### SUPPLEMENTARY INFORMATION:

The Pipeline Safety Act codified in 49 U.S.C. 60101, *et seq.*, directs DOT to establish and enforce safety standards for LNG facilities. While there are exceptions, generally an onshore LNG plant is regulated in CFR part 193 if the plant either receives from or delivers natural gas to a pipeline regulated in 49 CFR part 192.

The regulations in Part 193 were first promulgated in the 1970's, when the majority of LNG plants were built by natural gas pipeline operators for "peak shaving" or storage for injection back into natural gas pipelines to meet peak winter demand. Since that time, the LNG industry has made technological, fabrication, material, and material testing advancements. The field of process safety has also evolved.

The abundant natural gas supply in the U.S. and national and international demand for LNG is spurring development of new LNG plants. Large marine export plants are being constructed to export LNG due to the abundance of domestic natural gas. These plants store and transfer much greater quantities of LNG and other heavy hydrocarbons. Smaller LNG plants are being constructed to produce LNG as an alternative fuel to gasoline and diesel. Because LNG is a cleaner,

efficient, and lightweight fuel compared to other fossil fuels, it can substitute for traditional oil-based fuels for trucking, vessels, rail, drilling equipment, decentralized power generation, and process industry. Some new smaller scale LNG applications, such as marine bunkering, seek to locate at or near sites where diesel or other fueling occurs today. These locations may be in close proximity to other existing infrastructure and to an area that is used for outdoor assembly of groups of 50 or more persons—which is currently not allowed within a thermal exclusion zone.

As a new LNG industry is emerging, the existing LNG infrastructure is aging. Failures at new plants can occur due to unforeseen complications of new technology and design and construction issues, while older systems are vulnerable to risks from obsolescence, and aging, equipment and systems. PHMSA is considering updates to Part 193 to reflect advances in technologies, design, construction, materials, material testing, and to address risks associated with new and aging facilities.

The workshop is an opportunity to review and consider incorporating newer editions of the NFPA 59A and other technical standards that allow or require the use of new technologies, materials, and practices to enhance safety, and also to work with stakeholders to resolve issues that may prevent the incorporation of the latest edition of those standards. Part 193 significantly incorporates by reference the 2001 edition of the National Fire Protection Association (NFPA) 59A technical standard. In 2010, PHMSA incorporated by reference a few sections of the 2006 edition of NFPA 59A.

The LNG market is evolving due to the abundance of natural gas, stricter emissions regulations, new technologies, and new applications for the use of LNG. Also, the majority of LNG plants in service today were constructed in the 1970's and that existing regulations may not adequately incorporate risk-based assessments, process safety practices, and technologies that have developed over this time period. Additionally, newer editions of technical standards incorporated by reference in Part 193 have been issued since the last time the regulation was updated.

This workshop is also a forum for PHMSA to collect input regarding challenges operators face locating, designing, fabricating, constructing, replacing, or upgrading facilities due to regulations that may not address these changes or due to the incorporation of older versions of technical standards in

Part 193. PHMSA seeks to gain information on best practices for process safety. PHMSA also seeks input from the public and emergency responders regarding education, awareness, and training about LNG safety. Finally, PHMSA will also describe requirements for transporting LNG in commerce by rail, highway, and waterway, as authorized in Federal Hazardous Materials Regulations Title 49 CFR parts 100–185.

Issued in Washington, DC, on April 20, 2016, under authority delegated in 49 CFR 1.97.

### Office of the Comptroller of the Currency

#### Agency Information Collection Activities: Proposed Information Collection; Comment Request; Reduction of Permanent Capital Notice

**AGENCY:** Office of the Comptroller of the Currency (OCC), Treasury.

**ACTION:** Notice and request for comment.

**SUMMARY:** The OCC, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on a new information collection, as required by the Paperwork Reduction Act of 1995 (PRA).

An agency may not conduct or sponsor, and a respondent is not required to respond to, an information collection unless it displays a currently valid Office of Management and Budget (OMB) control number.

The OCC is soliciting comment concerning a new information collection titled "Reduction of Permanent Capital Notice."

**DATES:** Comments must be received by June 27, 2016.

**ADDRESSES:** Because paper mail in the Washington, DC area and at the OCC is subject to delay, commenters are encouraged to submit comments by email, if possible. Comments may be sent to: Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, Attention: 1557-NEW, 400 7th Street SW., Suite 3E-218, Mail Stop 9W-11, Washington, DC 20219. In addition, comments may be sent by fax to (571) 465-4326, or by electronic mail to [prainfo@occ.treas.gov](mailto:prainfo@occ.treas.gov).

You may inspect and photocopy comments in person at the OCC, 400 7th Street SW., Washington, DC 20219. For security reasons, the OCC requires that visitors make an appointment to inspect comments. You may do so by calling (202) 649-6700 or, for persons who are deaf or hard of hearing, TTY, (202) 649-5597. Upon arrival, visitors will be required to present valid government-issued photo identification and submit to a security screening in order to inspect and photocopy comments.

All comments received, including attachments and other supporting materials, are part of the public record and subject to public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure.

**FOR FURTHER INFORMATION CONTACT:** Shaquita Merritt, OCC Clearance Officer, at (202) 649-5490 or, for persons who are deaf or hard of hearing, TTY, (202) 649-5597, Legislative and Regulatory Activities Division, Office of the Comptroller of the Currency, 400 7th Street SW., Washington, DC 20219.

**SUPPLEMENTARY INFORMATION:** Under the PRA (44 U.S.C. 3501-3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information that they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) to include agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information before submitting the collection to OMB for approval. To comply with this requirement, the OCC is publishing notice of the proposed collection of information set forth in this document.

*Description:* Under 12 CFR 5.55, the OCC will review the information submitted by a Federal saving association in its application or notice requesting approval to issue a capital distribution to determine whether the Federal savings association's request is in accordance with existing statutory and regulatory criteria. In addition, the information provides the OCC with a mechanism for monitoring reductions in capital since these distributions may place the Federal savings association at risk.

*Title of Collection:* Reduction of Permanent Capital Notice.

*OMB Control Number:* 1557-NEW.

*Type of Review:* New collection.

*Affected Public:* Businesses or other for-profit.

*Estimated Number of Respondents:* 2.

*Estimated Frequency of Response:* On occasion.

*Estimated Total Burden:* 40 minutes.

*Comments:* We will summarize the comments that we receive and include them in our request for OMB approval. All comments will become a matter of public record. Comments are solicited on:

(a) Whether the proposed collection of information is necessary for the proper performance of the functions of the OCC;

(b) The accuracy of OCC's estimate of the burden of the proposed information collection;

(c) Ways to enhance the quality, utility, and clarity of the information to be collected;

(d) Ways to minimize the burden of the information collection on respondents, including through the use of information technology.

Dated: April 21, 2016.
