

independent of the Phase 3 modeling and analysis. This enabled the Coast Guard to improve its understanding of vessel routes, beyond the understanding gleaned through generic heat maps. Based on comments by the shipping industry and more recent literature on addressing shipping during marine spatial planning, the WG conducted additional research into the necessary sea space for vessels to maneuver in compliance with the International Regulations for Preventing Collisions at Sea. This research led to the development of recommended marine planning guidelines. In addition, an effort focused on determining the appropriate width of a navigation route was undertaken for alongshore towing operations. These efforts enabled the WG to identify navigation safety corridors along the Atlantic Coast that combine the width necessary for navigation and additional buffer areas based on the planning guidelines. The WG has also identified deep draft routes that it recommends be given priority consideration to navigation over other uses, to comply with the United Nations Convention of the Law of the Sea. The final report will be available on the **Federal Register** docket and also on the ACPARS Web site at www.uscg.mil/lantarea/acpars.

This notice is issued under authority of 33 U.S.C. 1223(c) and 5 U.S.C. 552.

Dated: February 24, 2016.

Vice Admiral, U.S. Coast Guard, Commander, Atlantic Area.

SUPPLEMENTARY INFORMATION:

I. Background

On September 11, 2015, NASA published a final rule in the **Federal Register** (80 FR 54701) titled, Uniform Administrative Requirements, Cost Principles and Audit Requirements for Federal Awards, to establish policies and procedures for grants and cooperative agreements awarded by NASA. The policies and procedures that recipients must follow are those appearing in subparts A through F of 2 Code of Federal Regulations (CFR) part 200 and as supplemented by 2 CFR part 1800. Additionally, in December 2014, NASA issued a non-regulatory policy and procedure manual titled, *NASA Grant and Cooperative Agreement Manual*. These two documents replaced the NASA Grant and Cooperative Agreement Handbook and are available at https://answers.nssc.nasa.gov/app/answers/detail/a_id/6487.

II. Discussion

NASA is proposing to remove references to grant and cooperative agreement policy and guidance from the NASA FAR Supplement, which supplements the FAR, because they do not pertain to the procurement of goods and services. The FAR only contains guidance on contracts and no other funding agreements such as grants and cooperative agreements. Consistent with Executive Order (E.O.) 13563, Improving Regulations and Regulatory Review, NASA reviewed the NFS and is proposing to remove references to the NASA Grant and Cooperative Agreement Handbook and Office of Management and Budget (OMB) Circulars A-21 for educational institutions and A-122 for nonprofit organizations located at NFS 1815.602 and in NFS 1852.235-72. Circulars A-21 and A-122 were rescinded and no longer applicable for new awards after December 26, 2014. Both of these OMB circulars were replaced by 2 CFR part 200.

III. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health, and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is not a significant regulatory action and, therefore, was not subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

IV. Regulatory Flexibility Act

NASA does not expect this proposed rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.*, because it merely removes outdated and unnecessary grant and cooperative agreement references that should not be in the NFS. Therefore, an initial regulatory flexibility analysis has not been performed. NASA invites comments from small business concerns and other interested parties on the expected impact of this proposed rule on small entities.

NASA will also consider comments from small entities concerning the

existing regulations in subparts affected by this rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (NFS case 2016–N001) in correspondence.

V. Paperwork Reduction Act

The rule does not contain any information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35).
