

collected quarterly as documents emailed to the Tracking Program.

There are no costs for the respondents other than their time. The total estimated time burden is 25,320 hours. This estimate includes the time it takes to extract the data from the original data source(s), standardize and format the

data to match the corresponding Tracking Network data form, and submit the data to the Tracking Network. In some cases, the data at the source are centralized and easily extracted. In other cases, like for radon data, the data are not. In those cases, the number of hours for extracting and standardizing

the data is much greater. Four respondents have been added to the 26 SLHDs the program currently funds to account for the data voluntarily received from unfunded SLHDs and to allow for potential program growth over the next three years.
