backstop requirement as a result of a failure to complete the accelerated rulemaking in accordance with the statute, the requirement to collect and model data for the applicable type of lamp shall continue for two years after the compliance date of the backstop requirement. (42 U.S.C. 6295(l)(4)(I)(i) and (ii))

C. Three-Way Incandescent Lamps

For 3-way incandescent lamps, the exponential growth forecast projected the benchmark unit sales estimate for 2015 to be 48,603,000 units. The NEMA-provided shipment data reported shipments of 32,665,000 units in 2015. As this finding is only 67.2 percent of the estimate, DOE will continue to track 3-way incandescent lamp sales data and will not initiate regulatory action for this lamp type at this time.

D. 2,601–3,300 Lumen General Service Incandescent Lamps

For 2,601–3,300 lumen general service incandescent lamps, the exponential growth forecast projected the benchmark unit sales estimate for 2015 to be 34,175,000 units. The NEMA-provided shipment data reported shipments of 4,049,000 units in 2015. As this finding is only 11.8 percent of the estimate, DOE will continue to track 2,601–3,300 lumen general service incandescent lamp sales data and will not initiate regulatory action for this lamp type at this time.

E. Shatter-Resistant Lamps

For shatter-resistant lamps, the exponential growth forecast projected the benchmark unit sales estimate for 2015 to be 1,675,000 units. The NEMA-provided shipment data reported shipments of 689,000 units in 2015. As this finding is only 41.1 percent of the estimate, DOE will continue to track shatter-resistant lamp sales data and will not initiate regulatory action for this lamp type at this time.

V. Conclusion

The shipments for rough service lamps, 3-way incandescent lamps, 2,601–3,300 lumen general service incandescent lamps, and shatter-resistant lamps did not cross the statutory threshold for a standard. DOE will continue to monitor these four currently exempted lamp types and will assess 2016 sales by March 31, 2017, in order to determine whether an energy conservation standards rulemaking is required, consistent with 42 U.S.C. 6295(l)(4)(D) through (H). The actual unit sales for vibration service lamps are 272,5 of the benchmark unit sales estimate. Therefore, DOE will begin an accelerated energy conservation standard rulemaking for vibration service lamps that must be completed by December 31, 2016.

VI. Review Under the National Environmental Policy Act of 1969

DOE has determined that this proposed action falls into a class of actions that are categorically excluded from review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 et seq.) and DOE’s implementing regulations at 10 CFR part 1021. Specifically, this proposed action would find that for vibration service lamps energy conservation standards would be appropriate. However, this proposed action would not establish energy conservation standards at this time, and, therefore, would not result in any environmental impacts. Thus, this action is covered by Categorical Exclusion A6 “Procedural rulemakings” under 10 CFR part 1021, subpart D. Accordingly, neither an environmental assessment nor an environmental impact statement is required.

Issued in Washington, DC, on March 28, 2016.

Kathleen B. Hogan,
Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy.
