Abstract: As required by the Clean Air Act, EPA has regulations establishing emission standards and other requirements for various classes of vehicles, engines, and evaporative emissions. These regulations require that compliance be demonstrated prior to EPA granting a "Certificate of Conformity". EPA charges fees for administering this certification program. In 2004 the fees program was expanded to include non-road categories of vehicles and engines, such as several categories of marine engines, locomotives, non-road recreational vehicles, and many non-road compression-ignition and spark-ignition engines. Manufacturers and importers of covered vehicles, engines and components are required to pay the applicable certification fees prior to their certification applications being reviewed. Under section 208 of the Clean Air Act (42 U.S.C. 7542(c)) all information, other than trade secret processes or methods, must be publicly available. Information about fee payments is treated as confidential information prior to certification.

Form Numbers: EPA Forms 3520-29.

Respondents/affected entities: Manufacturers or importers of passenger cars, motorcycles, light trucks, heavy duty truck engines, non-road vehicles or engines, and evaporative emissions components required to receive a certificate of conformity from EPA prior to selling or introducing these products into commerce in the U.S.

Respondent's obligation to respond: Required to obtain or retain a benefit (40 CFR part 1027). Estimated number of respondents: 597.

Frequency of response: Yearly and occasionally.

Total estimated burden: 927 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$59,683 (per year), which includes \$9,965 annualized capital or operation & maintenance costs.

Changes in Estimates: There is a decrease of 586 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is an adjustment of the estimate due to the decrease in the number of fee forms received from manufacturers and, more significantly, the decrease in labor due to the institution of an all-electric payment system which eliminates the need to print and fill forms by hand, resulting in a significant decrease in labor hours.

Dated: March 29, 2016.

Director, Compliance Division, Office of Transportation and Air Quality, Office of Air and Radiation.
