

registration review docket (EPA-HQ-OPP-2008-0351) at <http://www.regulations.gov>.

Malathion is a non-systemic, wide spectrum OP. It is used in the agricultural production of a wide variety of food/feed crops to control insects such as aphids, leafhoppers, and Japanese beetles. Malathion is also used in USDA's Cotton Boll Weevil Eradication Program, Fruit Fly (Medfly) Control Program, and for mosquito-borne disease control. It is also registered for outdoor residential uses which include vegetable gardens, home orchards, and ornamentals. EPA has completed a draft biological evaluation to assess whether all registered uses of malathion may affect listed species and designated critical habitat. The draft malathion biological evaluation is viewable at: <https://www.epa.gov/endangered-species/biological-evaluation-chapters-malathion>. Comments on the draft biological evaluation for malathion should be submitted to the malathion registration review docket (EPA-HQ-OPP-2009-0317) at <http://www.regulations.gov>.

IV. Public Review and Comment Opportunity

Pursuant to 40 CFR 155.53(c), EPA is providing an opportunity, through this notice of availability, for interested parties to provide comments and input concerning the Agency's draft biological evaluations for chlorpyrifos, diazinon, and malathion. Such comments and input could address, among other things, the Agency's risk assessment methodologies and assumptions, as applied to these draft biological evaluations. The Agency will consider all comments received during the public comment period and make changes, as appropriate, to the draft biological evaluations. EPA will then issue final biological evaluations, explain any changes to the draft biological evaluations, and respond to comments. For those species and designated critical habitats where registered uses of the pesticides are "likely to adversely affect" species and/or habitat, USFWS and NMFS will utilize the analyses and data from the biological evaluations in their final Biological Opinions for each of the three chemicals. The final Biological Opinions for the three chemicals are currently scheduled for December 2017. In the Federal Register notice announcing the availability of the final biological evaluations, if the final biological evaluations indicate risks of concern, the Agency may provide a comment period for the public to submit suggestions for mitigating the risk identified in the final biological

evaluations before developing proposed registration review decisions for chlorpyrifos, diazinon, and malathion.

1. Other related information.

Additional information on endangered species risk assessment and the NAS report recommendations are available at <https://www.epa.gov/endangered-species/implementing-nas-report-recommendations-ecological-risk-assessment-endangered-and>. Information on the Agency's registration review program and its implementing regulation is available at <https://www.epa.gov/pesticide-reevaluation>.

2. Information submission requirements.

Anyone may submit data or information in response to this document. To be considered during a pesticide's registration review, the submitted data or information must meet the following requirements:

- To ensure that EPA will consider data or information submitted, interested persons must submit the data or information during the comment period. The Agency may, at its discretion, consider data or information submitted at a later date.

- The data or information submitted must be presented in a legible and useable form. For example, an English translation must accompany any material that is not in English, and a written transcript must accompany any information submitted as an audiographic or videographic record. Written material may be submitted in paper or electronic form.

- Submitters must clearly identify the source of any submitted data or information.

- Submitters may request the Agency to reconsider data or information that the Agency rejected in a previous review. However, submitters must explain why they believe the Agency should reconsider the data or information in the pesticide's registration review.

As provided in 40 CFR 155.58, the registration review docket for each pesticide case will remain publicly accessible through the duration of the registration review process; that is, until all actions required in the final decision on the registration review case have been completed.
