

The firm's Method 1 score is the sum of its weighted systemic indicator scores. The GSIB surcharge for the firm is then the higher of the GSIB surcharge determined under Method 1 and a second method that weights size, interconnectedness, cross-jurisdictional activity, complexity, and reliance on wholesale funding (instead of substitutability).<sup>2</sup>

The aggregate global indicator amounts used in the score calculation

under Method 1 are based on data collected by the Basel Committee on Banking Supervision (BCBS). The BCBS amounts are determined based on the sum of the systemic indicator scores of the 75 largest U.S. and foreign banking organizations as measured by the BCBS, and any other banking organization that the BCBS includes in its sample total for that year. The BCBS publicly releases these values in euros each year. To account for changes in currency values,

the GSIB surcharge rule indicates that the Board will publish the aggregate global indicator amounts each year in U.S. dollars.<sup>3</sup>

The aggregate global indicator amounts for purposes of the Method 1 score calculation under the GSIB surcharge rule for 2015, which were calculated as part of the end-2014 GSIB assessment, are:
