

**Additional Background on Assessment**

Cyber threats have evolved and increased exponentially with greater sophistication. Cyber attacks on financial institutions may not only result in access to, and the compromise of, confidential information, but also the destruction of critical data and systems. Disruption, degradation, or unauthorized alteration of information and systems can affect an institution's operations and core processes and undermine confidence in the nation's financial services sector.

The Agencies, under the auspices of the FFIEC, developed the Assessment to assist financial institutions of all sizes in assessing their inherent cyber risks and their cybersecurity preparedness. The Assessment is intended to allow a financial institution to identify its inherent cyber risk profile based on the financial institution's technologies and connection types, delivery channels, online/mobile products and technology services it offers, organizational characteristics, and current threats. Once an institution identifies its inherent cyber risk profile, it will then determine its cybersecurity maturity levels based on the institution's cyber risk management and oversight, threat intelligence and collaboration, cybersecurity controls, external dependency management, and cyber incident management and resilience. A financial institution can use the Assessment to identify opportunities for improving the institution's cybersecurity preparedness. Use of the Assessment by financial institutions is not mandatory. Additional information on the Assessment and supporting materials are available on the FFIEC's Web site at <http://www.ffiec.gov/cyberassessmenttool.htm>.
