

the public interest and appraisals of the Federal and non-Federal parcels must show that the exchange parcels are equal in value. The EIS will provide BLM with the information necessary to make these determinations. The BLM has found that the proposed land exchange is appropriate for processing and is in conformance with land tenure decisions in the Kremmling Resource Management Plan.

The purpose of the public scoping process is to determine relevant issues that will influence the scope of the environmental analysis, including alternatives, and guide the process for developing the EIS. At present, the BLM has identified the preliminary issues from internal scoping and public comments received on the Notice of Exchange Proposal released in June 2005. The issues that were raised during the informal scoping process and feasibility analysis include changes to public fishing access, perceived changes to float boating on the Blue River, concerns about changes to public access for hunting, and concerns about large land owners realizing a benefit from the exchange. The BLM will address these preliminary issues, along with the other issues identified during the public scoping process and preparation of the EIS. The BLM will identify, analyze and require mitigation, as appropriate, to address the reasonably foreseeable impacts to resources if this project is approved. Mitigation may include avoidance, minimization, rectification, reduction or elimination over time and compensatory mitigation. These potential measures may be considered at multiple scales, including the landscape-scale.

The BLM will use and coordinate the NEPA scoping process to help fulfill the public involvement process under the National Historic Preservation Act (54 U.S.C. 306108) as provided in 36 CFR 800.2(d)(3). The information about historic and cultural resources within the area potentially affected by the proposed Blue Valley Land Exchange will assist the BLM in identifying and evaluating impacts to such resources.

The BLM will consult with Indian tribes on a government-to-government basis in accordance with Executive Order 13175 and other policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration. Federal, State and local agencies, along with tribes and other stakeholders that may be interested in or affected by the proposed Blue Valley Land Exchange are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM

to participate in the development of the environmental analysis as a cooperating agency.

SUPPLEMENTARY INFORMATION:

I. Background

The Department of Labor, as part of its continuing effort to reduce paperwork and respondent (i.e., employer) burden, conducts a preclearance consultation program to provide the public with an opportunity to comment on proposed and continuing information collection requirements in accord with the Paperwork Reduction Act of 1995 (PRA-95) (44 U.S.C. 3506(c)(2)(A)). This program ensures that information is in the desired format, reporting burden (time and costs) is minimal, collection instruments are clearly understood, and OSHA's estimate of the information collection burden is accurate.
