Brucellosis and Bovine Tuberculosis; Update of General Provisions

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule; extension of comment period.

SUMMARY: We are extending the comment period for our proposed rule that would consolidate the domestic regulations governing bovine tuberculosis and those governing brucellosis and revise the bovine tuberculosis- and brucellosis-related import requirements for cattle and bison

to make these requirements clearer and assure that they more effectively mitigate the risk of introduction of these diseases into the United States. This action will allow interested persons additional time to prepare and submit comments.

DATES: The comment period for the proposed rule published on December 16, 2015 (80 FR 78462) is extended. We will consider all comments that we receive on or before May 16, 2016.

ADDRESSES: You may submit comments by either of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov/#!docketDetail;D=APHIS-2011-0044>.

- *Postal Mail/Commercial Delivery:* Send your comment to Docket No. APHIS–2011–0044, Regulatory Analysis and Development, PPD, APHIS, Station 3A–03.8, 4700 River Road Unit 118, Riverdale, MD 20737–1238.

Airworthiness Directives; Continental Motors, Inc. Reciprocating Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: We propose to adopt a new airworthiness directive (AD) for certain Continental Motors, Inc. (CMI) TSIO–550–K, TSIOF–550–K, TSIO–550–C, TSIOF–550–D, and TSIO–550–N reciprocating engines. This proposed AD was prompted by a report of an uncommanded in-flight shutdown (IFSD) resulting in injuries and significant airplane damage. This proposed AD would require replacing the oil cooler cross fitting assembly. We are proposing this AD to prevent failure of the oil cooler cross fitting and engine, IFSD and loss of the airplane.

DATES: We must receive comments on this proposed AD by May 10, 2016.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <http://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* 202–493–2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE., Washington, DC 20590.

- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For service information identified in this AD contact Continental Motors, Inc., 2039 Broad Street, Mobile, Alabama 36615; phone: 800–326–0089; Internet: <http://www.continentalmotors.aero>. You may view this service information at the FAA, Engine & Propeller Directorate, 1200 District Avenue, Burlington, MA. For information on the availability of this material at the FAA, call 781–238–7125.

Examining the AD Docket

You may examine the AD docket on the Internet at <http://www.regulations.gov> by searching for and locating Docket No. FAA–2016–0069; or in person at the Docket Management Facility between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this proposed AD, the regulatory evaluation, any comments received, and other information. The street address for the Docket Office (phone: 800–647–5527) is in the **ADDRESSES** section. Comments will be available in the AD docket shortly after receipt.

SUPPLEMENTARY INFORMATION:

Comments Invited

We invite you to send any written relevant data, views, or arguments about this NPRM. Send your comments to an address listed under the **ADDRESSES** section. Include “Docket No. FAA–2016–0069; Directorate Identifier 2016–NE–01–AD” at the beginning of your comments. We specifically invite comments on the overall regulatory, economic, environmental, and energy aspects of this NPRM. We will consider all comments received by the closing date and may amend this NPRM because of those comments.

We will post all comments we receive, without change, to <http://www.regulations.gov>, including any personal information you provide. We will also post a report summarizing each substantive verbal contact we receive about this NPRM.

Discussion

A Cirrus SR–22T crashed on November 3, 2015 due to an

uncommanded IFSD. The crash caused four minor personal injuries and substantial airplane damage. The root cause of the engine IFSD was the loss of engine oil through the fatigue-induced fracture of an oil cooler cross fitting nipple. This condition, if not corrected, could result in failure of the oil cooler cross fitting and engine, IFSD, and loss of the airplane.

Relevant Service Information Under 14 CFR Part 51

We reviewed CMI Critical Service Bulletin (CSB) No. CSB15–2C, dated November 9, 2015 and CMI CSB No. CSB15–7A, dated November 10, 2015. The CSBs describe detailed procedures for replacing oil cooler cross fittings, nipples, and bushings with a redesigned oil cooler cross fitting. This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section of this document.

FAA’s Determination

We are proposing this NPRM because we evaluated all the relevant information and determined the unsafe condition described previously is likely to exist or develop in other products of the same type design.

Proposed AD Requirements

This NPRM would require accomplishing the actions specified in the service information described previously, except as discussed under “Differences Between this Proposed AD and the Service Information.”

Differences Between This Proposed AD and the Service Information

CMI CSB No. CSB15–7A, dated November 10, 2015 requires replacing the oil cooler cross fitting, nipple, and bushing prior to further flight. CMI CSB No. CSB15–2C, dated November 9, 2015 requires replacing the oil cooler cross fitting, nipple, and bushing within 25 hours of engine operation or at the next scheduled inspection or engine service, whichever occurs first. This proposed AD requires replacing the fitting at the next engine maintenance event not to exceed 12 months or 100 flight hours after the effective date of this AD, whichever occurs first.

Costs of Compliance

We estimate that this proposed AD affects 1,307 engines installed on airplanes of U.S. registry. We also estimate that it will take about 1 hour per engine to comply with this proposed AD. The average labor rate is \$85 per
