#### SUPPLEMENTARY INFORMATION:

##### I. Information About IRIS

EPA's IRIS Program is a human health assessment program that evaluates quantitative and qualitative risk information on effects that may result from exposure to chemicals found in the environment. Through the IRIS Program, EPA provides the highest quality science-based human health assessments to support the Agency's regulatory activities and decisions to protect public health. The IRIS database contains information on chemicals that can be used to support the first two steps (hazard identification and dose-response evaluation) of the human health risk assessment process. When supported by available data, IRIS provides health effects information and toxicity values for health effects (including cancer and effects other than cancer). Government and others combine IRIS toxicity values with exposure information to characterize public health risks of chemicals; this information is then used to support risk management decisions designed to protect public health.

##### II. Information on the IRIS Program General Comments Docket

EPA created the IRIS Program General Comments Docket in 2014, based in part on stakeholder's requests, to allow the public to submit comments that have broad applicability to the IRIS Program. Commenters are asked to identify themselves and provide contact information to promote an open

dialogue on issues. Examples of the types of comments appropriate for this docket include comments on general scientific issues that apply to all assessments as well as other general comments (not chemical-specific) about the IRIS Program. By having a docket for general comments, stakeholders will no longer have to submit the same general comment to individual chemical dockets that are established for each IRIS assessment.

##### III. Future Notifications on the Availability of Draft IRIS Assessments for Public Comment

In order to provide information to stakeholders in a timely and efficient manner, the IRIS Program has considered methods of more effectively communicating information to the public. As a result of these efforts, EPA will now announce public comment periods, docket numbers, and information on the availability of draft IRIS assessments, solely on the IRIS Web site (<http://www.epa.gov/iris>). EPA will no longer announce the availability of draft IRIS assessments for public comment in the **Federal Register**. This change only applies to assessments released by the IRIS Program for comment and discussion at future IRIS public science meetings and does not apply to external peer review draft IRIS assessments managed by EPA's Science Advisory Board (SAB) Staff Office. For more information on the IRIS Program, including registering for the Human Health Risk Assessment (HHRA) and IRIS Bulletin listservs, visit the IRIS Web site: <http://www.epa.gov/iris>.
