immunity law can affect only state enforcement and cannot have any impact on Federal enforcement authorities, EPA may at any time invoke its authority under the CAA, including, for example, sections 113, 167, 205, 211 or 213, to enforce the requirements or prohibitions of the state plan, independently of any state enforcement effort. In addition, citizen enforcement under section 304 of the CAA is likewise unaffected by this, or

any, state audit privilege or immunity law.

V. Incorporation by Reference

In this rulemaking action, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, EPA is finalizing the incorporation by reference of the definition of VOC. EPA has made, and will continue to make, these documents generally available electronically through www.regulations.gov and/or may be viewed at the EPA Region III office (see the **ADDRESSES** section of this preamble for more information).

VI. Statutory and Executive Order Reviews

A. General Requirements

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land as defined in 18 U.S.C. 1151 or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

B. Submission to Congress and the Comptroller General

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

C. Petitions for Judicial Review

Under section 307(b)(1) of the CAA, petitions for judicial review of this

action must be filed in the United States Court of Appeals for the appropriate circuit by January 26, 2016. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. Parties with objections to this direct final rule are encouraged to file a comment in response to the parallel notice of proposed rulemaking for this action published in the proposed rules section of today's **Federal Register**, rather than file an immediate petition for judicial review of this direct final rule, so that EPA can withdraw this direct final rule and address the comment in the proposed rulemaking action. This action, revising Virginia's definition of VOC, may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: November 12, 2015.

Shawn M. Garvin,
Regional Administrator, Region III.

40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart VV—Virginia

- 2. In § 52.2420, the table in paragraph (c) is amended by adding an entry for "Section 5-10-20" after the entry for "Section 5-10-20" (with the State effective date of 3/12/15) to read as follows:

§ 52.2420 Identification of plan.

Medicare Program; Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System Policy Changes and Fiscal Year 2016 Rates; Revisions of Quality Reporting Requirements for Specific Providers, Including Changes Related to the Electronic Health Record Incentive Program; Extensions of the Medicare-Dependent, Small Rural Hospital Program and the Low-Volume Payment Adjustment for Hospitals; Correction

AGENCY: Centers for Medicare & Medicaid Services (CMS), HHS.
ACTION: Final rule and interim final rule with comment period; correction.

SUMMARY: This document corrects technical and typographical errors in the correcting document that appeared in the October 5, 2015 **Federal Register**, entitled “Medicare Program; Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long Term Care Hospital Prospective Payment System Policy Changes and Fiscal Year 2016 Rates; Revisions of Quality Reporting Requirements for Specific Providers, including Changes Related to the Electronic Health Record Incentive Program; Extensions of the

Medicare-Dependent, Small Rural Hospital Program and the Low-Volume Payment Adjustment for Hospitals; Correction.”

DATES: *Effective date:* This correcting document is effective November 25, 2015. *Applicability date:* This correcting document is applicable to discharges beginning October 1, 2015.

FOR FURTHER INFORMATION CONTACT: Donald Thompson, (410) 786–4487.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. 2015–19049 which appeared in the August 17, 2015 **Federal Register** (80 FR 49326), entitled “Medicare Program; Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System Policy Changes and Fiscal Year 2016 Rates; Revisions of Quality Reporting Requirements for Specific Providers, including Changes Related to the Electronic Health Record Incentive Program; Extensions of the Medicare-Dependent, Small Rural Hospital Program and the Low-Volume Payment Adjustment for Hospitals” (hereinafter referred to as the FY 2016 IPPS/LTCH PPS final rule), there were a number of technical and typographical errors. Therefore, we published a correcting document that appeared in the October 5, 2015 **Federal Register** (80 FR 60055) to correct those errors (hereinafter referred to as the FY 2016 IPPS/LTCH PPS correcting document). The provisions of the FY 2016 IPPS/LTCH PPS correcting document were effective as if they had been included in the FY 2016 IPPS/LTCH PPS final rule that appeared in the August 17, 2015 **Federal Register**. Accordingly, those corrections were effective October 1, 2015.

II. Summary of Errors and Corrections to Tables Posted on the CMS Web Site

Since publication of the FY 2016 IPPS/LTCH PPS correcting document, we discovered technical and typographic errors to data that appeared in that document. Therefore, we are correcting the errors in the following IPPS tables that are listed on page 49808 of the FY 2016 IPPS/LTCH PPS final rule, that were discussed on pages 60056 and 60057 and corrected in the FY 2016 IPPS/LTCH PPS correcting document. These tables are available on the Internet on the CMS Web site at [https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/ AcuteInpatientPPS/FY2016-IPPS-Final-Rule-Home-Page.html](https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/FY2016-IPPS-Final-Rule-Home-Page.html):

Table 2—CASE MIX INDEX AND WAGE INDEX TABLE BY CCN—FY 2016 CORRECTION NOTICE. In the FY 2016 IPPS/LTCH PPS correcting document, we inadvertently changed the reclassification status for two hospitals (CCNs 050152 and 050228). In Table 2 of the FY 2016 IPPS/LTCH PPS final rule, prior to the revisions based on the FY 2016 IPPS/LTCH PPS correcting document, the reclassification status for CCNs 050152 and 050228 correctly reflected an MGCRB reclassification to Reclassified/ Redesignated CBSA 36084. For these two hospitals, the “MGCRB Reclass” column value will be corrected by adding a “Y” and the “Reclassified/ Redesignated CBSA” column value will be corrected by adding “36084.”

Also, in Table 2 that was posted on the Internet in conjunction with the FY 2016 IPPS/LTCH PPS correcting document, we inadvertently listed the “County Name” and “County Code” values for CCN 050B21 as “FAIRFIELD” and “07000”, and for CCN 070B22 as “FRESNO” and “05090”. The “County Name” and “County Code” values for CCN 050B21 should be “FRESNO” and

“05090”, and for CCN 070B22 should be “FAIRFIELD” and “07000.” Therefore, the “County Name” and “County Code” for CCN 050B21 will be corrected to read “FRESNO” and “05090”, respectively; and the “County Name” and “County Code” for CCN 070B22 will be corrected to read “FAIRFIELD” and “07000”, respectively.

Table 3—WAGE INDEX TABLE BY CBSA—FY 2016 CORRECTION NOTICE. As described previously, the reclassifications for two hospitals (CCNs 050152 and 050228) to CBSA 36084 were not properly listed and are being corrected in Table 2. Therefore, we are making corresponding changes to the “Reclassified Wage Index” and “Reclassified GAF” column values for CBSA 36084 in Table 3.

III. Waiver of Proposed Rulemaking and Delay in Effective Date

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** to provide a period for public comment before the provisions of a rule take effect in accordance with section 553(b) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). However, we can waive this notice and comment procedure if the Secretary finds, for good cause, that the notice and comment process is impracticable, unnecessary, or contrary to the public interest, and incorporates a statement of the finding and the reasons therefore in the notice.

Section 553(d) of the APA ordinarily requires a 30-day delay in effective date of final rules after the date of their publication in the **Federal Register**. This 30-day delay in effective date can be waived, however, if an agency finds for good cause that the delay is impracticable, unnecessary, or contrary to the public interest, and the agency incorporates a statement of the findings and its reasons in the rule issued.

We believe that this correcting document does not constitute a rule that would be subject to the APA notice and comment or delayed effective date requirements. This correcting document corrects technical and typographic errors in the tables referenced in the FY 2016 IPPS/LTCH PPS final rule as revised by the FY 2016 IPPS/LTCH PPS correcting document but does not make substantive changes to the policies or payment methodologies that were adopted in the final rule. As a result, this correcting document is intended to ensure that the tables referenced in the FY 2016 IPPS/LTCH PPS final rule accurately reflect the policies adopted in that final rule.

In addition, even if this were a rule to which the notice and comment

procedures and delayed effective date requirements applied, we find that there is good cause to waive such requirements. Undertaking further notice and comment procedures to incorporate the corrections in this document into the final rule or delaying the effective date would be contrary to the public interest because it is in the public’s interest for providers to receive appropriate payments in as timely a manner as possible, and to ensure that the FY 2016 IPPS/LTCH PPS final rule accurately reflects our policies. Furthermore, such procedures would be unnecessary, as we are not altering our payment methodologies or policies, but rather, we are simply implementing correctly the policies that we previously proposed, received comment on, and subsequently finalized. This correcting document is intended solely to ensure that the FY 2016 IPPS/LTCH PPS final rule accurately reflects these payment methodologies and policies. Therefore, we believe we have good cause to waive the notice and comment and effective date requirements.

Dated: November 18, 2015.

Madhura Valverde,

*Executive Secretary to the Department,
Department of Health and Human Services.*

BILLING CODE 4120–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 150826781–5999–02]

RIN 0648–BF33, 0648–BE91

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Reef Fish Fishery of the Gulf of Mexico; 2016 Red Snapper Commercial Quota Retention

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule.

SUMMARY: NMFS issues regulations to implement management measures described in a framework action to the Fishery Management Plan for the Reef Fish Resources of the Gulf of Mexico (FMP), as prepared by the Gulf of Mexico Fishery Management Council (Council). This final rule withholds 4.9 percent of the 2016 red snapper commercial quota prior to the annual distribution of red snapper allocation to

the Individual Fishing Quota (IFQ) program shareholders on January 1, 2016. This final rule allows the allocations being established through Amendment 28 to the FMP (Amendment 28) to be effective for the 2016 fishing year should Amendment 28 be approved by the Secretary of Commerce (Secretary) in 2016. This final rule also makes a technical correction to re-insert regulatory text that a previous rulemaking inadvertently omitted, which specifies that the recreational annual catch limit (ACL) for red snapper is equal to the total recreational quota.

DATES: This rule is effective December 28, 2015.

ADDRESSES: Electronic copies of the framework action, which includes an environmental assessment, a regulatory impact review, and a Regulatory Flexibility Act (RFA) analysis may be obtained from the Southeast Regional Office (SERO) Web site at http://sero.nmfs.noaa.gov/sustainable_fisheries/gulf_fisheries/reef_fish/2015/rs_framework_2016_quota/documents/pdfs/retain_2016_red_snapper_commercial_quota_ea.pdf.

FOR FURTHER INFORMATION CONTACT: Richard Malinowski, NMFS SERO, telephone: 727–824–5305, or email: rich.malinowski@noaa.gov.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico (Gulf) reef fish fishery is managed under the FMP. The FMP was prepared by the Council and is implemented by NMFS through regulations at 50 CFR part 622 under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

On October 19, 2015, NMFS published a proposed rule for the framework action and requested public comment (80 FR 63190). The proposed rule and the framework action outline the rationale for the actions contained in this final rule. A summary of the actions implemented by the framework action and this final rule is provided below.

Management Measures Contained in This Final Rule

This final rule withholds 4.9 percent of the 2016 red snapper commercial quota, equal to 352,000 lb (159,665 kg), round weight, and 317,117 lb (143,842 kg), gutted weight, prior to the annual distribution of allocation to the IFQ program shareholders on January 1, 2016. The framework procedures of the FMP include the authority to retain a portion of an annual quota in anticipation of future regulatory changes during the same fishing year. This final rule allows the allocations being

established through Amendment 28 to be effective for the 2016 fishing year should the Secretary approve Amendment 28 in 2016. If NMFS does not implement Amendment 28, NMFS will distribute the withheld 4.9 percent of the 2016 red snapper commercial quota to shareholders based on the shares held as of the date of distribution.

Other Changes to the Codified Text

This final rule fixes an error in § 622.41(q)(2)(i) for the recreational sector of Gulf red snapper. This final rule re-inserts a sentence of regulatory text originally published in the final rule implementing Amendment 40 to the FMP (80 FR 22422, April 22, 2015), which specifies that the recreational ACL for red snapper is equal to the total recreational quota. The regulatory text was inadvertently omitted in a subsequent correcting amendment (80 FR 58219, September 28, 2015) to a final rule for a framework action that increased the commercial and recreational quotas for Gulf red snapper in the 2015, 2016, and 2017 fishing years (80 FR 24832, May 1, 2015). This final rule corrects the error by re-inserting the regulatory text into § 622.41(q)(2)(i). This action is unrelated to the actions described in this framework action.

Comments and Responses

NMFS received 46 comment submissions from individuals, commercial fishermen, and a commercial fishermen's association on the framework action and the proposed rule, along with other issues. Many of the comments NMFS received were about Amendment 28 and alternative management strategies for red snapper, for example, expanding state waters and advocating for state rather than Federal management. Such comments were beyond the scope of the proposed rule and, therefore, have not been addressed in this final rule. The comments that relate to the framework action and the proposed rule are summarized and responded to below.

Comment 1: The red snapper commercial quota should not be withheld until Amendment 28 is approved and implemented by NMFS. The resulting reallocation of the red snapper commercial quota would then apply to the 2017 fishing year.

Response: NMFS disagrees that the commercial quota necessary to implement Amendment 28 in the 2016 fishing year should not be withheld. The Council approved Amendment 28 for review and implementation in August 2015 with the expectation that

the revised allocations and quotas would be implemented in 2016, if approved by the Secretary. This will not be possible unless that portion of the commercial quota is not distributed to shareholders on January 1, 2016, the date on which NMFS distributes annual red snapper allocation to shareholders. If Amendment 28 is not approved by the Secretary, the withheld red snapper commercial quota will be distributed as soon as possible to the current red snapper IFQ shareholders based on their current shares held as of the date of distribution.

Comment 2: Withholding IFQ allocation cannot be accomplished through framework procedures. NMFS regulations at 50 CFR 622.42(a) list actions that can be established or modified in accordance with the framework procedures of the FMP. Withholding IFQ allocation in anticipation of reallocation is not one of the described actions that can be accomplished by framework procedures. NMFS and the Council are not modifying approved framework items such as the red snapper quotas or the ACLs through this framework action; that is what Amendment 28 would do if and when it is approved. NMFS, therefore, lacks authority to implement this action using framework procedures.

Response: NMFS disagrees. The regulations at 50 CFR 622.42(a) refer to the framework procedures of the FMP and list quotas as one of the management measures that may be modified. The framework procedures for the FMP that were established with the Generic ACL and Accountability Measures Amendment (76 FR 82044, December 29, 2011; http://sero.nmfs.noaa.gov/sustainable_fisheries/gulf_fisheries/generic_archives/generic_acl_am_amend_sept_2011.pdf) list the regulatory changes that may be implemented and expressly include "retention of portion of an annual quota in anticipation of future regulatory changes during the same fishing year." Thus, this framework action and regulations are in accordance with the FMP (as revised through the Generic ACL and Accountability Measures Amendment), and regulations at 50 CFR 622.42(a).

Comment 3: Reducing each shareholder's allocation of red snapper by approximately five percent could reduce access to quota that was leased out to the grouper fishery for bycatch coverage. This would result in negative biological consequences that are not analyzed in the framework action.

Response: NMFS disagrees. Withholding the red snapper commercial quota until a decision to

approve or disapprove Amendment 28 is made does not restrict the ability of the shareholders to continue to contribute to the private quota bank they developed. Any long-term impacts on bycatch mortality anticipated from a permanent shift in allocation to the recreational sector would be a consequence of Amendment 28 and its implementing regulations, not this rule.

Comment 4: Withholding a portion of an individual's quota indefinitely disrupts fishermen's business plans, particularly for fishermen who harvest large portions or all of their allocation early in the year, leading to inefficiencies in the allocation leasing marketplace which would reduce profitability and introduce economic and social costs to the IFQ program.

Response: NMFS disagrees. As stated in the proposed rule for this framework action, withholding a portion of the commercial quota may result in a reduction in normal total revenue, alteration of the flow of receipts, and disruption of normal business operation, consistent with the comment. These effects, however, are expected to be minor because of the small amount of quota withheld (4.9 percent) and the likely short timeframe during which withholding occurs. Thus, the full value of the quota being withheld would not be lost. Because red snapper commercial harvest occurs throughout the year, and is not subject to "race to fish" (derby) conditions, withholding this small portion is not expected to severely limit the availability of allocation for purchase or trade early in the year, nor result in a market glut if allocation is subsequently returned to shareholders. This action only applies to the 2016 fishing year. As a result, the economic and social consequences are of limited scope and duration and are not expected to harm individual businesses or the industry beyond as already described. If Amendment 28 is approved by the Secretary of Commerce and the quota is not returned to shareholders, this would be a consequence of the rule for Amendment 28 and not this current framework action and final rule.

Classification

The Regional Administrator, Southeast Region, NMFS has determined that this final rule is consistent with the framework action, the FMP, the Magnuson-Stevens Act, and other applicable law.

This final rule has been determined to be not significant for purposes of Executive Order 12866.

The Magnuson-Stevens Act provides the statutory basis for this rule. No duplicative, overlapping, or conflicting

Federal rules have been identified. In addition, no new reporting, record-keeping, or other compliance requirements are introduced by this final rule.

The Chief Counsel for Regulation of the Department of Commerce (DOC) certified to the Chief Counsel for advocacy of the Small Business Administration (SBA) during the proposed rule stage that this action would not have a significant economic impact on a substantial number of small entities. The factual basis for this determination was published in the proposed rule and is not repeated here. NMFS received no significant comments regarding the certification. However, one general comment on the expected economic effects of this rule is addressed in the Comments and Response section of this rule. As a result, a final regulatory flexibility analysis was not required and was not prepared.

As discussed in the background section of this final rule, this rule also re-inserts a sentence of regulatory text originally published in the final rule implementing Amendment 40 (80 FR 22422, April 22, 2015). The regulatory text was inadvertently omitted in a subsequent correcting amendment (80 FR 58219, September 28, 2015) to a final rule that implemented a framework amendment for red snapper in the Gulf reef fish fishery (80 FR 24832, May 1, 2015). The DOC Chief Counsel for Regulation certified to the Chief Counsel for advocacy of the SBA that the final rules implementing both Amendment 40 and the framework amendment would not have a significant economic impact on a substantial number of small entities. The re-insertion of this regulatory text is not expected to have direct adverse economic effects on a substantial number of small entities because it is an administrative correcting action. The final rule that originally published the regulation was certified to not have a significant economic impact on a substantial number of small entities, and the public may believe the omitted text is already included in the regulations. This change is needed to ensure that the public is aware of the correct recreational harvest limit (quota) and accountability measures for recreationally-caught Gulf red snapper.

Pursuant to 5 U.S.C. 553(b)(B), the Assistant Administrator for Fisheries, NOAA, finds good cause to waive prior notice and opportunity for additional public comment for this correcting action because it would be unnecessary and contrary to the public interest. Such procedures are unnecessary because the

public received notice and an opportunity to comment on the proposed rules for the framework amendment and Amendment 40 and the final rule for Amendment 40 included this regulatory text. This final rule reinstates the regulatory text that was inadvertently omitted from the correcting amendment that published on September 28, 2015 (80 FR 58219). If this final rule was delayed to allow for notice and opportunity for public comment, it could cause confusion because the public believes that the omitted text is already included in the regulations.

List of Subjects in 50 CFR Part 622

Commercial, Fisheries, Fishing, Gulf of Mexico, Recreational, Red snapper, Reef fish.

Dated: November 23, 2015.

Eileen Sobeck,
Assistant Administrator for Fisheries,
National Marine Fisheries Service.

For the reasons set out in the preamble, 50 CFR part 622 is amended as follows:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

- 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

- 2. In § 622.39, add paragraphs (a)(1)(i)(B)(1) and (2) to read as follows:

§ 622.39 Quotas.

* * * * *

- (a) * * *
- (1) * * *
- (i) * * *
- (B) * * *

(1) NMFS will withhold distribution of 4.9 percent of the 2016 IFQ allocation of red snapper commercial quota on January 1, 2016, totaling 352,000 lb (159,665 kg), round weight, of the 2016 red snapper commercial quota specified in this paragraph (a)(1)(i)(B).

(2) As determined by NMFS, remaining 2016 IFQ allocation of red snapper will be distributed to the current shareholders based on their current shares held as of the date of distribution.

* * * * *

- 3. In § 622.41, revise paragraph (q)(2)(i) to read as follows:

§ 622.41 Annual catch limits (ACLs), annual catch targets (ACTs), and accountability measures (AMs).

* * * * *

- (q) * * *
- (2) * * *

(i) The recreational ACL is equal to the total recreational quota specified in § 622.39(a)(2)(i)(A). The AA will determine the length of the red snapper recreational fishing season, or recreational fishing seasons for the Federal charter vessel/headboat and private angling components, based on when recreational landings are projected to reach the recreational ACT, or respective recreational component ACT specified in paragraph (q)(2)(iii) of this section, and announce the closure date(s) in the **Federal Register**. These seasons will serve as in-season accountability measures. On and after the effective date of the recreational closure or recreational component closure notifications, the bag and possession limit for red snapper or for the respective component is zero. When the recreational sector or Federal charter vessel/headboat component is closed, this bag and possession limit applies in the Gulf on board a vessel for which a valid Federal charter vessel/headboat permit for Gulf reef fish has been issued, without regard to where such species were harvested, *i.e.*, in state or Federal waters.

* * * * *

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 101206604-1758-02]

RIN 0648-XE326

Coastal Migratory Pelagic Resources of the Gulf of Mexico and South Atlantic; 2015-2016 Accountability Measure and Closure for King Mackerel in the Florida West Coast Northern Subzone

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS implements an accountability measure (AM) for commercial king mackerel in the Florida west coast northern subzone of the eastern zone of the Gulf of Mexico (Gulf exclusive economic zone (EEZ) through this temporary final rule. NMFS has determined that the commercial quota for king mackerel in the eastern zone, Florida west coast northern subzone of the Gulf EEZ will be reached by

November 28, 2015. Therefore, NMFS closes the Florida west coast northern subzone to commercial king mackerel fishing on November 28, 2015, to protect the Gulf king mackerel resource.

DATES: The closure is effective noon, local time, November 28, 2015, until 12:01 a.m., local time, on July 1, 2016.

FOR FURTHER INFORMATION CONTACT:

Susan Gerhart, NMFS Southeast Regional Office, telephone: 727-824-5305, email: susan.gerhart@noaa.gov.

SUPPLEMENTARY INFORMATION: The fishery for coastal migratory pelagic fish (king mackerel, Spanish mackerel, and cobia) is managed under the Fishery Management Plan for Coastal Migratory Pelagic Resources in the Gulf of Mexico and Atlantic Region (FMP). The FMP was prepared by the Gulf of Mexico and South Atlantic Fishery Management Councils (Councils) and is implemented by NMFS under the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act) by regulations at 50 CFR part 622.

The Gulf migratory group king mackerel is divided into western and eastern zones. The Gulf's eastern zone for king mackerel is further divided into the Florida west coast northern and southern subzones that have separate quotas. The quota for the Florida west coast northern subzone is 178,848 lb (81,124 kg) (50 CFR 622.384(b)(1)(i)(B)(2)).

Regulations at 50 CFR 622.388(a)(1) require NMFS to close the commercial sector for Gulf migratory group king mackerel in the Florida west coast northern subzone when the commercial quota is reached, or is projected to be reached, by filing a notification to that effect with the Office of the Federal Register. Based on the best scientific information available, NMFS has determined the commercial quota of 178,848 lb (81,124 kg) for Gulf migratory group king mackerel in the Florida west coast northern subzone will be reached by November 28, 2015. Accordingly, the Florida west coast northern subzone is closed effective noon, local time, November 28, 2015, through June 30, 2016, the end of the current fishing year, to commercial fishing for Gulf migratory group king mackerel.

Except for a person aboard a charter vessel or headboat, during the closure, no person aboard a vessel for which a commercial permit for king mackerel has been issued may fish for or retain Gulf group king mackerel in the EEZ in the closed subzone (50 CFR 622.384(e)(1) and (e)(2)). A person aboard a vessel that has a valid charter vessel/headboat permit for coastal

migratory pelagic fish may continue to retain king mackerel in or from the closed subzone under the bag and possession limits set forth in 50 CFR 622.382(a)(1)(ii) and (a)(2), provided the vessel is operating as a charter vessel or headboat. A charter vessel or headboat that also has a commercial king mackerel permit is considered to be operating as a charter vessel or headboat when it carries a passenger who pays a fee or when there are more than three persons aboard, including operator and crew.

During the closure, king mackerel from the closed subzone, including those harvested under the bag and possession limits, may not be purchased or sold. This prohibition does not apply to king mackerel from the closed zones or subzones that were harvested, landed ashore, and sold prior to the closure and were held in cold storage by a dealer or processor (50 CFR 622.384(e)(3)).

The Florida west coast northern subzone is that part of the EEZ between 26°19.8' N. latitude (a line directly west from the boundary between Lee and Collier Counties, FL) and 87°31.1' W. longitude (a line directly south from the state boundary of Alabama and Florida).

Classification

The Regional Administrator, Southeast Region, NMFS, has determined this temporary rule is necessary for the conservation and management of Gulf migratory group king mackerel and is consistent with the Magnuson-Stevens Act and other applicable laws.

This action is taken under 50 CFR 622.388(a)(1) and 50 CFR 622.384(e) and is exempt from review under Executive Order 12866.

These measures are exempt from the procedures of the Regulatory Flexibility Act because the temporary rule is issued without opportunity for prior notice and comment.

This action responds to the best scientific information available. The Assistant Administrator for Fisheries, NOAA (AA), finds that the need to immediately implement this action to close the Florida west coast northern subzone of the Gulf eastern zone to commercial king mackerel fishing constitutes good cause to waive the requirements to provide prior notice and opportunity for public comment pursuant to the authority set forth at 5 U.S.C. 553(b)(B), as such procedures are unnecessary and contrary to the public interest. Such procedures are unnecessary, because the rule implementing the commercial quota and the associated requirement for closure of the commercial harvest when the quota

is reached or is projected to be reached has already been subject to notice and public comment, and all that remains is to notify the public of the closure. Such procedures are contrary to the public interest because the capacity of the fishing fleet allows for rapid harvest of the quota, and there is a need to immediately implement this action to protect the king mackerel resource. Prior notice and opportunity for public comment would require time and could potentially result in a harvest well in excess of the established quota.

For the aforementioned reasons, the AA also finds good cause to waive the 30-day delay in the effectiveness of this action under 5 U.S.C. 553(d)(3).

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 23, 2015.

Emily H. Menashes,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[Docket No. 130708597-4380-01]

RIN 0648-XE329

Pacific Island Pelagic Fisheries; 2015 CNMI Longline Bigeye Tuna Fishery; Closure

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS is closing the U.S. pelagic longline fishery for bigeye tuna in the western and central Pacific Ocean as a result of the fishery reaching the 2015 allocation limit for the Commonwealth of the Northern Mariana Islands (CNMI). This action is necessary to comply with regulations managing this fish stock.

DATES: Effective November 30, 2015, through December 31, 2015.

FOR FURTHER INFORMATION CONTACT: Jarad Makaiau, NMFS PIRO Sustainable Fisheries, 808-725-5176.

SUPPLEMENTARY INFORMATION: On August 5, 2015, NMFS restricted the retention, transshipment and landing of bigeye tuna captured by longline gear in the western and central Pacific Ocean (WCPO) as a result of the U.S. longline fishery reaching the 2015 U.S. bigeye

tuna limit of 3,502 mt (80 FR 44883, July 28, 2015). Regulations at 50 CFR 300.224(d) provide an exception to this closure for bigeye tuna caught by U.S. longline vessels identified in a valid specified fishing agreement under 50 CFR 665.819(c). Further, 50 CFR 665.819(c)(9) authorized NMFS to attribute catches of bigeye tuna made by U.S. longline vessels identified in a valid specified fishing agreement to the U.S. territory to which the agreement applies.

Effective on October 9, 2015, NMFS specified a 2015 catch limit of 2,000 mt of longline-caught bigeye tuna for the CNMI (80 FR 61767, October 14, 2015). NMFS also authorized the CNMI to allocate up to 1,000 mt of its 2,000 mt bigeye tuna limit to U.S. longline fishing vessels permitted to fish under the Fishery Ecosystem Plan for Pelagic Fisheries of the Western Pacific (FEP).

On October 9, 2015, the Western Pacific Fishery Management Council, through its Executive Director, transmitted to NMFS a specified fishing agreement between the CNMI and Quota Management, Inc. (QMI), dated September 16, 2015, and amended on October 15, 2015, by adding one vessel. NMFS reviewed the agreement, as amended, and determined that it was consistent with the requirements at 50 CFR 665.819, the FEP, the Magnuson-Stevens Fishery Conservation and Management Act, and other applicable laws. The criteria that a specified fishing agreement must meet, and the process for attributing longline-caught bigeye tuna, followed the procedures in 50 CFR 665.819—Territorial catch and fishing effort limits.

In accordance with 50 CFR 300.224(d) and 50 CFR 665.819(c)(9), NMFS began attributing bigeye tuna caught in the WCPO by vessels identified in the CNMI/QMI agreement to the CNMI, beginning on October 9, 2015. NMFS monitored catches of longline-caught bigeye tuna by the CNMI longline fisheries, including catches made by U.S. longline vessels operating under the CNMI/QMI agreement. Based on this monitoring, NMFS forecasted that the CNMI territorial allocation limit of 1,000 mt will be reached by the end of

November 2015, and is, as an accountability measure, prohibiting the catch and retention of longline-caught bigeye tuna by vessels in the CNMI/QMI agreement.

Notice of Closure and Temporary Rule

On November 30, 2015, through December 31, 2015, NMFS closes the U.S. pelagic longline fishery for bigeye tuna in the western and central Pacific Ocean as a result of the fishery reaching the 2015 allocation limit of 1,000 mt for the CNMI.

During the closure, a U.S. fishing vessel operating under the CNMI/QMI agreement may not retain on board, transship, or land bigeye tuna captured by longline gear in the WCPO, except that any bigeye tuna already on board a fishing vessel upon the effective date of the restrictions may be retained on board, transshipped, and landed, provided that they are landed within 14 days of the start of the closure, that is, by December 14, 2015. Additionally, U.S. fishing vessels operating under the CNMI/QMI agreement are also prohibited from transshipping bigeye tuna caught in the WCPO by longline gear to any vessel other than a U.S. fishing vessel with a valid permit issued under 50 CFR 660.707 or 665.801.

During the closure, all other restrictions and requirements NMFS established on August 5, 2015, as a result of the U.S. longline fishery reaching the 2015 U.S. bigeye tuna limit of 3,502 mt (80 FR 44883, July 28, 2015) shall remain valid and effective.

NMFS notes that there is a pending case in litigation—*Conservation Council for Hawai'i, et al., v. NMFS* (D. Hawaii); *case no. 14-cv-528*—that challenges the framework process for allocations from the territories to U.S. longline fishing vessels.

Classification

There is good cause to waive the prior notice and public comment requirement of the Administrative Procedure Act, and make this rule effective immediately upon publication in the **Federal Register**. This rule closes the U.S. longline fishery for bigeye tuna in the WCPO as a result of reaching the bigeye tuna allocation limit established

by the 2015 specification for catch and allocation limits of bigeye tuna for the CNMI, and the specified fishing agreement between the Government of the CNMI and QMI dated September 16, 2015, amended on October 15, 2015.

NMFS forecasts that the fishery will reach the 2015 limit by the end of November 2015. Fishermen have been subject to longline bigeye tuna limits in the western and central Pacific since 2009. They have received ongoing, updated information about the 2015 catch and progress of the fishery in reaching the Convention Area limit via the NMFS Web site, social media, and other means. The publication timing of this rule, moreover, provides longline fishermen with seven days' advance notice of the closure date, and allows two weeks to return to port and land their catch of bigeye tuna. This action is intended to comply with regulations managing this stock, and, accordingly NMFS finds it impracticable and contrary to the public interest to have prior notice and public comment.

For the reasons stated above, there is also good cause to waive the 30-day delay requirement of the Administrative Procedure Act for this notice and temporary rule. NMFS must close the fishery as soon as possible to ensure that fishery does not exceed the allocation limit. NMFS implemented the catch and allocation limits for the CNMI consistent with management objectives to sustainably manage the bigeye tuna stock and restore the stock to levels capable of producing maximum sustainable yield on a continuing basis. Failure to close the fishery immediately would be inconsistent with bigeye tuna management objections and in violation of Federal law.

This action is required by 50 CFR 665.819(d), and is exempt from review under Executive Order 12866.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 23, 2015.

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF GOVERNMENT ETHICS

5 CFR Part 2635

RIN 3209-AA04

Standards of Ethical Conduct for Employees of the Executive Branch; Amendment to the Standards Governing Solicitation and Acceptance of Gifts From Outside Sources

AGENCY: Office of Government Ethics (OGE).

ACTION: Proposed rule.

SUMMARY: The Office of Government Ethics is proposing to revise the portions of the Standards of Ethical Conduct for Executive Branch Employees that govern the solicitation and acceptance of gifts from outside sources. The proposed amendments modify the existing regulations to more effectively advance public confidence in the integrity of Federal officials. The proposed amendments would also incorporate past interpretive guidance, add and update regulatory examples, improve clarity, update citations and make technical corrections.

DATES: Written comments are invited and must be received on or before January 26, 2016.

ADDRESSES: You may submit comments, in writing, to OGE on this proposed rule, identified by RIN 3209-AA04, by any of the following methods:

Email: usoge@oge.gov. Include the reference "Proposed Amendments to Subpart B" in the subject line of the message.

Fax: (202) 482-9237.

Mail/Hand Delivery/Courier: Office of Government Ethics, Suite 500, 1201 New York Avenue NW., Washington, DC 20005-3917, Attention: "Proposed Amendments to Subpart B."

Instructions: All submissions must include OGE's agency name and the Regulation Identifier Number (RIN), 3209-AA04, for this proposed rulemaking. All comments, including attachments and other supporting materials, will become part of the public

record and subject to public disclosure. Comments may be posted on OGE's Web site, www.oge.gov. Sensitive personal information, such as account numbers or Social Security numbers, should not be included. Comments generally will not be edited to remove any identifying or contact information.

SUPPLEMENTARY INFORMATION:

I. Background

On August 7, 1992, the U.S. Office of Government Ethics (OGE) published the Standards of Ethical Conduct for Employees of the Executive Branch (Standards), which are codified at 5 CFR part 2635. *See* 57 FR 35005-35067, as amended. Subpart B of part 2635 sets forth the regulations governing the solicitation and acceptance of gifts from outside sources by officers and employees of the Executive Branch. These regulations implement the gift restrictions set forth in 5 U.S.C. 7353 and section 101(d) of Executive Order 12674, as modified by Executive Order 12731.

Pursuant to section 402 of the Ethics in Government Act of 1978, Public Law 95-521, codified at 5 U.S.C. Appendix IV, sec. 402, the Director of OGE is responsible for periodically reviewing, evaluating and updating the rules and regulations that pertain to ethics in the Executive Branch. In accordance with section 402, OGE has reviewed the regulations found in subpart B and is proposing changes in light of OGE's experience gained from application of the Standards since they became effective in February 1993.

In formulating this proposed rule, OGE has consulted with the Department of Justice and the Office of Personnel Management pursuant to section 201(a) of Executive Order 12674, as modified by Executive Order 12731, and the authorities contained in title IV of the Ethics in Government Act of 1978, as amended. Prior to promulgating this proposed rule, OGE solicited the views of Executive Branch agency ethics officials through an electronic survey

and multiple in-person meetings. OGE has considered the input received from these agency ethics officials and has incorporated many of their comments and suggestions into the proposed rule.

II. Regulatory Amendments to Subpart B

Technical Changes

OGE proposes amending the Table of Contents to subpart B of the Standards to conform to the proposed substantive amendments to subpart B, which are explained elsewhere in this document. OGE also proposes a number of general technical and non-substantive changes that would apply throughout subpart B to enhance clarity and readability and to remove gender-specific terms from the substantive regulatory text. OGE also proposes to replace the term "shall" as used throughout the regulation with the terms "will," "must," or "does" where the term is used to indicate an affirmative obligation or requirement, and to replace the term "shall not" with the terms "may not" or "does not" as appropriate. These changes are intended to enhance clarity and do not constitute a substantive change to the regulation.

Proposed § 2635.201 Overview and Considerations For Declining Otherwise Permissible Gifts

Proposed § 2635.201(a) reiterates the language that is contained in current § 2635.201, and includes a new subheading "Overview." Proposed § 2635.201(b) is new to the Standards. This section is entitled "Considerations for declining otherwise permissible gifts." OGE is proposing the addition of this section because it is OGE's experience that employees and ethics officials sometimes focus on whether a regulatory exception permits the acceptance of an otherwise impermissible gift, and not on whether acceptance of the gift could affect the perceived integrity of the employee or the credibility and legitimacy of the agency's programs. To counter this tendency, OGE is proposing to add § 2635.201(b)(1), which sets out a flexible, non-binding standard that employees are encouraged to use when deciding whether to accept a gift that would otherwise be permitted by this subpart. Specifically, this section encourages employees to consider the potential that a "reasonable person" would question their integrity if they

were to accept the gift. In a circumstance where an employee concludes that a reasonable person would question his or her integrity, the employee is encouraged to consider declining the gift.

To assist employees in making this determination, OGE has added proposed § 2635.201(b)(2), which sets out some factors that employees can consider when evaluating whether they should decline an otherwise permissible gift because acceptance might cause a reasonable person with knowledge of the relevant facts to question their integrity. Employees are not, however, required to consider these factors in every case; these factors are merely intended to be illustrative of the types of considerations that are relevant to this determination. In addition, because the regulatory exceptions represent OGE's determination that, in most cases, acceptance of a gift under the relevant exception will not adversely affect public confidence, and because the factors are inherently subjective, the proposed rule clarifies that an employee has not violated the subpart by accepting a gift under an exception found in § 2635.204. The section concludes by encouraging employees to seek advice from an appropriate agency ethics official when making this determination or where there are questions related to other provisions of this subpart.

Proposed § 2635.202 General Prohibition on Solicitation or Acceptance of Gifts

OGE proposes revising the heading of § 2635.202 to "General prohibition on solicitation or acceptance of gifts." OGE proposes to move the provisions setting forth the limitations on use of the exceptions set out in current § 2635.202(c) to redesignated § 2635.205. OGE believes that reordering the regulations to place the rules establishing limitations on the exceptions after the regulatory exceptions will produce a more logical and understandable ordering of the regulation.

OGE proposes to revise current § 2635.202(a) by moving the prohibitions on accepting gifts and soliciting gifts into separate paragraphs. OGE is proposing this revision to emphasize that the prohibition on soliciting gifts from prohibited sources, or that are to be given because of the employee's official position, is an independent restriction from the prohibition on accepting gifts that are restricted under subpart B.

OGE proposes to reword current § 2635.202(b) to increase clarity and

readability. OGE also proposes to move this paragraph to § 2635.202(c). This section describes the relationship between the Standards found in subpart B and the illegal gratuities statute, 18 U.S.C. 201(c)(1)(B). This revision is technical in nature and does not affect the substance of the regulation, which has been consistent since the issuance of the Standards in 1992. OGE also proposes to include a statement reminding employees that, notwithstanding any exception provided in the subpart, no gift may be solicited or accepted if to do so would violate the federal bribery statute, 18 U.S.C. 201(b). OGE proposes to add a new *Example 1 to paragraph (c)* to illustrate a circumstance in which an employee's acceptance of a gift would violate the new § 2635.202(c).

Proposed § 2635.203 Definitions

OGE proposes a number of changes to § 2635.203(b), which defines the term "gift" as well as provides exclusions from that definition.

OGE proposes to amend current § 2635.203(b)(2), which excludes from the definition of the term "gift" certain presentation items with little intrinsic value, to permit employees to accept items that are "primarily" for presentation as opposed to only those that are "solely" for presentation. OGE believes distinguishing between items intended for presentation based on whether the item hypothetically could have some independent use is not intuitive or necessary, so long as the presentation item is truly of "little intrinsic value." Items such as watches, artwork, items containing precious metals or gemstones, fine crystal, or that otherwise have significant independent value would not qualify for this exclusion, even if they were inscribed or otherwise adorned with personalized information (such as the name of the donor, the date of an event, or the name of the recipient).

Proposed § 2635.203(b)(6) would clarify that continued participation in an employee welfare or benefit plan with a current or former employer would not constitute a gift for purposes of subpart B.

OGE proposes to delete the Note following current paragraph (b)(7) stating that employees are prohibited from accepting certain frequent flyer program benefits that are earned from Government-financed travel, as it no longer reflects current law.

Proposed § 2635.203(b)(8) is new as an exclusion, and excludes from the definition of "gift" certain offers of free attendance to an event provided to a speaker on the day of his or her

presentation. Such offers of free attendance are currently treated as gifts that employees are permitted to accept pursuant to an exception set out in current § 2635.204(g)(1). As described in current § 2635.204(g)(1), OGE views the employee's attendance in these circumstances as customary and necessary to allow the employee to carry out his or her assignment, and therefore views such offers of free attendance as not constituting a gift to either the agency or the employee. Moving the exception at § 2635.204(g)(1) to the exclusion section at § 2635.203(b)(8) reflects that long-time understanding. Advice OGE has previously provided on the application of current § 2635.204(g)(1) would continue to be applicable to proposed § 2635.203(b)(8).

OGE has also provided that an offer of free attendance provided to an employee's spouse or another accompanying guest on the day the employee is presenting is also excluded from the gift rules in certain circumstances, which accords with the current exception for such attendees under § 2635.204(g)(6). Likewise, OGE has excluded from the definition of "gift" an offer of free attendance to certain personnel, such as security details or press officers, who are assigned by the agency to perform official duties in support of the presenting employee. This regulatory exclusion accords with OGE's longstanding interpretation of current § 2635.204(g)(1). See OGE DAEOgram DO-10-003 (Feb. 18, 2010). OGE also proposes simplifying the language of the exclusion to cover "Free attendance to an event provided by the sponsor of an event to . . . an employee who is assigned to *present information* on behalf of the agency . . ." (emphasis added). Current § 2635.204(g)(1) provides that an employee may accept an offer of free attendance to an event when he or she is assigned to participate as a speaker or panel participant or *otherwise to present information* on behalf of the agency. See also OGE Legal Advisory LA-12-05 (Sept. 7, 2012). The proposed regulation is consistent with this advice.

OGE proposes to include ten examples to § 2635.203(b) to provide clarification to the regulatory exclusions to the definition of "gift." These examples are not intended to be comprehensive. Proposed *Example 1 to paragraph (b)(1)* clarifies that the exclusion for "modest items of food and refreshment" would not cover alcoholic beverages served at a Government contractor's holiday party. Proposed *Example 1, Example 2, and Example 3 to paragraph (b)(2)* clarify the meaning

of “items with little intrinsic value . . . which are intended primarily for presentation.” Proposed *Example 1* and *Example 2 to paragraph (b)(5)* both clarify the exclusion for rewards and prizes given to participants in contests or events open to the public. *Example 1 to paragraph (b)(7)* emphasizes that employees may accept certain travel-related benefits, such as frequent flyer miles, pursuant to an applicable statute or regulation. OGE proposes to move *Example 4* following current § 2635.204(g) to *Example 1 to paragraph (b)(8)* following proposed § 2635.203(b)(8). OGE proposes to add *Example 2* and *Example 3 to paragraph (b)(8)* to provide additional guidance on what constitutes “present[ing] information” on behalf of an employee’s agency.

OGE is proposing to revise the first sentence of § 2635.203(c), which sets out the definition of “market value” as used throughout the subpart. The current definition states that “Market value means the retail cost the employee would incur to purchase the gift.” OGE has found that this definition can lead to confusion and in certain circumstances may not be applicable at all if the gift does not have a “retail” price, e.g., if the gift takes the form of services or intangibles. As OGE stated in 1992, the purpose of including a definition of “market value” was to “ensure that the employee pays the fair value” of the gift and to allow the employee to “determine the value or the amount to be reimbursed without having to consult the donor as to the donor’s cost.” 57 FR 35006, 35014 (Aug. 7, 1992); see also OGE Informal Advisory Opinion 96 x 20. To better accord with OGE’s intent that the term “market value” reflect the price the employee would pay for the gift if he or she were to purchase it at fair value and on the open market, OGE has amended the first sentence of the definition to read: “Market value means the cost that a member of the general public would reasonably expect to incur to purchase the gift.” The proposed change also reflects OGE’s interpretation that the “market value” of a gift is the cost the recipient would incur to purchase the item on the open market, not the cost that the donor paid to acquire the gift. This principle is illustrated in proposed *Example 1* and new *Example 2 to paragraph (c)*. Proposed *Example 1 to paragraph (c)* also illustrates OGE’s longstanding guidance that the market value of a gift is not eliminated or significantly diminished because the item has been inscribed or otherwise adorned with the donor or recipient’s

name or information related to an event at which the gift was presented. Proposed *Example 3 to paragraph (c)* is current *Example 2* following § 2635.203(c) without substantive change. *Example 4* and *Example 5 to paragraph (c)* are provided to clarify how to calculate the market value of certain gifts that are not available for retail purchase, such as free admission to a private skybox or an invitation-only event where an entry fee is not charged to attendees.

OGE proposes to modify the formatting of § 2635.203(e) and § 2635.203(f) to enhance clarity. OGE also proposes to amend § 2635.203(f)(1) to expand the definition of “indirectly solicited or accepted” gifts to include gifts that are given to “a member of the employee’s household” on the basis of the person’s relationship with the employee and with the employee’s knowledge and acquiescence. OGE proposes to amend § 2635.203(f)(2) to clarify that employees who solicit or accept funds or other support for a charitable organization in accordance with subpart H of the Standards have not indirectly solicited or accepted a gift under subpart B. Proposed *Example 1 to paragraph (e)* is current *Example 1* following § 2635.203(e). Proposed *Example 2 to paragraph (e)* is current *Example 2* following § 2635.203(e). Proposed *Example 1 to paragraph (f)(2)* is current *Example 1* following § 2635.203(f).

OGE proposes removing current § 2635.203(g), defining the term “vendor promotional training.” The term is no longer used in the substantive provisions of the subpart, and the definition is therefore unnecessary.

OGE proposes to add a new § 2635.203(g) defining the term “free attendance” as used throughout the subpart. The language found in this definition is based on the definition of “free attendance” currently found in § 2635.204(g)(4). Because the term is used throughout the subpart, OGE believes it is more logical for the definition to appear in § 2635.203. OGE has amended the definition as it is currently found in § 2635.204(g)(4) to permit employees who are presenters at an event to accept meals outside of a group context, so long as the meal is open to all presenters and is hosted by the sponsor of the event. OGE is aware that it is customary for the sponsors of an event to provide a separate luncheon or dinner for participating presenters. OGE believes that these meals are often beneficial to the agency because the agency employee is able to interact with other presenters, receive instructions, and hear about program goals or

changes. OGE believes that where a meal is provided to all other presenters, the meal does not constitute a separate gift for the personal benefit of the employee.

OGE has determined that the explanatory Note that follows current § 2635.204(g) is unnecessary. OGE therefore proposes to remove the Note.

Proposed § 2635.204 Exceptions to the Prohibition on Acceptance of Certain Gifts

OGE proposes retitling this section to provide additional clarity as to the substantive regulatory text. OGE also proposes amending the introductory clause to improve readability.

OGE is proposing to revise and add a number of examples to § 2635.204(a) to clarify the application of the rule in various contexts. Proposed *Examples 1 through 5 to paragraph (a)* are unchanged except for technical modification. Proposed *Example 6 to paragraph (a)* is new and emphasizes that an employee may not rely on the exception for gifts of \$20 or less to accept a group gift with an aggregate market value in excess of \$20. Proposed *Example 7 to paragraph (a)* is new and incorporates OGE’s advice that store gift cards that are worth \$20 or less may be accepted under § 2635.204(a), but that general-use prepaid gift cards may not be accepted under the exception, even if their value is below the regulatory threshold. See OGE Legal Advisory LA–15–04 (April 30, 2015). General-use prepaid cards operate similarly to debit cards in practice and are therefore akin to gifts of cash. See *id.*

OGE proposes amending § 2635.204(b) to incorporate OGE’s longstanding interpretation that the exception for gifts based on a personal relationship applies only to gifts provided by an individual. As used in the Standards, the term “individual” refers only to a natural person, i.e., a human being. See 5 CFR 2635.102(k) (defining “person” to include an “individual” as well as a “corporation” “company” or “other organization or institution”). This accords with the common understanding of the term. See *Mohammed v. Palestinian Authority*, 132 S. Ct. 1702, 1707 (2012). OGE also proposes amending § 2635.204(b) to make explicit that in determining whether a gift is motivated by a personal relationship, employees and agencies may consider not only the “history of the relationship” but also the “nature of the relationship.” This amendment accords with advice that OGE has issued on this exception in the past. See OGE Informal Advisory Opinion 06 x 3 (Mar. 21, 2006).

Proposed *Example 1 to paragraph (b)* is revised to reflect circumstances that arise more frequently. Proposed *Example 2 to paragraph (b)* has no substantive change. Proposed *Example 3 to paragraph (b)* is new and provides guidance on the application of the exception at § 2635.204(b) to personal contacts made through social media networking Web sites.

OGE is proposing to revise § 2635.204(c)(1) to clarify that an employee may accept a reduction or waiver of membership or other fees to an organization where the only restriction on membership is related to professional qualifications and the reduction or waiver is available to all Government employees or all uniformed military personnel. OGE proposes to amend § 2635.204(c)(2) to explain that “opportunities and benefits” under this section may include free attendance or participation at an event if the other criteria of the section are met. OGE also proposes to amend § 2635.204(c)(3) to provide that the general prohibition on an employee accepting for personal use a benefit to which the Government is entitled does not apply when the employee is specifically authorized by statute or regulation to retain the benefit. Proposed *Example 1 to paragraph (c)(2)* illustrates circumstances under which an employee would not be able to accept a discount under § 2635.204(c)(2)(i), as it would be related to the employee’s Government employment. Proposed *Example 2* and *Example 3 to paragraph (c)(2)* and *Example 1 to paragraph (c)(3)* are renumbered but not substantively changed.

OGE proposes to restructure § 2635.204(d), *Awards and honorary degrees*, to clarify this exception. Proposed § 2635.204(d)(l) covers awards. The elements are the same as currently set forth in § 2635.204(d), but are reordered for clarity. Proposed § 2635.204(d)(2) defines an “Established program of recognition.” Proposed § 2635.204(d)(3), entitled “Honorary degrees,” is current § 2635.204(d)(2). As proposed, this paragraph updates the citation for the definition of an institution of higher education found at 20 U.S.C. 1001 and provides that employees may also accept honorary degrees from “similar foreign institution[s] of higher education.” For purposes of this exception, a “foreign institution of higher education” would include an institution of higher education that is physically located outside of the United States if it is accredited by a recognized quality assurance or accreditation organization. OGE proposes to add a note following

§ 2635.204(d)(3) reminding agency ethics officials that before approving the acceptance of an honorary degree from a foreign institution of higher education, the agency should also consider the potential applicability of the Emoluments Clause of the U.S. Constitution and the Foreign Gifts and Decorations Act.

Proposed § 2635.204(d)(4) is similar to current § 2635.204(d)(3), but is reworded to clarify that, for the purpose of determining whether the value of an award exceeds \$200 (and therefore is subject to additional restrictions), the value of the free attendance at the event does not need to be included but the cost of any travel expenses do. This is consistent with OGE’s current interpretation, as reflected in *Example 3* in the awards section of the current regulation.

OGE also proposes to amend the examples to § 2635.204(d) by adding one new example and updating the remaining example designations. Proposed *Example 1 to paragraph (d)(1)*, *Example 3 to paragraph (d)(1)*, and *Example 1 to paragraph (d)(3)* are currently in the regulation, and OGE proposes no substantive amendment to these examples. Proposed *Example 2 to paragraph (d)(1)* is a new example added to emphasize the existing rule that even where there is an “established program of recognition,” an employee may not accept the award if the entity that is giving the award has interests that may be substantially affected by the performance or nonperformance of the employee’s official duties.

OGE proposes to amend § 2635.204(e) by moving the definition of “employment” currently found at § 2635.204(e)(4) to a new § 2635.204(e)(5). Currently the term “employment” is defined by cross-reference to the definition of “employment” in § 2635.603(a). New § 2635.204(e)(5) removes the cross-reference and incorporates the substantive definition found in § 2635.603(a), *i.e.*, “‘employment’ means any form of non-Federal employment or business relationship involving the provision of personal services.” OGE is also proposing to add a new subparagraph (e)(4) providing that an employee may accept an invitation from his or her former employer to attend a reception or similar event, and accept benefits that are provided at the event, if other former employees have also been invited to attend and it is clear that these benefits are not being offered or enhanced because of the employee’s official position. There is currently some ambiguity in this regard because of the phrasing of the existing

paragraph. OGE does not believe a distinction should be made between events based on current and former business or employment activities. Under either situation, the invitation and any benefits must clearly be offered because of the employee’s former or current non-Government position and not because of Federal employment or the official’s status. Proposed *Example 1 to paragraph (e)(4)* illustrates this provision. There are no substantive changes to the other examples to paragraph (e).

OGE proposes to amend § 2635.204(f) to clarify that a gift that may be accepted in connection with certain political activities includes offers of free attendance to an accompanying spouse and other guests. Proposed *Example 1 to paragraph (f)* is currently *Example 1* following § 2635.204(f). There is no substantive change to this example.

OGE is proposing a number of substantive revisions to § 2635.204(g). As described above, OGE proposes to remove § 2635.204(g)(1), *Speaking and similar engagements*. The substance of the exception will be included in a new exclusion from the definition of “gift” at proposed § 2635.203(b)(8). Proposed § 2635.204(g) will focus on when an employee may accept an invitation of free attendance at a “widely attended gathering.” Accordingly, OGE proposes re-titling § 2635.204(g) as “Gifts of free attendance at widely attended gatherings.” Proposed § 2635.204(g)(1) would set forth the rule for when an employee may accept an unsolicited gift of free attendance at such a gathering, while proposed subparagraphs (g)(2)–(g)(5) provide definitions and concepts that apply throughout § 2635.204(g). Proposed § 2635.204(g)(6) is similar to current § 2635.204(g)(6), but has been amended to clarify that an employee may bring only one accompanying guest under the authority found in that section. This has been OGE’s interpretation of the regulation since its promulgation in 1996. *See* 61 FR 42965, 42968 (Aug. 20, 1996).

Proposed § 2635.204(g)(1) provides that an employee may accept a gift of free attendance to attend a widely attended gathering only upon receiving a written authorization from the agency designee. This is a change from the current rule. Currently, a written determination is required only when the person extending the invitation has interests that may be substantially affected by the performance or non-performance of the employee’s official duties, or is an organization the majority of whose members have such interests.

Although OGE is sympathetic to agency concerns that requiring that all

determinations be made in writing may increase workload, OGE believes that increased access to certain technologies since the Standards were promulgated, such as the Internet and mobile devices, reduces this concern. Additionally, OGE believes that requiring a written authorization on all occasions will promote the public's confidence in Government operations.

Proposed § 2635.204(g)(2) defines "widely attended gatherings." This definition is similar to the definition that is used in current § 2635.204(g)(2). OGE is proposing to amend the current definition to highlight that an event does not qualify as a widely attended gathering unless it is "expected that . . . there will be an opportunity to exchange ideas and views among invited persons." OGE has long held that an event does not meet the criteria of this exception if an opportunity to exchange ideas and views is not available. *See, e.g.,* OGE Informal Advisory Opinion 08 x 1 (Jan. 30, 2008) (stating that "the 'widely attended gathering' exception cannot be used to justify free attendance at an event that is not structured to allow interchange among attendees"); OGE Informal Advisory Opinion 07 x 14 (Dec. 5, 2007) (stating that OGE "considers it fundamental that a WAG must provide the opportunity for 'an exchange of ideas' with a large and diverse group. . . . If an event is so structured that an employee has little opportunity to exchange views with a large and diverse number of persons, then the very purpose of the exception would be defeated."); OGE Informal Advisory Opinion 99 x 2 (March 15, 1999). This amendment is being proposed to codify OGE's long-standing interpretation.

Proposed § 2635.204(g)(3) describes the finding that the agency designee must make before authorizing an employee to accept an offer of free attendance at a widely attended gathering. The proposed rule does not require a particular degree of specificity in making this finding, but does require written evidence that the determination was made. For example, an email from the agency designee to the employee indicating the designee's approval would be sufficient. This section also sets out the limitations that apply when the gift of free attendance is from someone other than the sponsor, including restrictions on the aggregate value of such gifts. OGE has set the ceiling for nonsponsor gifts of free attendance to match the threshold set by the General Service Administration (GSA) as the "minimal value" level used in the regulations implementing the Foreign Gifts and Decorations Act, 5

U.S.C. 7342. OGE raises this threshold on a three-year basis to match the dollar value set by GSA. The last time the regulatory ceiling was raised was in 2014. *See, e.g.,* 79 FR 28605 (May 19, 2014).

As described above, OGE proposes removing § 2635.204(g)(4) and the explanatory Note following the regulation, which sets out the definition of "free attendance" for the purposes of § 2635.204(g), because there is now a proposed subpart-wide definition of "free attendance" at § 2635.203(g). OGE proposes adding a new § 2635.204(g)(4) establishing factors the agency designee may consider in determining whether the agency's interest in having the employee attend the event outweighs the potential that the employee may be, or may appear to be, improperly influenced in the performance of his or her duties by accepting the gift.

OGE proposes to reword § 2635.204(g)(5) to more clearly state the criteria that apply when making a determination that a gift is from a person other than the sponsor.

Because the exception for widely attended gatherings generates more questions than perhaps any other gift exception, OGE has provided eight examples to the regulation. Proposed *Example 1 to paragraph (g)* is part of current *Example 1* following § 2635.204(g), but has been modified to illustrate when acceptance would not be permitted under the exception because the value of the gift from a nonsponsor is in excess of the regulatory threshold. *Example 2 to paragraph (g)* is new, and illustrates when acceptance would not be permitted under the exception because the gift is from a nonsponsor and the event is not expected to be attended by more than 100 persons. *Example 3 to paragraph (g)* is part of current *Example 1* following § 2635.204(g), but has been modified to illustrate when acceptance could be permitted under the exception because the gift is from the sponsor of the event. *Example 4 to paragraph (g)* is current *Example 2* following § 2635.204(g) modified to account for changes in the regulatory dollar threshold. *Example 5 to paragraph (g)* is current *Example 3* following § 2635.204(g). *Example 6 to paragraph (g)* is current *Example 5* following § 2635.204(g). *Example 7 to paragraph (g)* is current *Example 6* following § 2635.204(g) modified to reflect that all widely attended gathering authorizations must be in writing. Proposed *Example 8 to paragraph (g)* is new, and explains that an employee may not accept gifts of transportation to or from an event pursuant to the exception at § 2635.204(g). This is

consistent with OGE's longstanding interpretation of the definition.

OGE proposes to revise § 2635.204(h) to clarify that an employee may accept an invitation to attend a social event permitted under the current rule only when that invitation is unsolicited. OGE also proposes clarifying that the gift exception includes food, refreshments, and entertainment that are provided to the employee's spouse or other accompanying guests. OGE further proposes to add a new § 2635.204(h)(3) to require an employee to receive a written determination that the employee's attendance at the event complies with the proposed standard set out at § 2635.201(b) when either the sponsor of the event or the person extending the invitation is not an individual. If the event is being hosted by an organization or the invitation is from an organization, as opposed to an individual, OGE believes that it is appropriate to require an independent written determination by an agency ethics official confirming that the employee's acceptance of free meals, refreshments, and entertainment would not cause a reasonable person to question the employee's integrity under the standard found in proposed § 2635.201(b). OGE proposes removing the examples following § 2635.204(h), and replacing them with new *Example 1 to paragraph (h)* illustrating a situation in which acceptance under this paragraph would be permitted.

OGE proposes to amend § 2635.204(i) to clarify that gifts of meals, refreshments, and entertainment provided in a foreign area may be accepted only when unsolicited. OGE has also updated the citations throughout the regulation.

OGE proposes revising § 2635.204(k) to include a cross-reference to § 2635.105, which sets forth the requirements that agencies must follow to promulgate supplemental agency regulations.

OGE proposes to revise § 2635.204(l) by removing the Note following paragraph (1), as it is not necessary for understanding the scope or substance of the exception.

OGE proposes to add a new gift exception for unsolicited gifts of informational materials at proposed § 2635.204(m). Executive Branch employees occasionally receive unsolicited gifts of books and periodicals. These items are often given with the goal of communicating the ideas and positions of the donor rather than personally benefitting the individual employee. The proposed gift exception would allow acceptance of these materials when either they are less

than \$100 or, if they are in excess of \$100, there has been a determination that their acceptance accords with the general standard found at proposed § 2635.201(b). An employee could not use the proposed exception to accept entertainment materials, such as novels, audio or video recordings of entertainment programs, or pictures, photographs, or artwork intended for display or decoration. Section (m)(2) provides guidance on what constitutes informational materials. OGE also proposes providing two new examples to illustrate this exception.

Proposed § 2635.205 Limitations on Use of Exceptions

As previously described, OGE is proposing to move the limitations on employees' ability to use and rely on the exceptions in § 2635.204, which were previously located at § 2635.202(c), to § 2635.205. OGE further proposes to revise the regulatory text of proposed § 2635.205(b), which is current § 2635.202(c)(2), by rewording this paragraph to prohibit an employee from "[u]s[ing], or permit[ing] the use of, the employee's Government position, or any authority associated with public office, to solicit or coerce the offering of a gift." This rewording is consistent with the language currently found in subpart G of the Standards, which broadly prohibits employees from using their public office for private gain. See 5 CFR 2635.702(a).

Some exceptions would permit employees to solicit certain gifts in limited circumstances where it is clear that they have not used their official positions to induce the offering of the gifts, as in the case of an employee who solicits a gift from his or her spouse even though the spouse is employed by a prohibited source, pursuant to the exception at § 2635.204(b). These exceptions include: § 2635.204(b) (Gifts based on a personal relationship); § 2635.204(c) (Discounts and similar benefits); § 2635.204(d) (Awards and honorary degrees); § 2635.204(e) (Gifts based on outside business or employment relationships); § 2635.204(f) (Gifts in connection with political activities permitted by the Hatch Act Reform Amendments); § 2635.204(j) (Gifts to the President or Vice President); § 2635.204(k) (Gifts authorized by supplemental agency regulation); and § 2635.204(l) (Gifts accepted under specific statutory authority). However, these exceptions would continue to prohibit employees from using the authority of their positions to solicit or coerce the offering of gifts. They would also continue to prohibit employees from soliciting gifts

to be given because of the employee's position.

Other exceptions would bar solicitation of gifts under any circumstances, even where employees have not used the authority of their positions to influence or induce the giving of the gift. To emphasize this broader prohibition, OGE retained, and in some cases added, language in these exceptions clarifying that they apply only to the acceptance of "unsolicited" gifts. These exceptions include: § 2635.204(a) (Gifts of \$20 or less); § 2635.204(g) (Gifts of free attendance at widely attended gatherings); § 2635.204(h) (Social invitations); § 2635.204(i) (Meals, refreshments and entertainment in foreign areas); and § 2635.204(m) (Gifts of informational materials).

OGE proposes to expand the description of the federal bribery statute, found at proposed § 2635.205(d)(1), to more closely follow the text of the law. OGE also proposes to add two new limitations on the use of the exceptions found at § 2635.204. Proposed § 2635.205(e) would bar an employee from relying on an exception to the general gift prohibition when the acceptance of the gift would be prohibited by Executive Order. Similarly, proposed § 2635.205(f) would bar an employee from relying on an exception to the general gift prohibition when the acceptance of the gift would be prohibited by supplemental agency regulation issued with the concurrence of OGE.

OGE proposes removing the limitation currently found at § 2635.202(c)(5) dealing with the acceptance of vendor promotional training. This limitation was originally included to ensure that any gift would be consistent with the guidelines on vendor promotional training in the Federal Information Resources Management Regulation, which was issued by the General Services Administration (GSA). See 57 FR 35006, 35012–13 (Aug. 7, 1992). However, that GSA regulation was rescinded in 1996.

Proposed *Example 1 to paragraph (c)* is current *Example 1* following § 2635.202(c)(3).

Proposed § 2635.206 Proper Disposition of Prohibited Gifts

OGE proposes to move the regulations pertaining to the proper disposition of prohibited gifts from § 2635.205 to § 2635.206.

OGE proposes to modify the language currently found at § 2635.205(a), and redesignated at § 2635.206(a), to enhance readability, to add headings to the subparagraphs, and to emphasize

that employees must promptly dispose of gifts that are accepted in violation of the subpart. OGE also proposes to add a sentence explaining that the obligation to dispose of prohibited gifts is independent of an agency's decision to initiate corrective or disciplinary action.

Currently, § 2635.205(a)(1) provides that an employee who receives a tangible gift that is prohibited by the subpart must either return the gift to the donor or pay the donor the market value. Proposed § 2635.206(a)(1) would amend the regulation to provide employees with the option of destroying gifts with a market value not in excess of \$100. OGE understands that on occasion it may be impossible, cost-prohibitive, or time-consuming for the employee or agency to return the prohibited gift. This could be the case, for example, if the donor was unknown or unreachable. In these cases, where the gift is a tangible item and the market value is \$100 or less, OGE believes the Government's interest may be better served by permitting an employee to destroy the gift. Destruction may be carried out by physical destruction or by permanently discarding the gift by placing it in a waste receptacle. OGE has provided examples illustrating proper gift disposition at the end of the relevant paragraphs.

OGE proposes revising § 2635.206(a)(2) for technical reasons. Proposed § 2635.206(a)(4) updates the citation that relates to disposition of gifts received from foreign governments or international organizations and strikes the language related to disposal of materials related to official travel. The latter provision has become obsolete following statutory changes occurring after the original promulgation of the Standards.

OGE proposes to add a new § 2635.206(d) to encourage employees to record any actions that they take to dispose of gifts that cannot be accepted under the subpart.

III. Matters of Regulatory Procedure

Regulatory Flexibility Act

As Director of the Office of Government Ethics, I certify under the Regulatory Flexibility Act (5 U.S.C. chapter 6) that this proposed rule would not have a significant economic impact on a substantial number of small entities because it primarily affects current Federal Executive Branch employees.

Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) does not apply because this regulation does not contain information collection requirements that

require approval of the Office of Management and Budget.

Unfunded Mandates Reform Act

For purposes of the Unfunded Mandates Reform Act of 1995 (2 U.S.C. chapter 5, subchapter II), this proposed rule would not significantly or uniquely affect small governments and will not result in increased expenditures by State, local, and tribal governments, in the aggregate, or by the private sector, of \$100 million or more (as adjusted for inflation) in any one year.

Executive Order 13563 and Executive Order 12866

Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select the regulatory approaches that maximize net benefits (including economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been designated as a “significant regulatory action” although not economically significant, under section 3(f) of Executive Order 12866. Accordingly this rule has been reviewed by the Office of Management and Budget.

Executive Order 12988

As Director of the Office of Government Ethics, I have reviewed this proposed rule in light of section 3 of Executive Order 12988, Civil Justice Reform, and certify that it meets the applicable standards provided therein.

List of Subjects in 5 CFR Part 2635

Conflict of interests, Executive Branch standards of ethical conduct, Government employees.

Approved: November 9, 2015.

Walter M. Shaub, Jr.,

Director, Office of Government Ethics.

Accordingly, for the reasons set forth in the preamble, the Office of Government Ethics proposes to amend 5 CFR part 2635 as set forth below:

PART 2635—STANDARDS OF ETHICAL CONDUCT FOR EMPLOYEES OF THE EXECUTIVE BRANCH

■ 1. The authority citation for part 2635 continues to read as follows:

Authority: 5 U.S.C. 7301, 7351, 7353; 5 U.S.C. App. (Ethics in Government Act of 1978); E.O. 12674, 54 FR 15159, 3 CFR, 1989 Comp., p. 215, as modified by E.O. 12731, 55 FR 42547, 3 CFR, 1990 Comp., p. 306.

■ 2. Revise subpart B of part 2635 to read as follows:

Subpart B—Gifts From Outside Sources

Sec.

- 2635.201 Overview and considerations for declining otherwise permissible gifts.
- 2635.202 General prohibition on solicitation or acceptance of gifts.
- 2635.203 Definitions.
- 2635.204 Exceptions to the prohibition on acceptance of certain gifts.
- 2635.205 Limitations on use of exceptions.
- 2635.206 Proper disposition of prohibited gifts.

Subpart B—Gifts From Outside Sources

§ 2635.201 Overview and considerations for declining otherwise permissible gifts.

(a) *Overview.* This subpart contains standards that prohibit an employee from soliciting or accepting any gift from a prohibited source or any gift given because of the employee’s official position, unless the item is excluded from the definition of a gift or falls within one of the exceptions set forth in this subpart.

(b) *Considerations for declining otherwise permissible gifts.* (1) Every employee has a responsibility to the United States and its citizens to place loyalty to the Constitution, laws, and ethical principles above personal gain. An employee’s actions should promote the public’s trust that this fundamental responsibility is being met. Even when acceptance of a gift would be permitted by one of the exceptions contained in § 2635.204, it is frequently prudent for an employee to decline a gift offered by a prohibited source or because of the employee’s official position. In determining whether acceptance of a gift otherwise permitted by an exception set forth in § 2635.204 would be prudent, an employee should consider whether a reasonable person with knowledge of the relevant facts would question the employee’s integrity.

(2) In considering whether acceptance of a gift would lead a reasonable person to question the employee’s integrity, an employee may consider, among other factors:

- (i) Whether the gift has a high or low market value;
- (ii) Whether the gift was provided by a person or organization who has interests that may be affected substantially by the performance or nonperformance of the employee’s official duties;
- (iii) Whether acceptance of the gift would lead the employee to feel a sense of obligation to the donor;

(iv) Whether acceptance of the gift would reasonably create an appearance that the employee is providing the donor with preferential treatment or access to the Government;

(v) With regard to a gift of free attendance at an event, whether the Government is also providing persons with views or interests that differ from those of the donor with access to the Government;

(vi) With regard to a gift of free attendance at an event, whether the event is open to interested members of the public or representatives of the news media;

(vii) Whether acceptance of the gift would cause a reasonable person to question the employee’s ability to act impartially; and

(viii) Whether acceptance of the gift would interfere with the employee’s conscientious performance of official duties.

(3) Notwithstanding paragraph (b)(1) of this section, an employee who accepts a gift that qualifies for an exception under § 2635.204 does not violate this subpart or the Principles of Ethical Conduct set forth in § 2635.101(b).

(4) Employees who have questions regarding this subpart, including whether the employee should decline a gift that would otherwise be permitted under an exception found in § 2635.204, should seek advice from an agency ethics official. *See* § 2635.107(b).

§ 2635.202 General prohibition on solicitation or acceptance of gifts.

(a) *Prohibition on soliciting gifts.* Except as provided in this subpart, an employee may not, directly or indirectly:

- (1) Solicit a gift from a prohibited source; or
- (2) Solicit a gift to be given because of the employee’s official position.

(b) *Prohibition on accepting gifts.* Except as provided in this subpart, an employee may not, directly or indirectly:

- (1) Accept a gift from a prohibited source; or
- (2) Accept a gift given because of the employee’s official position.

(c) *Relationship to illegal gratuities statute.* A gift accepted pursuant to an exception found in this subpart will not constitute an illegal gratuity otherwise prohibited by 18 U.S.C. 201(c)(1)(B), unless it is accepted in return for being influenced in the performance of an official act. As more fully described in § 2635.205(d)(1), an employee may not solicit or accept a gift if to do so would be prohibited by the federal bribery statute, 18 U.S.C. 201(b).

Example 1 to paragraph (c): A government contractor who specializes in information technology software has offered an employee of the Department of Energy's information technology acquisition division a \$15 gift card to a local restaurant if the employee will allow the vendor to present a demonstration of the contractor's products at the division's staff meeting. Even though the gift card is less than \$20, the employee may not accept the gift under 5 CFR 2635.204(a) because it is conditional upon official action by the employee. Pursuant to §§ 2635.202(c) and 2635.205(a), notwithstanding any exception to the rule, an employee may not accept a gift in return for being influenced in the performance of an official act.

§ 2635.203 Definitions.

For purposes of this subpart, the following definitions apply:

(a) *Agency* has the meaning set forth in § 2635.102(a). However, for purposes of this subpart, an executive department, as defined in 5 U.S.C. 101, may, by supplemental agency regulation, designate as a separate agency any component of that department which the department determines exercises distinct and separate functions.

(b) *Gift* includes any gratuity, favor, discount, entertainment, hospitality, loan, forbearance, or other item having monetary value. It includes services as well as gifts of training, transportation, local travel, lodgings and meals, whether provided in-kind, by purchase of a ticket, payment in advance, or reimbursement after the expense has been incurred. The term excludes the following:

(1) Modest items of food and refreshments, such as soft drinks, coffee and donuts, offered other than as part of a meal;

Example 1 to paragraph (b)(1): A Department of Defense employee is invited to a defense contractor's holiday party. Alcoholic beverages are served at the party. Attendance at the party would be a gift to the employee because alcoholic beverages are not modest items of food or refreshment.

(2) Greeting cards and items with little intrinsic value, such as plaques, certificates, and trophies, which are intended primarily for presentation;

Example 1 to paragraph (b)(2): After giving a speech at the facility of a pharmaceutical company, a Government employee is presented with a glass paperweight in the shape of a pill capsule with the name of the company's latest drug and the date of the speech imprinted on the side. The employee may accept the paperweight because it is an item with little intrinsic value which is intended primarily for presentation.

Example 2 to paragraph (b)(2): After participating in a panel discussion hosted by an international media company, a Government employee is presented with an

inexpensive portable music player emblazoned with the media company's logo. The portable music player has a market value of \$25. The employee may not accept the portable music player as it has a significant independent use as a music player rather than being intended primarily for presentation.

Example 3 to paragraph (b)(2): After giving a speech at a conference held by a national association for miners, a Department of Commerce employee is presented with a block of granite that is engraved with the association's logo, a picture of the Appalachian Mountains, the date of the speech and the employee's name. The employee may accept this item because it is similar to a plaque, is designed primarily for presentation, and has little intrinsic value.

(3) Loans from banks and other financial institutions on terms generally available to the public;

(4) Opportunities and benefits, including favorable rates and commercial discounts, available to the public or to a class consisting of all Government employees or all uniformed military personnel, whether or not restricted on the basis of geographic considerations;

(5) Rewards and prizes given to competitors in contests or events, including random drawings, open to the public unless the employee's entry into the contest or event is required as part of the employee's official duties;

Example 1 to paragraph (b)(5): A Government employee is attending a free trade show on official time. The trade show is held in a public shopping area adjacent to the employee's office building. The employee voluntarily enters a drawing at an individual vendor's booth which is open to the public. She fills in an entry form on the vendor's display table and drops it into the contest box. The employee may accept the resulting prize because entry into the contest was not required by or related to her official duties.

Example 2 to paragraph (b)(5): All attendees at a conference, which is not open to the public, are entered in a drawing for a weekend getaway to Bermuda as a result of being registered for the conference. A Government employee who attends the conference in his official capacity at the Government's expense cannot accept the weekend getaway, which is a "door prize," because his entry in the contest was a result of registering for the conference as part of his official duties. Similarly, the employee could not accept the prize if entry into the drawing were restricted to those conference attendees who completed a conference evaluation, even if completing the evaluation was optional, because completing the evaluation was part of the conference and, therefore, incident to the performance of his official duties.

(6) Pension and other benefits resulting from continued participation in an employee welfare and benefits plan maintained by a current or former employer;

(7) Anything which is paid for by the Government or secured by the Government under Government contract;

Example 1 to paragraph (b)(7): An employee at the Occupational Safety and Health Administration is assigned to travel away from her duty station to conduct an investigation of a collapse at a construction site. The employee's agency is paying for her travel expenses, including her airfare. The employee may accept and retain travel promotional items, such as frequent flyer miles, received as a result of her official travel, if done in accordance with 5 U.S.C. 5702, note, and 41 CFR part 301-53.

(8) Free attendance to an event provided by the sponsor of the event to:

(i) An employee who is assigned to present information on behalf of the agency at the event on any day when the employee is presenting;

(ii) An employee whose presence on any day of the event is deemed to be essential by the agency to the presenting employee's participation in the event, provided that the employee is accompanying the presenting employee; and

(iii) The spouse or one other guest of the presenting employee on any day when the employee is presenting, provided that others in attendance will generally be accompanied by a spouse or other guest, the offer of free attendance for the spouse or other guest is unsolicited, and the agency designee has authorized the presenting employee orally or in writing to accept.

Example 1 to paragraph (b)(8): An employee of the Department of the Treasury is assigned to participate in a panel discussion of economic issues as part of a one-day conference may accept the sponsor's waiver of the conference fee. Under the separate authority of § 2635.204(a), the employee may accept a token of appreciation for her speech having a market value of \$20 or less.

Example 2 to paragraph (b)(8): An employee of the Securities and Exchange Commission is assigned to present the agency's views at a roundtable discussion of an ongoing working group. The employee may accept free attendance to the meeting under § 2635.203(b)(8) because the employee has been assigned to present information at the meeting on behalf of the agency. If it is determined by the agency that it is essential that another employee accompany the presenting employee to the roundtable discussion, the accompanying employee may also accept free attendance to the meeting under § 2635.203(b)(8)(ii).

Example 3 to paragraph (b)(8): An employee of the United States Trade and Development Agency is invited to attend a cocktail party hosted by a prohibited source. The employee believes that while at the event he will have an opportunity to discuss official matters with other attendees. Although the employee may voluntarily

discuss official matters with other attendees, the employee has not been assigned to present information on behalf of the agency. The employee may not accept free attendance to the event under § 2635.203(b)(8).

(9) Any gift accepted by the Government under specific statutory authority, including:

(i) Travel, subsistence, and related expenses accepted by an agency under the authority of 31 U.S.C. 1353 in connection with an employee's attendance at a meeting or similar function relating to the employee's official duties which take place away from the employee's duty station, provided that the agency's acceptance is in accordance with the implementing regulations at 41 CFR chapter 304; and

(ii) Other gifts provided in-kind which have been accepted by an agency under its agency gift acceptance statute; and

(10) Anything for which market value is paid by the employee.

(c) *Market value* means the cost that a member of the general public would reasonably expect to incur to purchase the gift. An employee who cannot ascertain the market value of a gift may estimate its market value by reference to the retail cost of similar items of like quality. The market value of a gift of a ticket entitling the holder to food, refreshments, entertainment, or any other benefit is deemed to be the face value of the ticket.

Example 1 to paragraph (c): An employee who has been given a watch inscribed with the corporate logo of a prohibited source may determine its market value based on her observation that a comparable watch, not inscribed with a logo, generally sells for about \$50.

Example 2 to paragraph (c): During an official visit to a factory operated by a well-known athletic footwear manufacturer, an employee of the Department of Labor is offered a commemorative pair of athletic shoes manufactured at the factory. Although the cost incurred by the donor to manufacture the shoes was \$17, the market value of the shoes would be the \$100 that the employee would have to pay for the shoes on the open market.

Example 3 to paragraph (c): A prohibited source has offered a Government employee a ticket to a charitable event consisting of a cocktail reception to be followed by an evening of chamber music. Even though the food, refreshments, and entertainment provided at the event may be worth only \$20, the market value of the ticket is its \$250 face value.

Example 4 to paragraph (c): A company offers an employee of the Federal Communication Commission (FCC) free attendance for two to a private skybox at a ballpark to watch a major league baseball game. The skybox is leased annually by the company, which has business pending before the FCC. To determine the market value of

the tickets, the employee must add the market value of two of the most expensive publicly available tickets to the game and the market value of any food, parking or other tangible benefits provided in connection with the gift of attendance.

Example 5 to paragraph (c): An employee of the Department of Agriculture is invited to a reception held by a prohibited source. There is no entrance fee to the reception event or to the venue. To determine the market value of the gift, the employee must add the market value of any entertainment, food, beverages, or other tangible benefit provided to attendees in connection with the reception, but need not consider the cost incurred by the sponsor to rent or maintain the venue where the event is held. The employee may rely on a per-person cost estimate provided by the sponsor of the event, unless the employee or an agency designee has determined that a reasonable person would find that the estimate is clearly implausible.

(d) *Prohibited source* means any person who:

(1) Is seeking official action by the employee's agency;

(2) Does business or seeks to do business with the employee's agency;

(3) Conducts activities regulated by the employee's agency;

(4) Has interests that may be substantially affected by performance or nonperformance of the employee's official duties; or

(5) Is an organization a majority of whose members are described in paragraphs (d)(1) through (4) of this section.

(e) *Given because of the employee's official position.* A gift is given because of the employee's official position if the gift is from a person other than an employee and would not have been given had the employee not held the status, authority, or duties associated with the employee's Federal position.

Note to paragraph (e): Gifts between employees are subject to the limitations set forth in subpart C of this part.

Example 1 to paragraph (e): Where free season tickets are offered by an opera guild to all members of the Cabinet, the gift is offered because of their official positions.

Example 2 to paragraph (e): Employees at a regional office of the Department of Justice (DOJ) work in Government-leased space at a private office building, along with various private business tenants. A major fire in the building during normal office hours causes a traumatic experience for all occupants of the building in making their escape, and it is the subject of widespread news coverage. A corporate hotel chain, which does not meet the definition of a prohibited source for DOJ, seizes the moment and announces that it will give a free night's lodging to all building occupants and their families, as a public goodwill gesture. Employees of DOJ may accept, as this gift is not being given because of their Government positions. The donor's

motivation for offering this gift is unrelated to the DOJ employees' status, authority, or duties associated with their Federal position, but instead is based on their mere presence in the building as occupants at the time of the fire.

(f) *Indirectly solicited or accepted.* A gift which is solicited or accepted indirectly includes a gift:

(1) Given with the employee's knowledge and acquiescence to the employee's parent, sibling, spouse, child, dependent relative, or a member of the employee's household because of that person's relationship to the employee; or

(2) Given to any other person, including any charitable organization, on the basis of designation, recommendation, or other specification by the employee, except the employee has not indirectly solicited or accepted a gift by the raising of funds or other support for a charitable organization if done in accordance with § 2635.808.

Example 1 to paragraph (f)(2): An employee who must decline a gift of a personal computer pursuant to this subpart may not suggest that the gift be given instead to one of five charitable organizations whose names are provided by the employee.

(g) *Free attendance* includes waiver of all or part of the fee for an event or the provision of food, refreshments, entertainment, instruction or materials furnished to all attendees as an integral part of the event. It does not include travel expenses, lodgings, or entertainment collateral to the event. It does not include meals taken other than in a group setting with all other attendees, unless the employee is a presenter at the event and is invited to a separate meal for participating presenters that is hosted by the sponsor of the event. Where the offer of free attendance has been extended to an accompanying spouse or other guest, the market value of the gift of free attendance includes the market value of free attendance by both the employee and the spouse or other guest.

§ 2635.204 Exceptions to the prohibition on acceptance of certain gifts.

Subject to the limitations in § 2635.205, this section establishes exceptions to the prohibitions set forth in § 2635.202(a) and (b).

(a) *Gifts of \$20 or less.* An employee may accept unsolicited gifts having an aggregate market value of \$20 or less per source per occasion, provided that the aggregate market value of individual gifts received from any one person under the authority of this paragraph does not exceed \$50 in a calendar year. This exception does not apply to gifts of cash or of investment interests such as

stock, bonds, or certificates of deposit. Where the market value of a gift or the aggregate market value of gifts offered on any single occasion exceeds \$20, the employee may not pay the excess value over \$20 in order to accept that portion of the gift or those gifts worth \$20. Where the aggregate value of tangible items offered on a single occasion exceeds \$20, the employee may decline any distinct and separate item in order to accept those items aggregating \$20 or less.

Example 1 to paragraph (a): An employee of the Securities and Exchange Commission and his spouse have been invited by a representative of a regulated entity to a community theater production, tickets to which have a face value of \$30 each. The aggregate market value of the gifts offered on this single occasion is \$60, \$40 more than the \$20 amount that may be accepted for a single event or presentation. The employee may not accept the gift of the evening of entertainment. He and his spouse may attend the play only if he pays the full \$60 value of the two tickets.

Example 2 to paragraph (a): An employee of the National Geospatial-Intelligence Agency has been invited by an association of cartographers to speak about her agency's role in the evolution of missile technology. At the conclusion of her speech, the association presents the employee a framed map with a market value of \$18 and a ceramic mug that has a market value of \$15. The employee may accept the map or the mug, but not both, because the aggregate value of these two tangible items exceeds \$20.

Example 3 to paragraph (a): On four occasions during the calendar year, an employee of the Defense Logistics Agency (DLA) was given gifts worth \$10 each by four employees of a corporation that is a DLA contractor. For purposes of applying the yearly \$50 limitation on gifts of \$20 or less from any one person, the four gifts must be aggregated because a person is defined at § 2635.102(k) to mean not only the corporate entity, but its officers and employees as well. However, for purposes of applying the \$50 aggregate limitation, the employee would not have to include the value of a birthday present received from his cousin, who is employed by the same corporation, if he can accept the birthday present under the exception at § 2635.204(b) for gifts based on a personal relationship.

Example 4 to paragraph (a): Under the authority of 31 U.S.C. 1353 for agencies to accept payments from non-Federal sources in connection with attendance at certain meetings or similar functions, the Environmental Protection Agency (EPA) has accepted an association's gift of travel expenses and conference fees for an employee to attend a conference on the long-term effect of radon exposure. While at the conference, the employee may accept a gift of \$20 or less from the association or from another person attending the conference even though it was not approved in advance by the EPA. Although 31 U.S.C. 1353 is the

authority under which the EPA accepted the gift to the agency of travel expenses and conference fees, a gift of \$20 or less accepted under § 2635.204(a) is a gift to the employee rather than to her employing agency.

Example 5 to paragraph (a): During off-duty time, an employee of the Department of Defense (DoD) attends a trade show involving companies that are DoD contractors. He is offered software worth \$15 at X Company's booth, a calendar worth \$12 at Y Company's booth, and a deli lunch worth \$8 from Z Company. The employee may accept all three of these items because they do not exceed \$20 per source, even though they total more than \$20 at this single occasion.

Example 6 to paragraph (a): An employee of the Department of Defense (DoD) is being promoted to a higher level position in another DoD office. Six individuals, each employed by a different defense contractor, who have worked with the DoD employee over the years, decide to act in concert to pool their resources to buy her a nicer gift than each could buy her separately. Each defense contractor employee contributes \$20 to buy a desk clock for the DoD employee that has a market value of \$120. Although each of the contributions does not exceed the \$20 limit, the employee may not accept the \$120 gift because it is a single gift that has a market value in excess of \$20.

Example 7 to paragraph (a): During a holiday party, an employee of the Department of State is given a \$15 store gift card to a national coffee chain by an agency contractor. The employee may accept the card as the market value is less than \$20. The employee could not, however, accept a gift card that is issued by a credit card company or other financial institution, because such a card is equivalent to a gift of cash.

(b) *Gifts based on a personal relationship.* An employee may accept a gift given by an individual under circumstances which make it clear that the gift is motivated by a family relationship or personal friendship rather than the position of the employee. Relevant factors in making such a determination include the history and nature of the relationship and whether the family member or friend personally pays for the gift.

Example 1 to paragraph (b): An employee of the Federal Deposit Insurance Corporation (FDIC) has been dating an accountant employed by a member bank. As part of its "Work-Life Balance" program, the bank has given each employee in the accountant's division two tickets to a professional basketball game and has urged each to invite a family member or friend to share the evening of entertainment. Under the circumstances, the FDIC employee may accept the invitation to attend the game. Even though the tickets were initially purchased by the member bank, they were given without reservation to the accountant to use as she wished, and her invitation to the employee was motivated by their personal friendship.

Example 2 to paragraph (b): Three partners in a law firm that handles corporate mergers

have invited an employee of the Federal Trade Commission to join them in a golf tournament at a private club at the firm's expense. The entry fee is \$500 per foursome. The employee cannot accept the gift of one-quarter of the entry fee even though he and the three partners have developed an amicable relationship as a result of the firm's dealings with the FTC. As evidenced in part by the fact that the fees are to be paid by the firm, it is not a personal friendship but a business relationship that is the motivation behind the partners' gift.

Example 3 to paragraph (b): A Peace Corps employee enjoys using a social media site on the internet in his personal capacity outside of work. He has used the site to keep in touch with friends, neighbors, coworkers, professional contacts, and other individuals he has met over the years through both work and personal activities. One of these individuals works for a contractor that provides language services to the Peace Corps. The employee was acting in his official capacity when he met the individual at a meeting to discuss a matter related to the contract between their respective employers. Thereafter, the two communicated occasionally regarding contract matters. They later also granted one another access to join their social media networks through their respective social media accounts. However, they did not communicate further in their personal capacities, carry on extensive personal interactions, or meet socially outside of work. One day, the individual, whose employer continues to serve as a Peace Corps contractor, contacts the employee to offer him a pair of concert tickets worth \$30 apiece. Although the employee and the individual are connected through social media, the circumstances do not demonstrate that the gift was clearly motivated by a personal relationship, rather than the position of the employee, and therefore the employee may not accept the gift pursuant to § 2635.204(b).

(c) *Discounts and similar benefits.* In addition to those opportunities and benefits excluded from the definition of a gift by § 2635.203(b)(4), an employee may accept:

(1) A reduction or waiver of the fees for participation in organization activities offered to all Government employees or all uniformed military personnel by professional organizations if the only restrictions on membership relate to professional qualifications; and

(2) Opportunities and benefits, including favorable rates, commercial discounts, and free attendance or participation not precluded by paragraph (c)(3) of this section:

(i) Offered to members of a group or class in which membership is unrelated to Government employment;

(ii) Offered to members of an organization, such as an employees' association or agency credit union, in which membership is related to Government employment if the same

offer is broadly available to large segments of the public through organizations of similar size; or

(iii) Offered by a person who is not a prohibited source to any group or class that is not defined in a manner that specifically discriminates among Government employees on the basis of type of official responsibility or on a basis that favors those of higher rank or rate of pay.

Example 1 to paragraph (c)(2): A computer company offers a discount on the purchase of computer equipment to all public and private sector computer procurement officials who work in organizations with over 300 employees. An employee who works as the computer procurement official for a Government agency could not accept the discount to purchase the personal computer under the exception in § 2635.204(c)(2)(i). Her membership in the group to which the discount is offered is related to Government employment because her membership is based on her status as a procurement official with the Government.

Example 2 to paragraph (c)(2): An employee of the Consumer Product Safety Commission (CPSC) may accept a discount of \$50 on a microwave oven offered by the manufacturer to all members of the CPSC employees' association. Even though the CPSC is currently conducting studies on the safety of microwave ovens, the \$50 discount is a standard offer that the manufacturer has made broadly available through a number of employee associations and similar organizations to large segments of the public.

Example 3 to paragraph (c)(2): An Assistant Secretary may not accept a local country club's offer of membership to all members of Department Secretariats which includes a waiver of its \$5,000 membership initiation fee. Even though the country club is not a prohibited source, the offer discriminates in favor of higher ranking officials.

(3) An employee may not accept for personal use any benefit to which the Government is entitled as the result of an expenditure of Government funds, unless authorized by statute or regulation (e.g., 5 U.S.C. 5702, note, regarding frequent flyer miles).

Example 1 to paragraph (c)(3): The administrative officer for a field office of U.S. Immigration and Customs Enforcement (ICE) has signed an order to purchase 50 boxes of photocopy paper from a supplier whose literature advertises that it will give a free briefcase to anyone who purchases 50 or more boxes. Because the paper was purchased with ICE funds, the administrative officer cannot keep the briefcase which, if claimed and received, is Government property.

(d) *Awards and honorary degrees.*—(1) *Awards.* An employee may accept a bona fide award for meritorious public service or achievement and any item incident to the award, provided that:

(i) The award and any item incident to the award are not from a person who has interests that may be substantially affected by the performance or nonperformance of the employee's official duties, or from an association or other organization if a majority of its members have such interests; and

(ii) If the award or any item incident to the award is in the form of cash or an investment interest, or if the aggregate value of the award and any item incident to the award, other than free attendance to the event provided to the employee and to members of the employee's family by the sponsor of the event, exceeds \$200, the agency ethics official has made a written determination that the award is made as part of an established program of recognition.

Example 1 to paragraph (d)(1): Based on a written determination by an agency ethics official that the prize meets the criteria set forth in § 2635.204(d)(2), an employee of the National Institutes of Health may accept the Nobel Prize for Medicine, including the cash award which accompanies the prize, even though the prize was conferred on the basis of laboratory work performed at NIH.

Example 2 to paragraph (d)(1): A defense contractor, ABC Systems, has an annual award program for the outstanding public employee of the year. The award includes a cash payment of \$1,000. The award program is wholly funded to ensure its continuation on a regular basis for the next twenty years and selection of award recipients is made pursuant to written standards. An employee of the Department of the Air Force, who has duties that include overseeing contract performance by ABC Systems, is selected to receive the award. The employee may not accept the cash award because ABC Systems has interests that may be substantially affected by the performance or nonperformance of the employee's official duties.

Example 3 to paragraph (d)(1): An ambassador selected by a nonprofit organization as a recipient of its annual award for distinguished service in the interest of world peace may, together with his wife and children, attend the awards ceremony dinner and accept a crystal bowl worth \$200 presented during the ceremony. However, where the organization has also offered airline tickets for the ambassador and his family to travel to the city where the awards ceremony is to be held, the aggregate value of the tickets and the crystal bowl exceeds \$200, and he may accept only upon a written determination by the agency ethics official that the award is made as part of an established program of recognition.

(2) *Established program of recognition.* An award and an item incident to the award are made pursuant to an established program of recognition if:

(i) Awards have been made on a regular basis or, if the program is new,

there is a reasonable basis for concluding that awards will be made on a regular basis based on funding or funding commitments; and

(ii) Selection of award recipients is made pursuant to written standards.

(3) *Honorary degrees.* An employee may accept an honorary degree from an institution of higher education, as defined at 20 U.S.C. 1001, or from a similar foreign institution of higher education, based on a written determination by an agency ethics official that the timing of the award of the degree would not cause a reasonable person to question the employee's impartiality in a matter affecting the institution.

Note to paragraph (d)(3): When the honorary degree is offered by a foreign institution of higher education, the agency may need to make a separate determination as to whether the institution of higher education is a foreign government for purposes of the Emoluments Clause of the U.S. Constitution (U.S. Const., art. I, § 9, cl. 8) which forbids employees from accepting emoluments, presents, offices, or titles from foreign governments, without the consent of Congress. The Foreign Gifts and Decorations Act, 5 U.S.C. 7342, however, may permit the acceptance of honorary degrees in some circumstances.

Example 1 to paragraph (d)(3): A well-known university located in the United States wishes to give an honorary degree to the Secretary of Labor. The Secretary may accept the honorary degree only if an agency ethics official determines in writing that the timing of the award of the degree would not cause a reasonable person to question the Secretary's impartiality in a matter affecting the university.

(4) *Presentation events.* An employee who may accept an award or honorary degree pursuant to paragraphs (d)(1) or (3) of this section may also accept free attendance to the event provided to the employee and to members of the employee's family by the sponsor of an event. In addition, the employee may also accept unsolicited offers of travel to and from the event provided to the employee and to members of the employee's family by the sponsor of the event. Travel expenses accepted under this paragraph must be added to the value of the award for purposes of determining whether the aggregate value of the award exceeds \$200.

(e) *Gifts based on outside business or employment relationships.* An employee may accept meals, lodgings, transportation and other benefits:

(1) Resulting from the business or employment activities of an employee's spouse when it is clear that such benefits have not been offered or enhanced because of the employee's official position;

Example 1 to paragraph (e)(1): A Department of Agriculture employee whose husband is a computer programmer employed by a Department of Agriculture contractor may attend the company's annual retreat for all of its employees and their families held at a resort facility. However, under § 2635.502, the employee may be disqualified from performing official duties affecting her husband's employer.

Example 2 to paragraph (e)(1): Where the spouses of other clerical personnel have not been invited, an employee of the Defense Contract Audit Agency whose wife is a clerical worker at a defense contractor may not attend the contractor's annual retreat in Hawaii for corporate officers and members of the board of directors, even though his wife received a special invitation for herself and her spouse.

(2) Resulting from the employee's outside business or employment activities when it is clear that such benefits are based on the outside business or employment activities and have not been offered or enhanced because of the employee's official status;

Example 1 to paragraph (e)(2): The members of an Army Corps of Engineers environmental advisory committee that meets six times per year are special Government employees. A member who has a consulting business may accept an invitation to a \$50 dinner from her corporate client, an Army construction contractor, unless, for example, the invitation was extended in order to discuss the activities of the advisory committee.

(3) Customarily provided by a prospective employer in connection with bona fide employment discussions. If the prospective employer has interests that could be affected by performance or nonperformance of the employee's duties, acceptance is permitted only if the employee first has complied with the disqualification requirements of subpart F of this part applicable when seeking employment; or

Example 1 to paragraph (e)(3): An employee of the Federal Communications Commission with responsibility for drafting regulations affecting all cable television companies wishes to apply for a job opening with a cable television holding company. Once she has properly disqualified herself from further work on the regulations as required by subpart F of this part, she may enter into employment discussions with the company and may accept the company's offer to pay for her airfare, hotel, and meals in connection with an interview trip.

(4) Provided by a former employer to attend a reception or similar event when other former employees have been invited to attend, the invitation and benefits are based on the former employment relationship, and it is clear that such benefits have not been offered or enhanced because of the employee's official position.

Example 1 to paragraph (e)(4): An employee of the Department of the Army is invited by her former employer, an Army contractor, to attend its annual holiday dinner party. The former employer traditionally invites both its current and former employees to the holiday dinner regardless of their current employment activities. Under these circumstances, the employee may attend the dinner because the dinner invitation is a result of the employee's former outside employment activities, other former employees have been asked to attend, and the gift is not offered because of the employee's official position.

(5) For purposes of paragraphs (e)(1) through (4) of this section, "employment" means any form of non-Federal employment or business relationship involving the provision of personal services.

(f) *Gifts in connection with political activities permitted by the Hatch Act Reform Amendments.* An employee who, in accordance with the Hatch Act Reform Amendments of 1993, at 5 U.S.C. 7323, may take an active part in political management or in political campaigns, may accept meals, lodgings, transportation, and other benefits, including free attendance at events, for the employee and an accompanying spouse or other guests, when provided, in connection with such active participation, by a political organization described in 26 U.S.C. 527(e). Any other employee, such as a security officer, whose official duties require him or her to accompany an employee to a political event, may accept meals, free attendance, and entertainment provided at the event by such an organization.

Example 1 to paragraph (f): The Secretary of the Department of Health and Human Services may accept an airline ticket and hotel accommodations furnished by the campaign committee of a candidate for the United States Senate in order to give a speech in support of the candidate.

(g) *Gifts of free attendance at widely attended gatherings.* (1) When authorized in writing by the agency designee pursuant to paragraph (g)(3) of this section, an employee may accept an unsolicited gift of free attendance at all or appropriate parts of a widely attended gathering. For an employee who is subject to a leave system, attendance at the event will be on the employee's own time or, if authorized by the employee's agency, on excused absence pursuant to applicable guidelines for granting such absence, or otherwise without charge to the employee's leave account.

(2) *Widely attended gatherings.* A gathering is widely attended if it is expected that a large number of persons will attend, that persons with a diversity of views or interests will be present, for

example, if it is open to members from throughout the interested industry or profession or if those in attendance represent a range of persons interested in a given matter, and that there will be an opportunity to exchange ideas and views among invited persons.

(3) *Written authorization by the agency designee.* The agency designee may authorize an employee or employees to accept a gift of free attendance at all or appropriate parts of a widely attended gathering only if the agency designee issues a written determination after finding that:

(i) The event is a widely attended gathering, as set forth in paragraph (g)(2) of this section;

(ii) The employee's attendance at the event is in the agency's interest because it will further agency programs and operations;

(iii) The agency's interest in the employee's attendance outweighs the concern that the employee may be, or may appear to be, improperly influenced in the performance of official duties; and

(iv) If a person other than the sponsor of the event invites or designates the employee as the recipient of the gift of free attendance and bears the cost of that gift, the event is expected to be attended by more than 100 persons and the value of the gift of free attendance does not exceed \$375.

(4) *Determination of agency interest.* In determining whether the agency's interest in the employee's attendance outweighs the concern that the employee may be, or may appear to be, improperly influenced in the performance of official duties, the agency designee may consider relevant factors including:

(i) The importance of the event to the agency;

(ii) The nature and sensitivity of any pending matter affecting the interests of the person who extended the invitation and the significance of the employee's role in any such matter;

(iii) The purpose of the event;

(iv) The identity of other expected participants;

(v) Whether acceptance would reasonably create the appearance that the donor is receiving preferential treatment;

(vi) Whether the Government is also providing persons with views or interests that differ from those of the donor with similar access to the Government; and

(vii) The market value of the gift of free attendance.

(5) *Cost provided by person other than the sponsor of the event.* The cost of the employee's attendance will be

considered to be provided by a person other than the sponsor of the event where such person designates the employee to be invited and bears the cost of the employee's attendance through a contribution or other payment intended to facilitate the employee's attendance. Payment of dues or a similar assessment to a sponsoring organization does not constitute a payment intended to facilitate a particular employee's attendance.

(6) *Accompanying spouse or other guest.* When others in attendance will generally be accompanied by a spouse or other guest, and where the invitation is from the same person who has invited the employee, the agency designee may authorize an employee to accept an unsolicited invitation of free attendance to an accompanying spouse or one other accompanying guest to participate in all or a portion of the event at which the employee's free attendance is permitted under paragraph (g)(1) this section. The authorization required by this paragraph must be provided in writing.

Example 1 to paragraph (g): An aerospace industry association that is a prohibited source sponsors an industry-wide, two-day seminar for which it charges a fee of \$800 and anticipates attendance of approximately 400. An Air Force contractor pays \$4,000 to the association so that the association can extend free invitations to five Air Force officials designated by the contractor. The Air Force officials may not accept the gifts of free attendance because (a) the contractor, rather than the association, provided the cost of their attendance; (b) the contractor designated the specific employees to receive the gift of free attendance; and (c) the value of the gift exceeds \$375 per employee.

Example 2 to paragraph (g): An aerospace industry association that is a prohibited source sponsors an industry-wide, two-day seminar for which it charges a fee of \$25 and anticipates attendance of approximately 50. An Air Force contractor pays \$125 to the association so that the association can extend free invitations to five Air Force officials designated by the contractor. The Air Force officials may not accept the gifts of free attendance because (a) the contractor, rather than the association, provided the cost of their attendance; (b) the contractor designated the specific employees to receive the gift of free attendance; and (c) the event was not expected to be attended by more than 100 persons.

Example 3 to paragraph (g): An aerospace industry association that is a prohibited source sponsors an industry-wide, two-day seminar for which it charges a fee of \$800 and anticipates attendance of approximately 400. An Air Force contractor pays \$4,000 in order that the association might invite any five Federal employees. An Air Force official to whom the sponsoring association, rather than the contractor, extended one of the five invitations could attend if the employee's participation were determined to be in the

interest of the agency and he received a written authorization.

Example 4 to paragraph (g): An employee of the Department of Transportation is invited by a news organization to an annual press dinner sponsored by an association of press organizations. Tickets for the event cost \$375 per person and attendance is limited to 400 representatives of press organizations and their guests. If the employee's attendance is determined to be in the interest of the agency, she may accept the invitation from the news organization because more than 100 persons will attend and the cost of the ticket does not exceed \$375. However, if the invitation were extended to the employee and an accompanying guest, the employee's guest could not be authorized to attend for free because the market value of the gift of free attendance would exceed \$375.

Example 5 to paragraph (g): An employee of the Department of Energy (DOE) and his spouse have been invited by a major utility executive to a small dinner party. A few other officials of the utility and their spouses or other guests are also invited, as is a representative of a consumer group concerned with utility rates and her spouse. The DOE official believes the dinner party will provide him an opportunity to socialize with and get to know those in attendance. The employee may not accept the free invitation under this exception, even if his attendance could be determined to be in the interest of the agency. The small dinner party is not a widely attended gathering. Nor could the employee be authorized to accept even if the event were instead a corporate banquet to which forty company officials and their spouses or other guests were invited. In this second case, notwithstanding the larger number of persons expected (as opposed to the small dinner party just noted) and despite the presence of the consumer group representative and her husband who are not officials of the utility, those in attendance would still not represent a diversity of views or interests. Thus, the company banquet would not qualify as a widely attended gathering under those circumstances either.

Example 6 to paragraph (g): An Assistant U.S. Attorney is invited to attend a luncheon meeting of a local bar association to hear a distinguished judge lecture on cross-examining expert witnesses. Although members of the bar association are assessed a \$15 fee for the meeting, the Assistant U.S. Attorney may accept the bar association's offer to attend for free, even without a determination of agency interest. The gift can be accepted under the \$20 gift exception at § 2635.204(a).

Example 7 to paragraph (g): An employee of the Department of the Interior authorized to speak on the first day of a four-day conference on endangered species may accept the sponsor's waiver of the conference fee for the first day of the conference under § 2635.203(b)(8). If the conference is widely attended, the employee may be authorized to accept the sponsor's offer to waive the attendance fee for the remainder of the conference if the agency designee has made a written determination that attendance is in the agency's interest.

Example 8 to paragraph (g): A military officer has been approved to attend a widely

attended gathering, pursuant to paragraph (g) of this section, that will be held in the same city as the officer's duty station. The defense contractor sponsoring the event has offered to transport the officer in a limousine to the event. The officer may not accept the offer of transportation because the definition of "free attendance" set forth in § 2635.203(g) excludes travel, and the market value of the transportation would exceed \$20.

(h) *Social invitations.* An employee may accept food, refreshments, and entertainment, not including travel or lodgings, for the employee and an accompanying spouse or other guests, at a social event attended by several persons if:

(1) The invitation is unsolicited and is from a person who is not a prohibited source;

(2) No fee is charged to any person in attendance; and

(3) If either the sponsor of the event or the person extending the invitation to the employee is not an individual, the agency designee makes a written determination after finding that the employee's attendance would not cause a reasonable person to question the employee's integrity. See § 2635.201(b).

Example 1 to paragraph (h): An employee of the White House Press Office has been invited to a social dinner for current and former White House Press Officers at the home of an individual who is not a prohibited source. The employee may attend even if she is being invited because of her official position.

(i) *Meals, refreshments, and entertainment in foreign areas.* An employee assigned to duty in, or on official travel to, a foreign area as defined in 41 CFR 300-3.1 may accept unsolicited food, refreshments, or entertainment in the course of a breakfast, luncheon, dinner, or other meeting or event provided:

(1) The market value in the foreign area of the food, refreshments or entertainment provided at the meeting or event, as converted to U.S. dollars, does not exceed the per diem rate for the foreign area specified in the U.S. Department of State's Maximum Per Diem Allowances for Foreign Areas, Per Diem Supplement Section 925 to the Standardized Regulations (GC-FA) available on the Internet at www.state.gov;

(2) There is participation in the meeting or event by non-U.S. citizens or by representatives of foreign governments or other foreign entities;

(3) Attendance at the meeting or event is part of the employee's official duties to obtain information, disseminate information, promote the export of U.S. goods and services, represent the United States, or otherwise further programs or

operations of the agency or the U.S. mission in the foreign area; and

(4) The gift of meals, refreshments, or entertainment is from a person other than a foreign government as defined in 5 U.S.C. 7342(a)(2).

Example 1 to paragraph (i): A number of local business owners in a developing country are eager for a U.S. company to locate a manufacturing facility in their province. An official of the Overseas Private Investment Corporation may accompany the visiting vice president of the U.S. company to a dinner meeting hosted by the business owners at a province restaurant where the market value of the food and refreshments does not exceed the per diem rate for that country.

(j) *Gifts to the President or Vice President.* Because of considerations relating to the conduct of their offices, including those of protocol and etiquette, the President or the Vice President may accept any gift on his or her own behalf or on behalf of any family member, provided that such acceptance does not violate § 2635.205(a) or (b), 18 U.S.C. 201(b) or 201(c)(3), or the Constitution of the United States.

(k) *Gifts authorized by supplemental agency regulation.* An employee may accept any gift when acceptance of the gift is specifically authorized by a supplemental agency regulation issued with the concurrence of the Office of Government Ethics, pursuant to 5 CFR 2635.105.

(l) *Gifts accepted under specific statutory authority.* The prohibitions on acceptance of gifts from outside sources contained in this subpart do not apply to any item which a statute specifically authorizes an employee to accept. Gifts which may be accepted by an employee under the authority of specific statutes include, but are not limited to:

(1) Free attendance, course or meeting materials, transportation, lodgings, food and refreshments or reimbursements therefor incident to training or meetings when accepted by the employee under the authority of 5 U.S.C. 4111 from an organization with tax-exempt status under 26 U.S.C. 501(c)(3) or from a person to whom the prohibitions in 18 U.S.C. 209 do not apply. The employee's acceptance must be approved by the agency in accordance with part 410 of this title; or

(2) Gifts from a foreign government or international or multinational organization, or its representative, when accepted by the employee under the authority of the Foreign Gifts and Decorations Act, 5 U.S.C. 7342. As a condition of acceptance, an employee must comply with requirements

imposed by the agency's regulations or procedures implementing that Act.

(m) *Gifts of informational materials.* (1) An employee may accept unsolicited gifts of informational materials when:

(i) The informational materials are primarily provided for educational or instructive purposes, rather than entertainment; and

(ii)(A) The aggregate market value of the informational materials is \$100 or less; or

(B) If the aggregate market value exceeds \$100, an agency designee makes a written determination that acceptance would not be inconsistent with the standard set forth in § 2635.201(b).

(2) *Informational materials.* Informational materials are writings, recordings, documents, records, or other items intended primarily to communicate information, not including images intended primarily for display or decoration, provided that the information relates in whole or in part to the following categories:

(i) The employee's official duties or position, profession, or field of study;

(ii) A general subject matter area, industry, or economic sector affected by or involved in the programs and operations of the agency; or

(iii) Another topic of interest to the agency or its mission.

Example 1 to paragraph (m): An analyst at the Agricultural Research Service receives an edition of an agricultural research journal in the mail from a consortium of private farming operations concerned with soil toxicity. The journal edition has a market value of \$75. The analyst may accept the gift.

Example 2 to paragraph (m): An inspector at the Mine Safety and Health Administration receives a popular novel with a market value of \$25 from a mine operator. Because the novel is primarily for entertainment purposes, the inspector may not accept the gift.

§ 2635.205 Limitations on use of exceptions.

Notwithstanding any exception provided in this subpart, other than § 2635.204(j), an employee may not:

(a) Accept a gift in return for being influenced in the performance of an official act;

(b) Use, or permit the use of, the employee's Government position, or any authority associated with public office, to solicit or coerce the offering of a gift;

(c) Accept gifts from the same or different sources on a basis so frequent that a reasonable person would be led to believe the employee is using the employee's public office for private gain;

Example 1 to paragraph (c): A purchasing agent for a Department of Veterans Affairs medical center routinely deals with

representatives of pharmaceutical manufacturers who provide information about new company products. Because of his crowded calendar, the purchasing agent has offered to meet with manufacturer representatives during his lunch hours Tuesdays through Thursdays, and the representatives routinely arrive at the employee's office bringing a sandwich and a soft drink for the employee. Even though the market value of each of the lunches is less than \$6 and the aggregate value from any one manufacturer does not exceed the \$50 aggregate limitation in § 2635.204(a) on gifts of \$20 or less, the practice of accepting even these modest gifts on a recurring basis is improper.

(d) Accept a gift in violation of any statute. Relevant statutes applicable to all employees include, but are not limited to:

(1) 18 U.S.C. 201(b), which prohibits a public official from, directly or indirectly, corruptly demanding, seeking, receiving, accepting, or agreeing to receive or accept anything of value personally or for any other person or entity in return for being influenced in the performance of an official act; being influenced to commit or aid in committing, or to collude in, or allow, any fraud, or make opportunity for the commission of any fraud, on the United States; or for being induced to do or omit to do any action in violation of his or her official duty. As used in 18 U.S.C. 201(b), the term "public official" is broadly construed and includes regular and special Government employees as well as all other Government officials; and

(2) 18 U.S.C. 209, which prohibits an employee, other than a special Government employee, from receiving any salary or any contribution to or supplementation of salary from any source other than the United States as compensation for services as a Government employee. The statute contains several specific exceptions to this general prohibition, including an exception for contributions made from the treasury of a State, county, or municipality;

(e) Accept a gift in violation of any Executive Order; or

(f) Accept any gift when acceptance of the gift is specifically prohibited by a supplemental agency regulation issued with the concurrence of the Office of Government Ethics, pursuant to 5 CFR 2635.105.

§ 2635.206 Proper disposition of prohibited gifts.

(a) Unless a gift is accepted by an agency acting under specific statutory authority, an employee who has received a gift that cannot be accepted under this subpart must dispose of the

gift in accordance with the procedures set forth in this section. The employee must promptly complete the authorized disposition of the gift. The obligation to dispose of a gift that cannot be accepted under this subpart is independent of an agency's decision regarding corrective or disciplinary action under § 2635.106.

(1) *Gifts of tangible items.* The employee must promptly return any tangible item to the donor, or pay the donor its market value, or, in the case that the tangible item has a market value not in excess of \$100, the employee may destroy the item. An employee who cannot ascertain the actual market value of an item may estimate its market value by reference to the retail cost of similar items of like quality. See § 2635.203(c).

Example 1 to paragraph (a)(1): A Department of Commerce employee received a \$25 T-shirt from a prohibited source after providing training at a conference. Because the gift would not be permissible under an exception to this subpart, the employee must either return or destroy the T-shirt or promptly reimburse the donor \$25. Destruction may be carried out by physical destruction or by permanently discarding the T-shirt by placing it in the trash.

Example 2 to paragraph (a)(1): To avoid public embarrassment to the seminar sponsor, an employee of the National Park Service did not decline a barometer worth \$200 given at the conclusion of his speech on Federal lands policy. To comply with this section, the employee must either promptly return the barometer or pay the donor the market value of the gift. Alternatively, the National Park Service may choose to accept the gift if permitted under specific statutory gift acceptance authority. The employee may not destroy this gift, as the market value is in excess of \$100.

(2) *Gifts of perishable items.* When it is not practical to return a tangible item in accordance with paragraph (a)(1) of this section because the item is perishable, the employee may, at the discretion of the employee's supervisor or the agency designee, give the item to an appropriate charity, share the item within the recipient's office, or destroy the item.

Example 1 to paragraph (a)(2): With approval by the recipient's supervisor, a floral arrangement sent by a disability claimant to a helpful employee of the Social Security Administration may be placed in the office's reception area.

(3) *Gifts of intangibles.* The employee must promptly reimburse the donor the market value for any entertainment, favor, service, benefit or other intangible. Subsequent reciprocation by the employee does not constitute reimbursement.

Example 1 to paragraph (a)(3): A Department of Defense employee wishes to attend a charitable event to which he has

been offered a \$300 ticket by a prohibited source. Although his attendance is not in the interest of the agency under § 2635.204(g), he may attend if he reimburses the donor the \$300 face value of the ticket.

(4) *Gifts from foreign governments or international organizations.* The employee must dispose of gifts from foreign governments or international organizations in accordance with 41 CFR part 102-42.

(b) An agency may authorize disposition or return of gifts at Government expense. Employees may use penalty mail to forward reimbursements required or permitted by this section.

(c) An employee who, on his or her own initiative, promptly complies with the requirements of this section will not be deemed to have improperly accepted an unsolicited gift. An employee who promptly consults his or her agency ethics official to determine whether acceptance of an unsolicited gift is proper and who, upon the advice of the ethics official, returns the gift or otherwise disposes of the gift in accordance with this section, will be considered to have complied with the requirements of this section on the employee's own initiative.

(d) Employees are encouraged to record any actions they have taken to properly dispose of gifts that cannot be accepted under this subpart, such as by sending an electronic mail message to the appropriate agency ethics official or the employee's supervisor.

BILLING CODE 6345-02-P

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

6 CFR Part 5

[Docket No. DHS 2015-0079]

Privacy Act of 1974: Implementation of Exemptions; Department of Homeland Security/United States Coast Guard-029 Notice of Arrival and Departure System of Records

AGENCY: Privacy Office, Department of Homeland Security.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Homeland Security is giving concurrent notice of an updated and reissued system of records pursuant to the Privacy Act of 1974 for the "Department of Homeland Security/United States Coast Guard-029 Notice of Arrival and Departure System of Records" and this proposed

rulemaking. In this proposed rulemaking, the Department proposes to exempt portions of the system of records from one or more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements.

DATES: Comments must be received on or before December 28, 2015.

ADDRESSES: You may submit comments, identified by docket number DHS 2015-0079, by one of the following methods:

- *Federal e-Rulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* 202-343-4010.

- *Mail:* Karen L. Neuman, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528.

Instructions: All submissions received must include the agency name and docket number for this document. All comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: For general questions, please contact: Marilyn Scott-Perez, (202) 475-3515, Privacy Officer, Commandant (CG-61), United States Coast Guard, 2703 Martin Luther King Jr. Ave. SE., Mail Stop 7710, Washington, DC 20593. For privacy questions, please contact: Karen L. Neuman, (202) 343-1717, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528-0655.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS), United States Coast Guard (USCG) is giving notice of a proposed rulemaking that DHS/USCG intends to update its regulations to exempt portions of a system of records from certain provisions of the Privacy Act. Specifically, DHS/USCG proposes to exempt portions of the "DHS/USCG-029 Notice of Arrival and Departure System of Records" from one of more provisions of the Privacy Act because of criminal, civil, and administrative enforcement requirements. DHS/USCG is issuing an updated notice and proposed rule for proposed exemptions for these new categories of records pursuant to 5 U.S.C. 552a(j)(2) and 5 U.S.C. 552 a(k)(2). Furthermore, to the extent certain categories of records are ingested from other systems, the

exemptions applicable to the source systems will remain in effect.

Concurrent with this document, DHS/USCG is updating and reissuing a current DHS system of records titled, “DHS/USCG–029 Notice of Arrival and Departure (NOAD) System of Records.” The collection and maintenance of this information assists DHS/USCG in meeting its statutory obligation to assign priorities while conducting maritime safety and security missions in accordance with international and U.S. regulations. In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) United States Coast Guard (USCG) proposes to update and reissue a current DHS system of records titled, “DHS/USCG–029 Notice of Arrival and Departure (NOAD) System of Records.” The collection and maintenance of this information assists DHS/USCG in meeting its statutory obligation to assign priorities while conducting maritime safety and security missions in accordance with international and U.S. regulations. DHS/USCG is updating this system of records to (1) clarify the authority for the maintenance of the system to align with the recently published *Vessel Requirements for Notices of Arrival and Departure, and Automatic Identification System* Final Rule (January 30, 2015, 80 FR 5281); (2) update the security classification; (3) change the system location to clarify that NOAD records may be stored on information technology (IT) systems connected to classified networks; (4) update the purpose(s) to align with the updated authorities for collection, pursuant to the newly issued *Vessel Requirements for Notices of Arrival and Departure, and Automatic Identification System* Final Rule and to allow for replication of data for analysis and vetting as part of the DHS Data Framework; (5) update categories of individuals and categories of records to clarify that individuals considered “non-crew” for the purposes of this system may include passenger records, as well as organizations; (6) remove routine use (M) because it is not compatible with the original purpose for collection of the records (7) update the retention period and disposal standards to reflect that records will follow the same retention schedule despite their storage in a classified environment; (8) modify the notification procedures to confirm that regardless of record storage on a classified environment, DHS/USCG will review all replicated records; and (9) update the system manager and mailing address to reflect the new mail stop.

II. Privacy Act

The Privacy Act embodies fair information practice principles in a statutory framework governing the means by which federal government agencies collect, maintain, use, and disseminate personally identifiable information. The Privacy Act applies to information that is maintained in a “system of records.” A “system of records” is a group of any records under the control of an agency from which information is retrieved by the name of the individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals where systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors.

The Privacy Act allows government agencies to exempt certain records from the access and amendment provisions. If an agency claims an exemption, however, it must issue a Notice of Proposed Rulemaking to make clear to the public the reasons why a particular exemption is claimed.

DHS is claiming exemptions from certain requirements of the Privacy Act for DHS/USCG–029 Notice of Arrival and Departure System of Records. Some information in DHS/USCG–029 Notice of Arrival and Departure System of Records may be used to support official DHS national security or law enforcement activities. These exemptions are needed to protect information relating to DHS activities from disclosure to subjects or others related to these activities. Specifically, the exemptions are required protect information relating to DHS law enforcement investigations from disclosure to subjects of investigations and others who could interfere with investigatory and law enforcement activities. The exemptions are required to preclude subjects of these activities from frustrating the investigative process; to avoid disclosure of investigative techniques; protect the identities and physical safety of confidential informants and of law enforcement personnel; ensure DHS’s and other federal agencies’ ability to obtain information from third parties and other sources; protect the privacy of third parties; and safeguard sensitive information. Disclosure of information to the subject of the inquiry could also permit the subject to avoid detection or apprehension.

In appropriate circumstances, where compliance would not appear to interfere with or adversely affect the law enforcement purposes of this system and the overall law enforcement process, the applicable exemptions may be waived on a case by case basis.

DHS will not assert any exemption with respect to information maintained in the system that is collected from a person at the time of arrival or departure, if that person, or his or her agent, seeks access or amendment of such information. The DHS/USCG–029 Notice of Arrival and Departure System of Records Notice is also published in this issue of the **Federal Register**.

List of Subjects in 6 CFR Part 5

Freedom of information, Privacy.

For the reasons stated in the preamble, DHS proposes to amend chapter I of title 6, Code of Federal Regulations, as follows:

PART 5—DISCLOSURE OF RECORDS AND INFORMATION

- 1. Revise the authority citation for part 5 to read as follows:

Authority: 6 U.S.C. 101 *et seq.*; Pub. L. 107–296, 116 Stat. 2135; 5 U.S.C. 301. Subpart A also issued under 5 U.S.C. 552. Subpart B also issued under 5 U.S.C. 552a.

- 2. In appendix C to part 5, revise paragraph 34 to read as follows:

Appendix C to Part 5—DHS Systems of Records Exempt From the Privacy Act

* * * * *

34. The DHS/USCG–029 Notice of Arrival and Departure System of Records consists of electronic and paper records and will be used by DHS and its components. The DHS/USCG–029 Notice of Arrival and Departure System of Records is a repository of information held by DHS in connection with its several and varied missions and functions, including, but not limited to the enforcement of civil and criminal laws; investigations, inquiries, and proceedings there under. The DHS/USCG–029 Notice of Arrival and Departure System of Records contains information that is collected by, on behalf of, in support of, or in cooperation with DHS and its components and may contain personally identifiable information collected by other federal, state, local, tribal, foreign, or international government agencies.

The Secretary of Homeland Security, pursuant to 5 U.S.C. 552a(j)(2), exempted this system from the following provisions of the Privacy Act: Sections (c)(3), (e)(8), and (g) of the Privacy Act of 1974, as amended, as is necessary and appropriate to protect this information. Further, DHS has exempted section (c)(3) of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(k)(2) as is necessary and appropriate to protect this information.

Exemptions from these particular subsections are justified, on a case-by-case

basis to be determined at the time a request is made, for the following reasons:

(a) From subsection (c)(3) (Accounting for Disclosures) because release of the accounting of disclosures could alert the subject of an investigation of an actual or potential criminal, civil, or regulatory violation to the existence of that investigation and reveal investigative interest on the part of DHS as well as the recipient agency. Disclosure of the accounting would therefore present a serious impediment to law enforcement efforts and/or efforts to preserve national security. Disclosure of the accounting would also permit the individual who is the subject of a record to impede the investigation, to tamper with witnesses or evidence, and to avoid detection or apprehension, which would undermine the entire investigative process.

(b) From subsection (e)(8) (Notice on Individuals) because compliance would interfere with DHS's ability to obtain, serve, and issue subpoenas, warrants, and other law enforcement mechanisms that may be filed under seal and could result in disclosure of investigative techniques, procedures, and evidence.

(c) From subsection (g)(1) (Civil Remedies) to the extent that the system is exempt from other specific subsections of the Privacy Act.

* * * * *

Karen L. Neuman,

Chief Privacy Officer, Department of Homeland Security.

BILLING CODE 9110-04-P

DEPARTMENT OF ENERGY

10 CFR Parts 429 and 430

[Docket No. EERE-2014-BT-TP-0014]

RIN 1904-AD22

Energy Conservation Program: Test Procedures for Portable Air Conditioners

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Supplemental notice of proposed rulemaking.

SUMMARY: The U.S. Department of Energy (DOE) proposes to modify the test procedure proposals for portable air conditioners (ACs), initially presented in a notice of proposed rulemaking (NOPR) published on February 25, 2015. Upon further analysis and review of the public comments received in response to the February 2015 NOPR, DOE proposes in this supplemental notice of proposed rulemaking (SNOPR) the following additions and clarifications to its proposed portable AC test procedure: (1) Minor revisions to the indoor and outdoor cooling mode test conditions;

(2) an additional test condition for cooling mode testing; (3) updated infiltration air and capacity calculations to account for the second cooling mode test condition; (4) removal of the measurement of case heat transfer; (5) a clarification of test unit placement within the test chamber; (6) removal of the heating mode test procedure; (7) a revision to the CEER calculation to reflect the two cooling mode test conditions and removal of heating mode testing; and (8) additional technical corrections and clarifications. These proposals are to be combined with the initial NOPR proposals and would be codified in a newly created appendix CC to title 10 of the Code of Federal Regulations (CFR), part 430, subpart B. The test procedures would be used to determine capacities and energy efficiency metrics that would be the basis for any future energy conservation standards for portable ACs.

DATES: DOE will accept comments, data, and information regarding this SNOPR, submitted no later than December 28, 2015. See section V, "Public Participation," for details.

ADDRESSES: Any comments submitted must identify the SNOPR for Test Procedures for Portable Air Conditioners, and provide docket number EERE-2014-BT-TP-0014 and/or regulatory information number (RIN) number 1904-AD22. Comments may be submitted using any of the following methods:

1. *Federal eRulemaking Portal:* www.regulations.gov. Follow the instructions for submitting comments.

2. *Email:* PortableAC2014TP0014@ee.doe.gov. Include the docket number and/or RIN in the subject line of the message.

3. *Mail:* Ms. Brenda Edwards, U.S. Department of Energy, Building Technologies Program, Mailstop EE-5B, 1000 Independence Avenue SW., Washington, DC 20585-0121. If possible, please submit all items on a CD. It is not necessary to include printed copies.

4. *Hand Delivery/Courier:* Ms. Brenda Edwards, U.S. Department of Energy, Building Technologies Program, 950 L'Enfant Plaza SW., Room 6094, Washington, DC 20024. Telephone: (202) 586-2945. If possible, please submit all items on a CD. It is not necessary to include printed copies.

For detailed instructions on submitting comments and additional information on the rulemaking process, see section V of this document (Public Participation).

Docket: The docket, which includes **Federal Register** notices, public meeting

attendee lists and transcripts, comments, and other supporting documents/materials, is available for review at www.regulations.gov. All documents in the docket are listed in the www.regulations.gov index. However, some documents listed in the index, such as those containing information that is exempt from public disclosure, may not be publicly available.

A link to the docket Web page can be found at: <http://www.regulations.gov/#!docketDetail;D=EERE-2014-BT-TP-0014>. This Web page will contain a link to the docket for this notice on the www.regulations.gov site. The www.regulations.gov Web page will contain simple instructions on how to access all documents, including public comments, in the docket. See Section V, "Public Participation," for information on how to submit comments through www.regulations.gov.

For further information on how to submit a comment, or review other public comments and the docket, contact Ms. Brenda Edwards at (202) 586-2945 or by email: Brenda.Edwards@ee.doe.gov.

FOR FURTHER INFORMATION CONTACT:

Mr. Bryan Berringer, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE-5B, 1000 Independence Ave. SW., Washington, DC 20585-0121. Telephone: 202-586-0371. Email: Bryan.Berringer@ee.doe.gov.

Ms. Sarah Butler, U.S. Department of Energy, Office of the General Counsel, Mailstop GC-33, 1000 Independence Ave. SW., Washington, DC 20585-0121. Telephone: 202-586-1777; Email: Sarah.Butler@hq.doe.gov.

SUPPLEMENTARY INFORMATION: DOE

intends to incorporate by reference the following industry standard into 10 CFR parts 429 and 430: AHAM PAC-1-2015, Portable Air Conditioners. DOE also intends to incorporate by reference the following industry standard into 10 CFR part 430: ANSI/ASHRAE Standard 37-2009, Methods of Testing for Rating Electrically Driven Unitary Air-Conditioning and Heat Pump Equipment.

Copies of AHAM PAC-1-2015 can be obtained from the Association of Home Appliance Manufacturers 1111 19th Street NW., Suite 402, Washington, DC 20036, 202-872-5955, or by going to <http://www.aham.org/ht/d/ProductDetails/sku/PAC12009/from/714/pid/>.

Copies of ANSI/ASHRAE Standard 37-2009 can be obtained from the American National Standards Institute 25 W. 43rd Street, 4th Floor, New York, NY 10036, 212-642-4980, or by going to

<http://webstore.ansi.org/RecordDetail.aspx?sku=ANSI%2FASHRAE+Standard+37-2009>.

See section IV.B. for a description of these standards.

I. Authority and Background

Title III of the Energy Policy and Conservation Act (EPCA), as amended (42 U.S.C. 6291, *et seq.*; “EPCA” or, “the Act”) sets forth various provisions designed to improve energy efficiency. Part A of title III of EPCA (42 U.S.C. 6291–6309) establishes the “Energy Conservation Program for Consumer Products Other Than Automobiles,” which covers consumer products and certain commercial products (hereinafter referred to as “covered products”).¹ EPCA authorizes DOE to establish technologically feasible, economically justified energy conservation standards for covered products or equipment that would be likely to result in significant national energy savings. (42 U.S.C. 6295(o)(2)(B)(i)(I)–(VII)) In addition to specifying a list of covered consumer and industrial products, EPCA contains

provisions that enable the Secretary of Energy to classify additional types of consumer products as covered products. (42 U.S.C. 6292(a)(20)) For a given product to be classified as a covered product, the Secretary must determine that:

(1) Classifying the product as a covered product is necessary for the purposes of EPCA; and

(2) The average annual per-household energy use by products of each type is likely to exceed 100 kilowatt-hours (kWh) per year. (42 U.S.C. 6292(b)(1))

To prescribe an energy conservation standard pursuant to 42 U.S.C. 6295(o) and (p) for covered products added pursuant to 42 U.S.C. 6292(b)(1), the Secretary must also determine that:

(1) The average household energy use of the products has exceeded 150 kWh per household for a 12-month period;

(2) The aggregate 12-month energy use of the products has exceeded 4.2 terawatt-hours (TWh);

(3) Substantial improvement in energy efficiency is technologically feasible; and

(4) Application of a labeling rule under 42 U.S.C. 6294 is unlikely to be sufficient to induce manufacturers to produce, and consumers and other persons to purchase, covered products of such type (or class) that achieve the maximum energy efficiency that is technologically feasible and economically justified. (42 U.S.C. 6295(l)(1))

Under EPCA, the energy conservation program consists essentially of four parts: (1) testing, (2) labeling, (3) Federal energy conservation standards, and (4) certification and enforcement procedures. The testing requirements consist of test procedures that manufacturers of covered products must use as the basis for: (1) certifying to DOE that their products comply with the applicable energy conservation standards adopted under EPCA, and (2) making representations about the efficiency of those products. Similarly, DOE must use these test procedures to determine whether the products comply with any relevant standards promulgated under EPCA.

A. General Test Procedure Rulemaking Process

Under 42 U.S.C. 6293, EPCA sets forth the criteria and procedures DOE must follow when prescribing or amending test procedures for covered products. EPCA provides in relevant part that any test procedures prescribed or amended under this section shall be reasonably designed to produce test results that measure energy efficiency, energy use or estimated annual operating cost of a

covered product during a representative average use cycle or period of use and shall not be unduly burdensome to conduct. (42 U.S.C. 6293(b)(3)) In addition, if DOE determines that a test procedure should be prescribed or amended, it must publish proposed test procedures and offer the public an opportunity to present oral and written comments on them. (42 U.S.C. 6293(b)(2))

B. Test Procedure for Portable Air Conditioners

There are currently no DOE test procedures or energy conservation standards for portable ACs. On July 5, 2013, DOE issued a notice of proposed determination (NOPD) of coverage (hereinafter referred to as the “July 2013 NOPD”), in which DOE announced that it tentatively determined that portable ACs meet the criteria under 42 U.S.C. 6292(b)(1) to be classified as a covered product. 78 FR 40403. DOE estimated that approximately 974,000 portable AC units were shipped in North America in 2012, and projected that approximately 1.74 million units would be shipped in 2018, representing nearly 80-percent growth in 6 years.² *Id.* at 40404. In addition, DOE estimated the average per-household portable AC electricity consumption for those homes with portable ACs to be approximately 650 kWh per year. *Id.*

In response to the July 2013 NOPD, DOE received comments from interested parties on several topics regarding appropriate test procedures for portable ACs that DOE should consider if it issues a final determination classifying portable ACs as a covered product.

1. The May 2014 NODA

On May 9, 2014, DOE published in the **Federal Register** a notice of data availability (NODA) (hereinafter referred to as the “May 2014 NODA”), in which it agreed that a DOE test procedure for portable ACs would provide consistency and clarity for representations of energy use of these products. DOE evaluated available industry test procedures to determine whether such methodologies would be suitable for incorporation in a future DOE test procedure, should DOE determine to classify portable ACs as a covered product. DOE conducted testing on a range of portable ACs to determine typical cooling capacities and cooling energy efficiencies based on the existing industry test methods and other modified approaches for portable ACs. 79 FR 26639, 26640 (May 9, 2014).

² Transparency Media Research, “Air Conditioning Systems Market—Global Scenario, Trends, Industry Analysis, Size, Share and Forecast, 2012–2018,” January 2013.

¹ For editorial reasons, upon codification in the U.S. Code, Part B was re-designated Part A.

2. The February 2015 NOPR

On February 25, 2015, DOE published in the **Federal Register** a notice of proposed rulemaking (NOPR) (hereinafter referred to as the “February 2015 NOPR”), in which it proposed test procedures for portable ACs that would provide a means of determining efficiency in various operating modes, including cooling mode, heating mode, off-cycle mode, standby mode, and off mode. 80 FR 10211. For cooling mode and heating mode, DOE proposed test procedures based on the then-current industry-accepted test procedure, Association of Home Appliance Manufacturers (AHAM) PAC–1–2014, “Portable Air Conditioners,” with additional provisions to account for heat transferred to the indoor conditioned space from the case, ducts, and any infiltration air from unconditioned spaces. DOE also proposed various clarifications for cooling mode and heating mode testing, including: (1) Test duct configuration; (2) instructions for condensate collection; (3) control settings for operating mode, fan speed, temperature set point, and louver oscillation; and (4) unit placement within the test chamber. For off-cycle mode, DOE proposed a test procedure that would measure portable AC energy use when the ambient dry-bulb temperature is at or below the setpoint. DOE also identified relevant low-power modes, proposed definitions for inactive mode and off mode, and proposed test procedures to determine representative energy consumption for these modes. *Id.*

In the February 2015 NOPR, DOE proposed to use a combined energy efficiency ratio (CEER) metric for representing the overall energy efficiency of single-duct and dual-duct portable ACs. The CEER metric would represent energy use in all available operating modes. DOE also proposed a cooling mode-specific CEER for units that do not provide a heating function to provide a basis for comparing performance with other cooling products such as room ACs. In addition, DOE proposed separate energy efficiency ratio (EER) metrics for determining energy efficiency in cooling mode and heating mode only. 80 FR 10211, 10234–10235 (Feb. 25, 2015).

DOE also recently initiated a separate rulemaking to consider establishing energy conservation standards for portable ACs. Any new standards would be based on the same efficiency metrics derived from the test procedure that DOE would adopt in a final rule in this rulemaking.

II. Synopsis of the Supplemental Notice of Proposed Rulemaking

Upon further analysis and review of the public comments received in response to the February 2015 NOPR, DOE proposes in this SNOPR the following additions and clarifications to its proposed portable AC test procedure: (1) Minor revisions to the indoor and outdoor cooling mode test conditions; (2) an additional test condition for cooling mode testing; (3) updated infiltration air and capacity calculations to account for the second cooling mode test condition; (4) removal of the measurement of case heat transfer; (5) a clarification of test unit placement within the test chamber; (6) removal of the heating mode test procedure; (7) a revision to the CEER calculation to reflect the two cooling mode test conditions and removal of heating mode testing; and (8) additional technical corrections and clarifications.

Other than the specific amendments newly proposed in this SNOPR, DOE continues to propose the test procedure originally included in the February 2015 NOPR. For the reader's convenience, DOE has reproduced in this SNOPR the entire body of proposed regulatory text from the February 2015 NOPR, amended as appropriate according to these proposals. DOE's supporting analysis and discussion for the portions of the proposed regulatory text not affected by this SNOPR may be found in the February 2015 NOPR. 80 FR 10211 (Feb. 25, 2015).

III. Discussion

A. Active Mode

In the February 2015 NOPR, DOE proposed to define active mode, for purposes of the portable AC test procedure, as a mode in which the portable AC is connected to a mains power source, has been activated, and is performing the main functions of cooling or heating the conditioned space, circulating air through activation of its fan or blower without activation of the refrigeration system, or defrosting the refrigerant coil. 80 FR 10211, 10216 (Feb. 25, 2015). DOE has determined that the existing statutory definition of “active mode” is sufficient for purposes of this test procedure and therefore is no longer proposing a separate definition of “active mode” for portable ACs.

B. Cooling Mode

In the February 2015 NOPR, DOE proposed that cooling mode is a mode in which a portable AC has activated the main cooling function according to the thermostat or temperature sensor signal, including activating the refrigeration

system or the fan or blower without activation of the refrigeration system. 80 FR 10211, 10217 (Feb. 25, 2015). DOE determined that the existing industry standards used to measure portable AC cooling capacity and EER, which are based on air enthalpy methods, may not represent true portable AC performance. Additionally, DOE is aware that manufacturers may test according to different industry standards, causing confusion and variation in the reported cooling capacities and EERs for units currently on the market. DOE further concluded that varying infiltration air flow rates and heat losses would preclude a fixed translation factor that could be applied to the results of an air enthalpy measurement to account for the impact of these effects. Therefore, although DOE generally proposed a test procedure for portable ACs based on AHAM PAC–1–2014, the industry-accepted standard for testing portable ACs (which is based on an air enthalpy approach), the proposed test procedure incorporated infiltration air effects and heat losses to more accurately measure performance representative of typical operation and provide a clear and consistent basis for comparison of portable AC capacity and energy use. 80 FR 10211, 10222–10223 (Feb. 25, 2015).

The Appliance Standards Awareness Project (ASAP), Alliance to Save Energy (ASE), American Council for an Energy-Efficient Economy (ACEEE), National Consumer Law Center (NCLC), Natural Resources Defense Council (NRDC), and Northwest Energy Efficiency Alliance (NEEA) (hereinafter the “Joint Commenters”) and the Pacific Gas and Electric Company (PG&E), Southern California Gas Company (SCGC), Southern California Edison (SCE), and San Diego Gas and Electric Company (SDG&E) (hereinafter the “California IOUs”) supported DOE's proposal to adopt AHAM PAC–1–2014 with modifications to account for the impacts of infiltration air and heat transfer from the duct(s) and case, as this would better reflect real-world performance of both single-duct and dual-duct portable ACs. (Joint Commenters, No. 19 at p. 1; California IOUs, No. 20 at p. 1)³ The Joint Commenters further noted that in

³ A notation in the form “Joint Commenters, No. 19 at p. 1” identifies a written comment: (1) Made by the Appliance Standards Awareness Project, Alliance to Save Energy, American Council for an Energy-Efficient Economy, National Consumer Law Center, Natural Resources Defense Council, and Northwest Energy Efficiency Alliance (the “Joint Commenters”); (2) recorded in document number 19 that is filed in the docket of this test procedure rulemaking (Docket No. EERE–2014–BT–TP–0014) and available for review at www.regulations.gov; and (3) which appears on page 1 of document number 19.

response to the NODA, they had encouraged DOE to adopt a test procedure based on the calorimeter approach. In light of the data presented in the February 2015 NOPR, the Joint Commenters now support the proposal to base a DOE portable AC test procedure on AHAM PAC-1-2014 as there is a good correlation with the calorimeter test results when the proposed adjustments that account for the impact of infiltration air and duct and case heat transfer are applied. (Joint Commenters, No. 19 at p. 2)

China WTO/TBT National Notification & Enquiry Center (China) noted that, compared to the industry-accepted and commonly used American National Standards Institute (ANSI)/ American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE) Standard 128-2001, "Method of Rating Unitary Spot Air Conditioners," AHAM PAC-1-2014 is significantly more complex, increases the cost of testing, and would require laboratories to purchase new instrumentation and update or reconstruct their chambers. Further, China stated that DOE did not provide a comparison between AHAM PAC-1-2014 and ANSI/ASHRAE 128-2001 based on test data. Without a comparison of the results, China does not believe that DOE can conclude there is a marked difference between the two, and cannot determine that testing according to AHAM PAC-1-2014 is necessary. China requested that DOE provide comparative data between the two test procedures. (China, No. 15 at pp. 3-4)

De' Longhi Appliances s.r.l. (De' Longhi) claimed that in the United States, most manufacturers are using the standard ANSI/ASHRAE 128-2001 to rate the performance of single-duct

portable ACs. De' Longhi stated, however, that testing a single-duct portable AC according to AHAM PAC-1-2014 results in a cooling capacity about 25 percent lower than the rating obtained with ANSI/ASHRAE 128-2001. Despite this rated cooling capacity reduction, De' Longhi supports the use of AHAM PAC-1-2014 because it ensures more reliable and repeatable testing data. (De' Longhi, No. 16 at pp. 1-2)

AHAM and De' Longhi support the use of AHAM PAC-1-2014 as the basis for a DOE test procedure for portable ACs, albeit without the addition of certain test procedure provisions that DOE has proposed. (Public Meeting Transcript, AHAM, No. 13 at p. 31; Public Meeting Transcript, De' Longhi, No. 13 at pp. 13, 33; AHAM, No. 18 at p. 2; De' Longhi, No. 16 at p. 2)⁴

DOE agrees that certain portable ACs may be currently tested according to ANSI/ASHRAE 128-2001, but believes this is largely due to California's regulations for certifying spot coolers sold in that State. As discussed in the February 2015 NOPR, DOE is not proposing testing procedures for spot coolers at this time. 80 FR 10212, 10214-15 (Feb. 25, 2015). In addition, ANSI/ASHRAE 128-2001 is an obsolete version of that test standard, and DOE expects that manufacturers conducting testing of their portable ACs for reasons other than certification in California may be using a current, industry-accepted test standard such as AHAM PAC-1-2014 or ANSI/ASHRAE 128-2011, both of which were discussed and analyzed in the May 2014 NODA and February 2015 NOPR. For these reasons, and with the general support of interested parties, DOE continues to propose a test procedure for portable ACs that is based on the current version

of AHAM PAC-1. DOE notes that AHAM issued a new version of PAC-1 in 2015, with no changes in language from the 2014 version. Therefore, although DOE previously proposed to adopt a test procedure for portable ACs that is based on AHAM PAC-1-2014, DOE now proposes in this SNOPR to reference the identical updated version, AHAM PAC-1-2015, in the proposed DOE portable AC test procedure. Accordingly, DOE refers to AHAM PAC-1-2015 for the remainder of this SNOPR when discussing its current proposals.

Additionally, this notice discusses other modifications to the test procedure proposed in the February 2015 NOPR to address commenters' concerns, improve repeatability, minimize test burden, and ensure the test procedure is representative of typical consumer usage.

1. Test Chamber and Infiltration Air Conditions

DOE proposed in the February 2015 NOPR to utilize the following ambient conditions presented in Table III.1 below, based on those test conditions specified in Table 3, "Standard Rating Conditions," of AHAM PAC-1-2014. DOE also proposed to determine test configurations according to Table 2 of AHAM PAC-1-2014, with Test Configuration 3 applicable to dual-duct portable ACs and Test Configuration 5 applicable to single-duct portable ACs. 80 FR 10211, 10226 (Feb. 25, 2015). For single-duct units, the condenser inlet conditions are the same as the evaporator inlet. For dual-duct units, the condenser inlet air conditions are monitored at the interface between the condenser inlet duct and outdoor test room.

TABLE III.1—STANDARD RATING CONDITIONS—COOLING MODE—NOPR PROPOSAL

Test configuration	Evaporator inlet air, °F (°C)		Condenser inlet air, °F (°C)	
	Dry bulb	Wet bulb	Dry bulb	Wet bulb
3	80.6 (27)	66.2 (19)	95.0 (35)	75.2 (24)
5	80.6 (27)	66.2 (19)	80.6 (27)	66.2 (19)

⁴ A notation in the form "AHAM, Public Meeting Transcript, No. 13 at p. 31" identifies an oral comment that DOE received on March 18, 2015 during the NOPR public meeting, was recorded in the public meeting transcript in the docket for this test procedure rulemaking (Docket No. EERE-2014-BT-TP-0014). This particular notation refers to a comment (1) made by the Association of Home Appliance Manufacturers during the public

meeting; (2) recorded in document number 13, which is the public meeting transcript that is filed in the docket of this test procedure rulemaking; and (3) which appears on page 31 of document number 13.

a. Test Chamber Conditions

In the February 2015 NOPR, DOE noted that the AHAM PAC–1–2014 test conditions are slightly different from the AHAM PAC–1–2009 test conditions, which AHAM revised to harmonize with the temperatures specified in Canadian Standards Association (CSA) C370–2013, “Cooling Performance of Portable Air Conditioners” and ANSI/ASHRAE Standard 128–2011, “Method of Rating Portable Air Conditioners.” DOE’s analysis and testing was conducted in accordance with AHAM PAC–1–2009, as the next version of the standard, AHAM PAC–1–2014, had not yet been finalized. DOE tentatively determined that the test condition differences between the 2009 and 2014 versions of AHAM PAC–1 would not substantively impact test results. Therefore, DOE proposed to use the updated test conditions from AHAM PAC–1–2014. DOE also noted in the February 2015 NOPR that these conditions are close, but not identical, to those required by the DOE room AC test procedure (80 degrees Fahrenheit (°F) dry-bulb temperature and 67 °F wet-bulb temperature on the indoor side, and 95 °F dry-bulb temperature and 75 °F wet-bulb temperature on the outdoor side, consistent with the AHAM PAC–1–2009 conditions). 80 FR 10211, 10226 (Feb. 25, 2015).

AHAM agreed that there are no major differences between the 2009 and 2014 versions, and that the main changes were editorial in nature to harmonize with the Canadian test procedure. AHAM stated that it is important that the North American and Canadian methods are harmonized. (Public Meeting Transcript, AHAM, No. 13 at pp. 31–32)

DENSO Products and Services Americas, Inc. (DENSO) commented that the room AC indoor test conditions

in the DOE test procedure for those products correspond to about 50-percent relative humidity, whereas the AHAM PAC–1–2014 indoor test conditions are closer to 40-percent relative humidity. According to DENSO, this is a significant difference in test conditions and thus the AHAM PAC–1–2014 test conditions are not comparable to those for room ACs or other air conditioning products. DENSO also commented that the test conditions should be expressed in whole degrees instead of three-digit dry-bulb and wet-bulb temperatures in °F that are equivalent to whole degrees Celsius in other standards. (Public Meeting Transcript, DENSO, No. 13 at pp. 47–48, 69–70; DENSO, No. 14 at p. 2)

In response to the comments received regarding the chamber test conditions, DOE examined the relative impact of the varying latent heat differential between the indoor and outdoor conditions in the February 2015 NOPR proposal and in AHAM PAC–1–2009. The latent heat differential impacts cooling capacity primarily through the effects of infiltration air. Based on the average dry air mass flowrate for the single-duct and dual-duct units in DOE’s test sample, DOE estimated that the change in test conditions from the 2009 to either the 2014 or 2015 version of AHAM PAC–1 would decrease cooling capacity by increasing the heating effect due to infiltration air by an average of 755 Btu/h and 330 Btu/h for the two configurations, respectively. With an average PAC–1–2009 cooling capacity (without accounting for infiltration air, case, or duct heat effects) of 7,650 Btu/h for single-duct units and 6,800 Btu/h for dual-duct units, adjusting the test conditions from the 2009 to 2015 version of AHAM PAC–1 would decrease cooling capacity by 5–10 percent, an amount which DOE

considers to be significant. Therefore, DOE no longer concludes that the test condition differences between the 2009 and 2014 (and, thus, 2015) versions of AHAM PAC–1 would not substantively impact test results.

DOE further notes that the test conditions in AHAM PAC–1–2015, although harmonized with those in CSA C370–2013 and ANSI/ASHRAE Standard 128–2011, do not align with the test conditions in the DOE test procedures for other cooling products, particularly room ACs and central ACs. As noted earlier in this section, the AHAM PAC–1–2015 test approach is generally appropriate for portable ACs. However, DOE believes that the test conditions in AHAM PAC–1–2009, which align with the conditions used for testing other DOE covered products, are more appropriate for testing portable AC performance than those in AHAM PAC–1–2015. The temperatures specified in AHAM PAC–1–2015 were rounded to produce whole degrees Celsius, which results in a relative humidity on the indoor side (47.0 percent) that differs significantly from the relative humidity that DOE has previously determined for room ACs and central ACs is representative of a residential air-conditioned space (51.1 percent). To maintain consistency among products with similar functions, DOE proposes in this SNOPR to revise the test conditions proposed in the February 2015 NOPR to those presented in Table III.2 below, which would replace the test conditions specified in Table 3, “Standard Rating Conditions,” of AHAM PAC–1–2015. As discussed in the next section, however, these revisions do not comprise the only changes that DOE is proposing in this SNOPR to the rating conditions for portable ACs.

TABLE III.2—REVISED STANDARD RATING CONDITIONS—COOLING MODE

Test configuration	Evaporator inlet air, °F (°C)		Condenser inlet air, °F (°C)	
	Dry bulb	Wet bulb	Dry bulb	Wet bulb
3	80 (26.7)	67 (19.4)	95 (35)	75 (23.9)
5	80 (26.7)	67 (19.4)	80 (26.7)	67 (19.4)

b. Infiltration Air Conditions

In the February 2015 NOPR, DOE noted that infiltration from outside the conditioned space occurs due to the negative pressure induced as condenser air is exhausted to the outdoor space. Although this effect is most pronounced for single-duct units, which draw all of their condenser air from within the

conditioned space, dual-duct units also draw a portion of their condenser air from the conditioned space. DOE proposed calculating the infiltration air flow rate as the condenser exhaust flow rate to the outdoor chamber minus any condenser intake flow rate from the outdoor chamber. DOE proposed that the infiltration air conditions be 95 °F dry-bulb temperature and 75.2 °F wet-

bulb temperature, consistent with the outdoor conditions specified in AHAM PAC–1–2014. 80 FR 10211, 10224–10225 (Feb. 25, 2015).

The Joint Commenters supported the proposal to use 95 °F dry-bulb temperature and 75 °F wet-bulb temperature outdoor air. (Public Meeting Transcript, ASAP, No. 13 at p. 44; Joint Commenters, No. 19 at p. 2)

The Joint Commenters further stated that because AHAM PAC-1-2014 is conducted using these outdoor air conditions, it is important that the same conditions be used for the infiltration air to reflect the real-world performance of portable ACs under these outdoor air conditions. The Joint Commenters noted that all infiltration air is ultimately coming from the outdoors and adding heat to the home where the portable AC is installed. The Joint Commenters suspect that, in many cases, the bulk of the infiltration air will be coming directly from the outdoors due to imperfect installations, resulting in leaks through the window where the portable AC is installed. The Joint Commenters also suspect that over time, a greater portion of the infiltration air will come directly through the window where the portable AC is installed due to deterioration of the installation as the unit is repeatedly removed and re-installed. (Joint Commenters, No. 19 at p. 2)

De' Longhi did not agree with DOE's proposed approach to address infiltration air, stating that it would improperly represent the performance of single-duct products because the proposed infiltration air conditions of 95 °F dry-bulb temperature and 75.2 °F wet-bulb temperature represent worst-case outdoor conditions which occur for a negligible period of time during the cooling season. De' Longhi noted that according to ANSI/Air-Conditioning, Heating, and Refrigeration Institute (AHRI) 210/240, "Performance Rating of Unitary Air-Conditioning and Air-Source Heat Pump Equipment", outdoor temperatures ranging from 95 to 104 °F represent just 2.2 percent of the season while outdoor temperatures range from 65 to 80 °F during 66.1 percent of the season. De' Longhi stated that selection of an appropriate outdoor temperature for rating testing is critical for single-duct portable ACs. As a consequence, De' Longhi commented that DOE's proposed procedure overstates the impacts of infiltration air. (Public Meeting Transcript, De' Longhi, No. 13 at pp. 39-40; De' Longhi, No. 16 at p. 3)

The National Association of Manufacturers (NAM) stated that if the test procedure includes an infiltration air adjustment, the temperature must be representative and based on data. In NAM's view, given the uniqueness of homes, the proposed infiltration air temperatures are not practical, nor are they shown to be based on available data. (NAM, No. 17 at p. 2)

AHAM commented that portable ACs are not used just on the hottest summer days, but also during the transition

periods before and after summer to cool only a certain room or rooms before central air conditioning or heating is turned on. According to AHAM, this use pattern suggests that an outdoor temperature representing the hottest days of summer is not representative of consumer use. AHAM commented that even if consumers use portable ACs only in the summer and only the outdoor air temperature is considered, a 95 °F infiltration air temperature would still be too high. (AHAM, No. 18 at p. 4)

De' Longhi and AHAM suggested that, should DOE include a numerical adjustment for infiltration air to the results of testing with AHAM PAC-1-2014, the proper temperature for the infiltration air would be 70 °F, based on available data. They noted that 70 °F is the representative average cooling season temperature that DOE found for the United States as a whole. They also claimed that according to ANSI/AHRI 210/240-2008, an outdoor temperature of 70 °F represents 50 percent of the total cooling season hours. (Public Meeting Transcript, De' Longhi, No. 13 at p. 41; De' Longhi, No. 16 at p. 3; AHAM, No. 18 at p. 4) De' Longhi further stated that if DOE decides not to use 70 °F as the outdoor air temperature, this test condition should be no greater than 80.6 °F dry-bulb, the standard rating condition for single-duct portable ACs in AHAM PAC-1-2014 for both indoor and outdoor conditions. In order to compare single-duct and dual-duct portable ACs under the same conditions, De' Longhi would also accept 80.6 °F as the outdoor conditions for dual-duct units as well. (Public Meeting Transcript, De' Longhi, No. 13 at pp. 43-44; De' Longhi, No. 16 at p. 4)

Friedrich commented that 70 °F is low for an outdoor temperature that would necessitate AC use, and suggested DOE consider 80 °F as the outdoor condition. (Public Meeting Transcript, Friedrich, No. 13 at pp. 84-85)

In addition to the proposed temperatures for infiltration air, DOE received comments regarding the likely origin of the infiltration air to help inform the appropriate infiltration air conditions. De' Longhi noted that it is possible that some or all of the replacement air is drawn from a location other than the outdoors directly, such as a basement, attic, garage, or a space that is conditioned by other equipment. Thus, De' Longhi stated that DOE's proposed approach is unrealistic, as the building spaces from which infiltration air may be drawn and other inside air that may be cooled by central cooling

systems must be taken into account. De' Longhi also commented that DOE's approach did not account for any internal heating loads, solar radiation, or thermal lag of the building itself. (Public Meeting Transcript, De' Longhi, No. 13 at pp. 41-43; De' Longhi, No. 16 at pp. 3-4)

AHAM agreed with De' Longhi, and noted that even if all air in a home originates from outdoors, the infiltration air may be cooled once indoors. Moreover, AHAM noted that the infiltration air could be at different temperatures for a portable AC that is moved from room to room—for example, the air in a garage is not likely the same temperature as the air in an attic or basement. AHAM commented that if DOE accounts for the effects of infiltration air, DOE must ensure that the temperature is representative and based on data. In AHAM's view, given the uniqueness of homes, that is not practical to do. (AHAM, No. 18 at pp. 3-4)

AHAM, NAM, and DENSO stated that should DOE nevertheless move forward with its proposal, it must ensure it selects a representative test temperature for that infiltration air. They commented that DOE's current proposal is not representative and should be revised. (AHAM, No. 18 at p. 1; NAM, No. 17 at p. 3; DENSO, No. 14 at p. 3)

In response to comments received on the February 2015 NOPR, DOE conducted additional analysis to ensure the DOE test procedure for portable ACs is representative of typical cooling product operation and consumer usage. On the matter of the source of infiltration air, DOE reviewed information developed on infiltration air flow rates and sources for room ACs, which encounter issues for sealing in windows similar to portable ACs. In a study conducted by the National Renewable Energy Laboratory (NREL),⁵ infiltration air flow rates around the louvers on either side of three room AC test units and the air flow rates through the units themselves were measured when the units were installed in a test chamber outfitted with two residential single-hung windows. The units, including the side louvers, were installed per manufacturer instructions (*i.e.*, no additional sealing around the louvers was provided). A variable-speed blower was used to vary the differential pressure between the test chamber and ambient (outdoor condition) from 0 to 50 Pascals (Pa). NREL found that at 50

⁵ Winkler, J., *et al.*, 2013. "Laboratory Performance Testing of Residential Window Air Conditioners," National Renewable Energy Laboratory, Technical Report NREL/TP-5500-57617, March 2013.

Pa, the infiltration air flow rates around the louvers ranged from approximately 50 to 90 standard cubic feet per minute (SCFM) among the three test units. These infiltration air flow rates represented as much as two thirds of the rated evaporator air flow rates at high fan speed, and similarly would also represent a substantial percentage of the infiltration air for a single-duct portable AC. NREL estimated that the infiltration air leakage path around the louvers was the equivalent of a 27 to 42 square-inch hole in the wall. Because DOE observed that the window brackets for mounting the portable AC duct(s) in its test sample typically did not include any gasket, tape, or other sealing material, it concludes that outdoor air leaking through the portable AC's window bracket likely also represents the source of a substantial percentage of the infiltration air for portable ACs. Additionally, because portable ACs that do not draw all of the condenser air from outside the conditioned space create net negative pressure within the conditioned space, infiltration air flow is likely greater than for room ACs. Therefore, DOE continues to conclude that infiltration air temperature is best represented as the outdoor test condition.

DOE also notes that the temperature of infiltration air from sources other than the window bracket cannot be definitively characterized because the air temperature in the other locations may be greater than (e.g., an attic) or less than (e.g., a basement) the outdoor temperature. In addition, infiltration air that is drawn from other conditioned

space initially originated from locations that could also be direct sources of infiltration air for a portable AC, and thus DOE believes that the portable AC should not derive a *de facto* benefit by being rated at a lower infiltration air temperature achieved via the energy consumption of other conditioning equipment.

DOE next considered commenters' suggestion that the outdoor test condition in the current version of AHAM PAC-1 may not be representative of a significant portion of portable AC operation. DOE revisited its climate analysis from the February 2015 NOPR to determine the overall average dry-bulb temperature and relative humidity during hours allotted for cooling mode operation, in locations where portable ACs are likely to be used. DOE again performed this climate analysis using 2012 hourly ambient temperature data from the National Climatic Data Center (NCDC) of the National Oceanic and Atmospheric Administration (NOAA), collected at weather stations in 44 representative states. DOE determined the average temperature and humidity associated with the hottest 750 hours for each state for which there was data available. DOE then reviewed data from the 2009 *Residential Energy Consumption Survey (RECS)*⁶ to identify room AC ownership in the different geographic regions because no portable AC-specific usage data were available. Based on the *RECS* ownership data, DOE used a weighted-average approach to combine the average temperature and humidity for each individual state into sub-regional,

regional, and finally, the representative national average temperature and humidity for the hottest 750 hours in each state.⁷ DOE found that the national average dry-bulb temperature and relative humidity associated with the hottest 750 hours are 83 °F and 45 percent, respectively.

To maintain harmonization with other cooling products and the AHAM PAC-1-2009 test conditions, as discussed previously, and to continue to consider cooling performance under a rating condition at which product performance is most important to consumers, DOE proposes to specify the outdoor test conditions and associated infiltration air conditions of 95 °F dry-bulb and 75 °F wet-bulb temperature. However, DOE also proposes in this SNOPR that a second cooling mode test be conducted for dual-duct units (Test Configuration 3) at outdoor test conditions that reflect the weighted-average temperature and humidity observed during the hottest 750 hours (the hours during which DOE expects portable ACs to operate in cooling mode): 83 °F dry-bulb temperature and 67.5 °F wet-bulb temperature. For single-duct units (Test Configuration 5), DOE would specify a second set of numerical calculations for cooling capacity and CEER based on adjustments for infiltration air at these same conditions, rather than providing for an additional test at the weighted-average outdoor temperature and humidity. In sum, Table III.3 shows the complete set of cooling mode rating conditions that DOE proposes for portable ACs in this SNOPR.

TABLE III.3—STANDARD RATING CONDITIONS—COOLING MODE—SNOPR PROPOSAL

Test configuration	Evaporator inlet air, °F (°C)		Condenser inlet air, °F (°C)	
	Dry bulb	Wet bulb	Dry bulb	Wet bulb
3 (Condition A)	80 (26.7)	67 (19.4)	95 (35)	75 (23.9)
3 (Condition B)	80 (26.7)	67 (19.4)	83 (28.3)	67.5 (19.7)
5	80 (26.7)	67 (19.4)	80 (26.7)	67 (19.4)

c. Infiltration Air Calculations

In the February 2015 NOPR, DOE proposed that the sensible and latent components of infiltration air heat transfer be calculated using the evaporator inlet conditions, to be representative of the indoor room's ambient conditions. As discussed above, DOE proposed that the nominal indoor test chamber conditions for portable AC testing would be 80 °F dry-bulb

temperature and 67 °F wet-bulb temperature, resulting in a humidity ratio of 0.0112 pounds of water per pounds of dry air (lb_w/lb_{da}). DOE further proposed in the February 2015 NOPR that the indoor test chamber dry-bulb and wet-bulb temperature conditions be maintained within a range of 1.0 °F, with an average difference of 0.3 °F. 80 FR 10211, 10224, 10226 (Feb. 25, 2015).

DOE notes that the allowable tolerances for the indoor evaporator

inlet conditions would permit variations in the humidity ratio of up to 8.6 percent. DOE reviewed its test data and found that the maximum variation between the measured and proposed humidity ratio was 4.5 percent. DOE believes that the proposal to use the measured evaporator inlet conditions (dry-bulb and wet-bulb temperatures and the resulting humidity ratio) when calculating the impacts of infiltration air

⁶ RECS data are available online at: <http://www.eia.gov/consumption/residential/data/2009/> www.eia.gov/consumption/residential/data/2009/.

⁷ For more information on the weighted-average approach that DOE conducted for this analyses, see

the February 2015 NOPR. 80 FR 10211, 10235-27 (Feb. 25, 2015).

heat transfer may introduce variability in the test results due to the sensitivity of infiltration air to the allowable evaporator inlet conditions variability and the resulting impact on overall cooling capacity. Therefore, DOE proposes in this SNOPR to calculate the sensible and latent heat contributions of infiltration air using the nominal test chamber temperatures and subsequent humidity ratio to reduce test variability.

DOE further notes that there was an error in the equations proposed in the February 2015 NOPR that divided the quantity of heat, in Btu/min, by 60 instead of multiplying by 60 to convert to Btu/h. 80 FR 10211, 10224 (Feb. 25, 2015). This SNOPR corrects the calculation error in DOE's proposal.

Based on these changes, DOE proposes in this SNOPR to calculate the sensible and latent heat components of infiltration air, using the nominal test chamber temperatures and subsequent humidity ratio, as follows:

$$Q_s = \dot{m} \times 60 \times [(c_{p_da} \times (T_{ia} - T_{indoor})) + c_{p_wv} \times (\omega_{ia} \times T_{ia} - \omega_{indoor} \times T_{indoor})]$$

Where:

Q_s is the sensible heat added to the room by infiltration air, in Btu/h;

\dot{m} is the dry air mass flow rate of infiltration air for a single-duct or dual-duct unit, in lb/m;

c_{p_da} is the specific heat of dry air, 0.24 Btu/lb_m-°F.

c_{p_wv} is the specific heat of water vapor, 0.444 Btu/lb_m-°F.

T_{indoor} is the indoor chamber dry-bulb temperature, 80 °F.

T_{ia} is the infiltration air dry-bulb temperature, 95 °F.

ω_{ia} is the humidity ratio of the infiltration air, 0.0141 lb_w/lb_{da}.

ω_{indoor} is the humidity ratio of the indoor chamber air, 0.0112 lb_w/lb_{da}.

60 is the conversion factor from minutes to hours.

$$Q_l = \dot{m} \times 60 \times H_{fg} \times (\omega_{ia} - \omega_{indoor})$$

Where:

Q_l is the latent heat added to the room by infiltration air, in Btu/h.

\dot{m} is the mass flow rate of infiltration air for a single-duct or dual-duct unit, in lb/m.

H_{fg} is the latent heat of vaporization for water vapor, 1061 Btu/lb_m.

ω_{ia} is the humidity ratio of the infiltration air, 0.0141 lb_w/lb_{da}.

ω_{indoor} is the humidity ratio of the indoor chamber air, 0.0112 lb_w/lb_{da}.

60 is the conversion factor from minutes to hours.

2. Test Duration

AHAM PAC-1-2015 specifies testing in accordance with certain sections of ANSI/ASHRAE Standard 37-2009, "Methods of Testing for Rating Electrically Driven Unitary Air-Conditioning and Heat Pump Equipment" (ASHRAE 37-2009), but

does not explicitly specify the test duration required when conducting portable AC active mode testing. Therefore, DOE proposes in this SNOPR that the active mode test duration shall be determined in accordance with section 8.7 of ASHRAE 37-2009.

3. Seasonally Adjusted Cooling Capacity

In the February 2015 NOPR, DOE proposed a calculation for adjusted cooling capacity, ACC, defined as the measured cooling capacity adjusted for case, duct, and infiltration air heat transfer impacts. 80 FR 10211, 10225 (Feb. 25, 2015).

With the proposal to add a second cooling mode test condition for dual-duct portable ACs and, similarly, a second numerically applied infiltration air condition for single-duct portable ACs, DOE proposes that the adjusted cooling capacities for both sets of conditions be combined to create a seasonally adjusted cooling capacity, SACC. The higher outdoor temperature condition is consistent with that used for testing other air conditioning equipment and ensures that products can operate when they are most needed, while the cooler condition represents the typical outdoor temperatures encountered during use. Because the performance of a portable AC is important under each of these scenarios, DOE proposes in this SNOPR to weight the adjusted cooling capacities obtained under the two cooling mode conditions to calculate the SACC as follows.

Using an analytical approach based on climate and RECS data that was similar to the method used to determine representative rating conditions, DOE estimated the percentage of portable AC operating hours that would be associated with each rating condition. From the climate data, DOE allocated the number of annual hours with temperatures that ranged from 80 °F (the indoor test condition) to 89 °F (a temperature mid-way between the two rating conditions) to the 83 °F rating condition. The hours in which the ambient temperature was greater than 89 °F were assigned to the 95 °F rating condition. DOE then performed the geographical weighted averaging using the RECS data as discussed in section III.1.b to determine weighting factors of 19.7 percent and 80.3 percent, respectively, for the 95 °F and 83 °F rating conditions. A similar approach was adopted for central ACs, where DOE specifies eight test conditions and corresponding weighting factors that are based on the distribution of fractional hours for representative temperature

bins.⁸ For portable ACs, DOE estimated hours per temperature bin from the climate data analysis, and proposes in this SNOPR to apply weighting factors of 20 percent and 80 percent to the results of its testing at 95 °F and 83 °F, respectively. DOE welcomes input on whether different weighting factors would be appropriate.

Therefore, DOE proposes to calculate SACC according to the following equation.

$$SACC = (ACC_{95} \times 0.2) + (ACC_{83} \times 0.8)$$

Where:

SACC is the seasonally adjusted cooling capacity, in Btu/h.

ACC_{95} and ACC_{83} are the adjusted cooling capacities calculated at the 95 °F and 83 °F dry-bulb outdoor conditions, in Btu/h, respectively.

0.2 is the weighting factor for ACC_{95} .

0.8 is the weighting factor for ACC_{83} .

4. Duct Heat Transfer and Leakage

In the February 2015 NOPR, DOE presented its determination that duct heat losses and air leakage are non-negligible effects, and therefore proposed to account for heat transferred from the duct surface to the conditioned space in the portable AC test procedure. DOE proposed that four equally spaced thermocouples be adhered to the side of the entire length of the condenser exhaust duct for single-duct units and the condenser inlet and exhaust ducts for dual-duct units. DOE proposed to determine the duct heat transfer for each duct from the average duct surface temperature as measured by the four thermocouples, a convection heat transfer coefficient of 4 Btu/h per square foot per °F (Btu/h-ft²-°F), and the calculated duct surface area based on the test setup. 80 FR 10211, 10227 (Feb. 25, 2015).

a. Duct Heat Transfer Impacts

ASAP supported incorporating the duct heat transfer effects into the measurement of cooling capacity, and noted that there was a reasonably good correlation between the results using the calorimeter method and the modified AHAM method, as presented in the February 2015 NOPR. (Public Meeting Transcript, ASAP, No. 13 at p. 56)

AHAM and De' Longhi stated that DOE's proposed test for duct heat transfer and leakage unnecessarily complicates the test procedure without a corresponding benefit. They also stated that the methodology for the temperature sensor placement and determination of overall heat losses may be interpreted differently. AHAM

⁸ The DOE test procedure for central ACs is codified at 10 CFR part 430, subpart B, appendix M.

further commented that should DOE decide to include provisions for duct heat transfer and leakage, DOE should evaluate the impact of these effects on test procedure repeatability and reproducibility, preferably through a round robin test including manufacturers and third-party laboratories. (AHAM, No. 18 at p. 5; De' Longhi, No. 16 at p. 4)

China commented that DOE did not present the percent of the total cooling capacity associated with the duct and case heat transfer, and that it would be necessary to consider such data before adopting an approach that accounts for these heat transfer effects. (China, No. 15 at p. 3)

In response to these comments, DOE conducted further analysis to quantify the impacts of duct heat transfer. Figure

III.1 shows the impact of duct heat transfer as a percentage of the AHAM PAC-1-2009 cooling capacity measured in the February 2015 NOPR for each unit in DOE's test sample. Exhaust duct heat transfer is presented for each single-duct unit, while a pair of values for inlet duct heat transfer and exhaust duct heat transfer are presented for each dual-duct unit.

Figure III.1 Duct Heat Transfer as a Percentage of AHAM PAC-1-2009 Cooling Capacity for each Test Unit in the February 2015 NOPR

As shown in Figure III.1, the exhaust duct heat transfer determined according to the proposed methodology ranged from just below 6 percent to almost 18 percent of the AHAM PAC-1-2009 cooling capacity, with an average value of 11.1 percent. The intake duct heat transfer effect was lower than that of the exhaust duct due to the lower air temperature at the inlet, with values ranging from about 3 percent to almost 5 percent of the unadjusted cooling capacity and an average of 3.7 percent. DOE finds the exhaust and intake duct heat transfer impacts sufficiently significant to warrant the added test burdens associated with determining duct heat transfer. Therefore, DOE maintains the proposal from the February 2015 NOPR to measure and incorporate the duct heat transfer impacts into the overall seasonally adjusted cooling capacity.

b. Convection Coefficient

DENSO considered the 4 Btu/h-ft² °F convection coefficient

proposed for the duct heat transfer calculation to be arbitrary, and recommended measuring the conditions of the air at the inlet and outlet of each duct to substantiate that factor. (Public Meeting Transcript, DENSO, No. 13 at p. 53; DENSO, No. 14 at p. 2) DOE recognizes that different test setups may have somewhat different convective heat transfer coefficients. However, when developing test procedures, DOE must consider the test burden and impact on manufacturers and test laboratories. Taking that into consideration, DOE proposed an approach in the February 2015 NOPR that would minimize burden while capturing the impact of heat transfer from ducts, which DOE determined to have a significant impact on overall net cooling capacity. DOE also notes that the approach proposed by DENSO to characterize heat loss to the conditioned space would significantly increase test burden, requiring additional thermocouples and modification of the test setup on the unit-side of the duct.

Further, DOE notes that the convection heat transfer coefficient may vary among different laboratories and even for different chambers and test setups within each test laboratory. This would introduce variability from test to test, as the heat transfer coefficient may be highly sensitive to the specific test setup. To minimize the test burden and limit variability, DOE proposed one convection heat transfer coefficient for all units to provide a consistent estimate of the duct heat transfer.

In the February 2015 NOPR, DOE estimated the convection heat transfer coefficient to be 4 Btu/h-ft² °F based on a midpoint of values associated with free convection and forced convection, as recommended by the test laboratory that conducted testing for the NOPR. 80 FR 10211, 10219 (Feb. 25, 2015). The convection coefficient was based on values derived from coefficients listed in the 2013 *ASHRAE Handbook*—

*Fundamentals*⁹ for various types of assemblies in buildings. Depending on the orientation of the surface, direction of heat flow, and emissivity of the heat transfer surface, the typical coefficients for indoor assemblies, which DOE deduced would be subject primarily to free convection, ranged from 0.22 to 1.63 Btu/h-ft² °F. ASHRAE also provided coefficients for assemblies located outside and subject to wind speeds of 7.5 and 15 miles per hour (5.1 and 10.2 feet per second, respectively), which were 4.00 and 6.00 Btu/h-ft² °F, respectively. Because these speeds potentially correspond to air flow speeds over the portable AC duct(s) due to circulation of the conditioned air in the space, for example by the portable AC blower and infiltration air, DOE used these values as proxies for convective heat transfer coefficients for the duct surfaces. Therefore, DOE proposed in the February 2015 NOPR that the overall heat transfer coefficient for calculating duct heat losses would be 4 Btu/h-ft² °F, an approximate midpoint of the values described.

To further validate the proposed convection heat transfer coefficient for this notice, DOE re-examined the data it obtained from testing a sample of four single-duct and two dual-duct portables ACs with and without duct insulation for the May 2014 NODA. These tests were conducted using the calorimeter approach described in the May 2014 NODA, such that duct heat losses could be measured by subtracting the measured cooling capacity without insulation from the cooling capacity with insulation. Using the duct heat losses, duct surface area, and the differential between the indoor side ambient temperature and the average of the duct surface temperatures, an average duct heat transfer coefficient could be empirically determined for units in DOE's test sample. The results of this calculation are shown in Table III.4 below.

TABLE III.4—MEASURED DUCT CONVECTION HEAT TRANSFER COEFFICIENTS

Test unit	Duct convection heat transfer coefficient (Btu/h-ft ² °F)
SD1	2.74
SD2	3.08
SD3	1.70
SD4	5.26

⁹ ASHRAE Handbook—Fundamentals. American Society of Heating, Refrigerating, and Air-Conditioning Engineers, Atlanta, GA. 2013.

TABLE III.4—MEASURED DUCT CONVECTION HEAT TRANSFER COEFFICIENTS—Continued

Test unit	Duct convection heat transfer coefficient (Btu/h-ft ² °F)
DD1 (Test 1)	4.10
DD1 (Test 2)	3.76
DD2 (Test 1)	2.11
DD2 (Test 2)	2.27
Average	3.13

SD = Single-duct.
DD = Dual-duct.

Although the average heat transfer coefficient calculated from DOE's test results was slightly lower than the value proposed in the February 2015 NOPR, DOE notes that there is variation in individual results that is likely due to different duct types, installation configurations, forced convection air flow patterns, and other factors. Therefore, DOE proposes to maintain the original duct heat transfer proposal from the February 2015 NOPR, including the convection heat transfer coefficient of 4 Btu/h-ft² °F.

c. Duct Surface Area Measurements

In the February 2015 NOPR, DOE proposed that the duct surface area be calculated using the outer duct diameter and extended length of the duct while under test. 80 FR 10211, 10227 (Feb. 25, 2015).

De' Longhi and AHAM commented that ducts often have a corrugated surface, so that the measure of the duct(s) surface area will have high uncertainty. (De' Longhi, No. 16 at p. 4; AHAM, No. 18 at p. 5) DOE further examined the surface area of the ducts in its test sample. DOE calculated the surface area in two ways, one with the ducts fully extended and the other with the duct setup as required in AHAM PAC-1-2015. DOE found that the average difference in surface area calculated using the fully extended duct versus using the test setup was 7.5 percent. With the average duct impact on cooling capacity of 11.1 percent and 3.7 percent for single-duct and dual-duct units, respectively, the overall variability that differences in duct surface area determinations would introduce into the cooling capacity would be no greater than 1 percent. Therefore, DOE concludes that any uncertainty in duct surface area measurements would not have a significant impact on test repeatability and reproducibility and maintains the surface area measurement as proposed in the February 2015 NOPR.

5. Case Heat Transfer

In the February 2015 NOPR, DOE proposed that case heat transfer be determined using a method similar to the approach proposed for duct heat transfer. DOE proposed that the surface area and average temperature of each side of the case be measured to determine the overall case heat transfer, which would be used to adjust the cooling capacity and efficiency. DOE noted that the case heat transfer methodology would impose additional test burden, but determined that the burdens were likely outweighed by the benefit of addressing the heat transfer effects of all internal heating components. 80 FR 10211, 10227-10229 (Feb. 25, 2015).

DENSO commented that DOE should incorporate the effects of evaporator fan heat rather than case heat transfer effects, because all of the fan motor power ends up in the evaporator exhaust air stream. DENSO also stated that heat transfer mechanics for all surfaces of the case are not the same. (DENSO, No. 14 at p. 2)

Friedrich believes that there is no need to measure heat loss from the electrical components inside the case because the end result of the test would be the total cooling capacity coming from the portable AC and the total measure of energy consumption. (Public Meeting Transcript, Friedrich, No. 13 at p. 34)

De' Longhi noted that because there is a wide range in unit design, each portable AC may have uniquely shaped faces on the case, and it would be very difficult or impossible to identify the front, back, right, left, top, and bottom of the case. De' Longhi stated that laboratories may measure the surface temperature differently, and therefore, the proposal in the February 2015 NOPR may lead to inconsistencies among different laboratories. De' Longhi further suggested that the convection coefficient should be different for each side of the case due to the different orientation of each surface, and commented that a small variation in the position of the temperature sensors can cause significant differences in the average temperatures of each case. (Public Meeting Transcript, De' Longhi, No. 13 at pp. 55-56; De' Longhi, No. 16 at p. 4)

AHAM stated that the proposed methodology for determining case heat transfer unnecessarily complicates the test procedure and will likely lead to variation. AHAM believes the impact of case heat transfer is negligible and does not justify the added burden and variation. According to AHAM, if DOE

continues to consider case heat transfer, DOE should characterize the proposed test procedure's repeatability and reproducibility, preferably through a round robin test including manufacturers and third-party

laboratories. (AHAM, No. 18 at pp. 5–6)

In response to these comments, DOE further investigated the effects of case heat transfer as a percentage of the overall cooling capacity by analyzing the data determined in accordance with

AHAM PAC–1–2009 for the February 2015 NOPR. Figure III.2 shows, for each portable AC in its test sample, the heat transfer determined for each case side and the sum of all case sides as a percentage of the AHAM PAC–1–2009 cooling capacity.

Figure III.2 Case Heat Transfer as a Percentage of AHAM PAC-1-2009 Cooling Capacity for Each Test Unit in the February 2015 NOPR

From the data in Figure III.2, DOE calculated that the average heat transfer for individual case sides was 0.29 percent of the AHAM PAC–1–2009 cooling capacity, and the maximum heat transfer observed for a single side was 2.27 percent. The total case heat transfer impact was, on average, 1.76 percent of the AHAM PAC–1–2009 cooling capacity, with a maximum of 6.53 percent. Because the total case heat transfer impact is, on average, less than 2 percent of the cooling capacity without adjustments for infiltration air and heat transfer effects, DOE proposes to remove the provisions for determining case heat transfer from the proposed portable AC test procedure.

6. Test Unit Placement

In the February 2015 NOPR, DOE proposed that for all portable AC configurations, there must be no less than 6 feet between the evaporator inlet and any chamber wall surface, and for single-duct units, there must be no less than 6 feet between the condenser inlet surface and any other wall surface. Additionally, DOE proposed that there be no less than 3 feet between the other

surfaces of the portable AC with no air inlet or exhaust (other than the bottom of the unit) and any wall surfaces. 80 FR 10211, 10229–10230 (Feb. 25, 2015).

According to DENSO, the 6-foot minimum spacing would cause an unreasonable performance penalty when duct losses are incorporated into the efficiency rating. DENSO further noted that the ducted side of a portable AC is often located relatively close to the wall where the duct is mounted. (DENSO, No. 14 at p. 3)

AHAM objected to the proposed test unit placement, commenting that, due to duct length, it may not be feasible to maintain the proposed distances from the partition wall. AHAM stated that this particular distance is variable and unit-dependent, and should not be applicable for single-duct or dual-duct units. (AHAM, No. 18 at pp. 6–7)

De' Longhi requested clarification as to whether the back of the unit, or side with the duct attachments, is considered a side that must be placed at the minimum distance from the chamber or partition walls. If so, De' Longhi commented that the unit should be placed at least 6 feet from the partition wall and the ducts would likely not

reach. (Public Meeting Transcript, De' Longhi, No. 13 at pp. 59–60; De' Longhi, No. 16 at p. 4)

DOE recognizes that the length of the duct and duct setup as outlined in AHAM PAC–1–2015 dictate the distance of the portable AC from the partition wall. Therefore, DOE proposes to adjust the February 2015 NOPR proposals for unit placement that would have required no less than 6 feet between the evaporator inlet and any chamber wall surfaces, and for single-duct units, no less than 6 feet between the condenser inlet surface and any other wall surface. Because AHAM PAC–1–2015 specifies the distance between the test unit and the partition wall, DOE proposes that the test unit be placed in such a way that there is no less than 3 feet between any test chamber wall and any surface on the portable AC, except the surface or surfaces that have a duct attachment, as prescribed by the AHAM PAC–1–2015 test setup requirements. DOE notes that this test unit placement would provide manufacturers and test laboratories more flexibility in the use of their test chambers than that proposed in the

February 2015 NOPR, and would still provide sufficient space around the test unit to ensure free air flow with no air constriction.

C. Heating Mode

As discussed in the February 2015 NOPR, certain portable ACs, including some of the units in DOE's test sample, incorporate a heating function in addition to cooling mode. DOE proposed to define heating mode as an active mode in which a portable AC has activated the main heating function according to the thermostat or temperature sensor signal, including activating a resistance heater, the refrigeration system with a reverse refrigerant flow valve, or the fan or blower without activation of the resistance heater or refrigeration system. 80 FR 10211, 10217 (Feb. 25, 2015). In the February 2015 NOPR, DOE concluded that a heating mode test to measure heating mode performance was feasible, and proposed a heating mode test procedure that utilized AHAM PAC-1-2014 at lower temperature ambient conditions and with comparable adjustments as were considered for cooling mode. 80 FR 10211, 10230-10231 (Feb. 25, 2015).

AHAM and De' Longhi opposed DOE's proposal to require testing in heating mode. They noted that heating mode is not the main consumer utility offered by portable ACs, and commented that it was not clear how often consumers use the heating feature and whether the burden of including this mode in the test procedure would be justified. AHAM, NAM, and De' Longhi commented that there are not sufficient heating mode data upon which to determine whether to include measurement of or assign annual operating hours to heating mode. AHAM and NAM further noted that in the heating analysis, DOE assumed that the consumer will use a portable AC in heating mode when the temperature has fallen below 45 °F, but presented no consumer data to support that assumption. According to AHAM, consumer usage of portable ACs in heating mode is extremely limited due to the seasonality of the product. AHAM, NAM, and De' Longhi commented that DOE should be consistent with its other analyses when considering heating mode. For example, they stated that DOE did not propose testing in fan-only mode because it would be impractical, nor did it propose testing in dehumidification mode because it is not the primary mode of operation for portable ACs. These commenters considered heating mode to be no different, and therefore concluded

that DOE should not require it to be tested. (Public Meeting Transcript, AHAM, No. 13 at p. 64; AHAM, No. 18 at pp. 7, 10; De' Longhi, No. 16 at p. 5; NAM, No. 17 at p. 2)

AHAM noted that many of the comments submitted regarding cooling mode would also apply to heating mode where applicable. Specifically, should DOE require measurement of heating mode, AHAM would not object to DOE's proposal to use the unit and duct setup requirements and control settings of AHAM PAC-1-2014, as well as the test configurations referenced in Table 2 of AHAM PAC-1-2014. AHAM opposed the inclusion of infiltration air, duct heat transfer, case transfer, and test unit placement for heating mode as discussed for cooling mode. (AHAM, No. 18 at pp. 7-8)

DENSO stated that its cooling mode comments are generally applicable for heating mode as well. (DENSO, No. 14 at p. 3)

After considering stakeholder comments opposing the test procedure for heating mode and in light of the test burden that the heating mode test would impose, DOE proposes to remove the heating mode test provisions from the proposed DOE portable AC test procedure, including the definition of heating mode and calculations for EER_{nm} and total combined energy efficiency ratio. Accordingly, the cooling-specific energy efficiency ratio, EER_{cm} , is no longer necessary, as the combined efficiency ratio, CEER, would appropriately represent energy efficiency in all modes under consideration. DOE expects that measuring performance in cooling mode, off-cycle mode, standby mode, and off mode would capture representative performance of portable ACs during the cooling season. DOE may reconsider including a test for heating mode in a future test procedure rulemaking.

D. Combined Energy Efficiency Ratio

In the February 2015 NOPR, DOE proposed a single energy conservation standard metric for portable ACs, in accordance with the requirements of EPCA. (42 U.S.C. 6295(gg)(3)(A)) The single integrated efficiency metric, CEER, weights the average power in each operating mode, as measured by the proposed test procedure, with estimated annual operating hours for each mode. The modes considered in the February 2015 NOPR procedure were cooling mode, heating mode, off-cycle mode (with and without fan operation), inactive mode (including bucket-full mode), and off mode. 80 FR 10211, 10234-10235 (Feb. 25, 2015).

1. Annual Operating Mode Hours

As presented in the February 2015 NOPR, DOE developed several estimates of portable AC annual operating mode hours for cooling, heating, off-cycle, and inactive or off modes. However, the three estimates that addressed units with both cooling and heating mode operating hours are no longer applicable with the removal of the heating mode test procedure. Therefore, for this revised analysis, DOE considered the annual operating mode hours for all portable ACs to be those from the "Cooling Only" scenario presented in the February 2015 NOPR as follows:

TABLE III.5—PROPOSED ANNUAL OPERATING HOURS BY MODE

Modes	Operating hours
Cooling Mode	750
Off-Cycle Mode	880
Off/Inactive Mode	1,355

More information on the development of these annual hours for each operating mode can be found in the February 2015 NOPR. 80 FR 10211, 10235-10237 (Feb. 25, 2015).

Friedrich noted that it rates its portable AC energy consumption based on 750 hours, the same cooling mode operating hours as room ACs. Friedrich suggested that DOE maintain the proposal of 750 annual cooling mode operating hours for portable ACs to maintain harmonization with room ACs and properly reflect unit annual energy consumption. (Public Meeting Transcript, Friedrich, No. 13 at p. 84)

AHAM and NAM disagreed with DOE's proposals, stating that the majority of the analysis was based on outdated room AC data. They asserted that although portable ACs and room ACs are similar in some ways, the usage profiles and installation locations of the two products differ. AHAM and NAM urged DOE to obtain data on consumer usage of portable ACs or demonstrate that consumer use of portable ACs and room ACs are sufficiently comparable. (Public Meeting Transcript, AHAM, No. 13 at pp. 81-83; AHAM, No. 18 at p. 10; NAM, No. 17 at pp. 1-2)

AHAM and NAM also objected to DOE basing the proposed unplugged hours on assumptions, without any consumer study or supporting data. These commenters stated that DOE should obtain consumer use data in order to inform its proposal on the number of unplugged hours. (Public Meeting Transcript, AHAM, No. 13 at p. 81; AHAM, No. 18 at p. 10; NAM, No. 17 at p. 2)

AHAM further commented that it is not aware of consumer usage data for portable ACs, but would attempt to request that information from its members. AHAM urged DOE not to proceed in the absence of such consumer use data. (Public Meeting Transcript, AHAM, No. 13 at pp. 83–84)

Neither AHAM nor manufacturers provided additional consumer usage data, and no further data were available from RECS or other sources. Therefore, DOE continues to utilize the most relevant consumer use data available and proposes the annual operating hours in Table III.5, maintaining the

analysis and approach described in the February 2015 NOPR. DOE welcomes any additional information and data regarding consumer use to further inform the proposed annual mode operating hours.

2. CEER Calculation

In addition to the CEER metric that incorporated energy consumption in all operating modes, including heating mode, DOE proposed a simplified CEER metric in the February 2015 NOPR for portable ACs that do not include a heating mode (CEER_{cm}). The CEER calculation in the February 2015 NOPR

would equal CEER_{cm} for units without heating mode. With the newly proposed removal of heating mode from the test procedure and addition of a second set of testing conditions for dual-duct units, DOE also proposes in this SNOPR to eliminate the CEER_{cm} calculation and to revise the CEER metric calculation as follows, using the same weighting factors as were developed for SACC. The revised calculations also correctly divide energy consumption by annual cooling mode hours rather than total annual hours, as was initially proposed in the February 2015 NOPR.

$$CEER_{SD} = \left[\frac{(ACC_{95} \times 0.2 + ACC_{83} \times 0.8)}{\left(\frac{AEC_{SD} + AEC_T}{k \times t} \right)} \right]$$

$$CEER_{DD} = \left[\frac{ACC_{95}}{\left(\frac{AEC_{95} + AEC_T}{k \times t} \right)} \right] \times 0.2 + \left[\frac{ACC_{83}}{\left(\frac{AEC_{83} + AEC_T}{k \times t} \right)} \right] \times 0.8$$

Where:

CEER_{SD} and CEER_{DD} are the combined energy efficiency ratios for single-duct and dual duct units, respectively, in Btu/Wh.

ACC₉₅ and ACC₈₃ are the adjusted cooling capacities, tested at the 95 °F and 83 °F dry-bulb outdoor conditions, respectively, in Btu/h.

AEC_{SD} is the annual energy consumption in cooling mode for single-duct units, in kWh/year.

AEC₉₅ is the annual energy consumption in cooling mode for dual-duct units, assuming all cooling mode hours would be at the 95 °F dry-bulb outdoor conditions, in kWh/year.

AEC₈₃ is the annual energy consumption in cooling mode for dual-duct units, assuming all cooling mode hours would be at the 83 °F dry-bulb outdoor conditions, in kWh/year.

AEC_T is the total annual energy consumption attributed to all modes except cooling, in kWh/year.

t is the number of cooling mode hours per year, 750.

k is 0.001 kWh/Wh conversion factor for watt-hours to kilowatt-hours.

0.2 is the weighting factor for the 95 °F dry-bulb outdoor condition test.

0.8 is the weighting factor for the 83 °F dry-bulb outdoor condition test.

The February 2015 NOPR included incorrect text stating that the representative CEER would be the mean of the test unit efficiencies. DOE proposes in this SNOPR to clarify that the representative CEER for a basic model is calculated based on the sampling plan instructions proposed in

10 CFR 429.62. DOE further maintains its proposal that the CEER would be rounded to the nearest 0.1 Btu/Wh.

E. Compliance With Other Energy Policy and Conservation Act Requirements

1. Test Burden

EPCA requires that any test procedures prescribed or amended shall be reasonably designed to produce test results which measure energy efficiency, energy use, or estimated annual operating cost of a covered product during a representative average use cycle or period of use, and shall not be unduly burdensome to conduct. (42 U.S.C. 6293(b)(3)) In the February 2015 NOPR, DOE concluded that establishing a test procedure to measure the energy consumption of portable ACs in active mode, standby mode, and off mode would produce the required test results and would not be unduly burdensome to conduct. This determination was driven by the many similarities between the necessary testing equipment and facilities for portable ACs and other products, whose performance is currently certified through a DOE test procedure. Therefore, DOE concluded that manufacturers would not be required to make significant investment in test facilities and new equipment.

DOE notes that the modifications to the portable AC test procedures introduced in this notice, mainly the additional test condition in cooling mode for dual-duct units and the

removal of heating mode testing and case heat transfer considerations, would not significantly increase the overall test burden compared to the test procedure proposed in the February 2015 NOPR. Further, because the added cooling mode test conditions are closer to those of the originally proposed cooling mode test than the test conditions for the heating mode test, DOE estimates that less time would be required to achieve and maintain the chamber conditions for the second cooling mode test than for a heating mode test, decreasing the test burden for dual-duct units with a heating mode. In addition, the outdoor test chamber would not be required to reach the low temperatures required for the proposed heating mode test, which may have presented difficulties for some manufacturers and test laboratories to achieve.

For dual-duct units without a heating mode, the proposals in this notice would introduce test burden by requiring a second cooling mode test. However, the removal of case surface temperature measurements would likely mitigate the increased burden associated with this second cooling mode test, resulting in similar overall test burden as for the test procedure proposed in the February 2015 NOPR.

DOE concludes that although this SNOPR introduces modifications to the test procedures proposed in the February 2015 NOPR, it does not significantly increase the test burden,

and may instead reduce the overall test burden. Therefore, the determination in the February 2015 NOPR that the proposed portable AC test procedure would produce test results that measure energy consumption during representative use and that the test procedure would not be unduly burdensome to conduct still applies.

IV. Procedural Issues and Regulatory Review

DOE has concluded that the determinations made pursuant to the various procedural requirements applicable to the February 2015 NOPR, set forth at 80 FR 10212, 10238–10241, remain unchanged for this SNOPR, except for the following additional analysis and determination DOE conducted in accordance with the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*).

A. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis (IFRA) for any rule that by law must be proposed for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. As required by Executive Order 13272, “Proper Consideration of Small Entities in Agency Rulemaking,” 67 FR 53461 (August 16, 2002), DOE published procedures and policies on February 19, 2003, to ensure that the potential impacts of its rules on small entities are properly considered during the DOE rulemaking process. 68 FR 7990. DOE has made its procedures and policies available on the Office of the General Counsel’s Web site: <http://energy.gov/gc/office-general-counsel>.

DOE reviewed this proposed rule under the provisions of the Regulatory Flexibility Act and the procedures and policies published on February 19, 2003. DOE’s IRFA is set forth in the February 2015 NOPR, with additional analysis below based on the proposals in this SNOPR. DOE seeks comment on its analysis and the economic impacts of the rule on small manufacturers. In the February 2015 NOPR, DOE estimated that there is one small business that manufactures portable ACs. Since the February 2015 NOPR, DOE has determined that this small business no longer produces portable ACs and, therefore, DOE is unable to identify any small businesses that currently manufacture portable ACs. For this reason, DOE tentatively concludes and certifies that the proposed rule would

not have a significant economic impact on a substantial number of small entities. Accordingly, DOE has not prepared a regulatory flexibility analysis for this rulemaking. DOE will transmit the certification and supporting statement of factual basis to the Chief Counsel for Advocacy of the Small Business Administration (SBA) for review under 5 U.S.C. 605(b).

In the alternative, should any small business manufacturers of portable ACs be identified, DOE evaluated the modifications proposed in this SNOPR to determine if these modification would have a significant economic impact on small businesses as compared to the proposals in the February 2015 NOPR. DOE believes that these modifications are likely to reduce overall test burden with respect to the proposals in the February 2015 NOPR, and therefore would not have a significant economic impact on small businesses, should any be identified.

In this SNOPR, DOE proposes to increase the number of cooling mode tests for dual-duct portable ACs from one test to two tests at different outdoor test conditions. Although this increase requires running the cooling mode test a second time, DOE notes that the test setup would not need to be modified between testing and as such would not significantly increase the test burden beyond that for a single cooling mode test. The remaining changes associated with the additional outdoor test condition impact the post-testing calculations and therefore do not increase test burden.

DOE further proposes in this SNOPR to remove the measurement of case heat transfer and the heating mode testing requirements that were originally proposed in the February 2015 NOPR. The removal of the case heat transfer measurement eliminates the added burden of determining surface area of each case surface and measuring the average temperature of each surface. In addition, the removal of the heating mode test significantly reduces test burden for dual-duct units with a heating mode, in that a substantial stabilization period is avoided that would require reducing the outdoor chamber conditions well below those for the cooling mode test.

In the February 2015 NOPR, DOE concluded that the costs associated with the February 2015 NOPR proposals were small compared to the overall financial investment needed to undertake the business enterprise of developing and testing consumer products. 80 FR 10211, 10239. Compared to the proposals in the February 2015 NOPR, there is no net change in the number of

tests or power metering instrumentation required. In addition, the elimination of the case heat transfer requirement would avoid the potential need for setting up and purchasing additional temperature sensors, estimated to cost less than \$500 for both equipment and labor.

On the basis of this analysis, DOE tentatively concludes that the proposed rule would not have a significant economic impact on a substantial number of small entities, should any small business manufacturers of portable ACs be identified.

DOE seeks comment on the determinations in this section and information on whether any small businesses manufacture portable ACs.

B. Description of Materials Incorporated by Reference

In this SNOPR, DOE proposes to incorporate by reference the test standard published by AHAM, titled “Portable Air Conditioners,” AHAM PAC–1–2015. AHAM PAC–1–2015 is an industry accepted test procedure that measures portable AC performance in cooling mode and is applicable to products sold in North America. AHAM PAC–1–2015 specifies testing conducted in accordance with other industry accepted test procedures (already incorporated by reference) and determines energy efficiency metrics for various portable AC configurations. The test procedure proposed in this SNOPR references various sections of AHAM PAC–1–2015 that address test setup, instrumentation, test conduct, calculations, and rounding. AHAM PAC–1–2015 is readily available on AHAM’s Web site at <http://www.aham.org/ht/d/ProductDetails/sku/PAC12009/from/714/pid/>.

In this SNOPR, DOE also proposes to incorporate by reference the test standard ASHRAE Standard 37–2009, titled “Methods of Testing for Rating Electrically Driven Unitary Air-Conditioning and Heat Pump Equipment,” (ANSI Approved). ANSI/ASHRAE Standard 37–2009 is an industry-accepted test standard referenced by AHAM PAC–1–2015 that defines various uniform methods for measuring performance of air conditioning and heat pump equipment. Although AHAM PAC–1–2015 references a number of sections in ANSI/ASHRAE Standards 37–2009, the test procedure proposed in this SNOPR additionally references one section in ANSI/ASHRAE Standards 37–2009 that addresses test duration. ANSI/ASHRAE Standards 37–2009 is readily available on ANSI’s Web site at <http://webstore>.

ansi.org/RecordDetail.aspx?sku=ANSI%2FASHRAE+Standard+37-2009.

V. Public Participation

DOE will accept comments, data, and information regarding this proposed rule no later than the date provided in the **DATES** section at the beginning of this proposed rule. Interested parties may submit comments using any of the methods described in the **ADDRESSES** section at the beginning of this notice.

Submitting comments via www.regulations.gov. The www.regulations.gov Web page will require you to provide your name and contact information. Your contact information will be viewable to DOE Building Technologies staff only. Your contact information will not be publicly viewable except for your first and last names, organization name (if any), and submitter representative name (if any). If your comment is not processed properly because of technical difficulties, DOE will use this information to contact you. If DOE cannot read your comment due to technical difficulties and cannot contact you for clarification, DOE may not be able to consider your comment.

However, your contact information will be publicly viewable if you include it in the comment or in any documents attached to your comment. Any information that you do not want to be publicly viewable should not be included in your comment, nor in any document attached to your comment. Persons viewing comments will see only first and last names, organization names, correspondence containing comments, and any documents submitted with the comments.

Do not submit to www.regulations.gov information for which disclosure is restricted by statute, such as trade secrets and commercial or financial information (hereinafter referred to as Confidential Business Information (CBI)). Comments submitted through [regulations.gov](http://www.regulations.gov) cannot be claimed as CBI. Comments received through the Web site will waive any CBI claims for the information submitted. For information on submitting CBI, see the Confidential Business Information section.

DOE processes submissions made through [regulations.gov](http://www.regulations.gov) before posting. Normally, comments will be posted within a few days of being submitted. However, if large volumes of comments are being processed simultaneously, your comment may not be viewable for up to several weeks. Please keep the comment tracking number that [regulations.gov](http://www.regulations.gov) provides after you have successfully uploaded your comment.

Submitting comments via email, hand delivery, or mail. Comments and documents submitted via email, hand delivery, or mail also will be posted to [regulations.gov](http://www.regulations.gov). If you do not want your personal contact information to be publicly viewable, do not include it in your comment or any accompanying documents. Instead, provide your contact information on a cover letter. Include your first and last names, email address, telephone number, and optional mailing address. The cover letter will not be publicly viewable as long as it does not include any comments.

Include contact information each time you submit comments, data, documents, and other information to DOE. If you submit via mail or hand delivery, please provide all items on a CD, if feasible. It is not necessary to submit printed copies. No facsimiles (faxes) will be accepted.

Comments, data, and other information submitted to DOE electronically should be provided in PDF (preferred), Microsoft Word or Excel, WordPerfect, or text (ASCII) file format. Provide documents that are not secured, written in English and free of any defects or viruses. Documents should not contain special characters or any form of encryption and, if possible, they should carry the electronic signature of the author.

Campaign form letters. Please submit campaign form letters by the originating organization in batches of between 50 to 500 form letters per PDF or as one form letter with a list of supporters' names compiled into one or more PDFs. This reduces comment processing and posting time.

Confidential Business Information. According to 10 CFR 1004.11, any person submitting information that he or she believes to be confidential and exempt by law from public disclosure should submit via email, postal mail, or hand delivery two well-marked copies: one copy of the document marked confidential including all the information believed to be confidential, and one copy of the document marked non-confidential with the information believed to be confidential deleted. Submit these documents via email or on a CD, if feasible. DOE will make its own determination about the confidential status of the information and treat it according to its determination.

Factors of interest to DOE when evaluating requests to treat submitted information as confidential include: (1) A description of the items; (2) whether and why such items are customarily treated as confidential within the industry; (3) whether the information is

generally known by or available from other sources; (4) whether the information has previously been made available to others without obligation concerning its confidentiality; (5) an explanation of the competitive injury to the submitting person which would result from public disclosure; (6) when such information might lose its confidential character due to the passage of time; and (7) why disclosure of the information would be contrary to the public interest.

It is DOE's policy that all comments may be included in the public docket, without change and as received, including any personal information provided in the comments (except information deemed to be exempt from public disclosure).

VI. Approval of the Office of the Secretary

The Secretary of Energy has approved publication of this supplemental notice of proposed rulemaking.

List of Subjects

10 CFR Part 429

Confidential business information, Energy conservation, Household appliances, Imports, Incorporation by reference, Reporting and recordkeeping requirements.

10 CFR Part 430

Administrative practice and procedure, Confidential business information, Energy conservation, Household appliances, Imports, Incorporation by reference, Intergovernmental relations, Small businesses.

Issued in Washington, DC, on November 17, 2015.

Kathleen B. Hogan,

Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.

For the reasons stated in the preamble, DOE proposes to amend parts 429 and 430 of Chapter II of Title 10, Code of Federal Regulations as set forth below:

PART 429—CERTIFICATION, COMPLIANCE, AND ENFORCEMENT FOR CONSUMER PRODUCTS AND COMMERCIAL AND INDUSTRIAL EQUIPMENT

■ 1. The authority citation for part 429 continues to read as follows:

Authority: 42 U.S.C. 6291–6317.

■ 2. Section 429.4 is amended by adding paragraph (b)(3) to read as follows:

§ 429.4 Materials incorporated by reference.

* * * * *

(b) * * *

(3) AHAM PAC-1-2015, Portable Air Conditioners, 2015, IBR approved for § 429.62.

* * * * *

■ 3. Add § 429.62 to read as follows:

§ 429.62 Portable air conditioners.

(a) *Sampling plan for selection of units for testing.* (1) The requirements of § 429.11 are applicable to portable air conditioners; and

(2) For each basic model of portable air conditioner, a sample of sufficient size shall be randomly selected and tested to ensure that—

(i) Any represented value of energy consumption or other measure of energy consumption of a basic model for which consumers would favor lower values shall be greater than or equal to the higher of:

(A) The mean of the sample:

$$\bar{x} = \frac{1}{n} \sum_{i=1}^n x_i$$

Where:

\bar{x} is the sample mean;
 x_i is the i^{th} sample; and
 n is the number of units in the test sample.

Or,

(B) The upper 95 percent confidence limit (UCL) of the true mean divided by 1.10:

$$UCL = \bar{x} + t_{0.95} \left(\frac{s}{\sqrt{n}} \right)$$

Where:

\bar{x} is the sample mean;
 s is the sample standard deviation;
 n is the number of units in the test sample; and
 $t_{0.95}$ is the t statistic for a 95% one-tailed confidence interval with $n-1$ degrees of freedom.

And,

(ii) Any represented value of the combined energy efficiency ratio or other measure of energy consumption of a basic model for which consumers would favor higher values shall be less than or equal to the lower of:

(A) The mean of the sample:

$$\bar{x} = \frac{1}{n} \sum_{i=1}^n x_i$$

Where:

\bar{x} is the sample mean;
 x_i is the i^{th} sample; and
 n is the number of units in the test sample.

Or,

(B) The lower 95 percent confidence limit (LCL) of the true mean divided by 0.90:

$$LCL = \bar{x} - t_{0.95} \left(\frac{s}{\sqrt{n}} \right)$$

Where:

\bar{x} is the sample mean;
 s is the sample standard deviation;
 n is the number of units in the test sample; and
 $t_{0.95}$ is the t statistic for a 95% one-tailed confidence interval with $n-1$ degrees of freedom.

And,

(3) The value of seasonally adjusted cooling capacity of a basic model shall be the mean of the seasonally adjusted cooling capacities for each tested unit of the basic model. Round the mean capacity value to the nearest 50, 100, 200, or 500 Btu/h, depending on the value being rounded, in accordance with Table 1 of AHAM PAC-1-2015, (incorporated by reference, see § 429.4), “Multiples for reporting Dual Duct Cooling Capacity, Single Duct Cooling Capacity, Spot Cooling Capacity, Water Cooled Condenser Capacity and Power Input Ratings.”

(4) Round the value of combined energy efficiency ratio of a basic model to the nearest 0.1 Btu/Wh.

(b) *Certification reports.* [Reserved]

PART 430—ENERGY CONSERVATION PROGRAM FOR CONSUMER PRODUCTS

■ 4. The authority citation for part 430 continues to read as follows:

Authority: 42 U.S.C. 6291-6309; 28 U.S.C. 2461 note.

■ 5. Section 430.2 is amended by adding the definition of “portable air conditioner” in alphabetical order to read as follows:

§ 430.2 Definitions.

* * * * *

Portable air conditioner means an enclosed assembly, other than a “packaged terminal air conditioner,” “room air conditioner,” or “dehumidifier,” designed as a portable unit for delivering cooled, conditioned air to an enclosed space, that is powered by single-phase electric current, and which may rest on the floor or other elevated surface. It includes a source of refrigeration and may include additional means for air circulation and heating.

* * * * *

■ 6. Section 430.3 is amended by:

- a. Revising paragraph (g)(4);
- b. Redesignating paragraph (i)(8) as (i)(9), and adding a new paragraph (i)(8); and

■ c. Revising paragraph (p)(4).

The revisions read as follows:

§ 430.3 Materials incorporated by reference.

* * * * *

(g) * * *

(4) ANSI/ASHRAE Standard 37-2009, (“ASHRAE 37-2009”), Methods of Testing for Rating Electrically Driven Unitary Air-Conditioning and Heat Pump Equipment, ANSI approved June 25, 2009, IBR approved for appendix AA and CC to subpart B.

* * * * *

(i) * * *

(8) AHAM PAC-1-2015, Portable Air Conditioners, 2015, IBR approved for appendix CC to subpart B.

* * * * *

(p) * * *

(4) IEC 62301 (“IEC 62301”), Household electrical appliances— Measurement of standby power, (Edition 2.0, 2011-01), IBR approved for appendices C1, D1, D2, G, H, I, J2, N, O, P, X, X1, Z and CC to subpart B.

* * * * *

■ 7. Section 430.23 is amended by adding paragraph (dd) to read as follows:

§ 430.23 Test procedures for the measurement of energy and water consumption.

* * * * *

(dd) *Portable air conditioners.* (1) For portable air conditioners, measure the seasonally adjusted cooling capacity, expressed in British thermal units per hour (Btu/h), and the combined energy efficiency ratio, expressed in British thermal units per watt-hour (Btu/Wh) in accordance with section 5 of appendix CC of this subpart.

(2) Determine the estimated annual operating cost for portable air conditioners, expressed in dollars per year, by multiplying the following two factors:

(i) For dual-duct portable air conditioners, the sum of AEC_{05} multiplied by 0.2, AEC_{83} multiplied by 0.8, and AEC_T as measured in accordance with section 5.3 of appendix CC of this subpart; or for single-duct portable air conditioners, the sum of AEC_{SD} and AEC_T as measured in accordance with section 5.3 of appendix CC of this subpart; and

(ii) A representative average unit cost of electrical energy in dollars per kilowatt-hour as provided by the Secretary.

(iii) Round the resulting product to the nearest dollar per year.

■ 7. Add appendix CC to subpart B of part 430 to read as follows:

Appendix CC to Subpart B of Part 430—Uniform Test Method for Measuring the Energy Consumption of Portable Air Conditioners

1. Scope

This appendix covers the test requirements used to measure the energy performance of single-duct and dual-duct portable air conditioners. It does not contain testing provisions for measuring the energy performance of spot coolers at this time.

2. Definitions

2.1 *AHAM PAC-1* means the test standard published by the Association of Home Appliance Manufacturers, titled “Portable Air Conditioners,” AHAM PAC-1-2015 (incorporated by reference; see § 430.3).

2.2 *Combined energy efficiency ratio* is the energy efficiency of a portable air conditioner as measured in accordance with this test procedure in Btu per watt-hours (Btu/Wh) and determined in section 5.4.

2.3 *Cooling mode* means a mode in which a portable air conditioner has activated the main cooling function according to the thermostat or temperature sensor signal, including activating the refrigeration system or the fan or blower without activation of the refrigeration system.

2.4 *Dual-duct portable air conditioner* means a portable air conditioner that draws some or all of the condenser inlet air from outside the conditioned space through a duct, and may draw additional condenser inlet air from the conditioned space. The condenser outlet air is discharged outside the conditioned space by means of a separate duct. 2.6 *IEC 62301* means the test standard published by the International Electrotechnical Commission, titled “Household electrical appliances—Measurement of standby power,” Publication 62301 (Edition 2.0 2011-01) (incorporated by reference; see § 430.3).

2.5 *Inactive mode* means a standby mode that facilitates the activation of an active mode or off-cycle mode by remote switch (including remote control), internal sensor, or timer, or that provides continuous status display.

2.6 *Off-cycle mode* means a mode in which a portable air conditioner:

(1) Has cycled off its main cooling or heating function by thermostat or temperature sensor signal;

(2) May or may not operate its fan or blower; and

(3) Will reactivate the main function according to the thermostat or temperature sensor signal.

2.7 *Off mode* means a mode in which a portable air conditioner is connected to a mains power source and is not providing any active mode, off-cycle mode, or standby mode function, and where the mode may persist for an indefinite time. An indicator that only shows the user that the portable air conditioner is in the off position is included within the classification of an off mode.

2.8 *Seasonally adjusted cooling capacity* means a measure of the cooling, measured in Btu/h, provided to the indoor conditioned space, measured under the specified ambient conditions.

2.9 *Single-duct portable air conditioner* means a portable air conditioner that draws all of the condenser inlet air from the conditioned space without the means of a duct, and discharges the condenser outlet air outside the conditioned space through a single duct.

2.10 *Spot cooler* means a portable air conditioner that draws condenser inlet air from and discharges condenser outlet air to the conditioned space, and draws evaporator inlet air from and discharges evaporator outlet air to a localized zone within the conditioned space.

2.11 *Standby mode* means any mode where a portable air conditioner is connected to a mains power source and offers one or more of the following user-oriented or protective functions which may persist for an indefinite time:

(1) To facilitate the activation of other modes (including activation or deactivation of cooling mode) by remote switch (including remote control), internal sensor, or timer; or

(2) Continuous functions, including information or status displays (including clocks) or sensor-based functions. A timer is a continuous clock function (which may or may not be associated with a display) that provides regular scheduled tasks (e.g., switching) and that operates on a continuous basis.

3. Test Apparatus and General Instructions

3.1 Active mode.

3.1.1 *Test conduct.* The test apparatus and instructions for testing portable air conditioners in cooling mode and off-cycle mode shall conform to the requirements specified in Section 4, “Definitions” and Section 7, “Tests,” of AHAM PAC-1-2015 (incorporated by reference; see § 430.3), except as otherwise specified in this appendix. Where applicable, measure duct heat transfer and infiltration air heat transfer according to section 4.1.1.1 and section 4.1.1.2 of this appendix, respectively.

3.1.1.1 *Duct setup.* Use ducting components provided by the manufacturer, including, where provided by the manufacturer, ducts, connectors for attaching the duct(s) to the test unit, and window mounting fixtures. Do not apply additional sealing or insulation.

3.1.1.2 *Single-duct evaporator inlet test conditions.* When testing single-duct portable air conditioners, maintain the evaporator inlet dry-bulb temperature within a range of 1.0 °F with an average difference within 0.3 °F.

3.1.1.3 *Condensate Removal.* Setup the test unit in accordance with manufacturer instructions. If the unit has an auto-evaporative feature, keep any provided drain plug installed as shipped and do not provide other means of condensate removal. If the internal condensate collection bucket fills during the test, halt the test, remove the drain plug, install a gravity drain line, and start the test from the beginning. If no auto-evaporative feature is available, remove the drain plug and install a gravity drain line. If no auto-evaporative feature or gravity drain is available and a condensate pump is included, or if the manufacturer specifies the use of an included condensate pump during

cooling mode operation, then test the portable air conditioner with the condensate pump enabled. For units tested with a condensate pump, apply the provisions in Section 7.1.2 of AHAM PAC-1-2015 (incorporated by reference; see § 430.3) if the pump cycles on and off.

3.1.1.4 *Unit Placement.* There shall be no less than 3 feet between any test chamber wall surface and any surface on the portable air conditioner, except the surface or surfaces of the portable air conditioner that include a duct attachment. The distance between the test chamber wall and a surface with one or more duct attachments is prescribed by the test setup requirements in Section 7.3.7 of AHAM PAC-1-2015 (incorporated by reference; see § 430.3).

3.1.1.5 *Electrical supply.* Maintain the input standard voltage at 115 V ±1 percent. Test at the rated frequency, maintained within ±1 percent.

3.1.1.6 *Duct temperature measurements.* Measure the surface temperatures of each duct using four equally spaced thermocouples per duct, adhered to the outer surface of the entire length of the duct. Temperature measurements must have an error no greater than ±0.5 °F over the range being measured.

3.1.2 *Control settings.* Set the controls to the lowest available temperature setpoint for cooling mode. If the portable air conditioner has a user-adjustable fan speed, select the maximum fan speed setting. If the portable air conditioner has an automatic louver oscillation feature, disable that feature throughout testing. If the louver oscillation feature is included but there is no option to disable it, testing shall proceed with the louver oscillation enabled. If the portable air conditioner has adjustable louvers, position the louvers parallel with the airflow to maximize air flow and minimize static pressure loss.

3.1.3 *Measurement resolution and rounding.* Record measurements at the resolution of the test instrumentation. Round the seasonally adjusted cooling capacity value in accordance with Table 1 of AHAM PAC-1-2015 (incorporated by reference; see § 430.3). Round CEER as calculated in section 5 of this appendix, to the nearest 0.1 Btu/Wh.

3.2 Standby mode and off mode.

3.2.1 *Installation requirements.* For the standby mode and off mode testing, install the portable air conditioner in accordance with Section 5, Paragraph 5.2 of IEC 62301 (incorporated by reference; see § 430.3), disregarding the provisions regarding batteries and the determination, classification, and testing of relevant modes.

3.2.2 Electrical energy supply.

3.2.2.1 *Electrical supply.* For the standby mode and off mode testing, maintain the input standard voltage at 115 V ±1 percent. Maintain the electrical supply at the rated frequency ±1 percent.

3.2.2.2 *Supply voltage waveform.* For the standby mode and off mode testing, maintain the electrical supply voltage waveform indicated in Section 4, Paragraph 4.3.2 of IEC 62301 (incorporated by reference; see § 430.3).

3.2.3 *Standby mode and off mode wattmeter.* The wattmeter used to measure

standby mode and off mode power consumption must meet the requirements specified in Section 4, Paragraph 4.4 of IEC 62301 (incorporated by reference; see § 430.3).

3.2.4 *Standby mode and off mode ambient temperature.* For standby mode and off mode testing, maintain room ambient air temperature conditions as specified in Section 4, Paragraph 4.2 of IEC 62301 (incorporated by reference; see § 430.3).

4. Test Measurement

4.1 *Cooling mode.* Measure the indoor room cooling capacity and overall power input in cooling mode in accordance with Section 7.1.b and 7.1.c of AHAM PAC-1-2015 (incorporated by reference; see § 430.3), respectively. The test duration shall be determined in accordance with Section 8.7 of ASHRAE 37-2009 (incorporated by reference; § 430.3). Substitute the test conditions in Table 3 of AHAM PAC-1-2015 with the test conditions for single-duct and dual-duct portable air conditioners presented

in Table 1 of this appendix. For single-duct units, measure the indoor room cooling capacity, Capacity_{SD}, and overall power input in cooling mode, P_{SD}, in accordance with the ambient conditions for test configuration 5, presented in Table 1 of this appendix. For dual-duct units, measure the indoor room cooling capacity and overall power input in accordance with ambient conditions for test configuration 3, condition A (Capacity₉₅, P₉₅), and a second time in accordance with the ambient conditions for test configuration 3, condition B (Capacity₈₃, P₈₃), presented in Table 1 of this appendix.

TABLE 1—EVAPORATOR AND CONDENSER INLET TEST CONDITIONS

Test configuration	Evaporator inlet air, °F (°C)		Condenser inlet air, °F (°C)	
	Dry bulb	Wet bulb	Dry bulb	Wet bulb
3 (Condition A)	80 (26.7)	67 (19.4)	95 (35.0)	75 (23.9)
3 (Condition B)	80 (26.7)	67 (19.4)	83 (28.3)	67.5 (19.7)
5	80 (26.7)	67 (19.4)	80 (26.7)	67 (19.4)

4.1.1. *Duct Heat Transfer.* Measure the surface temperature of the condenser exhaust duct and condenser inlet duct, where applicable, throughout the cooling mode test. Calculate the average temperature at each individual location, and then calculate the average surface temperature of each duct by averaging the four average temperature measurements taken on that duct. Calculate the surface area (A_{duct_j}) of each duct according to the following:

$$A_{duct_j} = \pi \times d_j \times L_j$$

Where:

- d_j = the outer diameter of duct “j”.
- L_j = the extended length of duct “j” while under test.
- j represents the condenser exhaust duct and, for dual-duct units, condenser inlet duct.

Calculate the total heat transferred from the surface of the duct(s) to the indoor conditioned space while operating in cooling mode for the outdoor test conditions in Table 1 of this appendix, as follows. For single-duct portable air conditioners:

$$Q_{duct_SD} = h \times A_{duct_j} \times (T_{duct_SD_j} - T_{ei})$$

For dual-duct portable air conditioners:

$$Q_{duct_95} = \Sigma j \{ h \times A_{duct_j} \times (T_{duct_95_j} - T_{ei}) \}$$

$$Q_{duct_83} = \Sigma j \{ h \times A_{duct_j} \times (T_{duct_83_j} - T_{ei}) \}$$

Where:

- Q_{duct_SD} = for single-duct portable air conditioners, the total heat transferred from the duct to the indoor conditioned space in cooling mode when tested according to the test conditions in Table 1 of this appendix, in Btu/h.
- Q_{duct_95} and Q_{duct_83} = for dual-duct portable air conditioners, the total heat transferred from the ducts to the indoor conditioned space in cooling mode when tested according to the 95 °F dry-bulb and 83 °F dry-bulb outdoor test conditions in Table 1 of this appendix, in Btu/h.
- h = convection coefficient, 4 Btu/h per square foot per °F.
- A_{duct_j} = surface area of duct “j”, in square feet.
- T_{duct_SD_j} = average surface temperature for the condenser exhaust duct of single-duct portable air conditioners, as measured during testing according to the

- test condition in Table 1 of this appendix, in °F.
- T_{duct_95_j} and T_{duct_83_j} = average surface temperature for duct “j” of dual-duct portable air conditioners, as measured during testing according to the two outdoor test conditions in Table 1 of this appendix, in °F.
- j represents the condenser exhaust duct and, for dual-duct units, condenser inlet duct.
- T_{ei} = average evaporator inlet air dry-bulb temperature, in °F.

4.1.2 *Infiltration Air Heat Transfer.* Measure the heat contribution from infiltration air for single-duct portable air conditioners and dual-duct portable air conditioners that draw at least part of the condenser air from the conditioned space. Calculate the heat contribution from infiltration air for single-duct and dual-duct portable air conditioners for both cooling mode outdoor test conditions, as described in this section. The dry air mass flow rate of infiltration air shall be calculated according to the following equations. For single-duct portable air conditioners:

$$\dot{m}_{SD} = \frac{V_{co_SD} \times \rho_{co_SD}}{(1 + \omega_{co_SD})}$$

For dual-duct portable air conditioners:

$$\dot{m}_{95} = \left[\frac{V_{co_95} \times \rho_{co_95}}{(1 + \omega_{co_95})} \right] - \left[\frac{V_{ci_95} \times \rho_{ci_95}}{(1 + \omega_{ci_95})} \right]$$

$$\dot{m}_{83} = \left[\frac{V_{co_83} \times \rho_{co_83}}{(1 + \omega_{co_83})} \right] - \left[\frac{V_{ci_83} \times \rho_{ci_83}}{(1 + \omega_{ci_83})} \right]$$

Where:

\dot{m}_{SD} = dry air mass flow rate of infiltration air for single-duct portable air conditioners, in pounds per minute (lb/m).

\dot{m}_{95} and \dot{m}_{83} = dry air mass flow rate of infiltration air for dual-duct portable air conditioners, as calculated based on testing according to the test conditions in Table 1 of this appendix, in lb/m.

V_{co_SD} , V_{co_95} , and V_{co_83} = average volumetric flow rate of the condenser outlet air during cooling mode testing for single-duct portable air conditioners; and at the 95 °F and 83 °F dry-bulb outdoor conditions for dual-duct portable air conditioners, respectively, in cubic feet per minute (cfm).

V_{ci_95} , and V_{ci_83} = average volumetric flow rate of the condenser inlet air during cooling mode testing at the 95 °F and 83 °F dry-bulb outdoor conditions for dual-duct portable air conditioners, respectively, in cfm.

ρ_{co_SD} , ρ_{co_95} , and ρ_{co_83} = average density of the condenser outlet air during cooling mode testing for single-duct portable air conditioners, and at the 95 °F and 83 °F dry-bulb outdoor conditions for dual-duct portable air conditioners, respectively, in pounds mass per cubic foot (lb_m/ft³).

ρ_{ci_95} , and ρ_{ci_83} = average density of the condenser inlet air during cooling mode testing at the 95 °F and 83 °F dry-bulb outdoor conditions for dual-duct portable air conditioners, respectively, in lb_m/ft³.

ω_{co_SD} , ω_{co_95} , and ω_{co_83} = average humidity ratio of condenser outlet air during cooling mode testing for single-duct portable air conditioners, and at the 95 °F and 83 °F dry-bulb outdoor conditions for dual-duct portable air conditioners, respectively, in pounds mass of water vapor per pounds mass of dry air (lb_w/lb_{da}).

ω_{ci_95} , and ω_{ci_83} = average humidity ratio of condenser inlet air during cooling mode testing at the 95 °F and 83 °F dry-bulb outdoor conditions for dual-duct portable air conditioners, respectively, in lb_w/lb_{da}.

For single-duct and dual-duct portable air conditioners, calculate the sensible component of infiltration air heat contribution according to the following:

$$Q_{s_95} = \dot{m} \times 60 \times [(C_{p_da} \times (T_{ia_95} - T_{indoor})) + C_{p_wv} \times (\omega_{ia_95} \times T_{ia_95} - \omega_{indoor} \times T_{indoor})]$$

$$Q_{s_83} = \dot{m} \times 60 \times [(C_{p_da} \times (T_{ia_83} - T_{indoor})) + C_{p_wv} \times (\omega_{ia_83} \times T_{ia_83} - \omega_{indoor} \times T_{indoor})]$$

Where:

Q_{s_95} and Q_{s_83} = sensible heat added to the room by infiltration air, calculated at the 95 °F and 83 °F dry-bulb outdoor conditions in Table 1 of this appendix, in Btu/h.

\dot{m} = dry air mass flow rate of infiltration air, \dot{m}_{SD} or \dot{m}_{95} when calculating Q_{s_95} and \dot{m}_{SD} or \dot{m}_{83} when calculating Q_{s_83} , in lb/m.

C_{p_da} = specific heat of dry air, 0.24 Btu/lb_m - °F.

C_{p_wv} = specific heat of water vapor, 0.444 Btu/lb_m - °F.

T_{indoor} = indoor chamber dry-bulb temperature, 80 °F.

T_{ia_95} and T_{ia_83} = infiltration air dry-bulb temperatures for the two test conditions

in Table 1 of this appendix, 95 °F and 83 °F, respectively.

ω_{ia_95} and ω_{ia_83} = humidity ratios of the 95 °F and 83 °F dry-bulb infiltration air, 0.0141 and 0.01086 lb_w/lb_{da}, respectively.

ω_{indoor} = humidity ratio of the indoor chamber air, 0.0112 lb_w/lb_{da}.

60 = conversion factor from minutes to hours.

Calculate the latent heat contribution of the infiltration air according to the following:

$$Q_{l_95} = \dot{m} \times 60 \times H_{fg} \times (\omega_{ia_95} - \omega_{indoor})$$

$$Q_{l_83} = \dot{m} \times 60 \times H_{fg} \times (\omega_{ia_83} - \omega_{indoor})$$

Where:

Q_{l_95} and Q_{l_83} = latent heat added to the room by infiltration air, calculated at the 95 °F and 83 °F dry-bulb outdoor conditions in Table 1 of this appendix, in Btu/h.

\dot{m} = mass flow rate of infiltration air, \dot{m}_{SD} or \dot{m}_{95} when calculating Q_{l_95} and \dot{m}_{SD} or \dot{m}_{83} when calculating Q_{l_83} , in lb/m.

H_{fg} = latent heat of vaporization for water vapor, 1061 Btu/lb_m.

ω_{ia_95} and ω_{ia_83} = humidity ratios of the 95 °F and 83 °F dry-bulb infiltration air, 0.0141 and 0.01086 lb_w/lb_{da}, respectively.

ω_{indoor} = humidity ratio of the indoor chamber air, 0.0112 lb_w/lb_{da}.

60 = conversion factor from minutes to hours.

The total heat contribution of the infiltration air is the sum of the sensible and latent heat:

$$Q_{infiltration_95} = Q_{s_95} + Q_{l_95}$$

$$Q_{infiltration_83} = Q_{s_83} + Q_{l_83}$$

Where:

$Q_{infiltration_95}$ and $Q_{infiltration_83}$ = total infiltration air heats in cooling mode, calculated at the 95 °F and 83 °F dry-bulb outdoor conditions in Table 1 of this appendix, in Btu/h.

Q_{s_95} and Q_{s_83} = sensible heat added to the room by infiltration air, calculated at the 95 °F and 83 °F dry-bulb outdoor conditions in Table 1 of this appendix, in Btu/h.

Q_{l_95} and Q_{l_83} = latent heat added to the room by infiltration air, calculated at the 95 °F and 83 °F dry-bulb outdoor conditions in Table 1 of this appendix, in Btu/h.

4.2 Off-cycle mode. Establish the test conditions specified in section 3.1.1 of this appendix for off-cycle mode, except that the duct measurements in section 3.1.1.6 shall not be used and the wattmeter specified in section 3.2.3 of this appendix shall be used. Begin the off-cycle mode test period 5 minutes following the cooling mode test period. Adjust the setpoint higher than the ambient temperature to ensure the product will not enter cooling mode and begin the test 5 minutes after the compressor cycles off due to the change in setpoint. The off-cycle mode test

period shall be 2 hours in duration, during which the power consumption is recorded at the same intervals as recorded for cooling mode testing. Measure and record the average off-cycle mode power of the portable air conditioner, P_{oc} , in watts.

4.3 Standby mode and off mode.

Establish the testing conditions set forth in section 3.2 of this appendix, ensuring that the portable air conditioner does not enter any active modes during the test. For portable air conditioners that take some time to enter a stable state from a higher power state as discussed in Section 5, Paragraph 5.1, Note 1 of IEC 62301, (incorporated by reference; see § 430.3), allow sufficient time for the portable air conditioner to reach the lowest power state before proceeding with the test measurement. Follow the test procedure specified in Section 5, Paragraph 5.3.2 of IEC 62301 for testing in each possible mode as described in sections 4.3.1 and 4.3.2 of this appendix.

4.3.1 If the portable air conditioner has an inactive mode, as defined in section 2.5 of this appendix, but not an off mode, as defined in section 2.7 of this appendix, measure and record the average inactive mode power of the portable air conditioner, P_{ia} , in watts.

4.3.2 If the portable air conditioner has an off mode, as defined in section 2.7 of this appendix, measure and record the average off mode power of the portable air conditioner, P_{om} , in watts.

5. Calculation of Derived Results From Test Measurements

5.1 Adjusted Cooling Capacity.

Calculate the adjusted cooling capacities for portable air conditioners, ACC_{95} and ACC_{83} , expressed in Btu/h, according to the following equations. For single-duct portable air conditioners:

$$ACC_{95} = Capacity_{SD} - \frac{Q_{duct_SD} - Q_{infiltration_95}}{Capacity_{SD}}$$

$$ACC_{83} = Capacity_{SD} - \frac{Q_{duct_SD} - Q_{infiltration_83}}{Capacity_{SD}}$$

For dual-duct portable air conditioners:

$$ACC_{95} = Capacity_{95} - \frac{Q_{duct_95} - Q_{infiltration_95}}{Capacity_{95}}$$

$$ACC_{83} = Capacity_{83} - \frac{Q_{duct_83} - Q_{infiltration_83}}{Capacity_{83}}$$

Where:

$Capacity_{SD}$, $Capacity_{95}$, and $Capacity_{83}$ = cooling capacity measured in section 4.1.1 of this appendix.

Q_{duct_SD} , Q_{duct_95} , and Q_{duct_83} = duct heat transfer while operating in cooling mode, calculated in section 4.1.1.1 of this appendix.

$Q_{infiltration_95}$ and $Q_{infiltration_83}$ = total infiltration air heat transfer in

cooling mode, calculated in section 4.1.1.2 of this appendix.

5.2 *Seasonally Adjusted Cooling Capacity.* Calculate the seasonally adjusted cooling capacity for portable air conditioners, SACC, expressed in Btu/h, according to the following:
 $SACC = ACC_{95} \times 0.2 + ACC_{83} \times 0.8$

Where:

ACC_{95} and ACC_{83} = adjusted cooling capacity, in Btu/h, calculated in section 5.1 of this appendix.

0.2 = weighting factor for ACC_{95} .

0.8 = weighting factor for ACC_{83} .

5.3 *Annual Energy Consumption.*

Calculate the annual energy consumption in each operating mode, AEC_m , expressed in kilowatt-hours per year (kWh/year). The annual hours of operation in each mode are estimated as follows:

Operating mode	Annual operating hours
Cooling Mode, Dual-Duct 95 °F ¹	750
Cooling Mode, Dual-Duct 83 °F ¹	750

Operating mode	Annual operating hours
Cooling Mode, Single-Duct	750
Off-Cycle	880
Inactive or Off	1,355

¹ These operating mode hours are for the purposes of calculating annual energy consumption under different ambient conditions for dual-duct portable air conditioners, and are not a division of the total cooling mode operating hours. The total dual-duct cooling mode operating hours are 750 hours.

$$AEC_m = P_m \times t_m \times k$$

Where:

AEC_m = annual energy consumption in each mode, in kWh/year.

P_m = average power in each mode, in watts.

m represents the operating mode (“95” and “83” cooling mode at the 95 °F and 83 °F dry-bulb outdoor conditions, respectively for dual-duct portable air conditioners, “SD” cooling mode for single-duct portable air conditioners, “oc” off-cycle, and “ia” inactive or “om” off mode).

t = number of annual operating time in each mode, in hours.

k = 0.001 kWh/Wh conversion factor from watt-hours to kilowatt-hours.

Total annual energy consumption in all modes except cooling, is calculated according to the following:

$$AEC_T = \sum_m AEC_m$$

Where:

AEC_T = total annual energy consumption attributed to all modes except cooling, in kWh/year;

AEC_m = total annual energy consumption in each mode, in kWh/year.

m represents the operating modes included in AEC_T (“oc” off-cycle, and “im” inactive or “om” off mode).

5.4 *Combined Energy Efficiency Ratio.* Using the annual operating hours, as outlined in section 5.3 of this appendix, calculate the combined energy efficiency ratio, CEER, expressed in Btu/Wh, according to the following:

$$CEER_{SD} = \left[\frac{(ACC_{95} \times 0.2 + ACC_{83} \times 0.8)}{\left(\frac{AEC_{SD} + AEC_T}{k \times t} \right)} \right]$$

$$CEER_{DD} = \left[\frac{ACC_{95}}{\left(\frac{AEC_{95} + AEC_T}{k \times t} \right)} \right] \times 0.2 + \left[\frac{ACC_{83}}{\left(\frac{AEC_{83} + AEC_T}{k \times t} \right)} \right] \times 0.8$$

Where:

$CEER_{SD}$ and $CEER_{DD}$ = combined energy efficiency ratio for single-duct and dual-duct portable air conditioners, respectively, in Btu/Wh.

ACC_{95} and ACC_{83} = adjusted cooling capacity, tested at the 95 °F and 83 °F dry-bulb outdoor conditions in Table 1 of this appendix, in Btu/h, calculated in section 5.1 of this appendix.

AEC_{SD} = annual energy consumption in cooling mode for single-duct portable air conditioners, in kWh/year, calculated in section 5.3 of this appendix.

AEC_{95} and AEC_{83} = annual energy consumption for the two cooling mode test conditions in Table 1 of this appendix for dual-duct portable air conditioners, in kWh/year, calculated in section 5.3 of this appendix.

AEC_T = total annual energy consumption attributed to all modes except cooling, in kWh/year,

calculated in section 5.3 of this appendix.

t = number of cooling mode hours per year, 750.

k = 0.001 kWh/Wh conversion factor for watt-hours to kilowatt-hours.

0.2 = weighting factor for the 95 °F dry-bulb outdoor condition test.

0.8 = weighting factor for the 83 °F dry-bulb outdoor condition test.

BILLING CODE 6450-01-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2015-5810; Directorate Identifier 2014-NM-116-AD]

RIN 2120-AA64

Airworthiness Directives; Fokker Services B.V. Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain Fokker Services B.V. Model F.28 Mark 0070 and 0100 airplanes. This proposed AD was prompted by a design review that revealed that a wiring failure, external to the center wing fuel tank, could cause a hot short circuit to a maximum level sensor wire, and result

in excessive heating of the maximum level sensor element. This proposed AD would require modifying the wiring of the maximum level sensors in the center wing fuel tank, performing after-installation tests, and corrective action if necessary. This proposed AD would also require revising the airplane maintenance or inspection program to incorporate fuel airworthiness limitation items and critical design configuration control limitations. We are proposing this AD to prevent the potential of ignition sources inside fuel tanks, which, in combination with flammable fuel vapors, could result in fuel tank explosions and consequent loss of the airplane.

DATES: We must receive comments on this proposed AD by January 11, 2016.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* (202) 493-2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone +31 (0)88-6280-350; fax +31 (0)88-6280-111; email technicalservices@fokker.com; Internet <http://www.myfokkerfleet.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-5810; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone (800) 647-5527) is in the **ADDRESSES** section. Comments will

be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Tom Rodriguez, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1137; fax 425-227-1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA-2015-5810; Directorate Identifier 2014-NM-116-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2014-0138, dated May 30, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or "the MCAI"), to correct an unsafe condition for certain Fokker Services B.V. Model F.28 Mark 0070 and 0100 airplanes. The MCAI states:

* * * [T]he FAA published Special Federal Aviation Regulation (SFAR) 88, and the Joint Aviation Authorities (JAA) published Interim Policy INT/POL/25/12.

The review conducted by Fokker Services on the Fokker 70/100 design, in response to these regulations, revealed that a wiring failure, external to the centre wing fuel tank, causing a hot short circuit to a maximum (max) level sensor wire may result in excessive heating of the max level sensor element.

This condition, if not corrected, could create an ignition source in the centre wing fuel tank vapour space, possibly resulting in a fuel tank explosion and consequent loss of the aeroplane.

EASA issued AD 2012-0240 [http://ad.easa.europa.eu/blob/easa_ad_2012_0240.pdf], to address this unsafe condition, which required installation of three fuses in the wiring of the max level sensor(s) in the centre wing fuel tank per Fokker Services Service Bulletin (SB)

SBF100-28-073. After that AD was issued, it was found that this technical solution caused fuel spills during refueling and, consequently, EASA cancelled AD 2012-0240.

More recently, Fokker Services issued SBF100-28-078, which cancelled SBF100-28-073, to correct the unsafe condition without the risk of fuel spills.

For the reasons described above, this [EASA] AD requires removal of one fuse from post-SBF100-28-073 aeroplanes, and installation of only two fuses on pre-SBF100-28-073 aeroplanes and, subsequently, the implementation of the associated Critical Design Configuration Control Limitation (CDCL) items.

More information this subject can be found in Fokker Services All Operators Message AOF100.186#03.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating it in Docket No. FAA-2015-5810.

The FAA has examined the underlying safety issues involved in fuel tank explosions on several large transport airplanes, including the adequacy of existing regulations, the service history of airplanes subject to those regulations, and existing maintenance practices for fuel tank systems. As a result of those findings, we issued a regulation titled "Transport Airplane Fuel Tank System Design Review, Flammability Reduction and Maintenance and Inspection Requirements" (66 FR 23086, May 7, 2001). In addition to new airworthiness standards for transport airplanes and new maintenance requirements, this rule included Special Federal Aviation Regulation No. 88 ("SFAR 88," Amendment 21-78, and subsequent Amendments 21-82 and 21-83).

Among other actions, SFAR 88 requires certain type design (*i.e.*, type certificate (TC) and supplemental type certificate (STC)) holders to substantiate that their fuel tank systems can prevent ignition sources in the fuel tanks. This requirement applies to type design holders for large turbine-powered transport airplanes and for subsequent modifications to those airplanes. It requires them to perform design reviews and to develop design changes and maintenance procedures if their designs do not meet the new fuel tank safety standards. As explained in the preamble to the rule, we intended to adopt airworthiness directives to mandate any changes found necessary to address unsafe conditions identified as a result of these reviews.

In evaluating these design reviews, we have established four criteria intended to define the unsafe conditions associated with fuel tank systems that

require corrective actions. The percentage of operating time during which fuel tanks are exposed to flammable conditions is one of these criteria. The other three criteria address the failure types under evaluation: single failures, combination of failures, and unacceptable (failure) experience. For all three failure criteria, the evaluations included consideration of previous actions taken that may mitigate the need for further action.

The Joint Aviation Authorities (JAA) has issued a regulation that is similar to SFAR 88. (The JAA is an associated body of the European Civil Aviation Conference (ECAC) representing the civil aviation regulatory authorities of a number of European States who have agreed to co-operate in developing and implementing common safety regulatory standards and procedures.) Under this regulation, the JAA stated that all members of the ECAC that hold type certificates for transport category airplanes are required to conduct a design review against explosion risks.

We have determined that the actions identified in this AD are necessary to reduce the potential of ignition sources inside fuel tanks, which, in combination with flammable fuel vapors, could result in fuel tank explosions and consequent loss of the airplane.

Related Service Information Under CFR Part 51

Fokker has issued Service Bulletin SBF100-28-078, dated January 23, 2014. The service information describes procedures for modifying the wiring of the maximum level sensors in the center wing fuel tank, after-installation tests, and corrective action if necessary. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section of this NPRM.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

Costs of Compliance

We estimate that this proposed AD affects 15 airplanes of U.S. registry.

We also estimate that it would take up to 9 work-hours per product to modify the wiring of the maximum level sensors in the center wing fuel tank, as specified in this proposed AD. The average labor rate is \$85 per work-hour. Required parts would cost about \$1,700 per product. Based on these figures, we estimate the cost of this proposed modification on U.S. operators to be up to \$36,975, or up to \$2,465 per product.

We also estimate that it would take about 1 work-hour per product to revise the maintenance or inspection program as specified in this proposed AD. The average labor rate is \$85 per work-hour. Based on these figures, we estimate the cost of this proposed revision on U.S. operators to be \$1,275, or \$85 per product.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and

4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Fokker Services B.V.: Docket No. FAA-2015-5810; Directorate Identifier 2014-NM-116-AD.

(a) Comments Due Date

We must receive comments by January 11, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Fokker Services B.V. Model F.28 Mark 0070 and 0100 airplanes, certificated in any category, equipped with a center wing tank.

(d) Subject

Air Transport Association (ATA) of America Code 28, Fuel.

(e) Reason

This AD was prompted by a design review which revealed that a wiring failure, external to the center wing fuel tank, could cause a hot short circuit to a maximum level sensor wire, and result in excessive heating of the maximum level sensor element. We are issuing this AD to prevent the potential of ignition sources inside fuel tanks, which, in combination with flammable fuel vapors, could result in fuel tank explosions and consequent loss of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Wiring Modification

Within 24 months after the effective date of this AD: Modify the wiring of the maximum level sensors of the center wing fuel tank, as specified in paragraph (g)(1) or (g)(2) of this AD, as applicable. Before further flight after accomplishing the modification,

do all applicable tests and corrective actions, in accordance with Part 5 of the Accomplishment Instructions of Fokker Service Bulletin SBF100-28-078, dated January 23, 2014.

(1) For post-SBF100-28-073 configuration airplanes: Do the modification in accordance with Part 1 or Part 3, as applicable, of the Accomplishment Instructions of Fokker Service Bulletin SBF100-28-078, dated January 23, 2014.

(2) For pre-SBF100-28-073 configuration airplanes: Do the modification in accordance with Part 2 or Part 4, as applicable, of the Accomplishment Instructions of Fokker Service Bulletin SBF100-28-078, dated January 23, 2014.

(h) Revise Maintenance or Inspection Program

Within 30 days after installing the modification specified in paragraph (g)(1) or (g)(2) of this AD, as applicable: Revise the airplane maintenance or inspection program, as applicable, to incorporate the fuel airworthiness limitation items and critical design configuration control limitations (CDCCLs) specified in paragraph 2.L.(1)(c) of Fokker Service Bulletin SBF100-28-078, dated January 23, 2014.

(i) No Alternative Actions, Intervals, and/or CDCCLs

After accomplishing the revision required by paragraph (h) of this AD, no alternative actions (*e.g.*, inspections), intervals, or CDCCLs may be used unless the actions, intervals, or CDCCLs are approved as an alternative method of compliance in accordance with the procedures specified in paragraph (j)(1) of this AD.

(j) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM-116, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Tom Rodriguez, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1137; fax 425-227-1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(2) *Contacting the Manufacturer*: As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Fokker B.V. Service's EASA Design Organization Approval (DOA). If

approved by the DOA, the approval must include the DOA-authorized signature.

(k) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2014-0138, dated May 30, 2014, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating it in Docket No. FAA-2015-5810.

(2) For service information identified in this AD, contact Fokker Services B.V., Technical Services Dept., P.O. Box 1357, 2130 EL Hoofddorp, the Netherlands; telephone +31 (0)88-6280-350; fax +31 (0)88-6280-111; email technicalservices@fokker.com; Internet <http://www.myfokkerfleet.com>. You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

Issued in Renton, Washington, on November 17, 2015.

Jeffrey E. Duven,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

[FR Doc. 2015-30007 Filed 11-25-15; 8:45 am]

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2015-5815; Directorate Identifier 2015-NM-039-AD]

RIN 2120-AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain Airbus Model A330-200 and -300 series airplanes; and all Model A340-200, -300, -500, and -600 series airplanes. This proposed AD was prompted by reports that the potable water service panel access door was lost during flight. This proposed AD would require modifying affected potable water service panel access doors. We are proposing this AD to prevent failure of the latching mechanism of the potable water service panel access door, which could result in the loss of the potable water service panel access door during flight, and resultant damage to the airplane (*e.g.*, damage to the trimmable horizontal stabilizer) that could cause loss of control of the airplane.

DATES: We must receive comments on this proposed AD by January 11, 2016.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* 202-493-2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Airbus SAS, Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email airworthiness.A330-A340@airbus.com; Internet <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-5815; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800-647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT:

Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1138; fax 425-227-1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the

ADDRESSES section. Include “Docket No. FAA–2015–5815; Directorate Identifier 2015–NM–039–AD” at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2015–0028R1, dated May 29, 2015 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for certain Airbus Model A330–200 and –300 series airplanes; and Model A340–200, –300, –500, and –600 series airplanes. The MCAI states:

Several cases have been reported in which the potable water service panel access door was lost during flight, causing damage to the trimmable horizontal stabilizer. The results of subsequent investigations showed that these events were due to failure of the latching mechanism of the potable water service panel access door.

This condition, if not corrected, could lead to further cases of in-flight loss of the potable water service panel access door, possibly resulting in injury to persons on ground and/or damage to the aeroplane [(e.g., damage to the trimmable horizontal stabilizer)].

To address this condition, Airbus developed a modification and published Service Bulletin (SB) A330–52–3086, SB A340–52–4094 and SB A340–52–5019, to provide instructions for in-service accomplishment of that modification.

Consequently, EASA issued AD 2015–0028 to require modification of the potable water service panel access door 164AR for A330/A340–200/–300 aeroplanes or 154BR for A340–500/–600 aeroplanes, which includes installation of reinforced hinge screws and more robust latches.

Since that [EASA] AD was issued, it was determined that aeroplanes that have embodied Airbus Mod 201938 (Improvement of latching mechanism of potable water service panel) are also not affected by the requirements of this [EASA] AD.

For the reason described above, this [EASA] AD is revised to exclude post-mod 201938 aeroplanes from the Applicability.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for

and locating Docket No. FAA–2015–5815.

Related Service Information Under 1 CFR Part 51

Airbus has issued the following service information.

- Airbus Service Bulletin A330–52–3086, Revision 01, dated April 25, 2014.
- Airbus Service Bulletin A340–52–4094, Revision 01, dated April 25, 2014.
- Airbus Service Bulletin A340–52–5019, Revision 01, dated April 25, 2014.

The service information describes procedures for modifying the affected potable water service panel access door. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this NPRM.

FAA’s Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of these same type designs.

Explanation of “RC” Procedures and Tests in Service Information

The FAA worked in conjunction with industry, under the Airworthiness Directive Implementation Aviation Rulemaking Committee (ARC), to enhance the AD system. One enhancement was a new process for annotating which procedures and tests in the service information are required for compliance with an AD.

Differentiating these procedures and tests from other tasks in the service information is expected to improve an owner’s/operator’s understanding of crucial AD requirements and help provide consistent judgment in AD compliance. The procedures and tests identified as RC (required for compliance) in any service information have a direct effect on detecting, preventing, resolving, or eliminating an identified unsafe condition.

As specified in a NOTE under the Accomplishment Instructions of the specified service information, procedures and tests that are identified as RC in any service information must be done to comply with the proposed

AD. However, procedures and tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator’s maintenance or inspection program without obtaining approval of an alternative method of compliance (AMOC), provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC will require approval of an AMOC.

Costs of Compliance

We estimate that this proposed AD affects 63 airplanes of U.S. registry.

We also estimate that it would take about 21 work-hours per product to comply with the basic requirements of this proposed AD. The average labor rate is \$85 per work-hour. Required parts would cost about \$15,280 per product. Based on these figures, we estimate the cost of this proposed AD on U.S. operators to be \$1,075,095, or \$17,065 per product.

According to the manufacturer, some of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. “Subtitle VII: Aviation Programs,” describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in “Subtitle VII, Part A, Subpart III, Section 44701: General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a

substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a “significant regulatory action” under Executive Order 12866;
2. Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Airbus: Docket No. FAA–2015–5815; Directorate Identifier 2015–NM–039–AD.

(a) Comments Due Date

We must receive comments by January 11, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to the airplanes identified in paragraphs (c)(1) and (c)(2) of this AD, certificated in any category.

(1) Airbus Model A330–201, –202, –203, –223, –243, –301, –302, –303, –321, –322, –323, –341, –342, and –343 airplanes, all manufacturer serial numbers, except those on which Airbus modification 201715, or Airbus modification 201796, or Airbus modification 201938 has been embodied in production.

(2) Airbus Model A340–211, –212, –213, –311, –312, –313, –541, and –642 airplanes, all manufacturing serial numbers.

(d) Subject

Air Transport Association (ATA) of America Code 52, Doors.

(e) Reason

This AD was prompted by reports that the potable water service panel access door was lost during flight. We are issuing this AD to prevent failure of the latching mechanism of the potable water service panel access door, which could result in the loss of the potable water service panel access door during flight, and resultant damage to the airplane (e.g., damage to the trimmable horizontal stabilizer) that could cause loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Modification

(1) Except as required by paragraph (g)(2) of this AD, within 36 months after the effective date of this AD, modify the affected potable water service panel access door, in accordance with the Accomplishment Instructions of the service information identified in paragraph (g)(1)(i), (g)(1)(ii), or (g)(1)(iii) of this AD, as applicable to airplane type and model.

(i) Airbus Service Bulletin A330–52–3086, Revision 01, dated April 25, 2014.

(ii) Airbus Service Bulletin A340–52–4094, Revision 01, dated April 25, 2014.

(iii) Airbus Service Bulletin A340–52–5019, Revision 01, dated April 25, 2014.

(2) For airplanes that have already been modified before the effective date of this AD, as specified in the service information identified in paragraph (g)(2)(i), (g)(2)(ii), or (g)(2)(iii) of this AD, as applicable to airplane type and model: Within 16 months after the effective date of this AD, modify the potable water service panel access door by accomplishing the actions identified as “additional work,” as specified in and in accordance with the Accomplishment Instructions of the service information identified in paragraph (g)(1)(i), (g)(1)(ii), or (g)(1)(iii) of this AD, as applicable to airplane type and model.

(i) Airbus Service Bulletin A330–52–3086, dated April 27, 2012.

(ii) Airbus Service Bulletin A340–52–4094, dated April 27, 2012.

(iii) Airbus Service Bulletin A340–52–5019, dated May 29, 2012.

(h) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Vladimir Ulyanov, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone 425–227–1138; fax 425–227–1149. Information may be emailed to: 9–ANM–116–

AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM–116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus’s EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* If any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator’s maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(i) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2015–0028R1, dated May 29, 2015, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–5815.

(2) For service information identified in this AD, contact Airbus SAS, Airworthiness Office—EAL, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 45 80; email airworthiness.A330-A340@airbus.com; Internet <http://www.airbus.com>. You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on November 17, 2015.

Jeffrey E. Duven,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****14 CFR Part 39**

[Docket No. FAA-2015-5814; Directorate Identifier 2014-NM-247-AD]

RIN 2120-AA64

Airworthiness Directives; Airbus Airplanes**AGENCY:** Federal Aviation Administration (FAA), DOT.**ACTION:** Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain Airbus Model A318, A319, and A320 series airplanes. This proposed AD was prompted by reports of an operator finding chafing damage on the fuselage skin at the bottom of certain frames, underneath the fairing structure. This proposed AD would require a repetitive detailed inspection for damage on the fuselage skin at certain frames, and applicable related investigative and corrective actions. We are proposing this AD to detect and correct damage to the fuselage skin, which could lead to crack initiation and propagation, possibly resulting in reduced structural integrity of the fuselage.

DATES: We must receive comments on this proposed AD by January 11, 2016.**ADDRESSES:** You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- Federal eRulemaking Portal: Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.

- Fax: 202-493-2251.

- Mail: U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

- Hand Delivery: U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email account.airworth-eas@airbus.com; Internet <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue

SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-5814; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800-647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1405; fax 425-227-1149.

SUPPLEMENTARY INFORMATION:**Comments Invited**

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include “Docket No. FAA-2015-5814; Directorate Identifier 2014-NM-247-AD” at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2014-0259, dated December 5, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for certain Airbus Model A318, A319, and A320 series airplanes. The MCAI states:

An operator reported finding chafing damage on the fuselage skin at the bottom of frame (FR) 34 junction between stringer

(STR) 43 left hand (LH) side and right hand (RH) side on several aeroplanes, underneath the fairing structure.

After investigation, a contact between the fairing nut plate and the fuselage was identified, causing damage to the fuselage.

This condition, if not detected and corrected, could lead to crack initiation and propagation, possibly resulting in reduced structural integrity of the fuselage.

For the reason described above, this [EASA] AD requires repetitive detailed inspections (DET) of the fuselage [for chafing] at FR 34 and provides an optional terminating action [modification of the belly fairing] to the repetitive inspections required by this [EASA] AD.

Related investigative actions include a special detailed inspection of external fuselage skin panel for any cracking, and measurement of crack length and remaining thickness. Corrective actions include repair or modification of the fuselage skin panel. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-5814.

Related Service Information Under 14 CFR Part 51

Airbus has issued Service Bulletin A320-53-1281, Revision 01, dated December 1, 2014; and Service Bulletin A320-53-1287, dated July 29, 2014. The service information describes procedures for a detailed inspection for damage (including chafing marks) on the fuselage skin at FR34 between STR43 LH and RH sides, and applicable related investigative and corrective actions. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this NPRM.

FAA’s Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of these same type designs.

Explanation of “RC” Procedures and Tests in Service Information

The FAA worked in conjunction with industry, under the Airworthiness Directive Implementation Aviation

Rulemaking Committee (ARC), to enhance the AD system. One enhancement was a new process for annotating which procedures and tests in the service information are required for compliance with an AD. Differentiating these procedures and tests from other tasks in the service information is expected to improve an owner's/operator's understanding of crucial AD requirements and help provide consistent judgment in AD compliance. The procedures and tests identified as Required for Compliance (RC) in any service information have a direct effect on detecting, preventing, resolving, or eliminating an identified unsafe condition.

As specified in a Note under the Accomplishment Instructions of the specified service information, procedures and tests that are identified as RC in any service information must be done to comply with the proposed AD. However, procedures and tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an alternative method of compliance (AMOC), provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC will require approval of an AMOC.

Costs of Compliance

We estimate that this proposed AD affects 642 airplanes of U.S. registry.

We also estimate that it would take about 12 work-hours per product to comply with the basic requirements of this proposed AD. The average labor rate is \$85 per work-hour. Required parts would cost about \$90 per product. Based on these figures, we estimate the cost of this proposed AD on U.S. operators to be \$712,620, or \$1,110 per product.

In addition, we estimate that any necessary follow-on actions would take about 21 work-hours and require parts costing \$3,550, for a cost of \$5,335 per product. We have no way of determining the number of aircraft that might need this action.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more

detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Airbus: Docket No. FAA-2015-5814; Directorate Identifier 2014-NM-247-AD.

(a) Comments Due Date

We must receive comments by January 11, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to the airplanes identified in paragraphs (c)(1), (c)(2), and (c)(3) of this AD, certificated in any category, all manufacturer serial numbers, except those on which Airbus Modification 37878 has been embodied in production, or Airbus Service Bulletin A320-53-1281 has been done in service.

(1) Airbus Model A318-111, -112, -121, and -122 airplanes.

(2) Airbus Model A319-111, -112, -113, -114, -115, -131, -132, and -133 airplanes.

(3) Airbus Model A320-211, -212, -214, -231, -232, and -233 airplanes

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Reason

This AD was prompted by reports of chafing damage on the fuselage skin at the bottom of certain frames, underneath the fairing structure. We are issuing this AD to detect and correct damage to the fuselage skin, which could lead to crack initiation and propagation, possibly resulting in reduced structural integrity of the fuselage.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Inspection and Corrective Action

(1) Within the compliance times identified in paragraphs (g)(1)(i) and (g)(1)(ii) of this AD, whichever occurs later, do a detailed inspection for damage (including chafing marks) on the fuselage skin at frame (FR)34 between stringer (STR)43 on the left-hand and right-hand sides, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320-53-1287, dated July 29, 2014. Repeat the inspection thereafter at intervals not to exceed 12,000 flight cycles or 24,000 flight hours, whichever occurs first.

(i) Before exceeding 12,000 flight cycles or 24,000 flight hours, whichever occurs first since the airplane's first flight.

(ii) Within 5,000 flight cycles or 10,000 flight hours, whichever occurs first after the effective date of this AD.

(2) If any damage is detected during any inspection required by paragraph (g)(1) of this AD, before further flight, do all applicable related investigative and corrective actions, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320-53-1287, dated July 29, 2014, except as required by paragraph (g)(3) of this AD.

(3) If any cracking is found during any related investigative action required by paragraph (g)(2) of this AD, or if any damage detected during the inspection required by paragraph (g)(1) of this AD exceeds the limits defined in the Accomplishment Instructions

of Airbus Service Bulletin A320-53-1287, dated July 29, 2014, before further flight, repair using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA).

(h) Non-Terminating Repair Action

Accomplishment of a repair on an airplane as required by paragraphs (g)(2) and (g)(3) of this AD, does not constitute terminating action for the repetitive detailed inspection required by paragraph (g)(1) of this AD, unless the approved repair indicates otherwise.

(i) Terminating Action for the Repetitive Detailed Inspection

Modification of the belly fairing on any airplane in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320-53-1281, Revision 01, dated December 1, 2014, constitutes terminating action for the repetitive detailed inspection required by paragraph (g)(1) of this AD for that airplane.

(j) Credit for Previous Actions

This paragraph provides credit for actions required by paragraph (i) of this AD, if those actions were performed before the effective date of this AD using Airbus Service Bulletin A320-53-1281, dated July 29, 2014, which is not incorporated by reference in this AD.

(k) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1405; fax 425-227-1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer*: For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the EASA; or Airbus's EASA DOA. If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC)*: If any service information contains procedures or tests that are identified as RC, those procedures and tests must be done to comply

with this AD; any procedures or tests that are not identified as RC are recommended. Those procedures and tests that are not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the procedures and tests identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to procedures or tests identified as RC require approval of an AMOC.

(l) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2014-0259, dated December 5, 2014, for related information.

This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-5814.

(2) For service information identified in this AD, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email account.airworth-eas@airbus.com; Internet <http://www.airbus.com>. You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

Issued in Renton, Washington, on November 17, 2015.

Jeffrey E. Duven,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2015-5812; Directorate Identifier 2015-NM-077-AD]

RIN 2120-AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to supersede Airworthiness Directive (AD) 2011-23-05, which applies to certain The Boeing Company Model 737-300, -400, and -500 series airplanes. AD 2011-23-05 currently requires repetitive inspections for cracking of the 1.04-inch nominal diameter wire penetration hole, and applicable related investigative and corrective actions. Since we issued AD 2011-23-05, an evaluation by the design approval holder (DAH) indicates

that the fuselage frames and frame reinforcements are subject to widespread fatigue damage (WFD). This proposed AD would add new inspection areas, a modification that terminates certain inspections, post-modification inspections, and repair if necessary. We are proposing this AD to detect and correct fatigue cracking of the fuselage frames and frame reinforcements, which could result in reduced structural integrity of the airplane.

DATES: We must receive comments on this proposed AD by January 11, 2016.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* 202-493-2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P. O. Box 3707, MC 2H-65, Seattle, WA 98124-2207; telephone 206-544-5000, extension 1; fax 206-766-5680; Internet <https://www.myboeingfleet.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, Washington. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-5812.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-5812; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800-647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Wayne Lockett, Aerospace Engineer,

Airframe Branch, ANM-120S, Seattle Aircraft Certification Office (ACO), FAA, 1601 Lind Avenue SW., Renton, Washington 98057-3356; phone: 425-917-6447; fax: 425-917-6590; email: wayne.lockett@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA-2015-5812; Directorate Identifier 2015-NM-077-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

Structural fatigue damage is progressive. It begins as minute cracks, and those cracks grow under the action of repeated stresses. This can happen because of normal operational conditions and design attributes, or because of isolated situations or incidents such as material defects, poor fabrication quality, or corrosion pits, dings, or scratches. Fatigue damage can occur locally, in small areas or structural design details, or globally. Global fatigue damage is general degradation of large areas of structure with similar structural details and stress levels. Multiple-site damage is global damage that occurs in a large structural element such as a single rivet line of a lap splice joining two large skin panels. Global damage can also occur in multiple elements such as adjacent frames or stringers. Multiple-site-damage and multiple-element-damage cracks are typically too small initially to be reliably detected with normal inspection methods. Without intervention, these cracks will grow, and eventually compromise the structural integrity of the airplane, in a condition known as WFD. As an airplane ages, WFD will likely occur, and will certainly occur if the airplane is operated long enough without any intervention.

The FAA's WFD final rule (75 FR 69746, November 15, 2010) became

effective on January 14, 2011. The WFD rule requires certain actions to prevent structural failure due to WFD throughout the operational life of certain existing transport category airplanes and all of these airplanes that will be certificated in the future. For existing and future airplanes subject to the WFD rule, the rule requires that DAHs establish a limit of validity (LOV) of the engineering data that support the structural maintenance program. Operators affected by the WFD rule may not fly an airplane beyond its LOV, unless an extended LOV is approved.

The WFD rule (75 FR 69746, November 15, 2010) does not require identifying and developing maintenance actions if the DAHs can show that such actions are not necessary to prevent WFD before the airplane reaches the LOV. Many LOVs, however, do depend on accomplishment of future maintenance actions. As stated in the WFD rule, any maintenance actions necessary to reach the LOV will be mandated by airworthiness directives through separate rulemaking actions.

In the context of WFD, this action is necessary to enable DAHs to propose LOVs that allow operators the longest operational lives for their airplanes, and still ensure that WFD will not occur. This approach allows for an implementation strategy that provides flexibility to DAHs in determining the timing of service information development (with FAA approval), while providing operators with certainty regarding the LOV applicable to their airplanes.

On October 20, 2011, we issued AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011), for certain Model 737-300, -400, and -500 series airplanes. AD 2011-23-05 superseded AD 2009-02-06 R1, Amendment 39-16015 (74 FR 45979, September 8, 2009). AD 2011-23-05 requires repetitive inspections for cracking of the 1.04-inch nominal diameter wire penetration hole, and applicable related investigative and corrective actions. AD 2011-23-05 resulted from reports of cracking in the frame, or in the frame and frame reinforcement, common to the 1.04-inch nominal diameter wire penetration hole intended for wire routing; and recent reports of multiple adjacent frame cracking found before the compliance time required by AD 2009-02-06 R1. We issued AD 2011-23-05 to detect and correct cracking in the fuselage frames and frame reinforcements, which could reduce the structural capability of the frames to sustain limit loads, and result in cracking in the fuselage skin and

subsequent rapid depressurization of the airplane.

Actions Since AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011), Was Issued

Since we issued AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011), an evaluation by the DAH indicates that the fuselage frames and frame reinforcements are subject to WFD.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Alert Service Bulletin 737-53A1279, Revision 2, dated April 21, 2015. The service information describes procedures for the following actions.

- Inspections of wire penetration holes, standoff/tooling holes, and the production fastener holes for cracking in the forward cargo compartment frames and frame reinforcements, between stringer (S) S-19 and S-22, on both left and right sides of the airplane.
- A preventive modification of frames between S-19 and S-22.
- Post-modification inspections.
- Repairs.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this NPRM.

FAA's Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of these same type designs.

Proposed AD Requirements

This proposed AD would retain all requirements of AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011). This proposed AD would require accomplishing the actions specified in the service information described previously, except as discussed under "Differences Between This Proposed AD and the Service Information." For information on the procedures and compliance times, see this service information at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-5812.

Differences Between This Proposed AD and the Service Information

Boeing Alert Service Bulletin 737-53A1279, Revision 2, dated April 21, 2015, specifies to contact the manufacturer for instructions on how to

repair certain conditions, but this proposed AD would require repairing those conditions in one of the following ways:

- In accordance with a method that we approve; or
- Using data that meet the certification basis of the airplane, and that have been approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) whom

we have authorized to make those findings.

Explanation of Compliance Time

The compliance time for the modification specified in this proposed AD for addressing WFD was established to ensure that discrepant structure is modified before WFD develops in airplanes. Standard inspection techniques cannot be relied on to detect WFD before it becomes a hazard to

flight. We will not grant any extensions of the compliance time to complete any AD-mandated service bulletin related to WFD without extensive new data that would substantiate and clearly warrant such an extension.

Costs of Compliance

We estimate that this proposed AD affects 605 airplanes of U.S. registry. We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Inspections [retained actions from AD 2011–23–05, Amendment 39–16856 (76 FR 67343, November 1, 2011).]	16 work-hours × \$85 per hour = \$1,360 per inspection cycle.	\$0	\$1,360 per inspection cycle.	\$822,800 per inspection cycle.
Inspections [new proposed action]	32 work-hours × \$85 per hour = \$2,720 per inspection cycle.	0	\$2,720 per inspection cycle.	\$1,645,600 per inspection cycle.
Modification [new proposed action]	32 work-hours × \$85 per hour = \$2,720.	0	\$2,720	\$1,645,600.

We estimate the following costs to do any necessary repairs that would be

required based on the results of the proposed inspection. We have no way of

determining the number of aircraft that might need these repairs:

ON-CONDITION COSTS

Action	Labor cost	Parts cost	Cost per product
Repair	18 work-hours × \$85 per hour = \$1,530	None	\$1,530

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency’s authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, “General requirements.” Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the

States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Is not a “significant rule” under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2011–23–05, Amendment 39–16856 (76 FR 67343, November 1, 2011), and adding the following new AD:

The Boeing Company: Docket No. FAA–2015–5812; Directorate Identifier 2015–NM–077–AD.

(a) Comments Due Date

The FAA must receive comments on this AD action by January 11, 2016.

(b) Affected ADs

This AD replaces AD 2011–23–05, Amendment 39–16856 (76 FR 67343, November 1, 2011).

(c) Applicability

This AD applies to The Boeing Company Model 737–300, –400, and –500 series airplanes; certificated in any category; as identified in Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015.

(d) Subject

Air Transport Association (ATA) of America Code 53, Fuselage.

(e) Unsafe Condition

This AD was prompted by an evaluation by the design approval holder (DAH) indicates that the fuselage frames and frame reinforcements are subject to widespread fatigue damage (WFD). We are issuing this AD to detect and correct fatigue cracking of the fuselage frames and frame reinforcements, which could result in reduced structural integrity of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Inspection, With References To Terminating Actions

This paragraph restates the requirements of paragraph (g) of AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011), with references to terminating actions. At the applicable time specified in paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737-53A1279, Revision 1, dated September 2, 2011, except as required by paragraphs (k)(1), (k)(2), and (k)(4) of this AD: Do a high frequency eddy current (HFEC) surface or HFEC hole/edge inspection for any cracking of the 1.04-inch nominal diameter wire penetration hole in the frame and frame reinforcement between stringer (S) S-20 and S-21, in accordance with Part 2 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1279, Revision 1, dated September 2, 2011. Accomplishment of the applicable inspections required by paragraphs (m) and (n) of this AD terminates the inspections required by this paragraph. Accomplishment of the modification required by paragraph (p) of this AD terminates the inspections required by this paragraph for the modified area only.

(h) Retained Repetitive Inspections, With References To Terminating Actions

This paragraph restates the requirements of paragraph (h) of AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011), with references to terminating actions. Within 4,500 flight cycles after accomplishment of the most recent inspection specified in Part 2 or Part 4 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1279, Revision 1, dated September 2, 2011, or within 90 days after November 16, 2011 (the effective date of AD 2011-23-05), whichever occurs later: Do an HFEC hole/edge inspection for cracking of the 1.04-inch nominal diameter wire penetration hole in the frame and frame reinforcement between S-20 and S-21, in accordance with Part 4 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1279, Revision 1, dated September 2, 2011. Repeat the inspection thereafter at intervals not to exceed 4,500 flight cycles. Accomplishment of the applicable inspections required by paragraphs (m) and (n) of this AD, terminates the inspections required by this paragraph.

Accomplishment of the modification specified in paragraph (j) or (p) of this AD terminates the repetitive inspections required by this paragraph for the modified area only. Accomplishment of the repair specified in paragraph (i) of this AD terminates the repetitive inspections required by this paragraph for the repaired area only.

(i) Retained Repair, With No Changes

This paragraph restates the requirements of paragraph (i) of AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011), with no changes. If any cracking is found during any inspection required by paragraph (g) or (h) of this AD: Before further flight, repair the crack including doing all applicable related investigative and corrective actions, in accordance with the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1279, Revision 1, dated September 2, 2011, except as required by paragraph (k)(3) of this AD. All applicable related investigative and corrective actions must be done before further flight. Accomplishment of the requirements of this paragraph terminates the repetitive inspection requirements of paragraph (h) of this AD for the repaired location of that frame.

(j) Retained Optional Terminating Action, With New Limitation

This paragraph restates the optional action provided in paragraph (j) of AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011), with new limitation. Accomplishment of the preventive modification before the effective date of this AD, including doing all related investigative and applicable corrective actions, specified in Part 5 of the Accomplishment Instructions of Boeing Alert Service Bulletin 737-53A1279, Revision 1, dated September 2, 2011, except as required by paragraph (k)(3) of this AD, terminates the repetitive inspection requirements of paragraph (h) of this AD for the modified location of that frame, provided the modification is done before further flight after an inspection required by paragraph (g) or (h) of this AD has been done, and no cracking was found on that frame location during that inspection.

(k) Retained Exceptions to Service Information Specifications, With No Changes

This paragraph restates the requirements of paragraph (k) of AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011), with no changes. The following exceptions apply as specified in paragraphs (g), (i), and (j) of this AD.

(1) Where paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737-53A1279, Revision 1, dated September 2, 2011, refers to a compliance time "from date on Revision 1 of this service bulletin," this AD requires compliance within the specified compliance time after November 16, 2011 (the effective date of AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011)).

(2) For airplanes meeting all of the criteria specified in paragraphs (k)(2)(i), (k)(2)(ii), and (k)(2)(iii) of this AD: The compliance time for the initial inspection specified in Part 2 of the Accomplishment Instructions of

Boeing Alert Service Bulletin 737-53A1279, Revision 1, dated September 2, 2011, and required by paragraph (g) of this AD, may be extended to 90 days after November 16, 2011 (the effective date of AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011)).

(i) Model 737-300 series airplanes in Group 1, line numbers 1001 through 2565 inclusive;

(ii) Airplanes that have accumulated 40,000 or more total flight cycles as of November 16, 2011 (the effective date of AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011)); and

(iii) Airplanes on which the modification specified in Boeing Service Bulletin 737-53-1273, dated September 20, 2006; Revision 1, dated December 21, 2006; Revision 2, dated June 4, 2007; Revision 3, dated December 7, 2009; or Revision 4, dated July 23, 2010; has been done, including any configuration or deviation that has been approved as an AMOC during accomplishment of these service bulletins, by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle Aircraft Certification Office (ACO) to make those findings.

(3) Where Boeing Alert Service Bulletin 737-53A1279, Revision 1, dated September 2, 2011, specifies to contact Boeing for appropriate repair instructions: Before further flight, repair the crack using a method approved in accordance with the procedures specified in paragraph (u) of this AD.

(4) The "Condition" column of paragraph 1.E., "Compliance," of Boeing Alert Service Bulletin 737-53A1279, Revision 1, dated September 2, 2011, refers to total flight cycles "at the date of/on this service bulletin." However, this AD applies to the airplanes with the specified total flight cycles as of November 16, 2011 (the effective date of AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011)).

(l) Retained Credit for Previous Actions, With No Changes

This paragraph restates the requirements of paragraph (l) of AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011), with no changes. Actions done in accordance with Boeing Alert Service Bulletin 737-53A1279, dated December 18, 2007, before November 16, 2011 (the effective date of AD 2011-23-05), are acceptable for compliance with the corresponding actions required by paragraphs (g), (h), (i), and (j) of this AD.

(m) New Requirement of This AD: Inspections of Frames and Frame Reinforcements Between S-19 and S-22 for Certain Airplanes on Which Certain Inspections Have Not Been Accomplished

For airplanes identified as Groups 1 through 6, Configuration 3, in Boeing Alert Service Bulletin 737-53A1279, Revision 2, dated April 21, 2015, with 30,000 total flight cycles or fewer as of the effective date of this AD, on which any inspections specified in Boeing Alert Service Bulletin 737-53A1279, Revision 1, dated September 2, 2011, have not been accomplished: Except as required by paragraphs (t)(1) and (t)(2) of this AD, at

the applicable time specified in table 1 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015, or within 4,500 flight cycles after the effective date of this AD, whichever occurs later, do inspections for cracking at certain locations in the frames and frame reinforcements in accordance with “Part 2—Initial Detail and HFEC Inspection” of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015. Repeat the inspections for cracking at certain locations in the frames and frame reinforcements as specified in “Part 4—Repeat Detail and HFEC Inspections” of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015, thereafter at the applicable interval specified in paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015; or, before further flight after accomplishing an inspection and no cracking was found, do “Part 5—Preventative Modification” as specified in the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015. Accomplishment of the preventive modification specified in this paragraph terminates the repetitive inspections required by this paragraph for the modified area only. Do all actions specified in this paragraph in accordance with Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015.

(n) New Requirement of This AD: Inspections of Frames and Frame Reinforcements Between S–19 and S–22 for Groups 1–6, Configuration 3, Airplanes

For airplanes identified as Groups 1 through 6, Configuration 3, in Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015, with more than 30,000 total flight cycles as of the effective date of this AD, or that have been inspected as specified in Boeing Alert Service Bulletin 737–53A1279, Revision 1, dated September 2, 2011: Except as required by paragraphs (t)(1) and (t)(2) of this AD, at the applicable time specified in table 1 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015, do inspections for cracking at certain locations of the frames and frame reinforcements in accordance with “Part 4—Repeat Detail and HFEC Inspections” of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015. Repeat the inspections thereafter at the applicable interval specified in paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015; or, before further flight after accomplishing an inspection and no cracking was found, do “Part 5—Preventative Modification” as specified in the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015. Accomplishment of the preventive modification specified in this paragraph terminates the repetitive inspections required by this paragraph for the modified area only.

(o) New Requirement of This AD: Repairs

If any crack is found during any inspection required by paragraph (m) or (n) of this AD: Before further flight, repair, in accordance with “Part 3—Repair” of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015, except where Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015, specifies to contact Boeing for damage removal and repair instructions, repair before further flight using a method approved in accordance with the procedures specified in paragraph (u) of this AD. Accomplishing a repair terminates the inspections required by paragraphs (m) and (n) of this AD in the repaired area only. Accomplishment of a repair terminates the modification required by paragraph (p) of this AD at the repaired location only.

(p) New Requirement of This AD: Preventative Modification of the Frames Between S–19 and S–22

For airplanes identified as Groups 1 through 6, Configuration 3, in Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015: Except as required by paragraphs (t)(1) and (t)(2) of this AD, at the applicable time specified in table 2 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015, do the preventive modification of the frames between S–19 and S–22, in accordance with “Part 5—Preventative Modification” of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015. Accomplishment of the modification required by this paragraph terminates the requirements of paragraphs (g), (h), (m), and (n) of this AD for the modified location only.

(q) New Requirement of This AD: Inspections of Preventative Modification for Groups 1–3, Configuration 1, Airplanes

For airplanes identified as Groups 1 through 3, Configuration 1, in Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015: Except as required by paragraph (t)(1) of this AD, at the applicable time specified in table 3 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015, do HFEC, LFEC, and detailed inspections for cracking in accordance with “Part 7—INSPECTION OF PREVENTATIVE MODIFICATION” of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015. Repeat the inspections thereafter at the applicable interval specified in paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015. If any cracking is found during any inspection required by this paragraph, before further flight, repair using a method approved in accordance with the procedures specified in paragraph (u) of this AD.

(r) New Requirement of This AD: Inspections of Preventive Modification for Groups 1–6, Configuration 2

For airplanes identified as Groups 1 through 6, Configuration 2, in Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015: Except as required by paragraph (t)(1) of this AD, at the applicable time specified in table 4 or table 6 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015, do HFEC, LFEC, and detailed inspections for cracking in accordance with “Part 8—INSPECTION OF PREVENTATIVE MODIFICATION” of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015. Repeat the inspections thereafter at the applicable interval specified in table 4 or table 6 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015. If any cracking is found during any inspection required by this paragraph, before further flight, repair using a method approved in accordance with the procedures specified in paragraph (u) of this AD.

(s) New Requirement of This AD: Inspections of Preventive Modification for Group 4–6, Configuration 1, Airplanes

For airplanes identified as Group 4 through 6, Configuration 1, in Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015: At the applicable time specified in table 5 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015, except as required by paragraph (t)(1) of this AD: Do HFEC, LFEC and detailed inspections for cracking in accordance with “Part 7—INSPECTION OF PREVENTATIVE MODIFICATION” of the Accomplishment Instructions of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015. Repeat the inspections thereafter at the applicable time specified in paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015. If any cracking is found during any inspection required by this paragraph, before further flight, repair using a method approved in accordance with the procedures specified in paragraph (u) of this AD.

(t) New Requirement of This AD: Exceptions to Service Bulletin Specifications

(1) Where paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015, refers to a compliance time “after the Revision 2 date of this service bulletin,” this AD requires compliance within the specified compliance time after the effective date of this AD.

(2) The “Condition” column in table 1 and table 2 of paragraph 1.E., “Compliance,” of Boeing Alert Service Bulletin 737–53A1279, Revision 2, dated April 21, 2015, refers to total flight cycles “at the Revision 2 date of this service bulletin.” However, this AD applies to the airplanes with the specified total flight cycles as of the effective date of this AD.

(u) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Los Angeles Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (v)(1) of this AD. Information may be emailed to: 9-ANM-LAACO-AMOC-Requests@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair, modification, or alteration required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to make those findings. To be approved, the repair method, modification deviation, or alteration deviation must meet the certification basis of the airplane and the approval must specifically refer to this AD.

(4) AMOCs approved for AD 2009-02-06, Amendment 39-15796 (74 FR 10469, March 11, 2009); AD 2009-02-06 R1, Amendment 39-16015 (74 FR 45979, September 6, 2009); and AD 2011-23-05, Amendment 39-16856 (76 FR 67343, November 1, 2011); are approved as AMOCs for the corresponding provisions of this AD.

(v) Related Information

(1) For more information about this AD, contact Wayne Lockett, Aerospace Engineer, Airframe Branch, ANM-120S, Seattle Aircraft Certification Office (ACO), FAA, 1601 Lind Avenue SW., Renton, Washington 98057-3356; phone: 425-917-6447; fax: 425-917-6590; email: wayne.lockett@faa.gov.

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P. O. Box 3707, MC 2H-65, Seattle, WA 98124-2207; telephone 206-544-5000, extension 1; fax 206-766-5680; Internet <https://www.myboeingfleet.com>. You may view this referenced service information at the FAA, 1601 Lind Avenue SW., Renton, Washington. For information on the availability of this material at the FAA, call 425-227-1221.

Issued in Renton, Washington, on November 17, 2015.

Jeffrey E. Duven,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

RIN 2120-AA64

Airworthiness Directives; The Boeing Company Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to supersede Airworthiness Directive (AD) 2006-10-16, which applies to all The Boeing Company Model 747-100, 747-100B, 747-100B SUD, 747-200B, 747-200C, 747-200F, 747-300, 747-400, 747-400D, 747-400F, 747SR, and 747SP series airplanes. AD 2006-10-16 requires, for certain airplanes, repetitive inspections for cracking of the outboard and center sections of the horizontal stabilizer, and repair if necessary. For certain other airplanes, AD 2006-10-16 requires a detailed inspection to determine the type of fasteners, and related investigative actions and repair if necessary. Since we issued AD 2006-10-16, additional cracking was found in the splice plates, hinge fittings, terminal fittings, the upper skin of the outboard and center sections, and the rear spar webs before reaching the inspection interval specified in AD 2006-10-16. Cracked and fractured Maraging steel fasteners were also found. This proposed AD would reduce the compliance time for certain inspections and would add repetitive inspections for cracking of the splice plates, hinge fittings, terminal fittings, the upper skin of the outboard and center sections, and the rear spar webs in Zone B. This proposed AD would also add an inspection to determine whether fasteners are magnetic in Zone C, repetitive ultrasonic inspections for cracking and fractures of affected fasteners, and related investigative and corrective actions if necessary. This proposed AD would also add an optional modification, which would terminate certain repetitive inspections, and would add post-modification inspections and corrective action if necessary. We are proposing this AD to detect and correct this cracking, which could lead to reduced structural capability of the outboard and center sections of the horizontal stabilizer and could result in loss of control of the airplane.

DATES: We must receive comments on this proposed AD by January 11, 2016.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- Federal eRulemaking Portal: Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.
- Fax: 202-493-2251.
- Mail: U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- Hand Delivery: Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P. O. Box 3707, MC 2H-65, Seattle, WA 98124-2207; telephone: 206-544-5000, extension 1; fax: 206-766-5680; Internet <https://www.myboeingfleet.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221. It is also available on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-5816.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-5816; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800-647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Nathan Weigand, Aerospace Engineer, Airframe Branch, ANM-120S, FAA, Seattle Aircraft Certification Office, 1601 Lind Avenue SW., Renton, WA 98057-3356; phone: 425-917-6428; fax: 425-917-6590; email: nathan.p.weigand@faa.gov.

SUPPLEMENTARY INFORMATION:**Comments Invited**

We invite you to send any written relevant data, views, or arguments about

this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include “Docket No. FAA–2015–5816; Directorate Identifier 2015–NM–029–AD” at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD because of those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

On May 8, 2006, we issued AD 2006–10–16, Amendment 39–14600 (71 FR 28570, May 17, 2006), for all The Boeing Company Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747–400D, 747–400F, 747SR, and 747SP series airplanes. AD 2006–10–16 requires, for certain airplanes, repetitive inspections for cracking of the outboard and center sections of the horizontal stabilizer, and repair if necessary. For certain other airplanes, AD 2006–10–16 requires a detailed inspection to determine the type of fasteners, related investigative actions, and repair if necessary. AD 2006–10–16 resulted from reports of cracking in the outboard and center section of the aft upper skin of the horizontal stabilizer, the rear spar chord, rear spar web, terminal fittings, and splice plates; and a report of fractured and cracked steel fasteners. We issued AD 2006–10–16 to detect and correct this cracking, which could lead to reduced structural capability of the outboard and center sections of the horizontal stabilizer and could result in loss of control of the airplane.

Actions Since AD 2006–10–16, Amendment 39–14600 (71 FR 28570, May 17, 2006), Was Issued

Since we issued AD 2006–10–16, Amendment 39–14600 (71 FR 28570, May 17, 2006), additional cracking was found in the splice plates, hinge fittings, terminal fittings, the upper skin of the outboard and center sections, and the rear spar webs before reaching the inspection interval specified in AD 2006–10–16. Cracked and fractured

Maraging steel fasteners were also found.

Related Service Information Under 1 CFR Part 51

We reviewed Boeing Service Bulletin 747–55A2050, Revision 2, dated January 23, 2015. The service information describes procedures for accomplishing Zone A, Zone B, and Zone C inspections for cracking of the upper skin and upper rear spar chord of the outboard and center sections of the horizontal stabilizer, and related investigative and corrective actions if necessary. The service information also describes procedures for a magnetic inspection to determine the type of fasteners, ultrasonic inspections for cracking and fractures of affected fasteners, and related investigative actions and corrective actions if necessary. The service information also describes procedures for an optional modification, which would end certain repetitive inspections, and procedures for post-modification inspections and corrective action if necessary. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this NPRM.

FAA’s Determination

We are proposing this AD because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

Although this proposed AD does not explicitly restate the requirements of AD 2006–10–16, Amendment 39–14600 (71 FR 28570, May 17, 2006), this proposed AD would retain all of the requirements. Those requirements are referenced in the service information identified previously, which, in turn, is referenced in paragraph (g) of this proposed AD. This proposed AD would reduce the compliance time for certain inspections and add new repetitive inspections for cracking of the splice plates, hinge fittings, terminal fittings, the upper skin of the outboard and center sections, and the rear spar webs in Zone B. This proposed AD would also add an inspection to determine whether fasteners are magnetic in Zone C (made of H–11 steel), repetitive ultrasonic inspections for cracking and fractures of affected fasteners, and related

investigative and corrective actions if necessary. This proposed AD would also add an optional modification, which would end certain repetitive inspections, and procedures for post-modification inspections and corrective action if necessary. This proposed AD also adds optional open-hole NDT inspections (high frequency eddy current inspections) for certain airplanes, for Zone B inspections. This proposed AD would also require accomplishing the actions specified in the service information described previously, except as discussed under “Difference Between this Proposed AD and the Service Bulletin.” For information on the procedures and compliance times, see this service information at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–5816.

The phrase “related investigative actions” is used in this proposed AD. “Related investigative actions” are follow-on actions that (1) are related to the primary action, and (2) further investigate the nature of any condition found. Related investigative actions in an AD could include, for example, inspections.

The phrase “corrective actions” is used in this proposed AD. “Corrective actions” are actions that correct or address any condition found. Corrective actions in an AD could include, for example, repairs.

Difference Between This Proposed AD and the Service Bulletin

Although Boeing Service Bulletin 747–55A2050, Revision 2, dated January 23, 2015, specifies that operators may contact the manufacturer for disposition of certain repair conditions, this proposed AD would require repairing those conditions in one of the following ways:

- In accordance with a method that we approve; or
- Using data that meet the certification basis of the airplane, and that have been approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) whom we have authorized to make those findings.

Costs of Compliance

We estimate that this proposed AD affects 116 airplanes of U.S. registry.

We estimate the following costs to comply with this proposed AD:

ESTIMATED COSTS—REQUIRED ACTIONS

Action	Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Zone A Inspections (required by AD 2006–10–16, Amendment 39–14600).	8 work-hours × \$85 per hour = \$680.	\$0	\$680	Up to \$78,880.
Zone B Open-hole NDT Inspection (required by AD 2006–10–16, Amendment 39–14600 for Groups 3, 4, and 5 airplanes; and for Groups 1, 2, and 3 airplanes, if done).	30 work-hours × 85 per hour = 2,550.	0	2,550	Up to \$295,800.
Zone C Maraging or H–11 Steel Fastener Inspection (required by AD 2006–10–16, Amendment 39–14600 for Groups 1, 2, and 3 airplanes).	8 work-hours × 85 per hour = 680.	0	680	Up to \$78,880.
New Zone B proposed inspections	248 work-hours × 85 per hour = 21,080.	0	21,080	\$2,445,280.
New Zone C proposed inspection	26 work-hours × 85 per hour = 2,210.	0	2,210	\$256,360.

ESTIMATED COSTS—OPTIONAL ACTIONS

Action	Labor cost	Parts cost	Cost per product
Open-hole NDT inspections (high frequency eddy current inspections).	Up to 298 work-hours × \$85 per hour = up to \$25,330.	\$0	Up to \$25,330.
Zone B Modification	Up to 313 work-hours × \$85 per hour = up to \$26,605.	Up to \$3,486	Up to \$30,091.
Post-Modification Inspections	Up to 298 work-hours × \$85 per hour = up to \$25,330.	\$0	Up to \$25,330.

We have received no definitive data that would enable us to provide a cost estimate for the on-condition actions specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, "General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We have determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the

national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that the proposed regulation:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979),
- (3) Will not affect intrastate aviation in Alaska, and
- (4) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing Airworthiness Directive AD 2006–10–16, Amendment 39–14600 (71 FR 28570, May 17, 2006), and adding the following new AD:

The Boeing Company: Docket No. FAA–2015–5816; Directorate Identifier 2015–NM–029–AD.

(a) Comments Due Date

The FAA must receive comments on this AD action by January 11, 2016.

(b) Affected ADs

This AD replaces AD 2006–10–16, Amendment 39–14600 (71 FR 28570, May 17, 2006).

(c) Applicability

This AD applies to all The Boeing Company Model 747–100, 747–100B, 747–100B SUD, 747–200B, 747–200C, 747–200F, 747–300, 747–400, 747–400D, 747–400F, 747SR, and 747SP series airplanes; certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 55, Stabilizers.

(e) Unsafe Condition

This AD was prompted by reports of cracking found in the splice plates, hinge fittings, terminal fittings, the upper skin of the outboard and center sections, and the rear spar webs before reaching the inspection interval specified in AD 2006–10–16. Cracked and fractured Maraging steel fasteners were also found. We are issuing this AD to detect and correct this cracking, which

could lead to reduced structural capability of the outboard and center sections of the horizontal stabilizer and could result in loss of control of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Repetitive Inspections/Investigative and Corrective Actions

At the applicable time specified in paragraph 1.E., "Compliance," of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, except as required by paragraphs (h)(1) and (h)(2) of this AD: Do the applicable actions specified in paragraphs (g)(1), (g)(2), (g)(3), and (g)(4) of this AD, and all applicable related investigative and corrective actions, in accordance with the applicable part of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, except as required by paragraph (h)(3) of this AD. Do all applicable related investigative and corrective actions before further flight. Repeat the applicable inspections specified in paragraphs (g)(1), (g)(2), (g)(3), and (g)(4) of this AD at the applicable times specified in paragraph 1.E., "Compliance," of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015.

(1) For Group 1 through 3 airplanes identified in Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015: Do non-destructive test (NDT) inspections (ultrasonic, high frequency eddy current, and low frequency eddy current inspections) or open-hole NDT inspections (high frequency eddy current inspections), of Zone B for cracking in accordance with Part 3 or Part 4 of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, as applicable.

(2) For Group 4 through 6 airplanes identified in Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015: Do open-hole NDT inspections (high frequency eddy current inspections), of Zone B for cracking in accordance with Part 4 of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015.

(3) For Group 7 through 9 airplanes identified in Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015: Do inspections of Zone A (detailed or high frequency eddy current inspections) and Zone B (high frequency eddy current inspections) for cracking, in accordance with Part 1, Part 2, or Part 4 of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, as applicable.

(4) For Group 1 through 3 airplanes identified in Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015: Do an inspection of Zone C Maraging or H-11 steel fasteners to determine whether fasteners are magnetic, in accordance with Part 6 of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015.

(h) Exceptions to Service Bulletin Specifications

(1) Where Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, specifies a compliance time "after the Revision 2 date of this service bulletin," this AD requires compliance within the specified compliance time after the effective date of this AD.

(2) The Condition column of Table 1 of paragraph 1.E., "Compliance," of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, refers to "airplanes with certain total flight cycles and total flight hours." This AD, however, applies to the airplanes with the specified total flight cycles and total flight hours as of the effective date of this AD.

(3) Where Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, specifies to contact Boeing for repair instructions: Before further flight, repair using a method approved in accordance with the procedures specified in paragraph (l) of this AD.

(i) Optional Terminating Action

(1) For Group 1 through 3 airplanes identified in Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015: Accomplishing the Zone B modification, including all applicable related investigative and corrective actions, specified in Part 7 of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, except as required by paragraph (h)(3) of this AD, terminates the repetitive inspections specified in paragraphs (i)(1)(i) and (i)(1)(ii) of this AD for the modified area only.

(i) Inspections required by paragraph (g)(1) of this AD for Zone B, as specified in Part 3 and Part 4 of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015.

(ii) Inspections required by paragraph (g)(4) of this AD for Zone C, as specified in Part 5 and Part 6 of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015.

(2) For Group 1 through 3 airplanes identified in Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015: Accomplishing the Zone B open hole NDT inspection, repairing any cracking as applicable, and replacing fasteners as specified in Part 4 of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, terminates the repetitive ultrasonic inspections required by paragraph (g)(4) of this AD for Zone C, as specified in Part 6 of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, for the inspected area only.

(3) For Group 4 through 9 airplanes identified in Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015: Accomplishing the Zone B modification, including all applicable related investigative and corrective actions, specified in Part 7 of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, except as required by paragraph (h)(3) of this AD, terminates the

repetitive inspections required by paragraph (g)(2) or (g)(3) of this AD, as applicable, only for Zone B, as specified in Part 4 of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, for the modified area only.

(j) Repetitive Post-Modification Inspections and Corrective Actions

At the applicable time specified in paragraph 1.E., "Compliance," of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015: Do the applicable inspections specified in paragraphs (j)(1) and (j)(2) of this AD and all applicable corrective actions, in accordance with Part 8 of the Accomplishment Instructions of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, except as required by paragraph (h)(3) of this AD. Do all applicable corrective actions before further flight. Repeat the applicable inspections at the applicable times specified in paragraph 1.E., "Compliance," of Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015.

(1) For Group 1 through 3 airplanes identified in Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015 on which the Zone B modification specified in paragraph (i)(1) of this AD is done: Do non-destructive test (NDT) inspections (ultrasonic, high frequency eddy current, and low frequency eddy current inspections) or open-hole NDT inspections (high frequency eddy current inspections) of Zone B for cracking.

(2) For Group 4 through 9 airplanes identified in Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015 on which the Zone B modification specified in paragraph (i)(3) of this AD is done: Do open-hole NDT inspections (high frequency eddy current inspections) of Zone B for cracking.

(k) Parts Installation Prohibition

As of the effective date of this AD, no person may install any Maraging or H-11 steel fasteners in the locations specified in this AD. Where Boeing Service Bulletin 747-55A2050, Revision 2, dated January 23, 2015, specifies to install H-11 bolts (kept fasteners), this AD requires installation of Inconel bolts.

(l) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Seattle Aircraft Certification Office (ACO), FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the manager of the ACO, send it to the attention of the person identified in paragraph (m)(1) of this AD. Information may be emailed to: 9-ANM-Seattle-ACO-AMOC-Requests@faa.gov.

(2) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(3) An AMOC that provides an acceptable level of safety may be used for any repair required by this AD if it is approved by the Boeing Commercial Airplanes Organization Designation Authorization (ODA) that has been authorized by the Manager, Seattle ACO, to make those findings. For a repair method to be approved, the repair must meet the certification basis of the airplane, and the approval must specifically refer to this AD.

(4) AMOCs approved for AD 2006–10–16, Amendment 39–14600 (71 FR 28570, May 17, 2006), are approved as AMOCs for the corresponding provisions of paragraph (g) of this AD, except for approved AMOCs that allow installation of Maraging or H–11 steel fasteners.

(m) Related Information

(1) For more information about this AD, contact Nathan Weigand, Aerospace Engineer, Airframe Branch, ANM–120S, FAA, Seattle ACO, 1601 Lind Avenue SW., Renton, WA 98057–3356; phone: 425–917–6428; fax: 425–917–6590; email: nathan.p.weigand@faa.gov.

(2) For service information identified in this AD, contact Boeing Commercial Airplanes, Attention: Data & Services Management, P. O. Box 3707, MC 2H–65, Seattle, WA 98124–2207; telephone: 206–544–5000, extension 1; fax: 206–766–5680; Internet <https://www.myboeingfleet.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Issued in Renton, Washington, on November 19, 2015.

Michael Kaszycki,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910–13–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2015–5813; Directorate Identifier 2014–NM–111–AD]

RIN 2120–AA64

Airworthiness Directives; Dassault Aviation Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain Dassault Aviation Model FALCON 7X airplanes. This proposed AD was prompted by a fuel leak that occurred in the baggage compartment during fuel system pressurization. This proposed AD would require opening the fuel

boxes and restoring the sealing. We are proposing this AD to detect and correct failure of a connector or coupling on a fuel line, which, in combination with a leak in the corresponding enclosure (*i.e.*, fuel box), could result in a fire in the baggage compartment and affect the safe flight of the airplane.

DATES: We must receive comments on this proposed AD by January 11, 2016.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- Federal eRulemaking Portal: Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.
- Fax: 202–493–2251.
- Mail: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- Hand Delivery: U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Dassault Falcon Jet, P.O. Box 2000, South Hackensack, NJ 07606; telephone 201–440–6700; Internet <http://www.dassaultfalcon.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425–227–1221.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–5813; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT: Tom Rodriguez, Aerospace Engineer, International Branch, ANM–116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057–3356; telephone (425) 227–1137; fax (425) 227–1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include “Docket No. FAA–2015–5813; Directorate Identifier 2014–NM–111–AD” at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

The European Aviation Safety Agency (EASA), which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2014–0116, dated May 13, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for certain Dassault Aviation Model FALCON 7X airplanes. The MCAI states:

During the fuel system pressurization of a production line Falcon 7X aeroplane, a fuel leak occurred in the baggage compartment. The technical investigations concluded that a double failure of a connector (or coupling) on a fuel line, in combination with a defective fuel tightness of the corresponding enclosure (fuel box), caused the leak.

Failure of the second barrier (fuel box) is a dormant failure, as this will only manifest itself in case of connector (or fuel pipe coupling) failure in flight.

This condition, if not corrected, could result in a fire in the baggage compartment, which would affect the aeroplane safe flight.

To address this potential unsafe condition, Dassault Aviation issued Service Bulletin (SB) F7X–284, which provides instructions to restore the sealing of the Left Hand (LH) and Right Hand (RH) fuel boxes.

For the reasons described above, this [EASA] AD requires opening of the fuel boxes and restoration of the sealing of the fuel boxes to meet the initial design specifications.

You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–5813.

Related Service Information Under 14 CFR Part 51

Dassault Aviation has issued Service Bulletin 7X–284, Revision 1, dated

April 8, 2014. The service information describes procedures for opening the fuel boxes and restoring the sealing. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section of this NPRM.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

Costs of Compliance

We estimate that this proposed AD affects 39 airplanes of U.S. registry.

We also estimate that it would take about 16 work-hours per product to comply with the basic requirements of this proposed AD. The average labor rate is \$85 per work-hour. Required parts are negligible. Based on these figures, we estimate the cost of this proposed AD on U.S. operators to be \$53,040, or \$1,360 per product.

According to the manufacturer, all of the costs of this proposed AD may be covered under warranty, thereby reducing the cost impact on affected individuals. We do not control warranty coverage for affected individuals. As a result, we have included all costs in our cost estimate.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII, Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition

that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Dassault Aviation: Docket No. FAA-2015-5813; Directorate Identifier 2014-NM-111-AD.

(a) Comments Due Date

We must receive comments by January 11, 2016.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Dassault Aviation Model FALCON 7X airplanes, certificated in any category, serial numbers (S/Ns) 1 through 140 inclusive, S/Ns 142 through 156 inclusive, S/Ns 158 through 176 inclusive, S/Ns 178 through 181 inclusive, and S/N 183, 184, 187, 188, 190, 194, and 200.

(d) Subject

Air Transport Association (ATA) of America Code 28, Fuel.

(e) Reason

This AD was prompted by a fuel leak that occurred in the baggage compartment during fuel system pressurization. We are issuing this AD to prevent failure of a connector or coupling on a fuel line, which, in combination with a leak in the corresponding enclosure (*i.e.*, fuel box), could result in a fire in the baggage compartment and affect the safe flight of the airplane.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Open the Fuel Box and Restore the Sealing

Within 98 months after the effective date of this AD, open the left-hand and right-hand fuel boxes and restore the sealing, in accordance with the Accomplishment Instructions of Dassault Service Bulletin 7X-284, Revision 1, dated April 8, 2014.

(h) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Tom Rodriguez, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone (425) 227-1137; fax (425) 227-1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain corrective actions from a manufacturer, the action must be accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Dassault Aviation's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(i) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2014-0116, dated May 13, 2014, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by

searching for and locating Docket No. FAA-2015-5813.

(2) For service information identified in this AD, contact Dassault Falcon Jet, P.O. Box 2000, South Hackensack, NJ 07606; telephone 201-440-6700; Internet <http://www.dassaultfalcon.com>. You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

Issued in Renton, Washington, on November 17, 2015.

Jeffrey E. Duven,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2015-5811; Directorate Identifier 2014-NM-158-AD]

RIN 2120-AA64

Airworthiness Directives; Airbus Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to supersede Airworthiness Directive (AD) 2004-19-11 for certain Airbus Model 320 series airplanes. AD 2004-19-11 currently requires modification of the inner rear spar web of the wing, cold expansion of the attachment holes of the forward pintle fitting and the actuating cylinder anchorage of the main landing gear (MLG), repetitive ultrasonic inspections for cracking of the rear spar of the wing, and corrective action if necessary. AD 2004-19-11 also provides optional terminating action for the repetitive inspections. Since we issued AD 2004-19-11, we have determined that the terminating action is necessary to address the unsafe condition. This proposed AD is intended to complete certain mandated programs intended to support the airplane reaching its limit of validity (LOV) of the engineering data that support the established structural maintenance program. This proposed AD would retain the requirements of AD 2004-19-11 and would require the previously optional terminating action. We are proposing this AD to prevent fatigue cracking of the inner rear spar, which may lead to reduced structural integrity of the wing and the MLG.

DATES: We must receive comments on this proposed AD by January 11, 2016.

ADDRESSES: You may send comments by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Fax:* 202-493-2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590.
- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this proposed AD, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email account.airworth-eas@airbus.com; Internet <http://www.airbus.com>. You may view this referenced service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-5811; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Operations office (telephone 800-647-5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT:

Sanjay Ralhan, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1405; fax 425-227-1149.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this proposed AD. Send your comments to an address listed under the **ADDRESSES** section. Include "Docket No. FAA-2015-5811; Directorate Identifier

2014-NM-158-AD" at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this proposed AD. We will consider all comments received by the closing date and may amend this proposed AD based on those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this proposed AD.

Discussion

On September 21, 2004, we issued AD 2004-19-11, Amendment 39-13805 (69 FR 58828, October 1, 2004). AD 2004-19-11 requires actions intended to address an unsafe condition on certain Airbus Model 320 series airplanes. AD 2004-19-11 superseded AD 2000-10-15, Amendment 39-17739 (65 FR 34069, May 26, 2000).

Since we issued AD 2004-19-11, Amendment 39-13805 (69 FR 58828, October 1, 2004), we have determined that the modification of the inner rear spar that is an optional terminating action of AD 2004-19-11 must be accomplished in order to address the identified unsafe condition.

As described in FAA Advisory Circular 120-104 (http://www.faa.gov/documentLibrary/media/Advisory_Circular/120-104.pdf), several programs have been developed to support initiatives that will ensure the continued airworthiness of aging airplane structure. The last element of those initiatives is the requirement to establish a limit of validity (LOV) of the engineering data that support the structural maintenance program under 14 CFR 26.21. This proposed AD is the result of an assessment of the previously established programs by the design approval holder (DAH). The actions specified in this proposed AD are necessary to complete certain programs to ensure the continued airworthiness of aging airplane structure and to support an airplane reaching its LOV.

The European Aviation Safety Agency, which is the Technical Agent for the Member States of the European Union, has issued EASA Airworthiness Directive 2014-0169, corrected July 22, 2014 (referred to after this as the Mandatory Continuing Airworthiness Information, or "the MCAI"), to correct an unsafe condition on certain Airbus Model A320 series airplanes. The MCAI states:

During centre fuselage certification full scale fatigue test, cracks were found on the

inner rear spar at holes position 52 on the right hand wing due to fatigue aspects.

This condition, if not detected and corrected, could affect the structural integrity of the aeroplane.

To prevent such cracks, Airbus developed modifications, which were introduced in production and in service through several Airbus Service Bulletins (SB). DGAC France issued * * * [an earlier AD], which was subsequently superseded by [DGAC] AD 2001–249 [which corresponds with FAA AD 2004–19–11, Amendment 39–13805 (69 FR 58828, October 1, 2004)], to require modification of the rear spar on some aeroplanes, post-modification repetitive inspections and, depending on findings, accomplishment of a repair. DGAC France AD 2001–249 also specified that modification in accordance with Airbus SB A320–57–1089 (in-service equivalent to Airbus mod 24591) constituted (optional) terminating action for the repetitive inspections.

Since that [DGAC] AD [2001–249] was issued, in the framework of the A320 Extended Service Goal (ESG), it has been determined that Airbus mod 24591 is necessary to allow aeroplanes to operate up to the new ESG limit.

For the reasons described above, this [EASA] AD retains the requirements of DGAC France AD 2001–249, which is superseded, and requires modification of all pre-mod 24591 aeroplanes.

The modification includes modifying all specified fastener holes in the inner rear spar of the wing. You may examine the MCAI in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2015–5811.

Related Service Information Under 14 CFR part 51

Airbus has issued the following service information.

- Airbus Service Bulletin A320–57–1004, Revision 02, dated June 14, 1993. This service information describes procedures for modifying the inner rear spar web of the wing.
- Airbus Service Bulletin A320–57–1060, Revision 2, dated December 16, 1994. This service information describes procedures for a cold expansion of all the attachment holes for the forward pintle fitting of the main landing gear (MLG), except for the holes that are for taper-lok bolts; and for a cold expansion of the holes at the actuating cylinder anchorage of the MLG.
- Airbus Mandatory Service Bulletin A320–57–1088, Revision 04, dated August 6, 2001. This service information describes procedures for doing ultrasonic inspections for cracking of the rear spar of the wing.
- Airbus Service Bulletin A320–57–1089, Revision 03, dated February 9, 2001. This service information describes modification of the airplane by accomplishing cold reexpansion of the

holes in the inner rear spar for the attachment of gear rib 5, forward pintle fitting, and actuating cylinder anchorage; and the installation of interference fit fasteners in the rear spar and gear rib 5.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this NPRM.

FAA's Determination and Requirements of This Proposed AD

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to our bilateral agreement with the State of Design Authority, we have been notified of the unsafe condition described in the MCAI and service information referenced above. We are proposing this AD because we evaluated all pertinent information and determined an unsafe condition exists and is likely to exist or develop on other products of the same type design.

Costs of Compliance

We estimate that this proposed AD affects 84 airplanes of U.S. registry.

The actions required by AD 2004–19–11, Amendment 39–13805 (69 FR 58828, October 1, 2004), and retained in this proposed AD take about 684 work-hours per product, at an average labor rate of \$85 per work-hour. Required parts cost about \$13,644 per product. Based on these figures, the estimated cost of the actions that are required by AD 2004–19–11 is \$71,784 per product.

We also estimate that it would take about 980 work-hours per product to comply with the basic requirements of this proposed AD. The average labor rate is \$85 per work-hour. Required parts would cost about \$32,727 per product. Based on these figures, we estimate the cost of this proposed AD on U.S. operators to be \$9,746,268, or \$116,027 per product.

We have received no definitive data that would enable us to provide cost estimates for the on-condition actions specified in this proposed AD.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. "Subtitle VII: Aviation Programs," describes in more detail the scope of the Agency's authority.

We are issuing this rulemaking under the authority described in "Subtitle VII,

Part A, Subpart III, Section 44701: General requirements." Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

We determined that this proposed AD would not have federalism implications under Executive Order 13132. This proposed AD would not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify this proposed regulation:

1. Is not a "significant regulatory action" under Executive Order 12866;
2. Is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979);
3. Will not affect intrastate aviation in Alaska; and
4. Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2004–19–11, Amendment 39–13805 (69 FR 58828, October 1, 2004), and adding the following new AD:

Airbus: Docket No. FAA–2015–5811; Directorate Identifier 2014–NM–158–AD.

(a) Comments Due Date

We must receive comments by January 11, 2016.

(b) Affected ADs

This AD replaces AD 2004–19–11, Amendment 39–13805 (69 FR 58828, October 1, 2014).

(c) Applicability

This AD applies to Airbus Model A320–211, –212, –214, –231, –232, and –233 airplanes, certificated in any category, all manufacturer serial numbers, except those on which Airbus modification (mod) 24591 has been embodied in production.

(d) Subject

Air Transport Association (ATA) of America Code 57, Wings.

(e) Reason

This AD was prompted by reports of fatigue cracking of the inner rear spar of the wing and also by the determination that the modification of the inner rear spar is necessary to address the unsafe condition. We are issuing this AD to prevent fatigue cracking of the inner rear spar, which may lead to reduced structural integrity of the wing and the main landing gear (MLG).

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Retained Modification of Inner Rear Spar Web of the Wing, With Change to Acceptable Service Information

This paragraph restates the requirements of paragraph (a) of AD 2004–19–11, Amendment 39–13805 (69 FR 58828, October 1, 2004), with a change to acceptable service information. For airplanes having manufacturer's serial numbers (MSNs) 003 through 008 inclusive, and 010 through 021 inclusive, except airplanes modified as specified in Airbus Service Bulletin A320–57–1089, dated December 22, 1996; Revision 01, dated April 17, 1997; Revision 02, dated November 6, 1998; or Revision 03, dated February 9, 2001: Prior to the accumulation of 12,000 total flight cycles, or within 500 flight cycles after June 11, 1993 (the effective date of AD 93–08–15, Amendment 39–8563 (58 FR 27923, May 12, 1993)), whichever occurs later, modify the inner rear spar web of the wing in accordance with Airbus Service Bulletin A320–57–1004, Revision 1, dated September 24, 1992; or Revision 2, dated June 14, 1993. As of the effective date of this AD, only Airbus Service Bulletin A320–57–1004, Revision 2, dated June 14, 1993, may be used for the actions required by this paragraph.

(h) Retained Cold Expansion of Holes at Forward Pintle Fitting and Actuating Cylinder Anchorage of the Main Landing Gear, With Change to Acceptable Service Information

This paragraph restates the requirements of paragraph (b) of AD 2004–19–11, Amendment 39–13805 (69 FR 58828, October 1, 2004), with a change to acceptable service information. For airplanes having MSNs 002 through 051 inclusive, except airplanes modified as specified in Airbus Service Bulletin A320–57–1089, dated December 22, 1996; Revision 01, dated April 17, 1997; Revision 02, dated November 6, 1998; or Revision 03, dated February 9, 2001: Prior to the accumulation of 12,000 total flight cycles, or within 2,000 flight cycles after February 14, 1994 (the effective date of AD 93–25–13, Amendment 39–8777 (59 FR 1903, January 13, 1994)), whichever occurs later, accomplish the requirements of paragraphs (h)(1) and (h)(2) of this AD in accordance with Airbus Service Bulletin A320–57–1060, dated December 8, 1992; Revision 1, dated April 26, 1993; or Revision 2, dated December 16, 1994. As of the effective date of this AD, only Airbus Service Bulletin A320–57–1060, Revision 2, dated December 16, 1994, may be used for the actions required by this paragraph.

(1) Perform a cold expansion of all the attachment holes for the forward pintle fitting of the main landing gear (MLG), except for the holes that are for taper-lok bolts.

(2) Perform a cold expansion of the holes at the actuating cylinder anchorage of the MLG.

(i) Retained Repetitive Ultrasonic Inspections for Cracking of the Rear Spar of the Wing, With No Changes

This paragraph restates the requirements of paragraphs (c), (d), and (e) of AD 2004–19–11, Amendment 39–13805 (69 FR 58828, October 1, 2004), with no changes. Except for airplanes modified as specified in Airbus Service Bulletin A320–57–1089, dated December 22, 1996; Revision 01, dated April 17, 1997; Revision 02, dated November 6, 1998; or Revision 03, dated February 9, 2001: Do the actions specified in paragraphs (i)(1) and (i)(2) of this AD.

(1) Do an ultrasonic inspection for cracking of the rear spar of the wing, in accordance with Airbus Service Bulletin A320–57–1088, Revision 04, dated August 6, 2001. Inspect at the applicable time specified in paragraph 1.E. of Airbus Service Bulletin A320–57–1088, Revision 04, dated August 6, 2001,

except as required by paragraphs (i)(1)(i) and (i)(1)(ii) of this AD.

(i) For any airplane that has not been inspected but has exceeded the applicable specified compliance time in paragraph 1.E. of Airbus Service Bulletin A320–57–1088, Revision 04, dated August 6, 2001, as of November 5, 2004 (the effective date of AD 2004–19–11, Amendment 39–13805 (69 FR 58828, October 1, 2004)): Inspect within 18 months after November 5, 2004.

(ii) For any airplane that has been inspected before November 5, 2004 (the effective date of AD 2004–19–11, Amendment 39–13805 (69 FR 58828, October 1, 2004)): Repeat the inspection within 3,600 flight cycles after the most recent inspection.

(2) Repeat the inspection required by paragraph (i)(1) of this AD at intervals not to exceed 3,600 flight cycles or 6,700 flight hours, whichever occurs first, until the requirements of paragraph (k) of this AD have been done.

(j) Retained Corrective Action for Inspections Required by Paragraphs (i)(1) and (i)(2) of This AD, With Specific Delegation Approval Language.

This paragraph restates the requirements of paragraph (f) of AD 2004–19–11, Amendment 39–13805 (69 FR 58828, October 1, 2004), with specific delegation approval language. If any crack is found during any inspection required by paragraph (i)(1) or (i)(2) of this AD: Before further flight, repair in accordance with a method approved by either the Manager, International Branch, ANM–116, FAA, Transport Airplane Directorate; or the Direction Générale de l'Aviation Civile (or its delegated agent); or the European Aviation Safety Agency (EASA); or Airbus's EASA Design Organization Approval (DOA). Accomplishment of a repair as required by this paragraph does not constitute terminating action for the repetitive inspections required by paragraph (i)(2) of this AD.

(k) New Requirement of This AD: Modification of Inner Rear Spar

Before exceeding 48,000 flight cycles or 96,000 flight hours, whichever occurs first since first flight of the airplane: modify all specified fastener holes in the inner rear spar of the wing, in accordance with the Accomplishment Instructions of Airbus Service Bulletin A320–57–1089, Revision 03, dated February 9, 2001; except where Airbus Service Bulletin A320–57–1089, Revision 03, dated February 9, 2001, specifies to contact Airbus for certain conditions, before further flight, repair using a method approved by the

Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or EASA; or Airbus's EASA DOA. Modification of all specified fastener holes in the rear spar of the wing terminates the initial and repetitive inspections required by paragraphs (i)(1) and (i)(2) of this AD. If the modification is done both before the airplane accumulates 12,000 total flight cycles and before the effective date of this AD, the modification also terminates the actions required by paragraphs (g) and (h) of this AD.

(l) Credit for Previous Actions

(1) This paragraph provides credit for actions required by paragraph (i) of this AD, if those actions were performed before the effective date of this AD using Airbus Service Bulletin A320-57-1088, Revision 02, dated July 29, 1999; or Revision 03, dated February 9, 2001, which are not incorporated by reference in this AD.

(2) This paragraph provides credit for actions required by paragraph (k) of this AD, if those actions were performed before the effective date of this AD using Airbus Service Bulletin A320-57-1089, Revision 02, dated November 6, 1998, which is not incorporated by reference in this AD.

(m) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs)*: The Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Branch, send it to ATTN: Sanjay Ralhan, Aerospace Engineer, International Branch, ANM-116, Transport Airplane Directorate, FAA, 1601 Lind Avenue SW., Renton, WA 98057-3356; telephone 425-227-1405; fax 425-227-1149. Information may be emailed to: 9-ANM-116-AMOC-REQUESTS@faa.gov.

(i) Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office. The AMOC approval letter must specifically reference this AD.

(ii) AMOCs approved previously in accordance with AD 2004-19-11, Amendment 39-13805 (69 FR 58828, October 1, 2004), are approved as AMOCs for the corresponding provisions of paragraphs (g) through (j) of this AD.

(2) *Contacting the Manufacturer*: As of the effective date of this AD, for any requirement in this AD to obtain corrective actions from a manufacturer, the action must be

accomplished using a method approved by the Manager, International Branch, ANM-116, Transport Airplane Directorate, FAA; or the European Aviation Safety Agency (EASA); or Airbus' EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(n) Related Information

(1) Refer to Mandatory Continuing Airworthiness Information (MCAI) EASA Airworthiness Directive 2014-0169, corrected July 22, 2014, for related information. This MCAI may be found in the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA-2015-5811.

(2) For service information identified in this AD, contact Airbus, Airworthiness Office—EIAS, 1 Rond Point Maurice Bellonte, 31707 Blagnac Cedex, France; telephone +33 5 61 93 36 96; fax +33 5 61 93 44 51; email account.airworth-eas@airbus.com; Internet <http://www.airbus.com>. You may view this service information at the FAA, Transport Airplane Directorate, 1601 Lind Avenue SW., Renton, WA. For information on the availability of this material at the FAA, call 425-227-1221.

Issued in Renton, Washington, on November 17, 2015.

Jeffrey E. Duven,

Manager, Transport Airplane Directorate, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2015-4452; Airspace Docket No. 15-AWA-7]

RIN 2120-AA66

Proposed Amendment of Class C Airspace; Capital Region International Airport, MI

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify Class C airspace at Capital Region International Airport, formerly Lansing Capital City Airport, Lansing, MI, by removing a cutout from the surface area that was put in place to accommodate operations around Davis Airport, now permanently closed. Also, this proposal would update the airport's name and geographic coordinates to reflect the current information in the FAA's aeronautical database. The FAA is proposing this action to enable more efficient operations at Capital Region International Airport.

DATES: Comments must be received on or before January 26, 2016.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, M-30, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12-140, Washington, DC 20590-0001; telephone: (202) 366-9826. You must identify FAA Docket No. FAA-2015-4452 and Airspace Docket No. 15-AWA-7 at the beginning of your comments. You may also submit comments through the Internet at <http://www.regulations.gov>. You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone 1-800-647-5527), is on the ground floor of the building at the above address.

FAA Order 7400.9Z, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at http://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC, 20591; telephone: (202) 267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call (202) 741-6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

FAA Order 7400.9, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT: Colby Abbott, Airspace Policy Group, Office of Airspace Services, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 20591; telephone: (202) 267-8783.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use

of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify terminal airspace as required to preserve the safe and efficient flow of air traffic in the Lansing, MI, area.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (FAA Docket No. FAA-2015-4452 and Airspace Docket No. 15-AWA-7) and be submitted in triplicate to the Docket Management Facility (see **ADDRESSES** section for address and phone number). You may also submit comments through the internet at <http://www.regulations.gov>.

Commenters wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to FAA Docket No. FAA-2015-4452 and Airspace Docket No. 15-AWA-7." The postcard will be date/time stamped and returned to the commenter.

All communications received on or before the specified comment closing date will be considered before taking action on the proposed rule. The proposal contained in this action may be changed in light of comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

An electronic copy of this document may be downloaded through the internet at <http://www.regulations.gov>.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. An informal docket may also be examined during

normal business hours at the office of the Central Service Center, Operations Support Group, Federal Aviation Administration, 2601 Meacham Blvd., Fort Worth, TX 76137.

Persons interested in being placed on a mailing list for future NPRM's should contact the FAA's Office of Rulemaking, (202) 267-9677, for a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.9Z, airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.9Z lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to Title 14, Code of Federal Regulations (14 CFR) part 71 to modify the Capital Region International Airport Class C airspace area by removing the cutout from the Class C surface area that excluded the airspace within a 1-mile radius of the former Davis Airport and the airspace 1 mile either side of the 090° bearing from the former Davis Airport. The exclusion from the Class C surface area was in place solely to accommodate operations at Davis Airport, which was located about 3.5 NM east of the Capital Region International Airport. Davis Airport was permanently closed in 2000, and removed from the FAA's aeronautical database in 2006. Since the original purpose of the exclusion no longer exists, the FAA is proposing to remove the words ". . . excluding that airspace within a 1-mile radius of the Davis Airport and excluding that airspace 1 mile either side of the 090° bearing from Davis Airport to the 5-mile radius from Capital City Airport . . ." from the Class C airspace description. This would restore the Class C surface area to a standard configuration of a 5-NM radius around Capital Region International Airport and enhance the management of aircraft operations at the airport.

Also, this action would update the airport name and geographic coordinates to reflect the current information in the FAA's aeronautical database. This change would replace "Capital City Airport" with "Capital Region International Airport" and

replace "lat. 42°46'43" N., long. 84°35'15" W." with "lat. 42°46'43" N., long. 84°35'10" W."

Class C airspace areas are published in paragraph 4000 of FAA Order 7400.9Z, dated August 6, 2015 and effective September 15, 2015, which is incorporated by reference in 14 CFR 71.1. The Class C airspace area modification proposed in this document would be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under Department of Transportation (DOT) Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures" prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

- 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959-1963 Comp., p. 389.

§ 71.1 [Amended]

- 2. The incorporation by reference in 14 CFR 71.1 of the FAA Order 7400.9Z,

Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015, is amended as follows:

Paragraph 4000—Subpart C—Class C Airspace

* * * * *

AGL MI C Lansing, MI [Amended]

Capital Region International Airport, MI
(Lat. 42°46'43" N., long. 84°35'10" W.)

That airspace extending upward from the surface to and including 4,900 feet MSL within a 5-mile radius of Capital Region International Airport; and that airspace extending upward from 2,100 feet MSL to and including 4,900 feet MSL within a 10-mile radius of Capital Region International Airport.

Issued in Washington, DC, on November 16, 2015.

Gary A. Norek,

Manager, Airspace Policy Group.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2015-3675; Airspace
Docket No. 15-ANM-19]

Proposed Amendment of Class D and Class E Airspace; Walla Walla, WA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to modify Class D airspace, Class E surface area airspace, Class E surface area airspace designated as an extension, and Class E airspace extending upward from 700 feet above the surface at Walla Walla Regional Airport, Walla Walla, WA. After a review of the airspace, the FAA found it necessary to amend the airspace area for the safety and management of Instrument Flight Rules (IFR) operations for arriving and departing aircraft at the airport. This action would also update the geographic coordinates of Walla Walla Regional Airport in the respective Class D and E airspace areas above.

DATES: Comments must be received on or before January 11, 2016.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590; telephone (202) 366-9826. You must identify FAA Docket No. FAA-2015-3675; Airspace

Docket No. 15-ANM-19, at the beginning of your comments. You may also submit comments through the Internet at <http://www.regulations.gov>. You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office between 9:00 a.m. and 5:00 p.m., Monday through Friday, except Federal holidays. The Docket Office (telephone 1-800-647-5527), is on the ground floor of the building at the above address.

FAA Order 7400.9Z, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at http://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy and ATC Regulations Group, Federal Aviation Administration, 800 Independence Avenue SW., Washington, DC 29591; telephone: 202-267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202-741-6030, or go to http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html.

FAA Order 7400.9, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

FOR FURTHER INFORMATION CONTACT:

Steve Haga, Federal Aviation Administration, Operations Support Group, Western Service Center, 1601 Lind Avenue SW., Renton, WA 98057; telephone (425) 203-4563.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part, A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend Class D and Class E airspace at Walla Walla Regional Airport, Walla Walla, WA.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking

by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2015-3675; Airspace Docket No. 15-ANM-19." The postcard will be date/time stamped and returned to the commenter.

Availability of NPRMs

An electronic copy of this document may be downloaded through the Internet at <http://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's Web page at http://www.faa.gov/airports_airtraffic/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 1601 Lind Avenue SW., Renton, WA 98057.

Persons interested in being placed on a mailing list for future NPRMs should contact the FAA's Office of Rulemaking, (202) 267-9677, for a copy of Advisory Circular No. 11-2A, Notice of Proposed Rulemaking Distribution System, which describes the application procedure.

Availability and Summary of Documents Proposed for Incorporation by Reference

This document amends FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015. FAA Order 7400.9Z is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.9Z lists Class A, B, C, D, and E airspace areas,

air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) Part 71 by modifying Class D airspace, Class E surface area airspace, Class E surface area airspace designated as an extension, and Class E airspace extending upward from 700 feet above the surface at Walla Walla Regional Airport, Walla Walla, WA. The Class E airspace area designated as an extension would extend from the 4.3-mile radius of Walla Walla Regional Airport to 7.5 miles southwest and 13.4 miles northeast of the airport. Class E airspace extending upward from 700 feet above the surface would be modified to an area 5.7 miles to the west, 16.5 miles to the southwest, 22.5 miles northeast and within a 13.4-mile radius of a point in space location east of Walla Walla Regional Airport. This action would also update the geographic coordinates of the airport for the Class D and E airspace areas listed above.

Class D and Class E airspace designations are published in paragraph 5000, 6002, 6004, and 6005, respectively, of FAA Order 7400.9Z, dated August 6, 2015, and effective September 15, 2015, which is incorporated by reference in 14 CFR 71.1. The Class D and Class E airspace designations listed in this document will be published subsequently in the Order.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance

with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.9Z, Airspace Designations and Reporting Points, dated August 6, 2015, and effective September 15, 2015, is amended as follows:

Paragraph 5000: Class D Airspace.

* * * * *

ANM WA D Walla Walla, WA [Modified]

Walla Walla Regional Airport, WA (Lat. 46°05’43” N., long. 118°17’09” W.)

That airspace extending upward from the surface to and including 3,700 feet MSL within a 4.3-mile radius of Walla Walla Regional Airport. This Class D airspace area is effective during the specific dates and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Airport/Facility Directory.

Paragraph 6002: Class E Airspace Designated as Surface Areas.

* * * * *

ANM WA E2 Walla Walla, WA [Modified]

Walla Walla Regional Airport, WA (Lat. 46°05’43” N., long. 118°17’09” W.)

That airspace extending upward from the surface within a 4.3-mile radius of Walla Walla Regional Airport.

Paragraph 6004: Class E Airspace Areas Designated as an Extension to a Class D or Class E Surface Area.

* * * * *

ANM WA E4 Walla Walla, WA [Modified]

Walla Walla Regional Airport, WA (Lat. 46°05’43” N., long. 118°17’09” W.)

That airspace extending upward from the surface within 2.7 miles each side of the Walla Walla 215° bearing from the airport extending from the 4.3-mile radius of Walla Walla Regional Airport to 7.5 miles southwest of the airport, and within 4.1 miles

each side of the Walla Walla 35° bearing from the airport extending from the 4.3-mile radius of Walla Walla Regional Airport to 13.4 miles northeast of the airport.

Paragraph 6005: Class E Airspace Areas Extending Upward from 700 feet or More Above the Surface of the Earth.

* * * * *

ANM WA E5 Walla Walla, WA [Modified]

Walla Walla Regional Airport, WA (Lat. 46°05’43” N., long. 118°17’09” W.)

Walla Walla Regional Airport, point in space coordinates

(Lat. 46°03’27” N., long. 118°12’20” W.)

That airspace extending upward from 700 feet above the surface bounded by a line beginning at lat. 45°52’29” N., long. 118°23’027” W.; to lat. 45°49’51” N., long. 118°26’02” W.; to lat. 45°57’17” N., long. 118°40’49” W.; to lat. 46°10’22” N., long. 118°27’48” W.; to lat. 46°08’46” N., long. 118°24’32” W.; to lat. 46°14’38” N., long. 118°18’44” W.; to lat. 46°16’07” N., long. 118°21’47” W.; to lat. 46°29’20” N., long. 118°08’35” W.; to lat. 46°22’02” N., long. 117°53’24” W.; to lat. 46°14’25” N., long. 118°01’11” W.; and that airspace within a 13.4-mile radius of point in space coordinates at lat. 46°03’27” N., long. 118°12’20” W., from the 052° bearing from the Walla Walla Regional Airport clockwise to the 198° bearing.

Issued in Seattle, Washington, on November 10, 2015.

Christopher Ramirez,

Manager, Operations Support Group, Western Service Center.

BILLING CODE 4910–13–P

DEPARTMENT OF THE TREASURY

Financial Crimes Enforcement Network

31 CFR Part 1010

RIN 1506–AB27

Imposition of Special Measure Against FBME Bank Ltd., Formerly Known as the Federal Bank of the Middle East Ltd., as a Financial Institution of Primary Money Laundering Concern

AGENCY: Financial Crimes Enforcement Network (FinCEN), Treasury.

ACTION: Proposed rule; re-opening of comment period and availability of supplemental information.

SUMMARY: On July 29, 2015, FinCEN issued a Final Rule imposing the fifth special measure against FBME Bank Ltd. (FBME), formerly known as the Federal Bank of the Middle East, Ltd., with an effective date of August 28, 2015. On August 27, 2015, the United States District Court for the District of Columbia granted FBME’s motion for a preliminary injunction and enjoined the

Final Rule from taking effect. On November 6, 2015, the Court granted the Government's motion for voluntary remand to allow for further rulemaking proceedings. FinCEN is hereby re-opening the Final Rule to solicit additional comment in connection with the rulemaking, particularly with respect to the unclassified, non-protected documents that support the rulemaking and whether any alternatives to the prohibition of the opening or maintaining of correspondent accounts with FBME would effectively mitigate the risk to domestic financial institutions.

DATES: Written comments on this document must be submitted on or before January 26, 2016.

ADDRESSES: You may submit comments, identified by 1506-AB27, by any of the following methods:

- *Federal E-rulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments. Include 1506-AB27 in the submission.
- *Mail:* The Financial Crimes Enforcement Network, P.O. Box 39, Vienna, VA 22183. Include 1506-AB27 in the body of the text. Please submit comments by one method only.

- Absent a sufficient showing that a submission warrants confidential treatment, comments submitted in response to this document will become a matter of public record. Therefore, you should generally only submit information that you wish to make publicly available.

Inspection of comments: The public dockets for FinCEN can be found at www.Regulations.gov. Proposed and final rules published by FinCEN in the **Federal Register** are searchable by docket number, RIN, or document title, among other things, and the docket number, RIN, and title may be found at the beginning of the document. FinCEN uses the electronic, Internet-accessible dockets at [Regulations.gov](http://www.regulations.gov) as their complete docket; all hard copies of materials that should be in the docket, including public comments, are electronically scanned and placed in the docket. In general, FinCEN will make all comments publicly available by posting them on <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: The FinCEN Resource Center at (800) 767-2825.

SUPPLEMENTARY INFORMATION:

I. Regulatory Background

On July 22, 2014, FinCEN published in the **Federal Register** a Notice of Finding (NOF) in which the Director of FinCEN explained that reasonable grounds exist for concluding that FBME

Bank Ltd. (FBME) is a financial institution of primary money laundering concern pursuant to Section 311 of the USA PATRIOT Act (Section 311),¹ which is codified at 31 U.S.C. 5318A. FinCEN's NOF identified two main areas of concern: (i) FBME's facilitation of money laundering, terrorist financing, transnational organized crime, fraud schemes, sanctions evasion, weapons proliferation, corruption by politically-exposed persons, and other financial crime; and (ii) FBME's weak anti-money laundering controls, which allow its customers to perform a significant volume of obscured transactions and activities through the U.S. financial system. Simultaneously with the issuance of the NOF, FinCEN also published in the **Federal Register** a related Notice of Proposed Rulemaking (NPRM) proposing the imposition of the fifth special measure available under Section 311 against FBME.² In particular, FinCEN proposed to prohibit covered U.S. financial institutions from opening or maintaining a correspondent account in the United States for, or on behalf of, FBME. On July 29, 2015, after considering comments from the public on these documents, and other information available to FinCEN, including both public and non-public reporting, FinCEN published in the **Federal Register** a Final Rule imposing the fifth special measure as proposed in the NPRM, with an effective date of August 28, 2015.³

FBME filed suit on August 7, 2015 in the United States District Court for the District of Columbia and sought a preliminary injunction against the Final Rule. On August 27, 2015, the Court granted the motion for preliminary injunction and enjoined the Final Rule from taking effect.⁴ In its order, the Court found that FBME was likely to succeed on the merits of two of its claims: (i) That FinCEN provided insufficient notice of unclassified, non-protected information on which it relied during the rulemaking proceedings, and (ii) that FinCEN failed to adequately consider at least one potentially significant, viable, and obvious alternative to the special measure it imposed.⁵ On November 6, 2015, the Court granted FinCEN's motion for voluntary remand so that FinCEN may engage in further rulemaking to address

the procedural issues identified by the Court in enjoining the Final Rule. Accordingly, FinCEN is issuing this document to solicit additional comment regarding the Section 311 rulemaking related to FBME. In addition, FinCEN is making available for comment the unclassified, non-protected material that FinCEN relied upon and intends to rely upon during the rulemaking proceeding.⁶ That unclassified, non-protected material is available at www.regulations.gov [Fincen-2014-0007]. Those comments previously submitted in connection with the rulemaking need not be resubmitted, as FinCEN will consider all comments received to date. In addition, if FinCEN decides to consider any additional unclassified, non-protected material other than that provided in the comments, such information will be added to www.regulations.gov [Fincen-2014-0007].

II. Proposed Imposition of the Fifth Special Measure

On October 26, 2001, the President signed into law the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001, Public Law 107-56 (the USA PATRIOT Act). Title III of the USA PATRIOT Act amends the anti-money laundering provisions of the Bank Secrecy Act (BSA), codified at 12 U.S.C. 1829b, 12 U.S.C. 1951-1959, and 31 U.S.C. 5311-5314, 5316-5332, to promote the prevention, detection, and prosecution of international money laundering and the financing of terrorism. Regulations implementing the BSA appear at 31 CFR chapter X. The authority of the Secretary of the Treasury to administer the BSA and its implementing regulations has been delegated to the Director of FinCEN.

Section 311 of the USA PATRIOT Act grants the Director of FinCEN the authority, upon finding that reasonable grounds exist for concluding that a foreign jurisdiction, foreign financial institution, class of transactions, or type of account is of "primary money laundering concern," to require domestic financial institutions and financial agencies to take certain "special measures" to address the primary money laundering concern. The special measures enumerated under Section 311 are prophylactic safeguards

² 79 FR 42486 (July 22, 2014) (RIN 1506-AB27).

³ 80 FR 45057 (July 29, 2015) (RIN 1506-AB27).

⁴ *FBME Bank Ltd. v. Lew*, No. 1:15-cv-01270, 2015 WL 5081209 (D.D.C. Aug. 27, 2015).

⁵ *Id.* at *5.

⁶ As previously disclosed in the litigation involving the Final Rule, FinCEN notes that it does not intend to rely on three documents that were originally included in its administrative record supporting the NOF and NPRM: Two were law enforcement sensitive documents and the other was mistakenly included.

that defend the U.S. financial system from money laundering and terrorist financing. FinCEN may impose one or more of these special measures in order to protect the U.S. financial system from these threats. To that end, special measures one through four, codified at 31 U.S.C. 5318A(b)(1–4), impose additional recordkeeping, information collection, and information reporting requirements on covered U.S. financial institutions. The fifth special measure, codified at 31 U.S.C. 5318A(b)(5), allows the Director to prohibit or impose conditions on the opening or maintaining of correspondent or payable-through accounts for the identified institution by U.S. financial institutions.

Given FinCEN's finding that FBME is of primary money laundering concern, in the Final Rule, FinCEN imposed the fifth special measure's prohibition on the opening or maintaining of a correspondent account in the United States for FBME. In further evaluation of alternative measures pursuant to the Court's November 6, 2015 opinion and order, FinCEN is reopening the Final Rule to solicit additional comment. First, FinCEN seeks comment on whether any of special measures one through four under Section 311 with respect to covered U.S. financial institutions' activities involving FBME would be an effective alternative to mitigate the risk posed by FBME, as explained in the Notice of Finding. FinCEN also seeks comment on whether, pursuant to special measure five of Section 311, FinCEN should impose conditions, rather than a prohibition, on the opening or maintaining of correspondent accounts with FBME.

III. Request for Comments

FinCEN invites comments on all aspects of this rulemaking, including, but not limited to, the following:

1. The unclassified, non-protected information that FinCEN intends to rely upon during the rulemaking proceeding;⁷

2. Whether any of special measures one through four under Section 311 with respect to covered U.S. financial institutions' activities involving FBME would be an effective alternative to mitigate the risk posed by FBME as explained in the Notice of Finding;

3. Whether, pursuant to special measure five of Section 311, FinCEN

should impose conditions, rather than a prohibition, on the opening or maintaining of correspondent accounts with FBME as an effective alternative to mitigate the risk posed by FBME as explained in the Notice of Finding; and

4. Any material developments that have occurred with respect to FBME since the issuance of the NOF and NPRM on July 22, 2014, including whether reasonable grounds continue to exist for concluding that FBME is a primary money laundering concern.

IV. Regulatory Flexibility Act

When an agency issues a rulemaking proposal, the Regulatory Flexibility Act (RFA) requires the agency to "prepare and make available for public comment an initial regulatory flexibility analysis" that will "describe the impact of the proposed rule on small entities." (5 U.S.C. 603(a)). Section 605 of the RFA allows an agency to certify a rule, in lieu of preparing an analysis, if the proposed rulemaking is not expected to have a significant economic impact on a substantial number of small entities. FinCEN previously provided information about the number and types of entities that would be affected by the earlier proposal to impose special measure five.⁸ FinCEN is restating that information in this document so that persons may comment on FinCEN's proposed certification concerning whether the imposition of any of the special measures would have a significant economic impact on a substantial number of small entities. As explained in more detail, the limited number of foreign banking institutions with which FBME maintains or will maintain accounts will likely limit the number of affected covered financial institutions to the largest U.S. banks, which actively engage in international transactions.

A. Estimate of the Number of Small Entities to Whom Any of Special Measures One Through Five Would Apply

For purposes of the RFA, both banks and credit unions are considered small entities if they have less than \$500,000,000 in assets.⁹ Of the estimated 7,000 banks, 80 percent have less than \$500,000,000 in assets and are considered small entities.¹⁰ Of the

estimated 7,000 credit unions, 94 percent have less than \$500,000,000 in assets.¹¹

Broker-dealers are defined in 31 CFR 1010.100(h) as those broker-dealers required to register with the Securities and Exchange Commission (SEC). Because FinCEN and the SEC regulate substantially the same population, for the purposes of the RFA, FinCEN relies on the SEC's definition of small business as previously submitted to the Small Business Administration (SBA). The SEC has defined the term "small entity" to mean a broker or dealer that: (a) Had total capital (net worth plus subordinated liabilities) of less than \$500,000 on the date in the prior fiscal year as of which its audited financial statements, were prepared pursuant to Rule 17a-5(d) or, if not required to file such statements, a broker or dealer that had total capital (net worth plus subordinated debt) of less than \$500,000 on the last business day of the preceding fiscal year (or in the time that it has been in business if shorter); and (b) is not affiliated with any person (other than a natural person) that is not a small business or small organization as defined in this release.¹² Based on SEC estimates, 17 percent of broker-dealers are classified as "small" entities for purposes of the RFA.¹³

Futures commission merchants (FCMs) are defined in 31 CFR 1010.100(x) as those FCMs that are registered or required to be registered as a FCM with the Commodity Futures Trading Commission (CFTC) under the Commodity Exchange Act (CEA), except persons who register pursuant to section 4f(a)(2) of the CEA, 7 U.S.C. 6f(a)(2). Because FinCEN and the CFTC regulate substantially the same population, for the purposes of the RFA, FinCEN relies on the CFTC's definition of small business as previously submitted to the SBA. In the CFTC's "Policy Statement and Establishment of Definitions of 'Small Entities' for Purposes of the Regulatory Flexibility Act," the CFTC concluded that registered FCMs should not be considered to be small entities for purposes of the RFA.¹⁴ The CFTC's determination in this regard was based, in part, upon the obligation of registered

¹² 17 CFR 240.0-10(c).

¹³ 76 FR 37572, 37602 (June 27, 2011) (the SEC estimates 871 small broker-dealers of the 5,063 total registered broker-dealers).

¹⁴ 47 FR 18618, 18619 (Apr. 30, 1982).

⁷ FinCEN anticipates that certain confidential business information ("CBI") pertaining to FBME will not be made available. To the extent documents containing such CBI can be disclosed publicly in redacted form, they will be added to www.regulations.gov.

⁸ 79 FR 42486, 42489 (July 22, 2014) and 80 FR 45057, 45063 (July 29, 2015).

⁹ *Table of Small Business Size Standards Matched to North American Industry Classification System Codes*, Small Business Administration Size Standards (SBA Jan. 22, 2014) [hereinafter *SBA Size Standards*].

¹⁰ Federal Deposit Insurance Corporation, *Find an Institution*, <http://www2.fdic.gov/idasp/main.asp>;

FCMs to meet the capital requirements established by the CFTC.

For purposes of the RFA, an introducing broker-commodities dealer is considered small if it has less than \$35,500,000 in gross receipts annually.¹⁵ Based on information provided by the National Futures Association (NFA), 95 percent of introducing brokers-commodities dealers have less than \$35.5 million in Adjusted Net Capital and are considered to be small entities.

Mutual funds are defined in 31 CFR 1010.100(gg) as those investment companies that are open-end investment companies that are registered or are required to register with the SEC. Because FinCEN and the SEC regulate substantially the same population, for the purposes of the RFA, FinCEN relies on the SEC's definition of small business as previously submitted to the SBA. The SEC has defined the term "small entity" under the Investment Company Act to mean an investment company that, together with other investment companies in the same group of related investment companies, has net assets of \$50 million or less as of the end of its most recent fiscal year.¹⁶ Based on SEC estimates, 7 percent of mutual funds are classified as "small entities" for purposes of the RFA under this definition.¹⁷

B. Special Measures One Through Five

As noted above, 80 percent of banks, 94 percent of credit unions, 17 percent of broker-dealers, 95 percent of introducing brokers-commodities, zero FCMs, and 7 percent of mutual funds are small entities. The limited number of foreign banking institutions with which FBME maintains or will maintain accounts will likely limit the number of affected covered financial institutions to the largest U.S. banks, which actively engage in international transactions. Thus, the imposition of the recordkeeping, information collection, or reporting provisions in any of special measures one through four would not impact a substantial number of small entities. Similarly, the imposition of the prohibition on maintaining correspondent accounts for foreign banking institutions that engage in transactions involving FBME under the fifth special measure, together with related notice and special due diligence, would not impact a substantial number of small entities. Finally, imposing conditions on the opening or maintenance of such a correspondent

account under special measure five would not impact a substantial number of small entities.

C. Certification

For these reasons, FinCEN certifies that the proposals contained in this rulemaking would not have a significant impact on a substantial number of small businesses.

FinCEN invites comments from members of the public who believe there would be a significant economic impact on small entities from the imposition of any of special measures one through five.

Jamal El-Hindi,

Deputy Director, Financial Crimes Enforcement Network.

BILLING CODE 4810-02-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R03-OAR-2015-0686; FRL- 9939-37-Region 3]

Approval and Promulgation of Air Quality Implementation Plans; Virginia; Revision to the Definition of Volatile Organic Compound

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The Environmental Protection Agency (EPA) proposes to approve the State Implementation Plan (SIP) revision submitted by the Commonwealth of Virginia for the purpose of revising the definition of volatile organic compound (VOC). In the Final Rules section of this **Federal Register**, EPA is approving the State's SIP submittal as a direct final rule without prior proposal because the Agency views this as a noncontroversial submittal and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse comments are received in response to this action, no further activity is contemplated. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. EPA will not institute a second comment period. Any parties interested in commenting on this action should do so at this time.

DATES: Comments must be received in writing by December 28, 2015.

ADDRESSES: Submit your comments, identified by Docket ID Number EPA-R03-OAR-2015-0686 by one of the following methods:

A. www.regulations.gov. Follow the on-line instructions for submitting comments.

B. Email: fernandez.cristina@epa.gov.

C. Mail: EPA-R03-OAR-2015-0686, Cristina Fernandez, Associate Director, Office of Air Program Planning, Air Protection Division, Mailcode 3AP30, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103.

D. Hand Delivery: At the previously-listed EPA Region III address. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA-R03-OAR-2015-0686. EPA's policy is that all comments received will be included in the public docket without change, and may be made available online at www.regulations.gov, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through www.regulations.gov or email. The www.regulations.gov Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to EPA without going through www.regulations.gov, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the electronic docket are listed in the www.regulations.gov index. Although listed in the index, some information is not publicly available, *i.e.*, CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material,

¹⁵ SBA Size Standards at 28.

¹⁶ 17 CFR 270.0-10.

¹⁷ 78 FR 23637, 23658 (April 19, 2013).

is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available in www.regulations.gov or may be viewed during normal business hours at the Air Protection Division, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. Copies of the State submittal are available at the Virginia Department of Environmental Quality, 629 East Main Street, Richmond, Virginia 23219.

FOR FURTHER INFORMATION CONTACT: Irene Shandruk, (215) 814-2166, or by email at shandruk.irene@epa.gov.
SUPPLEMENTARY INFORMATION: For further information, please see the information provided in the direct final action, with the same title, that is located in the “Rules and Regulations” section of this **Federal Register** publication.

Dated: November 12, 2015.

Shawn M. Garvin,
Regional Administrator, Region III.

RIN 2060-AS13

Oil and Natural Gas Sector: National Emission Standards for Hazardous Air Pollutants

AGENCY: Environmental Protection Agency (EPA).

ACTION: Request for information.

SUMMARY: This action requests information related to hazardous air pollutant (HAP) emissions from sources in the oil and natural gas production and natural gas transmission and storage segments of the oil and natural gas sector. In 2012, the Environmental Protection Agency (EPA) revised the National Emission Standards for Hazardous Air Pollutants (NESHAP) for

the Oil and Natural Gas Production Facilities and the Natural Gas Transmission and Storage Facilities major source categories. This action requests additional data and information that was not available at that time. In particular, we are requesting data on storage vessels without potential flash emissions (PFE) and data on HAP emissions from regulated small glycol dehydrators. With regard to the small glycol dehydrators we are particularly interested in data regarding any emissions of HAP other than benzene, toluene, ethylbenzene, and xylene (BTEX), information on available control options for any such HAP and information regarding a potential compliance demonstration issue with respect to the 2012 standards for small glycol dehydration units, as they apply to units with very low emissions.

DATES: Comments must be received on or before January 26, 2016.

ADDRESSES: Submit your comments, identified by Docket ID No. EPA-HQ-OAR-2015-0747, to the Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the online instructions for submitting comments. Once submitted, comments cannot be edited or withdrawn. The EPA may publish any comment received to its public docket. Do not submit electronically any information you consider to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.*, on the web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit <http://www2.epa.gov/dockets/commenting-epa-dockets>.

Docket. All documents in the docket are listed in the <http://www.regulations.gov> index. Although listed in the index, some information is not publicly available, *e.g.*, CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in hard copy. Publicly available docket materials are available either electronically at <http://www.regulations.gov> or in hard copy at the U.S. Environmental Protection Agency, EPA Docket Center, EPA WJC West Building, Room 3334, 1301 Constitution Ave. NW., Washington, DC. The Public Reading Room is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Public Reading Room is (202) 566-1744, and the telephone number for the Air Docket is (202) 566-1742.

FOR FURTHER INFORMATION CONTACT: For further information about this action, contact Mr. Matthew Witosky, Sector Policies and Programs Division (E143-05), Office of Air Quality Planning and Standards, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number: (919) 541-2865; facsimile number: (919) 541-3740; email address: witosky.matthew@epa.gov. For further information on the EPA’s oil and natural gas sector regulatory program, contact Mr. Bruce Moore, Sector Policies and Programs Division (E143-05), Office of Air Quality Planning and Standards, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number: (919) 541-5460; facsimile number: (919) 541-3470; email address: moore.bruce@epa.gov. For additional contact information, see the following **SUPPLEMENTARY INFORMATION** section.

SUPPLEMENTARY INFORMATION:

I. General Information

A. Does this action apply to me?

Categories and entities potentially affected by this action include:

TABLE 1—INDUSTRIAL SOURCE CATEGORIES AFFECTED BY THIS ACTION

Category	NAICS code ¹	Examples of regulated entities
Industry	211111	Crude Petroleum and Natural Gas Extraction.
	211112	Natural Gas Liquid Extraction.
	221210	Natural Gas Distribution.
	486110	Pipeline Distribution of Crude Oil.
	486210	Pipeline Transportation of Natural Gas.
Federal government		Not affected.

TABLE 1—INDUSTRIAL SOURCE CATEGORIES AFFECTED BY THIS ACTION—Continued

Category	NAICS code ¹	Examples of regulated entities
State/local/tribal government	Not affected.

¹ North American Industry Classification System.

This table is not intended to be exhaustive, but rather is meant to provide a guide for readers regarding entities likely to be affected by this action. If you have any questions regarding the applicability of this action to a particular entity, consult either the air permitting authority for the entity or your EPA Regional representative as listed in 40 CFR 60.4 or 40 CFR 63.13 (General Provisions).

B. What should I consider as I prepare my information/comments to the EPA?

Do not submit information containing CBI to the EPA through www.regulations.gov or email. Send or deliver information identified as CBI only to the following address: OAQPS Document Control Officer (C404–02), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention: Docket ID No. EPA–HQ–OAR–2015–0747. Clearly mark the part or all of the information that you claim to be CBI. For CBI in a disk or CD-ROM that you mail to the EPA, mark the outside of the disk or CD-ROM as CBI and then identify electronically within the disk or CD-ROM the specific information that is claimed as CBI. In addition to one complete version of the comment that includes information claimed as CBI, a copy of the comment that does not contain the information claimed as CBI must be submitted for inclusion in the public docket. Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2.

II. Background

In 2012, the EPA issued a final rule titled “Oil and Natural Gas Sector: New Source Performance Standards and National Emission Standards for Hazardous Air Pollutants Reviews,” 77 FR 49490 (August 16, 2012). The final rule contains final actions on two different national standards for the oil and natural gas industry promulgated by the EPA under the Clean Air Act (CAA): (1) The new source performance standards (NSPS), promulgated under section 111 of the CAA, and (2) the NESHAP, promulgated under section 112 of the CAA. The NESHAP portion of the final rule (“the 2012 NESHAP revisions”) included the EPA’s residual

risk and technology review of the NESHAP for the Oil and Natural Gas Production Facilities and the NESHAP for the Natural Gas Transmission and Storage Facilities major source categories (40 CFR part 63 subpart HH¹ and HHH, respectively) pursuant to sections 112(f)(2) and (d)(6) of the CAA. In addition, pursuant to section 112(d)(2) and (3) of the CAA, the EPA established emission standards for BTEX based on maximum achievable control technology (MACT) for a subcategory of glycol dehydrators referred to as the “small glycol dehydration units.”

This request is to obtain additional data and information. We are interested in receiving information on HAP emissions from some affected facilities in the oil and natural gas production, and the natural gas transmission and storage segments of the oil and natural gas sector. In particular, the EPA is interested in the following information:

1. HAP emissions from storage vessels without PFE from the oil and natural gas production segment;

2. Emission information on HAP other than BTEX from small glycol dehydrators and available control options.

In addition, the EPA recently learned of a potential compliance demonstration issue with respect to the 2012 BTEX MACT standards for small glycol dehydration units as they apply to units with very low BTEX emissions. The EPA is also soliciting comment and information related to this issue. The Agency also requests any additional relevant information for sources covered by the NESHAP.

Section III of this action discusses in more detail the information identified above. The EPA is providing a 60-day period for the public to submit the requested information.

III. Solicitation of Data and Comments

The following presents the issues on which we are particularly interested in receiving feedback, data, and information.

¹ 40 CFR part 63, subpart HH also includes standards for certain area source glycol dehydration units, which were not a subject of the 2012 NESHAP revisions.

A. Storage Vessels Without Potential Flash Emissions

We request available data on storage vessels without PFE. Crude oil, condensate, and produced water are typically stored in fixed-roof storage vessels. Some vessels used for storing produced water may be open-top tanks. These fixed-roof vessels, which are operated at or near atmospheric pressure conditions, are typically located in tank batteries at well sites and at centralized gathering facilities. A tank battery refers to the collection of process components used to separate, treat, and store crude oil, condensate, intermediate hydrocarbon liquids, and produced water. The extracted products from production wells enter the tank battery through the production header, which may collect product from many wells.

Emissions from storage vessels are a result of working, breathing, and flash losses. Working losses occur due to the emptying and filling of storage vessels. Breathing losses are the release of gas associated with daily temperature fluctuations and other equilibrium effects. Flash losses occur when a liquid with entrained gases is transferred from a vessel with higher pressure to a vessel with lower pressure, and thus, allowing entrained gases or a portion of the liquid to vaporize or flash. In the oil and natural gas production segment, flashing losses occur when crude oil or condensate flows into a storage vessel from a processing vessel operated at a higher pressure. Typically, the larger the pressure drop, the more flash emissions will occur in the storage vessel. Temperature of the liquid may also influence the amount of flash emissions.

In 1999, the EPA promulgated the NESHAP for the Oil and Natural Gas Production Facilities major source category (40 CFR part 63, subpart HH). The 1999 NESHAP included the MACT standards for storage vessels with PFE, which are defined in subpart HH, 40 CFR 63.761.

The 1999 NESHAP left unregulated storage vessels without PFE (*i.e.*, storage vessels that do not meet the above definition). In the 2011 proposal to revise the Oil and Natural Gas

NESHAP,² the EPA proposed MACT standards for storage vessels without PFE pursuant to CAA section 112(d)(2) and (3), but did not take final action on that proposal. As explained in the preamble to the 2012 NESHAP revisions, “we need (and intend to gather) additional data on these sources in order to analyze and establish MACT emission standards for this subcategory of storage vessels under section 112(d)(2) and (3) of the CAA.” 77 FR 49503.

We request available data regarding storage vessels without PFE. In particular, we are interested in data and other relevant information characterizing emissions and emission rates of storage vessels in the oil and natural gas production segment that do not have PFE, but that nonetheless emit HAP. We also request information on technologies and/or practices for reducing emissions from storage vessels without PFE.

B. Studies of HAP Emissions From Small Glycol Dehydrators

The EPA is specifically interested in receiving data for units with low inlet concentration of BTEX and the amount of these HAP emissions from small glycol dehydration units. In 2012,

²Proposed Rule, *Oil and Natural Gas Sector: New Source Performance Standards and National Emission Standards for Hazardous Air Pollutants Reviews*, 76 FR 52738 (August 23, 2011).

pursuant to CAA section 112(d)(2) and (3), the EPA revised 40 CFR part 63, subparts HH and HHH to include MACT standards for “small glycol dehydration units.” See 40 CFR 63.761 and 63.1271. The standards for both existing and new sources of small glycol dehydration units are in the form of a unit-specific BTEX emission limit determined by the equations provided in that subpart.

The EPA recently learned of a potential compliance demonstration issue for certain small glycol dehydration units with very low BTEX emissions. Specifically, we were informed that for certain small glycol dehydrators that operate with low BTEX inlet concentrations, the equations may result in emission standards that are below the detection limit for the reference method used for compliance purposes. If there are units that fit this criterion, it is theoretically possible that neither the source nor the EPA could verify compliance using the methods specified in the rule. To enable us to fully evaluate this issue, we are requesting source data that demonstrates whether compliance with the standard can be verified at small glycol dehydration units for which this is a potential issue. We request that commenters submit estimates on the number of units where this is a potential

problem and the data showing the HAP inlet concentrations for these units.³

We are also requesting information on emissions of HAP other than BTEX from small glycol dehydrators. As explained above, in the 2012 NESHAP revisions, the EPA established MACT standards for BTEX emitted from small glycol dehydration units. While our data indicate that there is potential for other HAP to be emitted from small glycol dehydration units, we do not have sufficient information to establish MACT standards for other HAP emitted from these units. We are, therefore, requesting data that show the types and quantities of HAP emissions other than BTEX from small glycol dehydration units. In addition to non-BTEX HAP emissions data, we are requesting information on methods employed to control these non-BTEX HAP, including whether BTEX control measures are an effective method for other non-BTEX HAP emitted by the units.

Dated: November 3, 2015.

Janet G. McCabe,

Acting Assistant Administrator, Office of Air and Radiation.

[FR Doc. 2015–30103 Filed 11–25–15; 8:45 am]

BILLING CODE 6560–50–P

³The EPA is not requesting information that would identify the units. Rather, we are requesting information demonstrating that for an affected facility, the applicable standard would be below the detection limit of the EPA method used to show compliance.

Notices

Federal Register

Vol. 80, No. 228

Friday, November 27, 2015

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

Agency Information Collection Activities: Proposed Collection; Comment Request—Federal Claims Collection Methods for Supplemental Nutrition Assistance Program Recipient Claims

AGENCY: Food and Nutrition Service, USDA.

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this Notice invites the general public and other public agencies to comment on proposed information collections. This revision of an existing collection announces the intent of the Food and Nutrition Service to revise and continue the requirements associated with initiating and conducting Federal collection actions against households with delinquent Supplemental Nutrition Assistance Program (SNAP) recipient debts.

DATES: Written comments must be submitted on or before January 26, 2016 to be assured consideration.

ADDRESSES: Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate, automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Comments may be sent to Jane Duffield, Chief, State Administration Branch, Supplemental Nutrition Assistance Program, Food and Nutrition Service, USDA, 3101 Park Center Drive, Room 818, Alexandria, Virginia, 22302. Comments may also be submitted via fax to the attention of Jane Duffield at 703-605-0795. Comments will also be accepted through the Federal eRulemaking Portal. Go to <http://www.regulations.gov> and follow the online instructions for submitting comments electronically.

All written comments will be open for public inspection at the office of the Food and Nutrition Service during regular business hours (8:30 a.m. to 5:00 p.m., Monday through Friday) at 3101 Park Center Drive, Alexandria, Virginia 22302, Room 818.

All comments will be summarized and included in the request for Office of Management and Budget approval of the information collection. All comments will become a matter of public record.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of this information collection should be directed to Kelly Stewart at (703) 305-2425.

SUPPLEMENTARY INFORMATION:

Title: Federal Claims Collection Methods for Supplemental Nutrition Assistance Program Recipient Claims.

OMB Number: 0584-0446.

Form Number: None.

Expiration Date: April 30, 2016.

Type of Request: Revision of a currently approved collection.

Abstract: Section 13(b) of the Food Stamp Act of 1977, as amended (7 U.S.C. 2022(b)), and Supplemental Nutrition Assistance Program (SNAP) regulations at 7 CFR 273.18 require State agencies to refer delinquent debtors for SNAP benefit over-issuance to the U.S. Department of the Treasury for collection. The Debt Collection Improvement Act of 1996 (Pub. L. 104-134), as amended by the Digital Accountability and Transparency Act of 2014 (Pub. L. 113-101), requires these debts to be referred to Treasury for collection when they are 120 days or more delinquent. Through the Treasury Offset Program (TOP), 31 CFR part 285, payments such as Federal income tax refunds, Federal salaries and other Federal payments payable to these delinquent debtors will be offset and the amount applied to the delinquent debt.

TOP places a burden on States agencies and/or former SNAP recipients who owe delinquent debts in three areas: (1) 60-day notices from State agencies to debtors that their debt will be referred to TOP; (2) State-level submissions; and (3) automated data processing (ADP). Below, the burden narrative and chart depicts the burden estimates by these three areas and affected public.

TOP 60-Day Notice Burden

The burden associated with the information collection involves both the households (debtors) and the State agencies. The TOP 60-day notice notifies the household of the proposed referral to TOP and provides the right for review and appeal. The State agency prepares and mails the notices as well as responds to inquiries and appeals. The household, in turn, receives and reads the notice and may make an inquiry or appeal the impending action. Based on an average of the number of records for claims the States sent to TOP for calendar years 2012, 2013 and 2014, we estimate that State agencies will produce and send and that households will read 237,014 TOP 60-day notices. We estimate that the households will submit and State agencies will respond to about 16,591 phone and informal inquiries. Households will file and the States will respond to an estimated 1,421 appeals each. An additional 3,000 notices will be sent directly from FNS to Federal employees concerning the potential offset of their Federal salary. Historically, 30 percent of these notices will result in a phone inquiry from a household; and approximately 20 will result in a formal appeal to FNS requiring documentation from the State. Thus, the total number of responses for the 60-day notice and household inquiry is 513,992 responses (258,946 household responses + 255,046 State Agency responses) per year resulting in an annual reporting burden of 33,960.80 hours. The existing burden for activity relating to the 60-day notice is 34,510.28 hours. The net decrease of 549.48 hours is due to a decrease in the average number of 60-day notices sent to debtors by State agencies between 2012 and 2014.

TOP State-Level Submissions

Treasury prescribes specific processes and file formats for FNS to use to send debts to TOP. FNS provides guidance

and file formats to State agencies and monitors their compliance with such. State agencies must submit an annual letter to FNS certifying that all of the debts submitted in the past and all debts to be submitted in the upcoming calendar year by the State agency to TOP are valid and legally enforceable in the amount stated. FNS estimates that it will take State agencies a total of 26.5 hours per year for these State submissions. This burden has not changed with this activity. State agencies also report TOP collections on the FNS-209 form, "Status of Claims Against Households." The burden for completing the FNS-209 is covered under OMB number 0584-0594.

TOP ADP Burden

The burden for ADP includes weekly file processing, monthly address requests and system maintenance. Weekly and monthly file processing includes requesting addresses to use to send out 60-day notices, adding and maintaining debts in TOP, correcting errors on unprocessable records, and posting weekly collection files. Much of this activity is completed using automation and involves an estimated 1.4 million records annually. FNS estimates that this activity takes

12,374.82 annual reporting and 689 recordkeeping burden hours. This burden has not changed with this activity.

Summary of Estimated Burden

The net aggregate change from the existing to the revised annual burden for this entire Information Collection is a decrease of 549.48 hours from the previous submission. For the activity relating to the 60-day notice, we are decreasing the estimated annual burden for State agencies and households from 34,510.28 hours to 33,960.80 hours to reflect a decrease in the number of notices and the resulting inquiries and appeals. The State-level submissions portion of the reporting and recordkeeping burden is estimated to require the same number of hours as the currently approved collection, 26.5 hours. The annual ADP portion of this burden package is also estimated to require the same number of hours as the currently approved collection, 12,374.82 reporting and 689 recordkeeping hours. This results in a final total of 47,051 annual burden hours.

Reporting Burden

Affected Public: Households/Debtors.
Estimated Number of Respondents: 237,014.

Estimated Number of Responses per Respondent: 1.09253.

Estimated Total Number of Annual Responses: 258,946.

Estimated Hours per Response: 0.097064.

BILLING CODE 3410-30-P

DEPARTMENT OF AGRICULTURE

National Agricultural Statistics Service

Notice of the Intent To Request To Conduct a New Information Collection

AGENCY: National Agricultural Statistics Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, this notice announces the intention of the National Agricultural Statistics Service (NASS) to seek approval to conduct a new information collection to gather data related to the production and marketing of foods directly from farm producers to consumers or retailers. In addition NASS will collect some whole-farm data to be used to classify and group operations for summarizing and publication of results.

FOR FURTHER INFORMATION CONTACT: R. Renee Picanso, Associate Administrator, National Agricultural Statistics Service, U.S. Department of Agriculture, (202) 720-2707. Copies of this information collection and related instructions can be obtained without charge from David Hancock, NASS-OMB Clearance Officer, at (202) 690-2388 or at *ombofficer@nass.usda.gov*.

Correction

In the **Federal Register** of October 26, 2015 in FR Doc. 2015-27139 on page

65196, in the SUPPLEMENTARY INFORMATION, para 5, the Estimate of Burden section, read as follows:

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 30 minutes per response. NASS plans to mail out publicity materials with the questionnaires to inform producers of the importance of this survey. NASS will also use multiple mailings, followed up with phone and limited personal enumeration to increase response rates and to minimize data collection costs. The sample will consist of farm operators believed to market their products directly to consumers or retailers. These operators will be drawn from two sources: (1) NASS's list of farm operators, and (2) farm operators obtained from publically available sources, including those obtained from web harvesting.

Respondents: Farmers and Ranchers.

Estimated Number of Respondents: 56,000.

Estimated Total Annual Burden on Respondents: 29,000 hours.

Yvette Anderson,

Federal Register Liaison Officer for ARS, ERS, and NASS.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XE332

Gulf of Mexico Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; public meeting via webinar.

SUMMARY: The Gulf of Mexico Fishery Management Council (Council) will hold a public meeting of its Law Enforcement Advisory Panel (LEAP) via webinar.

DATES: The meeting/webinar will be held Monday, December 14, 2015, beginning at 1 p.m. EST and concluding by 3 p.m. EST.

ADDRESSES: The public documents can be obtained by contacting the Gulf of Mexico Fishery Management Council at (813) 348-1630 or on their Web site at *www.gulfcouncil.org*.

Meeting address: The meeting will be held via webinar. You may register to participate at: *https://attendee.gotowebinar.com/register/1596747440417850881*.

Council address: Gulf of Mexico Fishery Management Council, 2203 N. Lois Avenue, Suite 1100, Tampa, FL 33607.

FOR FURTHER INFORMATION CONTACT: Steven Atran, Senior Fishery Biologist, Gulf of Mexico Fishery Management Council; telephone: (813) 348-1630; fax: (813) 348-1711; email: *steven.atran@gulfcouncil.org*.

SUPPLEMENTARY INFORMATION: The agenda for the meeting is as follows: The meeting will begin with adoption of agenda and review of scope of work. The Advisory Panel (AP) will discuss the ability of state enforcement agencies to provide background checks on advisory panel applicants for fishery violations in state waters involving federally managed stocks. The AP will also review the procedure for selecting candidates for the new Officer of the Year Program, and will discuss LEAP Representatives duties during council meetings. Lastly, any Other Business items, if any, may be discussed.

Special Accommodations

Requests for auxiliary aids should be directed to Kathy Pereira (see **ADDRESSES**), at least 5 working days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

National Oceanic and Atmospheric Administration

RIN 0648-XE302

Fisheries of the South Atlantic; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 41 Assessment Workshop for South Atlantic *red snapper* (*Lutjanus campechanus*) and *gray triggerfish* (*Balistes caprisiscus*).

SUMMARY: The SEDAR 41 assessments of the South Atlantic stocks of *red snapper* and *gray triggerfish* will consist of a series of workshops and webinars: Data Workshops; an Assessment Workshop and webinars; and a Review Workshop. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 41 Assessment Workshop will be held on December 14, 2015 from 9 a.m. until 6 p.m.; December 15-16, 2015 from 8 a.m. until 6 p.m., and December 17, 2015 from 8 a.m. until 1 p.m. The established times may be adjusted as necessary to accommodate the timely completion of discussion relevant to the assessment process. Such adjustments may result in the meeting being extended from, or

completed prior to the time established by this notice. Additional Assessment Webinars and the Review Workshop dates and times will publish in a subsequent issue in the **Federal Register**.

ADDRESSES:

Meeting address: The SEDAR 41 Assessment Workshop will be held at the Crystal Coast Civic Center, 3505 Arendell Street, Morehead City, NC 28557, 252-247-3883.

SEDAR address: South Atlantic Fishery Management Council, 4055 Faber Place Drive, Suite 201, N. Charleston, SC 29405; www.sedarweb.org.

FOR FURTHER INFORMATION CONTACT: Julia Byrd, SEDAR Coordinator, 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405; phone: (843) 571-4366; email: julia.byrd@safmc.net.

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants include: Data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs);

international experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion in the Assessment Workshop are as follows:

1. Participants will use datasets provided by the Data Workshop to develop population models to evaluate stock status, estimate population benchmarks and Sustainable Fisheries Act criteria, and project future conditions, as specified in the Terms of Reference.

2. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters.

3. Participants will prepare a workshop report, compare and contrast various assessment approaches, and determine whether the assessments are adequate for submission to the review panel.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

This meeting is accessible to people with disabilities. Requests for auxiliary aids should be directed to the SAFMC office (see **ADDRESSES**) at least 10 business days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 23, 2015.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of

information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Expenditure Survey of Highly Migratory Species Tournaments and Participants.

OMB Control Number: 0648–xxxx.

Form Number(s): None.

Type of Request: Regular (request for a new information collection).

Number of Respondents: 3,225.

Average Hours Per Response:

Operator's survey, 30 minutes;

participant survey, 15 minutes.

Burden Hours: 863.

Needs and Uses: This request is for a new collection of information.

The objective of the study is to collect information on the earnings and expenditures of Atlantic and Hawaii Highly Migratory Species (HMS) tournament operators and participants. The study will use two survey instruments to collect information from tournament operators and participants. One survey will ask tournament operators to characterize and quantify their operating costs and income sources in addition to describing their tournament participants. The other survey instrument will ask fishing tournament participants to estimate their expenditures associated with travel to, entering, and participating in the tournament.

The National Marine Fisheries Service (NMFS) will collect cost and earnings data from all Atlantic and Hawaii HMS tournaments registered within the year (approximately 300 based on recent years' tournament registration data). In addition, NMFS will select fifty percent of registered tournaments to distribute expenditure surveys to anglers registered for those tournament events. The Atlantic HMS Management Division is currently consulting with tournament organizers and participants to design the survey instruments to ensure NMFS captures data on all relevant expenditures.

As specified in the Magnuson-Stevenson Fishery Conservation and Management Act of 1996 (and reauthorized in 2007), NMFS is required to enumerate the economic impacts of the policies it implements on fishing participants and coastal communities. The cost and earnings data collected in this survey will be used to estimate the economic contributions and impacts of Atlantic HMS tournaments regionally.

Affected Public: Business and other for-profit organizations; individuals or households.

Frequency: One time.

Respondent's Obligation: Voluntary.

This information collection request may be viewed at reginfo.gov. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA_Submission@omb.eop.gov or fax to (202) 395–5806.

Dated: November 23, 2015.

Sarah Brabson,

NOAA PRA Clearance Officer.

The established times for addressing items on the agenda may be adjusted as necessary to accommodate the timely completion of discussion relevant to the agenda items. To further accommodate discussion and completion of all items on the agenda, the meeting may be extended from, or completed prior to the date established in this notice.

The meeting is open to the public, and will be conducted in English. Fishers and other interested persons are invited to attend and participate with oral or written statements regarding agenda issues.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be subjects for formal action during this meeting. Actions will be restricted to those issues specifically identified in this notice, and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided that the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

The meeting is physically accessible to people with disabilities. For more information or request for sign language interpretation and/or other auxiliary aids, please contact Mr. Miguel A. Rolón,

Executive Director, Caribbean Fishery Management Council, 270 Muñoz Rivera Avenue, Suite 401, San Juan, Puerto Rico, 00918, telephone (787) 766-5926, at least 5 days prior to the meeting date.

Dated: November 23, 2015.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

Fisheries of the Caribbean; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of SEDAR 46 post-workshop webinar for Caribbean Data-limited Species.

SUMMARY: The SEDAR 46 assessment of the Caribbean Data-limited Species will consist of one in-person workshop and a series of webinars. See **SUPPLEMENTARY INFORMATION**.

DATES: The SEDAR 46 post-workshop webinar will be held from 2 p.m. to 4 p.m. on December 14, 2015.

ADDRESSES:

Meeting address: The meeting will be held via webinar. The webinar is open to members of the public. Those interested in participating should contact Julie A. Neer at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

SEDAR address: 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

FOR FURTHER INFORMATION CONTACT: Julie A. Neer, SEDAR Coordinator; phone: (843) 571-4366; email: Julie.neer@safmc.net

SUPPLEMENTARY INFORMATION: The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in

the Southeast Region. SEDAR is a multi-step process including: (1) Data/Assessment Workshop, and (2) a series of webinars. The product of the Data/Assessment Workshop is a report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses, and describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion in the Assessment Process webinars are as follows:

1. Using datasets and initial assessment analysis recommended from the In-person Workshop, panelists will employ assessment models to evaluate stock status, estimate population benchmarks and management criteria, and project future conditions.

2. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 10 business days prior to each workshop.

Note: The times and sequence specified in this agenda are subject to change.

Takes of Marine Mammals Incidental to Specified Activities; Taking Marine Mammals Incidental to a Pier Maintenance Project

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of an incidental harassment authorization.

SUMMARY: In accordance with the regulations implementing the Marine Mammal Protection Act (MMPA) as amended, notification is hereby given that we have issued an incidental harassment authorization (IHA) to the U.S. Navy (Navy) to incidentally harass, by Level B harassment only, three species of marine mammals during construction activities associated with a pier maintenance project at Naval Base Kitsap Bremerton, WA.

DATES: This authorization is effective from December 1, 2015, through November 30, 2016.

FOR FURTHER INFORMATION CONTACT: Ben Laws, Office of Protected Resources, NMFS, (301) 427-8401.

SUPPLEMENTARY INFORMATION:

Availability

An electronic copy of the Navy's application and supporting documents, as well as a list of the references cited in this document, may be obtained by visiting the Internet at: www.nmfs.noaa.gov/pr/permits/incidental/construction.htm. A memorandum describing our adoption of the Navy's Environmental Assessment (2015) and our associated Finding of No Significant Impact, prepared pursuant to the National Environmental Policy Act, are also available at the same site. In case of problems accessing these documents, please call the contact listed above (see **FOR FURTHER INFORMATION CONTACT**).

Background

Sections 101(a)(5)(A) and (D) of the MMPA (16 U.S.C. 1361 *et seq.*) direct

the Secretary of Commerce to allow, upon request, the incidental, but not intentional, taking of small numbers of marine mammals by U.S. citizens who engage in a specified activity (other than commercial fishing) within a specified geographical region if certain findings are made and either regulations are issued or, if the taking is limited to harassment, a notice of a proposed authorization is provided to the public for review.

Authorization for incidental takings shall be granted if NMFS finds that the taking will have a negligible impact on the species or stock(s), will not have an unmitigable adverse impact on the availability of the species or stock(s) for subsistence uses (where relevant), and if the permissible methods of taking and requirements pertaining to the mitigation, monitoring and reporting of such takings are set forth. NMFS has defined "negligible impact" in 50 CFR 216.103 as "... an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival."

Section 101(a)(5)(D) of the MMPA established an expedited process by which citizens of the U.S. can apply for an authorization to incidentally take small numbers of marine mammals by harassment. Section 101(a)(5)(D) establishes a 45-day time limit for NMFS review of an application followed by a 30-day public notice and comment period on any proposed authorizations for the incidental harassment of marine mammals. Within 45 days of the close of the comment period, NMFS must either issue or deny the authorization. Except with respect to certain activities not pertinent here, the MMPA defines "harassment" as "any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment]."

Summary of Request

On April 14, 2015, we received a request from the Navy for authorization to take marine mammals incidental to pile driving and removal associated with the Pier 4 maintenance project at Naval Base Kitsap Bremerton, WA (NBKB). The Navy submitted revised versions of the request on May 20 and June 12, 2015, the latter of which we

deemed adequate and complete. The Navy submitted additional information related to a small amount of necessary maintenance work at the adjacent Pier 5 on November 18, 2015. The Navy plans to conduct this project, involving vibratory pile driving only, within the approved in-water work window. Hereafter, use of the generic term "pile driving" may refer to both pile installation and removal unless otherwise noted.

The use of vibratory pile driving is expected to produce underwater sound at levels that have the potential to result in behavioral harassment of marine mammals. Species with the expected potential to be present during the in-water work window include the Steller sea lion (*Eumetopias jubatus monteriensis*), California sea lion (*Zalophus californianus*), and harbor seal (*Phoca vitulina richardii*). All of these species may be present throughout the period of validity for this IHA.

Description of the Specified Activity

Overview

NBKB serves as the homeport for a nuclear aircraft carrier and other Navy vessels and as a shipyard capable of overhauling and repairing all types and sizes of ships. Other significant capabilities include alteration, construction, deactivation, and dry-docking of naval vessels. Pier 4 was completed in 1922 and requires substantial maintenance to maintain readiness. The Navy plans to remove up to 92 deteriorating fender piles and to replace them with new steel fender piles.

Dates and Duration

The allowable season for in-water work for this project is July 16 through February 15, a window related to bull trout (*Salvelinus confluentus*) occurrence in the project area. Under the specified activity a maximum of thirty pile driving days would occur. Pile driving may occur only during daylight hours. The IHA is valid for one year, from December 1, 2015, through November 30, 2016. The Navy requested a one-year period of validity for this IHA due to uncertainty regarding the project start date. However, the in-water work would occur within only a single work window; *i.e.*, would occur from December 1, 2015, through February 15, 2016, or would occur from July 16, 2016, through November 30, 2016.

Specific Geographic Region

NBKB is located on the north side of Sinclair Inlet in Puget Sound (see Figures 1–1 and 2–1 of the Navy's

application). Sinclair Inlet, an estuary of Puget Sound extending 3.5 miles southwesterly from its connection with the Port Washington Narrows, connects to the main basin of Puget Sound through Port Washington Narrows and then Agate Pass to the north or Rich Passage to the east. Sinclair Inlet has been significantly modified by development activities. Fill associated with transportation, commercial, and residential development of NBKB, the City of Bremerton, and the local ports of Bremerton and Port Orchard has resulted in significant changes to the shoreline. The area surrounding Pier 4 is industrialized, armored and adjacent to railroads and highways. Sinclair Inlet is also the receiving body for a wastewater treatment plant located just west of NBKB. Sinclair Inlet is relatively shallow and does not flush fully despite freshwater stream inputs.

Detailed Description of Activities

The Navy plans to remove eighty deteriorated 14-in timber fender piles at Pier 4 and replace them with eighty new 12 to 14-in steel fender piles. The Navy assumes a notional production rate of eight piles per day (removal) and four piles per day (installation) in determining the number of days of pile driving expected, and scheduling (as well as exposure analysis) is based on this assumption. All pile driving and removal would be accomplished with a vibratory driver (except where removal is accomplished by direct pull or other mechanical means, *e.g.*, clamshell, cutting). Vibratory driving and/or removal could occur on any work day during the period of the IHA. Only one pile driving rig is planned for operation at any given time.

Changes from the Notice of Proposed Authorization—The Navy requested an expansion of the specified activity to include additional maintenance work at the immediately adjacent Pier 5. This additional work will involve the removal and replacement of an additional twelve piles. The piles would be the same as those considered for Pier 4 (14-in timber piles to be removed and replaced with 12- to 14-in steel piles) and all pile driving and removal would be accomplished with a vibratory driver. This work would require an additional five in-water work days, but would not involve use of any additional or concurrent pile driving. We have determined that this additional work represents an inconsequential increase to the scope of work considered in our notice of proposed authorization (July 24, 2015; 80 FR 44033).

Comments and Responses

We published a notice of receipt of the Navy’s application and proposed IHA in the **Federal Register** on July 24, 2015 (80 FR 44033). We received a letter from the Marine Mammal Commission, which concurred with our preliminary findings and recommended that we issue the requested IHA, subject to inclusion of the proposed mitigation and monitoring measures. All mitigation and monitoring measures described in our notice of proposed IHA have been included in the IHA as issued. The Commission also recommended that we ensure that the Navy is sufficiently aware of the requirements set forth in the authorization, and we agree with the recommendation.

Description of Marine Mammals in the Area of the Specified Activity

There are five marine mammal species with records of occurrence in waters of Sinclair Inlet in the action area. These are the California sea lion, harbor seal, Steller sea lion, gray whale (*Eschrichtius robustus*), and killer whale (*Orcinus orca*). The harbor seal is a year-round resident of Washington inland waters, including Puget Sound, while the sea lions are absent for portions of the summer. For the killer whale, both transient (west coast stock) and resident (southern stock) animals have occurred in the area. However, southern resident animals are known to have occurred only once, with the last confirmed sighting from 1997 in Dyes Inlet. A group of 19 whales from the L-25 subpod entered and stayed in Dyes Inlet, which connects to Sinclair Inlet northeast of NBKB, for 30 days. Dyes

Inlet may be reached only by traversing from Sinclair Inlet through the Port Washington Narrows, a narrow connecting body that is crossed by two bridges, and it was speculated at the time that the whales’ long stay was the result of a reluctance to traverse back through the Narrows and under the two bridges. There is one other unconfirmed report of a single southern resident animal occurring in the project area, in January 2009. Of these stocks, the southern resident killer whale is listed (as endangered) under the Endangered Species Act (ESA).

An additional seven species have confirmed occurrence in Puget Sound, but are considered rare to extralimital in Sinclair Inlet and the surrounding waters. These species—the humpback whale (*Megaptera novaeangliae*), minke whale (*Balaenoptera acutorostrata scammoni*), Pacific white-sided dolphin (*Lagenorhynchus obliquidens*), harbor porpoise (*Phocoena phocoena vomerina*), Dall’s porpoise (*Phocoenoides dalli dalli*), and northern elephant seal (*Mirounga angustirostris*), along with the southern resident killer whale—are considered extremely unlikely to occur in the action area or to be affected by the specified activities, and are not considered further in this document. A review of sightings records available from the Orca Network (www.orcanetwork.org; accessed July 13, 2015) confirms that there are no recorded observations of these species in the action area (with the exception of the southern resident sightings described above).

We have reviewed the Navy’s detailed species descriptions, including life history information, for accuracy and

completeness and refer the reader to Sections 3 and 4 of the Navy’s application instead of reprinting the information here. Please also refer to NMFS’ Web site (www.nmfs.noaa.gov/pr/species/mammals) for generalized species accounts and to the Navy’s Marine Resource Assessment for the Pacific Northwest, which documents and describes the marine resources that occur in Navy operating areas of the Pacific Northwest, including Puget Sound (DoN, 2006). The document is publicly available at www.navfac.navy.mil/products_and_services/ev/products_and_services/marine_resources/marine_resource_assessments.html (accessed November 13, 2015). We provided additional information for marine mammals with potential for occurrence in the area of the specified activity in our **Federal Register** notice of proposed authorization (July 24, 2015; 80 FR 44033).

Table 1 lists the marine mammal species with expected potential for occurrence in the vicinity of NBKB during the project timeframe and summarizes key information regarding stock status and abundance. Taxonomically, we follow Committee on Taxonomy (2014). Please see NMFS’ Stock Assessment Reports (SAR), available at www.nmfs.noaa.gov/pr/sars, for more detailed accounts of these stocks’ status and abundance. The harbor seal, California sea lion, and gray whale are addressed in the Pacific SARs (e.g., Carretta *et al.*, 2015), while the Steller sea lion and transient killer whale are treated in the Alaska SARs (e.g., Allen and Angliss, 2015).

TABLE 1—MARINE MAMMALS POTENTIALLY PRESENT IN THE VICINITY OF NBKB

Species	Stock	ESA/MMPA status; strategic (Y/N) ¹	Stock abundance (CV, N _{min} , most recent abundance survey) ²	PBR ³	Annual M/SI ⁴	Relative occurrence in Sinclair Inlet; season of occurrence
Order Cetartiodactyla—Cetacea—Superfamily Mysticeti (baleen whales)						
Family Eschrichtiidae						
Gray whale	Eastern North Pacific ...	–; N	20,990 (0.05; 20,125; 2010–11).	624	132 ⁹	Rare; year-round.
Superfamily Odontoceti (toothed whales, dolphins, and porpoises)						
Family Delphinidae						
Killer whale	West coast transient ⁵ ..	–; N	243 (n/a; 2009)	2.4	0	Rare; year-round.
Order Carnivora—Superfamily Pinnipedia						
Family Otariidae (eared seals and sea lions)						
California sea lion.	U.S.	–; N	296,750 (n/a; 153,337; 2011).	9,200	389	Common; year-round (excluding July).

TABLE 1—MARINE MAMMALS POTENTIALLY PRESENT IN THE VICINITY OF NBKB—Continued

Species	Stock	ESA/MMPA status; strategic (Y/N) ¹	Stock abundance (CV, N _{min} , most recent abundance survey) ²	PBR ³	Annual M/SI ⁴	Relative occurrence in Sinclair Inlet; season of occurrence
Steller sea lion ..	Eastern U.S.	–; N ⁷	60,131–74,448 (n/a; 36,551; 2008–13) ⁸ .	1,645	92.3	Occasional/seasonal; Oct-May.
Family Phocidae (earless seals)						
Harbor seal	Washington northern inland waters ⁶ .	–; N	11,036 (0.15; 7,213; 1999).	undetermined	>2.8	Common; year-round.

¹ ESA status: Endangered (E), Threatened (T)/MMPA status: Depleted (D). A dash (–) indicates that the species is not listed under the ESA or designated as depleted under the MMPA. Under the MMPA, a strategic stock is one for which the level of direct human-caused mortality exceeds PBR (see footnote 3) or which is determined to be declining and likely to be listed under the ESA within the foreseeable future. Any species or stock listed under the ESA is automatically designated under the MMPA as depleted and as a strategic stock.

² CV is coefficient of variation; N_{min} is the minimum estimate of stock abundance. In some cases, CV is not applicable. For killer whales, the abundance values represent direct counts of individually identifiable animals; therefore there is only a single abundance estimate with no associated CV. For certain stocks of pinnipeds, abundance estimates are based upon observations of animals (often pups) ashore multiplied by some correction factor derived from knowledge of the specie's (or similar species') life history to arrive at a best abundance estimate; therefore, there is no associated CV. In these cases, the minimum abundance may represent actual counts of all animals ashore. The most recent abundance survey that is reflected in the abundance estimate is presented; there may be more recent surveys that have not yet been incorporated into the estimate.

³ Potential biological removal, defined by the MMPA as the maximum number of animals, not including natural mortalities, that may be removed from a marine mammal stock while allowing that stock to reach or maintain its optimum sustainable population size (OSP).

⁴ These values, found in NMFS' SARs, represent annual levels of human-caused mortality plus serious injury from all sources combined (e.g., commercial fisheries, subsistence hunting, ship strike). Annual M/SI often cannot be determined precisely and is in some cases presented as a minimum value.

⁵ The abundance estimate for this stock includes only animals from the "inner coast" population occurring in inside waters of southeastern Alaska, British Columbia, and Washington—excluding animals from the "outer coast" subpopulation, including animals from California—and therefore should be considered a minimum count. For comparison, the previous abundance estimate for this stock, including counts of animals from California that are now considered outdated, was 354.

⁶ Abundance estimates for these stocks are greater than eight years old and are therefore not considered current. PBR is considered undetermined for these stocks, as there is no current minimum abundance estimate for use in calculation. We nevertheless present the most recent abundance estimates and PBR values, as these represent the best available information for use in this document.

⁷ The eastern distinct population segment of the Steller sea lion, previously listed under the ESA as threatened, was delisted on December 4, 2013 (78 FR 66140; November 4, 2013).

⁸ Best abundance is calculated as the product of pup counts and a factor based on the birth rate, sex and age structure, and growth rate of the population. A range is presented because the extrapolation factor varies depending on the vital rate parameter resulting in the growth rate (i.e., high fecundity or low juvenile mortality).

⁹ Includes annual Russian harvest of 127 whales.

Potential Effects of the Specified Activity on Marine Mammals

Our Federal Register notice of proposed authorization (July 24, 2015; 80 FR 44033) provides a general background on sound relevant to the specified activity as well as a detailed description of marine mammal hearing and of the potential effects of these construction activities on marine mammals.

Anticipated Effects on Habitat

We described potential impacts to marine mammal habitat in detail in our Federal Register notice of proposed authorization (July 24, 2015; 80 FR 44033). In summary, we have determined that given the short daily duration of sound associated with individual pile driving events and the relatively small areas being affected, pile driving activities associated with the proposed action are not likely to have a permanent, adverse effect on any fish habitat, or populations of fish species. The area around NBKB, including the adjacent ferry terminal and nearby marinas, is heavily altered with significant levels of industrial and

recreational activity, and is unlikely to harbor significant amounts of forage fish. Thus, any impacts to marine mammal habitat are not expected to cause significant or long-term consequences for individual marine mammals or their populations.

Mitigation

In order to issue an IHA under section 101(a)(5)(D) of the MMPA, NMFS must set forth the permissible methods of taking pursuant to such activity, and other means of effecting the least practicable impact on such species or stock and its habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance, and on the availability of such species or stock for taking for certain subsistence uses.

Measurements from similar pile driving events were coupled with practical spreading loss to estimate zones of influence (ZOI; see "Estimated Take by Incidental Harassment"); these values were used to develop mitigation measures for pile driving activities at NBKB. The ZOIs effectively represent the mitigation zone that would be established around each pile to prevent

Level A harassment to marine mammals, while providing estimates of the areas within which Level B harassment might occur. In addition to the specific measures described later in this section, the Navy will conduct briefings between construction supervisors and crews, marine mammal monitoring team, and Navy staff prior to the start of all pile driving activity, and when new personnel join the work, in order to explain responsibilities, communication procedures, marine mammal monitoring protocol, and operational procedures.

Monitoring and Shutdown for Pile Driving

The following measures apply to the Navy's mitigation through shutdown and disturbance zones:

Shutdown Zone—For all pile driving activities, the Navy will establish a shutdown zone intended to contain the area in which SPLs equal or exceed the acoustic injury criteria for pinnipeds (190 dB root mean square [rms]). The purpose of a shutdown zone is to define an area within which shutdown of activity would occur upon sighting of a

marine mammal (or in anticipation of an animal entering the defined area), thus preventing injury of marine mammals (as described previously under “Potential Effects of the Specified Activity on Marine Mammals” in our notice of proposed authorization [July 24, 2015; 80 FR 44033], serious injury or death are unlikely outcomes even in the absence of mitigation measures). Modeled radial distances for shutdown zones are shown in Table 2. Although no potential for injury is predicted, a minimum shutdown zone of 10 m will be established during all pile driving activities. This precautionary measure is intended to prevent the already unlikely possibility of physical interaction with construction equipment and to further reduce any possibility of acoustic injury.

Disturbance Zone—Disturbance zones are the areas in which SPLs equal or exceed 160 and 120 dB rms (for impulse and continuous sound, respectively). Disturbance zones provide utility for monitoring conducted for mitigation purposes (*i.e.*, shutdown zone monitoring) by establishing monitoring protocols for areas adjacent to the shutdown zones. Monitoring of disturbance zones enables observers to be aware of and communicate the presence of marine mammals in the project area but outside the shutdown zone and thus prepare for potential shutdowns of activity. However, the primary purpose of disturbance zone monitoring is for documenting incidents of Level B harassment; disturbance zone monitoring is discussed in greater detail later (see “Monitoring and Reporting”). Nominal radial distances for disturbance zones are shown in Table 2.

In order to document observed incidents of harassment, monitors record all marine mammal observations, regardless of location. The observer’s location, as well as the location of the pile being driven, is known from a GPS. The location of the animal is estimated as a distance from the observer, which is then compared to the location from the pile. It may then be estimated whether the animal was exposed to sound levels constituting incidental harassment on the basis of predicted distances to relevant thresholds in post-processing of observational and acoustic data, and a precise accounting of observed incidences of harassment created. This information may then be used to extrapolate observed takes to reach an approximate understanding of actual total takes.

Monitoring Protocols—Monitoring will be conducted before, during, and after pile driving activities. In addition, observers shall record all incidents of

marine mammal occurrence, regardless of distance from activity, and shall document any behavioral reactions in concert with distance from piles being driven. Observations made outside the shutdown zone will not result in shutdown; that pile segment would be completed without cessation, unless the animal approaches or enters the shutdown zone, at which point all pile driving activities must be halted. Monitoring will take place from fifteen minutes prior to initiation through thirty minutes post-completion of pile driving activities. Pile driving activities include the time to install or remove a single pile or series of piles, as long as the time elapsed between uses of the pile driving equipment is no more than thirty minutes. Please see the Monitoring Plan (Appendix C in the Navy’s application), developed by the Navy in consultation with NMFS, for full details of the monitoring protocols.

The following additional measures apply to visual monitoring:

(1) Monitoring will be conducted by qualified observers, who will be placed at the best vantage point(s) practicable to monitor for marine mammals and implement shutdown/delay procedures when applicable by calling for the shutdown to the hammer operator. Qualified observers are trained biologists, with the following minimum qualifications:

- Visual acuity in both eyes (correction is permissible) sufficient for discernment of moving targets at the water’s surface with ability to estimate target size and distance; use of binoculars may be necessary to correctly identify the target;
- Advanced education in biological science or related field (undergraduate degree or higher required);
- Experience and ability to conduct field observations and collect data according to assigned protocols (this may include academic experience);
- Experience or training in the field identification of marine mammals, including the identification of behaviors;
- Sufficient training, orientation, or experience with the construction operation to provide for personal safety during observations;
- Writing skills sufficient to prepare a report of observations including but not limited to the number and species of marine mammals observed; dates and times when in-water construction activities were conducted; dates and times when in-water construction activities were suspended to avoid potential incidental injury from construction sound of marine mammals observed within a defined shutdown

zone; and marine mammal behavior; and

- Ability to communicate orally, by radio or in person, with project personnel to provide real-time information on marine mammals observed in the area as necessary.

(2) Prior to the start of pile driving activity, the shutdown zone will be monitored for fifteen minutes to ensure that it is clear of marine mammals. Pile driving will only commence once observers have declared the shutdown zone clear of marine mammals; animals will be allowed to remain in the shutdown zone (*i.e.*, must leave of their own volition) and their behavior will be monitored and documented. The shutdown zone may only be declared clear, and pile driving started, when the entire shutdown zone is visible (*i.e.*, when not obscured by dark, rain, fog, etc.). In addition, if such conditions should arise during impact pile driving that is already underway, the activity must be halted.

(3) If a marine mammal approaches or enters the shutdown zone during the course of pile driving operations, activity will be halted and delayed until either the animal has voluntarily left and been visually confirmed beyond the shutdown zone or fifteen minutes have passed without re-detection of the animal. Monitoring will be conducted throughout the time required to drive a pile.

Special Conditions

The Navy did not request the authorization of incidental take for killer whales or gray whales (see discussion below in “Estimated Take by Incidental Harassment”). Therefore, shutdown will be implemented in the event that either of these species is observed in the vicinity, prior to entering the defined disturbance zone. As described later in this document, we believe that occurrence of these species during the in-water work window would be uncommon and that the occurrence of an individual or group would likely be highly noticeable and would attract significant attention in local media and with local whale watchers and interested citizens. Prior to the start of pile driving on any day, the Navy will contact and/or review the latest sightings data from the Orca Network and/or Center for Whale Research to determine the location of the nearest marine mammal sightings. The Orca Sightings Network consists of a list of over 600 residents, scientists, and government agency personnel in the U.S. and Canada, and includes passive acoustic detections. The presence of a killer whale or gray whale in the

southern reaches of Puget Sound would be a notable event, drawing public attention and media scrutiny. With this level of coordination in the region of activity, the Navy should be able to effectively receive real-time information on the presence or absence of whales, sufficient to inform the day's activities. Pile driving will not occur if there was the risk of incidental harassment of a species for which incidental take was not authorized.

One land-based observer will be positioned at the pier work site. Additionally, one vessel-based observer will travel through the monitoring area, completing an entire loop approximately every thirty minutes (please see Figure 1 of Appendix C in the Navy's applications). If any killer whales or gray whales are detected, activity would not begin or would shut down.

Timing Restrictions

In the project area, designated timing restrictions exist to avoid in-water work when salmonids and other spawning forage fish are likely to be present. The in-water work window is July 16–February 15. All in-water construction activities will occur only during daylight hours (sunrise to sunset).

Soft Start

The use of a soft start procedure is believed to provide additional protection to marine mammals by warning or providing a chance to leave the area prior to the hammer operating at full capacity, and typically involves a requirement to initiate sound from the hammer at reduced energy followed by a waiting period. This procedure is repeated two additional times. It is difficult to specify the reduction in energy for any given hammer because of variation across drivers. The pier maintenance project will utilize soft start techniques, which require the Navy to initiate sound from vibratory hammers for fifteen seconds at reduced energy followed by a thirty-second waiting period, with the procedure repeated two additional times. Soft start will be required at the beginning of each day's pile driving work and at any time following a cessation of pile driving of thirty minutes or longer.

We have carefully evaluated the Navy's proposed mitigation measures and considered their effectiveness in past implementation to determine whether they are likely to effect the least practicable impact on the affected marine mammal species and stocks and their habitat. Our evaluation of potential measures included consideration of the following factors in relation to one

another: (1) The manner in which, and the degree to which, the successful implementation of the measure is expected to minimize adverse impacts to marine mammals, (2) the proven or likely efficacy of the specific measure to minimize adverse impacts as planned; and (3) the practicability of the measure for applicant implementation.

Any mitigation measure(s) we prescribe should be able to accomplish, have a reasonable likelihood of accomplishing (based on current science), or contribute to the accomplishment of one or more of the general goals listed below:

(1) Avoidance or minimization of injury or death of marine mammals wherever possible (goals 2, 3, and 4 may contribute to this goal).

(2) A reduction in the number (total number or number at biologically important time or location) of individual marine mammals exposed to stimuli expected to result in incidental take (this goal may contribute to 1, above, or to reducing takes by behavioral harassment only).

(3) A reduction in the number (total number or number at biologically important time or location) of times any individual marine mammal would be exposed to stimuli expected to result in incidental take (this goal may contribute to 1, above, or to reducing takes by behavioral harassment only).

(4) A reduction in the intensity of exposure to stimuli expected to result in incidental take (this goal may contribute to 1, above, or to reducing the severity of behavioral harassment only).

(5) Avoidance or minimization of adverse effects to marine mammal habitat, paying particular attention to the prey base, blockage or limitation of passage to or from biologically important areas, permanent destruction of habitat, or temporary disturbance of habitat during a biologically important time.

(6) For monitoring directly related to mitigation, an increase in the probability of detecting marine mammals, thus allowing for more effective implementation of the mitigation.

Based on our evaluation of the Navy's proposed measures, as well as any other potential measures that may be relevant to the specified activity, we have determined that the proposed mitigation measures provide the means of effecting the least practicable impact on marine mammal species or stocks and their habitat, paying particular attention to rookeries, mating grounds, and areas of similar significance.

Monitoring and Reporting

In order to issue an IHA for an activity, section 101(a)(5)(D) of the MMPA states that NMFS must set forth "requirements pertaining to the monitoring and reporting of such taking." The MMPA implementing regulations at 50 CFR 216.104 (a)(13) indicate that requests for incidental take authorizations must include the suggested means of accomplishing the necessary monitoring and reporting that will result in increased knowledge of the species and of the level of taking or impacts on populations of marine mammals that are expected to be present in the proposed action area.

Any monitoring requirement we prescribe should improve our understanding of one or more of the following:

- Occurrence of marine mammal species in action area (*e.g.*, presence, abundance, distribution, density).
- Nature, scope, or context of likely marine mammal exposure to potential stressors/impacts (individual or cumulative, acute or chronic), through better understanding of: (1) Action or environment (*e.g.*, source characterization, propagation, ambient noise); (2) Affected species (*e.g.*, life history, dive patterns); (3) Co-occurrence of marine mammal species with the action; or (4) Biological or behavioral context of exposure (*e.g.*, age, calving or feeding areas).
- Individual responses to acute stressors, or impacts of chronic exposures (behavioral or physiological).
- How anticipated responses to stressors impact either: (1) Long-term fitness and survival of an individual; or (2) Population, species, or stock.
- Effects on marine mammal habitat and resultant impacts to marine mammals.
- Mitigation and monitoring effectiveness.

The Navy marine mammal monitoring plan can be found as Appendix C of the Navy's application, on the Internet at www.nmfs.noaa.gov/pr/permits/incidental/construction.htm.

Visual Marine Mammal Observations

The Navy will collect sighting data and behavioral responses to construction for marine mammal species observed in the region of activity during the period of activity. All observers will be trained in marine mammal identification and behaviors and are required to have no other construction-related tasks while conducting monitoring. The Navy will monitor the shutdown zone and disturbance zone before, during, and

after pile driving, with observers located at the best practicable vantage points. Based on our requirements, the Navy would implement the following procedures for pile driving:

- MMOs will be located at the best vantage point(s) in order to properly see the entire shutdown zone and as much of the disturbance zone as possible.

- During all observation periods, observers will use binoculars and the naked eye to search continuously for marine mammals.

- If the shutdown zones are obscured by fog or poor lighting conditions, pile driving at that location will not be initiated until that zone is visible. Should such conditions arise while impact driving is underway, the activity must be halted.

- The shutdown and disturbance zones around the pile will be monitored for the presence of marine mammals before, during, and after any pile driving or removal activity.

Two observers will be deployed as described under Mitigation, including one land-based observer and one-vessel-based observer traversing the extent of the Level B harassment zone. Individuals implementing the monitoring protocol will assess its effectiveness using an adaptive approach. Monitoring biologists will use their best professional judgment throughout implementation and seek improvements to these methods when deemed appropriate. Any modifications to protocol will be coordinated between NMFS and the Navy.

Data Collection

We require that observers use approved data forms. Among other pieces of information, the Navy will record detailed information about any implementation of shutdowns, including the distance of animals to the pile and description of specific actions that ensued and resulting behavior of the animal, if any. In addition, the Navy will attempt to distinguish between the number of individual animals taken and the number of incidents of take. We require that, at a minimum, the following information be collected on the sighting forms:

- Date and time that monitored activity begins or ends;
- Construction activities occurring during each observation period;
- Weather parameters (*e.g.*, percent cover, visibility);
- Water conditions (*e.g.*, sea state, tide state);
- Species, numbers, and, if possible, sex and age class of marine mammals;
- Description of any observable marine mammal behavior patterns,

including bearing and direction of travel and distance from pile driving activity;

- Distance from pile driving activities to marine mammals and distance from the marine mammals to the observation point;

- Description of implementation of mitigation measures (*e.g.*, shutdown or delay);

- Locations of all marine mammal observations; and

- Other human activity in the area.

Reporting

A draft report will be submitted to NMFS within 45 days of the completion of marine mammal monitoring, or sixty days prior to the issuance of any subsequent IHA for this project, whichever comes first. The report will include marine mammal observations pre-activity, during-activity, and post-activity during pile driving days, and will also provide descriptions of any behavioral responses to construction activities by marine mammals and a complete description of all mitigation shutdowns and the results of those actions and an extrapolated total take estimate based on the number of marine mammals observed during the course of construction. A final report must be submitted within thirty days following resolution of comments on the draft report.

Estimated Take by Incidental Harassment

Except with respect to certain activities not pertinent here, section 3(18) of the MMPA defines “harassment” as: “. . . any act of pursuit, torment, or annoyance which (i) has the potential to injure a marine mammal or marine mammal stock in the wild [Level A harassment]; or (ii) has the potential to disturb a marine mammal or marine mammal stock in the wild by causing disruption of behavioral patterns, including, but not limited to, migration, breathing, nursing, breeding, feeding, or sheltering [Level B harassment].”

All anticipated takes would be by Level B harassment resulting from vibratory and impact pile driving and involving temporary changes in behavior. The planned mitigation and monitoring measures are expected to minimize the possibility of injurious or lethal takes such that take by Level A harassment, serious injury, or mortality is considered extremely unlikely. However, it is unlikely that injurious or lethal takes would occur even in the absence of the planned mitigation and monitoring measures.

If a marine mammal responds to a stimulus by changing its behavior (*e.g.*,

through relatively minor changes in locomotion direction/speed or vocalization behavior), the response may or may not constitute taking at the individual level, and is unlikely to affect the stock or the species as a whole. However, if a sound source displaces marine mammals from an important feeding or breeding area for a prolonged period, impacts on animals or on the stock or species could potentially be significant (*e.g.*, Lusseau and Bejder, 2007; Weilgart, 2007). Given the many uncertainties in predicting the quantity and types of impacts of sound on marine mammals, it is common practice to estimate how many animals are likely to be present within a particular distance of a given activity, or exposed to a particular level of sound. In practice, depending on the amount of information available to characterize daily and seasonal movement and distribution of affected marine mammals, it can be difficult to distinguish between the number of individuals harassed and the instances of harassment and, when duration of the activity is considered, it can result in a take estimate that overestimates the number of individuals harassed. In particular, for stationary activities, it is more likely that some smaller number of individuals may accrue a number of incidences of harassment per individual than for each incidence to accrue to a new individual, especially if those individuals display some degree of residency or site fidelity and the impetus to use the site (*e.g.*, because of foraging opportunities) is stronger than the deterrence presented by the harassing activity.

The project area is not believed to be particularly important habitat for marine mammals, nor is it considered an area frequented by marine mammals, although harbor seals may be present year-round and sea lions are known to haul-out on man-made objects at the NBKB waterfront. Sightings of other species are rare. Therefore, behavioral disturbances that could result from anthropogenic sound associated with these activities are expected to affect only a relatively small number of individual marine mammals, although those effects could be recurring over the life of the project if the same individuals remain in the project vicinity.

The Navy requested authorization for the incidental taking of small numbers of Steller sea lions, California sea lions, and harbor seals in Sinclair Inlet and nearby waters that may result from pile driving during construction activities associated with the pier maintenance project described previously in this document. In order to estimate the

potential incidents of take that may occur incidental to the specified activity, we first estimated the extent of the sound field that may be produced by the activity and then considered that in combination with information about marine mammal density or abundance in the project area. We provided detailed information on applicable sound thresholds for determining effects to marine mammals as well as describing the information used in

estimating the sound fields, the available marine mammal density or abundance information, and the method of estimating potential incidents of take, in our **Federal Register** notice of proposed authorization (July 24, 2015; 80 FR 44033). The only change to that information is the addition of five days of in-water pile driving to account for the additional work to be conducted at the adjacent Pier 5, increasing the total in-water work days from thirty to 35.

Our take estimates were calculated in the same manner and on the basis of the same information as what was described in the **Federal Register** notice. Modeled distances to relevant thresholds are shown in Table 2 and total estimated incidents of take are shown in Table 3. Please see our **Federal Register** notice of proposed authorization (July 24, 2015; 80 FR 44033) for full details of the process and information used in estimating potential incidents of take.

TABLE 2—DISTANCES TO RELEVANT SOUND THRESHOLDS AND AREAS OF ENSONIFICATION, UNDERWATER

Description	Distance to threshold (m) and associated area of ensonification (km ²) ¹			
	190 dB	180 dB	160 dB	120 dB
Steel piles, vibratory	0	0	n/a	2,154 ² , 7.5
Timber piles, vibratory	0	0	n/a	1,585; 5.0

¹ SPLs used for calculations were: 170 dB for vibratory removal of steel piles, and 168 dB for vibratory removal of timber piles.
² Areas presented take into account attenuation and/or shadowing by land. Please see Appendix B in the Navy's applications.

Sinclair Inlet does not represent open water, or free field, conditions. Therefore, sounds would attenuate according to the shoreline topography. Distances shown in Table 2 are estimated for free-field conditions, but areas are calculated per the actual

conditions of the action area. See Appendix B of the Navy's application for a depiction of areas in which each underwater sound threshold is predicted to occur at the project area due to pile driving. The additional five days of pile driving work result in an increase in the

estimated take numbers from what was considered in our notice of proposed authorization. The total numbers of authorized takes shown in Table 3 represent an increase of approximately seventeen percent for each species.

TABLE 3—CALCULATIONS FOR INCIDENTAL TAKE ESTIMATION

Species	n (animals/km ²) ¹	n * ZOI (vibratory steel pile removal) ²	Abundance ³	Total authorized takes (% of total stock)
California sea lion	0.1266	1	48	1,680 (0.6)
Steller sea lion	0.0368	0	1	35 (0.06)
Harbor seal	1.219 ⁴	9	11	385 (3.5)
Killer whale (transient)	0.0024 (fall)	0	n/a	0
Gray whale	0.0005 (winter)	0	n/a	0

¹ Best available species- and season-specific density estimate, with season noted in parentheses where applicable (Hanser *et al.*, 2015).
² Product of density and largest ZOI (7.5 km²) rounded to nearest whole number; presented for reference only.
³ Best abundance numbers multiplied by expected days of activity (35) to produce take estimate.
⁴ Uncorrected density; presented for reference only.

Analyses and Determinations

Negligible Impact Analysis

NMFS has defined “negligible impact” in 50 CFR 216.103 as “. . . an impact resulting from the specified activity that cannot be reasonably expected to, and is not reasonably likely to, adversely affect the species or stock through effects on annual rates of recruitment or survival.” A negligible impact finding is based on the lack of likely adverse effects on annual rates of recruitment or survival (*i.e.*, population-level effects). An estimate of the number of Level B harassment takes alone is not enough information on which to base an impact determination. In addition to

considering estimates of the number of marine mammals that might be “taken” through behavioral harassment, we consider other factors, such as the likely nature of any responses (*e.g.*, intensity, duration), the context of any responses (*e.g.*, critical reproductive time or location, migration), as well as the number and nature of estimated Level A harassment takes, the number of estimated mortalities, and effects on habitat.

Pile driving activities associated with the pier maintenance project, as outlined previously, have the potential to disturb or displace marine mammals. Specifically, the specified activities may result in take, in the form of Level B

harassment (behavioral disturbance) only, from underwater sounds generated from pile driving. Potential takes could occur if individuals of these species are present in the ensonified zone when pile driving is happening.

No injury, serious injury, or mortality is anticipated given the nature of the activity and measures designed to minimize the possibility of injury to marine mammals. The potential for these outcomes is minimized through the construction method and the implementation of the planned mitigation measures. Specifically, piles will be installed and removed via vibratory means, an activity that does not have the potential to cause injury to

marine mammals due to the relatively low source levels produced (less than 180 dB) and the lack of potentially injurious source characteristics.

Environmental conditions in Sinclair Inlet are expected to generally be good, with calm sea states, although Sinclair Inlet waters may be more turbid than waters further north in Puget Sound or in Hood Canal. Nevertheless, we expect conditions in Sinclair Inlet will allow a high marine mammal detection capability for the trained observers required, enabling a high rate of success in implementation of shutdowns. In addition, the topography of Sinclair Inlet should allow for placement of observers sufficient to detect cetaceans, should any occur (see Figure 1 of Appendix C in the Navy's application).

Effects on individuals that are taken by Level B harassment, on the basis of reports in the literature as well as monitoring from other similar activities, will likely be limited to reactions such as increased swimming speeds, increased surfacing time, or decreased foraging (if such activity were occurring) (e.g., Thorson and Reyff, 2006; HDR, 2012). Most likely, individuals will simply move away from the sound source and be temporarily displaced from the areas of pile driving, although even this reaction has been observed primarily only in association with impact pile driving. The pile driving activities analyzed here are similar to, or less impactful than, numerous other construction activities conducted in San Francisco Bay and in the Puget Sound region, which have taken place with no reported injuries or mortality to marine mammals, and no known long-term adverse consequences from behavioral harassment. Repeated exposures of individuals to levels of sound that may cause Level B harassment are unlikely to result in hearing impairment or to significantly disrupt foraging behavior. Thus, even repeated Level B harassment of some small subset of the overall stock is unlikely to result in any significant realized decrease in viability for the affected individuals, and thus would not result in any adverse impact to the stock as a whole. Level B harassment will be reduced to the level of least practicable impact through use of mitigation measures described herein and, if sound produced by project activities is sufficiently disturbing, animals are likely to simply avoid the area while the activity is occurring.

We preliminarily determined in our notice of proposed authorization that the effects of the specified activity would represent a negligible impact on the affected marine mammal stocks. Here, we have added an additional five

days of in-water pile driving (of the same size and type of piles, by the same methods, and adhering to the same mitigation and monitoring requirements) and determine that the likely total impacts to the affected marine mammal stocks, considering the additional activity, remains within the scope of analysis provided in our notice of proposed authorization.

In summary, this negligible impact analysis is founded on the following factors: (1) The possibility of injury, serious injury, or mortality may reasonably be considered discountable; (2) the anticipated incidents of Level B harassment consist of, at worst, temporary modifications in behavior; (3) the absence of any significant habitat within the project area, including rookeries, significant haul-outs, or known areas or features of special significance for foraging or reproduction; (4) the presumed efficacy of the planned mitigation measures in reducing the effects of the specified activity to the level of least practicable impact. In addition, these stocks are not listed under the ESA or considered depleted under the MMPA. In combination, we believe that these factors, as well as the available body of evidence from other similar activities, demonstrate that the potential effects of the specified activity will have only short-term effects on individuals. The specified activity is not expected to impact rates of recruitment or survival and will therefore not result in population-level impacts. Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the planned monitoring and mitigation measures, we find that the total marine mammal take from Navy's pier maintenance activities will have a negligible impact on the affected marine mammal species or stocks.

Small Numbers Analysis

The number of incidents of take authorized for these stocks would be considered small relative to the relevant stocks or populations (less than one percent for both sea lion stocks and three percent for harbor seals; Table 3) even if each estimated taking occurred to a new individual. This is an extremely unlikely scenario as, for pinnipeds in estuarine/inland waters, there is likely to be some overlap in individuals present day-to-day.

We preliminarily determined in our notice of proposed authorization that the total taking proposed for authorization would be small relative to

the populations of the affected species or stocks. The additional takes authorized due to the addition of five in-water pile driving days result in slight increases for each species (0.5 percent to 0.6 percent for California sea lions; 0.05 percent to 0.06 percent for Steller sea lions; 3.0 percent to 3.5 percent for harbor seals). These increases do not affect the preliminary small numbers determination.

Based on the analysis contained herein of the likely effects of the specified activity on marine mammals and their habitat, and taking into consideration the implementation of the mitigation and monitoring measures, we find that small numbers of marine mammals will be taken relative to the populations of the affected species or stocks.

Impact on Availability of Affected Species for Taking for Subsistence Uses

There are no relevant subsistence uses of marine mammals implicated by this action. Therefore, we have determined that the total taking of affected species or stocks would not have an unmitigable adverse impact on the availability of such species or stocks for taking for subsistence purposes.

Endangered Species Act (ESA)

No marine mammal species listed under the ESA are expected to be affected by these activities. Therefore, we have determined that a section 7 consultation under the ESA is not required.

National Environmental Policy Act (NEPA)

In compliance with the NEPA of 1969 (42 U.S.C. 4321 *et seq.*), as implemented by the regulations published by the Council on Environmental Quality (CEQ; 40 CFR parts 1500–1508), the Navy prepared an Environmental Assessment (EA) to consider the direct, indirect and cumulative effects to the human environment resulting from the pier maintenance project. We made the Navy's EA available to the public for review and comment, in relation to its suitability for adoption in order to assess the impacts to the human environment of issuance of an IHA to the Navy. In compliance with NEPA, the CEQ regulations, and NOAA Administrative Order 216–6, we subsequently adopted that EA and signed a Finding of No Significant Impact (FONSI) on November 5, 2015. The 2015 NEPA documents are available for review at www.nmfs.noaa.gov/pr/permits/incidental/construction.htm.

We considered the addition of five days of in-water pile driving work at the same location and time, involving the same size and type of piles and conducted by the same means (*i.e.*, vibratory hammer), and determined that the addition of this activity remains within the scope of analysis provided by the Navy's EA and considered in our adoption memorandum and FONSI. Therefore, we do not need to conduct additional analysis under NEPA.

Authorization

As a result of these determinations, we have issued an IHA to the Navy for conducting the described pier maintenance activities in Sinclair Inlet, from December 1, 2015, through November 30, 2016, provided the previously described mitigation, monitoring, and reporting requirements are incorporated.

Dated: November 20, 2015.

Perry F. Gayaldo,

Deputy Director, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

RIN 0648-XE315

Endangered Species; File Nos. 19331 and 19642

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; receipt of applications.

SUMMARY: Notice is hereby given that Harold Brundage [Responsible Party], Environmental Research and Consulting, Inc.; 126 Bancroft Rd; Kennett Square, PA 19348, has applied in due form for a permit [File No. 19331] to take shortnose sturgeon (*Acipenser brevirostrum*) and Atlantic sturgeon (*Acipenser oxyrinchus oxyrinchus*) for purposes of conducting scientific research; and that Jason Kahn [Responsible Party], NOAA Fisheries, 1315 East-West Highway, Silver Spring, MD 20910, has applied in due form for a permit to take shortnose sturgeon and Atlantic sturgeon for purposes of scientific research.

DATES: Written, telefaxed, or email comments must be received on or before December 28, 2015.

ADDRESSES: The applications and related documents are available for

review by selecting "Records Open for Public Comment" from the "Features" box on the Applications and Permits for Protected Species (APPS) home page, <https://apps.nmfs.noaa.gov>, and then selecting either File No. 19331 or File No. 19642 from the list of available applications.

These documents are also available upon written request or by appointment in the Permits and Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Room 13705, Silver Spring, MD 20910; phone (301) 427-8401; fax (301) 713-0376.

Written comments on these applications should be submitted to the Chief, Permits and Conservation Division, at the address listed above. Comments may also be submitted by facsimile to (301) 713-0376, or by email to NMFS.Pr1Comments@noaa.gov. Please include the File No. in the subject line of the email comment.

Those individuals requesting a public hearing should submit a written request to the Chief, Permits and Conservation Division at the address listed above. The request should set forth the specific reasons why a hearing on either of these applications would be appropriate.

FOR FURTHER INFORMATION CONTACT:

Malcolm Mohead or Rosa L. González, (301) 427-8401.

SUPPLEMENTARY INFORMATION: The subject permits are requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

File No. 19331: The applicant proposes to combine and continue similar shortnose and Atlantic sturgeon research currently authorized in the Delaware River and Estuary by Permit No 14604 (expiring on April 19, 2016) and Permit No. 16438 (expiring on April 5, 2017), respectively. At issuance of Permit No. 19331, both of the former permits would be terminated. The applicant's new objectives would be to characterize Atlantic and shortnose sturgeon habitat use in the lower Delaware River (between rkm 0 to rkm 245), studying the relative abundance, recruitment, temporal-spatial distributions, and reproduction, as well as assessing the potential for entrainment and impingement of various life stages of Atlantic and shortnose sturgeon at the intakes of selected industrial sites on the Delaware River. The permit would be valid for five years from the date of issuance.

File No. 19642: The applicant has proposed two studies to study Atlantic

and shortnose sturgeon in the Chesapeake Bay and other river systems of the Atlantic coast. The primary objective of Study No. 1 would be discovering and quantifying new populations of Atlantic and shortnose sturgeon in the York, Rappahannock, Potomac, and Susquehanna Rivers, and other Chesapeake Bay tributaries of Virginia and Maryland. Researchers would also attempt to monitor spawning activity, movement, and habitat use of individuals of these populations through telemetry and side-scan sonar technology. In Study No. 2, researchers would opportunistically sample Atlantic and shortnose sturgeon legally captured under ESA incidental take permits or incidental take statements authorized by NMFS in other actions. Goals would be to track coastal movements of both species in mixed marine stocks. The permit would be valid for five years from the date of issuance.

Dated: November 23, 2015.

Julia Harrison,

Chief, Permits and Conservation Division, Office of Protected Resources, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Technical Information Service

National Technical Information Service Advisory Board Meeting

AGENCY: National Technical Information Service, Department of Commerce.

ACTION: Notice of open meeting.

SUMMARY: This notice announces the next meeting of the National Technical Information Service Advisory Board (the Advisory Board), which advises the Secretary of Commerce and the Director of the National Technical Information Service (NTIS) on policies and operations of the Service.

DATES: The Advisory Board will meet on Monday, December 7, 2015 from 10:00 a.m. to approximately 2:30 p.m.

ADDRESSES: The Advisory Board will be held in Room 116 of the NTIS Facility at 5301 Shawnee Road, Alexandria, Virginia 22312. Please note admittance instructions under the **SUPPLEMENTARY INFORMATION** section of this notice.

FOR FURTHER INFORMATION CONTACT: Mr. Bruce Borzino, (703) 605-6405, bborzino@ntis.gov.

SUPPLEMENTARY INFORMATION: The NTIS Advisory Board is established by section 3704b(c) of title 15 of the United States

Code. The charter has been filed in accordance with the requirements of the Federal Advisory Committee Act, as amended (5 U.S.C. App.).

The meeting will focus on a review of NTIS data mission and strategic direction. A final agenda and summary of the proceedings will be posted at NTIS Web site as soon as they are available (<http://www.ntis.gov/about/advisorybd.aspx>).

The NTIS Facility is a secure one. Accordingly persons wishing to attend should call the NTIS Visitors Center, (703) 605-6040, to arrange for admission no later than Thursday, December 3, 2015. If there are sufficient expressions of interest, up to one-half hour will be reserved for public comments during the session. Questions from the public will not be considered by the Board but any person who wishes to submit a written question for the Board's consideration should mail or email it to the NTIS Visitor Center, bookstore@ntis.gov, Subject: NTIS Advisory Board, not later than Thursday, December 3, 2015.

Dated: November 23, 2015.

Bruce Borzino,
Director.

BILLING CODE 3510-04-P

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

Digital Economy Board of Advisors, Establishment and Call for Nominations

AGENCY: National Telecommunications and Information Administration, U.S. Department of Commerce.

ACTION: Notice of establishment and call for nominations to serve on the Digital Economy Board of Advisors.

SUMMARY: The Assistant Secretary for Communications and Information announces the establishment of the Digital Economy Board of Advisors on behalf of the Secretary of Commerce. The Board will advise and provide recommendations to the Secretary, through the Assistant Secretary, on a broad range of issues concerning the digital economy and Internet policy. This Notice also requests nominations of individuals for membership on the Board.

DATES: Nominations should be submitted electronically using the online nomination form on or before December 23, 2015, at midnight Eastern Standard Time.

ADDRESSES: Applicants should submit nominations electronically, with the information specified below, using the online nomination form located at www.ntia.doc.gov/digital-economy.

FOR FURTHER INFORMATION CONTACT:

Evelyn Remaley, Designated Federal Officer (DFO), at (202) 482-3821 or DEBA@ntia.doc.gov.

SUPPLEMENTARY INFORMATION: Pursuant the Federal Advisory Committee Act, as amended (5 U.S.C. App.) and the National Telecommunications & Information Administration's authorizing statute, 47 U.S.C. 904(b), the Assistant Secretary for Communications and Information (Assistant Secretary) announces the establishment of the Digital Economy Board of Advisors (the Board) on behalf of the Secretary of Commerce. The Board is established under the direction of the Secretary and with the concurrence of the General Services Administration.

I. Background

Economic prosperity is increasingly tied to the digital economy, which is a key driver of jobs, business creation, and innovation. Indeed, virtually every modern company relies on the Internet to grow and thrive. As a result, the Department of Commerce (Department) has made technology and Internet policy a top priority, investing resources to address the challenges and opportunities businesses face in a global economy.

On November 9, 2015, the Secretary of Commerce unveiled the Department's new Digital Economy Agenda, which will help businesses and consumers realize the potential of the digital economy to advance growth and opportunity. The Agenda focuses on four key objectives: promoting a free and open Internet worldwide; promoting trust online; ensuring access for workers, families, and companies; and promoting innovation. To support the Agenda, the Secretary has directed the creation of a Digital Economy Board of Advisors to enable the Department to have a mechanism for receiving regular advice from leaders in industry, academia, and civil society. The Secretary determined that the establishment of the Board is necessary and serves the public interest.

II. Description of Duties

The Board's primary duty will be to provide independent advice and recommendations to the Secretary, through the Assistant Secretary, on a broad range of policy issues impacting the digital economy. The Board will serve as a centralized forum for

gathering consensus input from a wide range of stakeholders and experts. The Board's mission is to provide advice in furtherance of increasing domestic prosperity, improving education, and facilitating participation in political and cultural life through the application and expansion of digital technologies.

The Board's advice will focus on ensuring that the Internet continues to thrive as an engine of growth, innovation, and free expression. In carrying out its duties, the Board's activities may include, but are not limited to:

- Gathering information and providing an analysis of challenges related to the global free flow of information on the Internet, including policies that could restrict cross-border information flows;
- Providing advice on other policy matters that impact the digital economy, such as expanding broadband capacity, enhancing cybersecurity, protecting privacy, and examining the role of intermediaries;
- Promoting the development of new digital technologies, and
- Analyzing the impact of the Internet on job growth and the economy as a whole.

The Department will use the advice provided by the Board to inform its decision-making process and advance Administration goals.

III. Board Structure and Composition

The Board will be comprised of no fewer than five (5) and no more than 30 members, including the Chair(s). The Secretary will appoint members of the Board for two-year terms. Members will serve at the Secretary's pleasure and discretion and may be reappointed for additional terms. The Assistant Secretary, with input from the Secretary, will appoint one or more members to serve as Chair or Co-Chairs. The Chair(s) will serve at the pleasure and discretion of the Assistant Secretary. The Board will meet approximately quarterly, or as determined by the DFO.

The Board will consist of leaders in industry and civil society who are prominent experts in their fields and recognized for their professional achievements. The Secretary will appoint objective members and ensure balanced representation. Membership is voluntary and, thus, members will not receive compensation for their time or reimbursement for travel or per diem expenses.

Members of the Board will be appointed as Special Government Employees (SGEs). See <http://www.oge.gov/Topics/Selected->

Employee-Categories/Special-Government-Employees. As SGEs, members must comply with certain federal conflict of interest statutes and ethics regulations, including some financial disclosure requirements. To permit evaluation of possible sources of conflicts of interest, selected candidates will be asked to provide detailed information concerning financial interests, consultancies, research grants, and/or contracts that might be affected by recommendations of the Board.

Appointments will be made without regard to political affiliation. Each nominee will need to certify that he or she is not currently a registered federal lobbyist pursuant to the Lobbying Disclosure Act of 1995 (codified at 2 U.S.C. 1601 *et seq.*). See *Revised Guidance on Appointment of Lobbyists to Federal Advisory Committees, Boards, and Commissions*, Office of Management and Budget, 79 FR 47482 (Aug. 13, 2014). Each nominee will also be required to certify that he or she is not currently an agent of a foreign principal required to register pursuant to the Foreign Agents Registration Act of 1938, as amended (codified at 22 U.S.C. 611 *et seq.*).

If a term expires or a vacancy occurs during the life of the Board, the Assistant Secretary may recommend any of the following:

- Reappointment of an incumbent;
- Solicitation for new applications published in the **Federal Register** in accordance with regular procedures; or
- Selection of a replacement from a list of candidates whose applications were received within the previous year.

IV. Nominations

Individuals may nominate themselves or other individuals. Professional associations and other organizations may nominate one or more qualified persons for membership on the Board. Nominations shall state that the nominee has been consulted and is willing to serve as a Special Government Employee. All nominations must provide the following information:

- A letter of nomination stating the full name, affiliation, and contact information for the nominee, the basis for the nomination, and the nominee's field(s) of expertise;
- a biographical sketch of the nominee and/or a copy of his or her curriculum vitae; and
- if applicable, the name, return address, email address, and daytime phone number at which the nominator can be contacted.

Nominations should be submitted electronically using the online

nomination form located at www.ntia.doc.gov/digital-economy.

The Assistant Secretary will review the nominations and make recommendations to the Secretary for appointments. Among other factors, the Secretary and Assistant Secretary will consider nominees' experience and knowledge of digital economy issues in addition to:

- Educational background (*e.g.*, advance degree in engineering, economics, law, business, or public policy);
- Professional experience and accomplishments (*e.g.*, nature of work, job function, projects, or publications); and
- Current employment and membership in associations (*e.g.*, technology developers, manufacturers, academia, civil society, service providers with customers in domestic and international markets).

All appointments will be made without discrimination on the basis of age, ethnicity, gender, sexual orientation, disability, or cultural, religious, or socioeconomic status.

Dated: November 23, 2015.

Lawrence E. Strickling,

Assistant Secretary for Communications and Information.

[FR Doc. 2015-30226 Filed 11-25-15; 8:45 am]

BILLING CODE 3510-60-P

COMMITTEE FOR PURCHASE FROM PEOPLE WHO ARE BLIND OR SEVERELY DISABLED

Procurement List, Additions

AGENCY: Committee for Purchase From People Who Are Blind or Severely Disabled.

ACTION: Additions to the Procurement List.

SUMMARY: This action adds services to the Procurement List that will be provided by nonprofit agencies employing persons who are blind or have other severe disabilities.

DATES: Effective Date: 12/27/2015.

ADDRESSES: Committee for Purchase From People Who Are Blind or Severely Disabled, 1401 S. Clark Street, Suite 715, Arlington, Virginia 22202-4149.

FOR FURTHER INFORMATION CONTACT: Barry S. Lineback, Telephone: (703) 603-7740, Fax: (703) 603-0655, or email CMTEFedReg@AbilityOne.gov.

SUPPLEMENTARY INFORMATION:

Additions

On 8/4/2015 (80 FR 46250); 8/21/2015 (80 FR 50825-50826) and 9/25/2015 (80

FR 57792), the Committee for Purchase From People Who Are Blind or Severely Disabled published notices of proposed additions to the Procurement List.

After consideration of the material presented to it concerning capability of qualified nonprofit agencies to provide the services and impact of the additions on the current or most recent contractors, the Committee has determined that the services listed below are suitable for procurement by the Federal Government under 41 U.S.C. 8501-8506 and 41 CFR 51-2.4.

Regulatory Flexibility Act Certification

I certify that the following action will not have a significant impact on a substantial number of small entities. The major factors considered for this certification were:

1. The action will not result in any additional reporting, recordkeeping or other compliance requirements for small entities other than the small organizations that will provide the services to the Government.
2. The action will result in authorizing small entities to provide the services to the Government.
3. There are no known regulatory alternatives which would accomplish the objectives of the Javits-Wagner-O'Day Act (41 U.S.C. 8501-8506) in connection with the services proposed for addition to the Procurement List.

End of Certification

Accordingly, the following services are added to the Procurement List:

Services

Service Type: Contractor Operated Parts Store (COPARS) Service

Service Is Mandatory For: US Marine Corps Garrison Mobile Equipment Branch, Marine Corps Logistics Base, Building 5400, Albany, GA

Mandatory Source(s) of Supply: Training, Rehabilitation, & Development Institute, Inc., San Antonio, TX

Contracting Activity: Dept of the Navy, Commanding General, Camp Lejeune, NC

The Commission was copied on a letter to the contracting officer from an incumbent contractor's law firm. While not received in response to the initial **Federal Register** notice, the Commission will, nevertheless, address the comments noted in the letter.

On behalf of the incumbent contractor, the law firm noted that the contractor has held the contract for three years and has retained experienced employees who have established a positive working relationship in providing the required services. The firm submitted that the contractor was the most capable and efficient provider of the required

services and could continue to perform with the best stewardship of the taxpayers' money. The firm questioned whether the proposed nonprofit agency could perform the required services within the restraints of the AbilityOne Program's requirement to employ people with severe disabilities and noted that some of its employees were contacted by the nonprofit agency and offered employment. Finally, while noting that the contract was not a major portion of the contractor's business portfolio, the loss of the contract would have a significant financial impact since it would result in the loss of a major profit margin contract without providing specific information to substantiate the impact or how the impact would be measured.

The U.S. AbilityOne Commission (statutorily identified as the Committee for Purchase from People Who Are Blind or Severely Disabled) (Commission) administers the AbilityOne® program under the authority of the Javits-Wagner-O'Day Act. Commission responsibilities include identifying products and services produced or provided by qualified nonprofit agencies employing people who are blind or severely disabled that the Commission determines are suitable for procurement by the Government. Prior to adding any project to the Procurement List (PL), the Commission reviews each project for suitability including, employment potential, nonprofit agency qualifications, capability, and level of impact on the current contractor. If the Commission is satisfied that each of these four criteria are met, then the service can be added to the PL and it becomes a mandatory requirement for the government agency to obtain the service from the designated nonprofit agency if available within the required time frame.

The Commission does not dispute that the contractor is effectively performing the required services; however, that does not mean that it is the only contractor that can effectively perform the services or that the AbilityOne Commission cannot add the work to the Procurement List for performance by a nonprofit agency in the AbilityOne Program. The Commission has reviewed and determined that the project will result in employment for people with severe disabilities and the designated nonprofit agency is qualified under the Commission's 75% ratio requirement and otherwise and capable of performing the services. Additionally, the Commission reviews financial information provided by current

contractors to determine whether severe adverse impact will occur if a project is added to the PL. The Commission did so in this instance and disagrees with the contractor's assertion that the addition of this project to the PL will result in severe adverse impact to the contractor company. The Commission has reviewed the specific requirements of this project and determined that this project is suitable for performance by a nonprofit agency employing people who are blind or severely disabled. Placing this project on the PL will result in employment and training opportunities for people with severe disabilities.

Accordingly, following a deliberative review of the facts of this project, the Commission determines that this project is appropriate for the AbilityOne Program and will be added to the Procurement List.

Service Type: Removal/Clean-up Bird Dropping Service

Service Is Mandatory For: Defense Logistics Agency, Defense Supply Center, 8000 Jefferson Davis Highway, Richmond, VA

Mandatory Source(s) of Supply: Richmond Area Association for Retarded Citizens, Richmond, VA

Contracting Activity: Defense Logistics Agency Contracting Services Office, Richmond, VA

Service Type: Custodial and Related Service

Service Is Mandatory For: GSA PBS Region 4, Benjamin P. Grogan and Jerry L. Dove Federal Building, 2030 SW. 145th Avenue, Miramar, FL

Mandatory Source(s) of Supply: CW Resources, Inc., New Britain, CT

Contracting Activity: Public Buildings Service, Acquisition Division/Services Branch, Atlanta, GA

Barry S. Lineback,

Director, Business Operations.

BILLING CODE 6353-01-P

CONSUMER PRODUCT SAFETY COMMISSION

[CPSC Docket No. 16-C0001]

Philips Lighting North America Corporation, Provisional Acceptance of a Settlement Agreement and Order

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: It is the policy of the Commission to publish settlements which it provisionally accepts under the Consumer Product Safety Act in the **Federal Register** in accordance with the terms of 16 CFR 1118.20(e). Published below is a provisionally-accepted Settlement Agreement with Philips

Lighting North America Corporation containing a civil penalty in the amount of two million dollars (\$2,000,000), within thirty (30) days of service of the Commission's final Order accepting the Settlement Agreement.¹

DATES: Any interested person may ask the Commission not to accept this agreement or otherwise comment on its contents by filing a written request with the Office of the Secretary by December 14, 2015.

ADDRESSES: Persons wishing to comment on this Settlement Agreement should send written comments to the Comment 16-C0001, Office of the Secretary, Consumer Product Safety Commission, 4330 East West Highway, Room 820, Bethesda, Maryland 20814-4408.

FOR FURTHER INFORMATION CONTACT:

Amy S. Colvin, Attorney, Office of the General Counsel, Division of Enforcement and Information, Consumer Product Safety Commission, 4330 East West Highway, Bethesda, Maryland 20814-4408; telephone (301) 504-7639.

SUPPLEMENTARY INFORMATION: The text of the Agreement and Order appears below.

Dated: November 23, 2015.

Todd A. Stevenson,
Secretary.

United States of America Consumer Product Safety Commission

In the Matter of: Philips Lighting North America Corporation

CPSC Docket No.: 16-C0001

Settlement Agreement

1. In accordance with the Consumer Product Safety Act, 15 U.S.C. 2051 – 2089 (“CPSA”) and 16 CFR 1118.20, Philips Lighting North America Corporation (“Philips”), and the United States Consumer Product Safety Commission (“Commission”), through its staff, hereby enter into this Settlement Agreement (“Agreement”). The Agreement, and the incorporated attached Order, resolve staff's charges set forth below.

The Parties

2. The Commission is an independent federal regulatory agency, established pursuant to, and responsible for the

¹ The Commission voted (4-1) to provisionally accept the Settlement Agreement and Order regarding Philips Lighting North America Corporation. Chairman Kaye, Commissioner Adler, Commissioner Robinson and Commissioner Mohorovic voted to provisionally accept the Settlement Agreement and Order. Commissioner Buerkle voted to reject the Settlement Agreement and Order.

enforcement of, the CPSA, 15 U.S.C. 2051–2089. By executing the Agreement, staff is acting on behalf of the Commission, pursuant to 16 CFR 1118.20(b). The Commission issues the Order under the provisions of the CPSA.

3. Philips is a corporation, organized and existing under the laws of the state of Delaware, with its principal corporate offices located in Somerset, New Jersey.

Staff Charges

4. Between March 2007 and July 2011, grocery and home center stores nationwide, online retailers, and professional electrical distributors sold in the United States approximately 1.86 million EnergySaver (a/k/a “Marathon” or “Marathon Classic”) compact fluorescent lamps enclosed inside glass envelopes (“Lamps”). Philips manufactured the Lamps.

5. The Lamps are a “consumer product” that was “distributed in commerce” as those terms are defined or used in sections 3(a)(5) and (8) of the CPSA, 15 U.S.C. 2052(a)(5) and (8). Philips is a “manufacturer” of the Lamps, as such term is defined in section 3(a)(11) of the CPSA, 15 U.S.C. 2052(a)(11).

6. The Lamps are defective and create an unreasonable risk of serious injury or death because the glue that attaches the glass outer envelope to the body of the Lamp can fail, allowing the glass envelope to fall and strike persons and objects below. This poses a laceration hazard to consumers.

7. Philips received numerous reports that glass envelopes separated or were loose, including 10 reports of lacerations and seven reports of property damage.

8. In response to these incident reports, Philips implemented multiple design changes to remedy the defect and unreasonable risk of serious injury or death associated with the Lamps.

9. Despite having information of a defect and the unreasonable risk of serious injury or death associated with the Lamps, Philips did not notify the Commission immediately of such defect or risk, as required by sections 15(b)(3) and (4) of the CPSA, 15 U.S.C. 2064(b)(3) and (4).

10. Because the information in Philips’s possession constituted actual and presumed knowledge, Philips knowingly violated section 19(a)(4) of the CPSA, 15 U.S.C. 2068(a)(4), as the term “knowingly” is defined in section 20(d) of the CPSA, 15 U.S.C. 2069(d).

11. Pursuant to section 20 of the CPSA, 15 U.S.C. 2069, Philips is subject to civil penalties for its knowing violation of section 19(a)(4) of the CPSA, 15 U.S.C. 2068(a)(4).

Response of Philips

12. Philips’s settlement of this matter does not constitute an admission that Philips knew that the Lamps were defective and created an unreasonable risk of serious injury or death pursuant to section 15(a) of the CPSA, 15 U.S.C. 2064(a), or that Philips knowingly violated the reporting requirements of section 15(b) of the CPSA, 15 U.S.C. 2064(b). In particular, Philips notes that the ten reported injuries were minor, requiring no medical attention.

Agreement of the Parties

13. Under the CPSA, the Commission has jurisdiction over the matter involving the Lamps and over Philips.

14. The parties enter into the Agreement for settlement purposes only. The Agreement does not constitute an admission by Philips or a determination by the Commission that Philips violated the CPSA’s reporting requirements.

15. In settlement of staff’s charges as set forth in paragraphs 4 through 11 above, and to avoid the cost, distraction, delay, uncertainty, and inconvenience of protracted litigation or other proceedings, Philips shall pay a civil penalty in the amount of two million dollars (\$2,000,000) within thirty (30) calendar days after receiving service of the Commission’s final Order accepting the Agreement. All payments to be made under the Agreement shall constitute debts owing to the United States and shall be made by electronic wire transfer to the United States via: <http://www.pay.gov> for allocation to and credit against the payment obligations of Philips under this Agreement. Failure to make such payment by the date specified in the Commission’s final Order shall constitute Default.

16. All unpaid amounts, if any, due and owing under the Agreement shall constitute a debt due and immediately owing by Philips to the United States, and interest shall accrue and be paid by Philips at the federal legal rate of interest set forth at 28 U.S.C. 1961(a) and (b) from the date of Default until all amounts due have been paid in full (hereinafter “Default Payment Amount” and “Default Interest Balance”). Philips shall consent to a Consent Judgment in the amount of the Default Payment Amount and Default Interest Balance; and the United States, at its sole option, may collect the entire Default Payment Amount and Default Interest Balance, or exercise any other rights granted by law or in equity, including, but not limited to, referring such matters for private collection, and Philips agrees not to contest, and hereby waives and discharges any defenses to, any

collection action undertaken by the United States or its agents or contractors pursuant to this paragraph. Philips shall pay the United States all reasonable costs of collection and enforcement under this paragraph, respectively, including reasonable attorney’s fees and expenses.

17. After staff receives this Agreement executed on behalf of Philips, staff shall promptly submit the Agreement to the Commission for provisional acceptance. Promptly following provisional acceptance of the Agreement by the Commission, the Agreement shall be placed on the public record and published in the **Federal Register**, in accordance with the procedures set forth in 16 CFR 1118.20(e). If the Commission does not receive any written request not to accept the Agreement within fifteen (15) calendar days, the Agreement shall be deemed finally accepted on the 16th calendar day after the date the Agreement is published in the **Federal Register**, in accordance with 16 CFR 1118.20(f).

18. This Agreement is conditioned upon, and subject to, the Commission’s final acceptance, as set forth above, and it is subject to the provisions of 16 CFR 1118.20(h). Upon the later of: (i) Commission’s final acceptance of this Agreement and service of the accepted Agreement upon Philips, and (ii) the date of issuance of the final Order, this Agreement shall be in full force and effect and shall be binding upon the parties.

19. Effective upon the later of: (i) the Commission’s final acceptance of the Agreement and service of the accepted Agreement upon Philips, and (ii) the date of issuance of the final Order, for good and valuable consideration, Philips hereby expressly and irrevocably waives and agrees not to assert any past, present, or future rights to the following, in connection with the matter described in this Agreement: (i) an administrative or judicial hearing; (ii) judicial review or other challenge or contest of the Commission’s actions; (iii) a determination by the Commission of whether Philips failed to comply with the CPSA and the underlying regulations; (iv) a statement of findings of fact and conclusions of law; and (v) any claims under the Equal Access to Justice Act.

20. Philips shall implement, maintain, and enforce a system of internal controls and procedures designed to ensure that, with respect to all consumer products, as that term is defined or used in section 3(a)(5) of the CPSA, 15 U.S.C. 2052(a)(5) (“consumer products”), imported, manufactured, distributed, or sold by Philips in the United States:

a. information required to be disclosed by Philips to the Commission is recorded, processed, and reported in accordance with applicable law;

b. all reporting made to the Commission is timely, truthful, complete, accurate, and in accordance with applicable law; and

c. prompt disclosure is made to Philips's management of any significant deficiencies or material weaknesses in the design or operation of such internal controls that are reasonably likely to affect adversely, in any material respect, Philips's ability to record, process, and report to the Commission in accordance with applicable law.

21. Philips shall implement and maintain a compliance program designed to ensure compliance with the CPSA and regulations enforced by the Commission with respect to any consumer product imported, manufactured, distributed, or sold by Philips in the United States, and which, at a minimum, shall contain the following elements:

a. written standards and policies;

b. written procedures that provide for the appropriate forwarding to compliance personnel of all information that may relate to, or impact, CPSA compliance, including all reports and complaints involving consumer products, whether an injury is referenced or not, and corresponding engineering analyses and risk assessments;

c. a mechanism for confidential employee reporting of compliance-related questions or concerns to either a compliance officer or to another senior manager with authority to act as necessary;

d. effective communication of company compliance-related policies and procedures regarding the CPSA to all applicable employees through training programs or otherwise;

e. Philips senior management responsibility for CPSA compliance and accountability for violations of the statutes and regulations enforced by the Commission;

f. Philips board oversight of CPSA compliance; and

g. retention of all CPSA compliance-related records for at least five (5) years, and availability of such records to staff upon reasonable request.

22. Upon reasonable request of staff, Philips shall provide written documentation of its improvements, processes, and controls, including, but not limited to, the effective dates of such improvements, processes, and controls as set forth in paragraphs 20 through 21 above. Philips shall cooperate fully and truthfully with staff

and shall make available all information, materials, and personnel deemed necessary by staff to evaluate Philips's compliance with the terms of the Agreement.

23. The parties acknowledge and agree that the Commission may publicize the terms of the Agreement and the Order.

24. Philips represents that the Agreement: (i) is entered into freely and voluntarily, without any degree of duress or compulsion whatsoever; (ii) has been duly authorized; and (iii) constitutes the valid and binding obligation of Philips, enforceable against Philips in accordance with its terms. Philips will not directly or indirectly receive any reimbursement, indemnification, insurance-related payment, or other payment in connection with the civil penalty to be paid by Philips pursuant to the Agreement and Order. The individuals signing the Agreement on behalf of Philips represent and warrant that they are duly authorized by Philips to execute the Agreement.

25. The signatories represent that they are authorized to execute this Agreement.

26. The Agreement is governed by the laws of the United States.

27. The Agreement and the Order shall apply to, and be binding upon, Philips and each of its successors, transferees, and assigns, and a violation of the Agreement or Order may subject Philips, and each of its successors, transferees, and assigns, to appropriate legal action.

28. The Agreement and the Order constitute the complete agreement between the parties on the subject matter contained therein.

29. The Agreement may be used in interpreting the Order. Understandings, agreements, representations, or interpretations apart from those contained in the Agreement and the Order may not be used to vary or contradict their terms. For purposes of construction, the Agreement shall be deemed to have been drafted by both of the parties and shall not, therefore, be construed against any party for that reason in any subsequent dispute.

30. The Agreement may not be waived, amended, modified, or otherwise altered, except as in accordance with the provisions of 16 CFR 1118.20(h). The Agreement may be executed in counterparts.

31. If any provision of the Agreement or the Order is held to be illegal, invalid, or unenforceable under present or future laws effective during the terms of the Agreement and the Order, such provision shall be fully severable. The

balance of the Agreement and the Order shall remain in full force and effect, unless the Commission and Philips agree in writing that severing the provision materially affects the purpose of the Agreement and the Order.

United States of America Consumer Product Safety Commission

In the Matter of: Philips Lighting North America Corporation
CPSC Docket No.: 16-C0001

Order

Upon consideration of the Settlement Agreement entered into between Philips Lighting North America Corporation ("Philips"), and the U.S. Consumer Product Safety Commission ("Commission"), and the Commission having jurisdiction over the subject matter and over Philips, and it appearing that the Settlement Agreement and the Order are in the public interest, it is:

ORDERED that the Settlement Agreement be, and is, hereby, accepted; and it is

FURTHER ORDERED that Philips shall comply with the terms of the Settlement Agreement and shall pay a civil penalty in the amount of two million dollars (\$2,000,000) within thirty (30) days after service of the Commission's final Order accepting the Settlement Agreement. The payment shall be made by electronic wire transfer to the Commission via: <http://www.pay.gov>. Upon the failure of Philips to make the foregoing payment when due, interest on the unpaid

amount shall accrue and be paid by Philips at the federal legal rate of interest set forth at 28 U.S.C. 1961(a) and (b). If Philips fails to make such payment or to comply in full with any other provision of the Settlement Agreement, such conduct will be considered a violation of the Settlement Agreement and Order.

Provisionally accepted and provisional Order issued on the 23th day of November, 2015.
By Order of the Commission:

Todd A. Stevenson, Secretary,
U.S. Consumer Product Safety Commission

Department of the Army

[Docket ID: USA-2015-0011]

Submission for OMB Review; Comment Request

ACTION: Notice.

SUMMARY: The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by December 28, 2015.

FOR FURTHER INFORMATION CONTACT: Fred Licari, 571-372-0493.

SUPPLEMENTARY INFORMATION:

Title, Associated Form and OMB Number: Employee Travel Files; 0702-XXXX.

Type of Request: Existing collection in use without an OMB Control Number.

Number of Respondents: 350.

Responses per Respondent: 1.

Annual Responses: 350.

Average Burden per Response: 45 minutes.

Annual Burden Hours: 263.

Needs and Uses: The information collection requirement is necessary to process official travel requests for military and civilian employees of the Army and Air Force Exchange Service; to determine eligibility of the individual's dependents to travel; to obtain the necessary clearance where foreign travel is involved, including assisting individuals in applying for passports and visas and counseling where proposed travel involves visiting/transiting communist countries and danger zones.

Affected Public: Individuals or households.

Frequency: On occasion.

Respondent's Obligation: Required to obtain or retain benefits.

OMB Desk Officer: Ms. Jasmeet Seehra.

Comments and recommendations on the proposed information collection should be emailed to Ms. Jasmeet Seehra, DoD Desk Officer, at Oira_submission@omb.eop.gov. Please identify the proposed information collection by DoD Desk Officer and the Docket ID number and title of the information collection.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

- Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, Docket ID number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the Internet at <http://www.regulations.gov> as they are received without change, including any personal identifiers or contact information.

DOD Clearance Officer: Mr. Frederick Licari.

Written requests for copies of the information collection proposal should be sent to Mr. Licari at WHS/ESD Directives Division, 4800 Mark Center Drive, East Tower, Suite 02G09, Alexandria, VA 22350-3100.

Dated: November 23, 2015.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

National Commission on the Future of the Army; Notice of Federal Advisory Committee Meeting

AGENCY: Deputy Chief Management Officer, Department of Defense (DoD).

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: The DoD is publishing this notice to announce two days of meetings of the National Commission on the Future of the Army ("the Commission"). The meetings will be partially closed to the public.

DATES: *Date of the Closed Meetings:* Wednesday, December 16, 2015, from 1:00 p.m. to 5:00 p.m. and Thursday, December 17, 2015, from 8:00 a.m. to 12:00 p.m.

Date of the Open Meeting: Thursday, December 17, 2015, from 3:00 p.m. to 5:00 p.m.

ADDRESSES: Address of Closed Meetings, December 16 and 17, 2015: Rm. 12110, 5th Floor, Zachary Taylor Building, 2530 Crystal Dr., Arlington, VA 22202.

Address of Open Meeting, December 17, 2015: Polk Conference Room, Room 12158, James Polk Building, 2521 S. Clark St., Arlington, VA 22202.

FOR FURTHER INFORMATION CONTACT: Mr. Don Tison, Designated Federal Officer, National Commission on the Future of the Army, 700 Army Pentagon, Room 3E406, Washington, DC 20310-0700, Email: dfo.public@ncfa.ncr.gov. Desk (703) 692-9099. Facsimile (703) 697-8242.

SUPPLEMENTARY INFORMATION: This meeting will be held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102-3.150.

Purpose of Meetings:

During the closed meeting on Wednesday, December 16, 2015, the Commission will review the rationale for potential recommendations sourced by classified data.

During the closed meeting on Thursday, December 17, 2015, the Commission will continue the review of the rationale for potential recommendations sourced by classified data.

During the open meeting on Thursday, December 17, 2015, the Commission will hear subcommittee interim reports and the public will have an opportunity to provide remarks.

Agendas:

December 16, 2015—Closed Meeting: The Commission will hold a closed meeting to discuss the rationale for proposals which the cited information will exceed report classification. All presentations and resulting discussion are classified.

December 17, 2015—Closed Meeting: The Commission will continue the discussion on the rationale for proposals which the cited information will exceed report classification. All presentations and resulting discussion are classified.

December 17, 2015—Open Meeting: The Commission will receive interim reports from representatives from the various subcommittees and time will be allotted for public comments.

Meeting Accessibility:

In accordance with applicable law, 5 U.S.C. 552b(c) and 41 CFR 102–3.155, the DoD has determined that portion of the meetings scheduled for December 16, 2015, and the morning of December 17, 2015, will be closed to the public. Specifically, the Assistant Deputy Chief Management Officer, with the coordination of the DoD FACA Attorney, has determined in writing that these portions of the meetings will be closed to the public because it will discuss matters covered by 5 U.S.C. 552b(c)(1).

Pursuant to 41 CFR 102–3.140 through 102–3.165 and the availability of space, the meeting scheduled for December 17, 2015 from 3:00 p.m. to 5:00 p.m. at the James Polk Building is open to the public. Seating is limited and pre-registration is strongly encouraged. Media representatives are also encouraged to register. Members of the media must comply with the rules of photography and video filming in the James Polk Building. The closest public parking facility is located in the basement and along the streets. Visitors will be required to present one form of photograph identification. Visitors to the James Polk Office Building will be screened by a magnetometer, and all items that are permitted inside the building will be screened by an x-ray device. Visitors should keep their belongings with them at all times. The following items are strictly prohibited in the James Polk Office Building: Any pointed object, *e.g.*, knitting needles and letter openers (pens and pencils are permitted.); any bag larger than 18" wide x 14" high x 8.5" deep; electric stun guns, martial arts weapons or devices; guns, replica guns, ammunition and fireworks; knives of any size; mace and pepper spray; razors and box cutters.

Written Comments:

Pursuant to section 10(a)(3) of the FACA and 41 CFR 102–3.105(j) and 102–3.140, the public or interested organizations may submit written

comments to the Commission in response to the stated agenda of the open and/or closed meeting or the Commission's mission. The Designated Federal Officer (DFO) will review all submitted written statements. Written comments should be submitted to Mr. Donald Tison, DFO, via facsimile or electronic mail, the preferred modes of submission. Each page of the comment must include the author's name, title or affiliation, address, and daytime phone number. All comments received before Wednesday, December 16, 2015, will be provided to the Commission before the December 17, 2015, meeting. Comments received after Wednesday, December 16, 2015, will be provided to the Commission before its next meeting. All contact information may be found in the **FOR FURTHER INFORMATION CONTACT** section.

Registration:

Individuals and entities who wish to attend the public meeting on Thursday, December 17, 2015 are encouraged to register for the event with the DFO using the electronic mail and facsimile contact information found in the **FOR FURTHER INFORMATION CONTACT** section. The communication should include the registrant's full name, title, affiliation or employer, email address, day time phone number. This information will assist the Commission in contacting individuals should it decide to do so at a later date. If applicable, include written comments and a request to speak during the oral comment session. (Oral comment requests must be accompanied by a summary of your presentation.) Registrations and written comments should be typed.

Additional Information

The DoD sponsor for the Commission is the Deputy Chief Management Officer. The Commission is tasked to submit a report, containing a comprehensive study and recommendations, by February 1, 2016 to the President of the United States and the Congressional defense committees.

The report will contain a detailed statement of the findings and conclusions of the Commission, together with its recommendations for such legislation and administrative actions it may consider appropriate in light of the results of the study. The comprehensive study of the structure of the Army will determine whether, and how, the structure should be modified to best fulfill current and anticipated mission requirements for the Army in a manner consistent with available resources.

Dated: November 23, 2015.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

36(b)(1) Arms Sales Notification

AGENCY: Department of Defense, Defense Security Cooperation Agency.

ACTION: Notice.

SUMMARY: The Department of Defense is publishing the unclassified text of a section 36(b)(1) arms sales notification. This is published to fulfill the requirements of section 155 of Public Law 104–164 dated July 21, 1996.

FOR FURTHER INFORMATION CONTACT: Sarah A. Ragan or Heather N. Harwell, DSCA/LMO, (703) 604–1546/(703) 607–5339.

The following is a copy of a letter to the Speaker of the House of Representatives, Transmittal 0M–15 with attached Policy Justification.

Dated: November 23, 2015.

Aaron Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEFENSE SECURITY COOPERATION AGENCY
201 12TH STREET SOUTH, 9YE 203
ARLINGTON, VA 22202-5408

The Honorable Paul D. Ryan
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

NOV 04 2015

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(5)(C) of the Arms Export Control Act (AECA), we are forwarding Transmittal No. 0M-15, concerning the Department of the Army's proposed Letter(s) of Offer and Acceptance to Qatar for defense articles and services estimated to cost \$12.86 billion. This notification relates to enhancements or upgrades from the level of sensitivity of technology or capability described in the Section 36(b)(1) AECA certification 12-58 of 06 November 2012.

Sincerely,

JWR J. W. Rixey
Vice Admiral, USN
Director

Enclosures:

1. Transmittal
2. Regional Balance (Classified Document Provided Under Separate Cover)

Transmittal No. 0M-15

*REPORT OF ENHANCEMENT OR
UPGRADE OF SENSITIVITY OF
TECHNOLOGY OR CAPABILITY (SEC.
36(B)(5)(C), AECA)*

(i) *Purchaser:* Government of Qatar
(QA-B-UAP)

(ii) *Sec. 36(b)(1), AECA Transmittal
No.:* 12-58

Date: 06 November 2012

Military Department: Army

(iii) *Description:* On 06 November 2012, Congress was notified by Congressional certification transmittal

number 12-58, of the possible sale under Section 36(b)(1) of the Arms Export Control Act of 11 PATRIOT Configuration-3 Modernized Fire Units, 11 AN/MPQ-65 Radar Sets, 11 AN/MSQ-132 Engagement Control Systems, 30 Antenna Mast Groups, 44 M902 Launching Stations (LS), 246 PATRIOT MIM-104E Guidance Enhanced Missile—TBM (GEM-T) with canisters, 2 PATRIOT MIM-104E GEM-T Test Missiles, 768 PATRIOT Advanced Capability 3 (PAC-3) Missiles with canisters, 10 PAC-3 Test Missiles with

canisters, 11 Electrical Power Plants (EPPII), 8 Multifunctional Information Distribution Systems/Low Volume Terminals (MIDS/LVTs), communications equipment, tools and test equipment, support equipment, publications and technical documentation, personnel training and training equipment, spare and repair parts, facility design, U.S. Government and contractor technical, engineering, and logistics support services, and other related elements of logistics and program support. The estimated total

cost was \$9.9 billion. Major Defense Equipment (MDE) constituted \$7.2 billion of this total.

This transmittal reports the upgrade of 34 of the previously notified (and purchased) M902 LS, and the addition of 300 PAC-3 PATRIOT Advanced Capability (PAC)-3 Missile Segment Enhancement (MSE) missiles and 10 PAC-3 MSE test missiles. In order to support MSE Integration, the M902 LS will require a modification kit to achieve the M903 LS configuration. The addition of the PAC-3 MSEs and the M902 LS upgrades will result in an MDE net increase of \$2.6 billion, and a non-MDE increase of \$360 million. The revised estimated total value is \$12.86 billion, with the revised MDE value constituting \$9.8 billion of this new total.

(iv) *Significance:* The LS M903 allows the PATRIOT system to fire PAC-3 MSE missiles.

The changes to the launcher for the M903 configuration are to account for the necessary cabling for power and signal interfaces with the PAC-3 MSE missiles. In order to change the launcher from the M902 configuration to the M903 configuration, the following items are added: Additional distribution cables, additional umbilical cables,

addition of a stowage box for storage of cables mentioned above, and the addition of a grounding cable. The PAC-3 MSE missile capability will allow for further and higher Tactical Ballistic Missile intercepts. This equipment will enhance Qatar's interoperability with the United States and its allies, making it a more valuable partner in an increasingly important area of the world. Qatar should have no difficulty including the PAC-3 MSE and the upgrade to M903 LS into its armed forces.

(v) *Justification:* This notification is being provided as the PAC-3 MSE was not specified in the original notification because the technology was not yet releasable to FMS customers and the M903 LS kit was not available/developed. This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a strategic partner. The PAC-3 MSE and the M903 LS kit will significantly improve Qatar's defense capabilities to meet current and future threats and deter regional aggression.

(vi) *Date Report Delivered to Congress:* 4 NOV 2015

(viii) *Date Report Delivered to Congress:* 04 NOV 2015

* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

United Arab Emirates (UAE) Joint Direct Attack Munitions (JDAM), Sustainment and Support

The United Arab Emirates requested approval to procure 3250 GBU-31V1 (KMU-556 JDAM kit) with 3250 MK-84/BLU-117 bombs, 750 GBU-31V3 (KMU-557 JDAM kit) with 750 BLU-109 bombs, 1000 GBU-12 with 1002 MK-82/BLU-111 bombs, 4,250 FMU-152 fuzes, and 216 GBU-24 tail kits (BSU-84). The sale also includes non-MDE related munitions items (fuzes and bomb components), sustainment, and support. The estimated total case value is \$380 million.

This proposed sale contributes to the foreign policy and national security of the United States by helping the UAE remain an active member of the OPERATION INHERENT RESOLVE (OIR) coalition working to defeat the Islamic State in Iraq and Levant (ISIL) and as part of the Saudi-led coalition to restore the legitimate government in Yemen. These munitions will sustain the UAE's efforts and support a key partner that remains an important force for political stability and economic progress in the Middle East.

The proposed sale provides the UAE additional precision guided munitions capability to meet the current threat. The UAE continues to provide host-nation support of vital U.S. forces stationed at Al Dhafra Air Base and plays a vital role in supporting U.S. regional interests. The UAE was a valued partner and an active participant in OPERATION IRAQI FREEDOM (OIF), OPERATION ENDURING FREEDOM (OEF), OPERATION UNIFIED PROTECTOR (OUP), and now is a valued partner in OIR coalition operations.

The proposed sale will not alter the basic military balance in the region.

The prime contractors will be determined during the contracting process. There are no known offset

agreements proposed in connection with this potential sale.

Implementation of this sale entails periodic Program Management Reviews in the United States or UAE. There are no additional U.S. Government or contractor representatives anticipated to be stationed in the UAE as a result of this potential sale.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 15-51

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. GBU-31 Joint Direct Attack Munition (JDAM) is a 2000-lb guidance tail kit that converts unguided free-fall bombs into accurate, Global Positioning System (GPS)-guided adverse weather "smart" munitions. With the addition of a new tail section that contains an inertial navigational system (INS) and a GPS guidance control unit, JDAM improves the accuracy of unguided, general-purpose (GP) bombs in any weather condition. The GBU-31V1 contains a KMU-556 JDAM tail, a general purpose 2000-lb BLU-117 or MK-84 bomb body and a fuse. The GBU-31V3 contains a KMU-557 JDAM tail, a 2000-lb BLU-109 penetrator bomb body and a fuse. The highest classification for the JDAM, its components, and technical data is SECRET. In addition to the JDAM tail kit, access to accurate target coordinates, INS/GPS capability, and operational test and evaluation plan are essential for successful employment.

2. GBU-12 is a 500-lb laser-guided ballistic bomb (LGB). The LGB is a maneuverable, free-fall weapon that guides to a spot of laser energy reflected off of the target. The LGB is delivered like a normal GP warhead and the semi-active guidance corrects for many of the normal errors inherent in any delivery system. Laser designation for the weapon can be provided by a variety of laser target markers or designators. The GBU-12 LGB consists of a laser guidance kit, a computer control group (CCG) and a warhead specific Air Foil Group (AFG), that attach to the nose and tail of MK-82 or BLU-111 500-lb GP bomb body and a fuse. The overall weapon is CONFIDENTIAL.

3. GBU-24 is a 2000-lb laser-guided ballistic bomb (LGB). The LGB is a maneuverable, free-fall weapon that guides to a spot of laser energy reflected off of the target. The LGB is delivered

like a normal GP warhead and the semi-active guidance corrects for many of the normal errors inherent in any delivery system. Laser designation for the weapon can be provided by a variety of laser target markers or designators. The GBU-24 LGB consists of a laser guidance kit, a computer control group (CCG) and a warhead specific BSU-84 Air Foil Group (AFG), that attaches to the tail of a MK-84 or BLU-117 2000-lb GP bomb body. The overall weapon is SECRET.

4. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

5. A determination has been made that the recipient country can provide substantially the same degree of protection of sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of U.S. foreign policy and national security objectives outlined in the Policy Justification. All defense articles and services listed in this transmittal have been authorized for release and export to the United Arab Emirates.

6. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification. Moreover, the benefits to be derived from this sale, as outlined in the Policy Justification, outweigh the potential damage that could result if the sensitive technology were revealed to unauthorized persons.

DEPARTMENT OF DEFENSE

Office of the Secretary

[Transmittal No. 15-56]

36(b)(1) Arms Sales Notification

AGENCY: Defense Security Cooperation Agency, Department of Defense.

ACTION: Notice.

SUMMARY: The Department of Defense is publishing the unclassified text of a section 36(b)(1) arms sales notification. This is published to fulfill the requirements of section 155 of Public Law 104-164 dated July 21, 1996.

FOR FURTHER INFORMATION CONTACT: Sarah A. Ragan or Heather N. Harwell, DSCA/LMO, (703) 604-1546/(703) 607-5339.

The following is a copy of a letter to the Speaker of the House of Representatives, Transmittal 15-56 with

attached Policy Justification and Sensitivity of Technology.

Dated: November 23, 2015.
Aaron Siegel,
Alternate OSD Federal Register Liaison Officer, Department of Defense.

DEFENSE SECURITY COOPERATION AGENCY
201 12TH STREET SOUTH, STE 203
ARLINGTON, VA 22202-5408

The Honorable Paul D. Ryan
Speaker of the House
U.S. House of Representatives
Washington, DC 20515

NOV 04 2015

Dear Mr. Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 15-56, concerning the Department of the Navy's proposed Letter(s) of Offer and Acceptance to the Government of Kuwait for defense articles and services estimated to cost \$115 million. After this letter is delivered to your office, we plan to issue a news release to notify the public of this proposed sale.

Sincerely,

J. W. Rixey
Vice Admiral, USN
Director

Enclosures:

1. Transmittal
2. Policy Justification
3. Sensitivity of Technology
4. Regional Balance (Classified Document Provided Under Separate Cover)

BILLING CODE 5001-06-C

Transmittal No. 15-56
Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* The Government of Kuwait
(ii) *Total Estimated Value:*

Major Defense Equipment* ..	\$ 50 million
Other	\$ 65 million
TOTAL	\$ 115 million

(iii) *Description and Quantity or Quantities of Articles or Services Under Consideration for Purchase:*

Major Defense Equipment (MDE):
Fourteen (14) AN/AAQ-33 Sniper
Advanced Targeting Pods (ATP)

Non-MDE items included in this request are associated equipment, spares, accessories, and airworthiness certification. The sale will include the integration of the ATPs on the purchaser's F/A-18 aircraft along with improvements in the on-board mission computer software suites. Also included in this request are systems integration and testing, software development/integration, test sets, support equipment, spares, repair parts, maintenance and pilot training, publications and technical documents, U.S. Government and contractor technical assistance, and other related elements of logistics, engineering and program support.

(iv) *Military Department:* Navy and Air Force (XX-P-LCI)

(v) *Prior Related Cases, if any:* None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* Offset agreements associated with this proposed sale are expected and will be determined during negotiations between the purchaser and contractor.

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* 04 NOV 2015

*as defined in Section 47(6) of the Arms Export Control Act

POLICY JUSTIFICATION

The Government of Kuwait—Sniper Advanced Targeting Pods (ATP)

The Government of Kuwait has requested a possible sale of:

Major Defense Equipment (MDE):
Fourteen (14) AN/AAQ-33 Sniper
Advanced Targeting Pods (ATP)

Non-MDE items included in this request are associated equipment, spares, accessories, and airworthiness certification. The sale will include the above system integration on the purchaser's F/A-18 aircraft along with improvements in the on-board mission computer software suites. Operational support for these modifications will be provided through upgrades. Also included in this request are systems integration and testing, software development/integration, test sets, support equipment, spares, repair parts, maintenance and pilot training, publications and technical documents, U.S. Government and contractor technical assistance, and other related elements of logistics, engineering and program support. The estimated cost of

MDE is \$50 million. The total estimated cost is \$115 million.

Kuwait has requested the Sniper ATP due to its compatibility with the latest precision-guided weapons and capability of detecting, identifying, and engaging multiple moving and fixed targets in air-to-air and air-to-ground engagements. Integration of the Sniper ATP on Kuwait's F/A-18 aircraft would enhance its ability to protect itself against possible aggression from foreign forces.

This proposed sale will contribute to the foreign policy and national security of the United States by helping to improve the security of a friendly country that has been, and continues to be, an important force for political stability and economic progress in the Middle East. Kuwait plays a large role in U.S. efforts to advance stability in the Middle East, providing basing, access, and transit for U.S. forces in the region.

The proposed sale of this equipment, services, and support will not affect the basic military balance in the region.

The principal contractor will be Lockheed Martin Missile and Fire Control, Orlando, Florida.

Offset agreements associated with this proposed sale are expected and will be determined during negotiations between the purchaser and contractor.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 15-56

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The hardware and software being purchased is being used to upgrade the customer country's existing F/A-1 8C/D Hornet aircraft. Description and classification of the hardware and software being purchased are detailed in the following paragraphs.

2. The Sniper Advanced Targeting Pod (ATP), designated AN/AAQ-33, provides positive target identification, autonomous tracking, coordinate generation, and precise weapons guidance from extended standoff ranges. The latest version of the Sniper ATP provides an enhanced capability using new sensors, a two-way data link, advanced processors and automated non-traditional intelligence, surveillance and reconnaissance modes.

3. A software upgrade to the Kuwait F/A-18 Mission Computer Operational Flight Program (OFF) software will be

required to ensure that flight crews receive full capability of the Sniper ATP. The OFF will be upgraded at the Naval Air Warfare Center Weapons Division at China Lake, California, as part of continuing support of the Kuwait Air Force F/A-18 program.

4. The Sniper ATP will provide classified SECRET data to the Kuwait Air Force. Some technical information is classified SECRET because it describes the limitations and effectiveness of both the aircraft and its capabilities.

5. If a technologically advanced adversary were to obtain knowledge of the specific hardware or software in this proposed sale, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

6. A determination has been made that the recipient country can provide the same degree of protection for the classified and sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Kuwait.

DEPARTMENT OF ENERGY

Bonneville Power Administration

Agency Information Collection Activities: Proposed Collection; Comment Request; Badge Replacement Request Form

AGENCY: Bonneville Power Administration (BPA), DOE.

ACTION: Notice of submission of information collection approval from the Office of Management and Budget (OMB) and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Bonneville Power Administration (BPA) will submit the collection abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden and includes the actual collection instrument.

DATES: Comments must be received on or before December 29, 2015.

ADDRESSES: Written comments may be submitted by mail to Christopher M. Frost, CGI-7, Bonneville Power Administration, 905 NE., 11th Avenue, Portland, Oregon 97232, or by email at IGLM@bpa.gov.

FOR FURTHER INFORMATION CONTACT: Additional information may be requested from Christopher M. Frost at the mailing address above or by email at IGLM@bpa.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

BPA is seeking approval for an information collection on lost, stolen, or damaged badges that control access to BPA facilities. This information collection helps BPA control access to BPA facilities and track identification badges issued by BPA's Personnel Security office. The relevant form, Form BPA F 5632.27e, will collect the following information: type of badge (standard, smart card, proximity access), date of report, date lost, stolen or damaged, name and work phone number of reporting contractor or federal employee, and a brief description of either the type of damage or the incident resulting in loss.

The **Federal Register** Notice with a 60-day comment period was published on June 23, 2015 at 80 FR 35947.

II. Data

OMB Control Number: New.
Information Collection Request Title: Badge Replacement Request Form.

Type of Request: New.
Respondents: BPA employees and contractors seeking replacement ID badges.

Annual Estimated Number of Respondents: 75.
Annual Estimated Number of Total Responses: 75.
Average Minutes per Response: 10.
Annual Estimated Number of Burden Hours: 12.5.
Annual Estimated Reporting and Recordkeeping Cost Burden: \$0.

Issued in Portland, Oregon, on November 18, 2015.

Christopher M. Frost,
Agency Records Officer, FOIA/Privacy Officer, Information Governance.

DEPARTMENT OF ENERGY

National Coal Council

AGENCY: Office of Fossil Energy, Department of Energy.

ACTION: Notice of renewal.

SUMMARY: Pursuant to section 14(a)(2)(A) of the Federal Advisory Committee Act (Pub. L. 92-463) and in accordance with Title 41 of the Code of Federal Regulations, section 102-3.65, and following consultation with the Committee Management Secretariat of the General Services Administration, notice is hereby given that the National Coal Council has been renewed for a two-year period. The Council will continue to provide advice, information, and recommendations to the Secretary of Energy on a continuing basis regarding general policy matters relating to coal issues.

SUPPLEMENTARY INFORMATION: Council members are chosen to assure a well-balanced representation from all sections of the country, all segments of the coal industry, including large and small companies, and commercial and residential consumers. The Council also has diverse members who represent interests outside the coal industry, including the environment, labor, research, and academia. Membership and representation of all interests will continue to be determined in accordance with the requirements of the Federal Advisory Committee Act, and implementing regulations.

The renewal of the Council has been deemed essential to the conduct of the Department's business and in the public interest in conjunction with the performance of duties imposed upon the Department of Energy by law. The Council will continue to operate in accordance with the provisions of the Federal Advisory Committee Act and implementing regulations.

FOR FURTHER INFORMATION CONTACT: Robert Wright at (202) 586-0429.

Issued at Washington, DC on November 20, 2015.

Amy Bodette,
Committee Management Officer.

Federal Energy Regulatory Commission

Commission Information Collection Activities (FERC–556, FERC–606, and FERC–607); Consolidated Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Notice of information collections and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, 44 U.S.C. 3506(c)(2)(A), the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on the requirements and burden¹ of the information collections described below.

DATES: Comments on the collections of information are due January 26, 2016.

ADDRESSES: You may submit comments (identified by Docket No. IC16–3–000) by either of the following methods:

- eFiling at Commission's Web site:

<http://www.ferc.gov/docs-filing/efiling.asp>.

- Mail/Hand Delivery/Courier:

Federal Energy Regulatory Commission, Secretary of the Commission, 888 First Street NE., Washington, DC 20426.

Please reference the specific collection number and/or title in your comments.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: <http://www.ferc.gov/help/submission-guide.asp>. For user assistance contact FERC Online Support by email at ferconlinesupport@ferc.gov, or by phone at: (866) 208–3676 (toll-free), or (202) 502–8659 for TTY.

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at <http://www.ferc.gov/docs-filing/docs-filing.asp>.

FOR FURTHER INFORMATION CONTACT:

Ellen Brown may be reached by email at DataClearance@FERC.gov, telephone at (202) 502–8663, and fax at (202) 273–0873.

SUPPLEMENTARY INFORMATION:

Type of Request: Three-year extension of the information collection

¹The Commission defines burden as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, reference 5 Code of Federal Regulations 1320.3.

requirements for all collections described below with no changes to the current reporting requirements. Please note that each collection is distinct from the next.

Comments: Comments are invited on: (1) Whether the collections of information are necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimates of the burden and cost of the collections of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collections; and (4) ways to minimize the burden of the collections of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FERC–556, Certification of Qualifying Facility Status for a Small Power Production or Cogeneration Facility

OMB Control No.: 1902–0075.

Abstract: Form No. 556 is required to implement sections 201 and 210 of the Public Utility Regulatory Policies Act of 1978² (PURPA). FERC is authorized, under those sections, to encourage cogeneration and small power production and to prescribe such rules as necessary in order to carry out the statutory directives.

A primary statutory objective is efficient use of energy resources and facilities by electric utilities. One means of achieving this goal is to encourage production of electric power by cogeneration facilities which make use of reject heat associated with commercial or industrial processes, and by small power production facilities which use other wastes and renewable resources. PURPA encourages the development of small power production facilities and cogeneration facilities that meet certain technical and corporate criteria through establishment of various regulatory benefits. Facilities that meet these criteria are called Qualifying Facilities (QFs).

FERC's regulations in 18 CFR part 292, as relevant here, specify: (a) The certification procedures which must be followed by owners or operators of small power production and cogeneration facilities; (b) the criteria which must be met; (c) the information which must be submitted to FERC in order to obtain qualifying status; (d) the PURPA benefits which are available to QFs to encourage small power production and cogeneration.

² 16 U.S.C. 796, 824a–3.

18 CFR part 292 also exempts QFs from certain corporate, accounting, reporting, and rate regulation requirements of the Federal Power Act,³ certain state laws and the Public Utility Holding Company Act of 2005.⁴

Type of Respondent: Facilities that are self-certifying their status as a cogenerator or small power producer or that are submitting an application for FERC certification of their status as a cogenerator or small power producer.

Estimate of Annual Burden: The Commission estimates the annual public reporting burden for the information collection as:

FERC-556: CERTIFICATION OF QUALIFYING FACILITY STATUS FOR A SMALL POWER PRODUCTION OR COGENERATION FACILITY

Facility type	Filing type	Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden hours & cost per response ⁵	Total annual burden hours & total annual cost	Cost per respondent (\$)
		(1)	(2)	(1)*(2)=(3)	(4)	(3)*(4)=(5)	(5)÷(1)
Cogeneration Facility > 1 MW ⁶ .	Self-certification	54	1.25	67.5	1.5 hrs; \$108	101.25 hrs; \$7,290.	\$135
Cogeneration Facility > 1 MW.	Application for FERC certification.	1	1.25	1.25	50 hrs; 3,600	62.5 hrs; 4,500	4,500
Small Power Production Facility > 1 MW.	Self-certification	1,787	1.25	2,234	1.5 hrs; 108	3,351hrs; 241,272.	135
Small Power Production Facility > 1 MW.	Application for FERC certification.	0	1.25	0	50 hrs; 3,600	0 hrs; 0	0
Cogeneration and Small Power Production Facility ≤ 1 MW (Self-Certification) ⁷ .	Self-certification	312	1.25	390	1.5 hrs; 3,600 ...	585 hrs; 42,120	135
TOTAL	2,154	2,693	4,100 hrs; \$295,182.

FERC-606, Notification of Request for Federal Authorization and Requests for Further Information; FERC-607, Report on Decision or Action on Request for Federal Authorization

OMB Control No.: 1902-0241.

Abstract: FERC-606 requires agencies and officials responsible for issuing, conditioning, or denying requests for federal authorizations necessary for a proposed natural gas project to report to the Commission regarding the status of an authorization request. This reporting requirement is intended to allow agencies to assist the Commission to make better informed decisions in establishing due dates for agencies'

decisions. FERC-607 requires agencies or officials to submit to the Commission a copy of a decision or action on a request for federal authorization and an accompanying index to the documents and materials relied on in reaching a conclusion.

The information collections can neither be discontinued nor collected less frequently because of statutory requirements. The consequences of not collecting this information are that the Commission would be unable to fulfill its statutory mandate under the Energy Policy Act of 2005 to:

- Establish a schedule for agencies to review requests for federal

authorizations required for a project, and

- Compile a record of each agency's decision, together with the record of the Commission's decision, to serve as a consolidated record for the purpose of appeal or review, including judicial review.

Type of Respondent: Agencies with federal authorization responsibilities.

Estimate of Annual Burden: The Commission estimates the annual public reporting burden and cost⁸ (rounded) for the information collection as follows:

FERC-606: (NOTIFICATION OF REQUEST FOR FEDERAL AUTHORIZATION AND REQUESTS FOR FURTHER INFORMATION), AND FERC-607 (REPORT ON DECISION OR ACTION ON REQUEST FOR FEDERAL AUTHORIZATION)

	Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden hours & cost per response	Total annual burden hours & total annual cost	Cost per respondent (\$)
	(1)	(2)	(1)*(2)=(3)	(4)	(3)*(4)=(5)	(5)÷(1)
FERC-606	6	1	6	4 hrs; \$288	24 hrs; \$1,728	\$288
FERC-607	1	1	1	1 hr.; 72	1 hr.; 72	72
TOTAL	7	25 hrs; 1,800

³ 16 U.S.C. 791, *et seq.*

⁴ 42 U.S.C. 16, 451-63.

⁵ The burden costs are based on an FERC's 2015 average annual wage (and benefits) figure for a full-time employee of \$149,489 (\$72/hour). The

Commission staff believes that industry is similarly situated in terms of staff costs and skill sets.

⁶ MW = megawatt.

⁷ Not required to file.

⁸ The cost is based on FERC's average cost (salary plus benefits) of \$72/hour for 2015. The Commission staff believes that the level and skill set (as a reporting agency official, *e.g.*, Environmental Program Manager or Reviewer) is comparable to FERC staff.

Issued: November 20, 2015.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

BILLING CODE 6717-01-P

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OPPT-2014-0486; FRL-9933-45-OEI]

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; Lead Training, Certification, Accreditation and Authorization Activities

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has submitted the following information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (PRA): “Lead Training, Certification, Accreditation and Authorization Activities” and identified by EPA ICR No. 2507.01 and OMB Control No. 2070-NEW. The ICR, which is available in the docket along with other related materials, provides a detailed explanation of the collection activities and the burden estimate that is only briefly summarized in this document. EPA did not receive any comments in response to the previously provided public review opportunity issued in the **Federal Register** on December 29, 2014 (79 FR 78084). With this submission, EPA is providing an additional 30 days for public review.

DATES: Comments must be received on or before December 28, 2015.

ADDRESSES: Submit your comments, identified by docket identification (ID) number EPA-HQ-OPPT-2014-0486, to both EPA and OMB as follows:

- To EPA online using <http://www.regulations.gov> (our preferred method) or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW., Washington, DC 20460.
- To OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA’s policy is that all comments received will be included in the docket without change, including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is

restricted by statute. Do not submit electronically any information you consider to be CBI or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:

Colby Lintner, Environmental Assistance Division (7408M), Office of Pollution Prevention and Toxics, Environmental Protection Agency, 1200 Pennsylvania Ave. NW., Washington, DC 20460-0001; telephone number: (202) 554-1404; email address: TSCA-Hotline@epa.gov.

SUPPLEMENTARY INFORMATION:

Docket: Supporting documents, including the ICR that explains in detail the information collection activities and the related burden and cost estimates that are summarized in this document, are available in the docket for this ICR. The docket can be viewed online at <http://www.regulations.gov> or in person at the EPA Docket Center, West William Jefferson Clinton Bldg., Rm. 3334, 1301 Constitution Ave. NW., Washington, DC. The telephone number for the Docket Center is (202) 566-1744. For additional information about EPA’s public docket, visit <http://www.epa.gov/dockets>.

ICR status: This is a new ICR. that seeks to consolidate the information collection activities that are currently covered by the following three ICRs that are currently approved by OMB under the separate OMB control numbers identified:

1. OMB Control No. 2070-0155; EPA ICR No. 1715.14; entitled “TSCA Sections 402 and Section 404 Training, Certification, Accreditation and Standards for Lead-Based Paint Activities and Renovation, Repair, and Painting”; approved through August 31, 2018.

2. OMB Control No. 2070-0158; EPA ICR No. 1669.07; entitled “Lead-Based Paint Pre-Renovation Information Dissemination—TSCA Sec. 406(b)”; approved through August 31, 2018.

3. OMB Control No. 2070-0181; EPA ICR No. 2381.03; entitled “ICR for the Final Rule entitled “Lead; Clearance and Clearance Testing Requirements for the Renovation, Repair, and Painting Program”; approved through August 31, 2018.

Under PRA, 44 U.S.C. 3501 *et seq.*, an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers are displayed either by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form, if applicable. The display of OMB control numbers for

certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This consolidated ICR will cover the information collection activities imposed on entities conducting lead-based paint related activities currently approved in the ICRs listed above. Following approval of this ICR, the previous ICRs will be discontinued.

Respondents/Affected entities: Private entities and state, territorial or Native American agencies who are engaged in or who administer lead-based paint activities or programs.

Respondent’s obligation to respond: Mandatory (see 40 CFR part 745). Respondents may claim all or part of a document confidential. EPA will disclose information that is covered by a claim of confidentiality only to the extent permitted by, and in accordance with, the procedures in TSCA section 14 and 40 CFR part 2.

Estimated total number of potential respondents: 791,805.

Frequency of response: On occasion.

Estimated total burden: 5,746,565 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Estimated total costs: \$283,187,555 (per year), includes no annualized capital investment or maintenance and operational costs.

Changes in the estimates: There is an overall decrease of 282,737 hours in the total estimated combined respondent burden that is currently approved by OMB in the three ICRs consolidated in this request. This decrease reflects changes in EPA’s estimates of the number of respondents and burden-related activities based on economic conditions in the housing market and related industries. Further, the fact that the 2008 Renovation, Repair and Painting (RRP) rule and the 2010 Opt-Out rule have been in place for several years allows this ICR to use estimates based on actual certification data instead of making broader assumptions about industry behavior. Further details about these changes are included in the supporting statement for this ICR. This change is an adjustment.

Authority: 44 U.S.C. 3501 *et seq.*

FEDERAL COMMUNICATIONS COMMISSION

[AU Docket No. 14-252; DA 15-1252]

Instructions for FCC Form 177 Application To Participate in the Reverse Auction (Auction 1001)

AGENCY: Federal Communications Commission.

ACTION: Notice.

SUMMARY: This document provides information on and filing instructions for completing FCC Form 177, the application for licensees of commercial and noncommercial educational full power and Class A television stations to participate in the reverse auction (Auction 1001).

DATES: Reverse Auction FCC Form 177 filing window opens 12 noon Eastern Time (ET) on December 8, 2015, and closes 6:00 p.m. ET on January 12, 2016.

FOR FURTHER INFORMATION CONTACT: *Wireless Telecommunications Bureau, Auctions and Spectrum Access Division:* for general reverse auction questions: Erin Griffith or Kathryn Hinton at (202) 418-0660.

SUPPLEMENTARY INFORMATION: This is a summary of the *Reverse Auction 1001 FCC Form 177 Instructions Public Notice (Reverse Auction 1001 FCC Form 177 Instructions PN)*, AU Docket No. 14-252, DA 15-1252, released on November 19, 2015. The complete text of the *Reverse Auction 1001 FCC Form 177 Instructions PN*, including all attachments is available for public inspection and copying from 8:00 a.m. to 4:30 p.m. ET Monday through Thursday or from 8:00 a.m. to 11:30 a.m. ET on Fridays in the FCC Reference Information Center, 445 12th Street SW., Room CY-A257, Washington, DC 20554. The complete text is also available on the Commission's Web site at <http://wireless.fcc.gov>, or by using the search function on the ECFS Web page at <http://www.fcc.gov/cgb/ecfs/>.

Alternative formats are available to persons with disabilities by sending an email to FCC504@fcc.gov or by calling the Consumer & Governmental Affairs Bureau at (202) 418-0530 (voice), (202) 418-0432 (TTY).

I. General Information

1. The *Reverse Auction 1001 FCC Form 177 Instructions PN* provides the filing instructions for the electronic FCC Form 177, the application for licensees of commercial and noncommercial educational full power and Class A television stations (eligible broadcast licensees) to participate in the reverse auction (Auction 1001). Separate

attachments to the *Reverse Auction 1001 FCC Form 177 Instructions PN* provide the step-by-step filing instructions and templates for the certification by prospective channel sharer(s) that a reverse auction applicant-sharee must provide when submitting a channel sharing agreement in an application.

2. When filling out an FCC Form 177, a reverse auction applicant should follow the instructions in Attachments to the *Reverse Auction FCC Form 177 Instructions PN* along with the guidance provided in the *Auction 1000 Application Procedures PN*, 80 FR 66429, October 29, 2015. Each prospective applicant should also reference other public notices and/or decisions that have been issued in this proceeding, any future public notices and/or decisions that may be issued in this proceeding, and any other relevant public notices and/or decisions issued by the Commission in other proceedings that may relate to the incentive auction. Additional guidance, data, and information related to the broadcast incentive auction is available on the Auction 1000 Web site (<http://www.fcc.gov/auctions/1000>). A pre-auction process tutorial for the reverse auction was made available on the Auction 1001 Web site (<http://www.fcc.gov/auctions/1001>) on November 20, 2015, and the reverse auction application process workshop will be held on December 8, 2015.

Federal Communications Commission.

William Huber,

Associate Chief, Auctions and Spectrum Access Division, WTB.

BILLING CODE 6712-01-P

FEDERAL COMMUNICATIONS COMMISSION

[DA 15-1242]

Notice of Intent To Terminate 214 Authorization

AGENCY: Federal Communications Commission

ACTION: Notice.

SUMMARY: This notice serves as final opportunity for Ocean Technology Limited (Ocean) to respond to the July 1, 2015 letter from the Department of Justice, Federal Bureau of Investigation, the Drug Enforcement Agency, and the U.S. Marshals Service (Agencies) requesting that the Federal Communications Commission (FCC) terminate and declare null, void and no longer in effect, and/or revoke the

international 214 authorization issued to Ocean by the FCC. The Agencies state that Ocean has failed to comply with commitments and undertakings in the July 9, 2013 Letter of Assurance entered into with the Agencies to address national security and law enforcement concerns. The FCC now provides final notice to Ocean that it intends to declare Ocean's international 214 authorization terminated for failure to comply with conditions of its authorization. Ocean must respond to this notice no later than 15 days after publication in the **Federal Register**.

DATES: Submit comments on or before December 14, 2015.

ADDRESSES: Federal Communications Commission, 445 12th Street SW., Washington DC, 20554.

FOR FURTHER INFORMATION CONTACT: Cara Grayer, Policy Division, International Bureau, at (202) 418-2960 or Cara.Grayer@fcc.gov.

SUPPLEMENTARY INFORMATION: Compliance with the commitments in the July 9, 2013 Letter of Assurance is a condition to the section 214 authorization granted to Ocean on July 17, 2013, by the FCC under file number ITC-214-20121210-00323. The FCC previously served its Notice of Intent to Terminate Ocean's 214 Authorization, DA 15-1242, to Ocean by mail, return receipt requested, at the last addresses of record which appears in the FCC's records. Ocean should send its response to Denise Coca, Chief, Policy Division, International Bureau via email at Denise.Coca@fcc.gov and file it in File No. ITC-214-20121210-00323 via IBFS at <http://licensing.fcc.gov/myibfs/pleading.do>. Ocean should also email a copy of its response to Cara Grayer, Policy Division, International Bureau at Cara.Grayer@fcc.gov.

Ocean's failure to respond to this notice will be deemed as an admission of the facts alleged by the Agencies.

The proceeding in this notice is treated as a "permit-but-disclose" proceeding in accordance with the Commission's *ex parte* rules.

Federal Communications Commission.

Denise Coca,
Chief, Policy Division, International Bureau.

BILLING CODE 6712-01-P

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank

Control Act (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the notices are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The notices are available for immediate inspection at the Federal Reserve Bank indicated. The notices also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing to the Reserve Bank indicated for that notice or to the offices of the Board of Governors. Comments must be received not later than December 11, 2015.

A. Federal Reserve Bank of Atlanta (Chapelle Davis, Assistant Vice President) 1000 Peachtree Street NE., Atlanta, Georgia 30309:

1. *VHS Grantor Retained Annuity Trust #1 and Martha Sigmon Spurlock* as trustee, both of Big Stone Gap, Virginia; to acquire voting shares Commercial Bancgroup, Inc., and thereby indirectly acquire voting shares of Commercial Bank, both in Harrogate, Tennessee.

Board of Governors of the Federal Reserve System, November 23, 2015.

Michael J. Lewandowski,
Associate Secretary of the Board.

BILLING CODE 6210-01-P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The applications will also be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also

includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than December 21, 2015.

A. Federal Reserve Bank of St. Louis (Yvonne Sparks, Community Development Officer) P.O. Box 442, St. Louis, Missouri 63166-2034:

1. *Bank of the Ozarks, Inc.*, Little Rock, Arkansas; to merge with Community & Southern Holdings, Inc., and thereby indirectly acquire Community & Southern Bank, both in Atlanta, Georgia.

Board of Governors of the Federal Reserve System, November 23, 2015.

Michael J. Lewandowski,
Associate Secretary of the Board.

BILLING CODE 6210-01-P

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000-0055; Docket 2015-0055; Sequence 23]

Information Collection; Freight Classification Description

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for public comments regarding an extension to an existing OMB clearance.

SUMMARY: Under the provisions of the Paperwork Reduction Act, the Regulatory Secretariat Division will be submitting to the Office of Management and Budget (OMB) a request to review and approve an extension of a previously approved information collection requirement concerning freight classification description.

DATES: Submit comments on or before January 26, 2016.

ADDRESSES: Submit comments identified by Information Collection 9000-0055, Freight Classification Description, by any of the following methods:

• *Regulations.gov*: <http://www.regulations.gov>.

Submit comments via the Federal eRulemaking portal by searching the OMB control number. Select the link "Submit a Comment" that corresponds with "Information Collection 9000–0055, Freight Classification Description". Follow the instructions provided at the "Submit a Comment" screen. Please include your name, company name (if any), and "Information Collection 9000–0055, Freight Classification Description" on your attached document.

• *Mail*: General Services Administration, Regulatory Secretariat Division (MVCB), 1800 First Street NW., Washington, DC 20405. ATTN: Ms. Flowers/IC 9000–0055, Freight Classification Description.

Instructions: Please submit comments only and cite Information Collection 9000–0055, Freight Classification Description, in all correspondence related to this collection. Comments received generally will be posted without change to <http://www.regulations.gov>, including any personal and/or business confidential information provided. To confirm receipt of your comment(s), please check www.regulations.gov, approximately two to three days after submission to verify posting (except allow 30 days for posting of comments submitted by mail).

FOR FURTHER INFORMATION CONTACT: Mr. Curtis E. Glover, Sr., Procurement Analyst, Office of Acquisition Policy, at 202–501–1448 or via email at curtis.glover@gsa.gov.

SUPPLEMENTARY INFORMATION:

A. Purpose

The Government is required to provide, in solicitations, a complete description of the supplies to be acquired and the packing requirements to determine transportation (freight rate) charges for the evaluation of offers. Generally, the freight rate for supplies is based on the ratings applicable to the freight classification description published in the National Motor Freight Classification (for carriers) and the Uniform Freight Classification (for rail) filed with Federal and State regulatory bodies.

When the Government purchases supplies that are new to the supply system, nonstandard, or modifications of previously shipped supplies, and different freight classifications may apply, per FAR clause 52.247–53, offerors are requested to indicate the full Uniform Freight Classification or National Motor Freight Classification

description applicable to the supplies. The Government will use these descriptions as well as other information available to determine the classification description most appropriate and advantageous to the government.

B. Annual Reporting Burden

Respondents: 3,000.
Responses per Respondent: 3.
Annual Responses: 9,000.
Hours per Response: .167.
Total Burden Hours: 1,503.

C. Public Comments

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the Federal Acquisition Regulations (FAR), and whether it will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Obtaining Copies of Proposals: Requesters may obtain a copy of the information collection documents from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 First Street NW., Washington, DC 20405, telephone 202–501–4755.

Please cite OMB Control No. 9000–0055, Freight Classification Description, in all correspondence.

Edward Loeb,

Acting Director, Office of Governmentwide Acquisition Policy, Office of Acquisition Policy, Office of Governmentwide Policy.

BILLING CODE 6820–EP–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–16–16ET; Docket No. CDC–2015–0107]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing efforts to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project entitled "Comprehensive HIV Prevention and Care for Men Who Have Sex with Men of Color." Seven U.S. health departments will form, lead, and coordinate a collaborative with 37 community-based organizations (CBOs), clinics and other health providers, behavioral health and social health providers in their jurisdictions. The collaborative will report standardized program monitoring and evaluation (M&E) data to the health department and then the health department will report the same M&E data to CDC.

DATES: Written comments must be received on or before January 26, 2016.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2015–0107 by any of the following methods:

• *Federal eRulemaking Portal*: *Regulation.gov*. Follow the instructions for submitting comments.

• *Mail*: Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS–D74, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. All relevant comments received will be posted without change to Regulations.gov, including any personal information provided. For access to the docket to read background documents or comments received, go to Regulations.gov.

Please note: All public comment should be submitted through the Federal eRulemaking portal (Regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact the Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS–D74, Atlanta, Georgia 30329; phone: 404–639–7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of

Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

Proposed Project

Comprehensive HIV Prevention and Care for Men Who Have Sex With Men of Color—New—National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Approximately 50,000 people in the United States are newly infected with HIV each year. Gay, bisexual, and other men who have sex with men (MSM) remain the US population most heavily affected by HIV infection. Among MSM,

those who are black and Hispanic comprise 58% of all new infections. To address the burden of HIV in this population, high impact HIV prevention approaches should be implemented by state, local, and territorial health departments to reduce new HIV infections among MSM of color, and to improve outcomes along the HIV continuum of care for MSM of color living with HIV.

Antiretroviral (ARV) medications for pre-exposure prophylaxis (PrEP) can be used for HIV prevention by MSM at substantial risk for HIV acquisition or by those with a possible HIV exposure in the past 72 hours post-exposure prophylaxis (nPEP). The daily use of co-formulated tenofovir disoproxil fumarate and emtricitabine (marketed as Truvada) for PrEP has been proven to significantly reduce the risk of HIV acquisition among sexually active MSM. In July 2012, the US Food and Drug Administration approved an HIV prevention indication for Truvada, and in May 2014 CDC published clinical practice guidelines for provision of PrEP. Given the high incidence of HIV among MSM of color, those who are sexually active are considered at risk for HIV acquisition and thus could benefit from prevention services such as routine and frequent HIV screening with lab-based 4th generation HIV tests, routine screening for STDs, assessment of PrEP eligibility, provision of PrEP (if at substantial risk for HIV acquisition), provision of nPEP (if a possible HIV exposure occurred in the past 72 hours), and/or other risk reduction interventions.

Among people living with HIV (PLWH), ARV treatment can suppress HIV viral load, which both improves health outcomes of individuals and reduces the risk of HIV transmission. Two studies, one that demonstrated the effectiveness of ARV treatment in preventing HIV transmission, and one that demonstrated improved health outcomes for individuals whose ARV treatment was initiated immediately, have led to increased public health focus on interventions and strategies designed to initiate ARV treatment, link, retain, and re-engage PLWH in HIV care, and to provide support for adherence to ARV medications.

The purpose of this project is to support state and local health departments to develop and implement demonstration projects for provision of comprehensive HIV prevention and care services for MSM of color by creating a collaborative with CBOs, clinics and other health care providers, and behavioral health and social services providers in their jurisdiction.

Behavioral health services include mental health and substance abuse treatment to enable MSM of color to utilize HIV prevention and care services; social services include services that promote access to housing, job counseling, and employment services to enable MSM of color to utilize HIV prevention and care services.

Comprehensive models of HIV prevention and care for MSM of color will be developed and implemented by a collaborative that is led by the jurisdiction's health department and includes the following: Health care providers (e.g., federally qualified health centers (FQHCs), FQHC Look-Alikes, other clinics, or health care providers); HIV care providers (e.g., clinics funded through the Ryan White HIV/AIDS Program (RWHAP clinics), other HIV care clinics, or HIV care providers); behavioral health and social services providers (i.e., mental health and substance abuse services, housing programs, and job training or employment services); and community based organizations (CBOs). Principles of high impact prevention should guide the selection and implementation of activities and strategies to focus on MSM of color at substantial risk for HIV infection (i.e., eligible for prevention with PrEP), and those living with HIV. MSM of color who are at risk for HIV acquisition (i.e., sexually active) but not eligible for or decline PrEP will be provided risk reduction interventions, partner services if diagnosed with an STD, re-testing for HIV and STDs in 3–6 months, and behavioral health and social services. The risk of HIV acquisition should be assessed at every encounter with an individual, and MSM of color at substantial risk of HIV acquisition should be offered PrEP when indicated by the risk assessment.

There are a total of 24 required HIV prevention and care services that must be provided by the health department collaborative for this project. This is to include thirteen HIV prevention services for MSM of color at substantial risk for HIV infection and eleven HIV care services for MSM of color living with HIV infection. The following are the thirteen HIV prevention services: 1. HIV testing services that use lab-based 4th generation HIV tests; 2. Assessment of indications for pre-exposure prophylaxis (PrEP) and non-occupational post-exposure prophylaxis (nPEP); 3. Provision of PrEP and nPEP; 4. Adherence interventions for PrEP and nPEP; 5. Immediate linkage to care, ARV treatment, and partner services for those diagnosed with acute HIV infection; 6. Expedient linkage to care, ARV treatment, and partner

services for those diagnosed with established HIV infection; 7. STD screening and treatment; 8. Partner services for patients with STDs; 9. Behavioral risk reduction interventions; 10. Screening for behavioral health and social services' needs; 11. Linkage to behavioral health and social services; 12. Navigators to assist accessing HIV prevention and behavioral health and social services; 13. Navigators to assist enrollment in a health plan. The following are the eleven HIV care services: 1. HIV primary care, including

antiretroviral (ARV) treatment; 2. Retention interventions; 3. Re-engagement interventions; 4. Adherence interventions; 5. STD screening and treatment; 6. Partner services; 7. Behavioral risk reduction interventions; 8. Screening patients for behavioral health and social services' needs; 9. Linkage to behavioral health and social services; 10. Navigators to assist linking to care and accessing behavioral health and social services; 11. Navigators to assist enrollment in a health plan.

CDC HIV program grantees will collect, enter or upload, and report agency-identifying information, budget data, information on the HIV prevention and care services, and client demographic characteristics with an estimate of 2,466 burden hours. It is estimated that the 37 respondents will see approximately 200 patients per year. The respondents will take about 20 minutes to enter the data for each of the 200 patients using the monitoring and evaluation form.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden hours
Health jurisdictions	Health Department Collaborative	37	200	20/60	2,466

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-16-16FE; Docket No. CDC-2015-0108]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing efforts to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection entitled "Monitoring and Reporting System for Rape Prevention and Education (RPE) Awardees." CDC will use the information collected to monitor cooperative agreement awardees and to identify challenges to

program implementation and achievement of outcomes.

DATES: Written comments must be received on or before January 26, 2016.

ADDRESSES: You may submit comments, identified by Docket No. CDC-2015-0108 by any of the following methods:

Federal eRulemaking Portal: Regulation.gov. Follow the instructions for submitting comments.

Mail: Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS-D74, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. All relevant comments received will be posted without change to Regulations.gov, including any personal information provided. For access to the docket to read background documents or comments received, go to Regulations.gov.

Please note: All public comment should be submitted through the Federal eRulemaking portal (Regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact the Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS-D74, Atlanta, Georgia 30329; phone: 404-639-7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each

collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and

maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

Proposed Project

Monitoring and Reporting System for Rape Prevention and Education (RPE) Awardees—New—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

According to CDC’s National Intimate Partner and Sexual Violence Survey (NISVS), in the United States, nearly 1 in 5 women and 1 in 71 men have been raped in their lifetime, while 1 in 2 women and 1 in 5 men have experienced severe sexual violence victimization other than rape at some point in their lives. Sexual violence is a major public health problem, but it is preventable. The majority of victimization starts early in life with approximately 80% of female victims experiencing their first rape before the age of 25 and almost half experiencing their first rape before age 18. CDC’s Rape Prevention and Education Initiative is a national program which funds, through a cooperative agreement,

all 50 state health departments, the District of Columbia, Puerto Rico, and territories (e.g., Guam, U.S. Virgin Islands, and the Commonwealth of Northern Mariana Islands) to conduct state- and territorial-wide sexual violence prevention activities.

The current Rape Prevention and Education (RPE) Cooperative Agreement builds on a decade long (2002–2012) investment in the infrastructure and capacity for sexual violence prevention within state health departments, state sexual assault coalitions, rape crisis centers and other community based organizations. Support and guidance for these programs have been provided through cooperative agreement funding and technical assistance administered by CDC’s National Center for Injury Prevention and Control (NCIPC).

The goal of this information collection is to receive the needed data to monitor cooperative agreement programs funded under the Rape Prevention Education program (CDC–RFA–CE14–1401), for program monitoring and improvement among funded state health departments.

Data to be collected will provide crucial information for program performance monitoring and budget tracking, and provide CDC with the capacity to respond in a timely manner to requests for information about the program from the Department of Health and Human Services (HHS), the White House, Congress, and other sources.

Awardees will report progress and activity information to CDC on an annual schedule using an Excel-based fillable electronic templates, pre-populated to the extent possible by CDC staff, to be submitted via Grant Solutions. Each awardee will submit an Annual reporting Progress Report Tool and an Annual reporting Evaluation Plan Tool. In Year 1, each awardee will have additional burden related to initial collection of the reporting tools. Initial population of the tools is a one-time activity, after completing the initial population of the tools, pertinent information only needs to be updated for each annual report. The same instruments will be used for all information collection and reporting.

CDC will use the information to monitor each awardee’s progress and to identify facilitators and challenges to program implementation and achievement of outcomes. Monitoring allows CDC to determine whether an awardee is meeting performance and budget goals and to make adjustments in the type and level of technical assistance provided to them, as needed, to support attainment of their performance measures.

OMB approval is requested for three years. Participation in the information collection is required as a condition of funding. There are no costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
State and Territorial Health Departments or Sexual Assault Coalition Designee.	Program Report Tool (initial collection—Year 1).	55	1	7	385
	Work Plan Tool (initial collection—Year 1).	55	1	10	550
	Program Report Tool (annual reporting collection—Years 2–3).	55	2	3	330
	Work Plan Tool (annual reporting collection—Years 2–3).	55	2	3	330
Total	1,595

Centers for Disease Control and Prevention

[60Day–16–16FG; Docket No. CDC–2015–0109]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing efforts to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. This notice invites comment on *Workplace Health In America*, a nationally representative survey of employer-based workplace health programs to describe the current state of U.S. workplace health promotion and protection programs and practices in employers of all sizes, industries and regions.

DATES: Written comments must be received on or before January 26, 2016.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2015–0109 by any of the following methods:
Federal eRulemaking Portal: Regulation.gov. Follow the instructions for submitting comments.

Mail: Leroy A. Richardson, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE., MS–D74, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. All relevant comments received will be posted without change to Regulations.gov, including any personal information provided. For access to the docket to read background documents or comments received, go to Regulations.gov.

Please note: All public comment should be submitted through the Federal eRulemaking portal (Regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact the Information Collection Review Office, Centers for

Disease Control and Prevention, 1600 Clifton Road NE., MS–D74, Atlanta, Georgia 30329; phone: 404–639–7570; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

Proposed Project

Workplace Health In America—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The health of a workplace and its workers are inextricably linked. Ideally, workplaces not only protect the safety and wellbeing of employees but also provide them opportunities for better long-term health and enhanced quality of life. Effective workplace programs, policies, and environments that are health-focused and worker-centered have the potential to significantly benefit employers, employees, their families, and communities. As the nation's premier public health agency, the CDC helps protect the health and safety of all people in our schools, communities, homes and workplaces through prevention. The workplace can specifically protect and promote health through programs, policies, and practices that have the potential of reaching millions of workers, retirees, and their families.

Increasing health care costs and decreasing health-related productivity are leading American businesses to examine strategies to improve employee health and contain health costs that are largely driven by chronic diseases and related lifestyle choices. Employers are recognizing the role they can play in creating a healthy work environment and providing their employees with opportunities to make healthy lifestyle choices. They increasingly look to CDC and other public health experts for guidance and solutions to combat the effects of chronic diseases on their employees and businesses. Workplace health programs not only benefit individual employees but also make good business sense.

Although a number of national and local level studies and surveys have been conducted over the past 25 years examining aspects of workplace health promotion and protection programs, there has not been, to date, a systematic and ongoing effort to document the evidenced-based and best practice strategies and interventions at the individual employee and organizational level that comprise a comprehensive workplace health program from a nationally representative sample of employers. Workplace Health in America is authorized by the Public Health Service Act and funded through the Prevention and Public Health Fund of the Patient Protection and Affordable Care Act (ACA). CDC has developed the Workplace Health in America survey program to describe the current state of U.S. workplace health promotion and protection programs and practices in employers of all sizes, industries and regions. National worksite health promotion experts, employers, and

content experts from the CDC advised on the survey content. Items from existing, validated surveys were used whenever possible. The survey contains yes/no, multiple choice and a small number of open-ended items.

The Workplace Health in America survey is designed to collect information about: Basic organizational characteristics; employer-sponsored health insurance; health risk assessments; staffing and other resources devoted to employee health and safety programming; incentives; work-life policies and benefits; availability of health screenings and disease management programs; occupational safety and health programs. The survey items also cover the presence of evidence-based and other health promotion programs, policies and supports related to physical activity; nutrition; weight; tobacco; excess alcohol use and drug abuse; lactation and prenatal support; musculoskeletal disorders, arthritis and back pain; stress; and sleep.

CDC seeks to request Office of Management and Budget (OMB) approval. The information that is collected is intended to build an infrastructure supporting ongoing surveillance to evaluate national workplace health priorities (e.g., *Healthy People*), monitor trends, and address emerging issues; provide free and accessible benchmarking data for employers and other stakeholders in workplace health promotion and protection; provide a better understanding of employer practices to inform the development of tools and resources to support the design, implementation, and evaluation of employer-based workplace health programs; and advance workplace health promotion and protection research.

To achieve these aims, CDC has developed an infrastructure for this initial effort that can be expanded for future iterations of data collection. CDC has designed a process to select a nationally representative sample of

worksites representing employers in all size categories, industry sectors, and CDC regions. The data collection platform was developed to collect information primarily by online survey or telephone assisted interview, and can be easily modified to accommodate additional survey modules. CDC has also created a dissemination plan to ensure the data and results can be used by employers and other stakeholders beyond the research community. Planned dissemination products include webinars to employer groups, an online dashboard for employers to benchmark their programs against other employers with comparable characteristics, and brief reports tailored to employers of different sizes.

OMB approval is requested for two years. CDC estimates that a total 8,085 employers will complete the Workplace Health in America survey. Participation is voluntary and there are no costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Request for Nominations of Candidates To Serve on the Board of Scientific Counselors (BSC), National Institute for Occupational Safety and Health (NIOSH)

The Centers for Disease Control and Prevention (CDC) is soliciting nominations for possible membership on the BSC, NIOSH.

The BSC, NIOSH consists of 15 experts in fields related to occupational safety and health. The members are selected by the Secretary of the U.S.

Department of Health and Human Services (HHS). The board advises the NIOSH Director on occupational safety and health research and prevention programs. The board also provides advice on standards of scientific excellence, current needs in the field of occupational safety and health, and the applicability and dissemination of research findings. This advice may take the form of reports or verbal communications to the NIOSH Director during BSC meetings.

Nominations are being sought for individuals who have expertise and qualifications necessary to contribute to the accomplishment of the board's mission. More information is available on the NIOSH BSC Web site: <http://www.cdc.gov/niosh/BSC/default.html>.

Nominees will be selected based on expertise in occupational safety and health fields, such as occupational medicine, occupational nursing, industrial hygiene, occupational safety and health engineering, toxicology, chemistry, safety and health education, ergonomics, epidemiology, biostatistics, and psychology. Members may be

invited to serve for terms of two to four years. Selected nominees would begin service on the BSC, NIOSH in January 2017.

The U.S. Department of Health and Human Services policy stipulates that committee membership shall be balanced in terms of professional training and background, points of view represented, and the committee's function. In addition to a broad range of expertise, consideration is given to a broad representation of geographic areas within the U.S., with diverse representation of both genders, all ethnic and racial groups, and persons with disabilities. Nominees must be U.S. citizens, and cannot be full-time employees of the U.S. Government or federally registered lobbyists.

Candidates should submit the following items:

- Current *curriculum vitae*, including complete contact information (name, affiliation, mailing address, telephone number, email address)
- A letter of recommendation stating the qualifications of the candidate.

Nomination materials must be postmarked by December 21, 2015, and sent to: John Decker, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention, 1600 Clifton Road NE., Mailstop E-20, Atlanta, Georgia 30333, telephone (404) 498-2500.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both the Centers for Disease Control and Prevention, and the Agency for Toxic Substances and Disease Registry.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

[FR Doc. 2015-30124 Filed 11-25-15; 8:45 am]

BILLING CODE P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Request for Nominations of Candidates to Serve on the Board of Scientific Counselors (BSC), Office of Infectious Diseases (OID)

The Centers for Disease Control and Prevention (CDC) is soliciting nominations for possible membership on the BSC, OID. This board consists of 17 experts in fields related to infectious diseases who are selected by the Secretary of the U.S. Department of Health and Human Services (HHS). The board advises the HHS Secretary; the CDC Director; the OID Director; and the Directors of the National Center for Immunization and Respiratory Diseases (NCIRD), the National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), and the National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention (NCHHSTP) concerning strategies, goals, and priorities for the programs and research within the national centers and monitors the overall strategic direction and focus of OID and the national centers.

Nominations are being sought for individuals who have expertise and qualifications necessary to contribute to the accomplishment of the board's mission. Nominees will be selected by the HHS Secretary or designee from authorities knowledgeable in the fields of infectious diseases and related disciplines, including epidemiology, microbiology, bioinformatics, and

clinical and veterinary medicine, as well as from the general public. Members may be invited to serve for terms of up to four years.

The U.S. Department of Health and Human Services policy stipulates that committee membership shall be balanced in terms of professional training and background, points of view represented, and the committee's function. In addition to a broad range of expertise, consideration is given to a broad representation of geographic areas within the U.S., with diverse representation of both genders, all ethnic and racial groups, and persons with disabilities. Nominees must be U.S. citizens, and cannot be full-time employees of the U.S. Government or federally registered lobbyists.

Candidates should submit the following items:

- Current *curriculum vitae*, including complete contact information (name, affiliation, mailing address, telephone number, email address);
- A letter of recommendation stating the qualifications of the candidate.

Nomination materials must be postmarked by December 31, 2015, and sent to: Kim Distel, Office of Infectious Diseases, Centers for Disease Control and Prevention, 1600 Clifton Road NE., Mailstop D10, Atlanta, Georgia 30329, telephone (404) 639-2100.

The Director, Management Analysis and Services Office, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities for both the Centers for Disease Control and Prevention, and the Agency for Toxic Substances and Disease Registry.

Elaine L. Baker,

Director, Management Analysis and Services Office, Centers for Disease Control and Prevention.

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

[Document Identifier: CMS-10066 and CMS-10596]

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services.

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by January 26, 2016.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to <http://www.regulations.gov>. Follow the instructions for "Comment or Submission" or "More Search Options" to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number, Room C4-26-05, 7500 Security Boulevard, Baltimore, Maryland 21244-1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Web site address at <http://www.cms.hhs.gov/PaperworkReductionActof1995>.

2. Email your request, including your address, phone number, OMB number, and CMS document identifier, to Paperwork@cms.hhs.gov.

3. Call the Reports Clearance Office at (410) 786-1326.

FOR FURTHER INFORMATION CONTACT: Reports Clearance Office at (410) 786-1326.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS-10066 Detailed Notice of Discharge (DND) and Supporting Regulations in 42 CFR 405.1206 and 422.622

Under the PRA (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term "collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Detailed Notice of Discharge (DND) and Supporting Regulations in 42 CFR 405.1206 and 422.622; *Use:* A beneficiary or enrollee who wishes to appeal a determination by a Medicare health plan (for a managed care enrollee) or hospital (for an original Medicare beneficiary) that inpatient care is no longer necessary may request Quality Improvement Organization (QIO) review of the determination. On the date the QIO receives the beneficiary's/enrollee's request, it must notify the plan and hospital that the beneficiary/enrollee has filed a request for an expedited determination. The plan or hospital, in turn, must deliver a DND to the enrollee/beneficiary. In this iteration the DND has been minimally changed to include language informing beneficiaries of their rights under the Rehabilitation Act of 1973 (section 504), by alerting the beneficiary to CMS's

nondiscrimination practices and the availability of alternate forms of this notice if needed. There are no substantive changes to the DND form and instructions. *Form Number:* CMS-10066 (OMB Control Number: 0938-1019); *Frequency:* Occasionally; *Affected Public:* Private sector (Business or other for-profit and Not-for-profit institutions); *Number of Respondents:* 6,164; *Total Annual Responses:* 17,000; *Total Annual Hours:* 17,000. (For policy questions regarding this collection contact Evelyn Blaemire at 410-786-1803.)

2. *Type of Information Collection Request:* New collection (Request for a new OMB control number); *Title of Information Collection:* Reapplication Submission Requirement for Qualified Entities under ACA Section 10332; *Use:* Section 10332 of the Patient Protection and Affordable Care Act (ACA) requires the Secretary to make standardized extracts of Medicare claims data under Parts A, B, and D available to "qualified entities" for the evaluation of the performance of providers of services and suppliers. The statute provides the Secretary with discretion to establish criteria to determine whether an entity is qualified to use claims data to evaluate the performance of providers of services and suppliers. After consideration of comments from a wide variety of stakeholders during the public comment period, CMS established "Medicare Program; Availability of Medicare Data for Performance Measurement" (hereinafter called the Final Rule and referred to as the Medicare Data Sharing Program). It was published in the **Federal Register** on December 7, 2011 (42 CFR, Part 401, Subpart G). To implement the requirements outlined in the legislation, the Centers for Medicare and Medicaid Services (CMS) established the Qualified Entity Certification Program (QECP). The Qualified Entity Certification Program (QECP) was established to implement the Final Rule. One of the requirements in the Final Rule is that QEs must reapply for certification six months prior to the end of their 3-year certification period to remain in good standing. This form is the official reapplication that QEs must complete to reapply to the QECP. *Form Number:* CMS-10596 (OMB Control Number: 0938-New); *Frequency:* Occasionally; *Affected Public:* Private sector (Business or other for-profit and Not-for-profit institutions); *Number of Respondents:* 10; *Total Annual Responses:* 10; *Total Annual Hours:* 1,200. (For policy questions regarding

this collection contact Kari Gaare at 410-786-8612.)

Dated: November 20, 2015.

William N. Parham, III,
Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2015-N-0001]

Vaccines and Related Biological Products Advisory Committee; Notice of Meeting

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

This notice announces a forthcoming meeting of a public advisory committee of the Food and Drug Administration (FDA). At least one portion of the meeting will be closed to the public.

Name of Committee: Vaccines and Related Biological Products Advisory Committee.

General Function of the Committee: To provide advice and recommendations to the Agency on FDA's regulatory issues.

Date and Time: The meeting will be held on January 14, 2016, from 1 p.m. to 5 p.m.

Location: FDA White Oak Campus, 10903 New Hampshire Ave., Building 31 Conference Center, the Great Room (Rm. 1503), Silver Spring, MD 20993-0002. Answers to commonly asked questions including information regarding special accommodations due to a disability, visitor parking, and transportation may be accessed at <http://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm408555.htm>.

For those unable to attend in person, the meeting will also be webcast and will be available at the following link <https://collaboration.fda.gov/vrbpacsem1/>.

Contact Person: Sujata Vijh or Denise Royster, Center for Biologics Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 71, Rm. 6128, Silver Spring, MD 20993-0002, at 240-402-7107 and 240-402-8158 respectively, or FDA Advisory Committee Information Line, 1-800-741-8138 (301-443-0572 in the Washington, DC area). A notice in the **Federal Register** about last minute modifications that impact a previously

announced advisory committee meeting cannot always be published quickly enough to provide timely notice. Therefore, you should always check the Agency's Web site at <http://www.fda.gov/AdvisoryCommittees/default.htm> and scroll down to the appropriate advisory committee meeting link, or call the advisory committee information line to learn about possible modifications before coming to the meeting.

Agenda: On January 14, 2016, the committee will meet by teleconference. In open session, the committee will hear updates of the research program in the Laboratory of Method Development, Division of Viral Products, Center for Biologics Evaluation and Research, FDA.

FDA intends to make background material available to the public no later than 2 business days before the meeting. If FDA is unable to post the background material on its Web site prior to the meeting, the background material will be made publicly available at the location of the advisory committee meeting, and the background material will be posted on FDA's Web site after the meeting. Background material is available at <http://www.fda.gov/AdvisoryCommittees/Calendar/default.htm>. Scroll down to the appropriate advisory committee meeting link.

Procedure: On January 14, 2016, from 1 p.m. to 3:35 p.m., the meeting is open to the public. Interested persons may present data, information, or views, orally or in writing, on issues pending before the committee. Written submissions may be made to the contact person on or before January 7, 2016. Oral presentations from the public will be scheduled between approximately 2:35 p.m. and 3:35 p.m. Those individuals interested in making formal oral presentations should notify the contact person and submit a brief statement of the general nature of the evidence or arguments they wish to present, the names and addresses of proposed participants, and an indication of the approximate time requested to make their presentation on or before December 29, 2015. Time allotted for each presentation may be limited. If the number of registrants requesting to speak is greater than can be reasonably accommodated during the scheduled open public hearing session, FDA may conduct a lottery to determine the speakers for the scheduled open public hearing session. The contact person will notify interested persons regarding their request to speak by December 30, 2015.

Closed Committee Deliberations: On January 14, 2016, from 3:35 p.m. to 5 p.m., the meeting will be closed to permit discussion where disclosure would constitute a clearly unwarranted invasion of personal privacy (5 U.S.C. 552b(c)(6)). The Committee will discuss the report of the intramural research program and make recommendations regarding personnel staffing decisions.

Persons attending FDA's advisory committee meetings are advised that the Agency is not responsible for providing access to electrical outlets.

FDA welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with disabilities. If you require accommodations due to a disability, please contact Sujata Vijh at least 7 days in advance of the meeting.

FDA is committed to the orderly conduct of its advisory committee meetings. Please visit our Web site at <http://www.fda.gov/AdvisoryCommittees/AboutAdvisoryCommittees/ucm111462.htm> for procedures on public conduct during advisory committee meetings.

Notice of this meeting is given under the Federal Advisory Committee Act (5 U.S.C. app. 2).

Dated: November 20, 2015.

Jill Hartzler Warner,

Associate Commissioner for Special Medical Programs.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Service Administration

Advisory Committee on Interdisciplinary, Community-Based Linkages; Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given of the following meeting:

Name: Advisory Committee on Interdisciplinary, Community-Based Linkages (ACICBL).

Dates and Times: December 15, 2015 (9:30 a.m.—4:00 p.m.).

Place: Conference Call/Webinar Format.

Status: The meeting will be open to the public.

Purpose: The ACICBL provides advice and recommendations to the Secretary of the Department of Health and Human Services (Secretary) concerning policy, program development, and other

matters of significance related to interdisciplinary, community-based training grant programs authorized under sections 750–759, Title VII, Part D of the Public Health Service Act, as amended by the Affordable Care Act. The following sections are included under this Part: 751—Area Health Education Centers; 752—Continuing Education Support for Health Professionals Serving in Underserved Communities; 753—Geriatrics Workforce Enhancement; 754—Quentin N. Burdick Program for Rural Interdisciplinary Training; 755—Allied Health and Other Disciplines; 756—Mental and Behavioral Health Education and Training, and 759—Program for Education and Training in Pain Care.

The members of the ACICBL will select a topic for the legislatively mandated 16th report. They will also finalize their discussion of the legislatively mandated 15th Annual Report to the Secretary of Health and Human Services and Congress. In the 15th Annual Report they will make recommendations for Title VII, Part D programs, performance measures, and appropriation levels.

Agenda: The ACICBL agenda will be available 2 days prior to the meeting on the HRSA Web site at <http://www.hrsa.gov/advisorycommittees/bhpradvisory/acicbl/index.html>.

SUPPLEMENTARY INFORMATION: Requests to make oral comments or provide written comments to the ACICBL should be sent to Dr. Joan Weiss, Designated Federal Official, using the address and phone number below. Individuals who plan to participate on the conference call and webinar should notify Dr. Weiss at least 3 days prior to the meeting, using the address and phone number below. Members of the public will have the opportunity to provide comments. Interested parties should refer to the meeting subject as the HRSA Advisory Committee on Interdisciplinary, Community-Based Linkages.

- The conference call-in number is 1-800-619-2521. The passcode is: 9271697.

- The webinar link is <https://hrsa.connectsolutions.com/acicbl-meeting/>.

Contact: Anyone requesting information regarding the ACICBL should contact Dr. Joan Weiss, Designated Federal Official within the Bureau of Health Workforce, Health Resources and Services Administration, in one of three ways: (1) Send a request to the following address: Dr. Joan Weiss, Designated Federal Official, Bureau of

Health Workforce, Health Resources and Services Administration, Room 12C-05, 5600 Fishers Lane, Rockville, Maryland 20857; (2) call (301) 443-0430; or (3) send an email to jweiss@hrsa.gov.

Jackie Painter,

Director, Division of the Executive Secretariat.

BILLING CODE 4165-15-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Proposed Collection; 60-Day Comment Request; The Agricultural Health Study: A Prospective Cohort Study of Cancer and Other Disease Among Men and Women in Agriculture (NIEHS)

SUMMARY: In compliance with the requirement of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, for opportunity for public comment on proposed data collection projects, the National Institute of Environmental Health Sciences (NIEHS), National Institutes of Health (NIH) will publish periodic summaries of proposed projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

Written comments and/or suggestions from the public and affected agencies are invited on one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3)

Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

To Submit Comments and for Further Information: To obtain a copy of the data collection plans and instruments, submit comments in writing, or request more information on the proposed project, contact: Dale Sandler, Ph.D., Chief, Epidemiology Branch, National Institute of Environmental Health Sciences, NIH, 111 T.W. Alexander Drive, P.O. Box 12233, MD A3-05, Research Triangle Park, NC 27709, or call non-toll-free number 919-541-4668, or email your request, including your address to: sandler@niehs.nih.gov. Formal requests for additional plans and instruments must be requested in writing.

DATES: Comment Due Date: Comments regarding this information collection are best assured of having their full effect if received within 60 days of the date of this publication.

Proposed Collection: The Agricultural Health Study: A Prospective Cohort Study of Cancer and Other Disease Among Men and Women in Agriculture, 0925-0406 (Expiration Date 9/30/2016, REVISION), National Institute of Environmental Health Sciences (NIEHS), National Institutes of Health (NIH).

Need and Use of Information Collection: The purpose of this information collection is to request new components as part of the ongoing Study of Biomarkers of Exposures and Effects in Agriculture (BEEA), as well as continue and complete phase IV (2013-

2016) of the Agricultural Health Study (AHS) and continue buccal cell collection. Phase IV will continue to update the occupational and environmental exposure information as well as medical history information for licensed pesticide applicators and their spouses enrolled in the AHS. The new BEEA components are a control respondent group, and a smartphone application (app), along with new sample collection (buccal cell and air monitoring samples). The new components will use similar procedures to ones already employed on the BEEA study, as well as other NCI studies. The primary objectives of the study are to determine the health effects resulting from occupational and environmental exposures in the agricultural environment. Secondary objectives include evaluating biological markers that may be associated with agricultural exposures and risk of certain types of cancer. Phase IV questionnaire data are collected by using self-administered computer assisted web survey (CAWI); self-administered paper-and-pen (Paper/pen); or an interviewer administered computer assisted telephone interview (CATI) and in-person interview (CAPI) systems for telephone screeners and home visit interviews, respectively. Some respondents are also asked to participate in the collection of biospecimens and environmental samples, including blood, urine, buccal cells (loose cells from the respondent's mouth), and vacuum dust. The findings will provide valuable information concerning the potential link between agricultural exposures and cancer and other chronic diseases among Agricultural Health Study cohort members, and this information may be generalized to the entire agricultural community.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Estimated annual number of respondents	Number of responses per respondent	Average time per response (in hours)	Total annual burden hours
Private and Commercial Applicators and Spouses.	Reminder, Missing, and Damaged Scripts for Buccal Cell.	100	1	5/60	8
Private Applicators	BEEA CATI Eligibility Script	480	1	20/60	160
Private Applicators	Mailed Consent, Pre-Visit Show Card, and Paper/Pen Dust Questionnaire.	160	1	20/60	53
Private Applicators	BEEA Home Visit CAPI, Blood, Buccal cell, Urine & Dust.	160	1	90/60	240
Private Applicators	BEEA Pre-Visit Scripts	20	3	5/60	5
Private Applicators	BEEA Home Visit CAPI, Blood, Buccal cell, Urine, & Dust x 3.	20	3	90/60	90
Private Applicators	BEEA Mailed Consents (Home Visit & Farm Visit), Pre-Visit Show Card, and Paper/Pen Dust Questionnaire.	16	1	25/60	7
Private Applicators	BEEA Home Visit CAPI, Blood, Urine, Buccal cell & Dust x 2.	16	2	90/60	16
Controls	BEEA CATI Control Eligibility Script	215	1	20/60	72

ESTIMATED ANNUALIZED BURDEN HOURS—Continued

Type of respondent	Form name	Estimated annual number of respondents	Number of responses per respondent	Average time per response (in hours)	Total annual burden hours
Controls	BEEA Mailed Consent, Pre-Visit Show Card, and Paper/Pen Dust Questionnaire.	67	1	20/60	22
Controls	BEEA Control Home Visit CAPI, Blood, Buccal cell, Urine, & Dust.	67	1	90/60	101
Private Applicators	'Life in a Day' Smartphone Application x 25	100	25	10/60	417
Private Applicators	Paper/pen, CAWI or CATI	13,855	1	25/60	5,773
Spouses	Paper/pen, CAWI or CATI	10,201	1	25/60	4,250
Proxy	Paper/pen, CAWI or CATI (Attachment 26)	635	1	15/60	159
Total	25,486	28,608	11,516

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 11,516.

Dated: November 20, 2015.

Chris Long,

Acting Executive Officer, NIEHS.

[FR Doc. 2015-30219 Filed 11-25-15; 8:45 am]

BILLING CODE 4140-01-P

DEPARTMENT OF HOMELAND SECURITY

Office of the Secretary

[Docket No. DHS-2015-0078]

Privacy Act of 1974; Department of Homeland Security/United States Coast Guard-029 Notice of Arrival and Departure System of Records

AGENCY: Department of Homeland Security, Privacy Office.

ACTION: Notice of Privacy Act system of records.

SUMMARY: In accordance with the Privacy Act of 1974, the Department of Homeland Security proposes to update and reissue a current Department of Homeland Security system of records titled, "Department of Homeland Security/United States Coast Guard-029 Notice of Arrival and Departure System of Records." This system of records allows the United States Coast Guard (Coast Guard) to facilitate the effective and efficient entry and departure of vessels into and from the United States, and assist with assigning priorities for complying with maritime safety and security regulations. As part of the Department's ongoing effort to promote transparency regarding its collection of information, the Coast Guard is updating this system of records notice to update the (1) authority for maintenance of the system, (2) security classification, (3) system location, (4) purpose(s), (5)

categories of individuals, (6) categories of records, (7) routine uses, (8) retention and disposal, (9) notification procedures, and (10) system manager and address. Additionally, this notice includes non-substantive changes to simplify the formatting and text of the previously published notice.

The Coast Guard is also issuing a Notice of Proposed Rulemaking (NPRM) to clarify the exemptions for this system concurrently with this notice. This updated system will be included in the Department of Homeland Security's inventory of record systems.

DATES: Submit comments on or before December 28, 2015. This updated system will be effective December 28, 2015.

ADDRESSES: You may submit comments, identified by docket number DHS-2015-0078 by one of the following methods:

- Federal e-Rulemaking Portal: <http://www.regulations.gov>. Follow the instructions for submitting comments.
- Fax: (202) 343-4010.
- Mail: Karen L. Neuman, Chief Privacy Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528-0655.

Instructions: All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, please visit <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: For general questions, please contact: Marilyn Scott-Perez, (202) 475-3515, Privacy Officer, Commandant (CG-61), United States Coast Guard, 2703 Martin Luther King Jr. Ave SE., Mail Stop 7710, Washington, DC 20593. For privacy questions, please contact: Karen L. Neuman, (202) 343-1717, Chief Privacy

Officer, Privacy Office, Department of Homeland Security, Washington, DC 20528-0655.

SUPPLEMENTARY INFORMATION:

I. Background

In accordance with the Privacy Act of 1974, 5 U.S.C. 552a, the Department of Homeland Security (DHS) United States Coast Guard (USCG) proposes to update and reissue a current DHS system of records titled, "DHS/USCG-029 Notice of Arrival and Departure (NOAD) System of Records." The collection and maintenance of this information assists DHS/USCG in meeting its statutory obligation to assign priorities while conducting maritime safety and security missions in accordance with international and U.S. regulations. DHS/USCG is updating this system of records to (1) clarify the authority for the maintenance of the system to align with the recently published *Vessel Requirements for Notices of Arrival and Departure, and Automatic Identification System* Final Rule (January 30, 2015, 80 FR 5281); (2) update the security classification; (3) change the system location to clarify that NOAD records may be stored on information technology (IT) systems connected to classified networks; (4) update the purpose(s) to align with the updated authorities for collection, pursuant to the newly issued *Vessel Requirements for Notices of Arrival and Departure, and Automatic Identification System* Final Rule and to allow for replication of data for analysis and vetting as part of the DHS Data Framework. DHS/USCG is also updating the categories of individuals and categories of records to clarify that individuals considered "non-crew" for the purposes of this system may include passenger records, as well as organizations; and removing routine use (M) because it is not compatible with the original purpose for collection of the records. Further DHS/USCG is updating the retention period and disposal standards to reflect that

records will follow the same retention schedule despite their storage in a classified environment; and modify the notification procedures to confirm that regardless of record storage on a classified environment, DHS/USCG will review all replicated records; and update the system manager and mailing address to reflect the new mail stop.

Consistent with DHS's information sharing mission, information stored in this system of records may be shared with other DHS components that have a need to know the information to carry out their national security, law enforcement, immigration, intelligence, or other homeland security functions and missions. In addition, DHS/USCG may share information with appropriate federal, state, local, tribal, territorial, foreign, or international government agencies consistent with the routine uses set forth in this system of records notice.

The Coast Guard is issuing a new Notice of Proposed Rulemaking (NPRM) to clarify the exemptions for this system concurrently with this notice. This updated system will be included in DHS's inventory of record systems.

II. Privacy Act

The Privacy Act embodies fair information practice principles in a statutory framework governing the means by which Federal Government agencies collect, maintain, use, and disseminate individuals' records. The Privacy Act applies to information that is maintained in a "system of records." A "system of records" is a group of any records under the control of an agency from which information is retrieved by the name of an individual or by some identifying number, symbol, or other identifying particular assigned to the individual. In the Privacy Act, an individual is defined to encompass U.S. citizens and lawful permanent residents. As a matter of policy, DHS extends administrative Privacy Act protections to all individuals when systems of records maintain information on U.S. citizens, lawful permanent residents, and visitors.

Below is the description of the DHS/USCG-029 Notice of Arrival and Departure System of Records.

In accordance with 5 U.S.C. 552a(r), DHS has provided a report of this system of records to the Office of Management and Budget and to Congress.

System of Records

Department of Homeland Security (DHS)/United States Coast Guard (USCG)-029

System name:

DHS/USCG-029 Notice of Arrival and Departure System of Records

SECURITY CLASSIFICATION:

Unclassified. The data may be retained on classified networks but this does not change the nature and character of the data until it is combined with classified information.

SYSTEM LOCATION:

The United States Coast Guard (USCG) maintains records in the operational system at the USCG Operations Systems Center, Kearneysville, West Virginia (WV), and in disaster recovery backup systems in other USCG field locations. USCG maintains records associated with this function in the Ship Arrival Notification System (SANS) operational information technology (IT) system.

DHS replicates records from the operational IT system and maintains them in other IT systems connected on the DHS unclassified and classified networks.

CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:

Categories of individuals covered by this notice include:

- Crew members who arrive or depart the United States by sea; and
- Other individuals or organizations associated with a vessel and whose information is submitted as part of a notice of arrival or notice of departure, such as vessel owners, operators, charterers, reporting parties, 24-hour contacts, company security officers, and passengers who arrive and depart the United States by sea.

CATEGORIES OF RECORDS IN THE SYSTEM:

- Records on vessels include: Name of vessel; name of registered owner; country of registry; call sign; International Maritime Organization (IMO) number or, if a vessel does not have an IMO number the official number; name of the operator; name of charterer; and name of classification society.
- Records on arrival information pertaining to the voyage include: Names of last five foreign ports or places the vessel visited; dates of arrival and departure for last five foreign ports or places it visited; for each port or place in the United States the vessel will visit, the name of the receiving facility; for the port or place in the United States the estimated date and time of arrival; for the port or place in the United States the estimated date and time of departure; the location (port or place and country) or position (latitude and longitude or

waterway and mile marker) of the vessel at the time of reporting; and the name and telephone number of a 24-hour point of contact (POC). This individual may be a crew or non-crew member.

- Records on departure information pertaining to the voyage include: The name of the departing port or waterway of the United States; the estimated date and time of departure; next port or place of call (including foreign); the estimated date and time of arrival at the next port or place of call; and the name and telephone number of a 24-hour POC.

- Records about crewmembers includes: Full name; date of birth; nationality; identification type (e.g., passport, U.S. Alien Registration Card, U.S. Merchant Mariner Document, foreign mariner document, government-issued picture identification (ID) (Canada) or (United States)); identification issue and expiration dates; position or duties on the vessel; location where the crewmember embarked (list port or place and country); and location where the crewmember will disembark.

- Records about "other individuals associated with a vessel and whose information is submitted as part of a notice of arrival or notice of departure" (e.g., passenger information) includes: Full name; date of birth; nationality; identification type (e.g., passport, U.S. Alien Registration Card, government-issued picture ID); identification number, issuing country, issue date, expiration date; U.S. address information; and location where the individual embarked (list port or place and country).

- Records related to cargo onboard the vessel include: A general description of cargo other than Certain Dangerous Cargo (CDC) onboard the vessel (e.g., grain, container, oil); name of each CDC carried, including United Nations (UN) number, if applicable; and amount of each CDC carried.

- Records regarding the operational condition of equipment required by 33 Code of Federal Regulations (CFR) part 164 include: The date of issuance for the company's document of compliance certificate; the date of issuance of the vessel's safety management certificate; and the name of the flag administration, or recognized organization(s) representing the vessel flag administration that issued those certificates.

AUTHORITY FOR MAINTENANCE OF THE SYSTEM:

The Secretary of the Department of Homeland Security has delegated to the Coast Guard authority from the Ports and Waterways Safety Act (33 U.S.C. 1221 *et se.*). See specifically 33 U.S.C.

1223(a)(5), 1225, and 1231; 46 U.S.C. 3717; 46 U.S.C. 12501; the Maritime Transportation Act of 2002, Pub. L. 107–295; the Homeland Security Act of 2002, Public Law 107–296; 33 CFR part 160; and 36 CFR chapter XII.

PURPOSE(S):

The purpose of this system is to maintain NOAD information to improve navigation safety, enhance the Coast Guard's ability to identify and track vessels, and heighten the Coast Guard's overall situational and maritime domain awareness (MDA), which will enhance mariner's navigation safety and the Coast Guard's ability to address threats to maritime transportation security.

DHS maintains a replica of some or all of the NOAD data in operational IT systems residing on unclassified and classified DHS networks to allow for analysis and vetting consistent with the above stated purposes and this published notice.

ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND THE PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under 5 U.S.C. 552a(b) of the Privacy Act, all or a portion of the records or information contained in this system may be disclosed outside DHS as a routine use pursuant to 5 U.S.C. 552a(b)(3) as follows:

A. To the Department of Justice (DOJ), including Offices of the U.S. Attorneys, or other federal agency conducting litigation or in proceedings before any court, adjudicative, or administrative body, when it is relevant or necessary to the litigation and one of the following is a party to the litigation or has an interest in such litigation:

1. DHS or any component thereof;
2. Any employee or former employee of DHS in his/her official capacity;
3. Any employee or former employee of DHS in his/her individual capacity when DOJ or DHS has agreed to represent the employee; or
4. The United States or any agency thereof.

B. To a congressional office from the record of an individual in response to an inquiry from that congressional office made at the request of the individual to whom the record pertains.

C. To the National Archives and Records Administration (NARA) or General Services Administration pursuant to records management inspections being conducted under the authority of 44 U.S.C. 2904 and 2906.

D. To an agency or organization for the purpose of performing audit or oversight operations as authorized by

law, but only such information as is necessary and relevant to such audit or oversight function.

E. To appropriate agencies, entities, and persons when:

1. DHS suspects or has confirmed that the security or confidentiality of information in the system of records has been compromised;

2. DHS has determined that as a result of the suspected or confirmed compromise, there is a risk of identity theft or fraud, harm to economic or property interests, harm to an individual, or harm to the security or integrity of this system or other systems or programs (whether maintained by DHS or another agency or entity) that rely upon the compromised information; and

3. The disclosure made to such agencies, entities, and persons is reasonably necessary to assist in connection with DHS's efforts to respond to the suspected or confirmed compromise and prevent, minimize, or remedy such harm.

F. To contractors and their agents, grantees, experts, consultants, and others performing or working on a contract, service, grant, cooperative agreement, or other assignment for DHS, when necessary to accomplish an agency function related to this system of records. Individuals provided information under this routine use are subject to the same Privacy Act requirements and limitations on disclosure as are applicable to DHS officers and employees.

G. To an appropriate federal, state, tribal, local, international, or foreign law enforcement agency or other appropriate authority charged with investigating or prosecuting a violation or enforcing or implementing a law, rule, regulation, or order, when a record, either on its face or in conjunction with other information, indicates a violation or potential violation of law, which includes criminal, civil, or regulatory violations and such disclosure is proper and consistent with the official duties of the person making the disclosure.

H. To federal and foreign government intelligence or counterterrorism agencies or components if USCG becomes aware of an indication of a threat or potential threat to national or international security, or if such use is to assist in anti-terrorism efforts and disclosure is appropriate to the proper performance of the official duties of the person making the disclosure.

I. To an organization or individual in either the public or private sector, foreign or domestic, if there is a reason to believe that the recipient is or could become the target of a particular

terrorist activity or conspiracy, to the extent the information is relevant to the protection of life, property, or other vital interests of a data subject and disclosure is proper and consistent with the official duties of the person making the disclosure;

J. To appropriate federal, state, local, tribal, territorial, or foreign governmental agencies or multilateral governmental organizations for the purpose of protecting the vital interests of a data subject or other persons, USCG will provide appropriate notice of any identified health threat or risk to assist such agencies or organizations in preventing exposure to or transmission of a communicable or quarantined disease or for combating other significant public health threats;

K. To a court, magistrate, or administrative tribunal in the course of presenting evidence, including disclosures to opposing counsel or witnesses in the course of civil discovery, litigation, settlement negotiations, response to a subpoena, or in connection with criminal law proceedings;

L. To third parties during the course of a law enforcement investigation to the extent necessary to obtain information pertinent to the investigation, provided disclosure is appropriate in the proper performance of the official duties of the officer making the disclosure;

M. To appropriate federal, state, local, tribal, territorial, or foreign governmental agencies or multilateral governmental organizations if USCG is aware of a need to utilize relevant data for purposes of testing new technology and systems designed to enhance border security or identify other violations of law, provided disclosure is appropriate in the proper performance of the official duties of the person making the disclosure;

N. To the news media and the public, with the approval of the Chief Privacy Officer in consultation with counsel, when there exists a legitimate public interest in the disclosure of the information, when disclosure is necessary to preserve confidence in the integrity of DHS, or when disclosure is necessary to demonstrate the accountability of DHS's officers, employees, or individuals covered by the system, except to the extent the Chief Privacy Officer determines that release of the specific information in the context of a particular case would constitute an unwarranted invasion of personal privacy.

DISCLOSURE TO CONSUMER REPORTING**AGENCIES:**

None.

POLICIES AND PRACTICES FOR STORING, RETRIEVING, ACCESSING, RETAINING, AND DISPOSING OF RECORDS IN THE SYSTEM:**STORAGE:**

Records in this system are stored electronically in the operational IT system as well as on other IT systems residing on the unclassified and classified networks or on paper in secure facilities in a locked drawer behind a locked door. The records are stored on magnetic disc, tape, digital media, and CD-ROM.

USCG stores NOAD information electronically in the Ship Arrival Notice System (SANS) located at USCG Operations Systems Center in Kearneysville, WV. USCG uses an alternative storage facility for the SANS historical logs and system backups. Derivative NOAD system data may be stored on USCG Standard Workstation computers or USCG unit servers located at USCG Headquarters, headquarters units, area offices, sector offices, sector sub-unit offices, and other locations where USCG authorized personnel may be posted to facilitate DHS's mission.

RETRIEVABILITY:

USCG retrieves records from the SANS by vessel. Information from the retrieved records may then be extracted by name, passport number, or other unique personal identifier. NOAD information maintained in the SANS operational IT system is not directly retrievable by name or other unique personal identifier.

NOAD data that is replicated on the unclassified and classified DHS networks to allow for analysis and vetting consistent with the above stated purposes and this published notice may be retrieved by all core and extended biographic fields (e.g., full name; date of birth; nationality).

SAFEGUARDS:

USCG safeguards NOAD data in accordance with applicable laws, rules, and policies. All records are protected from unauthorized access through appropriate administrative, physical, and technical safeguards. These safeguards include role-based access provisions, restricting access to authorized personnel who have a need-to-know, using locks, and password-protection identification features. USCG file areas are locked after normal duty hours and the facilities are protected from the outside by security personnel. In addition, the system manager, in addition, has the capability to maintain

system back-ups for the purpose of supporting continuity of operations and the discrete need to isolate and copy specific data access transactions for the purpose of conducting security incident investigations. All communication links with the USCG datacenter are encrypted. The databases are Certified and Accredited in accordance with the requirements of the Federal Information Security Management Act (FISMA).

RETENTION AND DISPOSAL:

In accordance with NARA Disposition Authority number N1-026-05-11, NOAD information on vessels and individuals maintained in the SANS is destroyed or deleted when no longer needed for reference, or after ten years, whichever is later. Outputs, which include ad-hoc reports generated for local and immediate use to provide a variety of interested parties with necessary information are deleted after five years if they do not constitute a permanent record according to NARA. For example, in accordance with this schedule, USCG shares outputs with the Captain of the Port and marine safety offices, sea marshals, U.S. Customs and Border Protection, U.S. Immigration and Customs Enforcement require such information to set up security zones, schedule boarding and inspections activities, take actions for non-compliance with regulations, and other activities in support of USCG's mission to provide for safety and security of U.S. ports. Records replicated to IT systems residing on the unclassified and classified networks will also follow the same retention schedule.

SYSTEM MANAGER AND ADDRESS:

Commandant (CG-26), United States Coast Guard, 2703 Martin Luther King Jr. Ave. SE., Mail Stop 7301, Washington, DC 20593-0001.

NOTIFICATION PROCEDURE:

Individuals seeking notification of and access to any record contained in this system of records, or seeking to contest its content, may submit a request in writing to the Chief Privacy Officer and USCG's Freedom of Information Act (FOIA) Officer, whose contact information can be found at <http://www.dhs.gov/foia> under "Contacts." If an individual believes more than one component maintains Privacy Act records concerning him or herself, the individual may submit the request to the Chief Privacy Officer and Chief FOIA Officer, Department of Homeland Security, Washington, DC 20528-0655.

When seeking records about yourself from this system of records or any other

Departmental system of records, your request must conform with the Privacy Act regulations set forth in 6 CFR part 5. You must first verify your identity, meaning that you must provide your full name, current address, and date and place of birth. You must sign your request, and your signature must either be notarized or submitted under 28 U.S.C. 1746, a law that permits statements to be made under penalty of perjury as a substitute for notarization. While no specific form is required, you may obtain forms for this purpose from the Chief Privacy Officer and Chief FOIA Officer, <http://www.dhs.gov/foia> or 1-866-431-0486. In addition, you should:

- Explain why you believe the Department would have information on you;
- Identify which component(s) of the Department you believe may have the information about you;
- Specify when you believe the records would have been created; and
- Provide any other information that will help the FOIA staff determine which DHS component agency may have responsive records;

If your request is seeking records pertaining to another living individual, you must include a statement from that individual certifying his/her agreement for you to access his/her records.

Without the above information, the component(s) may not be able to conduct an effective search, and your request may be denied due to lack of specificity or lack of compliance with applicable regulations.

In processing requests for access to information in this system, the USCG will review not only the records in the operational IT system but also the records replicated on IT systems residing on the unclassified and classified networks; and provide appropriate access to the information based on this notice.

RECORD ACCESS PROCEDURES:

See "Notification procedure" above.

CONTESTING RECORD PROCEDURES:

See "Notification procedure" above.

RECORD SOURCE CATEGORIES:

USCG obtains NOAD records from vessel carriers and operators regarding passengers, crewmembers, and cargo that arrive in, depart from, or transit through the United States on a vessel carrier covered by notice of arrival and departure regulations.

EXEMPTIONS CLAIMED FOR THE SYSTEM:

No exemption shall be asserted with respect to information maintained in the

system that is collected from a person if that person, or his or her agent, seeks access or amendment of such information.

The Privacy Act, however, requires DHS to maintain an accounting of the disclosures made pursuant to all routines uses. Disclosing the fact that a law enforcement or intelligence agency has sought particular records may affect ongoing law enforcement activities. The Secretary of Homeland Security, pursuant to 5 U.S.C. 552a(j)(2), exempted this system from the following provisions of the Privacy Act: Sections (c)(3), (e)(8), and (g) of the Privacy Act of 1974, as amended, as is necessary and appropriate to protect this information. Further, DHS has exempted section (c)(3) of the Privacy Act of 1974, as amended, pursuant to 5 U.S.C. 552a(k)(2) as is necessary and appropriate to protect this information.

Dated: November 16, 2015.

Karen L. Neuman,

Chief Privacy Officer, Department of Homeland Security.

[FR Doc. 2015-30303 Filed 11-25-15; 8:45 am]

BILLING CODE 9110-04-P

DEPARTMENT OF HOMELAND SECURITY

United States Immigration and Customs Enforcement

Agency Information Collection Activities: Revision Notice; Student and Exchange Visitor Information System Forms I-20

ACTION: 30-Day notice of Information collection for review; Form No. I-20; Certificate of Eligibility for Nonimmigrant (F-1) Student Status—For Academic and Language Students, and the Form I-20, Certificate of Eligibility for Nonimmigrant (M-1) Student Status—For Vocational Students; OMB Control No. 1653-0038.

The Department of Homeland Security (DHS), U.S. Immigration and Customs Enforcement (ICE), is submitting the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection is published in the **Federal Register** (FR) to obtain comments from the public and affected agencies.

Written comments and suggestions regarding items contained in this notice should be directed to the Department of Homeland Security, Scott Elmore, Forms Management Office, U.S. Immigration and Customs Enforcement,

801 I Street NW., Mailstop 5800, Washington, DC 20536-5800.

SUMMARY: This FR notice pertains to all schools certified to enroll F-1 and/or M-1 nonimmigrant students. DHS's Student and Exchange Visitor Program (SEVP) performs and manages these certifications, as well as oversees the F-1 and M-1 students. SEVP uses the Form I-20, Certificate of Eligibility for Nonimmigrant (F-1) Student Status—For Academic and Language Students, and the Form I-20, Certificate of Eligibility for Nonimmigrant (M-1) Student Status—For Vocational Students, which are issued solely through the Student and Exchange Visitor Information System (SEVIS), as an instrument to facilitate the oversight process and to document student eligibility for nonimmigrant benefits. The Forms I-20 are being modified to reflect current DHS branding, remove obsolete information, and modernize the forms' layout to improve readability. The old Forms I-20 sunset on July 1, 2016; after that date, they will no longer be accepted at ports-of-entry, nor suffice for any other nonimmigrant benefit application by either F-1 and M-1 students or their F-2 and M-2 accompanying dependents.

Authority: The authority for DHS/SEVP to manage the program comes from the following sources:

- Sections 101(a)(15)(F)(i) and (M)(i), of the Immigration and Nationality Act of 1952 (INA), as amended (Pub. L. 82-414, 66 Stat. 163, June 27, 1952), codified under Title 8 of the United States Code (U.S.C.) 1101(a)(15)(F) and (M), under which a foreign national may be admitted to the United States in nonimmigrant status as

- A student to attend an SEVP-certified academic school or language training program (F-1),

- A student to attend an SEVP-certified vocational or other recognized nonacademic institution (M-1), respectively, or

- An accompanying F-2 or M-2 dependent spouse or minor child, respectively.

- Section 641 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, Public Law 104-208, Div. C, 110 Stat. 3009-546, September 30, 1996, codified at 8 U.S.C. 1372, which authorized the following:

- Creation of a program to collect current and ongoing information provided by schools regarding F or M nonimmigrants during the courses of their stay in the United States.

- Use of electronic reporting technology where practicable.

- DHS certification of schools to participate in F-1 or M-1 student enrollment.

- Section 416(b) of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001, Public Law 107-56, 115 Stat. 272, October 26, 2001 (USA PATRIOT Act), as amended, which provides for the collection of alien date of entry and port of entry information of aliens whose information is collected under 8 U.S.C. 1372.

- Homeland Security Presidential Directive No. 2 (HSPD-2), Combating Terrorism Through Immigration Policies, which requires DHS to “conduct periodic reviews of all institutions certified to receive nonimmigrant students.” “These reviews shall include checks for compliance with record keeping and reporting requirements” and authorize the termination of certification for institutions that fail to comply. 37 Weekly Comp. Pres. Docs. 1570, 1571-72 (Oct. 29, 2001).

- Section 502 of the Enhanced Border Security and Visa Entry Reform Act of 2002, Public Law 107-173, 116 Stat. 543, May 14, 2002, codified at 8 U.S.C. 1762, which directs DHS to review compliance with recordkeeping and reporting requirements under 8 U.S.C. 1372 and INA section 101(a)(15)(F) and (M), 8 U.S.C. 1101(a)(15)(F) and (M), of all schools approved to receive F or M nonimmigrants within two years of enactment, and every two years thereafter.

Accordingly, as directed by DHS, SEVP certifies, reviews, recertifies and collects data from schools enrolling F-1 and M-1 students. The specific data collection requirements for SEVP-certified schools associated with these laws are identified comprehensively in the Code of Federal Regulations (CFR) at 8 CFR 214.3.

Under the combined mandates of the USA PATRIOT Act and HSPD-2, the U.S. Immigration and Naturalization Service (INS) received funding and accelerated the development of SEVIS. Soon after, the INS published rules in the FR implementing supporting modifications to 8 CFR 214, Nonimmigrant Classes. 67 FR 60107 (September 25, 2002); and 67 FR 76256, (December 11, 2002).

The Homeland Security Act of 2002, Public Law 107-296, 116 Stat. 2135 (codified at 6 U.S.C. Chapter 1) created DHS, which came into effect on March 1, 2003. DHS encompasses and replaces the INS. Simultaneously, DHS established ICE, now the second largest criminal investigations agency in the

U.S. government. ICE subsequently created SEVP to administer SEVIS.

How does this notice affect SEVP-certified schools?

SEVP-certified schools must replace old Forms I-20 with the new version, produced through SEVIS. All prospective and active F-1 and M-1 students and their accompanying F-2 and M-2 dependents must be issued and use the new Forms I-20 no later than June 30, 2016. SEVP will not approve additional time for schools to comply.

How does this notice affect F-1 and M-1 students and their F-2 and M-2 dependents?

All prospective and active F-1 and M-1 students and their accompanying F-2 and M-2 dependents must be issued and use new Forms I-20 no later than June 30, 2016. The old Forms I-20 will sunset on July 1, 2016. At that time, bearers of the old Forms I-20 will be denied admission at ports-of-entry; old Forms I-20 will not be accepted as supporting documentation with applications for other nonimmigrant benefits.

How is SEVIS used to support F and M nonimmigrant admission into, and oversight while in, the United States?

SEVIS is an internet-based reporting and tracking system that is accessible by U.S. government agencies involved in the admission and oversight of nonimmigrants in the United States, as well as by authorized officials at SEVP-certified schools and Department of State (DOS)-designated exchange visitor programs. Data and information on F and/or M nonimmigrants are maintained in SEVIS, collected during the admission process and throughout the length of their stay in the United States. Foreign students who wish to study in the United States must first apply to an SEVP-certified school. When a foreign student accepts an offer to study, a designated school official at the applicable school will access SEVIS to enter the relevant student and accompanying dependent information electronically prior to issuing a Form I-20 to each individual that will be applying for admission into the United States. Authorized consular officials use SEVIS data through an interface to the DOS Consolidated Consular Database to support the visa issuance process, and to report associated F and/or M visa issuances to DHS. U.S. Customs and Border Protection officials access SEVIS information at ports-of-entry to verify or clarify a prospective F or M nonimmigrant's entry eligibility.

Dated: November 18, 2015.

BILLING CODE 9111-28-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-5828-N-48]

Federal Property Suitable as Facilities To Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This Notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for use to assist the homeless.

FOR FURTHER INFORMATION CONTACT:

Juanita Perry, Department of Housing and Urban Development, 451 Seventh Street SW., Room 7266, Washington, DC 20410; telephone (202) 402-3970; TTY number for the hearing- and speech-impaired (202) 708-2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 800-927-7588.

SUPPLEMENTARY INFORMATION: In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless v. Veterans Administration*, No. 88-2503-OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, and suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the

homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Where property is described as for "off-site use only" recipients of the property will be required to relocate the building to their own site at their own expense. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to: Ms. Theresa M. Ritta, Chief Real Property Branch, the Department of Health and Human Services, Room 5B-17, Parklawn Building, 5600 Fishers Lane, Rockville, MD 20857, (301) 443-2265 (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1-800-927-7588 for detailed instructions or write a letter to Ann Marie Oliva at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: GSA: Mr. Flavio Peres, General Services Administration, Office of Real Property Utilization and Disposal, 1800 F Street NW., Room 7040, Washington, DC 20405, (This is not a toll free number).

Dated: November 19, 2015.

Brian P. Fitzmaurice,

Director, Division of Community Assistance, Office of Special Needs Assistance Programs.

BILLING CODE 4210–67–P**DEPARTMENT OF THE INTERIOR****Bureau of Indian Affairs**

[167A2100DD/AAKC001030/
AOA501010.999900]

**Receipt of Documented Petitions for
Federal Acknowledgment of American
Indian Tribes**

AGENCY: Bureau of Indian Affairs,
Interior.

ACTION: Notice.

SUMMARY: Under Part 83 of Title 25 of
the Code of Federal Regulations (25 CFR
part 83), the Department of the Interior
(Department) gives notice of three
groups that have each filed a
documented petition for Federal
acknowledgment as an American Indian
tribe with the Assistant Secretary—
Indian Affairs. The Department seeks
comment and evidence from the public
on the petitions listed below.

DATES: Comments and evidence must be
postmarked March 28, 2016.

ADDRESSES: Copies of the narrative
portion of the documented petitions, as
submitted by the petitioner (with any
redactions appropriate under
§ 83.21(b)), and other information are
available at the Office of Federal
Acknowledgment's (OFA) Web site:
www.bia.gov/WhoWeAre/AS-IA/OFA.
Submit any comments or evidence to:
Mr. R. Lee Fleming, Director, Office of
Federal Acknowledgment, U.S.
Department of the Interior, MS–34B–
SIB, 1951 Constitution Avenue NW.,
Washington, DC 20240 or by email to:
lee.fleming@bia.gov.

FOR FURTHER INFORMATION CONTACT: Mr.
R. Lee Fleming, OFA Director, Office of
the Assistant Secretary—Indian Affairs,
(202) 513–7650.

SUPPLEMENTARY INFORMATION: On July
31, 2015, the Department's revisions to
25 CFR part 83 became final and
effective (80 FR 37861). A key goal of
the revisions was to improve
transparency through increased notice
of petitions and providing improved
public access to petitions. Today the
Department informs the public that
three documented petitions have been
submitted under the current regulations,
that portions of those petitions are
publically available on the Web site
identified below for easy access, and
that we are seeking public comment
early in the process on these petitions.

Pursuant to the regulations, OFA
notified 15 groups that the Department
had identified them as having
previously submitted complete
documented petitions, under the 1994
acknowledgment regulations, which had

not yet received final agency decisions. Section 83.7 of the regulations allow petitioners that have submitted a complete documented petition but have not yet received a final agency decision to choose whether to proceed applying those standards and processes set forth in the current regulations or the standards and processes of the superseded regulations; 25 CFR part 83, revised as of February 25, 1994 (59 FR 9280). This notice informs the public that three petitioners have submitted complete documented petitions and are proceeding under the standards and processes set forth in the current regulations. Two of these petitioners elected not to supplement their petitions, and one elected to supplement its petition and did so immediately.

Under § 83.22(b)(1), OFA publishes notice that the following groups have each filed a documented petition for Federal acknowledgment as American Indian tribes to the Assistant Secretary—Indian Affairs:

- Muscogee Nation of Florida
 - c/o Ms. Ann D. Tucker, 278 Church Road, Bruce, Florida 32455;
- Piro/Manso/Tiwa Indian Tribe of the Pueblo of San Juan Guadalupe
 - c/o Mr. Edward Roybal, II, 4048 Calle De Estrellas, Las Cruces, New Mexico 88012; and
- Fernandño Tataviam Band of Mission Indians
 - c/o Mr. Rudy Ortega, Jr., 1019 Second Street, #1, San Fernando, California 91340.

Under § 83.22, OFA also publishes on its Web site the following:

- (i) The name, location, and mailing address of the petitioner and other information to identify the entity;
- (ii) The date of receipt;
- (iii) The narrative portion of the documented petition, as submitted by the petitioner (with any redactions appropriate under § 83.21(b));
- (iv) The opportunity for individuals and entities to submit comments and evidence supporting or opposing the petitioner's request for acknowledgment within 120 days of the date of the Web site posting (postmarked by the date in the **DATES** section of this notice); and
- (v) The opportunity for individuals and entities to request to be kept informed of general actions regarding a specific petitioner.

Additionally, OFA is required under § 83.22(c) to publish on the Web site other portions of the documented petition, to the extent feasible and allowable under Federal law, except documentation and information protectable from disclosure under

Federal law, as identified by Petitioner under § 83.21(b) or otherwise.

The Department publishes this notice and request for comment in the exercise of authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs by 209 DM 8.

Dated: November 20, 2015.

Kevin K. Washburn,

Assistant Secretary—Indian Affairs.

Gila River Indian Community; Amendments to Alcoholic Beverages Ordinance

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice.

SUMMARY: This notice publishes two comprehensive amendments to the Gila River Indian Community's Title 14 Alcoholic Beverages Ordinance. This Ordinance amends and supersedes the existing Gila River Indian Community Control Ordinance, Ordinance No. GR–03–05, enacted by the Gila River Indian Community Council in 2005.

DATES: This ordinance shall become effective 30 days after November 27, 2015.

FOR FURTHER INFORMATION CONTACT:

Ms. Sharlot Johnson, Tribal Government Services Officer, Western Regional Office, Bureau of Indian Affairs, 2600 North Central Avenue, Phoenix, AZ 85004, Telephone: (602) 379–6786, Fax: (602) 379–4100; or Ms. Laurel Iron Cloud, Chief, Division of Tribal Government Services, Office of Indian Services, Bureau of Indian Affairs, 1849 C Street NW., MS–4513–MIB, Washington, DC 20240, Telephone: (202) 513–7641.

SUPPLEMENTARY INFORMATION: Pursuant to the Act of August 15, 1953, Public Law 83–277, 67 Stat. 586, 18 U.S.C. 1161, as interpreted by the Supreme Court in *Rice v. Rehner*, 463 U.S. 713 (1983), the Secretary of the Interior shall certify and publish in the **Federal Register** notice of adopted liquor control ordinances for the purpose of regulating liquor transactions in Indian country. On October 7, 2009, the Gila River Indian Community Council duly adopted the amendments to the Community's Title 14—Alcoholic Beverages Ordinance by Ordinance GR–

15–09. On January 7, 2015, the Gila River Indian Community Council duly adopted additional amendments to the Community's Title 14—Alcoholic Beverages Ordinance by Ordinance GR–01–15. This **Federal Register** Notice comprehensively amends and supersedes the existing Gila River Indian Community Control Ordinance, Ordinance No. GR–03–05, enacted by the Gila River Indian Community Council, which was published in the **Federal Register** on November 9, 2005 (70 FR 68071).

This notice is published in accordance with the authority delegated by the Secretary of the Interior to the Assistant Secretary—Indian Affairs. I certify that the Gila River Indian Community Council of the Gila River Indian Community duly adopted these amendments to the Community's Title 14—Alcoholic Beverages Ordinance on October 7, 2009 and January 7, 2015.

Dated: November 17, 2015.

Kevin Washburn,

Assistant Secretary—Indian Affairs.

The Gila River Indian Community's Title 14—Alcoholic Beverages Ordinance, as amended, shall read as follows:

TITLE 14

Effect of Suspension or****Revocation of State License.****14.504. Effective Date.****CHAPTER 1. LEGALIZING ALCOHOLIC BEVERAGES****14.101. Permission to Introduce, Possess, Store and Sell Alcoholic Beverages.**

Members of the Gila River Indian Community and other persons are hereby authorized to introduce, possess, store and sell alcoholic beverages in accordance with all Community ordinances, rules, and regulations, and state and federal law to the extent they apply. Such possession, storage, and sale is permitted in these enumerated situations:

A. Possession of alcoholic beverages is permitted throughout the Gila River Indian Reservation.

B. Locations for Introduction, Storage and Sale of Alcoholic Beverages. The introduction, storage, and sale of alcoholic beverages is permitted upon application to and approval by the Gila River Indian Community Council, as further described in section 14.202 of this title. Such permission shall apply to a corridor extending one-half mile on either side of centerline of Interstate 10, where it crosses the Reservation, and in the following areas: parcels within Township 2 South, Range 4 East of the Gila and Salt River Base and Meridian, a part of the Gila River Indian Reservation located in Arizona.

1. More Particularly: The True Point of Beginning at a point of the North line of said Township 2 South, Range 4 East on the centerline of Interstate 10, thence westerly on said Township line to a Point on a line which is one-half mile westerly and parallel to the Interstate 10 centerline, thence southerly on said one-half mile line to a point on the centerline of the Broad acres Canal, thence southwesterly on said canal centerline to the North-South midsection line of Section 6, Township 2 South, Range 4 East, thence south on the midsection lines of Sections 6, 7 and 18 to the center point of Section 18, Township 2 South, Range 4 East, thence easterly on the East-West midsection lines of Sections 18, 17 and 16 to the centerline of said Interstate 10, thence northwesterly along said centerline to the North line of said Township 2 South, Range 4 East, the true Point of Beginning;

2. Together With: A parcel of which the True Point of Beginning is the Northeast corner of Section 4, of said Township 2 South, Range 4 East, thence westerly on the North line of Township 2 South, Range 4 East, to the Easterly right-of-way line of Interstate 10, thence southeasterly on said right-of-way line to the south section line of Section 9, Township 2 South, Range 4 East, thence east on said Section 9 south section line to the southeast corner of Section 9, thence northerly on the east section lines of Section 9 and Section 4, Township 2 South, Range 4 East to the True Point of Beginning;

3. Also Together With: The property as described within the Memorial Airport lease, all in Township 2 South, Range 4 East of the Gila and Salt River Base and Meridian, to wit:

4. Also together with: A parcel of land commonly referred to as the "Wild Horse Pass Development Area", situated within the SE1/4 of the SE1/4 of Section 1, the E1/2 of the NE1/4 and SE1/4 of Section 12, NE1/4 of the NE1/4 of Section 13, Township 2 South, Range 3 East, the S1/2 of the SW1/4 of Section 5, the S1/2 of the SW1/4 and SE1/4 of Section 6, all of Section 7, W1/2 of Section 8, N1/2 of the NW1/4 of Section 17, N1/2 of the NW1/4 and NE1/4 of Section 18, Township 2 South, Range 4 East of the Gila and Salt River and Base and Meridian.

C. Introduction, Storage, Sale of Alcoholic Beverages at Other Locations. The introduction, storage, and sale of alcoholic beverages on any part of the Reservation other than in the areas

described in Subsection 14.101.B is permitted upon application to and approval by the Gila River Indian Community Council as further described in section 14.202; provided that the council shall not approve the application until the affected District has voted to recommend approval of the application. The vote described in this paragraph shall occur at a regular meeting of the affected District, and shall require the Community members residing in the affected District, who are present and vote at such regular meeting, to recommend approval of the application by majority vote.

D. The Gila River Indian Community Council may adopt further resolutions as may be necessary to implement this title.

14.102. Definitions.

A. In this title, unless the context otherwise requires:

1. *Beer* means any beverage obtained by the alcoholic fermentation, infusion, or decoction of barley malt, hops, or other ingredients not drinkable, or any combination thereof.

2. *Broken package* means any container of spirituous liquor on which the United States tax seal has been broken or removed, or from which the cap, cork, or seal placed thereupon by the manufacturer has been removed.

3. *Club* includes any of the following organizations where the sale of spirituous liquor for consumption on the premises is made to members only:

a. A post, chapter, camp, or other local unit composed solely of veterans and its duly recognized auxiliary which has been chartered by the Congress of the United States for patriotic, fraternal, or benevolent purposes and which has, as the owner, lessee, or occupant, operated an establishment for that purpose within the Reservation.

b. A chapter, aerie, parlor, lodge, or other local unit of an American national fraternal organization which has as the owner, lessee or occupant operated an establishment for fraternal purposes within the Reservation. An American national fraternal organization as used in this subdivision shall actively operate in not less than 36 states or have been in active continuous existence for not less than 20 years.

c. A hall or building association of a local unit mentioned in subdivisions 1 and 2 of this paragraph, all of the capital stock of which is owned by the local unit or the members, and which operates the clubroom facilities of the local unit.

d. A golf club which has more than 50 bona fide members which owns, maintains, or operates a bona fide golf

links together with a clubhouse. A social club which has more than 50 bona fide members who are actual residents of the county in which it is located, that owns, maintains or operates club quarters, is authorized and incorporated to operate as a non-profit club under the laws of this Community, and has been continuously incorporated and operating for a period of not less than one year. The club shall have had, during this one-year period, a bona fide membership with regular meetings conducted at least once each month and the membership shall be and shall have been actively engaged in carrying out the objectives of the club. The club's membership shall consist of bona fide dues paying members paying at least \$6.00 per year, payable monthly, quarterly, or annually, which have been recorded by the secretary of the club, and the members at the time of application for a club license shall be in good standing having for at least one full year paid dues. At least 51 percent of the members shall have signified their intention to secure a social club license by personally signing a petition, on a form prescribed by the Committee, which shall also include the correct mailing address of each signer. The petition shall not have been signed by a member at a date earlier than 30 days prior to the filing of the petition. It is the intent of this paragraph that a license shall not be granted to a club which is, or has been primarily formed or activated to obtain a license to sell liquor, but solely to a bona fide club, where the sale or liquor is incidental to the main purposes of the club.

4. *Committee* means the Government and Management Standing Committee, a committee of the Gila River Indian Community Council.

5. *Community* means the Gila River Indian Community.

6. *Company* or *association* when used in reference to a corporation includes successors or assigns.

7. *Council* means the Gila River Indian Community Council.

8. *License* means a license or an interim retail permit issued pursuant to the provisions of this title.

9. *Off-sale retailer* means any person operating a bona fide regularly established retail liquor store selling spirituous liquors, wines and beer, and any established retail store selling commodities other than spirituous liquors and engaged in the sale of spirituous liquors only in the original package, to be taken away from the premises of the retail and to be consumed off the premises.

10. *On-sale retailer* means any person operating an establishment where

spirituous liquors are sold in the original container for consumption on or off the premises or in individual portions for consumption on the premises.

11. *Premises* or *licensed premises* means the area from which the licensee is authorized to sell, dispense, or serve spirituous liquors under the provisions of the license.

12. *Person* includes partnership, limited liability company, association, company, or corporation, as well as a natural person.

13. *Reservation* means the Gila River Indian Reservation, located in the counties of Maricopa and Pinal in the State of Arizona.

14. *Sell* includes soliciting and receiving an order for, keeping or exposing for sale, directly or indirectly delivering for value, peddling, or keeping with the intent to sell and trafficking in.

15. *Spirituous liquor* includes alcohol, brandy, whiskey, rum, tequila, mescal, gin, wine, porter, ale, beer, any malt liquor or beverage, absinthe, a compound or mixture of any of them with any vegetable or other substance, alcohol bitters, bitters containing alcohol, any liquid mixture or preparation, whether patented or otherwise, which produces intoxication, fruits preserved in ardent spirits, and beverages containing more than one-half of one percent of alcohol by volume.

16. *Vehicle* means any means of transportation by land, water, or air, and includes everything made up of in any way for such transportation.

17. *Wine* means the product obtained by the fermentation of grapes or other agricultural products containing natural or added sugar or any such alcoholic beverages fortified with grape brandy and containing not more than 24 percent alcohol by volume.

CHAPTER 2. JURISDICTION, LICENSING, AND EXEMPTIONS

14.201. Jurisdiction of Community Court.

The Gila River Indian Community Court is vested with original jurisdiction to hear and decide all matters arising pursuant to his article.

14.202. Liquor License Applications.

Liquor license applications shall be filed with the Government and Management Standing Committee of the Gila River Indian Community Council.

A. The Committee shall review all liquor license applications and provide the Community Council with a recommendation as to the disposition of the application. A spirituous liquor

license shall be issued only after a satisfactory showing of the capability, qualifications and reliability of the applicant and, with the exception of club licenses, that the public convenience requires and that the best interests of the Community will be substantially served by the issuance.

B. All applications shall be referred to the District in which the applicant seeks to do business, except for applications in which the applicant will conduct business within the areas referenced in section 14.101.B., of this title, which do not require District approval.

C. License Issuance Contingent Upon Possession of Gila River Indian Community Business License. Any person or organized business entity that applies for a liquor license to manufacture, sell, or deal in spirituous liquors within the exterior boundaries of the Gila River Indian Reservation shall possess a Community Business License before being issued a liquor license.

D. License Issuance Contingent Upon Possession of Arizona Liquor License. Issuance of a Community Liquor License shall be contingent upon the applicant obtaining a liquor license of the same type from the Department of Liquor Licenses and Control of the State of Arizona.

14.203. Scope of Liquor License.

A license issued under this title shall permit the licensee to manufacture, sell, or deal in spirituous liquors only at the place and in the manner provided therein, and a separate license shall be issued for each specific business. Each license shall specify the:

A. Particular spirituous liquors which the licensee is authorized to manufacture, sell, or deal in.

B. Licensee's mailing and physical address and business or trade name.

C. Purpose for which the spirituous liquors shall be manufactured or sold.

14.204. Transfer of Liquor License.

No Community license shall be transferred without the prior written consent of the Gila River Indian Community Council.

14.205. Expiration of Liquor License.

Every license expires annually, measured from the date of issuance.

A. A licensee who fails to renew the license on or before the due date shall pay a penalty of \$100.00 with their application for renewal.

B. A license renewal application that is deposited, properly addressed, and postage prepaid in an official depository of the United States mail on or before the due date shall be deemed filed and received by the Committee on the date

shown by the postmark or other official mark of the United States Postal Service.

C. If the due date falls on a Saturday, Sunday, or other Community-recognized holiday, the renewal shall be deemed timely if received by the Committee on the next business day.

D. A licensee who fails to renew the license on or before the due date shall not sell, purchase, or otherwise deal in spirituous liquor until the license is renewed.

E. A license not renewed within 20 working days after the due date shall be deemed terminated.

14.206. Exemptions from License Requirement.

This title shall not apply to drugstores selling spirituous liquors only upon prescription or to ethyl alcohol used for the following purposes:

A. Scientific, chemical, mechanical, industrial, and medicinal purposes.

B. Use by those authorized to procure spirituous liquor or ethyl alcohol tax-free, as provided by the acts of Congress and regulations promulgated thereunder.

C. In the manufacture of denatured alcohol produced and used as provided by the acts of Congress and regulations promulgated thereunder.

D. In the manufacture of patented, patent, proprietary, medicinal, pharmaceutical, antiseptic toilet, scientific, chemical, mechanical and industrial preparations or products, unfit and not used for beverage purposes.

E. In the manufacture of flavoring extracts and unfit for beverage purposes.

CHAPTER 3. LICENSE FEES

14.301. Disposition of License Fees and Fines.

All license fees and fines collected under this title shall be paid to the Community Treasurer's Office and deposited in the Gila River Indian Community's general fund, unless otherwise directed by Community Council resolution.

14.302. Fees for Liquor License.

All applications for liquor licenses shall include full payment of the fees described herein. Original license application fees shall be refunded to the applicant if the application is denied.

A. Application Fees For An Original Community License.

1. Distiller's, Brewer's, or Vintner's license: \$100.00.

2. Wholesaler's license to sell spirituous liquors: \$100.00.

3. On-sale retailer's license to sell all spirituous liquors in individual portions and in the original container: \$100.00.

4. Off-sale retailer's license to sell all spirituous liquors: \$100.00.

5. Club license issued in the name of a bona fide club qualified under this title to sell all liquors on-sale: \$1,000.00.

6. Hotel-motel license issued as such to sell and serve spirituous liquors solely for consumption on the licensed premises of the hotel or motel: \$1,000.00.

7. Restaurant license issued to sell and serve spirituous liquors solely for consumption on the licensed premises of the restaurant: \$1,000.00.

B. Renewal Fees.

1. Distiller's, Brewer's, or Vintner's license: \$300.00.

2. Wholesaler's license to sell all spirituous liquors: \$250.00.

3. On-sale retailer's license to sell all spirituous liquors by individual portions and in the original containers: \$150.00.

4. Off-sale retailer's license to sell all spirituous liquors: \$50.00.

5. Hotel-motel license issued as such to sell and serve spirituous liquors solely for consumption on the licensed premises of the hotel or motel: \$250.00.

6. Restaurant license issued to sell and serve spirituous liquors solely for consumption on the licensed premises of the restaurant: \$250.00.

C. Transfer Fees. Licenses may be transferred to another licensee only on approval from the Community Council as stated in section 14.204 of this title.

1. Distiller or Brewer's license: \$500.00.

2. Vintner's license: \$300.00.

3. Wholesaler's license to sell all spirituous liquors: \$200.00.

4. On-sale retailer's license to sell all spirituous liquors by individual portions and in the original containers: \$300.00.

5. Off-sale retailer's license to sell all spirituous liquors: \$100.00.

6. Site Transfer Fee. Persons or business organizations who wish to retain their license but transfer their business to another site may do so after paying a site transfer fee of \$25.00.

D. Seasonal Business. Where the business of an on-sale retail licensee is seasonal, extending for periods of less than six months in a calendar year, the licensee may designate the periods of his operation and be granted a license for a period not to exceed six months. The fees for any license granted pursuant to this subsection shall be one-half of the fee listed in subsection 14.302.A., B., or C.

E. Licenses Issued After July 1. Any application, renewal, or transfer fee levied under this title after July 1 shall be reduced by one-half.

CHAPTER 4. ALCOHOL REGULATION

14.401. Registration of Stills.

A. Every person who possesses or otherwise exercises control of a still or distilling apparatus shall register it with the Committee under the rules and regulations the Committee may prescribe.

B. Every still or distilling apparatus not registered, and any mash, wort, or wash, for distillation or for the production of spirits or alcohol, and all finished products, together with all personal property in the possession or custody of, or under the control of any person which may be used in the manufacture or transportation of spirituous liquors which is found in the building, yard, or enclosure connected with the building in which the unregistered still or distilling apparatus is located, shall be forfeited to the Community.

C. The still, distilling apparatus, mash, wort, wash or finished products shall forthwith be destroyed by an agency of the Committee, or other peace officer, and all personal property forfeited to the Committee shall be sold at public auction to the highest bidder for cash on five days' notice. Notice shall be posted at the Gila River Indian Community Court and at the District Service Center in the District where the still and associated personal property were seized. All publication and sale expenses shall be deducted from the sale proceeds and the balance will be paid into the Gila River Indian Community general fund.

14.402. Close of Business.

No on-sale licensee shall lock, or permit to be locked, any entrance of his licensed establishment until all persons other than the licensee and his employees have left the premises.

14.403. Change of Business or Trade Name; Permission Required.

No licensee shall change the name of his licensed business without first obtaining written permission from the Committee. No licensee shall use a name for his licensed business until that name has been approved in writing by the Committee. The licensee shall submit his license for change within 15 days of the written approval of the business or trade name change.

14.404. Liquor Containers.

A. No liquor bottle or other container authorized by the laws of the United States or any agency thereof shall be reused for the packaging of distilled spirits, nor shall the original contents, or any portion of such original contents,

remaining in a liquor bottle or other such authorized container, be increased by the addition of any substance.

B. No licensee shall reuse, sell, or give away empty spirituous liquor bottles contrary to federal laws or regulations.

14.405. Licensee Recordkeeping Requirements.

All licensees shall retain, for a period of not less than two years, all invoices, records, bills, and other papers and documents relating to the purchase, sale, and delivery of alcoholic beverages. Such records and papers shall be kept in such condition as to be easily accessible to the Committee or authorized Community employee for audit or examination.

14.406. Emergency Closing of Premises.

A licensed place of business may be required to cease its operation and stop all sales of alcoholic beverages or allow any person on the premises, with the exception of peace officers, the licensee and his employees, during the time at which it appears to the Committee or any peace officer that violence might reasonably occur.

14.407. Disclosure of Interest in Liquor License; Requirements.

A. All persons having a legal or equitable interest in a spirituous liquor license shall file with the Committee a statement of such interest on a form prescribed and furnished by the Committee. Notice of termination of such interest shall be filed in writing by the interest holder upon final determination of the interest. Interest holders shall immediately file amended statements presently on file.

B. The Committee may periodically, by notice to the holders of interests filed under this regulation, require those interest holders to verify in writing to the Committee that the statement presently on file is correct and accurate and, if not, such interest holder shall immediately file an amended statement or termination notice. If no response is received by the Committee within 30 days of the mailing of such notice, the interest shall be deemed terminated.

C. All persons having filed statements of interest in accordance with this regulation and the statute shall be given notice of all matters and/or action affecting or regarding the spirituous liquor license in which they have an interest. Notice shall be effected by mailing a copy thereof by registered or certified mail in a sealed envelope with postage prepaid and addressed to such person as his address as shown by the statement on file with the Committee. Service of such notice shall be complete

when deposited in the United States mail.

D. All interest holders who are entitled to receive notice as provided hereinabove shall have the right to appear and participate in person and through counsel in any hearing held before the Committee affecting the subject spirituous liquor license as his interests may appear.

E. The statement of legal or equitable interest shall allow the person filing said statement to participate in the proceedings and shall not in any manner bind the Community concerning the matter under consideration.

14.408. Unlawful Acts.

It is unlawful:

A. For any person, whether as principal or agent, clerk or employee, whether for himself, or for any other person, or for any body corporate, or as officer of any corporation, or as a member of any firm or co-partnership or otherwise to buy for resale, sell or deal in spirituous liquors on and within the exterior boundaries of the Gila River Indian Reservation, Arizona, without first obtaining all necessary federal and state licenses including, but not restricted to a federal license to trade with the Indians issued pursuant to Title 25, Code of Federal Regulations, and a valid license issued by the Gila River Indian Community.

B. For a person to sell or deal in alcohol for beverage purposes without first complying with the provisions of this title.

C. For a distiller, vintner, brewer or wholesaler to sell, dispose of or give spirituous liquor to any persons other than a licensee, except in sampling wares as may be necessary in the ordinary course of business.

D. For a distiller, vintner or brewer to require a wholesaler to offer or grant a discount to a retailer, unless the discount has also been offered and granted to the wholesaler by the distiller, vintner or brewer.

E. For a distiller, vintner or brewer to use a vehicle for trucking or transportation of spirituous liquors unless there is affixed to both sides of the vehicle a sign showing the name and address of the licensee and the type and number of his license in letters not less than three and one-half inches in height.

F. For a person to take or solicit orders for spirituous liquors unless he is a registered salesman or solicitor of a licensed wholesaler or a registered salesman or solicitor of distillery, vintner, brewery, importer or broker.

G. For any retail licensee to purchase spirituous liquor from any person other

than a registered solicitor or salesman of a wholesaler licensed by the State of Arizona and the Community.

H. For a retailer to acquire an interest in property owned, occupied or used by a wholesaler in his business, or in a license with respect to the premises of the wholesaler.

I. Except as provided in subsections 14.408.J. and 14.408.K. of this section, for a licensee or other person to sell, furnish, dispose of or give, or cause to be sold, furnished, disposed of or given, to a person under the legal drinking age or for a person under the legal drinking age to buy, receive, have in the person's possession or consume spirituous liquor. This paragraph shall not prohibit the employment by an off-sale retailer of persons who are at least 16 years of age to check out, if supervised by a person on the premises who is at least 19 years of age, package or carry merchandise, including spirituous liquor, in unbroken packages, for the convenience of the customer of the employer, if the employer sells primarily merchandise other than spirituous liquor.

J. For a licensee to employ a person under the age of 19 years to manufacture, sell or dispose of spirituous liquors. This paragraph shall not prohibit the employment by an off-sale retailer of persons who are at least 16 years of age to check out, if supervised by a person on the premises who is at least 19 years of age, package or carry merchandise, including spirituous liquor, in unbroken packages, for the convenience of the customer of the employer, if the employer sells primarily merchandise other than spirituous liquor.

K. For an on-sale retailer to employ a person under the age of 19 years in any capacity connected with the handling of spirituous liquors. This paragraph does not prohibit the employment by an on-sale retailer of a person under the age of 19 years who cleans up the tables on the premises for reuse, removes dirty dishes, keeps a ready supply of needed items and helps clean up the premises.

L. For a licensee, when engaged in waiting on or serving customers, to consume spirituous liquor or remain on or about the premises while in an intoxicated or disorderly condition.

M. For an employee of a licensee, during that employee's working hours or in connection with such employment, to give to or purchase for any other person, accept a gift of, purchase for himself or consume spirituous liquor.

N. For a licensee or other person to serve, sell or furnish spirituous liquor to an intoxicated or disorderly person, or for a licensee or employee of the

licensee to allow or permit an intoxicated or disorderly person to come into or remain in or about the premises.

O. For an on-sale or off-sale retailer or an employee of such retailer to sell, dispose of, deliver or give spirituous liquor to a person between the hours of 2:00 a.m. and 6:00 a.m.

P. For a licensee or employee to knowingly permit any person on or about the licensed premises to give or furnish any spirituous liquor to any person under the age of 21 or knowingly permit any person under the age of 21 to have in the person's possession spirituous liquor on the licensed premises.

Q. For an on-sale retailer or an employee of such retailer to allow a person to consume or possess spirituous liquors on the premises between the hours of 2:30 a.m. and 6:00 a.m.

R. For an on-sale retail licensee to employ a person for the purpose of soliciting the purchase of spirituous liquors by patrons of the establishment for themselves, on a percentage basis or otherwise, and no licensee shall serve employees or allow a patron of the establishment to give spirituous liquor to, or to purchase liquor for or drink liquor with, any employee.

S. For an off-sale retailer to sell spirituous liquors except in the original container, to permit spirituous liquor to be consumed on the premises, or to sell spirituous liquor in a container having a capacity of less than eight ounces, or for an on-sale retailer to sell spirituous liquor for consumption off the premises in the container having a capacity of less than eight ounces.

T. For a person to consume spirituous liquor from a broken package in a public place, thoroughfare or gathering, and the license of a licensee permitting a violation of this paragraph on the premises shall be subject to revocation. This paragraph shall not apply to sale of spirituous liquors on the premises of and by an on-sale retail licensee.

U. For a person to have possession of or to transact spirituous liquor which is manufactured in a distillery, winery, brewery, or rectifying plant contrary to the laws of the United States and any property used in transporting such spirituous liquor shall be forfeited to the Community and shall be seized and disposed of by the Gila River Indian Community Police Department.

V. For a licensee or employee to fail or refuse to make the premises or records available for inspection and examination as provided in this title or to comply with a lawful subpoena issued either by the State of Arizona or the Gila River Indian Community under state or Community law.

CHAPTER 5. VIOLATIONS, APPEALS AND LICENSE PROCEEDINGS

14.501. Violations; Penalties; Revocation.

Any person or licensee who is fined under this title or who has had their license suspended or revoked may appeal such action to the Committee. Upon receipt of said appeal, the Committee shall set a date to hear the appeal. The Committee shall hear such evidence as the appellant, Community, and other interested parties may offer, and render its decision at the conclusion of such hearing.

A. Unlawful Acts. Any person or licensee who violates any enumerated provision of section 14.408 shall be fined \$500.00. In the event of multiple violations, the Committee may levy one fine per violation or may levy a single \$500.00 fine.

B. Licensees. The Committee may revoke the license of any licensee who violates any provision of this title.

14.502. Appeal.

The Committee's decision may be appealed to the Gila River Indian Community Court, provided that the appeal is duly filed within 20 working days of the Committee's decision.

14.503. Effect of Suspension or Revocation of State License.

A. All licensees shall comply with the laws of the United States and the State of Arizona governing the manufacture and sale of spirituous liquor.

B. Any suspension or revocation of an Arizona-issued liquor license shall automatically take effect against a licensee's Gila River Indian Community-issued license.

C. Notwithstanding the appeal process described in sections 14.501 and 14.502, no appeal shall be permitted for any Community-issued license suspended or revoked under subsection 14.503.2.

14.504. Effective Date.

In accordance with 18 U.S.C. 1161 (2005), this title shall be effective on the date upon which, after having been certified by the Secretary of the Interior, it is published in the **Federal Register**.

Notice of Intent To Prepare Environmental Impact Statement for Wilderness Stewardship Plan, Yosemite National Park, Madera, Mariposa, and Tuolumne, California

AGENCY: National Park Service, Interior.

ACTION: Notice of Intent.

SUMMARY: Yosemite National Park is initiating the conservation planning and environmental impact analysis process needed to inform consideration of alternative strategies for the future management of Yosemite Wilderness. The Yosemite Wilderness encompasses 704,638 acres that were designated by the California Wilderness Act of 1984 (an additional 927 acres were designated as potential wilderness additions). Through the preparation of the Wilderness Stewardship Plan/Environmental Impact Statement (WSP/EIS), Yosemite National Park (YOSE) proposes to update the park's current

1989 Wilderness Management Plan to achieve enhanced wilderness stewardship objectives, which include preserving wilderness character, providing appropriate types and levels of access for visitors and authorized users, protecting natural and cultural resources, and adhering to legally-mandated management and preservation requirements. YOSE intends to coordinate the steps of Section 106 of the National Historic Preservation Act with reviews under the NEPA process.

DATES: All written comments must be postmarked or transmitted not later than January 26, 2016.

ADDRESSES: Requests to be added to the WSP/EIS mailing list may be submitted to: Superintendent, Yosemite National Park, Attn: Wilderness Stewardship Plan, P.O. Box 577, Yosemite, CA 95389.

FOR FURTHER INFORMATION CONTACT: Please contact the Yosemite Planning and Compliance Office by telephone at (209) 379-1365 or by email at yose_planning@nps.gov.

SUPPLEMENTARY INFORMATION: Over 94% of Yosemite National Park is designated Wilderness. The Wilderness encompasses the upper watersheds of the Tuolumne and Merced Rivers, ranging in elevation from less than 3,000 feet to more than 13,000 feet. This large elevation range supports a wide diversity of plant and animal communities including threatened and endangered species. The Yosemite Wilderness is rich in cultural resources including tribal ancestral homelands and historic and archeological features. It is known for its granite peaks, alpine and subalpine lakes, and dramatic waterfalls. It is a popular Wilderness, with visitors enjoying over 100,000 use nights and approximately 400,000 to 500,000 use days. Visitors engage in activities such as backpacking, rockclimbing, stock trips, fishing, and dayhiking. The WSP/EIS will address a variety of issues including, but not limited to trails, minimum requirements analysis for administrative use and facilities, wilderness restoration, cultural resources management, potential wilderness additions, commercial use, visitor use and capacity, stock use and meadow management. The plan will provide detailed management direction consistent with the National Park Service's Management Policies (2006) and other agency guidelines regarding the preservation of wilderness character.

How To Comment: Public comments regarding the range of issues that should be addressed, alternative approaches to managing YOSE wilderness, and other

concerns regarding YOSE Wilderness or the planning process may be submitted online through the Planning, Environment, and Public Comment (PEPC) Web site at <http://parkplanning.nps.gov/yosewild> (electronic comment submittal saves resources and allows for direct entry into the National Park Service's comment analysis system). You may also submit written comments mailing to the address noted above; written comments will also be accepted during public scoping meetings.

Before including your address, phone number, email address, or other personal identifying information in your comment, please be advised that your entire comment including your personal identifying information may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

At this time several public scoping meetings are expected to be hosted during the Winter of 2015. Scoping materials including WSP planning process information and confirmed details regarding public meetings will be posted on the park planning Web site <http://www.nps.gov/yose/parkmgmt/yosewild.htm> and on the PEPC Web site (noted above). The status of the Draft WSP/EIS will be updated periodically at both Web sites listed above. To be added to the WSP/EIS mailing list, email your request to yose_planning@nps.gov or mail your request to the address noted above. Please note in your request if you would like to receive an electronic copy of the document (*i.e.*, CD-ROM) or a printed copy of the Draft WSP/EIS when it is released (limited copies will be available). To reduce printing costs and conserve resources, the public is strongly encouraged to download materials from the Web site.

Decision Process: Following consideration of all comments obtained through this scoping effort, YOSE will prepare the Draft WSP/EIS. This document will state the purpose and need for federal action, describe and analyze a range of alternatives (including a "no action" baseline alternative), assess potential environmental consequences and provide appropriate impact mitigation strategies for each alternative, and identify the "agency-preferred" alternative. Public release of the Draft WSP/EIS will be formally announced by publication of a Notice of Availability in the **Federal Register** and via Web site postings and announcements in local and regional news media. Notifications

will also be sent to the WSP/EIS mailing list and YOSE planning electronic mailing list, as well as to local, state, federal, and tribal organizations and groups.

Following careful analysis of all responses received concerning the Draft WSP/EIS, a Final WSP/EIS will be prepared and its availability similarly announced in the **Federal Register**. Thereafter, but not sooner than 30 days after release of the Final WSP/EIS, a Record of Decision will be prepared. As a delegated EIS, the official responsible for final approval of the WSP/EIS is the Regional Director, Pacific West Region. Subsequently the official responsible for implementation of the approved WSP is the Superintendent, Yosemite National Park.

Dated: November 12, 2015.

Martha J. Lee,

Acting Regional Director, Pacific West Region.

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting comments on the significance of properties nominated before October 24, 2015, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted by December 14, 2015.

ADDRESSES: Comments may be sent via U.S. Postal Service to the National Register of Historic Places, National Park Service, 1849 C St. NW., MS 2280, Washington, DC 20240; by all other carriers, National Register of Historic Places, National Park Service, 1201 Eye St. NW., 8th floor, Washington, DC 20005; or by fax, 202-371-6447.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before October 24, 2015. Pursuant to section 60.13 of 36 CFR part 60, written comments are being accepted concerning the significance of the nominated properties

under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Draft Environmental Impact Statement for Backcountry Management Plan, Grand Canyon National Park, Arizona

AGENCY: National Park Service, Interior.
ACTION: Notice of availability.

SUMMARY: The National Park Service (NPS) announces the availability of the Draft Environmental Impact Statement for the Backcountry Management Plan (Plan/DEIS), Grand Canyon National Park, Arizona. The Plan/DEIS evaluates

the impacts of three action alternatives that address backcountry and wilderness management.

DATES: The NPS will accept comments from the public on the Plan/DEIS for 90 days following publication by the U.S. Environmental Protection Agency (EPA) of the Notice of Availability of the Draft Environmental Impact Statement. After the EPA Notice of Availability is published, the NPS will schedule public meetings to be held during the comment period. Dates, times, and locations of these meetings will be announced in press releases and on the NPS Planning, Environment, and Public Comment (PEPC) for the project at <http://parkplanning.nps.gov/GRCA>.

ADDRESSES: Information will be available for public review and comment online at <http://parkplanning.nps.gov/GRCA>. Copies of the Plan/DEIS will also be available at the park library located in the Park Headquarters Building, 20 South Entrance Road, Grand Canyon, AZ.

FOR FURTHER INFORMATION CONTACT: Linda Jalbert, Wilderness Coordinator, PO Box 129, Grand Canyon, AZ 86023, (928) 638-7909, Linda_Jalbert@nps.gov or Rachel Bennett, Environmental Protection Specialist, 1824 S Thompson Street, Flagstaff, AZ 86001, (928) 638-7326, Rachel_Bennett@nps.gov.

SUPPLEMENTARY INFORMATION: The purpose of the Backcountry Management Plan is to establish an up-to-date plan that addresses immediate backcountry issues and provides an adaptive management framework to preserve, while allowing the public to experience, Grand Canyon's unique backcountry and wilderness resources and values. The park's backcountry encompasses over 1.1 million acres, most of which are proposed for wilderness designation. The Plan/DEIS evaluates four alternatives—the no-action alternative (A) and three action alternatives (B, C, and D)—all of which are summarized below. Alternative B is the NPS preferred alternative. Alternative D is the environmentally preferable alternative.

Alternative A, the no-action alternative, would continue existing management practices. Under this alternative user conflicts and concerns and resource impacts would continue to occur because extended day hiking and running (*i.e.* rim-to-rim day trips) would not be comprehensively managed. An interim process was developed in 2014 that requires organized groups participating in extended day hiking and running to apply for a special use permit and limits group size to 30. The interim policy is expected to remain in

place until the completion of the Backcountry Management Plan Final EIS and Record of Decision. Commercial overnight backpacking would not be capped, would continue to occur in all backcountry management zones, and would be managed by commercial use authorizations. Commercial backpacking operators would continue to compete with the non-commercial public for backcountry permits which are limited by use area. River-assisted backcountry travel would continue to be managed with a rule that allows up to five miles of river travel on one backcountry permit. Under the no-action alternative, no additional campsites would be added to the corridor-zone campgrounds to address the bottleneck for overnight users. Under this alternative, overnight backpacking would continue at the level that occurred in 2012, which was 94,277 user nights (one user night is one person in the backcountry for one night). The no-action alternative is required by NEPA as a baseline against which action alternatives can be compared and evaluated.

Common to all action alternatives, NPS proposes an adaptive management process for extended day hiking and running (*i.e.* rim-to-rim day trips), human waste management, use area management, day use at Tuweep, and management of canyoneering and climbing. For example, seasonal day use permits are proposed for rim-to-rim and extended day hiking and running in the cross-canyon corridor in order to collect data and educate visitors. Future adaptive management actions could include limiting group size (*e.g.* 30), limiting overall number of people per day (*e.g.* 250), year-round day use permits, or designating specific days for these activities. Also common to all action alternatives, NPS proposes to authorize the majority of commercial overnight backpacking through longer-term concessions contracts (estimated at 3–5 contracts) instead of the commercial use authorization permits currently used. Commercial use authorizations would continue to be issued for commercial groups conducting three or less trips per year.

Alternative B, the NPS preferred alternative, focuses on providing a variety of recreational activities and a high level of protection for natural and cultural resources and wilderness character. Changes would include a reduction in group size for overnight backpacking, from a maximum of 11 to a maximum of 6, in two of the most remote wilderness zones. Alternative B would manage river-assisted backcountry travel using 31 route-based

river sections and would include development of four additional campsites at Cottonwood Campground in the cross-canyon corridor. Commercially guided services would be limited by zone and would be allowed only in less remote backcountry areas, while the most remote wilderness areas would remain free of guided activities. Commercial overnight backpacking use would be capped, and commercial guides would no longer compete with the non-commercial public for backcountry permits. Overnight use in the popular cross-canyon corridor would increase by approximately 3% (from 53,821 to a projected 55,531 user nights). Overall, overnight use in the backcountry is expected to decrease by 1% (93,116 user nights), primarily as a result of the reduction in group size in two of the wilderness zones.

Alternative C focuses on recreational activities and expanded opportunities for these activities. Group sizes for overnight backpacking would be the same as at present. Alternative C proposes to manage river-assisted backcountry travel using 11 river sections. Up to eight additional campsites would be developed at Indian Garden, Cottonwood Campground and Roaring Springs. Commercially guided services would be allowed in more use areas throughout the backcountry when compared with Alternatives B and D. Commercial overnight backpacking use would be capped. Overnight use in the cross-canyon corridor would increase by approximately 10% (from 53,821 to a projected 59,421 user nights). Overall, overnight use in the backcountry is expected to increase by 5% (99,273 user nights), primarily as a result of the increase in campsites in the corridor zone and designated campsites along backcountry road corridors.

Alternative D, the environmentally preferable alternative, would focus on resource protection and opportunities for solitude. Recreational use would be concentrated in non-wilderness areas and facility improvement would be limited. Group size for overnight backpacking would be reduced, from a maximum of 11 to a maximum of 6, in all backcountry zones except the corridor zone. Commercially guided activities would be focused in non-wilderness zones. Commercial overnight backpacking use would be capped and only allowed in the corridor zone. These actions would allow for self-exploration and increased opportunities for solitude in all wilderness zones. Overnight use in the popular cross-canyon corridor would increase by approximately 2% (from 53,821 to a projected 54,846 user nights). Overall, overnight use in the

backcountry is expected to decrease by 3% (91,405 user nights) primarily from the decrease in group size outside the corridor.

If you wish to comment, you may submit your comments by any one of several methods. You may submit comments online at <http://parkplanning.nps.gov/grca>. You may also mail comments to Superintendent, Grand Canyon National Park, PO Box 129, Grand Canyon, AZ 86023. Finally, you may hand-deliver comments to Grand Canyon National Park Headquarters, 20 South Entrance Rd, Grand Canyon, AZ.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment, including your personal identifying information, may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. We will make all submission from organizations and businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses, available for public inspection in their entirety.

Dated: November 3, 2015.

Sue E. Masica,

*Regional Director, Intermountain Region,
National Park Service.*

BILLING CODE 4312–CB–P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

[RR02054000, 15XR0687NA,
RX.18527901.3000000]

Central Valley Project Improvement Act Water Management Plans

AGENCY: Bureau of Reclamation,
Interior.

ACTION: Notice of availability.

SUMMARY: The Bureau of Reclamation has made available to the public the Water Management Plans for seven entities. For the purpose of this announcement, Water Management Plans (Plans) are considered the same as Water Conservation Plans. Reclamation is publishing this notice in order to allow the public an opportunity to review the Plans and comment on the preliminary determinations.

DATES: Submit written comments on the preliminary determinations on or before December 28, 2015.

ADDRESSES: Send written comments to Ms. Shanna Hines, Bureau of Reclamation, 2800 Cottage Way, MP-410, Sacramento, CA 95825; or via email at shines@usbr.gov.

FOR FURTHER INFORMATION CONTACT: To be placed on a mailing list for any subsequent information, please contact Ms. Shanna Hines at the email address above or at 916-978-5281 (TDD 978-5608).

SUPPLEMENTARY INFORMATION: To meet the requirements of the Central Valley Project Improvement Act of 1992 and the Reclamation Reform Act of 1982, the Bureau of Reclamation developed and published the Criteria for Evaluating Water Management Plans (Criteria). Each of the eight entities listed below has developed a Plan that has been evaluated and preliminarily determined to meet the requirements of these Criteria. The following Plans are available for review:

- Bella Vista Water District
- Clear Creek Community Services District
- City of Shasta Lake
- Fresno Irrigation District
- Orland Artois Water District
- Santa Barbara County Water Agency
- Santa Ynez River Community District, Improvement District No. 1

We are inviting the public to comment on our preliminary (*i.e.*, draft) determination of Plan adequacy. Section 3405(e) of the Central Valley Project Improvement Act (Title 34 Pub. L. 102-575), requires the Secretary of the Interior to establish and administer an office on Central Valley Project water conservation best management practices that shall “develop criteria for evaluating the adequacy of all water conservation plans developed by project contractors, including those plans required by Section 210 of the Reclamation Reform Act of 1982.” Also, according to Section 3405(e)(1), these criteria must be developed “with the purpose of promoting the highest level of water use efficiency reasonably achievable by project contractors using best available cost-effective technology and best management practices.” These criteria state that all parties (Contractors) that contract with Reclamation for water supplies (municipal and industrial contracts over 2,000 acre-feet and agricultural contracts over 2,000 irrigable acres) must prepare a Plan that contains the following information:

1. Description of the District;
2. Inventory of Water Resources;
3. Best Management Practices (BMPs) for Agricultural Contractors;
4. BMPs for Urban Contractors;

5. Plan Implementation;
6. Exemption Process;
7. Regional Criteria; and
8. Five-Year Revisions

Reclamation evaluates Plans based on these criteria. A copy of these Plans will be available for review at Reclamation’s Mid-Pacific Regional Office, 2800 Cottage Way, MP-410, Sacramento, CA 95825. Our practice is to make comments, including names and home addresses of respondents, available for public review. If you wish to review a copy of these Plans, please contact Ms. Hines.

Public Disclosure

Before including your name, address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Dated: November 2, 2015.

Richard J. Woodley,

Regional Resources Manager, Mid-Pacific Region, Bureau of Reclamation.

BILLING CODE 4332-90-P-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-525 and 731-TA-1260-1261 (Final)]

Certain Welded Line Pipe From Korea and Turkey

Determinations

On the basis of the record¹ developed in the subject investigations, the United States International Trade Commission (“Commission”) determines, pursuant to the Tariff Act of 1930 (“the Act”), that an industry in the United States is materially injured by reason of imports of certain welded line pipe from Korea and Turkey, provided for in subheadings 7305.11, 7305.12, 7305.19, and 7306.19, that have been found by the Department of Commerce (“Commerce”) to be sold in the United States at less than fair value (“LTFV”), and that have been found by Commerce to be subsidized by the government of Turkey.

¹ The record is defined in sec. 207.2(f) of the Commission’s Rules of Practice and Procedure (19 CFR 207.2(f)).

Background

The Commission, pursuant to sections 705(b) and 735(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b) and 19 U.S.C. 1673d(b)), instituted these investigations effective October 16, 2014, following receipt of a petition filed with the Commission and Commerce by American Cast Iron Pipe Company, Birmingham, Alabama; EnergeX, a division of JMC Steel Group, Chicago, Illinois; Maverick Tube Corporation, Houston, Texas; Northwest Pipe Company, Vancouver, Washington; Stupp Corporation, Baton Rouge, Louisiana; Tex-Tube Company, Houston, Texas; TMK IPSCO, Houston, Texas; and Welspun Tubular LLC USA, Little Rock, Arkansas. The final phase of the investigations was scheduled by the Commission following notification of preliminary determinations by Commerce that imports of certain welded line pipe from Korea and Turkey were dumped within the meaning of 733(b) of the Act (19 U.S.C. 1673b(b)) and preliminary determination by Commerce that imports of certain welded line pipe from Turkey were subsidized within the meaning of section 703(b) of the Act (19 U.S.C. 1671b(b)). Notice of the scheduling of the final phase of the Commission’s investigations and of a public hearing to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** on June 12, 2015 (80 FR 33554). The hearing was held in Washington, DC, on October 6, 2015, and all persons who requested the opportunity were permitted to appear in person or by counsel.

The Commission made these determinations pursuant to sections 705(b) and 735(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b) and 19 U.S.C. 1673d(b)). It completed and filed its determinations in these investigations on November 20, 2015. The views of the Commission are contained in USITC Publication 4580 (November 2015), entitled *Certain Welded Line Pipe from Korea and Turkey: Investigation Nos. 701-TA-525 and 731-TA-1260-1261 (Final)*.

By order of the Commission.

Issued: November 20, 2015.

Lisa R. Barton,

Secretary to the Commission.

INTERNATIONAL TRADE COMMISSION

[USITC SE-15-040]

Government in the Sunshine Act Meeting Notice

AGENCY HOLDING THE MEETING: United States International Trade Commission.

TIME AND DATE: December 2, 2015 at 11:00 a.m.

PLACE: Room 101, 500 E Street SW., Washington, DC 20436, Telephone: (202) 205-2000.

STATUS: Open to the public.

MATTERS TO BE CONSIDERED:

1. Agendas for future meetings: none.
2. Minutes.
3. Ratification List.
4. Vote in Inv. Nos. 701-TA-526-527 and 731-TA-1262-1263 (Final)(Melamine from China and Trinidad and Tobago). The Commission is currently scheduled to complete and file its determinations and views of the Commission on December 16, 2015.

5. Outstanding action jackets: none. In accordance with Commission policy, subject matter listed above, not disposed of at the scheduled meeting, may be carried over to the agenda of the following meeting.

By order of the Commission:

Issued: November 23, 2015.

William R. Bishop,
Supervisory Hearings and Information Officer.

BILLING CODE 7020-02-P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Stipulation and Agreed Judgment Under the System Unit Resource Protection Act

On November 19, 2015, the Department of Justice lodged a Proposed Stipulation and Agreed Judgment with the United States District Court for the Northern District of Indiana in the lawsuit entitled *United States v. Indiana Harbor Belt Railroad Co., et al.*, Civil Action No. 2:15-cv-0087.

The Stipulation and Agreed Judgment resolves the United States' claims against the Indiana Harbor Belt Railroad Co., et al. ("Defendants") for alleged violation of the System Unit Resource Protection Act, 54 U.S.C. 100721-100725, as set forth in the United States' Verified Complaint filed on March 9, 2015. In this action, the United States seeks recovery of system unit resource damages and response costs that

resulted from fires at the Indiana Dunes National Lakeshore on March 10, 2012, and March 11, 2012. The Verified Complaint alleges that Defendants destroyed, caused the loss of, or injured, System unit resources, including experimental data and property owned by the National Park Service, and that Defendants are liable for response costs and damages resulting from the destruction, loss, and/or injury.

Under the Stipulation and Agreed Judgment, Defendants will pay to the United States \$72,500 for response costs and damages described in the Complaint. There is no injunctive relief under this Judgment.

The publication of this notice opens a period for public comment on the proposed Stipulation and Agreed Judgment. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States v. Indiana Harbor Belt Railroad Co., et al.*, D.J. Ref. No. 90-5-1-1-11105. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

To submit comments:	Send them to:
By email	<i>pubcomment-ees.enrd@usdoj.gov.</i>
By mail	Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044-7611.

During the public comment period, the proposed Stipulation and Agreed Judgment may be examined and downloaded at this Justice Department Web site: <http://www.justice.gov/enrd/consent-decrees>. We will provide a paper copy of the proposed Stipulation and Agreed Judgment upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044-7611.

Please enclose a check or money order for \$2.75 (25 cents per page reproduction cost) payable to the United States Treasury. For a paper copy without the exhibits and signature pages, the cost is \$2.25.

Randall M. Stone,

Acting Assistant Section Chief,
Environmental Enforcement Section,
Environment and Natural Resources Division.

BILLING CODE 4410-15-P

DEPARTMENT OF JUSTICE

Notice of Lodging of Proposed Consent Decree Under the Clean Air Act

On November 17, 2015, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the District of Columbia in the lawsuit entitled *United States v. HollyFrontier Refining & Marketing LLC, Frontier El Dorado Refining LLC, Holly Refining & Marketing Company—Woods Cross LLC, and Navajo Refining Company, LLC*, Civil Action No. 1:15-cv-02024.

The United States alleges in its Complaint that HollyFrontier Refining & Marketing LLC, Frontier El Dorado Refining LLC, Holly Refining & Marketing Company—Woods Cross LLC, and Navajo Refining Company, LLC (collectively HollyFrontier) are liable for civil penalties and injunctive relief arising from alleged violations of the Clean Air Act, Section 211(h), 42 U.S.C. 7545(h), and the fuels regulations promulgated thereunder and published at 40 CFR part 80. This Complaint addresses HollyFrontier's self-reported violations of the Reid Vapor Pressure (RVP) standard for certain batches of gasoline produced at their respective refineries and introduced into commerce with a RVP in excess of the respective standard. The Complaint also addresses alleged self-reported fuel testing violations at their respective refineries.

The proposed Consent Decree resolves all claims alleged in the Complaint, provides for payment of a \$1.2 million civil penalty, and requires HollyFrontier to implement mitigation projects that are anticipated to reduce emissions of volatile organic compounds, including toxics, by an estimated 96 tons over the lifetime of the Consent Decree.

The publication of this notice opens a period for public comment on the proposed Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, Environmental Enforcement Section, and should refer to *United States v. HollyFrontier Refining & Marketing LLC, Frontier El Dorado Refining LLC, Holly Refining & Marketing Company—Woods Cross LLC, and Navajo Refining Company, L.L.C.*, D.J. Ref. No. 90-5-2-1-1113. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

<i>To submit comments:</i>	<i>Send them to:</i>

DEPARTMENT OF LABOR

Employment and Training Administration

Investigations Regarding Eligibility To Apply for Worker Adjustment Assistance

Director, Office of Trade Adjustment Assistance, at the address shown below, no later than December 7, 2015.

Interested persons are invited to submit written comments regarding the subject matter of the investigations to the Director, Office of Trade Adjustment Assistance, at the address shown below, not later than December 7, 2015.

The petitions filed in this case are available for inspection at the Office of the Director, Office of Trade Adjustment Assistance, Employment and Training Administration, U.S. Department of Labor, Room N–5428, 200 Constitution Avenue NW., Washington, DC 20210.

Signed at Washington, DC this 27th day of October 2015.

Jessica R. Webster,

Certifying Officer, Office of Trade Adjustment Assistance.

Appendix

During the public comment period, the proposed Consent Decree may be examined and downloaded at this Justice Department Web site: <http://www.justice.gov/enrd/consent-decrees>.

We will provide a paper copy of the proposed Consent Decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for \$ 7.75 (25 cents per page reproduction cost) for the proposed Consent Decree without attachments, \$ 8.75 with attachments, payable to the United States Treasury.

Bob Brook,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

Petitions have been filed with the Secretary of Labor under Section 221(a) of the Trade Act of 1974 (“the Act”) and are identified in the Appendix to this notice. Upon receipt of these petitions, the Director of the Office of Trade Adjustment Assistance, Employment and Training Administration, has instituted investigations pursuant to Section 221(a) of the Act.

The purpose of each of the investigations is to determine whether the workers are eligible to apply for adjustment assistance under Title II, Chapter 2, of the Act. The investigations will further relate, as appropriate, to the determination of the date on which total or partial separations began or threatened to begin and the subdivision of the firm involved.

The petitioners or any other persons showing a substantial interest in the subject matter of the investigations may request a public hearing, provided such request is filed in writing with the

DEPARTMENT OF LABOR**Employment and Training Administration****Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance**

In accordance with section 223 of the Trade Act of 1974, as amended (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers by (TA-W) number issued during the period of *October 9, 2015 through October 23, 2015*.

In order for an affirmative determination to be made for workers of a primary firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of section 222(a) of the Act must be met.

I. Under section 222(a)(2)(A), the following must be satisfied:

(1) A significant number or proportion of the workers in such workers' firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) the sales or production, or both, of such firm have decreased absolutely; and

(3) One of the following must be satisfied:

(A) Imports of articles or services like or directly competitive with articles produced or services supplied by such firm have increased;

(B) Imports of articles like or directly competitive with articles into which one or more component parts produced by such firm are directly incorporated, have increased;

(C) Imports of articles directly incorporating one or more component parts produced outside the United States that are like or directly

competitive with imports of articles incorporating one or more component parts produced by such firm have increased;

(D) Imports of articles like or directly competitive with articles which are produced directly using services supplied by such firm, have increased; and

(4) The increase in imports contributed importantly to such workers' separation or threat of separation and to the decline in the sales or production of such firm; or

II. Section 222(a)(2)(B) all of the following must be satisfied:

(1) A significant number or proportion of the workers in such workers' firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) One of the following must be satisfied:

(A) There has been a shift by the workers' firm to a foreign country in the production of articles or supply of services like or directly competitive with those produced/supplied by the workers' firm;

(B) There has been an acquisition from a foreign country by the workers' firm of articles/services that are like or directly competitive with those produced/supplied by the workers' firm; and

(3) The shift/acquisition contributed importantly to the workers' separation or threat of separation.

In order for an affirmative determination to be made for adversely affected secondary workers of a firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of section 222(b) of the Act must be met.

(1) A significant number or proportion of the workers in the workers' firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) The workers' firm is a Supplier or Downstream Producer to a firm that

employed a group of workers who received a certification of eligibility under section 222(a) of the Act, and such supply or production is related to the article or service that was the basis for such certification; and

(3) either—

(A) The workers' firm is a supplier and the component parts it supplied to the firm described in paragraph (2) accounted for at least 20 percent of the production or sales of the workers' firm; or

(B) A loss of business by the workers' firm with the firm described in paragraph (2) contributed importantly to the workers' separation or threat of separation.

In order for an affirmative determination to be made for adversely affected workers in firms identified by the International Trade Commission and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of section 222(e) of the Act must be met.

(1) The workers' firm is publicly identified by name by the International Trade Commission as a member of a domestic industry in an investigation resulting in—

(A) An affirmative determination of serious injury or threat thereof under section 202(b)(1);

(B) An affirmative determination of market disruption or threat thereof under section 421(b)(1); or

(C) An affirmative final determination of material injury or threat thereof under section 705(b)(1)(A) or 735(b)(1)(A) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)(1)(A) and 1673d(b)(1)(A));

(2) The petition is filed during the 1-year period beginning on the date on which—

(A) A summary of the report submitted to the President by the International Trade Commission under section 202(f)(1) with respect to the affirmative determination described in paragraph (1)(A) is published in the **Federal Register** under section 202(f)(3); or

(B) Notice of an affirmative determination described in subparagraph (1) is published in the **Federal Register**; and

(3) The workers have become totally or partially separated from the workers' firm within—

(A) The 1-year period described in paragraph (2); or

(B) Notwithstanding section 223(b)(1), the 1- year period preceding the 1-year period described in paragraph (2).

Affirmative Determinations for Worker Adjustment Assistance

The following certifications have been issued. The date following the company name and location of each

determination references the impact date for all workers of such determination.

The following certifications have been issued. The requirements of section 222(a)(2)(A) (increased imports) of the Trade Act have been met.

The following certifications have been issued. The requirements of section 222(b) (supplier to a firm whose workers are certified eligible to apply for TAA) of the Trade Act have been met.

TA-W No.	Subject firm	Location	Impact date
85,799	Comprehensive Logistics, Inc	Lansing, MI	January 28, 2014.

Determinations Terminating Investigations of Petitions for Worker Adjustment Assistance

After notice of the petitions was published in the **Federal Register** and

on the Department’s Web site, as required by section 221 of the Act (19 U.S.C. 2271), the Department initiated investigations of these petitions.

The following determinations terminating investigations were issued because the petitioner has requested that the petition be withdrawn.

TA-W No.	Subject firm	Location	Impact date
85,964	IPSCO Koppel Tubulars, LLC	Ambridge, PA	
85,993	IPSCO Tubulars (KY) Inc.	Wilder, KY	
86,017	IPSCO Tubulars Inc., D/B/A TMK—IPSCO	Houston, TX	
86,067	Guardian Life Insurance Company	Appleton, WA.	

The following determinations terminating investigations were issued in cases where these petitions were not filed in accordance with the requirements of 29 CFR 90.11. Every petition filed by workers must be signed

by at least three individuals of the petitioning worker group. Petitioners separated more than one year prior to the date of the petition cannot be covered under a certification of a petition under section 223(b), and

therefore, may not be part of a petitioning worker group. For one or more of these reasons, these petitions were deemed invalid.

TA-W No.	Subject firm	Location	Impact date
86,092	National Electronic Warranty/Asurion	Sterling, VA.	

The following determinations terminating investigations were issued because the petitioning groups of

workers are covered by active certifications. Consequently, further investigation in these cases would serve

no purpose since the petitioning group of workers cannot be covered by more than one certification at a time.

TA-W No.	Subject firm	Location	Impact date
90,017	MoneyGram Payment Systems, Inc., MoneyGram International, Inc.	Brooklyn Center, MN.	
90,192	Frontier Airlines, Inc., Frontier Airlines Holdings, Inc., Customer Service Department.	Denver, CO.	
90,225	Ipsco Koppel Tubulars, LLC	Ambridge, PA.	

The following determinations terminating investigations were issued because the petitions are the subject of ongoing investigations under petitions filed earlier covering the same petitioners.

TA-W No.	Subject firm	Location	Impact date
90,121	Symantec Corporation	Springfield, OR..	

I hereby certify that the aforementioned determinations were issued during the period of *October 9, 2015 through October 23, 2015*. These determinations are available on the Department's Web site *www.tradeact/taa/taa_search_form.cfm* under the searchable listing of determinations or by calling the Office of Trade Adjustment Assistance toll free at 888-365-6822.

Signed at Washington DC this 27th day of October 2015.

Jessica R. Webster

Certifying Officer, Office of Trade Adjustment Assistance.

BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR

Employment and Training Administration

Comment Request for Information Collection for Reporting and Performance Standards System for Migrant and Seasonal Farmworker Programs, Extension With Revision

AGENCY: Employment and Training Administration (ETA), Labor.

ACTION: Notice.

SUMMARY: The Department of Labor (Department), as part of its continuing effort to reduce paperwork and respondent burden, conducts a preclearance consultation program to provide the public and Federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 [44 U.S.C. 3506(c)(2)(A)] (PRA). The PRA helps ensure that respondents can provide requested data in the desired format with minimal reporting burden (time and financial resources), collection instruments are clearly understood and the impact of collection requirements on respondents can be properly assessed. Currently, ETA is soliciting comments concerning the information collection request (ICR) to collect data about The National Farmworker Jobs Program (NFJP), which provides employment and training services as well as housing assistance to disadvantaged migrant and seasonal

farmworkers (MSFWs) and their dependents.

Interested parties are encouraged to provide comments to the contact shown in the ADDRESS section. Comments must be written to receive consideration, and they will be summarized and included in the request for OMB approval of the final ICR. In order to help ensure appropriate consideration, comments should mention OMB Control No. 1205-0425.

DATES: Submit written comments to Gregory Scheib at the office listed in the address section below on or before January 26, 2016.

ADDRESSES: A copy of this ICR with applicable supporting documentation; including a description of the likely respondents, proposed frequency of response, and estimated total burden may be obtained free by contacting Gregory Scheib, Workforce Analyst for the National Farmworker Jobs Program, at *NFJP@dol.gov*, or by mail to Gregory Scheib, Room C-4510, Employment and Training Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Washington, DC 20210. Telephone number: 202-693-2791 (this is not a toll-free number). Fax: 202-693-3015. Individuals with hearing or speech impairments may access the telephone number above via TTY by calling the toll-free Federal Information Relay Service at 1-877-889-5627 (TTY/TDD).

SUPPLEMENTARY INFORMATION:

I. Background

This grant program seeks to counter the impact of the chronic unemployment and underemployment experienced by MSFWs who depend primarily on jobs in agricultural labor. NFJP grant funds are awarded to community-based organizations and public agencies through a biennial grant competition.

NFJP grantees are required to submit a Program Planning Summary report (ETA Form 9094), a Program Status Summary report (ETA Form 9095), a Housing Assistance report (ETA Form 9164), a quarterly file of individual records on all participants who exit the program (Workforce Investment Act Standardized Participant Record (WIASPR), and a grant plan narrative. These reporting requirements

encompass a minimum level of information collection that is necessary to hold grantees appropriately accountable for the Federal funds they receive, assess progress against a set of common performance measures, and allows the Department to fulfill its oversight and management responsibilities. ETA proposes eliminating the Budget Information Summary Form, ETA 9093, currently submitted by grantees as part of annual program plan updates. ETA believes the information collected on this form is not essential to monitor grantee expenditures; moreover, information on prior year funds exists on ETA 9130 (OMB Control No. 1205-0461), a form already required for grantees. Discontinuation of this form will reduce the total estimated annual reporting burden on each NFJP grantees by 15 hours per year.

II. Review Focus

The Department is particularly interested in comments which:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submissions of response.

III. Current Actions

- *Agency:* DOL-ETA.
- *Type of Review:* extension with change.
- *Title of Collection:* Reporting and Performance Standards System for Migrant and Seasonal Farmworker Programs.
- *Forms:* ETA 9094, 9095, and 9165 (housing assistance).

- OMB Control Number: 1205–0425.
- Affected Public: State, local, and tribal governments.
- Estimated Number of Respondents: 69.
- Frequency: quarterly.
- Total Estimated Annual Responses: 29,897.
- Estimated Total Annual Burden Hours: 73,279 hours.
- Total Estimated Annual Other Cost Burden: \$0.

We will summarize and/or include in the request for OMB approval of the ICR, the comments received in response to this comment request; they will also become a matter of public record.

Portia Wu,

Assistant Secretary for Employment and Training, Labor.

BILLING CODE 4510–FN–P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with section 223 of the Trade Act of 1974, as amended (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers by (TA–W) number issued during the period of *October 26, 2015 through November 6, 2015*.

In order for an affirmative determination to be made for workers of a primary firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(a) of the Act must be met.

I. Under section 222(a)(2)(A), the following must be satisfied:

(1) A significant number or proportion of the workers in such workers' firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) the sales or production, or both, of such firm have decreased absolutely; and

(3) One of the following must be satisfied:

(A) Imports of articles or services like or directly competitive with articles produced or services supplied by such firm have increased;

(B) imports of articles like or directly competitive with articles into which one or more component parts produced by such firm are directly incorporated, have increased;

(C) imports of articles directly incorporating one or more component parts produced outside the United States that are like or directly competitive with imports of articles incorporating one or more component parts produced by such firm have increased;

(D) imports of articles like or directly competitive with articles which are produced directly using services supplied by such firm, have increased; and

(4) the increase in imports contributed importantly to such workers' separation or threat of separation and to the decline in the sales or production of such firm; or

II. Section 222(a)(2)(B) all of the following must be satisfied:

(1) A significant number or proportion of the workers in such workers' firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) One of the following must be satisfied:

(A) There has been a shift by the workers' firm to a foreign country in the production of articles or supply of services like or directly competitive with those produced/supplied by the workers' firm;

(B) there has been an acquisition from a foreign country by the workers' firm of articles/services that are like or directly competitive with those produced/supplied by the workers' firm; and

(3) the shift/acquisition contributed importantly to the workers' separation or threat of separation.

In order for an affirmative determination to be made for adversely affected secondary workers of a firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of section 222(b) of the Act must be met.

(1) a significant number or proportion of the workers in the workers' firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) the workers' firm is a Supplier or Downstream Producer to a firm that employed a group of workers who received a certification of eligibility under section 222(a) of the Act, and such supply or production is related to the article or service that was the basis for such certification; and

(3) either—

(A) the workers' firm is a supplier and the component parts it supplied to the firm described in paragraph (2) accounted for at least 20 percent of the

production or sales of the workers' firm; or

(B) a loss of business by the workers' firm with the firm described in paragraph (2) contributed importantly to the workers' separation or threat of separation.

In order for an affirmative determination to be made for adversely affected workers in firms identified by the International Trade Commission and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of section 222(e) of the Act must be met.

(1) the workers' firm is publicly identified by name by the International Trade Commission as a member of a domestic industry in an investigation resulting in—

(A) an affirmative determination of serious injury or threat thereof under section 202(b)(1);

(B) an affirmative determination of market disruption or threat thereof under section 421(b)(1); or

(C) an affirmative final determination of material injury or threat thereof under section 705(b)(1)(A) or 735(b)(1)(A) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)(1)(A) and 1673d(b)(1)(A));

(2) the petition is filed during the 1-year period beginning on the date on which—

(A) a summary of the report submitted to the President by the International Trade Commission under section 202(f)(1) with respect to the affirmative determination described in paragraph (1)(A) is published in the **Federal Register** under section 202(f)(3); or

(B) notice of an affirmative determination described in subparagraph (1) is published in the **Federal Register**; and

(3) the workers have become totally or partially separated from the workers' firm within—

(A) the 1-year period described in paragraph (2); or

(B) notwithstanding section 223(b)(1), the 1-year period preceding the 1-year period described in paragraph (2).

Affirmative Determinations For Worker Adjustment Assistance

The following certifications have been issued. The date following the company name and location of each determination references the impact date for all workers of such determination.

The following certifications have been issued. The requirements of section 222(a)(2)(A) (increased imports) of the Trade Act have been met.

TA-W No.	Subject firm	Location	Impact date
85,122	Bimbo Bakeries, USA, Inc., BBU, Inc., Earthgrains Baking Companies, Inc..	Wichita, KS	March 5, 2013.
85,197	Bimbo Bakeries, USA, Inc., BBU, Inc., Orograin Bakeries Manufacturing, Inc..	Bay Shore, NY	April 1, 2013.

Determinations Terminating Investigations of Petitions for Worker Adjustment Assistance

on the Department's Web site, as required by section 221 of the Act (19 U.S.C. 2271), the Department initiated investigations of these petitions.

The following determinations terminating investigations were issued because the petitioner has requested that the petition be withdrawn.

After notice of the petitions was published in the **Federal Register** and

TA-W No.	Subject firm	Location	Impact date
85,929	International Business Machines (IBM), GTS Mobility Services (Desk Side Support), 07 (GTS).	Endicott, NY.	
90,126	Sealed Air Corporation	Greenville, SC.	
90,222	Telesource Services, LLC	Bensenville, IL.	
90,223	Telesource Services, LLC	Pontiac, MI.	
91,020	East Wind Code LTD	New York, NY.	

The following determinations terminating investigations were issued in cases where these petitions were not filed in accordance with the requirements of 29 CFR 90.11. Every petition filed by workers must be signed

by at least three individuals of the petitioning worker group. Petitioners separated more than one year prior to the date of the petition cannot be covered under a certification of a petition under section 223(b), and

therefore, may not be part of a petitioning worker group. For one or more of these reasons, these petitions were deemed invalid.

TA-W No.	Subject firm	Location	Impact date
86,079	Airboss Defense Inc.	Milton, VT.	
90,144	Arvato Digital Services	Reno, NV.	

The following determinations terminating investigations were issued because the petitioning groups of

workers are covered by active certifications. Consequently, further investigation in these cases would serve

no purpose since the petitioning group of workers cannot be covered by more than one certification at a time.

TA-W No.	Subject firm	Location	Impact date
85,617	Day&Zimmermann, Inc., Kansas Division	Parsons, KS.	
91,058	Transcend Services, Inc., Nuance Communications, Inc	Atlanta, GA.	

The following determinations terminating investigations were issued because the petitions are the subject of ongoing investigations under petitions filed earlier covering the same petitioners.

90,205	Lenovo	Morrisville, NC.	
90,274	Legacy Measurement Solutions, Inc., Express Employment Professionals	Bristow, OK.	
91,035	Mitsubishi Motors North America, Inc	Normal, IL.	

I hereby certify that the aforementioned determinations were issued during the period of *October 26, 2015 through November 6, 2015*. These determinations are available on the Department's Web site *www.tradeact/taa/taa_search_form.cfm* under the searchable listing of determinations or by calling the Office of Trade Adjustment Assistance toll free at 888-365-6822.

Signed at Washington, DC this 10th day of November 2015.

Jessica R. Webster,

Certifying Officer, Office of Trade Adjustment Assistance.

[FR Doc. 2015-30180 Filed 11-25-15; 8:45 am]

BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Decisions on States' Applications for Relief From Tax Credit Reductions Provided Under Section 3302 of the Federal Unemployment Tax Act (FUTA) Applicable in 2015

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: Sections 3302(c)(2)(A) and 3302(d)(3) of the FUTA provide that employers in a State that has an outstanding balance of advances under Title XII of the Social Security Act at the beginning of January 1 of two or more consecutive years are subject to a reduction in credits otherwise available against the FUTA tax for the calendar year in which the most recent such January 1 occurs, if a balance of advances remains at the beginning of November 10 of that year. Further, section 3302(c)(2)(C) of FUTA provides for an additional credit reduction for a year if a State has outstanding advances on five or more consecutive January firsts and has a balance at the beginning of November 10 for such years. Section 3302(c)(2)(C) also provides for waiver of this additional credit reduction and substitution of the credit reduction provided in section 3302(c)(2)(B) if a state meets certain conditions.

The States of California, Connecticut, Indiana, Kentucky, New York, North Carolina, Ohio, South Carolina, and the Virgin Islands passed January 1, 2015, with outstanding Title XII advances and were potentially subject to FUTA credit reductions.

California, Indiana, Kentucky, Ohio, and the Virgin Islands applied for a waiver of the 2015 additional credit reduction under section 3302(c)(2)(C) of FUTA and it has been determined that each of these States met all of the criteria of that section necessary to qualify for the waiver of the additional credit reduction. Further, the additional credit reduction of section 3302(c)(2)(B) is zero for these States for 2015. Therefore, employers in these States will have no additional credit reduction applied for calendar year 2015.

Also, Section 3302(f) of FUTA provides that a State may apply for a cap in the reduction in credit for a year by meeting certain criteria. Kentucky applied for the cap of the 2015 credit reduction under this section. It has been determined that Kentucky met all of the criteria of section 3302(f) and thus qualifies for a cap on the credit reduction. Therefore, Kentucky employers would not be subject to an increase in FUTA credit reductions for calendar year 2015.

The States of Indiana, Kentucky, New York, North Carolina, and South Carolina repaid all of their outstanding advance balances before the beginning of November 10, 2015. Therefore, employers in those States will have no reduction in FUTA offset credit for calendar year 2015.

California, Ohio, and the Virgin Islands will have a credit reduction of 1.5%, and Connecticut will have a credit reduction of 2.1%, which is the 1.5% plus a 0.6% fifth year add-on amount for calendar year 2015.

Portia Wu,

Assistant Secretary for Employment and Training.

BILLING CODE 4510-FW-P

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

[Docket No. OSHA-2010-0046]

QPS Evaluation Services, Inc.: Request for Renewal of Recognition and Applications for Expansion of Recognition

AGENCY: Occupational Safety and Health Administration (OSHA), Labor.

ACTION: Notice.

SUMMARY: In this notice, OSHA announces the application of QPS Evaluation Services, Inc. (QPS), for renewal of recognition as a Nationally Recognized Testing Laboratory (NRTL). Additionally, this notice announces QPS's applications for expansion of its recognition as an NRTL and presents the Agency's preliminary finding to grant the application.

DATES: Submit comments, information, and documents in response to this notice, or requests for an extension of time to make a submission, on or before December 14, 2015.

ADDRESSES: Submit comments by any of the following methods:

1. *Electronically:* Submit comments and attachments electronically at <http://www.regulations.gov>, which is the Federal eRulemaking Portal. Follow the instructions online for making electronic submissions.

2. *Facsimile:* If submissions, including attachments, are not longer than 10 pages, commenters may fax them to the OSHA Docket Office at (202) 693-1648.

3. *Regular or express mail, hand delivery, or messenger (courier) service:* Submit comments, requests, and any attachments to the OSHA Docket Office, Docket No. OSHA-2010-0046, Technical Data Center, U.S. Department of Labor, 200 Constitution Avenue NW., Room N-2625, Washington, DC 20210; telephone: (202) 693-2350 (TTY number: (877) 889-5627). Note that security procedures may result in significant delays in receiving comments and other written materials by regular mail. Contact the OSHA Docket Office for information about security procedures concerning delivery

of materials by express mail, hand delivery, or messenger service. The hours of operation for the OSHA Docket Office are 8:15 a.m.–4:45 p.m., e.t.

4. *Instructions:* All submissions must include the Agency name and the OSHA docket number (OSHA–2010–0046). OSHA places comments and other materials, including any personal information, in the public docket without revision, and these materials will be available online at <http://www.regulations.gov>. Therefore, the Agency cautions commenters about submitting statements they do not want made available to the public, or submitting comments that contain personal information (either about themselves or others) such as Social Security numbers, birth dates, and medical data.

5. *Docket:* To read or download submissions or other material in the docket, go to <http://www.regulations.gov> or the OSHA Docket Office at the address above. All documents in the docket are listed in the <http://www.regulations.gov> index; however, some information (e.g., copyrighted material) is not publicly available to read or download through the Web site. All submissions, including copyrighted material, are available for inspection and copying at the OSHA Docket Office. Contact the OSHA Docket Office for assistance in locating docket submissions.

6. *Extension of comment period:* Submit requests for an extension of the comment period on or before December 14, 2015 to the Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–3655, Washington, DC 20210, or by fax to (202) 693–1644.

FOR FURTHER INFORMATION CONTACT: Information regarding this notice is available from the following sources:

Press inquiries: Contact Mr. Frank Meilinger, Director, OSHA Office of Communications, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–3647, Washington, DC 20210; telephone: (202) 693–1999; email: meilinger.francis2@dol.gov.

General and technical information: Contact Mr. Kevin Robinson, Director,

Office of Technical Programs and Coordination Activities, Directorate of Technical Support and Emergency Management, Occupational Safety and Health Administration, U.S. Department of Labor, 200 Constitution Avenue NW., Room N–3655, Washington, DC 20210; phone: (202) 693–2110, or email: robinson.kevin@dol.gov.

SUPPLEMENTARY INFORMATION:

I. Background

OSHA recognition of an NRTL signifies that the organization meets the requirements specified in Section 1910.7. Recognition is an acknowledgment that the organization can perform independent safety testing and certification of the specific products covered within its scope of recognition. Each NRTL’s scope of recognition includes (1) the type of products the NRTL may test, with each type specified by its applicable test standard; and (2) the recognized site(s) that has/have the technical capability to perform the product-testing and product-certification activities for test standards within the NRTL’s scope. Recognition is not a delegation or grant of government authority; however, recognition enables employers to use products approved by the NRTL to meet OSHA standards that require product testing and certification. OSHA maintains an informational Web site for each NRTL that details its scope of recognition available at <http://www.osha.gov/dts/otpca/nrtl/index.html>.

The Agency processes applications by an NRTL for renewals and expansions of recognition following requirements in Appendix A to 29 CFR 1910.7. OSHA conducts renewals in accordance with the procedures in 29 CFR 1910.7, App. II.C. OSHA processes applications for modifying the scope of recognition in accordance with 29 CFR 1910.7, App. IB4. In accordance with these procedures, NRTLs may submit an application to modify its scope of recognition at any time within its recognition period. For renewals, NRTLs must submit a request to OSHA, between nine months and one year before the expiration date of its current recognition. A renewal request includes an application for renewal and any additional information demonstrating its continued compliance with the terms of its recognition and 29 CFR 1910.7. If

OSHA did not conduct an on-site assessment of the NRTL’s headquarters and key sites within the past 18 to 24 months, the Agency will schedule the necessary on-site assessments prior to the expiration date of the NRTL’s recognition. Upon review of the submitted material and, as necessary, the successful completion of the on-site assessment, OSHA announces its preliminary decision to grant or deny renewal and QPS’s requested scope expansion in the **Federal Register** and solicits comments from the public. OSHA then publishes a final **Federal Register** notice responding to any comments and announcing the Agency’s Final Decision on modifying an NRTL’s scope of recognition and on the renewal of the NRTL’s recognition.

II. Notice of Application for Expansion

The Occupational Safety and Health Administration is providing notice that QPS is applying for expansion of its current recognition as an NRTL. QPS requests the addition of seven test standards to its NRTL scope of recognition.

QPS currently has one facility (site) recognized by OSHA for product testing and certification, with its headquarters located at: QPS Evaluation Services, Inc., 81 Kelfield Street, Unit 8, Toronto, Ontario, M9W 5A3.

III. General Background on the Application for Expansion

QPS submitted two applications, one dated July 16, 2014, and one dated June 9, 2015 (QPS Exhibit 14–1—Expansion Application for Six Standards OSHA–2010–0046 and QPS Exhibit 15–1—Amended Expansion Application to Add an Additional Standard OSHA–2010–0046), to expand its recognition to include seven additional test standards. These two applications were combined. OSHA staff performed a comparability analysis and reviewed other pertinent information. OSHA performed an on-site review in relation to these applications (as well as the application for renewal) on July 16–17, 2015.

Table 1 below lists the appropriate test standards found in QPS’s applications for expansion for testing and certification of products under the NRTL Program.

TABLE 1—PROPOSED APPROPRIATE TEST STANDARDS FOR INCLUSION IN QPS’S NRTL SCOPE OF RECOGNITION

Test standard	Test standard title
UL 48	Standard for Electric Signs.
UL 8750	Standard for Light Emitting Diode (LED) Equipment for Use in Lighting Products.
UL 73	Standard for Motor-Operated Appliances.

TABLE 1—PROPOSED APPROPRIATE TEST STANDARDS FOR INCLUSION IN QPS'S NRTL SCOPE OF RECOGNITION—Continued

Test standard	Test standard title
UL 1310	Standard for Class 2 Power Units.
UL 1598	Luminaries.
UL 1741	Standard for Inverters, Converters, Controllers and Interconnection System Equipment for Use with Distributed Energy Resources.
ANSI/ISA 12.12.01	Nonincendive Electrical Equipment for Use in Class I and II, Division 2 and Class III, Divisions 1 and 2 Hazardous (Classified) Locations.

IV. General Background on Application for Renewal

OSHA is additionally providing notice that QPS is applying for renewal of its current recognition as an NRTL. QPS initially received OSHA recognition as an NRTL on March 2, 2011 (76 FR 11518) for a five-year period expiring on March 2, 2016. QPS submitted a timely request for renewal, dated April 21, 2015 (Exhibit 2—Renewal Application, OSHA–2010–0046) and retains its recognition pending OSHA's final decision in this renewal process. The current address of QPS facilities recognized by OSHA and included as part of the renewal request are:

1. QPS Evaluation Services, Inc., 81 Kelfield Street, Unit 8, Toronto, Ontario, M9W 5A3 Canada.

V. Notice of Preliminary Findings of the Applications

QPS submitted acceptable applications for expansion of its scope of recognition. OSHA's review of the application file and on-site review indicate that QPS can meet the requirements prescribed by 29 CFR 1910.7 for expanding its recognition to include the addition of the test standards for NRTL testing and certification noted in Table 1 above. This preliminary finding does not constitute an interim or temporary approval of QPS's applications.

This requested renewal covers QPS's existing NRTL scope of recognition. OSHA evaluated QPS's application for renewal, conducted an on-site review of QPS's facilities and preliminarily determined that QPS can continue to meet the requirements prescribed by 29 CFR 1910.7 for recognition. This information includes OSHA's most recent on-site assessment of QPS's facilities conducted on July 16–17, 2015 (Toronto, Canada). The assessors found some nonconformances with the requirements of 29 CFR 1910.7. QPS addressed these issues sufficiently to meet the applicable NRTL requirements. This preliminary finding does not constitute an interim or temporary approval of the application.

OSHA welcomes public comment as to whether QPS meets the requirements of 29 CFR 1910.7 for expansion and renewal of its recognition as an NRTL. Comments should consist of pertinent written documents and exhibits. Commenters needing more time to comment must submit a request in writing, stating the reasons for the request. Commenters must submit the written request for an extension by the due date for comments. OSHA will limit any extension to 10 days unless the requester justifies a longer period. OSHA may deny a request for an extension if it is not adequately justified. To obtain or review copies of the exhibits identified in this notice, as well as comments submitted to the docket, contact the Docket Office, Room N–2625, Occupational Safety and Health Administration, U.S. Department of Labor, at the above address. These materials also are available online at <http://www.regulations.gov> under Docket No. OSHA–2010–0046.

OSHA staff will review all comments submitted to the docket in a timely manner and, after addressing the issues raised by these comments, will recommend whether to grant QPS's application for renewal and for expansion of its scope of recognition. The Assistant Secretary will make the final decision on granting the application and, in making this decision, may undertake other proceedings prescribed in Appendix A to 29 CFR 1910.7.

OSHA will publish a public notice of this final decision in the **Federal Register**.

Authority and Signature

David Michaels, Ph.D., MPH, Assistant Secretary of Labor for Occupational Safety and Health, 200 Constitution Avenue NW., Washington, DC 20210, authorized the preparation of this notice. Accordingly, the Agency is issuing this notice pursuant to 29 U.S.C. 657(g)(2), Secretary of Labor's Order No. 1–2012 (77 FR 3912, Jan. 25, 2012), and 29 CFR 1910.7.

Signed at Washington, DC, on November 23, 2015.

David Michaels,

Assistant Secretary of Labor for Occupational Safety and Health.

[FR Doc. 2015–30168 Filed 11–25–15; 8:45 am]

NATIONAL SCIENCE FOUNDATION

National Science Board

Sunshine Act Meetings; Notice

The National Science Board's *ad hoc* Committee on Nominations for the NSB Class of 2016–2022, pursuant to NSF regulations (45 CFR part 614), the National Science Foundation Act, as amended (42 U.S.C. 1862n-5), and the Government in the Sunshine Act (5 U.S.C. 552b), hereby gives notice in regard to the scheduling of a meeting for the transaction of National Science Board business, as follows:

DATE AND TIME: Monday, December 7, 2015 at 1:30–2:30 p.m. EST

SUBJECT MATTER: Committee chair's remarks, and discussion of the nomination submissions and preparation of a proposed list of names.

STATUS: Closed.

This meeting will be held by teleconference originating at the National Science Board Office, National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230.

Please refer to the National Science Board Web site (www.nsf.gov/nsb) for information or schedule updates, or contact: Brandon Powell (bjpowell@nsf.gov), National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230.

Kyscha Slater-Williams,
Program Specialist.

BILLING CODE 7555–01–P

NATIONAL SCIENCE FOUNDATION**Notice of Permit Modification Received Under the Antarctic Conservation Act of 1978**

AGENCY: National Science Foundation.

ACTION: Notice of Permit Modification Request Received and Permit Issued under the Antarctic Conservation Act of 1978, Public Law 95–541.

SUMMARY: The National Science Foundation (NSF) is required to publish a notice of requests to modify permits issued to conduct activities regulated and permits issued under the Antarctic Conservation Act of 1978. NSF has published regulations under the Antarctic Conservation Act at title 45 part 670 of the Code of Federal Regulations. This is the required notice of a requested permit modification and permit issued.

FOR FURTHER INFORMATION CONTACT: Nature McGinn, ACA Permit Officer, Division of Polar Programs, Rm. 755, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230. Or by email: ACApermits@nsf.gov.

SUPPLEMENTARY INFORMATION: The Foundation issued a permit (ACA 2014–003) to Jennifer Burns on July 18, 2013. The issued permit allows the applicant to study the interaction of Weddell seal condition and the timing of molting and reproduction via capture, restraint, and sedation of adult female seals to conduct health assessments and attach tags.

A recent modification to this permit, dated December 2, 2014, permitted several handling modifications for animals.

Now the applicant proposes a permit modification to attach 2 new types of tags, to conduct nasal swabs, and to keep on some of the tags over winter to collect more data. Both new proposed tags are less than 100g. The seals are already sedated for other permitted procedures, and these new tag attachments and procedures would not increase handling time, since they can be simultaneously conducted during ultrasounds.

The Environmental Officer has reviewed the modification request and has determined that the amendment is not a material change to the permit, and it will have a less than a minor or transitory impact.

November 20, 2015 to February 28, 2017.

The permit modification was issued on November 20, 2015.

Nadene G. Kennedy,
Polar Coordination Specialist, Division of Polar Programs.

- III. Ordering Paragraphs

I. Introduction

On November 19, 2015, the Postal Service filed notice that it has entered into an additional Global Reseller Expedited Package Contracts 4 (GREP 4) negotiated service agreement (Agreement).¹

To support its Notice, the Postal Service filed a copy of the Agreement, a copy of the Governors' Decision authorizing the product, a certification of compliance with 39 U.S.C. 3633(a), and an application for non-public treatment of certain materials. It also filed supporting financial workpapers.

II. Notice of Commission Action

The Commission establishes Docket No. CP2016–21 for consideration of matters raised by the Notice.

The Commission invites comments on whether the Postal Service's filing is consistent with 39 U.S.C. 3632, 3633, or 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comments are due no later than November 30, 2015. The public portions of the filing can be accessed via the Commission's Web site (<http://www.prc.gov>).

The Commission appoints Christopher C. Mohr to serve as Public Representative in this docket.

III. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket No. CP2016–21 for consideration of the matters raised by the Postal Service's Notice.

2. Pursuant to 39 U.S.C. 505, Christopher C. Mohr is appointed to serve as an officer of the Commission to represent the interests of the general public in this proceeding (Public Representative).

3. Comments are due no later than November 30, 2015.

¹ Notice of United States Postal Service of Filing a Functionally Equivalent Global Reseller Expedited Package Contracts 4 Negotiated Service Agreement, November 19, 2015 (Notice).

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

Stacy L. Ruble,
Secretary, Commissioner Goldway,
abstaining.

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2016-16 and CP2016-22;
Order No. 2831]

New Postal Product

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing concerning the addition of Priority Mail Express Contract 29 to the competitive product list. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* December 1, 2015.

ADDRESSES: Submit comments electronically via the Commission's Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202-789-6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Introduction
- II. Notice of Commission Action
- III. Ordering Paragraphs

I. Introduction

In accordance with 39 U.S.C. 3642 and 39 CFR 3020.30 *et seq.*, the Postal Service filed a formal request and associated supporting information to add Priority Mail Express Contract 29 to the competitive product list.¹

The Postal Service contemporaneously filed a redacted contract related to the proposed new product under 39 U.S.C. 3632(b)(3) and 39 CFR 3015.5. Request, Attachment B.

To support its Request, the Postal Service filed a copy of the contract, a

copy of the Governors' Decision authorizing the product, proposed changes to the Mail Classification Schedule, a Statement of Supporting Justification, a certification of compliance with 39 U.S.C. 3633(a), and an application for non-public treatment of certain materials. It also filed supporting financial workpapers.

II. Notice of Commission Action

The Commission establishes Docket Nos. MC2016-16 and CP2016-22 to consider the Request pertaining to the proposed Priority Mail Express Contract 29 product and the related contract, respectively.

The Commission invites comments on whether the Postal Service's filings in the captioned dockets are consistent with the policies of 39 U.S.C. 3632, 3633, or 3642, 39 CFR part 3015, and 39 CFR part 3020, subpart B. Comments are due no later than December 1, 2015. The public portions of these filings can be accessed via the Commission's Web site (<http://www.prc.gov>).

The Commission appoints James F. Callow to serve as Public Representative in these dockets.

III. Ordering Paragraphs

It is ordered:

1. The Commission establishes Docket Nos. MC2016-16 and CP2016-22 to consider the matters raised in each docket.

2. Pursuant to 39 U.S.C. 505, James F. Callow is appointed to serve as an officer of the Commission to represent the interests of the general public in these proceedings (Public Representative).

3. Comments are due no later than December 1, 2015.

4. The Secretary shall arrange for publication of this order in the **Federal Register**.

By the Commission.

Stacy L. Ruble,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76489; File No. SR-CBOE-2015-103]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Technical Disconnect Mechanism

November 20, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 9, 2015, Chicago Board Options Exchange, Incorporated (the "Exchange" or "CBOE") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 6.23C related to the Exchange's Technical Disconnect Mechanism. The text of the proposed rule change is provided below. (additions are *italicized*; deletions are [bracketed])

* * * * *

Chicago Board Options Exchange, Incorporated

Rules

* * * * *

Rule 6.23C Technical Disconnect

(a) When a CBOE Application Server ("CAS") loses communication with a Client Application such that a CAS does not receive an appropriate response to a Heartbeat Request within "x" period of time, the Technical Disconnect Mechanism will automatically logoff the Trading Permit Holder's affected Client Application and[, if applicable, will] automatically cancel all the Trading Permit Holder's Market-Maker quotes, *if applicable, and open orders with a time-in-force of "day" ("day orders"), if the Trading Permit Holder enables that optional service*, posted through the affected Client Application. The following describes how the Technical Disconnect Mechanism works for each of the Exchange's application programming interfaces ("APIs"):

(i) *CBOE Market Interface ("CMi") API*. A CAS shall generate a Heartbeat Request to a Client Application every "n" period of time. The value of "n" shall be set by the Exchange at two (2) seconds. The value of "x" shall be set either by the Exchange or a Trading Permit Holder, depending upon the version of CMi being used. If the value of "x" is determined by the Exchange, "x" shall be set at twenty (20) seconds. If the value of "x" is determined by a Trading Permit Holder, "x" shall in no event be less than three (3) seconds or exceed twenty (20) seconds.]

(i[i]) *CBOE Market Interface 2.0 ("CMi 2") API*. A CAS shall generate a Heartbeat Request to a Client Application (i) after the CAS does not receive any messages from a particular Client Application for "n" period of time or (ii) after every "n" period of time. A Trading Permit Holder shall determine the value of "n." In no event shall "n" be less than three (3) seconds or exceed twenty (20) seconds. If a CAS generates a Heartbeat Request only after it does not receive any messages from a particular Client Application for "n" period of time, the value of "x" shall be set at a half (.5) second. If a CAS generates a Heartbeat Request every "n" period of time, the value of "x" shall be equal to the value of "n."

(ii[i]) *Financial Information eXchange ("FIX") Protocol API*. A CAS shall generate a Heartbeat Message to a Client Application after the CAS does not receive any messages from a particular Client Application for "n" period of time. If the CAS does not receive a response to the Heartbeat Message from the Client Application for "n" period of time, the CAS shall generate a Heartbeat Request to the Client Application. A Trading Permit Holder shall determine the value of "n" at logon. In no event shall "n" be less than five (5) seconds. The value of "x" shall be equal to the value of "n."

(b) The Technical Disconnect Mechanism is enabled for all Trading Permit Holders and may not be disabled by Trading Permit Holders, *except the automatic cancellation of a Trading Permit Holder's day orders is an optional service that the Trading Permit Holder may enable or disable through the API*.

(c) The trigger of the Technical Disconnect Mechanism is event- and Client Application-specific. The automatic cancellation of a Market-Maker's quotes (*if applicable*) or a Trading Permit Holder's day orders (*if enabled by the Trading Permit Holder*) entered into a CAS via a particular Client Application will neither impact nor determine the treatment of the

quotes of the same or other Market-Makers or orders of the same Trading Permit Holder entered into the CAS via a separate and distinct Client Application. *Except for day orders the Technical Disconnect Mechanism automatically cancels if a Trading Permit Holder enables that optional service*, [T]he Technical Disconnect Mechanism will not impact or determine the treatment of orders a Trading Permit Holder previously entered into the CAS.

. . . *Interpretations and Policies:*
.01 No change.

* * * * *

The text of the proposed rule change is also available on the Exchange's Web site (<http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx>), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 6.23C related to the Exchange's Technical Disconnect Mechanism. Rule 6.23C(a) provides that when a CBOE Application Server ("CAS")³ loses communication with a Client Application⁴ such that a CAS does not receive an appropriate response to a Heartbeat Request⁵ within "x" period of

³ CBOE currently has numerous CASs serving TPHs.

⁴ For relevant purposes, a "Client Application" is the system component, such as a CBOE-supported workstation or a TPH's custom trading application, through which a TPH communicates its quotes and/or orders to a CAS. Messages are passed between a Client Application and a CAS. A Market-Maker may send quotes to the Exchange from one or more Client Applications, and a TPH may send orders to the Exchange from one or more Client Applications.

⁵ A "Heartbeat Request" refers to a message from a CAS to a Client Application to check connectivity and which requires a response from the Client

Continued

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

time, the Technical Disconnect Mechanism will automatically logoff the Trading Permit Holder's ("TPH") affected Client Application. If that occurs, the current rule provides that the Technical Disconnect Mechanism, if applicable, will automatically cancel all the TPH's Market-Maker quotes posted through the affected Client Application.⁶ The Technical Disconnect Mechanism is intended to help mitigate the potential risks associated with a loss of communication with a Client Application, such as erroneous or unintended executions for stale quotes that are resting in the CBOE book. This mechanism serves to assist a TPH when a technical or system issue occurs, as well as assist the Exchange in maintaining a fair and orderly market.

The proposed rule change provides TPHs with an optional service that, if enabled by a TPH, will cause the Technical Disconnect Mechanism to also automatically cancel all the TPH's open orders with a time-in-force of "day" ("day orders") posted through the affected Client Application if the CAS loses communication with the Client Application. The proposed rule change amends Rule 6.23C(b) to provide that the TPH may enable or disable this optional service through its application programming interface ("API") (all other aspects of the Technical Disconnect Mechanism continue to otherwise be enabled for all TPHs and may not be disabled by TPHs).⁷ The proposed rule change makes corresponding changes to Rule 6.23C(c) that indicate the Technical Disconnect Mechanism will automatically cancel a TPH's day orders (in addition to a Market-Maker's quotes), if the TPH enables the proposed optional service.⁸ As is the case in the event the Technical Disconnect

Mechanism automatically logs a TPH off and cancels its Market-Maker quotes (if applicable), if a TPH enables this proposed optional service, and the Technical Disconnect Mechanism automatically logs a TPH off and cancels the TPH's day orders due to lost communication with TPH's Client Application, the TPH may send messages to the CAS to enter new orders once it reestablishes connectivity to the Client Application. In addition, any nonconnectivity will continue to be event- and Client Application-specific. In other words, any cancellation of day orders entered into a CAS via a particular Client Application will neither impact nor determine the treatment of the quotes of the same TPH entered into a CAS via a separate and distinct Client Application. The Technical Disconnect Mechanism will not impact or determine the treatment of orders previously entered into a CAS if the TPH does not enable this optional service, nor will it impact or determine the treatment of non-day orders previously entered into a CAS by the TPH. The Exchange notes use of this service will be voluntary and within the sole discretion of each TPH.

The proposed optional service is an additional preventative risk control measure that CBOE is making available to TPHs. It is intended to help further mitigate the potential risks associated with a loss of communication with a Client Application. While orders may be static in nature and rest in the book, TPHs often enter day orders more frequently in response to then-current market conditions. Therefore, if a TPH's Client Application is disconnected for any period of time, it is possible that market conditions upon which it based its day orders may change during that time and make those orders stale. Consequently, any resulting executions of those orders may be erroneous or unintended. The Exchange believes it is appropriate to limit this optional service to day orders and exclude good-til-cancelled orders,⁹ as those orders are intended to rest in the book for a period of time and thus have lower risk of erroneous or unintended executions during and after the Technical Disconnect Mechanism logs off a TPH.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange

and, in particular, the requirements of Section 6(b) of the Act.¹⁰ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹¹ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹² requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the proposed rule change helps maintain a fair and orderly market and protects investors and the public interest. The Technical Disconnect Mechanism is a valuable tool that is designed to help maintain a fair and orderly market. The Exchange believes that providing TPHs with the option to have the Technical Disconnect Mechanism cancel its day orders, in addition to Market-Maker quotes (if applicable), further mitigates the potential risks associated with a loss in communication with a Client Application. The Exchange believes it is reasonable to offer to cancel only day orders. Unlike non-day orders, day orders are more likely to be reflective of then-current market conditions and are intended to rest in the book for a limited period of time. As a result, in the event that a CAS loses connectivity with a Client Application, execution of day orders during that time are more likely to result in erroneous or unintended executions, while risk of such executions is lower for non-day orders. The proposed optional service protects TPHs from these potential erroneous or unintended executions, as well as protects investors and the efficiency and fairness of the markets in general. The Exchange believes this functionality enhances the overall market quality for options traded on CBOE. The Exchange notes that other exchanges offer their members similar services that cancels a member's orders if it disconnects from the exchange.¹³

Application in order to avoid logoff. The Heartbeat Request acts as a virtual pulse between a CAS and a Client Application and allows a CAS to continually monitor its connection with a Client Application. Failure to receive a response to a Heartbeat Request within the Heartbeat Response Time is indicative of a technical or system issue.

⁶ See Rule 6.23C and Securities Exchange Act Release No. 34-70039 (July 25, 2013), 78 FR 46395 (July 31, 2013) (SR-CBOE-2013-071) for further information regarding the Technical Disconnect Mechanism.

⁷ CBOE currently makes available two APIs: CBOE Market Interface 2.0 ("CMI 2") and Financial Information eXchange Protocol ("FIX"). The proposed rule change deletes Rule 6.23A(a)(i) [sic] regarding the CBOE Market Interface ("CMI") API, as that has been phased out and is no longer available to TPHs. The proposed rule change also renumbers subparagraphs (ii) and (iii) to become subparagraphs (i) and (ii), respectively.

⁸ In addition, the proposed rule change makes nonsubstantive changes to Rule 6.23C(a), including moving the phrase "if applicable" to ensure that phrase clearly applies to the cancellation of a Market-Maker's quotes (as that functionality only applies to TPHs that are Market-Makers).

⁹ Currently, the Exchange offers two time-in-force order types: Day and good-til-cancelled. The proposed optional service will apply to orders that include the "day" marking.

¹⁰ 15 U.S.C. 78f(b).

¹¹ 15 U.S.C. 78f(b)(5).

¹² *Id.*

¹³ See, e.g., BZX Exchange US Equities FIX Specification, Version 1.33.5 (October 8, 2014).

The Exchange also believes that the proposed rule change is designed to not permit unfair discrimination among market participants. Use of the optional service will be voluntary and within the sole discretion of each TPH. The proposed optional service is available to all TPHs and will apply to the same order types of all TPHs.

The proposed rule change to delete language related to CMi benefits investors, as that API is no longer available to TPHs and thus deletion of that language helps eliminate confusion. CMi2 and FIX continue to be available to TPHs.

B. Self-Regulatory Organization's Statement on Burden on Competition

CBOE does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange does not believe the proposed rule change will cause any burden on intramarket competition because the optional service will be available to all TPHs. Use of this optional service will be within the sole discretion of each TPH. The proposed rule change will have no impact on TPHs that do not enable the proposed optional service. For TPHs that elect to enable the proposed optional service, the only impact on those TPHs will be cancellation of day orders (in addition to Market-Maker quotes) upon loss of connectivity. The Technical Disconnect Mechanism will otherwise continue to function in the same manner as it does today. Further, the Exchange does not believe that such change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change modifies a mechanism available on CBOE's system and applies only to orders entered on CBOE. The Exchange notes that, should the proposed change make CBOE a more attractive place for trading, market participants trading on other exchanges are welcome to become TPHs and trade at CBOE if they determine that this proposed change has made CBOE more

available at http://www.batstrading.com/resources/membership/BATS_FIX_Specification.pdf (see Section 5.1 for description of automatic cancel on disconnection or malfunction); MIAX Options Market Protections Handout (March 2015), available at https://www.miaxoptions.com/sites/default/files/MIAX_Market_Protections_March_2015.pdf (see page 5 for description of auto cancel on disconnect order protection); and NYSE UTPDirect (CGC Binary) API Specification, V1.4 (February 26, 2015), available at https://www.nyse.com/publicdocs/nyse/markets/nyse/NYSEUTPDirect_Specification.pdf (see Section 3.8 for description of cancel on disconnect service).

attractive or favorable. Additionally, as discussed above, other options exchanges offer their members similar functionality.¹⁴

The proposed rule change to delete language regarding CMi has no impact on competition, as it merely deletes a provision regarding an API that is no longer used by, and is no longer available to, TPHs. CMi 2 ultimately replaced CMi, and FIX continues to be available to TPHs as well.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁵ and paragraph (f) of Rule 19b-4¹⁶ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CBOE-2015-103 on the subject line.

Paper comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-CBOE-2015-103. This file

¹⁴ *Id.*

¹⁶ 17 CFR 240.19b-4(f).

number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CBOE-2015-103 and should be submitted on or before December 18, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁷

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76498; File No. SR-CBOE-2015-105]

Self-Regulatory Organizations; Chicago Board Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Fees Schedule

November 20, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 16, 2015, Chicago Board Options Exchange, Incorporated (the "Exchange")

¹⁷ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

or “CBOE”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend its Fees Schedule. The text of the proposed rule change is available on the Exchange’s Web site (<http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx>), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its Fees Schedule, effective November 16, 2015. Specifically, the Exchange proposes to amend the Fees Schedule with respect to Qualified Contingent Cross (“QCC”) ³ orders. Currently, the Fees Schedule provides for a transaction fee for all non-customer QCC orders of \$0.15 per contract side (customer orders are not assessed a charge) and a \$0.10 per contract credit for the initiating order side, regardless of origin code.⁴ The Exchange first proposes to increase the fee for QCC transactions from \$0.15 per contract to \$0.17 per contract for all

³ A QCC order is comprised of an order to buy or sell at least 1,000 contracts (or 10,000 mini-option contracts) that is identified as being part of a qualified contingent trade, coupled with a contra-side order or orders totaling an equal number of contracts.

⁴ The Exchange notes that the \$0.10 per contract credit is not be available for customer-to-customer transactions.

non-customer orders. The Exchange notes that the proposed increase is in line with other exchanges.⁵

Next, the Exchange proposes to provide that the maximum credit paid shall not exceed \$350,000 per month per Trading Permit Holder (“TPH”). The Exchange notes that it will aggregate the credits of affiliated TPHs (TPHs with at least 75% common ownership between the firms as reflected on each firm’s Form BD, Schedule A) for purposes of determining whether a TPH has met the QCC credit cap. The Exchange believes that, while limiting the amount of rebate that a market participant can receive, the current QCC rebate will continue to incentivize market participants to seek to obtain the highest rebate possible. The Exchange also notes that other Exchanges have similar caps on rebates offered for QCC transactions.⁶

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the “Act”) and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act. Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitation transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with Section 6(b)(4) of the Act, which requires that Exchange rules provide for the equitable allocation of reasonable dues, fees, and other charges among its Trading Permit Holders and other persons using its facilities.

The Exchange believes the proposed increase to the transaction fee for QCC orders is reasonable because the proposed amount is in line with the amount assessed at other Exchanges for

⁵ See e.g., NASDAQ OMX PHLX LLC (“PHLX”) Pricing Schedule, Section II, QCC Transaction Fees.

⁶ See e.g., PHLX Pricing Schedule, Section II, QCC Transaction Fees and NSYE Amex Options Fees Schedule (“Amex”), Section IE, Qualified Contingent Cross (“QCC”) Fees and Credits for Standard Options and Mini Options.

similar transactions.⁷ Additionally, the proposed fee increase would be charged to all non-customers alike. Assessing QCC rates to all market participants except customers is equitable and not unfairly discriminatory because Customer order flow enhances liquidity on the Exchange for the benefit of all market participants. Specifically, Customer liquidity benefits all market participants by providing more trading opportunities, which attracts Market-Makers. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants. By exempting customer orders, the QCC transaction fees will not discourage the sending of customer orders.

The Exchange believes the proposed QCC credit cap is reasonable, equitable and not unfairly discriminatory because it is in line with similar caps on rebates paid for QCC transactions at other exchanges⁸ and because all TPHs would be uniformly capped at \$350,000 per month. The Exchange also believes it’s reasonable, equitable and not unfairly discriminatory to provide that it will aggregate the credits of affiliated TPHs to determine whether the credit cap has been met, as the Exchange believes this should prevent TPHs from dividing up their orders to different affiliates in order to avoid meeting the cap and it would apply to all TPHs.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule changes will impose any burden on competition that are not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act, because the proposed [sic] rule changes apply uniformly to all Trading Permit Holders. The Exchange believes this proposal will not cause an unnecessary burden on intermarket competition because it only affects trading on CBOE. To the extent that the proposed changes make CBOE a more attractive marketplace for market participants at other exchanges, such market participants are welcome to become CBOE market participants. Additionally,

⁷ See e.g., PHLX Pricing Schedule, Section II, QCC Transaction Fees and NSYE Amex Options Fees Schedule, Section I.E, Qualified Contingent Cross (“QCC”) Fees and Credits for Standard Options and Mini Options.

⁸ *Id.*

the Exchange notes that it operates in a highly competitive market, comprised of thirteen options exchanges, in which market participants can easily and readily direct order flow to competing venues if they deem fee levels at a particular venue to be excessive or rebates to be inadequate.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act⁹ and paragraph (f) of Rule 19b-4¹⁰ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CBOE-2015-105 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-CBOE-2015-105. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use

only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CBOE-2015-105, and should be submitted on or before December 18, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹¹

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76492; File No. SR-NYSEArca-2015-92]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Adopting a Rule Relating to Fingerprint-Based Background Checks of Directors, Officers, Employees, and Others

November 20, 2015.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (the "Act")² and Rule 19b-4 thereunder,³ notice is hereby given that, on November 12, 2015, NYSE Arca, Inc. (the "Exchange" or "NYSE Arca") filed with the Securities and Exchange Commission (the "SEC" or

"Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes a rule to [sic] relating to fingerprint-based background checks of directors, officers, employees and others. The proposed rule change is available on the Exchange's Web site at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange and its wholly owned subsidiary NYSE Arca Equities proposes a new Rule 3.11⁴ codifying the current practice of conducting fingerprint-based background checks of prospective and current employees, temporary personnel, independent contractors, service providers and others. The proposed rule is substantially similar to Rule 28 of the Exchange's affiliates, New York Stock Exchange LLC and NYSE MKT LLC.⁵ A number of other securities markets have also adopted a similar rule, permitting them to obtain fingerprints from certain enumerated

⁴ NYSE Arca and NYSE Arca Equities Rule 3 govern organization and administration. The text of proposed Rule 3.11 would be identical for both NYSE Arca and NYSE Arca Equities.

⁵ See NYSE Rule 28; NYSE MKT Rule 28. There are no substantive differences between the proposed Rule and NYSE Rule 28 and NYSE MKT Rule 28.

⁹ 15 U.S.C. 78s(b)(3)(A).

¹⁰ 17 CFR 240.19b-4(f).

¹¹ 17 CFR 200.30-3(a)(12).

¹⁵ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

parties.⁶ The proposed rule is also consistent with those rules.

Background and Proposed Rule Change

Section 17(f)(2) of the Securities Exchange Act of 1934 (the “Act”), as amended by the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010 (“Dodd-Frank Act”),⁷ provides that every member of a national securities exchange, broker, dealer, registered transfer agent, registered clearing agency, registered securities information processors, national securities exchanges and national securities associations shall require each of its partners, directors, officers and employees of [sic] to be fingerprinted and submit those fingerprints (or cause the fingerprints to be submitted) to the Attorney General of the United States (“Attorney General”) for identification. Section 17(f)(2) explicitly directs the Attorney General to provide self-regulatory organizations (“SROs”) designated by the Commission with access to criminal history record information. Further, SEC Rule 17f-2 authorizes SROs to store criminal record information received from the Federal Bureau of Investigation (“FBI”), which maintains on behalf of the Attorney General a database of fingerprint-based criminal history records.

Consistent with these requirements, proposed Rule 3.11 would permit the Exchange to obtain fingerprints of prospective and current employees, temporary personnel, independent contractors and service providers of the Exchange and its principal subsidiaries; submit those fingerprints to the Attorney General or his or her designee for identification and processing; and receive criminal history record information from the Attorney General for evaluation and use, in accordance with applicable law, in enhancing the security of the facilities, systems, data, and/or records of the Exchange and its principal subsidiaries.

The Exchange would utilize a Live-Scan⁸ electronic system to capture and transmit fingerprints directly to the FBI. The capture and transmittal function, and corresponding receipt of criminal history information from the FBI, would be handled directly by Exchange

⁶ See, e.g., International Securities Exchange (“ISE”) Rule 1408; Nasdaq Stock Market (“Nasdaq”) Rule 0140; Chicago Board Options Exchange (“CBOE”) Rule 15.10.

⁷ See 15 U.S.C. 78q(f)(2); Dodd-Frank Act Sect. 929S.

⁸ Live-Scan refers to the process of capturing fingerprints directly into a digitized format as opposed to traditional ink and paper methods. Live-Scan technology captures and transfers images to a central location and/or interface for identification processing.

personnel and/or an FBI-approved “Channel Partner”⁹ who would maintain and operate, on behalf of the Exchange, a Live-Scan and/or other electronic system(s) for the submission of fingerprints to the FBI; receive and maintain criminal history record information from the FBI; and disseminate such information, through secure systems, to a limited set of approved reviewing officials within the Exchange and its affiliates.

Fingerprint-based background checks would enhance the ability to screen adequately employees and non-employees¹⁰ to determine better, in accordance with applicable law, whether there are unacceptable risks associated with granting such persons access to facilities and records. Through access to state-of-the-art information systems administered and maintained by the FBI, the Exchange would receive centrally-maintained “criminal history record information,” which includes arrest-based data and derivative information, and may include personal descriptive data; FBI number; conviction status; sentencing, probation and parole information; and such other information as the FBI may make available. This information is supplied to the FBI by various local, state, federal and/or international criminal justice agencies. The information obtained through fingerprint-based background checks would thus provide a more exhaustive and reliable profile of a candidate’s criminal record, and thereby better facilitate risk assessment, than a physical review of court records based on information provided by the candidate.

⁹ FBI-approved Channel Partners receive the fingerprint submission and relevant data, collect the associated fee(s), electronically forward the fingerprint submission with the necessary information to the FBI Criminal Justice Information Services Division (“CJIS”) for a national Criminal History Summary check, and receive the electronic summary check result for dissemination to the authorized employer entity. See Securities Exchange Act Release No. 71066 (December 12, 2013), 78 FR 76667 (December 18, 2013) (SR-ISE-2013-66) (“Release No. 71066”). The Exchange would retain ultimate legal responsibility for the fulfillment of its statutory and self-regulatory obligations under the Act, including compliance with Section 17(f)(2) of the Act as amended by the Dodd-Frank Act.

¹⁰ Under the proposed Rule, the Exchange would also obtain fingerprints from service providers, including employees of affiliates of the Exchange. See CBOE Rule 15.10; Securities Exchange Act Release No. 69496 (May 2, 2013), 78 FR 26671, 26671 (May 7, 2013) (SR-CBOE-2013-044) (CBOE conducts fingerprint-based criminal record checks of directors, officers and employees as well as, without limitation, “temporary personnel, independent contractors, consultants, vendors and service providers . . . who have or are anticipated to have access to facilities and records.”).

The proposed access to criminal history information is consistent with federal law. As noted, Section 17(f)(2) was amended by the Dodd-Frank Act to also require partners, directors, officers and employees of registered securities information processors, national securities exchanges and national securities associations to be fingerprinted. Although Section 17(f)(2) does not require the fingerprinting of contractors, the statute specifically permits SROs designated by the SEC to have access to “all criminal history record information.”

The Exchange accordingly believes that fingerprint-based background checks of employees and non-employees would promote the objectives of investor protection, business continuity and workplace safety by providing the Exchange with an effective tool for identifying and excluding persons with felony or misdemeanor conviction records that may pose a threat to the safety of Exchange personnel or the security of facilities and records.

The Exchange will comply with all applicable laws relating to the use and dissemination of criminal history record information obtained from the FBI.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act¹¹ in general, and furthers the objectives of Section 6(b)(5) of the Act,¹² in particular, because it is designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system, and protect investors and the public interest. In particular, the Exchange believes fingerprint-based background checks of directors, officers, employees and contractors is consistent with the Section 6(b)(5) requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest in that they would help identify and exclude persons with felony or misdemeanor conviction records that may pose a threat to the safety of Exchange personnel or the security of facilities and records, thereby enhancing business

¹¹ 15 U.S.C. 78f(b).

¹² 15 U.S.C. 78f(b)(5).

continuity, workplace safety and the security of the Exchange's operations and helping to protect investors and the public interest. The proposed rule is substantially similar to the rules of the Exchange's affiliates NYSE and NYSE MKT and the fingerprinting rules of other SROs.¹³ The proposed amendment would also conform the Exchange's fingerprinting practices with Section 17(f)(2) of the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended to address competitive issues but rather to enhance the security and continuity of the Exchange's facilities and records by adopting a fingerprinting rule that codifies the Exchange's current practice in compliance with Section 17(f)(2) of the Act as amended by the Dodd-Frank Act.¹⁴ As discussed below, the Exchange notes that the proposed rule change is based on the fingerprinting rules of other SROs.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the proposed rule change does not (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁵ and Rule 19b-4(f)(6) thereunder.¹⁶

¹³ See, e.g., International Securities Exchange Rule 1408. See generally Release No. 71066, 78 FR at 76668, n. 12 (noting that "[a]n FBI-approved Channel Partner simply helps expedite the delivery of Criminal History Summary information on behalf of the FBI", and that the "process for making a request through an FBI-approved Channel Partner is consistent with FBI submission procedures").

¹⁴ See Section 929S of the Dodd-Frank Act.

¹⁵ 15 U.S.C. 78s(b)(3)(A).

¹⁶ 17 CFR 240.19b-4(f)(6). As required under Rule 19b-4(f)(6)(iii), the Exchange provided the Commission with written notice of its intent to file

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)¹⁷ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NYSEArca-2015-92 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-NYSEArca-2015-92. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official

the proposed rule change, along with a brief description and the text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission.

¹⁷ 15 U.S.C. 78s(b)(2)(B).

business days between 10 a.m. and 3 p.m. Copies of the filing will also be available for inspection and copying at the NYSE's principal office and on its Internet Web site at www.nyse.com. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NYSEArca-2015-92 and should be submitted on or before December 18, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁸

Robert W. Errett

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76497; File No. SR-NSX-2015-06]

Self-Regulatory Organizations; National Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Adopt Rule 2.13, Mandatory Participation in Testing of Backup Systems

November 20, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Exchange Act" or "Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 10, 2015, National Stock Exchange, Inc. ("NSX" or the "Exchange") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change, as described in Items I and II below, which Items have been substantially prepared by the Exchange. The Exchange has designated this proposal as a "non-controversial" proposed rule change pursuant to Section 19(b)(3)(A) of the Act³ and Rule 19b-4(f)(6)(iii)⁴ thereunder, which renders it effective upon filing with the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

¹⁸ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ 15 U.S.C. 78s(b)(3)(A).

⁴ 17 CFR 240.19b-4(f)(6)(iii).

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange is proposing to adopt Rule 2.13, Mandatory Participation in Testing of Backup Systems, establishing business continuity and disaster recovery plans ("BC/DR plans") testing requirements for certain ETP Holders in connection with Regulation Systems Compliance and Integrity ("Regulation SCI"), as further described below.⁵

The text of the proposed rule change is available at the Exchange's Web site at www.nsx.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in Sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

As adopted by the Commission, Regulation SCI applies to certain self-regulatory organizations (including the Exchange), alternative trading systems ("ATs"), plan processors, and exempt clearing agencies (collectively, "SCI entities"), and will require these SCI entities to comply with requirements with respect to the automated systems central to the performance of their regulated activities.⁶ Among the requirements of Regulation SCI is Rule 1001(a)(2)(v), which requires the Exchange and other SCI entities to maintain "[b]usiness continuity and disaster recovery plans that include

maintaining backup and recovery capabilities sufficiently resilient and geographically diverse and that are reasonably designed to achieve next business day resumption of trading and two-hour resumption of critical SCI systems following a wide-scale disruption."⁷

Pursuant to Regulation SCI, the Exchange is proposing to require certain ETP Holders to participate in testing of the operation of the Exchange's BC/DR plans. Paragraph (a) of Rule 1004 of Regulation SCI requires each SCI entity to: "[e]stablish standards for the designation of those members or participants that the SCI entity reasonably determines are, taken as a whole, the minimum necessary for the maintenance of fair and orderly markets in the event of the activation of such plans."⁸ Paragraph (b) of Rule 1004 further requires each SCI entity to "[d]esignate members or participants pursuant to the standards established in paragraph (a) of [Rule 1004] and require participation by such designated members or participants in scheduled functional and performance testing of the operation of such plans, in the manner and frequency specified by the SCI entity, provided that such frequency shall not be less than once every 12 months."⁹

To comply with the provisions of Rule 1004 of Regulation SCI, the Exchange is proposing to adopt new Rule 2.13 governing mandatory testing of the Exchange's backup systems. First, in paragraph (a) of Rule 2.13, the Exchange proposes to include language from paragraph (a) of Rule 1004 of Regulation SCI to summarize the Exchange's obligation pursuant to such rule. Specifically, the Exchange proposes to state that "[p]ursuant to Regulation SCI and with respect to the Exchange's business continuity and disaster recovery plans, including its backup systems, the Exchange is required to establish standards for the designation of ETP Holders that the Exchange reasonably determines are, taken as a whole, the minimum necessary for the maintenance of fair and orderly markets in the event of the activation of such plans." The Exchange further proposes that paragraph (a) state that the "Exchange has established standards and will designate ETP Holders according to those standards" as set forth in the proposed Rule. In addition, the Exchange proposes to make clear that all ETP Holders are permitted to connect to the Exchange's

backup systems as well as to participate in testing of such systems. Proposed paragraph (a) is consistent with the Commission's adoption of Regulation SCI, which encouraged "SCI entities to permit non-designated members or participants to participate in the testing of the SCI entity's BC/DR plans if they request to do so."¹⁰

Second, in paragraph (b) of Rule 2.13, the Exchange proposes to specify the criteria that the Exchange will employ to determine whether an ETP Holder will be required to connect to the Exchange's backup systems and to participate in scheduled functional and performance testing as announced by the Exchange, which shall occur at least once every 12 months. Specifically, proposed paragraph (b) would require all ETP Holders that account for a meaningful percentage of the Exchange's volume to connect to the Exchange's backup systems and to participate in functional and performance testing.

In adopting the requirements of Rule 2.13(b) to participate in mandatory testing of such systems, the Exchange intends to subject to the Rule only those ETP Holders that the Exchange believes are necessary to maintain fair and orderly markets at the Exchange. Designating ETP Holders to participate in mandatory testing because they account for a meaningful percentage of the Exchange's overall volume is a reasonable means to ensure the maintenance of a fair and orderly market on the Exchange.

In addition to paragraphs (a) and (b) described above, the Exchange also proposes to adopt Interpretation and Policy .01, which would provide additional detail regarding the notice that will be provided to ETP Holders that have been designated pursuant to subparagraph (b) of the Rule as well as the Exchange's method for measuring the volume threshold. As proposed, Interpretation and Policy .01 would state that for purposes of identifying ETP Holders that account for a meaningful percentage of the Exchange's overall volume, the Exchange will measure volume executed on the Exchange on a quarterly basis. The percentage of volume that the Exchange considers to be meaningful for purposes of this Interpretation and Policy .01 will be determined by the Exchange and will be published in a circular distributed to ETP Holders. The Exchange will publish its first Information Circular consistent with

⁵ See Securities Exchange Act Release No. 73639 (November 19, 2014), 79 FR 72252 (December 5, 2014) ("SCI Adopting Release").

⁶ The Exchange ceased trading operations as of the close of business on May 30, 2014. See Securities Exchange Act Release No. 72107 (May 6, 2014), 79 FR 27017 (May 12, 2014) (SR-NSX-2014-14). However, the Exchange has retained its status as a registered national securities exchange under Section 6 of the Act, 15 U.S.C. 78f and a self-regulatory organization as defined in Section 3(a)(26) of the Act, 15 U.S.C. 78c(a)(26). NSX is planning to resume trading operations, subject to receiving Commission approval to do so.

⁷ 17 CFR 242.1001(a)(2)(v).

⁸ 17 CFR 242.1004(a).

⁹ 17 CFR 242.1004(b).

¹⁰ See SCI Adopting Release, *supra* note 5 at 72350.

Rule 2.13 upon a resumption of trading on the System.

The proposed Interpretation and Policy would also require the Exchange to notify, on a quarterly basis, individual ETP Holders that are subject to proposed paragraph (b) based on the prior calendar quarter's volume. Finally, as proposed, if an ETP Holder has not previously been subject to the requirements of proposed paragraph (b), then such ETP Holder would have until the next calendar quarter before such requirements are applicable. The Exchange believes the proposed notice requirements are necessary to provide ETP Holders with proper advance notice in the event they become subject to proposed Rule 2.13(b). The proposed timeframes would also provide ETP Holders with adequate time to become compliant with such Rule due to the necessary infrastructure changes that may be needed to connect to the Exchange's backup systems for an ETP Holder that is not already connected.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act¹¹ in general, and furthers the objectives of Section 6(b)(5) of the Act¹² in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. The proposal will ensure that the minimum number of ETP Holders necessary for the maintenance of a fair and orderly market are properly designated consistent with Rule 1004 of Regulation SCI.

Specifically, the proposal will adopt criteria with respect to the designation of ETP Holders that are required to participate in the testing of the Exchange's BC/DR plans, as well as appropriate notification regarding such designation. As set forth in the SCI Adopting Release, "SROs have the authority, and legal responsibility, under Section 6 of the Exchange Act, to adopt and enforce rules (including rules to comply with Regulation SCI's requirements relating to BC/DR testing) applicable to their members or participants that are designed to, among other things, foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the

mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest."¹³ The proposal is consistent with such authority and legal responsibility.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the proposal is not a competitive proposal but rather is necessary for the Exchange's compliance with Regulation SCI.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants or Others

The Exchange has neither solicited nor received written comments on the proposed rule change from market participants or others.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A) of the Act¹⁴ and Rule 19b-4(f)(6)(iii) thereunder.¹⁵ Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A) of the Act and Rule 19b-4(f)(6)(iii) thereunder.¹⁶ A proposed rule change filed under Rule 19b-4(f)(6)(iii)¹⁷ normally does not become operative prior to 30 days after the date of the filing. However, pursuant to Rule 19b4(f)(6)(iii),¹⁸ the Commission may designate a shorter time if such action

¹³ See SCI Adopting Release, supra note 5 at 72350.

¹⁴ 15 U.S.C. 78s(b)(3)(A)(iii).

¹⁵ 17 CFR 240.19b-4(f)(6).

¹⁶ In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

¹⁷ 17 CFR 240.19b-4(f)(6).

¹⁸ 17 CFR 240.19b-4(f)(6)(iii).

is consistent with the protection of investors and the public interest.

The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest as it will allow the Exchange to immediately incorporate changes required under Regulation SCI, such as establishing standards for designating BC/DR participants, and help ensure that the Exchange will be able to satisfy the requirements of Regulation SCI once the Exchange commences operations. Accordingly, the Commission designates the proposed rule change to be operative upon filing.¹⁹

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)²⁰ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NSX-2015-06 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File No. SR-NSX-2015-06. This file number should be included in the subject line if email is used. To help the

¹⁹ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

²⁰ 15 U.S.C. 78s(b)(2)(B).

¹¹ 15 U.S.C. 78f(b).

¹² 15 U.S.C. 78f(b)(5).

Commission process and review comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549-1090. Copies of the filing will also be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. Interested persons should submit only information that they wish to make available publicly. All submissions should refer to file number SR-NSX-2015-06 and should be submitted on or before December 18, 2015.

For the Commission by the Division of Trading and Markets, pursuant to the delegated authority.²¹

Robert W. Errett,
Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76485; File No. SR-NYSE-2015-57]

Self-Regulatory Organizations; New York Stock Exchange LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Establishing Fees for the NYSE Integrated Feed

November 20, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 5, 2015, New York Stock Exchange LLC ("NYSE" or the "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items

have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to establish fees for the NYSE Integrated Feed. The proposed rule change is available on the Exchange's Web site at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to establish the fees for the NYSE Integrated Feed in the NYSE Proprietary Market Data Fee Schedule ("Fee Schedule").³ The Exchange proposes to make the NYSE Integrated Feed available without charge starting on November 16, 2015. The Exchange proposes to establish the following fees for the NYSE Integrated Feed operative on January 1, 2016:

1. *Access Fee.* For the receipt of access to the NYSE Integrated Feed, the Exchange proposes to charge \$7,500 per month.

2. *User Fees.* The Exchange proposes to charge a Professional User Fee (Per User) of \$70 per month and a Non-Professional User Fee (Per User) of \$16 per month. These user fees would apply to each display device that has access to the NYSE Integrated Feed.

3. *Non-Display Use Fees.* The Exchange proposes to establish non-display fees for the NYSE Integrated

Feed using the same non-display use fee structure established for the Exchange's other market data products.⁴ Non-display use would mean accessing, processing, or consuming the NYSE Integrated Feed delivered via direct and/or Redistributor⁵ data feeds for a purpose other than in support of a data recipient's display or further internal or external redistribution ("Non-Display Use"). Non-Display Use would include any trading use, such as high frequency or algorithmic trading, and would also include any trading in any asset class, automated order or quote generation and/or order pegging, price referencing for algorithmic trading or smart order routing, operations control programs, investment analysis, order verification, surveillance programs, risk management, compliance, and portfolio management.

Under the proposal, for Non-Display Use of NYSE Integrated Feed, there would be three categories of, and fees applicable to, data recipients. One, two or three categories of Non-Display Use may apply to a data recipient.

- Under the proposal, the Category 1 Fee would be \$20,000 per month and would apply when a data recipient's Non-Display Use of the NYSE Integrated Feed is on its own behalf, not on behalf of its clients.

- Under the proposal, Category 2 Fees would be \$20,000 per month and would apply to a data recipient's Non-Display Use of the NYSE Integrated Feed on behalf of its clients.

- Under the proposal, Category 3 Fees would be \$20,000 and would apply to a data recipient's Non-Display Use of the NYSE Integrated Feed for the purpose of internally matching buy and sell orders within an organization, including matching customer orders for data recipient's own behalf and/or on behalf of its clients. This category would apply to Non-Display Use in trading platforms, such as, but not restricted to, alternative trading systems ("ATs"), broker crossing networks, broker crossing systems not filed as ATs, dark pools, multilateral trading facilities, exchanges and systematic internalization systems. Category 3 Fees would be capped at \$60,000 per month for each data recipient for the NYSE Integrated Feed.

⁴ See Securities Exchange Act Release Nos. 69278 (April 2, 2013), 78 FR 20973 (April 8, 2013) (SR-NYSE-2013-25) and 72923 (Aug. 26, 2014), 79 FR 52079 (Sept. 2, 2014) (SR-NYSE-2014-43).

⁵ "Redistributor" means a vendor or any person that provides a real-time NYSE data product to a data recipient or to any system that a data recipient uses, irrespective of the means of transmission or access.

²¹ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ The proposed rule change establishing the NYSE Integrated Feed was immediately effective on January 23, 2015. See Securities Exchange Act Release No. 74128 (Jan. 23, 2015), 80 FR 4951 (Jan. 29, 2015) (SR-NYSE-2015-03).

Non-Display Use fees for NYSE Integrated Feed include, for customers also paying access fees for NYSE BBO, NYSE Trades, NYSE OpenBook and NYSE Order Imbalances, the Non-Display Use for such products when declared within the same category of use.

The description of the three non-display use categories is set forth in the Fee Schedule in endnote 1 and that endnote would be referenced in the NYSE Integrated Feed fees on the Fee Schedule. The text in the endnote would remain unchanged.

Data recipients that receive the NYSE Integrated Feed for Non-Display Use would be required to complete and submit a Non-Display Use Declaration before they would be authorized to receive the feed.⁶ A firm subject to Category 3 Fees would be required to identify each platform that uses the NYSE Integrated Feed on a Non-Display Use basis, such as ATSS and broker crossing systems not registered as ATSS, as part of the Non-Display Use Declaration.

4. *Non-Display Declaration Late Fee.* Data recipients that receive the NYSE Integrated Feed for Non-Display Use would be required to complete and submit a Non-Display Use Declaration before they would be authorized to receive the feed. Beginning in 2017, NYSE Integrated Feed data recipients would be required to submit, by January 31st of each year, the Non-Display Use Declaration that applies to all real-time NYSE market data products that include Non-Display Use fees.⁷ The Exchange proposes to charge a Non-Display Declaration Late Fee of \$1,000 per month to any data recipient that pays an Access Fee for NYSE Integrated Feed that has failed to complete and submit a Non-Display Use Declaration. Specifically, with respect to the Non-Display Use Declaration due by January 31st of each year beginning in 2017, the Non-Display Declaration Late Fee would apply to data recipients that fail to complete and submit the Non-Display Use Declaration by the January 31st due date, and would apply beginning February 1st and for each month thereafter until the data recipient has completed and submitted the annual

⁶Data recipients are required to complete and submit the Non-Display Declaration with respect to each market data product on the Fee Schedule that includes Non-Display Fees. See Securities Exchange Act Release Nos. 74870 (May 5, 2015), 80 FR 26962 (May 11, 2015) (SR-NYSE-2015-20) (NYSE OpenBook) and 74872 (May 5, 2015), 80 FR 26975 (May 11, 2015) (SR-NYSE-2015-21) (NYSE Order Imbalances) and 74861 (May 4, 2015), 80 FR 26599 (May 8, 2015) (SR-NYSE-2015-22) (NYSE Trades and NYSE BBO).

⁷*Id.*

Non-Display Use Declaration. The Exchange also proposes to apply current endnote 2 on the Fee Schedule to the Non-Display Declaration Late Fee for NYSE Integrated Feed, but proposes to modify endnote 2 to the Fee Schedule so that it is clear that the Non-Display Declaration Late Fee applies to the NYSE Integrated Feed beginning February 1st of 2017 and each year thereafter with respect to the Non-Display Use Declaration due by January 31st each year.⁸

In addition, if a data recipient's use of the NYSE Integrated Feed data changes at any time after the data recipient submits a Non-Display Use Declaration, the data recipient must inform the Exchange of the change by completing and submitting at the time of the change an updated declaration reflecting the change of use.

5. *Redistribution Fee.* For redistribution of the NYSE Integrated Feed, the Exchange proposes to establish a fee of \$4,000 per month.

The Exchange notes that the three existing data feed products—NYSE OpenBook, NYSE Trades, and NYSE Order Imbalances—would continue to be available to vendors and subscribers separately, in each case at the same prices at which they are currently available.⁹

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,¹⁰ in general, and Sections 6(b)(4) and 6(b)(5) of the Act,¹¹ in particular, in that it provides an equitable allocation of reasonable fees among users and recipients of the data and is not designed to permit unfair discrimination among customers, issuers, and brokers.

The Exchange believes it is equitable and not unfairly discriminatory to make the NYSE Integrated Feed available free of charge through December 31, 2015

⁸The second sentence of endnote 2 to the Fee Schedule refers to a late fee for the Non-Display Use Declarations due September 1, 2014 that have not been submitted by July 1, 2015. This sentence is not applicable to the NYSE Integrated Feed because NYSE Integrated Feed was not available as of the September 1, 2014 due date and because data recipients of the NYSE Integrated Feed will have to complete and submit a Non-Display Declaration before they can receive the feed. The Exchange proposes to modify the second sentence so that it applies only to NYSE OpenBook, NYSE BBO, NYSE Trades and NYSE Order Imbalances and not to the NYSE Integrated Feed. The Exchange proposes to modify the third sentence so that it is clear that it applies to all market data products, including the NYSE Integrated Feed, to which Non-Display Use fees apply.

⁹ See Fee Schedule.

¹⁰ 15 U.S.C. 78f(b).

¹¹ 15 U.S.C. 78f(b)(4), (5).

because providing it at no charge would provide an opportunity for vendors and subscribers to determine whether the NYSE Integrated Feed suits their needs without incurring fees. Other exchanges provide or have provided market data products free for a certain period of time.¹²

The fees for the NYSE Integrated Feed are reasonable because they represent not only the value of the data available from three existing data feeds but also the value of receiving the data on an integrated basis. Receiving the data on an integrated basis provides greater efficiencies and reduced errors for vendors and subscribers that currently choose to integrate the data themselves after receiving it from the Exchange. Some vendors and subscribers may not have the technology or resources to integrate the separate data feeds in a timely and/or efficient manner, and thus the integration feature of the product may be valuable to them.

Moreover, the fees are equitably allocated and not unfairly discriminatory because vendors and subscribers may choose to continue to receive some or all of the data through the existing separate feeds at current prices, or they can choose to pay for the NYSE Integrated Feed in order to receive integrated data, or they can choose a combination of the two approaches, thereby allowing each vendor or subscriber to choose the best business solution for itself.

The Exchange believes the proposed monthly Access Fee of \$7,500 and monthly Redistribution Fee of \$4,000 for NYSE Integrated Feed are reasonable because they are comparable to the total of the same types of fees for NYSE OpenBook, NYSE Trades, and NYSE Order Imbalances. The monthly Access Fee for NYSE OpenBook is \$5,000, for NYSE Trades is \$1,500 and for NYSE Order Imbalances is \$500.¹³ The monthly Redistribution Fee for NYSE

¹² For example, NYSE Arca, Inc. ("NYSE Arca"), an affiliate of the Exchange, offered ArcaBook for Arca Options-Complex, and NYSE MKT LLC ("NYSE MKT"), an affiliate of the Exchange, offered ArcaBook for Amex Options-Complex, without charge between May 1, 2014 and October 31, 2014. See Securities Exchange Act Release Nos. 72074 (May 1, 2014), 79 FR 26277 (May 7, 2014) (NYSEArca 2014-51) and 72075 (May 1, 2014), 79 FR 26290 (May 7, 2014) (NYSEMKT 2014-40). The NASDAQ Stock Market, Inc. ("NASDAQ") provides a 30-day free trial related to NASDAQ TotalView. See NASDAQ Rule 7023(e).

¹³ The Access Fee for Managed Non-Display Services only for NYSE OpenBook is \$2,500 per month, for NYSE Trades is \$750 per month and for NYSE Order Imbalances is \$250 per month. Managed Non-Display Services will not be offered for NYSE Integrated Feed.

OpenBook is \$3,000 and for NYSE Trades is \$1,000.¹⁴

The Exchange believes that it is reasonable to charge redistribution fees because vendors receive value from redistributing the data in their business products for their customers. The redistribution fees also are equitable and not unfairly discriminatory because they will be charged on an equal basis to those vendors that choose to redistribute the data. Also, the proposed redistribution fee for NYSE Integrated Feed is reasonable because it is comparable to the redistribution fees that are currently charged by other exchanges.¹⁵

The proposed monthly Professional User Fee (Per User) of \$70 and monthly Non-Professional User Fee (Per User) of \$16 are reasonable because they are comparable to the total of the per user fees for NYSE OpenBook and NYSE Trades. The monthly Professional User Fee (Per User) for NYSE OpenBook is \$60 and for NYSE Trades, it is \$4. The monthly Non-Professional User Fee (Per User) for NYSE OpenBook is \$15 and for NYSE Trades, it is \$0.20.

The Exchange believes that having separate Professional and Non-Professional User fees for the NYSE Integrated Feed is reasonable because it will make the product more affordable and result in greater availability to Professional and Non-Professional Users. Setting a modest Non-Professional User fee is reasonable because it provides an additional method for Non-Professional Users to access the NYSE Integrated Feed by providing the same data that is available to Professional Users. The Exchange believes that the proposed fees are equitable and not unfairly discriminatory because they will be charged uniformly to recipient firms and Users. The fee structure of differentiated Professional and Non-Professional fees applies to the user fees applicable to NYSE OpenBook and NYSE Trades and has long been used by the Exchange in order to reduce the price of data to Non-Professional Users and make it more broadly available.¹⁶

¹⁴ There are no Redistribution or User fees charged for NYSE Order Imbalances.

¹⁵ NYSE Arca charges a \$3,000 per month redistribution fee for the NYSE Arca Integrated Feed. See Securities Exchange Act Release No. 66128 (Jan. 10, 2012), 77 FR 2331 (Jan. 17, 2012) (SR-NYSEArca-2011-96). Distributors of NASDAQ-listed security depth entitlements pay a Monthly External Distributor Fee of \$2,500. See NASDAQ Rule 7019(b).

¹⁶ See e.g., Securities Exchange Act Release No. 59544 (March 9, 2009), 74 FR 11162 (March 16, 2009) (SR-NYSE-2008-131) (establishing the \$15 Non-Professional User Fee (Per User) for NYSE OpenBook). See e.g., Securities Exchange Act

Offering the NYSE Integrated Feed to Non-Professional Users with the same data available to Professional Users results in greater equity among data recipients.

The Exchange believes the proposed Non-Display Use fees are reasonable, equitable and not unfairly discriminatory because they reflect the value of the data to the data recipients in their profit-generating activities and do not impose the burden of counting non-display devices. After gaining further experience with the non-display fee structure, the Exchange believes that the proposed Non-Display Use fees reflect the significant value of the non-display data to data recipients, which purchase such data on an entirely voluntary basis. Non-display data can be used by data recipients for a wide variety of profit-generating purposes, including proprietary and agency trading and smart order routing, as well as by data recipients that operate order matching and execution platforms that compete directly with the Exchange for order flow. The data also can be used for a variety of non-trading purposes that indirectly support trading, such as risk management and compliance. While some of these non-trading uses do not directly generate revenues, they can nonetheless substantially reduce the recipient's costs by automating such functions so that they can be carried out in a more efficient and accurate manner and reduce errors and labor costs, thereby benefiting end users. The Exchange believes that charging for non-trading uses is reasonable because data recipients can derive substantial value from such uses, for example, by automating tasks so that they can be performed more quickly and accurately and less expensively than if they were performed manually.

Data can be processed much faster by a non-display device than it can be by a human being processing information that he or she views on a data terminal. Non-display devices also can dispense data to multiple computer applications as compared with the restriction of data to one display terminal. While non-display data has become increasingly valuable to data recipients who can use it to generate substantial profits, it has become increasingly difficult for them and the Exchange to accurately count non-display devices. The number and type of non-display devices, as well as their complexity and interconnectedness, have grown in recent years, creating

administrative challenges for vendors, data recipients, and the Exchange to accurately count such devices and audit such counts. Unlike a display device, such as a Bloomberg terminal, it is not possible to simply walk through a trading floor or areas of a data recipient's premises to identify non-display devices. During an audit, an auditor must review a firm's entitlement report to determine usage. While display use is generally associated with an individual end user and/or unique user ID, a non-display use is more difficult to account for because the entitlement report may show a server name or Internet protocol ("IP") address or it may not. The auditor must review each IP or server and further inquire about downstream use and quantity of servers with access to data; this type of counting is very labor-intensive and prone to inaccuracies.

Market data technology and usage has evolved to the point where it is no longer practical, nor fair and equitable, to simply count non-display devices. The administrative costs and difficulties of establishing reliable counts and conducting an effective audit of non-display devices have become too burdensome, impractical, and non-economic for the Exchange, vendors, and data recipients. Indeed, some data recipients dislike the burden of having to comply with count-based audit processes, and the Exchange's non-display pricing policies are a direct response to such complaints as well as a further competitive distinction between the Exchange and other markets. The Exchange believes that the proposed fee structure for non-display use is reasonable, equitable, and not unfairly discriminatory in light of these developments.

The Non-Display Use fees for the NYSE Integrated Feed are reasonable because they represent the extra value of receiving the data for Non-Display Use on an integrated basis. The Exchange believes that the proposed fees directly and appropriately reflect the significant value of using NYSE Integrated Feed on a non-display basis in a wide range of computer-automated functions relating to both trading and non-trading activities and that the number and range of these functions continue to grow through innovation and technology developments.¹⁷

¹⁷ See also Exchange Act Release No. 69157, March 18, 2013, 78 FR 17946, 17949 (March 25, 2013) (SR-CTA/CQ-2013-01) ("[D]ata feeds have become more valuable, as recipients now use them to perform a far larger array of non-display functions. Some firms even base their business models on the incorporation of data feeds into black boxes and application programming interfaces that

Release No. 20002, File No. S7-433 (July 22, 1983), 48 FR 34552 (July 29, 1983) (establishing nonprofessional fees for CTA data); NASDAQ Rules 7023(b), 7047.

The Exchange believes that it is reasonable to require annual submissions of the Non-Display Use Declaration so that the Exchange will have current and accurate information about the use of the NYSE Integrated Feed and can correctly assess fees for the uses of the NYSE Integrated Feed. The annual submission requirement is equitable and not unfairly discriminatory because it will apply to all users.

The Exchange believes that it is reasonable to impose a late fee in connection with the submission of the Non-Display Use Declaration. In order to correctly assess fees for the non-display use of NYSE Integrated Feed, the Exchange needs to have current and accurate information about the use of NYSE Integrated Feed. The failure of data recipients to submit the Non-Display Use Declaration on time leads to potentially incorrect billing and administrative burdens, including tracking and obtaining late Non-Display Use Declarations and correcting and following up on payments owed in connection with late Non-Display Use Declarations. The purpose of the late fee is to incent data recipients to submit the Non-Display Use Declaration promptly to avoid the administrative burdens associated with the late submission of Non-Display Use Declarations. The Non-Display Declaration Late Fee is equitable and not unfairly discriminatory because it will apply to all data recipients that choose to subscribe to the NYSE Integrated Feed.

In addition, the proposed fees are reasonable when compared to fees for comparable products, including the NYSE Arca Integrated Feed,¹⁸ offered by NYSE Arca and Nasdaq TotalView-Itch,¹⁹ offered by NASDAQ. Specifically, the fees for NYSE Arca Integrated Feed, which like NYSE Integrated Feed, includes depth of book, trades, and order imbalances data for the NYSE Arca market, and a security status message, consist of an Access Fee

apply trading algorithms to the data, but that do not require widespread data access by the firm's employees. As a result, these firms pay little for data usage beyond access fees, yet their data access and usage is critical to their businesses.”)

¹⁸ See NYSE Arca Integrated Feed, <http://www.nyse.com/page/1084> (last visited June 8, 2015) (data feed that provides a unified view of events, in sequence as they appear on the NYSE Arca matching engine, including depth of book, trades, order imbalance data, and security status messages).

¹⁹ See NASDAQ TotalView-ITCH, <http://www.nasdaqtrader.com/Trader.aspx?id=Totalview2> (last visited June 8, 2015) (displays the full order book depth for NASDAQ market participants and also disseminates the Net Order Imbalance Indicator (NOI) for the NASDAQ Opening and Closing Crosses and NASDAQ IPO/Halt Cross).

of \$3,000 per month, a Professional User Fee (Per User) of \$40 per month a Non-Professional User Fee (Per User) of \$20 per month, Non-Display Fees of \$7,000 per month for each of Categories 1, 2 and 3, and a Redistribution Fee of \$3,000 per month. The fees are also equitable and not unfairly discriminatory because they will apply to all data recipients that choose to subscribe to the NYSE Integrated Feed.

The Exchange also notes that the NYSE Integrated Feed is entirely optional. The Exchange is not required to make the NYSE Integrated Feed available or to offer any specific pricing alternatives to any customers, nor is any firm required to purchase the NYSE Integrated Feed. Firms that purchase the NYSE Integrated Feed would do so for the primary goals of using it to increase revenues, reduce expenses, and in some instances compete directly with the Exchange (including for order flow); those firms are able to determine for themselves whether the NYSE Integrated Feed or any other similar products are attractively priced or not.

Firms that do not wish to purchase the NYSE Integrated Feed at the new prices have a variety of alternative market data products from which to choose,²⁰ or if the NYSE Integrated Feed does not provide sufficient value to firms as offered based on the uses those firms have or planned to make of it, such firms may simply choose to conduct their business operations in ways that do not use the NYSE Integrated Feed. The Exchange notes that broker-dealers are not required to purchase proprietary market data to comply with their best execution obligations.²¹ Similarly, there is no requirement in Regulation NMS or any other rule that proprietary data be utilized for order routing decisions, and some broker-dealers and ATSS have chosen not to do so.²²

The decision of the United States Court of Appeals for the District of Columbia Circuit in *NetCoalition v. SEC*, 615 F.3d 525 (D.C. Cir. 2010), upheld reliance by the Securities and

Exchange Commission (“Commission”) upon the existence of competitive market mechanisms to set reasonable and equitably allocated fees for proprietary market data:

In fact, the legislative history indicates that the Congress intended that the market system ‘evolve through the interplay of competitive forces as unnecessary regulatory restrictions are removed’ and that the SEC wield its regulatory power ‘in those situations where competition may not be sufficient,’ such as in the creation of a ‘consolidated transactional reporting system.’

Id. at 535 (quoting H.R. Rep. No. 94–229 at 92 (1975), *as reprinted in* 1975 U.S.C.C.A.N. 323). The court agreed with the Commission’s conclusion that “Congress intended that ‘competitive forces should dictate the services and practices that constitute the U.S. national market system for trading equity securities.’”²³

As explained below in the Exchange’s Statement on Burden on Competition, the Exchange believes that there is substantial evidence of competition in the marketplace for proprietary market data and that the Commission can rely upon such evidence in concluding that the fees established in this filing are the product of competition and therefore satisfy the relevant statutory standards. In addition, the existence of alternatives to these data products, such as consolidated data and proprietary data from other sources, as described below, further ensures that the Exchange cannot set unreasonable fees, or fees that are unreasonably discriminatory, when vendors and subscribers can select such alternatives.

As the *NetCoalition* decision noted, the Commission is not required to undertake a cost-of-service or ratemaking approach. The Exchange believes that, even if it were possible as a matter of economic theory, cost-based pricing for non-core market data would be so complicated that it could not be done practically or offer any significant benefits.²⁴

²³ *NetCoalition*, 615 F.3d at 535.

²⁴ The Exchange believes that cost-based pricing would be impractical because it would create enormous administrative burdens for all parties and the Commission, to cost-regulate a large number of participants and standardize and analyze extraordinary amounts of information, accounts, and reports. In addition, and as described below, it is impossible to regulate market data prices in isolation from prices charged by markets for other services that are joint products. Cost-based rate regulation would also lead to litigation and may distort incentives, including those to minimize costs and to innovate, leading to further waste. Under cost-based pricing, the Commission would be burdened with determining a fair rate of return, and the industry could experience frequent rate increases based on escalating expense levels. Even

²⁰ See *supra* notes 19–20.

²¹ See In the Matter of the Application of Securities Industry And Financial Markets Association For Review of Actions Taken by Self-Regulatory Organizations, Release Nos. 34–72182; AP–3–15350; AP–3–15351 (May 16, 2014).

²² For example, Goldman Sachs Execution and Clearing, L.P. disclosed in 2014 that it was not using proprietary market data in connection with Sigma X, its ATS. See response to Question E3, available at <http://www.goldmansachs.com/media-relations/in-the-news/current/pdf-media/gsec-order-handling-practices-ats-specific.pdf>. By way of comparison, IEX has disclosed that it uses proprietary market data feeds from all registered stock exchanges. See <http://www.iextrading.com/about/>.

For these reasons, the Exchange believes that the proposed fees are reasonable, equitable, and not unfairly discriminatory.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. An exchange's ability to price its proprietary market data feed products is constrained by actual competition for the sale of proprietary market data products, the joint product nature of exchange platforms, and the existence of alternatives to the Exchange's proprietary data.

The Existence of Actual Competition.

The market for proprietary data products is currently competitive and inherently contestable because there is fierce competition for the inputs necessary for the creation of proprietary data and strict pricing discipline for the proprietary products themselves. Numerous exchanges compete with one another for listings and order flow and sales of market data itself, providing ample opportunities for entrepreneurs who wish to compete in any or all of those areas, including producing and distributing their own market data. Proprietary data products are produced and distributed by each individual exchange, as well as other entities, in a vigorously competitive market. Indeed, the U.S. Department of Justice ("DOJ") (the primary antitrust regulator) has expressly acknowledged the aggressive actual competition among exchanges, including for the sale of proprietary market data. In 2011, the DOJ stated that exchanges "compete head to head to offer real-time equity data products. These data products include the best bid and offer of every exchange and information on each equity trade, including the last sale."²⁵

in industries historically subject to utility regulation, cost-based ratemaking has been discredited. As such, the Exchange believes that cost-based ratemaking would be inappropriate for proprietary market data and inconsistent with Congress's direction that the Commission use its authority to foster the development of the national market system, and that market forces will continue to provide appropriate pricing discipline. See Appendix C to NYSE's comments to the Commission's 2000 Concept Release on the Regulation of Market Information Fees and Revenues, which can be found on the Commission's Web site at <http://www.sec.gov/rules/concept/s72899/buck1.htm>.

²⁵ Press Release, U.S. Department of Justice, Assistant Attorney General Christine Varney Holds Conference Call Regarding NASDAQ OMX Group Inc. and IntercontinentalExchange Inc. Abandoning

Moreover, competitive markets for listings, order flow, executions, and transaction reports provide pricing discipline for the inputs of proprietary data products and therefore constrain markets from overpricing proprietary market data. Broker-dealers send their order flow and transaction reports to multiple venues, rather than providing them all to a single venue, which in turn reinforces this competitive constraint. As a 2010 Commission Concept Release noted, the "current market structure can be described as dispersed and complex" with "trading volume . . . dispersed among many highly automated trading centers that compete for order flow in the same stocks" and "trading centers offer[ing] a wide range of services that are designed to attract different types of market participants with varying trading needs."²⁶ More recently, SEC Chair Mary Jo White has noted that competition for order flow in exchange-listed equities is "intense" and divided among many trading venues, including exchanges, more than 40 alternative trading systems, and more than 250 broker-dealers.²⁷

If an exchange succeeds in its competition for quotations, order flow, and trade executions, then it earns trading revenues and increases the value of its proprietary market data products because they will contain greater quote and trade information. Conversely, if an exchange is less successful in attracting quotes, order flow, and trade executions, then its market data products may be less desirable to customers using them in support of order routing and trading decisions in light of the diminished content; data

Their Bid for NYSE Euronext (May 16, 2011), available at <http://www.justice.gov/iso/opa/atr/speeches/2011/at-speech-110516.html>; see also Complaint in *U.S. v. Deutsche Borse AG and NYSE Euronext*, Case No. 11-cv-2280 (D.C. Dist.) ¶ 24 ("NYSE and Direct Edge compete head-to-head . . . in the provision of real-time proprietary equity data products.").

²⁶ Concept Release on Equity Market Structure, Securities Exchange Act Release No. 61358 (Jan. 14, 2010), 75 FR 3594 (Jan. 21, 2010) (File No. S7-02-10). This Concept Release included data from the third quarter of 2009 showing that no market center traded more than 20% of the volume of listed stocks, further evidencing the dispersal of and competition for trading activity. *Id.* at 3598. Data available on ArcaVision show that from June 30, 2013 to June 30, 2014, no exchange traded more than 12% of the volume of listed stocks by either trade or dollar volume, further evidencing the continued dispersal of and fierce competition for trading activity. See <https://www.arcavision.com/Arcavision/arcalogin.jsp>.

²⁷ Mary Jo White, Enhancing Our Equity Market Structure, Sandler O'Neill & Partners, L.P. Global Exchange and Brokerage Conference (June 5, 2014) (available on the Commission Web site), citing Tuttle, Laura, 2014, "OTC Trading: Description of Non-ATS OTC Trading in National Market System Stocks," at 7-8.

products offered by competing venues may become correspondingly more attractive. Thus, competition for quotations, order flow, and trade executions puts significant pressure on an exchange to maintain both execution and data fees at reasonable levels.

In addition, in the case of products that are also redistributed through market data vendors, such as Bloomberg and Thompson Reuters, the vendors themselves provide additional price discipline for proprietary data products because they control the primary means of access to certain end users. These vendors impose price discipline based upon their business models. For example, vendors that assess a surcharge on data they sell are able to refuse to offer proprietary products that their end users do not or will not purchase in sufficient numbers. Vendors will not elect to make available NYSE Integrated Feed unless their customers request it, and customers will not elect to pay the proposed fees unless NYSE Integrated Feed can provide value by sufficiently increasing revenues or reducing costs in the customer's business in a manner that will offset the fees. All of these factors operate as constraints on pricing proprietary data products.

Joint Product Nature of Exchange Platform

Transaction execution and proprietary data products are complementary in that market data is both an input and a byproduct of the execution service. In fact, proprietary market data and trade executions are a paradigmatic example of joint products with joint costs. The decision of whether and on which platform to post an order will depend on the attributes of the platforms where the order can be posted, including the execution fees, data availability and quality, and price and distribution of data products. Without a platform to post quotations, receive orders, and execute trades, exchange data products would not exist.

The costs of producing market data include not only the costs of the data distribution infrastructure, but also the costs of designing, maintaining, and operating the exchange's platform for posting quotes, accepting orders, and executing transactions and the cost of regulating the exchange to ensure its fair operation and maintain investor confidence. The total return that a trading platform earns reflects the revenues it receives from both products and the joint costs it incurs.

Moreover, an exchange's broker-dealer customers generally view the costs of transaction executions and

market data as a unified cost of doing business with the exchange. A broker-dealer will only choose to direct orders to an exchange if the revenue from the transaction exceeds its cost, including the cost of any market data that the broker-dealer chooses to buy in support of its order routing and trading decisions. If the costs of the transaction are not offset by its value, then the broker-dealer may choose instead not to purchase the product and trade away from that exchange. There is substantial evidence of the strong correlation between order flow and market data purchases. For example, in September 2015, more than 80% of the transaction volume on each of NYSE and NYSE's affiliates NYSE Arca and NYSE MKT was executed by market participants that purchased one or more proprietary market data products (the 20 firms were not the same for each market). A supra-competitive increase in the fees for either executions or market data would create a risk of reducing an exchange's revenues from both products.

Other market participants have noted that proprietary market data and trade executions are joint products of a joint platform and have common costs.²⁸ The Exchange agrees with and adopts those discussions and the arguments therein. The Exchange also notes that the economics literature confirms that there is no way to allocate common costs between joint products that would shed any light on competitive or efficient pricing.²⁹

²⁸ See Securities Exchange Act Release No. 72153 (May 12, 2014), 79 FR 28575, 28578 n.15 (May 16, 2014) (SR-NASDAQ-2014-045) (“[A]ll of the exchange's costs are incurred for the unified purposes of attracting order flow, executing and/or routing orders, and generating and selling data about market activity. The total return that an exchange earns reflects the revenues it receives from the joint products and the total costs of the joint products.”). See also Securities Exchange Act Release No. 62907 (Sept. 14, 2010), 75 FR 57314, 57317 (Sept. 20, 2010) (SR-NASDAQ-2010-110), and Securities Exchange Act Release No. 62908 (Sept. 14, 2010), 75 FR 57321, 57324 (Sept. 20, 2010) (SR-NASDAQ-2010-111).

²⁹ See generally Mark Hirschey, *Fundamentals of Managerial Economics*, at 600 (2009) (“It is important to note, however, that although it is possible to determine the separate marginal costs of goods produced in variable proportions, it is impossible to determine their individual average costs. This is because common costs are expenses necessary for manufacture of a joint product. Common costs of production—raw material and equipment costs, management expenses, and other overhead—cannot be allocated to each individual by-product on any economically sound basis. . . . Any allocation of common costs is wrong and arbitrary.”). This is not new economic theory. See, e.g., F. W. Taussig, “A Contribution to the Theory of Railway Rates,” *Quarterly Journal of Economics* V(4) 438, 465 (July 1891) (“Yet, surely, the division is purely arbitrary. These items of cost, in fact, are jointly incurred for both sorts of traffic; and I cannot share the hope entertained by the statistician of the

Analyzing the cost of market data product production and distribution in isolation from the cost of all of the inputs supporting the creation of market data and market data products will inevitably underestimate the cost of the data and data products because it is impossible to obtain the data inputs to create market data products without a fast, technologically robust, and well-regulated execution system, and system and regulatory costs affect the price of both obtaining the market data itself and creating and distributing market data products. It would be equally misleading, however, to attribute all of an exchange's costs to the market data portion of an exchange's joint products. Rather, all of an exchange's costs are incurred for the unified purposes of attracting order flow, executing and/or routing orders, and generating and selling data about market activity. The total return that an exchange earns reflects the revenues it receives from the joint products and the total costs of the joint products.

As noted above, the level of competition and contestability in the market is evident in the numerous alternative venues that compete for order flow, including 11 equities self-regulatory organization (“SRO”) markets, as well as various forms of ATSS, including dark pools and electronic communication networks (“ECNs”), and internalizing broker-dealers. SRO markets compete to attract order flow and produce transaction reports via trade executions, and two FINRA-regulated Trade Reporting Facilities compete to attract transaction reports from the non-SRO venues.

Competition among trading platforms can be expected to constrain the aggregate return that each platform earns from the sale of its joint products, but different trading platforms may choose from a range of possible, and equally reasonable, pricing strategies as the means of recovering total costs. For example, some platforms may choose to pay rebates to attract orders, charge relatively low prices for market data products (or provide market data products free of charge), and charge relatively high prices for accessing posted liquidity. Other platforms may choose a strategy of paying lower rebates (or no rebates) to attract orders, setting relatively high prices for market data products, and setting relatively low prices for accessing posted liquidity. For example, BATS Global Markets (“BATS”) and Direct Edge, which

previously operated as ATSS and obtained exchange status in 2008 and 2010, respectively, provided certain market data at no charge on their Web sites in order to attract more order flow, and used revenue rebates from resulting additional executions to maintain low execution charges for their users.³⁰ In this environment, there is no economic basis for regulating maximum prices for one of the joint products in an industry in which suppliers face competitive constraints with regard to the joint offering.

Existence of Alternatives

The large number of SROs, ATSS, and internalizing broker-dealers that currently produce proprietary data or are currently capable of producing it provides further pricing discipline for proprietary data products. Each SRO, ATS, and broker-dealer is currently permitted to produce and sell proprietary data products, and many currently do or have announced plans to do so, including but not limited to the Exchange, NYSE MKT, NYSE Arca, NASDAQ OMX, BATS, and Direct Edge.

The fact that proprietary data from ATSS, internalizing broker-dealers, and vendors can bypass SROs is significant in two respects. First, non-SROs can compete directly with SROs for the production and sale of proprietary data products. By way of example, BATS and NYSE Arca both published proprietary data on the Internet before registering as exchanges. Second, because a single order or transaction report can appear in an SRO proprietary product, a non-SRO proprietary product, or both, the amount of data available via proprietary products is greater in size than the actual number of orders and transaction reports that exist in the marketplace. With respect to NYSE Integrated Feed, competitors offer close substitute products.³¹ Because market data users can find suitable substitutes for most proprietary market data products, a market that overprices its market data products stands a high risk that users may substitute another source of market data information for its own.

Those competitive pressures imposed by available alternatives are evident in the Exchange's proposed pricing.

In addition to the competition and price discipline described above, the market for proprietary data products is

³⁰ This is simply a securities market-specific example of the well-established principle that in certain circumstances more sales at lower margins can be more profitable than fewer sales at higher margins; this example is additional evidence that market data is an inherent part of a market's joint platform.

³¹ See *supra* notes 19–20.

Commission, Professor Henry C. Adams, that we shall ever reach a mode of apportionment that will lead to trustworthy results.”).

also highly contestable because market entry is rapid and inexpensive. The history of electronic trading is replete with examples of entrants that swiftly grew into some of the largest electronic trading platforms and proprietary data producers: Archipelago, Bloomberg Tradebook, Island, RediBook, Attain, TrackECN, BATS Trading and Direct Edge. As noted above, BATS launched as an ATS in 2006 and became an exchange in 2008, while Direct Edge began operations in 2007 and obtained exchange status in 2010.

In setting the proposed fees for the NYSE Integrated Feed, the Exchange considered the competitiveness of the market for proprietary data and all of the implications of that competition. The Exchange believes that it has considered all relevant factors and has not considered irrelevant factors in order to establish fair, reasonable, and not unreasonably discriminatory fees and an equitable allocation of fees among all users. The existence of numerous alternatives to the Exchange's products, including proprietary data from other sources, and continued availability of the Exchange's separate data feeds at a lower price, ensures that the Exchange cannot set unreasonable fees, or fees that are unreasonably discriminatory, when vendors and subscribers can elect these alternatives or choose not to purchase a specific proprietary data product if the attendant fees are not justified by the returns that any particular vendor or data recipient would achieve through the purchase.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)³² of the Act and subparagraph (f)(2) of Rule 19b-4³³ thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of

investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)³⁴ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NYSE-2015-57 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-NYSE-2015-57. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions

should refer to File Number SR-NYSE-2015-57, and should be submitted on or before December 18, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.³⁵

Robert W. Errett,
Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. IC-31907]

Notice of Applications for Deregistration Under Section 8(f) of the Investment Company Act of 1940

November 20, 2015.

The following is a notice of applications for deregistration under section 8(f) of the Investment Company Act of 1940 for the month of November 2015. A copy of each application may be obtained via the Commission's Web site by searching for the file number, or for an applicant using the Company name box, at <http://www.sec.gov/search/search.htm> or by calling (202) 551-8090. An order granting each application will be issued unless the SEC orders a hearing. Interested persons may request a hearing on any application by writing to the SEC's Secretary at the address below and serving the relevant applicant with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on December 15, 2015, and should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to Rule 0-5 under the Act, hearing requests should state the nature of the writer's interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission's Secretary.

ADDRESSES: The Commission: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

FOR FURTHER INFORMATION CONTACT: Chief Counsel's Office at (202) 551-6821; SEC, Division of Investment Management, Chief Counsel's Office, 100 F Street NE., Washington, DC 20549-8010.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76490; File No. SR-BX-2015-073]

Self-Regulatory Organizations; NASDAQ OMX BX, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Extend the Pilot Period for the Retail Price Improvement Program Until December 1, 2016

November 20, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 12, 2015, NASDAQ OMX BX, Inc. ("BX" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The [*sic*] to extend the pilot period for the Exchange's Retail Price Improvement ("RPI") Program (the "Program"), which is set to expire on December 1, 2015, for a period of one year, to expire on December 1, 2016.

The Exchange has designated December 1, 2015 as the date the proposed rule change becomes effective.

The text of the proposed rule change is available on the Exchange's Web site at <http://nasdaqomxbx.cchwallstreet.com>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to extend the pilot period of the RPI Program,³ currently scheduled to expire on December 1, 2015, for an additional year, until December 1, 2016.

Background

In November 2014, the Commission approved the RPI Program on a pilot basis.⁴ The Program is designed to attract retail order flow to the Exchange, and allow such order flow to receive potential price improvement. The Program is currently limited to trades occurring at prices equal to or greater than \$1.00 per share. Under the Program, a new class of market participant called a Retail Member Organization ("RMO") is eligible to submit certain retail order flow ("Retail Orders")⁵ to the Exchange. BX members ("Members") are permitted to provide potential price improvement for Retail Orders in the form of non-displayed interest that is priced more aggressively than the Protected National Best Bid or Offer ("Protected NBBO").⁶

The Program was approved by the Commission on a pilot basis running one-year from the date of implementation.⁷ The Commission approved the Program on November 28, 2014.⁸ The Exchange implemented the

³ Securities Exchange Act Release No. 73702 (November 28, 2014), 79 FR 72049 (December 4, 2014) ("RPI Approval Order") (SR-BX-2014-048).

⁴ See *id.*

⁵ A "Retail Order" is defined in BX Rule 4780(a)(2) by referencing BX Rule 4702, and BX Rule 4702(b)(6) says it is an order type with a non-display order attribute submitted to the Exchange by a RMO. A Retail Order must be an agency order, or riskless principal order that satisfies the criteria of is an agency or riskless principal order that originates from a natural person and is submitted to BX by a RMO, provided that no change is made to the terms of the order with respect to price (except in the case that a market order is changed to a marketable limit order) or side of market and the order does not originate from a trading algorithm or any other computerized methodology.

⁶ The term Protected Quotation is defined in Chapter XII, Sec. 1(19) and has the same meaning as is set forth in Regulation NMS Rule 600(b)(58). The Protected NBBO is the best-priced protected bid and offer. Generally, the Protected NBBO and the national best bid and offer ("NBBO") will be the same. However, a market center is not required to route to the NBBO if that market center is subject to an exception under Regulation NMS Rule 611(b)(1) or if such NBBO is otherwise not available for an automatic execution. In such case, the Protected NBBO would be the best-priced protected bid or offer to which a market center must route interest pursuant to Regulation NMS Rule 611.

⁷ See RPI Approval Order, *supra* note 3 at 72053.

⁸ *Id.* at 72049.

Program on December 1, 2014. Thus, the pilot period for the Program is scheduled to end on December 1, 2015.

Proposal To Extend the Operation of the Program

The Exchange established the RPI Program in an attempt to attract retail order flow to the Exchange by potentially providing price improvement to such order flow. The Exchange believes that the Program promotes competition for retail order flow by allowing Exchange members to submit Retail Price Improvement Orders (“RPI Orders”)⁹ to interact with Retail Orders. Such competition has the ability to promote efficiency by facilitating the price discovery process and generating additional investor interest in trading securities, thereby promoting capital formation. The Exchange believes that extending the pilot is appropriate because it will allow the Exchange and the Commission additional time to analyze data regarding the Program that the Exchange has committed to provide.¹⁰ As such, the Exchange believes that it is appropriate to extend the current operation of the Program.¹¹ Through this filing, the Exchange seeks to extend the current pilot period of the Program until December 1, 2016.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,¹² in general, and with Section 6(b)(5) of the Act,¹³ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange believes that extending the pilot period for the RPI Program is consistent with these principles because the Program is reasonably designed to

attract retail order flow to the exchange environment, while helping to ensure that retail investors benefit from the better price that liquidity providers are willing to give their orders.

Additionally, as previously stated, the competition promoted by the Program may facilitate the price discovery process and potentially generate additional investor interest in trading securities. The extension of the pilot period will allow the Commission and the Exchange to continue to monitor the Program for its potential effects on public price discovery, and on the broader market structure.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended. The proposed rule change extends an established pilot program for one year, thus allowing the RPI Program to enhance competition for retail order flow and contribute to the public price discovery process.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁴ and Rule 19b-4(f)(6)¹⁵ thereunder because the proposal does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) by its terms, become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest.¹⁶

A proposed rule change filed under Rule 19b-4(f)(6) normally may not become operative prior to 30 days after the date of filing. However, Rule 19b-

4(f)(6)(iii)¹⁷ permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay period. The Exchange states that waiving the operative delay would allow the pilot period to continue uninterrupted, which the Exchange argues would be beneficial to market participants and would help to eliminate the potential for investor confusion.

The Commission believes that waiver of the 30-day operative delay period is consistent with the protection of investors and the public interest. Specifically, the Commission believes that the proposal would allow the RPI Program to continue uninterrupted and to provide additional time for data about the program to be generated and analyzed. For these reasons, the Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest, and designates the proposed rule change to be operative upon filing with the Commission.¹⁸

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.¹⁹

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-BX-2015-073 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

⁹ A Retail Price Improvement Order is defined in BX Rule 4780(a)(3) by referencing BX Rule 4702 and BX Rule 4702(b)(5) says that it is as an order type with a non-display order attribute that is held on the Exchange Book in order to provide liquidity at a price at least \$0.001 better than the NBBO through a special execution process described in Rule 4780.

¹⁰ See RPI Approval Order, *supra* note 3 at 72051.

¹¹ Concurrently with this filing, the Exchange has submitted a request for an extension of the exemption under Regulation NMS Rule 612 previously granted by the Commission that permits it to accept and rank the RPI orders in sub-penny increments. See Letter from Jeffrey S. Davis, Vice President and Deputy General Counsel and Secretary, NASDAQ OMX BX, Inc. to Brent J. Fields, Secretary, Securities and Exchange Commission dated November 12, 2015.

¹⁵ 17 CFR 240.19b-4(f)(6).

¹⁶ In addition, Rule 19b-4(f)(6)(iii) requires the Exchange to give the Commission written notice of the Exchange’s intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission is waiving this requirement.

¹⁷ 17 CFR 240.19b-4(f)(6)(iii).

¹⁸ For purposes only of waiving the operative delay for this proposal, the Commission has considered the proposed rule’s impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

¹⁹ 15 U.S.C. 78s(b)(3)(C).

All submissions should refer to File Number SR–BX–2015–073. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BX–2015–073 and should be submitted on or before December 18, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²⁰

Robert W. Errett,
Deputy Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–76491; File No. SR–MIAX–2015–64]

Self-Regulatory Organizations: Notice of Filing and Immediate Effectiveness of a Proposed Rule Change by Miami International Securities Exchange LLC To Amend Exchange Rule 519

November 20, 2015.

Pursuant to the provisions of Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) ¹ and Rule 19b–4 thereunder,² notice is hereby given that

on November 13, 2015, Miami International Securities Exchange LLC (“MIAX” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”) a proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

The Exchange proposes to amend Exchange Rule 519, MIAX Order Monitor (“MOM”) to codify the Open Order and Open Contract Protection features included in MOM.

The text of the proposed rule change is available on the Exchange's Web site at http://www.miaxoptions.com/filter/wotitle/rule_filing, at MIAX's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 519, MIAX Order Monitor, to provide details regarding Open Order and Open Contract protections. The proposal codifies existing functionality applicable to orders on the Exchange. The Exchange is also proposing a clarifying amendment to current Rule 519(b) to provide consistency in that Rule with the proposed new rules.

The MOM is a risk management feature of the Exchange's System ³ that prevents certain orders from executing or being placed on the Book at prices outside pre-set standard limits ⁴ and if

the size of the order exceeds the order size protection designated by the Member submitting the order.⁵

Additionally, the System currently rejects any orders that exceed the maximum number of open orders held in the System on behalf of a particular Member (the “Open Order Protection”). The System also currently rejects any orders that cause the number of open contracts represented by orders held in the System on behalf of a particular Member (the “Open Contract Protection”) to exceed a specified maximum number of contracts. For each of these protections, the maximum number (of open orders and open contracts) is designated (or may be disabled) by the Member. The Exchange is proposing to codify the Open Order and Open Contract Protections in Rule 519.

Currently, Rule 519 only provides details regarding the System's Order Price Protections and Order Size Protections. However, in addition to order protections based on price and order size, the System also employs order protections based on the number of open orders held in the System and on the number of contracts represented by open orders held in the System. The Exchange now proposes to codify these existing order protections into Rule 519.

Members may designate or disable the Open Order and/or the Open Contract Protections on a firm wide basis. If the maximum number of open orders or contracts is not designated by the Member, the Exchange will set a maximum number of open orders or contracts on behalf of the Member by default. The default maximum number of open orders and open contracts are determined by the Exchange and announced to Members through a Regulatory Circular.⁶ The Open Order and Open Contract Protections provide market participants the flexibility to designate the level of protection they need to help prevent the potential submission of a number of orders and/or a number of contracts to the Exchange that would cause them to be at unintended risk levels.

The Exchange is also proposing a clarifying amendment to current Rule 519(b), Order Size Protections, to state that if the maximum size of orders is not designated by the Member, the Exchange will set a maximum size of orders on behalf of the Member by default. This is consistent with proposed new Rules 519(c) and (d), and

²⁰ 17 CFR 200.30–3(a)(12), (59).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ The term “System” means the automated trading system used by the Exchange for the trading of securities. See Exchange Rule 100.

⁴ See Exchange Rule 519(a).

⁵ See Exchange Rule 519(b).

⁶ The Exchange notes that the current default maximum number of open orders is 30,000 and the default number of open contracts is 1,000,000.

is intended to provide clarity, consistency and ease of reference regarding MOM protections available to users of the System.

The proposed rule change is designed to protect investors and the public interest by codifying the protections that apply to orders that help market participants avoid the potential submission of orders that would place them at unwanted risk on the Exchange. In addition, the Exchange believes that the proposed rule change removes impediments to and perfects the mechanisms of a free and open market and a national market system and, in general, protects investors and the public interest by helping to eliminate potential confusion on behalf of market participants by clearly stating the System's functionality with regard to orders that trigger Open Order and Open Contract Protections.

2. Statutory Basis

MIAX believes that its proposed rule change is consistent with Section 6(b) of the Act⁷ in general, and furthers the objectives of Section 6(b)(5) of the Act⁸ in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

The proposed rule change is designed to protect investors and the public interest by codifying the Open Order and Open Contract Protections that help market participants avoid the potential submission of a number of orders and/or a number of contracts to the Exchange that would cause them to be at unintended risk levels.

In addition, the Exchange believes that the proposed amendment removes impediments to and perfects the mechanisms of a free and open market and a national market system and, in general, protects investors and the public interest by helping to eliminate potential confusion on behalf of market participants by clearly stating the System's functionality with regard to Open Order and Open Contract Protections.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange believes the proposed changes will not impose any burden on intra-market competition because it applies to all MIAX participants equally. In addition, the Exchange does not believe the proposal will impose any burden on inter-market competition as the proposal is intended to protect investors by providing further transparency regarding the MOM feature.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate, it has become effective pursuant to 19(b)(3)(A) of the Act⁹ and Rule 19b-4(f)(6)¹⁰ thereunder.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

⁹ 15 U.S.C. 78s(b)(3)(A).

¹⁰ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-MIAX-2015-64 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-MIAX-2015-64. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-MIAX-2015-64, and should be submitted on or before December 18, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹¹

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76493; File No. SR-NYSEARCA-2015-86]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on Proposed Rule Change To Adopt New Equity Trading Rules Relating to Auctions for Pillar, the Exchange's New Trading Technology Platform

November 20, 2015.

On September 22, 2015, NYSE Arca, Inc. ("Exchange" or "NYSE Arca") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change to adopt new equity trading rules relating to auctions for Pillar, the Exchange's new trading technology platform. The proposed rule change was published for comment in the **Federal Register** on October 13, 2015.³

Section 19(b)(2) of the Act⁴ provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day for this filing is November 27, 2015. The Commission is extending this 45-day time period.

The Commission finds it appropriate to designate a longer period within which to take action on the proposed rule change, so that it has sufficient time to consider this proposed rule change.

Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,⁵ designates January 11, 2016, as the date by which the Commission should either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR-NYSEARCA-2015-86).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶

Robert W. Errett,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76486; File No. SR-NYSEARCA-2015-110]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Proposed Rule Change Amending NYSE Arca Equities Rule 8.600 To Adopt Generic Listing Standards for Managed Fund Shares

November 20, 2015.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 ("Act")² and Rule 19b-4 thereunder,³ notice is hereby given that, on November 6, 2015, NYSE Arca, Inc. ("Exchange" or "NYSE Arca") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend NYSE Arca Equities Rule 8.600 to adopt generic listing standards for Managed Fund Shares. The proposed rule change is available on the Exchange's Web site at www.nyse.com, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below,

of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend NYSE Arca Equities Rule 8.600 to adopt generic listing standards for Managed Fund Shares. Under the Exchange's current rules, a proposed rule change must be filed with the Securities and Exchange Commission ("SEC" or "Commission") for the listing and trading of each new series of Managed Fund Shares. The Exchange believes that it is appropriate to codify certain rules within Rule 8.600 that would generally eliminate the need for such proposed rule changes, which would create greater efficiency and promote uniform standards in the listing process.⁴

Background

Rule 8.600 sets forth certain rules related to the listing and trading of Managed Fund Shares.⁵ Under Rule 8.600(c)(1), the term "Managed Fund Share" means a security that:

(a) represents an interest in a registered investment company ("Investment Company") organized as an open-end management investment company or similar entity, that invests in a portfolio of securities selected by the Investment Company's investment adviser (hereafter "Adviser") consistent with the Investment Company's investment objectives and policies;

(b) is issued in a specified aggregate minimum number in return for a deposit of a specified portfolio of securities and/or a cash amount with a value equal to the next determined net asset value; and

⁴ The Exchange has previously filed a proposed rule change to amend NYSE Arca Equities Rule 8.600 to adopt generic listing standards for Managed Fund Shares. See Securities Exchange Act Release No. 74433 (March 4, 2015), 80 FR 12690 (March 10, 2015) (SR-NYSEARCA-2015-02). On June 3, 2015, the Exchange filed Amendment No. 1 to the proposed rule change. See Securities Exchange Act Release No. 75115 (June 5, 2015), 80 FR 33309 (June 11, 2015). On October 13, 2015, the Exchange withdrew the proposed rule change. See Securities Exchange Act Release No. 76186 (October 19, 2015), 80 FR 64461 (October 23, 2015).

⁵ See Securities Exchange Act Release No. 57619 (April 4, 2008), 73 FR 19544 (April 10, 2008) (SR-NYSEARCA-2008-25) (order approving NYSE Arca Equities Rule 8.600 and listing and trading of shares of certain issues of Managed Fund Shares) (the "Approval Order"). The Approval Order approved the rules permitting the listing and trading of Managed Fund Shares, trading hours and halts, listing fees applicable to Managed Fund Shares, and the listing and trading of several individual series of Managed Fund Shares.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ See Securities Exchange Act Release No. 76085 (October 6, 2015), 80 FR 61513.

⁴ 15 U.S.C. 78s(b)(2).

⁵ 15 U.S.C. 78s(b)(2).

⁶ 17 CFR 200.30-3(a)(31).

¹ 15 U.S.C. 78s(b)(1).

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

(c) when aggregated in the same specified minimum number, may be redeemed at a holder's request, which holder will be paid a specified portfolio of securities and/or cash with a value equal to the next determined net asset value.

Effectively, Managed Fund Shares are securities issued by an actively-managed open-end Investment Company (*i.e.*, an actively-managed exchange-traded fund ("ETF")). Because Managed Fund Shares are actively-managed, they do not seek to replicate the performance of a specified passive index of securities. Instead, they generally use an active investment strategy to seek to meet their investment objectives. In contrast, an open-end Investment Company that issues Investment Company Units ("Units"), listed and traded on the Exchange pursuant to NYSE Arca Equities Rule 5.2(j)(3), seeks to provide investment results that generally correspond to the price and yield performance of a specific foreign or domestic stock index, fixed income securities index or combination thereof.

All Managed Fund Shares listed and/or traded pursuant to Rule 8.600 (including pursuant to unlisted trading privileges) are subject to the full panoply of Exchange rules and procedures that currently govern the trading of equity securities on the Exchange.⁶

In addition, Rule 8.600(d) currently provides for the criteria that Managed Fund Shares must satisfy for initial and continued listing on the Exchange, including, for example, that a minimum number of Managed Fund Shares are required to be outstanding at the time of commencement of trading on the Exchange. However, the current process for listing and trading new series of Managed Fund Shares on the Exchange requires that the Exchange submit a proposed rule change with the Commission. In this regard, Commentary .01 to Rule 8.600 specifies that the Exchange will file separate proposals under Section 19(b) of the Act (hereafter, a "proposed rule change") before listing and trading of shares of an issue of Managed Fund Shares.

Proposed Changes to Rule 8.600

The Exchange would amend Commentary .01 to Rule 8.600 to specify that the Exchange may approve Managed Fund Shares for listing and/or trading (including pursuant to unlisted trading privileges) pursuant to SEC Rule 19b-4(e) under the Act, which pertains to derivative securities products ("SEC

Rule 19b-4(e)").⁷ SEC Rule 19b-4(e)(1) provides that the listing and trading of a new derivative securities product by a self-regulatory organization ("SRO") is not deemed a proposed rule change, pursuant to paragraph (c)(1) of Rule 19b-4,⁸ if the Commission has approved, pursuant to section 19(b) of the Act, the SRO's trading rules, procedures and listing standards for the product class that would include the new derivative securities product and the SRO has a surveillance program for the product class. This is the current method pursuant to which "passive" ETFs are listed under NYSE Arca Equities Rule 5.2(j)(3).

The Exchange would also specify within Commentary .01 to Rule 8.600 that components of Managed Fund Shares listed pursuant to SEC Rule 19b-4(e) must satisfy on an initial and continued basis certain specific criteria, which the Exchange would include within Commentary .01, as described in greater detail below. As proposed, the Exchange would continue to file separate proposed rule changes before the listing and trading of Managed Fund Shares with components that do not satisfy the additional criteria described below or components other than those specified below. For example, if the components of a Managed Fund Share exceeded one of the applicable thresholds, the Exchange would file a separate proposed rule change before listing and trading such Managed Fund Share. Similarly, if the components of a Managed Fund Share included a security or asset that is not specified below, the Exchange would file a separate proposed rule change.

The Exchange would also add to the criteria of Rule 8.600(c) to provide that the Web site for each series of Managed Fund Shares shall disclose certain information regarding the Disclosed Portfolio, to the extent applicable. The required information includes the following, to the extent applicable: ticker symbol, CUSIP or other identifier, a description of the holding, identity of the asset upon which the derivative is based, the strike price for any options, the quantity of each security or other asset held as measured by select

metrics, maturity date, coupon rate, effective date, market value and percentage weight of the holding in the portfolio.⁹

In addition, the Exchange would amend Rule 8.600(d) to specify that all Managed Fund Shares must have a stated investment objective, which must be adhered to under normal market conditions.¹⁰

Finally, the Exchange would also amend the continued listing requirement in Rule 8.600(d)(2)(A) by changing the requirement that a Portfolio Indicative Value for Managed Fund Shares be widely disseminated by one or more major market data vendors at least every 15 seconds during the time when the Managed Fund Shares trade on the Exchange to a requirement that a Portfolio Indicative Value be widely disseminated by one or more major market data vendors at least every 15 seconds during the Core Trading Session (as defined in NYSE Arca Equities Rule 7.34).

Proposed Managed Fund Share Portfolio Standards

The Exchange is proposing standards that would pertain to Managed Fund Shares to qualify for listing and trading pursuant to SEC Rule 19b-4(e). These standards would be grouped according to security or asset type. The Exchange notes that the standards proposed for a Managed Fund Share portfolio that holds domestic equity securities, Derivative Securities Products and Index-Linked Securities are based in large part on the existing equity security standards applicable to Units in Commentary .01 to Rule 5.2(j)(3). The standards proposed for a Managed Fund Share portfolio that holds fixed income securities are based in large part on the existing fixed income security standards applicable to Units in Commentary .02 to Rule 5.2(j)(3). Many of the standards proposed for other types of holdings in a Managed Fund Share portfolio are based on previous proposed rule

⁹ Proposed rule changes for previously-listed series of Managed Fund Shares have similarly included disclosure requirements with respect to each portfolio holding, as applicable to the type of holding. *See, e.g.* Securities Exchange Act Release No. 72666 (July 3, 2014), 79 FR 44224 (July 30, 2014) (SR-NYSEArca-2013-122) (the "PIMCO Total Return Use of Derivatives Approval"), at 44227.

¹⁰ The Exchange would also add a new defined term under Rule 8.600(c)(5) to specify that the term "normal market conditions" includes, but is not limited to, the absence of trading halts in the applicable financial markets generally; operational issues causing dissemination of inaccurate market information; or force majeure type events such as systems failure, natural or man-made disaster, act of God, armed conflict, act of terrorism, riot or labor disruption or any similar intervening circumstance.

⁷ 17 CFR 240.19b-4(e). As provided under SEC Rule 19b-4(e), the term "new derivative securities product" means any type of option, warrant, hybrid securities product or any other security, other than a single equity option or a security futures product, whose value is based, in whole or in part, upon the performance of, or interest in, an underlying instrument.

⁸ 17 CFR 240.19b-4(c)(1). As provided under SEC Rule 19b-4(c)(1), a stated policy, practice, or interpretation of the SRO shall be deemed to be a proposed rule change unless it is reasonably and fairly implied by an existing rule of the SRO.

⁶ See Approval Order, *supra* note 5, at 19547.

changes for specific series of Managed Fund Shares.¹¹

Proposed Commentary .01(a) would describe the standards for a Managed Fund Share portfolio that holds equity securities, which are defined to be U.S. Component Stocks,¹² Derivative Securities Products,¹³ and Index-Linked Securities¹⁴ listed on a national securities exchange as follows:

(1) Component stocks (excluding Derivative Securities Products and Index-Linked Securities) that in the aggregate account for at least 90% of the equity weight of the portfolio (excluding such Derivative Securities Products and Index-Linked Securities) each must have a minimum market value of at least \$75 million;¹⁵

(2) Component stocks (excluding Derivative Securities Products and Index-Linked Securities) that in the aggregate account for at least 70% of the equity weight of the portfolio (excluding such Derivative Securities Products and Index-Linked Securities) each must have a minimum monthly trading volume of 250,000 shares, or minimum notional volume traded per month of

¹¹ See the PIMCO Total Return Use of Derivatives Approval. See also, Securities Exchange Act Release Nos. 66321 (February 3, 2012), 77 FR 6850 (February 9, 2012) (SR-NYSEArca-2011-95) (the "PIMCO Total Return Approval"); 69244 (March 27, 2013), 78 FR 19766 (April 2, 2013) (SR-NYSEArca-2013-08) (the "SPDR Blackstone/GSO Senior Loan Approval"); 68870 (February 8, 2013), 78 FR 11245 (February 15, 2013) (SR-NYSEArca-2012-139) (the "First Trust Preferred Securities and Income Approval"); 69591 (May 16, 2013), 78 FR 30372 (May 22, 2013) (SR-NYSEArca-2013-33) (the "International Bear Approval"); 61697 (March 12, 2010), 75 FR 13616 (March 22, 2010) (SR-NYSEArca-2010-04) (the "WisdomTree Real Return Approval"); and 67054 (May 24, 2012), 77 FR 32161 (May 31, 2012) (SR-NYSEArca-2012-25) (the "WisdomTree Brazil Bond Approval"). Certain standards proposed herein for Managed Fund Shares are also based on previous proposed rule changes for specific series of Units for which Commission approval for listing was required due to the Units not satisfying certain standards of Commentary .01 and .02 to Rule 5.2(j)(3). See, e.g., Securities Exchange Act Release No. 69373 (April 15, 2013), 78 FR 23601 (April 19, 2013) (SR-NYSEArca-2012-108) (the "NYSE Arca U.S. Equity Synthetic Reverse Convertible Index Fund Approval").

¹² For the purposes of Commentary .01 and this proposal, the term "U.S. Component Stocks" would have the same meaning as defined in NYSE Arca Equities Rule 5.2(j)(3).

¹³ For the purposes of Commentary .01 and this proposal, the term "Derivative Securities Products" would have the same meaning as defined in NYSE Arca Equities Rule 7.34(a)(4)(A).

¹⁴ Index-Linked Securities are securities listed under NYSE Arca Equities Rule 5.2(j)(6).

¹⁵ This proposed text is identical to the corresponding text of Commentary .01(a)(A)(1) to Rule 5.2(j)(3), except for the omission of the reference to "index," which is not applicable, and the addition of the reference to Index-Linked Securities.

\$25,000,000, averaged over the last six months;¹⁶

(3) The most heavily weighted component stock (excluding Derivative Securities Products and Index-Linked Securities) must not exceed 30% of the equity weight of the portfolio, and, to the extent applicable, the five most heavily weighted component stocks (excluding Derivative Securities Products and Index-Linked Securities) must not exceed 65% of the equity weight of the portfolio;¹⁷

(4) A portfolio that includes any equity security as described in Commentary .01(a) shall include a minimum of 13 component stocks; provided, however, that there shall be no minimum number of component stocks if (a) one or more series of Derivative Securities Products or Index-Linked Securities constitute, at least in part, components underlying a series of Managed Fund Shares, or (b) one or more series of Derivative Securities Products or Index-Linked Securities account for 100% of the equity weight of the portfolio of a series of Managed Fund Shares;¹⁸

(5) Except as provided in proposed Commentary .01(a), equity securities in the portfolio must be U.S. Component Stocks listed on a national securities exchange and must be NMS Stocks as defined in Rule 600 of Regulation NMS;¹⁹

(6) For Derivative Securities Products and Index-Linked Securities, no more than 25% of the equity weight of the portfolio could include leveraged and/or inverse leveraged Derivative Securities Products or Index-Linked Securities; and

(7) American Depositary Receipts ("ADRs") may be sponsored or unsponsored. However no more than

¹⁶ This proposed text is identical to the corresponding text of Commentary .01(a)(A)(2) to Rule 5.2(j)(3), except for the omission of the reference to "index," which is not applicable, and the addition of the reference to Index-Linked Securities.

¹⁷ This proposed text is identical to the corresponding text of Commentary .01(a)(A)(3) to Rule 5.2(j)(3), except for the omission of the reference to "index," which is not applicable, and the addition of the reference to Index-Linked Securities.

¹⁸ This proposed text is identical to the corresponding text of Commentary .01(a)(A)(4) to Rule 5.2(j)(3), except for the omission of the reference to "index," which is not applicable, the addition of the reference to Index-Linked Securities, and the reference to the 100% limit applying to the "equity portion" of the portfolio.

¹⁹ 17 CFR 240.600. This proposed text is identical to the corresponding text of Commentary .01(a)(A)(5) to Rule 5.2(j)(3), except for the addition of "equity" to make clear that the standard applies to "equity securities", the exclusion of unsponsored ADRs, and the omission of the reference to "index," which is not applicable.

10% of the equity weight of the portfolio shall consist of unsponsored ADRs.

Proposed Commentary .01(b) would describe the standards for a Managed Fund Share portfolio that holds fixed income securities, which are debt securities²⁰ that are notes, bonds, debentures or evidence of indebtedness that include, but are not limited to, U.S. Department of Treasury securities ("Treasury Securities"), government-sponsored entity securities ("GSE Securities"), municipal securities, trust preferred securities, supranational debt and debt of a foreign country or a subdivision thereof, investment grade and high yield corporate debt, bank loans, mortgage and asset backed securities, and commercial paper. The applicable portfolio holdings standards would be as follows:

(1) Components that in the aggregate account for at least 75% of the fixed income weight of the portfolio each shall have a minimum original principal amount outstanding of \$100 million or more;²¹

(2) No component fixed-income security (excluding Treasury Securities and GSE Securities) could represent more than 30% of the fixed income weight of the portfolio, and the five most heavily weighted component fixed income securities in the portfolio must not in the aggregate account for more than 65% of the fixed income weight of the portfolio;²²

(3) An underlying portfolio (excluding exempted securities) that includes fixed income securities must include a minimum of 13 non-affiliated issuers; provided, however, that there shall be no minimum number of non-affiliated issuers required for fixed income securities if at least 70% of the weight of the portfolio consists of equity securities as described in proposed Commentary .01(a).²³

²⁰ Debt securities include a variety of fixed income obligations, including, but not limited to, corporate debt securities, government securities, municipal securities, convertible securities, and mortgage-backed securities. Debt securities include investment-grade securities, non-investment-grade securities, and unrated securities. Debt securities also include variable and floating rate securities. To the extent a fund holds a convertible security, the equity security into which such security is converted would be required to meet the criteria of proposed Commentary .01(a).

²¹ This text of proposed Commentary .01(b)(1) to Rule 8.600 is based on the corresponding text of Commentary .02(a)(2) to Rule 5.2(j)(3).

²² This proposed text is identical to the corresponding text of Commentary .02(a)(4) to Rule 5.2(j)(3), except for the omission of the reference to "index," which is not applicable.

²³ This proposed text is similar to the corresponding text of Commentary .02(a)(5) to Rule 5.2(j)(3), except for the omission of the reference to

(4) Component securities that in aggregate account for at least 90% of the fixed income weight of the portfolio must be either (a) from issuers that are required to file reports pursuant to Sections 13 and 15(d) of the Act; (b) from issuers that have a worldwide market value of its outstanding common equity held by non-affiliates of \$700 million or more; (c) from issuers that have outstanding securities that are notes, bonds debentures, or evidence of indebtedness having a total remaining principal amount of at least \$1 billion; (d) exempted securities as defined in Section 3(a)(12) of the Act; or (e) from issuers that are a government of a foreign country or a political subdivision of a foreign country; and

(5) Non-agency, non-GSE and privately-issued mortgage-related and other asset-backed securities components of a portfolio shall not account, in the aggregate, for more than 20% of the weight of the fixed income portion of the portfolio.

Proposed Commentary .01(c) would describe the standards for a Managed Fund Share portfolio that holds cash and cash equivalents.²⁴ Specifically, the portfolio may hold short-term instruments with maturities of less than 3 months. There would be no limitation to the percentage of the portfolio invested in such holdings. Short-term instruments would include the following:²⁵

(1) U.S. Government securities, including bills, notes and bonds differing as to maturity and rates of interest, which are either issued or guaranteed by the U.S. Treasury or by U.S. Government agencies or instrumentalities;

(2) certificates of deposit issued against funds deposited in a bank or savings and loan association;

(3) bankers' acceptances, which are short-term credit instruments used to finance commercial transactions;

"index," which is not applicable, the exclusion of the text "consisting entirely of exempted securities" and the provision that there shall be no minimum number of non-affiliated issuers required for fixed income securities if at least 70% of the weight of the portfolio consists of equity securities as described in proposed Commentary .01(a).

²⁴ Proposed rule changes for previously-listed series of Managed Fund Shares have similarly included the ability for such Managed Fund Share holdings to include cash and cash equivalents. *See, e.g.,* SPDR Blackstone/GSO Senior Loan Approval, *supra* note 10, at 19768–69 and First Trust Preferred Securities and Income Approval, *supra* note 11, at 76150.

²⁵ Proposed rule changes for previously-listed series of Managed Fund Shares have similarly specified short-term instruments with respect to their inclusion in Managed Fund Share holdings. *See, e.g.,* First Trust Preferred Securities and Income Approval, *supra* note 11, at 76150–51.

(4) repurchase agreements and reverse repurchase agreements;

(5) bank time deposits, which are monies kept on deposit with banks or savings and loan associations for a stated period of time at a fixed rate of interest;

(6) commercial paper, which are short-term unsecured promissory notes; and

(7) money market funds.

Proposed Commentary .01(d) would describe the standards for a Managed Fund Share portfolio that holds listed derivatives, including futures, options and swaps on commodities, currencies and financial instruments (*e.g.*, stocks, fixed income, interest rates, and volatility) or a basket or index of any of the foregoing.²⁶ There would be no limitation to the percentage of the portfolio invested in such holdings; provided, however, that, in the aggregate, at least 90% of the weight of such holdings invested in futures and exchange-traded options shall consist of futures and options whose principal market is a member of the Intermarket Surveillance Group ("ISG") or is a market with which the Exchange has a comprehensive surveillance sharing agreement ("CSSA").²⁷ Proposed Commentary .01(e) would describe the standards for a Managed Fund Share portfolio that holds over the counter ("OTC") derivatives, including forwards, options and swaps on commodities, currencies and financial instruments (*e.g.*, stocks, fixed income, interest rates, and volatility) or a basket or index of any of the foregoing.²⁸ Proposed Commentary .01(e)(1) would provide that no more than 20% of the assets in the portfolio may be invested in OTC derivatives.

Proposed Commentary .01(f) would provide that, to the extent that listed or OTC derivatives are used to gain exposure to individual equities and/or

²⁶ Proposed rule changes for previously-listed series of Managed Fund Shares have similarly included the ability for such Managed Fund Share holdings to include listed derivatives. *See, e.g.,* WisdomTree Real Return Approval, *supra* note 10, at 13617 and WisdomTree Brazil Bond Approval, *supra* note 11, at 32163.

²⁷ ISG is comprised of an international group of exchanges, market centers, and market regulators that perform front-line market surveillance in their respective jurisdictions. *See* <https://www.isgportal.org/home.html>.

²⁸ A proposed rule change for series of Units previously listed and traded on the Exchange pursuant to Rule 5.2(j)(3) similarly included the ability for such Units' holdings to include OTC derivatives, specifically OTC down-and-in put options, which are not NMS Stocks as defined in Rule 600 of Regulation NMS and therefore do not satisfy the requirements of Commentary .01(a)(A) to Rule 5.2(j)(3). *See, e.g.,* NYSE Arca U.S. Equity Synthetic Reverse Convertible Index Fund Approval, *supra* note 11, at 23602.

fixed income securities, or to indexes of equities and/or fixed income securities, such equities and/or fixed income securities, as applicable, shall meet the criteria set forth in Commentary .01(a) and .01(b) to Rule 8.600, respectively.

The Exchange believes that the proposed standards would continue to ensure transparency surrounding the listing process for Managed Fund Shares. Additionally, the Exchange believes that the proposed portfolio standards for listing and trading Managed Fund Shares, many of which track existing Exchange rules relating to Units, are reasonably designed to promote a fair and orderly market for such Managed Fund Shares.²⁹ These proposed standards would also work in conjunction with the existing initial and continued listing criteria related to surveillance procedures and trading guidelines.

In support of this proposal, the Exchange represents that:³⁰

(1) the Managed Fund Shares will continue to conform to the initial and continued listing criteria under Rule 8.600;

(2) the Exchange's surveillance procedures are adequate to continue to properly monitor the trading of the Managed Fund Shares in all trading sessions and to deter and detect violations of Exchange rules. Specifically, the Exchange intends to utilize its existing surveillance procedures applicable to derivative products, which will include Managed Fund Shares, to monitor trading in the Managed Fund Shares;

(3) prior to the commencement of trading of a particular series of Managed Fund Shares, the Exchange will inform its Equity Trading Permit ("ETP") Holders in a Bulletin of the special characteristics and risks associated with trading the Managed Fund Shares, including procedures for purchases and redemptions of Managed Fund Shares, suitability requirements under NYSE Arca Equities Rule 9.2(a), the risks involved in trading the Managed Fund Shares during the Opening and Late Trading Sessions when an updated Portfolio Indicative Value will not be calculated or publicly disseminated, information regarding the Portfolio Indicative Value and the Disclosed Portfolio, prospectus delivery requirements, and other trading information. In addition, the Bulletin will disclose that the Managed Fund Shares are subject to various fees and expenses, as described in the applicable

²⁹ *See* Approval Order, *supra* note 5 at 19548.

³⁰ The Exchange made similar representations in the Approval Order. *See id.* at 19549.

registration statement, and will discuss any exemptive, no-action, and interpretive relief granted by the Commission from any rules under the Act. Finally, the Bulletin will disclose that the net asset value for the Managed Fund Shares will be calculated after 4 p.m. ET each trading day; and

(4) the issuer of a series of Managed Fund Shares will be required to comply with Rule 10A-3 under the Act for the initial and continued listing of Managed Fund Shares, as provided under NYSE Arca Equities Rule 5.3.

The Exchange notes that the proposed change is not otherwise intended to address any other issues and that the Exchange is not aware of any problems that ETP Holders or issuers would have in complying with the proposed change.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,³¹ in general, and furthers the objectives of Section 6(b)(5) of the Act,³² in particular, because it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

The proposed rule change is designed to perfect the mechanism of a free and open market and, in general, to protect investors and the public interest because it would facilitate the listing and trading of additional Managed Fund Shares, which would enhance competition among market participants, to the benefit of investors and the marketplace. Specifically, after more than six years under the current process, whereby the Exchange is required to file a proposed rule change with the Commission for the listing and trading of each new series of Managed Fund Shares, the Exchange believes that it is appropriate to codify certain rules within Rule 8.600 that would generally eliminate the need for separate proposed rule changes. The Exchange believes that this would facilitate the listing and trading of additional types of Managed Fund Shares that have investment portfolios that are similar to investment portfolios for Units, which have been approved for listing and trading, thereby creating greater efficiencies in the listing process for the Exchange and the Commission. In this regard, the Exchange notes that the standards proposed for Managed Fund Share portfolios that include domestic

equity securities, Derivative Securities Products, and Index-Linked Securities are based in large part on the existing equity security standards applicable to Units in Commentary .01 to Rule 5.2(j)(3) and that the standards proposed for Managed Fund Share portfolios that include fixed income securities are based in large part on the existing fixed income standards applicable to Units in Commentary .02 to Rule 5.2(j)(3). Additionally, many of the standards proposed for other types of holdings of series of Managed Fund Shares are based on previous proposed rule changes for specific series of Managed Fund Shares.³³

With respect to the proposed addition to the criteria of Rule 8.600(c) to provide that the Web site for each series of Managed Fund Shares shall disclose certain information regarding the Disclosed Portfolio, to the extent applicable, the Exchange notes that proposed rule changes approved by the Commission for previously-listed series of Managed Fund Shares have similarly included disclosure requirements with respect to each portfolio holding, as applicable to the type of holding.³⁴ With respect to the proposed exclusion of Derivatives Securities Products and Index-Linked Securities from the requirements of proposed Commentary .01(a) of Rule 8.600, the Exchange believes it is appropriate to exclude Index-Linked Securities as well as Derivative Securities Products from certain component stock eligibility criteria for Managed Fund Shares in so far as Derivative Securities Products and Index-Linked Securities are themselves subject to specific quantitative listing and continued listing requirements of a national securities exchange on which such securities are listed. Derivative Securities Products and Index-Linked Securities that are components of a fund's portfolio would have been listed and traded on a national securities exchange pursuant to a proposed rule change approved by the Commission pursuant to Section 19(b)(2) of the Act³⁵ or submitted by a national securities exchange pursuant to Section 19(b)(3)(A) of the Act³⁶ or would have been listed by a national securities exchange pursuant to the requirements of Rule 19b-4(e) under the Act.³⁷ The Exchange also notes that Derivative Securities Products and Index-Linked Securities are derivatively priced, and, therefore, the Exchange believes that it

would not be necessary to apply the proposed generic quantitative criteria (e.g., market capitalization, trading volume, or portfolio component weighting) applicable to equity securities other than Derivative Securities Products or Index-Linked Securities (e.g., common stocks) to such products.³⁸

With respect to the proposed amendment to the continued listing requirement in Rule 8.600(d)(2)(A) to require dissemination of a Portfolio Indicative Value at least every 15 seconds during the Core Trading Session (as defined in NYSE Arca Equities Rule 7.34), such requirement conforms to the requirement applicable to the dissemination of the Intraday Indicative Value for Investment Company Units in Commentary .01(c) and Commentary .02 (c) to NYSE Arca Equities Rule 5.2(j)(3). In addition, such dissemination is consistent with representations made in proposed rule changes for issues of Managed Fund Shares previously approved by the Commission.³⁹

With respect to the proposed requirement in Commentary .01(b)(3) to Rule 8.600 that an underlying portfolio (excluding exempted securities) that includes fixed income securities must include a minimum of 13 non-affiliated issuers, but that there would be no minimum number of non-affiliated issuers required for fixed income securities if at least 70% of the weight of the portfolio consists of equity securities, the Exchange notes that such requirement is consistent with proposed Commentary .01(b)(2). The Exchange further notes that Commentary .02 (a)(4) to Rule 5.2(j)(3) currently provides that a single fixed income security can represent up to 30% of the weight of an index underlying a series of Investment Company Units. Proposed Commentary .01(b)(3) to Rule 8.600, therefore, provides for a maximum weighting of a fixed income security in a fund's portfolio comparable to existing rules applicable to Investment Company Units based on fixed income indexes.

With respect to proposed Commentary .01(d)(1) to Rule 8.600 relating to listed derivatives, the Exchange believes that it is appropriate

³⁸ See Securities Exchange Act Release Nos. 57561 (March 26, 2008), 73 FR 17390 (April 1, 2008) (SR-NYSEArca-2008-29) (notice of filing of proposed rule change to amend eligibility criteria for components of an index underlying Investment Company Units); 57751 (May 1, 2008), 73 FR 25818 (May 7, 2008) (SR-NYSEArca-2008-29) (order approving proposed rule change to amend eligibility criteria for components of an index underlying Investment Company Units).

³⁹ See, e.g., Approval Order, *supra* note 4; International Bear Approval, *supra* note 11.

³³ See *supra*, note 11.

³⁴ See *supra*, note 9.

³⁵ 15 U.S.C. 78s(b)(2).

³⁶ 15 U.S.C. 78s(b)(3)(A).

³⁷ 17 CFR 240.19b-4(e).

³¹ 15 U.S.C. 78f(b).

³² 15 U.S.C. 78f(b)(5).

that there be no limit to the percentage of a portfolio invested in such holdings, provided that, in the aggregate, at least 90% of the weight of such holdings invested in futures and exchange-traded options would consist of futures and options whose principal market is a member of ISG or is a market with which the Exchange has a comprehensive surveillance sharing agreement. Such a requirement would facilitate information sharing among market participants trading shares of a series on Managed Fund Shares as well as futures and options that such series may hold. In addition, listed swaps would be centrally cleared, reducing counterparty risk and thereby furthering investor protection.⁴⁰

With respect to proposed Commentary .01(e) to Rule 8.600 relating to OTC derivatives, the Exchange believes that the limitation to 20% of assets for non-centrally cleared derivatives would assure that the preponderance of fund investments would not be in derivatives that are not listed and centrally cleared.

With respect to proposed Commentary .01(f) to Rule 8.600 relating to a fund's use of listed or OTC derivatives to gain exposure to individual equities and/or fixed income securities, or to indexes of equities and/or indexes of fixed income securities, the Exchange notes that such exposure would be required to meet the numerical and other criteria set forth in proposed Commentary .01(a) and .01(b) to Rule 8.600 respectively.

Quotation and other market information relating to listed futures and options is available from the exchanges listing such instruments as well as from market data vendors. With respect to listed swaps, which are centrally cleared and traded on "Swap Execution Facilities ("SEFs")", intraday pre-trade (quoting) information, including real time streaming quotes and market depth is available through the facilities of the applicable SEF.⁴¹

The Exchange notes that a fund's investments in derivative instruments

would be subject to limits on leverage imposed by the 1940 Act. Section 18(f) of the 1940 Act and related Commission guidance limit the amount of leverage an investment company can obtain. A fund's investments would be consistent with its investment objective and would not be used to enhance leverage. To limit the potential risk associated with a fund's use of derivatives, a fund will segregate or " earmark " assets determined to be liquid by a fund in accordance with the 1940 Act (or, as permitted by applicable regulation, enter into certain offsetting positions) to cover its obligations under derivative instruments. A fund's investments will not be used to seek performance that is the multiple or inverse multiple (*i.e.*, 2Xs and 3Xs) of a fund's broad-based securities market index (as defined in Form N-1A).⁴²

The proposed rule change is also designed to protect investors and the public interest because Managed Fund Shares listed and traded pursuant to Rule 8.600, including pursuant to the proposed new portfolio standards, would continue to be subject to the full panoply of Exchange rules and procedures that currently govern the trading of equity securities on the Exchange.⁴³

The Exchange believes that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices because the Managed Fund Shares will be listed and traded on the Exchange pursuant to the initial and continued listing criteria in Rule 8.600. The Exchange has in place surveillance procedures that are adequate to properly monitor trading in the Managed Fund Shares in all trading sessions and to deter and detect violations of Exchange rules and applicable federal securities laws. The Financial Industry Regulatory Authority, Inc. ("FINRA"), on behalf of the Exchange, or the regulatory staff of the Exchange, will communicate as needed regarding trading in Managed Fund Shares with other markets that are members of the ISG, including all U.S. securities exchanges and futures exchanges on which the components are traded. In addition, the Exchange may obtain information regarding trading in Managed Fund Shares from other markets that are members of the ISG, including all U.S. securities exchanges and futures exchanges on which the

components are traded, or with which the Exchange has in place a CSSA.

The Exchange also believes that the proposed rule change would fulfill the intended objective of Rule 19b-4(e) under the Act by allowing Managed Fund Shares that satisfy the proposed listing standards to be listed and traded without separate Commission approval. However, as proposed, the Exchange would continue to file separate proposed rule changes before the listing and trading of Managed Fund Shares that do not satisfy the additional criteria described above.

For these reasons, the Exchange believes that the proposal is consistent with the Act.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,⁴⁴ the Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, the Exchange believes that the proposed rule change would facilitate the listing and trading of additional types of Managed Fund Shares and result in a significantly more efficient process surrounding the listing and trading of Managed Fund Shares, which will enhance competition among market participants, to the benefit of investors and the marketplace. The Exchange believes that this would reduce the time frame for bringing Managed Fund Shares to market, thereby reducing the burdens on issuers and other market participants and promoting competition. In turn, the Exchange believes that the proposed change would make the process for listing Managed Fund Shares more competitive by applying uniform listing standards with respect to Managed Fund Shares.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or *up to 90 days* (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory

⁴⁰ The Commission has noted that "[c]entral clearing mitigates counterparty risk among dealers and other institutions by shifting that risk from individual counterparties to [central counterparties ("CCPs")], thereby protecting CCPs from each other's potential failures." See Securities Exchange Act Release No. 67286 (June 28, 2012) (File No. S7-44-10) (Process for Submissions for Review of Security-Based Swaps for Mandatory Clearing and Notice Filing Requirements for Clearing Agencies).

⁴¹ There are currently five categories of swaps eligible for central clearing: interest rate swaps; credit default swaps; foreign exchange swaps; equity swaps; and commodity swaps. The following entities provide central clearing for OTC derivatives: ICE Clear Credit (US); ICE Clear (EU); CME Group; LCH.Clearnet; and Eurex.

⁴² See, e.g., Securities Exchange Act Release No. 74842 (April 29, 2015), 86 FR 25723 (May 5, 2015) (SR-NYSEArca-2014-89) (order approving listing and trading of shares of eight PIMCO exchange-traded funds).

⁴³ See Approval Order, *supra* note 5, at 19547.

⁴⁴ 15 U.S.C. 78f(b)(8).

organization consents, the Commission will:

(A) by order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NYSEArca-2015-110 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-NYSEArca-2015-110. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Section, 100 F Street NE., Washington, DC 20549 on official business days between 10:00 a.m. and 3:00 p.m. Copies of the filing will also be available for inspection and copying at the NYSE's principal office and on its Internet Web site at www.nyse.com. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NYSEArca-2015-110 and

should be submitted on or before December 18, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁴⁵

Robert W. Errett,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76499; File No. SR-NASDAQ-2015-142]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to Market Order Spread Protection

November 20, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 12, 2015, The NASDAQ Stock Market LLC ("Nasdaq" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the rules of the NASDAQ Options Market, LLC ("NOM"), NASDAQ's facility for executing and routing standardized equity and index options, at Chapter VI, Section 6, entitled "Acceptance of Quotes and Orders," specifically at Section 6(c) concerning Market Order Spread Protection.

The text of the proposed rule change is available on the Exchange's Web site at <http://nasdaq.cchwallstreet.com>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for

the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to amend Chapter VI, Section 6 entitled "Acceptance of Quotes and Orders," specifically, at paragraph (c) related to Market Order Spread Protection. This feature was adopted as an enhancement to NOM's Systems in 2011.³ The Market Order Spread Protection was designed to protect Market Orders⁴ from being executed in very wide markets. This feature is not optional and is set at the same threshold for all options traded on NOM. The Market Order Spread Protection is applicable to all Participants submitting Market Orders.

At this time, the Exchange is proposing to amend Section 6(c) which currently states, "System Orders that are Market Orders will be rejected if the NBBO is wider than a preset threshold at the time the order is received by the System." The Exchange proposes to amend this sentence as follows: "System Orders that are Market Orders will be rejected if the *best of the NBBO and the internal market BBO*⁵ (the "Reference BBO") is wider than a preset threshold at the time the order is received by the System." The Exchange is amending this rule text to account for both Price-Improving⁶ and Post-Only Orders.⁷ Both of these order types, as well as orders which would lock or cross another market,⁸ could result in non-displayed pricing and would result

³ See Securities Exchange Act Release No. 64667 (June 14, 2011), 76 FR 35930 (June 20, 2011) (SR-NASDAQ-2011-080).

⁴ "Market Orders" are orders to buy or sell at the best price available at the time of execution. Participants can designate that their Market Orders not executed after a pre-established period of time, as established by the Exchange, will be cancelled back to the Participant. See NOM Rules at Chapter VI, Section 1(e)(5).

⁵ Best Bid or Best Offer on NOM.

⁶ See NOM Rules at Chapter VI, Section 1(e)(6).

⁷ See NOM Rules at Chapter VI, Section 1(e)(11).

⁸ Options Order Protection and Locked and Crossed Market Rules are located in Chapter XII of NOM Rules. In the event of a locked and crossed market, the BBO will be repriced and displayed in accordance with NOM Rules at Chapter VI, Section 7(b)(3)(C).

⁴⁵ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

in the internal market BBO being better than the NBBO.

Price Improving Orders are orders to buy or sell an option at a specified price at an increment smaller than the minimum price variation ("MPV") in the security. Price Improving Orders may be entered in increments as small as one cent. Price Improving Orders that are available for display shall be displayed at the minimum price variation in that security and shall be rounded up for sell orders and rounded down for buy orders.

Post-Only Orders are orders that will not remove liquidity from the System. Post-Only Orders are to be ranked and executed on the Exchange or cancelled, as appropriate, without routing away to another market. Post-Only Orders are evaluated at the time of entry with respect to locking or crossing other orders as follows: (i) If a Post-Only Order would lock or cross an order on the System, the order will be re-priced to \$.01 below the current low offer (for bids) or above the current best bid (for offers) and displayed by the System at one minimum price increment below the current low offer (for bids) or above the current best bid (for offers); and (ii) if a Post-Only Order would not lock or cross an order on the System but would lock or cross the NBBO as reflected in the protected quotation of another market center, the order will be handled pursuant to Chapter VI, Section 7(b)(3)(C). Participants may choose to have their Post-Only Orders returned whenever the order would lock or cross the NBBO or be placed on the book at a price other than its limit price. Post-Only Orders received prior to the opening will be eligible for execution during the opening cross and will be processed as per Chapter VI, Section 8. Post-Only Orders received after market close will be rejected.⁹ Similarly, with this order type, market participants are able to submit orders or quotes priced between the MPV.

The current rule text does not reflect the possibility that orders or quotes could be priced between the MPV. The proposed rule text amends the current rule text to account for Price Improving and Post-Only Orders and the results of repricing.

The following is an example of a Price Improving Order and Market Order Spread Protection. Assume an option MPV is scaled in \$0.05 increments and a limit buy order of \$0.05 exists on the Exchange. If a Price Improving sell order is entered at \$0.11, this order will not

be displayed at its limit of \$0.11, because the order is priced at a non-MPV increment. This order will be displayed at the nearest MPV price of \$0.15 (because of the option's \$0.05 MPV increment). Assume this order makes up the best offer on the Exchange. For this example, assume the Market Order Spread Threshold in the System is set at \$0.09. Further assume a Market Order to buy is submitted to the Exchange. Based on the Exchange's proposed implementation of Market Order Spread Protection, the Market Order to buy would execute against the resting sell order at \$0.11, since \$0.11 is the best available offer and the internal market BBO spread is \$0.06 (spread between the best bid of \$0.05 and the best offer of \$0.11) which is less than the Market Order Spread Threshold of \$0.09. Based on the current rule text, a Participant could expect their Market Order to be rejected, since the NBBO spread is \$0.10 (spread between the best NBB of \$0.05 and the NBO of \$0.15) which exceeds the \$0.09 Market Order Spread Threshold. The Exchange is amending the rule text to provide for the internal market BBO being better than the NBBO.

The following is a similar example for a Post-Only Order. Assume an option MPV is scaled in \$0.05 increments and a limit buy order of \$0.05 exists on the Exchange. If a Post-Only Order is entered to sell at \$0.05, this order will not immediately trade at its limit of \$0.05 since by definition it will not remove liquidity from the System. Instead, the Post-Only Order will be available to trade \$0.01 above the locking price of \$0.05 (*i.e.*, \$0.06) and displayed at the nearest MPV increment price of \$0.10. Assume this order makes up the best offer on the Exchange. For this example, assume the Market Order Spread Threshold in the System is set at \$0.04. Further assume a Market Order to buy is submitted to the Exchange. Based on the Exchange's proposed implementation of Market Order Spread Protection, the Market Order to buy would execute against the resting Post-Only Order at \$0.06, since \$0.06 is the best available offer and the internal market BBO spread is \$0.01 (spread between the best bid of \$0.05 and the best offer of \$0.06) which is less than the Market Order Spread Threshold of \$0.04. Based on the current rule text, a Participant could expect their Market Order to be rejected, since the NBBO spread is \$0.05 (spread between the best NBB of \$0.05 and the NBO of \$0.10) which exceeds the \$0.04 Market Order Spread Threshold.

This rule change will correct the existing rule text to reflect current

practice which accounts for non-displayed order types and reprices due to trade-through and locked and crossed market restrictions.¹⁰ Participants were notified via an Options Trader Alert of this rule text error.¹¹

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act¹² in general, and furthers the objectives of Section 6(b)(5) of the Act¹³ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by amending the rule text to reflect the impact of non-displayed order types and repricing due to trade-through and locked and crossed market restrictions.

Amending the current NOM rule text for Market Order Spread Protection to account for non-displayed orders such as Price-Improving and Post-Only Orders and repricing due to trade-through and locked and crossed market restrictions would provide Participants with the expected results of the Market Order Spread Protection feature. The Exchange believes that it is consistent with the Act to amend the rule text to reflect these non-displayed orders because today, these order types permit Participants to submit orders or quotes priced between the MPV, which will be rounded to the nearest MPV for display.

The Exchange believes that the amendment to the Market Order Spread Protection language does not otherwise create an impediment to a free and open market because these two order types already exist today and provide investors the opportunity to trade at a better price than would otherwise be available, *e.g.* inside the disseminated best bid and offer for a security, which could result in better executions for investors. Further, these order types incent Participants to compete by putting forth their best price to potentially match or better any Price Improving or Post-Only Orders or any other order resident in the System. This may result in more aggressive, rather than less aggressive, trading interest. This proposal reflects the impact of these order types on the Market Order Spread Protection feature.

By reflecting the proper rule text to account for these order types the

¹⁰ See Chapter XII of NOM Rules.

¹¹ See Options Regulatory Alert 2015-28 dated September 4, 2015.

¹² 15 U.S.C. 78f(b).

¹³ 15 U.S.C. 78f(b)(5).

⁹ Post-Only Orders may not have a time-in-force designation of Good Til Cancelled or Immediate or Cancel.

Exchange is providing Participants with additional information with which to anticipate the impact of the Market Order Spread Protection feature.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposal to amend the Market Order Spread Protection rule text to account for Price Improving or Post-Only Orders or repricing due to trade-through and locked and crossed market restrictions creates an undue burden on competition because it will serve to provide Participants with greater information to anticipate the impact of the Market Order Spread Protection feature. Today, Participants are able to submit orders or quotes priced between the MPV for display at the nearest MPV. This rule change would reflect the ability to enter these types of orders on NOM and the impact of the Market Order Spread Protection feature. The purpose of this rule change is to protect orders resting on the Order Book when the market is wide. This feature will be applied in a similar manner to all Participants on NOM.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A)(iii) of the Act¹⁴ and subparagraph (f)(6) of Rule 19b-4 thereunder.¹⁵

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may

temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NASDAQ-2015-142 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-NASDAQ-2015-142. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions

should refer to File Number SR-NASDAQ-2015-142 and should be submitted on or before December 18, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁶

Robert W. Errett,

Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 31906; File No. 812-14475]

ETF Series Solutions and AlphaClone, Inc.; Notice of Application

November 19, 2015.

AGENCY: Securities and Exchange Commission ("Commission").

ACTION: Notice of an application under section 6(c) of the Investment Company Act of 1940 ("Act") for an exemption from section 15(a) of the Act and rule 18f-2 under the Act, as well as from certain disclosure requirements in rule 20a-1 under the Act, Item 19(a)(3) of Form N-1A, Items 22(c)(1)(ii), 22(c)(1)(iii), 22(c)(8) and 22(c)(9) of Schedule 14A under the Securities Exchange Act of 1934, and Sections 6-07(2)(a), (b), and (c) of Regulation S-X ("Disclosure Requirements"). The requested exemption would permit an investment adviser to hire and replace certain sub-advisers without shareholder approval and grant relief from the Disclosure Requirements as they relate to fees paid to the sub-advisers.

Applicants: ETF Series Solutions (the "Trust"), a Delaware statutory trust registered under the Act as an open-end management investment company with multiple series, and AlphaClone, Inc. (the "Initial Adviser"), a Delaware corporation registered as an investment adviser under the Investment Advisers Act of 1940.

Filing Dates: The application was filed on May 28, 2015 and amended on September 25, 2015.

Hearing or Notification of Hearing: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by writing to the Commission's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the Commission by 5:30 p.m. on December 14, 2015, and

¹⁶ 17 CFR 200.30-3(a)(12).

¹⁴ 15 U.S.C. 78s(b)(3)(a)(iii).

¹⁵ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

should be accompanied by proof of service on applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0–5 under the Act, hearing requests should state the nature of the writer’s interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the Commission’s Secretary.

ADDRESSES: Secretary, U.S. Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549–1090.

Applicants: ETF Series Solutions, 615 E. Michigan Street, Milwaukee, WI 53202, and AlphaClone, Inc., One Market Street, Steuart Tower, Suite 1208, San Francisco, CA 94105.

FOR FURTHER INFORMATION CONTACT: Courtney S. Thornton, Senior Counsel, at (202) 551–6812, or David P. Bartels, Branch Chief, at (202) 551–6821 (Division of Investment Management, Chief Counsel’s Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission’s Web site by searching for the file number, or for an applicant using the Company name box, at <http://www.sec.gov/search/search.htm> or by calling (202) 551–8090.

Summary of the Application

1. The Initial Adviser is the investment adviser to the Trust’s AlphaClone Small Cap ETF, AlphaClone International ETF, AlphaClone Activist ETF, and AlphaClone Value ETF (collectively, “Initial Funds”) pursuant to an investment management agreement with the Trust (“Investment Management Agreement”).¹ Under the terms of the

¹ Applicants request relief with respect to the Initial Funds, as well as to any future series of the Trust and any other existing or future registered open-end management investment company or series thereof that, in each case, is advised by the Initial Adviser or any entity controlling, controlled by, or under common control with, the Initial Adviser or its successors (each, also an “Adviser”), uses the multi-manager structure described in the application, and complies with the terms and conditions set forth in the application (each, a “Subadvised Fund”). For purposes of the requested order, “successor” is limited to an entity that results from a reorganization into another jurisdiction or a change in the type of business organization. Future Subadvised Funds may be operated as a master-feeder structure pursuant to section 12(d)(1)(E) of the Act. In such a structure, certain series of the Trust (each, a “Feeder Fund”) may invest substantially all of their assets in a Subadvised Fund (a “Master Fund”) pursuant to section 12(d)(1)(E) of the Act. No Feeder Fund will engage any sub-advisers other than through approving the engagement of one or more of the Master Fund’s sub-advisers.

Investment Management Agreement, the Adviser, subject to the supervision of the board of trustees of the Trust (“Board”), provides continuous investment management of the assets of each Subadvised Fund. Consistent with the terms of the Investment Management Agreement, the Adviser may, subject to the approval of the Board, delegate portfolio management responsibilities of all or a portion of the assets of a Subadvised Fund to one or more Sub-Advisers.² The Adviser will continue to have overall responsibility for the management and investment of the assets of each Subadvised Fund. The Adviser will evaluate, select, and recommend Sub-Advisers to manage the assets of a Subadvised Fund and will oversee, monitor and review the Sub-Advisers and their performance and recommend the removal or replacement of Sub-Advisers.

2. Applicants request an order to permit the Adviser, subject to the approval of the Board, to enter into investment sub-advisory agreements with the Sub-Advisers (each, a “Sub-Advisory Agreement”) and materially amend such Sub-Advisory Agreements without obtaining the shareholder approval required under section 15(a) of the Act and rule 18f–2 under the Act.³ Applicants also seek an exemption from the Disclosure Requirements to permit a Subadvised Fund to disclose (as both a dollar amount and a percentage of the Subadvised Fund’s net assets): (a) The aggregate fees paid to the Adviser and any Wholly-Owned Sub-Adviser; (b) the aggregate fees paid to Non-Affiliated Sub-Advisers; and (c) the fee paid to each Affiliated Sub-Adviser (collectively, Aggregate Fee Disclosure”).⁴

² As used herein, a “Sub-Adviser” for a Subadvised Fund is (1) an indirect or direct “wholly owned subsidiary” (as such term is defined in the Act) of the Adviser for that Subadvised Fund, or (2) a sister company of the Adviser for that Subadvised Fund that is an indirect or direct “wholly-owned subsidiary” of the same company that, indirectly or directly, wholly owns the Adviser (each of (1) and (2) a “Wholly-Owned Sub-Adviser” and collectively, the “Wholly-Owned Sub-Advisers”), or (3) not an “affiliated person” (as such term is defined in section 2(a)(3) of the Act) of the Subadvised Fund, any Feeder Fund invested in a Master Fund, the Trust, or the Adviser, except to the extent that an affiliation arises solely because the Sub-Adviser serves as a sub-adviser to a Subadvised Fund (“Non-Affiliated Sub-Advisers”).

³ The requested relief will not extend to any sub-adviser, other than a Wholly-Owned Sub-Adviser, who is an affiliated person, as defined in section 2(a)(3) of the Act, of the Subadvised Fund, of any Feeder Fund, or of the Adviser, other than by reason of serving as a sub-adviser to one or more of the Subadvised Funds (“Affiliated Sub-Adviser”).

⁴ For any Subadvised Fund that is a Master Fund, the relief would also permit any Feeder Fund

3. Applicants agree that any order granting the requested relief will be subject to the terms and conditions stated in the application. Such terms and conditions provide for, among other safeguards, appropriate disclosure to Subadvised Funds’ shareholders and notification about sub-advisory changes and enhanced Board oversight to protect the interests of the Subadvised Funds’ shareholders.

4. Section 6(c) of the Act provides that the Commission may exempt any person, security, or transaction or any class or classes of persons, securities, or transactions from any provisions of the Act, or any rule thereunder, if such relief is necessary or appropriate in the public interest and consistent with the protection of investors and purposes fairly intended by the policy and provisions of the Act. Applicants believe that the requested relief meets this standard because, as further explained in the application, the Investment Management Agreements will remain subject to shareholder approval, while the role of the Sub-Advisers is substantially equivalent to that of individual portfolio managers, so that requiring shareholder approval of Sub-Advisory Agreements would impose unnecessary delays and expenses on the Subadvised Funds. Applicants believe that the requested relief from the Disclosure Requirements meets this standard because it will improve the Adviser’s ability to negotiate fees paid to the Sub-Advisers that are more advantageous for the Subadvised Funds.

For the Commission, by the Division of Investment Management, under delegated authority.

Robert W. Errett,
Deputy Secretary.

invested in that Master Fund to disclose Aggregate Fee Disclosure.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76496; File No. SR-OCC-2015-016]

Self-Regulatory Organizations; The Options Clearing Corporation; Notice of Designation of Longer Period for Commission Action on Proposed Rule Change To Modify The Options Clearing Corporation's Margin Methodology by Incorporating Variations in Implied Volatility

November 20, 2015.

On October 5, 2015, The Options Clearing Corporation ("OCC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change SR-OCC-2015-016 pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Exchange Act")¹ and Rule 19b-4 thereunder.² The proposed rule change was published for comment in the *Federal Register* on October 19, 2015.³ The Commission did not receive any comments on the proposed rule change.

Section 19(b)(2) of the Exchange Act⁴ provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day from the publication of notice of filing of this proposed rule change is December 3, 2015.

The Commission is extending the 45-day time period for Commission action on the proposed rule change. The Commission finds that it is appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider and take action on OCC's proposed rule change.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4. OCC also filed this proposal as an advance notice pursuant to Section 802(e)(1) of the Payment, Clearing, and Settlement Supervision Act of 2010 and Rule 19b-4(n)(1) under the Exchange Act. 15 U.S.C. 5465(e)(1) and 17 CFR 240.19b-4(n)(1). See Securities Exchange Act Release No. 76421 (November 10, 2015), 80 FR 71900 (November 17, 2015) (SR-OCC-2015-804). To date, the Commission has not received any comments on the advance notice.

³ Securities Exchange Act Release No. 76128 (October 13, 2015), 80 FR 63264 (October 19, 2015) (SR-OCC-2015-016).

⁴ 15 U.S.C. 78s(b)(2).

Accordingly, pursuant to Section 19(b)(2)(A)(ii)(I) of the Exchange Act,⁵ the Commission designates January 17, 2016, as the date by which the Commission should either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR-OCC-2015-016).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶

Robert W. Errett,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76500; File No. SR-ISEGemini-2015-26]

Self-Regulatory Organizations; ISE Gemini, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Schedule of Fees

November 20, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 6, 2015, ISE Gemini, LLC (the "Exchange" or "ISE Gemini") filed with the Securities and Exchange Commission ("Commission") the proposed rule change, as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

ISE Gemini proposes to amend the Schedule of Fees as described in more detail below. The text of the proposed rule change is available on the Exchange's Internet Web site at <http://www.ise.com>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements

⁵ 15 U.S.C. 19(b)(2)(A)(ii)(I).

⁶ 17 CFR 200.30-3(a)(31).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange currently offers three real-time market data feed offerings.³ In order to encourage subscriptions to multiple market data feeds, ISE Gemini adopted a multi-product subscription discount, which offers a ten percent (10%) discount for customers who subscribe to two data feeds.⁴ The Exchange now proposes to remove this multi-product subscription discount from its Schedule of Fees.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with the provisions of Section 6 of the Act,⁵ in general, and Section 6(b)(4) of the Act,⁶ in particular, in that it is designed to provide for the equitable allocation of reasonable dues, fees, and other charges among its members and other persons using its facilities.

In particular, the Exchange believes the removal of the subscription discount is reasonable and equitable because the discount is no longer necessary to encourage subscriptions to multiple data feeds. Further, the Exchange believes that the proposed removal of the discount is not unfairly discriminatory because it applies to all similarly situated market participations who subscribe to the feeds.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,⁷ the Exchange does not believe that the proposed rule change will impose any burden on intermarket or intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The removal of the multi-product, market data

³ The market data feeds are: the ISE Gemini Order Feed, the ISE Gemini Top Quote Feed, and the ISE Gemini Real-Time Depth of Market Raw Data Feed.

⁴ See Securities Exchange Act Release No. 34-71614 (February 25, 2014), 79 FR 11840 (March 3, 2014) (SR-ISE Gemini-2014-10).

⁵ 15 U.S.C. 78f.

⁶ 15 U.S.C. 78f(b)(4).

⁷ 15 U.S.C. 78f(b)(8).

discount reflects the intense competition among exchanges and the cost of producing market data as further described below.

Notwithstanding its determination that the Commission may rely upon competition to establish fair and equitably allocated fees for market data, the *NetCoalition* [sic] court found that the Commission had not, in that case, compiled a record that adequately supported its conclusion that the market for the data at issue in the case was competitive. The Exchange believes that a record may readily be established to demonstrate the competitive nature of the market in question.

For the reasons discussed above, the Exchange believes that the Dodd-Frank Act amendments to Section 19 materially alter the scope of the Commission's review of future market data filings, by creating a presumption that all fees may take effect immediately, without prior analysis by the Commission of the competitive environment. Even in the absence of this important statutory change, however, the Exchange believes that a record may readily be established to demonstrate the competitive nature of the market in question.

There is intense competition between exchanges that provide transaction execution and routing services and proprietary data products. Transaction execution and proprietary data products are complementary in that market data is both an input and a byproduct of the execution service. In fact, market data and trade execution are a paradigmatic example of joint products with joint costs. The decision whether and on which exchange to post an order will depend on the attributes of the exchange where the order can be posted, including the execution fees, data quality and price and distribution of its data products. Without the prospect of a taking order seeing and reacting to a posted order on a particular exchange, the posting of the order would accomplish little. Without trade executions, exchange data products cannot exist. Data products are valuable to many end users only insofar as they provide information that end users expect will assist them or their customers in making trading decisions.

The costs of producing market data include not only the costs of the data distribution infrastructure, but also the costs of designing, maintaining, and operating the exchange's transaction execution platform and the cost of regulating the exchange to ensure its fair operation and maintain investor confidence. The total return that an exchange earns reflects the revenues it

receives from both products and the joint costs it incurs. Moreover, an exchange's customers view the costs of transaction executions and of data as a unified cost of doing business with the exchange. A broker-dealer will direct orders to a particular exchange only if the expected revenues from executing trades on the exchange exceed net transaction execution costs and the cost of data that the broker-dealer chooses to buy to support its trading decisions (or those of its customers). The choice of data products is, in turn, a product of the value of the products in making profitable trading decisions. If the cost of the product exceeds its expected value, the broker-dealer will choose not to buy it.

Moreover, as a broker-dealer chooses to direct fewer orders to a particular exchange, the value of the product to that broker-dealer decreases, for two reasons. First, the product will contain less information, because executions of the broker-dealer's orders will not be reflected in it. Second, and perhaps more important, the product will be less valuable to that broker-dealer because it does not provide information about the venue to which it is directing its orders. Data from the competing venue to which the broker-dealer is directing orders will become correspondingly more valuable. Thus, a super-competitive increase in the fees charged for either transactions or data has the potential to impair revenues from both products. "No one disputes that competition for order flow is 'fierce'."⁸ However, the existence of fierce competition for order flow implies a high degree of price sensitivity on the part of broker-dealers with order flow, since they may readily reduce costs by directing orders toward the lowest-cost trading venues. A broker-dealer that shifted its order flow from one platform to another in response to order execution price differentials would both reduce the value of that platform's market data and reduce its own need to consume data from the disfavored platform. Similarly, if a platform increases its market data fees, the change will affect the overall cost of doing business with the platform, and affected broker-dealers will assess whether they can lower their trading costs by directing orders elsewhere and thereby lessening the need for the more expensive data.

Analyzing the cost of market data distribution in isolation from the cost of all of the inputs supporting the creation of market data will inevitably underestimate the cost of the data. Thus,

because it is impossible to create data without a fast, technologically robust, and well-regulated execution system, system costs and regulatory costs affect the price of market data. It would be equally misleading, however, to attribute all of the exchange's costs to the market data portion of an exchange's joint product. Rather, all of the exchange's costs are incurred for the unified purposes of attracting order flow, executing and/or routing orders, and generating and selling data about market activity. The total return that an exchange earns reflects the revenues it receives from the joint products and the total costs of the joint products.

Competition among exchanges can be expected to constrain the aggregate return each exchange earns from the sale of its joint products, but different exchanges may choose from a range of possible, and equally reasonable, pricing strategies as the means of recovering total costs. For example, some exchanges may choose to pay rebates to attract orders, charge relatively low prices for market information (or provide information free of charge) and charge relatively high prices for accessing posted liquidity. Other exchanges may choose a strategy of paying lower rebates (or no rebates) to attract orders, setting relatively high prices for market information, and setting relatively low prices for accessing posted liquidity. In this environment, there is no economic basis for regulating maximum prices for one of the joint products in an industry in which suppliers face competitive constraints with regard to the joint offering.

The market for market data products is competitive and inherently contestable because there is fierce competition for the inputs necessary to the creation of proprietary data and strict pricing discipline for the proprietary products themselves. Numerous exchanges compete with each other for listings, trades, and market data itself, providing virtually limitless opportunities for entrepreneurs who wish to produce and distribute their own market data. This proprietary data is produced by each individual exchange.

Market data vendors provide another form of price discipline for proprietary data products because they control the primary means of access to end users. Vendors impose price restraints based upon their business models. For example, vendors such as Bloomberg and Reuters that assess a surcharge on data they sell may refuse to offer proprietary products that end users will not purchase in sufficient numbers.

⁸ *NetCoalition*, at 24.

Internet portals, such as Google, impose a discipline by providing only data that will enable them to attract “eyeballs” that contribute to their advertising revenue. Retail broker-dealers, such as Schwab and Fidelity, offer their customers proprietary data only if it promotes trading and generates sufficient commission revenue.

Although the business models may differ, these vendors’ pricing discipline is the same: they can simply refuse to purchase any proprietary data product that fails to provide sufficient value. The Exchange and other producers of proprietary data products must understand and respond to these varying business models and pricing disciplines in order to market proprietary data products successfully.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,⁹ and subparagraph (f)(2) of Rule 19b-4 thereunder,¹⁰ because it establishes a due, fee, or other charge imposed by ISE Gemini.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-ISEGemini-2015-26 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-ISEGemini-2015-26. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission’s Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-ISEGemini-2015-26, and should be submitted on or before December 18, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹¹

Robert W. Errett,
Deputy Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76501; File No. SR-ISE-2015-40]

Self-Regulatory Organizations; International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Schedule of Fees

November 20, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the “Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 6, 2015, the International Securities Exchange, LLC (the “Exchange” or “ISE”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change, as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

ISE proposes to amend the Schedule of Fees as described in more detail below. The text of the proposed rule change is available on the Exchange’s Internet Web site at <http://www.ise.com>, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The self-regulatory organization has prepared summaries, set forth in Sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Schedule of Fees to offer a one (1) month free trial of the

⁹ 15 U.S.C. 78s(b)(3)(A)(ii).

¹⁰ 17 CFR 240.19b-4(f)(2).

¹¹ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

ISE Open/Close Trade Profile End of Day market data offering to all members and non-members who have never before subscribed to the offering and to remove the discounts offered to subscribers of multiple market data feeds.

ISE Open/Close Trade Profile

ISE currently sells a market data offering comprised of the entire opening and closing trade data of ISE listed options of both customers and firms, referred to by the Exchange as the ISE Open/Close Trade Profile. The ISE Open/Close Trade Profile offering is subdivided by origin code (*i.e.*, customer or firm) and the customer data is then further subdivided by order size. The volume data is summarized by day and series (*i.e.*, symbol, expiration date, strike price, call or put). The ISE Open/Close Trade Profile enables subscribers to create their own proprietary put/call calculations. The data is compiled and formatted by ISE as an end of day file (“ISE Open/Close Trade Profile End of Day”). This market data offering is currently available to both members and non-members on an annual subscription basis. The current subscription rate for both members and non-members is \$750 per month with an annual subscription.

The Exchange now proposes to amend its Schedule of Fees to offer a one (1) month free trial of the ISE Open/Close Trade Profile End of Day market data offering to all members and non-members that have never before subscribed to the offering. This will give potential subscribers the ability to use and test the data offering before signing up for an annual subscription.

Multi-Fee Discount

The Exchange currently offers five real-time market data feed offerings.³ In order to encourage subscriptions to multiple market data feeds, ISE adopted a multi-product subscription discount, which offers a ten percent (10%) discount for subscribers who subscribe to two feeds and twenty percent (20%) discount for subscribers who subscribe to three feeds.⁴ The Exchange now proposes to remove the discounts for subscribers of multiple feeds.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with

the provisions of Section 6 of the Act,⁵ in general, and Section 6(b)(4) of the Act,⁶ in particular, in that it is designed to provide for the equitable allocation of reasonable dues, fees, and other charges among its members and other persons using its facilities.

In particular, the Exchange believes the proposed free trial is reasonable and equitable because it gives potential subscribers the ability to use and test the ISE Open/Close Trade Profile End of Day offering prior to committing to an annual subscription. Furthermore, the Exchange believes that the proposed free trial is not unfairly discriminatory because it is available to all similarly-situated market participants—members and non-members who have never subscribed to the market data offering. Similarly, the removal of the multi-product subscription discount is also reasonable and equitable because the ISE believes the discount is no longer necessary to encourage multiple subscriptions. Further, the Exchange believes that the proposed removal of the discount is not unfairly discriminatory because it applies to all members and non-members who are subscribers to the feeds.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act,⁷ the Exchange does not believe that the proposed rule change will impose any burden on intermarket or intramarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. First, the proposed free trial does not affect competition because it is designed to give potential subscribers the ability to use and test the ISE data offering prior to committing to an annual subscription. Next, the removal of the multi-product, market data discount reflects the intense competition among exchanges and the cost of producing market data as further described below.

Notwithstanding its determination that the Commission may rely upon competition to establish fair and equitably allocated fees for market data, the *NetCoalition* [sic] court found that the Commission had not, in that case, compiled a record that adequately supported its conclusion that the market for the data at issue in the case was competitive. The Exchange believes that a record may readily be established to demonstrate the competitive nature of the market in question.

For the reasons discussed above, the Exchange believes that the Dodd-Frank Act amendments to Section 19 materially alter the scope of the Commission's review of future market data filings, by creating a presumption that all fees may take effect immediately, without prior analysis by the Commission of the competitive environment. Even in the absence of this important statutory change, however, the Exchange believes that a record may readily be established to demonstrate the competitive nature of the market in question.

There is intense competition between exchanges that provide transaction execution and routing services and proprietary data products. Transaction execution and proprietary data products are complementary in that market data is both an input and a byproduct of the execution service. In fact, market data and trade execution are a paradigmatic example of joint products with joint costs. The decision whether and on which exchange to post an order will depend on the attributes of the exchange where the order can be posted, including the execution fees, data quality and price and distribution of its data products. Without the prospect of a taking order seeing and reacting to a posted order on a particular exchange, the posting of the order would accomplish little. Without trade executions, exchange data products cannot exist. Data products are valuable to many end users only insofar as they provide information that end users expect will assist them or their customers in making trading decisions.

The costs of producing market data include not only the costs of the data distribution infrastructure, but also the costs of designing, maintaining, and operating the exchange's transaction execution platform and the cost of regulating the exchange to ensure its fair operation and maintain investor confidence. The total return that an exchange earns reflects the revenues it receives from both products and the joint costs it incurs. Moreover, an exchange's customers view the costs of transaction executions and of data as a unified cost of doing business with the exchange. A broker-dealer will direct orders to a particular exchange only if the expected revenues from executing trades on the exchange exceed net transaction execution costs and the cost of data that the broker-dealer chooses to buy to support its trading decisions (or those of its customers). The choice of data products is, in turn, a product of the value of the products in making profitable trading decisions. If the cost of the product exceeds its expected

³ The market data feeds are: Real-time Depth of Market Raw Data Feed, ISE Order Feed, ISE Top Quote Feed, ISE Spread Feed, and ISE Implied Volatility and Greeks Feed.

⁵ 15 U.S.C. 78f.

⁶ 15 U.S.C. 78f(b)(4).

⁷ 15 U.S.C. 78f(b)(8).

value, the broker-dealer will choose not to buy it.

Moreover, as a broker-dealer chooses to direct fewer orders to a particular exchange, the value of the product to that broker-dealer decreases, for two reasons. First, the product will contain less information, because executions of the broker-dealer's orders will not be reflected in it. Second, and perhaps more important, the product will be less valuable to that broker-dealer because it does not provide information about the venue to which it is directing its orders. Data from the competing venue to which the broker-dealer is directing orders will become correspondingly more valuable. Thus, a super-competitive increase in the fees charged for either transactions or data has the potential to impair revenues from both products. "No one disputes that competition for order flow is 'fierce'."⁸ However, the existence of fierce competition for order flow implies a high degree of price sensitivity on the part of broker-dealers with order flow, since they may readily reduce costs by directing orders toward the lowest-cost trading venues. A broker-dealer that shifted its order flow from one platform to another in response to order execution price differentials would both reduce the value of that platform's market data and reduce its own need to consume data from the disfavored platform. Similarly, if a platform increases its market data fees, the change will affect the overall cost of doing business with the platform, and affected broker-dealers will assess whether they can lower their trading costs by directing orders elsewhere and thereby lessening the need for the more expensive data.

Analyzing the cost of market data distribution in isolation from the cost of all of the inputs supporting the creation of market data will inevitably underestimate the cost of the data. Thus, because it is impossible to create data without a fast, technologically robust, and well-regulated execution system, system costs and regulatory costs affect the price of market data. It would be equally misleading, however, to attribute all of the exchange's costs to the market data portion of an exchange's joint product. Rather, all of the exchange's costs are incurred for the unified purposes of attracting order flow, executing and/or routing orders, and generating and selling data about market activity. The total return that an exchange earns reflects the revenues it receives from the joint products and the total costs of the joint products.

Competition among exchanges can be expected to constrain the aggregate return each exchange earns from the sale of its joint products, but different exchanges may choose from a range of possible, and equally reasonable, pricing strategies as the means of recovering total costs. For example, some exchanges may choose to pay rebates to attract orders, charge relatively low prices for market information (or provide information free of charge) and charge relatively high prices for accessing posted liquidity. Other exchanges may choose a strategy of paying lower rebates (or no rebates) to attract orders, setting relatively high prices for market information, and setting relatively low prices for accessing posted liquidity. In this environment, there is no economic basis for regulating maximum prices for one of the joint products in an industry in which suppliers face competitive constraints with regard to the joint offering.

The market for market data products is competitive and inherently contestable because there is fierce competition for the inputs necessary to the creation of proprietary data and strict pricing discipline for the proprietary products themselves. Numerous exchanges compete with each other for listings, trades, and market data itself, providing virtually limitless opportunities for entrepreneurs who wish to produce and distribute their own market data. This proprietary data is produced by each individual exchange.

Market data vendors provide another form of price discipline for proprietary data products because they control the primary means of access to end users. Vendors impose price restraints based upon their business models. For example, vendors such as Bloomberg and Reuters that assess a surcharge on data they sell may refuse to offer proprietary products that end users will not purchase in sufficient numbers. Internet portals, such as Google, impose a discipline by providing only data that will enable them to attract "eyeballs" that contribute to their advertising revenue. Retail broker-dealers, such as Schwab and Fidelity, offer their customers proprietary data only if it promotes trading and generates sufficient commission revenue. Although the business models may differ, these vendors' pricing discipline is the same: they can simply refuse to purchase any proprietary data product that fails to provide sufficient value. The Exchange and other producers of proprietary data products must understand and respond to these

varying business models and pricing disciplines in order to market proprietary data products successfully.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act,⁹ and subparagraph (f)(2) of Rule 19b-4 thereunder,¹⁰ because it establishes a due, fee, or other charge imposed by ISE.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-ISE-2015-40 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-ISE-2015-40. This file number should be included on the subject line if email is used. To help the Commission process and review your

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76487; File No. SR-BX-2015-068]

Self-Regulatory Organizations; NASDAQ OMX BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Relating to BX PRISM

November 20, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 9, 2015, NASDAQ OMX BX, Inc. ("BX" or the "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been

prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend BX Rules at Chapter VI, Section 9, entitled "Price Improvement Auction ("PRISM")," to correct two cross-references to BX Rules. The text of the proposed rule change is available on the Exchange's Web site at <http://nasdaqomxbx.cchwallstreet.com>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend BX Rules at Chapter VI, Section 9, entitled "Price Improvement Auction ("PRISM")" to correct two cross-references to BX Rules. Specifically, the Exchange cited to its Size Pro-Rata allocation algorithm in the BX PRISM Rule at Chapter VI, Section 9(ii)(E). The cite was to Chapter VI, Section 10(1)(C)(1)(a) when it should have cited to Section 10(1)(C)(2). Further, the Exchange cited to its Price/Time allocation algorithm in the BX PRISM Rule at Chapter VI, Section 9(ii)(F). The cite was to Chapter VI, Section 10(1)(C)(2)(1) when it should have cited to Section 10(1)(C)(1). These clarifications to the BX PRISM rule will update the Rulebook and help avoid confusion for Participants. The proposed changes are non-substantive rule changes.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b)

of the Act³ in general, and furthers the objectives of Section 6(b)(5) of the Act⁴ in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest, by correcting citation errors within the BX Rulebook.

The Exchange's proposal to correct the citations will serve to avoid confusion as to the correct algorithm. The proposed changes are non-substantive rule changes.

B. Self-Regulatory Organization's Statement on Burden on Competition

BX does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed changes do not impose any burden on competition, rather, the non-substantive rule changes correct incorrect references within the Rulebook. As a result, there will be no substantive changes to the Exchange's operations or its rules.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The Exchange has filed the proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act⁵ and Rule 19b-4(f)(6) thereunder.⁶ Because the proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative prior to 30 days from the date on which it was filed, or such shorter time as the Commission may designate, if consistent with the protection of investors and the public interest, the proposed rule change has become effective pursuant to Section 19(b)(3)(A)

³ 15 U.S.C. 78f(b).

⁴ 15 U.S.C. 78f(b)(5).

⁵ 15 U.S.C. 78s(b)(3)(A)(iii).

⁶ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

¹¹ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

of the Act and Rule 19b-4(f)(6)(iii) thereunder.

The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Exchange has stated that updating the existing rule text to reflect the correct citations sooner, rather than later, will avoid confusion for Participants. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because this waiver will enable the Exchange to provide the correct citations to the applicable allocation rules for its PRISM rule in a timely manner, and thereby avoid confusion for the Exchange's Participants with respect to how PRISM executions would be allocated.⁷ For this reason, the Commission hereby waives the 30-day operative delay requirement and designates the proposed rule change as operative upon filing.⁸

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)⁹ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or

⁷ The Exchange stated in its proposal for the PRISM rule that it anticipated that it would deploy the PRISM mechanism within 45 days of Commission approval. See Securities Exchange Act Release No. 75827 (Sept. 30, 2015), 80 FR 54601 (Sept. 10, 2015) (notice for SR-BX-2015-032). The Commission approved the proposed PRISM rule on October 29, 2015. See Securities Exchange Act Release No. 76301, 80 FR 68347 (Nov. 4, 2015) (order approving SR-BX-2015-032).

⁸ For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

⁹ 15 U.S.C. 78s(b)(2)(B).

- Send an email to rule-comments@sec.gov. Please include File Number SR-BX-2015-068 on the subject line.

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-BX-2015-068. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal offices of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-BX-2015-068, and should be submitted on or before December 18, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁰

Robert W. Errett,
Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76495; File No. SR-BX-2014-048]

Self-Regulatory Organizations; NASDAQ OMX BX, Inc.; Order Granting an Extension To Limited Exemption From Rule 612(c) of Regulation NMS in Connection With the Exchange's Retail Price Improvement Program Until December 1, 2016

November 20, 2015.

On November 28, 2014, the Commission issued an order pursuant to its authority under Rule 612(c) of Regulation NMS¹ ("Sub-Penny Rule") that granted the NASDAQ OMX BX, Inc. ("BX" or "Exchange") a limited exemption from the Sub-Penny Rule in connection with the operation of the Exchange's Retail Price Improvement Program ("RPI Program").² The limited exemption was granted concurrently with the Commission's approval of the Exchange's proposal to adopt the RPI Program on a one-year pilot term. The Commission granted the exemption coterminous with the effectiveness of the RPI Program—both the RPI Program and the exemption are scheduled to expire on December 1, 2015.

The Exchange now seeks to extend the exemption until December 1, 2016.³ The Exchange's request was made in conjunction with an immediately effectively filing that extends the operation of the RPI Program until December 1, 2016.⁴ In its request to extend the exemption, the Exchange notes that given the gradual implementation of the RPI Program and the preliminary participation and results, extending the exemption would provide additional opportunities for greater participation and assessment of the results. Accordingly, the Exchange has asked additional time to allow it and the Commission to analyze data concerning the RPI Program, which the Exchange committed to provide to the Commission.⁵ For this reason and the reasons stated in the RPI Approval Order originally granting the limited exemption, the Commission, pursuant to its authority under Rule 612(c) of Regulation NMS, finds that pursuant to its authority under Rule 612(c) of

¹ 17 CFR 242.612(c).

² See Securities Exchange Act Release No. 73702, 79 FR 72049 (December 4, 2014) (SR-BX-2014-048) ("RPI Approval Order").

³ See Letter from Jeffrey S. Davis, Vice President & Deputy General Counsel, Exchange, to Brent J. Fields, Secretary, Commission, dated November 12, 2015.

⁴ See SR-BX-2015-073.

⁵ See RPI Approval Order, *supra* note 2.

¹⁰ 17 CFR 200.30-3(a)(12).

Regulation NMS, extending the exemption is appropriate in the public interest and consistent with the protection of investors.

Therefore, it is hereby ordered that, pursuant to Rule 612(c) of Regulation NMS, the Exchange is granted an extension of the limited exemption from Rule 612 of Regulation NMS that allows the Exchange to accept and rank orders priced equal to or greater than \$1.00 per share in increments of \$0.001, in connection with the operation of its RPI Program, until December 1, 2016.

The limited and temporary exemption extended by this Order is subject to modification or revocation if at any time the Commission determines that such action is necessary or appropriate in furtherance of the purposes of the Act. Responsibility for compliance with any applicable provisions of the Federal securities laws must rest with the persons relying on the exemption that are the subject of this Order.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶

Robert W. Errett,
Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-76488; File No. SR-C2-2015-032]

Self-Regulatory Organizations; C2 Options Exchange, Incorporated; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change Relating to the Technical Disconnect Mechanism

November 20, 2015.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 9, 2015, C2 Options Exchange, Incorporated (the "Exchange" or "C2") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

⁶ 17 CFR 200.30-3(a)(83).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 6.48 related to the Exchange's Technical Disconnect Mechanism. The text of the proposed rule change is provided below. (additions are italicized; deletions are [bracketed])

C2 Options Exchange, Incorporated

Rules

* * * * *

Rule 6.48. Technical Disconnect

(a) When a CBOE Application Server ("CAS") loses communication with a Client Application such that a CAS does not receive an appropriate response to a Heartbeat Request within "x" period of time, the Technical Disconnect Mechanism will automatically logoff the Permit Holder's affected Client Application and [, if applicable, will] automatically cancel all the Permit Holder's Market-Maker quotes, *if applicable, and open orders with a time-in-force of "day" ("day orders")*, if the Permit Holder enables that optional service, posted through the affected Client Application. The following describes how the Technical Disconnect Mechanism works for each of the Exchange's application programming interfaces ("APIs"):

(i) *CBOE Market Interface 2.0 ("CMi 2") API*. A CAS shall generate a Heartbeat Request to a Client Application (i) after the CAS does not receive any messages from a particular Client Application for "n" period of time or (ii) after every "n" period of time. A Permit Holder shall determine the value of "n." In no event shall "n" be less than three (3) seconds or exceed twenty (20) seconds. If a CAS generates a Heartbeat Request only after it does not receive any messages from a particular Client Application for "n" period of time, the value of "x" shall be set at a half (.5) second. If a CAS generates a Heartbeat Request every "n" period of time, the value of "x" shall be equal to the value of "n."

(ii) *Financial Information eXchange ("FIX") Protocol API*. A CAS shall generate a Heartbeat Message to a Client Application after the CAS does not receive any messages from a particular Client Application for "n" period of time. If the CAS does not receive a response to the Heartbeat Message from the Client Application for "n" period of time, the CAS shall generate a Heartbeat Request to the Client Application. A Permit Holder shall determine the value of "n" at logon. In no event shall "n"

be less than five (5) seconds. The value of "x" shall be equal to the value of "n."

(b) The Technical Disconnect Mechanism is enabled for all Permit Holders and may not be disabled by Permit Holders, *except the automatic cancellation of a Permit Holder's day orders is an optional service that the Permit Holder may enable or disable through the API.*

(c) The trigger of the Technical Disconnect Mechanism is event- and Client Application- specific. The automatic cancellation of a Market-Maker's quotes (*if applicable*) or a Permit Holder's day orders (*if enabled by the Permit Holder*) entered into a CAS via a particular Client Application will neither impact nor determine the treatment of the quotes of the same or other Market-Makers or orders of the same Permit Holder entered into the CAS via a separate and distinct Client Application. *Except for day orders the Technical Disconnect Mechanism automatically cancels if a Permit Holder enables that optional service*, [T]the Technical Disconnect Mechanism will not impact or determine the treatment of orders a Permit Holder previously entered into the CAS.

. . . Interpretations and Policies:

.01 No change.

* * * * *

The text of the proposed rule change is also available on the Exchange's Web site (<http://www.c2exchange.com/Legal/>), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 6.48 related to the Exchange's Technical Disconnect Mechanism. Rule 6.48(a) provides that when a CBOE

Application Server (“CAS”)³ loses communication with a Client Application⁴ such that a CAS does not receive an appropriate response to a Heartbeat Request⁵ within “x” period of time, the Technical Disconnect Mechanism will automatically logoff the Permit Holder’s affected Client Application. If that occurs, the current rule provides that the Technical Disconnect Mechanism, if applicable, will automatically cancel all the Permit Holder’s Market-Maker quotes posted through the affected Client Application.⁶ The Technical Disconnect Mechanism is intended to help mitigate the potential risks associated with a loss of communication with a Client Application, such as erroneous or unintended executions for stale quotes that are resting in the C2 book. This mechanism serves to assist a Permit Holder when a technical or system issue occurs, as well as assist the Exchange in maintaining a fair and orderly market.

The proposed rule change provides Permit Holders with an optional service that, if enabled by a Permit Holder, will cause the Technical Disconnect Mechanism to also automatically cancel all the Permit Holder’s open orders with a time-in-force of “day” (“day orders”) posted through the affected Client Application if the CAS loses communication with the Client Application. The proposed rule change amends Rule 6.48(b) to provide that the Permit Holder may enable or disable this optional service through its application programming interface (“API”) (all other aspects of the Technical Disconnect Mechanism continue to otherwise be enabled for all Permit Holders and may not be disabled

³ C2 currently has numerous CASs serving Permit Holders.

⁴ For relevant purposes, a “Client Application” is the system component, such as a C2-supported workstation or a Permit Holder’s custom trading application, through which a Permit Holder communicates its quotes and/or orders to a CAS. Messages are passed between a Client Application and a CAS. A Market-Maker may send quotes to the Exchange from one or more Client Applications, and a Permit Holder may send orders to the Exchange from one or more Client Applications.

⁵ A “Heartbeat Request” refers to a message from a CAS to a Client Application to check connectivity and which requires a response from the Client Application in order to avoid logoff. The Heartbeat Request acts as a virtual pulse between a CAS and a Client Application and allows a CAS to continually monitor its connection with a Client Application. Failure to receive a response to a Heartbeat Request within the Heartbeat Response Time is indicative of a technical or system issue.

⁶ See Rule 6.48 and Securities Exchange Act Release No. 34-70112 (August 5, 2013), 78 FR 48738 (August 9, 2013) (SR-C2-2013-029) for further information regarding the Technical Disconnect Mechanism.

by Permit Holders).⁷ The proposed rule change makes corresponding changes to Rule 6.48(c) that indicate the Technical Disconnect Mechanism will automatically cancel a Permit Holder’s day orders (in addition to a Market-Maker’s quotes), if the Permit Holder enables the proposed optional service.⁸ As is the case in the event the Technical Disconnect Mechanism automatically logs a Permit Holder off and cancels its Market-Maker quotes (if applicable), if a Permit Holder enables this proposed optional service, and the Technical Disconnect Mechanism automatically logs a Permit Holder off and cancels the Permit Holder’s day orders due to lost communication with Permit Holder’s Client Application, the Permit Holder may send messages to the CAS to enter new orders once it reestablishes connectivity to the Client Application. In addition, any nonconnectivity will continue to be event- and Client Application-specific. In other words, any cancellation of day orders entered into a CAS via a particular Client Application will neither impact nor determine the treatment of the quotes of the same Permit Holder entered into a CAS via a separate and distinct Client Application. The Technical Disconnect Mechanism will not impact or determine the treatment of orders previously entered into a CAS if the Permit Holder does not enable this optional service, nor will it impact or determine the treatment of non-day orders previously entered into a CAS by the Permit Holder. The Exchange notes use of this service will be voluntary and within the sole discretion of each Permit Holder.

The proposed optional service is an additional preventative risk control measure that C2 is making available to Permit Holders. It is intended to help further mitigate the potential risks associated with a loss of communication with a Client Application. While orders may be static in nature and rest in the book, Permit Holders often enter day orders more frequently in response to then-current market conditions. Therefore, if a Permit Holder’s Client Application is disconnected for any period of time, it is possible that market conditions upon which it based its day orders may change during that time and make those orders stale. Consequently,

⁷ C2 currently makes available two APIs: CBOE Market Interface 2.0 (“CMI 2”) and Financial Information eXchange Protocol (“FIX”).

⁸ In addition, the proposed rule change makes nonsubstantive changes to Rule 6.48 including moving the phrase “if applicable” to ensure that phrase clearly applies to the cancellation of a Market-Maker’s quotes (as that functionality only applies to Permit Holders that are Market-Makers).

any resulting executions of those orders may be erroneous or unintended. The Exchange believes it is appropriate to limit this optional service to day orders and exclude good-til-cancelled orders,⁹ as those orders are intended to rest in the book for a period of time and thus have lower risk of erroneous or unintended executions during and after the Technical Disconnect Mechanism logs off a Permit Holder.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Act and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.¹⁰ Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹¹ requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)¹² requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the proposed rule change helps maintain a fair and orderly market and protects investors and the public interest. The Technical Disconnect Mechanism is a valuable tool that is designed to help maintain a fair and orderly market. The Exchange believes that providing Permit Holders with the option to have the Technical Disconnect Mechanism cancel its day orders, in addition to Market-Maker quotes (if applicable), further mitigates the potential risks associated with a loss in communication with a Client Application. The Exchange believes it is reasonable to offer to cancel only day orders. Unlike non-day orders, day orders are more likely to be reflective of then-current market conditions and are intended to rest in the book for a limited period of time. As a result, in the event

⁹ Currently, the Exchange offers two time-in-force order types: day and good-til-cancelled. The proposed optional service will apply to orders that include the “day” marking.

¹⁰ 15 U.S.C. 78f(b).

¹¹ 15 U.S.C. 78f(b)(5).

¹² *Id.*

that a CAS loses connectivity with a Client Application, execution of day orders during that time are more likely to result in erroneous or unintended executions, while risk of such executions is lower for non-day orders. The proposed optional service protects Permit Holders from these potential erroneous or unintended executions, as well as protects investors and the efficiency and fairness of the markets in general. The Exchange believes this functionality enhances the overall market quality for options traded on C2. The Exchange notes that other exchanges offer their members similar services that cancels a member's orders if it disconnects from the exchange.¹³

The Exchange also believes that the proposed rule change is designed to not permit unfair discrimination among market participants. Use of the optional service will be voluntary and within the sole discretion of each Permit Holder. The proposed optional service is available to all Permit Holders and will apply to the same order types of all Permit Holders.

B. Self-Regulatory Organization's Statement on Burden on Competition

C2 does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Specifically, the Exchange does not believe the proposed rule change will cause any burden on intramarket competition because the optional service will be available to all Permit Holders. Use of this optional service will be within the sole discretion of each Permit Holder. The proposed rule change will have no impact on Permit Holders that do not enable the proposed optional service. For Permit Holders that elect to enable the proposed optional service, the only impact on those Permit Holders will be cancellation of day orders (in addition to Market-Maker quotes) upon loss of connectivity. The Technical Disconnect Mechanism will otherwise continue to function in the same manner as it does today. Further, the Exchange does not

¹³ See, e.g., BZX Exchange US Equities FIX Specification, Version 1.33.5 (October 8, 2014), available at http://www.batstrading.com/resources/membership/BATS_FIX_Specification.pdf (see Section 5.1 for description of automatic cancel on disconnection or malfunction); MIAX Options Market Protections Handout (March 2015), available at https://www.miaxoptions.com/sites/default/files/MIAX_Market_Protections_March_2015.pdf (see page 5 for description of auto cancel on disconnect order protection); and NYSE UTPDirect (CGC Binary) API Specification, V1.4 (February 26, 2015), available at https://www.nyse.com/publicdocs/nyse/markets/nyse/NYSEUTPDirect_Specification.pdf (see Section 3.8 for description of cancel on disconnect service).

believe that such change will impose any burden on intermarket competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change modifies a mechanism available on C2's system and applies only to orders entered on C2. The Exchange notes that, should the proposed change make C2 a more attractive place for trading, market participants trading on other exchanges are welcome to become Permit Holders and trade at C2 if they determine that this proposed change has made C2 more attractive or favorable. Additionally, as discussed above, other options exchanges offer their members similar functionality.¹⁴

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁵ and paragraph (f) of Rule 19b-4¹⁶ thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-C2-2015-032 on the subject line.

¹⁶ 17 CFR 240.19b-4(f).

Paper Comments

- Send paper comments in triplicate to Brent J. Fields, Secretary, Securities and Exchange Commission, 100 F Street NE., Washington, DC 20549-1090. All submissions should refer to File Number SR-C2-2015-032. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street NE., Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-C2-2015-032 and should be submitted on or before December 18, 2015.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁷

personal information provided. Please see the Privacy Act heading below for further information.

Docket: For access to the docket to read background documents or comments, go to <http://www.regulations.gov> at any time or Room W12-140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Federal Docket Management System (FDMS) is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL-14 FDMS), which can be reviewed at www.dot.gov/privacy.

FOR FURTHER INFORMATION CONTACT: Christine A. Hydock, Chief, Medical Programs Division, (202) 366-4001, fmcamedical@dot.gov, FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64-113, Washington, DC 20590-0001. Office hours are 8:30 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may grant an exemption from the Federal Motor Carrier Safety Regulations for a 2-year period if it finds "such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption." The statute also allows the Agency to renew exemptions at the end of the 2-year period. The 44 individuals listed in this notice have recently requested such an exemption from the diabetes prohibition in 49 CFR 391.41(b) (3), which applies to drivers of CMVs in interstate commerce. Accordingly, the Agency will evaluate the qualifications of each applicant to determine whether granting the exemption will achieve the required level of safety mandated by statute.

II. Qualifications of Applicants

Michael E. Adrieansen

Mr. Adrieansen, 34, has had ITDM since 2007. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Adrieansen understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Adrieansen meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Illinois.

David A. August

Mr. August, 58, has had ITDM since 2005. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. August understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. August meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Colorado.

Samuel M. Balis

Mr. Balis, 73, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Balis understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Balis meets the requirements of the vision standard at 49 CFR

391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Pennsylvania.

Dwight J. Banks

Mr. Banks, 66, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Banks understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Banks meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Illinois.

David R. Bauman, III

Mr. Bauman, 43, has had ITDM since 2010. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Bauman understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Bauman meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a chauffeur's license from Michigan.

George E. Britt

Mr. Britt, 43, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Britt understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV

safely. Mr. Britt meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Pennsylvania.

Cris A. Brown

Mr. Brown, 54, has had ITDM since 2005. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Brown understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Brown meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Michigan.

Dustin D. Brown

Mr. Brown, 34, has had ITDM since 1983. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Brown understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Brown meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds an operator's license from Wisconsin.

Thomas W. Camp

Mr. Camp, 58, has had ITDM since 1993. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Camp understands diabetes management and monitoring,

has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Camp meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Virginia.

Nathan G. Carnes

Mr. Carnes, 37, has had ITDM since 2000. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Carnes understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Carnes meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Oregon.

Vincenzo A. Cortese

Mr. Cortese, 57, has had ITDM since 2000. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Cortese understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Cortese meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable proliferative diabetic retinopathy. He holds a Class B CDL from Connecticut.

Vernon L. Davidson

Mr. Davidson, 66, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in

the last 5 years. His endocrinologist certifies that Mr. Davidson understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Davidson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Nebraska.

Damiano DiFlorio

Mr. DiFlorio, 66, has had ITDM since 2002. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. DiFlorio understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. DiFlorio meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from New Jersey.

Matthew D. Fox

Mr. Fox, 29, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Fox understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Fox meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Indiana.

Sammy N. Fox

Mr. Fox, 69, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the

past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Fox understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Fox meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Pennsylvania.

Chadwick E. Gainey

Mr. Gainey, 49, has had ITDM since 2010. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Gainey understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Gainey meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Florida.

Jamal A. George

Mr. George, 36, has had ITDM since 2005. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. George understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. George meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Ohio.

John M. Halm

Mr. Halm, 55, has had ITDM since 2006. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the

past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Halm understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Halm meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Washington.

William R. Hardy

Mr. Hardy, 59, has had ITDM since 2004. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Hardy understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hardy meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a chauffeur's license from Michigan.

Craig A. Hendrickson

Mr. Hendrickson, 46, has had ITDM since 2007. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Hendrickson understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hendrickson meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Illinois.

William D. Hoopes

Mr. Hoopes, 53, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the

assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Hoopes understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Hoopes meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Ohio.

Jeffrey L. Jones

Mr. Jones, 44, has had ITDM since 2010. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Jones understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Jones meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Arkansas.

Brent S. LaBree, II

Mr. LaBree, 40, has had ITDM since 2007. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. LaBree understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. LaBree meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class B CDL from Vermont.

Michael C. Landers

Mr. Landers, 54, has had ITDM since 2005. His endocrinologist examined him in 2015 and certified that he has had no

severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Landers understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Landers meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Massachusetts.

Duane F. Light

Mr. Light, 63, has had ITDM since 2011. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Light understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Light meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Connecticut.

Darold W. Mahlstedt

Mr. Mahlstedt, 68, has had ITDM since 2010. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Mahlstedt understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Mahlstedt meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Iowa.

Robert L. McConnell

Mr. McConnell, 59, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. McConnell understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. McConnell meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class B CDL from Pennsylvania.

Mark R.S. McMillan

Mr. McMillan, 59, has had ITDM since 2013. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. McMillan understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. McMillan meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from New York.

Keith R. Miller

Mr. Miller, 60, has had ITDM since 2013. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Miller understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Miller meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His

ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from West Virginia.

Randall T. Mitchell

Mr. Mitchell, 50, has had ITDM since 2012. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Mitchell understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Mitchell meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Alabama.

Ernest Nez, Sr.

Mr. Nez, 56, has had ITDM since 2013. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Nez understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Nez meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Arizona.

Shawn P. O'Malley

Mr. O'Malley, 45, has had ITDM since 2015. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. O'Malley understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. O'Malley meets the

requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Washington.

Felipe N. Perez

Mr. Perez, 26, has had ITDM since 2007. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Perez understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Perez meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Florida.

Kenneth W. Phillips

Mr. Phillips, 66, has had ITDM since 2010. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Phillips understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Phillips meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Indiana.

Tony L. Prouty

Mr. Prouty, 32, has had ITDM since 1986. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Prouty understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV

safely. Mr. Prouty meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Iowa.

Jim T. Repass

Mr. Repass, 56, has had ITDM since 1985. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Repass understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Repass meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Indiana.

Jakob K. Siler

Mr. Siler, 28, has had ITDM since 1995. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Siler understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Siler meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Oklahoma.

Darren G. Steil

Mr. Steil, 46, has had ITDM since 1986. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Steil understands diabetes management and monitoring,

has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Steil meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds a Class A CDL from Iowa.

Steven P. Stokke

Mr. Stokke, 53, has had ITDM since 2009. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Stokke understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Stokke meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he has stable nonproliferative diabetic retinopathy. He holds a class A CDL from Wisconsin.

Richard E. Wagner

Mr. Wagner, 74, has had ITDM since 2014. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Wagner understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Wagner meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class A CDL from Minnesota.

Harold W. Welch

Mr. Welch, 76, has had ITDM since 1998. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in

the last 5 years. His endocrinologist certifies that Mr. Welch understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Welch meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Nebraska.

John F. Wesoloski, Jr.

Mr. Wesoloski, 57, has had ITDM since 2013. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Wesoloski understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Wesoloski meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds a Class C CDL from North Dakota.

Levon Wright, Sr.

Mr. Wright, 65, has had ITDM since 2012. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Wright understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Wright meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His optometrist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Florida.

Tadeusz S. Wrzesinski

Mr. Wrzesinski, 60, has had ITDM since 2000. His endocrinologist examined him in 2015 and certified that he has had no severe hypoglycemic reactions resulting in loss of consciousness, requiring the assistance of another person, or resulting in

impaired cognitive function that occurred without warning in the past 12 months and no recurrent (2 or more) severe hypoglycemic episodes in the last 5 years. His endocrinologist certifies that Mr. Wrzesinski understands diabetes management and monitoring, has stable control of his diabetes using insulin, and is able to drive a CMV safely. Mr. Wrzesinski meets the requirements of the vision standard at 49 CFR 391.41(b)(10). His ophthalmologist examined him in 2015 and certified that he does not have diabetic retinopathy. He holds an operator's license from Pennsylvania.

III. Request for Comments

In accordance with 49 U.S.C. 31136(e) and 31315, FMCSA requests public comment from all interested persons on the exemption petitions described in this notice. We will consider all comments received before the close of business on the closing date indicated in the date section of the notice.

FMCSA notes that section 4129 of the Safe, Accountable, Flexible and Efficient Transportation Equity Act: A Legacy for Users requires the Secretary to revise its diabetes exemption program established on September 3, 2003 (68 FR 52441).¹ The revision must provide for individual assessment of drivers with diabetes mellitus, and be consistent with the criteria described in section 4018 of the Transportation Equity Act for the 21st Century (49 U.S.C. 31305).

Section 4129 requires: (1) Elimination of the requirement for 3 years of experience operating CMVs while being treated with insulin; and (2) establishment of a specified minimum period of insulin use to demonstrate stable control of diabetes before being allowed to operate a CMV.

In response to section 4129, FMCSA made immediate revisions to the diabetes exemption program established by the September 3, 2003 notice. FMCSA discontinued use of the 3-year driving experience and fulfilled the requirements of section 4129 while continuing to ensure that operation of CMVs by drivers with ITDM will achieve the requisite level of safety required of all exemptions granted under 49 U.S.C. 31136 (e).

Section 4129(d) also directed FMCSA to ensure that drivers of CMVs with ITDM are not held to a higher standard than other drivers, with the exception of limited operating, monitoring and

¹ Section 4129(a) refers to the 2003 notice as a "final rule." However, the 2003 notice did not issue a "final rule" but did establish the procedures and standards for issuing exemptions for drivers with ITDM.

medical requirements that are deemed medically necessary.

The FMCSA concluded that all of the operating, monitoring and medical requirements set out in the September 3, 2003 notice, except as modified, were in compliance with section 4129(d). Therefore, all of the requirements set out in the September 3, 2003 notice, except as modified by the notice in the **Federal Register** on November 8, 2005 (70 FR 67777), remain in effect.

IV. Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to <http://www.regulations.gov> and in the search box insert the docket number FMCSA-2015-0337 and click the search button. When the new screen appears, click on the blue "Comment Now!" button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and material received during the comment period and may change this proposed rule based on your comments. FMCSA may issue a final rule at any time after the close of the comment period.

V. Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble, To submit your comment online, go to <http://www.regulations.gov> and in the search box insert the docket number FMCSA-2015-0337 and click "Search." Next, click "Open Docket Folder" and you will find all documents and comments related to the proposed rulemaking.

Issued on: November 16, 2015.

Larry W. Minor,

Associate Administrator for Policy.

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2007-29035; FMCSA-2008-0293; FMCSA-2009-0242; FMCSA-2011-0277; FMCSA-2011-0278; FMCSA-2013-0184; FMCSA-2013-0187; FMCSA-2013-0190]

Qualification of Drivers; Exemption Applications; Diabetes

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of renewal of exemptions; request for comments.

SUMMARY: FMCSA announces its decision to renew the exemptions of 133 individuals from its rule prohibiting persons with insulin-treated diabetes mellitus (ITDM) from operating commercial motor vehicles (CMVs) in interstate commerce. FMCSA has statutory authority to exempt individuals from this rule if the exemptions granted will not compromise safety. The Agency has concluded that granting these exemption renewals will provide a level of safety that is equivalent to or greater than the level of safety maintained without the exemptions for these CMV drivers.

DATES: Each group of renewed exemptions are effective from the dates stated in the discussions below. Comments must be received on or before December 28, 2015.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) numbers: Docket No. FMCSA-2007-29035; FMCSA-2008-0293; FMCSA-2009-0242; FMCSA-2011-0277; FMCSA-2011-0278; FMCSA-2013-0184; FMCSA-2013-0187; FMCSA-2013-0190, using any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12-140, Washington, DC 20590-0001.
- *Hand Delivery or Courier:* West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.
- *Fax:* 1-202-493-2251.

Instructions: Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received

without change to <http://www.regulations.gov>, including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments, go to <http://www.regulations.gov> at any time or Room W12-140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The Federal Docket Management System (FDMS) is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: Anyone may search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or of the person signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's Privacy Act Statement for the Federal Docket Management System (FDMS) published in the **Federal Register** on January 17, 2008 (73 FR 3316).

FOR FURTHER INFORMATION CONTACT: Christine A. Hydock, Chief, Medical Programs Division, 202-366-4001, fmcsamedical@dot.gov, FMCSA, Department of Transportation, 1200 New Jersey Avenue SE., Room W64-113, Washington, DC 20590-0001. Office hours are from 8 a.m. to 5:30 p.m. Monday through Friday, except Federal holidays.

SUPPLEMENTARY INFORMATION:

Background

Under 49 U.S.C. 31136(e) and 31315, FMCSA may renew an exemption from the Federal Motor Carrier Safety Regulations 2-year period if it finds "such exemption would likely achieve a level of safety that is equivalent to or greater than the level that would be achieved absent such exemption." The statute also allows the Agency to renew exemptions at the end of the 2-year period. The 133 individuals listed in this notice have recently become eligible for a renewed exemption from the diabetes prohibition in 49 CFR 391.41(b)(3), which applies to drivers of CMVs in interstate commerce. The drivers remain in good standing with the Agency, have maintained their required medical monitoring and have not exhibited any medical issues that

would compromise their ability to safely operate a CMV during the previous 2-year exemption period.

Exemption Decision

This notice addresses 133 individuals who have requested renewal of their exemptions in accordance with FMCSA procedures. These 133 drivers remain in good standing with the Agency, have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period. Therefore, FMCSA has decided to extend each exemption for a renewable two-year period. Each individual is identified according to the renewal date.

The exemptions are renewed subject to the following conditions: (1) That each individual submit a quarterly monitoring checklist completed by the treating endocrinologist as well as an annual checklist with a comprehensive medical evaluation; (2) that each individual reports within 2 business days of occurrence, all episodes of severe hypoglycemia, significant complications, or inability to manage diabetes; also, any involvement in an accident or any other adverse event in a CMV or personal vehicle, whether or not it is related to an episode of hypoglycemia; (3) that each individual submit an annual ophthalmologist's or optometrist's report; and (4) that each individual provide a copy of the annual medical certification to the employer for retention in the driver's qualification file, or keep a copy in his/her driver's qualification file if he/she is self-employed. The driver must also have a copy of the certification when driving, for presentation to a duly authorized Federal, State, or local enforcement official.

Basis for Renewing Exemptions

Under 49 U.S.C. 31315(b)(1), an exemption may be granted for no longer than two years from its approval date and may be renewed upon application for additional two year periods. The following groups of drivers received renewed exemptions in the month of December and are discussed below.

As of December 1, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 10 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (74 FR 48338; 74 FR 62883):

Charles E. Boyd (NE)
Warren B. Copple, Jr. (MI)
Hernan Hernandez (CT)

Jeffrey E. Kiehl (MI)
Jesus G. Maesse (TX)
Jackson R. Olive (NY)
Thomas N. Pico (PA)
Paul Ramirez (OK)
Jon C. Thomas (MT)
Dennis M. Thyfault (UT)

The drivers were included in Docket No. FMCSA-2009-0242. Their exemptions are effective as of December 1, 2015 and will expire on December 1, 2017.

As of December 10, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 7 individuals, have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (73 FR 63042; 73 FR 75163):

Herschel J. Crawford (AK)
James E. Gaines (NJ)
Allan D. Gralapp (IA)
Scott L. Halm (OH)
Jason P. Smith (GA)
Dean A. Sullivan (KY)
Lawrence W. Thomas (AR)

The drivers were included in Docket No. FMCSA-2008-0293. Their exemptions are effective as of December 10, 2015 and will expire on December 10, 2017.

As of December 17, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 60 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (78 FR 63298; 78 FR 76397):

James L. Barnes (GA)
Toni Benfield (SC)
Peter J. Benz (FL)
Robert J. Berger, III (PA)
Daniel A. Bryan (PA)
Travis D. Clarkston (IN)
Romero Coleman (WI)
Michael L. Collins (WA)
Thomas S. Crawford (NY)
Stephen A. Cronin (FL)
Steven M. Dent (IA)
John S. Duvall (PA)
Robert S. Engel (IN)
Steven M. Ference (CT)
David W. Foster (TN)
Francis M. Garlach III (PA)
Allen D. Goddard (MO)
Brian L. Gregory (IL)
Alfonso Grijalva (CA)
Jason E. Jacobus (KY)
Bobby H. Johnson (GA)
Isadore Johnson Jr. (NY)
Jerry D. Joseph (OH)
Neal S. Kassebaum (TN)
Ervin A. Klocko, Jr.
Kevin E. Kneff (MO)

John D. May (KS)

Kenneth B. Maynard, Jr. (NH)
Mike C. McDowell (TX)
Charles B. McKay (FL)
Norman C. Mertz (PA)
Travis F. Moon (GA)
Ronald Mooney (ID)
Martin J. Mostyn (OH)
Floyd P. Murray, Jr. (UT)
Steven D. Nowakowski (MD)
Gary D. Peters (NE)
Mark A. Pille (IA)
Stephen Plesz (CT)
Glen E. Pozernick (ID)
Jody R. Prause (MI)
Walter A. Przewrocki, Jr. (PA)
Andrew Quaglia (NY)
Stanley A. Sabin (KY)
Joseph F. Schafer, Jr. (PA)
Francis J. Schultz (PA)
Gary A. Sjkovist (ND)
Gary L. Snelling (AL)
Charles W. Sterling (WA)
Thomas L. Stoudnour (PA)
Matthew S. Thompson (PA)
Robin S. Travis (CO)
Richard A. Treadwell (PA)
James R. Troutman (PA)
William R. Van Gog (WA)
Charles S. Watson (IL)
William E. Wyant III (IA)
Mark A. Yurian (MT)
David M. Zanicky (PA)

The drivers were included in Docket No. FMCSA-2013-0187. Their exemptions are effective as of December 17, 2015 and will expire on December 17, 2017.

As of December 19, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 27 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (72 FR 62514; 72 FR 71996; 76 FR 64165; 76 FR 78718):

Robin R. Baumgartner (WI)
Joseph K. Beasley (GA)
Toni A. Brown (AR)
Glenn W. Burke (NY)
David P. Charest (FL)
Charles Demesmin (NJ)
Derek E. Dowling (PA)
Donald E. Dupke, Jr. (IN)
Frederick E. Dyer (MA)
Donald N. Ellis (IN)
Tim E. Holmberg (WI)
Russell D. Jordan (ND)
Warren D. Knabe (NE)
Jackie L. Lane (TX)
Dennis L. Lorenz (IN)
Robert J. Malone (NJ)
Clayton A. Powers (CA)
Dennis R. Scheel (SD)
Michael K. Schulist (MI)
Andrew P. Shirk (MS)
Jerry L. Smit (MN)
Reese L. Sullivan (TX)

Randy J. Voss (IL)
Robert M. Walker (PA)
Robert E. Weiss (MI)
Robert A. Wild (OR)
Randy L. Wyant (OR)

The drivers were included in Docket No. FMCSA–2007–29035; FMCSA–2011–0277. Their exemptions are effective as of December 19, 2015 and will expire on December 19, 2017.

As of December 22, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 11 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (76 FR 66120; 76 FR 79759):

Lennie D. Cook (OH)
David R. Cornelius (IL)
Scott A. Edwards (PA)
Ronald J. Ezell (MO)
Marcus M. Gagne (ME)
David P. Govero (MO)
Christopher A. Jones (WY)
Donald R. McClure, Jr. (PA)
Clyde G. Rishel, Jr. (PA)
Kurt Schneider (VT)
Douglas O. Sundby (ND)

The drivers were included in Docket No. FMCSA–2011–0278. Their exemptions are effective as of December 22, 2015 and will expire on December 22, 2017.

As of December 24, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following 17 individuals have satisfied the renewal conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce. (78 FR 64267; 78 FR 77784):

John D. Clark (NJ)
David S. Monroe (KS)
William I. Harbolt (MT)
Mark G. Kahler (TX)
Larry W. Hines (NM)
Their L. Coleman (VA)
Michael W. McCrary (GA)
Jerry D. Zimmerman (ND)
James S. Tracy (ID)
John Baltich (PA)
Donald A. Spivey (TN)
Thomas B. Quirk (CT)
Steven M. Oliver (AZ)
Sean T. McMahan (WI)
David G. Shultz (PA)
Ryan L. Harrier (MI)
John E. Parker (KS)

The drivers were included in Docket No. FMCSA–2013–0184. Their exemptions are effective as of December 24, 2015 and will expire on December 24, 2017.

As of December 31, 2015, and in accordance with 49 U.S.C. 31136(e) and 31315, the following individual, Gary L. Crawford (OH), has satisfied the renewal

conditions for obtaining an exemption from the rule prohibiting drivers with ITDM from driving CMVs in interstate commerce (78 FR 65034; 79 FR 3917).

The driver was included in Docket No. FMCSA–2013–0190. The exemption is effective as of December 31, 2015 and will expire on December 31, 2017.

Each of the 133 drivers in the aforementioned groups qualifies for a renewal of the exemption. They have maintained their required medical monitoring and have not exhibited any medical issues that would compromise their ability to safely operate a CMV during the previous 2-year exemption period.

These factors provide an adequate basis for predicting each driver's ability to continue to drive safely in interstate commerce. Therefore, FMCSA concludes that extending the exemption for each of the 133 drivers for a period of two years is likely to achieve a level of safety equal to that existing without the exemption. The drivers were included in docket numbers FMCSA–2007–29035; FMCSA–2008–0293; FMCSA–2009–0242; FMCSA–2011–0277; FMCSA–2011–0278; FMCSA–2013–0184; FMCSA–2013–0187; FMCSA–2013–0190.

Request for Comments

FMCSA will review comments received at any time concerning a particular driver's safety record and determine if the continuation of the exemption is consistent with the requirements at 49 U.S.C. 31136(e) and 31315. However, FMCSA requests that interested parties with specific data concerning the safety records of these drivers submit comments by December 28, 2015.

FMCSA believes that the requirements for a renewal of an exemption under 49 U.S.C. 31136(e) and 31315 can be satisfied by initially granting the renewal and then requesting and evaluating, if needed, subsequent comments submitted by interested parties. As indicated above, the Agency previously published notices of final disposition announcing its decision to exempt these 133 individuals from rule prohibiting persons with ITDM from operating CMVs in interstate commerce in 49 CFR 391.41(b)(3). The final decision to grant an exemption to each of these individuals was made on the merits of each case and made only after careful consideration of the comments received to its notices of applications. The notices of applications stated in detail the medical condition of each applicant for an exemption from rule prohibiting persons with ITDM from operating

CMVs in interstate commerce. That information is available by consulting the above cited **Federal Register** publications.

Interested parties or organizations possessing information that would otherwise show that any, or all, of these drivers are not currently achieving the statutory level of safety should immediately notify FMCSA. The Agency will evaluate any adverse evidence submitted and, if safety is being compromised or if continuation of the exemption would not be consistent with the goals and objectives of 49 U.S.C. 31136(e) and 31315, FMCSA will take immediate steps to revoke the exemption of a driver.

Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission.

To submit your comment online, go to <http://www.regulations.gov> and in the search box insert the docket numbers FMCSA–2007–29035; FMCSA–2008–0293; FMCSA–2009–0242; FMCSA–2011–0277; FMCSA–2011–0278; FMCSA–2013–0184; FMCSA–2013–0187; FMCSA–2013–0190 and click the search button. When the new screen appears, click on the blue “Comment Now!” button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and material received during the comment period and may change this proposed rule based on your comments. FMCSA may issue a final rule at any time after the close of the comment period.

Viewing Comments and Documents

To view comments, as well as any documents mentioned in this preamble, to submit your comment online, go to <http://www.regulations.gov> and in the search box insert the docket number FMCSA–2007–29035; FMCSA–2008–

0293; FMCSA–2009–0242; FMCSA–2011–0277; FMCSA–2011–0278; FMCSA–2013–0184; FMCSA–2013–0187; FMCSA–2013–0190 and click “Search.” Next, click “Open Docket Folder” and you will find all documents and comments related to the proposed rulemaking.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2015–0397]

Commercial Driver’s License: Oregon Department of Transportation; Application for Exemption

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA announces that it has received an application from the Oregon Department of Transportation (ODOT) for a limited exemption from the Agency’s commercial learner’s permit (CLP) requirement in 49 CFR 383.25(c). The regulation provides that the CLP be valid for no more than 180 days from the date of issuance. The State of issuance may renew the CLP for an additional 180 days without requiring the CLP holder to retake the general and endorsement knowledge tests. ODOT proposes that it be allowed to extend the 180-day timeline to one year for CLPs issued to its drivers for multiple reasons. ODOT believes that there would be no impact on safety if the exemption is granted. FMCSA requests public comment on ODOT’s application for exemption. In addition, because the issues concerning ODOT’s request could be applicable to each State, FMCSA requests public comments whether the exemption, if granted, should apply to all State Driver’s Licensing Agencies (SDLAs).

DATES: Comments must be received on or before December 28, 2015.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket ID FMCSA–2015–0397 using any of the following methods:

- *Federal eRulemaking Portal:* www.regulations.gov. Follow the online instructions for submitting comments.

- *Mail:* Docket Management Facility, U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building, Ground Floor, Room W12–140, Washington, DC 20590–0001.

- *Hand Delivery or Courier:* West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- *Fax:* 1–202–493–2251

Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received without change to www.regulations.gov, including any personal information included in a comment. Please see the *Privacy Act* heading below.

Docket: For access to the docket to read background documents or comments, go to www.regulations.gov at any time or visit Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. The on-line FDMS is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at www.dot.gov/privacy.

FOR FURTHER INFORMATION CONTACT: For information concerning this notice, contact Ms. Pearlie Robinson, FMCSA Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards; Telephone: 202–366–4325. Email: MCPSD@dot.gov. If you have questions on viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2015–0397), indicate the specific section of this document to

which the comment applies, and provide a reason for suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to www.regulations.gov and put the docket number, “FMCSA–2015–0397” in the “Keyword” box, and click “Search.” When the new screen appears, click on “Comment Now!” button and type your comment into the text box in the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope. FMCSA will consider all comments and material received during the comment period and may grant or not grant this application based on your comments.

Viewing Comments and Documents

To view comments, as well as documents mentioned in this preamble as being available in the docket, go to www.regulations.gov and insert the docket number, “FMCSA–2015–0397” in the “Keyword” box and click “Search.” Next, click “Open Docket Folder” button and choose the document listed to review. If you do not have access to the Internet, you may view the docket online by visiting the Docket Management Facility in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain parts of the Federal Motor Carrier Safety Regulations. FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reasons for denying or granting the application and, if granted, the name of the person or class of persons receiving the exemption, and the regulatory provision from which the exemption is granted. The notice must also specify the effective period and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

III. Request for Exemption

ODOT requests an exemption from the Agency's CLP requirement in 49 CFR 383.25(c). The regulation provides that the CLP be valid for no more than 180 days from the date of issuance. The State may renew the CLP for an additional 180 days without requiring the CLP holder to retake the general and endorsement knowledge tests. ODOT proposes that it be allowed to extend the 180-day timeline to one year for CLPs issued to its drivers.

ODOT provided multiple reasons for regulatory relief from the CLP rule. First, ODOT believes that the 180-day time line required to renew the CLP adds nothing to the effectiveness of the rule itself, the purpose of which is to "enhance safety by ensuring that only qualified drivers are allowed to operate commercial vehicles on our nation's highways" (76 FR 26854, May 9, 2011). ODOT asserts that neither FMCSA staff nor the States were able to identify any highway safety enhancement arising from this requirement. ODOT states that it is unaware of any data suggesting that persons who have not renewed their CLP or obtained their CDL within six months pose less risk on the Nation's highways.

Second, ODOT agrees that requiring CLP holders to retake the knowledge test after not obtaining a CDL within one year improves highway safety, but disagrees that the requirement for renewal at six months is needed. According to ODOT, if the exemption is granted, ODOT's CLP would have a validity period of one year with no renewal allowed. All applicable knowledge tests would be required before a new CDL could be issued, which would accomplish the objective of not allowing a person to have a CLP longer than one year without passing knowledge tests.

The third reason for the request ODOT advises; is that Oregon's "Department of Motor Vehicle (DMV) field offices have a very large volume of work to accomplish and, at best, limited resources with which to accomplish it. Adding the bureaucratic requirement for a CLP holder to visit a DMV office and pay a fee in order to get a second six months of CLP validity will add unnecessary workload to offices already stretched to the limit. ODOT is confident there would be no negative impact on safety if the exemption is granted."

According to ODOT, "If this exemption is not granted, Oregon drivers with CLPs who have not passed the CDL skills test within six months of CLP issuance would have to go to a DMV office and pay for a renewal of the CLP. This would cause undue hardship to the drivers, from the perspectives of both their time and their pocketbooks. It would also cause undue hardship to our agency, where scarce resources would be used to process bureaucratic transactions that add nothing to highway safety." ODOT advises that it would not be able to change the validity period of the CLP until a statutory change can be made.

In addition, because the issues concerning ODOT's request could be applicable in each State, FMCSA requests public comment on whether the exemption, if granted, should apply to all SDLAs.

A copy of ODOT's application for exemption is available for review in the docket for this notice.

Dated: November 6, 2015.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA-2015-0371]

Qualification of Drivers; Exemption Applications; Implantable Cardioverter Defibrillators

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of applications for exemptions; request for comments.

SUMMARY: FMCSA announces receipt of 7 applications for exemptions from the cardiovascular standard [49 CFR 391.41(b)(4)]. These 7 individuals are requesting an exemption due to the

presence of implantable cardioverter defibrillators (ICD) as a result of their underlying cardiac condition. If granted, the exemptions would enable these individuals with ICDs to operate commercial motor vehicles (CMVs) in interstate commerce for up to 2 years.

DATES: Comments must be received on or before December 28, 2015.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket ID FMCSA-2015-0371 using any of the following methods:

- *Federal eRulemaking Portal:* Go to www.regulations.gov. Follow the on-line instructions for submitting comments.

- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12-140, Washington, DC 20590-0001.

- *Hand Delivery or Courier:* West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

- *Fax:* 1-202-493-2251.

Each submission must include the Agency name and the docket ID for this Notice. Note that DOT posts all comments received without change to www.regulations.gov, including any personal information included in a comment. Please see the Privacy Act heading below.

Docket: For access to the docket to read background documents or comments, go to www.regulations.gov, at any time or Room W12-140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The FDMS is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system records notice (DOT/ALL-14 FDMS), which can be reviewed at www.dot.gov/privacy.

FOR FURTHER INFORMATION CONTACT: Christine A. Hydock, Chief, Medical Programs Division, (202) 366-4001, fmcsamedical@dot.gov, FMCSA, Department of Transportation, 1200

New Jersey Avenue SE., Room W64–224, Washington, DC 20590–0001. Office hours are 8:30 a.m. to 5 p.m., e.t., Monday through Friday, except Federal holidays.

Submitting Comments

You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so that FMCSA can contact you if there are questions regarding your submission. To submit your comment online, go to <http://www.regulations.gov> and in the search box insert the docket number “FMCSA–2015–0371” and click the search button. When the new screen appears, click on the blue “Comment Now!” button on the right hand side of the page. On the new page, enter information required including the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope. We will consider all comments and material received during the comment period and may change this proposed rule based on your comments. FMCSA may issue a final rule at any time after the close of the comment period.

Viewing Comments and Documents

To view comments, as well as any documents mentioned in this notice, or to submit your comment online, go to www.regulations.gov and in the search box insert the docket number “FMCSA–2015–0371” and click “Search.” Next, click “Open Docket Folder” and you will find all documents and comments related to the proposed rulemaking.

SUPPLEMENTARY INFORMATION:

Background

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from certain parts of the Federal Motor Carrier Safety Regulations. FMCSA must publish a notice of each exemption request in the **Federal Register** [49 CFR 381.315(a)]. The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted. The Agency must also

provide an opportunity for public comment on the request.

The Agency reviews safety analyses and public comments submitted, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The Agency may grant an exemption subject to specified terms and conditions. The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reasons for denying or granting the application and, if granted, the name of the person or class of persons receiving the exemption, and the regulatory provision from which the exemption is granted. The notice must also specify the effective period and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

The FMCSA provides medical advisory criteria for use by medical examiners in determining whether drivers with certain medical conditions should be certified to operate CMVs in interstate commerce. The advisory criteria are currently set out as part of the medical examination report published with 49 CFR 391.43. The advisory criteria for section 391.41(b)(4) indicate that the term “has no current clinical diagnosis of” is specifically designed to encompass:

“a clinical diagnosis of” (1) a current cardiovascular condition, or (2) a cardiovascular condition which has not fully stabilized regardless of the time limit. The term “known to be accompanied by” is designed to include a clinical diagnosis of a cardiovascular disease (1) which is accompanied by symptoms of syncope, dyspnea, collapse or congestive cardiac failure; and/or (2) which is likely to cause syncope, dyspnea, collapse, or congestive cardiac failure.

Summary of Applications

Ellis James Benson

Mr. Benson is a 53 year old Class A CDL holder in Minnesota. A June 2, 2015 letter from his cardiologist reports that Mr. Benson’s defibrillator was implanted on November 12, 2008. His records show that his defibrillator delivered therapies on February 27, 2014, and on February 28, 2015. In 2008 (his most recent study) showed a left ejection fraction of 55–60%.

Jon Carey

Mr. Carey is a 51 year old route salesman in Colorado. A May 2015 letter from his cardiologist reports that Mr.

Carey’s ICD “was implanted in March 2009 after he experienced a ventricular fibrillation arrest”. “Since that incident, his defibrillator has never gone off and he’s had no progression of coronary disease”. Recent echocardiography shows “improved ventricular function with an EF of 40–50%”. “Mr. Carey is active without limitations without angina, heart failure, or arrhythmia symptoms”. “The patient is clear to receive a CDL license from my standpoint. I see no issues with him driving commercial vehicles.”

Martin Carter

Mr. Carter is a 47 year old Class A CDL holder in Maine. A March 11, 2015 letter from his cardiologist reports that Mr. Carter underwent ICD implantation on 4/1/2011. “At the time of the ICD placement, his ejection fraction was between 30–35%”. His cardiologists note that “since that time, the patient has gotten progressively stronger”. “Ejection fraction 10/5/2012 was 37% and 11/26/13 was 44%”. “The patient had a stress test 11/26/2013 which showed no inducible myocardial ischemia”. “In a patient such as this, the ICD would never have been considered for implantation”. “His ICD has never discharged and he has been followed regularly”. “The patient’s cardiovascular status has recovered to the point that the ICD is no longer medically necessary but no cardiologist is willing to remove the device”. “It is my medical opinion that the patient has recovered sufficiently from his ischemic cardiomyopathy that he no longer meets the restriction of ejection fraction less than 40% limiting his ability to drive. I would ask that he be considered for reinstatement of commercial tractor-trailer license”. “Prior to the placement of his ICD, Mr. Carter was treated medically and surgically and responded well”. “He had a near syncopal episode on 3/2/2010 felt to be secondary to excessive medication and dehydration. He has had no recurrences since that time.”

Carl Jeglum

Mr. Jeglum is a 58 year old Class A CDL holder in Washington. An October 22, 2015 letter from his cardiologist reports that in “March of 2005, (Mr. Jeglum) had an Internal Cardiac Defibrillator placed.” “Since then his implantable device has been checked frequently and has remained stable without further incident.” “The device has never been discharged or deployed since the time he has had the device in place.” “He has not had any ongoing cardiac symptoms and in my opinion is fully capable of performing his usual

duties as a driver as per the guidelines for the Department of Transportation.” Mr. Jeglum writes, “I already have a intrastate waiver with no problems in the past 10 years.”

William Kastner

Mr. Kastner is a 61 year old CDL holder in New Jersey. A May 2015 letter from his cardiologist reports that Mr. Kastner’s defibrillator “was implanted in 2006 after he experienced a myocardial infarction resulting in reduced left ventricular ejection fraction”. His cardiologist notes that “Mr. Kastner has never had an episode of syncope, symptomatic palpitations, loss of consciousness, cardiac arrest, documented ventricular tachycardia or ventricular fibrillation.” His electrophysiology group has recommended “that it is safe for him to continue to ride his motorcycle, and he has had no adverse events or effects from this”. He is followed regularly by his electrophysiologist office and has no untoward events with his defibrillator. “He has never had any syncope, palpitations, or discharges from his cardiac defibrillator.”

Mark Todd Smith

Mr. Smith is a 52 year old class A–CDL holder in Georgia. Medical documentation from his cardiologist between 2013 and June 2015 reports that he was upgraded from a dual chamber ICD to a biventricular ICD for ventricular arrhythmias. Mr. Smith had a pulmonary valve replacement in 2015. A September 2015 report from his cardiologist states “he has no complaints of PND (paroxysmal nocturnal dyspnea), orthopnea, LE (lower extremity) edema, syncope, or pre-syncope”. An October 2015 letter from his cardiologist reports that his ICD has “shown normal function”. “He also uses it as a pacemaker.” “Since 2014, he has not had ICD therapy because he underwent a procedure to correct that problem”. “Considering his cardiac issues, he is safer to drive professionally now than he ever has been.”

Andre Williams

Mr. Williams is a 57 year old CDL holder in Georgia. An August 2015 letter from his cardiologist reports that Mr. Williams’s ICD was implanted in February 2013. “His ICD has been checked every 6 months and has not fired/deployed”. “He has done well with no ICD shocks”.

Request for Comments

In accordance with 49 U.S.C. 31315 and 31136(e), FMCSA requests public

comment from all interested persons on the exemption applications described in this notice. We will consider all comments received before the close of business on the closing date indicated earlier in the notice.

Issued on: November 13, 2015.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910-EX-P

DEPARTMENT OF TRANSPORTATION

Federal Motor Carrier Safety Administration

[Docket No. FMCSA–2015–0394]

Driver Qualification Files: Application for Exemption; Atlantic and Pacific Freightways, Inc.

AGENCY: Federal Motor Carrier Safety Administration (FMCSA), DOT.

ACTION: Notice of application for exemption; request for comments.

SUMMARY: FMCSA announces that Atlantic and Pacific Freightways, Inc. (A&P) has applied for an exemption from 49 CFR 391.51(b)(7)(ii) requiring motor carriers to obtain an updated motor vehicle record (MVR) of any driver holding a commercial driver’s license (CDL) when he or she undergoes a new medical examination. A&P is requesting the exemption of behalf of all motor carriers that are required to obtain an MVR under this rule. FMCSA requests public comments on the application for exemption.

DATES: Comments must be received on or before December 28, 2015.

ADDRESSES: You may submit comments bearing the Federal Docket Management System (FDMS) Docket ID FMCSA–2015–0394 using any of the following methods:

- *Federal eRulemaking Portal:* Go to www.regulations.gov. Follow the on-line instructions for submitting comments.
- *Mail:* Docket Management Facility; U.S. Department of Transportation, 1200 New Jersey Avenue SE., West Building Ground Floor, Room W12–140, Washington, DC 20590–0001.
- *Hand Delivery or Courier:* West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal Holidays.
- *Fax:* 1–202–493–2251.

Each submission must include the Agency name and the docket number for this notice. Note that DOT posts all comments received without change to

www.regulations.gov, including any personal information included in a comment. Please see the *Privacy Act* heading below.

Docket: For access to the docket to read background documents or comments, go to www.regulations.gov at any time or visit Room W12–140 on the ground level of the West Building, 1200 New Jersey Avenue SE., Washington, DC, between 9 a.m. and 5 p.m., ET, Monday through Friday, except Federal holidays. The on-line FDMS is available 24 hours each day, 365 days each year. If you want acknowledgment that we received your comments, please include a self-addressed, stamped envelope or postcard or print the acknowledgement page that appears after submitting comments on-line.

Privacy Act: In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, including any personal information the commenter provides, to www.regulations.gov, as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at www.dot.gov/privacy.

FOR FURTHER INFORMATION CONTACT: For information concerning this notice, contact Mr. Robert Schultz, Transportation Specialist, FMCSA Driver and Carrier Operations Division; Office of Carrier, Driver and Vehicle Safety Standards; Telephone: 202–366–4325; email MCPSD@dot.gov. If you have questions on viewing or submitting material to the docket, contact Docket Services, telephone (202) 366–9826.

SUPPLEMENTARY INFORMATION:

I. Public Participation and Request for Comments

FMCSA encourages you to participate by submitting comments and related materials.

Submitting Comments

If you submit a comment, please include the docket number for this notice (FMCSA–2015–0394), indicate the specific section of this document to which the comment applies, and provide a reason for suggestions or recommendations. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. FMCSA recommends that you include your name and a mailing address, an email address, or a phone number in the body of your document so the Agency can contact you if it has questions regarding your submission.

To submit your comment online, go to www.regulations.gov and put the docket

number, “FMCSA–2015–0394” in the “Keyword” box, and click “Search.” When the new screen appears, click on “Comment Now!” button and type your comment into the text box in the following screen. Choose whether you are submitting your comment as an individual or on behalf of a third party and then submit. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the facility, please enclose a stamped, self-addressed postcard or envelope.

FMCSA will consider all comments and material received during the comment period and may grant or not grant this application based on your comments.

Viewing Comments and Documents

To view comments, as well as documents mentioned in this preamble as being available in the docket, go to www.regulations.gov and insert the docket number, “FMCSA–2015–0394” in the “Keyword” box and click “Search.” Next, click “Open Docket Folder” button and choose the document listed to review. If you do not have access to the Internet, you may view the docket online by visiting the Docket Management Facility in Room W12–140 on the ground floor of the DOT West Building, 1200 New Jersey Avenue SE., Washington, DC 20590, between 9 a.m. and 5 p.m., e.t., Monday through Friday, except Federal holidays.

II. Legal Basis

FMCSA has authority under 49 U.S.C. 31136(e) and 31315 to grant exemptions from the FMCSRs. FMCSA must publish a notice of each exemption request in the **Federal Register** (49 CFR 381.315(a)). The Agency must provide the public an opportunity to inspect the information relevant to the application, including any safety analyses that have been conducted, and must provide an opportunity for public comment on the request.

The Agency reviews the safety analyses and the public comments, and determines whether granting the exemption would likely achieve a level of safety equivalent to, or greater than, the level that would be achieved by the current regulation (49 CFR 381.305). The decision of the Agency must be published in the **Federal Register** (49 CFR 381.315(b)) with the reason for the grant or denial, and, if granted, the specific person or class of persons receiving the exemption, and the regulatory provision or provisions from

which exemption is granted. The notice must also specify the effective period of the exemption (up to 2 years), and explain the terms and conditions of the exemption. The exemption may be renewed (49 CFR 381.300(b)).

III. Background

The Commercial Motor Vehicle Safety Act of 1986 (CMVSA) was designed to improve highway safety by ensuring that truck and bus drivers are qualified to drive a commercial motor vehicle (CMV).¹ CMVSA mandated that the Federal government establish minimum requirements for issuance of a commercial driver’s license (CDL) to be issued by the States. It provided for removal of driving privileges from unsafe and unqualified drivers. The CMVSA also mandated the creation of the Commercial Driver’s Licensing Information System (CDLIS), a cooperative exchange of the 50 States and the District of Columbia. CDLIS documents the issuance of a CDL by a State and all subsequent actions by a State driver licensing agency (SDLA) relative to that CDL, such as suspension, downgrade or removal of all driving privileges. Thus, each CDL driver has a single motor vehicle record (MVR). Federal and State law enforcement officials access CDLIS electronically at roadside to verify the licensing status of CMV drivers.

The FMCSRs (49 CFR part 350 *et seq.*) require operators of CMVs to be medically examined and found physically qualified to perform their job-related duties (49 CFR 391.41(a)(1)(i)). CMV drivers must be re-examined every two years (49 CFR 391.45(b)(1)) or more frequently for medical reasons. Only medical examiners (MEs) approved by FMCSA and listed on the Agency’s National Registry of Certified Medical Examiners may perform medical examinations of CDL drivers (49 CFR 391.42).

¹ The CMVSA definition of “commercial motor vehicle” was adopted verbatim by 49 CFR 383.5: “Commercial motor vehicle means a motor vehicle or combination of motor vehicles used in commerce to transport passengers or property if the motor vehicle is a—(1) Combination Vehicle (Group A)—having a gross combination weight rating or gross combination weight of 11,794 kilograms or more (26,001 pounds or more), whichever is greater, inclusive of a towed unit(s) with a gross vehicle weight rating or gross vehicle weight of more than 4,536 kilograms (10,000 pounds), whichever is greater; or (2) Heavy Straight Vehicle (Group B)—having a gross vehicle weight rating or gross vehicle weight of 11,794 or more kilograms (26,001 pounds or more), whichever is greater; or (3) Small Vehicle (Group C)—(i) that does not meet Group A or B requirements; (ii) is designed to transport 16 or more passengers, including the driver; or (iii) is of any size and is used in the transportation of certain hazardous materials (49 CFR 383.5).”

ME’s must transmit the result of each driver medical examination they conduct to FMCSA electronically (391.41(g)(5)(i)(a)). FMCSA transmits the information to CDLIS, and SDLAs are required to extract the information from CDLIS and post on each MVR whether the driver is medically qualified to operate a CMV (49 CFR 383.73(b)(5)). Motor carriers must obtain the revised MVR of its drivers from the State of licensure within 15 days of the date of a medical examination and retain it in the driver’s qualification file (49 CFR 391.51(b)(7)(ii)). Some motor carriers retain third-party agents to manage this and other recordkeeping requirements. Some SDLAs will not provide revised MVRs to third-party agents.

IV. Request for Exemption

Applicant A&P retains a third-party agent to obtain revised MVRs of its CMV drivers. It has applied for exemption from the requirement of 49 CFR 391.51(b)(7)(ii) that motor carriers obtain the revised MVR of the driver from the State that licenses the driver within 15 days of the date of the medical examination. A&P has applied on behalf of all motor carriers who must obtain MVRs of their CDL drivers. A&P suggests that motor carriers be permitted to “have a copy of [the] current MVR from the third party provider and proof the medical certificate has been filed” with the SDLA in lieu of the existing requirement.

A copy of A&P’s application is in the docket of this matter.

Dated: November 6, 2015.

Larry W. Minor,

Associate Administrator for Policy.

BILLING CODE 4910–EX–P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD–2015–0134]

Requested Administrative Waiver of the Coastwise Trade Laws: Vessel LOCURA; Invitation for Public Comments

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Notice.

SUMMARY: As authorized by 46 U.S.C. 12121, the Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for

such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below.

DATES: Submit comments on or before December 28, 2015.

ADDRESSES: Comments should refer to docket number MARAD-2015-0134. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590. You may also send comments electronically via the Internet at <http://www.regulations.gov>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT:

Linda Williams, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Room W23-453, Washington, DC 20590. Telephone 202-366-0903, Email Linda.Williams@dot.gov.

SUPPLEMENTARY INFORMATION: As described by the applicant the intended service of the vessel LOCURA is:

Intended Commercial Use of Vessel: "Private Vessel Charters, Passengers Only".

Geographic Region: "Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia, Florida, California, Oregon, Washington and Alaska (excluding waters in Southeastern Alaska and waters north of a line between Gore Point to Cape Suckling [including the North Gulf Coast and Prince William Sound])."

The complete application is given in DOT docket MARAD-2015-0134 at <http://www.regulations.gov>. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments

should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

Privacy Act

Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477-78).

By Order of the Maritime Administrator.
Dated: November 19, 2015.

Thomas M. Hudson, Jr.,

Secretary, Maritime Administration.

Linda Williams, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Room W23-453, Washington, DC 20590. Telephone 202-366-0903, Email Linda.Williams@dot.gov.

SUPPLEMENTARY INFORMATION: As described by the applicant the intended service of the vessel MAGNA CARTA is:

Intended Commercial Use Of Vessel: "Private Vessel Charters, Passengers Only".

Geographic Region: "Maine, New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, North Carolina, South Carolina, Georgia, Florida,

California, Oregon, Washington and Alaska (excluding waters in Southeastern Alaska and waters north of a line between Gore Point to Cape Suckling [including the North Gulf Coast and Prince William Sound])."

The complete application is given in DOT docket MARAD-2015-0133 at <http://www.regulations.gov>. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR Part 388.

Privacy Act

Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477).

By Order of the Maritime Administrator.

Dated: November 19, 2015.

Thomas M. Hudson, Jr.,

Secretary, Maritime Administration.

DEPARTMENT OF TRANSPORTATION**Maritime Administration**

[Docket No. MARAD-2015 0131]

Requested Administrative Waiver of the Coastwise Trade Laws: Vessel CAROBELLE; Invitation for Public Comments

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Notice.

SUMMARY: As authorized by 46 U.S.C. 12121, the Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under

certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below.

DATES: Submit comments on or before December 28, 2015.

ADDRESSES: Comments should refer to docket number MARAD-2015-0131. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE., Washington, DC 20590. You may also send comments electronically via the Internet at <http://www.regulations.gov>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Linda Williams, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Room W23-453, Washington, DC 20590. Telephone 202-366-0903, Email Linda.Williams@dot.gov.

SUPPLEMENTARY INFORMATION: As described by the applicant the intended service of the vessel CAROBELLE is:

INTENDED COMMERCIAL USE OF VESSEL: "Passenger Charter."
GEOGRAPHIC REGION: "FLORIDA, GEORGIA, SOUTH CAROLINA, NORTH CAROLINA, VIRGINIA, MARYLAND, DELAWARE, NEW JERSEY, NEW YORK, CONNECTICUT, RHODE ISLAND, MASSACHUSETTS, MAINE, ALABAMA, MISSISSIPPI, LOUISIANA, TEXAS."

The complete application is given in DOT docket MARAD-2015-0131 at <http://www.regulations.gov>. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state

the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

BILLING CODE 4910-81-P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

Acceptance of Applications for the Potential Award of Maritime Security Program Operating Agreements

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Notice of Application Period for the Maritime Security Program.

SUMMARY: The Maritime Administration (MARAD) is issuing this request for applications for eligible vessels to potentially enroll in one or more MSP Operating Agreements in accordance with the provisions of the Maritime Security Act of 2003, Public Law 108-136, div. C, title XXXV, as amended by Section 3508 of the National Defense Authorization Act for Fiscal Year (FY) 2013, Public Law 112-239, (NDAA 2013). The Maritime Security Program (MSP) maintains a fleet of active, commercially-viable, privately-owned vessels to meet national defense and other security requirements and to maintain a United States presence in international commercial shipping. This request for applications provides, among other things, application criteria and a deadline for submitting applications for potential vessel enrollment in the MSP.

DATES: Applications for the potential enrollment of one or more vessels must be received no later than December 28, 2015. Applications should be submitted to the address listed in the **ADDRESSES** section below.

ADDRESSES: Application forms and instructions are available by electronic

mail request addressed to William.G.Mcdonald@dot.gov.

Submit applications for the enrollment of vessels in the MSP to William G. McDonald, Director, Office of Sealift Support, W25-310, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE., Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: William G. McDonald, Director, Office of Sealift Support, Maritime Administration, (202) 366-0688. For legal questions, call Ryan Kabacinski, Chief, Division of Maritime Programs, Maritime Administration, (202) 366-5176. For military-utility questions, call Mr. Tim Boemecke, United States Transportation Command, (618) 220-1452.

SUPPLEMENTARY INFORMATION: The NDAA 2013 extended the MSP from FY 2016 through FY 2025 and revised the associated annual MSP payment schedule. This program provides financial assistance to operators of U.S.-flag vessels that meet certain qualifications. Section 53102(a) of Title 46, United States Code, directs the Secretary of Transportation (Secretary), in consultation with the Secretary of Defense (SecDef), to establish a fleet of active, commercially-viable, militarily-useful, privately-owned vessels to meet national defense and other security requirements. Section 53111 of Title 46, United States Code, authorizes \$186 million annually for FYs 2012, 2013, 2014, 2015, 2016, 2017 and 2018; \$210 million annually for FYs 2019, 2020 and 2021; and \$222 million annually for each FY thereafter through FY 2025 to support the operation of up to 60 U.S.-flag vessels in the foreign commerce of the United States. Payment to participating operators are limited under 46 U.S.C. § 53106(a)(1) to \$3.1 million per ship, per year, through FY 2018; \$3.5 million per ship per year for FY 2019 through 2021; and \$3.7 million per ship per year for FY 2022 through 2025. Payments are subject to the availability of appropriations. Participating operators are required to make their commercial transportation resources available upon request by SecDef during times of war or national emergency.

Application Criteria

The NDAA 2013 amended the procedures in 46 U.S.C. § 53103(c) for awarding new MSP Operating Agreements. The amended statute provides that the Secretary may enter into a new Operating Agreement with an applicant that meets the citizenship requirements of 46 U.S.C. § 53102(c), for

a vessel that meets the eligibility requirements of 46 U.S.C. § 53102(b). Priority for the award of Operating Agreements under the amended 46 U.S.C. § 53103(c) shall be on the basis of vessel type established by military requirements of SecDef. The military requirements established by SecDef, through the United States Transportation Command (USTRANSCOM), are provided below. As provided by the amended statute, after consideration of military requirements, priority for the award of Operating Agreements shall be given to applicants that are United States citizens under 46 U.S.C. § 50501.

Vessel Requirements

Acceptable vessels for this MSP Operating Agreement must meet the requirements of 46 U.S.C. § 53102(b) and 46 CFR § 296.11. In addition, the Commander, USTRANSCOM, has established Department of Defense general evaluation criteria on the military requirements for eligible MSP vessels. Priority consideration, consistent with the requirements of 46 U.S.C. § 53103(c), will be given to applications providing for enrollment of the following vessel types in order of priority:

1. Roll-on/Roll-off (RO/RO)
2. Tanker
3. Heavy Lift
4. Geared Containerships
5. All other vessel types will be considered after all applications for the above listed vessel types have been reviewed.

National Security Requirements

If an applicant is chosen to receive a MSP Operating Agreement the applicant will be required to enter into an Emergency Preparedness Agreement (EPA) pursuant 46 U.S.C. § 53107. The EPA shall be a document incorporating the terms of the Voluntary Intermodal Sealift Agreement (VISA), as approved by the Secretary and SecDef, or such other agreement as may be approved by the Secretaries.

Documentation

If a vessel is chosen to be the subject of an MSP Operating Agreement, and if such vessel is currently documented under a foreign register, such vessel must be documented in the United States under 46 U.S.C. Ch. 121 prior to being eligible for MSP payments. Further, proof of U.S. Coast Guard vessel documentation and all relevant charter and management agreements for

the chosen vessels, if any, must be approved by MARAD before the vessel will be eligible to receive MSP payments.

Payments

If an applicant is awarded an MSP Operating Agreement, the applicant will be eligible for payments in accordance with 46 U.S.C. § 53106 and 46 CFR § 296.41.

Vessel Operation

The vessels under an MSP Operating Agreement shall be operated exclusively in foreign commerce as defined in 46 U.S.C. § 53101(4) or in permissible mixed foreign commerce and domestic trade as provided by 46 U.S.C. § 53105(a)(1)(A).

U.S. Merchant Marine Academy Cadets (Midshipmen)

In the course of operation of the vessel, the MSP Operator shall agree to carry contemporaneously up to two U.S. Merchant Marine Academy midshipmen upon request.

Award

No guarantee is provided that MARAD will award any MSP Operating Agreements in response to applications submitted under this Notice. In the event that no awards are made or an application is not selected for an award, the applicant will be provided a written reason why the application was denied, consistent with the requirements of 46 U.S.C. § 53103(c).

(Authority: 49 CFR Sections 1.92 and 1.93)

By Order of the Maritime Administrator.

Dated: November 23, 2015.

Jay R. Gordon,

Acting Secretary, Maritime Administration.

BILLING CODE 4910-81-P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

Hazardous Materials: Notice of Application for Modification of Special Permit

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: List of Application for Modification of Special Permits

SUMMARY: In accordance with the procedures governing the application

for, and the processing of, special permits from the Department of Transportation's Hazardous Material Regulations (49 CFR part 107, subpart B), notice is hereby given that the Office of Hazardous Materials Safety has received the applications described herein. This notice is abbreviated to expedite docketing and public notice. Because the sections affected, modes of transportation, and the nature of application have been shown in earlier **Federal Register** publications, they are not repeated here. Requests for modification of special permits (*e.g.* to provide for additional hazardous materials, packaging design changes, additional mode of transportation, etc.) are described in footnotes to the application number. Application numbers with the suffix "M" denote a modification request. These applications have been separated from the new application for special permits to facilitate processing.

DATES: Comments must be received on or before December 14, 2015.

Address Comments To: Record Center, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the special permit number.

FOR FURTHER INFORMATION CONTACT:

Ryan Paquet, Director, Office of Hazardous Materials Approvals and Permits Division, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, East Building, PHH-30, 1200 New Jersey Avenue Southeast, Washington, DC 20590-0001, (202) 366-4535.

Copies of the applications are available for inspection in the Records Center, East Building, PHH-30, 1200 New Jersey Avenue Southeast, Washington, DC or at <http://regulations.gov>.

This notice of receipt of applications for modification of special permit is published in accordance with Part 107 of the Federal hazardous materials transportation law (49 U.S.C. 5117(6); 49 CFR I.53(b)).

Issued in Washington, DC, November 4, 2015.

Don Burger,

Chief, General Approvals and Permits.

Application No.	Docket No.	Applicant	Regulation(s) affected	Nature of permit thereof
MODIFICATION SPECIAL PERMITS				
7765-M		Carleton Technologies, Inc., Orchard Park, NY.	49 CFR 173.302(a)(4); 175.3	To modify the special permit to authorize a competent internal Carleton inspector to perform the required duties outlined in § 178.35(c).
12399-M		Linde Gas, North America LLC., Murray Hill, NJ.	49 CFR 180.209	To modify the special permit to authorize DOT Specification 3AL cylinders made of 6351-T6 aluminum to be requalified by ultrasonic examination and eddy current examination in accordance with 49 CFR Appendix C to Part 180.
12562-M		Taeyang Corporation, Chung Nam.	49 CFR 173.304(d)(3)(ii)	To modify the special permit to authorize additional Division 2.1 hazardous materials, add an additional inside container design, mark each container "DOT-SP 12562" instead of "DOTE-12562" and company name change.
13192-M		Thomas Gray & Associates, Inc., Orange, CA.	49 CFR 173.12(b)	To modify the special permit to authorize transportation of radioactive materials.

BILLING CODE 4909-60-M

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

Hazardous Materials: Notice of Application for Special Permits

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: List of applications for special permits

SUMMARY: In accordance with the procedures governing the application for, and the processing of, special permits from the Department of Transportation's Hazardous Material Regulations (49 CFR part 107, subpart B), notice is hereby given that the Office of Hazardous Materials Safety has received the application described herein. Each mode of transportation for

which a particular special permit is requested is indicated by a number in the "Nature of Application" portion of the table below as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo aircraft only, 5—Passenger-carrying aircraft.

DATES: Comments must be received on or before December 28, 2015.

ADDRESSES: Send comments to Record Center, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, Washington, DC 20590.

Comments should refer to the application number and be submitted in triplicate. If confirmation of receipt of comments is desired, include a self-addressed stamped postcard showing the special permit number.

FOR FURTHER INFORMATION CONTACT: Ryan Paquet, Director, Office of Hazardous Materials Approvals and

Permits Division, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, East Building, PHH-30, 1200 New Jersey Avenue Southeast, Washington, DC 20590-0001, (202) 366-4535.

SUPPLEMENTARY INFORMATION: Copies of the applications are available for inspection in the Records Center, East Building, PHH-30, 1200 New Jersey Avenue Southeast, Washington, DC or at <http://regulations.gov>.

This notice of receipt of applications for special permit is published in accordance with part 107 of the Federal hazardous materials transportation law (49 U.S.C. 5117(b); 49 CFR 1.53(b)).

Issued in Washington, DC, on November 4, 2015.

Donald Burger,
Chief, General Approvals and Permits.

Application No.	Docket No.	Applicant	Regulation(s) affected	Nature of permit thereof
NEW SPECIAL PERMITS				
16591-N	Department of Defense, Scott AFB, IL.	49 CFR 171.3(a), 173.302a, ICAO TI Packing Instruction 200, IMDG Code Packing Instruction P200.	To authorize the transportation in commerce of compressed argon in non-DOT specification cylinders. (modes 1, 3, 4).
16592-N	Stericycle Specialty Waste Solutions, Inc., Minneapolis, MN.	49 CFR Subparts A through E of Part 173.	To authorize the transportation in commerce of certain Drug Enforcement Administration (DEA) controlled substances transported for the purpose of disposal. (mode 1).
16596-N	Great Slave Helicopters, Ltd., Yellowknife, Canada, NT.	49 CFR 172.101 Hazardous Materials Table Column (9B), Subpart C of Part 172, 172.301(c), 175.30, Part 173.	To authorize transportation in commerce in the U.S. only of certain hazardous materials by Rotorcraft External Load Operations transporting hazardous materials attached to or suspended from an aircraft without being subject to certain hazard communication requirements, quantity limitations, packaging and loading and storage requirements. (mode 4).
16598-N	Spaceflights, Inc., Tukwila, WA.	49 CFR 173.24(b)(1), 173.304a, 173.185(a)(1).	To authorize the transportation in commerce of the SHERPA spacecraft containing non-DOT specification cylinders filled with a Division 2.1 gas and three lithium ion batteries contained in equipment that are not of a type proven to meet the criteria in Part III, sub-section 38.3 of the UN Manual of Tests and Criteria. (mode 1).
16601-N	SAFC Hitech, Inc., Haverhill, MA.	49 CFR 173.181(b), IMDG Code Packing Instruction P400, paragraph (2).	To authorize the manufacture, mark, sale and use of specially-designed combination packagings for the transportation in commerce of certain pyrophoric hazardous materials. (modes 1, 3).
16602-N	Hydrite Chemical Co., Brookfield, WI.	49 CFR 173.158(b), 173.158(e), 173.158(f).	To authorize the transportation in commerce of nitric acid with a concentration up to 50% in UN 3H1 jerricans and UN 1H1 plastic drums. (mode 1).

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

Hazardous Materials: Delayed Applications

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: List of application delayed more than 180 days.

SUMMARY: In accordance with the requirements of 49 U.S.C. 5117(c), PHMSA is publishing the following list of special permit applications that have been in process for 180 days or more.

The reason(s) for delay and the expected completion date for action on each application is provided in association with each identified application.

FOR FURTHER INFORMATION CONTACT: Ryan Paquet, Director, Office of Hazardous Materials Special Permits and Approvals, Pipeline and Hazardous Materials Safety Administration, U.S. Department of Transportation, East Building, PHH-30, 1200 New Jersey Avenue Southeast, Washington, DC 20590-0001, (202) 366-4535.

Key to "Reason for Delay"

1. Awaiting additional information from applicant
2. Extensive public comment under review

3. Application is technically complex and is of significant impact or precedent-setting and requires extensive analysis

4. Staff review delayed by other priority issues or volume of special permit applications

Meaning of Application Number Suffixes

- N—New application
- M—Modification request
- R—Renewal Request
- P—Party To Exemption Request

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

Hazardous Materials: Actions on Special Permit Applications

AGENCY: Pipeline And Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Notice of actions on special permit applications.

SUMMARY: In accordance with the procedures governing the application for, and the processing of, special permits from the Department of Transportation's Hazardous Material Regulations (49 CFR part 107, subpart B), notice is hereby given of the actions on special permits applications in (October to October 2014). The mode of transportation involved are identified by a number in the "Nature of Application" portion of the table below

as follows: 1—Motor vehicle, 2—Rail freight, 3—Cargo vessel, 4—Cargo aircraft only, 5—Passenger-carrying aircraft. Application numbers prefixed by the letters EE represent applications for Emergency Special Permits. It should be noted that some of the sections cited were those in effect at the time certain special permits were issued.

Issued in Washington, DC, on November 4, 2015.

Don Burger,

Chief, Special Permits and Approvals Branch.

S.P. No.	Applicant	Regulation(s)	Nature of special permit thereof
MODIFICATION SPECIAL PERMIT GRANTED			
15744-M	Praxair Distribution, Inc., Danbury, CT.	49 CFR 180.205; 180.209	To modify the special permit to exempt the notation "DOT-SP" 15744 on shipping papers.
12562-M	Taeyang Industrial Company Ltd., Chung Nam.	49 CFR 173.304(d)(3)(ii)	To modify the special permit to authorize additional Division 2.1 hazardous materials and to add an additional inside container design.
16302-M	Ametek Inc., Pittsburgh, PA.	49 CFR 171.1	To modify the special permit to authorize glass ampules with a 31 ml actual capacity and remove the 30 kg limit when ampules are installed in analyzing equipment.
16239-M	Trinity Containers, LLC, Dallas, TX.	49 CFR 171.7	To reissue the special permit that was originally issued on an emergency basis with a two year renewal.
11054-M	Welker Inc., Sugar Land, TX.	49 CFR 178.36 subpart C	To modify the special permit to authorize additional hazardous materials.
NEW SPECIAL PERMIT GRANTED			
16395-N	Chandler Instruments Company LLC Broken Arrow, OK.	49 CFR 173.201, 173.301(f), 173.302(a), 173.304.	To authorize the manufacture, mark, sale and use of non-DOT specification cylinders used in oil well sampling. (modes 1, 2, 3, 4).
16414-N	Gardner Cryogenics Department of Air Products and Chemicals Inc., Allentown, PA.	49 CFR 178.338	To authorize the manufacture mark and sell of MC338 cargo tanks built to ASME Section XII standards(version in effect at time of manufacture) and stamping them with a "T" stamp associated with that section rather than the "U" stamp of current Federal Regulations. (modes 1, 3).
16498-N	FIBA Technologies, Inc. Littleton, MA.	49 CFR 172.203(a), 173.302a, 173.304a.	Authorizes the manufacture, mark, sale and use of specification DOT 3T cylinders using an alternative heat treatment batch size. (modes 1, 2, 3).

BILLING CODE 4910-60-M

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[Docket No. FD 35897]

R. J. Corman Railroad Company/ Carolina Lines, LLC—Acquisition and Operation Exemption—The Baltimore and Annapolis Railroad Company d/b/ a Carolina Southern Railroad Company

AGENCY: Surface Transportation Board, DOT.

ACTION: Correction to notice of exemption.

On January 12, 2015, R. J. Corman Railroad Company/Carolina Lines, LLC (RJC-Carolina), a noncarrier, filed a verified notice of exemption under 49 CFR 1150.31 to acquire from The Baltimore and Annapolis Railroad Company d/b/a Carolina Southern Railroad Company (CALA) and operate two interconnected rail lines totaling approximately 74.9 miles in North Carolina and South Carolina (the Line). RJC-Carolina stated that the Line extends from: (1) Milepost AL 326.0, at Mullins, S.C., to milepost AC 290.0, at Whiteville, N.C.; and (2) milepost ACH 297.2, at Chadbourn, N.C., to milepost ACH 336.1, at Conway, S.C. RJC-Carolina also sought to acquire one mile of incidental, local trackage rights from CALA, extending between milepost AC 290.0 and milepost AC 289.0, at or near Whiteville.¹ On January 28, 2015, notice of the exemption was served and published in the **Federal Register** (80 FR 4634). The exemption became effective on February 11, 2015.

On October 5, 2015, RJC-Carolina filed a letter stating that milepost ACH 336.1 should have been more precisely stated as ACH 336.18. As a result, RJC-Carolina states that the total length of the Line is approximately 74.98 miles as

¹ This transaction is related to a concurrently filed verified notice of exemption in *R.J. Corman Railroad Group—Continuance in Control Exemption—R.J. Corman Railroad/Carolina Lines*, Docket No. FD 35898, in which R.J. Corman Railroad Group, LLC, and R.J. Corman Railroad Company, LLC, sought Board approval under 49 CFR 1180.2(d)(2) to continue in control of RJC-Carolina upon RJC-Carolina's becoming a Class III rail carrier.

opposed to 74.9 miles. This notice corrects the description of the milepost and total length of the Line. All other information in the notice is correct.

Board decisions and notices are available on our Web site at www.stb.dot.gov.

Decided: November 20, 2015.

By the Board, Rachel D. Campbell,
Director, Office of Proceedings.

Jeffrey Herzig,
Clearance Clerk.

BILLING CODE 4915-01-P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Updating of Specially Designated Nationals and Blocked Persons Pursuant to the Foreign Narcotics Kingpin Designation Act

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (OFAC) is updating the identifying information for one vessel that was previously identified as blocked property pursuant to the Foreign Narcotics Kingpin Designation Act (Kingpin Act) (21 U.S.C. Sections 1901-1908, 8 U.S.C. Section 1182).

DATES: The update to the list of Specially Designated Nationals and Blocked Persons (SDN List) of the vessel identified in this notice, is effective on November 12, 2015.

FOR FURTHER INFORMATION CONTACT: Assistant Director, Sanctions Compliance & Evaluation, Department of the Treasury, Office of Foreign Assets Control, Washington, DC 20220, Tel: (202) 622-2420.

SUPPLEMENTARY INFORMATION:

Electronic and Facsimile Availability

This document and additional information concerning OFAC are available from OFAC's Web site at www.treasury.gov/ofac or via facsimile through a 24-hour fax-on demand service at (202) 622-0077.

Background

On December 3, 1999, the Kingpin Act was signed into law by the President of the United States. The Kingpin Act provides a statutory framework for the President to impose sanctions against significant foreign narcotics traffickers and their organizations on a worldwide basis, with the objective of denying their businesses and agents access to the U.S. financial system and to the benefits of trade and transactions involving U.S. persons and entities.

The Kingpin Act blocks all property and interests in property, subject to U.S. jurisdiction, owned or controlled by significant foreign narcotics traffickers as identified by the President. In addition, the Secretary of the Treasury consults with the Attorney General, the Director of the Central Intelligence Agency, the Director of the Federal Bureau of Investigation, the Administrator of the Drug Enforcement Administration, the Secretary of Defense, the Secretary of State, and the Secretary of Homeland Security when designating and blocking the property or interests in property, subject to U.S. jurisdiction, of persons or entities found to be: (1) Materially assisting in, or providing financial or technological support for or to, or providing goods or services in support of, the international narcotics trafficking activities of a person designated pursuant to the Kingpin Act; (2) owned, controlled, or directed by, or acting for or on behalf of, a person designated pursuant to the Kingpin Act; and/or (3) playing a significant role in international narcotics trafficking.

On November 12, 2015, the Associate Director of the Office of Global Targeting updated the SDN listing of the vessel listed below pursuant to the Kingpin Act:

Vessel

1. CITY OF TOKYO (D5GK6) Liberia flag; Vessel Registration Identification IMO 8709145; MMSI 636016488 (vessel) [SDNTK] (Linked To: MERHI, Merhi Ali Abou; Linked To: ABOU-MERHI LINES SAL).

To

1. CITY OF TOKYO (3ELV6) Panama flag; Vessel Registration Identification IMO 8709145; MMSI 636016488 (vessel) [SDNTK] (Linked To: MERHI, Merhi Ali

Abou; Linked To: ABOU-MERHI LINES SAL).

Dated: November 12, 2015.

Gregory T. Gatjanis,

Associate Director, Office of Global Targeting, Office of Foreign Assets Control.

BILLING CODE 4810-AL-P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Unblocking of Specially Designated Nationals and Blocked Persons Pursuant to the Foreign Narcotics Kingpin Designation Act

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of two individuals whose property and interests in property have been unblocked pursuant to the Foreign Narcotics Kingpin Designation Act (Kingpin Act) (21 U.S.C. Sections 1901-1908, 8 U.S.C. Section 1182).

DATES: The unblocking and removal from the list of Specially Designated Nationals and Blocked Persons (SDN List) of the individuals identified in this notice whose property and interests in property were blocked pursuant to the Kingpin Act, is effective on November 19, 2015.

FOR FURTHER INFORMATION CONTACT:

Assistant Director, Sanctions Compliance & Evaluation, Department of the Treasury, Office of Foreign Assets Control, Washington, DC 20220, Tel: (202) 622-2420.

SUPPLEMENTARY INFORMATION:

Electronic and Facsimile Availability

This document and additional information concerning OFAC are available from OFAC's Web site at www.treas.gov/ofac or via facsimile through a 24-hour fax-on demand service at (202) 622-0077.

BILLING CODE 4810-AL-P

DEPARTMENT OF THE TREASURY

Office of Foreign Assets Control

Updating of Specially Designated Nationals and Blocked Persons Pursuant to Executive Order 12978

AGENCY: Office of Foreign Assets Control, Treasury.

ACTION: Notice.

SUMMARY: The Department of the Treasury's Office of Foreign Assets Control (OFAC) is updating the identifying information for two individuals that were previously designated pursuant to Executive Order 12978 (Blocking Assets and Prohibiting Transactions with Significant Narcotics Traffickers).

DATES: The update to the list of Specially Designated Nationals and Blocked Persons (SDN List) of the individuals identified in this notice whose property and interests in property are blocked pursuant to Executive Order 12978, is effective on November 12, 2015.

FOR FURTHER INFORMATION CONTACT: Assistant Director, Sanctions Compliance & Evaluation, Department of the Treasury, Office of Foreign Assets Control, Washington, DC 20220, Tel: (202) 622-2420.

SUPPLEMENTARY INFORMATION:

Electronic and Facsimile Availability

This document and additional information concerning OFAC are available from OFAC's Web site at www.treasury.gov/ofac or via facsimile through a 24-hour fax-on demand service at (202) 622-0077.

Background

On October 21, 1995, the President, invoking the authority, inter alia, of the International Emergency Economic Powers Act (50 U.S.C. 1701-1706), issued Executive Order 12978, "Blocking Assets and Prohibiting Transactions with Significant Narcotics Traffickers" (the Order). In the Order, the President declared a national emergency to deal with the threat posed by significant foreign narcotics traffickers centered in Colombia and the

harm that they cause in the United States and abroad.

Section 1 of the Order blocks, with certain exceptions, all property and interests in property that are in the United States, or that hereafter come within the United States or that are or hereafter come within the possession or control of United States persons, of: (1) The persons listed in an Annex to the Order; (2) any foreign person determined by the Secretary of Treasury, in consultation with the Attorney General and the Secretary of State, to play a significant role in international narcotics trafficking centered in Colombia, or materially to assist in, or provide financial or technological support for or goods or services in support of, the narcotics trafficking activities of persons designated in or pursuant to the Order; and (3) persons determined by the Secretary of the Treasury, in consultation with the Attorney General and the Secretary of State, to be owned or controlled by, or to act for or on behalf of, persons designated pursuant to the Order.

On November 12, 2015, the Associate Director of the Office of Global Targeting updated the SDN listing of the two individuals listed below, whose property and interests in property are blocked pursuant to Executive Order 12978:

Individual

1. SANTAGRUZ LONDONO, Jose (a.k.a. "CHEPE"; a.k.a. "DON CHEPE"; a.k.a. "EL GORDO CHEPE"), Cali, Colombia; DOB 01 Oct 1943; Cedula No. 14432230 (Colombia); Passport AB149814 (Colombia) (individual) [SDNT].

-to-

SANTAGRUZ LONDONO, Jose (a.k.a. "CHEPE"; a.k.a. "DON CHEPE"; a.k.a. "EL GORDO CHEPE"), Cali, Colombia; DOB 01 Oct 1943; Passport AB149814 (Colombia) (individual) [SDNT].

2. GARCIA PIZARRO, Gentil Velez, c/o GALAPAGOS S.A., Cali, Colombia; Cedula No. 6616986 (Colombia) (individual) [SDNT].

-to-

GARCIA PIZARRO, Gentil Velez, Cali, Colombia (individual) [SDNT] (Linked To: GALAPAGOS S.A.).

BILLING CODE 4810-AL-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Information Collection Tools

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)). Currently, the IRS is soliciting comments concerning Form 1099-PATR, Taxable Distributions Received From Cooperatives; Conduit Arrangements Regulations (TD 8611); Form 8903, Domestic Production Activities Deduction; and the rules under the Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008: Technical amendment to external review for Multi-State Plan Program (TD 9640).

DATES: Written comments should be received on or before January 26, 2016 to be assured of consideration.

ADDRESSES: Direct all written comments to Christie Preston, Internal Revenue Service, room 6129, 1111 Constitution Avenue NW., Washington, DC 20224. Please send separate comments for each specific information collection listed below. You must reference the information collection's title, form number, reporting or record-keeping requirement number, and OMB number (if any) in your comment.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the collection tools should be directed to R. Joseph Durbala, Internal Revenue Service, Room 6129, 1111 Constitution Avenue NW., Washington, DC 20224, or at (202) 317-5746, or through the internet at RJoseph.Durbala@irs.gov.

SUPPLEMENTARY INFORMATION: Currently, the IRS is seeking comments concerning the following information collection tools, reporting, and record-keeping requirements:

(1) *Title:* Taxable Distributions Received From Cooperatives.

OMB Number: 1545-0118.

Form Number: 1099-PART.

Abstract: Form 1099-PATR is used to report patronage dividends paid by

cooperatives in accordance with Internal Revenue Code section 6044. The information is used by IRS to verify reporting compliance on the part of the recipient.

Current Actions: There is no change in the paperwork burden previously approved by OMB.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 1,961,131.

Estimated Time Per Respondent: 15 min.

Estimated Total Annual Burden Hours: 509,895.

(2) *Title:* Conduit Arrangements Regulations.

OMB Number: 1545-1440.

Form Number: TD 8611 (INTL-64-93).

Abstract: This regulation provides rules that permit the district director to recharacterize a financing arrangement as a conduit arrangement. The recharacterization will affect the amount of U.S. withholding tax due on financing transactions that are part of the financing arrangement. This regulation affects withholding agents and foreign investors who engage in multi-party financing arrangements.

Current Actions: There is no change in the paperwork burden previously approved by OMB.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 1,000.

Estimated Time Per Respondent: 10 min.

Estimated Total Annual Burden Hours: 10,000.

(3) *Title:* Domestic Production Activities Deduction.

OMB Number: 1545-1984.

Form Number: 8903.

Abstract: Taxpayers will use Form 8903 and related instructions to calculate the domestic production activities deduction.

Current Actions: There is no change in the paperwork burden previously approved by OMB.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 300,000.

Estimated Time Per Respondent: 24 hours 40 min.

Estimated Total Annual Burden Hours: 7,398,000.

(4) *Title:* Rules under the Paul Wellstone and Pete Domenici Mental

Health Parity and Addiction Equity Act of 2008: Technical amendment to external review for Multi-State Plan Program.

OMB Number: 1545-2165.

Form Number: TD 9640.

Abstract: This document contains final rules implementing the Paul Wellstone and Pete Domenici Mental Health Parity and Addiction Equity Act of 2008, which requires parity between mental health or substance use disorder benefits and medical/surgical benefits with respect to financial requirements and treatment limitations under group health plans and group and individual health insurance coverage.

Current Actions: There is no change in the paperwork burden previously approved by OMB.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses or other for-profits, Not-for-profit institutions.

Estimated Number of Respondents: 424,000.

Estimated Time Per Respondent: 1 min.

Estimated Total Annual Burden Hours: 1,900.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: November 19, 2015.

R. Joseph Durbala,

IRS, Tax Analyst.

BILLING CODE 4830-01-P

DEPARTMENT OF THE TREASURY

Departmental Offices; Proposed Collection; Comment Request

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork burdens, invites the general public and other Federal agencies to comment on a currently approved information collection form that is due for extension approval by the Office of Management and Budget. The Terrorism Risk Insurance Program Office, which is part of the Federal Insurance Office within the Department of the Treasury, is soliciting comments concerning the Record Keeping Requirements set forth in 31 CFR part 50, subpart J (Sec. 50.94).

DATES: Written comments must be received not later than January 26, 2016.

ADDRESSES: Interested persons may submit comments electronically through the Federal eRulemaking Portal at <http://www.regulations.gov>, in accordance with the instructions on that site. In general, the Department will post all comments to www.regulations.gov without change, including any business or personal information provided such as names, addresses, email addresses, or telephone numbers. The Department will also make such comments available for public inspection and copying in the Treasury's Library, 1500 Pennsylvania Avenue NW., Washington, DC 20220, on official business days between the hours of 10:00 a.m. and 5:00 p.m. Eastern Time. You can make an appointment to inspect comments by telephoning (202) 622-0990. All comments, including attachments and other supporting materials, are part of the public record and subject to public disclosure. You should submit only information that you wish to make available publicly.

Electronic submissions are encouraged.

Comments may also be mailed to the Department of the Treasury, Terrorism Risk Insurance Office, MT 1410, 1500 Pennsylvania Avenue NW., Washington, DC 20220.

FOR FURTHER INFORMATION CONTACT: Richard Ifft, Senior Insurance Regulatory Policy Analyst, Federal Insurance Office, Room 1319,

Department of the Treasury, 1500 Pennsylvania Avenue NW., Washington, DC 20220, at (202) 622-2922 (this is not a toll-free number) or Kevin Meehan, Policy Advisor, Federal Insurance Office, Room 1410, Department of the Treasury, 1500 Pennsylvania Avenue NW., Washington, DC 20220, at (202) 622-7009 (this is not a toll-free number). Persons who have difficulty hearing or speaking may access this number via TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

SUPPLEMENTARY INFORMATION:

OMB Number: 1505-0208.

Title: Terrorism Risk Insurance Program—Program Cap on Annual Liability.

Abstract: The Terrorism Risk Insurance Act of 2002, as amended (TRIA),¹ established the Terrorism Risk Insurance Program (TRIP),² which the Secretary of the U.S. Department of the Treasury (Secretary) administers, with the assistance of the Federal Insurance Office.³ Section 103(e) of TRIA sets a limit on the annual liability for insured losses at \$100 billion. This section requires the Secretary to notify Congress not later than 15 days after an act of terrorism as to whether aggregate insured losses are estimated to exceed the cap. TRIA, as amended, also requires the Secretary to determine the pro rata share of insured losses under the Program when insured losses exceed the cap, and to issue regulations for carrying this out. In order to meet these requirements, Treasury may need to obtain loss information from involved insurers. This would be accomplished by the issuance of a “data call” to ascertain insurer losses. In the event of the imposition on insurers of a “pro rata loss percentage”, it will be necessary to determine compliance when processing insurer claims for payment of the Federal share of compensation. The Terrorism Risk Insurance Program Reauthorization Act of 2015 (Pub. L. 114-1) (2015 Reauthorization Act) requires insurers participating in the Program to submit to Treasury certain information regarding the operation of the Program. Treasury is presently considering the information that should be collected under the 2015 Reauthorization Act. It is possible that information that will be collected pursuant to this process under consideration might affect the amount of information that would need to be

collected pursuant to this currently approved data collection. Treasury will address such issues in connection with any notice that it issues concerning data collection under the Terrorism Risk Insurance Program Reauthorization Act of 2015. This extension is sought to maintain the existing approved data collection in place, consistent with the requirements of the Paperwork Reduction Act, pending the proposal by Treasury of any additional data collection in connection with the Program.

Type of Review: Extension of a currently approved data collection.

Affected Public: Business/Financial Institutions.

Estimated Number of Respondents: 200.

Estimated Average Time per Respondent: 5 hours.

Estimated Total Annual Burden Hours: 1,000 hours.

Request for Comments: An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency’s estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information collections; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Michael T. McRaith,

Director, Federal Insurance Office.

BILLING CODE 4810-25-P

DEPARTMENT OF THE TREASURY

**Submission for OMB Review;
Comment Request**

AGENCY: Department of the Treasury.

ACTION: Notice.

The Department of the Treasury will submit the following information

collection requests to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, Public Law 104-13, on or after the date of publication of this notice.

DATES: Comments should be received on or before December 28, 2015 to be assured of consideration.

ADDRESSES: Send comments regarding the burden estimate, or any other aspect of the information collection, including suggestions for reducing the burden, to (1) Office of Information and Regulatory Affairs, Office of Management and Budget, Attention: Desk Officer for Treasury, New Executive Office Building, Room 10235, Washington, DC 20503, or email at OIRA_Submission@OMB.EOP.gov and (2) Treasury PRA Clearance Officer, 1750 Pennsylvania Ave. NW., Suite 8140, Washington, DC 20220, or email at PRA@treasury.gov.

FOR FURTHER INFORMATION CONTACT:

Copies of the submission(s) may be obtained by email at PRA@treasury.gov or the entire information collection request may be found at www.reginfo.gov.

SUPPLEMENTARY INFORMATION:

Internal Revenue Service (IRS)

OMB Number: 1545-0432.

Type of Review: Extension without change of a previously approved collection.

Title: Request for Discharge from Personal Liability Under Internal Revenue Code Section 2204 or 6905.

Form: 5495.

Abstract: Form 5495 provides guidance under sections 2204 and 6905 for executors of estates and fiduciaries of decedent’s trusts. The form, filed after regular filing of an Estate, Gift, or Income Tax Return for a Decedent, is used by the executor or fiduciary to request discharge from personal liability for any deficiency for the tax and periods shown on the form.

Affected Public: Individuals or Households.

Estimated Annual Burden Hours: 306,500.

OMB Number: 1545-0973.

Type of Review: Extension without change of a previously approved collection.

Title: Geographic Availability Statement.

Form: 8569.

Abstract: The data collected from this form is used by the executive panels responsible for screening internal and external applicants for the SES Candidate Development Program, and other executive position.

¹ 15 U.S.C. 6701 note. Because the provisions of TRIA (as amended) appear in a note, instead of particular sections, of the United States Code, the provisions of TRIA are identified by the sections of the law.

² See 31 CFR part 50.

³ 31 U.S.C. 313(c)(1)(D).

Affected Public: Individuals and Households.

Estimated Annual Burden Hours: 84.

OMB Number: 1545–1251.

Type of Review: Extension without change of a previously approved collection.

Title: TD 8437—Limitations on Percentage Depletion in the Case of Oil and Gas Wells.

Abstract: Section 1.613A–3(e)(6)(i) of the regulations requires each partner to separately keep records of the partner's share of the adjusted basis of partnership oil and gas property.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 49,550.

OMB Number: 1545–1344.

Type of Review: Extension without change of a previously approved collection.

Title: TD 8560 (CO–30–92) Consolidated Returns—Stock Basis and Excess Loss Accounts, Earnings and Profits, Absorption of Deductions and Losses, Joining and Leaving Consolidated Groups, Worthless (Final).

Abstract: The reporting requirements affect consolidated taxpayers who will be making elections (if made) to treat certain loss carryovers as expiring and an election (if made) allocating items between returns. The information will facilitate enforcement of consolidated return regulations.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 18,600.

OMB Number: 1545–1499.

Type of Review: Extension without change of a previously approved collection.

Title: Revenue Procedure 2006–10, Acceptance Agents.

Abstract: Revenue Procedure 2006–10 describes application procedures for becoming an acceptance agent and the requisite agreement that an agent must execute with IRS.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 24,960.

OMB Number: 1545–1541.

Type of Review: Revision of a previously approved collection.

Title: Revenue Procedure 97–27, Changes in Methods of Accounting.

Abstract: The information requested in sections 6, 8, and 13 of Revenue Procedure 97–27 is required in order for the Commissioner to determine whether the taxpayer is properly requesting to change its method of accounting and the terms and condition of that change.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 9,083.

OMB Number: 1545–1545.

Type of Review: Extension without change of a previously approved collection.

Title: TD 8769—(REG–107644–97) Permitted Elimination of Pre-retirement Optional Forms of Benefit.

Abstract: The final regulations permit taxpayers to amend qualified plans to eliminate plan provisions for benefit distributions before retirement but after age 70–1/2, if certain conditions are satisfied.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 48,800.

OMB Number: 1545–1674.

Type of Review: Extension without change of a previously approved collection.

Title: Revenue Procedure 2015–36 Master and Prototype and Volume Submitter Plans (previously Rev. Proc. 2011–49 & 2005–16).

Abstract: This revenue procedure modifies Rev. Proc. 2011–49, 2011–44 I.R.B. 608. Rev. Proc. 2011–49 sets forth the procedures for issuing opinion and advisory letters regarding the acceptability under §§ 401 and 403(b) of the form of pre-approved plans (that it, master and prototype (M&P) and volume submitter (VS) plans. Rev. Proc. 2011–49 provided that the procedures for applying for opinion and advisory letters will be updated from time to time. This revenue procedure expands the scope of the pre-approved program to include defined benefit plans containing cash balance features and defined contribution plans containing employee stock ownership plan (ESOP) features. Plans with these types of features have been previously excluded from the pre-approved program. This revenue procedure also reflects changes that were made to the determination letter program to eliminate features that were of limited usefulness to sponsors and to improve program efficiency by reducing the time it takes to process determination letter requests.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 988,290.

OMB Number: 1545–1828.

Type of Review: Extension without change of a previously approved collection.

Title: TD 9048; 9254—Guidance under Section 1502; Suspension of

Losses on Certain Stock Disposition (REG–131478–02).

Abstract: The information in Sec. 1.1502–35(c) is necessary to ensure that a consolidated group does not obtain more than one tax benefit from both the utilization of a loss from the disposition of stock and the utilization of a loss or deduction with respect to another asset that reflects the same economic loss; to allow the taxpayer to make an election under Sec. 1.1502–35(c)(5) that would benefit the taxpayer, the election in Sec. 1.1502–35(f) provides taxpayers the choice in the case of a worthless subsidiary to utilize a worthless stock deduction or absorb the subsidiary's losses; and Sec. 1.1502–35(g)(3) applies to ensure that taxpayers do not circumvent the loss suspension rule of § 1.1502–35(c) by deconsolidating a subsidiary and then re-importing to the group losses of such subsidiary.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 15,000.

OMB Number: 1545–1841.

Type of Review: Extension without change of a previously approved collection.

Title: TD 9142 (Final), Deemed IRAs in Qualified Retirement Plans (REG–157302–02).

Abstract: Section 408(q), added to the Internal Revenue Code by section 602 of the Economic Growth and Tax Relief Reconciliation Act of 2001, provides that separate accounts and annuities may be added to qualified employer plans and deemed to be individual retirement accounts and individual retirement annuities if certain requirements are met. Section 1.408(q)–1(f)(2) provides that these deemed IRAs must be held in a trust or annuity contract separate from the trust or annuity contract of the qualified employer plan. This collection of information is required to ensure that the separate requirements of qualified employer plans.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 40,000.

OMB Number: 1545–1969.

Type of Review: Extension without change of a previously approved collection.

Title: Form 13751—Waiver of Right to Consistent Agreement of Partnership Items and Partnership-Level Determinations as to Penalties, Additions to Tax, and Additional Amounts.

Form: 13751.

Abstract: Per the IRS Global Settlement Initiative, the information

requested on Form 13751 will be used to determine the eligibility for participation in the settlement initiative of taxpayers related through TEFRA (Tax Equity and Fiscal Responsibility Act of 1982) partnerships to ineligible applicants. Such determinations will involve partnership items and partnership-level determinations, as well as the calculation of tax liabilities resolved under this initiative, including penalties and interest.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 100.

OMB Number: 1545–1986.

Type of Review: Extension without change of a previously approved collection.

Title: Notice 2006–47, Elections Created or Effected by the American Jobs Creation Act of 2004.

Abstract: The collection of information will enable the Internal Revenue Service to ensure that the eligibility requirements for the various elections or revocations have been satisfied and are in compliance with the requisite sections.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 3,034,765.

OMB Number: 1545–1990.

Type of Review: Extension without change of a previously approved collection.

Title: Application of Section 338 to Insurance Companies.

Abstract: These regulations will allow companies to retroactively apply the regulations to transactions completed prior to the effective date and to stop an election to use a historic loss payment pattern.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 12.

OMB Number: 1545–2115.

Type of Review: Extension without change of a previously approved collection.

Title: TD 9481—Travel Expenses of State Legislators (REG–119518–07).

Abstract: This document contains regulations relating to travel expenses of state legislators. The regulations affect state legislators who make the election under section 162(h) of the Internal Revenue Code to treat their residences in their legislative districts as their tax homes.

Affected Public: Individuals or Households.

Estimated Annual Burden Hours: 3,700.

OMB Number: 1545–2133.

Type of Review: Extension without change of a previously approved collection.

Title: Rev. Proc. 2009–16, Section 168(k)(4) Election Procedures and Rev. Proc. 2009–33, Section 168(k)(4) Extension Property Elections.

Abstract: Rev. Proc. 2009–16 provides the time and manner for making the election to apply section 168(k)(4) of the Internal Revenue Code, for making the allocation of the bonus depreciation amount to increase certain limitation, and for making the election to apply section 3081(b) of the Housing and Economic Recovery Act of 2008. It provides the time and manner for a corporation to make the elections provided under new section 168(k)(4)(H) of the Internal Revenue Code with respect to the acceleration of claiming research or alternative minimum tax credits in lieu of claiming the bonus depreciation deduction.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 2,700.

OMB Number: 1545–2134.

Type of Review: Extension without change of a previously approved collection.

Title: Notice 2009–41—Credit for Residential Energy Efficient Property.

Abstract: This notice provides guidance about the procedures by which a manufacturer can certify that residential energy efficient property qualifies for the § 25D credit. This notice is intended to provide (1) guidance concerning the methods by which manufacturers can provide such certifications to taxpayers, and (2) guidance concerning the methods by which taxpayers can claim such credits.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 350.

OMB Number: 1545–2137.

Type of Review: Extension without change of a previously approved collection.

Title: Form 8936—Qualified Plug-in Electric Drive Motor Vehicle Credit (Notice 2009–89).

Abstract: The notice sets forth interim guidance, pending the issuance of regulations, relating to the new qualified plug-in electric drive motor vehicle credit under § 30D of the Internal Revenue Code, as in effect for vehicles acquired after December 31, 2009. For tax years beginning after 2008, Form 8936 is used to figure the credit for qualified plug-in electric drive motor vehicles placed in service during the tax year. The credit attributable to depreciable property (vehicles used for

business or investment purposes) is treated as a general business credit. Any credit not attributable to depreciable property is treated as a personal credit.

Affected Public: Private Sector: Businesses or other for-profits.

Estimated Annual Burden Hours: 267,780.

OMB Number: 1545–2138.

Type of Review: Extension without change of a previously approved collection.

Title: Form W–8CE—Notice of Expatriation and Waiver of Treaty Benefits.

Form: W–8CE.

Abstract: Information used by taxpayer to notify payer of expatriation so that proper tax treatment is applied by payer. The taxpayer is required to file this form to obtain any benefit accorded by the statute.

Affected Public: Individuals or Households.

Estimated Annual Burden Hours: 2,840.

OMB Number: 1545–2139.

Type of Review: Extension without change of a previously approved collection.

Title: Identity Theft Affidavit.

Form: 14039, 14039–B, 14039 (SP), 14039–B (SP).

Abstract: The primary purpose of the form is to provide a method of reporting identity theft issues to the IRS so that the IRS may document situations where individuals are or may be victims of identity theft. Additional purposes include the use in the determination of proper tax liability and to relieve taxpayer burden. The information may be disclosed only as provided by 26 U.S.C 6103.

Affected Public: Individuals or Households.

Estimated Annual Burden Hours: 25,000.

Dated: November 23, 2015.

Dawn D. Wolfgang,

Treasury PRA Clearance Officer.

BILLING CODE 4810-AS-P

DEPARTMENT OF VETERANS AFFAIRS

Commission on Care; Notice of Meeting

In accordance with the Federal Advisory Committee Act, 5 U.S.C., App. 2, the Commission on Care gives notice that it will meet on Monday, December 14, 2015, Tuesday, December 15, 2015, and Wednesday, December 16, 2015 at the J.W. Marriott, Jr. ASAE Conference Center, 1575 I St. NW., Washington, DC 20005. The meeting will convene at 8:30 a.m. and end at 12:30 p.m. on all days. The meeting is open to the public.

The purpose of the Commission, as described in section 202 of the Veterans Access, Choice, and Accountability Act of 2014, is to examine the access of veterans to health care from the Department of Veterans Affairs and strategically examine how best to organize the Veterans Health Administration, locate health care resources, and deliver health care to veterans during the next 20 years.

On the mornings of December 14, 15, and 16, the Commission will hear from

experts who will provide insights on work to be done by the Commission. On the afternoons of December 14, 15, and 16, the Commission will convene closed sessions in accordance with The Government in the Sunshine Act, 5 U.S.C. 552b (c)(2) and (c)(9)(B), or to conduct administrative work.

No time will be allocated at this meeting for receiving oral presentations from the public. The public may submit written statements for the Commission's review to Sharon Gilles or John Goodrich, Designated Federal Officers, Commission on Care, at *sharon.gilles@va.gov* or *john.goodrich@va.gov*, respectively. Any member of the public

wanting to attend may contact Ms. Gilles or Mr. Goodrich.

Dated: November 20, 2015.

Sharon Gilles,

Designated Federal Officer, Commission on Care.

[Docket No. FDA-2011-N-0143]

RIN 0910-AG64

Foreign Supplier Verification Programs for Importers of Food for Humans and Animals

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is adopting a regulation on foreign supplier verification programs (FSVPs) for importers of food for humans and animals. The regulation requires importers to verify that food they import into the United States is produced in compliance with the hazard analysis and risk-based preventive controls and standards for produce safety provisions of the Federal Food, Drug, and Cosmetic Act (the FD&C Act), is not adulterated, and is not misbranded with respect to food allergen labeling. We are issuing this regulation in accordance with the FDA Food Safety Modernization Act (FSMA). The regulation will help ensure the safety of imported food.

DATES: This rule is effective January 26, 2016. For the applicable compliance dates, see “Effective and Compliance Dates” in the **SUPPLEMENTARY INFORMATION** section of this document.

ADDRESSES: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov> and insert the docket number found in brackets in the heading of this final rule into the “Search” box and follow the prompts, and/or go to the Division of Dockets Management, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Executive Summary

Purpose and Coverage of the Rule

This rule is part of FDA’s implementation of the FDA Food Safety Modernization Act (FSMA), which intends to better protect public health by, among other things, adopting a modern, preventive, and risk-based approach to food safety regulation. This rule adopts provisions concerning FSVPs that importers must create and follow to help ensure the safety of imported food. The regulation is designed to be flexible based on risk, and the requirements vary based on the type of food product (such as processed foods, produce, and dietary supplements) and category of importer.

Congress required importers to perform risk-based foreign supplier verification activities and directed FDA to promulgate regulations on the content of FSVPs in section 301 of FSMA, codified in section 805 of the FD&C Act. The rule requires importers to implement FSVPs to provide adequate assurances that the importer’s foreign suppliers produce food in compliance with processes and procedures, including risk-based preventive controls, that provide the same level of public health protection as those required under section 418 (concerning hazard analysis and preventive controls) or 419 (concerning produce safety) of the FD&C Act, as appropriate, and in compliance with sections 402 (concerning adulteration) and 403(w) (concerning misbranding regarding allergen labeling) of the FD&C Act.

This rule is the result of significant stakeholder engagement. We took this approach to help ensure that the rule achieves its public health goal, reflects industry practice, and strikes the right balance between flexibility and accountability.

Summary of the Major Provisions of the Final Rule

We are finalizing a flexible, risk-based approach to foreign supplier verification. The FSVP regulation focuses on known or reasonably foreseeable food safety hazards, identified and considered through a hazard analysis and evaluation process, rather than all adulteration covered by the adulteration provisions in section 402 of the FD&C Act. After considering the comments on the proposed rule and the subsequently revised proposal along with other stakeholder input, we continue to believe that hazard analysis, which is well accepted and understood throughout the international food safety community, provides the most effective way to implement a risk-based framework in which importers can evaluate potential products and suppliers and ensure that appropriate verification activities occur.

The FSVP regulation aligns with key components of the food safety plans that facilities that manufacture, process, pack, or hold must establish and follow under FDA’s recently issued regulations on current good manufacturing practice (CGMP) and hazard analysis and risk-based preventive controls for human food and animal food (preventive controls regulations). In particular, the FSVP final rule is consistent with the supply-chain program provisions of those regulations to the extent feasible and appropriate. The general FSVP framework, together with the modified

requirements applicable to certain importers and foods, are intended to be sufficiently general and flexible to apply to a variety of circumstances without being unduly burdensome or restrictive of trade.

Although FSVP requirements apply to most imported food under FDA's regulatory jurisdiction, certain categories of imported food are not covered under the FSVP regulation. These exemptions include certain juice, fish, and fishery products (which are already subject to verification under FDA's hazard analysis and critical control point (HACCP) regulations for those products), food for research or evaluation, food for personal consumption, alcoholic beverages, food that is transshipped, food imported for processing and future export, food exported from and returned to the United States without manufacturing/processing in a foreign country, and certain meat, poultry, and egg products regulated by the U.S. Department of Agriculture (USDA).

In the final rule, we have added new provisions to allow greater flexibility with respect to certain requirements to better reflect modern food supply and distribution chains. Under the FSVP regulation, importers are responsible for:

1. Determining the hazards reasonably likely to cause illness or injury with each food. Importers can conduct their own analysis of the potential hazards with a food or review and assess a hazard analysis conducted by another entity.

2. Evaluating the risk posed by a food, using the results of the hazard analysis, and evaluating the foreign supplier's performance. This evaluation informs the approval of foreign suppliers and the determination of appropriate supplier verification activities. An importer may rely on another entity to conduct this evaluation and to determine the appropriate supplier verification activities as long as the importer reviews and assesses the evaluation, determination, or both, as applicable. An importer must approve its own foreign suppliers.

3. Conducting supplier verification activities. In general, importers must establish and follow written procedures to ensure they only import foods from foreign suppliers they have approved. However, importers may import food from unapproved foreign suppliers, on a temporary basis when necessary and appropriate, if they subject the food from these suppliers to adequate verification activities before importing it.

Importers are responsible for determining and documenting foreign supplier verification activities (as well as the frequency with which those activities must be conducted) that are appropriate to provide assurance that hazards requiring a control in food are significantly minimized or prevented. Importers must conduct supplier verification activities for each foreign supplier before importing a food into the United States and periodically thereafter. An importer may determine, document, and conduct these activities itself or may rely on other entities to perform those tasks, as long as the importer reviews and assesses the relevant documentation, including the results of supplier verification activities.

The appropriate verification activities and their frequency will vary depending on the food, the foreign supplier, and the nature of the control. Appropriate verification activities include: onsite auditing, sampling and testing of a food, review of the foreign supplier's relevant food safety records, and other activities that are appropriate based on the evaluation of the risk posed by the food and foreign supplier performance.

When a hazard in a food will be controlled by the foreign supplier and is one for which there is a reasonable probability that exposure to the hazard will result in serious adverse health consequences or death to humans or animals, the default appropriate verification activity under the regulation is an annual onsite audit of the foreign supplier. To provide flexibility even in these circumstances, the rule allows for the performance of a different supplier verification activity and/or less frequent onsite auditing provided an adequate written determination is made that the other approach will meet the public health purpose of supplier verification.

4. Performing appropriate activities in other circumstances. The final rule also adds flexibility and recognizes the reality of modern distribution chains by not requiring an importer to conduct supplier verification (or evaluate the risk posed by a food and the foreign supplier's performance) when the hazard requiring a control in a food will be controlled by a subsequent entity in the distribution chain in the United States. For example, if an importer's customer will control the hazard, the importer can rely on its customer to provide written assurance that the food will be processed for food safety and must disclose that the food has not been processed to control the identified hazard. If the hazard will be controlled by a subsequent entity in the distribution chain, the final rule requires disclosure that the food has not

been processed to control the identified hazard as well as a series of written assurances starting with assurances from the customer to the importer and continuing the obligation to provide written assurance of processing for food safety throughout the distribution chain. We also have provided flexibility for an importer to establish, document, and implement an alternative system that ensures adequate control, at a later distribution step, of the hazards in a food product distributed by a manufacturing/processing facility.

5. Conducting corrective actions. An importer must take appropriate corrective actions promptly if it determines that a foreign supplier of a food it imports does not produce the food in compliance with the processes and procedures that provide the same level of public health protection as those required under section 418 or 419 of the FD&C Act, if either is applicable, or produces food that is adulterated under section 402 or misbranded under section 403(w) (if applicable) of the FD&C Act. This determination could be based on a review of consumer, customer, or other complaints related to food safety, verification activities, or other information. The appropriate corrective actions will depend on the circumstances but could include discontinuing use of the foreign supplier until the problem is resolved.

6. Identifying themselves as the importer of the food for each line of food product offered for importation into the United States.

7. Retaining records of FSVP activities.

Modified Provisions for Certain Types of Importers

The rule provides several exceptions to the standard FSVP requirements for certain types of importers. First, for dietary supplements and dietary supplement components, importers who establish and verify compliance with certain specifications (concerning dietary supplement components and packaging) under the dietary supplement CGMP regulations will not be required to comply with most of the standard FSVP requirements, including hazard analysis and standard supplier verification activities. The same exception would apply to importers whose customer is required to establish such specifications and verify that they are met, except that the importer would have to obtain written assurance that its customer is complying with those requirements. In contrast, importers of other dietary supplements would be required to comply with most of the standard FSVP requirements but would

not have to conduct hazard analyses, and their supplier verification activities would focus on verifying that the supplier is in compliance with the dietary supplement CGMP regulation, rather than verifying that hazards requiring a control are significantly minimized or prevented, as required under the standard supplier verification activity provisions.

Second, the rule establishes modified FSVP requirements for very small importers and importers of food from certain small foreign suppliers. We have aligned the definition of “very small importer” with the definitions of “very small business” under the regulations on preventive controls for human food and animal food. With respect to the importation of human food, the definition of very small importer has an annual sales ceiling of \$1,000,000, which is consistent with the \$1,000,000 annual sales ceiling for a very small business under the preventive controls for human food regulation. With respect to the importation of animal food, the definition of very small importer has an annual sales ceiling of \$2,500,000, which is consistent with the \$2,500,000 annual sales ceiling for a very small business under the preventive controls for animal food regulation.

In addition, food from three types of small foreign suppliers is not subject to standard supplier verification requirements. Those foreign suppliers are: (1) Qualified facilities under either of the preventive controls regulations, (2) farms that are not “covered farms” under the produce safety regulation in part 112 (21 CFR part 112) in accordance with § 112.4(a), or in accordance with §§ 112.4(b) and 112.5, and (3) shell egg producers not subject to part 118 (21 CFR part 118) because the shell egg producer has fewer than 3,000 laying hens. Each of these types

of producers is either exempt from their underlying FDA food safety regulations or subject to modified requirements, mostly, and in some cases entirely, because of the size of these producers.

The relatively small volume of food imported by and from these entities should reduce consumers’ exposure to, and potential risk from, this imported food. Therefore, we are proposing that in these situations the importer would not be required to conduct a hazard analysis and would be able to verify their foreign suppliers by obtaining written assurance of their supplier’s compliance with the applicable food safety regulations (or, in some cases, the supplier’s acknowledgement that it is subject to the adulteration provisions of the FD&C Act). This policy is similarly reflected in the supply-chain program provisions of the preventive controls regulations.

Third, the rule excludes from most of the standard FSVP requirements (including hazard analysis and verification that identified hazards are significantly minimized or prevented) certain types of food from a foreign supplier in a country whose food safety system FDA has officially recognized as comparable or determined to be equivalent to that of the United States, provided that:

- The food is within the scope of the relevant official recognition or equivalency determination;
- The importer determines that the foreign supplier of the food is in good compliance standing with the relevant food safety authority; and
- The food is not intended for further processing in the United States, *e.g.*, packaged food products and raw agricultural commodities (RACs) that will not be processed further before consumption.

These provisions are consistent with our risk-based approach to foreign supplier verification because they enable both importers and FDA to leverage the regulatory efforts of food safety authorities in countries the Agency has officially determined to have food safety systems that are comparable or equivalent to that of the United States.

Costs and Benefits

This final rule requires importers of human and animal food to establish foreign supplier verification programs. It includes requirements regarding use of qualified individuals, evaluation of hazards in food and foreign supplier performance, verification of suppliers (through activities such as onsite audits, testing, and records review), and importer identification at entry. The total annualized costs of the final rule are estimated to be approximately \$435 million per year under 3 percent and 7 percent discount rates over 10 years. In the proposed rule’s Preliminary Regulatory Impact Analysis (PRIA), we calculated costs under three different scenarios reflecting different percentages of importers who, under proposed Option 2 for supplier verification requirements, might choose to conduct onsite audits of their foreign suppliers rather than perform different permitted verification activities. We present the Scenario 1 estimate (under which 63 percent of the importers we estimated would need to conduct mandatory onsite audits of their foreign suppliers under proposed Option 1 would conduct onsite audits under the final rule) as the overall estimate to facilitate comparison with the summary tables in the PRIA and the Supplemental PRIA; however, the summary table provides totals costs under all three scenarios.

Although the FSVP regulation does not establish safety requirements for food manufacturing and processing, it benefits the public health by helping to ensure that imported food is produced in a manner consistent with other applicable food safety regulations. The Regulatory Impact Analyses for the final rules on preventive controls for human food and standards for produce safety consider and analyze the number of illnesses and deaths that those regulations are aimed at reducing. The greater the compliance with those regulations, the greater the expected reduction in illnesses and deaths as well as the costs associated with them. The FSVP regulation will be an important mechanism for improving and helping to ensure compliance with the above-noted food safety regulations as they apply to imported food. For this reason,

and because we do not have sufficient data to determine the extent to which particular regulations might be responsible for the expected reduction in foodborne illnesses resulting from the FSMA final rules, we account for the public health benefits of the FSVP regulation in the preventive controls, produce safety, and other applicable food safety regulations instead of in this final rule.

I. Background

A. FDA Food Safety Modernization Act

FSMA (Pub. L. 111–353), signed into law by President Obama on January 4, 2011, is intended to allow FDA to better protect public health by helping to ensure the safety and security of the food supply. FSMA enables us to focus more on preventing food safety

problems rather than relying primarily on reacting to problems after they occur. The law also provides new enforcement authorities to help achieve higher rates of compliance with risk-based, prevention-oriented safety standards and to better respond to problems when they occur. In addition, the law contains important new tools to better ensure the safety of imported foods and encourages partnerships with State, local, tribal, and territorial authorities. A top priority for FDA are those FSMA-required regulations that provide the framework for industry’s implementation of preventive controls and enhance our ability to oversee their implementation for both domestic and imported food. To that end, we proposed the seven foundational rules listed in Table 1 and requested comments on all aspects of these proposed rules.

Foreign Supplier Verification Programs for Importers of Food for Humans and Animals.	2014 FSVP supplemental notice	79 FR 58574, September 29, 2014.

We finalized two of the foundational rulemakings listed in Table 3 in September 2015.

TABLE 3—PUBLISHED FOUNDATIONAL RULES FOR IMPLEMENTATION OF FSMA

Title	Abbreviation	Publication
Current Good Manufacturing Practice and Hazard Analysis and Risk-Based Preventive Controls for Human Food.	Preventive controls for human food final rule.	80 FR 55908, September 17, 2015.
Current Good Manufacturing Practice and Hazard Analysis and Risk-Based Preventive Controls for Food for Animals.	Preventive controls for animal food final rule.	80 FR 56170, September 17, 2015.

As we finalize these seven foundational rulemakings, we are putting in place a modern framework for food safety that brings to bear the most current science on the regulation of food safety, is risk-based and focuses efforts on known or reasonably foreseeable hazards, and is flexible and practical given existing food safety practices. To achieve this, we have engaged in extensive outreach to the stakeholder community to find the right balance of flexibility and accountability in this regulation.

Since FSMA was enacted in 2011, we have been involved in approximately 600 engagements on FSMA and the proposed rules, including public meetings, webinars, listening sessions, farm tours, and extensive presentations and meetings with various stakeholder groups (Refs. 1–3). As a result of this stakeholder dialogue, we decided to issue the four supplemental notices of proposed rulemaking to announce several changes to our proposals, share our current thinking on key issues, and

get additional stakeholder input on those issues. As we move forward into the next phase of FSMA implementation, we intend to continue this dialogue and collaboration with our stakeholders, through guidance, education, training, and assistance, to ensure that everyone understands and engages in their role in food safety. We believe these seven foundational final rules will effectively implement the paradigm shift toward prevention envisioned in FSMA and be a major step forward for food safety that will help protect consumers into the future.

B. Stages in the FSVP Rulemaking

Section 301 of FSMA added section 805 to the FD&C Act (21 U.S.C. 384a) to require persons who import food into the United States to perform risk-based foreign supplier verification activities. Section 805(c) of the FD&C Act directs FDA to issue regulations on the content of FSVPs.

We published a proposed rule on FSVPs in 2013 (78 FR 45730, July 29,

2013). We published new and revised provisions in a 2014 supplemental notice of proposed rulemaking (Supplemental Notice) (79 FR 58574, September 29, 2014). In the Supplemental Notice, we reopened the comment period on the proposed rule only with respect to specific proposed provisions. In addition, we emphasized that the revised provisions we included in the regulatory text were based on a preliminary review of the comments.

In this document, we use the terms “FSVP proposed regulations” or “proposed rule” to refer to the complete proposed regulatory text, including both the proposed provisions we published in the 2013 proposed rule and the new and revised provisions we published in the 2014 Supplemental Notice. We use the terms “2013 FSVP proposed rule” and “Supplemental Notice” to refer to specific text published in those documents. We use the terms “FSVP regulation,” “final rule,” and “this rule” to refer to the regulation we are establishing as a result of this

rulemaking. We also use the term “preventive controls regulations” to refer to the regulations on preventive controls for human food and preventive controls for animal food collectively.

C. Summary of the Major Provisions of the Proposed Rule

The proposed FSVP regulation, set forth in proposed subpart L of part 1 (21 CFR part 1), would require importers of most imported food to take risk-based steps to verify that the food they import is produced in compliance with applicable FDA regulatory requirements. The proposed regulation was intended to work in tandem with provisions of FSMA and the FD&C Act to create a more seamless system of food safety, applicable to both domestic and imported food, that provides appropriate layers of protection for U.S. consumers. At its core, FSMA establishes a preventive and risk-based approach that assigns to the food industry the primary responsibility for food safety. For example, FSMA requires food facilities that manufacture, process, pack, or hold food to implement risk-based preventive controls (in section 103 of FSMA, codified in section 418 of the FD&C Act (21 U.S.C. 350g)), with certain exceptions. FSMA also requires FDA to establish science-based, minimum standards for farms that grow, harvest, pack, and hold certain produce, also with certain exceptions (in section 105 of FSMA, codified in section 419 of the FD&C Act (21 U.S.C. 350h)). The intent of these requirements is to ensure that all segments of the food industry meet their responsibilities under the FD&C Act to produce safe food.

While FSMA grants FDA additional enforcement tools and directs the Agency to increase its inspections of food facilities, Congress determined that more was needed to adequately control the safety risks posed by imported food. Thus, FSMA creates new obligations for food importers. The FSVP proposed regulation was intended to ensure that importers take responsibility for the safety of the food they import into the United States so no food safety gaps exist between foreign producers and U.S. consumers.

Through this and other FSMA regulations, we are establishing a modern, risk-based food safety system designed to hold those in the food safety supply chain accountable for meeting their responsibilities. In doing so, we recognize the variability within the food industry of the size of operations and the type and volume of foods produced. Therefore, we have written regulations that provide a flexible approach to food

safety, taking into account the risk posed by the food and the size of the regulated businesses. While these regulations establish strong, risk-based food safety standards, they allow firms flexibility in determining how they will meet these standards, as appropriate.

In accordance with FSMA, the FSVP regulation we proposed would require food importers to adopt programs to ensure that the food they import: (1) Is produced in a manner that provides the same level of public health protection as required under section 418 or 419 of the FD&C Act, as appropriate; (2) is not adulterated under section 402 of the FD&C Act (21 U.S.C. 342); and (3) is not misbranded under section 403(w) of the FD&C Act (21 U.S.C. 343(w)) (concerning allergen labeling). The proposed rule would require importers to take the following actions as part of their FSVPs:

- Use a qualified individual to perform most FSVP activities;
- Analyze known or reasonably foreseeable hazards in foods they import to determine if the hazards are significant;
- Determine and perform verification activities for foods they import, based on the hazard analysis and an evaluation of supplier risks;
- Establish and follow procedures to ensure they import foods only from foreign suppliers they have approved (except, when necessary and appropriate, from unapproved suppliers on a temporary basis);
- Review complaints, conduct investigations of adulterated or misbranded food, take corrective actions when appropriate, and modify the FSVP when it is determined to be inadequate;
- Reassess the effectiveness of the FSVP;
- Ensure that information identifying the importer is submitted upon entry of a food into the United States; and
- Maintain records of FSVP procedures and activities.

In addition to these “standard” FSVP requirements that would apply to most food importers, the proposed rule included modified requirements for the following:

- Importers of dietary supplements and dietary supplement components;
- Very small importers and importers of food from very small suppliers; and
- Importers of food from foreign suppliers in countries whose food safety systems FDA has officially recognized as comparable or determined to be equivalent to the U.S. food safety system.

D. Public Comments

We received more than 300 public submissions on the 2013 FSVP proposed rule and more than 100 public submissions on the 2014 Supplemental Notice, each containing one or more comments on various aspects of the proposal. We received submissions from diverse members of the public, including the following: Importers; coalitions; trade organizations; consulting firms; law firms; academia; public health organizations; public advocacy groups; consumers; consumer groups; Congress; Federal, State, local, and tribal Government Agencies; foreign governments; and other organizations. The comments address virtually every provision of the FSVP proposed rule. In the remainder of this document, we describe these comments, respond to them, and explain any changes we made to the proposed regulation.

Some comments address issues that are outside the scope of this rulemaking. For example, we received comments asking that we increase the frequency and standardization of our inspection of foreign food facilities, improve our entry review procedures, and revise the Reportable Food Registry. We do not discuss such comments in this document.

II. Legal Authority

On January 4, 2011, FSMA was signed into law. Section 301 of FSMA added section 805 to the FD&C Act to require persons who import food into the United States to perform risk-based foreign supplier verification activities for the purpose of verifying the following: (1) The food is produced in compliance with section 418 (concerning hazard analysis and risk-based preventive controls) or 419 (concerning standards for the safe production and harvesting of certain fruits and vegetables that are RACs) of the FD&C Act, as appropriate; (2) the food is not adulterated under section 402 of the FD&C Act; and (3) the food is not misbranded under section 403(w) of the FD&C Act (concerning food allergen labeling). Section 805(c) of the FD&C Act directs FDA to issue regulations on the content of FSVPs. Section 805(c)(2)(A) states that these regulations must require that the FSVP of each importer is adequate to provide assurances that each of the importer’s foreign suppliers produces food in compliance with processes and procedures, including risk-based preventive controls, that provide the same level of public health protection as those required under section 418 or 419 of the FD&C Act, as appropriate, and in

compliance with sections 402 and 403(w) of the FD&C Act. Section 805(c)(2)(B) states that these regulations must include such other requirements as FDA deems necessary and appropriate to verify that food imported into the United States is as safe as food produced and sold within the United States.

Section 805(c)(3) of the FD&C Act directs FDA to, as appropriate, take into account differences among importers and types of imported food, including based on the level of risk posed by the imported food. Section 805(c)(4) states that verification activities under FSVPs may include monitoring records for shipments, lot-by-lot certification of compliance, annual onsite inspections, checking the hazard analysis and risk-based preventive control plans of foreign suppliers, and periodically testing and sampling shipments of imported products. Section 805(d) states that records of an importer related to a foreign supplier verification program must be maintained for a period of not less than 2 years and must be made available promptly to a duly authorized representative of the Secretary of the Department of Health and Human Services (the Secretary) upon request. Section 805(g) directs FDA to publish and maintain a list of importers participating under section 805 on the Agency's Web site.

Section 301(b) of FSMA amends section 301 of the FD&C Act (21 U.S.C. 331) by adding section 301(zz), which designates as a prohibited act the importation or offering for importation of a food if the importer (as defined in section 805 of the FD&C Act) does not have in place an FSVP in compliance with section 805. In addition, section 301(c) of FSMA amends section 801(a) of the FD&C Act (21 U.S.C. 381(a)) by stating that an article of food being imported or offered for import into the United States must be refused admission if it appears from an examination of a sample of such an article or otherwise that the importer is in violation of section 805.

In addition to the authority specified in section 301 of FSMA to issue this regulation, section 701(a) of the FD&C Act (21 U.S.C. 371(a)) gives us the authority to issue regulations for the efficient enforcement of the FD&C Act. Also, some aspects of the FSVP regulation are supported by section 421(b) of the FD&C Act (21 U.S.C. 350j(b)).

In addition to the FD&C Act, FDA's legal authority for some aspects of the regulations derives from the Public Health Service Act (PHS Act) to the extent such measures are related to

communicable disease. Authority under the PHS Act is derived from the provisions of sections 311, 361, and 368 (42 U.S.C. 243, 264, and 271) that relate to communicable disease. The PHS Act authorizes the Secretary to make and enforce such regulations as "are necessary to prevent the introduction, transmission, or spread of communicable diseases from foreign countries into the States * * * or from one State * * * into any other State" (section 361(a) of the PHS Act) (see section 1, Reorg. Plan No. 3 of 1966 at 42 U.S.C. 202 for transfer of authority from the Surgeon General to the Secretary).

III. Comments on the Proposed Rule and Supplemental Notice of Proposed Rulemaking

A. Definitions (§ 1.500)

We proposed to codify definitions of several terms that we use in the FSVP regulation. As discussed in the following paragraphs, we have revised several of the proposed definitions in response to comments we received. The definitions for terms used in the FSVP regulation are set forth in § 1.500.

1. Definitions Generally

(Comment 1) Some comments suggest that we use the same definition for terms used in different FSMA rulemakings.

(Response 1) We agree and have aligned the definitions used in the different regulations as much as possible. However, in some cases the definitions of terms differ because of differences in the applicable statutory provisions or in the scope or purpose of the regulations.

2. Audit

We proposed to define "audit" as the systematic, independent, and documented examination (through observation, investigation, records review, and, as appropriate, sampling and laboratory analysis) to assess a foreign supplier's food safety processes and procedures.

On our own initiative, we have changed the definition to refer to an "audited entity" rather than a "foreign supplier" because in some cases an importer might conduct (or rely on the results of) an onsite audit of an entity other than the foreign supplier (such as a foreign supplier's supplier) to meet FSVP requirements. In addition, consistent with auditing practice we have added discussions with employees of the audited entity to the list of activities that might be included in an audit.

(Comment 2) One comment recommends that we interpret an "independent" examination as including audits other than third-party audits, such as audits conducted by the importer or the importer's customer.

(Response 2) To the extent the comment is requesting that the definition of the term "audit" allow an importer to rely on an audit conducted by the importer itself, we agree. To the extent, however, the comment is requesting that there be no requirements for the independence of auditors, we disagree. Any qualified auditor conducting an audit relied upon by an importer would need to meet the requirements for independence set forth in § 1.506(e)(4), discussed in section III.G.7 of this document. Note, however, that under § 1.506(e)(2)(i) an importer cannot rely on a supplier's self-audit to fulfill the importer's requirement to conduct supplier verification under § 1.506 (because the supplier would have an inherent conflict of interest regarding the audit results).

(Comment 3) One comment requests that sampling and laboratory analysis not be specified as a potential component of an audit because they are separate verification activities.

(Response 3) While sampling and laboratory analysis might in some instances be conducted instead of an audit or other verification activities, we do not agree that sampling and laboratory analysis cannot also be included as a component of an audit. A qualified auditor might reasonably determine that it is appropriate to include some sampling and testing of a food or raw material or other ingredient as part of an onsite audit of a foreign supplier.

3. Environmental Pathogen

We proposed to define "environmental pathogen" as a pathogen that is capable of surviving and persisting within the manufacturing, processing, packing, or holding environment such that food may be contaminated and may result in foodborne illness if that food is consumed without treatment to significantly minimize or prevent the environmental pathogen. The proposed definition also specified that environmental pathogens do not include the spores of pathogenic sporeformers. To provide additional clarity, the final rule specifies in the definition that examples of environmental pathogens include *Listeria monocytogenes* and *Salmonella* spp.

(Comment 4) Some comments suggest that instead of a "pathogen," the definition of environmental pathogen

should refer to “pathogenic bacteria” because the latter term is considered more relevant to protecting food safety.

(Response 4) We do not agree.

Pathogens other than bacteria might be capable of surviving in a manufacturing environment, cause food to be contaminated, and result in foodborne illness.

4. Farm

We are adding a definition of “farm” to the final rule. A “farm” is a farm as defined in § 1.227 (21 CFR 1.227) in the regulation on registration of food facilities.

5. Farm Mixed-Type Facility

We are adding a definition of “farm mixed-type facility” to the final rule. A “farm mixed-type facility” is an establishment that is a farm but that also conducts activities outside the farm definition that require the establishment to be registered under section 415 of the FD&C Act (21 U.S.C. 350d).

6. Food

We proposed to define “food” as having the meaning given in section 201(f) of the FD&C Act (21 U.S.C. 321(f)), except that food would not include pesticides as defined in 7 U.S.C. 136(u).

(Comment 5) Several comments request that we exclude food contact substances from the definition of food because facilities that manufacture, process, pack, or hold food contact substances are not required to register with FDA and therefore are not subject to the proposed regulations on preventive controls. One comment suggests that we either exclude food packaging from the FSVP regulation or establish modified requirements for packaging.

(Response 5) We do not agree that it is appropriate to exclude food contact substances (including food packaging), as defined in section 409(h)(6) of the FD&C Act (21 U.S.C. 348(h)(6)), from the definition of “food” for FSVP purposes. The definition of “food” in § 1.227, for the purposes of food facility registration, excludes food contact substances as defined in section 409(h)(6) of the FD&C Act. Consequently, a facility that manufactures/processes, packs, or holds food contact substances is not required to be registered. Because section 418 of the FD&C Act only applies to establishments that are required to register, facilities involved in the manufacturing/processing, packing, and holding of food contact substances are not subject to the preventive control regulations implementing section 418. Section 805 of the FD&C Act, however,

is not similarly limited to facilities that are required to register. Instead, section 805 applies to imports of “food.” The term “food” is defined in section 201(f)(3) of the FD&C Act to include articles used as components of food, and the case law interpreting the definition makes clear that many substances that meet the definition of food contact substances under section 409(h)(6) of the FD&C Act also meet the definition of food (see, e.g., *Natick Paperboard v. Weinberger*, 525 F.2d 1103 (1st Cir. 1975) (paperboard containing PCBs intended for food use is adulterated food); *U.S. v. Articles of Food 688 Cases of Pottery (Cathy Rose)*, 370 F. Supp. 371 (E.D. Mi. 1974) (ceramic pottery that leaches lead is adulterated food)). Further, we do not believe there is any evidence that Congress intended to exclude food contact substances from being considered “food” for purposes of section 805 and the FSVP regulation.

(Comment 6) Several comments request that we add raw materials and other ingredients to the definition of food for clarity and for consistency with the definition of food in the preventive controls regulations.

(Response 6) We conclude that the suggested change is unnecessary because the definition of food in section 201(f) of the FD&C Act, which we are incorporating in the FSVP regulation, defines food as including articles used for components of any such food or drink for man or animals, which includes raw materials and other ingredients.

(Comment 7) One comment states that chemicals used in processing foods (e.g., hydrochloric acid in the production of cheese) that are declared as food-grade most likely will be used in food production but sometimes will not be used for such purposes. The comment asks that we provide guidance on how to address such imported chemicals.

(Response 7) As explained in section III.B.9 of this document, substances such as chemicals that are capable of food and non-food use are subject to the FSVP regulation if they are reasonably likely to be directed to a food use. In the example provided by the comment, the application of the FSVP regulation would not be based solely on whether a substance is declared as food-grade. However, we would consider the fact that the chemical is declared as food-grade in determining whether the chemical is reasonably likely to be directed to a food use.

7. Foreign Supplier

We proposed to define “foreign supplier” as, for an article of food, the establishment that manufactures/

processes the food, raises the animal, or harvests the food that is exported to the United States without further manufacturing/processing by another establishment, except for further manufacturing/processing that consists solely of the addition of labeling or any similar activity of a de minimis nature.

In the preamble to the proposed rule, we stated that the proposed definition of foreign supplier was generally consistent with the definition of a foreign facility under the preventive controls section (section 418) of the FD&C Act. However, we stated that the proposed definition of foreign supplier did not include firms that only pack or hold food, with no or de minimis manufacturing/processing (even if the firm is required to register with FDA under section 415 of the FD&C Act) because we tentatively concluded that Congress intended the importer to verify a single foreign supplier for a particular shipment of a food and, when several entities are required to register as foreign facilities with respect to this food, excluding a subsequent registered packer or holder who does not do any significant manufacturing/processing would be consistent with this intent. We also stated that the proposed exclusion from the definition of foreign supplier of any establishment engaging in further manufacturing/processing of a food that consists solely of the addition of labeling or any similar activity of a de minimis nature was consistent with FDA regulations on the registration of foreign food facilities in subpart H of part 1 (see 21 CFR 1.226(a)).

(Comment 8) Several comments oppose the proposed definition of foreign supplier because they believe it would require importers to go more than “one step back” in the supply chain to conduct supplier verification. The comments maintain this would be inconsistent with section 204(d)(1)(L) of FSMA and the section 414 of the FD&C Act (21 U.S.C. 350c)). The comments assert that, when foods are obtained from entities such as brokers, distributors, and consolidators, rather than the entity that manufactured/processed, raised, or harvested the food, it would be difficult for the importer to know the identity of the producer because the consolidator might refuse to reveal this information due to concern that the importer might decide to buy directly from the producer in the future. The comments also maintain that in these circumstances, particularly with consolidated or commingled RACs, it would be impractical and burdensome to have to conduct supplier verification of the original producer of the food and could result in multiple audits of the

same farm or manufacturer. Therefore, some comments request that we define the foreign supplier as the immediate previous source of an imported food. The comments assert that under this definition, importers would conduct verification activities to assess the supplier's ability to verify that its suppliers (growers or manufacturers) were producing food consistent with U.S. requirements.

(Response 8) Although we understand the concerns related to obtaining food from an entity that did not manufacture/process, raise, or harvest the food, such as distributors, warehouses, and consolidators of RACs, we decline to revise the definition of foreign supplier as suggested. The other FSMA and FD&C Act provisions noted by the comments were enacted to serve different purposes than the FSVP provisions. Section 805(c)(2)(A) of the FD&C Act specifically directs FDA to adopt regulations requiring that each importer's FSVP is adequate to provide assurances that "the foreign supplier to the importer *produces* the imported food" (emphasis added) in compliance with the applicable U.S. standards. Therefore, we conclude that Congress did not intend supplier verification to be conducted for entities that only perform activities of a de minimis nature with respect to the imported food. Consequently, we conclude that it would not be appropriate to define "foreign supplier" so that the importer would be conducting supplier verification of an entity in the supply chain that did not perform any significant processing step, such as distributors and some consolidators of RACs.

However, we understand that the requirement to perform supplier verification on the establishment that manufactures/processes, raises, or grows the imported food could impose a greater burden on importers when the foreign supplier is not the immediate source of the imported food, such as the case with consolidated RACs. To address this concern, we have revised the provisions on hazard analysis, evaluation for foreign supplier approval and verification, and supplier verification activities to allow an importer of a food to obtain information needed to meet certain FSVP requirements from other entities, such as a distributor or consolidator of that food. As discussed in sections III.E.5, III.F.4, and III.G.4 of this document, an importer may review and assess hazard analyses, evaluations of the risk posed by a food and the foreign supplier's performance, determinations of appropriate foreign supplier verification

activities, and results of such activities conducted by other entities for an imported food to meet its FSVP requirements in these areas. We anticipate that many importers will be able to rely on activities conducted by other entities, which will reduce the need for importers to directly verify the compliance of producers from which the importers did not directly purchase the imported food. We conclude that this approach to foreign supplier verification ensures that the FSVP requirements are consistent with FSMA while limiting the burden that otherwise might be imposed on importers when the foreign supplier of a food is not the importer's direct source for the food.

(Comment 9) One comment states that firms that pack or hold food products (other than of de minimis value) could introduce hazards during these operations. The comment maintains that the proposed definition of foreign supplier conflicts with the definition of facility in the FD&C Act and appears contrary to the intent of ensuring the safety of imported food. One comment asks that we revise the definition of foreign supplier to clarify that, in addition to an entity that harvests a food, a foreign supplier might be the establishment that owns (or owns and packs) a harvested food.

(Response 9) We decline to change the definition of foreign supplier to include entities that only own, pack, or hold food. We conclude that defining foreign supplier to include a firm that only owns or packs or holds a food would not be consistent with Congressional intent, because it would have the effect of requiring that importers verify the establishment that merely owns, packs, and/or holds a food—as opposed to the establishment that "produces" a food. As stated previously, in enacting section 805(c)(2)(A) of the FD&C Act, Congress specifically directed us to adopt regulations requiring that each importer's FSVP is adequate to provide assurances that "the foreign supplier to the importer *produces* the imported food" (emphasis added) in compliance with the applicable U.S. standards.

(Comment 10) Two comments request that we revise the definition of foreign supplier to include an exception for activities conducted on RACs that do not change the RAC into processed food. The comments maintain that farms that grow and harvest produce should not be regarded as foreign suppliers if the produce is sent to a packing operation that is not part of the farm before the produce is exported. The comments assert that because the packing operation is a separate entity from the farm, the activities performed at the

packing operation (such as washing and grading) should be considered manufacturing/processing by another establishment. The comments ask that we revise the definition of foreign supplier as follows:

- Specify that activities with RACs that do not change the RAC into processed food would not constitute further manufacturing/processing that would make an establishment a foreign supplier.
- State that when an entity aggregates a RAC from multiple farms without changing the RAC into processed food, the aggregator and the farm that produced the RAC will both be considered foreign suppliers.

(Response 10) We decline to revise the definition of foreign supplier as requested. In general, though not always, an entity between the farm and the importer that performs an activity that does not change a RAC into processed food would not be the foreign supplier of the RAC because, in most but not all cases, that entity would most likely not be manufacturing/processing the RAC but would only be packing or holding the RAC. For example, a packing operation that is a separate entity from a farm that only washes and grades produce RACs incidental to packing and holding the RACs is not manufacturing/processing the RACs but only packing and holding them.

We also conclude it would not be consistent with FSMA to designate multiple foreign suppliers of the same food, which would result by specifying that both the aggregator in the example and the farm that grew the RAC would be foreign suppliers of that RAC. If an aggregator is merely packing and/or holding RACs, and not performing manufacturing/processing (and no other foreign entity is doing more than de minimis manufacturing/processing of the food before export), then the farm that grew the RAC would be the foreign supplier of the RAC.

(Comment 11) One comment asks that we clarify whether food facilities required to register, such as off-farm packing houses, are foreign suppliers. This comment also asks whether farms that are not required to register and that have on-farm packing operations are foreign suppliers. Noting that RACs often are harvested by a contract harvest company, the comment also asks us to clarify what is meant by "establishment that harvests a food" and whether, in such circumstances, the foreign supplier of the RAC would be the contract harvest company or the establishment that owns the crop and sells it to an importer.

(Response 11) The foreign supplier of a crop that is grown and harvested would either be the establishment that grew the food or, if another foreign entity later manufactured/processed the food (performing an activity of a more than de minimis nature), the foreign supplier would be the last entity in a foreign country that performed such a manufacturing/processing activity. Because, as previously stated, the definition of foreign supplier does not include firms that only pack or hold food, off-farm packing houses that solely pack or hold food would not be foreign suppliers. In such cases, assuming that no other foreign entity manufactures/processes the food (performing an activity of more than a de minimis nature) after it is grown, the farm that grows the food is the foreign supplier. Similarly, provided that no foreign entity manufactures/processes the food (performing an activity of more than a de minimis nature) after it is grown, farms that grow food and also have on-farm packing operations are foreign suppliers of the food they grow because they grew the food.

Our consideration of the comment on contract harvesting, and of comments we received on the definition of “farm” in the rulemaking on preventive controls for human food, has led us to change the definition of foreign supplier as it relates to farming operations and to make other changes to clarify the importer’s responsibilities when multiple entities in its supply chain control different hazards in the same food. The definition of “farm” in the proposed rule on preventive controls for human food referred to an entity “devoted to the growing *and* harvesting of crops, the raising of animals (including seafood), or both” (78 FR 3646 at 3795, January 16, 2013) (emphasis added). However, as discussed in the preamble to the final rule on preventive controls for human food, farming operations can take diverse forms, including those in which multiple growers share ownership of a packinghouse and those in which separate operations grow and harvest a crop (80 FR 55908 at 55926 to 55927, September 17, 2015). Therefore, the definition of farm in § 1.227 (which is included in the definitions applicable to the FSVP regulation under § 1.500 of the final rule) refers to a “primary production farm” as an operation devoted to the “growing of crops, the harvesting of crops, the raising of animals (including seafood), or any combination of these activities.” This change to the definition of farm accommodates business models in

which growing, harvesting, and packing operations—each of which requires the application of controls—are conducted by different business entities.

When we referred, in the FSVP proposed rule, to an establishment that “harvests the food” as being the foreign supplier, we assumed that the grower of a food was also the harvester, and because harvesting followed growing, it was appropriate to refer to the harvesting, rather than growing, of a food in the definition of foreign supplier. However, as noted by the comment and discussed in the previous paragraph, a food is not always grown and harvested by the same establishment. Given the possibility that the growing and harvesting of a food might be conducted by separate entities, we conclude that, for purposes of the definition of “foreign supplier,” it is appropriate to regard the grower of a food, rather than the harvester, as the foreign supplier of the food. Although there are some hazards that must be controlled during harvesting (*e.g.*, worker hygiene, water quality), we believe that most people would regard the farm that grows a crop as the producer of the food rather than the establishment that harvests the crop. Given the potential complexities associated with different harvesting contractual relationships, the grower of a crop may be more easily identifiable than the harvester. In addition, making the grower the foreign supplier facilitates onsite auditing of the supplier because there is a clearly defined physical location for the farm on which the crop is grown, while the entity conducting harvesting might not own or have control over the site at which harvesting occurs (*e.g.*, mobile harvesting operations).

This change in the definition of foreign supplier from the harvester of a food to the grower of the food means that, when food is harvested on a farm by a contract harvest company, even one that takes ownership of the food, the grower of the food would be the foreign supplier (provided that no other foreign entity manufactures/processes the food by performing an activity of more than a de minimis nature).

Although the final rule defines the grower of a food, rather than the harvester, as the foreign supplier, the importer still must obtain assurances that hazards associated with the harvesting and packing of food are being significantly minimized or prevented. Without such assurances, we conclude that an importer could not meet its obligation under section 805(a)(1) of the FD&C Act of verifying that imported food is produced in compliance with

sections 418 and 419, as applicable, and that such food is not adulterated under section 402 or misbranded with respect to allergen labeling under section 403(w). We address this issue further in the discussion of the determination of appropriate supplier verification activities in section III.G.4 of this document.

(Comment 12) One comment asks that we clarify how the definition of foreign supplier compares to the definitions of “grower” and “manufacturer” in the prior notice regulation. The comment asks whether the terms grower and manufacturer, collectively, equate to the term foreign supplier. The comment notes that “grower” is defined in the prior notice regulation (21 CFR part 1, subpart I) in 21 CFR 1.276(b)(7) as a person who engages in growing and harvesting or collecting crops (including botanicals), raising animals (including fish, which includes seafood), or both; “manufacturer” is defined in § 1.276(b)(9) as the last facility (as defined in § 1.227) that manufactured/processed the food. Under § 1.227, a facility is considered the last facility even if the food undergoes further manufacturing/processing that consists of adding labeling or any similar activity of a de minimis nature.

(Response 12) As previously stated, the final rule defines the foreign supplier of a crop as the grower of the food rather than the harvester. Consequently, with respect to food that is grown, the definition of “foreign supplier” for FSVP purposes differs from the definition of “grower” under § 1.276(b)(7), which includes both growing and harvesting. Regardless, definitions used in the prior notice regulation do not apply to words or phrases in the FSVP regulation, and vice versa.

(Comment 13) One comment asks that the definition of foreign supplier exclude farms that grow non-produce botanical, algal, or fungal RACs. The comment asserts that these products have a complicated supply chain that makes it difficult to identify the farms that grow them, there are no public health reasons to identify these farms, and there are no regulations governing the production of these products.

(Response 13) We decline to adopt a different approach for these particular types of RACs compared to the previously stated approach to defining the foreign supplier of a RAC. Provided these products are being imported for use as food as defined in 201(f) of the FD&C Act, importers of these products are subject to FSVP. However, the FSVP regulation does not require that the importer be the entity to gather

information about the farms. Rather, the regulation allows importers of such RACs to obtain information from other entities in the supply chain for the RAC to meet the importers' FSVP requirements for these products, provided the importer reviews and assesses the information and documents the review and assessment.

(Comment 14) Several comments request that we clarify whether certain activities are "de minimis" activities and therefore would mean the entity performing these activities for a food would not be the foreign supplier of the food. Some comments ask whether waxing, cooling, washing, and repacking are de minimis activities. Some comments maintain that sorting, packing, cooling, and holding of produce by packing houses should be regarded as de minimis activities, as should farm activities such as waxing, sorting, culling, conveying, storing, labeling, packing, packaging, and shipping of RACs.

(Response 14) The foreign supplier is the establishment that manufactures/processes the food, raises the animal, or grows the food that is exported to the United States without further manufacturing/processing except for the addition of labeling or any similar activity of de minimis nature. This means that a foreign supplier is not an entity that merely performs de minimis manufacturing/processing activities, but, importantly, a foreign supplier also is not an entity that only packs or holds a food.

Whether an activity is harvesting, manufacturing/processing, packing, or holding can depend on the circumstances. For example, packing, cooling, and holding performed by an off-farm packing house (that only packs and holds produce and cools the produce incidental to packing and holding) would not make the packing house the foreign supplier, because these activities would not be considered manufacturing/processing but only packing and holding. Waxing, sorting, culling, conveying, storing, packing, and shipping of RACs when conducted on a farm would generally be considered harvesting, packing, or holding. Assuming the farm conducting these activities grows the RACs and no other entity manufactures/processes the food (except de minimis manufacturing/processing) before it enters the United States, the farm would be the foreign supplier.

With regard to the packaging of RACs, packaging is a manufacturing/processing activity but is specifically included within the farm definition. A farm that raises an animal or grows a

crop and performs packaging operations would be the foreign supplier (assuming that no other entity manufactures/processes the food except for de minimis manufacturing/processing).

Concerning the comment's reference to re-packing, re-packing is a packing activity (*i.e.*, the definition of packing includes re-packing), not a manufacturing/processing activity. We regard waxing and cooling RACs, when done by a packing operation for purposes of storage or transport, to be packing activities rather than manufacturing/processing activities.

To help explain FDA's current thinking on the classification of activities as "harvesting," "packing," "holding," or "manufacturing/processing," we will issue a draft guidance for industry on preventive controls for human food. We intend for this guidance, when finalized, to provide sufficient examples of activities within each of these definitions to inform both industry and regulators of those activities we consider to be within those definitions. The draft guidance will be available for public comment in accordance with our regulation on good guidance practices (see 21 CFR 10.115(g)(1)). We will consider comments we receive on the draft guidance in developing the final guidance.

(Comment 15) One comment, noting that coffee beans are extracted from the cherry surrounding the bean by fermentation, washing, and/or drying at a mill, asserts that because these activities are more than de minimis in nature, the mill should be regarded as the foreign supplier of the coffee beans.

(Response 15) We agree that fermentation, washing, and/or drying of raw coffee cherries (or "berries") would constitute manufacturing/processing that is not of a de minimis nature and would make the mill the foreign supplier of the coffee beans (provided no subsequent entity conducted additional manufacturing/processing that is not of a de minimis nature before export to the United States). We note, however, that under § 1.507(a)(1) of the final rule, importers of foods that cannot be consumed without the application of an appropriate control, including RACs like coffee beans, are not subject to the full requirements of the FSVP regulation (see the discussion in section III.H.1 of this document).

(Comment 16) One comment asks that we distinguish "further manufacturing/processing by another establishment" under the proposed definition of foreign supplier from the concept of substantial transformation applied by U.S. Customs and Border Protection (CBP).

(Response 16) The concept of "further manufacturing/processing by another establishment" in the definition of "foreign supplier" under the FSVP regulation and the definition of "substantial transformation" as used by CBP (*i.e.*, the emergence of an article from manufacturing processes as a new and different article, with a distinctive name, character, or use) are used for different purposes and do not necessarily refer to the same processes. Further manufacturing/processing in the context of FSVP involves direct manipulation of a food, but it need not result in a new and different article, as it can include activities such as washing and freezing.

8. Good Compliance Standing With a Foreign Food Safety Authority

We proposed to define "good compliance standing with a foreign food safety authority" as meaning the foreign supplier (1) appears on the current version of a list, issued by the food safety authority of the country in which the foreign supplier is located and which has regulatory oversight of the supplier, of food manufacturers and processors that are in good compliance standing with the food safety authority, or (2) has otherwise been designated by such food safety authority as being in good compliance standing. Under § 1.513 of the final rule (discussed in section III.N of this document), modified FSVP requirements apply, subject to certain conditions and requirements, to importers of certain types of food from foreign suppliers in countries whose food safety systems FDA has officially recognized as comparable or determined to be equivalent to the U.S. system. One of the requirements for eligibility for the modified requirements is that the foreign supplier must be in good compliance standing with the food safety authority of a country with a comparable or equivalent food safety system.

On our own initiative, we revised the definition to reference to "food producers" instead of "food manufacturers and processors" because farms might be included among food producers designated as being in good compliance standing by a foreign food safety authority.

(Comment 17) One comment questions the need for this term in the FSVP regulation given that all U.S. importers of food must ensure the safety of the food they import. The comment maintains that it is unclear whether or to what extent a foreign supplier's inclusion on a list maintained by a foreign food safety authority will

facilitate an importer's access to a foreign-supplied food. The comment also asserts that it is unclear whether any country's food safety authority can be required to develop and maintain such a list and suggests that there will be disparity among countries regarding whether such a list can and will be developed.

(Response 17) The term good compliance standing with a foreign food safety authority is used to describe one of the conditions under which an importer is eligible to import certain types of food under the modified requirements in § 1.513 of the final rule. We conclude it is appropriate to condition the use of these modified requirements on the foreign supplier of the food being in good compliance standing with the food safety authority of a country whose food safety system FDA has officially recognized as comparable or determined to be equivalent to that of the United States. If the foreign supplier is not in good compliance standing, we conclude that the importer would lack adequate assurances that the foreign supplier is producing the food consistent with U.S. requirements. Although foreign authorities will not be required to designate food producers as being in good compliance standing, we believe that it is likely that some authorities will decide to do so.

(Comment 18) One comment suggests that the official registration or approval of an establishment by the relevant competent authority should be considered sufficient to meet the requirement of good compliance standing. The comment asserts that because all food establishments in the European Union (EU) are either registered with, or approved by, the national authorities, the existence of the records of these actions should be taken into account to avoid unnecessary or duplicative work.

(Response 18) We do not agree. We conclude that the fact that a foreign supplier is registered with, or approved to operate by, the food safety authority of the country in which it is located would generally not constitute a designation that the foreign supplier was in good compliance standing with that authority, absent a determination or designation by a food safety authority indicating that the supplier is in good compliance standing within the meaning in § 1.500. We believe it is possible a foreign supplier might maintain its registration or approval to operate even while it is the subject of an ongoing enforcement action due to significant non-compliance. Therefore, a foreign supplier cannot be regarded as

in good compliance standing with a food safety authority unless that authority has affirmatively designated that supplier as being in good compliance standing, either through the supplier's inclusion on a list of such suppliers, a company-specific certification, or some other manner of designation.

9. Harvesting

For clarity and consistency, we are adding a definition of "harvesting" that is consistent with the definition in the preventive controls regulations. Our new definition states that harvesting applies to farms and farm mixed-type facilities and means activities that are traditionally performed on farms for the purpose of removing RACs from the place they were grown or raised and preparing them for use as food. Harvesting is limited to activities performed on RACs on a farm. Harvesting does not include activities that transform a RAC into a processed food as defined in section 201(gg) of the FD&C Act. Examples of harvesting include cutting (or otherwise separating) the edible portion of a RAC from the crop plant and removing or trimming part of the RAC (e.g., foliage, husks, roots or stems). Examples of harvesting also include cooling, field coring, filtering, gathering, hulling, removing stems and husks from, shelling, sifting, threshing, trimming outer leaves of, and washing RACs grown on a farm.

10. Hazard

We proposed to define "hazard" as any biological, chemical (including radiological), or physical agent that is reasonably likely to cause illness or injury in the absence of its control.

On our own initiative, we have deleted "in the absence of its control" from the definition, consistent with a corresponding change to the definition of hazard in the preventive controls regulations, because the aspect of control of a hazard is addressed under the definition of "hazard requiring a control."

(Comment 19) One comment suggests limiting the definition of hazard by referring to an agent that is reasonably likely to cause illness or injury "in the intended species" in the absence of its control.

(Response 19) We do not believe that the suggested change to the definition of hazard is necessary. We note that under § 1.504(c)(3) of the final rule, in determining whether a hazard is a "hazard requiring a control," an importer must consider, among other factors, the intended or reasonably foreseeable use of the food, including

the species for which the food was intended.

11. Hazard Requiring a Control

In the Supplemental Notice, we proposed to adopt the term "significant hazard" and to define it as a known or reasonably foreseeable hazard for which a person knowledgeable about the safe manufacturing, processing, packing, or holding of food would, based on the outcome of a hazard analysis, establish controls to significantly minimize or prevent the hazard in a food and components to manage those controls (such as monitoring, corrections and corrective actions, verification, and records) as appropriate to the food, the facility, and the control.

(Comment 20) Some comments request that we use a term other than "significant hazard" to refer to a known or reasonably foreseeable hazard for which a knowledgeable person would establish a control. One comment maintains that use of the term "significant hazard" could be confusing because the term is used to refer to hazards addressed in a HACCP plan through critical control points. One comment recommends using the definition of "significant hazard" instead of the term itself. Some comments recommend using the term "food safety hazard" because it has no association with HACCP principles. Some comments recommend using the term "hazard requiring control."

(Response 20) To provide more clarity, we agree that the FSVP regulation should use a term other than "significant hazard." We conclude it is appropriate to refer to such a hazard as a "hazard requiring a control." The definition states, in pertinent part, that a "hazard requiring a control" is a known or reasonably foreseeable hazard for which a knowledgeable person would establish one or more "controls or measures" to significantly minimize or prevent the hazard. The definition refers to controls or measures because the FSVP requirements apply to food that is subject to the preventive controls regulations (which require the establishment of preventive "controls"), food that is subject to the produce safety regulation (which refers to safety "measures"), and food that is subject to other FDA regulations (e.g., dietary supplement CGMPs).

(Comment 21) Some comments recommend replacing the reference to "a person knowledgeable about safe manufacturing, processing, packing, or holding food" with "a qualified individual" because a qualified individual will be responsible for conducting a hazard analysis.

(Response 21) Although a qualified individual must conduct a hazard analysis for a food, we decline to make this change to the definition of “hazard requiring a control” because we believe it is appropriate to specify that a person determining whether a known or reasonably foreseeable hazard is one for which one or more controls or measures are needed must be knowledgeable about the safe manufacturing, processing, packing, or holding of food. This is consistent with the revised definition of “hazard requiring a preventive control” in the preventive controls regulations.

(Comment 22) Some comments recommend stating in the definition of “significant hazard” (or its replacement term) that a determination of a significant hazard is based on a hazard analysis that assesses the severity of the illness or injury to humans or animals if the hazard were to occur and the probability that the hazard will occur in the absence of a control, because severity and probability are integral to determining whether a hazard is significant.

(Response 22) We agree with the comments that this additional language is helpful. Consistent with the revised definition of “hazard requiring a preventive control” in the preventive controls regulations, this change is incorporated in the definition of “hazard requiring a control,” which under the final rule means a known or reasonably foreseeable hazard for which a person knowledgeable about the safe manufacturing, processing, packing, or holding of food would, based on the outcome of a hazard analysis (which includes an assessment of the probability that the hazard will occur in the absence of controls or measures and the severity of the illness or injury if the hazard were to occur), establish one or more controls or measures to significantly minimize or prevent the hazard in a food and components to manage those controls or measures (such as monitoring, corrections or corrective actions, verification, and records) as appropriate to the food, the facility, and the nature of the control or measure and its role in the facility’s food safety system.

(Comment 23) Some comments recommend that the definition of significant hazard reflect that components to manage controls should be appropriate not just to the food, the facility, and the control, but also to the intended use of the food.

(Response 23) We do not think this change to the definition of hazard requiring control is necessary because an importer already must consider the

intended or reasonably foreseeable use of a food in evaluating the hazards in the food under § 1.504(c)(3) of the final rule.

12. Holding

On our own initiative, we are adding a definition of “holding” that is consistent with the preventive controls regulations. Our new definition states that holding means storage of food and also includes activities performed incidental to storage of a food (e.g., activities performed for the safe or effective storage of that food, such as fumigating food during storage, and drying/dehydrating RACs when the drying/dehydrating does not create a distinct commodity (such as drying/dehydrating hay or alfalfa)). Holding also includes activities performed as a practical necessity for the distribution of that food (such as blending of the same RAC and breaking down pallets), but does not include activities that transform a RAC into a processed food as defined in section 201(gg) of the FD&C Act. Holding facilities could include warehouses, cold storage facilities, storage silos, grain elevators, and liquid storage tanks.

13. Importer

We proposed to define “importer” as the person in the United States who has purchased an article of food that is being offered for import into the United States. The proposed definition further stated that:

- If the article of food has not been sold to a person in the United States at the time of U.S. entry, the importer is the person in the United States to whom the article has been consigned at the time of entry; and
- If the article of food has not been sold or consigned to a person in the United States at the time of U.S. entry, the importer is the U.S. agent or representative of the foreign owner or consignee at the time of entry.

We proposed this definition of importer based on the statutory definition of importer in section 805(a)(2) of the FD&C Act, which states that the importer is the U.S. owner or consignee of an article of food at the time of entry of the article into the United States, or if at that time there is no U.S. owner or consignee, the importer is the U.S. agent or representative of the foreign owner or consignee.

On our own initiative, we are revising the definition of “importer” to mean the U.S. owner or consignee of an article of food that is being offered for import into the United States. If there is no U.S. owner or consignee at the time of U.S.

entry, the importer is the U.S. agent or representative of the foreign owner or consignee at the time of entry, as confirmed in a signed statement of consent to serve as the importer under the FSVP regulations. We conclude that this revised definition is more consistent with the statutory definition in section 805(a)(2). For the reasons explained in the following paragraphs, we also conclude that this change, along with a new definition we are adding for “U.S. owner or consignee,” better ensures that the FSVP importer is a person who has a financial interest in the food and has knowledge and control over the food’s supply chain. We are defining “U.S. owner or consignee” to mean the person in the United States who, at the time of entry of a food into the United States, either owns the food, has purchased the food, or has agreed in writing to purchase the food.

a. General

(Comment 24) Some comments ask that we either define or clarify the term “purchased.” One comment states that CBP defines the terms owner and purchaser to include any party with a financial interest in a transaction, including, but not limited to, the actual owner of the goods, the actual purchaser of the goods, a buying or selling agent, a person or firm who imports for exhibition at a trade fair, or a person or firm who imports foods for repair or alteration. One comment maintains that in contrast to the proposed rule, the statute does not create different rules for U.S. owners and their consignees regarding their FSVP responsibilities and does not define the importer as the person who purchased an article of food. The comment asserts that because neither the statute nor the proposed rule defines “purchased,” it is unclear who is responsible for ensuring FSVP compliance.

(Response 24) We do not agree that the proposed definition would create different FSVP regulations for U.S. owners and consignees, as the proposed rule contained no requirements that differed on that basis. However, to prevent possible confusion regarding the definition of importer and to align more closely with the statutory text, we have revised the definition of importer to mean the U.S. owner or consignee of an article of food that is being offered for import into the United States. We are further defining “U.S. owner or consignee” as the person in the United States who, at the time of entry of a food into the United States, either owns the food, has purchased the food, or has agreed in writing to purchase the food. Thus, the final rule explicitly refers to

a U.S. “owner” of a food. Because there is a wide range of commercial arrangements between foreign owners and U.S. persons, there may be situations in which ownership of imported food has not transferred from the foreign owner at the time of entry to the United States, but a person in the United States has nevertheless purchased or agreed in writing to purchase the goods. We do not agree it is necessary to define the terms “purchased” or “purchase,” but we understand the terms to mean obtain by paying money or its equivalent.

(Comment 25) Some comments request that we clarify that the FSVP importer of a food is not necessarily the importer of record for the food as defined by CBP. However, some comments suggest that instead of creating a new definition of importer, we should adopt a definition that parallels CBP’s definition of importer of record. The comments note that under 19 U.S.C. 1484(2)(B), an “importer of record” is defined as the owner or purchaser of the merchandise or, when appropriately designated by the owner, purchaser, or consignee of the merchandise, a person holding a valid customs broker license. The comments maintain that this definition of importer of record is substantially similar to the statutory definition of importer under FSMA. (The comments also note that CBP regulations (19 CFR 101.1) define “importer” as the person primarily liable for the payment of any duties on the merchandise or an authorized agent.) The comments maintain that CBP’s definition of importer has been effective in ensuring proper enforcement of collection of customs duties and provides certainty by defining a single party responsible for entry of a product.

(Response 25) We do not agree that it is appropriate to define “importer” for FSVP purposes to match CBP’s definition of “importer” or “importer of record.” As we stated in the preamble to the proposed rule, the importer of a food for FSVP purposes might be, but would not necessarily be, the importer of record of the food under CBP provisions (*i.e.*, the individual or firm responsible for making entry and payment of import duties). We conclude that, in section 805(a)(2) of the FD&C Act, Congress adopted a definition of importer that suits the purposes of the FSVP regulation because:

- It clearly specifies the person who will be responsible for ensuring that supplier verification activities are conducted for each food imported into the United States; and

- By specifying the U.S. owner or consignee, the definition helps to ensure that the person responsible for meeting the FSVP requirements has a financial interest in the food and has knowledge and control over the food’s supply chain.

The “U.S. owner or consignee” of a food, as we have defined the term, is more likely to have knowledge of food safety practices and control over the supply chain of an imported food than a customs broker, who often is the importer of record of a food for CBP purposes. Although the CBP definition of importer may be effective in ensuring collection of customs duties and otherwise meeting CBP requirements, that is not the purpose of the FSVP regulation. Consequently, the final rule adopts a definition of importer that best serves the purposes of the FSVP requirements, consistent with the statutory provisions the FSVP regulation must implement.

(Comment 26) Some comments maintain that the importer should be the person who has a direct financial interest in the imported food or, alternatively, the last known exporter. The comments assert that the only parties who can ensure the safety of the food supply chain are entities who are directly and financially involved in the manufacture, growth, sale, receipt, or purchase of the imported food.

(Response 26) As previously stated, the definition of importer is intended in part to ensure that someone with a financial interest in the imported food, as well as knowledge and control over the food’s supply chain, is responsible for meeting the FSVP requirements. In most cases, this will be the U.S. owner or consignee of the food. However, under section 805(a)(2) of the FD&C Act and § 1.500 of the final rule, the importer for FSVP purposes could not be the exporter in the foreign country in which the food was produced. If there is no U.S. owner or consignee of a food at the time of the food’s entry into the United States, the foreign owner or consignee of the food must have validly designated a U.S. agent or representative (in accordance with § 1.509(b) of the final rule) to serve as the U.S. importer of the food for purposes of FSVP compliance. We do not agree that the last known exporter is an appropriate person to serve as the FSVP “importer” because such a person exports—as opposed to imports—the food.

(Comment 27) One comment states that retailers may contract with foreign manufacturers to produce private label products bearing the retailer’s name and purchase the products from a U.S. firm after the products have entered the

United States. The comment asks us to clarify that in this situation, the retailer would not be the importer of the food for FSVP purposes.

(Response 27) We agree that provided a U.S. entity other than the retailer owns the food, has purchased the food, or has agreed in writing to purchase the food at the time of entry (*i.e.*, is the “U.S. owner or consignee”), the retailer would not be the FSVP importer of the food. In this situation, the importer is the U.S. firm that owns the product, has purchased the product, or has agreed in writing to purchase the product when it is offered for import into the United States and the entry documentation is submitted or presented. It would not be relevant that the retailer was the entity that entered into a contract with the foreign manufacturer (as long as the retailer is not the person in the United States that owns the food, has purchased the food, or has agreed in writing to purchase the food at the time of entry). If, on the other hand, the retailer owns the food, has purchased the food, or has agreed in writing to purchase the food at the time of entry (and thus is the U.S. owner or consignee), the retailer would be the FSVP “importer.”

(Comment 28) One comment asks that we clarify that a restaurant owner is not an “importer” for FSVP purposes unless it directly imports a food for its use and chooses to accept the responsibilities of the importer. The comment asserts that failing to do this would place an added burden on restaurant owners and operators who will have to make clear to their suppliers of foreign materials that the suppliers are responsible for compliance with FSVP requirements. The comment maintains that adoption of the FSVP regulation might result in a loss of U.S. importers of foreign products due to their unwillingness to assume responsibility for FSVP compliance.

(Response 28) A restaurant located in the United States must comply with the FSVP requirements only if it meets the definition of importer under § 1.500 (*e.g.*, because it is the “U.S. owner or consignee” of the food at the time of entry or, if there is no U.S. owner or consignee at the time of entry, the foreign owner or consignee designates the restaurant as a U.S. agent or representative for purposes of serving as the FSVP “importer”). If the restaurant purchases the food from another U.S. entity, the restaurant would not meet that definition and would not be responsible for meeting the FSVP requirements. However, we have added flexibility in the final rule to allow importers, including restaurants, to

meet their FSVP obligations by relying on analyses, evaluations, and activities performed by certain other entities, provided those importers review and assess the corresponding documentation (see sections III.E.5, III.F.4, and III.G.4 of this document).

(Comment 29) One comment asks that we define the phrase “time of U.S. entry” as used in the proposed definition of importer.

(Response 29) Section 805(a)(2)(A) of the FD&C Act provides that for purposes of the FSVP regulation, the term “importer” means the United States owner or consignee of the article of food “at the time of entry of such article into the United States.” The meaning of the phrase “at the time of entry of such article into the United States” is ambiguous. It could mean that the importer is the U.S. owner or consignee at the time of submission of an entry or at the time that the article of food physically enters U.S. territory. Given it might not always be clear when an imported item physically enters U.S. territory, we conclude that Congress intended that the importer be the U.S. owner or consignee at the time of submission of entry documents. Therefore, “time of U.S. entry,” as used in § 1.500, is the time when an import entry is submitted to CBP either electronically or in paper form. Because we believe that entities engaged in the import of food into the United States will understand this term, we do not think it is necessary to include a definition for “time of entry” in these regulations.

(Comment 30) One comment expresses concern that the proposed definition of importer will create a new layer of middlemen who would assume ownership of food at the time of entry into the United States and charge fees for ensuring compliance with the FSVP requirements. The comment contends this might result in duplicative foreign supplier verifications.

(Response 30) We do not agree. We believe it is unlikely that many entities currently not food importers will enter the food importing business because of the need to adopt and implement the procedures required under the FSVP regulation. Some importers may choose to hire employees or outside consultants to assist them in meeting the FSVP requirements, but this would not need to involve third parties assuming ownership of imported food or otherwise serving in an importer role solely for the purpose of providing supplier verification services. Even if new, FSVP-oriented businesses are created to conduct supplier verification activities on behalf of some importers,

we do not see how this would result in duplicative supplier verification. Regardless, the definition of “importer” is consistent with the definition established by Congress in section 805(a)(2) of the FD&C Act.

(Comment 31) Some comments request that we define the term “consignee” because it might be confused with a similar term used by CBP. In addition, some comments suggest that the term “consignee” be restricted to persons with a direct ownership interest in the product.

(Response 31) We agree with the comments to the extent they are premised on a claim that the proposed rule did not clarify the meaning of “consignee.” Instead of defining the term “consignee,” however, we have revised the definition of “importer” so the FSVP importer is not, first, a U.S. owner, and, second, a U.S. consignee. There is no separate “consignee” category of persons who meet the definition of “importer.” Instead, under the revised definition, the “importer” is the “U.S. owner or consignee” of an article of food that is being offered for import into the United States. If there is no U.S. owner or consignee at the time of U.S. entry, the importer is the U.S. agent or representative of the foreign owner or consignee at the time of entry, as confirmed in a signed statement of consent to serve as the importer under the FSVP regulation.

At the same time, we are defining “U.S. owner or consignee” to mean the person in the United States who, at the time of entry of a food into the United States, either owns the food, has purchased the food, or has agreed in writing to purchase the food. Under the previously proposed definition of “importer,” the “consignee” category could have caused proprietors of the U.S. premises to which imported food is to be delivered to be designated as FSVP “importers,” even when such proprietors have no connection to the imported food other than the physical receipt—even temporary receipt—of the food. Under section 805(a)(2)(B) of the FD&C Act, Congress provided that when there is no U.S. owner or consignee, the FSVP importer should be the U.S. agent or representative of a foreign owner or consignee at the time of entry into the United States. If the consignee for purposes of FSVP included the proprietor of the U.S. premises to which the merchandise is to be delivered, we believe it would be unlikely an FSVP importer would ever be the U.S. agent or representative of a foreign owner or consignee, as contemplated by section 805(a)(2)(B), because the role of FSVP importer would fall to the proprietor of

the premises before it would fall to the U.S. agent or representative. Moreover, we believe that a U.S. agent or representative of a foreign owner or consignee is more likely to have knowledge and control over the product’s supply chain, and is therefore more likely to be able to perform supplier verification activities, than the proprietor of the U.S. premises to which the merchandise is delivered (in cases where the proprietor of the U.S. premises has no connection to the food other than physical receipt).

The effect of our change to the definition of “importer,” in conjunction with the new definition of “U.S. owner or consignee,” likely will result in different entities serving as the FSVP importer in some circumstances than those who might have served as the importer under the proposed definition. For instance, in the case of a Canadian company that ships a food product to a Montana warehouse and for which delivery is made to the Montana facility in anticipation of possible orders from customers in the United States, it is possible, under the proposed rule, that the warehouse would have been the FSVP “importer” because the food might be considered to be consigned to the warehouse at the time of entry and no one in the United States at the time of entry either owned or had purchased the food. Under the final rule, however, the warehouse would not necessarily be the FSVP importer. Because there is no person in the United States at the time of entry who owns the food, purchased the food, or promised to purchase the food, there is no “U.S. owner or consignee.” Therefore, the FSVP “importer” would have to be a properly designated U.S. agent or representative.

As for those comments suggesting that a consignee needs to be a person with a direct ownership in the product, we do not agree. Section 805(a)(2)(A) of the FD&C Act provides that “importer” for purposes of section 805 means the “United States owner or consignee” (emphasis added). Because Congress used the word “or” between “owner” and “consignee,” we believe Congress intended the “United States owner or consignee” to include persons other than owners. Requiring a U.S. owner or consignee to have direct ownership over the product would be inconsistent with that intent. We also understand it is possible for U.S. persons to purchase or agree in writing to purchase food at the time of entry to the United States, even if they do not yet own the products at that time. Requiring a U.S. owner or consignee to have direct ownership in the product at the time of entry would

not account for these types of commercial arrangements.

b. U.S. Agent or Representative

(Comment 32) Several comments maintain that the U.S. agent or representative for FSVP purposes should not necessarily be the same person as the U.S. agent for a foreign food facility under the FDA food facility registration regulation (§ 1.227) and section 415(a) of the FD&C Act. The comments note that while section 805(a)(2) of the FD&C Act describes an agent acting for the foreign owner or consignee of an article of imported food at the time of entry, section 415(a) describes an agent acting for a food facility. The comments assert that Congress did not require that the U.S. agent for a foreign food facility also act as the U.S. agent for FSVP purposes, and many persons who serve as U.S. agents for facility registration purposes might not have the knowledge or ability to meet the FSVP requirements. The comments request that the FSVP regulation clarify this distinction by referring to the “U.S. FSVP agent or representative.”

(Response 32) FDA agrees in part and disagrees in part. Section 805(a)(2)(B) provides that when there is no U.S. owner or consignee with respect to an article of food, the term “importer” for FSVP means “the *United States agent* or representative of a foreign owner or consignee of the article of food at the time of entry of such article into the United States” (emphasis added). Section 805 does not further define the term “United States agent.” In addition, section 415(a)(1)(B) of the FD&C Act provides that foreign food facilities must submit the name of the “United States agent” for the facility as part of the facility’s registration under that section. FDA’s regulation implementing the food facility registration requirements in section 415 of the FD&C Act specifies that the registration for foreign facilities must include the name of the U.S. agent for the facility (21 CFR 1.232(d)). The facility registration regulation also defines the term U.S. agent to mean a person (as defined in section 201(e) of the FD&C Act) residing or maintaining a place of business in the United States whom a foreign facility designates as its agent for purposes of food facility registration (§ 1.227). The regulation further specifies that the U.S. agent “acts as a communications link between FDA and the foreign facility for both emergency and routine communications”.

Although Congress used the term “United States agent” in both section 805(a)(2)(B) and section 415(a)(1)(B) of

the FD&C Act, we do not interpret the use of the term “United States agent” in section 805(a)(2)(B) to mean the U.S. agent for a foreign facility under section 415(a)(1)(B). U.S. agents that foreign food facilities must designate for purposes of food facility registration perform a very different role than the “United States agent” that a foreign owner or consignee may designate under section 805(a)(2)(B) of the FD&C Act to serve as the “importer” for purposes of the FSVP regulations. For food facility registration, the “U.S. agent” acts as a communications link. For FSVP, however, an importer (whether a “United States agent” or otherwise) is responsible for the full breadth of supplier verification activities required under the FSVP regulation. These activities involve ensuring the safety of imported food, which is qualitatively different from serving as a communications link. Thus, we agree with the comments that urge us to not interpret the use of the term “United States agent” under section 805(a)(2)(B) to have the same meaning as the U.S. agent that food facilities are required to designate under section 415(a)(1)(B) and FDA’s food facility registration regulation.

We note, however, that this interpretation does not prohibit a foreign owner or consignee from designating a person who serves as a U.S. agent under the food facility regulation as the “importer” for purposes of FSVP. To the contrary, under the definition of “importer” in § 1.500, in cases in which there is no U.S. owner or consignee, it is up to the foreign owner or consignee to determine which U.S. agent or other U.S. representative will serve as the FSVP “importer.” Whomever the foreign owner or consignee designates also may be listed as a foreign facility’s U.S. agent for food facility registration purposes. We decline to adopt the term “U.S. FSVP agent or representative” because doing so is not necessary to prevent the kind of inadvertent or otherwise improper designation of FSVP importers contemplated by the comments.

(Comment 33) Some comments ask that we revise the definition of importer to specify that a person acting as a U.S. agent or representative of a foreign owner or consignee must knowingly and explicitly consent to serve as the U.S. agent or representative.

(Response 33) For cases in which a food has not been sold or consigned to a person in the United States at the time of entry, we proposed to require that, before an article of food is imported or offered for import into the United States, the foreign owner or consignee of

the article must designate a U.S. agent or representative as the importer of the food for the purposes of the definition of “importer.” The final rule retains this requirement. Because we agree a U.S. agent or representative cannot truly function as the FSVP importer without having consented to do so, we are adding a clarification to the definition of “importer” explaining that in order for the foreign owner or consignee of the article to validly designate a U.S. agent or representative (when there is no U.S. owner or consignee) for purposes of the definition of “importer,” the U.S. agent or representative’s role must be confirmed in a signed statement of consent. The signed statement of consent must confirm that the U.S. agent or representative agrees to serve as the importer under the FSVP regulation. Because a signed statement is an explicit acknowledgment of consent, we conclude that a signed statement is an effective way of ensuring the consent of U.S. agents and representatives. In addition, we will be able to inspect the signed statements, should the need arise, allowing us to verify the accuracy of “importer” designations under the FSVP regulation. Being able to verify the accuracy of such designations will allow us to more efficiently and effectively monitor compliance with, and enforce, section 805 of the FD&C Act.

(Comment 34) Several comments express concern about the manner in which a foreign owner or consignee would designate its U.S. agent or representative. The comments state that a foreign supplier might designate a party in the United States, such as the warehouse where the imported food will be stored, without seeking an affirmative acceptance from that party, or the foreign supplier of the food might assume the agent listed on its facility registration is also the U.S. agent for FSVP purposes. Some comments note concerns regarding the process for verification of U.S. agents of foreign facilities, including the absence of a requirement to obtain formal consent from a person to serve as the agent and FDA’s failure to obtain confirmation of consent. Several comments suggest that, because the U.S. agent’s responsibilities as the importer of a food under the FSVP regulation will be substantial, the regulation should require affirmative written acceptance by the designated firm for valid designation of a foreign owner or consignee’s U.S. agent or representative.

(Response 34) We agree that a person should not be required to serve as the U.S. agent or representative of a foreign owner or consignee unless the person has agreed to serve in this capacity. As

explained in Response 33, we therefore are adding a clarification to the definition of “importer” stating that when the foreign owner or consignee of the article must designate a U.S. agent or representative (when there is no U.S. owner or consignee) for the purposes of the definition of “importer,” the U.S. agent or representative’s role should be confirmed in a signed statement of consent. The signed statement of consent must confirm that the U.S. agent or representative agrees to serve as the importer under the FSVP regulation. In accordance with these changes, we also have revised the provisions regarding refusal of admission in proposed § 1.514(a) to specify that if there is no U.S. owner or consignee at the time an article of food is offered for entry into the United States, the article of food may not be imported into the United States unless the foreign owner or consignee has appropriately designated a U.S. agent or representative as the importer in accordance with § 1.500.

(Comment 35) One comment states that the requirement for foreign producers to obtain a U.S. agent in order for their product to be imported into the United States could be considered a technical barrier to trade according to the World Trade Organization (WTO).
